Seminar Description

With 1 billion users worldwide, business leaders recognize that the Internet user base is one of the largest (and growing) economic entities in the world. This one-day EXCEED seminar explores the discipline of Internet marketing, including practices of leading online marketing companies and state of the art online research, and demonstrates how the Internet is creating value for customers and profits for businesses while also fitting into a firm's complete marketing strategy. Effective online marketing utilizes a variety of skills, some closely related to traditional marketing and some that require new abilities and new training. A key goal of this seminar is to provide a strategic and tactical toolkit for the online marketer based on an understanding of how and why the Internet is changing traditional marketing. The participant will begin to develop the skills, strategies and tactics crucial to creating successful Internet marketing plans.

Mr. Nick Chasinov, Managing Director of Teknicks—a leader in providing Search Engine Optimization, Web Design and Web Application services—will share the firm's experiences in assisting companies in applying the concepts considered in the seminar.

Registration Fee: \$495 per participant
