

NEW LITERATURE REVIEW ASSIGNMENT

Use your CFF and Concept Map to write a literature review based on one of the strategies outlined in the handout entitled, “What a Literature Review can do for you.”

Identify which “strategy” of literature review you plan to use at the beginning of your literature review and follow this “strategy” throughout the writing process.

DO NOT simply provide me with a list of articles a short summary.

I will grade these on your ability to synthesize relevant information from the literature as it relates to your research question and I will grade it based on the following criteria:

1. How well do you integrate your concepts as used on your concept map.
2. How well do you discuss all the relevant issues discussed in your CFF.
3. Do you capture the main ideas of the articles/books you discussed in your CFF.
4. Does your concept map look similar to your literature review?
5. Lastly, does your literature review leave the reader with a narrative that is easy to follow or is it disconnected and hard to follow?
