## Rider University's Vision and Mission

### Rider's Vision

Rider University will be a premier, forward-looking university known for its Engaged Learning Program that, together with dynamic academic programs, enriching co-curricular experiences and a vibrant living and learning community, challenges students, excites their imaginations and instills in them excellence in thought and action, preparing them for highly engaged and fulfilling professional and personal lives.

### Rider's Mission

Rider University welcomes students from throughout the region, across the nation, and around the world who seek to be challenged and supported as active members of our inclusive and vibrant living and learning community. Committed to student growth, transformation and leadership, we connect rigorous academic, artistic and professional programs of study with a rich array of learning experiences that engage students inside and outside the classroom. We prepare graduates to thrive professionally and to be lifelong independent learners and responsible citizens who embrace diversity, support the common good, and contribute meaningfully to the changing world in which they live and work.

Our students, alumni, faculty, staff and administrators live the **RIDER PROMISE** by being forever:

**P** - prepared to contribute meaningfully to the changing world in which they live and work

**R** - respectful of all people, rights, freedoms and individual differences

**O** - open to a life of independent learning

**M** - motivated to be responsible citizens who support the common good

**I** - innovative, creative and resourceful

**S** - skilled and thriving professionals, educators, artists and performers

**E** - engaged in their communities as leaders and role models

## Accreditations

Rider University is regionally accredited by the Middle States Commission on Higher Education (<https://www.msche.org>).

The University also holds many specialized accreditations that attest to the quality of its academic programs. Rider is among the select business schools to have attained AACSB International (<https://www.aacsb.edu>) (Association to Advance Collegiate Schools of Business) accreditation. Elementary and secondary education programs and their applicable graduate programs on both campuses are accredited by the National Council for the Accreditation of Teacher Education (<http://www.ncate.org>) (NCATE) and Council for the Accreditation of Educator Preparation (<http://caepnet.org>) (CAEP). The undergraduate and graduate music programs of Westminster Choir College are accredited by the National Association of Schools of Music (<https://nasm.arts-accredit.org>) (NASM). In addition, Rider's graduate counseling services program in the School of Education holds the Council for Accreditation of Counseling and Related Education Programs (<https://www.cacrep.org>) (CACREP) national accreditation, and its school psychology program holds the National Association of School

Psychologists (<https://www.nasponline.org>) (NASP) accreditation. Rider's B.S. Chemistry program is approved by the Professional Training of the American Chemical Society (<https://www.acs.org/content/acs/en/about/governance/committees/training.html>).

Rider University is a member of the National Collegiate Athletic Association (<http://www.ncaa.org>) (NCAA) both men's and women's athletics. The University offers 20 NCAA Division I sports—10 men's and 10 women's. Rider is a member of the Metro Atlantic Athletic Conference (<https://maacsports.com>) (MAAC) for most sports while wrestling competes in the Mid-American Conference (MAC) and field hockey competes in the Northeast Conference (NEC).

## Notice of the Title IX Coordinator

As a community of educators and learners, Rider University is committed to fostering an environment dedicated to learning and mutual respect as reflected in the University's mission, Statement of Community Values, Anti-Harassment and Non-Discrimination Policy and Title IX. All students, faculty, administrators and staff at the University have the right to expect an environment that allows them to enjoy the full benefits of their work or learning experience. The University, therefore, does not condone violations of its Anti-Harassment and Non-Discrimination Policy and treats all allegations about violations very seriously. As outlined in the Anti-Harassment and Non-Discrimination Policy ([www.rider.edu/ahnd](http://www.rider.edu/ahnd)) ([http://www.rider.edu/sites/default/files/docs/anti-harassment-non-discrimination-2015-16\\_v08012016.pdf](http://www.rider.edu/sites/default/files/docs/anti-harassment-non-discrimination-2015-16_v08012016.pdf)), the University prohibits all forms of discrimination, harassment, sexual assault, sexual misconduct, sexual harassment, dating violence, domestic violence and stalking.

Rider University is an Equal Opportunity and Affirmative Action Employer.

No one will be denied employment at, admission to, or the opportunity to participate in educational programs and activities at the University on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law. The University does not discriminate on the basis of any of the aforementioned protected bases in the recruitment and admission of students, the recruitment and employment of faculty, administrators and staff, and the operation of any of its programs and activities.

The Vice President for Human Resources serves as both the Affirmative Action Officer and the Title IX Coordinator for the University, and is the resource available to anyone seeking additional information or wishing to file a complaint related to Affirmative Action and discrimination on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era, qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law.

The Affirmative Action Officer and the Title IX Coordinator for the University may be contacted as follows:

### Robert Stoto

Senior Vice President for Human Resources and Affirmative Action  
Moore Library, Room 108  
609-895-5683  
[rstoto@rider.edu](mailto:rstoto@rider.edu)

Rider University is an Equal Opportunity and Affirmative Action Employer. The Vice President for Human Resources serves as both the Affirmative

Action Officer and the Title IX Coordinator for the University, and is the resource available to anyone seeking additional information or wishing to file a complaint related to Affirmative Action and discrimination on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation or national origin. The Vice President for Human Resources is located in Moore Library, Room 108 and can also be reached at 609-895-5683.

## Degrees

At its Lawrenceville campus, Rider University offers programs leading to six undergraduate degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Fine Arts, Bachelor of Arts and Education, Bachelor of Science in Education, Bachelor of Science in Business Administration, and Associate in Arts.

Undergraduate degrees in Bachelor of Music and Bachelor of Arts in Music are offered at Westminster Choir College on the Princeton campus.

The Academic Programs A to Z Chart (p. 10) lists Rider University's majors, minors and certificates alphabetically, along with the college or school (p. 11) that grants each degree, major, minor and certificate. The following definitions explain the difference between majors, minors, tracks, concentrations, and emphases:

**Major** An organized group of courses ranging from introductory through advanced levels. Typically most if not all courses are in a single primary area of study, although some majors include study in multiple disciplines. Undergraduate majors require between 18 and 90 credits, depending upon the liberal arts or professional focus. Graduate majors require between 30 and 45 credits. Entrance into some majors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the major is listed on the official transcript.

**Minor** An organized group of courses, typically involving introductory through intermediate levels. While most minors are in a single discipline, Rider University offers several interdisciplinary minors, such as Law and Justice, and Sustainability Studies. Minors are offered at only the undergraduate level, and require between 15-24 credits. Some departments have restrictions on the connection between major and minor options. Entrance into some minors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the minor is listed on the official transcript.

**Track** A choice of specialty within a degree, tracks comprise an organized group of courses serving a particular focus within a major. In undergraduate and graduate majors that represent multiple disciplines, tracks indicate a particular disciplinary focus. In a single discipline major with tracks, each track represents a singular focus, often representing a liberal arts or professional path. In some cases, a track represents a sub-specialization within the major field. Entrance into some tracks, particularly those that represent a particular disciplinary focus, may require prerequisites, portfolios, auditions, or other forms of assessment. Tracks require between 21 and 52 credits. Upon completion of all requirements, the track is listed on the official transcript along with the major field of study.

**Concentration** Concentrations, such as English Literature or English Writing, represent a specialty or focus within an undergraduate or graduate major field of study. Typically, a concentration unites courses around content or a particular theme. Concentration requirements are a portion of a major, not the entire major itself. In some cases, concentrations refer to an interdisciplinary combination. Entrance into some concentrations may require prerequisites, portfolios, auditions, or other forms of assessment. Undergraduate concentrations require between 12 and 36 credits; graduate concentrations range from 9 to 18 credits. Upon completion of all requirements, the concentration is listed on the official transcript along with the major field of study.

**Emphasis** Typically an organized group of courses in a single discipline, the emphasis represents a subset of credits within an undergraduate or graduate major. The emphasis provides a coherent focus of study within a discipline, which may or not be in the major field. Typically an emphasis represents less than a third of the total major credits, mostly ranging from 15 to 19 credits. Entrance into some areas of emphasis may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the emphasis is listed on the official transcript along with the major field of study.

# GRADUATE

## Rider University's Vision and Mission

### Rider's Vision

Rider University will be a premier, forward-looking university known for its Engaged Learning Program that, together with dynamic academic programs, enriching co-curricular experiences and a vibrant living and learning community, challenges students, excites their imaginations and instills in them excellence in thought and action, preparing them for highly engaged and fulfilling professional and personal lives.

### Rider's Mission

Rider University welcomes students from throughout the region, across the nation, and around the world who seek to be challenged and supported as active members of our inclusive and vibrant living and learning community. Committed to student growth, transformation and leadership, we connect rigorous academic, artistic and professional programs of study with a rich array of learning experiences that engage students inside and outside the classroom. We prepare graduates to thrive professionally and to be lifelong independent learners and responsible citizens who embrace diversity, support the common good, and contribute meaningfully to the changing world in which they live and work.

Our students, alumni, faculty, staff and administrators live the **RIDER PROMISE** by being forever:

**P** - prepared to contribute meaningfully to the changing world in which they live and work

**R** - respectful of all people, rights, freedoms and individual differences

**O** - open to a life of independent learning

**M** - motivated to be responsible citizens who support the common good

**I** - innovative, creative and resourceful

**S** - skilled and thriving professionals, educators, artists and performers

**E** - engaged in their communities as leaders and role models

## Accreditations

Rider University is regionally accredited by the Middle States Commission on Higher Education (<https://www.msche.org>).

The University also holds many specialized accreditations that attest to the quality of its academic programs. Rider is among the select business schools to have attained AACSB International (<https://www.aacsb.edu>) (Association to Advance Collegiate Schools of Business) accreditation. Elementary and secondary education programs and their applicable graduate programs on both campuses are accredited by the National Council for the Accreditation of Teacher Education (<http://www.ncate.org>) (NCATE) and Council for the Accreditation of Educator Preparation (<http://caepnet.org>) (CAEP). The undergraduate and graduate music programs of Westminster Choir College are accredited by the National Association of Schools of Music (<https://nasm.arts-accredit.org>) (NASM). In addition, Rider's graduate counseling services program in the School of Education holds the Council for Accreditation of Counseling and Related Education Programs (<https://www.cacrep.org>) (CACREP) national accreditation, and its school psychology program holds the National Association of School

Psychologists (<https://www.nasponline.org>) (NASP) accreditation. Rider's B.S. Chemistry program is approved by the Professional Training of the American Chemical Society (<https://www.acs.org/content/acs/en/about/governance/committees/training.html>).

Rider University is a member of the National Collegiate Athletic Association (<http://www.ncaa.org>) (NCAA) both men's and women's athletics. The University offers 20 NCAA Division I sports—10 men's and 10 women's. Rider is a member of the Metro Atlantic Athletic Conference (<https://maacsports.com>) (MAAC) for most sports while wrestling competes in the Mid-American Conference (MAC) and field hockey competes in the Northeast Conference (NEC).

## Notice of the Title IX Coordinator

As a community of educators and learners, Rider University is committed to fostering an environment dedicated to learning and mutual respect as reflected in the University's mission, Statement of Community Values, Anti-Harassment and Non-Discrimination Policy and Title IX. All students, faculty, administrators and staff at the University have the right to expect an environment that allows them to enjoy the full benefits of their work or learning experience. The University, therefore, does not condone violations of its Anti-Harassment and Non-Discrimination Policy and treats all allegations about violations very seriously. As outlined in the Anti-Harassment and Non-Discrimination Policy ([www.rider.edu/ahnd](http://www.rider.edu/ahnd)) ([http://www.rider.edu/sites/default/files/docs/anti-harassment-non-discrimination-2015-16\\_v08012016.pdf](http://www.rider.edu/sites/default/files/docs/anti-harassment-non-discrimination-2015-16_v08012016.pdf)), the University prohibits all forms of discrimination, harassment, sexual assault, sexual misconduct, sexual harassment, dating violence, domestic violence and stalking.

Rider University is an Equal Opportunity and Affirmative Action Employer.

No one will be denied employment at, admission to, or the opportunity to participate in educational programs and activities at the University on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law. The University does not discriminate on the basis of any of the aforementioned protected bases in the recruitment and admission of students, the recruitment and employment of faculty, administrators and staff, and the operation of any of its programs and activities.

The Vice President for Human Resources serves as both the Affirmative Action Officer and the Title IX Coordinator for the University, and is the resource available to anyone seeking additional information or wishing to file a complaint related to Affirmative Action and discrimination on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era, qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law.

The Affirmative Action Officer and the Title IX Coordinator for the University may be contacted as follows:

### Robert Stoto

Senior Vice President for Human Resources and Affirmative Action  
Moore Library, Room 108  
609-895-5683  
[rstoto@rider.edu](mailto:rstoto@rider.edu)

Rider University is an Equal Opportunity and Affirmative Action Employer. The Vice President for Human Resources serves as both the Affirmative

Action Officer and the Title IX Coordinator for the University, and is the resource available to anyone seeking additional information or wishing to file a complaint related to Affirmative Action and discrimination on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation or national origin. The Vice President for Human Resources is located in Moore Library, Room 108 and can also be reached at 609-895-5683.

## Summer Session 2020

Students interested in calendar and course offerings for the summer sessions should consult the summer session catalog, available from the College of Continuing Studies at 609-896-5033 or go to [www.rider.edu/summer](http://www.rider.edu/summer) (<http://www.rider.edu/summer>).

## **Commencement Information**

For Commencement ceremonies information, go to [www.rider.edu/commencement](http://www.rider.edu/commencement) (<http://www.rider.edu/commencement>)

## **Cancellation of Classes**

In most cases, Rider will remain open and fully operational during snowstorms and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, and close certain buildings or take emergency actions.

If such circumstances should arise, a notice will be sent via the Rider Alert System.

Students may sign up for Rider Alert at [www.rider.edu/rideralert](http://www.rider.edu/rideralert) (<http://www.rider.edu/rideralert>)

Cancellations will also be announced online at [www.rider.edu](http://www.rider.edu) (<http://www.rider.edu>) and on the Rider University information hotline at 609-219-2000, option 1.

## College of Business Administration

The College of Business Administration (CBA) seeks to develop in students the skills needed to perform effectively in a variety of organizational settings—small business, multinational corporations, service industry, not-for-profits, family companies, government, or Wall Street—depending upon the student's interests and goals. Each graduate degree program is designed to provide an educational experience for the whole person by combining theory and practice. Since most of the students in our degree programs are employed in professional or managerial positions, they bring a wealth of business experience to share with their peers as part of the networking and learning process.

## Professional Accreditation

Rider University's College of Business Administration graduate and undergraduate programs are accredited by AACSB International – The Association to Advance Collegiate Schools of Business. The initial accreditation was achieved in 1993 and reaffirmed regularly thereafter. In addition, the accounting program was further recognized for excellence with AACSB International Accounting Accreditation in 2000 and also is reaffirmed on a regular basis.

## Faculty

Courses are taught in small sections, usually by full-time faculty holding doctorates. Faculty members are engaged in research in their fields, and many have relevant business experience as well. Adjunct faculty come to Rider from the ranks of executives from major corporations and thought leaders in business and service organizations.

## Graduate Degree Programs and Certificate Summary

### Introduction

The College of Business Administration offers seven degree programs and two certificate programs that provide individuals seeking a graduate degree in business or accounting with options to fit their career goals. The various programs offer students the flexibility to balance school with on-going professional and life demands. Whether a student is a full-time professional wanting to complete the degree on a part-time basis or is looking to pursue a degree on a full-time basis, there is a program and a mode of delivery to suit every students' needs.

### The Master of Accountancy (MAcc)

The MAcc program prepares individuals for a flexible career path and, ultimately, leadership positions in the accounting profession. Those students who wish to pursue a career in public accounting will develop specialized technical competencies to meet the 150 credit-hour requirement for licensure. Accounting career paths in corporate, financial or governmental sectors are facilitated through the core curriculum and specialized elective courses. The comprehensive curriculum focuses on

development of analytical and professional skills necessary for success in today's global business environment.

Required courses emphasize an integration and synthesis of accounting theories and concepts. Course work assumes that students have established a basic foundation level of accounting at the undergraduate level. Students without an undergraduate accounting degree are required to complete preliminary courses prior to beginning the MAcc core curriculum.

Students have the option to personalize their MAcc degree by creating a skill set from a menu of MBA and MAcc electives. Students may also elect to concentrate in one of the following areas: finance, business analytics, global business, information systems, or fraud and forensic accounting.

Graduate accounting courses are offered in the evening, Monday through Thursday, in the fall, spring and summer semesters, with some courses offered in the late afternoons, and online. While most students pursue the program on a part-time basis, courses are scheduled to allow a student to fast track a degree full-time by enrolling in up to four courses each semester.

Please see the MAcc website at [www.rider.edu/macc](http://www.rider.edu/macc) (<http://www.rider.edu/macc>) for up-to-date information on the program and faculty.

### The Online Master of Accountancy (OL MAcc)

Similar to the on-campus MAcc, the Online MAcc program prepares individuals for a range of careers in the accounting profession, using the online educational format. Students may enter the Online MAcc in one of six start dates and follow a structured progression of courses that guarantees completion in 20-months. Students who have both academic and professional backgrounds in accounting can earn the same graduate degree as our on-campus Master of Accountancy.

Required courses emphasize an integration and synthesis of accounting theories and concepts. Course work assumes that students have established a basic foundation level of accounting at the undergraduate level. Students without an undergraduate accounting degree are required to complete preliminary courses prior to beginning the MAcc core curriculum.

The OL MAcc supports students in developing their competencies and knowledge to sit for the CPA examination in all states and to meet the education credit-hour requirements for licensure. Accounting career paths in corporate, financial or governmental entities are facilitated through the core MAcc curriculum and specialized elective courses. These electives, built into the curriculum, allow students to earn a concentration in fraud and forensic accounting, business analytics or finance.

Please see the Online MAcc website at [w \(https://online.rider.edu/lpap-macc/?Access\\_Code=RDU-MAcc-SEO2&utm\\_campaign=RDU-MAcc-SEO2\)](https://online.rider.edu/lpap-macc/?Access_Code=RDU-MAcc-SEO2&utm_campaign=RDU-MAcc-SEO2) ([https://online.rider.edu/online-masters-degrees/masters-accountancy?Access\\_Code=RDU-MACC-SEO2&utm\\_campaign=RDU-MACC-SEO2](https://online.rider.edu/online-masters-degrees/masters-accountancy?Access_Code=RDU-MACC-SEO2&utm_campaign=RDU-MACC-SEO2)) for up-to-date information on the program and faculty.

### The Master of Business Administration (MBA)

The MBA program prepares individuals for career advancement as business professionals, managers and leaders of organizations. Structured around contemporary business knowledge and the

development of strong analytical and leadership skills, Rider has developed a forward-looking MBA program built on a long tradition of business education excellence. The curriculum provides a distinctive and effective business learning environment that emphasizes advanced business theory, interpersonal and communication skills, cross-functional integration of business theory and practice, and the ability to manage in a changing environment.

MBA program flexibility is supported by a variety of MBA and MAcc electives. MBA students have the option to pursue a general MBA that allows them to select graduate level business electives based on individual professional needs. Students also may elect to concentrate in one of the following areas: business analytics, finance, information systems, or global business. Additionally, MBA students with an undergraduate accounting education can complete a concentration in forensic accounting.

Graduate business courses are offered in the evening, Monday through Thursday, in the fall, spring and summer semesters and online. While most students pursue the program on a part-time basis, courses are scheduled to allow a student to fast track a degree full-time by enrolling in up to four courses each semester.

Please see the MBA website at [www.rider.edu/mba](http://www.rider.edu/mba) (<http://www.rider.edu/mba>) for up-to-date information on the program and faculty.

### **The Online Master of Business Administration (OL MBA)**

The Online MBA program prepares individuals for career advancement as business professionals, managers and leaders of organizations, offering the same high quality graduate degree as our on-campus MBA, but in a flexible, online educational format.

Course work assumes that students have established a basic foundation level of business courses at the undergraduate level. For those students who do not have this foundation, pre-program courses are available in an online format to satisfy this requirement before students begin the Online MBA curriculum.

The Online MBA courses may be completed in as few as 21-months for part-time students. An online orientation is required for all students entering the program.

Please see the Online MBA website at [www.rider.edu/onlinemba](http://www.rider.edu/onlinemba) ([https://online.rider.edu/online-masters-degrees/masters-business-administration?Access\\_Code=RDU-MBA-SEO2&utm\\_campaign=RDU-MBA-SEO2](https://online.rider.edu/online-masters-degrees/masters-business-administration?Access_Code=RDU-MBA-SEO2&utm_campaign=RDU-MBA-SEO2)) for up-to-date information on the program and faculty.

### **The Executive Master of Business Administration (EMBA)**

The Executive MBA program is a cohort-based program for experienced business professionals that offers courses in an accelerated program format across 14 months. Classes are held on Saturdays and selected Friday evenings so students can continue to work full-time. Students enter the program, complete classes and graduate with the same integrated group of up to 20 students. The program consists of two parts: the first part sets expectations concerning what it means to operate at an executive level and then delivers a solid foundation in business concepts and basic leadership and team skills. The second part of the program provides advanced executive sessions on a variety of current business topics of relevance to today's executive. A personal,

professional coaching program called Leadership Edge also is included in the curriculum.

In addition, there is a seminar on international business, which includes up to two weeks of travel in a key economic region of the globe. Other program highlights include: learning advanced business theory from the faculty while receiving practical insights from executives who work alongside the faculty in the classroom.

Please see the Executive MBA website at [www.rider.edu/emba](http://www.rider.edu/emba) (<http://www.rider.edu/emba>) for unique admission requirements, program schedules and other relevant information.

### **The Master of Science in Corporate Finance**

The Master of Science in Corporate Finance is a focused graduate degree that prepares students for leadership roles in managerial finance in a corporate setting. The degree is designed to utilize the strengths of Rider's AACSB accredited Accounting program and the nationally-ranked Finance program to provide students with contemporary business knowledge and practice skills that can lead to success in the corporate environment. Students have access to key financial databases and analytical tools and will become adept at synthesizing financial and accounting data and using modeling to recommend financial strategies that will positively impact high-level business decisions.

The MS in Corporate Finance offers students the option to begin the program in any semester; fall, spring or summer. Classes are offered in-person in the evening, Monday through Thursday. The online delivery format is an option for some of the classes. Students may pursue the program on a part-time basis, or take it full-time by enrolling in up to four courses each semester.

Please see the MS in Corporate Finance website at [www.rider.edu/corpfinance](http://www.rider.edu/corpfinance) (<http://www.rider.edu/corpfinance>) for up-to-date information on the program and faculty.

### **The Master of Science in Information Systems**

The Master of Science in Information Systems provides students with a strong foundation in information technology and organizational leadership followed by electives personalized to each student's career goals. The mission is to graduate a new class of information and business leaders ready to rise as CTO/CIOs and other senior information management roles. The 30-credit program begins with a core foundation of management, information technology, and analytics, followed by in-depth investigations into the relationship between technology systems and high-level business strategies. The curriculum offers universal skills for students from all over the world at our convenient central New Jersey campus. Enrollees will graduate with a deep and profound understanding of information systems for businesses – and how to execute innovative strategies in their own work.

The MS in Information Systems offers students the option to begin the program in any semester; fall, spring or summer. Classes are offered in-person in the evening, Monday through Thursday, with some classes taught online. Students may pursue the program on a part-time basis, or take it full-time by enrolling in up to four courses each semester.

Please see the MS in Information Systems website at [www.rider.edu/infosystems](http://www.rider.edu/infosystems) (<https://www.rider.edu/academics/colleges-schools/college-business-administration/graduate-programs/master-science-information-systems>) for up-to-date information on the program and faculty.

## Business Analytics Graduate Certificate Program

The Graduate Certificate Program in Business Analytics has been developed in response to the overwhelming demand from corporations and organizations for employees with skills and knowledge of technologies, applications and processes to analyze data in order to better inform the decisions of the organization. This skill set is applicable in all aspects of business including finance, marketing, accounting and operations. Designed with the valuable input of executives in the field of analytics, the program is endorsed by SAS Institute, the leader in business analytics software and services.

Rider's Graduate Certificate Program in Business Analytics allows students to follow one of two tracks:

- one for business professionals (<http://www.rider.edu/academics/colleges-schools/cba/graduate-business/business-analytics-certificate/business-professionals-track>)
- one for Information Technology (IT) professionals (<http://www.rider.edu/academics/colleges-schools/cba/graduate-business/business-analytics-certificate/it-professionals-track>) with advanced skills in programming, data management and a working knowledge of SAS software.

The program, comprised of five graduate level courses, is structured so it can be completed within one year on a part-time basis. Students can start the Certificate in any semester, with courses being taught in the evenings on Rider's Lawrenceville campus and online.

Please see the Business Analytics Graduate Certificate Program website at [www.rider.edu/businessanalytics](http://www.rider.edu/businessanalytics) (<http://www.rider.edu/academics/colleges-schools/college-business-administration/graduate-programs/business-analytics-certificate>) for unique admission requirements, program schedules and other relevant information.

## Forensic Accounting Graduate Certificate Program

The Graduate Certificate Program in Forensic Accounting is designed to meet the needs of businesses and organizations who know they must make the detection, prevention and prosecution of financial fraud a priority. There has been a tremendous increase in demand for employees with skills and knowledge of technologies, applications and processes to analyze data in order to better inform the decisions of the organization.

This is the result of a significant increase in federal legislation and more stringent auditing standards. Career opportunities in forensic investigation include positions in the government, public accounting, insurance, law, business and non-profit sectors. Students acquire the skills to identify, collect and examine evidence for accounting fraud and abuse

The program, comprised of four graduate level courses, may be completed in as few as two semesters. Students can start the Certificate in any semester, with courses being taught in the evenings on Rider's Lawrenceville campus as well as online.

Please see the Forensic Accounting Graduate Certificate Program website at [www.rider.edu/forensicacct](http://www.rider.edu/forensicacct) (<http://www.rider.edu/academics/colleges-schools/college-business-administration/graduate-programs/business-analytics-certificate>) for unique admission requirements, program schedules and other relevant information.

## Concentrations for MBA, MAcc & EMBA Students

### Concentrations Overview

The required courses in the MBA, MAcc and EMBA provide a distinct and consistent advanced business knowledge and skill structure for all students in the programs. The electives allow the student to tailor the graduate educational experience to fit their individual needs by pursuing a general management option with two electives or a specific concentration with three electives.

Concentrations are comprised of three-course elective (nine credit hours) sequences selected from a menu of electives by either the functional area (**business analytics, finance, forensic accounting, information systems**) or interdisciplinary area (**international business**.) Students in the online MAcc or MBA may have a limited selection of electives based on what is available in the online format.

Electives counted toward a concentration must carry a grade of "B" or better, and students must achieve a 3.2 GPA in those electives.

PMBA 8492	Ethical Issues in International Business	
Total Credits		9

<sup>1</sup> ALL Independent Studies must be sponsored by a full-time faculty member and approved by the Associate Dean for Graduate Business Programs.

## Courses and Descriptions

### **MACC 662 Auditing Practice & Problems 3 Credits**

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, and other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

**Prerequisite(s):** ACC 400 Principles of Auditing.

### **MACC 663 Fraud and Forensic Accounting 3 Credits**

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

**Prerequisite(s):** completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

### **MACC 665 Fraud Detection and Deterrence 3 Credits**

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

**Prerequisite(s):** MACC 663 and completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

### **MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits**

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

**Prerequisite(s):** completion of PMBA 8240 or the Preliminary Accounting Requirements; this course applies to the Corporate Accounting for Managers, Forensic Accounting and Fraud & Forensic Accounting concentrations.

### **PMBA 8311 Information Security for the Enterprise 3 Credits**

This course will teach students how businesses can implement security policies which will protect their significant investment in computer systems. The course topics include but are not limited to security attacks, attack prevention and mediation and security audits. Security devices, firewalls, PC and server security, authentication methods and procedures, and network security will all be discussed. The course will be delivered through a combination of hands-on labs where students will evaluate and implement computer security on computers, and class lectures.

**Prerequisite(s):** PMBA 8210.

### **PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits**

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

### **PMBA 8313 Electronic Commerce 3 Credits**

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

**Prerequisite(s):** Completion of MBA pre-program courses.

### **PMBA 8314 Project Management 3 Credits**

in our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

### **PMBA 8315 Globalization and Technology 3 Credits**

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology. This course applies to the Information Systems and Global Business concentrations. This course will satisfy the International elective requirement.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8317 Applied Data Management for Business Users 3 Credits**

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**PMBA 8318 Business Analysis and Design 3 Credits**

This course will integrate the skills of business analysis with those of system design. Students will learn a dynamic visioning/planning process which will guide the development of a technology architecture model for the business enterprise. Students will learn requirements elicitation techniques and use cases. Design methods such as object modeling and prototyping and data modeling with enterprise relationship diagrams will also be covered.

**Prerequisite(s):** PMBA 8210.

**PMBA 8341 Corporate Treasury Management 3 Credits**

This course is designed to provide an understanding of modern principles and techniques for corporate treasury management. The course materials are useful for finance, banking, accounting and information system professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multinational cash management, and other related topics. Success in this course will help students preparing for the Certified Cash Manager (CCM) exam. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8343 Investment Instruments and Strategies 3 Credits**

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8344 Financial Market Operations 3 Credits**

Flow of funds analysis is used to study financial intermediation and interest rate determination in money and capital markets. Includes the flow of funds accounts, funds flow through financial institutions, the demands for and supply of credit by economic sectors, and the impact of public policies on financial market behavior. This course applies to the Finance and Global Business concentrations.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8345 International Financial Management 3 Credits**

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions. This course applies to the Finance and Global Business concentrations.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8346 Financial Modeling 3 Credits**

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8347 Portfolio Management 3 Credits**

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8348 Fixed Income Securities and Alternative Investments 3 Credits**

This is an introductory course in fixed income securities and alternative investments. The first part of the course covers the markets for fixed income securities and their derivatives. Valuation of these securities and determination of the risk inherent in these securities are discussed. Methods for managing that risk, such as hedging and credit derivatives, are also discussed. The second part of the course covers a variety of alternative investments, including real estate funds, venture capital, hedge funds, and commodities. Valuation of these investments and determination of their risk are discussed. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

**PMBA 8349 Personal Financial Planning 3 Credits**

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

**PMBA 8352 Design Thinking and Innovation 3 Credits**

This graduate course on Design Thinking and Innovation provides students with a framework for dealing with unstructured problems, and for managing the innovation process. This course introduces students to design thinking as a systematic approach to innovation, but also guide students through the process to identify and translate broadly defined opportunities into actionable innovation possibilities. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

**Prerequisite(s):** PMBA 8210.

**PMBA 8353 Digital Futures 3 Credits**

This course is a capstone course aimed at leveraging the in-depth understanding of Technology that MsIS students possess and transforming such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. The course is divided into three parts. Part 1 aims to familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology / innovation. Part 2 engages the students in a discussion of three multi-firm cases of strategic innovation, followed by Part 3 on debates about new policy and ethical dilemmas engendered by technological changes of the last four decades. Each part is aimed at developing new skills that will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future.

**PMBA 8357 Business Analytics for Managers 3 Credits**

Business Analytics, the data driven approach to management, is essential to achieve effective business decision-making and competitive advantage. All business managers need to analyze data and make quantitative-based decisions in their business careers. The focus of this course is to equip students with a variety of data analysis methods and tools that are useful to uncover trends, patterns, relationships, and other useful information. The course will take a hands-on, example-based approach and introduce fundamental concepts as they are needed. Students will be using both Excel and SAS software. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**PMBA 8380 Business Analytics Optimization 3 Credits**

This course has been designed to provide professional MBA students with the current knowledge and practice of optimization business analysts use. Optimization aims at selecting the best alternative from among available alternatives according to a predetermined objective. In general it involves building a mathematical model and finding the best alternative through a mathematical procedure. Optimization techniques help decision-makers make fact (i.e. data) based decisions and offer the potential of making significant profits or cost savings. The main focus of this course will be on developing modeling skills to gain insight into a wide variety of business decision problems. In other words, the emphasis in this course will be on modeling practical business decision problems, use of relevant software for optimal solution, interpretation of results, and sensitivity analysis rather than the theory of mathematical solution techniques. Coverage of course material will follow the typical sequence of (1) identification and discussion of a business decision problem; (2) developing a graphical model (e.g. influence diagram); (3) developing a mathematical model; (4) computer solution; (5) interpretation of results and sensitivity analysis; (6) discussion of insights gained from the experience; (7) discussion of implementation issues. In addition, heuristics will be discussed when optimization techniques are not available or too costly. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**Prerequisites:** PMBA 8010 and PMBA 8051.

**PMBA 8902 Independent Studies in Business Administration 3 Credits**

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study. Prerequisite(s): Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

## Corporate Finance (M.S.)

### Program Overview

Rider's Master of Science in Corporate Finance is designed to prepare students for a leadership role in managerial finance in a corporate setting. Our program capitalizes on the strengths of Rider's AACSB-accredited Accounting program and nationally-ranked Finance program, allowing students to develop and practice skills that can lead to success in the corporate environment. Our distinctive managerial and accounting emphasis will put students on a track to become a CFO. Through our program, students will become adept at synthesizing financial and accounting data, and using modeling to recommend financial strategies that impact high-level business decisions.

### Curriculum Overview

The Rider MS in Corporate Finance curriculum includes pre-required and core classes. Depending on the background of the individual student, completion of the degree may require between 30-40.5 credits.

Rider's College of Business Administration is accredited by the AACSB International (<http://www.aacsb.edu>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide

Classes for the program are offered in the evening, Monday through Thursday, with some courses offered online. Students may enter the program in the fall, spring and summer semesters and can elect to pursue the MS in Corporate Finance on a full or part-time basis. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well.

### Degree Offered

**Program Website:** [www.rider.edu/corpfinance](http://www.rider.edu/corpfinance) (<http://www.rider.edu/corpfinance>)

### Program Requirements

(30 credits)

The Master of Science in Corporate Finance program consists of 30 semester hours at the graduate level. The courses in the program provide a depth of knowledge and skills in three main areas: managerial accounting and financial statement analysis, corporate finance, and investments and legal/ethical aspects of management .

Code	Title	Credits
MACC 652	Analysis of Accounting Data	3
PMBA 8220	Strategic Accounting for Manager	3
PMBA 8240	Applied Corporate Finance	3
PMBA 8290	Legal and Ethical Aspects of Management	3

PMBA 8324	Financial Accounting & Report	3
PMBA 8325	Enterprise Risk Management	3
PMBA 8341	Corporate Treasury Management	3
PMBA 8343	Investment Instruments and Strategies	3
PMBA 8345	International Financial Management	3
PMBA 8346	Financial Modeling	3
Total Credits		30

## Preliminary Requirements

Students may also be required to take an additional 10.5 credit hours of pre-program requirement based on their educational and professional experience. Waiver of these courses follows the guidelines defined under the Waiver of Courses section.

Code	Title	Credits
PMBA 8020	Fundamentals of Accounting	3
PMBA 8030	Economic Analysis	3
PMBA 8040	Basic Financial Principles	1.5
PMBA 8051	Fund of Statistical Analysis	3
Total Credits		10.5

## Business Writing Requirement

One objective of the MS in Corporate Finance program is to develop strong written communication skills. This will be done both formally, through a class for those not demonstrating a level of proficiency expected for business professionals, and informally for all students through faculty review of student-prepared course materials such as research reports, case study write-ups and papers.

Each student who enters the a Graduate Business degree program must have their writing skills formally assessed in one of the following ways:

1. Through the writing portion of the GMAT or GRE. A score of 4.5 or better on the GMAT writing section or a score of 4 or better on the GRE Analytical Writing section would rate the student as proficient.
2. Through the Graduate Business Writing Assessment, a 60-minute test in which students write a passage in response to a prompt.  
The passage is graded using a rubric that assesses Voice/Tone; Organization; Ideas, Support and Development; and Grammar and Mechanics. Students must score a 3 (adequate) on all four of the writing elements for a passing grade.

Students who fall below the proficient levels as identified above on any of the specified assessments will be required to do one of the following:

- Complete a business/workplace writing course at a U.S.-accredited university. The student must achieve a "C" or better in the course, demonstrating basic proficiency. Courses must be approved by the Associate Dean for Graduate Programs. ENG 321 is not included as an approved course for this purpose.
- Retake either of the above assessments until a proficient level is reached. Students will be provided with a directory of resources to improve their business writing skills prior to retaking the assessments including Rider writing lab, online tutorials and not-for-credit courses.

Students need to satisfy the above requirement within the first 6 credit hours of taking breadth and elective courses in the graduate business program. Students who do not satisfy the above requirement within the specified time frame will not be allowed to take additional breadth or

elective courses in the graduate business program until the requirement is satisfied; he or she may continue to enroll in pre-program courses.

## MS in Corporate Finance –Waiver of Courses

A waiver of a course from pre-program requirements may be granted under the following conditions:

I) *PMBA prerequisite class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA prerequisite class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA prerequisite class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

If a student is granted a waiver for any pre-program requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

## Core Course Waivers

Students with undergraduate coursework in accounting may be able to substitute electives for PMBA 8220 and PMBA 8324 in the following situations so as not to duplicate course work content:

1. Students who took the equivalent ACC 302 Cost Management and meet the waiver guidelines list above with a B or better, may waive PMBA 8220 Strategic Accounting for Manager and replace it with a PMBA or MAcc elective.
2. Students who took the equivalent ACC 310 Acct Theory & Concepts I AND ACC 311 Acct Theory & Concepts II and meet the waiver guidelines list above with a B or better, may waive PMBA 8324 Financial Accounting & Report and replace it with a PMBA or MAcc elective.

## Courses and Descriptions

### PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

**Prerequisite(s):** Completion of MBA pre-program courses.

### PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

**Prerequisite(s):** Completion of PMBA 8040 and PMBA 8220.

### PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

**Prerequisite(s):** Completion of MBA pre-program courses.

### PMBA 8324 Financial Accounting & Report 3 Credits

Focus is on analysis and evaluation of alternative accounting methods and the relationship to company policy. Insight is gained through the reading of articles in leading accounting and financial periodicals and Internet research. Cases demonstrating financial reporting methods are assigned and discussed in class. Term project required. Topics include financial instruments, earnings per share, deferred taxes, post-retirement benefits and the accounting rule-making process.

**Prerequisite(s):** PMBA 8020 and PMBA 8040.

### PMBA 8325 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

**Prerequisites:** ACC 302 or PMBA 8220.

### PMBA 8341 Corporate Treasury Management 3 Credits

This course is designed to provide an understanding of modern principles and techniques for corporate treasury management. The course materials are useful for finance, banking, accounting and information system professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multinational cash management, and other related topics. Success in this course will help students preparing for the Certified Cash Manager (CCM) exam. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

### PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

### PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions. This course applies to the Finance and Global Business concentrations.

**Prerequisite(s):** Completion of PMBA 8040.

### PMBA 8346 Financial Modeling 3 Credits

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**MACC 652 Analysis of Accounting Data 3 Credits**

This course uses information technology and data analytical techniques to conduct analysis needs commonly faced by accounting professionals. The course uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics. MACC 654 should be taken before this course. **Prerequisite(s):** completion of Preliminary Accounting requirements.

## Executive Master of Business Administration (EMBA)

### Program Overview

The Executive MBA is a 45 credit, 14-month program taught in an integrated group setting. Courses meet in person on Saturdays on the Lawrenceville campus three times a month, with coursework done online one Saturday a month. While there are many students with undergraduate business degrees in the EMBA program, it is especially appropriate for individuals who have non-business educational backgrounds and those who are transitioning to positions requiring higher levels of business, management, and leadership skills. A key goal of the program is to emphasize application of the information and skills being taught; therefore, students will find this emphasis throughout all aspects of the program.

The program consists of two parts: the first part sets expectations concerning what it means to operate at an executive level and then delivers a solid foundation in business concepts and basic leadership and team skills; the second part provides “advanced executive sessions” on a variety of current business topics of relevance to the business executive.

The EMBA program also has multiple coaches who work with students individually throughout the 14-month program to develop essential management, leadership, time management, stress management, and personal career development skills.

### Waiver of Program Coursework

There are no course waivers granted for the EMBA program.

### Executive-in-Residence Program

Successful business executives, each with their own specialization, are brought in to work alongside Rider faculty to lend their personal insight to classroom discussion during several of the courses in the “advanced executive session” portion of the program.

### International Experience

The international experience includes up to two weeks traveling in one or more countries around the world. The actual location for each integrated group is partially dependent upon the interests and needs of the group. Through a series of site visits, the group will meet with business leaders, develop relationships with overseas firms, and get a up-close look at how business is handled in some of the world’s most dynamic markets.

### Cost

The cost of the program is all-inclusive, covering tuition, food, fees, and the international study experience. Students are responsible for purchasing their own textbooks.

### Application Procedures

To apply for admission to the Executive MBA program, the procedures are:

- Obtain and complete an application for admission from the Office of Graduate Admission or online at <https://www.rider.edu/emba/apply>.
- Submit your resume, statement of aims and objectives, and two work-related recommendations (employer or another business-related resource) to the Office of Graduate Admission.
- Arrange to have an official transcript(s) sent to the Office of Graduate Admission from every institution of higher learning attended (including Rider University). A transcript should be sent even if only one course was taken at the institution. Only official transcripts will be accepted. Transcripts sent to the student are not acceptable unless they are sealed in the original envelope when received by the Office of Graduate Admission.
- International students are asked to have their transcripts evaluated (and translated, if necessary) for program equivalency by a recognized credential evaluation service. World Education Services in New York City is suggested for this evaluation.
- For international students, a notarized financial resource statement or notarized bank statement is required to demonstrate the student’s ability to pay the total cost of attendance.
- Upon submission of all application materials, applicants will be asked to take part in an admissions interview with the Director of the Executive MBA Program.

### Application Deadlines

The application deadline for application to the EMBA program is December 1. Applications received after the official deadlines may be given consideration at the discretion of the College of Business Administration.

Total Credits		45

**Note: There are no course waivers granted for the EMBA program.**

**EMBA 9001 Top Management Perspective 3 Credits**

This team-taught course will serve as the initial course of the EMBA program. The course will take place over three weekends. Top managers will also attend and provide their perspectives to students and faculty in attendance. This course will explore the “art” of case study analysis. Students will focus on identifying, analyzing, and resolving issues from a top management perspective. This course will consider various issues confronted by top managers and heavily emphasizes contemporary cases that illustrate a wide range of management issues. By having the course team-taught by a faculty member and an Executive-in-Residence, both the academic and applied aspects of business will be represented in the classroom. This sets the tone for the approach and philosophy of the entire program - a blending of business theory with real world application. Another of the course’s purposes is to allow the students to get to know one another, become acquainted with the faculty who will be teaching in the program, and receive an overview of the material that will be covered.

**EMBA 9220 Financial Accounting 3 Credits**

This course provides a managerially-oriented focus on the aspects of financial accounting most relevant to business decision makers. Students will develop the ability to read, analyze, and interpret financial information for decisions regarding operating, investing, and financing activities as well as serving as a foundation for more advanced analysis in areas such as credit and equity decisions.

**EMBA 9231 Economic Analysis and Decision Making 3 Credits**

This course focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

**EMBA 9240 Corporate Finance 3 Credits**

This course introduces modern corporate finance principles that today’s managers should know. Its purpose is to give students a thorough introduction to the theory and practice of financial management. The course reviews the principles executives need to acquire to manage for value creation. Topics covered include valuation of securities, capital budgeting, cost of capital, capital structure, and value-creating decisions in a global environment.

**EMBA 9250 Statistical Analysis for Bus 3 Credits**

This course introduces students to basic concepts and methodologies in probability theory and statistics. Emphasis is on real-world application of reasoning techniques used for interpreting data for decision criteria of managerial decision making. Topics include probability, variables, estimation, hypothesis, regression, and sampling. Concepts of learning are facilitated through real-world practices.

**EMBA 9251 Service/Product Management 3 Credits**

This course focuses on the issues, concepts, skills, and techniques related to the management of operations of organizations. Students are introduced to various techniques of operations research and management science as they are applied to decision making in the management of operations. Topics include productivity, supply chain management, manufacturing strategies, and competitiveness.

**EMBA 9260 Strategic Marketing 3 Credits**

The focus of this course is to provide students with the analytical skills required to understand and assess complex marketing situations in order to develop and implement appropriate marketing strategies. Identifying individual case factors and understanding the relationship between developments of strategies is emphasized. Students will apply the material using real-world cases faced by organizations.

**EMBA 9270 Management/Team Skills 3 Credits**

This course is based on the assumption that management and team skills can be learned. To learn skills requires active involvement in the classroom exercises and many learning opportunities come from group activities. To develop these skills, students will need to set personal goals and experiment with new behavior. This course will involve a variety of in-class exercises including self-assessments, interpersonal activities, and a team project.

**EMBA 9271 Leadership 3 Credits**

This course has been designed to provide students with an understanding of leadership from both a scholarly and a practitioner perspective. The purpose is to help students understand what it means to be a leader in general and in the current business environment specifically. Students will be encouraged to consider their own leadership aspirations, to observe others in leadership roles, and to test their own leadership acumen.

**EMBA 9301 Corp Governance Legal Ethical Issues 3 Credits**

This team-taught course provides an overview of corporate governance. The governance structure specifies the distribution of rights and responsibilities among different participants in the corporation, such as the board of directors, managers, shareholders, and other stakeholders. In this course, students will discuss the importance of corporate governance and the roles of various stakeholders in the governance structure. Conflicts of interest that arise between the stakeholders and approaches to mitigate those conflicts will be a central focus of the course. Because corporate governance plays an integral role in creating a culture in which ethical behavior is the norm, this course will also focus on identifying, analyzing, and resolving ethical dilemmas in business. The course will consider ethical issues confronted by managers and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues.

**EMBA 9302 Corporate Performance Evaluation 3 Credits**

This team-taught course emphasizes to executives that shareholder value creation should be an enduring focus of concern because value is the foundation of survival and prosperity for the enterprise. The course introduces multiple perspectives in evaluating the performance of the firm. Among them are management control systems, financial statement analysis, cash flow analysis, and the balanced score card (BSC) including Economic Value Added. The nature of these approaches to evaluation draws from the disciplines of accounting and finance. Structuring the course as a team-taught course in which instructors from both of these disciplines will be present helps to ensure that students will receive a comprehensive and integrated understanding of the course topics. Students will experience using real-world cases in evaluation.

**EMBA 9303 Intl Bus Seminar W/ Travel Exp 3 Credits**

The purpose of this course is to examine the intricacies of conducting business internationally. With each offering, the course will focus on parts of the world where emerging economies are becoming influential players in international business. Examples of these emerging economies include China, South America, Argentina and Chile in particular, and Eastern Europe or Southeast Asia. The influence of external forces resulting from the socio-cultural, economic, technological and political aspects of the macro-environment will be examined. The competitive environment will be examined from the perspective of both multinational and domestic corporations. Finally, consideration will be given to the corporate level strategies and the functional operation of these corporations as they compete for market share, financial investment and human resources.

**EMBA 9309 Special Topics 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**EMBA 9310 Information Technology and Management 3 Credits**

This course enables current and future senior executives to gain a strategic perspective of information technology resources within the organization. The focus is on opportunities and challenges associated with managing technological resources as well as how the effective management of information technology can improve competitive positioning and operational performance. Course format will be a combination of lectures, guest speakers, case studies, and hands-on exercises. Experiential learning opportunities will allow students to work with real-world case studies using relevant technologies.

**EMBA 9362 Product Development and Commercialization 3 Credits**

The purpose of this course is to provide an in-depth overview of the Product Development and Commercialization (PD&C) process. This will be done through the analysis of cases that describe actual PD&C as well as innovation problems faced by a variety of organizations (e.g. consumer, health care service). Topics covered include innovation funding, opportunity analysis, common PD&C challenges and issues, and the interface among various disciplines to achieve best-in-class PD&C strategies.

**EMBA 9880 Strategic Management: a Capstone Course 3 Credits**

The capstone course focuses on the elements required to make effective strategic decisions in organizations with reference to the impact these decisions have on all stakeholders. The purpose of this course is to provide students with an understanding of the strategy process through an analysis of how a firm develops a mission, vision, and establishes a sense of purpose while simultaneously monitoring the external environment for emerging opportunities and threats. Topics focus on real-world cases, the evolution of strategic management processes, and strategies for a global world.

**EMBA 9900 Leadership Edge 0 Credits**

This course is structured as pass/fail. It provides students at, or aspiring to, executive positions within their organization's career, leadership and management development with a real-time, practical approach to leadership. This differentiator and developmental component is referred to as "The Leadership Edge." Students will reflect on self-assessments completed as part of the program. They are then able to leverage the Leadership Edge experience by pursuing different methods of developing career, leadership, and management competencies to fill identified gaps. Opportunities for development are met through group sessions and student participation in individual (private) coaching or group seminars to discuss personal career and organizational situations. The choice of which avenue is taken (individual or group) is made on an integrated group basis.

**EMBA 9906 Special Topics in Bus Adm 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

## Forensic Accounting Graduate Certificate

### Program Overview

Over the last four decades, the field of forensic accounting has grown tremendously as increased federal legislation and more stringent auditing standards have helped to make the detection, prevention and prosecution of financial fraud a priority.

Career opportunities in forensic investigation include positions in the government, public accounting, insurance, law, business and non-profit sectors. The role of forensic accountants is far-reaching: these skilled professionals combine their accounting knowledge with critical investigative and analysis skills. They help to manage and reduce risk; identify and prosecute criminal activities such as embezzlement or illegally obtained funds; and advise on critical financial transactions from mergers and acquisitions to bankruptcy proceedings.

For the convenience of professionals, Rider's 12-credit Forensic Accounting Graduate Certificate program is offered in a variety of delivery formats: all-online, blended or on-campus evening classes. Classes are offered year-round with start dates in the spring, summer and fall.

You can complete the certificate in as little as two semesters, acquiring the skills to identify, collect and examine evidence for accounting fraud and abuse. Learning outcomes are:

- Identify, detect and prevent common fraud schemes and fraudulent financial reporting
- Recognize misappropriation of assets and corruption
- Gather and deliver evidence for the purpose of litigation
- Support fraud cases through documentation and analysis for litigation support
- Understand how internal control systems minimize or mitigate the potential for fraud including control frameworks and specific control procedures

**Completion of the Certificate**

You must achieve an overall GPA of 3.0 in the program, with no grades earned below a "C", to earn the certificate.

## Certificate Offered

### Related Programs

- Master of Accountancy (MAcc) (p. 31)
- Business Analytics Graduate Certificate (<http://catalog.rider.edu/graduate/colleges-schools/business-administration/programs-certificates/business-analytics-certificate>)

## Program Requirements

(12 credits)

The Forensic Accounting Graduate Certificate requires students to complete four graduate-level courses (12 credit hours) to complete the program.

### Prerequisites for the Program

Before starting with the core program's courses, students must demonstrate technology proficiency by satisfying ONE of the following conditions:

1. Earn a grade of "C" or better in Rider University's ACC 310 Acct Theory & Concepts I and ACC 311 Acct Theory & Concepts II ,or similar coursework at accredited four-year institution within six years prior to the semester admitted;

OR

2. Complete PMBA 8020 Fundamentals of Accounting with a grade of B or better AND PMBA 8324 Financial Accounting & Report with a grade of C or better.

### Core Requirements for the Program

Code	Title	Credits
MACC 663	Fraud and Forensic Accounting	3
MACC 665	Fraud Detection and Deterrence	3
MACC 667	Business Valuations: Fundamentals, Techniques and Theory	3
PMBA 8312	Business Intelligence Tech-Data Mining	3
Total Credits		12

## Courses and Descriptions

### MACC 663 Fraud and Forensic Accounting 3 Credits

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

**Prerequisite(s):** completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

### MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

**Prerequisite(s):** MACC 663 and completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

### MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

**Prerequisite(s):** completion of PMBA 8240 or the Preliminary Accounting Requirements; this course applies to the Corporate Accounting for Managers, Forensic Accounting and Fraud & Forensic Accounting concentrations.

### PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

## Master of Accountancy (MAcc)

### Program Overview

The Master of Accountancy develops the technical and interpersonal skills necessary for success in the accounting profession and fulfills the 150 credit-hour requirement for CPA licensure. Students can choose a concentration in business analytics, finance, information systems, or forensic accounting. This approach allows students to customize their degree.

Many full-time students enter the MAcc directly after completing their undergraduate degree and take sections of the CPA exam during the MAcc program. Most part-time students in the program are employed in

professional or managerial positions and bring business experience to share. There are internship opportunities for MAcc students.

## Curriculum Overview

Courses are taught in small sections by full-time faculty who research in their fields and by part-time faculty who are active in the profession. The accounting program has earned the AACSB Accounting accreditation (<https://www.aacsb.edu>), the international standard of excellence in accounting and business education that is held by less than 3% of accounting programs worldwide.

Classes are offered in the evening, Monday through Thursday, with some afternoon and online sessions. All required courses are offered during the fall, spring and summer semesters. Students can pursue the MAcc on a full or part-time basis.

## Master of Accountancy Program Requirements

The MAcc program consists of 30 semester hours at the graduate level (MAcc and PMBA only). The program includes 21 semester hours in required courses and 9 semester hours in MBA or MAcc electives. Please refer to the MBA course descriptions for a listing of PMBA elective courses. MAcc students may choose to use both MAcc and MBA electives to create concentrations. See the "Concentration (p. 21)" section provided in this catalog. Required graduate accounting courses are offered each semester. Graduate accounting electives are typically offered on a three-semester rotational basis. Students without an educational background in accounting may also be required to take an additional 25.5 credit hours of pre-program requirements based on their educational and professional experience.

(30 credits)

Code	Title	Credits
MAcc 650	Seminar in Federal Taxes	3
MAcc 652	Analysis of Accounting Data	3
MAcc 654	Issues in Financial Reporting	3

MAcc 662	Auditing Practice & Problems	3
MAcc 664	Issues in Managerial Accounting	3
MAcc 611	Professional Research and Communication	3
PMBA 8312	Business Intelligence Tech-Data Mining	3
<b>Elective Courses</b>		9
Total Credits		30

## Preliminary Requirements

MAcc students who hold an undergraduate degree in an area other than business will need to complete all of the Business Prerequisite Requirements and Accounting Prerequisite Requirements before taking upper level Accounting courses.

MAcc students who hold an undergraduate business degree in an area other than accounting may be eligible to waive the Business Prerequisite Requirements but must complete the Accounting Prerequisite Requirements before taking upper level Accounting Courses.

MAcc students who hold an undergraduate degree in accounting may be eligible to waive the Business Prerequisite Requirements and the Accounting Prerequisite Requirements.

Waiver of these courses follows the guidelines defined under the Waiver of Courses section.

## Business Prerequisite Requirements

7.5 credits (for students with a non-business undergraduate degree or outdated course work that does not meet the waiver requirements).

Code	Title	Credits
PMBA 8020	Fundamentals of Accounting	3
PMBA 8030	Economic Analysis	3
PMBA 8040	Basic Financial Principles	1.5
Total Credits		7.5

## Accounting Prerequisite Requirements

18 credits (for non-accounting business undergraduate degree or course work that does not meet the waiver requirements)

Code	Title	Credits
ACC 302	Cost Management	3
ACC 310	Acct Theory & Concepts I	3
ACC 311	Acct Theory & Concepts II	3
ACC 400	Principles of Auditing	3
ACC 405	Acct Problems & Practice	3
ACC 410	Fund of Federal Taxation	3
Total Credits		18

## The Master of Accountancy (MAcc)–Waiver of Courses

A waiver of a course from business prerequisite requirements may be granted under the following conditions:

1) *PMBA prerequisite class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.

- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA prerequisite class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA prerequisite class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

Waivers of courses for the "Accounting Prerequisite Requirements" may be granted as outlined in conditions I, if the student receives a "C" or better for these courses. There are no waiver examinations for the "Accounting Prerequisite Requirements" for the MAcc program. When the MAcc "Prerequisite Requirements" are waived, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

## Courses and Descriptions

### **MACC 611 Professional Research and Communication 3 Credits**

Effective communication and interpersonal skills are key for success in the accounting profession. This course is an interactive seminar designed to provide a strong foundation in professional research and to develop communication and interpersonal skills with an emphasis on the communication and interpersonal challenges that accountants commonly face. Course work is primarily base based and includes a wide variety of video and written assignments that require research to develop accounting services and present to guest professionals and the "client".

### **MACC 650 Seminar in Federal Taxes 3 Credits**

The course examines tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts. Topics include tax issues involved in the decision to select a particular form of business organization, fundamental concepts of interstate, international, and New Jersey taxation, and to expose the student to a variety of common tax returns, applicable to the above topics.

**Prerequisite(s):** completion of ACC 410 Fundamentals of Federal Taxation.

### **MACC 652 Analysis of Accounting Data 3 Credits**

This course uses information technology and data analytical techniques to conduct analysis needs commonly faced by accounting professionals. The course uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics. MACC 654 should be taken before this course. **Prerequisite(s):** completion of Preliminary Accounting requirements.

### **MACC 654 Issues in Financial Reporting 3 Credits**

This course uses the conceptual framework to examine standards for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

**Prerequisite(s):** completion of the Preliminary Accounting Requirements.

### **MACC 656 International Dimensions of Accounting 3 Credits**

This course examines the global applications of accounting principles and practices, including the relationship between international accounting issues and company strategy. Topics include theoretical and societal considerations of international accounting issues, the identification of transnational accounting practices, and attempts at harmonization.

**Prerequisite(s):** completion of the Preliminary Accounting Requirements; this course applies to the Global Business concentration.

### **MACC 658 Governmental and Not-for-Profit Accounting 3 Credits**

This course provides an in-depth study of the concepts, objectives and techniques of the evolving field of accounting for nonprofit institutions and organizations. Areas emphasized include municipal and state governmental units, hospitals, colleges and universities and service organizations. Problems, cases and selected readings are employed.

**Prerequisite(s):** completion of Preliminary Accounting requirements.

### **MACC 662 Auditing Practice & Problems 3 Credits**

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, and other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

**Prerequisite(s):** ACC 400 Principles of Auditing.

**MACC 663 Fraud and Forensic Accounting 3 Credits**

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

**Prerequisite(s):** completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

**MACC 664 Issues in Managerial Accounting 3 Credits**

This course examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

**Prerequisite(s):** completion of ACC 302 Cost Management or PMBA 8220 Strategic Accounting for Managers; this course applies to the Corporate Accounting for Managers concentration.

**MACC 665 Fraud Detection and Deterrence 3 Credits**

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

**Prerequisite(s):** MACC 663 and completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

**MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits**

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

**Prerequisite(s):** completion of PMBA 8240 or the Preliminary Accounting Requirements; this course applies to the Corporate Accounting for Managers, Forensic Accounting and Fraud & Forensic Accounting concentrations.

**MACC 668 Enterprise Risk Management 3 Credits**

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

**Prerequisites:** ACC 302 or PMBA 8220.

**MACC 670 Accounting Internship 3 Credits**

This course provides on-site experiential learning through supervised employment with a participating company. Students will be reviewed periodically by senior staff. Academic assignments, including a formal report, will be developed in conjunction with a faculty member. Permission of the instructor is required.

**MACC 690 Special Topics 3 Credits**

This course provides study of a timely topic that represents a dimension of business administration or accounting that not covered in a regular course. Such a topic may be offered by the Accounting Department. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

## Master of Business Administration (MBA)

### Program Overview

In recent years, businesses have become more global in their outreach, increasingly driven by analytics in their decision making and progressively more entrepreneurial in their approach. These shifts in business have led to a need for business professionals to regularly make decisions outside of their functional areas of operation and be better problem solvers and decisions makers who understand how their actions impact the entire organization and the competitive landscape. The Rider MBA program provides advanced preparation for successful participation in a rapidly changing world. Students are exposed to real-world situations that encourage them to question and analyze.

### Curriculum Overview

The Rider MBA classes include prerequisite, core and elective classes. Depending on the background of the individual student, completion of the degree will require between 36 and 54 credits. The MBA program is accredited by the AACSB International (<http://www.aacsb.edu>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide.

Classes are offered in the evening, Monday through Thursday, with some afternoon and online sessions. All prerequisite courses are offered during the fall, spring and summer semesters. Students can pursue the MBA on a full or part-time basis. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well.

Students may also select electives to concentrate in a particular area of interest, though these concentrations are not required. This approach allows MBA students to customize their degree.

- International Business (p. 21)

## Program Requirements Course Requirements

The MBA Program requires a core of 30 credit hours of Breadth course requirements and 6 credit hours of elective courses. Students may also be required to take up to an additional 18 credit hours of Pre-Program requirements based on their educational and work experience. A student must complete between 36 and 52.5 semester hours for the MBA, depending on the number of Pre-Program courses that are waived. To enrich the MBA degree, students may take electives in the areas of global business, finance, computer information systems, management, entrepreneurship, business analytics, or forensic accounting.

### Breadth Course Requirements

Code	Title	Credits
PMBA 8000	Executive Communications <sup>1</sup>	3
PMBA 8210	Information Technology Management	3
PMBA 8220	Strategic Accounting for Manager	3
PMBA 8230	Managerial Economics	3
PMBA 8240	Applied Corporate Finance	3
PMBA 8250	Operations & Supply Chain Management	3
PMBA 8260	Mkt Analysis & Decision Making	3
PMBA 8270	Adv. Organizational Behavior	3
PMBA 8290	Legal and Ethical Aspects of Management	3
PMBA 8880	Strategic Management	3

### Elective Courses

Students are required to complete 6 semester hours of electives to complete the program requirements. <sup>2</sup>

Total Credits 36

<sup>1</sup> Students are required to take PMBA 8000 as one of the first breadth classes they take in the program.

<sup>2</sup> Students pursuing a concentration as part of their degree will need to complete 9 semester hours of electives by taking an additional elective.

### Pre-Program Requirements – Courses

(18 credits for non-business undergraduates or business undergraduates with outdated course work or course work that did not meet waiver standards)

Code	Title	Credits
PMBA 8010	Information Technology Proficiency	1.5
PMBA 8020	Fundamentals of Accounting	3
PMBA 8030	Economic Analysis	3
PMBA 8040	Basic Financial Principles	1.5
PMBA 8050	Introduction to Calculus	1.5
PMBA 8051	Fund of Statistical Analysis	3
PMBA 8052	Models and Methods of Operations Mgt	1.5
PMBA 8060	Basic Marketing Principles	1.5
PMBA 8070	Management: Theory & Application	1.5

## The Master of Business Administration (MBA) – Waiver of Courses

A waiver of a course from pre-program requirements may be granted under the following conditions:

I) *PMBA prerequisite class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA prerequisite class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA prerequisite class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

If a student is granted a waiver for any pre-program requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

### MBA Breadth Course Waivers

It is possible for students to substitute an elective for an MBA Breadth course in the following situations, so as not to duplicate course work that may have been done as undergraduates:

- Students who graduated in the last five years as marketing majors and had at least a 3.0 in their marketing courses will not need to take PMBA 8260 Mkt Analysis & Decision Making. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years as accounting majors who graduated with at least a 3.0 in their accounting courses, will not need to take PMBA 8220 Strategic Accounting for Manager. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years with an undergraduate degree in Information Systems/Technology, Computer Science or Electrical Engineering with at least a 3.0 GPA in their major area courses and have at least five years professional experience in IS/IT

and strategy, OR for students with a graduate degree in Information Systems/Technology, Computer Science or Electrical Engineering and over five years professional experience in IS/IT and strategy will not need to take PMBA 8210 Information Technology Management. In its place, students must take an elective from either the MBA or MAcc program.

- Students who graduated in the last five years as supply chain majors and had at least a 3.0 in their supply chain courses will not need to take PMBA 8250 Operations & Supply Chain Management. In its place, students must take an additional elective from the MBA or MAcc programs.

## Course Descriptions

### **PMBA 8000 Executive Communications 3 Credits**

Professionals spend about seventy percent (70%) of their work-time communicating with other people. It is therefore no surprise that, without good communication skills, it is impossible to succeed in one's workplace. Yet, effective communication skills do not come naturally for most people. This course aims to prepare you to speak compellingly, write clearly and concisely, listen actively and critically, and persuade others by constructing sound arguments. To that end, we will learn the key aspects of communication: audience analysis, communicator credibility, message construction, and delivery. Deliverables will include written documents and oral presentations, as well as both individual and team presentations. Importantly, in doing so, you will enhance your leadership potential in your workplace by motivating your colleagues, team, and organization to work toward important goals.

### **PMBA 8010 Information Technology Proficiency 1.5 Credits**

Computing proficiency requires understanding implications of advanced information technologies and the ability to successfully apply these technologies in an increasingly global society. This course will enable students to effectively use specific information systems tools (spreadsheet and database management) to begin to design applications for effective decision making.

### **PMBA 8020 Fundamentals of Accounting 3 Credits**

For those students having no previous knowledge of accounting. Subject is approached from the point of view of the user of accounting information rather than that of the accountant who supplies the information. Surveys mechanics of accounting as a means to an end, emphasizing accounting as a tool of management and the language of business. Problems and cases bring out the managerial implications of accounting.

### **PMBA 8030 Economic Analysis 3 Credits**

An intensive exposition of the essentials of price theory and income and employment theory. For students with less than a year of introductory economics at the undergraduate level. Topics include an analysis of markets, the nature and characteristics of producer behavior, the theory of pricing in competitive and non competitive markets, and their welfare effects. At the macro level, coverage of the economy in the short run deals with economic fluxuations, fiscal policy, and monetary policy. An examination of the economy in the long run covers factors effecting economic growth.

### **PMBA 8040 Basic Financial Principles 1.5 Credits**

The central unifying theme of this course is valuation. Valuation is the basis for decisions in all major areas of finance. This course begins with a discussion of basic concepts including time value of money and its application for valuation of stocks and bonds and analysis of risk and return. Further application of valuation for capital investment projects made by a firm is explored by introducing the techniques of capital budgeting.

### **PMBA 8050 Introduction to Calculus 1.5 Credits**

This course has been designed to prepare students for courses in the MBA program in which calculus is used. Topics include limits, derivatives, functions of two or more independent variables and maxima and minima in one and two independent variable(s).

### **PMBA 8051 Fundamentals of Statistical Analysis 3 Credits**

Covers basic statistical techniques useful in business decision making. Includes descriptive statistics, event probability, random variables, sampling distributions, regression analysis and topics in statistical inference.

**Prerequisite(s):** MSD 105 (or equivalent).

### **PMBA 8052 Models and Methods of Operations Management 1.5 Credits**

This course provides students with some of the most frequently used quantitative tools necessary in analyzing and resolving issues and problems in managing service and/or manufacturing operations. These tools are required in PMBA 8250 Operations and Supply Chain Management, and may also be used in other PMBA courses such as Economic Analysis and Decision Making, and Business Intelligence.

### **PMBA 8060 Basic Marketing Principles 1.5 Credits**

The purpose of this course is to provide students with an operational understanding of basic marketing principles and concepts. This will be done through interactive exercises and discussions based both on primary source and textbook readings as well as discussions and critical examinations of current marketing practices in companies and industries of interest to the students. Topics covered include environmental analysis, target marketing, product and service strategy, integrated marketing communications, channels of distribution, pricing practices, and the interface between marketing and corporate strategic planning.

### **PMBA 8070 Management: Theory & Application 1.5 Credits**

A foundation course that provides an introduction to the theory and practice of management. The management functions of planning, organizing, leading, and controlling provide an organizing framework for examining current management challenges (e.g. globalization, ethics, diversity, and multidimensional organizational structures).

### **PMBA 8210 Information Technology Management 3 Credits**

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

**Prerequisite(s):** Completion of PMBA 8010.

**PMBA 8220 Strategic Accounting for Manager 3 Credits**

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8230 Managerial Economics 3 Credits**

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8240 Applied Corporate Finance 3 Credits**

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

**Prerequisite(s):** Completion of PMBA 8040 and PMBA 8220.

**PMBA 8250 Operations & Supply Chain Management 3 Credits**

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8260 Mkt Analysis & Decision Making 3 Credits**

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8270 Adv. Organizational Behavior 3 Credits**

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8290 Legal and Ethical Aspects of Management 3 Credits**

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8303 International Business Study Tour 3 Credits**

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits**

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

**PMBA 8313 Electronic Commerce 3 Credits**

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8314 Project Management 3 Credits**

in our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

**PMBA 8317 Applied Data Management for Business Users 3 Credits**

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**PMBA 8319 Selected Topics in CIS 3 Credits**

The study of a topic (or combination of topics) that represents some dimensions of computer information systems or has important and direct implications for CIS management. Topics recently covered include project management, data mining and data privacy. Theoretical foundations as well as applications may be explored. Readings, research, lectures, projects, discussions or other appropriate methods are employed to stimulate student learning.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8321 Managerial Taxation and Strategy 3 Credits**

This course is designed for students who are embarking on (or already in) careers in investment banking, corporate finance, strategy consulting, money management, or venture capital. The focus of the course comes from integrating the tax law with the fundamentals of corporate finance and microeconomics.

**Prerequisite(s):** PMBA 8020.

**PMBA 8324 Financial Accounting & Report 3 Credits**

Focus is on analysis and evaluation of alternative accounting methods and the relationship to company policy. Insight is gained through the reading of articles in leading accounting and financial periodicals and Internet research. Cases demonstrating financial reporting methods are assigned and discussed in class. Term project required. Topics include financial instruments, earnings per share, deferred taxes, post-retirement benefits and the accounting rule-making process.

**Prerequisite(s):** PMBA 8020 and PMBA 8040.

**PMBA 8341 Corporate Treasury Management 3 Credits**

This course is designed to provide an understanding of modern principles and techniques for corporate treasury management. The course materials are useful for finance, banking, accounting and information system professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multinational cash management, and other related topics. Success in this course will help students preparing for the Certified Cash Manager (CCM) exam. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8343 Investment Instruments and Strategies 3 Credits**

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8345 International Financial Management 3 Credits**

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions. This course applies to the Finance and Global Business concentrations.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8346 Financial Modeling 3 Credits**

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8347 Portfolio Management 3 Credits**

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8348 Fixed Income Securities and Alternative Investments 3 Credits**

This is an introductory course in fixed income securities and alternative investments. The first part of the course covers the markets for fixed income securities and their derivatives. Valuation of these securities and determination of the risk inherent in these securities are discussed. Methods for managing that risk, such as hedging and credit derivatives, are also discussed. The second part of the course covers a variety of alternative investments, including real estate funds, venture capital, hedge funds, and commodities. Valuation of these investments and determination of their risk are discussed. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

**PMBA 8349 Personal Financial Planning 3 Credits**

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

**PMBA 8357 Business Analytics for Managers 3 Credits**

Business Analytics, the data driven approach to management, is essential to achieve effective business decision-making and competitive advantage. All business managers need to analyze data and make quantitative-based decisions in their business careers. The focus of this course is to equip students with a variety of data analysis methods and tools that are useful to uncover trends, patterns, relationships, and other useful information. The course will take a hands-on, example-based approach and introduce fundamental concepts as they are needed. Students will be using both Excel and SAS software. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**PMBA 8365 International Marketing Management 3 Credits**

Examination of the nature and scope of global marketing activities, including the theoretical framework of international marketing, foreign marketing environments, multinational markets, MNC information systems, strategic marketing decisions, and organization for transnational marketing. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

**Prerequisite(s):** Completion of PMBA 8060.

**PMBA 8369 Selected Topics in Marketing 3 Credits**

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision-making may be explored. Readings, research, lectures, discussions or other appropriate methods are employed to stimulate student learning.

**Prerequisite(s):** Completion of PMBA 8060.

**PMBA 8371 Human Resource Management 3 Credits**

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8372 Management Skills 3 Credits**

This is a practicum in interpersonal skills that are useful for practicing managers. Topics include motivating oneself and others, persuasive communication, creative problem-solving, managing conflict, using power constructively, managing change, and team management. Students are given opportunities to practice these skills in class and are asked to apply them to their current lives and report on the results of their applications. The course will provide students with a better understanding of the art of managing and of themselves as current or future managers.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8375 International Management 3 Credits**

This course focuses on the complexities of working and managing in a global business environment. Emphasis is placed on cross-cultural awareness, international communication, and negotiations. Students will explore the effect of culture on organizational behavior, managerial decision making, and global leadership. This course applies to the Global Business concentration.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8380 Business Analytics Optimization 3 Credits**

This course has been designed to provide professional MBA students with the current knowledge and practice of optimization business analysts use. Optimization aims at selecting the best alternative from among available alternatives according to a predetermined objective. In general it involves building a mathematical model and finding the best alternative through a mathematical procedure. Optimization techniques help decision-makers make fact (i.e. data) based decisions and offer the potential of making significant profits or cost savings. The main focus of this course will be on developing modeling skills to gain insight into a wide variety of business decision problems. In other words, the emphasis in this course will be on modeling practical business decision problems, use of relevant software for optimal solution, interpretation of results, and sensitivity analysis rather than the theory of mathematical solution techniques. Coverage of course material will follow the typical sequence of (1) identification and discussion of a business decision problem; (2) developing a graphical model (e.g. influence diagram); (3) developing a mathematical model; (4) computer solution; (5) interpretation of results and sensitivity analysis; (6) discussion of insights gained from the experience; (7) discussion of implementation issues. In addition, heuristics will be discussed when optimization techniques are not available or too costly. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**Prerequisites:** PMBA 8010 and PMBA 8051.

**PMBA 8383 Entrepreneurship 3 Credits**

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8384 Consulting for New and Small Ventures 3 Credits**

This course provides experience-based learning to students through the use of student teams to assist area small businesses/organizations. These small firms could have a variety of needs ranging from market research, improving financial reporting and bookkeeping, business planning, streamlining operational procedures, etc. This course will provide students the opportunity to experience in-depth analysis of an individual organization. The emphasis is on student consultants generating immediate, actionable recommendations for the client. Thus, this course is useful not only for those considering small business ownership, but provides an opportunity to students to learn entrepreneurial thinking.

**Prerequisite(s):** Completion of MBA pre-program courses and permission of instructor.

**PMBA 8385 New Venture Launch 3 Credits**

Students will start and run a new venture while under the supervision and guidance of faculty. Students will take a business plan they have developed and execute it. This is an opportunity to experience the launch process and learn hands-on how to adapt to the marketplace. Some businesses started in this class may also be eligible to receive venture funding from Rider.

**PMBA 8386 Green Entrepreneurship 3 Credits**

This course is both a traditionally academic graduate course and a practical, case study based, business development course. Lectures will present the scientific, technical, financial, and business underpinnings required to understand the rationale for and the range of solutions possible that businesses can utilize when initiating or developing sustainable practices or new entrepreneurs can consider as they develop new businesses. Students will be learning about real business examples and discussing how the technical aspects of sustainability interact with the more practical and immediate demands of running a business – making a profit and maintaining positive cash flow while acting ethically.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8491 Business Law 3 Credits**

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement; this course applies to the Entrepreneurship concentration.

**Prerequisite(s):** BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

**PMBA 8880 Strategic Management 3 Credits**

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

**Prerequisite(s):** All other MBA breadth courses.

**PMBA 8902 Independent Studies in Business Administration 3 Credits**

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study.

**Prerequisite(s):** Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

**PMBA 8905 Internship 3 Credits**

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be done at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and during the semester he/she receives credit for the internship is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

**Prerequisite(s):** Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

**PMBA 8906 Selected Topics in Business Administration 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**Prerequisite(s):** To be announced and completion of MBA pre-program courses.

**PMBA 8907 Selected Topics in Business Administration 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**Prerequisite(s):** To be announced and completion of MBA pre-program courses.

**PMBA 8908 Selected Topics in Business Administration 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**Prerequisite(s):** To be announced and completion of MBA pre-program courses.

**PMBA 8909 Selected Topics in Business Administration 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**Prerequisite(s):** To be announced and completion of MBA pre-program courses.

## Information Systems (M.S.)

### Program Overview

The Information Technology (IT) job market continues its rapid growth as the lower cost of developing applications and expanding user platforms creates additional demands for qualified IT employees. The Master of Science in Information Systems is designed for early to mid-career professionals who aspire to become CTO's / CIO's or rise to other senior management roles in career tracks that have a significant technological component. Such career advancements are possible through multiple pathways because of the role of technology in every aspect of an organization's functioning. This program helps students to develop the knowledge and skills to evaluate the IS needs for a business organization and develop and implement the appropriate IT strategies, all while attending to the ethical and legal implications of data and technology-related issues. The program also provides students with practical experience to develop their professional communication skills and ability to work with others in diverse environments to solve IT problems.

### Curriculum Overview

The Rider MS in Information Systems curriculum includes prerequisite, core and elective classes. Depending on the background of the individual student, completion of the degree may require between 30-36 credits. Rider's College of Business Administration is accredited by the AACSB International (<http://www.aacsb.edu>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide

Classes for the program are offered in the evening, Monday through Thursday, with some courses offered online. Students may enter the program in the fall, spring and summer semesters and can elect to pursue the MS in Information Systems on a full or part-time basis. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well.

### Degree Offered

- Master of Science in Information Systems

## Master of Science in Information Systems Program

(30 credits)

Code	Title	Credits
<b>Required Business Core</b>		<b>6</b>
PMBA 8210	Information Technology Management	
PMBA 8250	Operations & Supply Chain Management	
<b>Required Information Systems Core</b>		<b>18</b>
PMBA 8311	Information Security for the Enterprise	
PMBA 8314	Project Management	
PMBA 8317	Applied Data Mgt for Bus Users	
PMBA 8318	Business Analysis and Design	
PMBA 8352	Design Thinking and Innovation	
PMBA 8353	Digital Futures	
<b>Elective Courses</b>		<b>6</b>
Select two of the following:		
PMBA 8260	Mkt Analysis & Decision Making	
PMBA 8270	Adv. Organizational Behavior	
PMBA 8290	Legal and Ethical Aspects of Management	
PMBA 8312	Business Intelligence Tech-Data Mining	
PMBA 8313	Electronic Commerce	
PMBA 8315	Globalization and Technology	
PMBA 8316	Application Development for the Web	
PMBA 8357	Bus Analytics for Managers	
<b>Total Credits</b>		<b>30</b>

### Prerequisite Curriculum

6 credits (for students with a non-business undergraduate degree or outdated course work that does not meet the waiver requirements).

Code	Title	Credits
<b>Prerequisite Curriculum</b> <sup>1</sup>		
PMBA 8010	Information Technology Proficiency	1.5
PMBA 8051	Fund of Statistical Analysis	3
PMBA 8052	Models and Methods of Operations Mgt	1.5
<b>Total Credits</b>		<b>6</b>

<sup>1</sup> Students must earn a minimum grade of B in each pre-program requirement course.

### MS in Information Systems –Waiver of Prerequisite Courses

A waiver of a course from pre-program requirements may be granted under the following conditions:

1) *PMBA prerequisite class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.

- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA prerequisite class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA prerequisite class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

If a student is granted a waiver for any pre-program requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

## Courses and Descriptions

### **PMBA 8010 Information Technology Proficiency 1.5 Credits**

Computing proficiency requires understanding implications of advanced information technologies and the ability to successfully apply these technologies in an increasingly global society. This course will enable students to effectively use specific information systems tools (spreadsheet and database management) to begin to design applications for effective decision making.

### **PMBA 8051 Fundamentals of Statistical Analysis 3 Credits**

Covers basic statistical techniques useful in business decision making. Includes descriptive statistics, event probability, random variables, sampling distributions, regression analysis and topics in statistical inference.

**Prerequisite(s):** MSD 105 (or equivalent).

### **PMBA 8052 Models and Methods of Operations Management 1.5 Credits**

This course provides students with some of the most frequently used quantitative tools necessary in analyzing and resolving issues and problems in managing service and/or manufacturing operations. These tools are required in PMBA 8250 Operations and Supply Chain Management, and may also be used in other PMBA courses such as Economic Analysis and Decision Making, and Business Intelligence.

### **PMBA 8210 Information Technology Management 3 Credits**

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

**Prerequisite(s):** Completion of PMBA 8010.

### **PMBA 8250 Operations & Supply Chain Management 3 Credits**

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

**Prerequisite(s):** Completion of MBA pre-program courses.

### **PMBA 8260 Mkt Analysis & Decision Making 3 Credits**

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

**Prerequisite(s):** Completion of MBA pre-program courses.

### **PMBA 8270 Adv. Organizational Behavior 3 Credits**

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8290 Legal and Ethical Aspects of Management 3 Credits**

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8311 Information Security for the Enterprise 3 Credits**

This course will teach students how businesses can implement security policies which will protect their significant investment in computer systems. The course topics include but are not limited to security attacks, attack prevention and mediation and security audits. Security devices, firewalls, PC and server security, authentication methods and procedures, and network security will all be discussed. The course will be delivered through a combination of hands-on labs where students will evaluate and implement computer security on computers, and class lectures.

**Prerequisite(s):** PMBA 8210.

**PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits**

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

**PMBA 8313 Electronic Commerce 3 Credits**

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8314 Project Management 3 Credits**

in our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

**PMBA 8315 Globalization and Technology 3 Credits**

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology. This course applies to the Information Systems and Global Business concentrations. This course will satisfy the International elective requirement.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8316 Application Development for the Web 3 Credits**

This class will examine application development for the Web platform in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications and the skills needed to develop applications using that architecture. Specific skills learned include programming with the JavaScript programming language, creating Web pages using the HyperText Markup Language (HTML) and Cascading Style Sheets (CSS). Other skills learned in this course include how to create user-friendly user interfaces, and how to retrieve and update information stored on computer servers.

**Prerequisite(s):** PMBA 8210.

**PMBA 8317 Applied Data Management for Business Users 3 Credits**

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**PMBA 8318 Business Analysis and Design 3 Credits**

This course will integrate the skills of business analysis with those of system design. Students will learn a dynamic visioning/planning process which will guide the development of a technology architecture model for the business enterprise. Students will learn requirements elicitation techniques and use cases. Design methods such as object modeling and prototyping and data modeling with enterprise relationship diagrams will also be covered.

**Prerequisite(s):** PMBA 8210.

**PMBA 8352 Design Thinking and Innovation 3 Credits**

This graduate course on Design Thinking and Innovation provides students with a framework for dealing with unstructured problems, and for managing the innovation process. This course introduces students to design thinking as a systematic approach to innovation, but also guide students through the process to identify and translate broadly defined opportunities into actionable innovation possibilities. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

**Prerequisite(s):** PMBA 8210.

**PMBA 8353 Digital Futures 3 Credits**

This course is a capstone course aimed at leveraging the in-depth understanding of Technology that MsIS students possess and transforming such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. The course is divided into three parts. Part 1 aims to familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology / innovation. Part 2 engages the students in a discussion of three multi-firm cases of strategic innovation, followed by Part 3 on debates about new policy and ethical dilemmas engendered by technological changes of the last four decades. Each part is aimed at developing new skills that will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future.

**PMBA 8357 Business Analytics for Managers 3 Credits**

Business Analytics, the data driven approach to management, is essential to achieve effective business decision-making and competitive advantage. All business managers need to analyze data and make quantitative-based decisions in their business careers. The focus of this course is to equip students with a variety of data analysis methods and tools that are useful to uncover trends, patterns, relationships, and other useful information. The course will take a hands-on, example-based approach and introduce fundamental concepts as they are needed. Students will be using both Excel and SAS software. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

## Online Master of Accountancy (OL MAcc)

### Program Overview

The Online Master of Accountancy (MAcc) is designed for working professionals with a background in accounting who seek advanced credentials and education for CPA or other professional licensures but want the flexibility and convenience of an online program. The Online Macc program offers the same course work as the in-person MAcc program, with which it shares the prestigious AACSB Accounting accreditation, the international standard of excellence in accounting and business education. The accounting faculty who teach in the program publish research in top accounting publications and are actively involved in the professional community.

### Curriculum Overview

The Online MAcc program enhances the knowledge and skills required of accounting professionals while meeting the educational requirements for CPA licensure.

Acceptance into the online program assumes that students have mastered the basic foundation of accounting and business courses at

the undergraduate level. Students who do not have this background will need to complete the prerequisite courses before beginning the core of the MAcc program. The core of the MAcc is comprised of seven required courses which cover relevant topics and skills needed to be successful in the field of accounting. Those skills and knowledge include oral and written communication skills, ability to do in-depth research, knowledge of data analytics and the manipulation of accounting data. The MAcc also requires the completion of three electives, which include the courses for a concentration in forensic accounting, finance or business analytics.

There is a required online orientation before a student can begin in the program.

Course work and connections with fellow students and faculty are facilitated through our user friendly technology platform. Students also have access to the MAcc resource center including webinars from leading accounting professionals on matters in the profession and CPA licensure.

## Online MAcc Program Requirements

The Online MAcc program is designed for students who have completed an undergraduate accounting major or have completed a series of both business and accounting prerequisite courses as part of an undergraduate/graduate program or independently at a four year university. The program consists of 30 semester hours at the graduate level and is completed with students following a set course schedule so they may complete their program in as few as 21 months.

Code	Title	Credits
MAcc 650	Seminar in Federal Taxes	3
MAcc 652	Analysis of Accounting Data	3
MAcc 654	Issues in Financial Reporting	3
MAcc 662	Auditing Practice & Problems	3
MAcc 664	Issues in Managerial Accountng	3
MAcc 611	Professional Research and Communication	3
PMBA 8312	Business Intelligence Tech-Data Mining	3
<b>Electives</b>		<b>9</b>
<b>Total Credits</b>		<b>30</b>

## Preliminary Requirements

MAcc students who hold an undergraduate degree in an area other than business will need to complete the Business Prerequisite Requirements and Accounting Prerequisite Requirements before taking upper level Accounting Courses.

MAcc students who hold an undergraduate business degree in an area other than accounting may be eligible to waive the Business Prerequisite Requirements but must complete the Accounting Prerequisite Requirements before taking upper level Accounting Courses.

MAcc students who hold an undergraduate degree in accounting may be eligible to waive the Business Prerequisite Requirements and the Accounting Prerequisite Requirements.

Waiver of these courses follows the guidelines defined under the Waiver of Courses section.

## Business Prerequisite Requirements

7.5 credits (for students with a non-business undergraduate degree or outdated course work that does not meet the waiver requirements).

Code	Title	Credits
PMBA 8020	Fundamentals of Accounting	3
PMBA 8030	Economic Analysis	3
PMBA 8040	Basic Financial Principles	1.5
Total Credits		7.5

## Accounting Prerequisite Requirements

18 credits (for non-accounting business undergraduate degree or course work that does not meet the waiver requirements)

Code	Title	Credits
ACC 302	Cost Management	3
ACC 310	Acct Theory & Concepts I	3
ACC 311	Acct Theory & Concepts II	3
ACC 400	Principles of Auditing	3
ACC 405	Acct Problems & Practice	3
ACC 410	Fund of Federal Taxation	3
Total Credits		18

## MAcc and Online MAcc–Waiver of Courses

A waiver of a course from business prerequisite requirements may be granted under the following conditions:

I) *PMBA prerequisite class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA prerequisite class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.

- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA prerequisite class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

Waivers of courses for the "Accounting Prerequisite Requirements" may be granted as outlined in conditions I, if the student receives a "C" or better for these courses. There are no waiver examinations for the "Accounting Prerequisite Requirements" for the MAcc program. When the MAcc "Prerequisite Requirements" are waived, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

### MACC 611 Professional Research and Communication 3 Credits

Effective communication and interpersonal skills are key for success in the accounting profession. This course is an interactive seminar designed to provide a strong foundation in professional research and to develop communication and interpersonal skills with an emphasis on the communication and interpersonal challenges that accountants commonly face. Course work is primarily base based and includes a wide variety of video and written assignments that require research to develop accounting services and present to guest professionals and the "client".

### MACC 650 Seminar in Federal Taxes 3 Credits

The course examines tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts. Topics include tax issues involved in the decision to select a particular form of business organization, fundamental concepts of interstate, international, and New Jersey taxation, and to expose the student to a variety of common tax returns, applicable to the above topics.

**Prerequisite(s):** completion of ACC 410 Fundamentals of Federal Taxation.

### MACC 652 Analysis of Accounting Data 3 Credits

This course uses information technology and data analytical techniques to conduct analysis needs commonly faced by accounting professionals. The course uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics. MACC 654 should be taken before this course.

**Prerequisite(s):** completion of Preliminary Accounting requirements.

**MACC 654 Issues in Financial Reporting 3 Credits**

This course uses the conceptual framework to examine standards for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

**Prerequisite(s):** completion of the Preliminary Accounting Requirements.

**MACC 662 Auditing Practice & Problems 3 Credits**

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, and other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

**Prerequisite(s):** ACC 400 Principles of Auditing.

**MACC 663 Fraud and Forensic Accounting 3 Credits**

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

**Prerequisite(s):** completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

**MACC 664 Issues in Managerial Accounting 3 Credits**

This course examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

**Prerequisite(s):** completion of ACC 302 Cost Management or PMBA 8220 Strategic Accounting for Managers; this course applies to the Corporate Accounting for Managers concentration.

**MACC 665 Fraud Detection and Deterrence 3 Credits**

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

**Prerequisite(s):** MACC 663 and completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

**MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits**

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

**Prerequisite(s):** completion of PMBA 8240 or the Preliminary Accounting Requirements; this course applies to the Corporate Accounting for Managers, Forensic Accounting and Fraud & Forensic Accounting concentrations.

**PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits**

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

**PMBA 8491 Business Law 3 Credits**

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement; this course applies to the Entrepreneurship concentration.

**Prerequisite(s):** BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

## Online Masters in Business Administration

### Program Overview

The Rider Online MBA program is designed to offer flexibility, convenience, and value to students preparing for advanced careers as decision makers in a rapidly changing world. Students are provided with a broad understanding of overall business concepts and operations, moving from a "one-dimensional" focus to one that mirrors the complexity of today's business enterprise. By utilizing the case study approach to analyze real-world situations, students are encouraged to question, apply business knowledge and develop informed decisions.

This program is accredited by the AACSB International (<http://www.aacsb.edu>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide.

### Curriculum Overview

The Rider Online MBA classes include prerequisite, breadth and elective classes that provide the same knowledge and experience as in-person MBA courses. Depending on the background of the individual student,

selected prerequisite courses may be waived, leaving students with between 36 and 54 credits to complete the degree. With six start dates, (two in fall, two in spring and two in summer), students may complete the MBA on a part-time basis in as few as 24 months. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well. There is a required online orientation before a student can begin in the program.

To enrich the MBA degree, students may take electives in the areas of global business, finance or business analytics

## The Master of Business Administration (MBA) – Waiver of Courses

### Waiver of Prerequisite Courses

A waiver of a course from pre-program requirements may be granted under the following conditions:

I) *PMBA prerequisite class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA prerequisite class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA prerequisite class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

If a student is granted a waiver for any pre-program requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

**MBA Breadth Course Waivers**

It is possible for students to substitute an elective for an MBA Breadth course in the following situations, so as not to duplicate course work that may have been done as undergraduates:

- Students who graduated in the last five years as marketing majors and had at least a 3.0 in their marketing courses will not need to take PMBA 8260. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years as accounting majors with at least a 3.0 in their accounting courses will not need to take PMBA 8220. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years with an undergraduate degree in Information Systems/Technology, Computer Science or Electrical Engineering with at least a 3.0 GPA in their major area courses and have at least five years professional experience in IS/IT and strategy, OR for students with a graduate degree in Information Systems/Technology, Computer Science or Electrical Engineering and over five years professional experience in IS/IT and strategy, will not need to take PMBA 8210. In its place, students must take an elective from either the MBA or MAcc program.

**Courses and Descriptions****PMBA 8210 Information Technology Management 3 Credits**

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

**Prerequisite(s):** Completion of PMBA 8010.

**PMBA 8220 Strategic Accounting for Manager 3 Credits**

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8230 Managerial Economics 3 Credits**

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8240 Applied Corporate Finance 3 Credits**

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

**Prerequisite(s):** Completion of PMBA 8040 and PMBA 8220.

**PMBA 8250 Operations & Supply Chain Management 3 Credits**

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8260 Mkt Analysis & Decision Making 3 Credits**

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8270 Adv. Organizational Behavior 3 Credits**

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8290 Legal and Ethical Aspects of Management 3 Credits**

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8303 International Business Study Tour 3 Credits**

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits**

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

**PMBA 8313 Electronic Commerce 3 Credits**

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8314 Project Management 3 Credits**

in our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

**PMBA 8315 Globalization and Technology 3 Credits**

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology. This course applies to the Information Systems and Global Business concentrations. This course will satisfy the International elective requirement.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8317 Applied Data Management for Business Users 3 Credits**

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**PMBA 8319 Selected Topics in CIS 3 Credits**

The study of a topic (or combination of topics) that represents some dimensions of computer information systems or has important and direct implications for CIS management. Topics recently covered include project management, data mining and data privacy. Theoretical foundations as well as applications may be explored. Readings, research, lectures, projects, discussions or other appropriate methods are employed to stimulate student learning.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8341 Corporate Treasury Management 3 Credits**

This course is designed to provide an understanding of modern principles and techniques for corporate treasury management. The course materials are useful for finance, banking, accounting and information system professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multinational cash management, and other related topics. Success in this course will help students preparing for the Certified Cash Manager (CCM) exam. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8343 Investment Instruments and Strategies 3 Credits**

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8345 International Financial Management 3 Credits**

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions. This course applies to the Finance and Global Business concentrations.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8346 Financial Modeling 3 Credits**

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8347 Portfolio Management 3 Credits**

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8349 Personal Financial Planning 3 Credits**

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

**PMBA 8357 Business Analytics for Managers 3 Credits**

Business Analytics, the data driven approach to management, is essential to achieve effective business decision-making and competitive advantage. All business managers need to analyze data and make quantitative-based decisions in their business careers. The focus of this course is to equip students with a variety of data analysis methods and tools that are useful to uncover trends, patterns, relationships, and other useful information. The course will take a hands-on, example-based approach and introduce fundamental concepts as they are needed. Students will be using both Excel and SAS software. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**PMBA 8365 International Marketing Management 3 Credits**

Examination of the nature and scope of global marketing activities, including the theoretical framework of international marketing, foreign marketing environments, multinational markets, MNC information systems, strategic marketing decisions, and organization for transnational marketing. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

**Prerequisite(s):** Completion of PMBA 8060.

**PMBA 8371 Human Resource Management 3 Credits**

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8372 Management Skills 3 Credits**

This is a practicum in interpersonal skills that are useful for practicing managers. Topics include motivating oneself and others, persuasive communication, creative problem-solving, managing conflict, using power constructively, managing change, and team management. Students are given opportunities to practice these skills in class and are asked to apply them to their current lives and report on the results of their applications. The course will provide students with a better understanding of the art of managing and of themselves as current or future managers.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8380 Business Analytics Optimization 3 Credits**

This course has been designed to provide professional MBA students with the current knowledge and practice of optimization business analysts use. Optimization aims at selecting the best alternative from among available alternatives according to a predetermined objective. In general it involves building a mathematical model and finding the best alternative through a mathematical procedure. Optimization techniques help decision-makers make fact (i.e. data) based decisions and offer the potential of making significant profits or cost savings. The main focus of this course will be on developing modeling skills to gain insight into a wide variety of business decision problems. In other words, the emphasis in this course will be on modeling practical business decision problems, use of relevant software for optimal solution, interpretation of results, and sensitivity analysis rather than the theory of mathematical solution techniques. Coverage of course material will follow the typical sequence of (1) identification and discussion of a business decision problem; (2) developing a graphical model (e.g. influence diagram); (3) developing a mathematical model; (4) computer solution; (5) interpretation of results and sensitivity analysis; (6) discussion of insights gained from the experience; (7) discussion of implementation issues. In addition, heuristics will be discussed when optimization techniques are not available or too costly. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**Prerequisite(s):** PMBA 8010 and PMBA 8051.

**PMBA 8383 Entrepreneurship 3 Credits**

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8384 Consulting for New and Small Ventures 3 Credits**

This course provides experience-based learning to students through the use of student teams to assist area small businesses/organizations. These small firms could have a variety of needs ranging from market research, improving financial reporting and bookkeeping, business planning, streamlining operational procedures, etc. This course will provide students the opportunity to experience in-depth analysis of an individual organization. The emphasis is on student consultants generating immediate, actionable recommendations for the client. Thus, this course is useful not only for those considering small business ownership, but provides an opportunity to students to learn entrepreneurial thinking.

**Prerequisite(s):** Completion of MBA pre-program courses and permission of instructor.

**PMBA 8386 Green Entrepreneurship 3 Credits**

This course is both a traditionally academic graduate course and a practical, case study based, business development course. Lectures will present the scientific, technical, financial, and business underpinnings required to understand the rationale for and the range of solutions possible that businesses can utilize when initiating or developing sustainable practices or new entrepreneurs can consider as they develop new businesses. Students will be learning about real business examples and discussing how the technical aspects of sustainability interact with the more practical and immediate demands of running a business – making a profit and maintaining positive cash flow while acting ethically.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8491 Business Law 3 Credits**

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement; this course applies to the Entrepreneurship concentration.

**Prerequisite(s):** BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

**PMBA 8880 Strategic Management 3 Credits**

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

**Prerequisite(s):** All other MBA breadth courses.

**PMBA 8902 Independent Studies in Business Administration 3 Credits**

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study. **Prerequisite(s):** Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

**PMBA 8905 Internship 3 Credits**

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be done at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and during the semester he/she receives credit for the internship is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

**Prerequisite(s):** Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

**PMBA 8906 Selected Topics in Business Administration 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**Prerequisite(s):** To be announced and completion of MBA pre-program courses.

## Faculty

### Devon Baranek

Assistant Professor, Department of Accounting  
B.S. Villanova University; MBA Baruch College; Ph.D. Baruch College

### Jerome T. Bentley

Associate Professor, Department of Finance and Economics  
B.A. St. Vincent College; Ph.D. University of Pittsburgh

### Nandini Chandar

Associate Professor, Department of Accounting  
B.Com. Osmania University, India; PGDM Indian Institute of Management Calcutta; Ph.D. Case Western Reserve University

### Ronald G. Cook

Professor, Department of Management  
B.S.B.A. State University of New York at Oswego; MBA Syracuse University; Ph.D. Syracuse University

### Kathleen Dunne

Associate Professor, Department of Accounting  
B.A. University at Buffalo, The State University of New York; M.S. State University College of Buffalo; Ph.D. Temple University

### Lauren B. Eder

Professor, Department of Information Systems, Analytics, and Supply Chain Management  
B.S. Boston University; MBA Drexel University; Ph.D. Drexel University

### Herbert E. Gishlick

Professor, Department of Finance and Economics  
A.B. Muhlenberg College; M.A. University of Pennsylvania; Ph.D. University of Pennsylvania

### Ilene V. Goldberg

Associate Professor, Department of Marketing, Sport Management and Legal Studies  
B.A. The Pennsylvania State University; J.D. Temple University James E. Beasley School of Law

### M. Elizabeth Haywood-Sullivan

Associate Professor, Department of Accounting  
B.S. The College of Charleston; M.P.A. The University of Texas at Austin; Ph.D. The University of Georgia

### Mayank Jaiswal

Assistant Professor, Department of Management  
B.E. University of Delhi; M.B.A. University of Chicago; Ph.D. Georgia Institute of Technology

### Carol A. Johnson

Priority Adjunct Assistant Professor, Department of Information Systems, Analytics, and Supply Chain Management  
B.S. Rider University; M.A. Rider University; M.A. Rider University; Ed.S. Rider University

### Sherry Fang Li

Associate Professor, Department of Accounting  
B.Ec. Tsinghua University; Ph.D. University of Massachusetts Amherst

### Biju Mathew

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management  
B.A. Nizam College, Hyderabad, India; M.A. XLRI – Xavier School of Management, Jamshedpur, India; Ph.D. University of Pittsburgh

### Kristin McCarthy

Assistant Professor, Department of Finance and Economics  
B.A. Dickinson College; M.P.H. Hunter College; Dr.P.H. Columbia University

### Evelyn A. McDowell

Associate Professor, Department of Accounting  
B.B.A. Baldwin Wallace University; MAcc Case Western Reserve University; Ph.D. Case Western Reserve University; CPA, CGMA

### Dorothy A. McMullen

Associate Professor, Department of Accounting  
B.S. LaSalle University; MBA Drexel University; Ph.D. Drexel University

### Marge O'Reilly-Allen

Associate Professor, Department of Accounting  
B.S.B.A. Temple University; MBA Drexel University; Ph.D. Drexel University

### Susan A. O'Sullivan-Gavin

Associate Professor, Department of Marketing, Sport Management and Legal Studies  
B.A. Seton Hall University; J.D. Seton Hall University School of Law

### Obeua S. Persons

Associate Professor, Department of Accounting  
B.A. Chulalongkorn University, Thailand; M.P.A. The University of Texas at Austin; Ph.D. The University of Texas at Austin

## Admission Requirements

### Graduate Business Degree Programs - MBA/Online MBA, MAcc/Online MAcc, MS in Corporate Finance, MS in Information Systems, Executive MBA

No decision is made on an application for admission to the graduate programs of business administration until all required documents have been submitted. These include a completed application form, the \$50 application fee, official notification by GMAC as to the score achieved on the Graduate Management Admissions Test (GMAT), your resume, statement of aims and objectives, and an official transcript from every institution of higher learning attended. To be admitted to the programs, an applicant must show evidence that he or she has earned a bachelor's degree or equivalent from an accredited institution of higher learning and has the potential to perform satisfactorily at the graduate level. The primary criteria used in making admission decisions are the undergraduate grade point average, the score achieved on the GMAT, professional experience, and graduate level GPA (if applicable). The Graduate Record Examination (GRE) is acceptable as an admissions examination in place of the GMAT.

#### **MBA/Online MBA/MS in Corporate Finance/MS in Information Systems Applicant GMAT/GRE Waiver Guidelines**

MBA/MSCF/MSIS applicants who meet one of the following criteria established by the Rider University College of Business Administration would qualify for a waiver for the standardized test requirement (GMAT or GRE):

- Has graduated from an AACSB accredited business program AND has one of the following:
  - a minimum cumulative undergraduate GPA of 3.3;
  - a minimum cumulative undergraduate GPA of 3.0 with 3 years of professional experience;
  - 5 or more years of professional experience.

NOTE: Graduate Admissions and the Associate Dean of Graduate Programs of the College of Business Administration will evaluate an applicant's professional experience.
- Has been inducted into Beta Gamma Sigma.
- Has passed the CPA certifying exam.
- Has earned a master's degree or higher with a cumulative GPA of 3.0 or higher from a program that is accredited in its discipline (e.g., NCATE for education, ABET for engineering.)
- Has earned a graduate certificate in a business-related discipline from an accredited institution with a minimum GPA of 3.3.
- Has earned a Ph.D. from an accredited university in the United States.
- Has been admitted as a conditional student (see below for description of this academic standing) into a Rider University graduate business program and has completed 12 credit hours of graduate business coursework with a cumulative GPA of 3.3 with no grades below a B.
- Has completed a minimum of 90 undergraduate credits at an AACSB accredited institution with a minimum cumulative GPA of 3.3. Such applicants will be granted conditional acceptance into the graduate program. The conditions of admission are to complete their

undergraduate program and maintain a minimum GPA of 3.3. After these conditions are met, applicants will be fully admitted into the MBA program.

9. Is a student in Rider's 3+1 or 4+1 program in business administration and has a GPA of 3.3 overall.

#### **MAcc/Online MAcc Applicant GMAT/GRE Waiver Guidelines**

MAcc applicants who meet one of the following criteria established by the Rider University College of Business Administration would qualify for a waiver for the standardized test requirement (GMAT or GRE):

1. Passed the CPA certifying exam
2. Hold a Ph.D. from an accredited university in the United States.
3. Passed the CMA exam.
4. Have completed at least 90 undergraduate credits in an accounting program from a U.S. AACSB-accredited university in the last five years AND at the time of application, have an overall GPA of at least 3.3 and a 3.3 GPA in accounting. Students who meet the criteria will be accepted conditionally into the MAcc program. The conditions of admission will be to maintain the minimum GPA requirement throughout the remainder of the undergraduate program and successfully complete the undergraduate program. After the conditions are met, students will be formally admitted into the MAcc. Accounting graduates, who meet the above criteria, will be directly admitted to the MAcc program.
5. Is a student in Rider's 3+1 or 4+1 program in accounting with the benefit of fixed tuition and has a GPA of 3.3 overall.
6. Is an accounting student at Rider, not in the formal 4+1 or 3+1 program, with a GPA of 3.0 overall and in accounting.

International students are required to present evidence of completion of a university degree equivalent to, or higher than, a bachelor's degree in the United States. A program equivalency evaluation by a recognized evaluation service is required. World Education Services (<http://www.wes.org>) in New York City is suggested for this service. International applicants must also provide a notarized financial resource statement or notarized bank statement demonstrating their ability to pay the total cost of program attendance at Rider.

If a student is conditionally admitted, (i.e., not satisfying one of the requirements above), he/she has no more than four months to satisfy the conditions. An exception to satisfying the conditions can only be approved by the Associate Dean of Graduate Programs.

#### **EMBA**

To qualify for the program, you must demonstrate the following:

##### **Academic Background**

- Bachelor's degree from an accredited university;
- Minimum 3.0 GPA (if the student's GPA is less than 3.0, the GMAT may be required.)

##### **Business-Related Background**

- Full-time employment;
- Minimum five years of work experience;
- Three years managerial/supervisory experience;
- Two work-related recommendations (employer or another business-related source.)

#### **Interview**

- Students will also have a personal interview with the EMBA Program Director to assess their academic and professional qualifications and readiness for the program.

## **Graduate Business Certificate Programs - Business Analytics and Forensic Accounting**

An application for admission to the graduate certificate program of business administration is not reviewed for a decision until all required documents have been submitted. These include a completed application form, the \$50 application fee, your resume, and an official transcript from every institution of higher learning attended.

To be considered for admission into one of Rider's Graduate Certificate Programs, you must hold a minimum of a bachelor's degree or its equivalent from an accredited institution of higher learning with a GPA of 3.0 or better.

## **Admission Classifications**

Each student admitted to the MBA, MS-CF, MS-IS or MAcc program is assigned to one of the following classifications:

#### **Full Standing**

Students who have full standing are permitted to register for any pre-program courses that have not been waived or for certain breadth courses, if those courses are needed by the student.

#### **Conditional Admission**

Conditionally admitted students have been admitted into the graduate business program with specific conditions outlined for them to meet within the first 12 credits they take in the program. These conditions may include maintaining a certain GPA and taking specific courses within the program as part of those first 12 credits.

Conditionally admitted students must meet the prerequisites for the specific classes they take and they may not take classes that could be waived if they were admitted to the program.

#### **Non-Degree Students**

Prospective students may take MBA classes as non-degree students under the following conditions:

- graduated with an undergraduate degree from an accredited university with a minimum 3.0 GPA OR has earned a graduate degree
- meets prerequisite requirements for desired course(s).

Non-degree students will only be allowed to take 6 credits in the graduate business program. If a non-degree student desires to take more than 6 credits in the graduate business program, he/she will need to fully apply to the program.

#### **Special**

Special student status is granted to those students enrolled in a graduate program at another institution who have been granted permission to take graduate business courses at Rider.

Executive MBA students and graduate certificate program students are admitted as "full standing" only.

## **Transfer of Courses**

A student may request the transfer of a graduate course taken at an AACSB-accredited institution. Such a request may be granted if the

course was taken within the past three years, was passed with a grade of "B" or higher, and was taken before admission to the graduate program at Rider. Once a student has been admitted to the program, graduate courses taken at other AACSB-accredited institutions must have prior approval of the Associate Dean for Graduate Programs before transfer credit will be allowed. A maximum of six semester hours of transfer credit may be granted for application against the elective requirements. No academic credit will be granted for corporate-sponsored management or professional development courses.

As the EMBA program is cohort-based, the transfer of courses does not apply.

## **Advising**

The Academic Coordinator of Graduate Programs is the advisor to students in all graduate business programs (except the EMBA) and tracks program progress. The Director of the Executive MBA Program is the advisor to the EMBA students. Students are also encouraged to contact members of the faculty and the program's executives-in-residence for career and related advising.

Note: The most significant policies and procedures for the graduate business programs are covered in this catalog. Questions and issues not addressed here default to other University-wide policy statements.

## **Course Repeat Policy**

With the written permission of the Associate Dean for Graduate Programs, graduate business students may repeat graduate courses for which they received grades of "C+" or lower. Both grades will appear on the student's transcript, but only the second grade will count in the GPA.

## **Academic Integrity**

Students are expected to conduct themselves professionally and with the highest standards of academic integrity. See Rider's Code of Academic Integrity (p. 259) in this catalog for further information.

## **Dismissal**

Rider University reserves the right to dismiss any student when, in the judgment of the faculty or officers of Rider, such action seems advisable. A student in a graduate business program will be subject to dismissal based on academic standing for any of the following reasons:

- Receiving more than two grades of "C+" or below in graduate-level work;
- Completing graduate course work with a cumulative grade point average of less than 3.0; or,
- Failure to complete the MAcc, MBA, MS-CF or MS-IS program in the required six years.

In all cases of dismissal, graduate business students have the right of appeal. Academic standing dismissal is a progressive process with student participation and advising designed to help students regain good academic standing. Students approaching the six-year time limit to complete a graduate business program may request a time limit extension prior to actual dismissal. The request should be based on unique work requirements, personal, or other reasons. Time limit appeals will be reviewed and acted on by the Associate Dean for Graduate Business Programs.

## **Honors Graduates**

Students who graduate with an overall grade point average of 3.85 or better are designated as graduating with distinction. This term appears on the student's official transcript, below the student's name in the commencement program and on the diploma.

## **Graduation Requirements and Application**

To graduate from the a graduate business degree or certificate program, students must have completed all of the course requirements as described above, within the six-year time frame, and have a cumulative Grade Point Average (GPA) of 3.0 or above. In addition, a candidate for graduation:

- Cannot have any grades below a "C", and cannot have received more than two grades of "C+" or "C"

A student who expects to graduate with a graduate degree must complete and file a degree application form no later than the date indicated on the calendar for each semester, found at the front of this publication.

## **Undergraduate Students Taking Graduate Business Courses**

Seniors enrolled in any business major can take one or two graduate business courses (PMBA or MAcc) in their senior spring (or equivalent) semester if the following conditions are met:

For taking an PMBA course:

- Students must have at least a 3.5 GPA;
- Students may take an elective or PMBA breadth course if all prerequisites have been met.

For taking a MAcc course:

- Students must have at least a 3.3 GPA or higher overall and in accounting courses;
- Students may take either MACC 654 or a MAcc elective, if all prerequisites have been met.

A graduate business course taken as an undergraduate can fulfill the requirements of only one program, either graduate or undergraduate. There is no "double dipping" of coursework between graduate and undergraduate programs. Permission to take such courses will be granted by the Associate Dean for Graduate Business Programs based on a review of a student's academic record.

## **College of Continuing Studies**

Whether you have completed your undergraduate degree at Rider or elsewhere, the College of Continuing Studies can help you take the next step towards your educational goal by earning a graduate degree. We are committed to helping adult learners reach their professional objectives.

With a rich history of offering quality undergraduate programs, the College of Continuing Studies now offers its first graduate degree, a Masters in Athletic Leadership. You can earn your degree by taking on-campus courses or complete it online. For admissions information please see the M.A. in Athletic Leadership (<https://www.rider.edu/academics/colleges-schools/college-continuing-studies/programs->

offerings/degrees-certificates-working-adults/ma-athletic-leadership) page on the website.

## Programs and Certificates

Program	Degree	Certificate
Athletic Leadership M.A. (p. 56)	✓	

## Athletic Leadership (M.A.)

### Overview

The Master of Arts in Athletic Leadership provides current and aspiring coaches and administrators, at all levels, the opportunity to obtain a graduate education focused on leadership, ethics, and coaching development within the current landscape of athletics. This graduate program is designed to promote personal and professional growth in leadership, coaching integrity, and community influence using most of the standards of the National Association for Sport and Physical Education (N.A.S.P.E.) (<http://pgpedia.com/n/national-association-sport-and-physical-education>) and the university's commitment to preparing caring, competent, and connected graduates. This program will promote the university mission of educating students to meet the challenges of our times. Intercollegiate athletics is a core component of the college experience and developing leaders within context this promotes multiple aspects of the Rider mission that include good decision-making, ethical lifestyles, and tolerance and respect for others.

### Curriculum Overview

There are two models for the degree program, both requiring 36 credit hours. The first model is a "4+1" program for undergraduates in which the two (2) courses (ATHL 501 and ATHL 502) can be completed by rising seniors; the remaining 30 hours will be completed post-graduation. The second model is a traditional master's program consisting of 36 credits. The program allows the possibility of receiving credit for up to six (6) hours of the coaching/athletic administrative depending upon prior professional experience (e.g., 2 years of full-time coaching or athletic administrative experience).

## Athletic Leadership 4 + 1 Undergraduate Program Information

(Complete six credits as an undergraduate, then 30 credits to complete the graduate requirement)

### Program Overview

This program is for undergraduate students who wish to continue into the M.A. in Athletic Leadership. Rising seniors may complete two (2) courses of the program:

- ATHL 501
- ATHL 502

The remaining 30 credits will be completed post-graduation and upon acceptance into the M.A. in Athletic Leadership program.

## Courses and Descriptions

### **ATHL 501 Sport Psychology 3 Credits**

This course covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics. Emphasis is placed on applications for maximizing effectiveness while serving in the position of coach or administrator.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

### **ATHL 502 Evidence-Based Research and Athletics 3 Credits**

This course in research methods prepares the student to understand materials and issues associated with but not limited to the logic of the scientific method, research design, and qualitative and statistical analysis of data. Students will be afforded the opportunity to conduct research in the course on topics.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

### **ATHL 503 Strength, Speed, and Conditioning 3 Credits**

Emphasis will be placed upon assessment, description, and analysis of sport movement and designing training programs to enhance performance variables. While this course will assist those who desire to sit for the National Strength and Conditioning Association's (NSCA) Certified Exam, it is NOT a preparation course for the NSCA-CSCS exam.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

### **ATHL 504 Fundamentals of Athletic Training and Wellness 3 Credits**

Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

### **ATHL 505 Athletic Communication and Marketing 3 Credits**

Seminar in Sports Media and Communication is a critical examination of the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

### **ATHL 506 Facilities Management 3 Credits**

Seminar in Facilities Management and Event Planning provides an examination of principles and techniques of planning and operating sport facilities. Emphasizes the principles and concepts of organization and administration including communication, personnel management, management of physical resources, and risk management. Examines a variety of sport operations such as indoor stadiums, athletic field complexes, and managing recreation and intramural activities.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

### **ATHL 507 Athletic Governance and Policy 3 Credits**

Students in this course will explore principles, techniques, and process related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. Studying collegiate athletic administration involves interpreting NCAA By-laws, including a comparison between Division I, II, and III compliance regulations. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level. At the end of the course, students will understand the primary duties of the athletic director and the intricacies of managing an intercollegiate athletic program.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

### **ATHL 508 Athletic Risk Management & Wellness 3 Credits**

Students in this course will explore proactive approaches to managing risks associated with conducting health, physical education, recreation and outdoor education programs. This course will emphasize safety as a foundation of quality program planning. Students will study governing associations and leadership/management skills required to be successful in the world of college athletics.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

### **ATHL 509 Sport Law 3 Credits**

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues which will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

### **ATHL 533 Special Topics Seminar 3 Credits**

This course will provide students the opportunity to survey the various sub-disciplines related to coaching and athletic administration, and their methods of inquiry. The course will place emphases on critically appraising research literature, and data collection, data organization and analyses for various research questions.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

### **ATHL 601 Concepts and Principles of Coaching 3 Credits**

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 650 Internship of Coaching 3 Credits**

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 651 Internship of Administration 3 Credits**

The internship affords students professional experience with an organization where the course theory can be applied to best practices. The internship is developed in consultation with the student, the student's academic advisor and the Internship. A learning/work plan is prepared by the student for approval by the site supervisor, both of whom share responsibility for the internship.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**College of Education and Human Services**

<http://www.rider.edu/cehs>

The College of Education and Human Services prepares students to be effective educators. Rider was the first private New Jersey institution to hold the highest accreditation possible in teaching from the National Council for the Accreditation of Teacher Education/ Council for the Accreditation of Educator Preparation (NCATE/CAEP (<http://www.ncate.org>)). This in turn offers graduates added value and recognition nationwide when seeking employment or admission to graduate study. The College has created partnerships with local schools, businesses, and government and community agencies so that students work collaboratively to develop high-quality programs. Professors value excellence in teaching, scholarship and service and serve as devoted advisors and mentors who relate well to each and every student.

**College of Education and Human Services: Graduate Education, Leadership, and Counseling**

The **Department of Graduate Education, Leadership, and Counseling** strives to provide quality programs with personal attention. Our full-time faculty, all of whom have doctoral degrees, teach the majority of our courses. Our College of Education and Human Services is accredited by the National Council for the Accreditation of Teacher Education (NCATE/CAEP) and our Master's degrees in Counseling Services and Clinical Mental Health Counseling are accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). Other programs that have received national accreditation include: School Psychology and Educational Leadership.

Classes are scheduled to enable those who work full-time to complete their programs. Class sizes are moderate to small, and many degree programs have internships.

The department offers educational specialist degrees, master's degrees, and certifications and endorsements in a variety of areas. These degree programs of study, their descriptions, and the certifications associated with them appear under programs and certificates (p. 62). Course descriptions for each program can be found in this catalog and on the Registrar's Office website. All programs require an application available from the Office of Graduate Admission (<https://www.rider.edu/admissions/graduate>).

You may also apply as a special student in some programs. Students enrolled in graduate programs elsewhere or students seeking course work for professional development not leading to a degree, certification or endorsement from Rider University may take courses as a special student. Apply to the Office of Graduate Admission. A bachelor's degree and two letters of recommendation are required.

**Mission Statement**

- The College of Education of Education and Human Services prepares undergraduate and graduate students for professional careers in education, organizations, and agencies in the diverse American society.
- The College of Education and Human Services fosters the intellectual, personal, and social development of each student for a changing world by creating and providing programs that embody the highest academic and professional standards.
- The College of Education and Human Services develops students who are committed, knowledgeable, professional, and reflective and who value service, ethical behavior and the improvement of one's self and profession.
- The College of Education and Human Services promotes a climate of scholarly inquiry, high expectations for achievement, and best professional practices, while establishing beneficial relationships with the public and exchanging relevant ideas and services that speak to emerging needs.

**College of Education and Human Services Conceptual Framework****Knowledgeable**

The College of Education and Human Services emphasizes content and pedagogical knowledge, which candidates implement in supervised classroom and field experiences. Candidates use acquired technological expertise and reference relevant standards for planning and reflecting on their classroom work.

**Professional**

Novice and experienced educators enrolled in the College of Education and Human Services are on a career-long path toward professionalism that does not end with graduation. We encourage candidates to become thoughtful, creative problem-solvers.

**Reflective**

The College of Education and Human Services defines reflection as the process of thinking clearly and deliberately to promote understanding about professional practice. Reflection, grounded in active experience, has value for developing educators, through classroom observation, self-assessment, and journal writing.

## Committed

Commitment, highly prized by the College of Education and Human Services, serves as an essential cornerstone for teaching and learning. Commitment is a set of connected attitudes, values, and beliefs that result in professional behaviors expected of dedicated educators.

## Admission Status

Upon completion of the steps in the application procedures described below, the applicant will be assigned to one of the following classifications once admitted:

### Graduate Standing

The student is qualified to undertake graduate study and is recognized as a degree or certification candidate upon admission;

### Conditional Standing

Students who do not satisfy all of the admission requirements or have not completed all of the undergraduate preparatory requirements or both may be permitted to enroll in studies during a probationary period not exceeding 12 graduate credits with a minimum grade point average of 3.0. Students who fail to attain a 3.0 grade point average upon completion of up to 12 graduate credits will be subject to dismissal.

### Special Standing

The student does not plan to be a degree candidate or certification candidate in a department/graduate program. Certification students enter the program under this classification. (If a certification student applies for admission to a master's or specialist degree program and is accepted, the student may apply for transfer of certificate course credits according to the policy guidelines of the department.)

## Transfer of Credit

Upon application to and before admission to any graduate degree program in education, leadership, and counseling, students may request transfer of up to 12 semester hours of graduate credits completed at an accredited institution, or up to 30 graduate credits for the Clinical Mental Health Counseling program. These credits must have been earned within six years of the date of credit transfer approval. All transfer credits must be approved by the program director and the department chair. Courses accepted for transfer must be similar to required or elective courses that are approved for the respective programs, and a grade of at least "B" must have been earned in each of these courses.

Students who are eligible to transfer graduate credits from other institutions must submit official transcripts of these credits. The Department of Graduate Education, Leadership, and Counseling will consider specific written requests for appropriate transfer credits. Official transcripts covering courses submitted for transfer must accompany the written request for such transfer if the transcripts have not already been filed.

### Transfer of Credit for Educational Specialist (Ed.S.) Students

The Department of Graduate Education, Leadership, and Counseling recognizes that students enrolled in an educational specialists program may enter after completing an appropriate master's program. Consideration is typically given to their prior graduate

training and its application to the current degree. The program director/designee and the department chairperson will determine the number of credits to be transferred given the following guidelines.

### Guidelines for Transfer of Credits for Ed.S. Students

- All transfer credits must carry a letter grade of at least "B."
- Transfer credits must be taken within the six years from the date of acceptance into the program. Exceptions may also be granted by the program director/designee for courses where content remains consistent over time and supports current program objectives.
- For students in the School Psychology Program up to 36 credits may be transferred so long as course equivalency can be thoroughly documented. Students in the Counseling Services Program may transfer up to 48 credits from a CACREP approved program. Students admitted from a non-CACREP approved program may transfer up to 36 credits.
- Official transcripts must accompany the request for transfer of credit. The program director/designee must approve the credits to be transferred upon admission.
- Credits approved for transfer will be added to the student's transcript at the time of admission to the program.
- Course descriptions and/or syllabi of the courses being requested for transfer may be required.

## Course Repeat Policy

Students may not repeat any graduate course for credit that they have already taken, except a course in which they have received a grade lower than "B" or one from which they withdrew. Any exceptions must be approved by the department chair.

## Comprehensive Examination

Students who are pursuing a graduate program leading to the Master of Arts in counseling services, clinical mental health counseling, or special education or to an Educational Specialist degree in school psychology must successfully pass a comprehensive examination covering knowledge of a specialized field; major concepts, theories and ideas; techniques for applying to a problem area knowledge of the specialized field and/or the related areas of foundations and research; adequate communication of ideas in light of the question(s) posed.

The date, location, and time of the Comprehensive Examination is determined by the appropriate program director. Only those students who have achieved the following requirements for the MA or EdS degree are eligible to sit for this exam:

- A cumulative average of 3.0 or better by the time of application for the comprehensive exam.
- In the last semester of the program; or, may take the examination in the spring if only one course remains and will be taken in the summer. Permission of program director/designee is required.

### Application for Comprehensive Examination and Graduation

A student who plans to take the comprehensive examination and graduate must fill out and file an Application for Comprehensive Examination and Graduation form on or before the date specified in the graduate calendar for his or her final semester. This form must be filed

with the chair of the Department of Graduate Education, Leadership, and Counseling.

## Dismissal

Any of the following situations will result in the automatic dismissal of a student working toward a graduate degree or certification program in the Department of Graduate Education, Leadership, and Counseling:

- Receiving two grades of “F” in graduate course work in either the same graduate course or in two different graduate courses;
- Receiving any grade of “C” (C+, C, or C- or lower) in more than two graduate courses;
- Not attaining a grade point average of 3.0 for the Master of Arts degree and certification programs or a grade point average of 3.3 for the Educational Specialist degree or the Ed.D. after taking twelve or more graduate credits at Rider University;
- Failing the comprehensive examination for the second time (pertains only to students enrolled in degree programs that require the examination);
- Failure to complete degree requirements in six years (with the exception of the M.A. in Counseling Services program, which is eight years from the date of acceptance into the program; the M.A. in Clinical Mental Health Counseling, which is 10 years from the date of acceptance into the program; and the Ed.S. in School Psychology, which is 10 years from the date of acceptance into the program);
- The Department of Graduate Education, Leadership, and Counseling reserves the right to dismiss any student when, in the judgment of the faculty or the officers of Rider, such action seems advisable.

## Honors Graduates

Students who graduate with an overall grade point average of 3.85 or better are designated as graduating with distinction. This term appears on the student’s official transcript, below the student’s name in the commencement program, and on the diploma.

## Programs of Study

### Degrees and Certifications Offered

The Educational Specialist (Ed.S.) degree is offered in the following areas:

- Counseling Services (p. 75)
- School Psychology (p. 124)

The Master of Arts (M.A.) degree is offered in the following areas:

- Clinical Mental Health Counseling (p. 65)
- Counseling Services (p. 72)
- Educational Leadership (p. 94)
- Organizational Leadership (p. 117)
- Special Education (p. 131)
- Teaching (p. 151)
- Teacher Leadership (p. 137)

The Education Doctorate (Ed.D) is offered in the following area:

- Educational Leadership (p. 87)

In addition, the department provides opportunity for study leading to teacher certification and other types of educational and human services certification.

## Educational Certificates

The Department of Graduate Education, Leadership, and Counseling provides opportunity for study leading to teacher certification and other types of certification in the following areas:

- Business Education/Marketing Education Teacher (p. 63)
- Dance Education (K-12) (p. 80)
- Director of Counseling Services (p. 86)
- Early Childhood Preschool Teacher (Preschool- 3) (p. 92)
- Elementary Teacher (K–6) (p. 97)
- English as a Second Language (ESL) (p. 107)
- English Language Arts Education (K-12) (p. 110)
- Life and Career Coach (<http://catalog.rider.edu/graduate/colleges-schools/education/education-leadership-counseling/programs-certificates/life-career-coaching>)
- Mathematics Teacher (p. 114)
- Music Teacher (p. 115)
- Reading Specialist (p. 123)
- School Administrator (Principal) (p. 121)
- School Counselor (p. 72)
- School Psychologist (p. 124)
- Science Teacher (Biological Sciences, Chemistry, Physics, Earth Science) (p. 128)
- Social Studies Teacher (p. 130)
- Student Assistance Coordinator (p. 134)
- Supervisor of Instruction (p. 136)
- Teacher Leadership (p. 148)
- Theater Education (K-12) (p. 152)
- World Languages Teacher—French or Spanish (K–12) (p. 154)

## Endorsement to Existing Teaching Certificates

- Bilingual Education (p. 62)
- English as a Second Language (ESL) (p. 108)
- Early Childhood Preschool–Grade 3 Teacher (P–3) (p. 92)
- Teacher-Coordinator of Cooperative Vocation/Technical Education (p. 71)
- Teacher of Students with Disabilities (p. 149)

## General Master’s Degree Application Requirements

All programs require an application available from the Office of Graduate Admission. A decision is made about an application for admission only when all required credentials have been submitted. Applications must be received by May 1 for summer session, August 1 for fall session, and December 1 for spring session unless otherwise specified by graduate admissions (<https://www.rider.edu/admissions/graduate/how-apply/graduate-education-counseling-leadership-students>) for specific programs. Completed applications received after the official deadline may be given consideration pending program capacity.

The faculty encourages prospective students from diverse ethnic and cultural backgrounds to apply. The following are due by the application due date:

- A completed application form, with a non-refundable \$50 application fee;

- Official transcripts from all colleges and universities attended;
- Other such admission requirements as specified within the particular program to which you are applying;
- If the due dates are different, they will be specified within the program requirements.

## General Master’s Degree Requirements

To qualify for the degree of Master of Arts, the candidate must:

- Comply with the general requirements concerning graduate study;
- Enroll in graduate study at Rider for no fewer than two academic semesters or the equivalent thereof;
- Complete at least 30–60 semester hours of graduate credit in an approved program of study;
- Complete an internship/practicum as required by individual programs;
- Successfully pass a written comprehensive examination except for the Master of Arts in Teaching degree, Educational Leadership degree, Organizational Leadership degree, and Teacher Leadership degree;
- Maintain a grade point average of “B” (3.0) or better for work submitted for the master’s degree with no more than two “C”s; and
- Complete the program within six years of the date the student enrolled in his/her first course unless an extension is approved by the Department of Graduate Education, Leadership, and Counseling. Students in the Clinical Mental Health Counseling and School Psychology programs have ten years and students in Counseling Services program have eight years to complete the program.

## Bilingual Education Endorsement Certificate

### Program Overview

Rider's bilingual endorsement program trains future educators to be sensitive to the cultural, sociological, linguistic, and psychological diversities that English Language Learner students bring with them to school. The mission of the bilingual program is to provide the skills, attitudes and understandings necessary to teach non-native speakers of English in order for them to achieve their greatest potential through education for life. Furthermore, the program introduces future educators to the different laws and programs that influence the bilingual classroom.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 151).

### Curriculum Overview

This endorsement provides bilingual teaching credentials for those already certified in another specialization. It is a 15 credit program requiring five courses offered in the late afternoon/evening.

### Certificate Offered

- Bilingual Education Endorsement

Total Credits		15

### Additional requirements for completion

- Language proficiency tests are required.
  - Oral Proficiency Interview (OPI)
  - Written Proficiency Test (WPT)

## Courses and Descriptions

### CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531 and CURR 538.

### EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

### EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. \*NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

### LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

### EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

## Business Education/Marketing Education Comprehensive (K-12) Certificate

### Program Overview

The Post-Baccalaureate Teacher Certification Program in Business Education/Marketing Education Comprehensive (K-12) is designed for college graduates seeking initial teacher certification. This is a streamlined, rigorous, and sequential program of professional studies that combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 151).

### Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Business Education/Marketing Education is a 21 credit graduate program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

### Certificates Offered

- Business Education Comprehensive (K-12) Certificate
- Marketing Education Certificate

## Courses and Descriptions

### BSED 530 Emerging Instructional Strategies in Business Education 3 Credits

Emphasis is placed on the enhancement of teaching effectiveness in business education as emerging instructional strategies are reviewed and studied. Special attention is devoted to the new technology and its use in business education while focusing attention to the present and future needs of the employer. Current instructional materials are presented and utilized. Master practicing business education teachers will augment the instructor’s presentations.

### CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

### CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students’ career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

**Prerequisite:** CURR 700.

### CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

**Prerequisite(s):** CURR 703.

**CURR 770 Clinical Experience and Seminar in Teaching 9 Credits**

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

**CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

## Clinical Mental Health Counseling (M.A.)

### Program Overview

The **Master of Arts in Clinical Mental Health Counseling Concentration** is a 60-credit program that prepares students for counseling positions in community agencies, mental health agencies, hospitals, government facilities, institutions of higher education, industry and private practice. This program meets the academic requirements for the Licensed Professional Counselor (LPC) (<http://www.njconsumeraffairs.gov/pc/Pages/default.aspx>) in New Jersey, Pennsylvania, and most other states. It also meets all educational requirements for certification as a National Certified Counselor (NCC), (<http://www.nbcc.org/Certification/NationalCertCounselor>) Approved Clinical Supervisor (ACS) (<http://www.cce-global.org/ACS>), Board Certified Coach (BCC) (<http://www.cce-global.org/bcc>) and Licensed Clinical Alcohol and Drug Counselor (LCADC) (<http://certbd.org>) and Certified Alcohol and Drug Counselor (CADC) (<http://certbd.org>) in New Jersey. Students may take two additional courses and a SAC practicum or internship in a school to qualify for the Student Assistance Coordinator (SAC) CEAS (<https://nj.gov/education/license/endorsements/3461CEAS.pdf>) (two courses may be able to count as electives for the M.A. CMHC program). (<http://www.state.nj.us/education/educators/license/endorsements/3461CEAS.pdf>) Master's students in their final year

are provided with preparation for the National Counselor Exam (NCE) (<https://www.nbcc.org/Exams/NCE>) which is taken during their last semester at Rider.

The **Master of Arts in Clinical Mental Health Counseling with a Dance/Movement Therapy Concentration** is an interdisciplinary 60-credit program that prepares students for counseling positions specializing in Dance/Movement Therapy in a wide range of settings. This program meets the academic requirements for the Licensed Professional Counselor (LPC) (<http://www.njconsumeraffairs.gov/pc/Pages/default.aspx>) in New Jersey, Pennsylvania, and most other states and for the national Registered Dance Movement Therapist (R-DMT) (<https://adta.org/r-dmt-2>) through the American Dance Therapy Association (<https://adta.org>). It also meets all educational requirements for certification as a National Certified Counselor (NCC) (<https://www.nbcc.org/certification/ncc>) and Board Certified Coach (BCC) (<http://www.cce-global.org/bcc>). Master's students in their final year are provided with preparation for the National Counselor Exam (NCE) (<https://www.nbcc.org/Exams/NCE>) which is taken during their last semester at Rider.

The concentration combines the unique elements of dance/movement therapy with the mental health counseling tradition. In keeping with the University's core mission, all degree and certification programs are student-centered, created to be flexible to meet the needs of returning and professional students with busy lives, provide cutting-edge instruction, hands-on practice in mental health organizations and agencies, and supportive faculty who are dedicated to mentoring students. The faculty and training are focused on dance therapy, wellness counseling and positive psychology, with an emphasis on clients' strengths, rather than on deficits.

**Accreditation Information:** The Clinical Mental Health Counseling program has been accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP) (<https://www.cacrep.org>) since 1999. The program is accredited through October 31, 2022.

### Curriculum Overview

All students in this area of study are required to complete 60 credits of coursework and to participate in at least 700 hours of counseling fieldwork in an agency. An appropriate agency for the intern is one which provides a program of services designed to help individuals function to their optimal capacity. Such programs exist in a wide variety of settings, such as mental health clinics, correctional facilities, hospital settings, family service centers, comprehensive rehabilitation centers, social service organizations, vocational counseling programs, private counseling programs, substance abuse treatment programs, employee assistance programs, college counseling centers, and other appropriate sites.

All degree candidates must purchase student professional liability insurance.

## Accelerated BA to MA Program

Highly qualified undergraduate psychology majors are eligible to apply in their junior year for the accelerated BA-MA program in Clinical Mental Health Counseling. This program enables students to take graduate courses during their senior year that count toward both the bachelor's and master's degrees.

Applicants for this accelerated program must have a GPA of at least 3.0 and must meet the same admission requirements as all other applicants. Students must apply by February 10 of their junior year. Those admitted must maintain a 3.0 GPA throughout the bachelor's part of the program. In addition, performance in graduate-level courses is subject to all academic policies and requirements of the Department of Graduate Education, Leadership, & Counseling.

Students accepted into the CMHC accelerated program who would like to complete the BA/MA in 5 ½ years will take the following 15 credits of graduate courses during their senior year, in addition to the necessary undergraduate courses:

Code	Title	Credits
COUN 500	Introduction to Counseling and Helping Professions	3
COUN 503	Group Counseling	3
COUN 550	Counseling Techniques Laboratory	3
CNPY 502	Theories of Counseling and Helping Professions	3
CNPY 514	Psychopathology	3

\* Undergraduate students who would like to take fewer than 15 graduate credits during their senior year are also eligible to apply for the accelerated program. Taking fewer than 15 courses as an undergraduate student may mean that it will take longer than 5 ½ years to complete the BA/MA.

Following successful completion of the undergraduate program, students will automatically be matriculated into the Clinical Mental Health Counseling MA-degree program, where they will complete the remaining MA-level coursework.

## Courses and Descriptions

### CNDT 584 Counseling and Dance/Movement Therapy Practicum I 3 Credits

Students develop clinical observation skills by being active participant observers in clinical field settings. Supervision class will focus on understanding the professional, legal, and ethical responsibilities of being a dance/movement therapist in clinical settings from a multicultural perspective. Issues pertaining to professional identity development will be addressed.

### CNDT 585 Counseling and Dance/Movement Therapy Practicum II 3 Credits

A supervised field experience in counseling and dance/movement therapy techniques. In this second semester of practicum, students will continue to advance their clinical skills by co-leading dance/movement therapy sessions with field supervision. The goal is for students to facilitate entire sessions by the end of the semester. The course will include seminar discussions, observations and analysis of the therapeutic process of dance/movement therapy sessions and individual supervision with the instructor. A total of 100 field hours is required with a minimum of 40 direct contact hours with clients. The approval and cooperation of the fieldwork agency or school field supervisor must be obtained the semester prior to the actual placement.

**Prerequisite(s):** CNDT 584.

### CNDT 590 Counseling and Dance/Movement Therapy Internship I 3 Credits

This course is one of two internship courses required in the student's final year. It fulfills 350 of the internship hours required by the American Dance Therapy Association and by CACREP. Students will be at a clinical site approved by faculty, with a supervisor who meets all CACREP standards and is a board certified Dance/Movement Therapist. Supervision class will support students in the clinical setting and in effectively utilizing counseling and dance/movement therapy knowledge and skills, including clinical appraisal, treatment planning, and documentation for dance/movement therapy. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

**Prerequisite(s):** All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

### CNDT 591 Counseling & DMT Internship II 3 Credits

The second semester of the internship that fulfills the remaining internship hours required by the American Dance Therapy Association and CACREP. Students will be at a clinical site approved by faculty, and will engage in all activities that a regularly employed staff member would be expected to perform. A regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring. Students will be under the field supervision of a supervisor who meets all CACREP requirements and is a Board Certified Dance/Movement Therapist. Supervision class will provide opportunities for students to analyze their practice, reflect on their progress as clinicians, and develop skills to internally self-evaluate their effectiveness as counselors and dance/movement therapists. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement. **Prerequisite(s):** CNDT 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the instructor.

**CNDT 600 Body Mind Integration through Movement I 0 Credits**

This is a movement laboratory class to explore how dance and movement reflect and affect physical, cognitive, mental, emotional, and spiritual states. Students learn to attune to their bodies in movement and develop awareness of the bidirectional interactions between body and mind.

**CNDT 610 Dance/Movement Therapy Theory and Practice I 3 Credits**

This course covers the foundational principles, theories, and techniques of dance/movement therapy and will examine the social and cultural foundations of dance as art and medium for growth, change, and healing. Works of dance/movement therapy pioneers and the evolution of dance/movement therapy practices will be explored didactically and experientially.

**CNDT 612 Movement Observation, Analysis, and Assessment 3 Credits**

This course is designed to provide students with the language and skills to observe, describe, analyze, and document human movement patterns and behaviors using Laban Movement Analysis. The didactic and experiential format of this class will allow students to embody movements and make connections to clinical practice with various client populations. Students will learn to translate movement based terminology and dance/movement therapy goals into clinical language used in treatment plans and progress notes.

**CNDT 620 Clinical Applications of Dance/Movement Therapy 3 Credits**

Group and individual dance/movement therapy practices in various clinical settings are addressed: psychiatric hospitals, addiction recovery programs, therapeutic schools for children with emotional and behavioral problems, developmental disabilities, and special needs; hospices; and hospitals. Students develop their own working theoretical model of dance/movement therapy to guide their work as emerging dance/movement therapists.

**CNDT 700 Body Mind Integration through Movement II 0 Credits**

The second semester of the movement laboratory class focuses on the use of mindfulness practices and Authentic Movement methods for further develop body-mind awareness, to experience and observe movements simultaneously as internal and external experience, and to decipher the nature of knowledge and meaning inherent in dance and movement.

**Prerequisite(s):** CNDT 600.

**CNDT 710 Dance/Movement Therapy Theory and Practice II 3 Credits**

In this didactic and experiential course, select theories from psychology, counseling, psychotherapy, and neuroscience are studied in order to identify the healing and transformative factors of the creative arts therapies. Some of the topics covered in this course are: psychodynamics and object relations theories; intersubjectivity; symbolism and metaphor; psychology of creativity; and neuroscience in dance/movement therapy.

**Prerequisite(s):** CNDT 610.

**CNPY 502 Theories of Counseling and Helping Professions 3 Credits**

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

**Prerequisite(s):** COUN 500 or as corequisite.

**CNPY 514 Psychopathology 3 Credits**

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

**CNPY 516 Advanced Psychopathology 3 Credits**

An in-depth study of psychopathology with emphasis on developmental and personality disorders, and physiological disturbances. Includes assessment, classification, and treatment with emphasis on utilization in a variety of counseling and school settings. Biological, pathological, pharmacological bases of mental disorders are introduced and discussed in relationship to specific disorder classifications.

**Prerequisite(s):** CNPY514 or permission of instructor.

**CNPY 518 Counseling Children, Adolescents and Families 3 Credits**

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

**COUN 500 Introduction to Counseling and Helping Professions 3 Credits**

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

**COUN 502 Prevention and Intervention for Body Image and Disordered Eating 3 Credits**

In this course, students will gain an understanding of strategies relevant to the prevention and treatment of body image and disordered eating concerns. Prevention strategies applicable to individual client care, small group work, and large group programming will be discussed. Students will also learn how to communicate and teach prevention strategies to parents, teachers, partners, and others who may be key influences in body image and/or disordered eating issues. In addition, various treatment and intervention approaches for individuals already exhibiting problematic body image and/or disordered eating attitudes and behaviors will be reviewed.

**COUN 503 Group Counseling 3 Credits**

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

**Prerequisite(s):** COUN 500, CNPY 502.

**COUN 504 Vocational/Career Development in Educational Settings 3 Credits**

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

**COUN 505 Vocational/Career Development 3 Credits**

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

**COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits**

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

**COUN 510 Approaches to Family Counseling 3 Credits**

Presents a basic understanding of major approaches of family counseling. Family counseling approaches covered include structural, systems, Ackerman, Satir, and analytical. These approaches are presented as related to major problem centered family concerns—child-rearing concerns, alcohol, drugs, child abuse, dysfunctional marriage, divorce, etc. Emphasizes self-awareness as related to family development.

**Prerequisite(s):** COUN 500, CNPY 502, or permission of instructor or advisor.

**COUN 512 Disaster Response, Trauma, Crisis, and Grief Counseling 3 Credits**

This course is an introduction to the research and practice of disaster response, trauma, crisis, and grief and loss counseling in clinical and educational settings. Course will include an overview of the impact of disasters, crisis, and trauma-causing events on individuals, communities, and educational settings and of the impact of working with traumatized clients on practitioners. Emphasis will be placed on prevention, intervention, and postvention practices in working effectively with individuals, families, and groups of people in the midst of traumatic situations and who have experienced loss, crisis, disasters and trauma-causing events.

**Prerequisite(s):** COUN 550.

**COUN 515 Substance Abuse Counseling 3 Credits**

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

**COUN 516 Strategies in Addiction Counseling 3 Credits**

This is an experiential and laboratory-based experience in which students will learn to implement evidenced based counseling techniques that are utilized in the field of substance abuse counseling. Students will be able to expand their basic counseling skills and techniques learned in COUN 550, as well as become exposed to techniques that are unique to addiction counseling. In addition to learning assessment skills, students will learn interventions that include motivational interviewing, relapse prevention, alternative therapies, group counseling, family counseling, and others. This course will also focus on issues of ethics and prevention in counseling.

**COUN 520 Multicultural Counseling and Relationship Development 3 Credits**

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

**COUN 525 Gender Issues in Counseling 3 Credits**

Examines the psychological, physiological, historical, and socio-cultural factors that affect the development of women and men across the life span and discusses implications for counseling. Focuses on relevant gender issues including gender bias and equity, misdiagnosis, self-esteem, depression, violence and sexual abuse, the feminization of poverty, and the importance of relationship for women. Presents an overview of feminist psychotherapy and explores the context of the behavioral, emotional and biological problems that impact on mental health. Also discusses the emerging men's movement and trends in counseling men; introduces gay and lesbian issues, the issues of minority women, and factors in counseling the HIV/AIDS client.

**COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits**

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

**COUN 535 Holistic Wellness Counseling 3 Credits**

Based on current methods and research, students will explore holistic wellness (e.g., spirituality, self-direction, work and leisure, friendship, and love) positive psychology (e.g., hope, forgiveness, etc.), and human change from personal and interpersonal perspectives.

**Prerequisite(s):** CNPY 502.

**COUN 550 Counseling Techniques Laboratory 3 Credits**

This is a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions.

The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

**COUN 555 Introduction to Play Therapy 3 Credits**

Introduction to Play Therapy provides an overview of the fundamental principles of play therapy, including history, theories, skills, and applications. The course emphasizes developing the therapeutic relationship with children and utilizing play to facilitate children's self-expression, self-understanding, and personal growth. Observation of and supervised experiential activities in play therapy with children are an integral part of the course.

**Prerequisite(s):** CNPY 502 Theories of Counseling and Psychotherapy, COUN 550 Counseling Techniques Lab, EDPS 503 Human Growth and Development.

**COUN 556 Parent-Child Play Therapy 3 Credits**

Parent-child play therapy builds upon the introduction to play therapy course and focuses on helping parents/caregivers enhance their relationship with children through play therapy modalities. Students will learn the history, principles, and skills of filial therapy, with an emphasis on Child-Parent Relationship Therapy (CPRT). Students will have opportunities to strengthen their play therapy skills, develop the ability to conduct CPRT, and learn how to facilitate systemic changes in children's lives through working with parents/caregivers. This course contains an experiential component including in-class role-playing and supervised parent-child play therapy experiences with parents/caregivers.

**Prerequisite(s):** CNPY 502, CNPY 550, EDPS 503, COUN 555.

**COUN 581 Secondary School Counseling Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

**Prerequisite(s):** To be taken semester prior to COUN 590.

**COUN 585 Clinical Mental Health Counseling Practicum 3 Credits**

A supervised experience in counseling and consulting techniques in mental health facility, community counseling agency, or college setting. Includes seminar discussions, interview analyses or audiotape/videotape observations, and individual supervision with the instructor. For the experienced counselor or the advanced counselor in training who desires to review and/or strengthen individual counseling and consulting techniques. A field placement of 100 hours is required with a minimum of 40 direct contact hours with clients. Students registering for this course should contact the instructor the semester prior to the course being offered.

**Prerequisite(s):** To be taken semester prior to COUN 590.

**COUN 590 Internship in Counseling I 3 Credits**

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

**Prerequisite(s):** all other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

**COUN 591 Internship in Counseling II 3 Credits**

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

**Prerequisite(s):** COUN 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

**COUN 600 Independent Study and Research in Counseling Services 1-3 Credits**

Students may take two independent studies. However, under special circumstances, such as students seeking certifications (e.g., Student Assistance Coordinator), students may be approved by their advisor to take up to six COUN 600 3-credit courses for a total of 18 credits.

**COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits**

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

**Prerequisites:** COUN 590.

**EDPS 502 Psychological Development of the Child and Adolescent 3 Credits**

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

**EDPS 503 Human Growth and Development 3 Credits**

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

**EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits**

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

**EDPS 521 Statistics and Quantitative Analysis 3 Credits**

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

**Prerequisite(s):** EDPS 520, EDUC 500.

**EDPS 535 Biological Basis of Behavior 3 Credits**

This course will emphasize a biological approach to the study of psychology and behavior. Topics studied will include the following: 1) the genetics of human psychological differences; 2) the anatomy of the nervous system; 3) psychopharmacology; 4) neuropsychological diseases (e.g., epilepsy, autism, multiple sclerosis); 5) memory and amnesia; 6) sleeping, dreaming, and circadian rhythms; and 7) the biopsychology of mental health difficulties.

**EDSO 501 Found of Counseling in Ed Settings: Referral Sources for Students and Students With Special Needs 3 Credits**

The course provides overview of the foundations of counseling in educational settings, including the historical roots; current and future trends, roles, and functions in multicultural schools and higher education settings; comprehensive developmental counseling programs; ethical school and higher education counseling practices; and individual and group counseling and consultation strategies, and evidence-based interventions and evaluations. In addition, the course will address community social services and educational-based programs (including special education and disability laws and accommodations) available to special needs students, other individuals and groups experiencing learning disabilities, and other temporary or chronic maladjustment. Reviews principles and methods utilized by social agencies, schools, and higher education settings.

**EDUC 500 Introduction To Research 3 Credits**

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

**EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits**

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

## Cooperative Education Coordinator Certificate

### Program Overview

Rider University offers the two required graduate courses for this certificate. The applicant should refer to the certification requirements on the NJDOE website (<http://www.state.nj.us/cgi-bin/education/license/endorsement.pl?string=999&maxhits=1000&field=2>).

### Certificate Offered

- Cooperative Education Coordinator Certificate

## Cooperative Education Coordinator Certificate Requirements

(6 credits)

Code	Title	Credits
BSED 508	Organizing and Administering Cooperative Work Experience Programs	3
COUN 505	Vocational/Career Development	3
Total Credits		6

## Courses and Descriptions

### BSED 508 Organizing and Administering Cooperative Work Experience Programs 3 Credits

An overview of the current administrative and instructional strategies used in organizing and administering cooperative work experience programs at the secondary and post-secondary levels. Up-to-date concepts are reviewed relative to program approval, teacher coordinator certification, work agreements, labor laws, funding, reporting supervision of student learners, related instruction, student wages, and vocational student organizations. Current instructional materials are reviewed and evaluated. Improvement in the organization and administration of cooperative work experience programs is the primary goal.

### COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

## Counseling Services (M.A.)

### Program Overview

The Master of Arts in Counseling Services (*school counseling concentration*) is a 48-credit program that prepares students for school counseling positions in elementary and secondary public and private schools. This program meets the educational requirements for state certification as a K-12 school counselor in New Jersey (<https://www.schoolcounselor.org/school-counselors-members/careers-roles/state-certification-requirements>), and meets the certification requirements of most other states. In addition, the program prepares students for the eight core content areas of the National Counselor Exam (NCE) (<https://www.nbcc.org/exams/nce>), required by the National Board of Certified Counselors (NBCC) in order to become a National Certified Counselor. Students completing this program will also have met the educational requirements for Board Certified Coach (BCC) (<https://www.cce-global.org/BCC>) and, with two additional courses, for the Student Assistance Coordinator (SAC) (<https://nj.gov/education/license/endorsements/3461CEAS.pdf>) certificate.

In keeping with the University's core mission, this program is student-centered. Courses are offered in the evenings with full-time and part-time enrollment options available to meet the needs of returning and professional students with busy lives. Cutting-edge instruction, hands-on practice in schools, and supportive faculty who are dedicated to mentoring students are core program components. The faculty and training are focused on wellness counseling and positive psychology,

with an emphasis on the strengths of the individuals served, rather than on deficits.

**Accreditation Information:** The Counseling Services program (school counseling concentration) has been accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP) (<https://www.cacrep.org>) since 1999. The program is accredited until October 31, 2022.

## Curriculum Overview

All students in this area of study are required to complete 48 credits of coursework and to take classes that cover the theories of counseling and psychotherapy, ethical and legal issues, counseling children, adolescents and their families, along with an elementary school counseling or secondary school counseling practicum and two internships. The practicum and internships require 700 hours of fieldwork in preparation for professional practice. Fieldwork placement occurs through close collaboration with Rider's clinical coordinator and is supervised by both practitioners in the field and professors in the classroom.

All degree candidates must purchase student professional liability insurance once they enter the field.

### Accelerated BA / MA

Highly qualified undergraduate psychology majors are eligible to apply in their junior year for the accelerated BA-MA program in School Counseling. This program enables students to take graduate courses during their senior year that count toward both the bachelor's and master's degrees.

Applicants for this accelerated program must have a GPA of at least 3.0 and must meet the same admission requirements as all other applicants. Students must apply by February 10 of their junior year. Those admitted must maintain a 3.0 GPA throughout the bachelor's part of the program. In addition, performance in graduate-level courses is subject to all

academic policies and requirements of the Department of Graduate Education, Leadership, & Counseling.

Students accepted into the School Counseling accelerated program who would like to complete the BA/MA in 5 years will take the following 15 credits\* of graduate courses during their senior year, in addition to the necessary undergraduate courses:

Code	Title	Credits
COUN 500	Introduction to Counseling and Helping Professions	3
CNPY 502	Theories of Counseling and Helping Professions	3
COUN 503	Group Counseling	3
COUN 550	Counseling Techniques Laboratory	3
EDSO 501	Found of Counseling in Ed Settings: Referral Sources for Students and Students With Special Needs	3

\* Undergraduate students who would like to take fewer than 15 graduate credits during their senior year are also eligible to apply for the accelerated program. Taking fewer than 15 courses as an undergraduate student may mean that it will take longer than 5 years to complete the BA/MA.

Following successful completion of the undergraduate program, students will automatically be matriculated into the School Counseling MA-degree program, where they will complete the remaining MA-level coursework.

### Courses and Descriptions

**CNPY 502 Theories of Counseling and Helping Professions 3 Credits**  
Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

**Prerequisite(s):** COUN 500 or as corequisite.

#### **CNPY 514 Psychopathology 3 Credits**

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

#### **CNPY 518 Counseling Children, Adolescents and Families 3 Credits**

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

**CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

**Prerequisite(s):** COUN 515 or COUN 516.

**CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

**Prerequisite(s):** COUN 515 or COUN 516.

**COUN 500 Introduction to Counseling and Helping Professions 3 Credits**

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

**COUN 503 Group Counseling 3 Credits**

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

**Prerequisite(s):** COUN 500, CNPY 502.

**COUN 504 Vocational/Career Development in Educational Settings 3 Credits**

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

**COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits**

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

**COUN 550 Counseling Techniques Laboratory 3 Credits**

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

**COUN 580 Elementary School Counseling Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children.

**Prerequisite(s):** To be taken semester prior to COUN 590.

**COUN 581 Secondary School Counseling Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

**Prerequisite(s):** To be taken semester prior to COUN 590.

**COUN 590 Internship in Counseling I 3 Credits**

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

**Prerequisite(s):** all other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

**COUN 591 Internship in Counseling II 3 Credits**

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

**Prerequisite(s):** COUN 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

**EDPS 503 Human Growth and Development 3 Credits**

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

**EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits**

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

**EDSO 501 Found of Counseling in Ed Settings: Referral Sources for Students and Students With Special Needs 3 Credits**

The course provides overview of the foundations of counseling in educational settings, including the historical roots; current and future trends, roles, and functions in multicultural schools and higher education settings; comprehensive developmental counseling programs; ethical school and higher education counseling practices; and individual and group counseling and consultation strategies, and evidence-based interventions and evaluations. In addition, the course will address community social services and educational-based programs (including special education and disability laws and accommodations) available to special needs students, other individuals and groups experiencing learning disabilities, and other temporary or chronic maladjustment. Reviews principles and methods utilized by social agencies, schools, and higher education settings.

**EDSO 510 Sociological and Cultural Foundations of Education 3 Credits**

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

**EDUC 500 Introduction To Research 3 Credits**

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

## Counseling Services (Ed.S.)

### Program Overview

The Ed.S. in Counseling Services is a 66-credit program that meets the academic requirements for the Licensed Professional Counselor (LPC) (<http://www.njconsumeraffairs.gov/pc/Pages/default.aspx>) in New Jersey, Pennsylvania, and most other states. It also meets all educational requirements for certification as an Approved Clinical Supervisor (ACS) (<http://www.cce-global.org/ACS>) as per N.J.A.C. 13:34-10.2 and 13.1 and as a National Certified Counselor (NCC) (<http://www.nbcc.org/Certification/NCC>). Students may also qualify for the Student Assistance Coordinator (SAC) CEAS (<https://nj.gov/education/license/endorsements/3461CEAS.pdf>). It also provides opportunity for candidates whose masters degree in counseling was completed with 48 or less credits, to complete the 60 credits now required for LPC by many state counseling licensure boards. Such candidates may apply to the Ed.S. program as advanced students and apply their already-completed MA credits toward the Ed.S. degree. Candidates who wish to qualify for Licensed Clinical Alcohol and Drug Counselor (LCADC) (<https://www.certbd.org>) or Certified Alcohol and Drug Counselor (CADC) (<https://www.certbd.org>), may do so by completing all the educational requirements through the Ed.S. program.

Flexibilities built into the Ed.S. degree program allow for career change for both LPC's and school counselors. LPC's who wish to become school counselors can complete courses required to become certified school counselors and master's-level school counselors can complete the courses required for LPC's in many states. Practicing counselors who wish to become certified as Director of School Counselor Services (<https://www.schoolcounselor.org/asca/media/asca/Careers-Roles/WhyDirectorCoord.pdf>) or as Student Assistance Coordinators may also complete these through the EdS program. Clinical supervised hours obtained during the Ed.S. post-Master's program may count toward satisfying a portion of the supervised professional counseling experience requirement as per N.J.A.C. 13:34-11.2. Program faculty work with students to develop a customized plan of study necessary to accomplish their desired career goals.

### Curriculum Overview

The Ed.S. in Counseling Services is a 66-credit program that is customized to the student's career goals. Some candidates may require more than 66 credits to achieve their desired professional objectives.

**There are three concentrations:**

- school counseling
- community counseling
- director of school counseling services

**Individualized advising helps candidates develop and grow professionally in the following specialty areas:**

- multicultural counseling issues
- college counseling and higher education affairs
- group counseling and process
- special needs of at-risk students
- legal and ethical issues in counseling
- career counseling and development
- substance abuse
- geriatrics/hospice issues
- probation/parole counseling
- elementary/secondary school counseling
- family and marital issues in counseling
- grief and crisis counseling
- grant writing/management

**Degree Offered**

- Ed.S. in Counseling Services

- School Psychology (Ed.S.) (p. 124)

**Counseling Services, Educational Specialist Requirements**

- A minimum of 66 graduate credits including appropriate master's level work.
- Eighteen credits must be completed after admission to the Ed.S. for candidates from CACREP approved master's programs.

- Thirty credits must be completed after admission to the Ed.S. for all non-CACREP approved program graduates.
- Degree completion requires a minimum of 3.3 GPA.

The program will be individualized to allow students to meet their career goals and to provide in-depth training and experience in a specialized area.

## Courses and Descriptions

### **COUN 500 Introduction to Counseling and Helping Professions 3 Credits**

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

### **COUN 503 Group Counseling 3 Credits**

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

**Prerequisite(s):** COUN 500, CNPY 502.

### **COUN 505 Vocational/Career Development 3 Credits**

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

### **COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits**

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

### **COUN 510 Approaches to Family Counseling 3 Credits**

Presents a basic understanding of major approaches of family counseling. Family counseling approaches covered include structural, systems, Ackerman, Satir, and analytical. These approaches are presented as related to major problem centered family concerns--child-rearing concerns, alcohol, drugs, child abuse, dysfunctional marriage, divorce, etc. Emphasizes self-awareness as related to family development.

**Prerequisite(s):** COUN 500, CNPY 502, or permission of instructor or advisor.

### **COUN 515 Substance Abuse Counseling 3 Credits**

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

### **COUN 516 Strategies in Addiction Counseling 3 Credits**

This is an experiential and laboratory-based experience in which students will learn to implement evidenced based counseling techniques that are utilized in the field of substance abuse counseling. Students will be able to expand their basic counseling skills and techniques learned in COUN 550, as well as become exposed to techniques that are unique to addiction counseling. In addition to learning assessment skills, students will learn interventions that include motivational interviewing, relapse prevention, alternative therapies, group counseling, family counseling, and others. This course will also focus on issues of ethics and prevention in counseling.

### **COUN 520 Multicultural Counseling and Relationship Development 3 Credits**

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

### **COUN 525 Gender Issues in Counseling 3 Credits**

Examines the psychological, physiological, historical, and socio-cultural factors that affect the development of women and men across the life span and discusses implications for counseling. Focuses on relevant gender issues including gender bias and equity, misdiagnosis, self-esteem, depression, violence and sexual abuse, the feminization of poverty, and the importance of relationship for women. Presents an overview of feminist psychotherapy and explores the context of the behavioral, emotional and biological problems that impact on mental health. Also discusses the emerging men's movement and trends in counseling men; introduces gay and lesbian issues, the issues of minority women, and factors in counseling the HIV/AIDS client.

**COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits**

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

**COUN 535 Holistic Wellness Counseling 3 Credits**

Based on current methods and research, students will explore holistic wellness (e.g., spirituality, self-direction, work and leisure, friendship, and love) positive psychology (e.g., hope, forgiveness, etc.), and human change from personal and interpersonal perspectives.

**Prerequisite(s):** CNPY 502.

**COUN 550 Counseling Techniques Laboratory 3 Credits**

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

**COUN 580 Elementary School Counseling Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children.

**Prerequisite(s):** To be taken semester prior to COUN 590.

**COUN 581 Secondary School Counseling Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

**Prerequisite(s):** To be taken semester prior to COUN 590.

**COUN 585 Clinical Mental Health Counseling Practicum 3 Credits**

A supervised experience in counseling and consulting techniques in mental health facility, community counseling agency, or college setting. Includes seminar discussions, interview analyses or audiotape/videotape observations, and individual supervision with the instructor. For the experienced counselor or the advanced counselor in training who desires to review and/or strengthen individual counseling and consulting techniques. A field placement of 100 hours is required with a minimum of 40 direct contact hours with clients. Students registering for this course should contact the instructor the semester prior to the course being offered.

**Prerequisite(s):** To be taken semester prior to COUN 590.

**COUN 586 Practicum II 1 Credits**

The continuation of Practicum, this 1-credit course is required for those students who were unable to complete the 100-fieldwork hours of Practicum in the fall or spring semester. Students will continue at their Practicum fieldwork site and will be responsible for completing the remainder of their 100-hours. A grade will not be granted in Practicum until the successful completion of Practicum II. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor, director, and professor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator.

**Prerequisite(s):** COUN 580 or CNSC 580 or COUN 581 or CNSC 581 or COUN 585 and all other required course work must be completed or in progress. Program director approval with professor of record approval is required.

**COUN 590 Internship in Counseling I 3 Credits**

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

**Prerequisite(s):** all other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

**COUN 591 Internship in Counseling II 3 Credits**

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

**Prerequisite(s):** COUN 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

**COUN 600 Independent Study and Research in Counseling Services 1-3 Credits**

Students may take two independent studies. However, under special circumstances, such as students seeking certifications (e.g., Student Assistance Coordinator), students may be approved by their advisor to take up to six COUN 600 3-credit courses for a total of 18 credits.

**COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits**

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

**Prerequisites:** COUN 590.

**COUN 690 Internship in Counseling Speciality I 3-6 Credits**

This internship provides on-the-job clinical experience in approved settings. Placement is selected based on students' specialty area goals and must be approved by the faculty advisor the semester prior to actual placement. Students must also submit in writing a description of clinical activities available in the field site before the placement is approved. Students will be required to attend a weekly seminar during which time each student will present and/or discuss legal, ethical, multicultural, contemporary, and clinical issues in her/his specialty area.

**CNPY 502 Theories of Counseling and Helping Professions 3 Credits**

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

**Prerequisite(s):** COUN 500 or as corequisite.

**CNPY 503 Psychological Development of the Adult and Aging 3 Credits**

Surveys psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human adult development and transitions throughout the adult life span. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the adult and aging will be examined.

**CNPY 514 Psychopathology 3 Credits**

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

**CNPY 515 Consultation in School and Agency Settings 3 Credits**

This course provides an introduction to school and agency based consultation theories and practices. Contemporary models of consultation are presented with students' emphasis on mental health, behavioral, and systems approach. In addition to the study of conceptual models, the development of skills in the consultation process in school and/or agency settings is emphasized. Students engage in behavioral consultations with consultees in approved placements.

**CNPY 516 Advanced Psychopathology 3 Credits**

An in-depth study of psychopathology with emphasis on developmental and personality disorders, and physiological disturbances. Includes assessment, classification, and treatment with emphasis on utilization in a variety of counseling and school settings. Biological, pathological, pharmacological bases of mental disorders are introduced and discussed in relationship to specific disorder classifications.

**Prerequisite(s):** CNPY514 or permission of instructor.

**CNPY 518 Counseling Children, Adolescents and Families 3 Credits**

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

**CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits**

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

**EDAD 501 Educational Leadership and Organizational Theory 3 Credits**

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits**

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDPS 502 Psychological Development of the Child and Adolescent 3 Credits**

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

**EDPS 503 Human Growth and Development 3 Credits**

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

**EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits**

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

**EDPS 521 Statistics and Quantitative Analysis 3 Credits**

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

**Prerequisite(s):** EDPS 520, EDUC 500.

**EDSO 501 Found of Counseling in Ed Settings: Referral Sources for Students and Students With Special Needs 3 Credits**

The course provides overview of the foundations of counseling in educational settings, including the historical roots; current and future trends, roles, and functions in multicultural schools and higher education settings; comprehensive developmental counseling programs; ethical school and higher education counseling practices; and individual and group counseling and consultation strategies, and evidence-based interventions and evaluations. In addition, the course will address community social services and educational-based programs (including special education and disability laws and accommodations) available to special needs students, other individuals and groups experiencing learning disabilities, and other temporary or chronic maladjustment. Reviews principles and methods utilized by social agencies, schools, and higher education settings.

**EDSO 510 Sociological and Cultural Foundations of Education 3 Credits**

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

**EDUC 500 Introduction To Research 3 Credits**

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

## Dance Education (K-12) Certificate

### Program Overview

The Post-Baccalaureate Teacher Certification Program in Dance is designed for college graduates seeking initial teacher certification as a teacher of dance in school settings. This is a streamlined, rigorous, and sequential program of professional studies that combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 151).

### Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Dance is a 21 credit graduate program requiring courses taken in late afternoons/evenings followed by a full semester of full-time student teaching.

### Certificate Offered

- Dance (K-12) Certificate

## Dance Education (K-12) Certificate Requirements

(21 credits)

Code	Title	Credits
CURR 700	Educational Foundations for Inclusive Practices	3
CURR 703	Inclusive Literacy Practices Across Content Areas	3
CURR 720	Inclusive Curriculum Design & Instruction in Secondary Schools	3
CURR 711	Pedagogy and Methodology in Dance	3
CURR 770 or CURR 771	Clinical Experience and Seminar in Teaching Supervised Clinical Experience in Teaching	9
Total Credits		21

### Additional Requirements for Completion of the Certificate:

- Completion of all courses before final clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade of better.

### CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

### CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

**Prerequisite:** CURR 700.

### CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

**Prerequisite(s):** CURR 703.

### CURR 711 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. The existing methods course in Dance for beginning teachers is cross-listed with DAN 450.

### CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

**CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

## Dance/Movement Therapy Concentration

### Program Overview

#### Program Overview

The Master of Arts in Clinical Mental Health Counseling with a Dance/ Movement Therapy Concentration is an interdisciplinary 60-credit program that prepares students for counseling positions specializing in Dance/Movement Therapy in a wide range of settings. This program meets the academic requirements for the Licensed Professional Counselor (LPC) (<http://www.njconsumeraffairs.gov/pc/Pages/default.aspx>) in New Jersey, Pennsylvania, and most other states and for the national Registered Dance Movement Therapist (R-DMT) (<https://adta.org/r-dmt-2>) through the American Dance Therapy Association (<https://adta.org>). It also meets all educational requirements for certification as a National Certified Counselor (NCC) (<https://www.nbcc.org/certification/ncc>) and Board Certified Coach (BCC) (<http://www.cce-global.org/bcc>). Master's students in their final year are provided with preparation for the National Counselor Exam (NCE) (<https://www.nbcc.org/Exams/NCE>) which is taken during their last semester at Rider.

This program combines the unique elements of dance/movement therapy with the mental health counseling tradition. In keeping with the University's core mission, all degree and certification programs are student-centered, created to be flexible to meet the needs of returning and professional students with busy lives, provide cutting-edge instruction, hands-on practice in mental health organizations and agencies, and supportive faculty who are dedicated to mentoring students. The faculty and training are focused on dance therapy, wellness counseling and positive psychology, with an emphasis on clients' strengths, rather than on deficits.

### Curriculum Overview

All students in this area of study are required to complete 60 credits of coursework and to participate in 800 hours of counseling and dance/ movement therapy fieldwork. An appropriate agency for the intern is one which provides a program of services using dance/movement therapy to help individuals function to their optimal capacity. Such programs exist in a wide variety of settings, such as mental health clinics, correctional facilities, hospital settings, family service centers, comprehensive

rehabilitation centers, social service organizations, vocational counseling programs, private counseling programs, substance abuse treatment programs, employee assistance programs, college counseling centers, and other appropriate sites.

All degree candidates must purchase student professional liability insurance.

### Accreditation Information

The Clinical Mental Health Counseling program with a Dance/Movement Therapy Concentration has been accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP) (<https://www.cacrep.org>) since 1999. The program is CACREP-accredited until October 31, 2022.

## Courses and Descriptions

### **CNDT 584 Counseling and Dance/Movement Therapy Practicum I 3 Credits**

Students develop clinical observation skills by being active participant observers in clinical field settings. Supervision class will focus on understanding the professional, legal, and ethical responsibilities of being a dance/movement therapist in clinical settings from a multicultural perspective. Issues pertaining to professional identity development will be addressed.

### **CNDT 585 Counseling and Dance/Movement Therapy Practicum II 3 Credits**

A supervised field experience in counseling and dance/movement therapy techniques. In this second semester of practicum, students will continue to advance their clinical skills by co-leading dance/movement therapy sessions with field supervision. The goal is for students to facilitate entire sessions by the end of the semester. The course will include seminar discussions, observations and analysis of the therapeutic process of dance/movement therapy sessions and individual supervision with the instructor. A total of 100 field hours is required with a minimum of 40 direct contact hours with clients. The approval and cooperation of the fieldwork agency or school field supervisor must be obtained the semester prior to the actual placement.

**Prerequisite(s):** CNDT 584.

### **CNDT 590 Counseling and Dance/Movement Therapy Internship I 3 Credits**

This course is one of two internship courses required in the student's final year. It fulfills 350 of the internship hours required by the American Dance Therapy Association and by CACREP. Students will be at a clinical site approved by faculty, with a supervisor who meets all CACREP standards and is a board certified Dance/Movement Therapist. Supervision class will support students in the clinical setting and in effectively utilizing counseling and dance/movement therapy knowledge and skills, including clinical appraisal, treatment planning, and documentation for dance/movement therapy. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

**Prerequisite(s):** All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

### **CNDT 591 Counseling & DMT Internship II 3 Credits**

The second semester of the internship that fulfills the remaining internship hours required by the American Dance Therapy Association and CACREP. Students will be at a clinical site approved by faculty, and will engage in all activities that a regularly employed staff member would be expected to perform. A regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring. Students will be under the field supervision of a supervisor who meets all CACREP requirements and is a Board Certified Dance/Movement Therapist. Supervision class will provide opportunities for students to analyze their practice, reflect on their progress as clinicians, and develop skills to internally self-evaluate their effectiveness as counselors and dance/movement therapists. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement. Prerequisite(s): CNDT 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the instructor.

### **CNDT 600 Body Mind Integration through Movement I 0 Credits**

This is a movement laboratory class to explore how dance and movement reflect and affect physical, cognitive, mental, emotional, and spiritual states. Students learn to attune to their bodies in movement and develop awareness of the bidirectional interactions between body and mind.

**CNDT 610 Dance/Movement Therapy Theory and Practice I 3 Credits**

This course covers the foundational principles, theories, and techniques of dance/movement therapy and will examine the social and cultural foundations of dance as art and medium for growth, change, and healing. Works of dance/movement therapy pioneers and the evolution of dance/movement therapy practices will be explored didactically and experientially.

**CNDT 612 Movement Observation, Analysis, and Assessment 3 Credits**

This course is designed to provide students with the language and skills to observe, describe, analyze, and document human movement patterns and behaviors using Laban Movement Analysis. The didactic and experiential format of this class will allow students to embody movements and make connections to clinical practice with various client populations. Students will learn to translate movement based terminology and dance/movement therapy goals into clinical language used in treatment plans and progress notes.

**CNDT 620 Clinical Applications of Dance/Movement Therapy 3 Credits**

Group and individual dance/movement therapy practices in various clinical settings are addressed: psychiatric hospitals, addiction recovery programs, therapeutic schools for children with emotional and behavioral problems, developmental disabilities, and special needs; hospices; and hospitals. Students develop their own working theoretical model of dance/movement therapy to guide their work as emerging dance/movement therapists.

**CNDT 700 Body Mind Integration through Movement II 0 Credits**

The second semester of the movement laboratory class focuses on the use of mindfulness practices and Authentic Movement methods for further develop body-mind awareness, to experience and observe movements simultaneously as internal and external experience, and to decipher the nature of knowledge and meaning inherent in dance and movement.

**Prerequisite(s):** CNDT 600.

**CNDT 710 Dance/Movement Therapy Theory and Practice II 3 Credits**

In this didactic and experiential course, select theories from psychology, counseling, psychotherapy, and neuroscience are studied in order to identify the healing and transformative factors of the creative arts therapies. Some of the topics covered in this course are: psychodynamics and object relations theories; intersubjectivity; symbolism and metaphor; psychology of creativity; and neuroscience in dance/movement therapy. **Prerequisite(s):** CNDT 610.

**COUN 500 Introduction to Counseling and Helping Professions 3 Credits**

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

**COUN 503 Group Counseling 3 Credits**

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

**Prerequisite(s):** COUN 500, CNPY 502.

**COUN 505 Vocational/Career Development 3 Credits**

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

**COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits**

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

**COUN 520 Multicultural Counseling and Relationship Development 3 Credits**

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

**COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits**

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

**COUN 550 Counseling Techniques Laboratory 3 Credits**

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

**CNPY 502 Theories of Counseling and Helping Professions 3 Credits**

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

**Prerequisite(s):** COUN 500 or as corequisite.

**CNPY 514 Psychopathology 3 Credits**

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

**EDPS 503 Human Growth and Development 3 Credits**

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

**EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits**

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

**EDUC 500 Introduction To Research 3 Credits**

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

## Developing People and Organizations Certificate

### Program Overview

This track is aimed at preparing students to be successful, strategic and impactful professionals who are able to work effectively through others. The program will:

- offer insight into human and organizational relationships;
- enhance the capacity for sound analytical judgment; and
- encourage the ability to see the "big picture" as it relates to an organization and its environment.

### Curriculum Overview

Coursework focuses on applied action grounded in theory, and embraces principles applicable to administrative issues in the private, public, and nonprofit sectors. The courses enable students to enhance their knowledge and skills in:

- employee recruitment
- leadership development
- group dynamics
- organizational change
- conflict management
- succession planning
- training and development
- adult learning theory

### Courses and Descriptions

#### LEAD 510 Organizations: Design and Dynamics 3 Credits

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

**LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits**

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 512 Forms of Diversity in Organizations 3 Credits**

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different “worldviews” which organizational members bring into the organization, and how that affects their ability to work together. The course develops students’ knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 531 Developing The Human Side of Organizations 3 Credits**

This course examines Strategic Human Resources Management (SHRM) within today’s organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 532 Program Design for Training and Development in Organizations 3 Credits**

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore “real world” applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 533 Conflict and Crisis Resolution in Organizations 3 Credits**

Leaders face conflict and crisis in their organizations. Being effective in their resolution is an important leadership attribute. Skills that support positive and integrative outcomes include mediation, negotiation and crisis resolution skills. This course will use multiple case studies and role-playing assignments to engage students in understanding how individuals and teams handle mediation and negotiation scenarios. The course will also use multiple case studies to enhance students’ understanding of the components of effective and ineffective leadership for crisis.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 534 Facilitation and Team Leadership 3 Credits**

This course examines the characteristics and behaviors of teams that produce good results and/or generate new ideas. The focus of the course is on how to lead high functioning teams and the development of facilitation capabilities, so that students can effectively lead teams and organizations.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

## Director of School Counseling Services Certificate

### Program Overview

The program is designed for school counselors who wish to be certified as director of school counseling services. The Director of School Counseling Services endorsement authorizes the holder to serve as a director, administrator or supervisor of school counseling services, including the supervision of educational activities in areas related to and within the counseling program in grades preschool through 12.

### Curriculum Overview

The applicant’s academic and professional background are assessed in terms of state certification requirements (<http://www.state.nj.us/education/educators/license/endorsements/0602S.pdf>) in order to determine an appropriate plan of study, however, three courses are typically required.

(9 credits)

Three courses are typically required. Students are advised to consult with their advisor.

Code	Title	Credits
CURR 531	Strategies for Curriculum Development, Innovation and Change	3
EDAD 501	Educational Leadership and Organizational Theory	3
EDAD 505	Supervisor/Teacher Leadership for Improved Instruction and Student Learning	3
or COUN 660	Counseling Supervision: Issues, Concepts and Methods	

## Courses and Descriptions

### **CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits**

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

### **EDAD 501 Educational Leadership and Organizational Theory 3 Credits**

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

### **EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits**

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

### **COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits**

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

**Prerequisites:** COUN 590.

## Doctor of Educational Leadership

### Program Overview

Rider's Doctor of Educational Leadership brings together passionate and experienced educators to collaboratively study the complex and pressing issues facing students and teachers today – and to develop practical, evidence-based solutions to respond to those issues through action research.

The **36-month, 51-credit program** involves two years of coursework and a year of dissertation research and analysis. Hybrid (online and on-campus) studies and summer residencies enable education professionals to pursue the degree without career interruption.

The goal of Rider's Ed.D. program is to prepare skilled professionals who use research and scholarship to inform their leadership and decision making. Through the required coursework, you will develop a greater understanding and sense of context for today's major educational challenges, including:

- Educational reform
- Instructional leadership
- Educational accountability and assessment
- Research methods and data analysis
- Social context of education
- Politics and governance
- Teachers and teaching
- Resource allocation and deployment

### Curriculum Overview

Much of the program's coursework will relate to issues facing your own school, district or college, giving you practical knowledge and insights that you can apply every day to your work. Early in the program, you will learn how action research can be used to determine needs and options, and begin working with members of the doctoral faculty to identify a potential problem, issue or opportunity of interest to you. You will then implement and evaluate your own dissertation change project.

As an added feature of our program we are currently offering our candidates the option to take a concentration of four courses focused on higher education. See the Concentration tab for the coursework related to this option.

## Carnegie Project on the Education Doctorate Rider has been invited to become a member of the prestigious Carnegie Project on the Education Doctorate

The **Carnegie Project on the Education Doctorate** (<https://www.cpedinitiative.org>) (CPED) includes over 100 colleges and schools of education, which have committed resources to work together to undertake a critical examination of the doctorate in education (EdD) through dialog, experimentation, critical feedback and evaluation.

### Vision

The Vision of the Carnegie Project on the Education Doctorate (CPED) is to inspire all schools of education to apply the CPED framework to the preparation of educational leaders to become well-equipped scholarly practitioners who provide stewardship of the profession and meet the educational challenges of the 21st century.

### Mission

The Mission of the Carnegie Project on the Education Doctorate (CPED) is to strengthen, improve, support and promote the CPED framework through continued collaboration and investigation.

### The Framework

Through a collaborative, authentic process, members of CPED developed a Framework for EdD program design/redesign that supports creating quality, rigorous practitioner preparation while honoring the local context of each member institution. The CPED Framework consists of three components—a new definition of the EdD, a set of guiding principles for program development and a set of design-concepts that serve as program building blocks.

Members enter the Consortium at points of considering a new EdD. As they engage in the Consortium, they utilize this Framework to design/redesign, evaluate and improve their programs. As such CPED members are often at different levels in the design/redesign process.

### Guiding Principles for Program Design

With this understanding, we have identified the following statements that will focus a research and development agenda to test, refine, and validate principles for the professional doctorate in education. The professional doctorate in education:

1. Is framed around questions of equity, ethics, and social justice to bring about solutions to complex problems of practice.
2. Prepares leaders who can construct and apply knowledge to make a positive difference in the lives of individuals, families, organizations, and communities.
3. Provides opportunities for candidates to develop and demonstrate collaboration and communication skills to work with diverse communities and to build partnerships.
4. Provides field-based opportunities to analyze problems of practice and use multiple frames to develop meaningful solutions.
5. Is grounded in and develops a professional knowledge base that integrates both practical and research knowledge, that links theory with systemic and systematic inquiry.
6. Emphasizes the generation, transformation, and use of professional knowledge and practice.

## Standards-Based Studies

The curriculum is built around the National Policy Board for Educational Administration's student-centric 2015 Professional Standards for Educational Leaders ([http://npbea.org/wp-content/uploads/2017/06/Professional-Standards-for-Educational-Leaders\\_2015.pdf](http://npbea.org/wp-content/uploads/2017/06/Professional-Standards-for-Educational-Leaders_2015.pdf)) (formerly known as the ISLLC Standards).

Prepared for and by educational leaders, the standards focus on 10 high-impact areas that drive and measure excellence in professional practice:

1. Mission, Vision and Core Values
2. Ethics and Professional Norms
3. Equity and Cultural Responsiveness
4. Curriculum, Instruction and Assessment
5. Community of Care and Support for Students
6. Professional Capacity of School Personnel
7. Professional Community for Teachers and Staff
8. Meaningful Engagement of Families and Community
9. Operations and Management
10. School Improvement

## Program Format

A defining element of this innovative doctoral program is its cohort model of 10 to 12 students. This design creates a highly supportive and interactive learning environment that promotes peer-to-peer learning and networking, as well as close mentoring relationships between faculty and students. The coursework is progressive, with each class building the knowledge base.

## Program Features

- **Flexibly designed** around the schedules of working professional educators
- **Asynchronous online classes** throughout each semester
- **Three on-campus Saturday sessions** (9 a.m. – 3 p.m.) each fall and spring semester
- **8-day summer residencies in July** (2 consecutive weeks, Monday through Thursday)

## The Online Experience

Your online courses will be asynchronous, enabling you to complete most of your course assignments and activities at the time and place that's best for you. For example, discussion board question responses can be posted and assignments submitted at a time that is convenient (as long as the activity is completed by the stated due date).

Real-time, interactive e-sessions will be scheduled periodically. Over the course of your studies, peer-to-peer and faculty interactions will include such activities as team projects and special presentations. (*Note: Web cam access will be needed for these sessions.*)

One-to-one access to our doctoral faculty is a critical part of the program. Your professors will be available for meetings on-campus, as well as by phone or streaming video. Each semester, your professors will interact with you by phone and email, participate actively in discussion boards and webinars, and provide feedback on assignments.

You will be assisted in all your scheduling and registration needs, as well as planning your coursework and maintaining academic progress based on your goals (a minimum 3.0 GPA is required for the doctoral program). You also will have full access to services and resources of the University.

Courses

**EDLD 800 Strategic Management, Organizational and Moral Leadership Behavior in a Culture of Learning 3 Credits**

This course will challenge students to embrace a system view of leadership and organizational change at the organizational level. Students will compare, contrast and critique theories and models of organizational learning, knowledge creation, and organizational capacity building and apply them to their own organizational settings. The course will focus on three leadership standards: instructional leadership, operational and managerial leadership, and professional culture. While the course will focus on conceptual frameworks and theory, it is a practice-based course. The course will enhance student ability to think systematically and develop comprehensive understanding of core competencies required to lead, initiate and sustain change in organizations. It investigates process and content issues of team building, interpersonal and group relations, and effective problem solving and decision making skills in collaborative environments. The course emphasizes the moral, ethical and social responsibilities of organizational leaders, as well as the application of principles to organizational leadership behavior and decision-making. Students will also investigate current research trends regarding ethical issues in education and other organizational contexts.

**Prerequisite(s):** Master's Degree.

**EDLD 801 Action Research: Principles and Methods 3 Credits**

This course provides an introduction to action research, with emphasis on its application in educational settings. The course covers definitions and purposes of action research. Students will explore theoretical, methodological, and ethical issues pertinent to action research. During the course, students will engage in an action research project in an educational setting.

**Prerequisite(s):** Master's Degree.

**EDLD 802 Educational Change, Systemic Reform, Exercising the Politics of Change 3 Credits**

This course will provide students with the skills necessary to achieve educational reform and improvement while navigating the political environment within educational institutions. Through this course, students will analyze various theories and how these ideas apply to education, organizations, change, and leadership.

**Prerequisite(s):** Master's Degree.

**EDLD 803 Instructional Leadership and Educational Reform 3 Credits**

Through this course, students will examine contemporary educational practices and their relationship to leadership theories, models, and strategies. Participants will investigate research based instructional practices and develop the skills necessary to identify issues within organizations in suburban and urban settings. The course will provide students with a deep knowledge of the educational challenges faced by educational leaders in today's society. The focus will be on learning a successful organization through the implementation of research based strategies.

**Prerequisite(s):** Master's Degree.

**EDLD 804 Community Building and Sustaining Community Partnerships 3 Credits**

Drawing on philosophies/theories, processes, and practices that build and sustain effective school-community partnerships, this course addresses the identification and utilization of community resources and the development of effective intra- and inter-organizational strategies, community linkages, and collaborative efforts necessary to provide for the holistic needs of students and families. Special attention is focused on the role of school leaders in planning and implementing community-wide and building level communications and involvement networks, through the development of practical action learning sets and tools. Building Commitment: How do leaders build and use public awareness and commitment to support their schools?

**Prerequisite(s):** Master's Degree.

**EDLD 805 Valuing Diversity/Equity: Developing and Fostering a Community of Learners 3 Credits**

The focus of the course is academic excellence with equity. The value orientation of the course is toward high-quality developmental outcomes for youth of all racial, ethnic, and social class backgrounds. With an emphasis on students of color and youth from less-advantaged families, the course explores several policy and strategic responses to achievement disparity: identify and work to remove key structural barriers to educational equity; excellence with equity goals; design more effective policies and practices to improve the quality of teaching; support families with ideas and practices for parenting children more effectively; engage youth to reshape their culture of achievement to align with their most positive values. The course explores theories, evidence, designs, methods, and mechanisms associated raising achievement and closing gaps.

**Prerequisite(s):** Master's Degree.

**EDLD 806 Research Proposal Development 3 Credits**

This course builds on the action research course to more clearly define the rationale and procedures of educational and social science research. The course is designed for our first-year doctoral students. Topics will include the nature and purpose of research, planning and conducting research, critiquing and evaluation research, sampling, survey and experimental design, evaluation research, naturalistic observation and inquiry, measurement and methods of data collection, ethics, and the use of computers in data analysis. Methods are considered for collecting both quantitative and qualitative data. Students will build on prior project ideas, concepts, and research practice to more fully develop into their Dissertation of Practice topic. This course has two objectives: to increase participants' knowledge of methods for making causal inferences in quantitative research, and to provide participants with a forum for presenting and receiving feedback on their research topic for the Dissertation of Practice.

**Prerequisite:** Master's Degree.

**EDLD 807 Law and Policy 3 Credits**

This course explores legal, ethical and politics issues governing PreK-12 education in America and the legal responsibilities and powers of state and local governing bodies and individuals that arise in elementary and secondary schools. Emphasis is given to federal and state statutes and case law affecting due process, liability, equal protection, and the rights of teachers and students in order to better understand the risks in education management and possible strategies to reduce those risks. The course will explore evolving legal standards on a variety of issues. The course will draw on real cases and legal/policy dilemmas that practitioners face, and focus on preventive law - providing current and future school learners with knowledge and skills they will need to make sound decisions, advance important educational objectives, and minimize legal problems.

**Prerequisite:** Master's Degree.

**EDLD 808 Generating, Using, and Assessing Data Accountability and Student Assessment 3 Credits**

This course will develop the skills necessary for educational leaders to identify and define problems, implement data collection methods, and analyze, interpret, and report data across multiple levels from the individual student to the larger system. Students will gain the knowledge and skills to use data in decision making within a problem solving framework that enables evaluation of instructional programs and practices. Within this course, students will engage in activities designed to enhance skills in data-based decision making, including: large and small group discussion; review of the extant literature base; review and use of different technologies and statistical methods for data collection and analyses; case studies and simulated data analyses; and application of skills in real world settings. Attainment of these skills will prepare the student for the dissertation process to serve as an instructional leader in the field. The course references and aligns with state adopted core curriculum content standards and professional development standards, the Standards for Schools Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite:** Master's Degree.

**EDLD 809 Finance, Fundraising and Fiscal Management 3 Credits**

Financial and managerial leadership of a school building or district is a primary factor in the success or failure of school instructional programs. This course provides an opportunity for public and private school practicing and prospective administrators to gain an understanding of their role in these critical areas. Providing the resources to fund academics/instruction/athletics, facilities and capital projects is a focus of this course. A comprehensive understanding of the financial implications of systemic reform, centralized goal setting, accountability standards, and decentralized forms of site-based management, school choice, and charter schools will be a focus of study. This course will also provide a comprehensive overview of fund raising. Students are provided with an ethical foundation and are introduced to basic terminology and concepts in the field. Various fund raising vehicles are surveyed and participants learn to apply fund raising strategies that are appropriate to their organizational setting.

**Prerequisite:** Master's Degree.

**EDLD 810 Curriculum Leadership: Transforming Teachers/Developing Teacher Talent 3 Credits**

This course will focus on the complex nature of teaching and learning and provide participants with the skills necessary to guide instructional practice. Adult learning theory will be examined as will curriculum theories, instructional practices, professional development, and human capital.

**Prerequisite:** Master's Degree.

**EDLD 811 Innovation and the Use of Educational Technology 3 Credits**

This course addresses the intersection of organizational change and educational technology. Students will develop a philosophy of educational technology and explore related issues in policy, diversity, ethics, and evaluation. The course also covers research and theory on organizational change and processes for developing a culture of innovation. Students will apply theories of organizational change to the implementation and use of technology in educational contexts.

**Prerequisite:** Master's Degree.

**EDLD 812 Leading Programs for Diverse Learners and At Risk Students 3 Credits**

This course examines some of the best practices for supporting diverse learners and at-risk students and some of the reasons behind the intrinsic and bureaucratic/policy barriers that may hinder their success. Schools are faced with an increasing number of diverse learners and at-risk students who require additional academic, social and/or medical supports for them to achieve success. This course will examine the root causes that may hinder student success and some of the programs and approaches that have proved successful in meeting their needs.

**Prerequisite:** Master's Degree.

**EDLD 813 Dissertation of Practice I 3 Credits**

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research.

**Prerequisite:** Master's Degree.

**EDLD 814 Dissertation of Practice II 3 Credits**

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice I.

**Prerequisite(s):** Master's Degree.

**EDLD 815 Dissertation of Practice III 3 Credits**

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice II.

**Prerequisite(s):** Master's Degree.

**EDLD 816 Dissertation of Practice IV 3 Credits**

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice III.

**Prerequisite(s):** Master Degree.

**EDUC 525 The Higher Education Organization 3 Credits**

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

**EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits**

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

**EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits**

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

**EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits**

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

## Early Childhood Education (P-3) Certificate

### Program Overview

The Post-Baccalaureate Teacher Certification Program in Early Childhood Education (P-3) is designed for college graduates seeking initial teaching certification. This is a streamlined, rigorous, and sequential program of professional studies that combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 151).

### Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Early Childhood Education (P-3) is a 24 credit graduate program requiring five courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

## Certificate Offered

- Preschool through Grade 3 (P-3) Certificate

## Contact

**Associated Department:** Department of Graduate Education, Leadership, and Counseling (<https://www.rider.edu/academics/colleges-schools/college-education-human-services/graduate-programs>)

### Related Programs

- Teaching (M.A.T.) (p. 151)

## Early Childhood Education (P-3) Certificate Requirements

Code	Title	Credits
CURR 700	Educational Foundations for Inclusive Practices	3
ECED 532	Issues and Challenges in Early Childhood Education	3
CURR 702	Early Literacy Development for Diverse Learners	3
ECED 550	Development Methods and Assessment in Early Childhood Education	3
CURR 710	Math Methods for the Inclusive Elementary Classroom	3
CURR 770 or CURR 771	Clinical Experience and Seminar in Teaching Supervised Clinical Experience in Teaching	9
Total Credits		24

### Additional requirements for completion

- Completion of all courses before the clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

## Courses and Descriptions

### **CURR 700 Educational Foundations for Inclusive Practices 3 Credits**

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

### **CURR 702 Early Literacy Development for Diverse Learners 3 Credits**

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

**Prerequisite(s):** CURR 700.

### **CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits**

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

### **CURR 770 Clinical Experience and Seminar in Teaching 9 Credits**

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

### **CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

### **ECED 532 Families, Community, and Diversity in Early Childhood Education 3 Credits**

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

**Prerequisite(s):** EDU 106 and EDU 206.

**ECED 550 Development Methods and Assessment in Early Childhood Education 3 Credits**

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.

**Prerequisite(s):** EDU 106 and EDU 206.

**Educational Leadership (M.A.)****Program Overview**

The program in Educational Leadership at Rider University prepares candidates for leadership positions at different administrative levels in elementary and secondary schools, colleges and related educational organizations. All programs are accredited by NCATE/CAEP. The program has been designed to be developmental and experiential in nature, fostering ethical behavior and the improvement of self and one's profession. Candidates are prepared for leadership opportunities in a collegial and collaborative academic environment that promotes inquiry and discovery, personal growth and initiative, and professional development. The Option Sequences build upon and reference the Professional Standards for School Leaders 2015, and the Standards of the National Policy Board for Educational Administration.

**Preparing Principals for New Emerging Needs**

Rider's Educational Leadership program recognizes that it is principals who are best positioned to lead the effort in their schools to ensure that teaching and learning are as excellent as possible. Principals who have a school-wide focus on better teaching and learning, who know how to create a vision and share authority, and who are prepared to be accountable for achieving the school's educational goals, are vital to ensuring the quality of our children's education. The professionals in the College of Education and Human Services work with the program's participants to develop and evaluate curricula, use data to diagnose student needs, coach teachers, plan professional development in their schools, and establish school-wide norms that support high quality teaching and learning.

**Curriculum Overview**

Leading to a Master of Arts in Educational Leadership, the Principal Leadership program's cohort-based, executive-style format brings educational peers together to study, network and learn as a unit throughout the program. Participants engage in online classes during the school year and attend two residencies on Rider's Lawrenceville campus each summer. The program's flexible, blended learning format recognizes the demands of the teaching profession while maintaining the rigors of a quality leadership training program. Participants pursue their graduate studies without interrupting their professional and personal

responsibilities. Candidates complete their graduate studies in two years, and are eligible to apply for both the principal and supervisor certificates.

**Educational Leadership Highlights**

The 36-credit program of study consists of 12 courses that focus on three areas of leadership:

- personal leadership
- instructional leadership
- school culture leadership

An accomplished and distinguished faculty whose members bring deep practical and theoretical knowledge to their disciplines lead the program. There is close integration of coursework and fieldwork, using techniques such as case studies, problem-based learning and journaling to encourage continuous reflection about the connections between theory and practice. The curriculum heavily emphasizes teaching and learning, school redesign and collaborative decision-making. Relevant field-based experiences (Leadership Growth Projects) are also integrated throughout the program of study, beginning with the very first course.

**Planned Internship Experiences**

This year-long aspect of the program emphasizes both the management and instructional facets of leadership for increased student performance. Coordinated by the program director at Rider and a school-based mentor, participants develop the skills needed to strategically transform public schools that prepare students for college and career success.

**Degree Offered**

- M.A. in Educational Leadership

<sup>1</sup> This course should be taken in the fall semester.

<sup>2</sup> This course should be taken in the spring semester.

Notes:

1. Meet general master's degree requirements.
2. Candidates will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.
3. Reference the ISLLC and ELCC Standards throughout the program.
4. Develop and refine the personal leadership platform statement throughout the program.
5. Complete a 9–12 hour standards and outcome-based growth project in each class and a 300 hour “capstone internship” in the Seminar/Practicum courses in Educational Leadership (EDAD 591/EDAD 592). Teacher Leadership candidates need only complete a 150 hour “capstone internship” in the Seminar/Practicum course EDAD 510.
6. Submit an electronic Leadership Growth Project Portfolio.
7. Complete a comprehensive standards-based self-assessment.
8. Complete a “Capstone School Improvement/Change Project.”

## Courses and Descriptions

### **CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits**

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

### **CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits**

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531.

### **CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits**

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531 and CURR 538.

**EDAD 501 Educational Leadership and Organizational Theory 3 Credits**

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits**

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDAD 507 Education and the Law 3 Credits**

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits**

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 505.

**EDAD 514 School Finance and Fiscal Management 3 Credits**

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 501.

**EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits**

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 501 and EDAD 514.

### EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

### EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

**Prerequisite(s):** EDAD 591.

### EDUC 515 Issues in American Schools and Society 3 Credits

This course is designed to examine contemporary educational issues impacting on schools and to re-examine the purposes of schooling in a democratic society. Students will explore current and emerging policy issues and the demands for reform in schools and districts. Emphasis will be placed on identifying and developing politically feasible responses to policy issues and procedural problems facing educational leaders today. The role of the leader in promoting the development of a collaborative institutional culture and climate and the identification of best-practice strategies to involve community stakeholders in the development of policies and programs will be emphasized. Effective communication models for use within the school, district and greater community and the use of different media and technology formats will be examined and evaluated. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

## Elementary Education (K-6) Certificate

## Program Overview

The Post-Baccalaureate Elementary Education Teacher Certification Program is designed for college graduates seeking initial teacher certification as a teacher in elementary school settings. This is a streamlined, rigorous, and sequential program of professional studies that combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 151).

## Curriculum Overview

The Post-Baccalaureate Elementary Education Teacher Certification Program is a 21 graduate credit program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

## Certificate Offered

- Elementary Education (K-6) Certificate

### Related Programs

- Teaching (M.A.T.) (p. 151)

## Elementary Education (K-6) Certificate Requirements

Code	Title	Credits
CURR 700	Educational Foundations for Inclusive Practices	3
CURR 702	Early Literacy Development for Diverse Learners	3
CURR 710	Math Methods for the Inclusive Elementary Classroom	3
CURR 715	Inclusive Elementary Science, Arts, & Social Studies Teaching	3
CURR 770 or CURR 771	Clinical Experience and Seminar in Teaching Supervised Clinical Experience in Teaching	9
Total Credits		21

### Additional requirements for completion

- Completion of all courses before final clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

## Courses and Descriptions

### **CURR 700 Educational Foundations for Inclusive Practices 3 Credits**

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

### **CURR 702 Early Literacy Development for Diverse Learners 3 Credits**

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

**Prerequisite(s):** CURR 700.

### **CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits**

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

### **CURR 715 Inclusive Elementary Science, Arts, & Social Studies Teaching 3 Credits**

This course provides aspiring elementary school teachers with a variety of developmentally appropriate options for designing, implementing, and evaluating curriculum and instruction in science, social studies, and the arts. Using NJ Student Learning Standards, emphasis is placed on inclusive practices and differentiation of instruction (e.g., modifying curriculum planning, learning environments, and instructional materials, content, processes, and products), curriculum integration, thematic unit and lesson planning, various teaching strategies, hands-on learning experiences, inquiry learning, career readiness skills, higher-order thinking, reflective practice, and various assessment strategies. Other facets of teaching also are addressed or reviewed in the course. These include the characteristics and needs of students with disabilities motivation, classroom management, and becoming a team member of a school faculty. Candidates also refine their pedagogical knowledge and skills by participating in the modification of instruction to meet the needs of diverse learners in nearby school settings.

### **CURR 770 Clinical Experience and Seminar in Teaching 9 Credits**

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

### **CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

## Endeavor STEM Concentration

### Program Overview

The Master of Arts in Teacher Leadership with a STEM concentration seeks students who wish to enhance their knowledge and ability to deliver content instruction and further develop their leadership skills in

educational settings. This program is designed to be developmental and experiential in nature, fostering ethical behavior and the improvement of self and one’s profession.

Participants who complete the full master’s degree will acquire both content knowledge and the skills needed to be effective teacher leaders in their schools and school districts. The full master’s degree program includes both the 21 credit Teacher Leadership core and 15 credits in approved STEM courses. A Capstone Project demonstrating the ability to develop and practice teaching and shared leadership skills is a requirement of this concentration.

## Curriculum Overview

Developed as a partnership between Rider University and the U.S. Satellite (Endeavor) Laboratory, the Master of Arts in Teacher Leadership with a STEM concentration is designed to prepare experienced STEM teachers to assume a greater leadership role in their schools, and share their skills and knowledge while remaining active in the classroom.

## Degree Offered

- M.A. Teacher Leadership with a STEM Concentration

## Courses and Descriptions

### CURR 517 Teaching and Learning Number and Operations 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students’ mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children’s thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

**CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

**CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits**

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Content and Mathematical Practices.

**CURR 520 Teaching and Learning Geometric Understanding 3 Credits**

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

**CURR 522 Teaching and Learning Measurement and Data 3 Credits**

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

**CURR 640 Teaching and Learning Physical Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected physical science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 641 Teaching and Learning Life Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 642 Teaching and Learning Earth and Space Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 643 Engineering Solutions to the Challenges of Contemporary Science Issues 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 644 Teaching and Learning Chemical Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be placed on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

**CURR 660 Authentic Data in the Elementary STEM Classroom. 3 Credits**

Young learners can think deeply about content and make meaningful connections between their experiences, natural phenomena, and authentic data when teachers integrate data in purposeful ways. In this course, teachers construct student-centered STEM investigations integrating real-world scientific and mathematical data and build their understanding of the theoretical basis for this work. Participants gain knowledge of STEM resources, learn to access entry points for STEM in elementary classrooms and foster engaging contexts, like engineering, coding, and NASA mission exploration. Teachers explore the synergies between Common Core State Standards and Next Generation Science Standards for a productive and exciting learning environment that prepares students for ongoing interest in STEM. This course is recommended as a foundation for the STEM certificate program.

**CURR 661 Authentic Data in the Secondary STEM Classroom 3 Credits**

Middle and High School students are capable of deep sense making when teachers utilize engaging STEM classroom practices to teach content with authentic data connections. In this course, teachers learn to apply research-based best practices central to today's classrooms. In a collaborative professional learning environment, they build knowledge of resources for accessing, analyzing, and making use of authentic data in meaningful activities. Coursework includes planning student-centered lessons that integrate data, building cultural relevance with engaging phenomena, and developing meaningful assessments for STEM activities. Participants identify how to integrate engineering design into the STEM classroom and learn how to represent the Nature of Science as students develop conceptual understanding and apply critical thinking to real-world decisions. A library of content rich lessons becomes available to all participants through a shared online community. This course is recommended as a foundation for the STEM certificate program.

**CURR 662 Eyes on Earth: Teaching Earth Science from Space (PK-8) 3 Credits**

This course will take participants through a journey about space exploration and specific NASA missions that examine components of earth. Participants will learn science content grounded in Earth's Lithosphere, Hydrosphere, Atmosphere, and Biosphere. By learning to use authentic data from NASA and other sources participants will experience an exploratory approach to learning about the Earth, and then bring these experiences to their own classrooms. Teachers will utilize several web-based tools and real-time data along with the three-dimensional learning in the Next Generation Science Standards to create lessons that can be used directly in the classroom.

**CURR 663 Lessons from the Ocean: Science on the Water Planet (Grades 2-12) 3 Credits**

Bring the ocean into your classroom by using Earth's waters as a context for standards-based STEM content. The ocean is critical to the functioning of the Earth system, and is an authentically integrated context for learning about topics such as density, weather and climate, heat transport, environmental issues, biogeochemical cycles, mathematics, and much more. Access a myriad of data sets to apply science concepts and make connections between the ocean and atmosphere, living and nonliving parameters, and life on land, as well as in the deep sea. Use the context of the ocean to teach Next Generation Science Standards topics with deep understanding and meaning for learners.

**CURR 664 The Arts in STEM: Advancing Meaningful Integration (K-12) 3 Credits**

Apply art in the context of exciting STEM concepts and learn to integrate art, science, math, technology, and engineering in more meaningful ways in your classroom. At the core of the STEM Education movement are critical thinking, creativity, problem solving, and authentic learning environments that engage diverse students in meaningful ways with content. The many mediums for art and artistic expression are a valuable component of communication and expression. Scientists and researchers at NASA and across the globe use myriad forms of art in their work. This course invites students to take a close look at the incorporation of art in the STEM classroom and provides resources, exemplars, and access to collaborative support for arts integration.

**CURR 665 Climate Change with NSF SPRINTT 3 Credits**

Award-winning curriculum and eloquent, online student investigations help students study science concepts emphasized in the Next Generation Science Standards, in the context of Earth's Polar Regions to better understand the complexity of Earth's climate and how it is changing. View the Earth using real scientific data from satellites and western researchers. Then, consider the lens of indigenous peoples of the Arctic. Examine tons of data and changes in ice, permafrost, weather patterns, biological change, and more as you conduct research with simple-to-use, web-based instructional tools, using authentic data sets and models to study our planet's past, present, and future climate. Interdisciplinary investigations address many Common Core State Standards in reading, writing, science, and technical subjects as well as mathematics in the context of climate science.

**CURR 666 Exploring Mars: A New Twist on Science (or Math) 3 Credits**

Use a wealth of data sets and technological tools to explore and understand features of Earth's neighbor, the Red Planet. Look for and study the physical and chemical evidence of water and ice; compare erosion patterns on Mars and Earth; and make inferences about the planet's history as you study both its geologic features, including volcanoes and craters, and the physics of the atmosphere. Teach Next Generation Science Standards topics in Earth, physical, and chemical science integrating mathematics, in the context of Mars using recent data from Curiosity Rover and other missions.

**CURR 667 Physical Science in Motion: Classroom Applications 3 Credits**

Physical science, when applied, makes tough-to-understand concepts easy and fun. Participants learn to solve problems relating to one-dimensional motion; become acquainted with and apply Newton's Laws of Motion and equilibrium of forces; learn about constant acceleration and gravitational acceleration; investigate concepts in aerodynamics; and learn about two-dimensional motion. Participants will use free, simple-to-use, software simulations from NASA Glenn Research Center, which help to present these concepts for you, and, then, your students, in the context of aeronautics, including airplane design, rocketry, sports, and more. A carefully developed resource page provides access to excellent resources and engaging activities for implementing course content in your classroom with important connections to Next Generation Science Standards and Common Core mathematics.

**CURR 668 Coding, Robotics, and 1:1 Devices 3 Credits**

Learn applications of Coding as a mathematics pedagogy, explore opportunities for Robotics, and learn cutting-edge implementation of One-to-One Devices (1:1) in K-12 classrooms. Participants learn about and explore best practices in the newest learning pedagogies and technologies. Whether you are already involved, or looking to integrate these cutting-edge tools and strategies for the classroom, you will begin to expand your reach for enhancing student learning. Scaffolded to allow success at all grade levels, Coding, Robotics, and 1:1 Devices offers resources for application into elementary, middle, and high school. Participants will interact with no-fee computer programming, robotics opportunities, and the latest uses of devices. All participants have the opportunity to work with innovative technologies and interact with talented educators, practitioners and special guests who are already making a difference in K-12 classrooms.

**CURR 669 Culturally Relevant Pedagogy in the STEM Classroom 3 Credits**

Classrooms comprise individual learners, each bringing their own culture and experiences to the learning environment. The value and strength of diversity has become increasingly described in educational literature. This course introduces teachers to the curriculum and pedagogical issues relevant to race, language, gender, and socio-economic differences. Participants apply content and pedagogy involving science and mathematics contexts for effective learning. STEM activities will integrate meaningful, engaging practices for teaching diverse learners. The course is differentiated for elementary and secondary school educators to provide relevant connections, to be directly applied, in each participant's classroom.

**CURR 670 Life and Marine Science: Tracking Live Marine Animals 3 Credits**

Follow marine animals (e.g., polar bears, sea turtles, sharks, and whales) in real-time, and apply life and Earth science topics to the ocean. Study topics such as ecosystems, biodiversity, cell structures, food webs, and conservation, as you make connections to ocean currents, seafloor features, density and more. Discover the importance of the ocean to humans, as well as our impacts, both positive and negative, on marine environments. The in-depth use of data lends itself to Next Generation Science Standards by integrating instructional technology with life, Earth and physical science.

**CURR 671 Life in Space: NASA ISS and Astrobiology 3 Credits**

The International Space Station (ISS) is an amazing undertaking comprising technology, engineering, science and math—the perfect context for exciting students for learning. NASA research leads to technological advances on Earth and in human space exploration. As NASA plans for manned missions to Mars, scientists explore our solar system and beyond for determining if and where life could exist. Extremophiles are fascinating for teaching Earth science in a context for astrobiology research. The course explores how space travel impacts the human body; growing food in space; engineering protection from radiation, and searching for habitable environments. With its application of subject matter, it offers excellent resources and interactions with NASA scientists, and data for educators to bring the exciting context of space travel to the classroom.

**CURR 672 Math Connections to STEM Education 3 Credits**

The course introduces a wealth of applied mathematics exercises and activities relevant to integrated STEM assets and science activities. Some are in the realm of topics seen in Earth and Space science and physics. Live presenters break down authentic examples and projects, and demonstrate to educators how problems incorporate Common Core State Standards-based mathematics with applications that meet Next Generation Science Standards performance expectations. Educators survey math and science examples and tools as the course promotes the use of applied mathematics in science, or science in mathematics, to meet content goals in the classroom.

**CURR 673 NASA Astronomy and Space Science 3 Credits**

Harness your students' enthusiasm for space and astronomy by using astronomical images to enrich your physical, Earth, and life science courses. Measure the speed of an asteroid, learn about erosion on Mars, and see the tracers of life that are visible from space. In this course, we explore the many ways in which real data from NASA's space science and astronomy missions can be used to teach math and science content in your classroom, meeting science and math standards in Next Generation Science Standards and Common Core State Standards. Through the use of cutting-edge technology tools, and with a NASA scientist visiting our class, you will not only learn more about the universe, you will learn how to bring the universe into your education context.

**CURR 674 NASA Physics for Real Beginners: Earth, Moon, and Space 3 Credits**

Gain an introduction to physics in this conceptual course that uses NASA's space initiatives as the context for content. Learn about gravitation between celestial bodies, how to get a satellite into orbit, what it takes to blast off into space, and more. This course will discuss these and related topics while exploring NASA content related to space and the Hubble Space Telescope and Kepler Missions. Bring cutting-edge examples to your classroom while addressing Next Generation Science Standards performance expectations.

**CURR 675 Reading and Writing in the Science Classroom 3 Credits**

Discuss and analyze the ways that literacy and science connect in the science classroom, and highlight how reading and writing can be used to increase students' understanding of science content. Focus on how to integrate important literacy skills from Common Core State Standards in your science and STEM classroom to address content standards from Next Generation Science Standards. Cutting-edge strategies and well-founded principles pave the way to success with non-fiction reading material. The manner in which information and scientific content is presented shapes student success, not just for reading, but student writing, organization, and presentation.

**CURR 676 The E in STEM: Meaningful Content for Engineering 3 Credits**

Learn how to use engineering to make your classroom come alive. Bridge and teach math and science concepts through exciting applications in the Engineering Design Process where you and your students design, test, and evaluate models and real-life applications. Activities are hands-on and emphasize the reciprocities between science, technology, engineering, and mathematics in formal design challenges. Educators enrich classroom curriculum with elements of design in science, mathematics, or technology activities, addressing important Next Generation Science Standards' engineering design practices.

**CURR 677 WDLC - Weather Data Learning Center 3 Credits**

Use weather data to teach and learn math. This course teaches content in a math curriculum that uses weather data. Weather Data Learning Center demonstrates increases in student performance in grade 4 mathematics. Collect, access, and interpret current real-time imagery, maps and data. Make connections from weather to learn Common Core-based mathematics using various STEM pedagogical strategies. Learn the basics of clouds, air masses, humidity, fronts, pressure, jet stream, and climatic patterns as you apply these ideas to math concepts such as measurement, fractions, number sense, data collection, and analysis.

**CURR 678 Action Research in the STEM Classroom 3 Credits**

A Capstone Course requirement "option", this course may be part of joint Master's Degree programs, or Endeavor's "5-course" certificate program earning Research Distinction and an award.

**CURR 679 Practicum in STEM Leadership 3 Credits**

Share your knowledge of STEM teaching and learning with colleagues in your building, district, or region.

**CURR 680 STEM Leadership Seminar 3 Credits**

The course contains STEM pedagogical content knowledge, incorporating authentic data and using technology as a tool for learning. The course provides a springboard for cultivating problem solving skills, inspiring student research projects, and integrating STEM methods and essential principles addressed in new standards.

## Endeavor STEM Professional Development Certificate

### Program Overview

The Endeavor STEM Professional Development Certificate is a 15 credit experience. Participants will complete 5 approved online courses. The courses are designed to enhance knowledge and ability to deliver instruction in Science and Math content. The Endeavor STEM Professional Development Certificate is appropriate for a wide range of educators looking to share their knowledge with a classroom, school or district.

## Courses and Descriptions

**CURR 517 Teaching and Learning Number and Operations 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

**CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

**CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits**

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Content and Mathematical Practices.

**CURR 520 Teaching and Learning Geometric Understanding 3 Credits**

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

**CURR 522 Teaching and Learning Measurement and Data 3 Credits**

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

**CURR 640 Teaching and Learning Physical Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected physical science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 641 Teaching and Learning Life Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 642 Teaching and Learning Earth and Space Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 643 Engineering Solutions to the Challenges of Contemporary Science Issues 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 644 Teaching and Learning Chemical Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be placed on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

**CURR 660 Authentic Data in the Elementary STEM Classroom. 3 Credits**

Young learners can think deeply about content and make meaningful connections between their experiences, natural phenomena, and authentic data when teachers integrate data in purposeful ways. In this course, teachers construct student-centered STEM investigations integrating real-world scientific and mathematical data and build their understanding of the theoretical basis for this work. Participants gain knowledge of STEM resources, learn to access entry points for STEM in elementary classrooms and foster engaging contexts, like engineering, coding, and NASA mission exploration. Teachers explore the synergies between Common Core State Standards and Next Generation Science Standards for a productive and exciting learning environment that prepares students for ongoing interest in STEM. This course is recommended as a foundation for the STEM certificate program.

**CURR 661 Authentic Data in the Secondary STEM Classroom 3 Credits**

Middle and High School students are capable of deep sense making when teachers utilize engaging STEM classroom practices to teach content with authentic data connections. In this course, teachers learn to apply research-based best practices central to today's classrooms. In a collaborative professional learning environment, they build knowledge of resources for accessing, analyzing, and making use of authentic data in meaningful activities. Coursework includes planning student-centered lessons that integrate data, building cultural relevance with engaging phenomena, and developing meaningful assessments for STEM activities. Participants identify how to integrate engineering design into the STEM classroom and learn how to represent the Nature of Science as students develop conceptual understanding and apply critical thinking to real-world decisions. A library of content rich lessons becomes available to all participants through a shared online community. This course is recommended as a foundation for the STEM certificate program.

**CURR 662 Eyes on Earth: Teaching Earth Science from Space (PK-8) 3 Credits**

This course will take participants through a journey about space exploration and specific NASA missions that examine components of earth. Participants will learn science content grounded in Earth's Lithosphere, Hydrosphere, Atmosphere, and Biosphere. By learning to use authentic data from NASA and other sources participants will experience an exploratory approach to learning about the Earth, and then bring these experiences to their own classrooms. Teachers will utilize several web-based tools and real-time data along with the three-dimensional learning in the Next Generation Science Standards to create lessons that can be used directly in the classroom.

**CURR 663 Lessons from the Ocean: Science on the Water Planet (Grades 2-12) 3 Credits**

Bring the ocean into your classroom by using Earth's waters as a context for standards-based STEM content. The ocean is critical to the functioning of the Earth system, and is an authentically integrated context for learning about topics such as density, weather and climate, heat transport, environmental issues, biogeochemical cycles, mathematics, and much more. Access a myriad of data sets to apply science concepts and make connections between the ocean and atmosphere, living and nonliving parameters, and life on land, as well as in the deep sea. Use the context of the ocean to teach Next Generation Science Standards topics with deep understanding and meaning for learners.

**CURR 664 The Arts in STEM: Advancing Meaningful Integration (K-12) 3 Credits**

Apply art in the context of exciting STEM concepts and learn to integrate art, science, math, technology, and engineering in more meaningful ways in your classroom. At the core of the STEM Education movement are critical thinking, creativity, problem solving, and authentic learning environments that engage diverse students in meaningful ways with content. The many mediums for art and artistic expression are a valuable component of communication and expression. Scientists and researchers at NASA and across the globe use myriad forms of art in their work. This course invites students to take a close look at the incorporation of art in the STEM classroom and provides resources, exemplars, and access to collaborative support for arts integration.

**CURR 665 Climate Change with NSF SPRINTT 3 Credits**

Award-winning curriculum and eloquent, online student investigations help students study science concepts emphasized in the Next Generation Science Standards, in the context of Earth's Polar Regions to better understand the complexity of Earth's climate and how it is changing. View the Earth using real scientific data from satellites and western researchers. Then, consider the lens of indigenous peoples of the Arctic. Examine tons of data and changes in ice, permafrost, weather patterns, biological change, and more as you conduct research with simple-to-use, web-based instructional tools, using authentic data sets and models to study our planet's past, present, and future climate. Interdisciplinary investigations address many Common Core State Standards in reading, writing, science, and technical subjects as well as mathematics in the context of climate science.

**CURR 666 Exploring Mars: A New Twist on Science (or Math) 3 Credits**

Use a wealth of data sets and technological tools to explore and understand features of Earth's neighbor, the Red Planet. Look for and study the physical and chemical evidence of water and ice; compare erosion patterns on Mars and Earth; and make inferences about the planet's history as you study both its geologic features, including volcanoes and craters, and the physics of the atmosphere. Teach Next Generation Science Standards topics in Earth, physical, and chemical science integrating mathematics, in the context of Mars using recent data from Curiosity Rover and other missions.

**CURR 667 Physical Science in Motion: Classroom Applications 3 Credits**

Physical science, when applied, makes tough-to-understand concepts easy and fun. Participants learn to solve problems relating to one-dimensional motion; become acquainted with and apply Newton's Laws of Motion and equilibrium of forces; learn about constant acceleration and gravitational acceleration; investigate concepts in aerodynamics; and learn about two-dimensional motion. Participants will use free, simple-to-use, software simulations from NASA Glenn Research Center, which help to present these concepts for you, and, then, your students, in the context of aeronautics, including airplane design, rocketry, sports, and more. A carefully developed resource page provides access to excellent resources and engaging activities for implementing course content in your classroom with important connections to Next Generation Science Standards and Common Core mathematics.

**CURR 668 Coding, Robotics, and 1:1 Devices 3 Credits**

Learn applications of Coding as a mathematics pedagogy, explore opportunities for Robotics, and learn cutting-edge implementation of One-to-One Devices (1:1) in K-12 classrooms. Participants learn about and explore best practices in the newest learning pedagogies and technologies. Whether you are already involved, or looking to integrate these cutting-edge tools and strategies for the classroom, you will begin to expand your reach for enhancing student learning. Scaffolded to allow success at all grade levels, Coding, Robotics, and 1:1 Devices offers resources for application into elementary, middle, and high school. Participants will interact with no-fee computer programming, robotics opportunities, and the latest uses of devices. All participants have the opportunity to work with innovative technologies and interact with talented educators, practitioners and special guests who are already making a difference in K-12 classrooms.

**CURR 669 Culturally Relevant Pedagogy in the STEM Classroom 3 Credits**

Classrooms comprise individual learners, each bringing their own culture and experiences to the learning environment. The value and strength of diversity has become increasingly described in educational literature. This course introduces teachers to the curriculum and pedagogical issues relevant to race, language, gender, and socio-economic differences. Participants apply content and pedagogy involving science and mathematics contexts for effective learning. STEM activities will integrate meaningful, engaging practices for teaching diverse learners. The course is differentiated for elementary and secondary school educators to provide relevant connections, to be directly applied, in each participant's classroom.

**CURR 670 Life and Marine Science: Tracking Live Marine Animals 3 Credits**

Follow marine animals (e.g., polar bears, sea turtles, sharks, and whales) in real-time, and apply life and Earth science topics to the ocean. Study topics such as ecosystems, biodiversity, cell structures, food webs, and conservation, as you make connections to ocean currents, seafloor features, density and more. Discover the importance of the ocean to humans, as well as our impacts, both positive and negative, on marine environments. The in-depth use of data lends itself to Next Generation Science Standards by integrating instructional technology with life, Earth and physical science.

**CURR 671 Life in Space: NASA ISS and Astrobiology 3 Credits**

The International Space Station (ISS) is an amazing undertaking comprising technology, engineering, science and math—the perfect context for exciting students for learning. NASA research leads to technological advances on Earth and in human space exploration. As NASA plans for manned missions to Mars, scientists explore our solar system and beyond for determining if and where life could exist. Extremophiles are fascinating for teaching Earth science in a context for astrobiology research. The course explores how space travel impacts the human body; growing food in space; engineering protection from radiation, and searching for habitable environments. With its application of subject matter, it offers excellent resources and interactions with NASA scientists, and data for educators to bring the exciting context of space travel to the classroom.

**CURR 672 Math Connections to STEM Education 3 Credits**

The course introduces a wealth of applied mathematics exercises and activities relevant to integrated STEM assets and science activities. Some are in the realm of topics seen in Earth and Space science and physics. Live presenters break down authentic examples and projects, and demonstrate to educators how problems incorporate Common Core State Standards-based mathematics with applications that meet Next Generation Science Standards performance expectations. Educators survey math and science examples and tools as the course promotes the use of applied mathematics in science, or science in mathematics, to meet content goals in the classroom.

**CURR 673 NASA Astronomy and Space Science 3 Credits**

Harness your students' enthusiasm for space and astronomy by using astronomical images to enrich your physical, Earth, and life science courses. Measure the speed of an asteroid, learn about erosion on Mars, and see the tracers of life that are visible from space. In this course, we explore the many ways in which real data from NASA's space science and astronomy missions can be used to teach math and science content in your classroom, meeting science and math standards in Next Generation Science Standards and Common Core State Standards. Through the use of cutting-edge technology tools, and with a NASA scientist visiting our class, you will not only learn more about the universe, you will learn how to bring the universe into your education context.

**CURR 674 NASA Physics for Real Beginners: Earth, Moon, and Space 3 Credits**

Gain an introduction to physics in this conceptual course that uses NASA's space initiatives as the context for content. Learn about gravitation between celestial bodies, how to get a satellite into orbit, what it takes to blast off into space, and more. This course will discuss these and related topics while exploring NASA content related to space and the Hubble Space Telescope and Kepler Missions. Bring cutting-edge examples to your classroom while addressing Next Generation Science Standards performance expectations.

**CURR 675 Reading and Writing in the Science Classroom 3 Credits**

Discuss and analyze the ways that literacy and science connect in the science classroom, and highlight how reading and writing can be used to increase students' understanding of science content. Focus on how to integrate important literacy skills from Common Core State Standards in your science and STEM classroom to address content standards from Next Generation Science Standards. Cutting-edge strategies and well-founded principles pave the way to success with non-fiction reading material. The manner in which information and scientific content is presented shapes student success, not just for reading, but student writing, organization, and presentation.

**CURR 676 The E in STEM: Meaningful Content for Engineering 3 Credits**

Learn how to use engineering to make your classroom come alive. Bridge and teach math and science concepts through exciting applications in the Engineering Design Process where you and your students design, test, and evaluate models and real-life applications. Activities are hands-on and emphasize the reciprocities between science, technology, engineering, and mathematics in formal design challenges. Educators enrich classroom curriculum with elements of design in science, mathematics, or technology activities, addressing important Next Generation Science Standards' engineering design practices.

**CURR 677 WDLC - Weather Data Learning Center 3 Credits**

Use weather data to teach and learn math. This course teaches content in a math curriculum that uses weather data. Weather Data Learning Center demonstrates increases in student performance in grade 4 mathematics. Collect, access, and interpret current real-time imagery, maps and data. Make connections from weather to learn Common Core-based mathematics using various STEM pedagogical strategies. Learn the basics of clouds, air masses, humidity, fronts, pressure, jet stream, and climatic patterns as you apply these ideas to math concepts such as measurement, fractions, number sense, data collection, and analysis.

**CURR 678 Action Research in the STEM Classroom 3 Credits**

A Capstone Course requirement "option", this course may be part of joint Master's Degree programs, or Endeavor's "5-course" certificate program earning Research Distinction and an award.

**CURR 679 Practicum in STEM Leadership 3 Credits**

Share your knowledge of STEM teaching and learning with colleagues in your building, district, or region.

**CURR 680 STEM Leadership Seminar 3 Credits**

The course contains STEM pedagogical content knowledge, incorporating authentic data and using technology as a tool for learning. The course provides a springboard for cultivating problem solving skills, inspiring student research projects, and integrating STEM methods and essential principles addressed in new standards.

## English as a Second Language / ESL (K-12) Certificate

### Program Overview

The mission of the English as a Second Language program at Rider University is to provide the skills, attitudes and understandings necessary to teach non-native speakers of English in order for them to achieve their greatest potential through education for life.

This Post-Baccalaureate Teacher Certification Program in English as a Second Language is designed for college graduates seeking initial teacher certification. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who are able to take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 151).

### Curriculum Overview

This Post-Baccalaureate Teacher Certification Program in English as a Second Language is a 24 credit graduate program requiring five courses to be taken in late afternoons/evenings followed by a semester of full-time student teaching.

### Certificate Offered

- ESL Certification

Total Credits		24

### Additional requirements for completion

- Completion of all courses before the clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

## Courses and Descriptions

**CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits**

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531 and CURR 538.

**CURR 700 Educational Foundations for Inclusive Practices 3 Credits**

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

**CURR 770 Clinical Experience and Seminar in Teaching 9 Credits**

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

**CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

**EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits**

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

**EDUC 521 Teaching a Second Language 3 Credits**

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. \*NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

**LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits**

Presents multidisciplinary and interdisciplinary perspectives on bilingual/ bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

## English as a Second Language Endorsement Certificate

### Program Overview

This English as a Second Language (ESL) Endorsement program is an additional endorsement to an initial teacher certification. The program is designed for teachers with certification in areas other than ESL who want to add the endorsement (additional certification) as an ESL teacher to help non-English speakers become fluent in the English language. This is a streamlined, rigorous, and sequential program of professional studies that combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT). (p. 151)

### Curriculum Overview

This ESL endorsement provides ESL teaching credentials for those already certified in another specialization. This is a 15 credit graduate program requiring five courses.

## Certificate Offered

- English as a Second Language (ESL) Endorsement

Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

### EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. \*NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

### EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

**LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits**

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

## English Language Arts Education (K-12) Certificate

### Program Overview

This Post-Baccalaureate Teacher Certification Program in English Language Arts Education (K-12) is designed for college graduates seeking initial teacher certification. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. ### Additional requirements for completion

- Completion of all courses before clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

### Courses and Descriptions

#### CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

#### CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

**Prerequisite:** CURR 700.

### **CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits**

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

### **CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits**

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

**Prerequisite(s):** CURR 703.

### **CURR 770 Clinical Experience and Seminar in Teaching 9 Credits**

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

### **CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

## **Higher Education Leadership Certificate**

Higher Education Administration and Leadership is a field of interest to many Higher Education professionals. The coursework in this Graduate Certificate covers 4 critical areas that together describe how institutions of higher learning operate. Major content areas are: how colleges and universities organize themselves; how they affect students in terms of learning and development; how they are shaped by the larger environment and legal mandates; and how they change and adapt to the changing landscape of education.

The coursework is aimed at working professionals who want to deepen their knowledge of functions such as student affairs, to gain understanding of how schools assess, plan and change, and also who want to develop insight into the complex and changing "big picture" of higher education.

Students earn a Graduate Certificate upon completion of the 4 required courses. If interested in continuing on to the MA in Organizational Leadership (<http://catalog.rider.edu/graduate/colleges-schools/education/education-leadership-counseling/programs-certificates/organizational-leadership>), all courses can be applied to the required degree credit hours.

## Certificate in Higher Education Leadership Requirements

(12 credits)

Students must:

- comply with the general requirements for graduate study in the Rider University Department of Graduate Education, Leadership, and Counseling;
- complete 12 credits with GPA of "B" (3.0) or better.

Code	Title	Credits
EDUC 525	The Higher Education Organization	3
EDUC 535	Legal and Ethical Issues in Higher Education	3
EDUC 540	Leading Operations, Change and Assessment in Higher Education	3
One elective from the following:		3
EDUC 530	Student Affairs & Experiences in Higher Education	
EDUC 541	Assessing Organizational Performance in Higher Education	
EDUC 542	Assessment in Higher Education	
Total Credits		12

## Courses and Descriptions

### EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

### EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

### EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

### EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

### EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. A focus on determining what should be assessed in academic and administrative units and strategies for initiating performance assessment programs is reviewed.

### EDUC 542 Assessment in Higher Education 3 Credits

This course examines institutional effectiveness matters focusing on assessment processes in higher education. It explores topics such as the evaluation of academic programs, assessment of student learning outcomes, and involvement in accreditation and accountability demands in higher education. This seminar-style course will cover key organizational and educational theories, and students are introduced to the uses and outcomes of administrative practice in relation to assessment planning and implementation. The course covers the pragmatic planning skills and decision-support tools relevant to accreditation processes. Understanding the roles of governance, institutional research, policy analysis, and decision-making is critical to understanding the changing organizational planning function of a college or university. Just as businesses are expected to adhere to compliance and ethics standards, this course provides an in-depth look at how universities' adherence to standards pertaining to academic success can and will lead to an assurance that accredited universities are achieving their institutional goals, meeting the public's' expectations, and realizing their greater societal mission.

## Life and Career Coaching Certificate

### Program Overview

The Life and Career Coaching certificate program at Rider University is designed to meet the educational requirements for certification as a Board Certified Coach through the Center for Credentialing and Education, Inc. (<http://www.cce-global.org/bcc>) Coaches are helping professionals who assist clients in achieving goals in areas such as life transitions, significant relationships, physical health, emotional well-being, career choices, and spirituality. Some coaches carve out a niche by working with business leaders as executive coaches. Coaches differ from other mental health professionals in that they do not work with clients with mental disorders.

### Curriculum Overview

There are three pathways to completion of required coursework, depending on a student's educational and professional background. These pathways range from one to three courses.

### Certificate Offered

- Board Certified Coach

## Life and Career Coaching Certificate Requirements

There are three pathways to the Life and Career Coaching certificate in order to meet the educational requirements for certification, depending on a student's educational and professional background.

For students who hold a *bachelor's degree or a graduate degree in a field outside of social or behavioral science* (e.g. mathematics, biology), three courses are required.

(9 credits)

Code	Title	Credits
COUN 500	Introduction to Counseling and Helping Professions	3
CNPY 502	Theories of Counseling and Helping Professions	3
COUN 505 or COUN 504	Vocational/Career Development Vocational/Career Development in Educational Settings	3

For students who hold a *master's degree in counseling or a doctoral degree in a social or behavioral science* (e.g. social work, education, health, or business), one course is required.

(3 credits)

Code	Title	Credits
COUN 501	Coaching Principles and Practices	3

For students who hold a *master's degree in a social or behavioral science other than counseling* (e.g. social work, education, health, or business), two courses are required.

(6 credits)

Code	Title	Credits
COUN 501 or CURR 501	Coaching Principles and Practices Coaching Principles and Practices	3

Choose one of the following electives:		3
COUN 504	Vocational/Career Development in Educational Settings	
or CURR 504		Vocational/Career Development in Educational Settings
COUN 505	Vocational/Career Development	
COUN 550	Counseling Techniques Laboratory	

## Courses and Descriptions

### CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

**Prerequisite(s):** COUN 500 or as corequisite.

### COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

### COUN 501 Coaching Principles and Practices 3 Credits

The course covers core coaching competencies, including coaching screening and orientation, fundamental skills, assessment, approaches for organizations, and coaching ethics. The course meets all 30-hour educational requirements for certification as a Board Certified Coach (BCC) through the Center for Credentialing and Education and is required course for the 60-hour BCC educational requirements.

### COUN 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

### COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

**COUN 550 Counseling Techniques Laboratory 3 Credits**

This is a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

**CURR 501 Coaching Principles and Practices 3 Credits**

This course is an introduction to the profession of coaching for educators. It is designed to fulfill the educational requirements for certification as a Board Certified Coach through the Center for Credentialing and Education (CCE). The CCE competencies for certification provide the basis for course material.

**CURR 504 Vocational/Career Development in Educational Settings 3 Credits**

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design for educators who work in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

## Mathematics Education (K–12) Certificate

### Program Overview

This Post-Baccalaureate Teacher Certification Program in Mathematics is designed for college graduates seeking initial teacher certification. This streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT). (p. 151)

### Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Mathematics is a 21 credit graduate program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

### Courses and Descriptions

**CURR 700 Educational Foundations for Inclusive Practices 3 Credits**

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

**CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits**

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

**Prerequisite:** CURR 700.

**CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits**

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

**Prerequisite(s):** CURR 703.

**CURR 707 Inclusive Methods for Teaching Mathematics 3 Credits**

This course critically analyzes the aims of teaching mathematics in secondary schools. Research pertaining to mathematics teaching and learning is analyzed. Demonstration lessons including reflective teaching and individual and group processing are created and carried out to clarify teaching, mathematics curriculum planning using NJ Student Learning Standards in Mathematics, the organization of materials and subject matter, assessment processes classroom management strategies, and awareness of career requirements in STEM fields. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying mathematics curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

**CURR 770 Clinical Experience and Seminar in Teaching 9 Credits**

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

**CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

## **Organizational Leadership**

### **Program Overview**

The Master of Arts (M.A.) in Organizational Leadership program is an applied graduate program which will enhance students' leadership, supervisory, and administrative skills. Students learn how to be more effective, strategic, and creative in complex organizational settings — and graduate with a vision of leadership, values to guide their decisions, and the knowledge to transform vision into a reality.

While cultivating the ability to ethically lead organizations is the focus of the program, students will also develop and refine their critical thinking and problem solving skills, approaches to change management, ability to motivate and empower others, and aptitude to communicate effectively and persuasively. Through a concentration of courses, students will apply the concepts of leadership as they pertain to the advanced study of another academic discipline.

**By successfully completing the program, students will develop a core set of leadership competencies that will enable them to:**

- develop a personal leadership philosophy and approach to ethical leadership practice;
- understand approaches to leadership practice;
- communicate, interact, and engage effectively with a diverse workforce;
- facilitate major leadership processes;
- lead organizations in a changing landscape; and
- be proficient in enhancing human and organizational performance.

**In addition to developing a core set of leadership skills and knowledge, the program (depending on the selected area of concentration) will provide students with skills and knowledge requisite to:**

- Leadership in Higher Education
- Developing People and Organizations
- Leadership in Counseling-Related Services
- Life and Career Coaching

## **Curriculum Overview**

Students' broad understanding of leadership and organizations is accomplished through the study of the program's core courses.

Developing an effective leadership practice takes self-knowledge, knowledge of others, financial and strategic acumen, a grasp of contextual forces and organizational dynamics, and a rigorous approach to making decisions and solving problems creatively.

In addition to the study of organizations, students pursue deep study of focal areas. One area is higher education administration and the unique opportunities of academia, particularly from a student learning and development perspective. Students become more aware of the history and processes involved in executing higher education missions.

Another area is the field of organizational development, with an emphasis on enhancing organizations through knowledge of contemporary issues, the development of individuals and the cultivation of organizational change. Students become more adept at creating and delivering initiatives for improved effectiveness in teams and organizations.

A third curriculum area is the study of human services from the point of view of those in the helping professions. Acquiring knowledge of the foundations of counseling and mental health enables students to gain greater awareness of how human services organizations and agencies fulfill their promise to clients.

A fourth area is in the area of life and career coaching. Students gain understanding of organization members from the perspective of human growth and development and gain skills in forming coaching relationships for the purpose of aiding others in areas such as life transitions, career choices and work/life balance.

## **Forms of Study**

Students take their core courses in an online or hybrid format. Depending on their chosen concentration, they will complete their 30 credit degree in one of two ways. They will complete their studies entirely online, or with a set of classroom, online or hybrid courses. The fully online MA in Organizational Leadership is offered for the Developing People and Organizations concentration in a traditional or accelerated (7-week) course format and the Life and Career Coaching concentration is offered online with a combination of 7- and 14-week courses.

## **Degree Offered**

- M.A. in Organizational Leadership

## Program Requirements

(30 credits)

Group I - Core Courses (15-18 credits)

Group II - Concentration Courses (12 credits)

### Organizational Leadership (M.A.)

- Comply with the general requirements concerning graduate study at the master's degree level.
- Enroll in graduate study at Rider for no fewer than two academic semesters or the equivalent thereof.
- Complete at least 30 credits of graduate study.
- Successfully pass a culminating research experience and related written requirements.
- Maintain a GPA of "B" (3.0) or better for work submitted for the master's degree.
- Complete the program within six years of the date the student enrolled in his/her first course unless an extension is approved by the Department of Graduate Education, Leadership, and Counseling.

### Group I - Core Courses - Required

Code	Title	Credits
LEAD 500	The Practice of Leadership	3
LEAD 510	Organizations: Design and Dynamics	3
LEAD 531	Developing The Human Side of Organizations	3
LEAD 540	Strategic and Financial Decision-Making in Organizations <sup>1</sup>	0-3
LEAD 550	Organizational Research	3
LEAD 598	Project Seminar in Leadership	3
Total Credits		15-18

<sup>1</sup> LEAD 540 is not a requirement for the concentration in Higher Education Leadership.

### Group II - Concentration Courses

Students will be expected to meet the requirements for any one of the four concentrations outlined below.

#### Developing People and Organizations

Program Goal: Prepare graduates to be strategic professionals who work effectively through others, particularly in the area of organization and human development. This concentration helps students to understand broad organizational concepts that apply to private and non-profit sectors. Students build conceptual understanding and explore connections to applied settings.

Code	Title	Credits
<b>Required courses:</b>		
Must take four courses:		12
<b>Select at least two of the following:</b>		
LEAD 511	Facilitating Culture and Process Change in Organizations	
LEAD 512	Forms of Diversity in Organizations	
LEAD 532	Program Design for Training and Development in Organizations	
LEAD 533	Conflict and Crisis Resolution in Organizations	
LEAD 534	Team Effectiveness and Creativity in Organizations	
May take up to two from the following:		
COUN 505	Vocational/Career Development	
COUN 520	Multicultural Counseling and Relationship Development	
COUN 535	Holistic Wellness Counseling	
Total Credits		12

#### Leadership in Higher Education

Program Goal: Prepare graduates for a variety of institutional roles in higher education, with emphasis on developing leadership skills for organizational change.

Code	Title	Credits
<b>Required courses:</b>		
EDUC 525	The Higher Education Organization	3
EDUC 535	Legal and Ethical Issues in Higher Education	3
EDUC 540	Leading Operations, Change and Assessment in Higher Education	3
<b>Select two electives from the following:</b>		6

LEAD 511	Facilitating Culture and Process Change in Organizations	
LEAD 512	Forms of Diversity in Organizations	
LEAD 532	Program Design for Training and Development in Organizations	
LEAD 533	Conflict and Crisis Resolution in Organizations	
LEAD 534	Team Effectiveness and Creativity in Organizations	
Total Credits		12

## Courses and Descriptions

### CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

**Prerequisite(s):** COUN 500 or as corequisite.

### CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

### COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

### COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

### COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

### COUN 515 Substance Abuse Counseling 3 Credits

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

### COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

### COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

### EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

**EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits**

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

**EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits**

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

**EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits**

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

**EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits**

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. A focus on determining what should be assessed in academic and administrative units and strategies for initiating performance assessment programs is reviewed.

**EDUC 542 Assessment in Higher Education 3 Credits**

This course examines institutional effectiveness matters focusing on assessment processes in higher education. It explores topics such as the evaluation of academic programs, assessment of student learning outcomes, and involvement in accreditation and accountability demands in higher education. This seminar-style course will cover key organizational and educational theories, and students are introduced to the uses and outcomes of administrative practice in relation to assessment planning and implementation. The course covers the pragmatic planning skills and decision-support tools relevant to accreditation processes. Understanding the roles of governance, institutional research, policy analysis, and decision-making is critical to understanding the changing organizational planning function of a college or university. Just as businesses are expected to adhere to compliance and ethics standards, this course provides an in-depth look at how universities' adherence to standards pertaining to academic success can and will lead to an assurance that accredited universities are achieving their institutional goals, meeting the public's' expectations, and realizing their greater societal mission.

**EDUC 543 Communicating Educational Data 3 Credits**

Through this course, students will develop skills in statistical communication, incorporating data into delivery methods such as writing, public speaking, teaching, informal conversation and collaboration, programming, and graphic visualizations. Students will understand the importance of creating a data-informed culture and how it contributes to an organization's success. They will also learn methods and strategies of how to communicate to a non-technical audience.

**LEAD 500 The Practice of Leadership 3 Credits**

This course allows students to gain an understanding of the practice of leadership and how they can develop as leaders. Students will explore leadership models, creativity in organizations, and approaches to decision making as they begin to form their own leadership philosophy.

**LEAD 510 Organizations: Design and Dynamics 3 Credits**

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

**LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits**

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 512 Forms of Diversity in Organizations 3 Credits**

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different "worldviews" which organizational members bring into the organization, and how that affects their ability to work together. The course develops students' knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 531 Developing The Human Side of Organizations 3 Credits**

This course examines Strategic Human Resources Management (SHRM) within today's organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 532 Program Design for Training and Development in Organizations 3 Credits**

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore “real world” applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 533 Conflict and Crisis Resolution in Organizations 3 Credits**

Leaders face conflict and crisis in their organizations. Being effective in their resolution is an important leadership attribute. Skills that support positive and integrative outcomes include mediation, negotiation and crisis resolution skills. This course will use multiple case studies and role-playing assignments to engage students in understanding how individuals and teams handle mediation and negotiation scenarios. The course will also use multiple case studies to enhance students’ understanding of the components of effective and ineffective leadership for crisis.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 534 Facilitation and Team Leadership 3 Credits**

This course examines the characteristics and behaviors of teams that produce good results and/or generate new ideas. The focus of the course is on how to lead high functioning teams and the development of facilitation capabilities, so that students can effectively lead teams and organizations.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 540 Strategic and Financial Decision-Making in Organizations 3 Credits**

This course explores the importance of information and financial resources within the culture of organizations, and the necessary relationship that exists between the two. The course draws on current literature and student experience to explore resource management and focuses on the effective use of information resources within the boundaries defined by financial realities. The relationship between data analyses and effective decision-making will be explored.

**Prerequisite(s):** LEAD 500 or concurrent with LEAD 500.

**LEAD 550 Organizational Research 3 Credits**

The purpose of this course is to prepare future organizational leaders to read professional journal articles, plan research, and critique research. The course covers basic research methods, such as experimental, ex post facto, correlational, case study, time series, interviews, surveys, and basic statistics in terms of understanding and selecting statistics. These concepts are taught within the framework of organizational leadership. This course should be taken at the end of your program.

**Prerequisite(s):** LEAD 500, LEAD 510.

**LEAD 598 Project Seminar in Leadership 3 Credits**

This course serves as a practicum for students about to graduate with their M.A. in Organizational Leadership. Reflecting upon their own leadership philosophy developed throughout the program, students will formulate, research, and write a leadership capstone paper. The project integrates the competencies and concepts from the core courses as students use research strategies to analyze an organizational problem. Class sessions will also be used for exercises and the practice of skills. Core and concentration courses should be completed before taking this course.

**Prerequisite(s):** Must be taken in last semester of study. Permission of Instructor required.

## Principal Certificate

### Program Overview

The Principal certificate in Educational Leadership is a sequence option designed for candidates who aspire to obtain school leadership positions as a director, assistant principal or principal.

### Curriculum Overview

Candidates have completed a master’s degree and hold New Jersey certification as a supervisor. A second course in leadership (EDAD 592) is required of candidates who have previously taken only one course in a state-approved supervisory certification sequence. Candidates will complete a year-long (300 hours) internship EDAD 591 and EDAD 592 along with a “Capstone School Improvement/Change Project.”

The frameworks for the program have been established to meet preparatory requirements as established in the New Jersey Administrative Code (6A:9-12.5) as well as the challenges, responsibilities, and opportunities inherent in educational leadership.

EDAD 592	Seminar/Practicum in Educational Leadership/Supervision	3
Total Credits		21

## Courses and Descriptions

### EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

### EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

### EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 505.

### EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 501.

### EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 501 and EDAD 514.

### EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

### EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

**Prerequisite(s):** EDAD 591.

## Reading Specialist Endorsement

### Program Overview

The Reading Specialist endorsement is designed for educators who have an earned master's degree in education or a related field and are interested in becoming a reading or literacy specialist in a pre-K-12 school.

### Curriculum Overview

In order for candidates to be eligible for the Reading Specialist endorsement they must complete four graduate level literacy courses at Rider University. These include:

LITR 501 Psychology and Pedagogy of Literacy Processes

LITR 502 Curriculum, Instruction and Supervision in Literacy

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum

One Graduate Level Literacy Elective

Candidates must also show evidence of at least 18 credits of graduate study across three areas selected from the list below. These areas of study will come from the state approved graduate courses offered in the College of Education and Human Services at Rider University or a candidate's master's degree program at other institutions. These include:

- Children's or Adolescent Literature
- Measurement
- Organization of Reading Programs
- Psychology
- Staff Supervision
- Linguistics
- Special Education
- Research
- Foundations of Education

### Certificate Offered

- Reading Specialist

LITR 510	Research and Survey of Texts for Children and Adolescents
LITR 560	Writing Project @ Rider
LITR 600	Independent Research and Study in Literacy Education
Total Credits	
	12

Note:

- Candidates must have completed at least two years of teaching by program completion.

<sup>1</sup> Additional graduate courses with a literacy focus may be counted towards the elective requirement for the endorsement with prior approval from the coordinator.

## Courses and Descriptions

**Note:** Additional graduate courses with a literacy focus may be counted towards the elective requirement for the endorsement with prior approval from the coordinator.

### LITR 500 Multimodal Teaching and Learning 3 Credits

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

### LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

### LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

### LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and disabilities and standardized and informal tests. Observational techniques and diagnostic teaching for assessment are stressed.

### LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

### LITR 510 Research and Survey of Texts for Children and Adolescents 3 Credits

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-print texts into the school curricula in ways that support youth and adolescent literacy development.

### LITR 560 Writing Project at Rider 3 Credits

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas.

### LITR 600 Independent Research and Study in Literacy Education 1-3 Credits

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education.

## School Psychology (Ed.S.)

### Program Overview

Rider University offers one of the region's finest school psychology programs. It is one of only seven specialist-level programs in New Jersey to hold full accreditation from the National Association of School Psychologists (NASP) (<http://www.nasponline.org>). This program is designed for students seeking national certification as a school psychologist.

### Making a Difference in the Lives of Children

Across the country, there is a growing need for specially trained school psychologists who can work with students, teachers, families and other professionals to promote safe and supportive learning environments. They play an increasingly important role in helping children succeed — and thrive — academically, socially and behaviorally.

### Highlights

- Rider's 64-credit Educational Specialist degree is a graduate-level program that typically takes three years of full-time study to complete.
- This program follows a cohort model in which students take classes together in a group, or team. Each cohort begins in the fall.
- Students develop and apply skills through fieldwork that complements coursework, starting with their first semester. Each student is expected to complete a 100-hour practicum each semester during the first two years.
- During the third year, students complete a one-year professional internship (1,200 hours) in a school setting where they perform the role and function of a professional school psychologist. Students

have the option of completing this internship at an approved site setting anywhere in the country.

- In addition to New Jersey, the program meets requirements for certification in other states, including Pennsylvania and New York.
- Graduates of the program are eligible for national certification as a school psychologist after earning a passing score on the School Psychology Praxis.

## Curriculum Overview

Rider University's School Psychology program will prepare students to become a productive and vital member of the school team through a highly-structured, developmental curriculum that builds on coursework and hands-on experience.

### Students will learn to:

- effectively assess children's skills and abilities, including diverse learning needs;
- assess emotional and behavioral needs;
- apply effective social-emotional and academic interventions;
- plan appropriate Individualized Education Programs for students with disabilities;
- evaluate the effectiveness of prevention and intervention programs;
- consult with parents, administrators and teachers.

The program emphasizes problem solving and data-based decision making aimed at improving the educational and mental health of children and adolescents. Rider's innovative program provides a blend of traditional and contemporary school psychology training, including psychological assessment, response to intervention, consultation, positive behavior support, counseling and curriculum-based measurement. And, students learn to work sensitively with people from diverse cultural and individual backgrounds.

## Degree Offered

- Ed.S. in School Psychology

## School Psychology Educational Specialist Program Requirements

- Satisfactory annual ratings for retention and progression in the School Psychology program. Program faculty will evaluate the academic, professional competencies, and professional work characteristics of each student based upon their portfolio and personal statement. A recommendation for continuation, continuation with remediation, or dismissal will be made by August 31st of each year.
- Based upon the National Association of School Psychologists (<https://www.nasponline.org>) (NASP) standards, all students must fulfill a residency requirement by enrolling as a full-time student (minimum of nine graduate credits for one semester) so as to develop an affiliation with colleagues, faculty, and the profession.
- Completion of 64 graduate credits with a minimum GPA of 3.3.
- Take and attain a passing score established by NASP on the Praxis Submitted Assessment test in school psychology during the first semester of internship, EDPS 590. Furnish a copy of the score to the Director of the School Psychology program.

Students are expected to complete 400 practicum hours prior to their internship. During each practicum, students will develop specific skills in the field relative to associated coursework and under program faculty's supervision.		
Total Credits		43

Internship serves as the culminating experience consisting of 1,200 hours. The internship occurs on a full-time basis over the period of one year OR on a part-time basis over two consecutive years.

## Courses and Descriptions

### CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

### COUN 550 Counseling Techniques Laboratory 3 Credits

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

### EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

### EDPS 500 Cognitive Assessment 3 Credits

This course addresses contemporary intellectual theories and the process and procedure of cognitive assessment. It presents the relevant issues related to intelligence testing and interpretation. Through a variety of pedagogical approaches, students acquire needed skills in administering, scoring, and interpreting results from contemporary tests of cognitive ability.

**Prerequisite(s):** EDPS 513.

### EDPS 502 Psychological Development of the Child and Adolescent 3 Credits

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

### EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

### EDPS 506 Testing and Measurement Techniques in Reading/Literacy Education 3 Credits

Studies basic characteristics of test scores, including: reliability and validity, selection, administration, and scoring of tests; measurement of achievement, intelligence, aptitude, and interests; and the writing and editing of items of teacher-made tests, school marking procedures, interpreting of test scores. Covers basic statistical tools needed by reading specialists.

**EDPS 507 Advanced Educational Psychology 3 Credits**

A critical examination of contemporary learning theory as applied to educational thought and practice. The psychological, physiological, and sociological foundations of education and training; personality problems encountered by classroom teachers.

**EDPS 508 Cognitive Processes and Learning 3 Credits**

This course deals with what is known relative to the principles of cognitive psychology and their application to learning. The flow of information is followed from where it begins through the processes of integration and storage. Cognitive principles will be studied relative to concept formation, reasoning, and problem solving. Their relationship to specific educational tasks such as the teaching of reading, writing, mathematics, and other content will be explored and confirmed through empirical evidence.

**EDPS 509 Assessment and Intervention III: Psychoeducational Assessment and Report Writing 3 Credits**

This course furnishes students with the clinical, practical, and theoretical sophistication to understand the assessment and report writing process for academic, behavioral, adaptive, and social-emotional concerns. Students are expected to master a wide range of concepts and skills to successfully complete this course including integrating multiple pieces of assessment data for case conceptualization, classification, and treatment recommendation. Students are required to synthesize data from multiple methods of assessment and sources to produce written psychoeducational reports that inform intervention practice.

**Prerequisite(s):** EDPS 513.

**EDPS 510 Assessment & Intervention IV: Behavioral and Social-Emotional Needs 3 Credits**

The assessment of personality is reviewed from the context of a comprehensive, ecological model of social-emotional, behavioral, and academic development. Assessment is studied from an empirically based, problem-solving model that links directly to intervention. Students learn to select appropriate assessment tools to match individual referral questions so as to evaluate the behavioral and social/emotional problems of children and adolescents.

**Prerequisite(s):** EDPS 513.

**EDPS 512 Psychology of Exceptionality 3 Credits**

This course provides opportunities for the study of school psychological issues associated with specific educational exceptionalities, including learning disabilities, mental retardation, behavior disorders, physical handicaps, and giftedness. The characteristics, identification procedures, and current intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**EDPS 513 Professional Practice of School Psychology: Issues and Historical, Ethical, and Legal Considerations 3 Credits**

This course is designed to provide an introduction to school psychology through an analysis of the contemporary roles and functions of school psychologists. Professional issues are explored in the context of the history and evolution of school psychology as a specialty area of professional psychology. In addition, the study of professional ethics, best practices, and standards for delivery of school psychological services that have been adopted by national organizations representing the profession of school psychology will be reviewed.

**EDPS 514 Assessment and Intervention I: Standardized Measures of Academics And Behavior 3 Credits**

This course will increase students' understanding of the standardized assessment process, measurement issues, psychometric properties of assessment instruments, and the role of these instruments in informing academic, behavioral, and social-emotional interventions.

**EDPS 515 Assessment and Intervention II: Curriculum-Based Measures 3 Credits**

This course will build upon students' knowledge and skills in individual-referenced assessment based upon the standards and general curriculum. Students will be able to design, administer, score, and interpret curriculum-based assessment and link these data to intervention.

**EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits**

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

**EDPS 521 Statistics and Quantitative Analysis 3 Credits**

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

**Prerequisite(s):** EDPS 520, EDUC 500.

**EDPS 535 Biological Basis of Behavior 3 Credits**

This course will emphasize a biological approach to the study of psychology and behavior. Topics studied will include the following: 1) the genetics of human psychological differences; 2) the anatomy of the nervous system; 3) psychopharmacology; 4) neuropsychological diseases (e.g., epilepsy, autism, multiple sclerosis); 5) memory and amnesia; 6) sleeping, dreaming, and circadian rhythms; and 7) the biopsychology of mental health difficulties.

**EDPS 538 Developmental Child Psychopathology 3 Credits**

The course will furnish students with a comprehensive account of the characteristics, correlates, causes, contexts, and outcomes of psychopathology in children. It serves to augment students' understanding of specific conditions in childhood and adolescence including autism spectrum disorders, attention-deficit/hyperactivity disorder, mental retardation, childhood anxiety/depression, enuresis/encopresis, learning disabilities, communication disorders including selective mutism, and emotional/behavioral disorders. The diagnostic nosologies of the DSM and IDEA will be referenced and thoroughly discussed. A special emphasis upon a developmental-systems framework for understanding child psychopathology will be presented wherein the importance of context and the influence of multiple, interacting events and processes in shaping adaptive and maladaptive development will be investigated.

**EDPS 570 Advanced Interventions for Children, Adolescents and Families 3 Credits**

This course provides opportunity to expand each student's knowledge and skills in the development of effective interventions to meet academic, behavioral, and social-emotional needs. Currently accepted practices based upon the individual's referral problem will be explored. Intervention will be approached from a problem-solving model and based on current assessment data. Case studies will be used to link theory and application.

**Prerequisite(s):** EDPS 513.

**EDPS 581 Practicum in Psychoeducational Assessment and Report Writing 1 Credits**

This practicum experience provides supervised practice in administering, scoring, and interpreting an array of individually administered assessment instruments for the purpose of producing a written psychological report that is linked to intervention.

**Prerequisite(s):** EDPS 513.

**EDPS 582 Practicum in the Assessment of Behavioral and Social-Emotional Needs 1 Credits**

This practicum experience provides supervised practice using the techniques and methods taught in EDPS 510 Assessment of Behavioral and Social-Emotional Needs. Students will be expected to complete a Functional Behavioral Assessment including recommendations for a behavior intervention plan and a means to monitor and evaluate the target student's progress.

**Prerequisite(s):** EDPS 513.

**EDPS 583 Practicum in Consultation in School and Agency Settings 1 Credits**

This practicum experience provides supervised practice in the study, implementation, and evaluation of a problem-solving model to provide consultation across school and agency settings. Students will be expected to successfully initiate and lead the 4-step consultation process resulting in a databased intervention. The consultation will be documented in a formal report.

**Prerequisite(s):** EDPS 513.

**EDPS 584 Practicum in Curriculum-Based Measures 1 Credits**

This practicum provides supervised experience in identifying academic needs of students utilizing curriculum-based assessment (CBA) methods within a problem-solving framework. Students will practice the selection and administration of appropriate CBA tools to match referral question(s) at the individual, class-wide and school-wide levels. Students will also practice assessment of the academic environment by conducting structured direct observation of the classroom. Students will summarize and analyze assessment data, develop goals and objectives and make recommendations for intervention.

**Prerequisite(s):** EDPS 513.

**EDPS 590 Internship in School Psychology I 3 Credits**

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

**Prerequisite(s):** EDPS 581, EDPS 582, and EDPS 583.

**EDPS 591 Internship in School Psych II 3 Credits**

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

**Prerequisite(s):** EDPS 590.

**EDPS 600 Independent Research and Study in School Psychology 1-3 Credits**

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of school psychology.

**EDSO 510 Sociological and Cultural Foundations of Education 3 Credits**

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

**EDUC 500 Introduction To Research 3 Credits**

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

**SPED 514 Positive Behavior Support 3 Credits**

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multicomponent interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

## Science Education (K-12) Certificate in Biological Sciences, Chemistry, Earth Sciences &/or Physics

### Program Overview

This Post-Baccalaureate Teacher Certification Program in Science is designed for college graduates seeking initial teacher certification in one or more of the scientific disciplines (biological sciences, chemistry, earth sciences, physics). The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical experience

(student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 151).

## Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Science is a 21 credit graduate program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

## Certificate Offered

- Science Education (K-12) Certificate in Biological Sciences, Chemistry, Earth Sciences or Physics

- Completion of CURR 770 with a "C+" grade or better.

## Courses and Descriptions

### CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

### CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

**Prerequisite:** CURR 700.

### CURR 706 Inclusive Methods for Teaching Science 3 Credits

Classroom interaction analysis systems are used in the study of the instructional processes that support inquiry-based science learning. Candidates develop their own repertoires of teaching strategies, classroom management strategies, and awareness of career requirements in STEM fields. Emphases are on the investigation and interpretation of recent curriculum developments in NGSS and NJ Student Learning Standards in Science as well as the use of lab-based processes in science learning. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying science curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

**CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits**

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

**Prerequisite(s):** CURR 703.

**CURR 770 Clinical Experience and Seminar in Teaching 9 Credits**

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

**CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

## Social Studies (K-12) Certificate

### Program Overview

This Post-Baccalaureate Teacher Certification Program in Social Studies is designed for college graduates seeking initial teacher certification. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. ### **CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits**

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

**Prerequisite:** CURR 700.

### **CURR 705 Inclusive Methods for Teaching Social Studies 3 Credits**

This course addresses the practical and theoretical aspects of teaching social studies to diverse adolescents in secondary schools. Using the NJ Student Learning Standards in Social Studies, candidates will prepare and design curriculum and assessment for students in various learning environments and with diverse learning needs. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying social studies curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

### **CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits**

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

**Prerequisite(s):** CURR 703.

### **CURR 770 Clinical Experience and Seminar in Teaching 9 Credits**

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

### **CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

## Special Education (M.A.)

### Program Overview

The Master of Arts in Special Education program is designed to prepare certified teachers to teach students with special needs in a variety of settings.

The program provides opportunities for students to understand the nature and causes of disabilities, become familiar with agencies and resources for persons with disabilities, and learn the best practices and

materials for teaching students with disabilities. This knowledge base, combined with a variety of shared and individual field-based experiences, provides opportunities for teachers to develop their expertise and become confident in their ability to work with students with special needs and become leaders in meeting the challenges of diverse classrooms.

## Curriculum Overview

The M.A. in Special Education program comprises a sequence of coursework that includes courses required for a New Jersey Teacher of Students with Disabilities Endorsement.

For individuals who are currently prepared to teach in general education settings, a 30-credit course sequence is designed to strengthen their preparation to meet the needs of all children, particularly those with disabilities. Students who currently hold a regular New Jersey instructional certificate in another field and successfully complete the program will be eligible for the New Jersey Teacher of Students with Disabilities Endorsement.

Those who already hold New Jersey Teacher of the Handicapped or Teacher of Students with Disabilities (TOSD) certification, may be eligible for up to nine credits waived depending on prior course work and transcript review. A total of 30 credits in graduate work is still required to receive the M.A. degree.

## Teacher of Students with Disabilities Coursework

(21 credits)

Candidates entering with an undergraduate degree in education and teacher certification will be required to take the following courses. SPED 512 is the prerequisite for all other courses.

Code	Title	Credits
SPED 504	Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities	3
SPED 512	Psychology of Exceptionality	3

SPED 514	Positive Behavior Support	3
SPED 524	Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities	3
SPED 531	Assessment for Instruction in Special Education	3
SPED 536	Instruction and Transition for Autism and Severe Disabilities	3
SPED 539	Instructional Practices for Students with Disabilities	3
Total Credits		21

## Additional Courses for Special Education (M.A.)

(30 total credits)

Code	Title	Credits
EDUC 500	Introduction To Research	3
SPED 542	Literacy and Students With Special Needs	3
SPED 590	Professional Seminar in Special Education	3
Total Credits		9

## Additional Courses for Special Education M.A. with Reading Specialist Certification

(39 total credits)

All additional courses for this certification can be completed online.

Code	Title	Credits
LITR 501	Psychology and Pedagogy of Literacy Processes	3
LITR 502	Curriculum, Instruction and Supervision in Literacy	3
LITR 504	Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum	3
Total Credits		9

## Graduation Requirements

- Meet general master's degree requirements.
- Successful completion of all academic and field requirements.
- Completion of 30 graduate credits with a minimum GPA of 3.00 on a 4.00 scale.
- Successful completion of a required sequence of field experiences.
- Candidates must successfully pass a comprehensive examination covering knowledge and skills related to the field of special education.
- Successful demonstration of professional dispositions and behavior.

### EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

**LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits**

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

**LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits**

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

**LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits**

Studies reading/language arts abilities and disabilities and standardized and informal tests. Observational techniques and diagnostic teaching for assessment are stressed.

**SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits**

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners. A 10-hour field experience and research component will be required.

**SPED 512 Psychology of Exceptionality 3 Credits**

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. A 10-hour experience in the field will enable candidates to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

**SPED 514 Positive Behavior Support 3 Credits**

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multicomponent interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits**

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

**SPED 531 Assessment for Instruction in Special Education 3 Credits**

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

**Prerequisite(s):** SPED 512.

**SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits**

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

**SPED 539 Instructional Practices for Students with Disabilities 3 Credits**

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

**SPED 542 Literacy and Students With Special Needs 3 Credits**

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

**SPED 590 Professional Seminar in Special Education 3 Credits**

This course addresses the current issues in the field of special education. Students will synthesize research and literature from the field of special education to address current issues and practice. Collaboratively, students will examine one area of special education through research and presentation. A reflective comprehensive view of special education including assessment, instruction, inclusive practice, assistive technology, Autism Spectrum Disorder, behavior, literacy etc. will be shared. Students are expected to complete a comprehensive exam in these related special education topics and submit 100 hours of supervised field hours. This course should be taken in the final semester of the MA program as it is the culminating reflective course of study.

**Prerequisite(s):** Permission of instructor.

## Student Assistance Coordinator Certificate

### Program Overview

This Rider Student Assistance Coordinator (SAC) Certificate qualifies students to apply for the Student Assistance Coordinator Certificate of Eligibility with Advanced Standing (SAC CEAS (<https://www.state.nj.us/education/license/sac>)) in New Jersey, which is supplied by the NJ Department of Education (<https://www.state.nj.us/education>). For students interested in the school counseling profession, the SAC plays a specialized counseling role in the schools. SACs help students who are coping with social, emotional, and behavioral issues related to substance abuse and typically provide drug and alcohol prevention and intervention counseling services.

Students should consult the NJ Department of Education (<https://www.state.nj.us/education>) for the most updated and detailed explanations of the requirements to ultimately qualify for a standard New Jersey SAC certificate.

### Curriculum Overview

This certificate is comprised of seven courses or 21 credits.

Current M.A. students seeking either the Master of Arts in Counseling Services, School Counseling Concentration or the Master of Arts in Clinical Mental Health Counseling, may fulfill requirements for the SAC certificate as they complete their M.A. degree. Extra courses will be required beyond their M.A. degree requirements. For those who are pursuing a master's in school counseling at Rider, completion of only two extra courses in substance abuse is required. For those who are pursuing a Master of Arts in Clinical Mental Health Counseling, three extra courses are required (two courses may be able to count as electives for the M.A. CMHC program).

For practicing counselors interested in acquiring the SAC CEAS, the 21 credits are standard; however, Rider faculty recommend that interested

students submit their transcripts to the NJ Department of Education for review and final determination of a required plan of study.

### Certificate Offered

## Student Assistance Coordinator Certificate Requirements

### For Current Master of Arts in Counseling Services (School Counseling Concentration) Students:

(9 credits)

Current Master of Arts in Counseling Services students with a School Counseling Concentration may fulfill requirements for the SAC as they complete their M.A. degree. One course (CNSC 580, CNSC 581, CNSC 590 or CNSC 591) may be taken as part of the M.A. degree requirements and two extra courses will be required beyond the M.A. degree requirements. At least one of the extra courses must be taken before CNSC 580, CNSC 581, CNSC 590, or CNSC 591. Currently enrolled students are encouraged to consult with their program advisors for more information about this certificate option.

Code	Title	Credits
COUN 515	Substance Abuse Counseling	3
COUN 516	Strategies in Addiction Counseling	3
CNSC 580	Elementary School Counseling Practicum and Student Assistance Coordinator Practicum	3

or CNSC 581	Secondary School Counseling Practicum and Student Assistance Coordinator Practicum	
or CNSC 590	Counseling Internship I	
or CNSC 591	Counseling Internship II	
Total Credits		9

**For Current Master of Arts in Clinical Mental Health Counseling Students:**

(9 credits)

Current Master of Arts in Clinical Mental Health Counseling students may fulfill requirements for the SAC as they complete their M.A. degree. Three extra courses will be required; two courses may be able to count as electives for the M.A. CMHC program. Currently enrolled students are encouraged to consult with their program advisors for more information on this certificate option.

Code	Title	Credits
EDSO 501	Foundations of Counseling in Edu Settings: Referral Sources for Stdnets and Stdnets With Special Needs	3
CNPY 518	Counseling Children, Adolescents and Families	3
CNSC 580	Elementary School Counseling Practicum and Student Assistance Coordinator Practicum	3
or CNSC 581	Secondary School Counseling Practicum and Student Assistance Coordinator Practicum	
or CNSC 590	Counseling Internship I	
or CNSC 591	Counseling Internship II	
Total Credits		9

**All Other Students:**

(21 credits)

The Rider University Student Assistance Coordinator (SAC) Certificate is an approved program by the New Jersey Department of Education. This certificate is comprised of 21 credits, meets 9 content area requirements, and is completed by taking seven courses:

Code	Title	Credits
COUN 515	Substance Abuse Counseling	3
COUN 516	Strategies in Addiction Counseling	3
COUN 530	Legal and Ethical Issues in Counseling and Psychotherapy	3
CNPY 518	Counseling Children, Adolescents and Families	3
EDSO 501	Foundations of Counseling in Edu Settings: Referral Sources for Stdnets and Stdnets With Special Needs	3
EDPS 503	Human Growth and Development	3
CNSC 580	Elementary School Counseling Practicum and Student Assistance Coordinator Practicum	3
or CNSC 581	Secondary School Counseling Practicum and Student Assistance Coordinator Practicum	
or CNSC 590	Counseling Internship I	
or CNSC 591	Counseling Internship II	
Total Credits		21

**Courses and Descriptions**

**CNPY 518 Counseling Children, Adolescents and Families 3 Credits**

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

**CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

**Prerequisite(s):** COUN 515 or COUN 516.

**CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

**Prerequisite(s):** COUN 515 or COUN 516.

**COUN 515 Substance Abuse Counseling 3 Credits**

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

**COUN 516 Strategies in Addiction Counseling 3 Credits**

This is an experiential and laboratory-based experience in which students will learn to implement evidenced based counseling techniques that are utilized in the field of substance abuse counseling. Students will be able to expand their basic counseling skills and techniques learned in COUN 550, as well as become exposed to techniques that are unique to addiction counseling. In addition to learning assessment skills, students will learn interventions that include motivational interviewing, relapse prevention, alternative therapies, group counseling, family counseling, and others. This course will also focus on issues of ethics and prevention in counseling.

**COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits**

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

**EDPS 503 Human Growth and Development 3 Credits**

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

**EDSO 501 Found of Counseling in Ed Settings: Referral Sources for Students and Students With Special Needs 3 Credits**

The course provides overview of the foundations of counseling in educational settings, including the historical roots; current and future trends, roles, and functions in multicultural schools and higher education settings; comprehensive developmental counseling programs; ethical school and higher education counseling practices; and individual and group counseling and consultation strategies, and evidence-based interventions and evaluations. In addition, the course will address community social services and educational-based programs (including special education and disability laws and accommodations) available to special needs students, other individuals and groups experiencing learning disabilities, and other temporary or chronic maladjustment. Reviews principles and methods utilized by social agencies, schools, and higher education settings.

## Supervisor of Instruction Certificate

### Program Overview

This program is designed for experienced and fully-certified teachers and other related instructional personnel to gain the necessary skills and professional knowledge to become supervisors in a school system.

It is a coherent program that develops the reflective capacities of students to perform a wide range of supervisory functions in accord with recognized professional standards, best practices and values.

Students should note that the recommended course sequence set by Rider University has been approved by the New Jersey Department of Education for the New Jersey supervisor's certificate and meets the four course requirements established by the Department: a course in the general principles of staff supervision (N-12); two courses in general principles of curriculum development (N-12); and a practicum in supervision where students will be expected to complete a mentored internship in a school or appropriate work setting as a requirement of the culminating course in the sequence.

## Courses and Descriptions

**CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits**

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

### **CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits**

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531.

### **EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits**

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

### **EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits**

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

## **Teacher Leadership (M.A.)**

### **Program Overview**

The Master of Arts in Teacher Leadership program seeks students who wish to enhance their knowledge and ability to deliver content instruction and further develop their leadership skills in educational settings. This program is designed to be developmental and experiential in nature, fostering ethical behavior and the improvement of self and one's profession. The program is based upon current leadership standards. These standards emphasize performance-based learning opportunities in the areas of articulating and implementing a vision for learning, promoting effective instruction, effectively utilizing and managing resources in the learning environment, collaborating with families and community members, promoting the success of all students in an ethical manner, and recognizing the influence of the larger political, social, economic, legal, and cultural context.

The teacher leadership degree program serves those students who seek a graduate program that will develop their professional capacities as teachers and leaders. Increasingly, teachers are called upon to play a leadership role in the following areas: design, coordinate, and evaluate standards-based curricular programs; assess the outcomes of instruction; support the work of other teachers through mentoring, peer-coaching, and collaborative problem-solving; contribute to the professional development of the staff by providing and facilitating teacher in-service programs; and to promote a positive climate and culture for learning both inside and outside of the classroom. This program also prepares students for formal instruction/supervisory roles by emphasizing the knowledge, skills, and dispositions needed to assume leadership responsibilities for school and district-wide improvement initiatives.

Leadership Growth Projects are a requirement of every teacher leadership core course within the program. They provide students with an opportunity to develop and practice their teacher/supervisory leadership skills throughout the program so that they are well-prepared for the

requirements of their internship experience (Capstone Project). An electronic portfolio showcasing how Standards have been addressed will be submitted during the internship course to document continuous and sustained accomplishments of all candidates in their educational settings. Upon the completion of the Master of Arts Degree in Teacher Leadership, graduates will qualify for the New Jersey Instructional Supervisor Certificate.

## Curriculum Overview

Developed by Rider University's respected and CAEP (<http://www.ncate.org>)-accredited College of Education and Human Services, the Master of Arts is designed to prepare experienced teachers to assume a greater leadership role in their schools, and share their skills and knowledge while remaining active in the classroom.

Teachers who complete the full master's degree will acquire both content knowledge and the skills needed to be effective teacher leaders in their schools and school districts. The full master's degree program includes both the 21-credit teacher leadership core and the 15-credit core content disciplines. Students who complete the master's degree track are eligible to apply for New Jersey Supervisor Certification.

The teacher leadership core is designed to prepare experienced teachers to assume a greater leadership role in their schools and share their skills and knowledge while remaining active in the classroom. This is a low-residency program that combines the best of face-to-face learning with the convenience of online learning. Its innovative design gives participants the flexibility they need to balance work and family demands while advancing their skill as teacher leaders. In the core content disciplines, teachers select content courses designed to build content knowledge and pedagogy in specialized fields. Teachers may select courses in only one concentration or a combination of courses in more than one concentration.

## Teacher Leadership Concentration Options

The concentrations provide teachers with face-to-face and/or online courses that require the application of what is being learned in class to how content is being taught in their classrooms. The primary goal is to enhance content knowledge and ability to deliver instruction in a common core curriculum area of specialization. The completion of five courses in the concentrations will result in a Rider University Professional Development Certificate in that specific concentration and in some instances a New Jersey Department of Education endorsement/certification.

## Teacher Leadership Concentration Options Requirements

- English as a Second Language/Bilingual Concentration (p. 139)
- Inclusive Practices in Education Concentration (p. 139)
- Math Concentration (p. 139)
- Principal Concentration (p. 139)
- Science Concentration (p. 139)
- Literacy Concentration (p. 139)
- Gifted Education and Creativity Concentration (p. 139)
- Endeavor (p. 139) STEM (p. 139) Concentration (p. 139)

**English as a Second Language/Bilingual Concentration**

(15 credits)

Code	Title	Credits
CURR 548	Curriculum and Instruction for Diverse Learners	3
EDUC 520	Introduction to Linguistics and Psycholinguistics	3
EDUC 521	Teaching a Second Language	3
EDUC 560	Educating and Evaluating the Bilingual Child	3
LITR 508	Literacy and the Bilingual/Bicultural Child	3
Total Credits		15

**Inclusive Practices in Education Concentration**

(15 credits)

Code	Title	Credits
SPED 512	Psychology of Exceptionality	3
SPED 514	Positive Behavior Support	3
SPED 524	Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities	3
SPED 531	Assessment for Instruction in Special Education	3
SPED 539	Instructional Practices for Students with Disabilities	3
Total Credits		15

**Math Concentration**

(15 credits)

Code	Title	Credits
CURR 517	Teaching and Learning Number and Operations	3
CURR 518	Teaching and Learning Rational Numbers and Proportional Reasoning	3
CURR 519	Teaching and Learning Algebraic Reasoning	3
CURR 520	Teaching and Learning Geometric Understanding	3
CURR 522	Teaching and Learning Measurement and Data	3
Total Credits		15

**Principal Concentration**

(15 credits)

Code	Title	Credits
EDAD 501	Educational Leadership and Organizational Theory	3
EDAD 507	Education and the Law	3
EDAD 514	School Finance and Fiscal Management	3
EDAD 591	Seminar/Practicum in Educational Leadership/Supervision	3
EDAD 592	Seminar/Practicum in Educational Leadership/Supervision	3

<b>Required Courses:</b>		3
CURR 660	Authentic Data in the Elementary STEM Classroom.	
	or CURR 661 Authentic Data in the Secondary STEM Classroom	

**Select up to four of the following courses:** 6-12

CURR 662	Eyes on Earth: Teaching Earth Science from Space (PK-8)
CURR 663	Lessons from the Ocean: Science on the Water Planet (Grades 2-12)
CURR 664	The Arts in STEM: Advancing Meaningful Integration (K-12)
CURR 665	Climate Change with NSF SPRINTT
CURR 666	Exploring Mars: A New Twist on Science (or Math)
CURR 667	Physical Science in Motion: Classroom Applications
CURR 668	Coding, Robotics, and 1:1 Devices
CURR 669	Culturally Relevant Pedagogy in the STEM Classroom
CURR 670	Life and Marine Science: Tracking Live Marine Animals
CURR 671	Life in Space: NASA ISS and Astrobiology
CURR 672	Math Connections to STEM Education
CURR 673	NASA Astronomy and Space Science
CURR 674	NASA Physics for Real Beginners: Earth, Moon, and Space
CURR 675	Reading and Writing in the Science Classroom
CURR 676	The E in STEM: Meaningful Content for Engineering
CURR 677	WDLC - Weather Data Learning Center
CURR 678	Action Research in the STEM Classroom
CURR 679	Practicum in STEM Leadership
CURR 680	STEM Leadership Seminar
<b>Select up to two of the following courses:</b>	
CURR 517	Teaching and Learning Number and Operations
CURR 518	Teaching and Learning Rational Numbers and Proportional Reasoning
CURR 519	Teaching and Learning Algebraic Reasoning
CURR 520	Teaching and Learning Geometric Understanding
CURR 522	Teaching and Learning Measurement and Data
CURR 640	Teaching and Learning Physical Science
CURR 641	Teaching and Learning Life Science
CURR 642	Teaching and Learning Earth and Space Science
CURR 643	Engineering Solutions to the Challenges of Contemporary Science Issues
CURR 644	Teaching and Learning Chemical Science

0-6

## Courses and Descriptions

### **CURR 517 Teaching and Learning Number and Operations 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

### **CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

### **CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits**

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Content and Mathematical Practices.

### **CURR 520 Teaching and Learning Geometric Understanding 3 Credits**

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

### **CURR 522 Teaching and Learning Measurement and Data 3 Credits**

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

**CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits**

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

**CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits**

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531.

**CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits**

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531 and CURR 538.

**CURR 552 Creative, Ethical Teacher Leadership 3 Credits**

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

**CURR 640 Teaching and Learning Physical Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected physical science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 641 Teaching and Learning Life Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 642 Teaching and Learning Earth and Space Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 643 Engineering Solutions to the Challenges of Contemporary Science Issues 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 644 Teaching and Learning Chemical Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be placed on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

**CURR 650 Understanding Gifted Learners 3 Credits**

The course explores the ways in which the gifted and talented can differ from more typical learners in terms of their cognition, social-emotional dimensions, behavior, and long-term development. It focuses on theories of intelligence, differing conceptions of giftedness and talent development, and learning processes. Some specific topics include underachievement, perfectionism, dual exceptionalism, gender issues, and underserved populations. The course also addresses the ways in which gifted education can evolve to fit the demands and opportunities embedded in complex, 21st-century socioeconomic, cultural, and technological contexts.

**CURR 652 Differentiating Instruction for the Gifted and Talented 3 Credits**

This course provides the rationale and practical strategies for effective instructional differentiation for the gifted and talented within and beyond the regular classroom. Participants will learn how to differentiate within subject areas by adjusting content, process, product, and learning environment to meet the needs of learners. They also will explore the nature and nuances of differentiation by ability, readiness, and interest, as well as the implications of instructional differentiation for formative and summative assessment. Throughout the course they will design and share examples of differentiation including tiered assignments, complex instruction, independent studies, graphic organizers, and learning contracts.

**CURR 654 Innovative Instructional Strategies for Gifted Education 3 Credits**

This hands-on, experiential course immerses participants in simulations and analyses of new and revised student-centered teaching models and strategies that are conducive to creative and critical thinking, advanced content mastery, and the invigoration of students' interests. Participants analyze the potential of each model/strategy while considering the ways in which it can apply to content learning in various subject areas/domains. The course also engages participants in studying the fundamental principles of program design in gifted education so they can make the best possible use of the instructional models and strategies.

**CURR 656 Creative, Interdisciplinary Thinking 3 Credits**

This course facilitates creative thinking through the exploration of important insights from a wide variety of disciplines in the social sciences, humanities, natural sciences, and education. The process of creative association enables participants to combine diverse, remotely associated constructs to create new products and processes. Applications of interdisciplinary thinking to curriculum and instruction are explored. These applications include novel methods for curriculum integration, discovery and development of children's interests, and instructional modifications for the gifted and talented. Exploration of concepts and processes in multiple academic domains and professional fields also provide appreciation for the domain-specific natures of giftedness and creativity.

**CURR 660 Authentic Data in the Elementary STEM Classroom. 3 Credits**

Young learners can think deeply about content and make meaningful connections between their experiences, natural phenomena, and authentic data when teachers integrate data in purposeful ways. In this course, teachers construct student-centered STEM investigations integrating real-world scientific and mathematical data and build their understanding of the theoretical basis for this work. Participants gain knowledge of STEM resources, learn to access entry points for STEM in elementary classrooms and foster engaging contexts, like engineering, coding, and NASA mission exploration. Teachers explore the synergies between Common Core State Standards and Next Generation Science Standards for a productive and exciting learning environment that prepares students for ongoing interest in STEM. This course is recommended as a foundation for the STEM certificate program.

**CURR 661 Authentic Data in the Secondary STEM Classroom 3 Credits**

Middle and High School students are capable of deep sense making when teachers utilize engaging STEM classroom practices to teach content with authentic data connections. In this course, teachers learn to apply research-based best practices central to today's classrooms. In a collaborative professional learning environment, they build knowledge of resources for accessing, analyzing, and making use of authentic data in meaningful activities. Coursework includes planning student-centered lessons that integrate data, building cultural relevance with engaging phenomena, and developing meaningful assessments for STEM activities. Participants identify how to integrate engineering design into the STEM classroom and learn how to represent the Nature of Science as students develop conceptual understanding and apply critical thinking to real-world decisions. A library of content rich lessons becomes available to all participants through a shared online community. This course is recommended as a foundation for the STEM certificate program.

**CURR 662 Eyes on Earth: Teaching Earth Science from Space (PK-8) 3 Credits**

This course will take participants through a journey about space exploration and specific NASA missions that examine components of earth. Participants will learn science content grounded in Earth's Lithosphere, Hydrosphere, Atmosphere, and Biosphere. By learning to use authentic data from NASA and other sources participants will experience an exploratory approach to learning about the Earth, and then bring these experiences to their own classrooms. Teachers will utilize several web-based tools and real-time data along with the three-dimensional learning in the Next Generation Science Standards to create lessons that can be used directly in the classroom.

**CURR 663 Lessons from the Ocean: Science on the Water Planet (Grades 2-12) 3 Credits**

Bring the ocean into your classroom by using Earth's waters as a context for standards-based STEM content. The ocean is critical to the functioning of the Earth system, and is an authentically integrated context for learning about topics such as density, weather and climate, heat transport, environmental issues, biogeochemical cycles, mathematics, and much more. Access a myriad of data sets to apply science concepts and make connections between the ocean and atmosphere, living and nonliving parameters, and life on land, as well as in the deep sea. Use the context of the ocean to teach Next Generation Science Standards topics with deep understanding and meaning for learners.

**CURR 664 The Arts in STEM: Advancing Meaningful Integration (K-12) 3 Credits**

Apply art in the context of exciting STEM concepts and learn to integrate art, science, math, technology, and engineering in more meaningful ways in your classroom. At the core of the STEM Education movement are critical thinking, creativity, problem solving, and authentic learning environments that engage diverse students in meaningful ways with content. The many mediums for art and artistic expression are a valuable component of communication and expression. Scientists and researchers at NASA and across the globe use myriad forms of art in their work. This course invites students to take a close look at the incorporation of art in the STEM classroom and provides resources, exemplars, and access to collaborative support for arts integration.

**CURR 665 Climate Change with NSF SPRINTT 3 Credits**

Award-winning curriculum and eloquent, online student investigations help students study science concepts emphasized in the Next Generation Science Standards, in the context of Earth's Polar Regions to better understand the complexity of Earth's climate and how it is changing. View the Earth using real scientific data from satellites and western researchers. Then, consider the lens of indigenous peoples of the Arctic. Examine tons of data and changes in ice, permafrost, weather patterns, biological change, and more as you conduct research with simple-to-use, web-based instructional tools, using authentic data sets and models to study our planet's past, present, and future climate. Interdisciplinary investigations address many Common Core State Standards in reading, writing, science, and technical subjects as well as mathematics in the context of climate science.

**CURR 666 Exploring Mars: A New Twist on Science (or Math) 3 Credits**

Use a wealth of data sets and technological tools to explore and understand features of Earth's neighbor, the Red Planet. Look for and study the physical and chemical evidence of water and ice; compare erosion patterns on Mars and Earth; and make inferences about the planet's history as you study both its geologic features, including volcanoes and craters, and the physics of the atmosphere. Teach Next Generation Science Standards topics in Earth, physical, and chemical science integrating mathematics, in the context of Mars using recent data from Curiosity Rover and other missions.

**CURR 667 Physical Science in Motion: Classroom Applications 3 Credits**

Physical science, when applied, makes tough-to-understand concepts easy and fun. Participants learn to solve problems relating to one-dimensional motion; become acquainted with and apply Newton's Laws of Motion and equilibrium of forces; learn about constant acceleration and gravitational acceleration; investigate concepts in aerodynamics; and learn about two-dimensional motion. Participants will use free, simple-to-use, software simulations from NASA Glenn Research Center, which help to present these concepts for you, and, then, your students, in the context of aeronautics, including airplane design, rocketry, sports, and more. A carefully developed resource page provides access to excellent resources and engaging activities for implementing course content in your classroom with important connections to Next Generation Science Standards and Common Core mathematics.

**CURR 668 Coding, Robotics, and 1:1 Devices 3 Credits**

Learn applications of Coding as a mathematics pedagogy, explore opportunities for Robotics, and learn cutting-edge implementation of One-to-One Devices (1:1) in K-12 classrooms. Participants learn about and explore best practices in the newest learning pedagogies and technologies. Whether you are already involved, or looking to integrate these cutting-edge tools and strategies for the classroom, you will begin to expand your reach for enhancing student learning. Scaffolded to allow success at all grade levels, Coding, Robotics, and 1:1 Devices offers resources for application into elementary, middle, and high school. Participants will interact with no-fee computer programming, robotics opportunities, and the latest uses of devices. All participants have the opportunity to work with innovative technologies and interact with talented educators, practitioners and special guests who are already making a difference in K-12 classrooms.

**CURR 669 Culturally Relevant Pedagogy in the STEM Classroom 3 Credits**

Classrooms comprise individual learners, each bringing their own culture and experiences to the learning environment. The value and strength of diversity has become increasingly described in educational literature. This course introduces teachers to the curriculum and pedagogical issues relevant to race, language, gender, and socio-economic differences. Participants apply content and pedagogy involving science and mathematics contexts for effective learning. STEM activities will integrate meaningful, engaging practices for teaching diverse learners. The course is differentiated for elementary and secondary school educators to provide relevant connections, to be directly applied, in each participant's classroom.

**CURR 670 Life and Marine Science: Tracking Live Marine Animals 3 Credits**

Follow marine animals (e.g., polar bears, sea turtles, sharks, and whales) in real-time, and apply life and Earth science topics to the ocean. Study topics such as ecosystems, biodiversity, cell structures, food webs, and conservation, as you make connections to ocean currents, seafloor features, density and more. Discover the importance of the ocean to humans, as well as our impacts, both positive and negative, on marine environments. The in-depth use of data lends itself to Next Generation Science Standards by integrating instructional technology with life, Earth and physical science.

**CURR 671 Life in Space: NASA ISS and Astrobiology 3 Credits**

The International Space Station (ISS) is an amazing undertaking comprising technology, engineering, science and math—the perfect context for exciting students for learning. NASA research leads to technological advances on Earth and in human space exploration. As NASA plans for manned missions to Mars, scientists explore our solar system and beyond for determining if and where life could exist. Extremophiles are fascinating for teaching Earth science in a context for astrobiology research. The course explores how space travel impacts the human body; growing food in space; engineering protection from radiation, and searching for habitable environments. With its application of subject matter, it offers excellent resources and interactions with NASA scientists, and data for educators to bring the exciting context of space travel to the classroom.

**CURR 672 Math Connections to STEM Education 3 Credits**

The course introduces a wealth of applied mathematics exercises and activities relevant to integrated STEM assets and science activities. Some are in the realm of topics seen in Earth and Space science and physics. Live presenters break down authentic examples and projects, and demonstrate to educators how problems incorporate Common Core State Standards-based mathematics with applications that meet Next Generation Science Standards performance expectations. Educators survey math and science examples and tools as the course promotes the use of applied mathematics in science, or science in mathematics, to meet content goals in the classroom.

**CURR 673 NASA Astronomy and Space Science 3 Credits**

Harness your students' enthusiasm for space and astronomy by using astronomical images to enrich your physical, Earth, and life science courses. Measure the speed of an asteroid, learn about erosion on Mars, and see the tracers of life that are visible from space. In this course, we explore the many ways in which real data from NASA's space science and astronomy missions can be used to teach math and science content in your classroom, meeting science and math standards in Next Generation Science Standards and Common Core State Standards. Through the use of cutting-edge technology tools, and with a NASA scientist visiting our class, you will not only learn more about the universe, you will learn how to bring the universe into your education context.

**CURR 674 NASA Physics for Real Beginners: Earth, Moon, and Space 3 Credits**

Gain an introduction to physics in this conceptual course that uses NASA's space initiatives as the context for content. Learn about gravitation between celestial bodies, how to get a satellite into orbit, what it takes to blast off into space, and more. This course will discuss these and related topics while exploring NASA content related to space and the Hubble Space Telescope and Kepler Missions. Bring cutting-edge examples to your classroom while addressing Next Generation Science Standards performance expectations.

**CURR 675 Reading and Writing in the Science Classroom 3 Credits**

Discuss and analyze the ways that literacy and science connect in the science classroom, and highlight how reading and writing can be used to increase students' understanding of science content. Focus on how to integrate important literacy skills from Common Core State Standards in your science and STEM classroom to address content standards from Next Generation Science Standards. Cutting-edge strategies and well-founded principles pave the way to success with non-fiction reading material. The manner in which information and scientific content is presented shapes student success, not just for reading, but student writing, organization, and presentation.

**CURR 676 The E in STEM: Meaningful Content for Engineering 3 Credits**

Learn how to use engineering to make your classroom come alive. Bridge and teach math and science concepts through exciting applications in the Engineering Design Process where you and your students design, test, and evaluate models and real-life applications. Activities are hands-on and emphasize the reciprocities between science, technology, engineering, and mathematics in formal design challenges. Educators enrich classroom curriculum with elements of design in science, mathematics, or technology activities, addressing important Next Generation Science Standards' engineering design practices.

**CURR 677 WDLC - Weather Data Learning Center 3 Credits**

Use weather data to teach and learn math. This course teaches content in a math curriculum that uses weather data. Weather Data Learning Center demonstrates increases in student performance in grade 4 mathematics. Collect, access, and interpret current real-time imagery, maps and data. Make connections from weather to learn Common Core-based mathematics using various STEM pedagogical strategies. Learn the basics of clouds, air masses, humidity, fronts, pressure, jet stream, and climatic patterns as you apply these ideas to math concepts such as measurement, fractions, number sense, data collection, and analysis.

**CURR 678 Action Research in the STEM Classroom 3 Credits**

A Capstone Course requirement "option", this course may be part of joint Master's Degree programs, or Endeavor's "5-course" certificate program earning Research Distinction and an award.

**CURR 679 Practicum in STEM Leadership 3 Credits**

Share your knowledge of STEM teaching and learning with colleagues in your building, district, or region.

**CURR 680 STEM Leadership Seminar 3 Credits**

The course contains STEM pedagogical content knowledge, incorporating authentic data and using technology as a tool for learning. The course provides a springboard for cultivating problem solving skills, inspiring student research projects, and integrating STEM methods and essential principles addressed in new standards.

**EDAD 501 Educational Leadership and Organizational Theory 3 Credits**

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits**

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDAD 507 Education and the Law 3 Credits**

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits**

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531, CURR 532 or CURR 538, and EDAD 505.

**EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits**

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 505.

**EDAD 514 School Finance and Fiscal Management 3 Credits**

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 501.

**EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits**

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 501 and EDAD 514.

**EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits**

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

**EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits**

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

**EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits**

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

**Prerequisite(s):** EDAD 591.

**EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits**

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

**EDUC 521 Teaching a Second Language 3 Credits**

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. \*NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

**LITR 500 Multimodal Teaching and Learning 3 Credits**

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

**LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits**

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

**LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits**

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

**LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits**

Studies reading/language arts abilities and disabilities and standardized and informal tests. Observational techniques and diagnostic teaching for assessment are stressed.

**LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits**

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

**LITR 510 Research and Survey of Texts for Children and Adolescents 3 Credits**

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-print texts into the school curricula in ways that support youth and adolescent literacy development.

**LITR 560 Writing Project at Rider 3 Credits**

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas.

**LITR 600 Independent Research and Study in Literacy Education 1-3 Credits**

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education.

**READ 503 Content Reading in High School, College, and Continuing Education 3 Credits**

Familiarizes teachers with the philosophy, language, and methodology of the language arts as they effect instruction in content areas. Emphasis is on the ways in which the integration of listening, speaking, reading and writing activities within all curricular areas can increase learning. Through lectures, demonstrations, and workshop-type activities, students will both experience and create lessons within various fields. Also investigates the content and methodology of reading programs in educational settings ranging from middle school through adult education.

**SPED 500 The Inclusive Classroom: Effective Practices for General Education Teachers 3 Credits**

This course is designed to introduce general education teachers to special education and the inclusive classroom. Students will explore current research, issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed.

**SPED 512 Psychology of Exceptionality 3 Credits**

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. A 10-hour experience in the field will enable candidates to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

**SPED 514 Positive Behavior Support 3 Credits**

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multicomponent interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits**

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

**SPED 531 Assessment for Instruction in Special Education 3 Credits**

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

**Prerequisite(s):** SPED 512.

**SPED 539 Instructional Practices for Students with Disabilities 3 Credits**

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

**SPED 542 Literacy and Students With Special Needs 3 Credits**

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

## Teacher Leadership Professional Development Certificate

### Program Overview

This 36-credit teacher leadership certificate provides mediated field placements, mentored internships, face-to-face and online courses and experiences, and on-the-job training that build necessary skills in teacher leadership. Those teachers who complete the teacher leadership core, which consists of seven core courses, will receive the Rider University Professional Development Certificate in Teacher Leadership.

### Certificate Offered

### Courses and Descriptions

#### **CURR 552 Creative, Ethical Teacher Leadership 3 Credits**

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

#### **EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits**

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits**

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

**CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits**

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531.

**EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits**

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 501 and EDAD 514.

**EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits**

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 505.

**EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits**

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531, CURR 532 or CURR 538, and EDAD 505.

## Teacher of Students with Disabilities Certificate

### Program Overview

The graduate education certification program for teacher of students with disabilities includes the 21 credits required by the State of New Jersey for endorsement as a Teacher of Students with Disabilities. This certification program is for candidates that possess a current New Jersey instructional elementary, secondary, or P-3 certification. Courses must be completed in order based on prerequisites. Completion of a sequence of field-based experiences is required.

### Curriculum Overview

Courses include psychology of exceptionality, positive behavior support, inclusive educational practices, transition to adult life, assessment, and instructional practices for children with disabilities.

The M.A. in Special Education program comprises a sequence of coursework that includes courses required for a New Jersey Teacher of Students with Disabilities Endorsement. Candidates who are successful in the Teacher of Students with Disabilities Certification Program may apply their credits toward the M.A. in Special Education.

## Endorsement/Certification Offered

The courses in this program are also part of the Master of Arts in Special Education.

Special Education (M.A.) (p. 131)

## Teacher of Students with Disabilities Certificate Requirements

The graduate education certification program for teacher of students with disabilities will require a minimum of 21 credits required by the State of New Jersey for endorsement as a teacher of students with disabilities. Candidates must possess an existing instructional certificate or certificate of eligibility in elementary education, secondary education, or P-3 education. Completion of a sequence of field-based activities is required.

## Courses and Descriptions

### SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners. A 10-hour field experience and research component will be required.

### SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. A 10-hour experience in the field will enable candidates to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

### SPED 514 Positive Behavior Support 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multicomponent interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

### SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

**SPED 531 Assessment for Instruction in Special Education 3 Credits**

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

**Prerequisite(s):** SPED 512.

**SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits**

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

**SPED 539 Instructional Practices for Students with Disabilities 3 Credits**

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

**Teaching (M.A.T.)**

**Program Overview**

The Master of Arts in Teaching (MAT) is a 30-credit degree that incorporates work completed during the initial teacher preparation phase of candidates' development while adding broad professional knowledge about innovative curriculum design, inclusive practices, and data-based decision making in teaching and learning. The program is open to candidates from Rider's Post-Baccalaureate Teacher Certification Program.

In addition to earning the MAT degree, candidates may apply coursework and credits to other Master's programs, endorsements, and/or professional development certificates offered through the Department of Graduate Education, Leadership, and Counseling.

**Students can take much of the initial coursework for the MAT degree by completing one of the initial teacher certification programs through the Post-Baccalaureate Teacher Certification Program:**

- Business Education/Marketing Education Comprehensive (K-12) (p. 63)
- Dance Education (K-12) (p. 80)
- Early Childhood Education (P-3) (p. 92)
- Elementary Education (K-6) (p. 97)
- English as a Second Language (p. 108)
- English Language Arts Education (K-12) (p. 107)
- Mathematics Education (K-12) (p. 114)
- Music Education (K-12) (p. 115)
- Science Education (K-12) (Biological Sciences, Chemistry, Earth Sciences, Physics) (p. 128)
- Social Studies (K-12) (p. 130)
- Theater Education (K-12) (p. 152)
- World Languages (K-12) (French or Spanish) (p. 154)

**Degree Offered**

- MAT (Master of Arts in Teaching)

- Meet general master's degree requirements;
- Successful completion of all academic requirements;
- Completion of 30 graduate credits with a minimum GPA of 3.00; and,
- Successful demonstration of professional dispositions and behavior.

## Courses and Descriptions

### **CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits**

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

### **CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits**

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531.

### **CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits**

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531 and CURR 538.

### **EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits**

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 501 and EDAD 514.

## Theater Education (K-12)

### Program Overview

The Post-Baccalaureate Teacher Certification Program in Theater is designed for college graduates seeking initial teacher certification. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 151).

### Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Theater is a 21 graduate credit program requiring courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

## Theater Education (K - 12) Certificate Requirements

(21 credits)

Code	Title	Credits
CURR 700	Educational Foundations for Inclusive Practices	3
CURR 703	Inclusive Literacy Practices Across Content Areas	3
CURR 704	Inclusive Methods for Teaching English Language and Theater Arts	3
CURR 720	Inclusive Curriculum Design & Instruction in Secondary Schools	3
CURR 770 or CURR 771	Clinical Experience and Seminar in Teaching Supervised Clinical Experience in Teaching	9
Total Credits		21

## Additional Requirements for Completion of Certificate:

- Completion of all courses before final clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

### CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

### CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

**Prerequisite:** CURR 700.

### CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

### CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

**Prerequisite(s):** CURR 703.

**CURR 770 Clinical Experience and Seminar in Teaching 9 Credits**

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

**CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

## World Languages (K-12) Certificate in French or Spanish

### Program Overview

This Post-Baccalaureate Teacher Certification Program in World Languages is designed for college graduates seeking initial teacher certification in French or Spanish. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 151).

### Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in World Languages (French or Spanish) is a 21 credit graduate program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

### **CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits**

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

**Prerequisite:** CURR 700.

### **CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits**

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

**Prerequisite(s):** CURR 703.

### **EDUC 521 Teaching a Second Language 3 Credits**

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. \*NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

### **CURR 770 Clinical Experience and Seminar in Teaching 9 Credits**

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

### **CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

## College of Liberal Arts and Sciences

The College of Liberal Arts and Sciences (<http://www.rider.edu/claes>) (CLAS) offers advanced degrees designed to build professional success in a variety of organizational settings. With programs in Applied Psychology, Business Communication and Homeland Security, graduate programs in CLAS focus on refining essential skill sets for data analysis and its critical application, for career advancement and personal growth. A Master's degree from Rider will connect cutting edge curricula with

real-world learning opportunities resulting in a unique and enriching educational experience.

### **Masters in Applied Psychology (p. 156)**

The M.A. in Applied Psychology: Applied Behavior Analysis (ABA) prepares students to excel in professional careers as scientist-practitioners. By challenging students to use a scientific lens when creating and evaluating clinical interventions, and to use an applied lens when designing research, this program will ensure that students are prepared to achieve success in behavior analytic employment, or to pursue further education upon completion of the program.

### **Masters in Business Communication (p. 160)**

The M.A. in Business Communication focuses on the application of communication skills within a business context. Students learn to better understand and leverage communication strategies to achieve organizational goals. The program introduces students to best practices in business communication, and engages them in real life current issues and scenarios faced by professionals on the job.

### **Masters in Health Communication (p. 163)**

The M.A. in Health Communication prepares graduates to advance public health policy, influence the health and lifestyle behaviors of individuals and underserved population groups, and improve overall health outcomes. The Health Communication program offers students a rich and engaging learning experience. Designed for working professionals, this online graduate program provides a rich and engaging learning experience.

### **Masters in Homeland Security (p. 165)**

The M.A. in Homeland Security is a broad, theory-based program which offers a distinctive and multidisciplinary approach to preparing professionals for leadership roles in protecting the United States, its interests and its allies from terrorist attacks, as well as responding to natural disasters and other threats to the safety and welfare of our communities, state and nation. Students will gain the knowledge and foundation needed to pursue private or public sector employment in the expanding area of homeland security and emergency preparedness, or further study in public policy.

## **Policies**

### **Undergraduate Students Taking Graduate Courses**

Students who are eligible to take CLAS graduate courses during their senior year must have a minimum cumulative GPA of 3.0. Under most circumstances, up to six credits of graduate courses may be taken as an undergraduate and would be included in the regular, full-time tuition fee. These credits may be applied towards the undergraduate degree requirements, including in the calculation of undergraduate GPA. Should the student matriculate into the CLAS graduate program, these credits, but not the grades, would be subsequently transferred to the graduate transcript.

## **Programs and Certificates**

<b>Program</b>	<b>Degree</b>	<b>Certificate</b>
Applied Psychology (M.A.) (p. 156)	✓	
Business Communication (M.A.) (p. 160)	✓	
Health Communication (M.A.) (p. 163)	✓	
Homeland Security (M.A.) (p. 165)	✓	

## **Applied Psychology (M.A.)**

### **Program Overview**

The Master of Arts in Applied Psychology: Applied Behavior Analysis (ABA) is intended to provide students with theoretical and practical knowledge in applied behavioral psychology while also providing general understanding of how psychology relates to ABA practice.

Applied behavioral psychology is the application of the science of motivation and learning to describing, explaining, predicting, and changing individual behavior. ABA is used in educational settings, organizational settings (e.g., job training, performance assessment, task analysis and training), behavior change related to health outcomes (e.g., compliance with medication, addictions, feeding problems, exercise, etc.) and most often in interventions with individuals with developmental disabilities.

### **Mission Statement**

The Master of Arts in Applied Psychology: Applied Behavior Analysis (ABA) prepares students to excel in professional careers as scientist-practitioners. By challenging students to use a scientific lens when creating and evaluating clinical interventions, and to use an applied lens when designing research, this program will ensure that students are prepared to achieve success in behavior analytic employment, or to pursue further education upon completion of the program.

### **National Certification in Behavior Analysis**

The Behavior Analyst Certification Board, Inc. (<http://www.bacb.com>)® (BCBA) has verified Rider University's ABA core course sequence as providing the content hours under the 4th Edition Task List and meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst Examination®. Applicants will have to meet additional requirements to qualify.

### **Admission Status**

Upon completion of the steps in the application procedure, the applicant will be assigned to one of the following classifications once admitted:

#### **Graduate Standing**

- The student is qualified to undertake graduate study and must apply for matriculated status when eligible;

#### **Conditional Standing**

- The student either has not satisfied all of the admission requirements or has not completed all of the undergraduate preparatory requirements or both and may be permitted to engage in studies during a probationary period;

#### **Special Standing**

- The student does not plan to matriculate in a Rider graduate degree.

### **Transfer of Credits**

Upon acceptance to the Master of Arts in Applied Psychology: Applied Behavior Analysis program, students may request transfer of up to nine semester hours of graduate credits completed at an accredited institution. These credits must have been earned within six years of the date of credit transfer approval. All transfer credits must be approved by the Applied Psychology Steering Committee. Courses accepted for transfer must be similar to required or elective courses that are approved

for the respective program, and a grade of at least "B" must have been earned in each of these courses.

## Academic Standing

A minimum grade of "B" is required to obtain credit toward graduation. A grade of "B-" or lower will not count toward graduation credits. A GPA of 3.0 must be maintained to remain in good academic standing. Students whose GPA falls below 3.0 will be placed on Conditional Standing.

## Course Repeat Policy

Students may not repeat any graduate course for credit that they have already taken, except a course in which they have received a grade lower than "B" or one from which they withdrew. Any exceptions must be approved by the department chair.

## Dismissal

Rider University reserves the right to dismiss any student when, in the judgment of the faculty or the officers of Rider, such action seems advisable. Any of the following situations will result in the automatic dismissal of a student working toward a graduate degree or certification program in Applied Psychology:

- Receiving two grades of "B-" or lower in two graduate courses;
- Not attaining a grade point average of 3.0 after taking 12 or more graduate credits at Rider University;
- Failure to complete the program within the required 6 years.

## Graduation Requirements

To graduate, students must have completed all the requirements for the degree within 6 years of enrolling in the program, have a GPA of 3.00 or higher, and have submitted the degree application for graduation form to the Dean's office.

## Graduation with Distinction

Students who graduate with an overall grade point average of 3.85 or higher are designated as graduating with distinction. This term appears on the student's official transcript, below the student's name in the commencement program, and on the diploma.

## Overview

The 4+1 Masters in Applied Psychology, Applied Behavior Analysis concentration is designed for students who wish to combine undergraduate study in psychology leading to a Bachelor's of Arts degree with graduate study leading to a Masters of Arts in Applied Psychology.

The admission process for this program ensures that only capable students are enrolled. Freshman students are encouraged to seek advice about the program from their advisor and the program coordinator. The following courses must be completed if the student intends to apply to the program:

- PSY 212 Intro to Applied Behavior Analysis
- PSY 299 Field Placement in Applied Behavior Analysis. This course is intended to assist the student in determining if the program is a good match for them.

During the first semester of the junior year, the student will formally apply to the Applied Psychology program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Applied Psychology program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- Two letters of reference from professors or supervisors of relevant work or internship experience;
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the Applied Psychology program;
- An interview with faculty from the Applied Psychology program; and
- Completion of required 200 level courses.

Students accepted into the Applied Psychology program at the end of their junior year will complete one graduate level elective course during each semester of their senior year.

Additional Applied Behavior Analysis courses are offered at the undergraduate level. While not required, it is recommended that students accepted into the Applied Psychology program as a 4+1 student take the following:

- PSY 339 Research Methods in Applied Behavior Analysis
- PSY 388 Learning and the Experimental Analysis of Behavior
- PSY 389 Professional Issues in ABA

Students will be awarded the BA degree when they complete the requirements for that degree in psychology. The MA will be awarded upon completion of the Applied Psychology graduate program requirements.

## Academic Plans of Study

The following educational plan is provided as a sample only. Students may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

### PSY 501 Introduction to Applied Psychology Skills 3 Credits

This course will provide students with an examination of several facets of applied psychology with a focus on consuming research, understanding differences in methods and perspectives, writing according to APA style, and demonstrating understanding of several methods and perspectives in applied psychology. These are necessary skills to function meaningfully in the field. We will review and evaluate scholarly literature from across several psychology application areas. This course is available to MA Applied Psychology students only and should be taken near the beginning of entering the MA program.

### PSY 510 Introduction to Applied Behavior Analysis 3 Credits

This course will provide an introduction to applied behavior analysis. Students will learn the history and defining features of the field. Due to the scientific nature of applied behavior analysis, students will also learn characteristics and processes associated with the scientific method. Furthermore, foundational concepts will be defined, along with relevant behavior change procedures.

**PSY 511 Principles of Learning 3 Credits**

This course will provide students with more in depth understanding of the philosophical assumptions, characteristics and basic principles of behavior analysis. Students will have the opportunity to review concepts learned during Introduction to Applied Behavior Analysis. This course will also provide an introduction to the basic research in behavior analysis. Students will become more fluent in definitions, characteristics, principles, processes, and concepts of behavior analysis.

**Prerequisite(s):** PSY 510.

**PSY 513 Functional Assessment 3 Credits**

This course is designed to provide knowledge and skills of methodologies to conduct a thorough behavioral assessment, interpret the assessment data, and identify goals for treatment. Topics will include direct observation/data collection methods, data analysis, functional assessment, stimulus preference and reinforcer assessments, and ethical and professional issues. The second half of the course will deal specifically with functional analysis including the history of and variations to the methodology. The relationship between assessment techniques and the development of the least-restrictive but most effective behavioral intervention will also be discussed.

**Prerequisite(s):** PSY 510, PSY 511.

**PSY 514 Single Subject Research Design and Analysis 3 Credits**

Students will be introduced to the basic evaluative methods used in behavior analysis including various models of single subject design such as multiple baselines, reversal designs, and alternating treatment models. Students will design analyses, collect data, graphically display their data, and provide an analysis of findings. Students will read original behavior analytic research articles and practice analysis of findings.

**Prerequisite(s):** PSY 510, PSY 511.

**PSY 516 Ethics for Behavior Analysts 3 Credits**

This course will familiarize the student with ethical issues and responsibilities of behavior analysts working in applied settings. Informed consent, due process, protection of confidentiality, and selection of least intrusive, least restrictive behavior change procedures will be presented and discussed within the context of case method. Ethical decision making processes will be emphasized, and the relationship between ethics and law will be explored.

**PSY 518 Organizational Behavior Management 3 Credits**

This course will provide an overview of research and practice in the field of Organizational Behavior Management (OBM), also referred to as Performance Management in organizational settings. Performance Management is a behaviorally-based area of specialization within the broad field of Industrial-Organizational Psychology. The concepts and techniques used in Performance Management originated from the field of behavior analysis.

**PSY 519 Models of ABA Instruction 3 Credits**

This course provides students with a general knowledge of the different procedures used to teach new skills and new behaviors in the field of applied behavior analysis. Areas covered will include the assessment of relative strengths and deficits, use of discrete-trial and naturalistic teaching procedures, use of reinforcement procedures to strengthen behaviors, use of motivating operations and discriminative stimuli, use of prompting and prompt-fading procedures to transfer stimulus control, use of shaping procedures to teach new behavior, use of task analysis and chaining procedures to teach new behaviors, use of precision teaching and fluency-based instruction, and use of personalized systems of instruction. Additionally, various components of the aforementioned areas will be integrated and culminate in two modules: one designed to teach communicative behavior and the other to perform discrimination training.

**Prerequisite(s):** PSY 510.

**PSY 520 Interventions for Challenging Behavior 3 Credits**

Students will review principles of behavior in the context of application to functional assessment and treatment of socially significant problem behavior. Topics including extinction, functional communication training, differential reinforcement, choice, environmental manipulations, and punishment will be covered. Students will move through the process of developing function-based interventions and writing behavior plans.

**Prerequisite(s):** PSY 510.

**PSY 521 Supervision and Management in ABA 3 Credits**

This course provides students with skills needed to provide supervision and management in the field of applied behavior analysis. Students will apply the basic principles of behavior analysis to supervision and management of their staff and trainees. Areas covered include establishing performance expectations, selecting supervision goals based on assessment of current skills, how to train personnel to competence, performance monitoring and feedback, functional assessment and function-based strategies of personnel behavior, and how to evaluate the effects of supervision. Additional areas of discussion will include professional behavior, leadership, ethics, and professional development.

**Prerequisite(s):** PSY 510, PSY 511, PSY 513 and PSY 514.

**PSY 530 Interventions for Individuals with Developmental Disabilities 3 Credits**

The purpose of this course is to prepare students to work with individuals with a broad spectrum of developmental disabilities. The course will begin with a discussion of typical child development and milestones, address how development might differ from the norm, introduce subsequent assessment and diagnosis and ultimately, introduce appropriate interventions. The main focus of this course is applied behavior analysis [ABA] and common ABA strategies for intervention.

**PSY 533 Interventions for Autism 3 Credits**

The purpose of this course is to provide students with a general understanding of the clinical characteristics of autism spectrum disorders. The course will briefly address etiology and neurocognitive underpinnings of these disorders but will focus on psycho-educational interventions. The course will be taught from an applied behavior analytic perspective.

**PSY 535 Language Assessment and Intervention 3 Credits**

Students will be introduced to the classification of verbal responses, both vocal and non-vocal. Using videotaped examples, students will categorize observed verbal behavior. Students will be provided with practical tools for the assessment of verbal behavior, as well as an array of intervention strategies. A focus will include the design of teaching strategies to enhance language acquisition, as well as ongoing evaluation of intervention efficacy will be employed.

**Prerequisite(s):** PSY 510, PSY 511.

**PSY 536 Social Skills Assessment & Intervention 3 Credits**

Students will be introduced to the development of social skills and the identification social skills deficits. Using videotaped examples, students will categorize observed social behavior. Next, students will be provided with practical tools for the assessment of social and emotional behavior, as well as an array of intervention strategies. Tools for the collection of data and the evaluation of the success of target interventions will be stressed.

**Prerequisite(s):** PSY 510, PSY 511.

**PSY 550 Behavior Analytic Approaches to Health and Physical Activity 3 Credits**

The application of behavior analytic methods, practices, and principles has been demonstrated through research and clinical applications to be effective at changing health and fitness behavior. This course will provide an overview of research and practice in applying behavior analytic principles to changing health behavior and physical activity. Behavior change across various populations will be covered including both adults and children with and without disabilities. Discussion will focus on both functional assessment as well as interventions effective at changing health and physical activity including self-management, self-monitoring, goal setting, contingency management, etc. Students will spend the semester implementing self-management projects for their own health and/or fitness behavior.

**PSY 551 Behavioral Appro to Addiction 3 Credits**

Evidence from laboratory and clinical settings suggests that addiction can be conceptualized and effectively treated through the application of principles of conditioning. This course provides an overview of behavior analytic research in understanding and intervening on addictive behavior. Behavioral technologies for change regarding substance-related and behavioral addiction will be covered.

**Prerequisite(s):** Graduate students in Applied Psychology.

**PSY 590 Field Placement in Applied Behavior Analysis 3 Credits**

The applied behavior analysis practicum includes a required field placement of 15 hours per week and periodic on campus meetings. The practicum experience will allow students to experience the professional life of a behavior analyst in one of several preapproved sites. Sites approved include those for children, adolescents or adults with disabilities. Placements will be selected in consultation with the Practicum Coordinator and will require a written practicum plan from the cooperating field supervisor.

**Prerequisite(s):** PSY 510, PSY 511, PSY 513, PSY 514.

**PSY 595 Selected Topics in Applied Psychology 3 Credits**

Students will actively engage in an in-depth inquiry into a special topic area concerning applied psychology. Though the topics will change, students will be required to read and discuss current literature as well as considering the application of tools of the discipline to research questions of their own.

**PSY 690 Independent Research and Study 1-4 Credits**

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of Instructor.

**PSY 700 ABA Thesis I 1 Credits**

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

**PSY 701 ABA Thesis II 3 Credits**

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

**PSY 702 ABA Thesis III 3 Credits**

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

**PSY 720 Practicum in ABA 3 Credits**

The Master in Applied Psychology - Applied Behavior Analysis (MAP-ABA) program's practicum offers students supervision from Rider's MAP-ABA faculty and a variety of high quality in-vivo experiences, under the direct supervision of a Rider-Approved Board Certified Behavior Analyst (BCBA), during which students apply the skills acquired in coursework.

**Prerequisite(s):** PSY 510, PSY 511.

## **Business Communication (M.A.)**

### **Program Overview**

Rider's M.A. in Business Communication (MABC) focuses on the application of communication skills within a business context. Through face-to-face, online, and hybrid courses, students learn to better understand and leverage communication strategies to achieve organizational goals. The program introduces students to best practices in business communication, and engages them in real life current issues and scenarios faced by professionals on the job.

Students also benefit from Rider's central location between New York City and Philadelphia, which connects them to the business, financial and cultural nexus of Princeton and the burgeoning Route 1 corridor.

## Curriculum Overview

The MABC is a 33-credit program designed to advance communication knowledge and skills as they apply to the professional work setting. Communication is the common thread weaving throughout every working day in every workplace. Most employees are required to communicate orally or in writing to clients, colleagues, supervisors and/or the public on a daily basis.

Completion of this 33-credit program will prepare students for jobs in business communication and as professional communicators in a range of organizational settings. Strategic communication is a central activity in the professional world and requires knowledge, case analysis and skill refinement at a high level. Courses focus on understanding the business environment and on analysis of business communication challenges and development of appropriate solutions to them. Students will learn the theories that are the foundation for effective communication and apply this knowledge to class exercises and professional experiences.

The program includes graduate-level courses from Rider's College of Business, which holds prestigious accreditation by AACSB International: The Association to Advance Collegiate Schools of Business.

Among the skills participants in the MABC develop are learning how to manage crisis communication, internally and externally, with credibility and transparency; thinking and writing strategically for the effective communication of business goals; being ethical and responsible communicators; functioning within the laws and regulations relative to workplace communication; and understanding organizational dynamics, including leadership and team building.

## M.A. in Business Communication 4+1 Option Overview

The 4+1 Masters in Business Communication is designed for students who wish to combine undergraduate study in a major leading to a Bachelor's degree with graduate study leading to a Masters of Arts in Business Communication.

The admission process for this program ensures that only capable students are enrolled. Freshman and sophomore students are encouraged to seek advice about the program from their advisor and the program director. During the junior year, the student will formally apply to the MABC program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Business Communication program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the Business Communication program;
- Two letters of recommendation, at least one from a college professor

Students accepted into the Business Communication program at the end of their junior year will complete one graduate level elective course during each semester of their senior year.

Students will be awarded the B.A. or B.S. degree when they complete the requirements for that degree. The M.A. will be awarded upon completion of the Business Communication requirements.

## Academic Plan of Study

The Four-Plus-One MABC is designed to begin in the senior year of undergraduate study and is completed in one additional year by the student who plans to attend the program on a full-time basis. The following educational plan is provided as a sample only. Each student, with the guidance from the MABC/MAHC director, will develop a personalized educational plan.

## Courses and Descriptions

### COMM 503 Corporate/Persuasive Discourse 3 Credits

Imparts advanced knowledge of crisis management, including theory, techniques and applications. Students will gain competency in a number of areas including: changing opinion and behavior, crisis management principles, strategies, tactics and communication methods. Students will work in teams to develop the knowledge and skills to manage the messages surrounding crisis-related issues found in organizations.

### COMM 504 Strategic Business Writing 3 Credits

Provides students with the tools to think and write strategically. Students will gain competency in a number of areas including: identifying challenges and communicating to different workplace audiences; developing content for daily, routine and specific workplace requirements; focusing on strategic, outcomes-based writing; and cultivating interpersonal relationships for successful communication. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

### COMM 507 Business Presentation Strategies 3 Credits

Develops the ability to create purposeful presentations with targeted messages relating to audience needs. Students will gain competency in a number of areas including: messaging, writing for the visual media, using current visual presentation tools, delivering an impactful presentation and taking advantage of social media channels. They will develop the knowledge and skills to influence and inspire internal and external constituencies, a key part of communication practitioners' jobs, especially those in managerial/senior staff roles.

### COMM 525 Visual Communication 3 Credits

This course introduces students to the theory and practice of visual communication design. Students will learn how to critique, design, and edit visual communications with specific audiences in mind. Topics include the elements and principles of design, color theory, visual perception theories, typography, symbols, brand identity, logos, propaganda, and information design in both current and historical contexts. Readings and viewings of relevant films are a required component of the course. Assignments will afford students opportunities to apply current visual communication software to produce visual communications for various professional environments, but command of such software is neither required nor expected.

### COMM 531 Legal/Ethical Issues for Professional Communication 3 Credits

Provides students with the knowledge to understand and apply ethical guidelines and current laws and regulations relative to workplace communication, as well as the legal limits impacting professional communications. This knowledge is particularly important for those in or aspiring to managerial/senior staff roles.

### COMM 545 Information Gathering & Analysis 3 Credits

Develops the knowledge and skills to use various research methods and analysis techniques to provide critical information for, and assist with, business decisions. It will cover developing research tools, gathering and verifying information, analyzing, and reporting results. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

### COMM 552 Communication in a Multicultural Workplace 1.5 Credits

Instructs in the use of diversity and cultural communication principles and strategies to effectively manage a culturally diverse workforce. This course will help organizational leaders understand how gender, ethnic, religious, and other differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relations, and ultimately, good productivity for the organization.

### COMM 553 Communication in a Global Market 1.5 Credits

Examines communication between and among businesses in a global context. The course presents communication as an essential pivot around which revolve the social and institutional relationships within and among nations. Hence, exploring global communication structures and tendencies is an important means to understanding social, cultural, economic and political impositions on global business. The emerging role of technologies of communication, such as social media, will be a particular focus of this course.

### COMM 554 Effective Group Communication 1.5 Credits

Encompasses the study of individual and group behavior in the workplace. Emphasis is placed on individual behavior and group dynamics, application of current group theories, effective group communication, and effective leadership/followership skills. A comprehensive review of these processes, as well as others, will allow students to examine their role in groups as well as teams.

### COMM 555 Communication and Organizational Culture 1.5 Credits

Examines communication and culture in organized settings. Emphasis is placed on managing organizational culture, communication and the relationship between organizational performance and organizational culture. A review of research and analysis as it relates to organizations will allow students to apply what they have learned about organizational culture to real life situations.

**COMM 599 Capstone in Business Communication 3 Credits**

Provides students with the opportunity to explore, research and discuss practical and theoretical topics in business communication. This capstone course gives students an opportunity to apply skills and knowledge they have learned throughout the Master of Arts in Business Communication curriculum. Under faculty supervision, students will complete a major project using a variety of research methods.

**PMBA 8020 Fundamentals of Accounting 3 Credits**

For those students having no previous knowledge of accounting. Subject is approached from the point of view of the user of accounting information rather than that of the accountant who supplies the information. Surveys mechanics of accounting as a means to an end, emphasizing accounting as a tool of management and the language of business. Problems and cases bring out the managerial implications of accounting.

**PMBA 8030 Economic Analysis 3 Credits**

An intensive exposition of the essentials of price theory and income and employment theory. For students with less than a year of introductory economics at the undergraduate level. Topics include an analysis of markets, the nature and characteristics of producer behavior, the theory of pricing in competitive and non competitive markets, and their welfare effects. At the macro level, coverage of the economy in the short run deals with economic fluxuations, fiscal policy, and monetary policy. An examination of the economy in the long run covers factors effecting economic growth.

**PMBA 8313 Electronic Commerce 3 Credits**

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8314 Project Management 3 Credits**

in our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

## Health Communication (M.A.)

### Program Overview

Rider's M.A. in Health Communication (MAHC) focuses on the application of communication skills within the health context. Health communication is one of the areas of communication that is growing exponentially and is projected to experience continued growth. Communication contributes to vital health outcomes by directing positive health behaviors. Interventions, strategies, and programs to change health behaviors are communicative acts and are the primary tools used in health communication. The program introduces students to best practices in communication, and engages them in real-life current issues and scenarios faced by professionals on the job. Students in the program

learn to better understand and leverage communication strategies to achieve organizational goals.

### Curriculum Overview

The MAHC is a fully online, 33-credit program designed to prepare students for careers in the fast-paced, expanding field of health. Students learn to identify and explain current issues in health communication; use theory and research methodology to examine and explain trends and phenomena in health; interpret the verbal and nonverbal communication practices of individuals, healthcare providers, and organizations in order to reform conversations about health; explain complex medical terminology, statistics, and research findings in simplified language; compose written materials and develop health communication campaigns for general audiences, healthcare professionals, medical organizations, and advocacy groups; understand the far-reaching, multi-layered impact that culture has on health communication and health outcomes; and develop a variety of health communication campaigns that inform, educate, promote, or call for action.

## Courses and Descriptions

### COMM 500 Communication Processes in Health 3 Credits

Interpersonal and nonverbal communication are the two areas of general communication studies that health communication draws from most heavily. These concepts affect relationships in healthcare, the ability to understand and process medical information, the efficacy of messages in relation to nonverbal indicators, and how bad news, another major concept in health communication, is received. This class will provide a comprehensive understanding of these concepts, how they are utilized in the field of health communication, and the ways in which the two areas intersect, all in the broader context of understanding health communication as a discipline.

### COMM 501 Medical Concepts and Health Writing 3 Credits

Improving the way that health is communicated requires the ability to understand health information at the initial – and often complex – level. In particular, health communication aims to provide information to underserved populations, who may suffer from lack of education and poor health literacy. This class will provide students with a basic understanding of medical terminology and the ability to comprehend and explain scientific literature. Students will develop the skills needed to translate medical information for a wide range of audiences. Students will also be required to apply these concepts through the creation of multiple types of health writing assignments.

### COMM 505 Health Communication Theory 3 Credits

Health communication is driven by a set of principles that guide the conceptualization, design, and implementation of new health guidelines and interventions. The ultimate goal of health communication is to increase health and satisfaction by encouraging healthier behaviors, medical compliance, and more efficient communication of medical information. This class is designed to give an overview of the major fields of study in health communication through examination of the major theoretical perspectives therein. Topics include the different areas of study in which health communication theories are based, how theory is used to support the initial design of research studies and interventions, and the situations in which the use of more than one theoretical approach is warranted.

**COMM 507 Business Presentation Strategies 3 Credits**

Develops the ability to create purposeful presentations with targeted messages relating to audience needs. Students will gain competency in a number of areas including: messaging, writing for the visual media, using current visual presentation tools, delivering an impactful presentation and taking advantage of social media channels. They will develop the knowledge and skills to influence and inspire internal and external constituencies, a key part of communication practitioners' jobs, especially those in managerial/senior staff roles.

**COMM 525 Visual Communication 3 Credits**

This course introduces students to the theory and practice of visual communication design. Students will learn how to critique, design, and edit visual communications with specific audiences in mind. Topics include the elements and principles of design, color theory, visual perception theories, typography, symbols, brand identity, logos, propaganda, and information design in both current and historical contexts. Readings and viewings of relevant films are a required component of the course. Assignments will afford students opportunities to apply current visual communication software to produce visual communications for various professional environments, but command of such software is neither required nor expected.

**COMM 531 Legal/Ethical Issues for Professional Communication 3 Credits**

Provides students with the knowledge to understand and apply ethical guidelines and current laws and regulations relative to workplace communication, as well as the legal limits impacting professional communications. This knowledge is particularly important for those in or aspiring to managerial/senior staff roles.

**COMM 545 Information Gathering & Analysis 3 Credits**

Develops the knowledge and skills to use various research methods and analysis techniques to provide critical information for, and assist with, business decisions. It will cover developing research tools, gathering and verifying information, analyzing, and reporting results. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

**COMM 551 Cultural Conceptions of Health and Illness 3 Credits**

Culture affects every relationship dynamic, the way nonverbal communication is interpreted, how audiences are selected for health campaigns, the ability and willingness to use technology, and the way bad news is broken to individuals and families. In health communication, culture comprises both the general conceptions of what culture is – the characteristics of a particular social, ethnic, or age group – as well as other factors. This class will examine the specific variables of culture in this setting, how the variables are both unique and interconnected, and the wide-reaching impact culture has in health. The first half of the course explores the variables that culture includes. The latter part of the course takes these variables and demonstrates the roles they play in real-world health communication settings.

**COMM 558 Health Communication Campaigns 3 Credits**

Campaigns are the primary tool used in health communication to disseminate messages and effect change. Campaigns can provide information on a specific issue or to a specific community, encourage preventative health behaviors, demonstrate behaviors (such as performing self-skin exams for skin cancer or the proper way to follow medication instructions), put forward suggestions for a healthy lifestyle, raise awareness, or offer support. At times, multiple messages may be present in one campaign. This class will examine the different types of health campaigns and the impact a health communication campaign can have. Students will learn how to analyze a health campaign through its full cycle. The class will also serve as a foundation for the capstone class of the Master's in Health Communication program.

**COMM 559 Communicating Crises in Health 3 Credits**

In the health setting, multiple events can be considered a crisis: the outbreak of a disease, contamination of food, a natural disaster, and more. The response to a crisis can have a significant, long-lasting impact on the organization's reputation. The development of a crisis plan, which sets forth guidelines for an organization's response to a crisis and involves multiple steps, can be completed before any events occur and can significantly affect the way an organization handles a crisis. This class explores the types of crises that occur in health communication, the factors involved in a crisis, the development of a crisis plan, and the effects of a crisis on an organization.

**COMM 600 Capstone: Implementing a Health Communication Campaign 3 Credits**

The ability to implement, evaluate, revise and successfully launch a campaign is a critical skill for all individuals who work in health communication. Campaigns are the primary tool used by health communicators to initiate change in a community, although their implementation will not always be a fluid, one-step process. This class will require students to select a local health campaign and evaluate the campaign from start to finish. Students will complete the Master's program in Health Communication with a complete proposal for a health communication campaign and the skills needed to analyze an existing campaign from beginning to end.

## Homeland Security (M.A.)

### Program Overview

The M.A. in Homeland Security provides students with a multidisciplinary program that goes beyond conventional studies of the subject. The degree is designed to give students broad training in the theoretical and applied nature of security studies and then to offer students the ability to specialize in Global or Domestic Security. The M.A. explores the causes and consequences of political violence and how the U.S.'s internal and global environment impacts issues of security within the nation and globally. Students will also learn about the institutions, actors and processes that support the security community. It explores the tools and actions the U.S. and other governments can utilize in maintaining security and the consequences of doing so. Finally, the graduate program in Homeland Security Policy provides students with the foundation for pursuing careers in the security sector.

## Course Requirements for the M.A. in Homeland Security

(36 credits)

Code	Title	Credits
<b>Required Foundation Courses</b>		18
HLSP 501	Homeland Security	
HLSP 502	Development and Structure of the US Intelligence Community	
HLSP 505	Civil Liberties and National Security	
HLSP 527	Policy Analysis and Evaluation	
HLSP 530	Data Analysis and Methods for Political Science	
HLSP 545	Loyalty and the State of Exception	
<b>Specialized Courses: Select one of the following specializations areas:</b>		9
<b>Global Security Specialization: Select three courses from the following:</b>		
HLSP 508	Political Communication, Terrorism, and Security	
HLSP 510	Terrorism	
HLSP 529	Energy Security	
HLSP 533	International Law and Armed Conflict	
HLSP 551	Global Security	
HLSP 552	U.S. Foreign and Security Policy	
HLSP 553	Cyber War	
HLSP 567	Global Immigration Trends and Security Issues	
<b>Domestic Security Specialization: Select three courses from the following:</b>		
HLSP 504	Political Behavior of Security and Conflict	
HLSP 506	US Constitutional Law and National Security	
HLSP 514	Congress and National Security	
HLSP 515	Counterterrorism	
HLSP 516	The Presidency and National Security	
HLSP 520	Defense Policy and Analysis	
HLSP 531	Critical Infrastructure Security	
HLSP 532	Disaster Management and Preparedness	
HLSP 550	American National Security	
<b>Elective Courses:</b>		6
Select two additional courses in either specialization		
HLSP 690	Research & Creative Expression	
<b>Capstone: Select one of the following:</b>		3
HLSP 590	Master's Thesis	
HLSP 591	M.A. in Homeland Security Internship	
<b>Total Credits</b>		36

## Courses and Descriptions

### HLSP 501 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

### HLSP 502 Development and Structure of the US Intelligence Community 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

### HLSP 504 Political Behavior of Security and Conflict 3 Credits

The course focuses on various analytical approaches in behavioral political science in order to better understand how individuals interact with the political system. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior during periods of crisis and uncertainty. The course empowers students to conduct advanced research in order to test some of the leading theories of the subfield.

### HLSP 505 Civil Liberties and National Security 3 Credits

During times of crisis, can our government maintain individual liberty? This course provides an in-depth exploration of the tension between the role of the state in balancing civil liberties with national security. In this context, the course provides a specific focus on freedom of speech, press and assembly, freedom of religion, the right to privacy and the courts' role, or lack thereof, in the War on Terror.

### HLSP 506 US Constitutional Law and National Security 3 Credits

This graduate seminar examines the origin and development of the American constitutional system and constitutional law. It further examines this system within the context of national security. Primary emphasis is on the US Supreme Court, which includes its developmental as an institution, the origins of judicial review and the court's establishment of this process, as well as the decision-making process by Justices of the court. The course will then examine the interplay between the court and its political environment and the impact the court has had upon the functioning of the political system by considering the Marshall Court (1801-1835), the Hughes Court (1930-1941) and the Warren Court (1953-1969). We will conclude with a consideration of the role of the court in balancing the rights and freedoms of a democratic society within the demands of the national security state.

**HLSP 508 Political Communication, Terrorism, and Security 3 Credits**

This course explores how political communication affects terrorism and security. It is well known that media plays an important role in creating the narrative for understanding terrorism and national security issues. The question is whether that narrative tends to help protect that nation, or whether it actually interferes with that goal. In addition, social media has become a means by which terrorist groups recruit outside volunteers, while blogs and websites are often used to incite incidents in various countries. This course deals with the various ways in which political communication can support, or interfere with, the protection of national security.

**HLSP 510 Terrorism 3 Credits**

Politics is the study of power and its application, and hence the study of violence has always played a central role in the discipline. In the era of mass politics, violent political participation has been accentuated as evidenced by the prevalence of both domestic and international terrorism. The practice of terrorism itself has undergone changes in the new era and the appearance of groups and "lone wolves" bent on sowing death and destruction for its own sake is more common place. Moreover, the statelessness of today's terrorists removes crucial restraints that once held even extreme terrorists in check. Perhaps more than any other organization, ISIS embodies these trends. It is therefore incumbent upon us to take a step away from the spectacular nature of the news, and ask fundamental questions concerning the motivations, modes of operation, and circumstances contributing to the appearance of terrorist movements, and the roles of the leaders as against the "foot soldiers" in such organizations. Special attention is laid on the emotional fervor of those engaged in the activity, the ideology that mobilizes them and rationalizes their behavior, within each case's historical settings.

**HLSP 511 Borders and National Security 3 Credits**

This course focuses on borders, boundary-making, securitization, and other theories surrounding the territorialization of the nation-state, including the rise of the national-security and homeland security industries. The analysis of the changing complexities of borders and borderlands is driven by a meta-narrative about national security and current developments in the immigration/security nexus, including policies of border control and the surveillance of immigrants, denizen, and citizens with new security technologies. A key piece of the course is the comparative analysis of US and EU border agencies and the militarization and weaponization of borders, including the construction of new border walls, with the objective to protect the global North from the onslaught of desperate, impoverished and persecuted hordes from the global South. Transnational questions focusing, for example, on the dynamics of human trafficking and drug cartels is an essential parts of this comparison. Throughout the course, a special analytical emphasis is given to the meta-narrative and political opportunism that have driven these developments and led to the fortification of the global North.

**HLSP 514 Congress and National Security 3 Credits**

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. In addition to an in-depth analysis of the US Congress, we also look comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror?.

**HLSP 515 Counterterrorism 3 Credits**

One of the aims of analyzing the nature of terrorism, its goals, and the underlying deeper motives of those who partake in it, is to thwart as many terrorist efforts as possible and to bring terrorist campaigns to an end. Thus, the questions of how terrorism begins and how terrorism ends are intimately related. Because of the prevalence of terrorism in the national and international arenas and the spectacular nature of terrorist undertakings, the analysis of these questions is the subject of much media attention and public discussion that tends to obscure and politicize what should be a focus of attention of citizens, policy makers, and students of the social sciences alike. This course seeks to point out concrete measures for counterterrorism –of the type that sometimes is under public discussion –but in a more systematic manner that brings together methods of heuristic thinking in political science and adjacent disciplines, historical and comparative experience, and the literature on counter terrorism to analyze the range of possible strategies that could be adopted and the possible manner in which terror campaigns may be brought.

**HLSP 516 The Presidency and National Security 3 Credits**

This course is designed as an upper level graduate combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School, English School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

**HLSP 520 Defense Policy and Analysis 3 Credits**

The course begins with an overview of the structure of US defense policy and administration and explores issues associated with national defense. Throughout the course students become familiar with basic data, institutions, actors, trends, issues and options in the strategic implementation of defense and force. The primary focus of the course is on the Department of Defense (DoD) as well as on key committees and actors within the White House, State Department, Central Intelligence Administration and Congress.

**HLSP 527 Policy Analysis and Evaluation 3 Credits**

Policy Analysis and Evaluation fully addresses this problem by providing students with an in-depth study of public policy. It does so by linking theory with practice in helping students think systematically about public policy. The course addresses the policy process through leading theoretical models within the subfield as well as an evaluation of government's response, or lack thereof, of contemporary policy problems. Our focus will be three areas of policy analysis: 1) descriptive 2) evaluative and 3) prescriptive. As part of our focus, we will address policy design, implementation, evaluation and failure. Overall, students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options.

**HLSP 529 Energy Security 3 Credits**

Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

**HLSP 530 Data Analysis and Methods for Political Science 3 Credits**

This course introduces students to quantitative and qualitative methods used by political scientists and security specialists in the study of social and political phenomena. Students will learn the logical structure of political analysis, and the quantitative measures used to supplement and support these logical structures. Overall the course draws on the fundamentals of statistics: Namely the ability to describe data samples and draw inferences about the populations from which they were drawn. It should also improve one's ability to read data, interpret data, and judge others' claims about data. After students learn these skills, they will apply them to a prepared data set. The emphasis of this course is on "hands-on" experience. Students approaching this subject for the first time will "learn by doing" this type of analysis.

**HLSP 531 Critical Infrastructure Security 3 Credits**

Overall the course draws on the fundamentals of risk management strategies and policies related to manmade and natural threats to critical infrastructure. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation's infrastructure. The emphasis of this course is on "hands-on" experience whereby students will "learn by doing" analysis.

**Prerequisite(s):** For MA students and can be offered to undergraduate students who are in the 4+1 program.

**HLSP 532 Disaster Management and Preparedness 3 Credits**

This course provides an overview of the following: 1) various types of natural and manmade disasters that communities are vulnerable to, and 2) how to develop corresponding preparedness, response, recovery, and mitigation strategies. Upon completing this course, students will be able to assess and develop the following: 1) preparedness plans for disaster response, 2) monitoring and evaluation plans for disaster response, 3) early warning systems plans for risk reductions, and 4) response, recovery, and mitigation strategies. Students will also learn about existing and developing domestic and international Disaster Risk Reduction models. This includes, but is not limited to: 1) strategies that prevent and minimize casualties during disasters, and 2) logistic and operational challenges. Special consideration will also be given to the impact of the social and political processes associated with disaster policy and planning.

**Prerequisite(s):** For MA students and can be offered to undergraduate students who are in the 4+1 program.

**HLSP 533 International Law and Armed Conflict 3 Credits**

By literalizing the "war on terror," governments have broken down the distinction between what is permissible in times of peace and what can be condoned during a war. In peacetime, governments are bound by strict rules of law enforcement. For example, lethal force can be employed in law enforcement only if necessary to meet an imminent threat of death or serious bodily injury. Those detained by police must be charged and tried. However, in wartime, law enforcement rules are supplemented by a more permissive set of rules embodied in international humanitarian law, otherwise known as the law of armed conflict. Under such wartime rules, unlike during peacetime, an enemy combatant can be shot without warning (unless he or she is incapacitated, in custody, or trying to surrender), regardless of any imminent threat. If a combatant is captured, he or she can be held in custody until the end of the conflict, without any trial. This course explores how these two sets of rules have developed, both by customary international law and by international conventions, analyzes under what sorts of circumstances one set of rules should apply instead of the other, and examines the legal consequences of governments fighting the "war on terror" by expanding the boundaries of the law of armed conflict beyond the traditional battlefield to wherever terrorists hide, run, or plan. Students will receive a solid foundation in the law of armed conflict and will analyze complex legal problems occurring at the intersections of international humanitarian law, international human rights law and national security law.

**Prerequisite(s):** For MA students and can be offered to undergraduate students who are in the 4+1 program.

**HLSP 545 Loyalty and the State of Exception 3 Credits**

The course enquires into cases ranging across Europe, the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, have suspended, if not dissolved, constitutionally guaranteed civil liberties. Under emergency situations, organs of national security are energized; organs of opinion and electronic media including internet newsgathering, opinion expression and formation, may be censored; citizens may be enlisted to report to and inform on their neighbors. Regimes of exception may severely curtail academic freedom and university life; they may regulate voluntary associations by means of secret or not so secret surveillance of meetings, and a demand for lists of members and financial contributors. States of exception may deploy methods of coercion usually proscribed in "normal" times, e.g., suspension of habeas corpus rules; extended if not indeterminate periods of detention of suspects; and techniques of "enhanced interrogation" that may violate constitutional and international law. Using a number of case studies, the course inquires into the conditions under which liberal democracies transform themselves into states of exceptions; the effects of such transformations on individual and civic life; and the procedures by which states no longer under stress return to liberal democratic procedures and recovery of civil liberties.

**HLSP 550 American National Security 3 Credits**

The course is part of the foundational sequence of the M.A. in Homeland Security Policy. The course trains students to think strategically and critically about major issues facing American National Security.

**HLSP 551 Global Security 3 Credits**

This seminar critically addresses the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

**HLSP 552 U.S. Foreign and Security Policy 3 Credits**

This course emphasizes the main theories of and themes in American foreign policy since the end of the Second World War. We will examine the patterns that have permeated American Foreign Policy since 1945, and discuss the roles that various actors play in the foreign policy process. We will use theoretical concepts to discuss the major events in American foreign policy over the last half of a century. The course will focus on both the conduct and formulation of American foreign policy. Detailed knowledge of the policy-making process, including legal and institutional restraints and standard operating procedures, is clearly essential for all students of foreign policy. Yet, only by exploring America's past actions in the global arena and only by searching for historical precedents and patterns can students fully grasp the dilemmas facing the United States today.

**HLSP 553 Cyber War 3 Credits**

Cyber attacks are a growing concern for international community. When does a cyber attack constitute an act of war or is merely an inconvenience? Is cyber power military power? How prevalent are such attacks, and to what extent can cyber attacks lead to conventional conflicts? Will cyber attacks by non-state actors render more power to such players in destabilizing states? This course explores the different types of issues in cyber wars, including mechanisms through which targeting of communication technology could escalate tensions and lead to an armed conflict, and ways through which states and international organizations could limit the de-structive potential of cyber technology.

**HLSP 567 Global Immigration Trends and Security Issues 3 Credits**

Amidst the broader trends of international politics that address the growing flow of goods, capital, and information across state borders, the movement of people is a permanent and expanding feature. However, central to the notion of the political identity of the nation-state is the ability to control the entry of non-citizens. The regulatory power of the nation-state to control its borders is at least threatened by the migratory movements of people. People are driven from their homes by conditions of war, economic difficulty, or environmental disaster. Millions of people migrate permanently each year, and about 20 million are refugees and seek political asylum worldwide. The vast majority of refugees are women and children—this is the hidden truth of the post-Cold War order, huge numbers of displaced women and children. These numbers are significant, particularly since the general movement heads in one direction, toward advanced industrial states, mainly Western Europe and the United States. About 35 million legal and illegal immigrants live in the United States. Immigrants account for 11.5 percent of the total population, the highest percentage in 70 years. Critics warn that if current trends continue, by the end of this decade the immigrant share of the total population will surpass the all time high of 14.8 percent reached in 1890. Understanding immigration and refugee issues in this interdependent world will help us to gain insights into the workings of political, economic, and social forces both within receiving and sending states as well as the international regime which regulates these movements. The topics addressed in this course go beyond simple models of utility and efficiency since the questions of immigration and political asylum are often deeply emotional issues for societies; the issue also has a significant moral dimension.

**HLSP 590 Master's Thesis 3 Credits**

Students will complete an original substantive research paper that will build on prior research in Security Studies or related discipline.

**HLSP 591 M.A. in Homeland Security Internship 3 Credits**

The course is part of the capstone requirements of the M.A. in Homeland Security Policy. The course will have students complete an internship, self-evaluation and write a reflection paper outlining their experience working in a security related position.

**HLSP 690 Research & Creative Expression 1-4 Credits****School of Fine and Performing Arts**

<http://www.rider.edu/sfpa>

A division of the Westminster College of the Arts, the School of Fine and Performing Arts is located on the Lawrenceville campus. The school offers Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music and Master of Arts degrees, as well as widespread opportunities for students – regardless of major – to participate in the arts. Exhibitions, plays, concerts, and productions are presented in the 442-seat Yvonne Theater, the 90-seat Spitz Studio Theater, and the recently-expanded 374-seat Bart Luedeke Theater.

Several experiences, including ensembles and classes, are open to all university students. Dramatic plays and musical theatre productions are open to all students by audition. The Rider University Art Gallery showcases leading regional and national artists, as well as selected student work. Artist lectures and gallery performances bring additional opportunities for artistic enrichment. The Arts Administration Center provides a forum for students to work with campus and community organizations on a variety of issues and activities. Rider Dances involves student dancers, choreographers and musicians. Each year, many education majors elect a second second major from the School of Fine &

Performing Arts, choosing from tracks in Dance Studies, Popular Music Studies or Theatre Studies.

## Mission

### Westminster College of the Arts

*Westminster College of the Arts inspires and empowers innovative artists and leaders to transform communities through the arts.*

### The School of Fine and Performing Arts

The School of Fine and Performing Arts focuses on dance, music, musical theatre, theatre and arts administration. Through programs that provide a historical, aesthetic, practical and professional perspective, students develop the skills to excel in a professional career while growing intellectually from a broadly based liberal arts curriculum. The school fosters meaningful engagement in the arts to students who wish to become professional artists as well as students who view the arts as an integral part of overall intellectual growth. The school nurtures and challenges the artist within all students and prepares them to contribute to an ever-changing global society.

## Programs and Certificates

Program	Degree	Certificate
Arts Management and Executive Leadership (p. 170)		

## Arts Management and Executive Leadership

### Overview

Arts administration combines passion for the arts with the business know-how that keeps the arts an active and integral part of communities. A wide variety of opportunities abound for satisfying and rewarding careers in administering the arts, whether in the growing nonprofit sector, or in for-profit entertainment including: entertainment law, venue management, artist management and representation, producing, production and touring management, fundraising, marketing, educational programming, education and outreach, and so much more. Rider's Bachelor of Arts in Arts and Entertainment Industries Management (p. 852) affords graduates essential foundational knowledge to pursue these opportunities and succeed in the field. The Master of Arts: Arts Management and Executive Leadership degree delivers practical and theory-based graduate coursework which prepares the practitioner for managerial and executive-level advancement in a field which increasingly requires its leaders to have advanced training, skills and practical knowledge.

AMEX 516	Engaging Arts and Institutions	3
AMEX 518	Surveying Arts Institutions	3
AMEX 519	Leading and Governing Arts and Institutions	3
AMEX 593	Capstone: Arts Management Thesis or Leadership Project	3
Total Credits		31.5

<sup>1</sup> This course consists of a series of workshops and introductory sessions offered to students who did not take AAD 121, AAD 202 and AAD 203 as an undergraduate. The Sessions are held on the Rider campus during the Friday through Sunday immediately preceding the start of the semester.

<sup>2</sup> Students who have successfully completed AAD 121, AAD 202 and/or AAD 203 may be waived from taking this course by the program director and dean.

### Courses and Descriptions

#### AMEX 500 Graduate Survey of Arts Management: Principles and Practice 1.5 Credits

Provides survey of key challenges and opportunities in institutional planning and development, strategy, organization, budgeting, leadership and governance in arts institutions, with a particular focus on nonprofit arts. Vision-centric, mission-driven, integrated management perspectives are applied to case-based research, analysis and reporting, supported by multiple assigned readings and required online discussion posts. This course is a pre-program requirement for the MA in Arts Management and Executive Leadership degree. Students who have successfully completed AAD 121 as an undergraduate may be waived from completing this course by the program director and dean.

**AMEX 503 Arts Marketing: Principles and Practice 1.5 Credits**

This course will build upon integrated management and marketing fundamentals addressed in AMEX 500. The course surveys the challenges, as well as traditional, contemporary and developing opportunities and approaches to institutional branding, audience development, product marketing and community alignment from vision-centric, mission-driven strategic marketing and public relations perspectives. The course is a pre-program requirement for the Master of Arts in Arts Management and Executive Leadership program. Students who have successfully completed AAD 202 as an undergraduate may be waived from completing this course by the program director and dean.

**Prerequisite(s):** AMEX 500 or permission of director and dean.

**AMEX 506 Arts Fundraising Principles and Practice 1.5 Credits**

The seminar builds upon integrated management, fundraising and institutional advancement fundamentals addressed in AMEX 500. This course surveys the challenges as well as traditional, contemporary and developing opportunities and approaches to advancement, donor-centered fundraising, legacy-building from vision-centric, mission-driven strategic fund-development perspectives. The course is a pre-program requirement for the Master of Arts, Arts Management and Executive Leadership program. Students who have successfully completed AAD 203 or similar coursework may be waived from completing this course by the program director and dean.

**Prerequisite(s):** AMEX 500.

**AMEX 510 Advancing Arts and Institutions 3 Credits**

This course will provide integrated strategies for long-term fund development, sustainability, and legacy building in the arts. Funding and other stakeholder-driven advancement follows vision and, in an industry that relies heavily on stakeholder investment to propel artistic and programmatic success, the need for strong vision-driven leadership is critical. Building upon foundational information delivered in AMEX 500 and AMEX 506 (or equivalents), the course explores and assesses multiple, diverse approaches to vision-centered, mission-driven institutional advancement and fund-development from all philanthropic sectors impacting the nonprofit arts. Students will compare and contrast diverse board, executive and managerial strategies and application of current tools, trends and best practices employed in fund development planning and program implementation via case-based research and reporting. Comparative research and analysis of public and private funding institutions, corporations, and individual philanthropists – what inspires and guides their proposal review processes and giving practices - further informs discussion and the development of three sector-specific assessments for multiple arts institutions with which each student will have aligned themselves. Three, 90-minute live streamed, moderated expert advisory panel discussions in addition to regularly-scheduled online sessions will interface leaders in the field and faculty moderator engaging on essential topics relating to course goals/outcomes, providing diverse and highly informative first-hand insights from executive leaders and decision-makers.

**Prerequisite(s):** AMEX 500, AMEX 503, AMEX 506, or equivalents, or permission of program director and dean.

**AMEX 513 Advocating Arts and Institutions 3 Credits**

This course will discuss the legal, societal and ethical perspectives on arts policy, practice, and procedures in the workplace. Arts often reflect, challenge and at times define social, political and ethical constructs and push the envelope on what is acceptable – aesthetically, morally and otherwise – in contemporary society. Explore the ever-evolving relationship of arts and society through the lens of institutional responsibility as interpreted by the artist, the law, and by contemporary civic and social considerations. Masters candidates will research and discuss key historical moments and movements which have impacted the arts and institutional governance and administration; current legal, social and ethical issues impacting artistic expression and institutional leadership today; and key policy decisions past, present and under consideration which impact the ways by which institutions make and disseminate art, govern themselves, and carry out key administrative functions. Case-based comparative research and analysis of effective leadership initiatives, policies and best practices around key legal, social and ethical issues impacting institutions further informs discussion and the development of a comprehensive institutional responsibility proposal for an arts institution with which each student will align him or herself.

**Prerequisite(s):** AMEX 500, AMEX 503, and AMEX 506 or equivalents when approved by the program director and dean.

**AMEX 516 Engaging Arts and Institutions 3 Credits**

This course provides an integrated approach to vision-centric, mission-driven community building, audience development, and engagement in the arts. In a time when active participation in live arts is challenged with multiple and ever-advancing competing arts and entertainment options, platforms and pricing structures, the ability and wherewithal for arts institutions to effectively get their message through is more essential than ever. Building upon foundational information delivered in AMEX 503, this course explores challenges and opportunities in winning the hearts and minds of a diverse, often fickle and ever-changing demographic, psychographic and socio-economic public, engaging them in new and meaningful ways. Masters candidates research and discuss the importance of vision, mission and integrated management approaches to branding and messaging; trends in audience participation; efficacy of traditional and contemporary approaches to institutional branding, audience development and community-building around the arts; evolving modes and tools for effectively identifying, programming for, marketing to and engaging diverse audiences; efforts to integrate live arts and new technologies to market, and expand access to and engage audiences in the arts in new ways. Case-based comparative research and analysis of effective branding and marketing campaigns further informs discussion and the development of a comprehensive market analysis and brand expansion proposal for an arts institution with which each student will align him or herself.

**Prerequisite(s):** AMEX 500, AMEX 503, and AMEX 506 or permission of the program director or dean.

**AMEX 518 Surveying Arts Institutions 3 Credits**

This course provides case-based research and analysis of institutions which shape and define the Arts industry. Students will gain depth of insight into the essential purpose, structure, management and culture of institutions while building working knowledge of how they function, produce good arts and impact communities. Masters candidates will integrate prior course learning as context for the design and implementation of case-based research and analysis of institutional planning, structure, leadership and impact. This process affords broader perspective and helps test assumptions, ground theories, synthesize learning and shape professional expectations and aspirations in context of the industry and the institutions which define it. This course lays the foundation for subsequent thesis and/or institutional leadership capstone project work.

**Prerequisite(s):** AMEX 500, AMEX 503, AMEX 506, AMEX 510, AMEX 513, AMEX 516 or permission of the program director and dean.

**AMEX 519 Leading and Governing Arts and Institutions 3 Credits**

This course will discuss strategic methods, analytical approaches, and best practices for arts executives, board members, and stakeholders. Strategic, adaptive, entrepreneurial governance and management of arts institutions is essential for long-term survival and success, particularly in ever-shifting social, political, economic and technological landscapes. Building upon foundational information delivered through all prior coursework, this course explores the roles, relationships and responsibilities of institutional leaders and how strategic approaches to defining roles, finding and keeping the right people to fill them, strengthening the relationships and identifying and fulfilling responsibilities at all levels drives success. Graduate candidates research, compare and contrast leadership styles, tools and best practices in ethically and responsibly governing and managing institutions, with particular consideration given to the specific needs of the nonprofit arts. Topics of discussion and debate will include ethics and aesthetics, diversity and equity, arts and civic responsibility, and freedom and constraint in strategically planning, governing and managing the production and dissemination of art. Multiple case-based analytical studies resulting from in-depth, thesis-oriented governance and/or leadership focus surveys developed throughout the program further inform discussion and the development of a comprehensive leadership strategy for an arts institution with which each student will align him or herself. Requires participation in a full-day Board and Executive Management Leadership Seminar/Workshop intensive on the Rider campus at end of the session.

**Prerequisite(s):** AMEX 510, AMEX 513, AMEX 516.

**AMEX 593 Capstone: Arts Management Thesis or Leadership Project 3 Credits**

This course represents the graduate capstone requirement and is taken subsequent to the preparatory "Synthesizing Arts Management" (AMEX 590) course wherein the graduate candidate will identify, design, prepare for and subsequently complete either a traditional, written graduate thesis path of completion or an in-depth, comprehensive leadership project - either option upon approval, and under advisement of, program director and designated faculty member.

**Prerequisite(s):** AMEX 519.

## Faculty

**Trent Blanton**

Associate Professor, Department of Theatre and Dance  
B.A. Georgia College; M.F.A. Florida Atlantic University

**Mariann Cook**

Associate Professor, Department of Theatre and Dance  
B.M.E. University of Central Oklahoma; M.M. The University of Oklahoma

**Ivan Fuller**

Professor, Department of Theatre and Dance  
B.A. Butler University; M.A. Bowling Green State University; Ph.D. Bowling Green State University

**Louis F. Goldberg**

Priority Adjunct Assistant Professor, Department of Theatre and Dance  
B.A. Colgate University; M.M. Syracuse University; M.F.A. Syracuse University

**Nathan Hurwitz**

Associate Professor, Department of Theatre and Dance  
B.F.A. New York University; M.A. Northwestern University; Ph.D. University of Pittsburgh

**Robin W. Lewis**

Associate Professor, Department of Theatre and Dance  
B.S. The University of Alabama at Birmingham

**Eri Millrod**

Assistant Professor, Department of Theatre and Dance

**Miriam N. Mills**

Associate Professor, Department of Theatre and Dance  
B.A. Rutgers, The State University of New Jersey; M.F.A. Mason Gross School of the Arts, Rutgers, The State University of New Jersey

**Robin Shane**

Assistant Professor, Department of Theatre and Dance  
B.A. Wesleyan University; M.F.A. NYU, Tisch School of the Arts

**Rebecca Simon**

Priority Adjunct Assistant Professor, Department of Theatre and Dance  
B.A. University at Buffalo, The State University of New York; M.F.A. Florida Atlantic University

**Yoshi Tanokura**

Assistant Professor, Department of Theatre and Dance

**Kim Chandler Vaccaro**

Associate Professor, Department of Theatre and Dance  
B.A. University of California, Santa Barbara; M.A. University of California, Los Angeles; Ed.D. Temple University

## COURSES AND DESCRIPTIONS

### Arts Management and Executive Leadership (AMEX)

#### **AMEX 500 Graduate Survey of Arts Management: Principles and Practice 1.5 Credits**

Provides survey of key challenges and opportunities in institutional planning and development, strategy, organization, budgeting, leadership and governance in arts institutions, with a particular focus on nonprofit arts. Vision-centric, mission-driven, integrated management perspectives are applied to case-based research, analysis and reporting, supported by multiple assigned readings and required online discussion posts. This course is a pre-program requirement for the MA in Arts Management and Executive Leadership degree. Students who have successfully completed AAD 121 as an undergraduate may be waived from completing this course by the program director and dean.

#### **AMEX 503 Arts Marketing: Principles and Practice 1.5 Credits**

This course will build upon integrated management and marketing fundamentals addressed in AMEX 500. The course surveys the challenges, as well as traditional, contemporary and developing opportunities and approaches to institutional branding, audience development, product marketing and community alignment from vision-centric, mission-driven strategic marketing and public relations perspectives. The course is a pre-program requirement for the Master of Arts in Arts Management and Executive Leadership program. Students who have successfully completed AAD 202 as an undergraduate may be waived from completing this course by the program director and dean.

**Prerequisite(s):** AMEX 500 or permission of director and dean.

#### **AMEX 506 Arts Fundraising Principles and Practice 1.5 Credits**

The seminar builds upon integrated management, fundraising and institutional advancement fundamentals addressed in AMEX 500. This course surveys the challenges as well as traditional, contemporary and developing opportunities and approaches to advancement, donor-centered fundraising, legacy-building from vision-centric, mission-driven strategic fund-development perspectives. The course is a pre-program requirement for the Master of Arts, Arts Management and Executive Leadership program. Students who have successfully completed AAD 203 or similar coursework may be waived from completing this course by the program director and dean.

**Prerequisite(s):** AMEX 500.

#### **AMEX 510 Advancing Arts and Institutions 3 Credits**

This course will provide integrated strategies for long-term fund development, sustainability, and legacy building in the arts. Funding and other stakeholder-driven advancement follows vision and, in an industry that relies heavily on stakeholder investment to propel artistic and programmatic success, the need for strong vision-driven leadership is critical. Building upon foundational information delivered in AMEX 500 and AMEX 506 (or equivalents), the course explores and assesses multiple, diverse approaches to vision-centered, mission-driven institutional advancement and fund-development from all philanthropic sectors impacting the nonprofit arts. Students will compare and contrast diverse board, executive and managerial strategies and application of current tools, trends and best practices employed in fund development planning and program implementation via case-based research and reporting. Comparative research and analysis of public and private funding institutions, corporations, and individual philanthropists – what inspires and guides their proposal review processes and giving practices – further informs discussion and the development of three sector-specific assessments for multiple arts institutions with which each student will have aligned themselves. Three, 90-minute live streamed, moderated expert advisory panel discussions in addition to regularly-scheduled online sessions will interface leaders in the field and faculty moderator engaging on essential topics relating to course goals/outcomes, providing diverse and highly informative first-hand insights from executive leaders and decision-makers.

**Prerequisite(s):** AMEX 500, AMEX 503, AMEX 506, or equivalents, or permission of program director and dean.

#### **AMEX 513 Advocating Arts and Institutions 3 Credits**

This course will discuss the legal, societal and ethical perspectives on arts policy, practice, and procedures in the workplace. Arts often reflect, challenge and at times define social, political and ethical constructs and push the envelope on what is acceptable – aesthetically, morally and otherwise – in contemporary society. Explore the ever-evolving relationship of arts and society through the lens of institutional responsibility as interpreted by the artist, the law, and by contemporary civic and social considerations. Masters candidates will research and discuss key historical moments and movements which have impacted the arts and institutional governance and administration; current legal, social and ethical issues impacting artistic expression and institutional leadership today; and key policy decisions past, present and under consideration which impact the ways by which institutions make and disseminate art, govern themselves, and carry out key administrative functions. Case-based comparative research and analysis of effective leadership initiatives, policies and best practices around key legal, social and ethical issues impacting institutions further informs discussion and the development of a comprehensive institutional responsibility proposal for an arts institution with which each student will align him or herself.

**Prerequisite(s):** AMEX 500, AMEX 503, and AMEX 506 or equivalents when approved by the program director and dean.

**AMEX 516 Engaging Arts and Institutions 3 Credits**

This course provides an integrated approach to vision-centric, mission-driven community building, audience development, and engagement in the arts. In a time when active participation in live arts is challenged with multiple and ever-advancing competing arts and entertainment options, platforms and pricing structures, the ability and wherewithal for arts institutions to effectively get their message through is more essential than ever. Building upon foundational information delivered in AMEX 503, this course explores challenges and opportunities in winning the hearts and minds of a diverse, often fickle and ever-changing demographic, psychographic and socio-economic public, engaging them in new and meaningful ways. Masters candidates research and discuss the importance of vision, mission and integrated management approaches to branding and messaging; trends in audience participation; efficacy of traditional and contemporary approaches to institutional branding, audience development and community-building around the arts; evolving modes and tools for effectively identifying, programming for, marketing to and engaging diverse audiences; efforts to integrate live arts and new technologies to market, and expand access to and engage audiences in the arts in new ways. Case-based comparative research and analysis of effective branding and marketing campaigns further informs discussion and the development of a comprehensive market analysis and brand expansion proposal for an arts institution with which each student will align him or herself.

**Prerequisite(s):** AMEX 500, AMEX 503, and AMEX 506 or permission of the program director or dean.

**AMEX 518 Surveying Arts Institutions 3 Credits**

This course provides case-based research and analysis of institutions which shape and define the Arts industry. Students will gain depth of insight into the essential purpose, structure, management and culture of institutions while building working knowledge of how they function, produce good arts and impact communities. Masters candidates will integrate prior course learning as context for the design and implementation of case-based research and analysis of institutional planning, structure, leadership and impact. This process affords broader perspective and helps test assumptions, ground theories, synthesize learning and shape professional expectations and aspirations in context of the industry and the institutions which define it. This course lays the foundation for subsequent thesis and/or institutional leadership capstone project work.

**Prerequisite(s):** AMEX 500, AMEX 503, AMEX 506, AMEX 510, AMEX 513, AMEX 516 or permission of the program director and dean.

**AMEX 519 Leading and Governing Arts and Institutions 3 Credits**

This course will discuss strategic methods, analytical approaches, and best practices for arts executives, board members, and stakeholders. Strategic, adaptive, entrepreneurial governance and management of arts institutions is essential for long-term survival and success, particularly in ever-shifting social, political, economic and technological landscapes. Building upon foundational information delivered through all prior coursework, this course explores the roles, relationships and responsibilities of institutional leaders and how strategic approaches to defining roles, finding and keeping the right people to fill them, strengthening the relationships and identifying and fulfilling responsibilities at all levels drives success. Graduate candidates research, compare and contrast leadership styles, tools and best practices in ethically and responsibly governing and managing institutions, with particular consideration given to the specific needs of the nonprofit arts. Topics of discussion and debate will include ethics and aesthetics, diversity and equity, arts and civic responsibility, and freedom and constraint in strategically planning, governing and managing the production and dissemination of art. Multiple case-based analytical studies resulting from in-depth, thesis-oriented governance and/or leadership focus surveys developed throughout the program further inform discussion and the development of a comprehensive leadership strategy for an arts institution with which each student will align him or herself. Requires participation in a full-day Board and Executive Management Leadership Seminar/Workshop intensive on the Rider campus at end of the session.

**Prerequisite(s):** AMEX 510, AMEX 513, AMEX 516.

**AMEX 593 Capstone: Arts Management Thesis or Leadership Project 3 Credits**

This course represents the graduate capstone requirement and is taken subsequent to the preparatory "Synthesizing Arts Management" (AMEX 590) course wherein the graduate candidate will identify, design, prepare for and subsequently complete either a traditional, written graduate thesis path of completion or an in-depth, comprehensive leadership project - either option upon approval, and under advisement of, program director and designated faculty member.

**Prerequisite(s):** AMEX 519.

**Athletic Leadership (ATHL)****ATHL 501 Sport Psychology 3 Credits**

This course covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics. Emphasis is placed on applications for maximizing effectiveness while serving in the position of coach or administrator.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 502 Evidence-Based Research and Athletics 3 Credits**

This course in research methods prepares the student to understand materials and issues associated with but not limited to the logic of the scientific method, research design, and qualitative and statistical analysis of data. Students will be afforded the opportunity to conduct research in the course on topics.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 503 Strength, Speed, and Conditioning 3 Credits**

Emphasis will be placed upon assessment, description, and analysis of sport movement and designing training programs to enhance performance variables. While this course will assist those who desire to sit for the National Strength and Conditioning Association's (NSCA) Certified Exam, it is NOT a preparation course for the NSCA-CSCS exam.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 504 Fundamentals of Athletic Training and Wellness 3 Credits**

Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 505 Athletic Communication and Marketing 3 Credits**

Seminar in Sports Media and Communication is a critical examination of the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 506 Facilities Management 3 Credits**

Seminar in Facilities Management and Event Planning provides an examination of principles and techniques of planning and operating sport facilities. Emphasizes the principles and concepts of organization and administration including communication, personnel management, management of physical resources, and risk management. Examines a variety of sport operations such as indoor stadiums, athletic field complexes, and managing recreation and intramural activities.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 507 Athletic Governance and Policy 3 Credits**

Students in this course will explore principles, techniques, and process related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. Studying collegiate athletic administration involves interpreting NCAA By-laws, including a comparison between Division I, II, and III compliance regulations. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level. At the end of the course, students will understand the primary duties of the athletic director and the intricacies of managing an intercollegiate athletic program.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 508 Athletic Risk Management & Wellness 3 Credits**

Students in this course will explore proactive approaches to managing risks associated with conducting health, physical education, recreation and outdoor education programs. This course will emphasize safety as a foundation of quality program planning. Students will study governing associations and leadership/management skills required to be successful in the world of college athletics.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 509 Sport Law 3 Credits**

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues which will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 514 Women and Sports 3 Credits**

Women and Sport focuses on women winning access to the playing field as well as the front office in sport. Using research-based materials, course members will gain an understanding of how women have been involved in sport and physical activity, how women have struggled for widespread recognition and legitimacy, how women continue to carve out their role in shaping sport as it is known today, in the future, and society's ongoing conversation about what it means to be a female athlete or a woman working in sport.

**ATHL 515 Athletic Leadership 3 Credits**

In any profession or endeavor, the attitude and overall culture of a team is a direct reflection of its leadership. In the sports realm, there are many different leadership approaches that have been considered effective. This course will provide an overview of these approaches based on a comprehensive review of the literature related to sport leadership. The primary goals of this course are to help current and aspiring sport leaders gain a better understanding of effective leadership, to provide the necessary tools in developing effective leaders, and to provide networking opportunities for individuals who share similar goals and aspirations across various domains. The leadership principles may be beneficial to individuals in a variety of settings. This course offers coaches, administrators, players, and scholars the opportunity to learn and apply leadership principles within various contexts.

**ATHL 516 Sport Analytics 3 Credits**

This course will discuss the theory, development, and application of analytics in sports and the application of analytics in sports for purposes of in-game strategy, player performance, team management, sports operations, and fantasy competitions. Students will be introduced to topics in the applied analysis of sports, with a focus on supporting team decision-makers and applying modern, practical analytic techniques to sports data in search of actionable insight and a competitive edge. The four major team sports of North America (football, baseball, basketball, and hockey) will be the primary subjects of study, but the course's learning objectives are universally applicable to all sports. Emphasis will be placed upon becoming familiar with the full analytic life-cycle: asking productive and relevant research questions, finding the correct data, applying the appropriate tools, discovering insights, and clearly communicating results.

**ATHL 517 Athletic Finances 3 Credits**

Athletic Finances examines the financial tools that sports managers use to run their sport businesses. Course members will explore traditional and innovative methods of revenue acquisition and financial management in sports organizations, the financial business structure of sports organizations, and the financial planning and forecasting processes that make organizations effective. Various other aspects of finance are discussed as they relate to sports organizations, including the time value of money, capital structuring, stocks and bonds, inventory management, and higher education.

**ATHL 518 Athlete Development 3 Credits**

Athlete Development focuses on sports-specific learning to prepare athletes with the necessary critical elements leading to an improvement in their chosen sport, emphasizing technical development, physical preparation and sports specific knowledge. The course follows the Long-Term Athlete Development (LTAD) model, an approach to athlete-centered sport that combines skill instruction with long-term planning and an understanding of human development. The LTAD model integrates current research on talent development and assessment into practice to help sport leaders plan athletic development across the life span or design detailed programs for a particular group, including those with physical and cognitive disabilities.

**ATHL 519 Ethics in Sport 3 Credits**

Ethics in Sport focuses on focus on how people should treat one another in sport settings and, therefore, on a critical examination of ethical issues central to contemporary sport. As a class we will thus consider these questions: 1) What place, if any, does sport have in a good life? 2) What counts as cheating in sport, and why is it morally wrong? 3) Is it morally permissible to use performance-enhancing drugs or genetic forms of enhancement to boost athletic performance? 4) How is it possible to achieve equality for women in sports in a culture where dominant sports tend to privilege such traditionally male features as strength, power, and speed?.

**ATHL 520 Applied Sport Psychology 3 Credits**

Applied sport psychology involves extending theory and research into the field to educate coaches, athletes, parents, exercisers, fitness professionals, and athletic trainers about the psychological aspects of sport or activity. A primary goal of professionals in applied sport psychology is to facilitate optimal involvement, performance, and enjoyment in sport and exercise. Applied sport psychology is an emerging practice area focusing on applying psychological principles, theories, and skills to enhance optimal performance among populations such as performing artists, athletes, and those in the business world.

**Prerequisite(s):** ATHL 501.

**ATHL 521 Clinical Sport Psychology 3 Credits**

Clinical Sport Psychology presents a new way of thinking about the psychological processes that are involved in attaining and maintaining sport expertise. The course, based on clinical and sport research, bridges the gap between clinical and sport psychologists by presenting a model that connects athletic performance, basic psychological processes, and relevant empirical findings. Successful completion of course materials provides the practitioner with greater understanding of the varying dimensions of clinical phenomena and how nonclinical, subclinical, and clinical issues affect athletic performance and the overall well-being of athletes.

**Prerequisite(s):** ATHL 501.

**ATHL 522 Assessment in Sport Psychology 3 Credits**

Assessment in Sport Psychology integrates and synthesizes the theoretical concepts of sport and performance psychology into meaningful application. Emphasis is placed on creating and then assessing performance-enhancement programs for clients through the exploration and application of theory, research, and intervention strategies to assist clients pursuing excellence. The construct of excellence is thoroughly explored, including common roadblocks and the type of contexts in which the skills and knowledge are used in the field of clinical mental health counseling, sport and performance, intrapersonal relationships, and career.

**Prerequisite(s):** ATHL 501.

**ATHL 533 Special Topics Seminar 3 Credits**

This course will provide students the opportunity to survey the various sub-disciplines related to coaching and athletic administration, and their methods of inquiry. The course will place emphases on critically appraising research literature, and data collection, data organization and analyses for various research questions.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 550 Current Issues in Athletics 3 Credits**

This course will provide students the opportunity to survey the various sub-disciplines related to coaching and athletic administration, and their methods of inquiry. The course will place emphases on critically appraising research literature, and data collection, data organization and analyses for various research questions.

**ATHL 601 Concepts and Principles of Coaching 3 Credits**

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 602 Developing a Philosophy of Coaching 3 Credits**

Athletic Coaching – Developing a Philosophy provides the opportunity to learn and reflect upon the necessary skills for a successful coach. The course will cover numerous topics to allow course members the opportunity to learn, evaluate and self-reflect on their abilities and skills as a coach, and to develop a personal philosophy of coaching. The course addresses the differences in levels of competitive sports, the personal roles that coaches should exhibit, the professional roles expected and the organizational influences on the world of a coach in order to maximize the development of athletes and team while progressing from one season to the next in the annual coaching cycle.

**Prerequisite(s):** ATHL 601.

**ATHL 621 Concepts and Principles of Athletic Administration 3 Credits**

Concepts and Principles of Athletic Administration explores the complexities of intercollegiate athletics while explaining the organizational structures, key players, terms, and important issues most relevant to the growing but often misunderstood fields of recreational studies, sports management, and athletic administration. Intercollegiate athletics create unique challenges to higher education—for while they are closely integrated into their institutions—athletic programs often operate outside of traditional university governance structures while contributing significantly to a school's culture, identity, and financial outlook. Course members in this course will explore principles, techniques, and process related to the management of college athletics, characterize the critical steps to getting hired in collegiate athletics, and prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level.

**ATHL 622 Administrative Decision-Making 3 Credits**

Students in this course will explore principles, techniques, and process related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level.

**Prerequisite(s):** ATHL 621.

**ATHL 650 Internship of Coaching 3 Credits**

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches—planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**ATHL 651 Internship of Administration 3 Credits**

The internship affords students professional experience with an organization where the course theory can be applied to best practices. The internship is developed in consultation with the student, the student's academic advisor and the Internship. A learning/work plan is prepared by the student for approval by the site supervisor, both of whom share responsibility for the internship.

**Prerequisite(s):** Permission of Program Director or approval by CCS.

**BSED 504 Curriculum Strategies and Evaluative Concepts in Business Education 3 Credits**

Designed to provide the student with effective curriculum strategies and evaluative concepts relative to business and office education programs in elementary, secondary, and post-secondary public and private schools. Students are acquainted with appropriate curriculum and evaluation models designed to plan, organize, implement, revise and assess instruction and programs. Improvement of curriculum and evaluation is the primary goal.

**BSED 506 Administration and Supervision of Business and Vocational Education 3 Credits**

A study of the administrative and supervisory problems associated with business and vocational education at the local, county, state, and federal levels. Administrative and supervisory improvement strategies are explored. Major topics include: educational administrative structures; role of the supervisor of instruction; state and federal legislation; certification; personnel policies; ethical conduct; funding procedures; and public relations. Improvement of administration and supervision of business and vocational education is the primary goal.

**BSED 508 Organizing and Administering Cooperative Work Experience Programs 3 Credits**

An overview of the current administrative and instructional strategies used in organizing and administering cooperative work experience programs at the secondary and post-secondary levels. Up-to-date concepts are reviewed relative to program approval, teacher coordinator certification, work agreements, labor laws, funding, reporting supervision of student learners, related instruction, student wages, and vocational student organizations. Current instructional materials are reviewed and evaluated. Improvement in the organization and administration of cooperative work experience programs is the primary goal.

**BSED 509 Principles and Strategies of Vocational and Cooperative Education 3 Credits**

Designed as one of the specialized courses in the preparation of business and marketing education teachers and teacher-coordinators of cooperative work experience programs. The philosophy and history of education for and about work, including technology, are studied along with the principles and strategies for organizing and administering vocational cooperative education programs. Developmental/reflective evaluative techniques will be applied for the assessment of self, students, instruction and selected case studies. Current instructional concepts, organizational and administrative strategies, legislative enactments, and regulations pertaining to the employment of youth are included. Special attention is given to the role of vocational student organizations and advisory committees.

**BSED 519 Directed Study and Research in Business Education 1-3 Credits**

Provides the student with an opportunity to complete a project, resolve a problem, or pursue a major activity that will make a contribution to the teaching profession in business or marketing education. Each participant, under the supervision of a senior faculty member, follows a planned sequence of professional activity that culminates in a completed written project. Professional teacher development is the primary goal.

**Business Education-GR (BSED)**

**BSED 530 Emerging Instructional Strategies in Business Education 3 Credits**

Emphasis is placed on the enhancement of teaching effectiveness in business education as emerging instructional strategies are reviewed and studied. Special attention is devoted to the new technology and its use in business education while focusing attention to the present and future needs of the employer. Current instructional materials are presented and utilized. Master practicing business education teachers will augment the instructor's presentations.

**Communication-GR (COMM)****COMM 500 Communication Processes in Health 3 Credits**

Interpersonal and nonverbal communication are the two areas of general communication studies that health communication draws from most heavily. These concepts affect relationships in healthcare, the ability to understand and process medical information, the efficacy of messages in relation to nonverbal indicators, and how bad news, another major concept in health communication, is received. This class will provide a comprehensive understanding of these concepts, how they are utilized in the field of health communication, and the ways in which the two areas intersect, all in the broader context of understanding health communication as a discipline.

**COMM 501 Medical Concepts and Health Writing 3 Credits**

Improving the way that health is communicated requires the ability to understand health information at the initial – and often complex – level. In particular, health communication aims to provide information to underserved populations, who may suffer from lack of education and poor health literacy. This class will provide students with a basic understanding of medical terminology and the ability to comprehend and explain scientific literature. Students will develop the skills needed to translate medical information for a wide range of audiences. Students will also be required to apply these concepts through the creation of multiple types of health writing assignments.

**COMM 503 Corporate/Persuasive Discourse 3 Credits**

Imparts advanced knowledge of crisis management, including theory, techniques and applications. Students will gain competency in a number of areas including: changing opinion and behavior, crisis management principles, strategies, tactics and communication methods. Students will work in teams to develop the knowledge and skills to manage the messages surrounding crisis-related issues found in organizations.

**COMM 504 Strategic Business Writing 3 Credits**

Provides students with the tools to think and write strategically. Students will gain competency in a number of areas including: identifying challenges and communicating to different workplace audiences; developing content for daily, routine and specific workplace requirements; focusing on strategic, outcomes-based writing; and cultivating interpersonal relationships for successful communication. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

**COMM 505 Health Communication Theory 3 Credits**

Health communication is driven by a set of principles that guide the conceptualization, design, and implementation of new health guidelines and interventions. The ultimate goal of health communication is to increase health and satisfaction by encouraging healthier behaviors, medical compliance, and more efficient communication of medical information. This class is designed to give an overview of the major fields of study in health communication through examination of the major theoretical perspectives therein. Topics include the different areas of study in which health communication theories are based, how theory is used to support the initial design of research studies and interventions, and the situations in which the use of more than one theoretical approach is warranted.

**COMM 507 Business Presentation Strategies 3 Credits**

Develops the ability to create purposeful presentations with targeted messages relating to audience needs. Students will gain competency in a number of areas including: messaging, writing for the visual media, using current visual presentation tools, delivering an impactful presentation and taking advantage of social media channels. They will develop the knowledge and skills to influence and inspire internal and external constituencies, a key part of communication practitioners' jobs, especially those in managerial/senior staff roles.

**COMM 510 Theory and Practice of Negotiations 3 Credits**

This course provides students with the theory and skills required to be effective negotiators. Students will learn how to prepare for and participate in negotiations by applying various strategies and tactics. This course will be evenly split between theoretical lecture/discussion and practical application / skill development, including in-class simulations.

**COMM 525 Visual Communication 3 Credits**

This course introduces students to the theory and practice of visual communication design. Students will learn how to critique, design, and edit visual communications with specific audiences in mind. Topics include the elements and principles of design, color theory, visual perception theories, typography, symbols, brand identity, logos, propaganda, and information design in both current and historical contexts. Readings and viewings of relevant films are a required component of the course. Assignments will afford students opportunities to apply current visual communication software to produce visual communications for various professional environments, but command of such software is neither required nor expected.

**COMM 531 Legal/Ethical Issues for Professional Communication 3 Credits**

Provides students with the knowledge to understand and apply ethical guidelines and current laws and regulations relative to workplace communication, as well as the legal limits impacting professional communications. This knowledge is particularly important for those in or aspiring to managerial/senior staff roles.

**COMM 545 Information Gathering & Analysis 3 Credits**

Develops the knowledge and skills to use various research methods and analysis techniques to provide critical information for, and assist with, business decisions. It will cover developing research tools, gathering and verifying information, analyzing, and reporting results. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

**COMM 551 Cultural Conceptions of Health and Illness 3 Credits**

Culture affects every relationship dynamic, the way nonverbal communication is interpreted, how audiences are selected for health campaigns, the ability and willingness to use technology, and the way bad news is broken to individuals and families. In health communication, culture comprises both the general conceptions of what culture is – the characteristics of a particular social, ethnic, or age group – as well as other factors. This class will examine the specific variables of culture in this setting, how the variables are both unique and interconnected, and the wide-reaching impact culture has in health. The first half of the course explores the variables that culture includes. The latter part of the course takes these variables and demonstrates the roles they play in real-world health communication settings.

**COMM 552 Communication in a Multicultural Workplace 1.5 Credits**

Instructs in the use of diversity and cultural communication principles and strategies to effectively manage a culturally diverse workforce. This course will help organizational leaders understand how gender, ethnic, religious, and other differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relations, and ultimately, good productivity for the organization.

**COMM 553 Communication in a Global Market 1.5 Credits**

Examines communication between and among businesses in a global context. The course presents communication as an essential pivot around which revolve the social and institutional relationships within and among nations. Hence, exploring global communication structures and tendencies is an important means to understanding social, cultural, economic and political impositions on global business. The emerging role of technologies of communication, such as social media, will be a particular focus of this course.

**COMM 554 Effective Group Communication 1.5 Credits**

Encompasses the study of individual and group behavior in the workplace. Emphasis is placed on individual behavior and group dynamics, application of current group theories, effective group communication, and effective leadership/followership skills. A comprehensive review of these processes, as well as others, will allow students to examine their role in groups as well as teams.

**COMM 555 Communication and Organizational Culture 1.5 Credits**

Examines communication and culture in organized settings. Emphasis is placed on managing organizational culture, communication and the relationship between organizational performance and organizational culture. A review of research and analysis as it relates to organizations will allow students to apply what they have learned about organizational culture to real life situations.

**COMM 556 Special Topics in Communicatio 3 Credits****COMM 557 Special Topics in Communicatio 3 Credits****COMM 558 Health Communication Campaigns 3 Credits**

Campaigns are the primary tool used in health communication to disseminate messages and effect change. Campaigns can provide information on a specific issue or to a specific community, encourage preventative health behaviors, demonstrate behaviors (such as performing self-skin exams for skin cancer or the proper way to follow medication instructions), put forward suggestions for a healthy lifestyle, raise awareness, or offer support. At times, multiple messages may be present in one campaign. This class will examine the different types of health campaigns and the impact a health communication campaign can have. Students will learn how to analyze a health campaign through its full cycle. The class will also serve as a foundation for the capstone class of the Master's in Health Communication program.

**COMM 559 Communicating Crises in Health 3 Credits**

In the health setting, multiple events can be considered a crisis: the outbreak of a disease, contamination of food, a natural disaster, and more. The response to a crisis can have a significant, long-lasting impact on the organization's reputation. The development of a crisis plan, which sets forth guidelines for an organization's response to a crisis and involves multiple steps, can be completed before any events occur and can significantly affect the way an organization handles a crisis. This class explores the types of crises that occur in health communication, the factors involved in a crisis, the development of a crisis plan, and the effects of a crisis on an organization.

**COMM 560 Communication Issues for Leaders 3 Credits**

Focuses on analysis of contemporary issues that highlight the necessity of effective communication for those in a leadership position. Through analysis and discussion of historical and current challenges faced by organizations, students will learn to recognize how effective leaders apply successful communication strategies. Case studies will also explore the effect that poor communication choices have had on organizations. Emphasis will be placed on discussion, research, and presentation.

**COMM 563 Digital Media Communication 3 Credits**

Looks at the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

**COMM 564 Communication and Diversity in the Workplace 3 Credits**

The culture of work, like society, is multicultural. More than ever, today's organizational leaders, including CEOs, managers and supervisors, must understand how to use diversity and cultural communication principles and strategies to effectively nurture and promote a culturally diverse workforce. This course helps organizational leaders understand how gender, ethnic, religious, and other social and cultural differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relationship, and ultimately, good productivity for the organization.

**COMM 565 Rel Comm: Interpersl, Group, Intercult 3 Credits**

Introduces students to seminal and contemporary research in the area of relational communication. Broken down into three modules, the curriculum will be divided among the topics of Interpersonal Communication, Group Communication, and Intercultural Communication. In the first, emphasis will be placed upon theories of human communication, verbal and nonverbal communication, gender, and conflict. The second module will explore various elements of group communication, including leadership and followership, roles, status, power and problem solving and decision making. The third module will introduce students to the study of intercultural communication, with its focus on the relationship between culture and communication.

**COMM 590 Independent Research and Study 3 Credits**

Independent Research and Study allows students in good academic standing to investigate topics of interest under faculty supervision.

**COMM 599 Capstone in Business Communication 3 Credits**

Provides students with the opportunity to explore, research and discuss practical and theoretical topics in business communication. This capstone course gives students an opportunity to apply skills and knowledge they have learned throughout the Master of Arts in Business Communication curriculum. Under faculty supervision, students will complete a major project using a variety of research methods.

**COMM 600 Capstone: Implementing a Health Communication Campaign 3 Credits**

The ability to implement, evaluate, revise and successfully launch a campaign is a critical skill for all individuals who work in health communication. Campaigns are the primary tool used by health communicators to initiate change in a community, although their implementation will not always be a fluid, one-step process. This class will require students to select a local health campaign and evaluate the campaign from start to finish. Students will complete the Master's program in Health Communication with a complete proposal for a health communication campaign and the skills needed to analyze an existing campaign from beginning to end.

**COMM 690 Research and Creative Expressi 1-4 Credits****Counseling Substance Aware (CNSC)****CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

**Prerequisite(s):** COUN 515 or COUN 516.

**CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

**Prerequisite(s):** COUN 515 or COUN 516.

**CNSC 590 Counseling Internship I 3 Credits**

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School counselors, student assistance coordinators (SACs) and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled. Students must be supervised by a SAC.

**Prerequisite(s):** all other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

**CNSC 591 Counseling Internship II 3 Credits**

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School counselors, Student Assistance Coordinators (SACs), and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. Students must be supervised by a SAC. The approval and cooperation of the intern's field supervisor must be obtained the semester prior to the actual placement.

**Prerequisite(s):** COUN 590 or CNSC 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

**Counseling (COUN)****COUN 500 Introduction to Counseling and Helping Professions 3 Credits**

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

**COUN 501 Coaching Principles and Practices 3 Credits**

The course covers core coaching competencies, including coaching screening and orientation, fundamental skills, assessment, approaches for organizations, and coaching ethics. The course meets all 30-hour educational requirements for certification as a Board Certified Coach (BCC) through the Center for Credentialing and Education and is required course for the 60-hour BCC educational requirements.

**COUN 502 Prevention and Intervention for Body Image and Disordered Eating 3 Credits**

In this course, students will gain an understanding of strategies relevant to the prevention and treatment of body image and disordered eating concerns. Prevention strategies applicable to individual client care, small group work, and large group programming will be discussed. Students will also learn how to communicate and teach prevention strategies to parents, teachers, partners, and others who may be key influences in body image and/or disordered eating issues. In addition, various treatment and intervention approaches for individuals already exhibiting problematic body image and/or disordered eating attitudes and behaviors will be reviewed.

**COUN 503 Group Counseling 3 Credits**

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

**Prerequisite(s):** COUN 500, CNPY 502.

**COUN 504 Vocational/Career Development in Educational Settings 3 Credits**

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

**COUN 505 Vocational/Career Development 3 Credits**

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

**COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits**

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

**COUN 510 Approaches to Family Counseling 3 Credits**

Presents a basic understanding of major approaches of family counseling. Family counseling approaches covered include structural, systems, Ackerman, Satir, and analytical. These approaches are presented as related to major problem centered family concerns—child-rearing concerns, alcohol, drugs, child abuse, dysfunctional marriage, divorce, etc. Emphasizes self-awareness as related to family development.

**Prerequisite(s):** COUN 500, CNPY 502, or permission of instructor or advisor.

**COUN 512 Disaster Response, Trauma, Crisis, and Grief Counseling 3 Credits**

This course is an introduction to the research and practice of disaster response, trauma, crisis, and grief and loss counseling in clinical and educational settings. Course will include an overview of the impact of disasters, crisis, and trauma-causing events on individuals, communities, and educational settings and of the impact of working with traumatized clients on practitioners. Emphasis will be placed on prevention, intervention, and postvention practices in working effectively with individuals, families, and groups of people in the midst of traumatic situations and who have experienced loss, crisis, disasters and trauma-causing events.

**Prerequisite(s):** COUN 550.

**COUN 515 Substance Abuse Counseling 3 Credits**

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

**COUN 516 Strategies in Addiction Counseling 3 Credits**

This is an experiential and laboratory-based experience in which students will learn to implement evidenced based counseling techniques that are utilized in the field of substance abuse counseling. Students will be able to expand their basic counseling skills and techniques learned in COUN 550, as well as become exposed to techniques that are unique to addiction counseling. In addition to learning assessment skills, students will learn interventions that include motivational interviewing, relapse prevention, alternative therapies, group counseling, family counseling, and others. This course will also focus on issues of ethics and prevention in counseling.

**COUN 520 Multicultural Counseling and Relationship Development 3 Credits**

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

**COUN 525 Gender Issues in Counseling 3 Credits**

Examines the psychological, physiological, historical, and socio-cultural factors that affect the development of women and men across the life span and discusses implications for counseling. Focuses on relevant gender issues including gender bias and equity, misdiagnosis, self-esteem, depression, violence and sexual abuse, the feminization of poverty, and the importance of relationship for women. Presents an overview of feminist psychotherapy and explores the context of the behavioral, emotional and biological problems that impact on mental health. Also discusses the emerging men's movement and trends in counseling men; introduces gay and lesbian issues, the issues of minority women, and factors in counseling the HIV/AIDS client.

**COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits**

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

**COUN 535 Holistic Wellness Counseling 3 Credits**

Based on current methods and research, students will explore holistic wellness (e.g., spirituality, self-direction, work and leisure, friendship, and love) positive psychology (e.g., hope, forgiveness, etc.), and human change from personal and interpersonal perspectives.

**Prerequisite(s):** CNPY 502.

**COUN 550 Counseling Techniques Laboratory 3 Credits**

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions.

The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

**COUN 555 Introduction to Play Therapy 3 Credits**

Introduction to Play Therapy provides an overview of the fundamental principles of play therapy, including history, theories, skills, and applications. The course emphasizes developing the therapeutic relationship with children and utilizing play to facilitate children's self-expression, self-understanding, and personal growth. Observation of and supervised experiential activities in play therapy with children are an integral part of the course.

**Prerequisite(s):** CNPY 502 Theories of Counseling and Psychotherapy, COUN 550 Counseling Techniques Lab, EDPS 503 Human Growth and Development.

**COUN 556 Parent-Child Play Therapy 3 Credits**

Parent-child play therapy builds upon the introduction to play therapy course and focuses on helping parents/caregivers enhance their relationship with children through play therapy modalities. Students will learn the history, principles, and skills of filial therapy, with an emphasis on Child-Parent Relationship Therapy (CPRT). Students will have opportunities to strengthen their play therapy skills, develop the ability to conduct CPRT, and learn how to facilitate systemic changes in children's lives through working with parents/caregivers. This course contains an experiential component including in-class role-playing and supervised parent-child play therapy experiences with parents/caregivers.

**Prerequisite(s):** CNPY 502, CNPY 550, EDPS 503, COUN 555.

**COUN 580 Elementary School Counseling Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children.

**Prerequisite(s):** To be taken semester prior to COUN 590.

**COUN 581 Secondary School Counseling Practicum 3 Credits**

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

**Prerequisite(s):** To be taken semester prior to COUN 590.

**COUN 582 Coaching Practicum 3 Credits**

A 30-hour supervised experience in coaching with individuals, groups, or organizations. Includes seminar discussions, observations of recorded sessions, session analyses, and group supervision with the faculty supervisor. Provides the coach in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of coaching services. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on coaching services as they address the needs of clients. This course is designed to fulfill the practice requirements for certification as a Board Certified Coach through the Center for Credentialing and Education.

**Prerequisite(s):** COUN 500 or COUN 501, CNPY 502, COUN 505, and permission of instructor.

**COUN 585 Clinical Mental Health Counseling Practicum 3 Credits**

A supervised experience in counseling and consulting techniques in mental health facility, community counseling agency, or college setting. Includes seminar discussions, interview analyses or audiotape/videotape observations, and individual supervision with the instructor. For the experienced counselor or the advanced counselor in training who desires to review and/or strengthen individual counseling and consulting techniques. A field placement of 100 hours is required with a minimum of 40 direct contact hours with clients. Students registering for this course should contact the instructor the semester prior to the course being offered.

**Prerequisite(s):** To be taken semester prior to COUN 590.

**COUN 586 Practicum II 1 Credits**

The continuation of Practicum, this 1-credit course is required for those students who were unable to complete the 100-fieldwork hours of Practicum in the fall or spring semester. Students will continue at their Practicum fieldwork site and will be responsible for completing the remainder of their 100-hours. A grade will not be granted in Practicum until the successful completion of Practicum II. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor, director, and professor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator.

**Prerequisite(s):** COUN 580 or CNSC 580 or COUN 581 or CNSC 581 or COUN 585 and all other required course work must be completed or in progress. Program director approval with professor of record approval is required.

**COUN 590 Internship in Counseling I 3 Credits**

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

**Prerequisite(s):** all other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

**COUN 591 Internship in Counseling II 3 Credits**

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

**Prerequisite(s):** COUN 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

**COUN 593 Internship III 1 Credits**

The continuation of Internship II, this 1-credit course is required for those students who were unable to complete the 300-fieldwork hours of Internship II in the fall or spring semester. Students will continue at their Internship II fieldwork site and will be responsible for completing the remainder of their 300-hours. A grade will not be granted in Internship II until the successful completion of Internship III. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor permission and a comprehensive plan for fieldwork-hour completion to the clinical coordinator. Clinical coordinator approval is required.

**Prerequisite(s):** COUN 591 and all other required course work must be completed or in progress and permission of the clinical coordinator is required.

**COUN 600 Independent Study and Research in Counseling Services 1-3 Credits**

Students may take two independent studies. However, under special circumstances, such as students seeking certifications (e.g., Student Assistance Coordinator), students may be approved by their advisor to take up to six COUN 600 3-credit courses for a total of 18 credits.

**COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits**

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

**Prerequisites:** COUN 590.

**COUN 690 Internship in Counseling Speciality I 3-6 Credits**

This internship provides on-the-job clinical experience in approved settings. Placement is selected based on students' specialty area goals and must be approved by the faculty advisor the semester prior to actual placement. Students must also submit in writing a description of clinical activities available in the field site before the placement is approved. Students will be required to attend a weekly seminar during which time each student will present and/or discuss legal, ethical, multicultural, contemporary, and clinical issues in her/his specialty area.

**Counseling Psychology (CNPY)****CNPY 502 Theories of Counseling and Helping Professions 3 Credits**

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

**Prerequisite(s):** COUN 500 or as corequisite.

**CNPY 503 Psychological Development of the Adult and Aging 3 Credits**

Surveys psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human adult development and transitions throughout the adult life span. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the adult and aging will be examined.

**CNPY 514 Psychopathology 3 Credits**

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

**CNPY 515 Consultation in School and Agency Settings 3 Credits**

This course provides an introduction to school and agency based consultation theories and practices. Contemporary models of consultation are presented with students' emphasis on mental health, behavioral, and systems approach. In addition to the study of conceptual models, the development of skills in the consultation process in school and/or agency settings is emphasized. Students engage in behavioral consultations with consultees in approved placements.

**CNPY 516 Advanced Psychopathology 3 Credits**

An in-depth study of psychopathology with emphasis on developmental and personality disorders, and physiological disturbances. Includes assessment, classification, and treatment with emphasis on utilization in a variety of counseling and school settings. Biological, pathological, pharmacological bases of mental disorders are introduced and discussed in relationship to specific disorder classifications.

**Prerequisite(s):** CNPY514 or permission of instructor.

**CNPY 518 Counseling Children, Adolescents and Families 3 Credits**

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

## Curriculum & Instruction (CURR)

**CURR 501 Coaching Principles and Practices 3 Credits**

This course is an introduction to the profession of coaching for educators. It is designed to fulfill the educational requirements for certification as a Board Certified Coach through the Center for Credentialing and Education (CCE). The CCE competencies for certification provide the basis for course material.

**CURR 504 Vocational/Career Development in Educational Settings 3 Credits**

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design for educators who work in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

**CURR 517 Teaching and Learning Number and Operations 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

**CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

**CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits**

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Content and Mathematical Practices.

**CURR 520 Teaching and Learning Geometric Understanding 3 Credits**

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

**CURR 522 Teaching and Learning Measurement and Data 3 Credits**

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

**CURR 523 Teaching and Learning Mathematics in the High School 3 Credits**

This course addresses issues central to teaching and learning mathematics in the high school; building learning communities, how students learn mathematics, use of worthwhile mathematical tasks, instructional modes, technology options, and assessment to inform instruction. Mathematical topics examined are number and quantity, algebra, trigonometry, geometry, and statistics and probability, and modeling. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

**CURR 524 Teaching Mathematics in the Middle School 3 Credits**

This course has been designed to guide both in-service and pre-service teachers towards growth in teaching mathematics in middle school classrooms, according to the best of current practices. It is accepted that teaching and learning is an ongoing process throughout our careers. Teaching math well requires: a) Deep understanding of the mathematics content, b) Understanding of how students develop mathematical ideas, and c) The ability to shape appropriate learning environments and tasks. Realistically, the process of teaching mathematics, how student learn it, and how to build appropriate learning environments in courses like this one is only the first step towards developing the content and pedagogical skills needed to teach in the 21st century. The objective is to help students construct ideas that take them in the right direction, providing models for the continued long-term learning they will develop with their own classrooms clearly in mind. According to the best of current practice, this involves learning through exploration, inquiry and discovery. As students communicate and then reflect on teaching situations, they will form what has been described as a community of practice, a prototype for how groups of educators join forces, over months and years, to strengthen both their understanding and school practice.

**CURR 526 Place Value Instruction: Navigating the Decimal 3 Credits**

K-8 teachers examine the theory and practice of K-8 place value instruction during a weeklong course. Incorporating the ideas of the successful CONNECT-ED project, this seminar will examine place value theory and model instructional design that traces children's developmental levels and aligns with national and state standards. Participants will work with peers and experienced University faculty to design longitudinal instructional modules on other math topics. By engaging in this multi-grade design process, teachers will examine new ideas about mathematics, children's mathematical thinking, and mathematics instruction. Participants can earn professional development hours or college credit.

**CURR 527 Curricular and Instructional Design for Fraction Understanding 3 Credits**

K-8 teachers examine the theory and practice of K-8 fraction instruction during a weeklong course. Based on the successful CONNECT-ED project, this seminar will model how to design fraction instruction that traces children's developmental levels, and aligns with national and state standards. Participants will work with peers and experienced University faculty to design similar instructional activities. By engaging in this multi-grade design process, teachers will examine new ideas about mathematics, children's mathematical thinking, and mathematics instruction. Participants can earn professional development hours or college credit.

**CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits**

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to core curriculum content standards, professional development standards and national school leadership standards.

**CURR 532 Strategies for Curriculum Change 3 Credits**

This course will examine organizational skills and knowledge necessary to effect curriculum development and change, K-12. The course will address the socio-political context of curriculum change along with alternative strategies for initiating, implementing and sustaining standards-based curriculum improvements. Topics of study include strategic planning, problem-solving strategies, needs assessments, curriculum alignment, program evaluation, staff development and the organization of staff members for collaborative deliberation and decision making as essential means for promoting successful curriculum change at all levels of schooling. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531.

**CURR 533 Elementary School Curriculum 3 Credits**

A review of principles, curriculum, and methodology in elementary education, examined in the framework of social, cultural, and psychological developments. Recent developments in theory and empirical knowledge are analyzed. Emphasizes developing the content and organization of an integrated curriculum with a concern for individual differences with provision for social environments best adapted to fulfill basic needs and interests.

**Prerequisite(s):** CURR 531.

**CURR 534 Secondary School Curriculum 3 Credits**

A survey of the changing aims and programs of the secondary school. General, specialized, vocational, and activity programs are discussed with an analysis and evaluation of recent curriculum developments and projects. Current issues and controversies, in addition to research findings affecting secondary curriculum, are studied.

**Prerequisite(s):** CURR 531.

**CURR 535 Theory and Practices of Bilingual Education 3 Credits**

Introduces the rationale and research as a basis for bilingual education as well as the varied and current approaches to implementing programs. Implications drawn from the social, psychological, and linguistic problems of bilingual learners are considered as they apply to the needs, goals, and issues of bilingual/bicultural programs.

**CURR 536 Special Studies in Curriculum, Instruction, and Supervision 3 Credits**

The content of this course varies for each offering. In-depth treatment of issues, problems, concerns, or developments in curriculum, instruction and/or supervision will be provided. Topics such as global education, teaching and learning styles, classroom management, etc., are announced in advance and serve as the focus of course content.

**CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits**

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531.

**CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits**

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531 and CURR 538.

**CURR 552 Creative, Ethical Teacher Leadership 3 Credits**

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

**CURR 580 Action Research Tchg & Learn 3 Credits****CURR 585 Practicum Conducting Action Rsch 3 Credits****CURR 590 Seminar and Practicum in Curriculum, Instruction and Supervision 3 Credits**

Taken at the completion of all course work in the program. Students study in seminar fashion the current literature and research in the general areas of curriculum, instruction and supervision. Each student is involved in an individualized field experience. Typically the experience involves work with supervisory assistance in a selected segment of the student's school district, or in an approved location. The cooperation of the administrative staff of the student's school district is essential for the effective completion of this project. The instructor is free to observe the project in progress, and to evaluate the completed research project and the finished project paper.

**Prerequisite(s):** all course work including EDUC 500, permission of instructor.

**CURR 600 Independent Study and Research 1-3 Credits**

Course content varies with academic research interests of students who wish to engage in independent study related to the overall content of curriculum, instruction and/or supervision.

**CURR 640 Teaching and Learning Physical Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected physical science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 641 Teaching and Learning Life Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 642 Teaching and Learning Earth and Space Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 643 Engineering Solutions to the Challenges of Contemporary Science Issues 3 Credits**

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

**CURR 644 Teaching and Learning Chemical Science 3 Credits**

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be placed on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

**CURR 650 Understanding Gifted Learners 3 Credits**

The course explores the ways in which the gifted and talented can differ from more typical learners in terms of their cognition, social-emotional dimensions, behavior, and long-term development. It focuses on theories of intelligence, differing conceptions of giftedness and talent development, and learning processes. Some specific topics include underachievement, perfectionism, dual exceptionalism, gender issues, and underserved populations. The course also addresses the ways in which gifted education can evolve to fit the demands and opportunities embedded in complex, 21st-century socioeconomic, cultural, and technological contexts.

**CURR 652 Differentiating Instruction for the Gifted and Talented 3 Credits**

This course provides the rationale and practical strategies for effective instructional differentiation for the gifted and talented within and beyond the regular classroom. Participants will learn how to differentiate within subject areas by adjusting content, process, product, and learning environment to meet the needs of learners. They also will explore the nature and nuances of differentiation by ability, readiness, and interest, as well as the implications of instructional differentiation for formative and summative assessment. Throughout the course they will design and share examples of differentiation including tiered assignments, complex instruction, independent studies, graphic organizers, and learning contracts.

**CURR 654 Innovative Instructional Strategies for Gifted Education 3 Credits**

This hands-on, experiential course immerses participants in simulations and analyses of new and revised student-centered teaching models and strategies that are conducive to creative and critical thinking, advanced content mastery, and the invigoration of students' interests. Participants analyze the potential of each model/strategy while considering the ways in which it can apply to content learning in various subject areas/domains. The course also engages participants in studying the fundamental principles of program design in gifted education so they can make the best possible use of the instructional models and strategies.

**CURR 656 Creative, Interdisciplinary Thinking 3 Credits**

This course facilitates creative thinking through the exploration of important insights from a wide variety of disciplines in the social sciences, humanities, natural sciences, and education. The process of creative association enables participants to combine diverse, remotely associated constructs to create new products and processes. Applications of interdisciplinary thinking to curriculum and instruction are explored. These applications include novel methods for curriculum integration, discovery and development of children's interests, and instructional modifications for the gifted and talented. Exploration of concepts and processes in multiple academic domains and professional fields also provide appreciation for the domain-specific natures of giftedness and creativity.

**CURR 660 Authentic Data in the Elementary STEM Classroom. 3 Credits**

Young learners can think deeply about content and make meaningful connections between their experiences, natural phenomena, and authentic data when teachers integrate data in purposeful ways. In this course, teachers construct student-centered STEM investigations integrating real-world scientific and mathematical data and build their understanding of the theoretical basis for this work. Participants gain knowledge of STEM resources, learn to access entry points for STEM in elementary classrooms and foster engaging contexts, like engineering, coding, and NASA mission exploration. Teachers explore the synergies between Common Core State Standards and Next Generation Science Standards for a productive and exciting learning environment that prepares students for ongoing interest in STEM. This course is recommended as a foundation for the STEM certificate program.

**CURR 661 Authentic Data in the Secondary STEM Classroom 3 Credits**

Middle and High School students are capable of deep sense making when teachers utilize engaging STEM classroom practices to teach content with authentic data connections. In this course, teachers learn to apply research-based best practices central to today's classrooms. In a collaborative professional learning environment, they build knowledge of resources for accessing, analyzing, and making use of authentic data in meaningful activities. Coursework includes planning student-centered lessons that integrate data, building cultural relevance with engaging phenomena, and developing meaningful assessments for STEM activities. Participants identify how to integrate engineering design into the STEM classroom and learn how to represent the Nature of Science as students develop conceptual understanding and apply critical thinking to real-world decisions. A library of content rich lessons becomes available to all participants through a shared online community. This course is recommended as a foundation for the STEM certificate program.

**CURR 662 Eyes on Earth: Teaching Earth Science from Space (PK-8) 3 Credits**

This course will take participants through a journey about space exploration and specific NASA missions that examine components of earth. Participants will learn science content grounded in Earth's Lithosphere, Hydrosphere, Atmosphere, and Biosphere. By learning to use authentic data from NASA and other sources participants will experience an exploratory approach to learning about the Earth, and then bring these experiences to their own classrooms. Teachers will utilize several web-based tools and real-time data along with the three-dimensional learning in the Next Generation Science Standards to create lessons that can be used directly in the classroom.

**CURR 663 Lessons from the Ocean: Science on the Water Planet (Grades 2-12) 3 Credits**

Bring the ocean into your classroom by using Earth's waters as a context for standards-based STEM content. The ocean is critical to the functioning of the Earth system, and is an authentically integrated context for learning about topics such as density, weather and climate, heat transport, environmental issues, biogeochemical cycles, mathematics, and much more. Access a myriad of data sets to apply science concepts and make connections between the ocean and atmosphere, living and nonliving parameters, and life on land, as well as in the deep sea. Use the context of the ocean to teach Next Generation Science Standards topics with deep understanding and meaning for learners.

**CURR 664 The Arts in STEM: Advancing Meaningful Integration (K-12) 3 Credits**

Apply art in the context of exciting STEM concepts and learn to integrate art, science, math, technology, and engineering in more meaningful ways in your classroom. At the core of the STEM Education movement are critical thinking, creativity, problem solving, and authentic learning environments that engage diverse students in meaningful ways with content. The many mediums for art and artistic expression are a valuable component of communication and expression. Scientists and researchers at NASA and across the globe use myriad forms of art in their work. This course invites students to take a close look at the incorporation of art in the STEM classroom and provides resources, exemplars, and access to collaborative support for arts integration.

**CURR 665 Climate Change with NSF SPRINTT 3 Credits**

Award-winning curriculum and eloquent, online student investigations help students study science concepts emphasized in the Next Generation Science Standards, in the context of Earth's Polar Regions to better understand the complexity of Earth's climate and how it is changing. View the Earth using real scientific data from satellites and western researchers. Then, consider the lens of indigenous peoples of the Arctic. Examine tons of data and changes in ice, permafrost, weather patterns, biological change, and more as you conduct research with simple-to-use, web-based instructional tools, using authentic data sets and models to study our planet's past, present, and future climate. Interdisciplinary investigations address many Common Core State Standards in reading, writing, science, and technical subjects as well as mathematics in the context of climate science.

**CURR 666 Exploring Mars: A New Twist on Science (or Math) 3 Credits**

Use a wealth of data sets and technological tools to explore and understand features of Earth's neighbor, the Red Planet. Look for and study the physical and chemical evidence of water and ice; compare erosion patterns on Mars and Earth; and make inferences about the planet's history as you study both its geologic features, including volcanoes and craters, and the physics of the atmosphere. Teach Next Generation Science Standards topics in Earth, physical, and chemical science integrating mathematics, in the context of Mars using recent data from Curiosity Rover and other missions.

**CURR 667 Physical Science in Motion: Classroom Applications 3 Credits**

Physical science, when applied, makes tough-to-understand concepts easy and fun. Participants learn to solve problems relating to one-dimensional motion; become acquainted with and apply Newton's Laws of Motion and equilibrium of forces; learn about constant acceleration and gravitational acceleration; investigate concepts in aerodynamics; and learn about two-dimensional motion. Participants will use free, simple-to-use, software simulations from NASA Glenn Research Center, which help to present these concepts for you, and, then, your students, in the context of aeronautics, including airplane design, rocketry, sports, and more. A carefully developed resource page provides access to excellent resources and engaging activities for implementing course content in your classroom with important connections to Next Generation Science Standards and Common Core mathematics.

**CURR 668 Coding, Robotics, and 1:1 Devices 3 Credits**

Learn applications of Coding as a mathematics pedagogy, explore opportunities for Robotics, and learn cutting-edge implementation of One-to-One Devices (1:1) in K-12 classrooms. Participants learn about and explore best practices in the newest learning pedagogies and technologies. Whether you are already involved, or looking to integrate these cutting-edge tools and strategies for the classroom, you will begin to expand your reach for enhancing student learning. Scaffolded to allow success at all grade levels, Coding, Robotics, and 1:1 Devices offers resources for application into elementary, middle, and high school. Participants will interact with no-fee computer programming, robotics opportunities, and the latest uses of devices. All participants have the opportunity to work with innovative technologies and interact with talented educators, practitioners and special guests who are already making a difference in K-12 classrooms.

**CURR 669 Culturally Relevant Pedagogy in the STEM Classroom 3 Credits**

Classrooms comprise individual learners, each bringing their own culture and experiences to the learning environment. The value and strength of diversity has become increasingly described in educational literature. This course introduces teachers to the curriculum and pedagogical issues relevant to race, language, gender, and socio-economic differences. Participants apply content and pedagogy involving science and mathematics contexts for effective learning. STEM activities will integrate meaningful, engaging practices for teaching diverse learners. The course is differentiated for elementary and secondary school educators to provide relevant connections, to be directly applied, in each participant's classroom.

**CURR 670 Life and Marine Science: Tracking Live Marine Animals 3 Credits**

Follow marine animals (e.g., polar bears, sea turtles, sharks, and whales) in real-time, and apply life and Earth science topics to the ocean. Study topics such as ecosystems, biodiversity, cell structures, food webs, and conservation, as you make connections to ocean currents, seafloor features, density and more. Discover the importance of the ocean to humans, as well as our impacts, both positive and negative, on marine environments. The in-depth use of data lends itself to Next Generation Science Standards by integrating instructional technology with life, Earth and physical science.

**CURR 671 Life in Space: NASA ISS and Astrobiology 3 Credits**

The International Space Station (ISS) is an amazing undertaking comprising technology, engineering, science and math—the perfect context for exciting students for learning. NASA research leads to technological advances on Earth and in human space exploration. As NASA plans for manned missions to Mars, scientists explore our solar system and beyond for determining if and where life could exist. Extremophiles are fascinating for teaching Earth science in a context for astrobiology research. The course explores how space travel impacts the human body; growing food in space; engineering protection from radiation, and searching for habitable environments. With its application of subject matter, it offers excellent resources and interactions with NASA scientists, and data for educators to bring the exciting context of space travel to the classroom.

**CURR 672 Math Connections to STEM Education 3 Credits**

The course introduces a wealth of applied mathematics exercises and activities relevant to integrated STEM assets and science activities. Some are in the realm of topics seen in Earth and Space science and physics. Live presenters break down authentic examples and projects, and demonstrate to educators how problems incorporate Common Core State Standards-based mathematics with applications that meet Next Generation Science Standards performance expectations. Educators survey math and science examples and tools as the course promotes the use of applied mathematics in science, or science in mathematics, to meet content goals in the classroom.

**CURR 673 NASA Astronomy and Space Science 3 Credits**

Harness your students' enthusiasm for space and astronomy by using astronomical images to enrich your physical, Earth, and life science courses. Measure the speed of an asteroid, learn about erosion on Mars, and see the tracers of life that are visible from space. In this course, we explore the many ways in which real data from NASA's space science and astronomy missions can be used to teach math and science content in your classroom, meeting science and math standards in Next Generation Science Standards and Common Core State Standards. Through the use of cutting-edge technology tools, and with a NASA scientist visiting our class, you will not only learn more about the universe, you will learn how to bring the universe into your education context.

**CURR 674 NASA Physics for Real Beginners: Earth, Moon, and Space 3 Credits**

Gain an introduction to physics in this conceptual course that uses NASA's space initiatives as the context for content. Learn about gravitation between celestial bodies, how to get a satellite into orbit, what it takes to blast off into space, and more. This course will discuss these and related topics while exploring NASA content related to space and the Hubble Space Telescope and Kepler Missions. Bring cutting-edge examples to your classroom while addressing Next Generation Science Standards performance expectations.

**CURR 675 Reading and Writing in the Science Classroom 3 Credits**

Discuss and analyze the ways that literacy and science connect in the science classroom, and highlight how reading and writing can be used to increase students' understanding of science content. Focus on how to integrate important literacy skills from Common Core State Standards in your science and STEM classroom to address content standards from Next Generation Science Standards. Cutting-edge strategies and well-founded principles pave the way to success with non-fiction reading material. The manner in which information and scientific content is presented shapes student success, not just for reading, but student writing, organization, and presentation.

**CURR 676 The E in STEM: Meaningful Content for Engineering 3 Credits**

Learn how to use engineering to make your classroom come alive. Bridge and teach math and science concepts through exciting applications in the Engineering Design Process where you and your students design, test, and evaluate models and real-life applications. Activities are hands-on and emphasize the reciprocities between science, technology, engineering, and mathematics in formal design challenges. Educators enrich classroom curriculum with elements of design in science, mathematics, or technology activities, addressing important Next Generation Science Standards' engineering design practices.

**CURR 677 WDLC - Weather Data Learning Center 3 Credits**

Use weather data to teach and learn math. This course teaches content in a math curriculum that uses weather data. Weather Data Learning Center demonstrates increases in student performance in grade 4 mathematics. Collect, access, and interpret current real-time imagery, maps and data. Make connections from weather to learn Common Core-based mathematics using various STEM pedagogical strategies. Learn the basics of clouds, air masses, humidity, fronts, pressure, jet stream, and climatic patterns as you apply these ideas to math concepts such as measurement, fractions, number sense, data collection, and analysis.

**CURR 678 Action Research in the STEM Classroom 3 Credits**

A Capstone Course requirement "option", this course may be part of joint Master's Degree programs, or Endeavor's "5-course" certificate program earning Research Distinction and an award.

**CURR 679 Practicum in STEM Leadership 3 Credits**

Share your knowledge of STEM teaching and learning with colleagues in your building, district, or region.

**CURR 680 STEM Leadership Seminar 3 Credits**

The course contains STEM pedagogical content knowledge, incorporating authentic data and using technology as a tool for learning. The course provides a springboard for cultivating problem solving skills, inspiring student research projects, and integrating STEM methods and essential principles addressed in new standards.

**CURR 700 Educational Foundations for Inclusive Practices 3 Credits**

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

**CURR 702 Early Literacy Development for Diverse Learners 3 Credits**

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

**Prerequisite(s):** CURR 700.

**CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits**

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

**Prerequisite:** CURR 700.

**CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits**

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

**CURR 705 Inclusive Methods for Teaching Social Studies 3 Credits**

This course addresses the practical and theoretical aspects of teaching social studies to diverse adolescents in secondary schools. Using the NJ Student Learning Standards in Social Studies, candidates will prepare and design curriculum and assessment for students in various learning environments and with diverse learning needs. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying social studies curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

**CURR 706 Inclusive Methods for Teaching Science 3 Credits**

Classroom interaction analysis systems are used in the study of the instructional processes that support inquiry-based science learning. Candidates develop their own repertoires of teaching strategies, classroom management strategies, and awareness of career requirements in STEM fields. Emphases are on the investigation and interpretation of recent curriculum developments in NGSS and NJ Student Learning Standards in Science as well as the use of lab-based processes in science learning. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying science curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

**CURR 707 Inclusive Methods for Teaching Mathematics 3 Credits**

This course critically analyzes the aims of teaching mathematics in secondary schools. Research pertaining to mathematics teaching and learning is analyzed. Demonstration lessons including reflective teaching and individual and group processing are created and carried out to clarify teaching, mathematics curriculum planning using NJ Student Learning Standards in Mathematics, the organization of materials and subject matter, assessment processes classroom management strategies, and awareness of career requirements in STEM fields. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying mathematics curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

**CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits**

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

**CURR 711 Pedagogy and Methodology in Dance 3 Credits**

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. The existing methods course in Dance for beginning teachers is cross-listed with DAN 450.

**CURR 712 Inclusive Methods for Teaching Music 3 Credits**

This course provides experience with various methods of teaching and learning music K-12. Course readings and field observations focus on inclusive teaching practices in music and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Music/Visual and Performing Arts.

**Prerequisite(s):** CURR 700, CURR 703, CURR 720.

**CURR 715 Inclusive Elementary Science, Arts, & Social Studies Teaching 3 Credits**

This course provides aspiring elementary school teachers with a variety of developmentally appropriate options for designing, implementing, and evaluating curriculum and instruction in science, social studies, and the arts. Using NJ Student Learning Standards, emphasis is placed on inclusive practices and differentiation of instruction (e.g., modifying curriculum planning, learning environments, and instructional materials, content, processes, and products), curriculum integration, thematic unit and lesson planning, various teaching strategies, hands-on learning experiences, inquiry learning, career readiness skills, higher-order thinking, reflective practice, and various assessment strategies. Other facets of teaching also are addressed or reviewed in the course. These include the characteristics and needs of students with disabilities motivation, classroom management, and becoming a team member of a school faculty. Candidates also refine their pedagogical knowledge and skills by participating in the modification of instruction to meet the needs of diverse learners in nearby school settings.

**CURR 720 Inclusive Curriculum Design & Instruction in Secondary Schools 3 Credits**

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students in middle and high schools—secondary classrooms. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse adolescent students actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

**Prerequisite(s):** CURR 703.

**CURR 770 Clinical Experience and Seminar in Teaching 9 Credits**

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

**CURR 771 Supervised Clinical Experience in Teaching 9 Credits**

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

**Dance and Movement Therapy (CNDT)****CNDT 584 Counseling and Dance/Movement Therapy Practicum I 3 Credits**

Students develop clinical observation skills by being active participant observers in clinical field settings. Supervision class will focus on understanding the professional, legal, and ethical responsibilities of being a dance/movement therapist in clinical settings from a multicultural perspective. Issues pertaining to professional identity development will be addressed.

**CNDT 585 Counseling and Dance/Movement Therapy Practicum II 3 Credits**

A supervised field experience in counseling and dance/movement therapy techniques. In this second semester of practicum, students will continue to advance their clinical skills by co-leading dance/movement therapy sessions with field supervision. The goal is for students to facilitate entire sessions by the end of the semester. The course will include seminar discussions, observations and analysis of the therapeutic process of dance/movement therapy sessions and individual supervision with the instructor. A total of 100 field hours is required with a minimum of 40 direct contact hours with clients. The approval and cooperation of the fieldwork agency or school field supervisor must be obtained the semester prior to the actual placement.

**Prerequisite(s):** CNDT 584.

**CNDT 590 Counseling and Dance/Movement Therapy Internship I 3 Credits**

This course is one of two internship courses required in the student's final year. It fulfills 350 of the internship hours required by the American Dance Therapy Association and by CACREP. Students will be at a clinical site approved by faculty, with a supervisor who meets all CACREP standards and is a board certified Dance/Movement Therapist. Supervision class will support students in the clinical setting and in effectively utilizing counseling and dance/movement therapy knowledge and skills, including clinical appraisal, treatment planning, and documentation for dance/movement therapy. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

**Prerequisite(s):** All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

**CNDT 591 Counseling & DMT Internship II 3 Credits**

The second semester of the internship that fulfills the remaining internship hours required by the American Dance Therapy Association and CACREP. Students will be at a clinical site approved by faculty, and will engage in all activities that a regularly employed staff member would be expected to perform. A regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring. Students will be under the field supervision of a supervisor who meets all CACREP requirements and is a Board Certified Dance/Movement Therapist. Supervision class will provide opportunities for students to analyze their practice, reflect on their progress as clinicians, and develop skills to internally self-evaluate their effectiveness as counselors and dance/movement therapists. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement. Prerequisite(s): CNDT 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the instructor.

**CNDT 600 Body Mind Integration through Movement I 0 Credits**

This is a movement laboratory class to explore how dance and movement reflect and affect physical, cognitive, mental, emotional, and spiritual states. Students learn to attune to their bodies in movement and develop awareness of the bidirectional interactions between body and mind.

**CNDT 610 Dance/Movement Therapy Theory and Practice I 3 Credits**

This course covers the foundational principles, theories, and techniques of dance/movement therapy and will examine the social and cultural foundations of dance as art and medium for growth, change, and healing. Works of dance/movement therapy pioneers and the evolution of dance/movement therapy practices will be explored didactically and experientially.

**CNDT 612 Movement Observation, Analysis, and Assessment 3 Credits**

This course is designed to provide students with the language and skills to observe, describe, analyze, and document human movement patterns and behaviors using Laban Movement Analysis. The didactic and experiential format of this class will allow students to embody movements and make connections to clinical practice with various client populations. Students will learn to translate movement based terminology and dance/movement therapy goals into clinical language used in treatment plans and progress notes.

**CNDT 620 Clinical Applications of Dance/Movement Therapy 3 Credits**

Group and individual dance/movement therapy practices in various clinical settings are addressed: psychiatric hospitals, addiction recovery programs, therapeutic schools for children with emotional and behavioral problems, developmental disabilities, and special needs; hospices; and hospitals. Students develop their own working theoretical model of dance/movement therapy to guide their work as emerging dance/movement therapists.

**CNDT 700 Body Mind Integration through Movement II 0 Credits**

The second semester of the movement laboratory class focuses on the use of mindfulness practices and Authentic Movement methods for further develop body-mind awareness, to experience and observe movements simultaneously as internal and external experience, and to decipher the nature of knowledge and meaning inherent in dance and movement.

**Prerequisite(s):** CNDT 600.

**CNDT 710 Dance/Movement Therapy Theory and Practice II 3 Credits**

In this didactic and experiential course, select theories from psychology, counseling, psychotherapy, and neuroscience are studied in order to identify the healing and transformative factors of the creative arts therapies. Some of the topics covered in this course are: psychodynamics and object relations theories; intersubjectivity; symbolism and metaphor; psychology of creativity; and neuroscience in dance/movement therapy. Prerequisite(s): CNDT 610.

## Early Childhood Ed-GR (ECED)

**ECED 507 Emergent Literacy 3 Credits**

Examines perspectives on literacy acquisition including the social-constructivist perspective. Examines the processes of comprehension and composition through the language systems for written language: the grapho-phonetic, syntactic, semantic, and pragmatic. Explores the components of these processes including concepts of print, knowledge of the alphabet, phonological awareness, language play, literary genres, spelling development, vocabulary development, and word recognition.

**ECED 532 Families, Community, and Diversity in Early Childhood Education 3 Credits**

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

**Prerequisite(s):** EDU 106 and EDU 206.

**ECED 550 Development Methods and Assessment in Early Childhood Education 3 Credits**

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.

**Prerequisite(s):** EDU 106 and EDU 206.

## Education Administration (EDAD)

**EDAD 501 Educational Leadership and Organizational Theory 3 Credits**

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits**

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDAD 507 Education and the Law 3 Credits**

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDAD 508 Leadership in School Business Administration 3 Credits**

The educational leadership required to establish an effective relationship between school business services and the success of the total educational program is the primary focus. The professional and legal responsibilities of the school business administrator to manage the organization and resources, identifying and solving problems and issues related to the effective and efficient operation of school district, will be reviewed. Specific legal and code requirements and best-practice organizational and management procedures critical to the administration of a public school district will be examined. Topics studied include: organization and management of the district business office; development of strategic planning models; traditional and program oriented budgets; and, application of technology to instruction and management of school and district fiscal operations. Importance of "generally accepted accounting procedures" in district operations is emphasized. Other topics include: personnel, enrollment, and resource forecasting; debt service and insurance expenses; food services, transportation, and facility operations; supply management and facility maintenance; and temporary financial investments. Students demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**EDAD 509 School Financial Management and Accounting 3 Credits**

This course examines the historical precedents and current procedures that regulate and control the funding and financial operations of school districts. The leadership role of the school business administrator, ensuring the operation of the district in compliance with policy, procedure, and code, is a central theme. Judicial decisions, federal and state legislation, the planned curriculum, and generally accepted business practices that impact on the operation of the total educational program in school districts will be reviewed. Some specific topics of study will include: the leadership role of the school business administrator in monitoring, assessing and reporting on fiscal operations; determining taxation rates; and, developing non-public sources of revenue. The impact of state imposed "cap" regulations and negotiated bargaining unit benefit packages and agreements will be assessed with regard to possible budget growth and development. Enrollment, revenue, and cash flow projections; the fiscal controls used to approve, manage and track expenditures; regulations and restrictions on the use of school funds; school district surplus and debt regulations; current and emerging fiscal concerns in school budget planning and development; and, the role of the school fiscal structure in relation to the local, state, and federal governments are other important topics to be developed. Advanced study in double entry accounting procedures will be a major component in the course. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits**

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** CURR 531, CURR 532 or CURR 538, and EDAD 505.

**EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits**

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 505.

**EDAD 512 School Facility Planning and Development 3 Credits**

This course will examine the leadership role of the school business administrator in facility planning, renovation, and expansion. The essential linkage between guiding principles, existing and proposed facilities, and the implementation of the total educational program is considered from both theoretical constructs and practical applications. Major topics of study will include: the development and revision of long-range facility plans; the role of the state Economic Development Authority; the critical review of state proposed "model" school buildings; and, the process of drafting educational specifications. In addition, required site plan reviews by state and local officials; the referendum approval process; and, the integral role of professional services (public opinion consultants, attorneys, demographers, architects, financial consultants, public information agencies, etc.) will be discussed. Students will evaluate geographic, socio-political, financial, and ecological considerations in proposed school construction. Planning for new and emerging technology, addressing health, safety, and security considerations, ensuring barrier-free access, incorporating energy conservation measures, and the utilization of school buildings by the greater community will be overarching themes developed. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**EDAD 513 Human Resources in Education 3 Credits**

This course will develop the practical and theoretical knowledge of the human resources function in the educational setting. Emphasis will be placed on understanding and utilizing human resources functions and processes to identify needs and address issues in both instructional and non-instructional positions. The student will gain an understanding of the inter-relationship that exists between organizational climate, strategic planning, and the established policies and regulations of the human resources function. Students will develop a comprehensive understanding of the importance of recruitment, selection, mentoring and evaluation of faculty and support staff. Emphasis will be to continuously identify issues that are legal requirements in human resources administration or required by federal or state regulations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite(s):** EDAD 505 and EDAD 511.

**EDAD 514 School Finance and Fiscal Management 3 Credits**

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 501.

**EDAD 515 Mentoring Beginning Teachers 3 Credits**

This field-based practicum requires that each student work with a novice teacher (student teacher or beginning teacher) while enrolled in the course. Through reading, observation, biography and interview, students will explore how novice teachers acquire teaching knowledge and skill. By researching their own practice as mentors, reading relevant literature and participating in critical dialogue in seminars, students will explore and evaluate methods of facilitating and supporting novice teachers' professional growth.

**EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits**

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**Prerequisite(s):** EDAD 501 and EDAD 514.

**EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits**

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

**EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits**

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

**Prerequisite(s):** EDAD 591.

**EDAD 600 Independent Study and Research in Educational Administration 1-3 Credits**

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of educational administration.

**Education Psychology (EDPS)****EDPS 500 Cognitive Assessment 3 Credits**

This course addresses contemporary intellectual theories and the process and procedure of cognitive assessment. It presents the relevant issues related to intelligence testing and interpretation. Through a variety of pedagogical approaches, students acquire needed skills in administering, scoring, and interpreting results from contemporary tests of cognitive ability.

**Prerequisite(s):** EDPS 513.

**EDPS 502 Psychological Development of the Child and Adolescent 3 Credits**

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

**EDPS 503 Human Growth and Development 3 Credits**

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

**EDPS 506 Testing and Measurement Techniques in Reading/Literacy Education 3 Credits**

Studies basic characteristics of test scores, including: reliability and validity, selection, administration, and scoring of tests; measurement of achievement, intelligence, aptitude, and interests; and the writing and editing of items of teacher-made tests, school marking procedures, interpreting of test scores. Covers basic statistical tools needed by reading specialists.

**EDPS 507 Advanced Educational Psychology 3 Credits**

A critical examination of contemporary learning theory as applied to educational thought and practice. The psychological, physiological, and sociological foundations of education and training; personality problems encountered by classroom teachers.

**EDPS 508 Cognitive Processes and Learning 3 Credits**

This course deals with what is known relative to the principles of cognitive psychology and their application to learning. The flow of information is followed from where it begins through the processes of integration and storage. Cognitive principles will be studied relative to concept formation, reasoning, and problem solving. Their relationship to specific educational tasks such as the teaching of reading, writing, mathematics, and other content will be explored and confirmed through empirical evidence.

**EDPS 509 Assessment and Intervention III: Psychoeducational Assessment and Report Writing 3 Credits**

This course furnishes students with the clinical, practical, and theoretical sophistication to understand the assessment and report writing process for academic, behavioral, adaptive, and social-emotional concerns. Students are expected to master a wide range of concepts and skills to successfully complete this course including integrating multiple pieces of assessment data for case conceptualization, classification, and treatment recommendation. Students are required to synthesize data from multiple methods of assessment and sources to produce written psychoeducational reports that inform intervention practice.

**Prerequisite(s):** EDPS 513.

**EDPS 510 Assessment & Intervention IV: Behavioral and Social-Emotional Needs 3 Credits**

The assessment of personality is reviewed from the context of a comprehensive, ecological model of social-emotional, behavioral, and academic development. Assessment is studied from an empirically based, problem-solving model that links directly to intervention. Students learn to select appropriate assessment tools to match individual referral questions so as to evaluate the behavioral and social/emotional problems of children and adolescents.

**Prerequisite(s):** EDPS 513.

**EDPS 512 Psychology of Exceptionality 3 Credits**

This course provides opportunities for the study of school psychological issues associated with specific educational exceptionalities, including learning disabilities, mental retardation, behavior disorders, physical handicaps, and giftedness. The characteristics, identification procedures, and current intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**EDPS 513 Professional Practice of School Psychology: Issues and Historical, Ethical, and Legal Considerations 3 Credits**

This course is designed to provide an introduction to school psychology through an analysis of the contemporary roles and functions of school psychologists. Professional issues are explored in the context of the history and evolution of school psychology as a specialty area of professional psychology. In addition, the study of professional ethics, best practices, and standards for delivery of school psychological services that have been adopted by national organizations representing the profession of school psychology will be reviewed.

**EDPS 514 Assessment and Intervention I: Standardized Measures of Academics And Behavior 3 Credits**

This course will increase students' understanding of the standardized assessment process, measurement issues, psychometric properties of assessment instruments, and the role of these instruments in informing academic, behavioral, and social-emotional interventions.

**EDPS 515 Assessment and Intervention II: Curriculum-Based Measures 3 Credits**

This course will build upon students' knowledge and skills in individual-referenced assessment based upon the standards and general curriculum. Students will be able to design, administer, score, and interpret curriculum-based assessment and link these data to intervention.

**EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits**

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

**EDPS 521 Statistics and Quantitative Analysis 3 Credits**

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

**Prerequisite(s):** EDPS 520, EDUC 500.

**EDPS 535 Biological Basis of Behavior 3 Credits**

This course will emphasize a biological approach to the study of psychology and behavior. Topics studied will include the following: 1) the genetics of human psychological differences; 2) the anatomy of the nervous system; 3) psychopharmacology; 4) neuropsychological diseases (e.g., epilepsy, autism, multiple sclerosis); 5) memory and amnesia; 6) sleeping, dreaming, and circadian rhythms; and 7) the biopsychology of mental health difficulties.

**EDPS 538 Developmental Child Psychopathology 3 Credits**

The course will furnish students with a comprehensive account of the characteristics, correlates, causes, contexts, and outcomes of psychopathology in children. It serves to augment students' understanding of specific conditions in childhood and adolescence including autism spectrum disorders, attention-deficit/hyperactivity disorder, mental retardation, childhood anxiety/depression, enuresis/encopresis, learning disabilities, communication disorders including selective mutism, and emotional/behavioral disorders. The diagnostic nosologies of the DSM and IDEA will be referenced and thoroughly discussed. A special emphasis upon a developmental-systems framework for understanding child psychopathology will be presented wherein the importance of context and the influence of multiple, interacting events and processes in shaping adaptive and maladaptive development will be investigated.

**EDPS 570 Advanced Interventions for Children, Adolescents and Families 3 Credits**

This course provides opportunity to expand each student's knowledge and skills in the development of effective interventions to meet academic, behavioral, and social-emotional needs. Currently accepted practices based upon the individual's referral problem will be explored. Intervention will be approached from a problem-solving model and based on current assessment data. Case studies will be used to link theory and application.

**Prerequisite(s):** EDPS 513.

**EDPS 581 Practicum in Psychoeducational Assessment and Report Writing 1 Credits**

This practicum experience provides supervised practice in administering, scoring, and interpreting an array of individually administered assessment instruments for the purpose of producing a written psychological report that is linked to intervention.

**Prerequisite(s):** EDPS 513.

**EDPS 582 Practicum in the Assessment of Behavioral and Social-Emotional Needs 1 Credits**

This practicum experience provides supervised practice using the techniques and methods taught in EDPS 510 Assessment of Behavioral and Social-Emotional Needs. Students will be expected to complete a Functional Behavioral Assessment including recommendations for a behavior intervention plan and a means to monitor and evaluate the target student's progress.

**Prerequisite(s):** EDPS 513.

**EDPS 583 Practicum in Consultation in School and Agency Settings 1 Credits**

This practicum experience provides supervised practice in the study, implementation, and evaluation of a problem-solving model to provide consultation across school and agency settings. Students will be expected to successfully initiate and lead the 4-step consultation process resulting in a databased intervention. The consultation will be documented in a formal report.

**Prerequisite(s):** EDPS 513.

**EDPS 584 Practicum in Curriculum-Based Measures 1 Credits**

This practicum provides supervised experience in identifying academic needs of students utilizing curriculum-based assessment (CBA) methods within a problem-solving framework. Students will practice the selection and administration of appropriate CBA tools to match referral question(s) at the individual, class-wide and school-wide levels. Students will also practice assessment of the academic environment by conducting structured direct observation of the classroom. Students will summarize and analyze assessment data, develop goals and objectives and make recommendations for intervention.

**Prerequisite(s):** EDPS 513.

**EDPS 590 Internship in School Psychology I 3 Credits**

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

**Prerequisite(s):** EDPS 581, EDPS 582, and EDPS 583.

**EDPS 591 Internship in School Psych II 3 Credits**

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

**Prerequisite(s):** EDPS 590.

**EDPS 600 Independent Research and Study in School Psychology 1-3 Credits**

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of school psychology.

**Education Sociology (EDSO)****EDSO 501 Found of Counseling in Ed Settings: Referral Sources for Students and Students With Special Needs 3 Credits**

The course provides overview of the foundations of counseling in educational settings, including the historical roots; current and future trends, roles, and functions in multicultural schools and higher education settings; comprehensive developmental counseling programs; ethical school and higher education counseling practices; and individual and group counseling and consultation strategies, and evidence-based interventions and evaluations. In addition, the course will address community social services and educational-based programs (including special education and disability laws and accommodations) available to special needs students, other individuals and groups experiencing learning disabilities, and other temporary or chronic maladjustment. Reviews principles and methods utilized by social agencies, schools, and higher education settings.

**EDSO 510 Sociological and Cultural Foundations of Education 3 Credits**

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

**Education-GR (EDUC)****EDUC 500 Introduction To Research 3 Credits**

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

**EDUC 501 Methods and Instruments of Research 3 Credits**

Acquaints students with insights, information, methods, procedures, and techniques for planning, conducting, and evaluating research. Includes the nature and types of research, methods, and procedures used in educational and psychological research, and the use of research data and other appropriate tools. The completion of a research proposal is required. Students who wish to complete the research project may do so on an individual basis in consultation with their respective advisors.

**Prerequisite(s):** EDPS 506 and READ 501.

**EDUC 502 History of Education 3 Credits**

The necessary knowledge of modern education's heritage so that students understand and appreciate current educational practices in proper perspective. Concentration on education's evolution in the U.S. from colonial times to the present, with a major emphasis on a study of topical issues in education treated within the framework of their historical background. A term paper and intermittent reports are required.

**EDUC 503 Philosophy of Education 3 Credits**

Considers the nature, aims, and objectives of education in a democratic society. Critical evaluations of various educational theorists and the philosophies of pragmatism, idealism, realism, existentialism, etc., are made. Students are encouraged to develop their own philosophy of education by preparing intermittent reports and term papers.

**EDUC 511 Educational Foundations: Philosophical/Historical Perspectives 3 Credits**

Major thoughts and significant actions in American educational history from colonial times to the present. Synthesis and integration of philosophical and historical contributions to the evolution of America's educational heritage for the purpose of understanding and appreciating current educational practices in proper perspective. Major emphasis on topical issues within the framework of their philosophical/historical backgrounds. Critical evaluations made of educational practices based on pragmatism, idealism, realism, existentialism. Students are encouraged to develop their own philosophy of education by preparing intermittent reports and term papers.

**EDUC 515 Issues in American Schools and Society 3 Credits**

This course is designed to examine contemporary educational issues impacting on schools and to re-examine the purposes of schooling in a democratic society. Students will explore current and emerging policy issues and the demands for reform in schools and districts. Emphasis will be placed on identifying and developing politically feasible responses to policy issues and procedural problems facing educational leaders today. The role of the leader in promoting the development of a collaborative institutional culture and climate and the identification of best-practice strategies to involve community stakeholders in the development of policies and programs will be emphasized. Effective communication models for use within the school, district and greater community and the use of different media and technology formats will be examined and evaluated. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

**EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits**

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

**EDUC 521 Teaching a Second Language 3 Credits**

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. \*NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

**EDUC 525 The Higher Education Organization 3 Credits**

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

**EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits**

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

**EDUC 531 Introduction to Collective Bargaining and Labor Relations 3 Credits**

This course assumes that students do not have prior knowledge of legal terminology or concepts. It will provide students with a foundation in the fundamentals of collective bargaining and union-management relationships within the unique environment of the college campus. American labor law is the prevailing system of laws that govern universities and colleges, however, students will explore how these general "rules of the game" apply to higher education institutions. The course will challenge participants to consider how general rules and principles of collective bargaining and labor relations shape, and are shaped by fundamental aspects of the higher-education "workplace" including academic freedom, faculty workloads, tenure and shared governance. These unique factors have the potential to influence expectations concerning productivity, termination and the traditionally sharp distinction between labor and management found in other industries.

**EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits**

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

**EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits**

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

**EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits**

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. A focus on determining what should be assessed in academic and administrative units and strategies for initiating performance assessment programs is reviewed.

**EDUC 542 Assessment in Higher Education 3 Credits**

This course examines institutional effectiveness matters focusing on assessment processes in higher education. It explores topics such as the evaluation of academic programs, assessment of student learning outcomes, and involvement in accreditation and accountability demands in higher education. This seminar-style course will cover key organizational and educational theories, and students are introduced to the uses and outcomes of administrative practice in relation to assessment planning and implementation. The course covers the pragmatic planning skills and decision-support tools relevant to accreditation processes. Understanding the roles of governance, institutional research, policy analysis, and decision-making is critical to understanding the changing organizational planning function of a college or university. Just as businesses are expected to adhere to compliance and ethics standards, this course provides an in-depth look at how universities' adherence to standards pertaining to academic success can and will lead to an assurance that accredited universities are achieving their institutional goals, meeting the public's' expectations, and realizing their greater societal mission.

**EDUC 543 Communicating Educational Data 3 Credits**

Through this course, students will develop skills in statistical communication, incorporating data into delivery methods such as writing, public speaking, teaching, informal conversation and collaboration, programming, and graphic visualizations. Students will understand the importance of creating a data-informed culture and how it contributes to an organization's success. They will also learn methods and strategies of how to communicate to a non-technical audience.

**EDUC 550 Selected Topics in Higher Education 3 Credits**

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

**EDUC 551 Selected Topics in Higher Education 3 Credits**

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

**EDUC 552 Selected Topics in Higher Education 3 Credits**

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

**EDUC 553 Selected Topics in Higher Education 3 Credits**

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

**EDUC 554 Selected Topics in Higher Education 3 Credits**

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

**EDUC 555 Selected Topics in Higher Education 3 Credits**

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.)

**EDUC 556 Selected Topics in Higher Education 3 Credits**

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.)

**EDUC 557 Selected Topics in Higher Education 3 Credits**

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.)

**EDUC 558 Selected Topics in Higher Education 3 Credits**

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.)

**EDUC 559 Selected Topics in Higher Education 3 Credits**

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.)

**EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits**

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

## Educational Leadership (EDLD)

**EDLD 800 Strategic Management, Organizational and Moral Leadership Behavior in a Culture of Learning 3 Credits**

This course will challenge students to embrace a system view of leadership and organizational change at the organizational level. Students will compare, contrast and critique theories and models of organizational learning, knowledge creation, and organizational capacity building and apply them to their own organizational settings. The course will focus on three leadership standards: instructional leadership, operational and managerial leadership, and professional culture. While the course will focus on conceptual frameworks and theory, it is a practice-based course. The course will enhance student ability to think systematically and develop comprehensive understanding of core competencies required to lead, initiate and sustain change in organizations. It investigates process and content issues of team building, interpersonal and group relations, and effective problem solving and decision making skills in collaborative environments. The course emphasizes the moral, ethical and social responsibilities of organizational leaders, as well as the application of principles to organizational leadership behavior and decision-making. Students will also investigate current research trends regarding ethical issues in education and other organizational contexts.

**Prerequisite(s):** Master's Degree.

**EDLD 801 Action Research: Principles and Methods 3 Credits**

This course provides an introduction to action research, with emphasis on its application in educational settings. The course covers definitions and purposes of action research. Students will explore theoretical, methodological, and ethical issues pertinent to action research. During the course, students will engage in an action research project in an educational setting.

**Prerequisite(s):** Master's Degree.

**EDLD 802 Educational Change, Systemic Reform, Exercising the Politics of Change 3 Credits**

This course will provide students with the skills necessary to achieve educational reform and improvement while navigating the political environment within educational institutions. Through this course, students will analyze various theories and how these ideas apply to education, organizations, change, and leadership.

**Prerequisite(s):** Master's Degree.

**EDLD 803 Instructional Leadership and Educational Reform 3 Credits**

Through this course, students will examine contemporary educational practices and their relationship to leadership theories, models, and strategies. Participants will investigate research based instructional practices and develop the skills necessary to identify issues within organizations in suburban and urban settings. The course will provide students with a deep knowledge of the educational challenges faced by educational leaders in today's society. The focus will be on learning a successful organization through the implementation of research based strategies.

**Prerequisite(s):** Master's Degree.

**EDLD 804 Community Building and Sustaining Community Partnerships 3 Credits**

Drawing on philosophies/theories, processes, and practices that build and sustain effective school-community partnerships, this course addresses the identification and utilization of community resources and the development of effective intra- and inter-organizational strategies, community linkages, and collaborative efforts necessary to provide for the holistic needs of students and families. Special attention is focused on the role of school leaders in planning and implementing community-wide and building level communications and involvement networks, through the development of practical action learning sets and tools. Building Commitment: How do leaders build and use public awareness and commitment to support their schools?

**Prerequisite(s):** Master's Degree.

**EDLD 805 Valuing Diversity/Equity: Developing and Fostering a Community of Learners 3 Credits**

The focus of the course is academic excellence with equity. The value orientation of the course is toward high-quality developmental outcomes for youth of all racial, ethnic, and social class backgrounds. With an emphasis on students of color and youth from less-advantaged families, the course explores several policy and strategic responses to achievement disparity: identify and work to remove key structural barriers to educational equity; excellence with equity goals; design more effective policies and practices to improve the quality of teaching; support families with ideas and practices for parenting children more effectively; engage youth to reshape their culture of achievement to align with their most positive values. The course explores theories, evidence, designs, methods, and mechanisms associated raising achievement and closing gaps.

**Prerequisite(s):** Master's Degree.

**EDLD 806 Research Proposal Development 3 Credits**

This course builds on the action research course to more clearly define the rationale and procedures of educational and social science research. The course is designed for our first-year doctoral students. Topics will include the nature and purpose of research, planning and conducting research, critiquing and evaluation research, sampling, survey and experimental design, evaluation research, naturalistic observation and inquiry, measurement and methods of data collection, ethics, and the use of computers in data analysis. Methods are considered for collecting both quantitative and qualitative data. Students will build on prior project ideas, concepts, and research practice to more fully develop into their Dissertation of Practice topic. This course has two objectives: to increase participants' knowledge of methods for making causal inferences in quantitative research, and to provide participants with a forum for presenting and receiving feedback on their research topic for the Dissertation of Practice.

**Prerequisite:** Master's Degree.

**EDLD 807 Law and Policy 3 Credits**

This course explores legal, ethical and politics issues governing PreK-12 education in America and the legal responsibilities and powers of state and local governing bodies and individuals that arise in elementary and secondary schools. Emphasis is given to federal and state statutes and case law affecting due process, liability, equal protection, and the rights of teachers and students in order to better understand the risks in education management and possible strategies to reduce those risks. The course will explore evolving legal standards on a variety of issues. The course will draw on real cases and legal/policy dilemmas that practitioners face, and focus on preventive law - providing current and future school learners with knowledge and skills they will need to make sound decisions, advance important educational objectives, and minimize legal problems.

**Prerequisite:** Master's Degree.

**EDLD 808 Generating, Using, and Assessing Data Accountability and Student Assessment 3 Credits**

This course will develop the skills necessary for educational leaders to identify and define problems, implement data collection methods, and analyze, interpret, and report data across multiple levels from the individual student to the larger system. Students will gain the knowledge and skills to use data in decision making within a problem solving framework that enables evaluation of instructional programs and practices. Within this course, students will engage in activities designed to enhance skills in data-based decision making, including: large and small group discussion; review of the extant literature base; review and use of different technologies and statistical methods for data collection and analyses; case studies and simulated data analyses; and application of skills in real world settings. Attainment of these skills will prepare the student for the dissertation process to serve as an instructional leader in the field. The course references and aligns with state adopted core curriculum content standards and professional development standards, the Standards for Schools Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

**Prerequisite:** Master's Degree.

**EDLD 809 Finance, Fundraising and Fiscal Management 3 Credits**

Financial and managerial leadership of a school building or district is a primary factor in the success or failure of school instructional programs. This course provides an opportunity for public and private school practicing and prospective administrators to gain an understanding of their role in these critical areas. Providing the resources to fund academics/instruction/athletics, facilities and capital projects is a focus of this course. A comprehensive understanding of the financial implications of systemic reform, centralized goal setting, accountability standards, and decentralized forms of site-based management, school choice, and charter schools will be a focus of study. This course will also provide a comprehensive overview of fund raising. Students are provided with an ethical foundation and are introduced to basic terminology and concepts in the field. Various fund raising vehicles are surveyed and participants learn to apply fund raising strategies that are appropriate to their organizational setting.

**Prerequisite:** Master's Degree.

**EDLD 810 Curriculum Leadership: Transforming Teachers/Developing Teacher Talent 3 Credits**

This course will focus on the complex nature of teaching and learning and provide participants with the skills necessary to guide instructional practice. Adult learning theory will be examined as will curriculum theories, instructional practices, professional development, and human capital.

**Prerequisite:** Master's Degree.

**EDLD 811 Innovation and the Use of Educational Technology 3 Credits**

This course addresses the intersection of organizational change and educational technology. Students will develop a philosophy of educational technology and explore related issues in policy, diversity, ethics, and evaluation. The course also covers research and theory on organizational change and processes for developing a culture of innovation. Students will apply theories of organizational change to the implementation and use of technology in educational contexts.

**Prerequisite:** Master's Degree.

**EDLD 812 Leading Programs for Diverse Learners and At Risk Students 3 Credits**

This course examines some of the best practices for supporting diverse learners and at-risk students and some of the reasons behind the intrinsic and bureaucratic/policy barriers that may hinder their success. Schools are faced with an increasing number of diverse learners and at-risk students who require additional academic, social and/or medical supports for them to achieve success. This course will examine the root causes that may hinder student success and some of the programs and approaches that have proved successful in meeting their needs.

**Prerequisite:** Master's Degree.

**EDLD 813 Dissertation of Practice I 3 Credits**

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research.

**Prerequisite:** Master's Degree.

**EDLD 814 Dissertation of Practice II 3 Credits**

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice I.

**Prerequisite(s):** Master's Degree.

**EDLD 815 Dissertation of Practice III 3 Credits**

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice II.

**Prerequisite(s):** Master's Degree.

**EDLD 816 Dissertation of Practice IV 3 Credits**

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice III.

**Prerequisite(s):** Master Degree.

## Executive MBA (EMBA)

**EMBA 9001 Top Management Perspective 3 Credits**

This team-taught course will serve as the initial course of the EMBA program. The course will take place over three weekends. Top managers will also attend and provide their perspectives to students and faculty in attendance. This course will explore the "art" of case study analysis. Students will focus on identifying, analyzing, and resolving issues from a top management perspective. This course will consider various issues confronted by top managers and heavily emphasizes contemporary cases that illustrate a wide range of management issues. By having the course team-taught by a faculty member and an Executive-in-Residence, both the academic and applied aspects of business will be represented in the classroom. This sets the tone for the approach and philosophy of the entire program - a blending of business theory with real world application. Another of the course's purposes is to allow the students to get to know one another, become acquainted with the faculty who will be teaching in the program, and receive an overview of the material that will be covered.

**EMBA 9220 Financial Accounting 3 Credits**

This course provides a managerially-oriented focus on the aspects of financial accounting most relevant to business decision makers. Students will develop the ability to read, analyze, and interpret financial information for decisions regarding operating, investing, and financing activities as well as serving as a foundation for more advanced analysis in areas such as credit and equity decisions.

**EMBA 9230 Economics Principles 1.5 Credits**

This course focuses on how markets work in different settings (structures). The course begins by establishing basic relationships between consumer behavior and demand, and production costs and supply. The remainder of the course focuses on profit-maximizing strategies in different market structures (perfect competition, monopoly, and imperfect competition). Also, this course provides an introduction to the basic economic concepts to prepare students for EMBA 9231, Economic Analysis and Decision Making.

**EMBA 9231 Economic Analysis and Decision Making 3 Credits**

This course focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

**EMBA 9240 Corporate Finance 3 Credits**

This course introduces modern corporate finance principles that today's managers should know. Its purpose is to give students a thorough introduction to the theory and practice of financial management. The course reviews the principles executives need to acquire to manage for value creation. Topics covered include valuation of securities, capital budgeting, cost of capital, capital structure, and value-creating decisions in a global environment.

**EMBA 9250 Statistical Analysis for Bus 3 Credits**

This course introduces students to basic concepts and methodologies in probability theory and statistics. Emphasis is on real-world application of reasoning techniques used for interpreting data for decision criteria of managerial decision making. Topics include probability, variables, estimation, hypothesis, regression, and sampling. Concepts of learning are facilitated through real-world practices.

**EMBA 9251 Service/Product Management 3 Credits**

This course focuses on the issues, concepts, skills, and techniques related to the management of operations of organizations. Students are introduced to various techniques of operations research and management science as they are applied to decision making in the management of operations. Topics include productivity, supply chain management, manufacturing strategies, and competitiveness.

**EMBA 9260 Strategic Marketing 3 Credits**

The focus of this course is to provide students with the analytical skills required to understand and assess complex marketing situations in order to develop and implement appropriate marketing strategies. Identifying individual case factors and understanding the relationship between developments of strategies is emphasized. Students will apply the material using real-world cases faced by organizations.

**EMBA 9270 Management/Team Skills 3 Credits**

This course is based on the assumption that management and team skills can be learned. To learn skills requires active involvement in the classroom exercises and many learning opportunities come from group activities. To develop these skills, students will need to set personal goals and experiment with new behavior. This course will involve a variety of in-class exercises including self-assessments, interpersonal activities, and a team project.

**EMBA 9271 Leadership 3 Credits**

This course has been designed to provide students with an understanding of leadership from both a scholarly and a practitioner perspective. The purpose is to help students understand what it means to be a leader in general and in the current business environment specifically. Students will be encouraged to consider their own leadership aspirations, to observe others in leadership roles, and to test their own leadership acumen.

**EMBA 9301 Corp Governance Legal Ethical Issues 3 Credits**

This team-taught course provides an overview of corporate governance. The governance structure specifies the distribution of rights and responsibilities among different participants in the corporation, such as the board of directors, managers, shareholders, and other stakeholders. In this course, students will discuss the importance of corporate governance and the roles of various stakeholders in the governance structure. Conflicts of interest that arise between the stakeholders and approaches to mitigate those conflicts will be a central focus of the course. Because corporate governance plays an integral role in creating a culture in which ethical behavior is the norm, this course will also focus on identifying, analyzing, and resolving ethical dilemmas in business. The course will consider ethical issues confronted by managers and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues.

**EMBA 9302 Corporate Performance Evaluation 3 Credits**

This team-taught course emphasizes to executives that shareholder value creation should be an enduring focus of concern because value is the foundation of survival and prosperity for the enterprise. The course introduces multiple perspectives in evaluating the performance of the firm. Among them are management control systems, financial statement analysis, cash flow analysis, and the balanced score card (BSC) including Economic Value Added. The nature of these approaches to evaluation draws from the disciplines of accounting and finance. Structuring the course as a team-taught course in which instructors from both of these disciplines will be present helps to ensure that students will receive a comprehensive and integrated understanding of the course topics. Students will experience using real-world cases in evaluation.

**EMBA 9303 Intl Bus Seminar W/ Travel Exp 3 Credits**

The purpose of this course is to examine the intricacies of conducting business internationally. With each offering, the course will focus on parts of the world where emerging economies are becoming influential players in international business. Examples of these emerging economies include China, South America, Argentina and Chile in particular, and Eastern Europe or Southeast Asia. The influence of external forces resulting from the socio-cultural, economic, technological and political aspects of the macro-environment will be examined. The competitive environment will be examined from the perspective of both multinational and domestic corporations. Finally, consideration will be given to the corporate level strategies and the functional operation of these corporations as they compete for market share, financial investment and human resources.

**EMBA 9309 Special Topics 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**EMBA 9310 Information Technology and Management 3 Credits**

This course enables current and future senior executives to gain a strategic perspective of information technology resources within the organization. The focus is on opportunities and challenges associated with managing technological resources as well as how the effective management of information technology can improve competitive positioning and operational performance. Course format will be a combination of lectures, guest speakers, case studies, and hands-on exercises. Experiential learning opportunities will allow students to work with real-world case studies using relevant technologies.

**EMBA 9362 Product Development and Commercialization 3 Credits**

The purpose of this course is to provide an in-depth overview of the Product Development and Commercialization (PD&C) process. This will be done through the analysis of cases that describe actual PD&C as well as innovation problems faced by a variety of organizations (e.g. consumer, health care service). Topics covered include innovation funding, opportunity analysis, common PD&C challenges and issues, and the interface among various disciplines to achieve best-in-class PD&C strategies.

**EMBA 9880 Strategic Management: a Capstone Course 3 Credits**

The capstone course focuses on the elements required to make effective strategic decisions in organizations with reference to the impact these decisions have on all stakeholders. The purpose of this course is to provide students with an understanding of the strategy process through an analysis of how a firm develops a mission, vision, and establishes a sense of purpose while simultaneously monitoring the external environment for emerging opportunities and threats. Topics focus on real-world cases, the evolution of strategic management processes, and strategies for a global world.

**EMBA 9900 Leadership Edge 0 Credits**

This course is structured as pass/fail. It provides students at, or aspiring to, executive positions within their organization's career, leadership and management development with a real-time, practical approach to leadership. This differentiator and developmental component is referred to as "The Leadership Edge." Students will reflect on self-assessments completed as part of the program. They are then able to leverage the Leadership Edge experience by pursuing different methods of developing career, leadership, and management competencies to fill identified gaps. Opportunities for development are met through group sessions and student participation in individual (private) coaching or group seminars to discuss personal career and organizational situations. The choice of which avenue is taken (individual or group) is made on an integrated group basis.

**EMBA 9906 Special Topics in Bus Adm 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**EMBA 9907 Special Topics in Bus Adm 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**EMBA 9908 Special Topics in Bus Adm 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**EMBA 9909 Special Topics in Bus Adm 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

## Homeland Security (HLSP)

**HLSP 501 Homeland Security 3 Credits**

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

**HLSP 502 Development and Structure of the US Intelligence Community 3 Credits**

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

**HLSP 504 Political Behavior of Security and Conflict 3 Credits**

The course focuses on various analytical approaches in behavioral political science in order to better understand how individuals interact with the political system. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior during periods of crisis and uncertainty. The course empowers students to conduct advanced research in order to test some of the leading theories of the subfield.

**HLSP 505 Civil Liberties and National Security 3 Credits**

During times of crisis, can our government maintain individual liberty? This course provides an in-depth exploration of the tension between the role of the state in balancing civil liberties with national security. In this context, the course provides a specific focus on freedom of speech, press and assembly, freedom of religion, the right to privacy and the courts' role, or lack thereof, in the War on Terror.

**HLSP 506 US Constitutional Law and National Security 3 Credits**

This graduate seminar examines the origin and development of the American constitutional system and constitutional law. It further examines this system within the context of national security. Primary emphasis is on the US Supreme Court, which includes its developmental as an institution, the origins of judicial review and the court's establishment of this process, as well as the decision-making process by Justices of the court. The course will then examine the interplay between the court and its political environment and the impact the court has had upon the functioning of the political system by considering the Marshall Court (1801-1835), the Hughes Court (1930-1941) and the Warren Court (1953-1969). We will conclude with a consideration of the role of the court in balancing the rights and freedoms of a democratic society within the demands of the national security state.

**HLSP 508 Political Communication, Terrorism, and Security 3 Credits**

This course explores how political communication affects terrorism and security. It is well known that media plays an important role in creating the narrative for understanding terrorism and national security issues. The question is whether that narrative tends to help protect that nation, or whether it actually interferes with that goal. In addition, social media has become a means by which terrorist groups recruit outside volunteers, while blogs and websites are often used to incite incidents in various countries. This course deals with the various ways in which political communication can support, or interfere with, the protection of national security.

**HLSP 510 Terrorism 3 Credits**

Politics is the study of power and its application, and hence the study of violence has always played a central role in the discipline. In the era of mass politics, violent political participation has been accentuated as evidenced by the prevalence of both domestic and international terrorism. The practice of terrorism itself has undergone changes in the new era and the appearance of groups and "lone wolves" bent on sowing death and destruction for its own sake is more common place. Moreover, the statelessness of today's terrorists removes crucial restraints that once held even extreme terrorists in check. Perhaps more than any other organization, ISIS embodies these trends. It is therefore incumbent upon us to take a step away from the spectacular nature of the news, and ask fundamental questions concerning the motivations, modes of operation, and circumstances contributing to the appearance of terrorist movements, and the roles of the leaders as against the "foot soldiers" in such organizations. Special attention is laid on the emotional fervor of those engaged in the activity, the ideology that mobilizes them and rationalizes their behavior, within each case's historical settings.

**HLSP 514 Congress and National Security 3 Credits**

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. In addition to an in-depth analysis of the US Congress, we also look comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror?.

**HLSP 515 Counterterrorism 3 Credits**

One of the aims of analyzing the nature of terrorism, its goals, and the underlying deeper motives of those who partake in it, is to thwart as many terrorist efforts as possible and to bring terrorist campaigns to an end. Thus, the questions of how terrorism begins and how terrorism ends are intimately related. Because of the prevalence of terrorism in the national and international arenas and the spectacular nature of terrorist undertakings, the analysis of these questions is the subject of much media attention and public discussion that tends to obscure and politicize what should be a focus of attention of citizens, policy makers, and students of the social sciences alike. This course seeks to point out concrete measures for counterterrorism –of the type that sometimes is under public discussion –but in a more systematic manner that brings together methods of heuristic thinking in political science and adjacent disciplines, historical and comparative experience, and the literature on counter terrorism to analyze the range of possible strategies that could be adopted and the possible manner in which terror campaigns may be brought.

**HLSP 516 The Presidency and National Security 3 Credits**

This course is designed as an upper level graduate combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School, English School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

**HLSP 520 Defense Policy and Analysis 3 Credits**

The course begins with an overview of the structure of US defense policy and administration and explores issues associated with national defense. Throughout the course students become familiar with basic data, institutions, actors, trends, issues and options in the strategic implementation of defense and force. The primary focus of the course is on the Department of Defense (DoD) as well as on key committees and actors within the White House, State Department, Central Intelligence Administration and Congress.

**HLSP 527 Policy Analysis and Evaluation 3 Credits**

Policy Analysis and Evaluation fully addresses this problem by providing students with an in-depth study of public policy. It does so by linking theory with practice in helping students think systematically about public policy. The course addresses the policy process through leading theoretical models within the subfield as well as an evaluation of government's response, or lack thereof, of contemporary policy problems. Our focus will be three areas of policy analysis: 1) descriptive 2) evaluative and 3) prescriptive. As part of our focus, we will address policy design, implementation, evaluation and failure. Overall, students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options.

**HLSP 529 Energy Security 3 Credits**

Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

**HLSP 530 Data Analysis and Methods for Political Science 3 Credits**

This course introduces students to quantitative and qualitative methods used by political scientists and security specialists in the study of social and political phenomena. Students will learn the logical structure of political analysis, and the quantitative measures used to supplement and support these logical structures. Overall the course draws on the fundamentals of statistics: Namely the ability to describe data samples and draw inferences about the populations from which they were drawn. It should also improve one's ability to read data, interpret data, and judge others' claims about data. After students learn these skills, they will apply them to a prepared data set. The emphasis of this course is on "hands-on" experience. Students approaching this subject for the first time will "learn by doing" this type of analysis.

**HLSP 545 Loyalty and the State of Exception 3 Credits**

The course enquires into cases ranging across Europe, the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, have suspended, if not dissolved, constitutionally guaranteed civil liberties. Under emergency situations, organs of national security are energized; organs of opinion and electronic media including internet newsgathering, opinion expression and formation, may be censored; citizens may be enlisted to report to and inform on their neighbors. Regimes of exception may severely curtail academic freedom and university life; they may regulate voluntary associations by means of secret or not so secret surveillance of meetings, and a demand for lists of members and financial contributors. States of exception may deploy methods of coercion usually proscribed in "normal" times, e.g., suspension of habeas corpus rules; extended if not indeterminate periods of detention of suspects; and techniques of "enhanced interrogation" that may violate constitutional and international law. Using a number of case studies, the course inquires into the conditions under which liberal democracies transform themselves into states of exceptions; the effects of such transformations on individual and civic life; and the procedures by which states no longer under stress return to liberal democratic procedures and recovery of civil liberties.

**HLSP 550 American National Security 3 Credits**

The course is part of the foundational sequence of the M.A. in Homeland Security Policy. The course trains students to think strategically and critically about major issues facing American National Security.

**HLSP 551 Global Security 3 Credits**

This seminar critically addresses the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

**HLSP 552 U.S. Foreign and Security Policy 3 Credits**

This course emphasizes the main theories of and themes in American foreign policy since the end of the Second World War. We will examine the patterns that have permeated American Foreign Policy since 1945, and discuss the roles that various actors play in the foreign policy process. We will use theoretical concepts to discuss the major events in American foreign policy over the last half of a century. The course will focus on both the conduct and formulation of American foreign policy. Detailed knowledge of the policy-making process, including legal and institutional restraints and standard operating procedures, is clearly essential for all students of foreign policy. Yet, only by exploring America's past actions in the global arena and only by searching for historical precedents and patterns can students fully grasp the dilemmas facing the United States today.

**HLSP 567 Global Immigration Trends and Security Issues 3 Credits**

Amidst the broader trends of international politics that address the growing flow of goods, capital, and information across state borders, the movement of people is a permanent and expanding feature. However, central to the notion of the political identity of the nation-state is the ability to control the entry of non-citizens. The regulatory power of the nation-state to control its borders is at least threatened by the migratory movements of people. People are driven from their homes by conditions of war, economic difficulty, or environmental disaster. Millions of people migrate permanently each year, and about 20 million are refugees and seek political asylum worldwide. The vast majority of refugees are women and children--this is the hidden truth of the post-Cold War order, huge numbers of displaced women and children. These numbers are significant, particularly since the general movement heads in one direction, toward advanced industrial states, mainly Western Europe and the United States. About 35 million legal and illegal immigrants live in the United States. Immigrants account for 11.5 percent of the total population, the highest percentage in 70 years. Critics warn that if current trends continue, by the end of this decade the immigrant share of the total population will surpass the all time high of 14.8 percent reached in 1890. Understanding immigration and refugee issues in this interdependent world will help us to gain insights into the workings of political, economic, and social forces both within receiving and sending states as well as the international regime which regulates these movements. The topics addressed in this course go beyond simple models of utility and efficiency since the questions of immigration and political asylum are often deeply emotional issues for societies; the issue also has a significant moral dimension.

**HLSP 590 Master's Thesis 3 Credits**

Students will complete an original substantive research paper that will build on prior research in Security Studies or related discipline.

**HLSP 591 M.A. in Homeland Security Internship 3 Credits**

The course is part of the capstone requirements of the M.A. in Homeland Security Policy. The course will have students complete an internship, self-evaluation and write a reflection paper outlining their experience working in a security related position.

**Interdisciplinary Studies (IND)****IND 600 Supervised Study 1-4 Credits**

## Literacy (LITR)

### LITR 500 Multimodal Teaching and Learning 3 Credits

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

### LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

### LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

### LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and disabilities and standardized and informal tests. Observational techniques and diagnostic teaching for assessment are stressed.

### LITR 510 Research and Survey of Texts for Children and Adolescents 3 Credits

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-print texts into the school curricula in ways that support youth and adolescent literacy development.

### LITR 560 Writing Project at Rider 3 Credits

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas.

### LITR 600 Independent Research and Study in Literacy Education 1-3 Credits

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education.

## Marine Sciences (MAR)

### MAR 580 Independent Marine Science Field Study 4 Credits

This field-based course provides a practical experience in integrating marine science with pedagogical concepts. Students will use scientific methodology to explain marine ecosystems through specially designed, inquiry-based exercises. During these activities, students will address the process of applying college-level content to their own classroom settings, considering national and state standards. Hands-on, field-based exercises will provide experience with a diversity of marine habitats and the biological, geological, hydrological, and physical processes that influence them. Visited habitats can include rocky intertidal, salt marsh, tidal flat, beach and channel sand bars. As a result, students will develop field and laboratory skills in marine science and use them in designing materials for their own classroom use.

## Master of Accountancy (MACC)

### MACC 611 Professional Research and Communication 3 Credits

Effective communication and interpersonal skills are key for success in the accounting profession. This course is an interactive seminar designed to provide a strong foundation in professional research and to develop communication and interpersonal skills with an emphasis on the communication and interpersonal challenges that accountants commonly face. Course work is primarily base based and includes a wide variety of video and written assignments that require research to develop accounting services and present to guest professionals and the "client".

### MACC 650 Seminar in Federal Taxes 3 Credits

The course examines tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts. Topics include tax issues involved in the decision to select a particular form of business organization, fundamental concepts of interstate, international, and New Jersey taxation, and to expose the student to a variety of common tax returns, applicable to the above topics.

**Prerequisite(s):** completion of ACC 410 Fundamentals of Federal Taxation.

### MACC 652 Analysis of Accounting Data 3 Credits

This course uses information technology and data analytical techniques to conduct analysis needs commonly faced by accounting professionals. The course uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics. MACC 654 should be taken before this course.

**Prerequisite(s):** completion of Preliminary Accounting requirements.

### MACC 654 Issues in Financial Reporting 3 Credits

This course uses the conceptual framework to examine standards for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

**Prerequisite(s):** completion of the Preliminary Accounting Requirements.

**MACC 656 International Dimensions of Accounting 3 Credits**

This course examines the global applications of accounting principles and practices, including the relationship between international accounting issues and company strategy. Topics include theoretical and societal considerations of international accounting issues, the identification of transnational accounting practices, and attempts at harmonization.

**Prerequisite(s):** completion of the Preliminary Accounting Requirements; this course applies to the Global Business concentration.

**MACC 658 Governmental and Not-for-Profit Accounting 3 Credits**

This course provides an in-depth study of the concepts, objectives and techniques of the evolving field of accounting for nonprofit institutions and organizations. Areas emphasized include municipal and state governmental units, hospitals, colleges and universities and service organizations. Problems, cases and selected readings are employed.

**Prerequisite(s):** completion of Preliminary Accounting requirements.

**MACC 662 Auditing Practice & Problems 3 Credits**

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, and other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

**Prerequisite(s):** ACC 400 Principles of Auditing.

**MACC 663 Fraud and Forensic Accounting 3 Credits**

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

**Prerequisite(s):** completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

**MACC 664 Issues in Managerial Accounting 3 Credits**

This course examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

**Prerequisite(s):** completion of ACC 302 Cost Management or PMBA 8220 Strategic Accounting for Managers; this course applies to the Corporate Accounting for Managers concentration.

**MACC 665 Fraud Detection and Deterrence 3 Credits**

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

**Prerequisite(s):** MACC 663 and completion of the Preliminary Accounting Requirements; this course is required for the Forensic Accounting and Fraud & Forensic Accounting concentrations.

**MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits**

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

**Prerequisite(s):** completion of PMBA 8240 or the Preliminary Accounting Requirements; this course applies to the Corporate Accounting for Managers, Forensic Accounting and Fraud & Forensic Accounting concentrations.

**MACC 668 Enterprise Risk Management 3 Credits**

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

**Prerequisites:** ACC 302 or PMBA 8220.

**MACC 670 Accounting Internship 3 Credits**

This course provides on-site experiential learning through supervised employment with a participating company. Students will be reviewed periodically by senior staff. Academic assignments, including a formal report, will be developed in conjunction with a faculty member. Permission of the instructor is required.

**MACC 690 Special Topics 3 Credits**

This course provides study of a timely topic that represents a dimension of business administration or accounting that not covered in a regular course. Such a topic may be offered by the Accounting Department. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

## Musical Theatre (MTR)

**MTR 511 Music Theater Ensemble 1 Credits**

The performance-based, auditioned music theater ensemble engages multiple singers/actors/dancers in performance, utilizing scenes from music theater literature as the primary material. Emphasis is placed upon group interaction and building an ensemble. This ensemble often is asked to perform for University sponsored events.

## Organizational Leadership (LEAD)

**LEAD 500 The Practice of Leadership 3 Credits**

This course allows students to gain an understanding of the practice of leadership and how they can develop as leaders. Students will explore leadership models, creativity in organizations, and approaches to decision making as they begin to form their own leadership philosophy.

**LEAD 510 Organizations: Design and Dynamics 3 Credits**

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

**LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits**

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 512 Forms of Diversity in Organizations 3 Credits**

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different "worldviews" which organizational members bring into the organization, and how that affects their ability to work together. The course develops students' knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 531 Developing The Human Side of Organizations 3 Credits**

This course examines Strategic Human Resources Management (SHRM) within today's organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 532 Program Design for Training and Development in Organizations 3 Credits**

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore "real world" applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 533 Conflict and Crisis Resolution in Organizations 3 Credits**

Leaders face conflict and crisis in their organizations. Being effective in their resolution is an important leadership attribute. Skills that support positive and integrative outcomes include mediation, negotiation and crisis resolution skills. This course will use multiple case studies and role-playing assignments to engage students in understanding how individuals and teams handle mediation and negotiation scenarios. The course will also use multiple case studies to enhance students' understanding of the components of effective and ineffective leadership for crisis.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 534 Facilitation and Team Leadership 3 Credits**

This course examines the characteristics and behaviors of teams that produce good results and/or generate new ideas. The focus of the course is on how to lead high functioning teams and the development of facilitation capabilities, so that students can effectively lead teams and organizations.

**Prerequisite(s):** LEAD 510 or concurrent with LEAD 510.

**LEAD 540 Strategic and Financial Decision-Making in Organizations 3 Credits**

This course explores the importance of information and financial resources within the culture of organizations, and the necessary relationship that exists between the two. The course draws on current literature and student experience to explore resource management and focuses on the effective use of information resources within the boundaries defined by financial realities. The relationship between data analyses and effective decision-making will be explored.

**Prerequisite(s):** LEAD 500 or concurrent with LEAD 500.

**LEAD 550 Organizational Research 3 Credits**

The purpose of this course is to prepare future organizational leaders to read professional journal articles, plan research, and critique research. The course covers basic research methods, such as experimental, ex post facto, correlational, case study, time series, interviews, surveys, and basic statistics in terms of understanding and selecting statistics. These concepts are taught within the framework of organizational leadership. This course should be taken at the end of your program.

**Prerequisite(s):** LEAD 500, LEAD 510.

**LEAD 551 Selected Topics in Organizational Leadership 3 Credits**

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

**LEAD 552 Selected Topics in Organizational Leadership 3 Credits**

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

**LEAD 553 Selected Topics in Organizational Leadership 3 Credits**

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

**LEAD 554 Selected Topics in Organizational Leadership 3 Credits**

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

**LEAD 555 Selected Topics in Organizational Leadership 3 Credits**

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

**LEAD 556 Selected Topics in Organizational Leadership 3 Credits**

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

**LEAD 557 Selected Topics in Organizational Leadership 3 Credits**

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

**LEAD 558 Selected Topics in Organizational Leadership 3 Credits**

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

**LEAD 559 Selected Topics in Organizational Leadership 3 Credits**

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

**LEAD 598 Project Seminar in Leadership 3 Credits**

This course serves as a practicum for students about to graduate with their M.A. in Organizational Leadership. Reflecting upon their own leadership philosophy developed throughout the program, students will formulate, research, and write a leadership capstone paper. The project integrates the competencies and concepts from the core courses as students use research strategies to analyze an organizational problem. Class sessions will also be used for exercises and the practice of skills. Core and concentration courses should be completed before taking this course.

**Prerequisite(s):** Must be taken in last semester of study. Permission of Instructor required.

**LEAD 600 Independent Study and Research in Organizational Leadership 3 Credits**

The content of the course varies with the academic research interests of students who wish to engage in independent study related to the core content of organizational leadership and/or one of the concentrations in higher education administration, communication, information technology, and counseling-related services.

## Political Science (POL)

**POL 501 Homeland Security 3 Credits**

This course is designed to help students increase their knowledge and understanding of problems impact the public agenda, why some solutions are adopted and other rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

**POL 502 The Development and Structure of U.S. Intelligence Agencies 3 Credits**

This course will provide an historical review of intelligence during the following World War II. It will examine the major functions of intelligence, as well as intelligence as a part of the foreign policy process: collection, analysis, counterintelligence and covert action. Students will be introduced to a range of collection procedures: human, open source, electronic, photographic, and signal. With emphasis placed on interpreting and writing intelligence summaries.

## Professional MBA (PMBA)

**PMBA 8000 Executive Communications 3 Credits**

Professionals spend about seventy percent (70%) of their work-time communicating with other people. It is therefore no surprise that, without good communication skills, it is impossible to succeed in one's workplace. Yet, effective communication skills do not come naturally for most people. This course aims to prepare you to speak compellingly, write clearly and concisely, listen actively and critically, and persuade others by constructing sound arguments. To that end, we will learn the key aspects of communication: audience analysis, communicator credibility, message construction, and delivery. Deliverables will include written documents and oral presentations, as well as both individual and team presentations. Importantly, in doing so, you will enhance your leadership potential in your workplace by motivating your colleagues, team, and organization to work toward important goals.

**PMBA 8010 Information Technology Proficiency 1.5 Credits**

Computing proficiency requires understanding implications of advanced information technologies and the ability to successfully apply these technologies in an increasingly global society. This course will enable students to effectively use specific information systems tools (spreadsheet and database management) to begin to design applications for effective decision making.

**PMBA 8020 Fundamentals of Accounting 3 Credits**

For those students having no previous knowledge of accounting. Subject is approached from the point of view of the user of accounting information rather than that of the accountant who supplies the information. Surveys mechanics of accounting as a means to an end, emphasizing accounting as a tool of management and the language of business. Problems and cases bring out the managerial implications of accounting.

**PMBA 8030 Economic Analysis 3 Credits**

An intensive exposition of the essentials of price theory and income and employment theory. For students with less than a year of introductory economics at the undergraduate level. Topics include an analysis of markets, the nature and characteristics of producer behavior, the theory of pricing in competitive and non competitive markets, and their welfare effects. At the macro level, coverage of the economy in the short run deals with economic fluctuations, fiscal policy, and monetary policy. An examination of the economy in the long run covers factors effecting economic growth.

**PMBA 8040 Basic Financial Principles 1.5 Credits**

The central unifying theme of this course is valuation. Valuation is the basis for decisions in all major areas of finance. This course begins with a discussion of basic concepts including time value of money and its application for valuation of stocks and bonds and analysis of risk and return. Further application of valuation for capital investment projects made by a firm is explored by introducing the techniques of capital budgeting.

**PMBA 8050 Introduction to Calculus 1.5 Credits**

This course has been designed to prepare students for courses in the MBA program in which calculus is used. Topics include limits, derivatives, functions of two or more independent variables and maxima and minima in one and two independent variable(s).

**PMBA 8051 Fundamentals of Statistical Analysis 3 Credits**

Covers basic statistical techniques useful in business decision making. Includes descriptive statistics, event probability, random variables, sampling distributions, regression analysis and topics in statistical inference.

**Prerequisite(s):** MSD 105 (or equivalent).

**PMBA 8052 Models and Methods of Operations Management 1.5 Credits**

This course provides students with some of the most frequently used quantitative tools necessary in analyzing and resolving issues and problems in managing service and/or manufacturing operations. These tools are required in PMBA 8250 Operations and Supply Chain Management, and may also be used in other PMBA courses such as Economic Analysis and Decision Making, and Business Intelligence.

**PMBA 8060 Basic Marketing Principles 1.5 Credits**

The purpose of this course is to provide students with an operational understanding of basic marketing principles and concepts. This will be done through interactive exercises and discussions based both on primary source and textbook readings as well as discussions and critical examinations of current marketing practices in companies and industries of interest to the students. Topics covered include environmental analysis, target marketing, product and service strategy, integrated marketing communications, channels of distribution, pricing practices, and the interface between marketing and corporate strategic planning.

**PMBA 8070 Management: Theory & Application 1.5 Credits**

A foundation course that provides an introduction to the theory and practice of management. The management functions of planning, organizing, leading, and controlling provide an organizing framework for examining current management challenges (e.g. globalization, ethics, diversity, and multidimensional organizational structures).

**PMBA 8200 Managerial Decision Making 3 Credits**

In this course, students will improve their managerial and analytical thinking skills through a range of approaches and techniques. Students will learn to analyze business problems within the context of managerial decision making. The course is designed as a series of seminars and will be organized in three areas, each with its complementary learning goals: Business Intelligence, Enterprise Analysis, and Executive and Managerial Decision Making.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8210 Information Technology Management 3 Credits**

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

**Prerequisite(s):** Completion of PMBA 8010.

**PMBA 8220 Strategic Accounting for Manager 3 Credits**

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8230 Managerial Economics 3 Credits**

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8240 Applied Corporate Finance 3 Credits**

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

**Prerequisite(s):** Completion of PMBA 8040 and PMBA 8220.

**PMBA 8250 Operations & Supply Chain Management 3 Credits**

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8260 Mkt Analysis & Decision Making 3 Credits**

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8270 Adv. Organizational Behavior 3 Credits**

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8290 Legal and Ethical Aspects of Management 3 Credits**

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8303 International Business Study Tour 3 Credits**

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8311 Information Security for the Enterprise 3 Credits**

This course will teach students how businesses can implement security policies which will protect their significant investment in computer systems. The course topics include but are not limited to security attacks, attack prevention and mediation and security audits. Security devices, firewalls, PC and server security, authentication methods and procedures, and network security will all be discussed. The course will be delivered through a combination of hands-on labs where students will evaluate and implement computer security on computers, and class lectures.

**Prerequisite(s):** PMBA 8210.

**PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits**

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered. This course applies to the Business Analytics, Forensic Accounting and Fraud & Forensic Accounting concentrations. This course applies to the graduate certificate in Business Analytics.

**PMBA 8313 Electronic Commerce 3 Credits**

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8314 Project Management 3 Credits**

in our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

**PMBA 8315 Globalization and Technology 3 Credits**

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology. This course applies to the Information Systems and Global Business concentrations. This course will satisfy the International elective requirement.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8316 Application Development for the Web 3 Credits**

This class will examine application development for the Web platform in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications and the skills needed to develop applications using that architecture. Specific skills learned include programming with the JavaScript programming language, creating Web pages using the HyperText Markup Language (HTML) and Cascading Style Sheets (CSS). Other skills learned in this course include how to create user-friendly user interfaces, and how to retrieve and update information stored on computer servers.

**Prerequisite(s):** PMBA 8210.

**PMBA 8317 Applied Data Management for Business Users 3 Credits**

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**PMBA 8318 Business Analysis and Design 3 Credits**

This course will integrate the skills of business analysis with those of system design. Students will learn a dynamic visioning/planning process which will guide the development of a technology architecture model for the business enterprise. Students will learn requirements elicitation techniques and use cases. Design methods such as object modeling and prototyping and data modeling with enterprise relationship diagrams will also be covered.

**Prerequisite(s):** PMBA 8210.

**PMBA 8319 Selected Topics in CIS 3 Credits**

The study of a topic (or combination of topics) that represents some dimensions of computer information systems or has important and direct implications for CIS management. Topics recently covered include project management, data mining and data privacy. Theoretical foundations as well as applications may be explored. Readings, research, lectures, projects, discussions or other appropriate methods are employed to stimulate student learning.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8321 Managerial Taxation and Strategy 3 Credits**

This course is designed for students who are embarking on (or already in) careers in investment banking, corporate finance, strategy consulting, money management, or venture capital. The focus of the course comes from integrating the tax law with the fundamentals of corporate finance and microeconomics.

**Prerequisite(s):** PMBA 8020.

**PMBA 8324 Financial Accounting & Report 3 Credits**

Focus is on analysis and evaluation of alternative accounting methods and the relationship to company policy. Insight is gained through the reading of articles in leading accounting and financial periodicals and Internet research. Cases demonstrating financial reporting methods are assigned and discussed in class. Term project required. Topics include financial instruments, earnings per share, deferred taxes, post-retirement benefits and the accounting rule-making process.

**Prerequisite(s):** PMBA 8020 and PMBA 8040.

**PMBA 8325 Enterprise Risk Management 3 Credits**

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

**Prerequisites:** ACC 302 or PMBA 8220.

**PMBA 8335 International Trade & Investment 3 Credits**

A study of the international economy in which business firms operate, and public policies that influence their activities. Includes international trade theory, balance of payments analysis, the international monetary system, barriers to trade, and the role of multinational corporations. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8341 Corporate Treasury Management 3 Credits**

This course is designed to provide an understanding of modern principles and techniques for corporate treasury management. The course materials are useful for finance, banking, accounting and information system professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multinational cash management, and other related topics. Success in this course will help students preparing for the Certified Cash Manager (CCM) exam. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8343 Investment Instruments and Strategies 3 Credits**

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8344 Financial Market Operations 3 Credits**

Flow of funds analysis is used to study financial intermediation and interest rate determination in money and capital markets. Includes the flow of funds accounts, funds flow through financial institutions, the demands for and supply of credit by economic sectors, and the impact of public policies on financial market behavior. This course applies to the Finance and Global Business concentrations.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8345 International Financial Management 3 Credits**

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions. This course applies to the Finance and Global Business concentrations.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8346 Financial Modeling 3 Credits**

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8347 Portfolio Management 3 Credits**

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040.

**PMBA 8348 Fixed Income Securities and Alternative Investments 3 Credits**

This is an introductory course in fixed income securities and alternative investments. The first part of the course covers the markets for fixed income securities and their derivatives. Valuation of these securities and determination of the risk inherent in these securities are discussed. Methods for managing that risk, such as hedging and credit derivatives, are also discussed. The second part of the course covers a variety of alternative investments, including real estate funds, venture capital, hedge funds, and commodities. Valuation of these investments and determination of their risk are discussed. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

**PMBA 8349 Personal Financial Planning 3 Credits**

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning. This course applies to the Finance concentration.

**Prerequisite(s):** Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

**PMBA 8352 Design Thinking and Innovation 3 Credits**

This graduate course on Design Thinking and Innovation provides students with a framework for dealing with unstructured problems, and for managing the innovation process. This course introduces students to design thinking as a systematic approach to innovation, but also guide students through the process to identify and translate broadly defined opportunities into actionable innovation possibilities. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

**Prerequisite(s):** PMBA 8210.

**PMBA 8353 Digital Futures 3 Credits**

This course is a capstone course aimed at leveraging the in-depth understanding of Technology that M&IS students possess and transforming such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. The course is divided into three parts. Part 1 aims to familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology / innovation. Part 2 engages the students in a discussion of three multi-firm cases of strategic innovation, followed by Part 3 on debates about new policy and ethical dilemmas engendered by technological changes of the last four decades. Each part is aimed at developing new skills that will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future.

**PMBA 8354 Quality Assurance and Total Quality Mgt 3 Credits**

This course integrates the concepts of statistical quality control and the practices of today's leading companies in creating systems of total quality management (TQM). Considers how various business functions (e.g., production, engineering and design of products and services, purchasing raw materials, providing technical assistance to customers, and statistical quality control) and their interrelationships can be used to create high-quality products, and, thus, high levels of customer satisfaction. Includes traditional statistical methods for process control, acceptance sampling, reliability and quality improvement, as well as numerous examples of U.S. and foreign firms at the cutting edge of TQM. Introduces current thinking of leading figures in TQM.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8357 Business Analytics for Managers 3 Credits**

Business Analytics, the data driven approach to management, is essential to achieve effective business decision-making and competitive advantage. All business managers need to analyze data and make quantitative-based decisions in their business careers. The focus of this course is to equip students with a variety of data analysis methods and tools that are useful to uncover trends, patterns, relationships, and other useful information. The course will take a hands-on, example-based approach and introduce fundamental concepts as they are needed. Students will be using both Excel and SAS software. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**PMBA 8361 Business to Business Marketing 3 Credits**

The practices and policies used in the marketing of goods and services to business and industrial buyers are analyzed, focusing on the market and demand for products, marketing research, product planning, channels of distribution, pricing policies and practices and the development of sales program and service policies.

**Prerequisite(s):** Completion of PMBA 8060.

**PMBA 8362 Marketing Communications 3 Credits**

This course dynamically blends the concepts and issues of integrated marketing communications with real world experiences. It is highly interactive, with students spending time in teams creating solutions, presenting, and feeling the experience of being in real life marketing communications situations. Students also will be exposed to current and classic literature pertaining to the course content.

**Prerequisite(s):** Completion of PMBA 8060.

**PMBA 8363 Consumer Behavior 3 Credits**

The purpose of this course is to provide the analytical skills required to understand the nature of consumer decision making and internal and external factors that influence buying decisions in order to develop and implement appropriate marketing strategies. A case study approach is utilized in this course. This will be done through the analysis of actual marketing problems faced by a variety of organizations. The readings and class discussions will also include internal and external influences on consumer behavior, marketing research tools, marketing strategies to reach consumers and shape consumers' opinions, the role of marketing communications and marketing mix elements in creating a unique value proposition, and managing consumer relationships.

**Prerequisite(s):** Completion of PMBA 8060.

**PMBA 8364 Marketing Research 3 Credits**

An overview of the subject matter which will assist students in developing an appreciation for the use by marketing management of marketing research and marketing information systems in making marketing decisions. Topics include specific research procedures for gathering, processing, analyzing and presenting information relevant to marketing problems in such areas as: advertising effectiveness, product development, distribution channels, sales techniques, consumer behavior, and forecasting study of research planning, implementation, and interpretation of findings is facilitated by the use of cases or projects.

**Prerequisite(s):** Completion of PMBA 8060.

**PMBA 8365 International Marketing Management 3 Credits**

Examination of the nature and scope of global marketing activities, including the theoretical framework of international marketing, foreign marketing environments, multinational markets, MNC information systems, strategic marketing decisions, and organization for transnational marketing. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

**Prerequisite(s):** Completion of PMBA 8060.

**PMBA 8369 Selected Topics in Marketing 3 Credits**

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision-making may be explored. Readings, research, lectures, discussions or other appropriate methods are employed to stimulate student learning.

**Prerequisite(s):** Completion of PMBA 8060.

**PMBA 8371 Human Resource Management 3 Credits**

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8372 Management Skills 3 Credits**

This is a practicum in interpersonal skills that are useful for practicing managers. Topics include motivating oneself and others, persuasive communication, creative problem-solving, managing conflict, using power constructively, managing change, and team management. Students are given opportunities to practice these skills in class and are asked to apply them to their current lives and report on the results of their applications. The course will provide students with a better understanding of the art of managing and of themselves as current or future managers.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8375 International Management 3 Credits**

This course focuses on the complexities of working and managing in a global business environment. Emphasis is placed on cross-cultural awareness, international communication, and negotiations. Students will explore the effect of culture on organizational behavior, managerial decision making, and global leadership. This course applies to the Global Business concentration.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8376 Org Development & Effectiveness 3 Credits**

This course focuses on Organization Development (OD), a discipline concerned with improving organizational effectiveness by means of planned, systematic interventions. The course will acquaint students with OD concepts, techniques, and skills. The course provides opportunities for students to explore and enhance their personal skills as change agents and consultants. The teaching/learning process emphasizes experiential activities and case analysis. This course applies to the Management concentration.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8377 Managing Workforce Diversity 3 Credits**

This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the U.S. today. It will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious - gender, race, age, and physical characteristics. Other differences are not as easily observed such as family structure, educational level, social class, and sexual orientation. Understanding and valuing diversity requires attitudinal self-assessment and change. Values, stereotypes, and prejudices will be explored through readings, reflective writing, and active involvement in discussions, projects, and activities. This course applies to the Management concentration.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8380 Business Analytics Optimization 3 Credits**

This course has been designed to provide professional MBA students with the current knowledge and practice of optimization business analysts use. Optimization aims at selecting the best alternative from among available alternatives according to a predetermined objective. In general it involves building a mathematical model and finding the best alternative through a mathematical procedure. Optimization techniques help decision-makers make fact (i.e. data) based decisions and offer the potential of making significant profits or cost savings. The main focus of this course will be on developing modeling skills to gain insight into a wide variety of business decision problems. In other words, the emphasis in this course will be on modeling practical business decision problems, use of relevant software for optimal solution, interpretation of results, and sensitivity analysis rather than the theory of mathematical solution techniques. Coverage of course material will follow the typical sequence of (1) identification and discussion of a business decision problem; (2) developing a graphical model (e.g. influence diagram); (3) developing a mathematical model; (4) computer solution; (5) interpretation of results and sensitivity analysis; (6) discussion of insights gained from the experience; (7) discussion of implementation issues. In addition, heuristics will be discussed when optimization techniques are not available or too costly. This course applies to the concentration in Business Analytics and the Business Analytics Certificate Program.

**Prerequisites:** PMBA 8010 and PMBA 8051.

**PMBA 8383 Entrepreneurship 3 Credits**

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8384 Consulting for New and Small Ventures 3 Credits**

This course provides experience-based learning to students through the use of student teams to assist area small businesses/organizations. These small firms could have a variety of needs ranging from market research, improving financial reporting and bookkeeping, business planning, streamlining operational procedures, etc. This course will provide students the opportunity to experience in-depth analysis of an individual organization. The emphasis is on student consultants generating immediate, actionable recommendations for the client. Thus, this course is useful not only for those considering small business ownership, but provides an opportunity to students to learn entrepreneurial thinking.

**Prerequisite(s):** Completion of MBA pre-program courses and permission of instructor.

**PMBA 8385 New Venture Launch 3 Credits**

Students will start and run a new venture while under the supervision and guidance of faculty. Students will take a business plan they have developed and execute it. This is an opportunity to experience the launch process and learn hands-on how to adapt to the marketplace. Some businesses started in this class may also be eligible to receive venture funding from Rider.

**PMBA 8386 Green Entrepreneurship 3 Credits**

This course is both a traditionally academic graduate course and a practical, case study based, business development course. Lectures will present the scientific, technical, financial, and business underpinnings required to understand the rationale for and the range of solutions possible that businesses can utilize when initiating or developing sustainable practices or new entrepreneurs can consider as they develop new businesses. Students will be learning about real business examples and discussing how the technical aspects of sustainability interact with the more practical and immediate demands of running a business - making a profit and maintaining positive cash flow while acting ethically.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8389 Tax Planning for Entrepreneurs 3 Credits**

The business and personal finances of an entrepreneur are integrally related. Often personal resources fund business operations and business resources fund individual necessities and obligations. This course is designed to familiarize the entrepreneur with wealth maximization and tax minimization strategies for business and personal activities. This course covers basic tax compliance concepts and includes personal financial planning and estate planning issues. Restricted to MBA students only. This course applies to the Entrepreneurship concentration.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8397 Evidence Management and Presentation 3 Credits**

This course addresses legal issues and practical considerations involved in the collection, acquisition, analysis and storage of digital evidence and presentation of digital and technical evidence to judges, juries and other decision makers. The law of evidence and its implications for the manner and method technical evidence is acquired and presented for consideration in court or in other proceedings (i.e. criminal, civil, or administrative). Requirements and preparation for the presentation of technical evidence as an expert or fact witness.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8402 The Business of Sports 3 Credits**

This course examines diverse managerial issues involving the sports industry. The course covers topics at the league level, the team level, the athlete-agent level, and the college level. The constituencies with interests in sports issues such as athletes, fans, media, companies, advertisers, and legislators are discussed along with global aspects of sports enterprises. Valuation issues related to sports teams are also covered. The course is designed to integrate all aspects of businesses as they apply to sports with an emphasis on strategy, management, marketing, and finance.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8491 Business Law 3 Credits**

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement; this course applies to the Entrepreneurship concentration.

**Prerequisite(s):** BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

**PMBA 8492 Ethical Issues in International Business 3 Credits**

This course is an introduction to identifying, analyzing and resolving ethical dilemmas in both U.S. and international business, including reference to legal and regulatory issues. The course begins with a general introduction to ethics, considers ethical issues connected with the economic, legal and regulatory systems within which modern business takes place and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues, including cases resulting in civil and criminal litigation. The primary focus of this course will be ethics in the international business environment. Most of the readings and discussion board topics, the group case studies and the individual research paper will have an international focus.

**Prerequisite(s):** Completion of MBA pre-program courses.

**PMBA 8880 Strategic Management 3 Credits**

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

**Prerequisite(s):** All other MBA breadth courses.

**PMBA 8880L Strategic Management Simulatn 1.5 Credits**

Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation.

**Corequisite:** PMBA 8880.

**PMBA 8902 Independent Studies in Business Administration 3 Credits**

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study.

**Prerequisite(s):** Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

**PMBA 8905 Internship 3 Credits**

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be done at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and during the semester he/she receives credit for the internship is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

**Prerequisite(s):** Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

**PMBA 8906 Selected Topics in Business Administration 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**Prerequisite(s):** To be announced and completion of MBA pre-program courses.

**PMBA 8907 Selected Topics in Business Administration 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**Prerequisite(s):** To be announced and completion of MBA pre-program courses.

**PMBA 8908 Selected Topics in Business Administration 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**Prerequisite(s):** To be announced and completion of MBA pre-program courses.

**PMBA 8909 Selected Topics in Business Administration 3 Credits**

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

**Prerequisite(s):** To be announced and completion of MBA pre-program courses.

**PMBA 8989 Spec Topics Entrepreneurship 3 Credits**

Special Topics in Entrepreneurship.

## Psychology (PSY)

**PSY 501 Introduction to Applied Psychology Skills 3 Credits**

This course will provide students with an examination of several facets of applied psychology with a focus on consuming research, understanding differences in methods and perspectives, writing according to APA style, and demonstrating understanding of several methods and perspectives in applied psychology. These are necessary skills to function meaningfully in the field. We will review and evaluate scholarly literature from across several psychology application areas. This course is available to MA Applied Psychology students only and should be taken near the beginning of entering the MA program.

**PSY 510 Introduction to Applied Behavior Analysis 3 Credits**

This course will provide an introduction to applied behavior analysis. Students will learn the history and defining features of the field. Due to the scientific nature of applied behavior analysis, students will also learn characteristics and processes associated with the scientific method. Furthermore, foundational concepts will be defined, along with relevant behavior change procedures.

**PSY 511 Principles of Learning 3 Credits**

This course will provide students with more in depth understanding of the philosophical assumptions, characteristics and basic principles of behavior analysis. Students will have the opportunity to review concepts learned during Introduction to Applied Behavior Analysis. This course will also provide an introduction to the basic research in behavior analysis. Students will become more fluent in definitions, characteristics, principles, processes, and concepts of behavior analysis.

**Prerequisite(s):** PSY 510.

**PSY 513 Functional Assessment 3 Credits**

This course is designed to provide knowledge and skills of methodologies to conduct a thorough behavioral assessment, interpret the assessment data, and identify goals for treatment. Topics will include direct observation/data collection methods, data analysis, functional assessment, stimulus preference and reinforcer assessments, and ethical and professional issues. The second half of the course will deal specifically with functional analysis including the history of and variations to the methodology. The relationship between assessment techniques and the development of the least-restrictive but most effective behavioral intervention will also be discussed.

**Prerequisite(s):** PSY 510, PSY 511.

**PSY 514 Single Subject Research Design and Analysis 3 Credits**

Students will be introduced to the basic evaluative methods used in behavior analysis including various models of single subject design such as multiple baselines, reversal designs, and alternating treatment models. Students will design analyses, collect data, graphically display their data, and provide an analysis of findings. Students will read original behavior analytic research articles and practice analysis of findings.

**Prerequisite(s):** PSY 510, PSY 511.

**PSY 515 Psychological Tests 3 Credits**

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

**Prerequisite(s):** any statistics course.

**PSY 516 Ethics for Behavior Analysts 3 Credits**

This course will familiarize the student with ethical issues and responsibilities of behavior analysts working in applied settings. Informed consent, due process, protection of confidentiality, and selection of least intrusive, least restrictive behavior change procedures will be presented and discussed within the context of case method. Ethical decision making processes will be emphasized, and the relationship between ethics and law will be explored.

**PSY 518 Organizational Behavior Management 3 Credits**

This course will provide an overview of research and practice in the field of Organizational Behavior Management (OBM), also referred to as Performance Management in organizational settings. Performance Management is a behaviorally-based area of specialization within the broad field of Industrial-Organizational Psychology. The concepts and techniques used in Performance Management originated from the field of behavior analysis.

**PSY 519 Models of ABA Instruction 3 Credits**

This course provides students with a general knowledge of the different procedures used to teach new skills and new behaviors in the field of applied behavior analysis. Areas covered will include the assessment of relative strengths and deficits, use of discrete-trial and naturalistic teaching procedures, use of reinforcement procedures to strengthen behaviors, use of motivating operations and discriminative stimuli, use of prompting and prompt-fading procedures to transfer stimulus control, use of shaping procedures to teach new behavior, use of task analysis and chaining procedures to teach new behaviors, use of precision teaching and fluency-based instruction, and use of personalized systems of instruction. Additionally, various components of the aforementioned areas will be integrated and culminate in two modules: one designed to teach communicative behavior and the other to perform discrimination training.

**Prerequisite(s):** PSY 510.

**PSY 520 Interventions for Challenging Behavior 3 Credits**

Students will review principles of behavior in the context of application to functional assessment and treatment of socially significant problem behavior. Topics including extinction, functional communication training, differential reinforcement, choice, environmental manipulations, and punishment will be covered. Students will move through the process of developing function-based interventions and writing behavior plans.

**Prerequisite(s):** PSY 510.

**PSY 521 Supervision and Management in ABA 3 Credits**

This course provides students with skills needed to provide supervision and management in the field of applied behavior analysis. Students will apply the basic principles of behavior analysis to supervision and management of their staff and trainees. Areas covered include establishing performance expectations, selecting supervision goals based on assessment of current skills, how to train personnel to competence, performance monitoring and feedback, functional assessment and function-based strategies of personnel behavior, and how to evaluate the effects of supervision. Additional areas of discussion will include professional behavior, leadership, ethics, and professional development.

**Prerequisite(s):** PSY 510, PSY 511, PSY 513 and PSY 514.

**PSY 525 Cognitive Development 3 Credits**

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

**PSY 530 Interventions for Individuals with Developmental Disabilities 3 Credits**

The purpose of this course is to prepare students to work with individuals with a broad spectrum of developmental disabilities. The course will begin with a discussion of typical child development and milestones, address how development might differ from the norm, introduce subsequent assessment and diagnosis and ultimately, introduce appropriate interventions. The main focus of this course is applied behavior analysis [ABA] and common ABA strategies for intervention.

**PSY 533 Interventions for Autism 3 Credits**

The purpose of this course is to provide students with a general understanding of the clinical characteristics of autism spectrum disorders. The course will briefly address etiology and neurocognitive underpinnings of these disorders but will focus on psycho-educational interventions. The course will be taught from an applied behavior analytic perspective.

**PSY 535 Language Assessment and Intervention 3 Credits**

Students will be introduced to the classification of verbal responses, both vocal and non-vocal. Using videotaped examples, students will categorize observed verbal behavior. Students will be provided with practical tools for the assessment of verbal behavior, as well as an array of intervention strategies. A focus will include the design of teaching strategies to enhance language acquisition, as well as ongoing evaluation of intervention efficacy will be employed.

**Prerequisite(s):** PSY 510, PSY 511.

**PSY 536 Social Skills Assessment & Intervention 3 Credits**

Students will be introduced to the development of social skills and the identification social skills deficits. Using videotaped examples, students will categorize observed social behavior. Next, students will be provided with practical tools for the assessment of social and emotional behavior, as well as an array of intervention strategies. Tools for the collection of data and the evaluation of the success of target interventions will be stressed.

**Prerequisite(s):** PSY 510, PSY 511.

**PSY 545 Health Psychology 3 Credits**

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

**PSY 550 Behavior Analytic Approaches to Health and Physical Activity 3 Credits**

The application of behavior analytic methods, practices, and principles has been demonstrated through research and clinical applications to be effective at changing health and fitness behavior. This course will provide an overview of research and practice in applying behavior analytic principles to changing health behavior and physical activity. Behavior change across various populations will be covered including both adults and children with and without disabilities. Discussion will focus on both functional assessment as well as interventions effective at changing health and physical activity including self-management, self-monitoring, goal setting, contingency management, etc. Students will spend the semester implementing self-management projects for their own health and/or fitness behavior.

**PSY 551 Behavioral Appro to Addiction 3 Credits**

Evidence from laboratory and clinical settings suggests that addiction can be conceptualized and effectively treated through the application of principles of conditioning. This course provides an overview of behavior analytic research in understanding and intervening on addictive behavior. Behavioral technologies for change regarding substance-related and behavioral addiction will be covered.

**Prerequisite(s):** Graduate students in Applied Psychology.

**PSY 565 Drugs and Human Behavior 3 Credits**

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

**PSY 567 Multicultural Perspectives in Applied Psychology 3 Credits**

In this graduate level course, students will examine in-depth, culture and identity formation, social relationships, the perception and manifestation of mental illness, and treatment seeking among other areas. Additionally, given the increasing diversity of communities in the US, the course will also focus on immigration, acculturation, discrimination, and the psychological correlates of each. Implications of these factors for emerging practitioners will also be covered.

**PSY 572 States of Consciousness 3 Credits**

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

**PSY 574 Psychology of the Family 3 Credits**

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

**PSY 577 Developmental Psychopathology 3 Credits**

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

**PSY 582 Aging, Brain, and Cognition 3 Credits**

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

**PSY 584 Positive Psychology 3 Credits**

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 584 is crosslisted with PSY 384.

**PSY 590 Field Placement in Applied Behavior Analysis 3 Credits**

The applied behavior analysis practicum includes a required field placement of 15 hours per week and periodic on campus meetings. The practicum experience will allow students to experience the professional life of a behavior analyst in one of several preapproved sites. Sites approved include those for children, adolescents or adults with disabilities. Placements will be selected in consultation with the Practicum Coordinator and will require a written practicum plan from the cooperating field supervisor.

**Prerequisite(s):** PSY 510, PSY 511, PSY 513, PSY 514.

**PSY 595 Selected Topics in Applied Psychology 3 Credits**

Students will actively engage in an in-depth inquiry into a special topic area concerning applied psychology. Though the topics will change, students will be required to read and discuss current literature as well as considering the application of tools of the discipline to research questions of their own.

**PSY 600 ABA Thesis I 1 Credits**

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

**PSY 601 ABA Thesis II 3 Credits**

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

**PSY 602 ABA Thesis III 3 Credits**

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

**PSY 690 Independent Research and Study 1-4 Credits**

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of Instructor.

**PSY 700 ABA Thesis I 1 Credits**

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

**PSY 701 ABA Thesis II 3 Credits**

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

**PSY 702 ABA Thesis III 3 Credits**

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

**PSY 720 Practicum in ABA 3 Credits**

The Master in Applied Psychology - Applied Behavior Analysis (MAP-ABA) program's practicum offers students supervision from Rider's MAP-ABA faculty and a variety of high quality in-vivo experiences, under the direct supervision of a Rider-Approved Board Certified Behavior Analyst (BCBA), during which students apply the skills acquired in coursework.

**Prerequisite(s):** PSY 510, PSY 511.

**Reading/Language Arts (READ)****READ 503 Content Reading in High School, College, and Continuing Education 3 Credits**

Familiarizes teachers with the philosophy, language, and methodology of the language arts as they effect instruction in content areas. Emphasis is on the ways in which the integration of listening, speaking, reading and writing activities within all curricular areas can increase learning. Through lectures, demonstrations, and workshop-type activities, students will both experience and create lessons within various fields. Also investigates the content and methodology of reading programs in educational settings ranging from middle school through adult education.

**READ 517 Teaching a Second Language 3 Credits**

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. \*NOTE: This course is cross-listed as EDUC 521. Students cannot get credit for both EDUC 521 and READ 517.

**READ 518 Social and Cultural Practices and their Effects on Learning in School 3 Credits**

This course focuses on the customs and cultures of culturally and linguistically diverse learners and how their diversities affect their enculturation into American communities. These differences will be studied by reviewing professional literature and children's literature whose stories are set in the varied locations where these customs are practiced.

**Spanish (SPA)****SPA 500 The Poetry of Resistance in the Time of the Generals in Latin America 3 Credits**

This course offers a broad overview of important historical literature about dictatorships in Latin America. The weekly readings and writing assignments have been selected in order to: 1) introduce major concepts, arguments, and figures in the field of Latin American literature and culture; 2) appreciate the evolution of the role of artists and intellectuals during the years of the "dirty war" in Latin America; 3) sharpen analytical writing; and, 4) demonstrate the connection (and the limits of the connection) between literature, culture, and society. This course is predominantly a study of Latin American governments in the twentieth century and of the role of artists, primarily writers of fiction and poetry, as a corps of truth-tellers and resisters in the face of government propaganda, censorship, and cultural/political repression.

**SPA 510 Marks of Identity: The Journey of the Self in Spanish Theater 3 Credits**

What markers of class, race, ethnicity, gender and even species shape individual and group identity? How does identity change over time? How do I know who I am, and how does my identity further my interests and those of society? Offered in translation, this course explores the staging of identity in Spanish theater from the seventeenth to the twenty-first century. Topics may include the 17th-century honor code and gender, the myth of Don Juan, imperialist imaginings of New World subjects, the romantic hero and the angel of love, identity and the grotesque, identity and erotic desire, identity and media technologies, and non-human animal subjects. Film, art, music and live-theater attendance.

## Special Education-GR (SPED)

### **SPED 500 The Inclusive Classroom: Effective Practices for General Education Teachers 3 Credits**

This course is designed to introduce general education teachers to special education and the inclusive classroom. Students will explore current research, issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed.

### **SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits**

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners. A 10-hour field experience and research component will be required.

### **SPED 512 Psychology of Exceptionality 3 Credits**

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. A 10-hour experience in the field will enable candidates to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

### **SPED 514 Positive Behavior Support 3 Credits**

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multicomponent interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

### **SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits**

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

### **SPED 531 Assessment for Instruction in Special Education 3 Credits**

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

**Prerequisite(s):** SPED 512.

### **SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits**

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

### **SPED 539 Instructional Practices for Students with Disabilities 3 Credits**

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

### **SPED 542 Literacy and Students With Special Needs 3 Credits**

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

**Prerequisite(s):** SPED 512.

### **SPED 580 Supervised Internship in Special Education 3 Credits**

This supervised internship experience will provide students with an opportunity to connect theory and practice in special education during the summer. Students will work full-time in a setting with individuals with disabilities. After a brief period of orientation to the setting, the intern will assume a full load of teaching and/or supervisory responsibilities appropriate to the context of the experience. Seminar meetings will be required. Permission of the program advisor is required.

**Prerequisite(s):** SPED 512, SPED 514, SPED 523, SPED 525, SPED 531, SPED 535, SPED 539.

**SPED 590 Professional Seminar in Special Education 3 Credits**

This course addresses the current issues in the field of special education. Students will synthesize research and literature from the field of special education to address current issues and practice. Collaboratively, students will examine one area of special education through research and presentation. A reflective comprehensive view of special education including assessment, instruction, inclusive practice, assistive technology, Autism Spectrum Disorder, behavior, literacy etc. will be shared. Students are expected to complete a comprehensive exam in these related special education topics and submit 100 hours of supervised field hours. This course should be taken in the final semester of the MA program as it is the culminating reflective course of study.

**Prerequisite(s):** Permission of instructor.

**SPED 600 Independent Study and Research in Special Education 1-3 Credits**

The content of the course varies with the academic research interests of students who wish to engage in independent study related to topics in special education.

# UNDERGRADUATE ACADEMIC POLICIES

## Introduction

Students should refer below for important information regarding Rider's undergraduate academic policies. College/school-specific academic policies are also listed within each of the colleges/schools in the Academic Catalog.

## Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to, those standards and policies set forth in this catalog and in The Student Code of Social Conduct ([https://www.rider.edu/sites/default/files/docs/student\\_code\\_of\\_social\\_conduct.pdf](https://www.rider.edu/sites/default/files/docs/student_code_of_social_conduct.pdf)). **Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student.**
2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirements), creations, and activities engaged in by the student while at the University, including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, internet/web-based productions and sales, and athletic events and all proceeds therefrom. The student has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

## Rider University's Right to Change Catalog Content

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

**Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student.**

While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and

reasonable treatment of interested parties requires in the University's best judgment.

- Transfer Credit While Currently Enrolled at Rider (p. 245)
- Transfer Appeals (p. 245)
- Veterans and Military Service Information (p. 264)
- Withdrawal from the University (p. 245)

## Academic Classification

Students must carry 12 credit hours or more (or their equivalent) in a fall or spring semester to be considered a full-time student. Normal progress toward a degree and academic classification consists of the following credit advancement:

- **Freshman:** 0 – 23 hours
- **Sophomore:** 24 – 53 hours
- **Junior:** 54 – 89 hours
- **Senior:** 90 or more hours

On the Lawrenceville campus, a minimum of 120 hours and on the Princeton campus, a minimum of 124 hours are necessary for baccalaureate degree completion. On both campuses, some degrees require more. College of Continuing Studies students require 60 credits for associate degree completion.

Students receiving financial aid from any source need to be particularly concerned with their full-time status and making normal progress toward a degree.

In **Westminster College of the Arts**, special (non-degree) students are not enrolled in a program that will lead to a degree, although they may have previously completed a degree in the college. They may enroll in courses at or below the 500-level at the discretion of appropriate academic personnel. Those holding baccalaureate degrees who wish to take courses at the 600 or 700-level may be asked to qualify by means of completing the graduate application process or by satisfying other criteria.

## Academic Concern, Conditional Standing/Dismissal and Readmission

- Academic Concern
- Conditional Academic Standing (p. )
- Academic Dismissal from the University (p. )
- Dismissal from a Major within Westminster College of the Arts (p. )
- Undergraduate Education Minimum Standards (p. )
- Readmission after Academic Dismissal (p. 230)

All students permitted to enroll at Rider University are in good standing and are qualified to be bona fide students. Decisions regarding academic progress, conditional standing, and dismissal for poor scholarship are the responsibility of the Committee on Academic Standing within each college or school. These committees may establish and apply criteria in addition to the minimum university cumulative grade point average (GPA).

Using approved academic criteria, the Committee on Academic Standing within each college or school may review the academic record of any student.

Because a minimum 2.0 cumulative grade point average (GPA) is required for graduation, students are expected to maintain a minimum 2.0 cumulative GPA while enrolled at Rider. Students who fail to meet this minimum will be reviewed by the appropriate Committee on Academic Standing and may receive a letter of academic concern, be placed on conditional standing, or be dismissed from the University. Students who meet the minimum cumulative GPA but who are dismissed from a specific college or school for other reasons are eligible to apply to another college or school of Rider University.

Undergraduate education students are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University and must receive a grade of 'C+' or higher in all education courses. It is the individual student's responsibility to re-take any education course in which a grade lower than 'C+' has been earned. Undergraduate education students will be permitted to undertake student teaching only if they have received 'C+' or higher in all education courses and have a minimum 3.0 cumulative GPA. See the Undergraduate Education section below for further information.

Undergraduate music education students are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University and must pass the sophomore portfolio to remain in good standing in the major. See the Undergraduate Education section below for further information.

## Academic Concern

Upon review of a student's academic record, a Committee on Academic Standing may issue a letter of concern, which responds to academic progress that does not meet college, school or university expectations, and describes an academic plan of study that must be met in the subsequent semester. Students who fail to pursue a course of study prescribed by an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be placed on Conditional Academic Standing or dismissed.

## Conditional Academic Standing

Upon review of a student's academic record, a Committee on Academic Standing may place a student on Conditional Academic Standing. In reaching this decision, the committee may require a student who does unsatisfactory work to pursue a specific course of study during a particular academic session. Students who fail to pursue a course of study prescribed by an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be continued on Conditional Academic Standing or may be dismissed without further right of appeal. There must be substantial evidence of proper motivation and a capacity for doing college level work to warrant maintaining a student in school with a record of continued conditional status as opposed to dismissal.

Students on conditional academic standing may not register for an academic overload. Additionally, students must be removed from conditional status in order to be approved for graduation.

## Academic Dismissal from the University

Students who have not done satisfactory work may be dismissed from the University for poor scholarship at the end of any semester after an appropriate review of their scholastic records by the Committee on Academic Standing within their college or school. Students may also be subject to academic dismissal if their cumulative GPA falls below the required minimum for two or more consecutive semesters, or the GPA falls below the required averages established at the freshman, sophomore, junior and senior levels. Academic dismissal at the end of the fall semester is effective prior to the beginning of the spring semester. Academic dismissal at the end of the spring semester is effective prior to the beginning of summer session II.

Students who wish to appeal a dismissal must submit a written statement of appeal to the academic dean of their college or school within 10 days from the date on their letter of dismissal. All appeals submitted by the deadline will receive consideration by the appropriate academic standing committee.

Dismissal for academic reasons terminates a student's relationship with Rider. Dismissed students may not enroll for courses nor participate in university-sponsored activities or ensembles at either campus for a period of one year following their dismissal. Students dismissed for academic reasons normally will not be eligible for readmission within one calendar year of the dismissal date. Although some students will apply for readmission, there is no real or implied right to such readmission.

Students dismissed by the School of Fine and Performing Arts (SFPA) or Westminster Choir College (WCC) but not Rider University may apply for enrollment in other colleges of the University. Students dismissed by WCC but not Rider University may not enroll in WCC courses, ensembles or activities until they have been readmitted to WCC with the exception of courses, ensembles or activities that are delivered by or at WCC and are required in music degrees housed within the School of Fine and Performing Arts (SFPA). Students dismissed by SFPA but not Rider University may not enroll in SFPA courses, ensembles or activities until they have been readmitted to SFPA.

## Dismissal from a Major within Westminster College of the Arts

Academic departments within Westminster College of the Arts reserve the right to dismiss a student from a major following notification that their standing in the major is in jeopardy and the passage of a suitable amount of time permitted to address stated issues, typically one semester. Such dismissal may be based upon any of the following conditions: failure to maintain a satisfactory or minimum GPA; failure to sustain academic progress in the courses of the major; conduct in violation of the standards of the department or profession; failure to meet conditions or requirements as stated in university catalogs, The Student Code of Social Conduct, or the departmental handbook; or the student's general standing at Rider University. Such dismissal will become effective at the end of the semester in which the decision is reached. Students dismissed from Music Education are not permitted to enroll in Music Education courses until readmitted into the Music Education major.

## Undergraduate Education Minimum Standards

Undergraduate education students are required to have a minimum 3.0 cumulative GPA by the time they register for student teaching and must receive a grade of 'C+' or higher in any Education course (a) that is specifically required for a major or minor in Education and (b) in which enrollment is limited to Education majors. It is the individual student's responsibility to re-take any required education course in which a grade lower than 'C+' has been earned. Undergraduate education students will be permitted to undertake student teaching only if they have received 'C+' or higher in all required education courses and have a minimum 3.0 cumulative GPA. See the Undergraduate Education section below for further information.

The undergraduate education department also reviews the professional development of all students to ensure that they meet departmental standards for professional conduct and that they show promise of success in teaching. This review is in addition to the grade requirements listed above. Students must earn a passing score on all sections (reading, writing, math) of the Core Academic Skills for Educators Test before registering for any methods courses. This is a NJ Department of Education rule that applies to all elementary, secondary and business education students.

Undergraduate music education majors are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University, must pass the sophomore portfolio to remain in good standing in the major, and must earn a passing score on all sections (reading, writing, math) of the Core Academic Skills for Educators Test.

All undergraduate education and music education students must present evidence of a passing score on the Praxis Content Area (Secondary) or Multi-Subject (Elementary) Assessment (formerly Praxis II) in their specialization area prior to the full time student teaching semester (by March 1 for those applying for full time student teaching in the fall semester and July 1 for those students applying for full time student teaching in the spring for Secondary Education and before registering for ELD 308/376 for Elementary Education). This is the same Praxis Content Area or Multi-subject Assessment (formerly Praxis II) students will need for certification.

As appropriate, students who fail to meet the undergraduate education department's standards will be counseled on ways to improve their performance or will be asked to leave the program.

## Readmission after Academic Dismissal

Dismissed students seeking readmission must first contact the Registrar's Office (<https://www.rider.edu/academics/academic-support-services/registrar>), Fine Arts Building, on the Lawrenceville campus or the Associate Dean of Students Office, Scheide Student Center, on the Princeton campus to obtain appropriate forms. Once the Registrar or Associate Dean of Students or his/her designee approves the readmission application, the application is forwarded to the dean of the college to which the student seeks reentry. Students dismissed for academic reasons must submit with their readmission application a personal letter to the Academic Standing Committee which will make decisions concerning their readmission. They should also provide evidence, usually in the form of a transcript from another institution, of formal study and/or accomplishment. If possible, such work should have been done in specific areas of deficiency in the student's academic record.

Academically dismissed students must meet all academic requirements in place at the time of their readmission. Readmission will be dependent upon various criteria including GPA, current academic progress, and the student's general standing. Students in the Westminster College of the Arts may be required to reapply or readmission.

If readmission is granted, the student is placed on conditional academic standing until the cumulative GPA reaches a satisfactory level of at least 2.0. A readmitted student is responsible for curriculum requirements in effect at the time of readmission.

## Academic Load/Overload

The normal maximum academic load for Lawrenceville students shall not exceed 17 semester credit hours per semester. The normal maximum academic load for Princeton students shall not exceed 18 semester credit hours per semester. Permission to exceed these loads must be obtained from the student's academic dean's office.

Lawrenceville students may exceed the normal maximum academic load after passing 45 semester credit hours and attaining a cumulative grade point average of 3.0 or higher.

Princeton students may exceed the normal maximum academic load after passing 24 semester credit hours and attaining a cumulative grade point average of 3.0 or higher.

Students who exceed the normal load are required to pay an overload per credit fee for each credit over 18, except in the case of non-billable hours.

Students on Conditional Academic Standing may not register for an academic overload.

Students may enroll for a maximum of 14 credits during Summer I and II combined with no more than 7 credits in any combination of I sessions or II sessions. These maximums may be exceeded only with the permission of the student's academic dean.

Students should understand that for every hour spent in class, they are expected to spend two to three hours studying outside of class time, and should therefore plan their academic load accordingly. Study time may vary based on the student's background knowledge and class difficulty.

## Academic Programs

The Academic Programs A to Z Chart (p. 10) lists Rider University's majors, minors and certificates alphabetically, along with the college or school (p. 11) that grants each degree, major, minor and certificate. The following definitions explain the difference between majors, minors, tracks, concentrations, and emphases:

**Major** An organized group of courses ranging from introductory through advanced levels. Typically most if not all courses are in a single primary area of study, although some majors include study in multiple disciplines. Undergraduate majors require between 18 and 90 credits, depending upon the liberal arts or professional focus. Graduate majors require between 30 and 45 credits. Entrance into some majors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the major is listed on the official transcript.

**Minor** An organized group of courses, typically involving introductory through intermediate levels. While most minors are in a single discipline, Rider University offers several interdisciplinary minors, such as Law and Justice, and Sustainability Studies. Minors are offered at only the undergraduate level, and require between 15-24 credits. Some departments have restrictions on the connection between major and minor options. Entrance into some minors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the minor is listed on the official transcript.

**Track** A choice of specialty within a degree, tracks comprise an organized group of courses serving a particular focus within a major. In undergraduate and graduate majors that represent multiple disciplines, tracks indicate a particular disciplinary focus. In a single discipline major with tracks, each track represents a singular focus, often representing a liberal arts or professional path. In some cases, a track represents a sub-specialization within the major field. Entrance into some tracks, particularly those that represent a particular disciplinary focus, may require prerequisites, portfolios, auditions, or other forms of assessment. Tracks require between 21 and 52 credits. Upon completion of all requirements, the track is listed on the official transcript along with the major field of study.

**Concentration** Concentrations, such as English Literature or English Writing, represent a specialty or focus within an undergraduate or graduate major field of study. Typically, a concentration unites courses around content or a particular theme. Concentration requirements are a portion of a major, not the entire major itself. In some cases, concentrations refer to an interdisciplinary combination. Entrance into some concentrations may require prerequisites, portfolios, auditions, or other forms of assessment. Undergraduate concentrations require between 12 and 36 credits; graduate concentrations range from 9 to 18 credits. Upon completion of all requirements, the concentration is listed on the official transcript along with the major field of study.

**Emphasis** Typically an organized group of courses in a single discipline, the emphasis represents a subset of credits within an undergraduate or graduate major. The emphasis provides a coherent focus of study within a discipline, which may or not be in the major field. Typically an emphasis represents less than a third of the total major credits, mostly ranging from 15 to 19 credits. Entrance into some areas of emphasis may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the emphasis is listed on the official transcript along with the major field of study.

## Academic Records

Academic records are maintained by the Registrar and the dean's office of each college or school for a minimum of 10 years from the date of last attendance. Records may be kept longer at the sole discretion of the University.

Access to student academic and other records may be accorded to Rider personnel with a legitimate educational interest in the records. Information may be released to other agencies and individuals according

to these policies in compliance with the Family Educational Rights and Privacy Act (FERPA) of 1974 (as amended):

- Rider may release the following information without written permission from the student: fact of enrollment, dates of enrollment, degree candidacy, degree awarded, and major field.
- Rider may release the following information unless the student has requested in writing by the end of the second week of classes each semester that the information not be released: name, email, home and local address, and home and local telephone number, participation on athletic teams and organizations, dates of attendance and honors and awards received.

No other information concerning a student will be released without that student's written permission.

Students having a complaint or question regarding FERPA may write to: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-8520.

Students may request to view their academic record by making an appointment with the appropriate dean's office.

## Accompanying Costs for Voice Students

Any student studying individual voice at Rider University should expect, in most cases, to hire an accompanist. Students may choose to hire a college-approved accompanist. The per-semester fee is not refundable in any part if a student discontinues voice study or decides to seek out another accompanist. For additional information, see Tuition and Fees on Rider's website: <https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees>.

## Advanced Placement (AP) Credit

Students who have taken an AP exam may submit official scores to obtain credit. For a complete listing of courses and credits and other information, see AP Credits at <https://www.rider.edu/admissions/undergraduate/how-to-apply/ap-credits>

## Applied Music - Westminster College of the Arts

Individual applied music lessons for academic credit are available to all Rider University students with prior experience, regardless of major. Lessons are available in brass, composition, conducting, guitar/bass, harpsichord, organ, percussion, piano, strings, woodwinds, and voice. For all students whose major or minor program does not require applied music lessons, and for those students who have completed the applied music requirements for their degree program, fees for this elective (non-required) study will apply. Elective lessons are provided on a space-available basis. All part-time students are charged an applied music fee.

Students may earn 1 or 2 credits per semester, with the exception of graduate applied composition courses, which carry 3 credits per semester. Each fall, spring, or summer applied course consists of twelve private lessons, or the equivalent instructional time, and may require participation in studio classes, performance classes, and/or an end-of-semester jury or performance review. Applied lessons completed during the January term follow specific departmental requirements regarding instructional time.

All applied music students must observe departmental applied requirements listed in the catalog and in departmental handbooks.

Applied lesson fees are described on the Tuition and Fees section of Rider's website.

All applied music students must observe departmental applied requirements listed elsewhere in this catalog and in departmental handbooks. Students for whom applied music lessons are not required may register for lessons on a space-available basis. Interested students should consult the Associate Dean.

Applied lesson fees are described on the Undergraduate Tuition and Fees (<http://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees>) section of Rider's website (<https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees>).

Effective as of the fall 2009 semester for all new or readmitted Rider University students on both campuses. For all students whose major or minor program does not require applied music study, or for those students who have completed applied music requirements, elective fees will apply. All part-time students are charged an applied music fee.

Registration for applied music study follows this table of suffixes. Students will register for the appropriate course number and suffix, as indicated in the curriculum pages found elsewhere in this catalog.

## Full-time Students

**A – One-hour, 2-credit required lesson. Included in tuition – no extra charge.**

- Lawrenceville example: Musical Theatre major
- Princeton example: All undergraduate majors

**B – Half-hour, 1-credit required lesson. Included in tuition – no extra charge.**

- Lawrenceville example: Popular Music Culture, up to 3 semesters
- Princeton example: Theory/Composition major (half-hour voice or keyboard lesson)

**C – One-hour, 2-credit elective lesson. Not included in tuition – fee charged per semester.**

- Both campuses: Student who has completed all required lessons in their major. Student whose major does not require lessons.

**D – Half-hour, 1-credit elective lesson. Not included in tuition – fee charged per semester.**

- Both campuses: Student who has completed all required lessons in their major. Student whose major does not require lessons.

**G – One-hour, 2-credit required/elective lesson. Half-hour is required and is included in tuition. The second half-hour is elective and is not included in tuition – fee charged per semester.**

- Lawrenceville example: Popular Music Culture, up to 3 semesters
- Princeton example: Theory/Composition major (full-hour voice or keyboard lesson)

## Part-time Students

(all students, both campuses, regardless of major or requirements)

- Suffix E – One-hour, 2-credit required or elective lesson – fee charged per semester.
- Suffix F – Half-hour, 1-credit required or elective lesson – fee charged per semester.

## Change of Applied Teacher

Students wishing to change their applied teacher must apply to the chair of the appropriate department. Any change requested after the beginning of a semester will require the permission of both applied teachers and the department chair. If either applied teacher is the department chair, permission of the Associate Dean also is required.

## Change of Major or Applied Primary Area

Students wishing to change their major or the applied primary instrument must complete the appropriate form. Permission of the old and new major departments is required.

## Class Attendance/Absence

It is the prerogative as well as the responsibility of each faculty member to establish a clear policy for each course of instruction in regard to the nature and extent of student participation that will be expected and required.

The effect of absences upon the student's standing in a particular class will be left to the determination of the instructor in the course. However, it is expected that faculty members will be fair and reasonable concerning validated absences due to field trips, practicum, religious observance, participation in varsity athletics, placement interviews for graduating seniors, Westminster College of the Arts rehearsals or performances, and illnesses sufficiently serious to be certified by either the University Health Center or the student's physician. The faculty member should consult with the Dean of Students in instances where doubts arise regarding the course to follow in evaluating student absences.

It is the student's responsibility to inform instructors of the nature and extent of an actual or anticipated absence. If that is impossible, or if the absence is or will be more than three (3) consecutive class session (seven [7] calendar days), the student should contact the Office of the Dean of Students at 609-896-5101. Then the dean's office will notify the appropriate faculty member.

## Class Cancellation Policy and Excused Absences for Princeton Campus Students Only

During run-outs involving Westminster ensembles, private lessons for those students not involved in the run-out continue to meet. When a college-sponsored performance necessitates that 30% or more of the students in a class be absent, the class may be cancelled at the discretion of the faculty member.

The dean will excuse individuals or groups of students who are participating in college-sponsored events. Only students registered for the class or ensemble participating in an activity will be excused from class. Students excused from class(es) under these circumstances remain responsible for all class work.

## Class Cancellation – Both Campuses

In most cases, Rider will remain open and fully operational during inclement weather and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, close certain buildings or take other emergency actions.

If such circumstances should arise, notification will be made by phone call, text and/or email via RiderAlert, Rider's mass electronic messaging system. Students can update their information via the link: RiderAlert (<http://www.rider.edu/rideralert>) (<https://www.rider.edu/rideralert>).

Cancellations will also be announced online at [www.rider.edu](http://www.rider.edu) (<https://www.rider.edu>) and on the Rider University information hotline at 609-219-2000, option 1.

## College Level Examination Program (CLEP)

In certain cases, Rider University accepts credits earned through the College Level Examination Program (<https://clep.collegeboard.org>) (CLEP). Students should consult with their academic dean to determine if credit may be awarded by CLEP. Typically, a minimum score of 50 is required on an individual examination. Generally, students may obtain CLEP credits prior to reaching Junior standing.

## Commencement Requirements – Westminster Choir College only

Academic year requirements at Westminster Choir College extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Schola Cantorum, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness. In particular, credit for spring semester choir participation is lost if a student does not attend and is not excused from Commencement. All other students are encouraged to participate in Commencement.

Students singing in one of the choirs for the Commencement ceremony will be provided with a red choir robe for the ceremony. Students participating in the ceremony as part of the graduating class can order academic regalia free of charge from Westminster Music and Books (<https://rider.bnccollege.com/webapp/wcs/storeservlet/BNCBHomePage?storeId=87921&campusId=87921&userId=-1002&catalogId=10001&ddkey=http:BNCC>

## Course Credits

Rider University has a 13-week semester, followed by seven days of examinations.

Rider uses the true number of minutes per hour-long session; i.e., a one-hour meeting is actually 60 minutes. Three-credit classes meet for 60, 90, or 180 minutes, corresponding to, respectively and typically, 3, 2, or 1 meetings per week.

In the Westminster College of the Arts all performance courses receive credit:

- All ensembles receive 1 credit
- Other performance-based courses receive 1-3 credits
- A full-semester Student Teaching experience receives 12 credits.

- Westminster Choir College students enrolled in LL 037, MTH 100S, PI 045, or TH 045 receive credit toward their semester course load, but such credits do not count toward graduation.

Applied music instruction receives 1-3 credits.

## Course Level Numbering

Courses numbered below 100 are taught at pre-college level and carry no credit. Courses numbered at the 100- to 400-level carry only undergraduate credit. The course number indicates the anticipated audience for a course; 100 level courses are designed for freshmen, 200 level for sophomores, etc.

### On the Princeton campus:

1. Courses at the 500-level are open to undergraduate and graduate students. Undergraduate students who have earned at least 60 credits and a minimum cumulative GPA of 3.0 may enroll in a 600-level course upon permission of the instructor and the Associate Dean. Undergraduate students who have earned at least 90 credits and a minimum cumulative GPA of 3.8 may enroll in a 700-level course upon permission of the instructor, the Director of Graduate Studies and the Associate Dean.
2. Students with undergraduate status in the five-year B.M./M.A.T. program may take graduate courses required in that curriculum at the 500- or 600-level. Students in the B.M./M.A.T. program may take required 700-level courses in the senior year or upon successfully completing 124 credits and the student teaching semester. Students in the B.M./M.A.T. program who have not attained graduate status may enroll in non-required 700-level courses according to the restrictions stated in the previous paragraph.
3. Special students who have completed a baccalaureate degree may apply for permission to take 600- or 700-level courses. Undergraduate students in the Baccalaureate Honors Program (BHP) should see the Assistant Registrar regarding enrollment in graduate courses.

## Course Repeats - Westminster College of the Arts

All undergraduate and graduate students who are enrolled in a major or minor offered by the Westminster College of the Arts may enroll for a second or subsequent time in any *non-repeatable* WCA course from which they have withdrawn, in which they have earned an "F," or in which they have failed to earn the required minimum grade<sup>1</sup> according to the following rules:

- 1) Students who have withdrawn from, failed, or failed to achieve the required minimum grade in a required course<sup>1</sup> in their first attempt at the course may enroll for a second time without permission. All other students must have the permission of the Associate Dean.
- 2) Permission of the dean or associate dean of the college (FPA or WCC) offering the course in question is required in order to enroll in a course for the third time.
- 3) Permission of the Academic Standing Committee of the college (FPA or WCC) offering the course in question is required in order to enroll in a course for the fourth time. Permission for a fourth enrollment will be granted only in rare, extenuating, and documented circumstances.

In all instances, the most recent grade is calculated into the grade point average, and all listings and grades will remain on the transcript.

- <sup>1</sup> Examples include: a minimum grade of "B-" is required in Piano Secondary, a minimum grade of "C" is required in foreign language study in order to progress to the next level in that language.

## Courses – Adding, Dropping, Withdrawing, Repeating, Auditing

Timetables and deadlines given below pertain to fall and spring semesters. Students should consult the Registrar's web page (<http://www.rider.edu/academics/academic-support-resources/registrar>) for summer session deadlines.

### Adding Courses

Students may add courses through the first week of the regular semester at their own discretion provided the course is still open for registration.

### Dropping Courses

Students may drop courses through the second week of the regular semester at their own discretion. In such cases, the courses are deleted from the student's record. After the second week of the semester, a withdrawal from the course is necessary and a 'W' is recorded on the transcript.

### Course Withdrawals

Students may withdraw from courses and receive a grade of 'W' during the third through seventh weeks of the semester. In the semester's eighth through eleventh weeks, students may withdraw from courses with the written consent of the course instructor and receive a grade of 'W'. Differing subject matters, instructional methodologies and course objectives make it likely that instructors will have differing criteria for giving consent to withdrawal in this period.

After the end of the eleventh week of the semester, students may withdraw from courses and receive a grade of 'W' only for validated reasons of physical or psychological incapacity. Validated reasons of physical or psychological incapacity serve as justification for a student to withdraw from courses with a grade of 'W' at any time beyond the add/drop period. Reasons must be validated by the Dean of Students and approved by the academic dean of the college in which the student is enrolled.

Students are required to notify Student Financial Services when withdrawing from courses as these circumstances may impact financial aid eligibility.

Student-athletes are required to notify the Associate Director of Athletics for Compliance and Academic Support or the Director of Athletics prior to withdrawing from courses.

Students receiving veterans benefits must report such changes to the Registrar's Office immediately.

Course withdrawal forms are available in the Registrar's and College of Continuing Studies offices.

Withdrawal policies during special sessions (summer session, J-term) observe time limits proportional to the time limits of a regular semester.

## Repeating Courses

Students may request permission from the academic dean to repeat a course to earn a better grade provided that the course is one that cannot be repeated for additional credit (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). The grade first earned will remain on the transcript but only the latest grade will be used in computing grade point average and determining whether or not degree requirements have been met.

Students who fail a required course must repeat the course until a passing grade is received. Students do not have to repeat a failed elective, but must pass another acceptable elective of comparable credit in order to meet graduation requirements.

Students receiving financial aid should consult with Student Financial Services before repeating a course already passed to determine the possible impact upon the student's continuing eligibility for financial aid.

## Auditing Courses

Students who want to attend classes without taking examinations or receiving grades may audit courses subject to space availability and the permission of the instructor. No credit is earned for audited courses. Transcripts will record an audit with the notation of 'AU.'

Performance based courses cannot be audited (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). For a complete list of performance-based classes, please see the Assistant Registrar on the Princeton campus.

The extent to which an auditor may take part in a course's activities is determined by the student and the instructor. In addition to the audit fee, students auditing a course carrying separate fees must pay all such required fees.

Lawrenceville students in the College of Continuing Studies (<http://www.rider.edu/academics/colleges-schools/college-continuing-studies>) who wish to audit courses should apply and register in the College of Continuing Studies office during the first week of class. Other Lawrenceville students should apply and register through their dean's office and the Registrar.

Princeton students who wish to audit courses should apply and register in the office of the Assistant Registrar during the first week of class.

Students who register on an audit basis may not change from audit to credit during a semester, except during the add period. Students originally registered for credit may change to audit status during the add / drop period. Students should refer to the academic calendar (<http://www.rider.edu/academics/academic-support-services/registrar/academic-calendars>) of each term (Spring, Summer, Fall, or JTerm) for specific add and drop / add dates. Students who have audited a course may take that same course for credit in a later semester at full tuition.

## Credit by Examination

Credit for certain undergraduate courses may be earned by examination.

Please see the chairperson of the department offering the course to determine if a course is available for credit by examination.

## Dance Study

*Effective as of the fall 2014 semester for all new or readmitted Rider University students on both campuses:* All students whose major or minor program does not require applied dance study under the DAN prefix, or for those students who have completed dance requirements, elective fees will apply. All part-time students are charged a dance fee.

Registration for applied dance study follows this table of courses.

Students will register for the appropriate course number, as indicated in the curriculum pages found elsewhere in this catalog. Maximum enrollment under full-time tuition:

- In **B.A.-Dance/Performance Track**, a total of 15 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School (PBS).
- In **B.A.-Dance/Dance Studies Track**, a total of 14 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School.
- In **Dance Minor**, a total of 8 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School.
- **Registration for DAN 100 and DAN 300** requires a placement completed with dance faculty.

## Full-time Students

**DAN 100-01** (Fundamentals of Dance) – 1-credit required course taken at PBS. Included in tuition – no extra charge.

Example: B.A./Dance majors and minors up to the maximum stated above.

**DAN 100-EF** (Fundamentals of Dance) – 1-credit elective course taken at PBS. Not included in tuition – fee charged per semester.

Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

**DAN 151** (Pilates and Modern) – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

**DAN 152** (World Dance & Improvisation) – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

**DAN 300-01** (Lecture and Studio in Dance) – 2-credit required course taken at PBS. Included in tuition – no extra charge. Example: B.A./Dance majors and minors up to the maximum stated above.

**DAN 300-EF** (Lecture and Studio in Dance) – 1-credit elective course taken at PBS. Not included in tuition – fee charged per semester.

Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

**Note:** Students choosing to register for both DAN 100-EF and DAN 300-EF as elective study in the same semester will be charged an inclusive fee.

---

## Part-time Students

(all students, both campuses, regardless of major or requirements)

**DAN 100-EP** –1-credit course taken at PBS. Not included in tuition – fee charged per semester. For majors and minors, course counts toward the maximum stated above.

**DAN 300-EP** –2-credit course taken at PBS. Not included in tuition – fee charged per semester.  
For majors and minors, course counts toward the maximum stated above.

**Note:** Part-time students choosing to register for both DAN 100-EP and DAN 300-EP in the same semester will be charged an inclusive fee.

## Dean's List

The **Dean's list** is prepared at the end of the fall and spring semesters to recognize students who have earned academic honors.

### Eligibility for the Dean's list is as follows:

In the College of Business Administration, College of Liberal Arts and Sciences, College of Education and Human Services, and School of Fine and Performing Arts, a student must be enrolled full-time, have no grade lower than "C" and must achieve a minimum semester grade point average of 3.50.

In Westminster Choir College, a student must be enrolled full-time, have no grade lower than "C," have no "Z" grades, and must achieve a minimum semester grade point average of 3.70.

In the College of Continuing Studies, student must have no grade lower than "C" and must achieve a minimum grade point average based on the number of credits earned in a given semester as follows – 6 to 8 credits: 3.75 GPA; 9 to 11 credits: 3.60 GPA; 12 or more credits: 3.50 GPA.

## Degree Completion

Students who have not completed all requirements within 10 years of initial enrollment may be required to repeat courses and/or meet further requirements. Students for whom more than one year has elapsed since the date of last enrollment may be required to re-apply and/or re-audition for the program, and must meet all requirements in place at the time of their readmission.

Credits earned at another institution or through Westminster Continuing Education outside the 10 year period that commenced with initial enrollment in a degree program must be approved for transfer into that program by the department offering the degree.

## Diploma Conferral

Diplomas are conferred three times each year: May, August, and December.

Students must submit a degree application form, available online via MyRider (<http://myrider.rider.edu>) or in their academic dean's office, in order to be eligible to receive a diploma on any date. Students must apply for graduation by the deadlines established each year by the Registrar's Office. More information is available on the Commencement Candidates (<http://www.rider.edu/academics/academic-support-resources/registrar/commencement-candidates>) web page.

Diplomas are conferred only upon those who have met 100% of all degree requirements. Students in the combined B.M./M.A.T. program receive both diplomas upon the completion of all requirements.

## Academic Disability Policy

Rider University supports the protections available to students with disabilities under Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended, and the New Jersey Law Against Discrimination.

Student Accessibility and Support Services (SASS) facilitates equal access to the programs and activities at Rider University for students with disabilities, as defined by the Americans with Disabilities Act (ADA).

Students must initiate contact with SASS in order to receive services and to arrange reasonable accommodations, such as course adjustments, course substitutions and auxiliary aids. Any Rider student who supplies SASS with appropriate documentation of a disability is eligible on a case-by-case basis for reasonable accommodations. Students with disabilities should contact SASS (Joseph P. Vona Academic Annex, Room 8, 609-895-5492) to discuss available services and reasonable accommodations, including academic adjustments.

Only students with documented disabilities that prevent equal access to an academic course or program are entitled to reasonable accommodations, which may include course adjustments, course substitutions and auxiliary aids. A reasonable accommodation is an accommodation that provides the student with equal access to the academic course or program, including all course or program materials, but does not impose an undue burden on the University or constitute a fundamental alteration to the course or program in question. Knowledge of the essential course and program standards resides primarily with the individual faculty member and/or the academic department.

SASS evaluates the disability documentation provided by the student, collects additional information from the student, and gathers information from relevant educational support personnel (e.g., high school guidance counselors), medical and psychological professionals, and other pertinent sources outside of Rider University. When the student's disability has been sufficiently documented and potential reasonable accommodations have been identified, the student is provided a Notice of Academic Adjustments specific to each course and encouraged to present that Notice of Academic Adjustments to the relevant faculty member and to discuss, in a private setting, how the reasonable accommodations will be implemented.

If any such faculty member has concerns that the accommodations constitute a fundamental alteration to the course or program in question, that faculty member shall promptly contact SASS to initiate discussion and resolution of those concerns.

## Double Major

Students wishing to pursue two majors within a college or school (or majors in different colleges or schools), each of which leads to the same baccalaureate degree (e.g., B.A. or B.M.) may do so provided they receive requisite approvals, satisfy the general education or core requirements for the degree they designate as primary, satisfy all of the major area requirements for each program, and satisfy all other requirements for each major. Upon completion of all requirements, the student will be awarded one degree but the transcript will indicate two majors.

## Dual Degrees

Students wishing to pursue two majors within a college or school (or majors in different colleges or schools), each of which leads to a separate and distinct baccalaureate degree may do so provided they receive

requisite approvals, satisfy all of the requirements for each major, and satisfy all other requirements for each degree. Upon completion of all requirements, the student will be awarded a second baccalaureate degree.

## Employment Opportunities – Westminster Choir College

The University provides work opportunities both on and off campus.

Students who demonstrate financial need as determined by the FAFSA are offered Federal Work Study in their award. Students who have no need are paid through a student employment budget. It is the responsibility of students to find their own jobs. All students are encouraged to apply for available employment opportunities. Bi-weekly paychecks are provided directly to students rather than to student accounts.

Weekend church positions: Many Westminster students are employed in area churches on a part-time basis as organists, directors, and singers.

Princeton employment: The Princeton area provides many opportunities for part-time employment in local businesses.

## Engaged Learning Policy

### Definition

“Engaged Learning” refers to activities in which students apply knowledge gained in educational settings beyond the classroom; delve further with independent scholarship and creative expression; broaden their horizons with study abroad or cross-cultural encounters; become problem solvers, leaders and team members in their communities; and prepare for professional and civic lives that make a difference. Rider’s students are required to complete at least two high-impact Engaged Learning Experiences that reflect the University’s strategic themes of leadership, ethics and social responsibility, and global and multicultural perspectives. These experiences will help students build bridges between their courses of study and the world in which they live.

### Requirements

All Rider University undergraduate students<sup>1,2</sup> are required to earn a minimum of six points, spread across at least two Engaged Learning categories. The six categories of Engaged Learning are:

1. Leadership and Mentoring
2. Study Abroad and Cultural Exploration
3. Guided Research and Scholarship
4. Civic and Community Engagement
5. Internship, Co-Op, and Field Work
6. Arts, Media and Creativity

<sup>1</sup> Transfer students who bring fewer than 31 accepted credits to Rider will be required to earn six (6) Engaged Learning points. Transfer students who bring 31 or more accepted credits to Rider will be required to earn three (3) Engaged Learning points. Points must be spread across at least two of the Engaged Learning categories.

<sup>2</sup> All NCAA Division I athletes will receive 3 Engaged Learning points each semester when the Director of Athletics submits the roster to the Registrar. Their remaining points will be completed from the approved list of Engaged Learning experiences or courses. Points must be spread across at least two Engaged Learning categories.

## Earning Points

### Academic courses

Credit bearing courses approved as Engaged Learning Experiences need not be submitted by students to earn points. Once a student completes a course that has been designated as Engaged Learning, points equal to the number of credits (up to a maximum of 3 points), will be automatically assigned by the Registrar’s Office. The Registrar’s Office will insert the course on the Engaged Learning Transcript. A full list of the eligible courses is available on the Engaged Learning Program (<https://www.rider.edu/engaged-learning/program>) webpage.

### Experiences

When students engage in experiences that are not connected to academic courses, they must initiate the review and approval process themselves. Forms for student submissions of eligible experiences are available in BroncNation (<https://broncnaion.rider.edu>). Instructions for completing the forms, submission guidelines and a complete list of eligible experiences are available on the Engaged Learning Program (<https://www.rider.edu/engaged-learning/program>) website.

Submitted experiences will be reviewed by designated approvers and, upon approval, will be reported to the Registrar by the end of each semester to be listed on the student’s Engaged Learning Transcript. For experiences not approved, students may appeal to their academic dean.

## Contact

### Ms. Sandra Ober

Engaged Learning Coordinator  
Moore Library, Suite 120  
609-896-5000 Ext. 7055

## Ensembles/Productions - Attire and Registration

### Attire

Students must purchase official ensemble attire for choirs in which they are enrolled. Freshman/transfer students at the Princeton campus must be fitted during orientation and purchase a red robe which will be charged to their student account by the Bursar’s Office.

### Registration

Students participating in music ensembles or artistic productions must be registered for the course that accompanies that activity. It is the responsibility of the student to ensure proper registration in the appropriate course. Excused absences are granted only to registered students.

Each semester, the official personnel roster for each ensemble will be finalized for that semester at the end of the schedule adjustment period, typically two weeks after the first day of classes.

Freshman class eligibility for non-required ensembles or productions is determined by the appropriate department/program/applied area, with the approval of the appropriate Academic Policy Committee.

## Full-Time Tuition Inclusion

**Please see the table of applied lesson suffixes in the Applied Music (p. 232) section in the Undergraduate Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.**

### Lawrenceville Students

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred when full-time students exceed maximum load levels, excluding recital credits or participation in auditioned choirs or productions for School of Fine and Performing Arts majors.

**For School of Fine and Performing Arts students, full undergraduate tuition includes:**

1. For School of Fine and Performing Arts students, full undergraduate tuition includes:
2. A minimum of 12 and maximum of 18 credits per semester or the equivalent including non-credit courses.
3. Primary applied music study (p. 232) to the maximum required credits/semesters.
4. Applied dance study to the maximum required credits/semesters. (see below)
5. Once all applied music or dance requirements have been completed, all additional lessons or courses will be billed at the elective rate.
6. Music students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate.

Please see the table of applied lesson suffixes in the "Applied Music (p. 232)" section in the Undergraduate Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

### Princeton Students

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred when full-time students exceed maximum load levels, excluding VC593 or participation in auditioned choirs.

Please see the Tuition and Fees Table (<http://www.rider.edu/offices-services/finaid/tuition-fees/undergraduate-tuition-fees>) on Rider's website for elective and part-time charges for elective music and dance study.

**Full undergraduate tuition includes:**

A minimum of 12 and maximum of 18 credits per semester or the equivalent including non-credit courses. Exception: during the senior student teaching semester for Music Education majors, full-time tuition covers only the course ME 492. For primary applied music study, one hour per week of applied music instruction each semester, except during the student teaching semester for Music Education majors or a full-time (12 cr) internship semester for Bachelor of Arts in Music majors. Composition majors receive one hour per week of private composition instruction and one half-hour per week of either private voice or private keyboard instruction. Once all applied requirements have been completed, all additional applied lessons will be billed at the elective rate. Students in

double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate. Any non-required private lesson will be billed at the elective rate.

Please see the table of applied lesson suffixes in the Applied Music (p. 232) section in the Undergraduate Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

### Dance Study

Effective as of the fall 2014 semester for all new or readmitted Rider University students on both campuses: For all students whose major or minor program does not require applied dance study under the DAN prefix, or for those students who have completed dance requirements, elective fees will apply. All part-time students are charged a dance fee. Please see below. Registration for applied dance study follows this table of courses. Students will register for the appropriate course number, as indicated in the curriculum pages later in this section.

Maximum enrollment under full-time tuition: In B.A.-Dance/Performance Track, a total of 15 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School (PBS); in B.A.-Dance/Dance Studies Track, a total of 14 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School; in Dance Minor, a total of 8 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School.

Registration for DAN 100 and DAN 300 require a placement completed with dance faculty.

### Full-Time Students

#### DAN 100

- DAN-100-01 – 1-credit required course taken at PBS. Included in tuition – no extra charge. Example: B.A./Dance majors and minors up to the maximum stated above.
- DAN-100-01F – 1-credit elective course taken at PBS. Not included in tuition – \$740 extra per semester. Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

DAN 151 Pilates and Modern – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

DAN 152 World Dance & Improvisation – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

#### DAN 300

- DAN-300-01 – 2-credit required course taken at PBS. Included in tuition – no extra charge. Example: B.A./Dance majors and minors up to the maximum stated above.
- DAN-300-01F – 2-credit elective course taken at PBS. Not included in tuition – \$1,500 extra per semester. Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

**Note:** Students choosing to register for both DAN 100-01F and DAN 300-01F as elective study in the same semester will be charged a total fee of \$2,000.00.

### Part-Time Students

(all students, both campuses, regardless of major or requirements)

#### DAN 100

- DAN-100-01P –1-credit course taken at PBS. Not included in tuition – \$1,050 extra per semester. For majors and minors, course counts toward the maximum stated above.

#### DAN 300

- DAN-300-01P –2-credit course taken at PBS. Not included in tuition – \$2,090 extra per semester. For majors and minors, course counts toward the maximum stated above.

Note: Part-time students choosing to register for both DAN 100-01P and 300-01P in the same semester will be charged a total fee of \$3,050.00.

## Grades – Grade Reports, Grade Point Average, Incomplete Grades, Grade Appeals

- Grade Reports (p. )
- Grade Point Average (GPA) (p. 239)
- Incomplete Grades (p. 239)
- Grade Appeals (p. 240)

### Grade Reports

Members of the faculty are officers of instruction at Rider University.

Among their responsibilities as such is the evaluation of students' academic accomplishments in courses of instruction. These evaluations ultimately are expressed in grades that are recorded in the students' academic record. Members of the faculty, judging the competencies and performances of students, assign grades based on their professional experience and training. Grades assigned by the faculty follow practices and procedures within the standards established by Rider and within the standards established by individual course requirements.

Letter grades are used at Rider University for recording faculty evaluations of final student achievement in individual courses and are entered on the permanent academic record of a student's academic performance.

**The academic grades used by faculty for recording evaluations of student achievement are as follows. For determining grade point averages (GPAs), grades have weighted values called variously honor points, quality points, or grade points as follows:**

A (Excellent)	4.0
A-	3.7
B+	3.3
B (Good)	3.0
B-	2.7
C+	2.3

C (Fair)	2.0
C-	1.7
D (Poor; minimum passing grade)	1.0
F	0.0

(Failing academic work; fail to abide by standards of academic honesty and integrity; unauthorized withdrawal, and fail to complete work in prescribed time.)

Each instructor of a course will inform the student of the course objectives, procedures, and applicable grading standards. Upon a student's written request, members of the faculty will provide a review of the student's course standing at least once each term by the mid-point of that term. Each student may also review material submitted to the instructor for evaluation such as papers, examinations, and the like. In these ways, students will be able to assess their own progress in a course before final grades are assigned.

**NOTE:** Faculty members are not required to maintain student course materials more than four months after the end of an academic term.

**A student grade report may also show the following transcript notations, which carry no grade point value:**

I	Incomplete
L	Late grade
N	Registered: Did not attend
AU	Audit
P	Pass
S	Satisfactory progress
U	Failure in pass/fail course
W	Withdrawal
Y	Satisfactory completion of supplemental education course
Z	Insufficient progress in supplemental education course

"N" and "W" notations are included in the total semester hours attempted, as far as tuition payment is concerned.

### Grade Point Average (GPA)

Grade point averages (GPA) are used to establish academic standing. In order to compute the grade point average, students must first determine the number of quality points earned for each course. The total number of quality points for a course is derived by multiplying the number of credits for the course by the number of quality points for each letter grade. The grade point average (GPA) is determined by dividing the number of quality points by the number of GPA hours.

### Incomplete Grades

Students who, as a result of extenuating circumstances, are unable to complete the required work of a course within the term, may request an extension of time from a faculty member. Such extensions of time can be granted only in cases in which illness or another serious emergency has

prevented the student from completing the course requirements or from taking a final examination. The request for extension of time must be made prior to the last scheduled class meeting, except in those unusual situations in which prior notification is impossible.

The faculty member shall determine whether to grant the request for a time extension and the type of verification (if any) required to support the request. The faculty member shall specify the time, up to four weeks from the last day of the term, as specified in the academic calendar, by which work must be completed by the student. If the faculty member does agree to the request, the notation "I" (Incomplete) shall be submitted on the grade roll. In those situations where the faculty member has not received a request for an extension of time, the notation "I" (Incomplete) may be submitted on the grade roll by the faculty member when, in his or her judgment, such a determination appears justified. Upon submission of completed required work the faculty member shall submit a Change of Grade form to the Registrar.

Students who, as a result of extenuating circumstances, are unable to submit the completed required work at the end of the four-week period may request an extension of the incomplete grade. The request for an extension of the incomplete must be made prior to the expiration of the four-week period. If the faculty member agrees to the request for an extension of the incomplete, the faculty member shall specify the time, up to a maximum of two weeks from the date of expiration of the four-week period (i.e., six weeks from the last day of the term) by which work must be completed by the student and shall submit an Extension of Incomplete form to the Registrar.

Upon submission of completed required work, the faculty member shall submit a Change of Grade form to the Registrar and assign the course grade. Failure of the Registrar to receive from the faculty member a Change of Grade form or an Extension of Incomplete form at the end of the four-week period, or a Change of Grade form at the end of the six-week period shall result in the automatic assignment of the grade "F," "Z," or "U" by the Registrar.

Students who receive an incomplete in a course that is part of a course sequence must obtain permission from the department chairperson to remain enrolled in the next course in the sequence or they will be removed from that next course.

## Grade Appeals

### Basis for Grade Appeal

A final course grade may be changed only at the initiative of the faculty member who originally assigned the grade or as the result of a decision made in the hearing of a grade appeal by the Faculty Grade Review Panel.

It is assumed that the final course grade is assigned in good faith and based on the professional expertise of the faculty member.

A student may appeal a final course grade only on the grounds that it represents an arbitrary, capricious, and/or unreasonable evaluation of his or her performance.

A grade appeal may not be based on a disagreement with the faculty member's professional academic evaluation of the student's work.

The burden of proof rests with the student. A grade appeal shall be supported only when a student convincingly demonstrates that an arbitrary, capricious, and/or unreasonable evaluation occurred. Changes and appeals for grades on written comprehensive graduate examinations are subject to the same requirements and procedures as course grades.

The Faculty Grade Review Panel may return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process; may decline to hear an appeal when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading; and shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

### Faculty Grade Review Panel

The Faculty Grade Review Panel has final authority concerning all grade appeal questions. **The panel consists of the following nine members:**

1. Six tenured faculty members including one tenured faculty member elected by the bargaining unit members of each of the five college/school academic policy committees and one selected by the bargaining unit members of the University Academic Policy Committee, who shall serve as chairperson of the panel;
2. A seventh faculty member selected jointly by the Provost and Vice President for Academic Affairs and the academic deans;
3. Two full-time students selected by the Student Government Association who, at the time of their service, must be seniors who have attained a grade point average of at least 3.25.

Each of the above appointing groups shall also designate an alternate for each member they appoint to the panel. Faculty members of the panel shall serve two-year terms and may be reappointed.

A quorum of the Faculty Grade Review Panel shall consist of any five members. The failure or inability of any appointing body to fulfill its responsibility to appoint any member or members to the panel shall not prevent the panel from organizing itself and exercising its duties.

**The chairperson of the panel will serve as the hearing coordinator and has the following duties and responsibilities:**

1. Inform the members of the panel that a grade appeal has been received and set a date for the hearing,
2. Distribute documentary materials pertaining to the appeal to members of the panel,
3. Maintain a permanent record of the panel's proceedings,
4. Prepare and distribute any decision made by the panel to the appropriate parties.

### Prior to Initiating a Grade Appeal

A student who believes that his or her final course grade represents an arbitrary, capricious, and/or unreasonable evaluation of his or her work is strongly encouraged to talk with the faculty member in an effort to resolve the issue before filing a formal grade appeal. However, it must be emphasized that this informal discussion does not constitute the initiation of a grade appeal and does not extend the time limits specified in the next paragraph.

### Initiating a Grade Appeal

To initiate a grade appeal, the student must forward a letter to the faculty member which clearly and precisely describes the student's reasons for believing that the final course grade constitutes an arbitrary, capricious, and/or unreasonable evaluation of his or her performance. A copy of this letter shall also be sent to the faculty member's department chairperson. (If the faculty member taught the relevant course in another department, the letter shall be sent to the chair of that other department. If the

relevant course is in a program and is not cross-listed, the letter shall be sent to the chair of the program director's home department.)

For appeal of fall semester grades, the letter must be postmarked or hand-delivered within seven (7) days of the start of the upcoming spring semester. For appeal of spring semester grades, it must be postmarked or hand-delivered within thirty (30) days of the last regularly scheduled spring semester examination. For appeal of summer grades, it must be postmarked or hand-delivered within seven (7) days of the start of the upcoming fall semester. For appeal of grades on written comprehensive graduate examinations, it must be postmarked or hand-delivered within thirty (30) days of the date that grades were issued for the examination.

If a change of grade occurs after the aforementioned deadlines, the grade appeal must be filed within thirty (30) days of the submission of the changed grade to the registrar.

If the faculty member who assigned the grade in question is no longer at Rider or is away from Rider on an extended basis and not available for consultation, the initial review shall be conducted by the appropriate department chairperson, and the schedule may be extended at the appropriate dean's discretion.

If the faculty member who assigned the grade in question is the department chairperson, the chairperson's dean or that dean's designee shall replace the chairperson in all the procedures that follow.

Failure to submit a written statement of the appeal within the time guidelines established above shall constitute grounds for denying a student access to the grade appeal process. Failure to provide a clear and precise statement shall constitute grounds for denying the appeal at any step in the process. Once a grade appeal is initiated, the basis of all subsequent proceedings must be limited to the allegations appearing in the initial written statement. This limitation does not exclude the introduction of new evidence directly related to the initial allegations.

The chairperson of the Faculty Grade Review Panel, upon written request of any party, may extend any deadline contained in this policy if he or she believes that circumstances beyond the control of a party to the appeal have prevented compliance with stated deadlines. The decision of the panel chairperson to extend or not to extend a deadline shall not be subject to appeal.

## The Grade Appeal Process

### Step One

In the letter of appeal, the student may request a formal meeting with the faculty member. If the faculty member agrees to such a meeting, the meeting shall be held no later than fourteen (14) days after the beginning of the fall or spring semester following the semester or session in which the grade was given. However, the parties are encouraged to schedule such a meeting at an earlier date if mutually convenient.

The faculty member shall render a decision on the appeal within seven (7) days of such a meeting and shall notify the student and the department chairperson in writing of the decision. If the faculty member agrees to change the final course grade of the student, he or she shall submit a Change of Grade form to the Registrar.

If the faculty member believes that a meeting with the student would not be productive, he or she shall make a decision on the appeal based on the student's letter and shall communicate the decision in writing to the student and the department chairperson within fourteen (14) days of the

beginning of the fall or spring semester following the semester or session in which the grade was given.

If the student accepts the decision of the faculty member at Step One, no further action is required. If the student does not accept the faculty member's decision at Step One, he or she may appeal the decision to Step Two in writing to the department chairperson with a copy to the faculty member's dean. This letter must be postmarked or hand-delivered within seven (7) days of the postmark date of the faculty member's Step One decision.

If the student does not receive a written response from the faculty member or department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given, the student may, within twenty-one (21) days of the beginning of that semester, proceed to Step Two as indicated below. All such written responses shall be mailed to the student's campus address, if the student resides on campus, or otherwise to the student's home address on record.

### Step Two

Within fourteen (14) days of the receipt of a student's letter of appeal to Step Two, the department chairperson shall schedule a meeting with the student and the faculty member. At such meeting, the student and the faculty member will have the opportunity to explain their positions with respect to the grade in question, but they shall be limited to the allegations raised in the student's initial written statement.

The department chairperson shall render an opinion on the matter within seven (7) days of the Step Two meeting and shall provide explanatory language for this opinion in writing to the student, the faculty member and the faculty member's dean.

If the department chairperson's opinion supports the position of the faculty member, the student shall have seven (7) days from the postmark date of the letter from the department chairperson to continue his or her appeal to the Faculty Grade Review Panel as described in Step Three.

If the department chairperson's opinion supports the student's position in the appeal, the faculty member shall have seven (7) days from the postmark date of the department chairperson's letter opinion either to accept that opinion and submit a Change of Grade form to the registrar, or to reject the opinion and notify the student, department chairperson, and faculty member's dean that the faculty member is making an appeal pursuant to the Step Three process.

If the student does not receive notification of a change of grade within twenty-one (21) days of the date of the department chairperson's written decision, the student may carry the appeal to Step Three.

### Step Three

To carry the appeal to Step Three, the student must submit a letter expressing that intent to the chairperson of the Faculty Grade Review Panel with copies to the faculty member, the department chairperson, the dean, and the Provost and Vice President for Academic Affairs.

Within seven (7) days (excluding vacation and examination periods) of the receipt of this letter, or the letter from the faculty member who has appealed, whichever the case may be, the chairperson of the Faculty Grade Review Panel shall schedule a meeting of the panel to consider the appeal.

The student and the faculty member shall have the right to appear before the panel to present information pertaining to the allegations made in the student's initial written statement.

The Faculty Grade Review Panel may, if it deems it desirable, request attendance by the chairperson, the dean, and/or any other representatives of the University. Attorneys or advisors to the participants may attend but not participate in the meeting of the panel.

The unwillingness of the faculty member or student to appear before the panel shall not prevent the panel from proceeding with its deliberations. In those deliberations, the panel shall have access to written documents pertaining to the appeal, pertinent records of student performance, and such verbal presentations as may be made during panel deliberations.

On the basis of careful consideration of the available information, the Faculty Grade Review Panel will determine if an arbitrary, capricious, and/or unreasonable evaluation of the student's performance has occurred. This determination will be made in writing and provided to all affected parties.

If the panel determines that no such action occurred, the case will be closed with no further right of appeal. If the panel determines that an arbitrary, capricious, and/or unreasonable evaluation has occurred, it will direct the faculty member's department (or will establish an evaluation committee of faculty members in the field of the course offered) to re-evaluate the student's performance based upon the panel's decision, the records and documentary materials.

Within fourteen (14) days of the receipt of the panel's directive, the department or evaluation committee shall recommend to the panel a grade that it deems appropriate, whether higher than, lower than, or the same as the original grade. Normally, the panel will accept the revised evaluation by the department or committee and will subsequently notify the Registrar of any change of grade. Should the panel feel that the department or committee has not conducted its review in an appropriate manner and that, as a result, the suggested substitute grade is not appropriate, it shall have the authority to direct the Registrar to enter the grade that the panel judges appropriate.

Decisions of the panel are not subject to further appeal. The panel may also return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process, or when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading. The panel shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

### **Expediting a Grade Appeal**

When a student's graduation is affected by the outcome of a grade appeal in a semester, term, or session immediately preceding such graduation, faculty members shall make reasonable efforts to expedite the process.

### **Grade Changes Made at Initiative of Faculty Member**

The individual faculty member may determine that it is appropriate to change a recorded academic grade. Such changes must be made within four (4) months of the date that the original grade was assigned. Any change of grade initiated by a faculty member more than four (4) months after the date the original grade was assigned must be approved by the faculty member's dean. Faculty members, using forms supplied by the Office of the Registrar, will prepare a written change of grade stating the reasons for the grade change with a copy to the student, the department

chairperson and the faculty member's dean. Upon receipt of this form by the Office of the Registrar, the grade will be changed on the official records of the University.

## **Graduation with Honors**

Graduation with distinction (sometimes referred to as Latin honors) depends upon the achievement of exceptionally high scholastic averages and completion of all requirements. This distinction is reflected by the awarding of degrees cum laude, magna cum laude, and summa cum laude. All grade point averages are computed on work completed at Rider University only.

**For Lawrenceville-based degrees, graduation with distinction is awarded on the following basis:**

Summa Cum Laude – averages between 3.75 and 4.00

Magna Cum Laude – averages between 3.50 and 3.74

Cum Laude – averages between 3.25 and 3.49

**For Princeton-based degrees, graduation with distinction is awarded on the following basis:**

Summa Cum Laude - averages between 3.80 and 4.00

Magna Cum Laude - averages between 3.60 and 3.79

Cum Laude - averages between 3.40 and 3.59

## **Health and Safety – Westminster College of the Arts**

Westminster Choir College/Westminster College of the Arts of Rider University, as required by the National Association of Schools of Music, is obligated to inform students and faculty of health and safety issues, hazards, and procedures inherent in practice, performance, teaching, and listening, both in general and as applicable to their specific specializations. This includes but is not limited to information regarding hearing, vocal and musculoskeletal health, injury prevention, and the use, proper handling, and operation of potentially dangerous materials, equipment, and technology.

It is important to note that health and safety depends largely on personal decisions made by informed individuals. Rider University has health and safety responsibilities, but fulfillment of these responsibilities cannot and will not ensure any individual's health and safety. Too many factors beyond the University's control are involved.

Each individual is personally responsible for avoiding risk and preventing injuries to themselves before, during, and after study or employment at Rider University. The policies, protocols, and operational procedures developed do not alter or cancel any individual's personal responsibility, or in any way shift personal responsibility for the results of any individual's personal decisions or actions in any instance or over time to the University.

All members of the Westminster College of the Arts community are encouraged to visit Health and Safety Recommendations (<http://www.rider.edu/student-life/health-wellness/student-health-services/health-safety-sfpa-wcc-students>) on Rider's website for a series of recommendations and resources designed to help each individual to become aware of and attend to various issues.

## Independent Study

In order to challenge students with exceptional talents and interests and to provide opportunities for individual study and research, independent study is available for credit to qualified students under the terms stated below. Each project must be directed by a Rider University faculty member.

The advisor-student relationship is one of mutual agreement between the faculty member and the student. The choice of project is limited primarily by the availability of an advisor who has some knowledge and interest in the field. Application forms are available in the office of the dean of the student's college or school.

The following policies apply to independent study courses:

1. Students must be a junior or senior in good academic standing with a cumulative grade point average of 3.00 or better.
2. Approval for an independent study course must be secured in writing, normally during the term prior to that in which the study will be carried out, but in any case in advance of the first day of classes of the applicable term. All proposals must be approved by the faculty/advisor, department chair, and by the office of the instructor's dean and the office of the student's dean. Upon approval, the student must enroll by the end of the third week of class.
3. A student may not enroll for more than one independent study course per term. Courses usually carry one to four credits, with a maximum of six allowable in special cases involving a full year of work.
4. A maximum of 18 credits may be earned in all independent study courses.
5. A student is expected to earn a minimum grade of "B" in any independent study course, as assigned by the faculty advisor for the project. A grade of "B-" or lower may result in ineligibility for future independent study courses.

## International Baccalaureate (IB) Credits

Incoming students may be granted up to 20 credits on the basis of their International Baccalaureate coursework. Credits are awarded for Higher Level IB courses based on the student receiving a score at or above the level approved by the department that evaluated the course (in no case less than a score of five).

In order to grant credit, Rider's Office of Undergraduate Admission must be sent an official IB transcript. For further information, please see International Baccalaureate (IB) Course Equivalency (<http://www.rider.edu/admissions/undergraduate-admission/how-apply/ib-course-equivalency>) on Rider's website.

## International Student Status

Federal regulations require that all F-1 and J-1 undergraduate and graduate international students maintain full-time status. International students may engage in one online course per mandatory term (fall and spring term) as long as they are enrolled in a full course load. Students may request part-time status under specified, limited circumstances, including during their final semester. Prior approval of the Center for International Education (<https://www.rider.edu/offices-services/center-for-international-education>) is required.

All international students do not need to comply with the above restrictions for summer course work.

## Outside Activities – Westminster Choir College only

Westminster Choir College students are expected to give priority to all officially scheduled classes, lessons, rehearsals, on- and off-campus performances (including tours), and other official functions involving music students. Outside activities, such as employment, church or volunteer work, or other professional engagements should not conflict with college requirements or those listed on course syllabi. Students employed outside of the college should inform employers of their commitment to their education and their obligation to college classes and ensembles.

## Placement Testing Information

### English Placement Test

Incoming freshmen who score 570 or above on the Evidence-Based Reading and Writing (EBRW) SAT or who score 23 or above on the ACT will be placed in CMP 120. Students scoring below 570 on the EBRW SAT or below 23 on the ACT will be placed in CMP 115.

### Reading Placement Test

Students who are admitted to Rider as test optional will be placed according to high school GPA.

- Students with a high school GPA of 3.11 or higher will not be placed into CRC 100.
- Students with a high school GPA below 3.11 will be placed into CRC 100.

Students who are admitted using an Evidence-Based Reading and Writing (EBRW) SAT score will be placed according to a combination of their EBRW score and high school GPA.

- Students with a 470 or below EBRW SAT who also have a high school GPA below 3.4 will be placed into CRC 100.
- Students with a 470 or below EBRW SAT who also have a high school GPA of 3.4 or higher will be exempt from taking CRC 100.

### Math Placement Test

Placement in some Mathematics classes and all Management Sciences classes is based upon the Mathematics score on the SAT and/or a math placement test.

Business majors with an SAT Math score of 550 taken before March, 2016 or an SAT Math score of 570 taken in March, 2016 or later, or ACT Math score of 23 or higher are placed in MSD 105 Quantitative Methods I for 3 credits. No placement test is required. Business majors with an SAT Math score of 540 taken before March, 2016 or an SAT Math score of 560 taken in March, 2016 or later, or ACT Math score of 22 or lower are required to take the Math Placement Test.

Science and mathematics majors with an SAT-M score of less than 650 will take a math placement test. Students with a SAT-M score of 650 and above will be placed into MTH 210

Scoring thresholds may be adjusted upwards and course requirements may be adjusted by individual college/school Academic Policy Committees. Students enrolled into MTH 102 (<https://rider-curr.courseleaf.com/search/?P=MTH%20102>) will be given a brief test, prepared by the Department of Mathematics, during the first five business

days of the semester. Those placing below a minimum score set by the Department of Mathematics on the test will be required to participate in one hour of structured tutoring<sup>1</sup> per week concurrent with taking MTH 102. All others enrolled in the class are strongly encouraged to participate in available tutoring.

#### Footnotes

- <sup>1</sup> Mandated structured tutoring will:
- include an embedded tutor in each class section
  - include a one-hour per week group study session
  - impact the student's grade as determined by individual faculty.

## Recital Scheduling – Westminster Choir College only

Recital Scheduling (p. 244)

Recital Spaces (p. 244)

Work Orders (p. )

Recital Dates and Times (p. )

Canceled Recitals (p. 244)

Recital Programs, Recording, and Documentation (p. 244)

Scheduling Dress Rehearsals and Receptions (p. )

University-Owned Instruments (p. 244)

Publicity (p. 245)

### **Recital Scheduling**

Recital scheduling occurs in three rounds:

1. **Lottery:** Two-week period in which students may request required recitals for the following semester. Requests are processed in random order. All students receive an email with a link to the request form.
2. **Open request period before semester:** After lottery recital assignments are confirmed, students may request changes or new reservations for required recitals. Requests are processed in the order received. All students receive an email announcing the start of the open request period.
3. **Open request period during semester:** At the beginning of the semester students may request non-required recitals. To receive a recital request form email [wcevents@rider.edu](mailto:wcevents@rider.edu). Requests are processed in the order received. Recital confirmations are emailed from [wcevents@rider.edu](mailto:wcevents@rider.edu). All recital requests are subject to approval by the student's applied instructor.

### **Recital Spaces**

Students may reserve Bristol Chapel, Hillman Hall, the Playhouse and Williamson Hall for recitals. Hillman Hall is not available for non-required or junior recitals. Bristol Chapel is not available for non-required or junior recitals except for junior organ recitals or by special permission.

Each recital hall has a standard recital configuration that will be set up prior to a recital. If the setup of the room is changed during a recital, it is the student's responsibility to return the room back to the standard

configuration before leaving the space. A diagram of the room setup is included with the recital confirmation.

### **Work Orders**

Students must submit a work order to Facilities Management including the date, time, location, and setup needs of their dress rehearsal, recital, and reception. A separate work order must be placed for each event.

Please follow this link (<https://login.myschoolbuilding.com/msb>) to submit a work order.

### **Recital Dates and Times**

Recitals are scheduled at 1 p.m., 2:30 p.m., 4 p.m., 5:30 p.m., 7 p.m., and 8:30 p.m. Recital reservations allow for 60 minutes of performance time plus 15 minutes before and after the recital. Recitals held after the last day of class require permission of the applied department chair and the associate dean. Email [wcevents@rider.edu](mailto:wcevents@rider.edu) for the after-term permission form.

### **Canceled Recitals**

Email [wcevents@rider.edu](mailto:wcevents@rider.edu) to cancel or postpone a recital. Students can only reschedule a recital after cancelling the previous reservation.

A request to reschedule a recital will be considered cancellation of an existing reservation.

### **Recital Programs, Recording, and Documentation**

Printed programs and recording arrangements for the recital performance are the responsibility of the performer.

Five archive copies of the recital program, formatted according to the Archive Program Guideline (sent with your recital confirmation email and available online), must be submitted to the Academic Coordinator no later than ten (10) days after the recital. Follow this link to view the program guidelines ([http://www.rider.edu/sites/default/files/docs/wcc\\_recital\\_program\\_guidelines.pdf](http://www.rider.edu/sites/default/files/docs/wcc_recital_program_guidelines.pdf)).

### **Scheduling Dress Rehearsals and Receptions**

Students may reserve time for a dress rehearsal in the recital space (90-minute time limit) and a reception beginning on the first day of the recital semester. Students with early-semester recitals may reserve rehearsal and reception times before the semester begins. Dress rehearsals and receptions will only be scheduled for confirmed recitals. Due to space limitations, availability of space for dress rehearsals and receptions is not guaranteed.

Dress rehearsals may not be scheduled in Williamson Hall during office hours except by instructor request. Receptions are held in Thayer Lounge or the Martin Room. There is a two hour time limit for all reception reservations. Receptions may not be held in any area of Bristol Hall, the Cullen Center, or Williamson Hall. The reception area should be cleaned and ready for use at the end of the reserved reception time.

Dress rehearsal and reception reservations should be made through 25Live (<https://25live.collegenet.com/rider>).

### **University-Owned Instruments**

Use of university-owned harpsichords or portative organs must be arranged with the Sacred Music office at least four (4) weeks prior to the recital. To make arrangements to use instruments, for a copy of the Portative Organ and Harpsichord Policy, or other information please contact the Office of Sacred Music ([sacredmusic@rider.edu](mailto:sacredmusic@rider.edu), ext. 8277).

## Publicity

All recital publicity is the responsibility of the performer. On-campus posters must be stamped by the Associate Dean of Students office and posted only in approved locations. Send questions regarding these guidelines to [wcevents@rider.edu](mailto:wcevents@rider.edu). In compliance with University policy, students must use their Rider email account for University business.

## Transfer Appeals

An appeal process for transfer course equivalency is open to students who have attended an accredited community college **or four-year institution** and have been admitted to a Rider degree program. **Course appeals will only be considered prior to the completion of the last 30 credits in the bachelor degree.**

All communication regarding appeal[s] will be communicated to the student through Rider email.

The appeal process is as follows:

1. For each course being appealed the student should submit the following information/documentation:
  - a. Program the student is pursuing
  - b. Course[s] the student wishes to appeal (include course number, title and the name of the transfer institution)
  - c. Supporting documentation [course syllabus, course work] to justify appeal[s]
  - d. Desired outcome of appeal[s] [please check one]:
    - Substitution for a required course in the major, list course[s]: \_\_\_\_\_
    - Substitution for a required course in the minor, list course[s]: \_\_\_\_\_
    - Substitution for a core course, list course[s]: \_\_\_\_\_
    - Transfer as a general or free elective
    - Transfer as a business elective [CBA only], list discipline or course prefix (e.g. MKT, ECO) \_\_\_\_\_
    - Other: \_\_\_\_\_
2. All appeals must be submitted electronically through the student's Rider email address to the Office of the Registrar at [transferappeal@rider.edu](mailto:transferappeal@rider.edu).
3. Appeals will be reviewed by the Transfer Appeals Committee. A member of the Transfer Appeals Committee will respond to the student's petition fifteen [15] days after receipt of the appeal.

The Transfer Appeals Committee is comprised of the relevant department chair(s) or program director(s), as well as the dean or associate/assistant dean of the college/school in which the program resides.

## Transfer Credit While Currently Enrolled at Rider

**Students seeking permission to transfer credit from another accredited college after matriculating at Rider University:**

1. must complete an off-campus approval form at least 30 days in advance of the start of the proposed off-campus course, to be approved by the student's academic dean's office. If prior approval is not obtained, there is no guarantee that transfer credit will be granted;
2. must have a cumulative grade point average of at least 2.00;

3. may not be within the final 30 credits of the Rider baccalaureate degree program.

Baccalaureate degree-seeking students with less than 60 credits may enroll in courses in either two-year or four-year accredited postsecondary institutions for transfer to a program of study at Rider as long as prior approval is obtained as described above.

Baccalaureate degree-seeking students with more than 60 credits may only enroll in courses in four-year accredited postsecondary institutions for transfer to a program of study at Rider as long as prior approval is obtained as described above.

Upon the completion of 21 credits, students pursuing a two-year (A.A.) program will not be permitted to enroll in courses at other institutions for transfer to that program of study at Rider University.

**Credit by transfer from other institutions may be applied toward baccalaureate degrees under these conditions:**

1. An official transcript must be forwarded directly from the sending institution to the student's academic dean's office.
2. A minimum grade of "C" or its equivalent is required for transfer of courses. Grades such as "pass" or "credit" are also acceptable. **Grades of "C-" or below are not acceptable.**
3. Courses taken 10 or more years prior to entering Rider University are subject to individual evaluation for contemporary transfer applicability.
4. Transfer credits are not associated with grades and are not included in grade point average calculation, except for courses taken at other colleges of Rider University or under the cooperative program between Westminster Choir College and Princeton University.

**At the Princeton campus:**

1. Transfer credit is equivalent to the credit earned at the sending institution, except that credit by transfer may not exceed three credits per course.
2. Many non-music courses may be transferred to satisfy Arts and Science requirements; excluded are courses dealing with highly technical or scientific subjects, specialized professional school courses, physical education courses and others determined by the college. The Arts and Science Program has the final authority in determining whether or not a specific course may transfer.
3. Music courses are not transferable. Credit will be awarded, however, for all college-level music courses exempted by examinations, which are given only after a student has enrolled at Westminster.

## Withdrawal from the University

Students should refer to the University website, <https://www.rider.edu/academics/academic-support-services/registrar/withdrawals-and-readmission> for information regarding the circumstances and procedures related to withdrawing from the University.

In addition, students should refer to Rider's website at <http://www.rider.edu/offices-services/financial/payments-billing-deposits/refunds> for refund and other related information as it concerns withdrawal from the University.

# GRADUATE ACADEMIC POLICIES

## Introduction

Graduate students must comply with the general requirements of Rider University concerning graduate study. Graduate students must demonstrate the ability to express their thoughts in writing and in speaking in clear, correct English for class reports, research papers, theses and examinations.

Graduate students should refer below for important information regarding Rider's graduate academic policies. In addition, academic policies specific to degree programs or certificates housed within each of the colleges/schools can be found in the Academic Catalog as per the list below.

- College of Business Administration (p. 53)
- College of Liberal Arts and Sciences (p. 155)
- College of Education and Human Services (<http://catalog.rider.edu/graduate/colleges-schools/education/education-leadership-counseling>)
- Westminster Choir College (p. 1093)

## Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to, those standards and policies set forth in this catalog and in The Student Code of Social Conduct ([https://www.rider.edu/sites/default/files/docs/student\\_code\\_of\\_social\\_conduct.pdf](https://www.rider.edu/sites/default/files/docs/student_code_of_social_conduct.pdf)). **Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student.**
2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirements), creations, and activities engaged in by the student while at the University, including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, internet/web-based productions and sales, and athletic events and all proceeds therefrom. The student has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

## Rider University's Right to Change Catalog Content

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

**Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student.**

While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and reasonable treatment of interested parties requires in the University's best judgment.

- Interruption of Studies (p. 257)
- Outside Activities (p. 257)
- Thesis/Capstone - Westminster Choir College (p. 257)
- Transfer Credit While Currently Enrolled at Rider (p. 258)

## Academic Concern, Conditional Standing/Dismissal and Readmission

Students permitted to enroll at Rider University are either in:

- Graduate Standing, in which case they are bona fide students;
- Conditional Standing, in which case they are permitted to enroll for a probationary period before a final decision of Graduate Standing is made; or
- Special Standing, in which case they are not enrolled in a degree program but are permitted to enroll in a few courses.

Decisions regarding academic progress, conditional standing, and dismissal for poor scholarship are the responsibility of the Committee on Academic Standing within each college or school. These committees may establish and apply criteria in addition to the minimum university cumulative grade point average (GPA). Using approved academic criteria, the Committee on Academic Standing within each college or school may review the academic record of any student. The following applies to all graduate students.

- Masters and graduate students with a cumulative GPA below 3.0 and EdS and EdD students with a cumulative GPA below 3.3 will be placed on probationary academic standing and may be dismissed.
- The minimum GPA to graduate from a Masters and graduate certificate program is 3.0 and from an EdS or EdD program is 3.3.
- For all graduate programs, students graduating with a cumulative GPA of 3.85 or above graduate with distinction.

Masters and graduate students who fail to maintain at least a 3.0 cumulative GPA and EdS and EdD student who fail to maintain at least a 3.3 cumulative GPA will be reviewed by the appropriate program faculty or Committee on Academic Standing and may receive a letter of academic concern, be placed on conditional standing, or be dismissed from the University.

### Academic Concern

Upon review of a student's academic record, a Committee on Academic Standing or Department Chair may issue a letter of concern, which responds to academic progress that does not meet college, school or university expectations, and describes an academic plan of study that must be met in the subsequent semester. Students who fail to pursue a course of study prescribed by the department faculty or an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be placed on Conditional Academic Standing or dismissed.

### Conditional Academic Standing

Upon review of a student's academic record, the department faculty or a Committee on Academic Standing may place a student on Conditional

Academic Standing. In reaching this decision, the faculty or committee may require a student who does unsatisfactory work to pursue a specific course of study during a particular academic session. Students who fail to pursue a course of study prescribed by the faculty or an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be continued on Conditional Academic Standing or may be dismissed without further right of appeal. There must be substantial evidence of proper motivation and a capacity for doing graduate level work to warrant maintaining a student in school with a record of continued conditional status as opposed to dismissal.

Students on conditional academic standing may not register for an academic overload. Westminster Choir College graduate students on conditional standing are ineligible for assistantships and may become ineligible for other scholarship awards. Additionally, students must be removed from conditional status in order to be approved for graduation.

### Academic Dismissal from the University

Students who have not done satisfactory work may be dismissed from the University for poor scholarship at the end of any semester after an appropriate review of their scholastic records by the department faculty or Committee on Academic Standing within their college or school. Academic dismissal at the end of the fall semester is effective prior to the beginning of the spring semester. Academic dismissal at the end of the spring semester is effective prior to the beginning of summer session.

Students who wish to appeal a dismissal must submit a written statement of appeal to the academic dean of their college or school within 10 days from the date on their letter of dismissal. All appeals submitted by the deadline will receive consideration by the appropriate academic standing committee.

Dismissal for academic reasons terminates a student's relationship with Rider. Dismissed students may not enroll for courses nor participate in university-sponsored activities or ensembles at either campus for a period of one year following their dismissal. Students dismissed for academic reasons normally will not be eligible for readmission within one calendar year of the dismissal date. Although some students will apply for readmission, there is no real or implied right to such readmission.

Students dismissed by Westminster Choir College (WCC) but not Rider University may apply for enrollment in graduate programs in other colleges of the University. Students dismissed by WCC but not Rider University may not enroll in WCC courses, ensembles or activities until they have been readmitted to WCC with the exception of courses, ensembles or activities that are delivered by or at WCC and are required in music degrees housed within the SFPA.

### Dismissal from a Major within Westminster College of the Arts

Academic departments within Westminster College of the Arts reserve the right to dismiss a student from a major following notification that their standing in the major is in jeopardy and the passage of a suitable amount of time permitted to address stated issues, typically one semester. Such dismissal may be based upon any of the following conditions: failure to maintain a satisfactory or minimum GPA; failure to sustain academic progress in the courses of the major; conduct in violation of the standards of the department or profession; failure to meet conditions or requirements as stated in university catalogs, The Student Code of Social Conduct ([https://www.rider.edu/sites/default/files/docs/student\\_code\\_of\\_social\\_conduct.pdf](https://www.rider.edu/sites/default/files/docs/student_code_of_social_conduct.pdf)), or the departmental

handbook; or the student's general standing at Rider University. Such dismissal will become effective at the end of the semester in which the decision is reached. Students dismissed from Music Education are not permitted to enroll in Music Education courses until readmitted into the Music Education major.

## Readmission after Academic Dismissal

Dismissed students seeking readmission must first contact the Registrar's Office (<https://www.rider.edu/academics/academic-support-services/registrar>), Fine Arts Building on the Lawrenceville campus or the Associate Dean of Students Office, Scheide Student Center, on the Princeton campus to obtain appropriate forms. Once the Registrar or Associate Dean of Students or his/her designee approves the readmission application, the application is forwarded to the dean of the college to which the student seeks reentry. Students dismissed for academic reasons must submit with their readmission application a personal letter to the Academic Standing Committee which will make decisions concerning their readmission. They should also provide evidence, usually in the form of a transcript from another institution, of formal study and/or accomplishment. If possible, such work should have been done in specific areas of deficiency in the student's academic record.

Academically dismissed students must meet all academic requirements in place at the time of their readmission. Readmission will be dependent upon various criteria including GPA, current academic progress, and the student's general standing. Students in the Westminster College of the Arts may be required to reapply or readmission.

If readmission is granted, the student is placed on conditional academic standing until the cumulative GPA reaches a satisfactory level of at least 3.0. A readmitted student is responsible for curriculum requirements in effect at the time of readmission.

Students should refer to The Student Code of Social Conduct at [https://www.rider.edu/sites/default/files/docs/student\\_code\\_of\\_social\\_conduct.pdf](https://www.rider.edu/sites/default/files/docs/student_code_of_social_conduct.pdf) for information regarding readmission following a voluntary or judicial dismissal.

## Academic Load/Overload

### Graduate Business

A full-time program consists of nine (9) or more semester hours of graduate course work. Part-time students who are employed full-time will generally be limited to six semester hours of graduate work in a given semester. During the evening summer session, the recommended course load is one-half that of a regular semester.

### Graduate Education

A full-time program during the fall and spring semesters consists of nine (9) or more semester hours of graduate course work. A full-time program during the Summer Sessions consists of six (6) or more semester hours of graduate course work. Students enrolled in the Graduate-Level Teacher Certification program are restricted to two courses (6 semester hours) per semester until the point of student teaching.

### Graduate Liberal Arts and Sciences

A full-time program consists of nine (9) or more semester hours of graduate course work. Part-time students who are employed full-time will generally be limited to six semester hours of graduate work in a given

semester. During the evening summer session, the recommended course load is one-half that of a regular semester.

## Westminster Choir College

In the Westminster College of the Arts, a full-time graduate program consists of between nine (9) and fifteen (15) semester hours. Enrollment for more than 15 semester hours constitutes an academic overload, and requires the permission of the WCA Associate Dean.

Westminster College of the Arts graduate students may exceed the normal maximum academic load after completing one (1) full-time semester at Rider University (minimum of 9 credit hours) **and** attaining a cumulative grade point average of 3.00 or higher. Students on Conditional Academic Standing are not eligible for an academic overload.

Students who exceed the normal load are required to pay an overload per credit fee for each credit over 15, except in the case of non-billable hours.

Students may enroll for a maximum of 12-14 combined credits during Summer I and II, with no more than 7 credits in any one session. These maximums may be exceeded only with the permission of the student's academic dean.

---

*Students should understand that for every hour spent in class, they are expected to spend two to three hours studying outside of class time, and should therefore plan their academic load accordingly. Study time may vary based on the student's background knowledge and class difficulty.*

## Academic Records

Academic records are maintained by the Registrar and the dean's office of each college or school for a minimum of 10 years from the date of last attendance. Records may be kept longer at the sole discretion of the University.

Access to student academic and other records may be accorded to Rider personnel with a legitimate educational interest in the records. Information may be released to other agencies and individuals according to these policies in compliance with the Family Educational Rights and Privacy Act (FERPA) of 1974 (as amended):

- Rider may release the following information without written permission from the student: fact of enrollment, dates of enrollment, degree candidacy, degree awarded, and major field.
- Rider may release the following information unless the student has requested in writing by the end of the second week of classes each semester that the information not be released: name, email, home and local address, and home and local telephone number, participation on athletic teams and organizations, dates of attendance and honors and awards received.

No other information concerning a student will be released without that student's written permission.

Students having a complaint or question regarding FERPA may write to: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-8520.

Students may request to view their academic record by making an appointment with the appropriate dean's office.

## Accompanying Costs for Voice Students

Any student studying individual voice at Rider University should expect, in most cases, to hire an accompanist. Students may choose to hire a college-approved accompanist. The per-semester fee is not refundable in any part if a student discontinues voice study or decides to seek out another accompanist. For additional information, see Tuition and Fees on Rider's website: <https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees>.

## Applied Music - Westminster College of the Arts

Individual applied music lessons for academic credit are available to all Rider University students with prior experience, regardless of major. Lessons are available in brass, composition, conducting, guitar/bass, harpsichord, organ, percussion, piano, strings, woodwinds, and voice. For all students whose major or minor program does not require applied music lessons, and for those students who have completed the applied music requirements for their degree program, fees for this elective (non-required) study will apply. Elective lessons are provided on a space-available basis. All part-time students are charged an applied music fee.

Students may earn 1 or 2 credits per semester, with the exception of graduate applied composition courses, which carry 3 credits per semester. Each fall, spring, or summer applied course consists of twelve private lessons, or the equivalent instructional time, and may require participation in studio classes, performance classes, and/or an end-of-semester jury or performance review. Applied lessons completed during the January term follow specific departmental requirements regarding instructional time.

All applied music students must observe departmental applied requirements listed in the catalog and in departmental handbooks.

Applied lesson fees are described on the Tuition and Fees section of Rider's website.

All applied music students must observe departmental applied requirements listed elsewhere in this catalog and in departmental handbooks. Students for whom applied music lessons are not required may register for lessons on a space-available basis. Interested students should consult the Associate Dean.

Applied lesson fees are described on the Undergraduate Tuition and Fees (<http://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees>) section of Rider's website (<https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees>).

Effective as of the fall 2009 semester for all new or readmitted Rider University students on both campuses. For all students whose major or minor program does not require applied music study, or for those students who have completed applied music requirements, elective fees will apply. All part-time students are charged an applied music fee.

Registration for applied music study follows this table of suffixes. Students will register for the appropriate course number and suffix, as indicated in the curriculum pages found elsewhere in this catalog.

## Full-time Students

**A – One-hour, 2-credit required lesson. Included in tuition – no extra charge.**

- Lawrenceville example: Musical Theatre major
- Princeton example: All undergraduate majors

**B – Half-hour, 1-credit required lesson. Included in tuition – no extra charge.**

- Lawrenceville example: Popular Music Culture, up to 3 semesters
- Princeton example: Theory/Composition major (half-hour voice or keyboard lesson)

**C – One-hour, 2-credit elective lesson. Not included in tuition – fee charged per semester.**

- Both campuses: Student who has completed all required lessons in their major. Student whose major does not require lessons.

**D – Half-hour, 1-credit elective lesson. Not included in tuition – fee charged per semester.**

- Both campuses: Student who has completed all required lessons in their major. Student whose major does not require lessons.

**G – One-hour, 2-credit required/elective lesson. Half-hour is required and is included in tuition. The second half-hour is elective and is not included in tuition – fee charged per semester.**

- Lawrenceville example: Popular Music Culture, up to 3 semesters
- Princeton example: Theory/Composition major (full-hour voice or keyboard lesson)

## Part-time Students

**(all students, both campuses, regardless of major or requirements)**

- Suffix E – One-hour, 2-credit required or elective lesson – fee charged per semester.
- Suffix F – Half-hour, 1-credit required or elective lesson – fee charged per semester.

## Change of Applied Teacher

Students wishing to change their applied teacher must apply to the chair of the appropriate department. Any change requested after the beginning of a semester will require the permission of both applied teachers and the department chair. If either applied teacher is the department chair, permission of the Associate Dean also is required.

## Change of Major or Applied Primary Area

Students wishing to change their major or the applied primary instrument must complete the appropriate form. Permission of the old and new major departments is required.

## Class Attendance/Absence

It is the prerogative as well as the responsibility of each faculty member to establish a clear policy for each course of instruction in regard to the nature and extent of student participation that will be expected and required.

The effect of absences upon the student's standing in a particular class will be left to the determination of the instructor in the course. However, it is expected that faculty members will be fair and reasonable concerning validated absences due to field trips, practicum, religious observance, participation in varsity athletics, placement interviews for graduating seniors, Westminster College of the Arts rehearsals or performances, and illnesses sufficiently serious to be certified by either the University Health Center or the student's physician. The faculty member should consult with the Dean of Students in instances where doubts arise regarding the course to follow in evaluating student absences.

It is the student's responsibility to inform instructors of the nature and extent of an actual or anticipated absence. If that is impossible, or if the absence is or will be more than three (3) consecutive class sessions (seven [7] calendar days), the student should contact the Office of the Dean of Students at 609-896-5101. Then the dean's office will notify the appropriate faculty member.

## **Class Cancellation Policy and Excused Absences for Princeton Campus Students Only**

During run-outs involving Westminster ensembles, private lessons for those students not involved in the run-out continue to meet. When a college-sponsored performance necessitates that 30% or more of the students in a class be absent, the class may be cancelled at the discretion of the faculty member.

The dean will excuse individuals or groups of students who are participating in college-sponsored events. Only students registered for the class or ensemble participating in an activity will be excused from class. Students excused from class(es) under these circumstances remain responsible for all class work.

## **Class Cancellation – Both Campuses**

In most cases, Rider will remain open and fully operational during inclement weather and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, close certain buildings or take other emergency actions.

If such circumstances should arise, notification will be made by phone call, text and/or email via RiderAlert, Rider's mass electronic messaging system. Students can update their information via the link: RiderAlert (<http://www.rider.edu/rideralert>) (<https://www.rider.edu/rideralert>).

Cancellations will also be announced online at [www.rider.edu](http://www.rider.edu) (<https://www.rider.edu>) and on the Rider University information hotline at 609-219-2000, option 1.

## **Commencement Requirements – Westminster Choir College only**

Academic year requirements at Westminster Choir College extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Schola Cantorum, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness. In particular, credit for spring semester choir participation is lost if a student does not attend and is not excused from Commencement. All other students are encouraged to participate in Commencement.

Students singing in one of the choirs for the Commencement ceremony will be provided with a red choir robe for the ceremony. Students participating in the ceremony as part of the graduating class can order academic regalia free of charge from Westminster Music and Books (<https://rider.bncollege.com/webapp/wcs/stores/servlet/BNCBHomePage?storeId=87921&campusId=87921&userId=-1002&catalogId=10001&ddkey=http:BNC>).

## **Course Credits**

Rider University has a 13-week semester, followed by seven days of examinations. Rider uses the true number of minutes per hour-long session; i.e., a one-hour meeting is actually 60 minutes. Three-credit classes meet for 60, 90, or 180 minutes, corresponding to, respectively and typically, 3, 2, or 1 meetings per week.

In the Westminster College of the Arts all performance courses receive credit:

- All ensembles receive 1 credit
- Other performance-based courses receive 1-3 credits
- A full-semester Student Teaching experience receives 12 credits.
- Westminster Choir College students enrolled in LL 037, MTH 100S, PI 045, or TH 045 receive credit toward their semester course load, but such credits do not count toward graduation.
- Applied music instruction receives 1-3 credits.

## **Course Level Numbering**

Courses numbered below 100 are taught at pre-college level and carry no credit. Courses numbered at the 100- to 400-level carry only undergraduate credit. The course number indicates the anticipated audience for a course; 100 level courses are designed for freshmen, 200 level for sophomores, etc.

On the Princeton campus:

1. Courses at the 500-level are open to undergraduate and graduate students. Undergraduate students who have earned at least 60 credits and a minimum cumulative GPA of 3.0 may enroll in a 600-level course upon permission of the instructor and the Associate Dean. Undergraduate students who have earned at least 90 credits and a minimum cumulative GPA of 3.8 may enroll in a 700-level course upon permission of the instructor, the Director of Graduate Studies and the Associate Dean.
2. Students with undergraduate status in the five-year B.M./M.A.T. program may take graduate courses required in that curriculum at the 500- or 600-level. Students in the B.M./M.A.T. program may take required 700-level courses in the senior year or upon successfully completing 124 credits and the student teaching semester. Students in the B.M./M.A.T. program who have not attained graduate status may enroll in non-required 700-level courses according to the restrictions stated in the previous paragraph.
3. Special students who have completed a baccalaureate degree may apply for permission to take 600- or 700-level courses. Undergraduate students in the Baccalaureate Honors Program (BHP) should see the Assistant Registrar regarding enrollment in graduate courses.

## Course Repeats - Westminster College of the Arts

All undergraduate and graduate students who are enrolled in a major or minor offered by the Westminster College of the Arts may enroll for a second or subsequent time in any *non-repeatable* WCA course from which they have withdrawn, in which they have earned an "F," or in which they have failed to earn the required minimum grade<sup>1</sup> according to the following rules:

- 1) Students who have withdrawn from, failed, or failed to achieve the required minimum grade in a required course<sup>1</sup> in their first attempt at the course may enroll for a second time without permission. All other students must have the permission of the Associate Dean.
- 2) Permission of the dean or associate dean of the college (FPA or WCC) offering the course in question is required in order to enroll in a course for the third time.
- 3) Permission of the Academic Standing Committee of the college (FPA or WCC) offering the course in question is required in order to enroll in a course for the fourth time. Permission for a fourth enrollment will be granted only in rare, extenuating, and documented circumstances.

In all instances, the most recent grade is calculated into the grade point average, and all listings and grades will remain on the transcript.

<sup>1</sup> Examples include: a minimum grade of "B-" is required in Piano Secondary, a minimum grade of "C" is required in foreign language study in order to progress to the next level in that language.

## Courses - Adding, Dropping, Repeating and Withdrawing

Timetables and deadlines given below pertain to fall and spring semesters. Students should consult the Registrar's web page for summer session deadlines.

### Adding Courses

Graduate students may add a course through the first week of the semester provided the course is still open for registration.

### Dropping Courses

Students may drop courses through the second week of the regular semester at their own discretion. In such cases, the courses are deleted from the student's record. After the second week of the semester, a withdrawal from the course is necessary and a 'W' is recorded on the transcript.

### Repeating Courses

Students may request permission from the academic dean to repeat a course to earn a better grade provided that the course is one that cannot be repeated for additional credit (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). The grade first earned will remain on the transcript but only the latest grade will be used in computing grade point average and determining whether or not degree requirements have been met.

Students who fail a required course must repeat the course until a passing grade is received. Students do not have to repeat a failed

elective, but must pass another acceptable elective of comparable credit in order to meet graduation requirements.

Students receiving financial aid should consult with Student Financial Services before repeating a course already passed to determine the possible impact upon the student's continuing eligibility for financial aid.

## Withdrawing from Courses

Students may withdraw from courses and receive a grade of 'W' during the third through seventh weeks of the semester. In the semester's eighth through eleventh weeks, students may withdraw from courses with the written consent of the course instructor and receive a grade of 'W'. Differing subject matters, instructional methodologies and course objectives make it likely that instructors will have differing criteria for giving consent to withdrawal in this period. A Lawrenceville student who wishes to withdraw officially from one or more graduate or undergraduate courses must submit a written request and must obtain the approval of the associate dean or department chair of graduate studies, or dean of the respective school.

Withdrawals are not permitted during the last two weeks of class except for reasons of validated physical or psychological incapacitation as approved by the dean of the college. Reasons must be validated by the Dean of Students and approved by the academic dean of the college in which the student is enrolled.

Students who do not withdraw officially from courses they fail to complete, will receive a grade of "F" for those courses.

Please refer to Financial Aid website (<http://www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds>) for information regarding course withdrawals and refunds.

## Degree Completion

On both campuses, students who have not satisfied requirements by the end of the specified time may be required to repeat courses and/or meet further requirements. Students for whom more than one year has elapsed since the date of last enrollment may be required to re-apply and/or re-audition for the program, and must meet all requirements in place at the time of their readmission.

On the Lawrenceville campus, students must complete all requirements for the master's degree within six (6) years of the date of first registration for graduate course work.

On the Princeton campus, students must complete all requirements for the master's degree within seven (7) years of the date of first registration for graduate course work. For Westminster Choir College students, credits earned at another institution or through Westminster Continuing Education outside the seven-year period that commenced with initial enrollment in a degree program must be approved for transfer into that program by the department offering the degree.

## Diploma Conferral

Diplomas are conferred three times each year: May, August, and December. Students must submit a degree application form, available online via MyRider or in their academic dean's office, in order to be eligible to receive a diploma on any date. Students must apply for graduation by the deadlines established each year by the Registrar's Office. See the Registrar's Office website (<http://www.rider.edu/>)

academics/academic-support-resources/registrar/commencement-candidates) for more information.

Diplomas are conferred only upon those who have met 100% of all degree requirements. Students in the combined B.M./M.A.T. program receive both diplomas upon the completion of all requirements.

## Academic Disability Policy

Rider University supports the protections available to students with disabilities under Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended, and the New Jersey Law Against Discrimination.

Student Accessibility and Support Services (SASS) facilitates equal access to the programs and activities at Rider University for students with disabilities, as defined by the Americans with Disabilities Act (ADA).

Students must initiate contact with SASS in order to receive services and to arrange reasonable accommodations, such as course adjustments, course substitutions and auxiliary aids. Any Rider student who supplies SASS with appropriate documentation of a disability is eligible on a case-by-case basis for reasonable accommodations. Students with disabilities should contact SASS (Joseph P. Vona Academic Annex, Room 8, 609-895-5492) to discuss available services and reasonable accommodations, including academic adjustments.

Only students with documented disabilities that prevent equal access to an academic course or program are entitled to reasonable accommodations, which may include course adjustments, course substitutions and auxiliary aids. A reasonable accommodation is an accommodation that provides the student with equal access to the academic course or program, including all course or program materials, but does not impose an undue burden on the University or constitute a fundamental alteration to the course or program in question. Knowledge of the essential course and program standards resides primarily with the individual faculty member and/or the academic department.

SASS evaluates the disability documentation provided by the student, collects additional information from the student, and gathers information from relevant educational support personnel (e.g., high school guidance counselors), medical and psychological professionals, and other pertinent sources outside of Rider University. When the student's disability has been sufficiently documented and potential reasonable accommodations have been identified, the student is provided a Notice of Academic Adjustments specific to each course and encouraged to present that Notice of Academic Adjustments to the relevant faculty member and to discuss, in a private setting, how the reasonable accommodations will be implemented.

If any such faculty member has concerns that the accommodations constitute a fundamental alteration to the course or program in question, that faculty member shall promptly contact SASS to initiate discussion and resolution of those concerns.

## Employment Opportunities – Westminster Choir College

The University provides work opportunities both on and off campus.

Students who demonstrate financial need as determined by the FAFSA are offered Federal Work Study in their award. Students who have no need are paid through a student employment budget. It is the responsibility of students to find their own jobs. All students are

encouraged to apply for available employment opportunities. Bi-weekly paychecks are provided directly to students rather than to student accounts.

Weekend church positions: Many Westminster students are employed in area churches on a part-time basis as organists, directors, and singers.

Princeton employment: The Princeton area provides many opportunities for part-time employment in local businesses.

## Ensembles/Productions – Attire and Registration

### Attire

Students must purchase official ensemble attire for choirs in which they are enrolled. Freshman/transfer students at the Princeton campus must be fitted during orientation and purchase a red robe which will be charged to their student account by the Bursar's Office.

### Registration

Students participating in music ensembles or artistic productions must be registered for the course that accompanies that activity. It is the responsibility of the student to ensure proper registration in the appropriate course. Excused absences are granted only to registered students.

Each semester, the official personnel roster for each ensemble will be finalized for that semester at the end of the schedule adjustment period, typically two weeks after the first day of classes.

## Full-Time Graduate Tuition Inclusion – Princeton Students

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred when full-time students exceed maximum load levels, excluding VC 593 or participation in auditioned choirs.

Please see Rider's Financial Aid website (<http://www.rider.edu/offices-services/finaid/tuition-fees/undergraduate-tuition-fees>) for elective and part-time charges for elective music and dance study.

Full graduate tuition includes:

1. A minimum of 9 and maximum of 15 credits per semester, or the equivalent including undergraduate and non-credit courses.
2. For required graduate primary applied music study, one hour per week of private instruction, except for Choral Conducting majors, who receive one half-hour per week of private instruction.
3. Once all required primary, secondary or private composition applied requirements have been completed, all additional applied lessons will be billed at the elective rate given below.
4. Students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate.
5. Any non-required private lesson will be billed at the elective rate given below. Graduate students in majors without applied requirements will be billed for applied lessons at the elective rate.

6. Please see the table of applied lesson suffixes under "Applied Music (p. 249)" in the Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

## Grades – Grade Reports, Grade Point Average, Incomplete Grades, Grade Appeals

### Grade Reports

Members of the faculty are officers of instruction at Rider University.

Among their responsibilities as such is the evaluation of students' academic accomplishments in courses of instruction. These evaluations ultimately are expressed in grades that are recorded in the students' academic record. Members of the faculty, judging the competencies and performances of students, assign grades based on their professional experience and training. Grades assigned by the faculty follow practices and procedures within the standards established by Rider and within the standards established by individual course requirements.

Letter grades are used at Rider University for recording faculty evaluations of final student achievement in individual courses and are entered on the permanent academic record of a student's academic performance.

**The academic grades used by faculty for recording evaluations of student achievement are as follows. For determining grade point averages (GPAs), grades have weighted values called variously honor points, quality points, or grade points as follows:**

A (Excellent)	4.0
A-	3.7
B+	3.3
B (Good)	3.0
B-	2.7
C+	2.3
C (Fair)	2.0
C-	1.7
D (Poor, minimum passing grade*)	1.0
F	0.0

\*Failing academic work; fail to abide by standards of academic honesty and integrity; unauthorized withdrawal, and fail to complete work in prescribed time.

Each instructor of a course will inform the student of the course objectives, procedures, and applicable grading standards. Upon a student's written request, members of the faculty will provide a review of the student's course standing at least once each term by the mid-point of that term. Each student may also review material submitted to the instructor for evaluation such as papers, examinations, and the like. In these ways, students will be able to assess their own progress in a course before final grades are assigned.

**NOTE:** Faculty members are not required to maintain student course materials more than four months after the end of an academic term.

**A student grade report may also show the following transcript notations, which carry no grade point value:**

I	Incomplete
L	Late grade
N	Registered: Did not attend
AU	Audit
P	Pass
S	Satisfactory progress
U	Failure in pass/fail course
W	Withdrawal
Y	Satisfactory completion of supplemental education course
Z	Insufficient progress in supplemental education course

"N" and "W" notations are included in the total semester hours attempted, as far as tuition payment is concerned.

### Grade Point Average (GPA)

Grade point averages (GPA) are used to establish academic standing. In order to compute the grade point average, students must first determine the number of quality points earned for each course. The total number of quality points for a course is derived by multiplying the number of credits for the course by the number of quality points for each letter grade. The grade point average (GPA) is determined by dividing the number of quality points by the number of GPA hours.

### Incomplete Grades

Students who, as a result of extenuating circumstances, are unable to complete the required work of a course within the term, may request an extension of time from a faculty member. Such extensions of time can be granted only in cases in which illness or another serious emergency has prevented the student from completing the course requirements or from taking a final examination. The request for extension of time must be made prior to the last scheduled class meeting, except in those unusual situations in which prior notification is impossible.

The faculty member shall determine whether to grant the request for a time extension and the type of verification (if any) required to support the request. The faculty member shall specify the time, up to four weeks from the last day of the term, as specified in the academic calendar, by which work must be completed by the student. If the faculty member does agree to the request, the notation "I" (Incomplete) shall be submitted on the grade roll. In those situations where the faculty member has not received a request for an extension of time, the notation "I" (Incomplete) may be submitted on the grade roll by the faculty member when, in his or her judgment, such a determination appears justified. Upon submission of completed required work the faculty member shall submit a Change of Grade form to the Registrar.

Students who, as a result of extenuating circumstances, are unable to submit the completed required work at the end of the four-week period may request an extension of the incomplete grade. The request for an extension of the incomplete must be made prior to the expiration of the four-week period. If the faculty member agrees to the request for an extension of the incomplete, the faculty member shall specify the time, up

to a maximum of two weeks from the date of expiration of the four-week period (i.e., six weeks from the last day of the term) by which work must be completed by the student and shall submit an Extension of Incomplete form to the Registrar.

Upon submission of completed required work, the faculty member shall submit a Change of Grade form to the Registrar and assign the course grade. Failure of the Registrar to receive from the faculty member a Change of Grade form or an Extension of Incomplete form at the end of the four-week period, or a Change of Grade form at the end of the six-week period shall result in the automatic assignment of the grade “F,” “Z,” or “U” by the Registrar.

Students who receive an incomplete in a course that is part of a course sequence must obtain permission from the department chairperson to remain enrolled in the next course in the sequence or they will be removed from that next course.

## Grade Appeals

### Basis for Grade Appeal

A final course grade may be changed only at the initiative of the faculty member who originally assigned the grade or as the result of a decision made in the hearing of a grade appeal by the Faculty Grade Review Panel. It is assumed that the final course grade is assigned in good faith and based on the professional expertise of the faculty member.

A student may appeal a final course grade only on the grounds that it represents an arbitrary, capricious, and/or unreasonable evaluation of his or her performance.

A grade appeal may not be based on a disagreement with the faculty member’s professional academic evaluation of the student’s work. The burden of proof rests with the student. A grade appeal shall be supported only when a student convincingly demonstrates that an arbitrary, capricious, and/or unreasonable evaluation occurred. Changes and appeals for grades on written comprehensive graduate examinations are subject to the same requirements and procedures as course grades.

The Faculty Grade Review Panel may return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process; may decline to hear an appeal when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading; and shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

### Faculty Grade Review Panel

The Faculty Grade Review Panel has final authority concerning all grade appeal questions. **The panel consists of the following nine members:**

1. Six tenured faculty members including one tenured faculty member elected by the bargaining unit members of each of the five college/school academic policy committees and one selected by the bargaining unit members of the University Academic Policy Committee, who shall serve as chairperson of the panel;
2. A seventh faculty member selected jointly by the Provost and Vice President for Academic Affairs and the academic deans;
3. Two full-time students selected by the Student Government Association who, at the time of their service, must be seniors who have attained a grade point average of at least 3.25.

Each of the above appointing groups shall also designate an alternate for each member they appoint to the panel. Faculty members of the panel shall serve two-year terms and may be reappointed.

A quorum of the Faculty Grade Review Panel shall consist of any five members. The failure or inability of any appointing body to fulfill its responsibility to appoint any member or members to the panel shall not prevent the panel from organizing itself and exercising its duties.

**The chairperson of the panel will serve as the hearing coordinator and has the following duties and responsibilities:**

1. Inform the members of the panel that a grade appeal has been received and set a date for the hearing,
2. Distribute documentary materials pertaining to the appeal to members of the panel,
3. Maintain a permanent record of the panel’s proceedings,
4. Prepare and distribute any decision made by the panel to the appropriate parties.

### Prior to Initiating a Grade Appeal

A student who believes that his or her final course grade represents an arbitrary, capricious, and/or unreasonable evaluation of his or her work is strongly encouraged to talk with the faculty member in an effort to resolve the issue before filing a formal grade appeal. However, it must be emphasized that this informal discussion does not constitute the initiation of a grade appeal and does not extend the time limits specified in the next paragraph.

### Initiating a Grade Appeal

To initiate a grade appeal, the student must forward a letter to the faculty member which clearly and precisely describes the student’s reasons for believing that the final course grade constitutes an arbitrary, capricious, and/or unreasonable evaluation of his or her performance. A copy of this letter shall also be sent to the faculty member’s department chairperson. (If the faculty member taught the relevant course in another department, the letter shall be sent to the chair of that other department. If the relevant course is in a program and is not cross-listed, the letter shall be sent to the chair of the program director’s home department.)

For appeal of fall semester grades, the letter must be postmarked or hand-delivered within seven (7) days of the start of the upcoming spring semester. For appeal of spring semester grades, it must be postmarked or hand-delivered within thirty (30) days of the last regularly scheduled spring semester examination. For appeal of summer grades, it must be postmarked or hand-delivered within seven (7) days of the start of the upcoming fall semester. For appeal of grades on written comprehensive graduate examinations, it must be postmarked or hand-delivered within thirty (30) days of the date that grades were issued for the examination.

If a change of grade occurs after the aforementioned deadlines, the grade appeal must be filed within thirty (30) days of the submission of the changed grade to the registrar.

If the faculty member who assigned the grade in question is no longer at Rider or is away from Rider on an extended basis and not available for consultation, the initial review shall be conducted by the appropriate department chairperson, and the schedule may be extended at the appropriate dean’s discretion.

If the faculty member who assigned the grade in question is the department chairperson, the chairperson's dean or that dean's designee shall replace the chairperson in all the procedures that follow.

Failure to submit a written statement of the appeal within the time guidelines established above shall constitute grounds for denying a student access to the grade appeal process. Failure to provide a clear and precise statement shall constitute grounds for denying the appeal at any step in the process. Once a grade appeal is initiated, the basis of all subsequent proceedings must be limited to the allegations appearing in the initial written statement. This limitation does not exclude the introduction of new evidence directly related to the initial allegations.

The chairperson of the Faculty Grade Review Panel, upon written request of any party, may extend any deadline contained in this policy if he or she believes that circumstances beyond the control of a party to the appeal have prevented compliance with stated deadlines. The decision of the panel chairperson to extend or not to extend a deadline shall not be subject to appeal.

## The Grade Appeal Process

### Step One

In the letter of appeal, the student may request a formal meeting with the faculty member. If the faculty member agrees to such a meeting, the meeting shall be held no later than fourteen (14) days after the beginning of the fall or spring semester following the semester or session in which the grade was given. However, the parties are encouraged to schedule such a meeting at an earlier date if mutually convenient.

The faculty member shall render a decision on the appeal within seven (7) days of such a meeting and shall notify the student and the department chairperson in writing of the decision. If the faculty member agrees to change the final course grade of the student, he or she shall submit a Change of Grade form to the Registrar.

If the faculty member believes that a meeting with the student would not be productive, he or she shall make a decision on the appeal based on the student's letter and shall communicate the decision in writing to the student and the department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given.

If the student accepts the decision of the faculty member at Step One, no further action is required. If the student does not accept the faculty member's decision at Step One, he or she may appeal the decision to Step Two in writing to the department chairperson with a copy to the faculty member's dean. This letter must be postmarked or hand-delivered within seven (7) days of the postmark date of the faculty member's Step One decision.

If the student does not receive a written response from the faculty member or department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given, the student may, within twenty-one (21) days of the beginning of that semester, proceed to Step Two as indicated below. All such written responses shall be mailed to the student's campus address, if the student resides on campus, or otherwise to the student's home address on record.

### Step Two

Within fourteen (14) days of the receipt of a student's letter of appeal to Step Two, the department chairperson shall schedule a meeting with the student and the faculty member. At such meeting, the student and

the faculty member will have the opportunity to explain their positions with respect to the grade in question, but they shall be limited to the allegations raised in the student's initial written statement.

The department chairperson shall render an opinion on the matter within seven (7) days of the Step Two meeting and shall provide explanatory language for this opinion in writing to the student, the faculty member and the faculty member's dean.

If the department chairperson's opinion supports the position of the faculty member, the student shall have seven (7) days from the postmark date of the letter from the department chairperson to continue his or her appeal to the Faculty Grade Review Panel as described in Step Three.

If the department chairperson's opinion supports the student's position in the appeal, the faculty member shall have seven (7) days from the postmark date of the department chairperson's letter opinion either to accept that opinion and submit a Change of Grade form to the registrar, or to reject the opinion and notify the student, department chairperson, and faculty member's dean that the faculty member is making an appeal pursuant to the Step Three process.

If the student does not receive notification of a change of grade within twenty-one (21) days of the date of the department chairperson's written decision, the student may carry the appeal to Step Three.

### Step Three

To carry the appeal to Step Three, the student must submit a letter expressing that intent to the chairperson of the Faculty Grade Review Panel with copies to the faculty member, the department chairperson, the dean, and the Provost and Vice President for Academic Affairs.

Within seven (7) days (excluding vacation and examination periods) of the receipt of this letter, or the letter from the faculty member who has appealed, whichever the case may be, the chairperson of the Faculty Grade Review Panel shall schedule a meeting of the panel to consider the appeal.

The student and the faculty member shall have the right to appear before the panel to present information pertaining to the allegations made in the student's initial written statement.

The Faculty Grade Review Panel may, if it deems it desirable, request attendance by the chairperson, the dean, and/or any other representatives of the University. Attorneys or advisors to the participants may attend but not participate in the meeting of the panel.

The unwillingness of the faculty member or student to appear before the panel shall not prevent the panel from proceeding with its deliberations. In those deliberations, the panel shall have access to written documents pertaining to the appeal, pertinent records of student performance, and such verbal presentations as may be made during panel deliberations.

On the basis of careful consideration of the available information, the Faculty Grade Review Panel will determine if an arbitrary, capricious, and/or unreasonable evaluation of the student's performance has occurred. This determination will be made in writing and provided to all affected parties.

If the panel determines that no such action occurred, the case will be closed with no further right of appeal. If the panel determines that an arbitrary, capricious, and/or unreasonable evaluation has occurred, it will direct the faculty member's department (or will establish an evaluation committee of faculty members in the field of the course offered) to re-

evaluate the student's performance based upon the panel's decision, the records and documentary materials.

Within fourteen (14) days of the receipt of the panel's directive, the department or evaluation committee shall recommend to the panel a grade that it deems appropriate, whether higher than, lower than, or the same as the original grade. Normally, the panel will accept the revised evaluation by the department or committee and will subsequently notify the Registrar of any change of grade. Should the panel feel that the department or committee has not conducted its review in an appropriate manner and that, as a result, the suggested substitute grade is not appropriate, it shall have the authority to direct the Registrar to enter the grade that the panel judges appropriate.

Decisions of the panel are not subject to further appeal. The panel may also return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process, or when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading. The panel shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

### Expediting a Grade Appeal

When a student's graduation is affected by the outcome of a grade appeal in a semester, term, or session immediately preceding such graduation, faculty members shall make reasonable efforts to expedite the process.

### Grade Changes Made at Initiative of Faculty Member

The individual faculty member may determine that it is appropriate to change a recorded academic grade. Such changes must be made within four (4) months of the date that the original grade was assigned. Any change of grade initiated by a faculty member more than four (4) months after the date the original grade was assigned must be approved by the faculty member's dean. Faculty members, using forms supplied by the Office of the Registrar, will prepare a written change of grade stating the reasons for the grade change with a copy to the student, the department chairperson and the faculty member's dean. Upon receipt of this form by the Office of the Registrar, the grade will be changed on the official records of the University.

## Graduate Assistantships

A limited number of assistantship positions and graduate scholarships are available to full-time graduate students.

On the Lawrenceville campus, further information can be found under Scholarships for Graduate Students (<http://www.rider.edu/offices-services/finaid/scholarships-grants/graduate-scholarships>) on Rider's website.

On the Princeton campus, inquiries should be directed to the Office of Admissions (<http://www.rider.edu/wcc/admissions>). Princeton students must maintain a minimum GPA of 3.0 at all times to retain an assistantship.

## Graduate Oral Examinations - Westminster Choir College

### Oral Examinations (Graduate Students)

#### General information

1. All students pursuing the M.M., M.M.E., or M.V.P. degree at Westminster Choir College of Rider University must pass a final oral examination.
2. The oral examination normally occurs during the last semester in which a student is enrolled prior to graduation.
3. **All courses required to remediate academic deficiencies must be completed successfully by the end of the semester prior to the oral examination.**
4. The oral examination must be completed by the deadline published in the Academic Calendar (p. 1137) in this catalog.
5. Students who elect to pursue multiple graduate programs must pass a separate final oral examination in each major area.
6. Students who have not passed all portions of the oral exam must be re-examined within one year from the date of the original or previous exam. Students failing to meet this deadline or those who have not passed the oral examination after three attempts are no longer considered degree candidates and become ineligible to graduate.
7. Students must apply to schedule the oral examination by November 1 for a fall examination, by April 1 for a spring examination, or by June 1 for a summer examination.

#### Examining Committee

1. The examining committee consists of no fewer than three Westminster **music** faculty members, full-time or adjunct, including two from the student's major program area, and one member of the student's choice from outside the major area.
2. Departments may establish their own policies for membership on the major area portion of the examining committee.

#### Structure and Content of Examination

1. The structure and content of the examination should support the general philosophy of graduate education, as previously endorsed by the Westminster Academic Policy Committee, which states:

*"Critical thinking is to be encouraged throughout the curriculum. Students should acquire a musicological sensibility and the ability to engage in a logical discourse about varied aspects of the art. In addition to overall musical competency, true expertise is required in a particular area. At the conclusion of their studies, students should have an understanding of what remains to be learned and the tools to continue their education throughout their lives. They should be fully prepared to embark upon—or continue in—their professional lives as performers, composers, teachers, ministers of music, conductors, doctoral students, and as vigorous advocates for music."*

While specific content is left to the discretion of the department, the examination should be designed to demonstrate the student's ability to engage in a logical discourse in the major area and its relationship to various aspects of the art, and should transcend the mere recitation of factual information.

2. Departments will create written guidelines to assist students in preparing for the examinations, which will be distributed to students at the onset of their graduate studies.
3. The Director of Graduate Studies will periodically attend examinations as a fourth, non-voting member to ensure a degree of interdepartmental consistency in content and the standard to which students are held. The DGS will report his/her findings to the Graduate Committee and the WAPC for future review.

## Health and Safety

Westminster Choir College/Westminster College of the Arts of Rider University, as required by the National Association of Schools of Music, is obligated to inform students and faculty of health and safety issues, hazards, and procedures inherent in practice, performance, teaching, and listening, both in general and as applicable to their specific specializations. This includes but is not limited to information regarding hearing, vocal and musculoskeletal health, injury prevention, and the use, proper handling, and operation of potentially dangerous materials, equipment, and technology.

It is important to note that health and safety depends largely on personal decisions made by informed individuals. Rider University has health and safety responsibilities, but fulfillment of these responsibilities cannot and will not ensure any individual's health and safety. Too many factors beyond the University's control are involved.

Each individual is personally responsible for avoiding risk and preventing injuries to themselves before, during, and after study or employment at Rider University. The policies, protocols, and operational procedures developed do not alter or cancel any individual's personal responsibility, or in any way shift personal responsibility for the results of any individual's personal decisions or actions in any instance or over time to the University.

All members of the Westminster College of the Arts community are encouraged to visit Health and Safety Recommendations (<http://www.rider.edu/student-life/health-wellness/student-health-services/health-safety-sfpa-wcc-students>) on Rider's website for a series of recommendations and resources designed to help each individual to become aware of and attend to various issues.

## International Student Status

Federal regulations require that all F-1 and J-1 undergraduate and graduate international students maintain full-time status. International students may engage in one online course per mandatory term (fall and spring term) as long as they are enrolled in a full course load. Students may request part-time status under specified, limited circumstances, including during their final semester. Prior approval of the Center for International Education (<https://www.rider.edu/offices-services/center-for-international-education>) is required.

All international students do not need to comply with the above restrictions for summer course work.

## Interruption of Studies

Lawrenceville

Students who interrupt their studies must notify the appropriate graduate program office. If studies are interrupted for up to one year, students may return with the approval of the advisor. However, if two calendar years

elapse between the last date of attendance and the next registration, students must submit an application for readmission together with a nonrefundable readmission fee. Students will be responsible for the application and degree requirements in force at the time of readmission.

For students to remain in good standing with the division, they must file a notification of non-attendance form announcing their intention to not attend any semester prior to the beginning of that semester. The form may be procured from the approved graduate office.

## Princeton

A student who wishes to discontinue study for any reason should withdraw officially from Rider University. Withdrawal from the university is accomplished by submission of the proper form, signed by the student, to the Associate Dean of Students. If it is not feasible to complete and submit the official form, a letter stating intention to withdraw may suffice.

Failure to observe the proper withdrawal procedure results in the recording of failing grades for all courses if a student leaves during a term. If a student leaves and returns within the same semester, consultation with course instructors may be necessary to ensure that coursework can be completed. Official withdrawal from the college is effective on the date that the Associate Dean of Students signs a withdrawal form or receives a letter stating intention to discontinue enrollment. A withdrawal date must fall within a term if grades of "W" are to be recorded.

The Graduate Committee may require a student who has withdrawn from the college and who seeks readmission to present evidence demonstrating that the conditions leading to the withdrawal are no longer operative. If it is felt that it is not in the best interests of the student or the college, permission to return may be denied. An audition and/or interview may be required for readmission.

Students withdrawing for medical reasons or to fulfill a military obligation may apply to the Associate Dean of Students. Written documentation is required, and the maximum length for such a leave is one year. If a leave of absence has been granted for medical reasons, the student may be required to submit evidence documenting full recovery. If a leave is granted, the student may return at any time within one year, so long as a letter stating intention to return is submitted to the Associate Dean of Students at least one month in advance of the start of a new term.

## Outside Activities – Westminster Choir College only

Westminster Choir College students are expected to give priority to all officially scheduled classes, lessons, rehearsals, on- and off-campus performances (including tours), and other official functions involving music students. Outside activities, such as employment, church or volunteer work, or other professional engagements should not conflict with college requirements or those listed on course syllabi. Students employed outside of the college should inform employers of their commitment to their education and their obligation to college classes and ensembles.

## Thesis/Capstone - Westminster Choir College Only

Students in the M.M.E. (p. 1104) and M.V.P. (p. 1130) programs must register for one hour of thesis credit in the semester or summer term in which thesis work begins, in the semester or summer term in which

work is completed, and in any other semester or summer term in which assistance is provided by the thesis advisor. A grade of "S" will be recorded on the student's transcript in any/all semesters while thesis work is ongoing, but incomplete. Students in the M.A.T. (p. 151) program must complete a capstone as part of the degree requirements.

Upon final approval of the thesis, a letter grade will be assigned by the thesis advisor for the final semester of registration. Final approval and deposit of the thesis must occur a minimum of one month prior to the end of the semester in which graduation is anticipated for Music Education students; a minimum of two weeks prior to the end of the semester in which graduation is anticipated for Voice students.

## **Transfer Credit While Currently Enrolled at Rider**

Currently enrolled students are strongly encouraged to obtain permission to transfer a course before enrolling for a course at another institution, using the form available in the Assistant Registrar's Office on the Princeton campus, the Registrar's Office on the Lawrenceville campus or their academic dean's office. If prior approval is not obtained, there is no guarantee that transfer credit will be granted.

For specific information about transfer credit policies on the Lawrenceville campus, visit their webpages:

**College of Business Administration** (p. 53)  
**School of Education** (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-sciences/school-of-education>)

The following information is for **Westminster Choir College, Princeton Campus** only:

Approval of transfer credits is given by the appropriate academic department, following receipt of a written petition and an official transcript. Graduate students may request transfer of a maximum of six (6) credits from other graduate schools. A maximum of six (6) additional credits earned through the Westminster Continuing Education program may be applied toward graduation requirements in the M.M. and M.V.P. programs. A maximum of twelve (12) additional credits earned through the Westminster Continuing Education program may be applied toward graduation requirements in the M.M.E. program. Official transcripts must be submitted before any transfer or continuing education credits can be accepted.

# CODE OF ACADEMIC INTEGRITY

## Introduction

All information given here applies to all undergraduate and graduate students of Rider University.

## Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to those standards and policies set forth in this catalog. **Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student;**
2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirement), creations, and activities engaged in by the student while at the University, including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, Internet/web-based productions and sales, and athletic events and all proceeds therefrom. He/she has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

## Rider University's Right to Change Catalog Contents

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

**Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student.** While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and reasonable treatment of interested parties requires in the University's best judgment.

## Academic Rights and Freedoms

It is the responsibility of Rider University to protect the academic freedoms of the students in accordance with the Joint Statement on

Rights and Freedoms of Students. Of critical importance is section two, which deals with the relationship between the professor and the student. "The professor in the classroom and in conference should encourage free discussion, inquiry and expression. Student performance should be evaluated solely on an academic basis, not on opinions or conduct in matters unrelated to academic standards."

### Protection of Freedom of Expression

Students should be free to take reasoned exception to the data or views offered in any course of study and to reserve judgment about matters of opinion, but they are responsible for learning the content of any course of study for which they are enrolled.

### Protection Against Improper Academic Evaluation

Students should have protection through orderly procedure against prejudiced or capricious academic evaluation. At the same time, they are responsible for maintaining standards of academic performance established for each course in which they are enrolled.

### Protection Against Improper Disclosure

Information about student views, beliefs and political associations which professors acquire in the course of their work as instructors, advisors and counselors should be considered confidential. Protection against improper disclosure is a serious professional obligation. Judgments of ability and character may be provided under appropriate circumstances, normally with the knowledge or consent of the student.

When students feel that their academic rights and freedoms have been violated, they must have a defined avenue of appeal that is consistent with the principles outlined in the Joint Statement on Rights and Freedoms of Students, the AAUP 1940 Statement on Academic Freedom, and the AAUP 1956 Statement on Professional Ethics.

## Code of Academic Integrity

### Preamble

Academic honesty constitutes the cornerstone of the academic community. Learning, teaching and scholarship cannot be conducted in an atmosphere of dishonesty. Therefore, Rider University insists on strict adherence to the concept of academic honesty as indispensable to the continued existence and future development of the campus community. Every student has a direct personal interest in maintaining academic honesty since each evaluation of academic progress involves a judgment by the faculty member concerning each individual's intellectual performance. The evaluation process is predicated on the assumption that an individual's achievement reflects his/her own ability, effort and perceptions.

Academic dishonesty includes any unauthorized collaboration, misrepresentation or fabrication in the submission of academic work. In all written work, whether in class or out of class, the student's name on the work is considered to be a statement that the work is his or hers alone, except as otherwise indicated. Students are expected to provide proper citations for the statements and ideas of others whether submitted word for word or paraphrased. Failure to provide proper citations will be considered plagiarism and offenders will be subject to the charge of plagiarism specified in the statement of regulations.

Similarly, students are expected to adhere to all regulations pertaining to examination conduct including placement tests. These regulations are designed to insure that the work submitted by the student on examinations is an honest representation of that student's effort and that it does not involve unauthorized collaboration, unauthorized use of notes

during the exam, or unauthorized access to prior information about the examination.

In oral or written submissions presented as scientific or non-fiction, fabrication or alteration of facts, data, images, or audio or video recordings, or misrepresentation of procedures or of participation in an academic activity, for the purpose of misleading, also constitutes academic dishonesty.

## Jurisdiction of the Code of Academic Integrity

Each student is responsible for his or her academic conduct from the time of acceptance for admission through the actual awarding of a degree.

## Statement of Regulations

### Section 1. Out-of-Class Assignments.

Students are expected to provide proper citations for the ideas and statements of others. When the ideas are paraphrased, the sources of those ideas need only to be properly cited. When the ideas are quoted (copied word for word), the copied words must be set in quotation marks and cited. When students collaborate on papers or out-of-class examinations, the names of all collaborators must be acknowledged on all papers submitted. It is expected that research and writing assigned to an individual student will be done by that student.

*1.1 Ghostwriting.* Written work submitted by an individual student (or group of students working together as approved in advance by the instructor) is expected to be the work of that student (or approved group). A false claim of authorship is an act of academic dishonesty.

*1.2 Word for Word Plagiarism.* Copying, word for word, from any source (book, magazine, newspaper, Internet source, unpublished paper or thesis) without proper acknowledgment by quotation and citation within the text of the paper, or the submission of any part of another's work, word for word, without proper quotation and citation is an act of academic dishonesty.

*1.3 Patchwork Plagiarism.* The submission of work which has been constructed by piecing together phrases and/or sentences quoted verbatim (word for word) or paraphrased from a variety of unacknowledged sources is an act of academic dishonesty.

*1.4 Unacknowledged Paraphrases.* Submission of another author's facts or ideas in one's own words without acknowledgment by proper citation is an act of academic dishonesty. (If the ideas or information are neither originally the student's nor cannot be found in a variety of sources, the source must be acknowledged by footnotes or by proper citation within the text of the paper. Failure to acknowledge this indebtedness is referred to as "unacknowledged paraphrase.")

### Section 2. Examination Conduct

Students are expected to adhere to the following regulations pertaining to their personal and academic conduct before, during, and after examinations. These regulations are designed to insure that the work submitted by a student on examinations is an honest representation of that student's effort and that it does not involve unauthorized

collaboration, unauthorized use of notes during an examination, or unauthorized access to prior information about the examination.

*2.1 Prior Access to Examinations.* No student may have direct or indirect access to an examination or an examination question without the express approval of the faculty member who has prepared the examination. Unauthorized entry into offices, duplicating centers, computers, voice mail, fax, other electronic media, or personal possessions of faculty is prohibited. Prior access to examination information, attempts to gain access to examination material, unauthorized possession of examination material, and the derivation of benefit from or aiding access to examination materials are all acts of academic dishonesty.

*2.2 Unauthorized Assistance During Examinations.* The receiving or giving of any written, oral or visible help on an examination is an act of academic dishonesty.

*2.3 Proxy Representation.* Students are expected to sit for examinations required for the courses in which they are enrolled. Proxies/ghosts are strictly prohibited. Serving as a proxy, or being served by proxy, during an examination is an act of academic dishonesty. (Students must carry ID cards at all times, including the times they present themselves for examinations. Students must present their ID cards during an examination if requested to do so by the proctor or instructor.)

*2.4 Unauthorized Use of Written or Electronic Material During Examinations.* No student may use any book, notebook or other written or electronic materials during an examination unless such examination has been designated as an "open book" type, in which case the examining faculty member must have so informed the class prior to the examination. Materials which are not permitted to be used on the examination, if brought to the examination room, must be deposited at a location specified by the faculty member. Unauthorized possession of any written materials during an examination is an act of academic dishonesty.

### Section 3. Fabrication

Students are expected to accurately report facts and data obtained in their research activities; present documentary photographs and audio and video recordings honestly; and, report on their attendance at events and engagement in activities honestly and accurately. Fabrication includes the making up or falsification of facts, data, sources or procedures; misleading doctoring or manipulation of photographs or video; or falsely claiming to have attended an event or visited a site, or engaged in an activity, or misrepresenting the time devoted to such attendance, visitation, or engagement, for the purpose of misleading.

*3.1 Fictional devices in nonfiction material.* Names, dates, places and other verifiable facts should not be altered in any paper or story that purports to be factual and non-fiction. Facts that must be disguised or withheld to protect the privacy or safety of a source should be acknowledged with an appropriate explanation to the reader/viewer. Composites, which present the characteristics or experiences of more than one person or event blended into one, should not be used without a clear explanation to the reader/viewer.

*3.2 Documentary photos and audio or video recordings.* While manipulating images and recordings for purposes of satiric or similar effect is permissible for artistic purposes, such manipulations should not be presented in a way that can be confused with reality. It is not permissible to doctor or manipulate photographs or recordings if the result is counterfactual. Cropping and enhancement of clarity are permissible, provided it does not distort reality so as to deceive the audience.

**3.3 Scientific misconduct.** Fabrication, manipulation, or “fudging” of the processes or results of experiments or observations, and similar practices which seriously deviate from those commonly accepted by the scientific community, as represented by your faculty, for proposing, conducting or reporting research, are also violations of this policy. Honest errors and honest differences of opinion in interpretations and judgments of data are not included in this definition.

**3.4 Procedural dishonesty.** This category includes falsely claiming to have attended an event or to have remained at the event longer than one did; claiming to have visited a site; or to have engaged in an activity, whether for purposes of extra-credit in a course, or for inclusion in a graded assignment.

## Procedures to be Followed in Cases of Academic Dishonesty

### Step One

When a faculty member has reason to believe that an act of academic dishonesty has been committed by a student enrolled either in a current course or in one completed within the previous four months, the faculty member shall notify the student in writing of the alleged violation and require that the student meet with the faculty member at a mutually satisfactory time within five (5) working days after the faculty member's notification. The faculty member shall have the authority to extend the time within which the meeting takes place to ten (10) working days at his or her discretion. If the meeting does not occur within this time, the faculty member may proceed with the imposition of any of the sanctions described below.

At this meeting with the student, the faculty member and the student shall discuss the alleged act of dishonesty. The faculty member and the student shall seek to resolve the matter during this meeting. If the faculty member concludes that an act of academic dishonesty has not occurred, no further action shall be taken and the student shall be permitted to complete the course, if it is still in session, as if the faculty member's allegation had not been made.

If, as a result of information obtained in this meeting and/or shortly thereafter, the faculty member concludes that an act of academic dishonesty has occurred, he/she must notify the student of this determination in writing within seven (7) working days of the meeting and must indicate which one of the following sanctions will be invoked. The existence of a prior finding of academic dishonesty may impact the choice of sanction. The options are listed below in ascending order of seriousness. The faculty member may:

1. Direct the student to resubmit any work necessary to complete the course requirements;
2. Direct the Registrar to change the grade given to the student to the notation “Incomplete” and direct the student to resubmit any work necessary to complete the course requirements;
3. Lower the grade appropriately on the assignment in which the academic dishonesty took place in light of the gravity and implications of the act of dishonesty, recalculate the final course grade, and direct the registrar to change the final course grade accordingly;
4. Direct the Registrar to enter the grade of “F” for the course on the student's permanent academic record (this “F” supersedes all other grades, including the “W” notation);

5. Initiate charges against the student with the Academic Integrity Committee for the purpose of causing the student to be suspended or dismissed from the University

The sanction will be effective immediately upon notification, except for sanction #5.

When the faculty member invokes sanction #5, he/she must submit a letter detailing the act of alleged academic dishonesty to the Academic Integrity Committee and, simultaneously, to the student involved, to the faculty member's department chairperson, to the student's academic dean and, in the case of an undergraduate student, to the Dean of Students.

When the faculty member invokes any of the sanctions #1 through #4 and the student does not challenge the decision within seven (7) working days of receiving notice from the faculty member, the faculty member shall place copies of the decision in the student's academic file in the student's academic dean's office. If the student challenges the sanction (#1-#4) recommended by the faculty member (based solely on disputing the charge of academic dishonesty), he/she shall have the right to pursue a written appeal beyond the faculty member, first to the chairperson of the department where the faculty member (or if an adjunct based solely in a program, where his/her program director) is based and then, if necessary, to the appropriate academic dean. If the faculty member of the course is the department chairperson, the appeal shall go directly to the appropriate academic dean.

### Step Two

The written appeal to the department chairperson or academic dean must be made within seven (7) working days of the receipt of the faculty member's decision, with a copy of the appeal to the faculty member. The department chairperson or academic dean will have seven (7) working days to reach his/her decision. The department chairperson or academic dean shall send the decision to the student by registered mail or hand delivery, with a copy to the faculty member. If the department chairperson upholds the faculty member's decision regarding academic dishonesty and the student does not appeal this decision in writing to the appropriate academic dean within seven (7) working days from the receipt of the decision, the department chairperson shall place copies of the decision in the student's academic file in the student's academic dean's office.

### Step Three

If either the student or faculty member is dissatisfied with the chairperson's or dean's decision, the student or faculty member will have seven (7) working days from receipt of that decision to submit a written appeal to the dean of the college in which the course is taught, with copies to the faculty member, student, and department chairperson. (If the dean has already ruled on the case, he/she shall appoint another department chair, or an associate or assistant dean to handle this appeal.) The appropriate dean shall schedule a meeting with the student and faculty member to hear the appeal as soon as it can reasonably be set, and, following his/her assessment of the situation, will have seven (7) working days to render a decision. The dean shall convey his/her decision in writing by registered mail or hand delivery to the student, with a copy to the faculty member and the department chairperson. If the dean upholds the faculty member's decision regarding academic dishonesty and the student does not appeal this decision to the Academic Integrity Committee within seven (7) working days from receipt of the decision, the dean shall place copies of the decision in the student's academic file in the student's academic dean's office. If after appealing to the dean, the student or faculty member is still dissatisfied, a final appeal may be made

in writing to the Academic Integrity Committee within seven (7) working days of receipt of the dean's decision.

#### **Step Four**

##### **The Academic Integrity Committee shall consist of six (6) members:**

Three (3) faculty members appointed by the bargaining unit members of the University Academic Policy Committee; two (2) administrators with faculty rank appointed by the Provost and Vice President for Academic Affairs; and one (1) full-time undergraduate student selected by the Student Government Association who, at the time of his/her service, must be a senior with a grade point average no lower than 3.25.

The bargaining unit members of the University Academic Policy Committee, the Provost and Vice President for Academic Affairs, and the Student Government Association shall each designate one alternate who shall serve in the event an applicable appointee is unable to serve. The bargaining unit faculty members and the administrators shall serve two-year terms, beginning with the date of appointment, and may be reappointed. The student member shall serve a one-year term.

The committee shall select from among its members with faculty rank a chairperson and a vice chairperson, and immediately notify the President, the Provost and Vice President for Academic Affairs and the chairperson of the University Academic Policy Committee, the president of the Student Government Association, and the Dean of Students of the names of the designees. The chairperson or vice-chairperson shall serve as the hearing coordinator. Any three (3) members of the committee with faculty rank (including the hearing coordinator) shall constitute a quorum.

The failure or inability of any appointing body to fulfill its responsibility to appoint any member(s) to the Academic Integrity Committee shall not prevent the committee from organizing and exercising its prescribed duties. Whenever there is no chairperson or vice-chairperson of the committee, the Provost and Vice President for Academic Affairs shall appoint a convener. Ordinarily, the chairperson (or vice-chairperson, in his/her absence) shall preside over the meetings of the committee.

##### **The hearing coordinator shall have the following duties and responsibilities:**

1. To assure that all procedures have been followed;
2. To inform the members of the committee that a charge of alleged academic misconduct against a student has been brought by a faculty member or that a student or faculty member has appealed a decision;
3. To see that all members of the committee receive the appropriate materials necessary for the hearing of the charge and appeal;
4. To keep a permanent record of the committee's proceedings; and
5. To see that all decisions made by the committee are prepared and distributed to the relevant parties.

Within ten (10) working days after receipt of a charge brought by a faculty member, or an appeal brought by either party, a date for a hearing shall be set and the faculty member and the student shall be notified of that date. If the hearing has not occurred within those ten (10) days, it shall be scheduled to take place as soon as possible thereafter. The committee chairperson shall have authority to extend any deadlines when it is evident that both parties have made good faith, though unsuccessful, efforts to meet the stated deadlines. Parties at the hearing shall be limited to members of the Rider University community with information pertinent to the given case. The student may choose to

have a University advisor present with him/her. This advisor may be a university administrator, faculty member, or current student.

If the requested sanction is dismissal from the University, the student shall have the right to be accompanied by an attorney. If the committee indicates in advance that dismissal will not be considered by the committee no attorney shall attend. In cases where dismissal will be considered, if the student wishes to be accompanied by an attorney, the hearing coordinator must be so notified at least seven (7) days before the scheduled hearing so that the University may also have counsel present.

##### **The committee shall establish the operating procedures by which it reviews cases. Standard operating steps include:**

1. An uninterrupted presentation of his/her position by whichever person brought the matter to the committee (faculty member or student);
2. An uninterrupted presentation of his/her position by the other party (faculty member or student);
3. Committee questioning of either and/or both parties;
4. Committee review of any documents or affidavits proffered by the parties;
5. Committee deliberations in executive session.

The role of any University advisor or attorney present shall be that of observer of the proceedings and advisor to his/her client and shall not include the right to question either party for the record. An audio recording shall be made of all proceedings conducted by the Academic Integrity Committee.

After both the faculty member's and the student's assertions and responses have been heard (including questioning of either party by the committee), the committee will decide whether the faculty member's charge and sanction shall be upheld.

If the faculty member's charge is upheld, the committee will normally uphold the sanction originally imposed, if it is consistent with the faculty member's pre-stated written guidelines (if any) given to the student at the outset of the course about the consequences of an act of academic dishonesty. However, the committee will have recourse to any one of the four (4) other sanctions which the faculty member could have chosen, or may decide to suspend or dismiss the student, depending upon the specific circumstances connected with each case.

When a student's graduation is affected by the outcome of an academic conduct case in a semester, term or session immediately before such graduation, all parties in the case shall make reasonable efforts to expedite the entire process.

As a result of its deliberation, the committee may find the student innocent of academic dishonesty, thereby levying no sanctions against the student. Under this condition, no punitive action shall be taken against the student, either by the committee or by the faculty member.

##### **If the committee finds the student guilty of academic dishonesty, it may direct that one of the following sanctions be taken against the student in ascending order of seriousness:**

1. That the student resubmit any work necessary to complete the course requirements;
2. That the registrar change the grade given to the student to the notation "Incomplete" and direct the student to resubmit any work necessary to complete the course requirements;

3. That the grade be lowered appropriately on the assignment in which the academic dishonesty took place in light of the gravity and implications of the act of dishonesty, and recalculate the final course grade and direct the registrar to change the final course grade accordingly;
4. That the registrar enter the grade of "F" for the course on the student's permanent academic record (this "F" supersedes all other grades, including the "W" notation);
5. That in addition to, or in place of, any of the sanctions imposed above, the student be suspended for a definite period of time or be dismissed from the University, whenever the committee deems it in the best interests of the University to do so, with the notation, "Dismissed for Academic Dishonesty" entered on the student's permanent academic record.

The sanction invoked will become effective immediately upon notification.

The committee shall notify, by registered mail or hand delivery, the faculty member and the student of its decision within five (5) working days after the hearing, and copies of the decision shall be forwarded to the student's chairperson and dean for inclusion in the student's academic file. The committee's decision shall be final, with no other right of appeal.

Any letters placed in a student's academic file according to any of the provisions in this policy will be available to individual members of the faculty and the committee when determining sanctions in subsequent incidents of academic dishonesty for that student. These letters will also be made available to the members of Academic Standing Committees for making subsequent decisions regarding conditional academic standing and academic dismissal for that student.

## **VETERANS AND MILITARY SERVICE INFORMATION**

---

Rider's degree programs are approved under the Veterans Readjustment Benefits Act of 1966, as amended. An application for VA Education and Training benefits is available online at [www.vets.gov](http://www.vets.gov) (<https://www.vets.gov>) or [www.benefits.va.gov/gibill/](http://www.benefits.va.gov/gibill/) (<https://www.benefits.va.gov/gibill/>).

Veterans who receive post 9/11 G.I. Bill benefits may be eligible for Rider's Yellow Ribbon program.

Students filing for benefits at Rider will be responsible for filing a copy of their separation papers (DD214) and/or their Certificate of Eligibility (COE) with the appropriate school certifying official. Contact the CCS certifying official at 609-896-5033 or the Registrar's Office certifying official at 609-896-5066 if there are any questions.

Enrolled students may contact the Veterans and Military Affairs Office at 609-896-5000 ext.7382 with any questions or concerns.

## Rider University's Vision and Mission

### Rider's Vision

Rider University will be a premier, forward-looking university known for its Engaged Learning Program that, together with dynamic academic programs, enriching co-curricular experiences and a vibrant living and learning community, challenges students, excites their imaginations and instills in them excellence in thought and action, preparing them for highly engaged and fulfilling professional and personal lives.

### Rider's Mission

Rider University welcomes students from throughout the region, across the nation, and around the world who seek to be challenged and supported as active members of our inclusive and vibrant living and learning community. Committed to student growth, transformation and leadership, we connect rigorous academic, artistic and professional programs of study with a rich array of learning experiences that engage students inside and outside the classroom. We prepare graduates to thrive professionally and to be lifelong independent learners and responsible citizens who embrace diversity, support the common good, and contribute meaningfully to the changing world in which they live and work.

Our students, alumni, faculty, staff and administrators live the **RIDER PROMISE** by being forever:

**P** - prepared to contribute meaningfully to the changing world in which they live and work

**R** - respectful of all people, rights, freedoms and individual differences

**O** - open to a life of independent learning

**M** - motivated to be responsible citizens who support the common good

**I** - innovative, creative and resourceful

**S** - skilled and thriving professionals, educators, artists and performers

**E** - engaged in their communities as leaders and role models

## Accreditations

Rider University is regionally accredited by the Middle States Commission on Higher Education (<https://www.msche.org>).

The University also holds many specialized accreditations that attest to the quality of its academic programs. Rider is among the select business schools to have attained AACSB International (<https://www.aacsb.edu>) (Association to Advance Collegiate Schools of Business) accreditation. Elementary and secondary education programs and their applicable graduate programs on both campuses are accredited by the National Council for the Accreditation of Teacher Education (<http://www.ncate.org>) (NCATE) and Council for the Accreditation of Educator Preparation (<http://caepnet.org>) (CAEP). The undergraduate and graduate music programs of Westminster Choir College are accredited by the National Association of Schools of Music (<https://nasm.arts-accredit.org>) (NASM). In addition, Rider's graduate counseling services program in the School of Education holds the Council for Accreditation of Counseling and Related Education Programs (<https://www.cacrep.org>) (CACREP) national accreditation, and its school psychology program holds the National Association of School

Psychologists (<https://www.nasponline.org>) (NASP) accreditation. Rider's B.S. Chemistry program is approved by the Professional Training of the American Chemical Society (<https://www.acs.org/content/acs/en/about/governance/committees/training.html>).

Rider University is a member of the National Collegiate Athletic Association (<http://www.ncaa.org>) (NCAA) both men's and women's athletics. The University offers 20 NCAA Division I sports—10 men's and 10 women's. Rider is a member of the Metro Atlantic Athletic Conference (<https://maacsports.com>) (MAAC) for most sports while wrestling competes in the Mid-American Conference (MAC) and field hockey competes in the Northeast Conference (NEC).

## Notice of the Title IX Coordinator

As a community of educators and learners, Rider University is committed to fostering an environment dedicated to learning and mutual respect as reflected in the University's mission, Statement of Community Values, Anti-Harassment and Non-Discrimination Policy and Title IX. All students, faculty, administrators and staff at the University have the right to expect an environment that allows them to enjoy the full benefits of their work or learning experience. The University, therefore, does not condone violations of its Anti-Harassment and Non-Discrimination Policy and treats all allegations about violations very seriously. As outlined in the Anti-Harassment and Non-Discrimination Policy ([www.rider.edu/ahnd](http://www.rider.edu/ahnd)) ([http://www.rider.edu/sites/default/files/docs/anti-harassment-non-discrimination-2015-16\\_v08012016.pdf](http://www.rider.edu/sites/default/files/docs/anti-harassment-non-discrimination-2015-16_v08012016.pdf)), the University prohibits all forms of discrimination, harassment, sexual assault, sexual misconduct, sexual harassment, dating violence, domestic violence and stalking.

Rider University is an Equal Opportunity and Affirmative Action Employer.

No one will be denied employment at, admission to, or the opportunity to participate in educational programs and activities at the University on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law. The University does not discriminate on the basis of any of the aforementioned protected bases in the recruitment and admission of students, the recruitment and employment of faculty, administrators and staff, and the operation of any of its programs and activities.

The Vice President for Human Resources serves as both the Affirmative Action Officer and the Title IX Coordinator for the University, and is the resource available to anyone seeking additional information or wishing to file a complaint related to Affirmative Action and discrimination on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era, qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law.

The Affirmative Action Officer and the Title IX Coordinator for the University may be contacted as follows:

### Robert Stoto

Senior Vice President for Human Resources and Affirmative Action  
Moore Library, Room 108  
609-895-5683  
[rstoto@rider.edu](mailto:rstoto@rider.edu)

Rider University is an Equal Opportunity and Affirmative Action Employer. The Vice President for Human Resources serves as both the Affirmative

Action Officer and the Title IX Coordinator for the University, and is the resource available to anyone seeking additional information or wishing to file a complaint related to Affirmative Action and discrimination on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation or national origin. The Vice President for Human Resources is located in Moore Library, Room 108 and can also be reached at 609-895-5683.

## **Degrees**

At its Lawrenceville campus, Rider University offers programs leading to six undergraduate degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Fine Arts, Bachelor of Arts and Education, Bachelor of Science in Education, Bachelor of Science in Business Administration, and Associate in Arts.

Undergraduate degrees in Bachelor of Music and Bachelor of Arts in Music are offered at Westminster Choir College on the Princeton campus.

# ACADEMIC CALENDAR

## Undergraduate Academic Calendar

Fall Semester 20 (p. )19

Spring Semester 20 (p. )20

Cancellation of Classes (p. )

Commencement (p. 269)

Summer Session (p. )

## Fall Semester 2019

### September

1 Sunday	Residences open for new students
1-3 Sunday-Tuesday	Final new student testing and scheduling New student orientation
2 Monday	Residences open for continuing students
4 Wednesday	Day, evening, and online classes begin
4 Wednesday	Alumni audit registration 5:00 pm-7:00 pm
4-10 Wednesday-Tuesday	Schedule changes
11-17 Wednesday-Tuesday	Courses may be dropped

### October

1 Tuesday	December 2019 degree applications due
14 Monday	Course Selection for spring semester begins

### November

Nov. 27-Dec. 1 Wednesday-Sunday	Thanksgiving recess
------------------------------------	---------------------

### December

2 Monday	Classes resume
6 Friday	Day classes end
7-8 Saturday-Sunday	Reading days
9-10 Monday-Tuesday	Final exams
11 Wednesday	Reading day
9-12 Monday-Thursday	Evening final exams
12-13 Thursday-Friday	Final exams
14-15 Saturday-Sunday	Reading days
16-17 Monday-Tuesday	Final exams

## Fall 2019 Withdrawal Dates <sup>1</sup>

Sept. 18-Oct. 22 Wednesday-Tuesday	Withdrawal, student discretion
Oct. 23-Nov. 19 Wednesday-Tuesday	Withdrawal, consent of instructor

Nov. 20-Dec. 6 Wednesday-Friday	Withdrawal, psychological or physiological incapacity
------------------------------------	---

## Spring Semester 2020

### January

6 Monday	January Term begins
3 Friday	Balance of spring charges due
20 Monday	Martin Luther King, Jr. Day (Closed)
23 Thursday	January Term ends
23-24 Thursday-Friday	New student orientation
24 Friday	New student testing and scheduling
24 Friday	Deadline for makeup of fall semester incomplete grades
25 Saturday	Residences open
27 Monday	Day, evening, and online classes begin
27-31 Monday-Friday	Schedule changes

### February

3-7 Monday-Friday	Classes may be dropped
1 Saturday	Incoming freshman, transfer and continuing undergraduate students priority deadline for filing federal financial aid forms
14 Friday	Spring 2020 degree applications due

### March

9 Monday	Course Selection for fall semester begins
14 Saturday	Last day of classes before spring recess
15-22 Sunday-Sunday	Spring recess
23 Monday	Classes resume

### April

30 Thursday	Evening classes end
-------------	---------------------

### May

1 Friday	Day classes end
2 Saturday	Saturday classes end
2-3 Saturday-Sunday	Reading Days
4-5 Monday-Tuesday	Final exams
4-7 Monday-Thursday	Evening final exams
6 Wednesday	Reading Day
7-8 Thursday-Friday	Final exams
9-10 Saturday-Sunday	Reading Days
11-12 Monday-Tuesday	Final exams
15 Friday	Commencement

### June

1 Monday	Summer 2020 degree applications due
12 Friday	Deadline for makeup of spring semester incomplete grades

## Spring 2020 Withdrawal Dates <sup>1</sup>

Feb. 10-March 13 Monday-Friday	Withdrawal, student discretion
March 16-April 17 Monday-Friday	Withdrawal, consent of instructor
April 20-May 1 Monday-Friday	Withdrawal, psychological or physiological incapacity

<sup>1</sup> Please refer to [www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds](http://www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds) (<http://www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds>) for information regarding course withdrawals and refunds.

For additional information and updates, go to [www.rider.edu](http://www.rider.edu) (<http://www.rider.edu>)

## Summer Session 2020

Students interested in calendar and course offerings for the summer sessions should consult the summer session catalog, available from the College of Continuing Studies at 609-896-5033 or go to [www.rider.edu/summer](http://www.rider.edu/summer) (<http://www.rider.edu/summer>).

## Commencement Information

For Commencement ceremonies information, go to [www.rider.edu/commencement](http://www.rider.edu/commencement) (<http://www.rider.edu/commencement>)

## Cancellation of Classes

In most cases, Rider will remain open and fully operational during snowstorms and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, and close certain buildings or take emergency actions.

If such circumstances should arise, a notice will be sent via the Rider Alert System.

Students may sign up for Rider Alert at [www.rider.edu/rideralert](http://www.rider.edu/rideralert) (<http://www.rider.edu/rideralert>)

Cancellations will also be announced online at [www.rider.edu](http://www.rider.edu) (<http://www.rider.edu>) and on the Rider University information hotline at 609-219-2000, option 1.

## **ACADEMIC SUPPORT SERVICES**

---

Rider University offers a wide array of academic support services.

Additional information regarding each of these can be found on Rider's Web site (<http://www.rider.edu/academics/academic-support-services>).  
(<http://www.rider.edu/academics/academic-support-services>)

### **Registrar** (<http://www.rider.edu/academics/academic-support-resources/registrar>)

Responsible for academic records, registration processing, degree and attendance verification, transcripts, grade reporting, veterans services, and maintenance of the student and course information system.

### **Career Development and Success** (<http://www.rider.edu/careerservices>)

Provides resume assistance, interview preparation, job search/postings, networking, career fairs, graduate school preparation, alumni services, employer partnerships and more.

### **Student Support Services** (<http://www.rider.edu/academics/academic-support-resources/student-support-services>)

A comprehensive academic support program designed to increase performance, retention and graduation rates, primarily of first-generation college students.

### **Academic Success Center** (<http://www.rider.edu/academics/academic-support-resources/student-success-center>)

Offers free tutoring and other programs to enhance learning and development.

### **Services for Students with Disabilities** (<http://www.rider.edu/academics/academic-support-resources/services-students-disabilities>)

Ensures equal access by providing services for all students with qualifying documented disabilities.

### **Reading Courses** (<http://www.rider.edu/academics/academic-support-resources/reading-courses>)

Rider University offers an introductory course in College Reading, CRC 100.

# ADDITIONAL LEARNING OPPORTUNITIES

## Study Abroad

Rider University offers a variety of study abroad opportunities through the Center for International Education (<https://rider.studioabroad.com>). No matter which academic program they are in, students may participate in one of Rider study abroad adventures that meets their degree requirements. Students apply online for all study abroad programs using their RiderKey credentials.

Each January, Spring Break, and May, Rider offers a variety of credit bearing opportunities abroad led by Rider faculty. For a list of currently offered programs, please visit Faculty Led Programs ([https://rider.studioabroad.com/index.cfm?Program\\_Type\\_ID=1&Program\\_Name=&pt=%7F&pi=%7F&pc=%7F&pr=%7F&FuseAction=Programs.SearchResults&SimpleSearch=1](https://rider.studioabroad.com/index.cfm?Program_Type_ID=1&Program_Name=&pt=%7F&pi=%7F&pc=%7F&pr=%7F&FuseAction=Programs.SearchResults&SimpleSearch=1)). Interested students can begin their applications by clicking "Apply Now" on their selected program.

Rider offers study abroad opportunities during all academic semesters ([https://rider.studioabroad.com/index.cfm?Program\\_Type\\_ID=6&Program\\_Name=&pt=Fall%7F&pi=%7F&pc=%7F&pr=%7F&FuseAction=Programs.SearchResults&SimpleSearch=1](https://rider.studioabroad.com/index.cfm?Program_Type_ID=6&Program_Name=&pt=Fall%7F&pi=%7F&pc=%7F&pr=%7F&FuseAction=Programs.SearchResults&SimpleSearch=1)) and summer ([https://rider.studioabroad.com/index.cfm?Program\\_Type\\_ID=6&Program\\_Name=&pt=Summer%7F&pi=%7F&pc=%7F&pr=%7F&FuseAction=Programs.SearchResults&SimpleSearch=1](https://rider.studioabroad.com/index.cfm?Program_Type_ID=6&Program_Name=&pt=Summer%7F&pi=%7F&pc=%7F&pr=%7F&FuseAction=Programs.SearchResults&SimpleSearch=1)) programs. Some approved programs offer the opportunity for an internship abroad ([https://rider.studioabroad.com/index.cfm?FuseAction=Programs.SearchResults&Program\\_Name=CAPA&Program\\_Type\\_ID=6&pr=%7F&pc=%7F&pr=%7F&pt=%7F&Partner\\_ID=ANY&p\\_10000=%7F&p\\_10000\\_t=MULTI&p\\_10001=%7F&p\\_10001\\_t=MINIM&p\\_10002=%7F&p\\_10002\\_t=MULTI&p\\_10003=%7F&p\\_10003\\_t=MULTI&p\\_10004=%7F&p\\_10004\\_t=MULTI&p\\_10005=%7F&p\\_10005\\_t=MULTI&p\\_10006=&p\\_10006\\_t=YESNO&p\\_10007=&p\\_10007\\_t=YESNO&p\\_10007\\_t=YESNO&p\\_10556=%7F&p\\_10556\\_t=SELECT&p\\_10557=&p\\_10557\\_t=YESNO&p\\_10606=%7F&p\\_10606\\_t=SELECT&p\\_10607=%7F&p\\_10607\\_t=SELECT&p\\_10608=%7F&p\\_10608\\_t=SELECT&Sort=Program\\_Name&Order=asc&pp=10000%2C10001%2C10002%2C10003%2C10004%2C10005%2C10006%2C10007%2C10556%2C10606%2C10607%2C10608](https://rider.studioabroad.com/index.cfm?FuseAction=Programs.SearchResults&Program_Name=CAPA&Program_Type_ID=6&pr=%7F&pc=%7F&pr=%7F&pt=%7F&Partner_ID=ANY&p_10000=%7F&p_10000_t=MULTI&p_10001=%7F&p_10001_t=MINIM&p_10002=%7F&p_10002_t=MULTI&p_10003=%7F&p_10003_t=MULTI&p_10004=%7F&p_10004_t=MULTI&p_10005=%7F&p_10005_t=MULTI&p_10006=&p_10006_t=YESNO&p_10007=&p_10007_t=YESNO&p_10007_t=YESNO&p_10556=%7F&p_10556_t=SELECT&p_10557=&p_10557_t=YESNO&p_10606=%7F&p_10606_t=SELECT&p_10607=%7F&p_10607_t=SELECT&p_10608=%7F&p_10608_t=SELECT&Sort=Program_Name&Order=asc&pp=10000%2C10001%2C10002%2C10003%2C10004%2C10005%2C10006%2C10007%2C10556%2C10606%2C10607%2C10608))

For information about any of Rider's Study Abroad (<https://rider.studioabroad.com/index.cfm?FuseAction=Abroad.Home>) programs, visit the web site and explore the array of offerings. We are certain you will find the right study abroad opportunity so every Rider student can be a Bronc Abroad!

## Summer Sessions

The College of Continuing Studies (Bart Luedeke Center, Suite 31) administers the undergraduate summer sessions. The summer sessions include courses scheduled in a 3-week or 6-week format. Summer I begins in May following Commencement, and Summer II begins in late June or early July. Courses are offered during the day, evening, and in an online format.

Information regarding summer sessions is available at [www.rider.edu/summer](http://www.rider.edu/summer). Student registration begins in March.

## Leadership Development Program

A program of Rider's Center for the Development of Leadership Skills (CDLS), the Leadership Development Program (LDP) is a university-wide

program that is open to all majors. The guiding assumption underlying this program is that every one of us has opportunities to be a leader and a role model for someone. A person does not have to be a CEO, elected official, or designated leader to make a difference.

Leadership at Rider is defined as a process in which one individual influences others to attain goals for the common good. To lead effectively requires skill in communicating, influencing, and teamwork. These are interpersonal skills that can be learned. They have been identified by Rider University, The Wall Street Journal, and the Center for Creative Leadership as the keys to career and life success.

The Leadership Development Program also emphasizes career development. Helping our students achieve career maturity will allow them to develop satisfying and meaningful occupations through which to express their leadership aspirations.

Leadership training at Rider combines traditional classroom learning with intensive skill training and supervised leadership experience through co-curricular activities, experiential learning, fieldwork, and community service. Developmental experiences are provided throughout a student's academic career.

Rider undergraduates of all majors who are interested in advancing their leadership development are invited and encouraged to apply. While first and second year students have the greatest opportunity to complete the program requirements prior to graduation from the university, students in their third year may apply, but are encouraged to speak with the Director of the LDP to assess the likelihood of successful completion. Only applicants with a 2.5 GPA or higher will be considered (first semester Freshmen are exempt from this, as they do not yet have a GPA at Rider).

Upon successful completion of the requirements listed below, students will obtain a Leadership Certificate upon graduation from Rider.

- Foundations of Leadership course (3 credit course – must earn a B or better)
- Leadership for Change Seminars (3 values-based seminars - composed of 9 total classes)
- This or That or Both: Multicultural Studies Elective (3 credit course – B or better)
- Career Development Workshops
- LDP Program/Workshop Attendance
- Leadership Practicum (200 supervised units of actual leadership experience in clubs, organizations, internships, fieldwork, community service, etc.)
- The maintenance of at least a 2.5 cumulative grade point average (\*Applicants with a cumulative GPA of 2.5 or less will not be considered for membership into the LDP)

At graduation, students who have successfully completed the requirements listed above will receive a Certificate in Leadership. Their completion of the Leadership Development Program will also be noted on their transcripts and in the commencement program.

For more information, see Rider's website (<http://www.rider.edu/ldp>). See also Leadership Development Program (p. 333) in the Academic Catalog.

## BA, BS/MBA PROGRAM

The integrated BA, BS/MBA program is designed for students who wish to combine undergraduate study in liberal arts and sciences leading to a Bachelor of Arts or Bachelor of Science degree, with graduate study leading to the degree of Master of Business Administration. This intensive program enables highly motivated students to engage in a broadly based education for a career in business or not-for-profit organizations.

The admission process for this program carefully tracks students through the course requirements and ensures that only capable students are enrolled. Freshman students are strongly encouraged, when they start classes, to seek advice about the program from the deans' offices in business administration and liberal arts and sciences. Certain courses must be completed in the freshman and sophomore years if the student intends to complete the program within 11-12 semesters. The actual timing of completing the two degrees will be based on courses that may have been taken in summer sessions and the individual student's internships.

The admission process starts prior to the beginning of the student's junior year (defined as 54 earned credit hours) and assumes completion of the first seven required business courses. At that point, the CBA's Associate Dean for Graduate Programs meets with the student and reviews his/her progress in completing the business core. Step two of the admission process occurs in the first semester of the senior year when the student will formally apply to the MBA Program through the Graduate Admissions Office. The process involves the following:

- A completed application for admission to the MBA program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- A score on the Graduate Management Admissions Test (GMAT) or the Graduate Record Exam (GRE) that, combined with the student's GPA, work experience and co-curricular activities, shows evidence to the Graduate Admissions Committee of ability to do graduate work at the high level established for the MBA Program. Students are advised to take the GMAT or GRE exams in the summer between the junior and senior years;
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the MBA program;
- An interview with the CBA's Associate Dean for Graduate Programs; and,
- Completion of the required freshman and sophomore classes.

Students completing the BA, BS/MBA program must take at least 90 credits in liberal arts and sciences courses at the undergraduate level.

Students will be awarded the BS or BA degree when they complete the requirements for that degree in liberal arts and sciences. The MBA will be awarded upon completion of the MBA requirements.

Students in the program will complete all the courses required in the liberal arts core as well as those courses necessary to satisfy the requirements for a major in liberal arts and sciences. The following courses will be completed in the first eight semesters along with the following courses offered by business administration comprising the undergraduate business core:

Code	Title	Credits
ACC 210	Introduction to Accounting	3
ACC 220	Managerial Uses of Accounting	3
ECO 200	Principles of Macroeconomics <sup>1</sup>	3
ECO 201	Principles of Microeconomics <sup>1</sup>	3
FIN 220	Introduction to Finance	3
MGT 201	Fund Management & Org Behavior	3
MKT 200	Marketing Principles	3
MSD 105	Quantitative Methods for Business	3
MSD 200 & MSD 201	Statistical Methods I and Statistical Methods II <sup>1</sup>	6
CIS 185	Information Systems Essentials	3
CIS 385	Management Information Systems	3
Total Credits		36

<sup>1</sup> May be considered either business or liberal arts course.

In the last semester of the senior year, students will take the following course if they have all of the prerequisites met:

Code	Title	Credits
MSD 340	Production and Operations	3

In all of the above courses, students must achieve a "B" or better in order for them to waive the equivalent "pre-program requirements" for their MBA Degree. If they do not, the student will be required to take the corresponding course at the graduate level.

In the three (3) or four (4) graduate semesters, the following graduate courses must be completed:

Code	Title	Credits
PMBA 8000	Executive Communications	3
PMBA 8210	Information Technology Management	3
PMBA 8220	Strategic Accounting for Manager	3
PMBA 8230	Managerial Economics <sup>1</sup>	3
PMBA 8240	Applied Corporate Finance	3
PMBA 8250	Operations & Supply Chain Management	3
PMBA 8260	Mkt Analysis & Decision Making	3
PMBA 8270	Adv. Organizational Behavior	3
PMBA 8290	Legal and Ethical Aspects of Management	3
PMBA 8880	Strategic Management	3
Electives		6
Total Credits		36

<sup>1</sup> PMBA 8050 Introduction to Calculus or an equivalent calculus course must be completed before the student may take PMBA 8230.

**Note:** There is not a specific combination BS, BA/MBA program for business majors. All business majors may apply directly to the MBA program. If accepted, the student may be able to complete the MBA within twelve months after undergraduate graduation.

Further information concerning the MBA program is available from the Graduate Business Academic Coordinator, Mrs. Jean Cherney, at (609) 895-5557 or [jcherney@rider.edu](mailto:jcherney@rider.edu).

## COLLEGES AND SCHOOLS

Originally founded in 1865 as a business college to prepare professionals for the booming post-Civil War economy, in 1959 Rider moved from Trenton to its current 280-acre campus in Lawrenceville, New Jersey. Thirty-three years later, a merger took place between Rider and Westminster Choir College in Princeton, NJ. Considered one of the leading schools of music of its kind in the world, the merger also led to the successful integration of the theatre and dance programs at Rider University and the college, in its entirety, became the Westminster College of the Arts in 2007. Housing both the School of the Fine and Performing Arts and Westminster Choir College, WCA was formed to offer select music and theatre programs on both the Princeton and Lawrenceville campuses, providing a complement to the liberal arts, sciences, education and business programs.

The colleges and schools within Rider University include:

- College of Business Administration (p. 273)
- College of Continuing Studies (p. 369)
- College of Education and Human Services (p. 464)
- College of Liberal Arts and Sciences (p. 543)
- Westminster College of the Arts (p. 846)

### College of Business Administration

Business administration is for anyone who wants to develop the skills needed to turn ideas and dreams into reality. Whether it's creating a own company or rising to the top of a major corporation, the key is having the skills to make it happen.

In each of its majors, the College of Business Administration (CBA) seeks to develop in students the skills needed to perform effectively in a variety of organizational settings—small business, multinational corporation, service industry, not-for-profit, family company, Wall Street—depending upon the student's interests and goals. Each program is designed to provide an educational experience for the whole person by combining theory and practice. Business students participate in a learning environment that offers both the practical skills needed to launch a career and the learning skills needed for continued growth.

### Mission Statement

The mission of Rider University's College of Business Administration is to provide a dynamic and innovative business education that builds functional expertise as well as professional competencies that enable our students to be productive, ethical, and socially responsible participants in the rapidly changing global marketplace.

The college fosters a supportive and personalized environment in which students develop communication, interpersonal, teamwork, leadership, and critical thinking skills for integrated problem solving.

The CBA infuses current theory and practice into the curricula through professional activity, business partnering, and experiential learning as well as through a combination of discipline-based, pedagogical, and applied scholarly research efforts.

### Key Objectives

To support students in preparing to perform effectively in the workplace and to continue to grow as individuals, the CBA seeks to realize the following key objectives for its undergraduate programs:

- To provide an outstanding faculty of teacher/scholars in the business fields who bring to the classroom a wide range of diverse expertise and who emphasize teaching excellence as well as research and scholarship;
- To develop an understanding of the functions of business, an ability to apply the tools and skills that will solve business and organizational problems, and an appreciation for the global environment of organizations in society;
- To offer sufficient breadth and depth in the curriculum to enable the student to achieve a level of competence in a major, while also providing opportunities for independent study, skill-building, and learning through experience;
- To ensure a useful balance between professional course work in the functional areas of business administration and study in the liberal arts and sciences; and
- To foster the development of leadership qualities and to encourage an attitude that values continuing education.

To remain strongly competitive, the CBA maintains high visibility and involvement in the corporate community outside of Rider. It seeks to be regarded by that community as a useful and valuable resource of educational knowledge, business and management talent, economic expertise and applied research, as well as an excellent source of college graduates in business. Students and faculty are involved regularly in real business situations through internships, meetings, and programs of the Executive Advisory Council, the CBA Accounting Advisory Council, the CBA Global Supply Chain Management Advisory Board, the CBA Human Resource Management Board, the CBA Entrepreneurship Board, the CBA Business Analytics Advisory Board, and the CBA Marketing and Advertising Board. Students benefit from special programs for the community such as the Volunteer Income Tax Assistance (VITA) program coordinated by the Department of Accounting, Minding Our Business (a mentoring program of entrepreneurship for inner city students), and many student clubs and organizations.

Regardless of the functional area of business that students select for their careers, they will be impacted by what occurs in the world of technology-enhanced business practices. Rider's courses will continue to adapt and change as this fast-paced environment continually reinvents itself.

### Professional Accreditation

Rider University's College of Business Administration programs were accredited by AACSB International—The Association to Advance Collegiate Schools of Business—in 1993 and most recently reaffirmed in 2017. In addition, the accounting program was further recognized for excellence with accreditation in accounting by AACSB International in 2000 and recently reaffirmed in 2017.

### BSBA/MBA Option

It is possible to apply to the graduate business program after completing 90 credits in a Rider undergraduate business degree program. Those students admitted may enter the program upon the completion of the BSBA degree. Courses waived should permit them to graduate with an advanced degree in one year by taking the required graduate course work.

See the Graduate Academic Catalog (p. 19) for requirements for the MBA program and the Master of Accountancy degree.

Students are eligible to take graduate business courses in the spring of their senior year if they are senior business majors with a minimum cumulative GPA's of 3.5 for MBA courses and 3.3 for MAcc courses. In order to take a MAcc course, a student must be an accounting major. Graduate business courses do not count toward both the undergraduate and graduate program requirements. Up to six credits of graduate level courses may be taken, and would be included in the regular full-time tuition fee.

## Degrees

The CBA offers curricula at the undergraduate level leading to the degree of Bachelor of Science in Business Administration (BSBA).

(For master's level work, see the Graduate Academic Catalog (p. 15).)

## Fields of Study: Majors, Minors, Concentrations and Certificates

To see the variety of programs of study that the CBA has to offer, please visit the list of Majors, Minors and Certificates (p. 274) available.

## Selection of a Major

Students who are undecided regarding an area of business specialization are enrolled as business administration majors.

A student may elect to double major, but there is no guarantee that the student will be able to complete the second major within the 120 credit hours required for graduation.

## Independent Study and Research

Students are offered opportunities for independent study in business-related areas for which formal courses are not available. Each program in the CBA provides these opportunities during the regular semester via offerings labeled 490, Independent Research and Study. Projects may be taken by an individual or a group of students working together. Each person must submit an independent study proposal including definitive statements on the following: an elaborate, clear statement of the study's significance; the study's design and objective; the utilization and expectation of on- and off-campus resources related to the study; and method to be used to demonstrate the results of the study.

Independent study proposal requests can be obtained and approved by the appropriate chairperson and the CBA Dean's Office. Such proposals must be submitted prior to the semester of the independent study and must include a timeline for completion.

## Accounting

### Program Overview

Rider's accounting programs are designed to build professionals. The BSBA in accounting provides students with the skills and knowledge needed for careers with corporations, public accounting firms and governmental organizations.

Accounting majors learn in the classroom, during co-op and internship positions and through ongoing networking opportunities with accounting executives.

### Program Objectives:

The Accounting major will prepare students with:

- the ability to apply knowledge of fundamental U.S. accounting techniques and standards to accounting problems and knowledge of emerging IFRS as they become applicable;
- skills in oral and written communication;
- skills in application of information technology skills appropriate for professional tasks;
- skills for problem solving and critical thinking;
- an ability to research accounting and tax issues;
- an understanding of the importance of ethics in the accounting profession and the ability to apply ethical reasoning to accounting decision making.

## Curriculum Overview

The BSBA accounting curriculum prepares students for a variety of career paths in the dynamic field of accounting. The curriculum emphasizes technical knowledge, professional development, written and oral communication, information technology, ethics and global perspectives.

The BSBA program has an active co-op and internship program in which students work in paid positions during the semester or summer and earn academic credit for the program. Both the co-op and internship can be completed within the four year program and often lead to full-time employment. The BSBA also offers a business forensic concentration.

Students who want to pursue **CPA certification** can meet the 150 hour requirement for CPA licensure by double majoring in the BSBA program or by continuing in the **4+1 Master of Accountancy (MAcc) program**.

Undergraduate accounting majors are encouraged to work closely with their advisor to select courses which will best address their career and certification plans. Students should consult the specific certification requirements of the state jurisdiction in which they plan to become certified and plan accordingly. To learn more about individual state requirements for CPA licensure see [www.nasba.org](http://www.nasba.org). (<https://nasba.org/exams/cpaexam>)

## Master of Accountancy (4 + 1 MAcc Program)

The 4+1 MAcc program is the fastest growing program in the College of Business Administration. The MAcc prepares students for CPA licensure and allows for an area of specialization. Students may enter the program directly from the BSBA program, and for students with overall and accounting GPA of 3.0, the GMAT requirement for admission is waived. The MAcc can be completed on either a full-time or part-time basis.

## Accreditation Information

The accounting program is one of less than 3% of accounting programs worldwide to hold the prestigious AACSB business and accounting accreditation. The accounting faculty are committed to continuous improvement in curriculum, faculty and student preparation.

## Degrees Offered

- B.S.B.A. in Accounting
- Master of Accountancy (fifth year program, 4+1)

## Major Requirements

(120 credits)

Code	Title	Credits
<b>Business Core</b>		
See Business Core Requirements (p. 362)		
<b>Major Requirements</b>		
ACC 302	Cost Management	3
ACC 310 & ACC 311	Acct Theory & Concepts I and Acct Theory & Concepts II	6
ACC 320	Accounting Info Systems	3
ACC 400	Principles of Auditing	3
ACC 405	Acct Problems & Practice	3
ACC 410	Fund of Federal Taxation	3
BUS 210	Intro to Law: Contracts	3
FIN 308	International Finance	3
Total Credits		27

Students who plan to take the CPA exam may, with the Department Chair's permission, take MAcc 658 Governmental and Not-for-Profit Accounting during their senior year. These credits may be used to fulfill the 120 undergraduate credit requirement.

Students desiring to become certified public accountants (CPAs) will be required to have 120 credit hours of education to take the CPA exam and have completed 150 credit hours of education for licensure. Rider accounting majors may graduate after four years (120 credit hours) or seek to achieve the additional credit hours directly through admission to the Master of Accountancy (MAcc) program at the University. It is possible to apply to the MAcc program at Rider after completion of 90 credit hours. (Please consult the Rider University Graduate Academic Catalog for details on the MAcc program.) Undergraduate accounting majors are encouraged to work closely with their advisor to select courses that will best address their career and certification plans. Students should consult the specific certification requirements of the state jurisdiction in which they plan to become certified and plan accordingly.

Students majoring in accounting must receive a grade of at least "C-" in a prerequisite course for any advanced course in accounting, and must have a cumulative average of at least 2.0 in the major.

## 4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different

plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Course	Title	Credits
<b>Year 1</b>		
<b>Fall Semester</b>		
ACC 210	Introduction to Accounting	3
CIS 185	Information Systems Essentials	3
CMP 120	Expository Writing	3
MSD 105	Quantitative Methods for Business	3
Natural Science Elective		3
Semester Credit Hours		15
<b>Spring Semester</b>

- Transfer students may be required to take CBA 336 Career Planning (formerly MGT 336 Career Management) as a substitute.
- Choose from LDP 398 The Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service Learning Through Minding Our Bus, MGT 355 Team Management, or MGT 363 Management Skills. Students taking ACC 399 The Co-Operative Experience are required to take LDP 398 The Co-op Experience Seminar during the co-op semester.

**NOTES**

- Business Fraud and Forensic Concentration:** Students should take ACC 325 Fraud Examination and Business Forensics in the spring of sophomore year, ACC 321 Internal Auditing in the fall of junior year, and ACC 450 Business Forensic Application in the spring of senior year.
- CPA Licensure Requirements for Students Not Entering the MAcc** Students should also work with their academic advisor to plan the additional 30 credits.
- Students are required to take BUS 210 Intro to Law: Contracts as a free elective, and FIN 308 International Finance as one of the two required international business electives.
- Global/Cultural Liberal Arts Elective can be satisfied by courses that are designed as global/cultural, including language courses at the 101 level or above.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., Internship, Co-op, Study Tour, study abroad, ENT 448 Seminar in Small Business Consulting, ECO 450 Seminar in Economic Research).
- Students working co-op positions in the spring of their third year will substitute ACC 399 (6 credits of free electives) for CIS 385 and MSD 340. CIS 385 and MSD 340 must be taken in another semester.

**3 Year Academic Plan of Study**

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

<sup>1</sup> Students who wish to complete the Concentration in Fraud and Business Forensics (p. 309) must take ACC 325 Fraud Examination and Business Forensics, ACC 321 Internal Auditing, and ACC 450 Business Forensic Application.

#### NOTES

1. Assumes no AP or other credits transferred into Rider University.
2. Students are required to take 6 credits of International Business Electives. One of the courses must be FIN 308 International Finance.
3. Business Honors students will have a different sequence.
4. Global/Cultural Liberal Arts electives can be satisfied by courses that are designated as global/cultural, including language courses at the 101-level or above.
5. For the Leadership Elective, choose from LDP 200 Foundations of Leadership, LDP 220 Service Learning Through Minding Our Bus, LDP 398 The Co-op Experience Seminar, MGT 355 Team Management, or MGT 363 Management Skills.
6. It is strongly suggested that students complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448 Small Business Consulting Sem, ECO 450 Seminar in Economic Research).
7. Students are required to take BUS 210 Intro to Law: Contracts as a free elective and FIN 308 International Finance as one of the required International Business Electives.

## Courses and Descriptions

### ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

**ACC 220 Managerial Uses of Accounting 3 Credits**

This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.

**Prerequisite(s):** ACC 210.

**ACC 302 Cost Management 3 Credits**

This course focuses on firm strategy and the role managerial accounting information plays in the decision making process. Topics include the balanced scorecard, the value chain, product life cycles, target costing, theory of constraints, strategic pricing, management and control of quality cost systems, traditional and activity-based costing, cost control, standard costs and variances, and capital budgeting.

**Prerequisite(s):** ACC 220 and CIS 185.

**ACC 302P Cost Management 3 Credits**

This course focuses on firm strategy and the role managerial accounting information plays in the decision making process. Topics include the balanced scorecard, the value chain, product life cycles, target costing, theory of constraints, strategic pricing, management and control of quality cost systems, traditional and activity-based costing, cost control, standard costs and variances, and capital budgeting.

**Prerequisite(s):** ACC 220 and CIS 185. This course is restricted to students in the MAcc program.

**ACC 310 Acct Theory & Concepts I 3 Credits**

This is the first upper-level course in a sequence in financial accounting courses. Topics include the conceptual framework, and standard setting process followed by application and evaluation of generally accepted accounting principles including content, and structure of financial statements, present value concepts, current assets, current liabilities, property, plant, and equipment, intangible assets and non-current liabilities are studied. An overview of comparable international financial reporting standards (IFRS) is also included.

**Prerequisite(s):** ACC 210 and ACC 220.

**ACC 310P Acct Theory & Concepts I 3 Credits**

This is the first upper-level course in a sequence in financial accounting courses. Topics include the conceptual framework, and standard setting process followed by application and evaluation of generally accepted accounting principles including content, and structure of financial statements, present value concepts, current assets, current liabilities, property, plant, and equipment, intangible assets and non-current liabilities are studied. An overview of comparable international financial reporting standards (IFRS) is also included. **Prerequisite(s):** ACC 210 and ACC 220. This course is restricted to students in the MAcc program.

**ACC 311 Acct Theory & Concepts II 3 Credits**

This course is a continuation of ACC 310. Topics include long-term investments, stockholders' equity, earnings per share, interperiod income tax allocation, accounting changes, revenue recognition, pensions, leases and cash flow analysis. An overview of comparable international financial reporting standards (IFRS) is also included.

**Prerequisite(s):** ACC 310.

**ACC 311P Acct Theory & Concepts II 3 Credits**

This course is a continuation of ACC 310. Topics include long-term investments, stockholders' equity, earnings per share, interperiod income tax allocation, accounting changes, revenue recognition, pensions, leases and cash flow analysis. An overview of comparable international financial reporting standards (IFRS) is also included. Restricted to students in the MAcc program.

**ACC 320 Accounting Info Systems 3 Credits**

This course provides an introduction to accounting information systems and enterprise-wide, process-focused information systems. Topics include quality of data for decision usefulness, internal control concepts and documentation tools, and database theory and applications.

**Prerequisite(s):** ACC 310.

**ACC 321 Internal Auditing 3 Credits**

This course provides an introduction to the internal audit profession, including understanding the nature and activities associated with the internal audit process. Topics include: international auditing standards, risk assessment including internal control system evaluation, business processes, and the relationship of management and employee fraud to the internal audit process.

**Prerequisite(s):** ACC 220.

**ACC 325 Fraud Examination and Business Forensics 3 Credits**

This course provides an introduction to the prevalence of fraud in all forms of business, including the many methods used by employees and managers to perpetrate fraud. Topics include: the motivation of individuals to commit fraud, various types of fraud schemes perpetrated in the workplace, as well as the various tools and techniques that are used to investigate, detect and prevent fraud.

**Prerequisite(s):** ACC 210.

**ACC 335 Small Business Taxation 3 Credits**

This course provides an understanding of the key tax issues faced by small businesses and their business implications. It also familiarizes prospective business owners with various tax filing requirements so that they can use the expertise of tax professionals more effectively.

**Prerequisite(s):** ACC 210.

**ACC 399 The Co-Operative Experience 6 Credits**

This course provides the student with a semester long supervised employment with participating companies. Students are evaluated periodically by senior staff members of the participating firms and required to complete a work journal, self-assessment and reflection paper. Eligible students include junior and senior accounting majors with a minimum GPA of 3.0 in accounting coursework. Co-op credits can be applied toward business or free elective requirements. Grading is on a pass/fail basis.

**Prerequisite(s):** ACC 210, ACC 220, and ACC 310 and permission of department chairperson.

**ACC 400 Principles of Auditing 3 Credits**

This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.

**Prerequisite(s):** ACC 302 and ACC 311.

**ACC 400P Principles of Auditing 3 Credits**

This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.

**Prerequisite(s):** ACC 302 and ACC 311. Restricted to students in the MAcc.

**ACC 405 Acct Problems & Practice 3 Credits**

This course provides additional coverage of financial reporting issues and procedures. Topics include business combinations, consolidated financial statements, foreign currency translation, the effects of diversity across countries, disclosure and SEC reporting issues. Governmental and not-for-profit accounting standards are also covered.

**Prerequisite(s):** ACC 302 and ACC 311.

**ACC 405P Acct Problems & Practice 3 Credits**

This course provides additional coverage of financial reporting issues and procedures. Topics include business combinations, consolidated financial statements, foreign currency translation, the effects of diversity across countries, disclosure and SEC reporting issues. Governmental and not-for-profit accounting standards are also covered.

**Prerequisite(s):** ACC 302 and ACC 311. Restricted to students in the MAcc program.

**ACC 406 Integrative Professional Capstone 3 Credits**

This course provides an integrative experience that applies financial statement and data analysis tools to a variety of accounting settings. Topics include issues of ethics and professionalism and linkages between accounting methods and company policy, equity valuation, bond ratings and other decision areas.

**Prerequisite(s):** ACC 405 or permission of department chairperson.

**ACC 410 Fund of Federal Taxation 3 Credits**

This course provides fundamental federal tax concepts applicable to individuals, partnerships, corporations, estates, and gifts. Topics are considered from a tax compliance and planning perspective. Preparation of individual and corporate tax returns is also included.

**Prerequisite(s):** ACC 311.

**ACC 410P Fund of Federal Taxation 3 Credits**

This course provides fundamental federal tax concepts applicable to individuals, partnerships, corporations, estates, and gifts. Topics are considered from a tax compliance and planning perspective. Preparation of individual and corporate tax returns is also included.

**Prerequisite(s):** ACC 311. Restricted to students in the MAcc program.

**ACC 450 Business Forensic Application 3 Credits**

This course provides an opportunity to perform complex investigative cases and analyses, thus demonstrating mastery of the knowledge and skills required to be effective forensic professionals. The course covers how to manage and present digital and technical evidence gathered for forensic litigation cases, including the ability to be an expert witness in court.

**Prerequisite(s):** ACC 325 and ACC 321.

**ACC 490 Independent Research and Study 3-4 Credits**

Topic to be approved by professor and department chairperson. Available to juniors and seniors.

**ACC 491 Accounting Internship 3 Credits**

This course provides the student with approximately two months of supervised employment with participating companies. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a term paper. Eligible students include junior and senior accounting majors with a minimum GPA of 3.0 in accounting coursework. Upon completion of course, a letter grade will be awarded.

**Prerequisite(s):** Permission of department chairperson.

## Actuarial Science

### Program Overview

In a world of uncertainty, actuaries use mathematics, statistics and computer software to assess and manage financial risk. Considered the backbone of the insurance and financial security industries, actuarial science is a highly regarded field that businesses and government rely on to improve forecasting and decision-making.

Actuarial Science graduates can pursue rewarding careers as actuaries, analysts, consultants, underwriters, brokers, and senior executives with national and regional industry leaders in consulting, health care, insurance, and finance.

### Program Learning Outcomes

Students graduating from the Actuarial Science program will be able to

- Be prepared to take the Society of Actuaries (SOA) exams required for employment in the actuarial science profession.
- Demonstrate the proficiency in all three Validation by Educational Experience (VEE) requirements by SOA.
- Write technical reports and make technical presentations containing statistical and actuarial results.
- Apply statistical methods using relevant software to solve real world problems.
- Gain the foundation in finance, mathematics, statistics, and other related fields to continue their study for and take additional SOA exams to advance their career.

### Curriculum Overview

The BSBA actuarial science curriculum provides students with a strong foundation in mathematics, statistics, finance, and other key business principles to prepare students for multiple actuarial exams and other requirements to achieve professional certification through the Casualty Actuarial Society (CAS) (<http://www.casact.org>) or the Society of Actuaries (SOA). (<https://www.soa.org/Member>)

Besides specialized knowledge, the skills developed and honed through the curricular and co-curricular activities include keen analytical and problem solving skills, solid oral and written communication skills, and strong computer skills.

In addition, students will develop business acumen and leadership qualities through the business core and leadership requirements.

### Degree Offered

Semester Credit Hours		15
Total Credit Hours for Graduation		120

This plan assumes the student will receive AP or transfer credits for MTH 210 Calculus I prior to starting at Rider.

Business Honors students may have a different course sequence.

### Courses and Descriptions

#### ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

#### ECO 200 Principles of Macroeconomics 3 Credits

A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.

**Prerequisite(s):** Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

**ECO 201 Principles of Microeconomics 3 Credits**

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re-evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

**Prerequisite(s):** Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

**FIN 220 Introduction to Finance 3 Credits**

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

**Prerequisite(s):** ACC 210 and ECO 201.

**FIN 307 Financial Markets & Institutions 3 Credits**

This course provides an introduction to the organization and behavior of financial markets and institutions in the economy. The factors determining security prices and interest rates in the money and capital markets are analyzed. An overview of all major financial institutions is presented. In addition, market returns, the regulatory environment, and monetary policy are examined.

**Prerequisite(s):** FIN 220 or concurrent with FIN 220.

**FIN 308 International Finance 3 Credits**

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

**Prerequisite(s):** FIN 220.

**FIN 309 Intermediate Corporate Finance 3 Credits**

This course builds on and extends the concepts of financial management learned in FIN 220. The course examines long-term corporate financing and investment decisions and how those decisions interface with each other. Topics covered include: cost of capital, financial planning and analysis, capital budgeting, capital structure and dividend policy.

**Prerequisite(s):** FIN 220.

**FIN 312 Investments 3 Credits**

The fundamentals of investing in stocks, bonds, and other negotiable instruments are covered. Major topics include trading on securities markets, mutual funds, international investing, margin accounts, short sales, determinants of securities prices, and investment risks. Stock options, financial futures, convertible securities, and implications of taxes on investment decisions are also discussed.

**Prerequisite(s):** FIN 220.

**FIN 340 Risk Management 3 Credits**

This course examines the risk management process as applied to the firm as a whole. It integrates the management of all risks facing the firm: strategic, financial, hazard, and operational. Techniques for identifying risk, measuring and analyzing it, and selecting an appropriate treatment will be explored.

**Prerequisite(s):** FIN 220.

**FIN 360 Fixed Income and Derivatives 3 Credits**

This course centers on the quantitative portion of the Chartered Financial Analyst (CFA) level 1 curriculum, which includes materials on fixed-income risk and return, fundamentals of risk analysis, derivative instruments and risk management applications of option strategies. The goal is to help students prepare for the exam, as well as introduce them to a variety of topics in finance.

**Prerequisite(s):** FIN 312.

**HTH 336 Economics of Health Care System 3 Credits**

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

**MSD 320 Statistics for Risk Modeling I 3 Credits**

This is the first course in a two course sequence to prepare actuarial science students for the Society of Actuaries' (SOA) new exam "Statistics for Risk Modeling." This course (SRM I), together with the second course of the sequence SRM II, cover all the topics in the SOA's proposed syllabus for the exam. The course covers two major topics: (i) Generalized Linear Models, and (ii) Regression-based time series models and forecasting.

**Prerequisite(s):** MSD 201 or MTH 341.

**MSD 325 Statistics for Risk Modeling II 3 Credits**

This course examines the use of applied linear statistical models to adequately describe practical relationships in business and economics. The implementation of a popular statistical computing package to analyze realistic data sets is an important component of the course. Topics include simple and multiple linear regression, model diagnostics and remedial measures, and the analysis of variance.

**Prerequisite(s):** MSD 201 or MTH 341.

**MSD 350 Financial Mathematics 3 Credits**

A thorough treatment of the theory and applications of compound interest. Topics include the measurement of interest, elementary and general annuities, amortization schedules and sinking funds, and bonds and other securities.

**Prerequisite:** MSD 201 or equivalent.

**MTH 210 Calculus I 4 Credits**

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

**Prerequisite(s):** Math SAT 650 or higher or Math ACT score of 28 or higher or successful completion of MTH 105.

**MTH 211 Calculus II 4 Credits**

The definite integral, differentiation of transcendental functions, methods of integration and approximate integration, determination of area, volume, and surface area.

**Prerequisite(s):** MTH 210.

**MTH 212 Calculus III 4 Credits**

Infinite series; functions of two and three variables, vectors and tangent planes, partial derivatives, multiple integrals, determination of volume and density.

**Prerequisite(s):** MTH 211.

**MTH 240 Linear Algebra 3 Credits**

Systems of linear equations; vector spaces; linear independence; determinants; orthogonality; linear maps; eigenvectors.

**Prerequisite(s):** MTH 210 or as corequisite; sophomore standing; or permission of instructor.

**MTH 340 Probability & Statistical Analysis I 3 Credits**

Theory of sets and probability; discrete and continuous random variables and probability distributions. Emphasizes foundations and utilizes the techniques of the calculus.

**Prerequisite(s):** MTH 212 or MSD 111.

**MTH 341 Probability & Statistical Analysis II 3 Credits**

Continuation of MTH 340. Foundations of mathematical statistics: normal distributions, estimation, confidence intervals and hypothesis testing; topics chosen from student's t- test, chi-square tests, analysis of variance and regression analysis. Emphasizes foundations and utilizes the techniques of the calculus.

**Prerequisite:** MTH 340. Spring.

## Business Administration B.S.B.A.

### Program Overview

Rider's business administration major provides students with a general business focus, and is ideal for students who do not want to concentrate in a particular functional area, but instead intend to pursue one of the following goals:

- attend graduate school, such as law school or a MBA or Ph.D. program;
- enter a management training or marketing program with a future employer;
- enter a family business or start a new one.

### Curriculum Overview

The Business Administration major requires completion of 18 credit hours of upper-level business courses across a variety of disciplines, including: economics, finance, management, and marketing. For graduation students must achieve an overall GPA of 2.0 in the major. Business Administration majors may not count more than six credit hours toward a second major, with the exception of International Business. Students majoring in Business Administration can count up to nine credit hours toward the International Business major.

### Degree Offered

- B.S.B.A. in Business Administration

### Contact

**Dr. Ira Bruce Sprotzer**

## Business Administration Major Requirements

(18 credits)

Code	Title	Credits
<b>Business Core</b> <sup>1</sup>		
See Business Core Requirements (p. 362)		
<b>Courses are to be selected as specified below:</b>		12
One upper-level economics (ECO) elective		
One upper-level finance (FIN) elective		
One upper-level management (MGT) or human resources (HRM) elective		
One upper-level marketing (MKT) elective		
<b>Two upper level business courses which may include:</b>		6
BUS 490	Independent Research and Study	
BUS 491	Business Admin Internship	
<b>Total Credits</b>		<b>18</b>

<sup>1</sup> Courses listed as core requirements may not be used for filling the requirements of the business administration major.

## Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

<sup>1</sup> CIS 185 can be taken in the Fall or Spring of Year 1.

<sup>2</sup> Students may be required to take CMP 115 Intro to Expository Writing based on placement. CMP 115 counts as a 3-credit Free Elective.

<sup>3</sup> Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

<sup>4</sup> Transfer students can take CBA 336 Career Planning (formerly MGT 336 Career Management) (3 credits) as a substitute for the Career Planning sequence.

<sup>5</sup> Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses or as free electives.

<sup>6</sup> Business Administration majors are required to take an upper level ECO Elective, an upper level FIN Elective, an upper level HRM/MGT Elective, an ADV/MKT Elective, and 6 credits of additional upper level business electives for a total of 18 credits.

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

<sup>1</sup> Global/Cultural Liberal Arts Elective can be satisfied by courses that are designated as Global/Cultural, including language courses at the 101-level or above.

<sup>2</sup> For the Leadership Elective, choose from LDP 200, LDP 220, LDP 398, MGT 355, or MGT 363.

#### Notes:

- The Plan assumes no AP or other credits were transferred into Rider University.
- Students are required to take 6 credits of International Business Electives which can be fulfilled as major courses or as free elective courses.

- Business Honors students will have a different sequence.
- It is strongly suggested that students complete a credit-bearing experiential course (e.g., Internship, Co-op, Study Tour, Study Abroad, ENT 448, or ECO 450.)

## Courses and Descriptions

### ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

### ACC 220 Managerial Uses of Accounting 3 Credits

This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.

**Prerequisite(s):** ACC 210.

### BUS 300 The Legal and Ethical Environment of Business 3 Credits

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

**Prerequisite(s):** 54 credits.

### CBA 102 Career Plan & Perspective I 1 Credits

In this course students will explore their own history, goals and values as input to their definition of success. The course will set the stage for the remainder of students' college career, and will encourage them to draw connections among their career goals, educational performance, extra-curricular experiences, and available resources.

### CBA 202 Career Plan & Perspect II 1 Credits

In this course, students will build on their CBA 102 self assessments to identify specific occupations that match who they are and where they want to go. The course will provide students with the understanding of the changed nature of the current work and career environment they will be entering when they graduate from Rider. They will acquire career management skills and apply these skills to develop short and long term career goals and plans for achieving them while at Rider. The course will also touch on the intersection of work and family roles.

**Prerequisite(s):** CBA 102.

### CBA 302 Career Plan & Perspect III 1 Credits

This one credit course will be targeted to second semester sophomores and juniors. In this course, students will build on their CBA 102 and 202 self assessments to develop strategies for a successful job search. The course will provide students with an understanding of the changed nature of the current work and career environment they will be entering when they graduate from Rider. They will acquire career management and job search skills and apply these skills to developing, networks, identify job search resources and enhance resume and interview skills. Students will understand how to research potential employers and translate their experiences into a successful job search strategy.

**Prerequisite(s):** CBA 102 and CBA 202.

**CIS 185 Information Systems Essentials 3 Credits**

This course will enable students to use Microsoft Excel and Access to design and create complex applications to support effective decision making. Students will use Excel to design and create spreadsheets to support business analytics. Access will be used to understand, design, create, and utilize relational databases.

**CIS 385 Management Information Systems 3 Credits**

The course focuses on the management and use of information systems and technology for the strategic and operational advantage of the firm. Students explore the business value of information resources including current communication, database, as well as hardware and software technologies. GSC 385 can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

**Prerequisite(s):** CIS 185 and junior or senior standing.

**CMP 120 Expository Writing 3 Credits**

Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. The second of the department's three-course composition sequence, This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

**Prerequisite(s):** SAT EBRW score greater than or equal to 550 and SAT or CMP 115 with a minimum grade of D.

**CMP 125 Research Writing 3 Credits**

Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

**Prerequisite(s):** CMP 120 or BHP 100.

**COM 290 Professional/Strategic Speech 3 Credits**

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

**ECO 200 Principles of Macroeconomics 3 Credits**

A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.

**Prerequisite(s):** Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

**ECO 201 Principles of Microeconomics 3 Credits**

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

**Prerequisite(s):** Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

**FIN 220 Introduction to Finance 3 Credits**

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

**Prerequisite(s):** ACC 210 and ECO 201.

**MKT 200 Marketing Principles 3 Credits**

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

**MSD 105 Quantitative Methods for Business 3 Credits**

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

**Prerequisite(s):** MSD 104 or a passing grade on the Math Placement Exam.

**MSD 340 Production and Operations 3 Credits**

This course introduces the concepts and techniques of designing and managing manufacturing and service systems and their operations effectively and efficiently. Major topics include product and process design, facility location, forecasting, aggregate planning, inventory management, supply chain management, project management, just-in-time systems, quality assurance, linear programming, and the transportation problem. Current issues such as productivity, global competitiveness, and quality are also discussed.

**Prerequisite(s):** MSD 105 or MSD 110, MSD 200 or MTH 340, MSD 201 or MTH 341.

## Business Analytics

### Program Overview

Due to technological advancements and exponential growth in data, businesses are increasingly relying on the use of analytics to create new opportunities, address business challenges and outperform their peers. Companies such as Google, Facebook, Amazon, and LinkedIn rise above their competition through continual innovations driven by actionable business insights uncovered from analyzing their data. With the increasing demand for professionals who are capable of sifting

through zettabytes of data to uncover insights and find business value, there is a shortage of talent in the analytics space.

## Curriculum Overview

The structure of the program consists of six required courses and two elective courses. The six required courses provide core data analytics skills that are ubiquitously applicable for all analytics professionals.

The two electives provide various track options that allow students to customize their program of study based on their choice of career path and interest in a specific industry or a business functional area.

Another key feature of the program is its emphasis on experiential learning through course projects embedded in multiple required courses and a practicum/capstone course that gives students the opportunity to apply their analytical skills to solve a real business problem and to communicate their findings to real-world clients.

## Degree Offered

- B.S.B.A. in Business Analytics
- Minor in Business Analytics

## Business Analytics Major Requirements

(24 credits)

Code	Title	Credits
BDA 205	Introduction to Business Data Analytics	3
BDA 360	Optimization and Stimulation	3
BDA 398	Business Data Analytics Practicum	3
CIS 330	Database Management	3
CIS 350	Practical Business Analytics with Excel	3
CIS 360	Data Mining	3

**Select two courses from one of the following tracks:** 6

### Marketing Track

MKT 366	Marketing Research
MKT 367	Marketing Web Analytics

### Finance Track

FIN 312	Investments
FIN 315	Financial Modeling
FIN 360	Derivatives

### Programming Track

CIS 300	Object-Oriented Programming
CSC 110	Computer Science I

### Applied Statistics Track

MSD 320	Quantitative Meth Bus Forecast
MSD 325	Regression/Analysis Variance

### Global Supply Chain Management Track

GSC 115	Introduction to Global Supply Chain Mgt.
GSC 235	Supply Chain External Focus: Customer and Supplier Logistics

GSC 355	Supply Chain Internal Focus: Firm Operations
<b>Health Care Management Track</b>	
ECO 450	Seminar in Economic Research
HTH 215	Population Healthcare Management
<b>Sport Analytics Track</b>	
SPT 250	Introduction to the Business of Sports
SPT 322	Sports Analytics
<b>Total Credits</b>	<b>24</b>

Note: Students majoring in Business Analytics are permitted to count a maximum of three courses toward a second major of Global Supply Chain Management.

## Business Analytics Minor Requirements

(15 credits)

The Minor in Business Analytics is open to all Rider students.

Code	Title	Credits
<b>Prerequisite Courses</b>		
CIS 185	Information Systems Essentials <sup>1</sup>	3
MSD 200	Statistical Methods I	
<b>Required Courses</b> <sup>2</sup>		
CIS 330	Database Management	9
CIS 350	Practical Business Analytics with Excel	
CIS 360	Data Mining	
<b>Select two of the following:</b>		
ACC 320	Accounting Info Systems	6
ECO 450	Seminar in Economic Research	
FIN 315	Financial Modeling	
HTH 215	Population Healthcare Management	
MKT 366	Marketing Research	
MKT 367	Marketing Web Analytics	
MSD 320	Quantitative Meth Bus Forecast	
MSD 325	Regression/Analysis Variance	
<b>Total Credits</b>		<b>15</b>

<sup>1</sup> Business students pursuing the Business Analytics Minor are advised to take GSC 385 in lieu of CIS 385 for their business core.

<sup>2</sup> Only two CIS courses may count towards both the Information Systems Major and the Business Analytics Major.

<sup>3</sup> For non-business students, the following courses may be used as a substitute for MSD 200: MTH 120, ENV 200, PSY 105, PSY 201, or POL 230.

## 4 Year Academic Plan

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Course	Title	Credits
<b>Year 1</b>		
<b>Fall Semester</b>

Semester Credit Hours		15
Total Credit Hours for Graduation		120

<sup>1</sup> Global Cultural Liberal Arts Electives may be satisfied by courses that are designated as global cultural liberal arts including language courses at the 101-level or above.

<sup>2</sup> Students are required to take six credits of International Business Electives.

<sup>3</sup> Select from LDP 200, LDP 220, LDP 398, MGT 355, or MGT 363.

**Notes:**

- The above plan assumes no AP or other credits transferred into Rider University.
- Business Honors students may have a different course sequence.

- It is strongly suggested that students complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448, ECO 450).

## Courses and Descriptions

### BDA 205 Introduction to Business Data Analytics 3 Credits

The primary objective of this course, as the introductory course in a business analytics sequence, is to familiarize students with business analytics and its value, application, and implications in various contexts. This course will utilize lectures, case studies, and guest speeches, and have a major hands-on component. The textbook and lectures will provide conceptual and theoretical knowledge about business analytics, and the students will be introduced in class to various tools and methods for analyzing and visualizing data. Case studies and guest speeches will expose the students to best practices as well as current and practical issues surrounding business analytics in today's organizations.

**Prerequisite(s):** CIS 185.

### BDA 360 Optimization and Stimulation 3 Credits

This course is designed to provide undergraduate students with the current knowledge and practice of optimization and simulation in business analytics. Optimization is an area in business analytics that finds the optimal, or most efficient, way of using limited resources to achieve the objectives of an individual or a business. Simulation is a technique that measures and describes various characteristics of the bottom-line performance measure of a model when one or more values for the independent variables are uncertain. The main focus of this course will be on developing modeling skills by using Excel (and Analytic Solver add-on) to gain insights into a wide variety of business decision problems. First, they will learn how to analyze the problem and choose an appropriate optimization/simulation method. Next, they learn how to formulate the problem in a format that can be implemented in a spreadsheet. Then, they will be taught to use Excel with add-on to solve the problem. Once the results are obtained, the students will be trained to interpret them and conduct sensitivity analyses. Eventually, the students are required to make a recommendation to managers after considering some implementation issues.

**Prerequisite(s):** BDA 205- Introduction to Business Data Analytics.

### BDA 398 Business Data Analytics Practicum 3 Credits

This course develops and sharpens the skills for a successful career in analytical business consulting, such as analysis, critical thinking, presentation, problem solving, and teamwork. This class will develop skills in each of these areas through discussion of the principles underlying best practices and feedbacks in a series of applied exercises and cases that will prepare students to obtain and succeed in analytical business consulting problems. The students will analyze the data provided by professionals from experts in the field, and they will present the project at the end of the semester.

**Prerequisite(s):** BDA 205; MSD 201 Statistical Methods II; Junior or Senior Standing; Completion of 12 credit hours in business analytics coursework or Permission of Instructor.

### BDA 399 The Co-Operative Experience 6 Credits

BDA 399 is the Co-Operative Experience for Business Analytics majors. This course will provide students with supervised employment (approximately four months), where the students will have an opportunity to apply what they have learned in their business analytics and other business classes.

**Prerequisite(s):** Business Analytics major, Junior or Senior standing, GPA of 3.0 or above.

**BDA 491 Business Data Analytics Internship 3 Credits**

BDA 491 is the Internship course for Business Analytics majors. This course will provide students with supervised employment (approximately two months), where the students will have an opportunity to apply what they have learned in their business analytics and other business classes.

**Prerequisite(s):** Business Analytics major, Junior or Senior standing, GPA of 2.75 or above.

## Business for Education Minor

### Overview

The Business for Education minor is offered to Secondary Education majors as part of the requirements to gain certification as a Comprehensive Business teacher authorized by New Jersey Department of Education.

For certification as a Comprehensive Business teacher, current regulations from NJ Department of Education require that applicants complete a minimum of 30 credits in a coherent sequence in the subject field of Business. A coherent sequence requires that at least 12 credits are completed at the advanced level of study (junior, senior or graduate level). Within the 30 credits, applicants must also complete:

- 12 credits in bookkeeping or accounting
- a course in business law
- a course in economics
- a course in finance
- a course in computer applications

Students who complete the program are entitled to teach accounting, financial literacy, business computer applications, business law, and other business related subjects in all public secondary schools.

#### ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

**ACC 220 Managerial Uses of Accounting 3 Credits**

This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.

**Prerequisite(s):** ACC 210.

**ACC 321 Internal Auditing 3 Credits**

This course provides an introduction to the internal audit profession, including understanding the nature and activities associated with the internal audit process. Topics include: international auditing standards, risk assessment including internal control system evaluation, business processes, and the relationship of management and employee fraud to the internal audit process.

**Prerequisite(s):** ACC 220.

**ACC 325 Fraud Examination and Business Forensics 3 Credits**

This course provides an introduction to the prevalence of fraud in all forms of business, including the many methods used by employees and managers to perpetrate fraud. Topics include: the motivation of individuals to commit fraud, various types of fraud schemes perpetrated in the workplace, as well as the various tools and techniques that are used to investigate, detect and prevent fraud.

**Prerequisite(s):** ACC 210.

**BUS 300 The Legal and Ethical Environment of Business 3 Credits**

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

**Prerequisite(s):** 54 credits.

**CIS 185 Information Systems Essentials 3 Credits**

This course will enable students to use Microsoft Excel and Access to design and create complex applications to support effective decision making. Students will use Excel to design and create spreadsheets to support business analytics. Access will be used to understand, design, create, and utilize relational databases.

**ECO 201 Principles of Microeconomics 3 Credits**

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

**Prerequisite(s):** Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

**FIN 220 Introduction to Finance 3 Credits**

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

**Prerequisite(s):** ACC 210 and ECO 201.

**FIN 305 Personal Financial Planning 3 Credits**

This course focuses on practical issues and problems involving personal financial budgeting, use of credit, selection of banking services, insurance needs, real estate, investments, tax planning, and retirement planning. An important objective of the course is to provide the student with the tools that are utilized in making personal financial decisions and how to apply those tools for a variety of financial needs.

**Prerequisite(s):** FIN 220.

**MGT 201 Fund Management & Org Behavior 3 Credits**

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

**Prerequisite(s):** minimum 30 credits completed.

**MKT 200 Marketing Principles 3 Credits**

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

## Courses and Descriptions

### Cybersecurity

#### Program Overview

Computer security is of vital importance today. Keeping business data safe through information assurance, identifying and mediating cybersecurity threats, and protecting personal information to ensure individual privacy are highly relevant topics across a number of academic disciplines. Information about people and their activities are stored on a variety of computer devices and current computing trends such as mobile computing, the Internet of Things (IoT) and cloud computing have increased the amount of information being captured and stored and, in the process, increased the potential for this information to be accessed by unauthorized parties.

#### Curriculum Overview

This program will instruct students on identifying computer security threats and how to mediate those threats. The courses provide the foundational knowledge needed to implement strategies to identify and manage cybersecurity threats. Students will be able to identify and analyze cybersecurity risks and take action to mediate those risks.

Mediation skills include implementation of policies and procedures as well as the ability to implement technical solutions to manage the risk of cybersecurity threats.

## Courses and Descriptions

### Economics

#### Program Overview

Rider's economics students master the tools needed to succeed in their careers and in their lives. Studying economics helps develop skills for

careers in business, law, teaching, public administration and research, while also building an understanding of contemporary social issues. In this challenging world, few areas of study are more relevant and essential than economics.

Rider economics majors are in demand among consulting firms, corporations, private banking and financial institutions, government agencies and non-profit agencies. Many graduates begin their careers as analysts, then progress to management positions in business and government. An undergraduate degree in economics from Rider also provides outstanding preparation for graduate study in economics, business and law.

### Curriculum Overview

Our economics program offers a flexible curriculum that allows you to target your specific career goals, whether you are a business or liberal arts major. The program offers a Bachelor of Science through the College of Business Administration, or a Bachelor of Arts through the College of Liberal Arts, Education and Sciences.

The curriculum allows students to select classes based on their area of interest. For example, a B.A. in economics with a minor in political science provides an excellent foundation for a career in law or politics. Students with a double major in economics (B.S.B.A.) and finance are prepared for careers in the financial and corporate sectors.

Studies center on macroeconomics and microeconomics. Students become trained in economic theory while learning how to apply principles and concepts to specific problems. This is done via small class sizes so that students can interact closely with faculty.

A minor in economics also is available, allowing students from different fields to study international economics, public policy and economic theory.

### Degree Offered

- B.S.B.A in Economics
- B.A. in Economics

<sup>1</sup> CIS 185 can be taken in the Fall or Spring of year 1.

<sup>2</sup> Students may be required to take CMP 115 based on placement. CMP 115 counts as a 3-credits Free Elective.

<sup>3</sup> Students may be required to take MSD 104 based on placement. MSD 104 counts as a 3-credit Free Elective.

<sup>4</sup> Transfer Students may take CBA 336 as a substitute for the Career Planning sequence.

<sup>5</sup> Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses or as free electives.

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different

plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

<sup>1</sup> Students are required to take 6 credits of International Business Electives which can be fulfilled as major courses (ECO 305, ECO 315, and/or ECO 365) or as free elective courses.

**Notes:**

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.
- Global/Cultural Liberal Arts Elective can be satisfied by courses that are designated as Global/Cultural, including language courses at the 101-level or above.
- For the Leadership Elective, choose from LDP 398, LDP 200, LDP 220, MGT 355, or MGT 363.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., Internship, Co-op, Study Tour, study abroad, ENT 448, ECO 450.)

**Courses and Descriptions****ECO 200 Principles of Macroeconomics 3 Credits**

A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.

**Prerequisite(s):** Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

**ECO 201 Principles of Microeconomics 3 Credits**

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re-evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

**Prerequisite(s):** Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

**ECO 210 Intermediate Macroeconomics 3 Credits**

An analytical study of modern aggregate economic theory. Emphasizes the measurement and determination of income, employment, and price levels, as well as economic policy in theory and practice.

**Prerequisite(s):** ECO 200 and ECO 201.

**ECO 211 Intermediate Microeconomics 3 Credits**

This course is designed to give the student a thorough understanding of microeconomic theory. As such, the course will analyze the behavior of both consumers and producers, and how this behavior determines the price and quantity observed in the market. The course objective is to provide students with the necessary theoretical background to enable them to solve meaningful and practical problems. Thus, the course is both theoretical and applied in its orientation. The course will emphasize that economic theory can be used not only to solve market oriented problems, but social and public policy problems as well.

**Prerequisite(s):** ECO 200 and ECO 201.

**ECO 300 Business Conditions Analysis/Forecast 3 Credits**

Business conditions change daily. Students study them as they change, learning to understand them in the light of economic theory, learning how each part of the economy is affected, and learning the advantages and limitations of the most reliable forecasting methods.

**Prerequisite(s):** ECO 200, MSD 201.

**ECO 301 Managerial Economics 3 Credits**

Intensively examines the theory of the firm with applications to the solution of such managerial problems as demand forecasting, the nature and behavior of costs, and product pricing. Introduces the use of simple mathematical and statistical tools that are employed with economic analysis for solving managerial problems.

**Prerequisite(s):** ECO 200 and ECO 201 and MSD 201 or permission of instructor.

**ECO 305 International Trade and Investment 3 Credits**

Studies the theory, institutions, and structures underlying the international flow of trade and investment. Topics are: the theory of international trade; balance of payment analysis; the international monetary system; adjustment to balance of payment disequilibrium; regional economic integration; the economic effects of trade restrictions; and trade and foreign investment problems of developing nations.

**Prerequisite(s):** ECO 200 and ECO 201.

**ECO 315 Comparative Economic Systems 3 Credits**

Provides a conceptual framework for classifying and comparing economic systems. Presents theory of the capitalist market economy and case studies of the U.S., Japanese, French, and Swedish economies. Examines theory of the centrally planned economy, its transition, and case studies of the Soviet and its successor states, Chinese, and East European economies. Case studies are necessarily limited, concentrating on selected topics, such as transition strategies, industrial policy, etc.

**Prerequisite(s):** ECO 200 and ECO 201.

**ECO 325 Industrial Organization 3 Credits**

Explores the relationship between market structure and performance. Topics include concentration in individual industries, product differentiation and entry barriers, pricing and marketing policies, and antitrust policies and their consequences.

**Prerequisite(s):** ECO 200 and ECO 201.

**ECO 326 Economics of Sports 3 Credits**

The overall objective of this course is to deepen student understanding of microeconomic principles by applying microeconomic concepts to the analysis of professional and amateur sports. This course will utilize concepts from many different microeconomic specialties, (primarily Industrial Organization, Labor Economics and Public Finance). The tools from these different microeconomic fields will be used to explain and analyze the operation of professional sports teams and leagues in the U.S. with an emphasis on baseball, football, basketball and hockey. International comparisons will be made between professional sports in the U.S. and the rest of the world. The course will also analyze the not-for-profit sports sector, focusing on college sports and the National Collegiate Athletic Association.

**Prerequisite(s):** ECO 201.

**ECO 330 Labor Market Analysis 3 Credits**

Intensive study of the economics of the labor market, which examines the determinants of labor supply and demand, and market equilibrium in the labor market. This enables the student to understand what determines wages, labor force participation, occupational choice, the extent of education and training, unemployment, poverty, union membership, and discrimination in the labor market.

**Prerequisite(s):** ECO 200 and ECO 201.

**ECO 335 Economics of the Public Sector 3 Credits**

Analyzes the economic roles of government: allocation; distribution; and stabilization. The course examines the tools used by governments, especially the federal government, such as taxation, expenditures, regulations and laws in order to achieve economic goals. The course will give special attention to social regulation.

**Prerequisite(s):** ECO 200 and ECO 201.

**ECO 336 Economics of Health Care Systems 3 Credits**

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomic tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

**Prerequisite(s):** ECO 201 or HTH 205.

**ECO 365 Post-Soviet Economy 3 Credits**

Studies the contemporary post-Soviet economic system, with emphasis on institutions, policies and issues related to business opportunities in this area. Topics covered include the historic, geographic, political, and cultural setting, planning and plan implementation in the traditional system, current reforms and prospects for the future, with special reference to the foreign trade institutions and experience of foreign firms doing business in the post-Soviet Union and Eastern European countries. **Prerequisite(s):** ECO 200 and ECO 201 or permission of instructor.

**ECO 450 Seminar in Economic Research 3 Credits**

Students in the course learn to conduct economic research by engaging in an actual community-based research project. At the beginning of the semester, students are assigned to a community-based organization. As a team, students meet with the client, devise a plan of action, collect and analyze data and other information, and write a report to the client. At the end of the semester, students present their findings to the client. Students are permitted to take ECO 450 up to two times for credit.

**Prerequisite(s):** Permission of instructor.

**ECO 490 Independent Research and Study 3 Credits**

Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

**ECO 491 Internship/Independent Study 3 Credits**

This course is available to qualified economics majors and minors. Evaluation is based on a performance appraisal provided by the participating firm and a project/paper judged by the major's internship director. This course can be used as a business or free elective. Grading is done on a pass/fail basis.

**Prerequisite(s):** Permission of instructor.

## Entrepreneurial Studies

### Program Overview

Rider entrepreneurial studies (ES) students develop the skills and knowledge needed to become independent, innovative and informed entrepreneurs. Entrepreneurs look at the world differently, and see opportunity where others do not. The programs emphasize practical experience and holistic thinking, encourage students to develop their own business concepts, and enhance analytical skills through experiential classes.

Entrepreneurs and small businesses are the engines for job creation and economic growth. Career opportunities for entrepreneurial students are as boundless as their creativity, imagination and work ethic. Many employers value students with an entrepreneurial attitude and their ability to think outside the box.

The ES program has two key learning objectives. First, encourage entrepreneurial thinking among students. This entails the ability to recognize, evaluate and pursue opportunities. Second, build professional skills relevant for starting and/or managing a venture. These include research, business planning, and understanding functional aspects of small business management and operations.

### Curriculum Overview

Rider entrepreneurial studies students gain an education in business, plus the skills, attitude and experience needed to create new ventures or revitalize established/family businesses. They learn to identify and understand different types of start-up ventures, how to build and present

business concepts, and how to evaluate sources of financing for start-up and other types of ventures.

The program's interdisciplinary format offers the option of double majoring with another business discipline, such as management, marketing, finance, sports management, information systems, and others.

Students also can choose the entrepreneurial studies minor, a four-course program that is paired with a major in the College of Business Administration.

#### Footnotes

- <sup>1</sup> In addition to the three required major courses (ENT 348, ENT 100, and ENT 410), ENT majors must take three additional ENT Major Electives from the following list, at least one of which must be an ENT-prefixed course: BUS 210, CIS 325 or CIS 340, ENT 210, ENT 260, ENT 335, ENT 350/FIN 350, ENT 375, ENT 420, ENT 444, ENT 448, ENT 490, MGT 310 or MGT 363, MKT 250 or MKT 320.
- <sup>2</sup> ENT majors have the option of completing MGT 363 for their major requirement as well as for their Leadership Elective requirement. If they choose to do this, they must complete another 3 credit free elective.
- <sup>3</sup> Students are required to take 6 credits of International Business Electives which can be fulfilled as major courses (ENT 375 International Entrepreneurship) or as free elective courses.

#### Notes:

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.
- Global/Cultural Liberal Arts Elective can be satisfied by courses that are designated as Global/Cultural, including language courses at the 101-level or above.
- For the Leadership Elective, choose from LDP 398, LDP 200, LDP 220, MGT 355, or MGT 363.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., Internship, Co-op, Study Tour, study abroad, ENT 448, ECO 450.)

## Courses and Descriptions

### ENT 100 Innovation and Entrepreneurship 3 Credits

This course provides students with an introduction to creativity, innovation, and the concept of an entrepreneurial mindset. Students explore the excitement and challenges faced by individuals and businesses as they create, develop, and evaluate innovative business opportunities. We also discuss the probable paths of career development for students pursuing entrepreneurship. In this course, students evaluate their own views of innovation and entrepreneurship within the framework of entrepreneurial thinking, and putting this mindset into action.

### ENT 210 Sports Entrepreneurship 3 Credits

Sports Entrepreneurship will introduce students to entrepreneurship in the sports industries as they explore opportunities and challenges for new ventures in this sector. Using an industry's business model, students will identify competitive advantages and understand what is required for startup success.

### ENT 260 Family Business Management 3 Credits

This course is directed at understanding the family-owned and managed firm. Topics included are the strengths and weaknesses of a family firm, the dynamics of the family and business interactions, conflict resolution, succession planning and ownership transfer. The course will help individuals involved with a family firm, regardless if they are a family member.

**Prerequisite(s):** MGT 201 and junior standing.

### ENT 335 Small Business Tax Planning 3 Credits

This course provides an understanding of the key tax issues faced by small businesses and their business implications. It also familiarizes prospective business owners with various tax filing requirements so that they can use the expertise of tax professionals more effectively.

**Prerequisite(s):** ACC 210.

### ENT 348 Small Business Management 3 Credits

This course provides students with an introduction to ownership/management in the world of small business as well as an understanding of what is needed to start/buy/sell a small business. In addition, the course endeavors to help students move from a consumer orientation to a producer orientation, and to learn project management and research skills through participation in a hands-on project. The project has students investigate the market potential of an innovative business concept, and then use this research to evaluate the business concept as an entrepreneurial opportunity.

### ENT 350 Entrepreneurial Finance 3 Credits

This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.

**Prerequisite(s):** FIN 300.

### ENT 375 International Entrepreneurship 3 Credits

Students will learn how new or small ventures enter international markets. Requirements include developing a case about starting or running a venture in a single country of the student's choice.

**Prerequisite(s):** MGT 201 and junior standing.

### ENT 399 Entrepreneurship Co-Op 6 Credits

This course provides students with a semester-long supervised employment with an entrepreneurial firm/organization. Students are required to maintain a journal, complete a reflection paper and are evaluated by the participating firm/organization. Eligible students are entrepreneurial studies juniors or seniors with a 3.0 GPA or better. Co-op credits count as free electives. Grading is on a pass/fail basis.

**Prerequisite(s):** ENT 348 or permission of program director.

### ENT 410 New Venture Planning 3 Credits

This course will require students to select a business and prepare a complete new venture plan for it. This plan would identify the product and its target market, analyze its market potential, choose the location, scale of operation, layout, staffing, type of financing, estimate the revenues and profits, and present the income statement, balance sheet, and the cash flow projections.

**Prerequisite(s):** ENT 348 or permission of instructor.

### ENT 420 Student Venture Experience 3 Credits

Students will start and run a small business while under the supervision and guidance of faculty. Students will take a business plan developed through New Venture Planning (ENT 410) and execute it. Students will experience the launch process and learn, hands on, how to adapt to the marketplace. Some businesses started in this class may also be eligible for seed venture funding from Rider.

**Prerequisite(s):** ENT 348, ENT 410, and permission of instructor.

### ENT 444 Special Topics 3 Credits

#### ENT 448 Small Business Consulting Sem 3 Credits

This course utilizes student teams to assist existing small businesses in solving problems or researching opportunities. Students will spend the majority of time in the field utilizing an experiential learning approach. Weekly activity logs, proposal development, and project completion are required. Restricted to seniors.

**Prerequisite(s):** ENT 348 and permission of instructor.

#### ENT 490 Independent Research and Study 3-4 Credits

Topic to be approved by professor and program chairperson. Available to juniors and seniors.

#### ENT 491 Internship 3 Credits

## Entrepreneurship Minor

### Program Overview

Rider students wishing to take a minor in entrepreneurship will develop the skills and know-how they need to become independent, innovative and informed entrepreneurs. The minor emphasizes practical experience and holistic thinking, encourages students to develop their own business concepts, and enhances analytical skills through experiential classes.

For students in the arts, sciences, business, or education who may want to start or have a significant role in a business, based on their skills and talents, the minor in entrepreneurship can help you reach your dream.

Entrepreneurs and small businesses are the engines for job creation and economic growth. Career opportunities for entrepreneurship students are as boundless as their creativity, imagination and work ethic. Many employers value students with an entrepreneurial attitude and their ability to think outside the box.

The entrepreneurship minor has two key learning objectives. First, to encourage entrepreneurial thinking among students. This entails the

ability to recognize, evaluate and pursue opportunities. Second, to build professional skills relevant for starting and managing a venture. These include research, business planning, and understanding functional aspects of small business management and operation.

Rider entrepreneurship students gain an education in business, plus the skills, attitude and experience needed to create new ventures or revitalize established/family businesses. They learn to identify and understand different types of start-up ventures, how to build and present business concepts, and how to evaluate sources of financing for start-up and other types of ventures.

## Minor Offered

## Courses and Descriptions

### ENT 100 Innovation and Entrepreneurship 3 Credits

This course provides students with an introduction to creativity, innovation, and the concept of an entrepreneurial mindset. Students explore the excitement and challenges faced by individuals and businesses as they create, develop, and evaluate innovative business opportunities. We also discuss the probable paths of career development for students pursuing entrepreneurship. In this course, students evaluate their own views of innovation and entrepreneurship within the framework of entrepreneurial thinking, and putting this mindset into action.

### ENT 210 Sports Entrepreneurship 3 Credits

Sports Entrepreneurship will introduce students to entrepreneurship in the sports industries as they explore opportunities and challenges for new ventures in this sector. Using an industry's business model, students will identify competitive advantages and understand what is required for startup success.

### ENT 260 Family Business Management 3 Credits

This course is directed at understanding the family-owned and managed firm. Topics included are the strengths and weaknesses of a family firm, the dynamics of the family and business interactions, conflict resolution, succession planning and ownership transfer. The course will help individuals involved with a family firm, regardless if they are a family member.

**Prerequisite(s):** MGT 201 and junior standing.

### ENT 335 Small Business Tax Planning 3 Credits

This course provides an understanding of the key tax issues faced by small businesses and their business implications. It also familiarizes prospective business owners with various tax filing requirements so that they can use the expertise of tax professionals more effectively.

**Prerequisite(s):** ACC 210.

### ENT 348 Small Business Management 3 Credits

This course provides students with an introduction to ownership/management in the world of small business as well as an understanding of what is needed to start/buy/sell a small business. In addition, the course endeavors to help students move from a consumer orientation to a producer orientation, and to learn project management and research skills through participation in a hands-on project. The project has students investigate the market potential of an innovative business concept, and then use this research to evaluate the business concept as an entrepreneurial opportunity.

### ENT 350 Entrepreneurial Finance 3 Credits

This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.

**Prerequisite(s):** FIN 300.

**ENT 375 International Entrepreneurship 3 Credits**

Students will learn how new or small ventures enter international markets. Requirements include developing a case about starting or running a venture in a single country of the student's choice.

**Prerequisite(s):** MGT 201 and junior standing.

**ENT 399 Entrepreneurship Co-Op 6 Credits**

This course provides students with a semester-long supervised employment with an entrepreneurial firm/organization. Students are required to maintain a journal, complete a reflection paper and are evaluated by the participating firm/organization. Eligible students are entrepreneurial studies juniors or seniors with a 3.0 GPA or better. Co-op credits count as free electives. Grading is on a pass/fail basis.

**Prerequisite(s):** ENT 348 or permission of program director.

**ENT 410 New Venture Planning 3 Credits**

This course will require students to select a business and prepare a complete new venture plan for it. This plan would identify the product and its target market, analyze its market potential, choose the location, scale of operation, layout, staffing, type of financing, estimate the revenues and profits, and present the income statement, balance sheet, and the cash flow projections.

**Prerequisite(s):** ENT 348 or permission of instructor.

**ENT 420 Student Venture Experience 3 Credits**

Students will start and run a small business while under the supervision and guidance of faculty. Students will take a business plan developed through New Venture Planning (ENT 410) and execute it. Students will experience the launch process and learn, hands on, how to adapt to the marketplace. Some businesses started in this class may also be eligible for seed venture funding from Rider.

**Prerequisite(s):** ENT 348, ENT 410, and permission of instructor.

**ENT 444 Special Topics 3 Credits****ENT 448 Small Business Consulting Sem 3 Credits**

This course utilizes student teams to assist existing small businesses in solving problems or researching opportunities. Students will spend the majority of time in the field utilizing an experiential learning approach. Weekly activity logs, proposal development, and project completion are required. Restricted to seniors.

**Prerequisite(s):** ENT 348 and permission of instructor.

**ENT 490 Independent Research and Study 3-4 Credits**

Topic to be approved by professor and program chairperson. Available to juniors and seniors.

**ENT 491 Internship 3 Credits**

## Finance

### Program Overview

The Finance major combines practical classroom training with internship opportunities to prepare students for a professional business career. Rider Finance majors find careers regionally and globally in business, industry, government service, and the non-profit sector. Career paths of our finance graduates include portfolio manager, financial analyst, banker, financial advisor, corporate financial manager, credit analyst, financial consultant and more.

### Curriculum Overview

Rider offers three main areas of specialization within the Finance major. All programs lead to nationally recognized professional credentials that

align with student career goals and demonstrate competency in the industry.

For students interested in pursuing a career in Financial Advising we offer a Concentration in Private Wealth Management (p. 302). This program prepares students to take the Securities Industry Essentials (SIE) exam that is now part of the Series 7 exam prior to graduation.

The Concentration in Investment Analysis (p. 302) prepares students for a variety of careers in investments and corporate finance. The program includes courses for students who plan to take the Chartered Financial Analyst® (CFA) Level 1 Exam.

The Concentration in Financial Management (p. 302) helps prepare students to take the Certified Management Accounting (CMA) examinations. This certification can be very worthwhile for those who intend to enter careers in Corporate Finance.

The Concentration in Financial Services Marketing (p. 302) is designed for students interested in the many careers requiring knowledge of Finance as well as strong marketing skills such as financial sales. This program serves as an excellent complement to the Concentration in Private Wealth Management.

There are many options that can meet your specific needs: highly motivated students with multiple interests may specialize in two or more finance concentrations or double major (e.g., Business Analytics is a valuable supplement to Finance). Alternatively, students may choose a well-rounded exposure to the many facets of financial decision making and forego any specific concentration.

Non-business majors can minor in Finance. Students can receive a non-business degree and at the same time acquire considerable business knowledge and skills from our Finance minor (p. 302).

FIN 370	Financial Analysis and Ethics	
FIN 405	Private Wealth Management	
FIN 412	Investment Analysis	
Total Credits		18

Students must achieve a minimum 2.0 GPA in the minor with no course grade below a "C-."

## Finance Concentrations

Concentration in Private Wealth Management (p. )

Concentration in Investment Analysis (p. )

Concentration in Financial Management (p. )

Concentration in Financial Services Marketing for Finance and Marketing Majors (p. )

### Concentration in Private Wealth Management

(21 credits)

The Concentration in Private Wealth Management (PWM) prepares students for a career as a Financial Advisor. The course sequence will provide a foundation for students to take the Securities Industry Essentials (SIE) (<https://www.finra.org/industry/essentials-exam>) exam during their senior year prior to graduation. The SIE is a portion of the

Series 7 exam required by all brokerages and advisory firms and is the entry-level credential that all financial advisors must earn in order to advance in their career in Finance. Students will undergo frequent benchmark testing through their finance courses, assessing necessary knowledge and thinking to achieve mastery. (A double major or minor in Business Analytics (p. 286) is a recommended complement. Students who are sales-oriented may consider the concentration in Financial Services Marketing.)

#### Admission

This program is only available to Rider undergraduate College of Business Administration (CBA) students majoring in Finance. With the exception of Finance-Accounting double majors, all Finance majors with a GPA of 2.50 who have completed 30 credits are automatically enrolled in the Concentration in PWM. Transfer students entering with 30 credits are automatically enrolled in PWM during their first semester.

Finance-Accounting double majors are permitted to enroll in this concentration at their discretion. Students can switch to or add the concentration in Financial Management, if desired, after earning 30 credits. Students may "opt-out" of having a concentration with permission of the Department Chair.

#### Graduation Requirement

A minimum cumulative GPA of 2.50 at graduation and a minimum grade of C is necessary in each of the following courses:

Code	Title	Credits
ACC 210	Introduction to Accounting	3
ACC 220	Managerial Uses of Accounting	3
FIN 220	Introduction to Finance	3
FIN 305	Personal Financial Planning	3
FIN 307	Financial Markets & Institut	3
FIN 312	Investments	3
FIN 405	Private Wealth Management	3
Total Credits		21

For information on the Concentration in Private Wealth Management please contact either:

liuf(liuf@rider.edu)@rider.edu (ratner@rider.edu)

### Concentration in Investment Analysis

(15 credits)

This program prepares students for a variety of careers in investments and corporate finance. By taking the required courses for the program, participants will receive in-depth training involving investment tools, valuation of assets, and management of investments that will position them to enter the fields of security analysis and portfolio management. Although the focus of the program is on investments, the knowledge

that participants gain from the required courses is highly valued in other finance fields such as financial planning and treasury management. (A double major or minor in Business Analytics is a recommended complement).

This program is also designed to prepare students for the Chartered Financial Analyst (CFA) Level 1 Exam (<https://www.cfainstitute.org/programs/cfa/exam/level-i>). The CFA designation is globally recognized by employers and investment professionals. The content of the required courses for the concentration, along with the other required courses for a business undergraduate degree, cover a significant portion of the CFA Level 1 Exam curriculum.

### Admission

Rider undergraduate College of Business Administration (CBA) students majoring in Finance or double-majoring in Finance may apply for this concentration after completing 60 credits. Students enrolled in the Concentration in Private Wealth Management are encouraged to add this second program if they meet the following criteria:

- minimum cumulative GPA of 3.25
- minimum grade of "B" in FIN 220
- minimum grade of "B" in at least five of the six prerequisite courses below:
- minimum grade of "C" in no more than one of the six prerequisite courses below:

Code	Title	Credits
<b>Prerequisite Courses:</b>		
ACC 210	Introduction to Accounting	
ACC 220	Managerial Uses of Accounting	
ECO 200	Principles of Macroeconomics	
ECO 201	Principles of Microeconomics	
MSD 200	Statistical Methods I	
MSD 201	Statistical Methods II	
<b>Required Courses for the Concentration:</b>		
FIN 309	Intermediate Corporate Finance	3
FIN 312	Investments	3
FIN 360	Derivatives	3
FIN 370	Financial Analysis and Ethics <sup>1</sup>	3
FIN 412	Investment Analysis	3
or FIN 315	Financial Modeling	
Total Credits		15

<sup>1</sup> Students who are a double major in Finance and Accounting are permitted to waive FIN 370.

### Graduation Requirement:

Students must have a minimum GPA of 3.25 in the 15 semester hours of required coursework and a minimum cumulative GPA of 3.25 in order to successfully complete the program.

## Concentration in Financial Management

(12-15 credits)

This program prepares Finance majors for careers in Corporate Finance that combine skills in both finance and accounting. Corporate Finance is used by both financial and non-financial firms, and by investment banks that help firms raise capital. The program is also designed to prepare students for the Certified Management Accountant (CMA) (<https://www.imanet.org/cma-certification?ssopc=1>) examinations that students are encouraged to complete prior to graduation. This credential is valued in a number of careers relating to both Corporate Finance and Accounting. (A double major or minor in Business Analytics (p. 286) is a recommended complement.)

### Admission

Rider undergraduate College of Business Administration (CBA) students majoring in Finance or any other business discipline excluding Accounting majors may choose this program after completing 30 credits and a minimum cumulative GPA of 2.50.

### Graduation Requirement

A minimum cumulative GPA of 2.50 at graduation and a minimum grade of C is necessary in each of the following courses:

Code	Title	Credits
<b>Required Courses:</b>		
ACC 302	Cost Management	3
FIN 309	Intermediate Corporate Finance	3
FIN 370	Financial Analysis and Ethics <sup>1</sup>	3
<b>Elective Course:</b>		
Select one of the following (or both if time permits):		3-6
FIN 315	Financial Modeling	
FIN 330	Corporate Cash Management	
Total Credits		12-15

<sup>1</sup> The FIN 370 course requirement can be satisfied by completion of both ACC 310 and ACC 311.

For information on the Financial Management Concentration please contact:

**Jason Chiu, Ph.D.**  
Associate Professor  
609-896-5299  
Sweigart Hall 262  
cchu@rider.edu

## Concentration in Financial Services for Finance (p. 304) or Marketing (p. 304) Majors

(12 credits)

This program is designed for students interested in the many careers requiring knowledge of finance as well as strong marketing skills, including banking, investment banking, and insurance.

This concentration is available to Finance or Marketing majors in CBA. Students majoring in Finance are required to complete 12 credit hours in marketing coursework; and students majoring in Marketing are required

to complete 12 credit hours in finance coursework. Finance majors may only select this program as a second concentration after they select a primary concentration such as Private Wealth Management.

## Finance Majors

#### Notes:

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.
- Global/Cultural Liberal Arts Electives can be satisfied by courses that are designated as global/cultural, including language courses at the 101-level or above.
- For the Leadership Elective, choose from LDP 398, LDP 200, LDP 220, MGT 355, or MGT 363.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448, ECO 450.)

## Courses and Descriptions

### FIN 200 Managing Your Money 3 Credits

An introduction to the analysis of a wide range of financial decisions which individuals encounter over their careers and lifetime. Topics include financial goals, tax planning, home ownership versus renting, consumer credit, money management and investments, and managing risk with insurance. This course is open to all Rider students, and it counts as a free elective or a business elective. It cannot be used as finance elective.

### FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

**Prerequisite(s):** ACC 210 and ECO 201.

### FIN 305 Personal Financial Planning 3 Credits

This course focuses on practical issues and problems involving personal financial budgeting, use of credit, selection of banking services, insurance needs, real estate, investments, tax planning, and retirement planning. An important objective of the course is to provide the student with the tools that are utilized in making personal financial decisions and how to apply those tools for a variety of financial needs.

**Prerequisite(s):** FIN 220.

### FIN 307 Financial Markets & Institut 3 Credits

This course provides an introduction to the organization and behavior of financial markets and institutions in the economy. The factors determining security prices and interest rates in the money and capital markets are analyzed. An overview of all major financial institutions is presented. In addition, market returns, the regulatory environment, and monetary policy are examined.

**Prerequisite(s):** FIN 220 or concurrent with FIN 220.

### FIN 308 International Finance 3 Credits

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

**Prerequisite(s):** FIN 220.

### FIN 309 Intermediate Corporate Finance 3 Credits

This course builds on and extends the concepts of financial management learned in FIN 220. The course examines long-term corporate financing and investment decisions and how those decisions interface with each other. Topics covered include: cost of capital, financial planning and analysis, capital budgeting, capital structure and dividend policy.

**Prerequisite(s):** FIN 220.

### FIN 312 Investments 3 Credits

The fundamentals of investing in stocks, bonds, and other negotiable instruments are covered. Major topics include trading on securities markets, mutual funds, international investing, margin accounts, short sales, determinants of securities prices, and investment risks. Stock options, financial futures, convertible securities, and implications of taxes on investment decisions are also discussed.

**Prerequisite(s):** FIN 220.

### FIN 315 Financial Modeling 3 Credits

Provides instruction in computer use beyond what is available in other finance courses. Topics include more sophisticated applications of computers in financial management, investments, and other areas of finance and business. Students work on cases and projects which require more advanced usage of spreadsheets and other software and databases.

**Prerequisite(s):** CIS 185 and FIN 220.

### FIN 330 Corporate Cash Management 3 Credits

This course is designed for business students seeking an understanding of modern principles and techniques for corporate treasury management. The course material is useful for finance, accounting, and banking professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multi-national cash management, and other related topics.

**Prerequisite(s):** FIN 220.

### FIN 340 Risk Management 3 Credits

This course examines the risk management process as applied to the firm as a whole. It integrates the management of all risks facing the firm: strategic, financial, hazard, and operational. Techniques for identifying risk, measuring and analyzing it, and selecting an appropriate treatment will be explored.

**Prerequisite(s):** FIN 220.

### FIN 350 Entrepreneurial Finance 3 Credits

This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.

**Prerequisite(s):** FIN 220.

**FIN 360 Fixed Income and Derivatives 3 Credits**

This course centers on the quantitative portion of the Chartered Financial Analyst (CFA) level 1 curriculum, which includes materials on fixed-income risk and return, fundamentals of risk analysis, derivative instruments and risk management applications of option strategies. The goal is to help students prepare for the exam, as well as introduce them to a variety of topics in finance.

**Prerequisite(s):** FIN 312.

**FIN 370 Financial Analysis and Ethics 3 Credits**

This course covers the topics of financial reporting and analysis and related ethical issues. The course would benefit students interested in augmenting their ability to understand, analyze and apply the information in financial statements. It provides essential knowledge for students seeking either the Certified Management Accountant (CMA) or Chartered Financial Analyst (CFA) certifications. Specifically, the course covers the Ethics and Professional Standards of the CFA curriculum, and materials on financial reporting quality and financial statement analysis. Course goals are to help students prepare for the certification exams, as well as introduce all interested students to a variety of topics in financial analysis and ethics.

**Prerequisite(s):** FIN 312 or POI.

**FIN 380 Real Estate 3 Credits**

Real estate finance and related subjects in real estate are examined. Topics include measuring cash flows and taxes, valuation methods for real estate investment decisions, location and value in real estate, home ownership, legal matters, and financing methods and techniques.

**Prerequisite(s):** FIN 220.

**FIN 399 The Co-Operative Experience 6 Credits**

The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their finance and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Eligible students include finance majors with at least junior status, a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in any finance coursework completed prior to the submission of the co-op application. Co-op credits can be applied toward business or free elective requirements but not toward finance elective requirements for majors. Grading is on a pass/fail basis.

**Prerequisite(s):** FIN 220.

**FIN 405 Private Wealth Management 3 Credits**

This course utilizes the Chartered Financial Analyst (CFA) curriculum and focuses on private asset management for high-net-worth investors. A wide range of topics including managing individual investor portfolios, taxes, estate planning, concentrated single-asset positions and individual risk management will be covered via lecture discussions. The main objective for the course is to help students develop the skills for a career in wealth management.

**Prerequisite(s):** FIN 305.

**FIN 412 Investment Analysis 3 Credits**

Real-world application of the concepts and techniques of investment analysis and portfolio theory introduced in FIN 312. Students interact with and make recommendations to professional portfolio managers. Topics include analysis and forecasts of business conditions, market interest rates, international opportunities, and corporate profits. Emphasis is placed on the valuation of securities, stock selection, investment timing, technical analysis, and management of portfolio risk with options, futures, and other tools.

**Prerequisite(s):** FIN 312 or permission of instructor.

**FIN 469 Special Topics in Finance 3 Credits**

This course is occasionally offered, with the topics and prerequisites set by the finance program.

**FIN 490 Independent Study: Research and Creative Expression 3 Credits**

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation. This course can be used as a business or free elective, but with prior approval it can also be used as finance elective.

**FIN 491 Finance Internship 1-3 Credits**

The internship offers qualified junior and senior finance majors supervised employment with participating companies. The internship may be taken during the fall or spring semester or during the summer session. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a term paper that will be reviewed by the major's internship director. Internship credits can be applied toward business or free elective requirements but not toward finance elective requirements for majors. Grading is on a pass/fail basis.

**Prerequisite(s):** permission of instructor.

## Finance Minor for Non-business Majors

### Program Overview

The finance minor is designed to meet the needs of students who have a variety of career goals. For many types of jobs, it is essential that one understands the process of financial decision-making and the environment in which those decisions take place. To provide this understanding, the minor program consists of a well-rounded course of study in principles of macroeconomics, personal financial planning, management, entrepreneurial finance and other related courses.

This program is offered to all non-business students.

### Minor Offered

FIN 315	Financial Modeling	
FIN 330	Corporate Cash Management	
FIN 350	Entrepreneurial Finance	
FIN 360	Derivatives	
FIN 405	Private Wealth Management	
FIN 412	Investment Analysis	
Total Credits		18

Note: Students must achieve a minimum 2.0 GPA in the minor with no course grade below a "C-".

## Courses and Descriptions

### ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

### ECO 201 Principles of Microeconomics 3 Credits

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

**Prerequisite(s):** Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

### FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

**Prerequisite(s):** ACC 210 and ECO 201.

### FIN 305 Personal Financial Planning 3 Credits

This course focuses on practical issues and problems involving personal financial budgeting, use of credit, selection of banking services, insurance needs, real estate, investments, tax planning, and retirement planning. An important objective of the course is to provide the student with the tools that are utilized in making personal financial decisions and how to apply those tools for a variety of financial needs.

**Prerequisite(s):** FIN 220.

### FIN 307 Financial Markets & Institut 3 Credits

This course provides an introduction to the organization and behavior of financial markets and institutions in the economy. The factors determining security prices and interest rates in the money and capital markets are analyzed. An overview of all major financial institutions is presented. In addition, market returns, the regulatory environment, and monetary policy are examined.

**Prerequisite(s):** FIN 220 or concurrent with FIN 220.

### FIN 308 International Finance 3 Credits

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

**Prerequisite(s):** FIN 220.

### FIN 309 Intermediate Corporate Finance 3 Credits

This course builds on and extends the concepts of financial management learned in FIN 220. The course examines long-term corporate financing and investment decisions and how those decisions interface with each other. Topics covered include: cost of capital, financial planning and analysis, capital budgeting, capital structure and dividend policy.

**Prerequisite(s):** FIN 220.

### FIN 312 Investments 3 Credits

The fundamentals of investing in stocks, bonds, and other negotiable instruments are covered. Major topics include trading on securities markets, mutual funds, international investing, margin accounts, short sales, determinants of securities prices, and investment risks. Stock options, financial futures, convertible securities, and implications of taxes on investment decisions are also discussed.

**Prerequisite(s):** FIN 220.

### FIN 315 Financial Modeling 3 Credits

Provides instruction in computer use beyond what is available in other finance courses. Topics include more sophisticated applications of computers in financial management, investments, and other areas of finance and business. Students work on cases and projects which require more advanced usage of spreadsheets and other software and databases.

**Prerequisite(s):** CIS 185 and FIN 220.

**FIN 330 Corporate Cash Management 3 Credits**

This course is designed for business students seeking an understanding of modern principles and techniques for corporate treasury management. The course material is useful for finance, accounting, and banking professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multi-national cash management, and other related topics.

**Prerequisite(s):** FIN 220.

**FIN 350 Entrepreneurial Finance 3 Credits**

This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.

**Prerequisite(s):** FIN 220.

**FIN 360 Fixed Income and Derivatives 3 Credits**

This course centers on the quantitative portion of the Chartered Financial Analyst (CFA) level 1 curriculum, which includes materials on fixed-income risk and return, fundamentals of risk analysis, derivative instruments and risk management applications of option strategies. The goal is to help students prepare for the exam, as well as introduce them to a variety of topics in finance.

**Prerequisite(s):** FIN 312.

**FIN 405 Private Wealth Management 3 Credits**

This course utilizes the Chartered Financial Analyst (CFA) curriculum and focuses on private asset management for high-net-worth investors. A wide range of topics including managing individual investor portfolios, taxes, estate planning, concentrated single-asset positions and individual risk management will be covered via lecture discussions. The main objective for the course is to help students develop the skills for a career in wealth management.

**Prerequisite(s):** FIN 305.

**FIN 412 Investment Analysis 3 Credits**

Real-world application of the concepts and techniques of investment analysis and portfolio theory introduced in FIN 312. Students interact with and make recommendations to professional portfolio managers. Topics include analysis and forecasts of business conditions, market interest rates, international opportunities, and corporate profits. Emphasis is placed on the valuation of securities, stock selection, investment timing, technical analysis, and management of portfolio risk with options, futures, and other tools.

**Prerequisite(s):** FIN 312 or permission of instructor.

**Fraud and Business Forensics Concentration Program Overview**

The Business Forensics concentration is designed to prepare students for a career in the field of fraud investigation and forensics. The curriculum encompasses fraud examinations, financial investigations, the psychology of white-collar crime, forensic interrogations and evidence management, and presentation for civil and criminal trials. A variety of teaching tools are employed including case studies, mock investigations, mock trials, guest speakers and professionals who are experts in their areas.

The program offers a track in either Accounting or Information Systems.

**Admission**

Current undergraduate College of Business Administration (CBA) students majoring in Accounting or Information Systems may choose a concentration on Fraud and Business Forensics. CBA students who want to declare this concentration should do so through the CBA Undergraduate Academic Coordinator in the Dean's Office in Sweigart Hall a semester prior to beginning coursework.

**Degree Offered**

- Concentration in Fraud and Business Forensics

**Contact**

**Dorothy McMullen, Ph.D.**

Associate Professor of Accounting  
Sweigart 314

**Program Website:** Fraud and Business Forensics Concentration (<http://www.rider.edu/academics/colleges-schools/college-business-administration/undergraduate-majors-programs/accounting-0>)

**Associated Department:** Department of Accounting

**Fraud and Business Forensics Requirements**

(12 credits)

A concentration in Fraud and Business Forensics consists of four courses that can be completed as part of the undergraduate Accounting or Information Systems program. The concentration prepares students for a career in the field of fraud investigation and forensics by providing skills and tools to both prevent fraud from occurring and discovering fraud after it has occurred.

Code	Title	Credits
<b>Required Courses</b>		
ACC 321	Internal Auditing	3
ACC 325	Fraud Examination and Business Forensics	3
ACC 450	Business Forensic Application	3
<b>Tracks</b>		
<b>Select one of the following Tracks:</b>		3
<b>Accounting Track</b>		
ACC 320	Accounting Info Systems	
or ACC 400	Principles of Auditing	
<b>Information Systems Track</b>		
CIS 370	Systems Analysis and Design Project	
Total Credits		12

Students must achieve a minimum 2.5 GPA in the coursework required for the concentration, with no grade lower than a "C" in any course in the concentration.

## Courses and Descriptions

### ACC 320 Accounting Info Systems 3 Credits

This course provides an introduction to accounting information systems and enterprise-wide, process-focused information systems. Topics include quality of data for decision usefulness, internal control concepts and documentation tools, and database theory and applications.

**Prerequisite(s):** ACC 310.

### ACC 321 Internal Auditing 3 Credits

This course provides an introduction to the internal audit profession, including understanding the nature and activities associated with the internal audit process. Topics include: international auditing standards, risk assessment including internal control system evaluation, business processes, and the relationship of management and employee fraud to the internal audit process.

**Prerequisite(s):** ACC 220.

### ACC 325 Fraud Examination and Business Forensics 3 Credits

This course provides an introduction to the prevalence of fraud in all forms of business, including the many methods used by employees and managers to perpetrate fraud. Topics include: the motivation of individuals to commit fraud, various types of fraud schemes perpetrated in the workplace, as well as the various tools and techniques that are used to investigate, detect and prevent fraud.

**Prerequisite(s):** ACC 210.

### ACC 400 Principles of Auditing 3 Credits

This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.

**Prerequisite(s):** ACC 302 and ACC 311.

### ACC 450 Business Forensic Application 3 Credits

This course provides an opportunity to perform complex investigative cases and analyses, thus demonstrating mastery of the knowledge and skills required to be effective forensic professionals. The course covers how to manage and present digital and technical evidence gathered for forensic litigation cases, including the ability to be an expert witness in court.

**Prerequisite(s):** ACC 325 and ACC 321.

### CIS 370 Systems Analysis and Design Project 3 Credits

Topics include modeling techniques and methodologies to address the planning, analysis, design, and implementation of high quality systems, delivered on time and within budget. Using rapid application development tools, students will also construct an operational system within the span of a single semester. Issues and tools related to the management of project teams are also discussed.

**Prerequisite(s):** CIS 330.

## General Business for Non-business Majors

### Program Overview

Available to all non-business majors, the General Business minor at Rider University provides students an understanding of the language and basic concepts of business. A minor in business administration can complement any major and may expand career opportunities. Students outside of the CBA can augment their understanding of business by joining business clubs, such as DAARSTOC (<http://www.rider.edu/>

[academics/colleges-schools/college-business-administration/clubs-organizations/daarstoc](http://www.rider.edu/)), and participate in club events like the Accounting Society's guest speakers' nights.

### Curriculum Overview

Students will learn foundational knowledge in business, including the fundamentals of economics and core concepts in financial accounting, management, finance and marketing. In addition, students will understand the legal environment in which business operates.

A minimum of six courses must be taken in business administration and students must achieve a minimum GPA of 2.0 in the minor.

## Courses and Descriptions

### ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

### BUS 300 The Legal and Ethical Environment of Business 3 Credits

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

**Prerequisite(s):** 54 credits.

### ECO 201 Principles of Microeconomics 3 Credits

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are re explored in the light of price theory. The role of the United States in the world economy is explored.

**Prerequisite(s):** Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

### ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits

This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.

**Corequisite(s):** ENV 200L.

### FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

**Prerequisite(s):** ACC 210 and ECO 201.

### MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

**Prerequisite(s):** minimum 30 credits completed.

### MKT 200 Marketing Principles 3 Credits

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

### MSD 105 Quantitative Methods for Business 3 Credits

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

**Prerequisite(s):** MSD 104 or a passing grade on the Math Placement Exam.

### MSD 200 Statistical Methods I 3 Credits

This course is designed to give the student an understanding of continuous random variables, the elements of statistical inference, and an introduction to how these tools may be useful in one's attempt to reach intelligent conclusions in real-world settings. The focus is on the normal random variable, descriptive statistics, sampling distributions, and the frameworks of estimation and hypothesis testing, particularly as they apply to inference for unknown population means and proportions in the one- and two-sample settings.

**Prerequisite(s):** MSD 105 or equivalent.

### MTH 120 Introduction to Applied Statistics 3 Credits

Collection and presentation of data. Measures of location and variation, sampling theory, hypothesis testing, confidence intervals, t-tests, chi-square tests, regression, and correlation. Emphasizes practical applications. Not open to business administration, chemistry, environmental, geosciences, marine sciences, math or liberal studies: marine ecological or environmental emphasis majors.

**Prerequisite(s):** MTH 102 or MTH 105.

### MTH 210 Calculus I 4 Credits

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

**Prerequisite(s):** Math SAT 650 or higher or Math ACT score of 28 or higher or successful completion of MTH 105.

### PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

**Prerequisite(s):** grade of "C" in PSY 105.

## Global Supply Chain Management

### Program Overview

Rider's award-winning global supply chain management program prepares students for one of the most in-demand specializations in today's business world.

Honored as one of the top 25 curriculums of its kind in the nation by research firm Gartner Inc., the GSCM program equips students with the skills and experiences needed for a career in the exciting field of global supply chain management.

Through every phase of a product's life cycle, global supply chain management professionals ensure that customers get the products and services they need and want — faster, better and more cost-effectively — from across town or around the world. They play a critical role to the successful functioning of businesses, healthcare, nonprofit agencies and governments.

## Curriculum Overview

Rider's interdisciplinary global supply chain management program combines theory and practice with hands-on internship and mentoring experiences to provide students with an understanding of the important role of supply chain management in domestic and international business.

Faculty include professors with expertise in supply chain management and logistics, information systems, marketing, international business and management science, as well as supply chain professionals from private industry and non-profits. Students learn the many dimensions of supply chain networks that businesses use to acquire, produce, and deliver goods and services across the global marketplace. They also gain skills that prepare them for success in this fast-growing field

- <sup>1</sup> CIS 185 can be taken in the Fall or Spring of year 1.
- <sup>2</sup> Students may be required to take CMP 115 Intro to Expository Writing based on placement. CMP 115 counts as a 3-credits Free Elective.
- <sup>3</sup> Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.
- <sup>4</sup> Transfer Students can take MGT 336 Career Management (3 credits) as a substitute for the Career Planning sequence.
- <sup>5</sup> Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses or as free electives.

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Total Credit Hours for Graduation		120

<sup>1</sup> Students are required to take 6 credits of International Business Electives which can be fulfilled as major courses or as free elective courses.

<sup>2</sup> This plan assumes the student is taking GSC 399 Co-op. GSCM majors can instead take a 3-credit GSC 491 Internship plus a 3-credit Business Elective. GSCM majors who choose the internship option may have a different 3 year sequence of courses.

Notes:

- Assumes no AP or other credits transferred into Rider University.
- Students are required to take 6 credits of International Business Electives which can be fulfilled as major courses or as free elective courses.

- Business Honors students will have a different sequence.
- Global/Cultural Liberal Arts Elective can be satisfied by courses that are designated as global/cultural, including language courses at the 101-level or above.
- For the Leadership Elective, choose from LDP 398 Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service Learning Through MOB, MGT 355 Team Management, or MGT 363 Management Skills.

## Courses and Descriptions

### GSC 115 Introduction to Global Supply Chain Mgt. 3 Credits

This course introduces students to components of global supply chains and issues of managing the global supply chain. It is designed as a survey course to give first or second year business students a general view of supply chain management at both domestic and international levels, as well as familiarize them with basic concepts and major challenges of supply chain management. Delivery of course material will include lectures and guest speakers from industry, and in-class logistics mini cases.

### GSC 235 Supply Chain External Focus: Customer and Supplier Logistics 3 Credits

This course is a detailed discussion of some of the major issues and components of supply chain management that are mainly external to an organization. In other words, it provides an “outward looking” perspective of supply chain management. Topics to be covered include sourcing, procurement, transportation, customer logistics, and distribution. The linkages to internal issues and components of supply chain will be made.

**Prerequisite(s):** GSC 115.

### GSC 315 International Business Tour 3 Credits

### GSC 345 Customer Focus 3 Credits

Marketing and supply chain management programs are concerned with the creation and delivery of value to customers and organizations. No longer simply the domain of the warehouse manager or logistics director, supply chain management is viewed by most companies as a mission critical element. Marketing focuses on developing an understanding of customers and markets, creating products and services based on that understanding, and communicating and delivering the value added. This course will teach the student the essential role of marketing in all aspects of successful supply chain management - relationship management, technological and financial management - and it will help the student understand the structure, functions, principles and methods employed in discovering and translating consumer needs and wants into product and service specifications, and then transferring these goods and services from producers to consumers or end users.

**Prerequisite(s):** GSC 115 and MKT 200.

### GSC 355 Supply Chain Internal Focus: Firm Operations 3 Credits

This course is a detailed discussion of some of the major issues and components of supply chain management that are mainly internal to an organization. In other words, it provides an “inward looking” perspective of supply chain management. Topics to be covered include: manufacturing, quality, product design, inventory, and warehousing. The linkages to external issues and components of supply chain will be made.

**Prerequisite(s):** GSC 115 and MSD 340.

**GSC 375 Adv.Sem in Global Outsourcing 3 Credits**

The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Various referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.

**Prerequisite(s):** junior standing.

**GSC 385 Management Information Systems for Global Supply Chain Management 3 Credits**

The purpose of this junior level management information systems course is to prepare students for today's dynamic business environment by increasing their understanding of IT-enabled global information processing and management. This course has a specific emphasis on the impact and effective utilization of information systems and technology for the global supply chain. Students will gain a solid understanding of the value of business process integration through a combination of conceptual learning, business process analysis, and collaborative decision-making. This will be facilitated through hands-on experience with SAP ERP and analytical software as well as Microsoft Excel. GSC 385 is required for the Global Supply Chain Management major and can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

**Prerequisite(s):** CIS 185 and junior standing.

**GSC 399 GSC Co-op Program 6 Credits**

The co-op program provides students with an opportunity to work full-time in an organization and apply what they have learned in their global supply chain and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first-step before they hire full-time employees. Eligible students include junior and senior global supply chain management majors with a minimum GPA of 3.0. The six credits are intended to be used as business electives, but it is also possible for them to be used as a combination of business and free electives.

**Prerequisite(s):** GSC 115 plus one additional course within the global supply chain management major, and permission of instructor.

**GSC 445 Supply Chain Strategy and Design 3 Credits**

This course introduces the student to the concepts and techniques necessary to design and operate global supply chains. It covers some of the strategic issues of managing a global supply chain and emphasizes the importance of understanding the organization, its value chain, industry, competitors, suppliers, and customers in a global framework. The course covers various strategies as well as different supply chain design models and approaches for efficient and effective supply chain operation.

**Prerequisite(s):** GSC 235 and GSC 355.

**GSC 490 The GSC Consulting Elective 3 Credits**

This special topics Independent Research and Study course is being offered during the 2018-2019 academic year. A Global Supply Chain professor will supervise a semester long project in which a team of students completes a consulting project for one or more local firms. The consulting project, which will be determined by the local firm(s),

provides valuable experience for students on the team as they perform analysis of important supply chain and logistics problems that a local firm must address. The work includes analytic and research activities, and culminates in a recommendation on how the firm should address the logistics/supply chain issues that it had engaged the student team to evaluate. This experience also provides valuable lessons on how to work with clients, and how to develop and make presentations to effectively communicate recommendations.

**Prerequisite(s):** GSC 115 and permission of instructor.

**GSC 491 GSC Internship 3 Credits**

The Global Supply Chain Management (GSCM) Program formally sponsors an internship in global supply chain management. The intention of the course is to supplement theoretical foundations and other material introduced in the classroom with an opportunity to work in a sponsoring organization. Through the internship experience, the student will get a chance to see how supply chains are managed and will get a chance to apply supply chain concepts for themselves. If used in place of the co-op, internship credits will count toward GSCM major requirements, but can also be used as a business or free elective.

**Prerequisite(s):** GSC 115 plus one additional course within the GSCM major, and permission of instructor.

## Health Administration

### Program Overview

The **health administration minor** recognizes the diversity of skills required in the health care sector, and allows students from a variety of majors to minor in health care administration. Majors particularly well-suited to health administration are:

- **Sciences** (biology, chemistry, biochemistry, biopsychology, psychology)
- **Social sciences** (economics, sociology, social work, political science)
- **Business** (marketing, management, business administration, human resources management, business economics, finance, management sciences and information systems).

Classes include a diversity of student majors, which allows science, social science and business students to interact and learn alternative points of view. The health administration minor, combined with other initiatives of the integrated science and business curriculum at Rider, place graduates at a strong advantage in the employment marketplace.

### Minor Offered

- Minor in Health Administration

## Courses and Descriptions

### BHP 309 Honors Seminar: Genetic Engineering and the Philosophy of Science 3 Credits

Highlights the different perspectives held by scientists and philosophers regarding current bioethical issues. Topics include classical ethical theory, applied ethics, and basic biology as it relates to topics such as stem cells, cloning, and assisted reproduction. Students will learn how to construct and present rational, objective arguments during class discussions and presentations. At the end of this course, students will have gained a strong perspective both the ethical and biological foundations behind modern "hot- button" topics in genetics.

### BIO 100 Life Science 3 Credits

An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

### BIO 110 Life Science: Inquiry Approach 4 Credits

An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.

**Corequisite(s):** BIO 110L.

### BIO 110L Life Science: Inquiry Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

**Corequisite(s):** BIO 110.

### BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.

**Corequisite(s):** BIO 115L.

### BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

**Corequisite(s):** BIO 115.

### BIO 206 The Pharmaceutical Industry 3 Credits

An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.

**Prerequisite(s):** BIO 100 or BIO 101 or BIO 106 or BIO 108 or BNS 107 or CHE 115.

**BIO 221 Human Anatomy & Physiology I 4 Credits**

A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor. **Corequisite(s):** BIO 221L.

**BIO 221L Human Anatomy & Physiology I Lab 0 Credits**

This lab is a co-requisite and must be taken with the corresponding course. **Corequisite(s):** BIO 221.

**BNS 107 Life Science: Brain and Behavior 3 Credits**

An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

**CHE 115 Chem and Contemporary Society 3 Credits**

Designed to give the nonscientist an appreciation of the role of chemistry in today's world. The approach is conceptual rather than mathematical. Topics include basic principles of chemical theory, energy sources, elementary organic chemistry, drugs, food additives, polymers, chemistry of living systems, inorganic solids in modern technology, and problems involving pollution of the environment. Three hours of lecture per week. This course satisfies the core requirements for education and business majors.

**CHE 118 Exploration of Chemical Principles 4 Credits**

A one-semester introduction to the principles of chemical sciences. Students will utilize inquiry-based learning methods to examine contextual problems as a means to explore introductory models and concepts of chemistry. Students will also gain an understanding of how scientific models are used to explain experimental observations. The laboratory component of this course is designed to provide students with an experimental context within which to develop some of the models described in the classroom. Three hours of lecture and one three-hour lab per week.

**CHE 118L Exploration of Chemical Principles Lab 0 Credits**

This lab is a co-requisite and must be taken with the corresponding course. **Corequisite(s):** CHE 118.

**CHE 120 Principles of Chemistry 3 Credits**

For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.

**Corequisite(s):** CHE 121.

**HTH 205 Introduction to Health Care 3 Credits**

This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

**HTH 336 Economics of Health Care System 3 Credits**

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

**HTH 450 Seminar in Health Research 3 Credits**

Students in the course learn to conduct health administration-related research by engaging in an actual community-based research project. At the beginning of the semester, students are assigned to a health-related community-based organization. As a team, students meet with the client, devise a plan of action, collect and analyze data and other information, and write a report to the client. At the end of the semester, students present their findings to the client.

**Prerequisite(s):** Permission of instructor.

**HTH 491 Health Management Internship 3 Credits**

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance. **Prerequisite(s):** HTH 205; junior or senior standing; and permission of faculty supervisor.

**HTH 315 Health Care Law, Ethics and Policy 3 Credits**

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

**HTH 215 Population Health Care Management 3 Credits**

In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.

**Prerequisite(s):** MSD 201 or MTH 120 or ENV 200 or PSY 201.

**MGT 201 Fund Management & Org Behavior 3 Credits**

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

**Prerequisite(s):** minimum 30 credits completed.

**MKT 200 Marketing Principles 3 Credits**

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

**PSY 220 Abnormal Psychology 3 Credits**

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

**Prerequisite(s):** PSY 100.

**PSY 345 Health Psychology 3 Credits**

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

**Prerequisite(s):** PSY 100.

**PSY 365 Drugs and Human Behavior 3 Credits**

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

**Prerequisite(s):** PSY 100.

**PSY 374 Psychology of the Family 3 Credits**

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

**Prerequisite(s):** PSY 100, PSY 230 or permission of instructor.

**PSY 382 Aging, Brain, and Cognition 3 Credits**

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

**Prerequisite(s):** PSY 100.

## Health Care Management

### Program Overview

The B.S.B.A. in Health Care Management allows students to learn the business of health care – and prepare for a career in America's fastest growing sector. This program allows students to earn a well-rounded business degree from Rider's distinguished AACSB-accredited College of Business Administration, hone their business skills and focus on health care management studies, explore different roles in the complex issues facing health care and benefit from ongoing advice and support from professionally well-connected and experienced faculty.

### Curriculum Overview

The curriculum provides a core education in business combined with critical topics in health care management. The program is designed to provide students with an understanding of both the business and health fields, including a deeper grasp of the legal, ethical, economic, social and managerial issues related to health care.

Faculty include professors with expertise in economics, finance, information systems, law, and marketing.

The courses are designed to provide real-world experiences and the program offers students the opportunity to learn through required participation in one of the following: a semester-long internship, large-data group project for a client and health care marketing courses where students design their own marketing plans.

**Total Credit Hours for Graduation 120**

- <sup>1</sup> CIS 185 can be taken in the Fall or Spring of Year 1.
- <sup>2</sup> Students may be required to take CMP 115 Intro to Expository Writing based on placement. CMP 115 counts as a 3-credit Free Elective.
- <sup>3</sup> Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.
- <sup>4</sup> Transfer students can take MGT 336 Career Management (3 credits) as a substitute for the Career Planning sequence.
- <sup>5</sup> Must complete one of the following Health Care Mgmt electives: HTH 450 Seminar in Economic Research, HTH 491 Health Management Internship, or MKT 380 Health Care Marketing.

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

**Notes:**

- Assumes no AP or other credits transferred into Rider University.
- Students are required to take 6 credits of International Business Electives.
- Business Honors students will have a different sequence.
- Global/Cultural Liberal Arts electives can be satisfied by courses that are designated as global/cultural, including language courses at the 101-level or above.
- For the Leadership Elective, choose from LDP 200 Foundations of Leadership, LDP 220 Service Learning Through Minding Our Bus, LDP 398 The Co-op Experience Seminar, MGT 355 Team Management, or MGT 363 Management Skills.

**Courses and Course Descriptions****BUS 315 Health Care Law, Ethics & Policy 3 Credits**

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

**Prerequisite(s):** 24 credits.

**ECO 336 Economics of Health Care Sys 3 Credits**

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomic tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

**Prerequisite(s):** ECO 201 or HTH 205.

**HTH 201 Excel for Healthcare Management and Administration 1 Credits**

This course is a refresher on Excel designed to fill gaps in knowledge and application of skills for students who are preparing for their internships. Students will review the essentials of Microsoft Excel. Within seven weeks, students will learn to expertly navigate the Excel user interface, perform basic calculations with formulas and functions, professionally format spreadsheets, and create visualizations of data through charts and graphs. This course will provide students with a practical hands-on opportunity that is designed for students to gain the skills necessary to proficiently create pivot tables, analyze data, utilize more advanced Excel data tools, and interpret statistical results.

**HTH 205 Introduction to Health Care 3 Credits**

This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

**HTH 215 Population Health Care Management 3 Credits**

In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.

**Prerequisite(s):** MSD 201 or MTH 120 or ENV 200 or PSY 201.

**HTH 225 Health Care Financing 3 Credits**

The goals of this course are: (1) to provide a description of how Americans pay for health care; (2) to explain how payment arrangements affect the health care system; and (3) to evaluate newly emerging arrangements. Specifically, we will focus on insurance (both public and private) in the United States, provider payment reform, the incentives of the parties in these arrangements and how these incentives impact cost containment in health care.

**Prerequisite(s):** HTH 205 and sophomore standing.

**HTH 365 Health Care Information Systems 3 Credits**

The Electronic Health Record (EHR) is one of the most complex technological projects ever undertaken. EHR involves the shared management, potentially on a global scale, of a variety of private, time-sensitive, multimedia data across activities including capture, processing, storage and access. The purpose of this course is to provide the future Health Administration professional with specifics of the socio-technical issues involved in this effort. The goals of this course are to study data standards used in modern EHR systems, technology platforms used to implement EHR in various types of organizations, data governance and regulations associated with health data, analytics that support quality of care and evidence-based practice.

**Prerequisite(s):** HTH 205; CIS 385 or GSC 385; HTH 215 or CIS 360; and junior standing.

**HTH 491 Health Management Internship 3 Credits**

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.

**Prerequisite(s):** HTH 205; junior or senior standing; and permission of faculty supervisor.

**MKT 380 Health Care Marketing 3 Credits**

The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.

**Prerequisite(s):** MKT 200 or permission of instructor.

**HTH 450 Seminar in Health Research 3 Credits**

Students in the course learn to conduct health administration-related research by engaging in an actual community-based research project. At the beginning of the semester, students are assigned to a health-related community-based organization. As a team, students meet with the client, devise a plan of action, collect and analyze data and other information, and write a report to the client. At the end of the semester, students present their findings to the client.

**Prerequisite(s):** Permission of instructor.

**HTH 490 Independent Study in Health Admin 3 Credits**

An independent study in health administration allows a student to conduct an in-depth exploration of a topic in health administration under the supervision of a faculty member. The project helps develop a student's research and written skills.

**Prerequisite(s):** JR or SR standing, Permission of Instructor.

## Human Resource Management

### Program Overview

Human Resource Management (HRM) professionals perform many vital business activities in organizations. As both private and public sector organizations have become more concerned about such issues as legal compliance, corporate culture, and ensuring employee work behaviors are aligned with strategic objectives, the demand for well-trained HRM professionals has increased greatly.

Practitioners in HRM are involved in a variety of important, interesting, and challenging activities. They establish and implement policies that affect such organizational functions as recruitment, selection, training and development, performance management, compensation and benefits.

Our program has been ranked among the top 20 Human Resource Management programs in the US, and placed as the #3 undergraduate HRM program in New Jersey by College Factual. The Society of Human Resource Management (SHRM) has acknowledged that our curriculum is fully aligned with SHRM's competency model for the HR profession. This connection to the profession, coupled with Rider's engaged learning program, makes Rider a great place to study Human Resource Management.

## Curriculum Overview

Courses in the program include Introduction to Human Resource Management, Introduction to Labor Relations, Employee Selection and Training, Employee Compensation Systems, Employee Engagement, Managing Workforce Diversity, Career Management, Team Management, Management Skills, and more.

## Degree Offered

- B.S.B.A. in Human Resource Management

## Human Resource Management Major Requirements

(21 credits)

Code	Title	Credits
<b>Business Core</b>		
See Business Core Requirements (p. 362)		
MGT 310	Intro to Human Resource Mgmt	3
HRM 315	Employee Selection & Training	3
HRM 316	Employee Compensation Systems	3
MGT 375	International Management	3
Select three of the following, with at least one being an HRM course: 9		
HRM 312	Intro to Labor Relations	
HRM 333	Employee Engagement	
HRM 441	Sel. Topics: Human Res Mgt	
MGT 320	Managing Workforce Diversity	
MGT 346	Negotiation	
MGT 355	Team Management <sup>1</sup>	
MGT 363	Management Skills <sup>1</sup>	
MGT 410	Ethical Management	
HRM 490	Independent Research and Study	
Total Credits		21

<sup>1</sup> Human Resource Management majors have the option of completing MGT 355 Team Management or MGT 363 Management Skills for their major requirements as well as for their Leadership Elective requirement. If a student chooses to count MGT 355 or MGT 363 toward both the major requirements and the Leadership Elective, the student must complete 3 credits of free elective for graduation.

An average of "C" or better is required in the 21 semester credit hours required of the human resource management major. Majors are encouraged to take HRM 491 Internship in Human Res Mgt or HRM 492 Internship in Human Res Mgt as a free elective.

## Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

<sup>1</sup> For the Leadership Elective, choose from LDP 200, LDP 220, LDP 398, MGT 355, or MGT 363. If a Human Resource Management major takes MGT 355 or MGT 363 as their Leadership Elective, they can also count it as a Major Course Elective, and they must take an additional 3-credit Free Elective.

<sup>2</sup> Human Resource Management majors are required to take MGT 310 Intro to Human Resource Management plus 3 additional major requirements and 3 additional major electives. Of the 3 major electives, at least 1 must be from the following list: HRM 312, HRM 333, HRM 441.

<sup>3</sup> Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses (MGT 375) or as free elective courses.

#### Notes:

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.
- Global/Cultural Liberal Arts Elective can be satisfied by courses that are designated as global/cultural, including language courses at the 101-level or above.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448, ECO 450.)

## Courses and Descriptions

### HRM 312 Intro to Labor Relations 3 Credits

This course deals with the relationship of labor unions and management, the fundamentals of collective bargaining, and labor legislation. The structure and growth of unions as well as the relationships and problems that exist among private and public sector organizations, the labor force, and government are surveyed.

**Prerequisite(s):** MGT 310 or permission of instructor.

### HRM 313 Legal Aspects of Human Res Mgt 3 Credits

This course deals with the various laws that affect human resource management, including social insurance, legislation, minimum wage laws, OSHA, ERISA, as well as equal employment opportunity legislation. This course is concerned not only with the provisions of these laws, but also with their constitutionality, their effects, and how they are administered.

**Prerequisite(s):** MGT 310 or permission of instructor.

### HRM 315 Employee Selection & Training 3 Credits

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.

**Prerequisite(s):** MGT 310.

### HRM 316 Employee Compensation Systems 3 Credits

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

**Prerequisite(s):** MGT 310.

### HRM 333 Employee Engagement 3 Credits

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

**Prerequisite(s):** MGT 310.

### HRM 441 Sel. Topics: Human Res Mgt 3 Credits

Deals with one area of study in the field of human resource management such as protective labor legislation, mediation and arbitration, the administration of labor unions, or case problems in human resource management. The topic varies each semester and is announced at the time of registration.

**Prerequisite(s):** MGT 310 or permission of instructor.

### HRM 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or HRM major elective.

**Prerequisite(s):** MGT 310 or permission of instructor.

### HRM 491 Internship 1-4 Credits

Provides the student with the opportunity to supplement and apply human resource management coursework in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing work experiences. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

**Prerequisite(s):** Junior or Senior; Major in human resource management and MGT 310; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

**HRM 492 Internship in Human Res Mgt 3 Credits**

Provides the student with the opportunity to supplement and apply their human resource management classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions. 2.75 GPA overall and 3.0 GPA in the major is required.

**Prerequisite(s):** major in human resource management or management and leadership, and MGT 310; senior status; and permission of instructor.

## Information Systems

### Program Overview

Students with a major in information systems develop a solid understanding of the use, design, development, and management of information systems and information technology. Rider's information systems courses are designed to give students the opportunity to develop and manage a variety of projects that can be applied to real business settings immediately.

Increasingly, organizations that seek individuals with an information systems specialization expect excellent organizational, communication, interpersonal and analytical skills. All information systems students are encouraged to participate in a full semester co-op or summer internship experiences during their junior year.

### Curriculum Overview

The required freshman-level information systems core course trains students to apply practical knowledge in their use of computer-based productivity tools. Core courses also allow students to develop an understanding of enterprise integration applications such as SAP R/3. The courses also explain the value of electronically integrating the major functional areas of an organization in order to facilitate more effective management decision-making.

Students gain an understanding of the enabling information technologies (IT) that organizations use to develop and sustain a strategic and competitive position in the marketplace. Students also learn about the benefits and drawbacks of adopting and using these information technologies.

Students with a major or a minor in information systems will be able to demonstrate their understanding of information technology by applying their technical knowledge and skills to provide a practical solution to a business problem, business need or business opportunity.

Students who satisfactorily complete a minimum of three courses with at least one-third SAP hands-on content in each course have the opportunity to earn the **SAP Student Recognition Award Certificate**. Click here (p. 355) to learn more about this certificate program.

Total Credit Hours for Graduation		120

- <sup>1</sup> CIS 185 can be taken in the Fall or Spring of year 1
- <sup>2</sup> Students may be required to take CMP 115 Intro to Expository Writing based on placement. CMP 115 counts as a 3-credits Free Elective
- <sup>3</sup> Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.
- <sup>4</sup> Transfer Students can take MGT 336 Career Management (3 credits) as a substitute for the Career Planning sequence.

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

- Assumes no AP or other credits transferred into Rider University.
- Students are required to take 6 credits of International Business Electives which can be fulfilled as major courses or as free elective courses.
- Business Honors students will have a different sequence.
- Global/Cultural Liberal Arts Elective can be satisfied by courses that are designated as global/cultural, including language courses at the 101-level or above.
- For the Leadership Elective, choose from LDP 398 Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service Learning Through MOB, MGT 355 Team Management, or MGT 363 Management Skills.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad,

ENT 448 Seminar in Small Business Consulting, ECO 450 Seminar in Economic Research).

## Courses and Descriptions

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

### CIS 185 Information Systems Essentials 3 Credits

This course will enable students to use Microsoft Excel and Access to design and create complex applications to support effective decision making. Students will use Excel to design and create spreadsheets to support business analytics. Access will be used to understand, design, create, and utilize relational databases.

### CIS 200 Application Development with JavaScript 3 Credits

In the early 1990s, Tim Berners-Lee created a set of technologies to allow information sharing at the CERN particle accelerator in Europe. These technologies dramatically changed the face of computing and became what we know today as the Web. Understanding how to develop and manage applications for the Web is a requirement for the information system professional. Because of the ease of development, deployment, maintenance and general scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using HTML and CCS, how to control user interaction with those pages using the JavaScript programming language. The programming basics of variable declaration and usage, program flow of control, function declaration and calling, and object usage and declaration will also be shown. The use of the JQuery Javascript library to ease the development of Web pages will also be shown.

### CIS 220 Application Development with JavaScript and Python 3 Credits

In the early 1990s, a set of network technologies was combined to create a platform for application development. These technologies are now referred to as the Web. Because of the ease of development, deployment, maintenance, and scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. Understanding how to develop and manage applications for the Web is vital for information systems professionals. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using the Hypertext Markup Language (HTML) and Cascading Style Sheets (CSS), and managing user interaction in those pages using the JavaScript programming language. The process of creating dynamic web pages using the PHP programming language on the Web server will also be taught.

**Prerequisite(s):** CIS 200.

### CIS 230 Introduction to Cybersecurity 3 Credits

This course introduces students to cybersecurity, the process of securing computers and the information they store. Coverage includes security attacks and attack prevention and mediation, security firewalls, PC and server security, authentication methods and procedures, and network security. Through lecture and hands-on labs students will learn how computer systems can be attacked and how computer professionals can manage the risks and potential damage from these attacks.

### CIS 255 Into to Game Design & Development 3 Credits

The basic concepts, logic, techniques, tools, and vocabulary associated with interactive, digital game and simulation development will be explored through a combination of lectures, discussions, and hands-on learning. Knowledge and skills derived can be applied to a wide variety of business and other organizational settings globally for interactive simulations, games, and education.

### CIS 260 Business Graphics 3 Credits

Basic color theory, typography, and page/slide layout are presented. Students utilize presentation, word processing and photo editing applications to create and edit various documents through hands-on labs and projects.

**Prerequisite(s):** CIS 185 or permission of instructor.

### CIS 270 Computer Networking 3 Credits

This course provides an introduction to business data communications and networking. The Internet and OSI models are discussed. Network technologies include local area networks, backbone, wide area networks, and the Internet. Introduction to network design, security, and network management are also provided.

**Prerequisite(s):** CIS 185.

### CIS 300 Programming with Java 3 Credits

Students will learn the basic concepts of object-oriented programming as contrasted with traditionally structured programming and will develop applications using the Java programming language.

**Prerequisite(s):** CIS 200.

### CIS 309 Data Structures & Cmptr Archit 3 Credits

An introduction to linked lists, stacks, queues, trees, pointers, and sorting and searching algorithms. Students will learn the technical details of data storage and manipulation along with the concepts of program execution, and will use tools such as hex-editors and debuggers.

**Prerequisite(s):** CIS 185 or permission of instructor.

### CIS 315 Integrated Business with SAP 3 Credits

This course provides an introduction to enterprise resource planning (ERP) systems and addresses how integrated information systems improve business operations. Students will learn about functional business areas and business processes, and understand the problems inherent in un-integrated enterprise information systems. Using SAP software and case studies, students will learn how ERP systems are being used to facilitate integrated, real-time management decision making.

**Prerequisite(s):** CIS 185 and ACC 210.

### CIS 319 Computer Forensics 3 Credits

Students will use computers to obtain and analyze evidence found on storage devices such as those confiscated under warrant, and learn how to trace digital activities. Criminal and investigative procedures will be explored in depth.

**Prerequisite(s):** CIS 185.

**CIS 320 Cloud Computing Administration 3 Credits**

Students will learn the process of creating or provisioning a cloud computing environment. Content will include the provisioning of operating system resources in a cloud environment, operating system installation, configuration and maintenance. Virtualization, the process of creating multiple operating system environments on a single piece of hardware will be covered in some detail. Troubleshooting problems in the virtualization environment and in the operating system environment will also be covered. Hands-on labs will be used throughout. Both Windows and Linux operating systems will be used.

**Prerequisite(s):** CIS 185.

**CIS 325 User-Centered Design 3 Credits**

This course introduces students to the design and evaluation of interactive and internet-based devices and systems, including methods to understand user needs and requirements, design and prototype alternative systems, and evaluate system usability. Topics include interaction design, human factors, requirement gathering techniques, protocol analysis, usability testing, and heuristics evaluation.

**Prerequisite(s):** Junior standing.

**CIS 330 Database Systems 3 Credits**

This course involves the study of computer databases. Major topics include relational databases, use of the structured query language (SQL) to query relational databases, and design and maintenance of relational databases.

**Prerequisite(s):** CIS 185.

**CIS 340 Electronic Commerce 3 Credits**

Students will learn about the most current e-commerce technologies and business models through readings, case studies, and hands-on projects. Students will gain experience using business data analytics tools to understand and evaluate the value of data that is generated and collected from various e-commerce platforms on the Internet.

**CIS 350 Practical Business Analytics with Excel 3 Credits**

CIS 350 – Practical Business Analytics with Excel is a required course for the proposed Business Analytics minor. This course will provide the student with an opportunity to gain proficiency in analyzing and visualizing data using Excel. The learning experience includes not only classic tools, such as pivot tables and VLOOKUP, but also more advanced Excel data tools such as building Excel data models, creating data mash ups, and using the Power Pivot add-in. The course also requires students to complete a data analysis project along with a presentation about the business insights drawn from the data analysis results. The project requires students to understand the business problem, identify and apply the appropriate analytic and visualization tools, and communicate the insight in an intuitive and effective manner.

**Prerequisite(s):** CIS 185, MSD 200.

**CIS 360 Data Mining 3 Credits**

This course deals with modern technologies for data analysis. Hands-on exercises for data retrieval, data visualization and predictive analytics will be carried out using up-to-date methodologies and software tools. The full data mining life cycle will be covered from recognizing business problems and opportunities amenable to data mining analysis through deploying and monitoring solutions.

**Prerequisite(s):** CIS 185.

**CIS 370 Systems Analysis and Design Project 3 Credits**

Topics include modeling techniques and methodologies to address the planning, analysis, design, and implementation of high quality systems, delivered on time and within budget. Using rapid application development tools, students will also construct an operational system within the span of a single semester. Issues and tools related to the management of project teams are also discussed.

**Prerequisite(s):** CIS 330.

**CIS 375 Business Process Design for a Global Economy 3 Credits**

The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Various referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.

**Prerequisite(s):** junior standing.

**CIS 377 Risk Management and Compliance for Information Security 3 Credits**

This course will use a holistic approach to examine the management of information security risk in relation to the strategic goals of the business organization. Students taking this course will learn to identify threats, threat agents, potential exploits and the information assets which will be impacted by those exploits. The risk management process will specifically examine threat agents, and the amplifiers, catalysts, and inhibitors to those threats. Using a process which assigns a weight to various threats, and a comprehensive risk analysis model will be developed.

**CIS 385 Management Information Systems 3 Credits**

The course focuses on the management and use of information systems and technology for the strategic and operational advantage of the firm. Students explore the business value of information resources including current communication, database, as well as hardware and software technologies. GSC 385 can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

**Prerequisite(s):** CIS 185 and junior or senior standing.

**CIS 388 Design Thinking 3 Credits**

This undergraduate course on Design Thinking provides students with a framework for dealing with unstructured problems to create innovative business solutions. Students in this course will learn about the complex and iterative process of design thinking and its several phases, including problem finding, observation, visualization and sense making, ideation, prototyping and testing, and explore the value of design thinking for creating business solutions with lasting impact. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

**Prerequisite(s):** JR/SR, 54+ credits, or POI.

**CIS 390 Project Management 3 Credits**

This course introduces students to general project management, the process of organizing resources to achieve business goals. Topics include the identification, approval, analysis, and general management of complex business projects. Project management tools, reports, techniques, and approaches will be covered.

**Prerequisite(s):** CIS 185.

**CIS 399 The Co-Operative Experience 6 Credits**

The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their computer information systems and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Eligible students include junior computer information systems majors with a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in any computer information systems coursework completed prior to submission of the co-op application. Three of the co-op credits can be applied toward the computer information systems major, and three credits can be applied toward business or free elective requirements. Grading is on a pass/fail basis.

**Prerequisite(s):** Completion of two of the three courses: CIS 200, CIS 270, and CIS330.

**CIS 410 Selected Topics in Information Systems 3 Credits**

Information and communication technologies are evolving rapidly and continually. The Special Topics course facilitates the exploration of a selected topic (or combination of topics) that represents a recent technological advance with important and direct implications in the field of computer information systems. Current research, readings, lectures, discussions and/or hands-on computer experience or other appropriate measures will be employed to stimulate student learning.

**Prerequisite(s):** to be determined by instructor.

**CIS 430 Enterprise Integration 3 Credits**

The major focus of this course includes the forces driving enterprise integration as well as the management decisions associated with the design and implementation of enterprise systems. Students will use SAP ERP extensively to configure, build, test, and implement an enterprise system for a real business environment from the ground up.

**Prerequisite(s):** CIS 315.

**CIS 490 Independent Study: Research and Creative Expression 1-4 Credits**

Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

**Prerequisite(s):** permission of instructor.

**CIS 491 Computer Information Systems Internship 3 Credits**

This is an honors course that provides the student with approximately two months of supervised employment with participating companies. Students are given a variety of information technology experiences. They are required to complete a term paper and/or to make an oral presentation to the faculty. Grading is on a pass/fail basis.

**Prerequisite(s):** permission of instructor.

**MSD 104 Intro to Quantitative Methods 3 Credits**

The aim of this course is to give students the preparation in algebra needed for successful completion of other required courses in management sciences and the functional areas of business administration. Topics covered include linear and quadratic equations and functions, systems of linear equations, exponential functions, logarithms, linear inequalities, radicals, percent change, scientific notation and scientific digits.

**MSD 105 Quantitative Methods for Business 3 Credits**

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

**Prerequisite(s):** MSD 104 or a passing grade on the Math Placement Exam.

**MSD 110 Math for Actuarial Science I 3 Credits**

The first of two courses designed to give the actuarial science student the necessary background in calculus. Topics include a brief review of a function, and introduces limits and continuity, the derivative and its applications, implicit differentiation, differentiating an inverse function, differentials, related rates, curve sketching, optimization problems, L'Hopital's rule, and an introduction to the indefinite integral. Fall.

**MSD 111 Math for Actuarial Science II 3 Credits**

A continuation of MSD 110. Topics include the definite integral and the fundamental theorem of calculus, change-of-variable theorems, the area between two graphs, integration by parts, improper integrals, infinite series, partial differentiation of a function of two variables and its optimization applications, and the double integral of a function of two variables.

**MSD 200 Statistical Methods I 3 Credits**

This course is designed to give the student an understanding of continuous random variables, the elements of statistical inference, and an introduction to how these tools may be useful in one's attempt to reach intelligent conclusions in real-world settings. The focus is on the normal random variable, descriptive statistics, sampling distributions, and the frameworks of estimation and hypothesis testing, particularly as they apply to inference for unknown population means and proportions in the one- and two-sample settings.

**Prerequisite(s):** MSD 105 or equivalent.

**MSD 201 Statistical Methods II 3 Credits**

The sequel to Statistical Methods I is designed to prepare the student to be able to recognize a variety of additional common inferential scenarios, select and apply appropriate techniques in their analyses, and be aware of the usefulness of computer packages in performing certain relatively complicated statistical calculations. The course covers the one-way analysis of variance, Chi-square tests for non parametric inferences, and regression analysis. Students are expected to submit, for evaluation, the analysis of a real-world data set.

**Prerequisite(s):** MSD 200.

**MSD 320 Statistics for Risk Modeling I 3 Credits**

This is the first course in a two course sequence to prepare actuarial science students for the Society of Actuaries' (SOA) new exam "Statistics for Risk Modeling." This course (SRM I), together with the second course of the sequence SRM II, cover all the topics in the SOA's proposed syllabus for the exam. The course covers two major topics: (i) Generalized Linear Models, and (ii) Regression-based time series models and forecasting.

**Prerequisite(s):** MSD 201 or MTH 341.

**MSD 325 Statistics for Risk Modeling II 3 Credits**

This course examines the use of applied linear statistical models to adequately describe practical relationships in business and economics. The implementation of a popular statistical computing package to analyze realistic data sets is an important component of the course. Topics include simple and multiple linear regression, model diagnostics and remedial measures, and the analysis of variance.

**Prerequisite(s):** MSD 201 or MTH 341.

**MSD 340 Production and Operations 3 Credits**

This course introduces the concepts and techniques of designing and managing manufacturing and service systems and their operations effectively and efficiently. Major topics include product and process design, facility location, forecasting, aggregate planning, inventory management, supply chain management, project management, just-in-time systems, quality assurance, linear programming, and the transportation problem. Current issues such as productivity, global competitiveness, and quality are also discussed.

**Prerequisite(s):** MSD 105 or MSD 110, MSD 200 or MTH 340, MSD 201 or MTH 341.

**MSD 350 Financial Mathematics 3 Credits**

A thorough treatment of the theory and applications of compound interest. Topics include the measurement of interest, elementary and general annuities, amortization schedules and sinking funds, and bonds and other securities.

**Prerequisite:** MSD 201 or equivalent.

**MSD 490 Independent Research and Study 3 Credits**

Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

**MSD 491 Summer Mgt Sciences Internship 3 Credits**

An honors course that provides the student with approximately two months of supervised employment with participating companies. Students are given a variety of work experiences. They are required to complete a term paper and to make an oral presentation to the faculty. Grading is on a pass/fail basis.

**Prerequisite(s):** Permission of instructor.

## International Business

### Program Overview

The international business co-major is designed to enable students in the College of Business Administration to expand the breadth and depth of their knowledge by combining international business with another business major.

Concurrent business majors include accounting, advertising, business administration, information systems, economics, entrepreneurial studies, finance, global supply chain management, health care management, human resource management, management and leadership, marketing, sport management.

## Curriculum Overview

Students in the international business co-major take four international business elective from a list including such courses as international advertising, international business law, independent study: global business, advanced seminar in global outsourcing, international trade and investment, comparative economic systems, international entrepreneurship, international finance, international management and international marketing.

Students also take an experiential elective such as a global business internship, a global business study tour, independent study or a study abroad program.

## Degree Offered

- B.S.B.A. in International Business

(15 credits)

Code	Title	Credits
<b>International Business Electives</b>		
Select four of the following:		12
BUS 375	International Business Law	
CBA 490	Independent Study	
CIS 375/GSC 375	Adv. Sem in Global Outsourcing	
ECO 305	Internatl Trade and Investment	
ECO 315	Comparative Economic Systems	
ECO 365	Post-Soviet Economy	

ENT 375	International Entrepreneurship	
FIN 308	International Finance	
MGT 375	International Management	
MKT 330	International Marketing	
MKT 369	International Advertising	
SPT 320	Global Business of Sports	
<b>Experiential Elective</b>		
Select one of the following: <sup>1</sup>		3
BUS 492	Global Business Internship	
CBA 315	International Business Tour	
CBA 316/IND 316	Nature's Business	
CBA 317	Emerging Nations Study Tour	
CBA 490	Independent Study	
GSC 315	International Business Tour	
IND 210	Global Encounters: Special Education Abroad: A Comparative Experience	
MUS 312	The Arts Abroad	
POL 295	Special Topics in Political Science	
Total Credits		15

<sup>1</sup> A semester-long study abroad program may be used to count toward this requirement.

<sup>2</sup> International Business majors who use IND 210 to fulfill the List B Experiential requirement cannot count IND 210 towards the Global Cultural Liberal Arts requirement.

## Liberal Arts

(6 credits)

Two courses (6 credits) chosen from a list of approved international liberal arts electives (can be applied to the Foreign Language minor).

### Optional Addition—Foreign Language Minor

Total of six courses (18 credits) in a foreign language.

International Liberal Arts Electives include courses in the humanities, social sciences and foreign languages:

Code	Title	Credits
CHI 307	Images of Women in Chinese Literature and Film	3
CHI 310	Chinese Culture and Civilization	3

## Courses and Descriptions

### BUS 375 International Business Law 3 Credits

This course considers the impact of international organizations and treaties on global business and examines the various methods of international dispute resolution. Important legal and ethical issues related to conducting business overseas are discussed including the topics of labor and employment rights, environmental law, and intellectual property.

**Prerequisite(s):** 54 credits.

### ECO 305 Internatl Trade and Investment 3 Credits

Studies the theory, institutions, and structures underlying the international flow of trade and investment. Topics are: the theory of international trade; balance of payment analysis; the international monetary system; adjustment to balance of payment disequilibrium; regional economic integration; the economic effects of trade restrictions; and trade and foreign investment problems of developing nations.

**Prerequisite(s):** ECO 200 and ECO 201.

### ECO 315 Comparative Economic Systems 3 Credits

Provides a conceptual framework for classifying and comparing economic systems. Presents theory of the capitalist market economy and case studies of the U.S., Japanese, French, and Swedish economies. Examines theory of the centrally planned economy, its transition, and case studies of the Soviet and its successor states, Chinese, and East European economies. Case studies are necessarily limited, concentrating on selected topics, such as transition strategies, industrial policy, etc.

**Prerequisite(s):** ECO 200 and ECO 201.

### ECO 365 Post-Soviet Economy 3 Credits

Studies the contemporary post-Soviet economic system, with emphasis on institutions, policies and issues related to business opportunities in this area. Topics covered include the historic, geographic, political, and cultural setting, planning and plan implementation in the traditional system, current reforms and prospects for the future, with special reference to the foreign trade institutions and experience of foreign firms doing business in the post-Soviet Union and Eastern European countries.

**Prerequisite(s):** ECO 200 and ECO 201 or permission of instructor.

### ENT 375 International Entrepreneurship 3 Credits

Students will learn how new or small ventures enter international markets. Requirements include developing a case about starting or running a venture in a single country of the student's choice.

**Prerequisite(s):** MGT 201 and junior standing.

### FIN 308 International Finance 3 Credits

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

**Prerequisite(s):** FIN 220.

### MGT 375 International Management 3 Credits

This course explores the ways in which culture impacts management practices and organizational behavior and dynamics. Topics include cross cultural communication, expatriate selection and training, leading and motivating cross cultural teams, developing organizational strategies to compete in a global market place, international business ethics, and current topics.

**Prerequisite(s):** MGT 201.

### MKT 330 International Marketing 3 Credits

This course examines the global marketplace and the complexities of its environmental influences, and necessary adaptations in formulating the strategies for product, pricing, promotion, channel and supply chain management.

**Prerequisite(s):** MKT 200.

### MKT 369 International Advertising 3 Credits

This course introduces students to the general landscape of international advertising with emphasis on understanding the opportunities and challenges entailed in international advertising management. The course will cover the subject from three aspects, including the international advertising environment, the international advertising industry, and international advertising strategies.

**Prerequisite:** MKT 200 or permission of instructor.

## Leadership Development Program / Certificate in Leadership

### Overview

The Leadership Development Program (LDP), housed within the Center for the Development of Leadership Skills, is a certificate bearing program that is open to undergraduate students of all majors at the University. The LDP is designed to create confident leaders by combining traditional academic learning with intensive skill training and supervised leadership experience through co-curricular activities, experiential learning, fieldwork, and community service.

The three components of the program (academic, experiential, and practical) apply knowledge and skills that are strengthened with "hands-on" participation in leadership and team environments. Through coaching and training, our students reinforce their leadership and interpersonal skills with team building, influence, and communication exercises throughout their time at Rider.

To become a member of the Leadership Development Program, interested undergraduate students must apply and be accepted. LDP members have from the time they are accepted to the time they graduate Rider to complete the requirements for the *Certificate in Leadership*, which is noted officially on each student's transcript.

To learn more about the Leadership Development Program and apply for membership, please visit the Leadership Development Program (<http://www.rider.edu/academics/colleges-schools/college-business-administration/centers-excellence/center-development-leadership-skills/leadership-development-program>) website.

## Program Requirements

The Leadership Development Program at Rider is a University-wide program that is open to undergraduate students of all majors. Upon successful completion of the requirements listed below, students will obtain a Leadership Certificate upon graduation from Rider.

All LDP members must maintain at least a 2.5 cumulative grade point average. Applicants with a cumulative GPA of 2.5 or less will not be considered for membership into the LDP.

Code	Title	Credits
<b>Academic Component</b>		
LDP 200	Foundations of Leadership <sup>1</sup>	3
	One Ethics or Multicultural Studies elective <sup>1,2</sup>	3
<b>Experiential Component</b>		
	Three Leadership for Change Seminars	
<b>Practical Component</b>		
	Leadership Practicum <sup>3</sup>	
<b>Event/Meeting Requirements (per academic year in the program)</b>		
	One career development workshop	
	One LDP-sponsored or endorsed program/workshop	
	One LDP general member meeting	

<sup>1</sup> Grade earned must be a "B-" or better.

<sup>2</sup> For a list of courses which satisfy this requirement please see Ethics/Multicultural Courses (<http://www.rider.edu/academics/colleges-schools/college-business-administration/centers-excellence/center-development-leadership-skills/leadership-development-program/ethics-multicultural-courses>).

<sup>3</sup> The Leadership Practicum consists of 200 supervised study units of actual leadership experience in clubs, organizations, internships, field work, community service, or other similar leadership activities.

### LDP 200 Foundations of Leadership 3 Credits

This course provides students with a working model of leadership to guide their personal leadership development. It also exposes students to insights about leadership from respected commentators, scholars, and practitioners. Finally, it provides students with an opportunity to actively "do" leadership through experiential learning activities.

## Legal Studies

### Program Overview

The Legal Studies minor provides students with an in-depth knowledge and understanding of the nature and development of law, legal institutions and processes, and the relationship ethical and social issues in the business world. Courses in the program include a wide spectrum of academic departments and programs so students may

benefit from studying law from diverse perspectives. Students can focus their course of study around their specific career goals by completing the required courses and selecting from a range of elective courses within the program. In addition, the Legal Studies minor can often be combined with other major and minor programs.

Business majors can double count a maximum of 2 courses toward another program.

## Courses and Descriptions

### **BUS 210 Intro to Law: Contracts 3 Credits**

An introduction to the origin of current law, with emphasis on the development of business law, students are exposed to legal terminology and acquainted with the system of application of rules of law to actual situations. The laws of contracts, particularly common-law developments, are considered in great detail.

### **BUS 211 Commercial Law 3 Credits**

The law as related to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code is considered in depth. Warranties, guarantees, remedies, and product liability are explored. The laws of bankruptcy and insurance are also considered.

**Prerequisite(s):** BUS 210.

### **BUS 214 Advanced Business Law 3 Credits**

This course provides students with an introduction to the fundamentals of individual and organizational forms of doing business. The laws governing agency, partnerships, corporations, and the purchase and sale of securities will be explored. The legal consequences of the relationships, and the rights and duties of the parties and entities will be discussed, as will the rules of law governing real, personal, and intellectual property, including the transfer of title to real property, the various types of bailments, the landlord-tenant relationship, and the laws concerning wills, trusts, and estates. The concerns of businesses that compete in the global environment through the study of international law will also be discussed. This course replaces the property (BUS 213) and business associations (BUS 212) courses; you may not take this course if you have taken either of these courses.

**Prerequisite(s):** BUS 210.

### **BUS 300 The Legal and Ethical Environment of Business 3 Credits**

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

**Prerequisite(s):** 54 credits.

### **BUS 315 Health Care Law, Ethics & Policy 3 Credits**

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

**Prerequisite(s):** 24 credits.

### **BUS 375 International Business Law 3 Credits**

This course considers the impact of international organizations and treaties on global business and examines the various methods of international dispute resolution. Important legal and ethical issues related to conducting business overseas are discussed including the topics of labor and employment rights, environmental law, and intellectual property.

**Prerequisite(s):** 54 credits.

### **BUS 444 Selected Topics Business Policy 3 Credits**

The study of a selected topic of contemporary interest related to one or more of the following: strategic management, business law, business ethics, social responsibility, legal environment of business. Readings, research, lectures, discussions, and other methods will be used.

**Prerequisite(s):** to be determined by instructor.

### **COM 301 Communication Law 3 Credits**

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

### **HIS 301 Constitutional History of U.S. 3 Credits**

Surveys the English, Colonial, and Confederation backgrounds of American law and constitutionalism; the framing, adoption, and implementation of the Federal Constitution and its later development; the role of law in the nation's history; the changing interpretations of federalism; the growth of judicial review; and the increasing role of the Supreme Court.

### **HRM 312 Intro to Labor Relations 3 Credits**

This course deals with the relationship of labor unions and management, the fundamentals of collective bargaining, and labor legislation. The structure and growth of unions as well as the relationships and problems that exist among private and public sector organizations, the labor force, and government are surveyed.

**Prerequisite(s):** MGT 310 or permission of instructor.

### **LAW 305 Trial Advocacy 3 Credits**

Students will apply fundamental legal concepts and rules of evidence to specific cases. By engaging in trial simulations, students will evaluate various forms of evidence, identify legal principles and evidentiary rules that impact a criminal trial, learn about trial procedures, pursuit of case theories, and witness, exhibit and jury selection.

### **LAW 308 Conflict & Conflict Resolution 3 Credits**

Focuses on understanding the meaning of conflict and strategies for its resolution. The course examines the ways conflict functions in various social contexts including professional, community, family, education, and international relations. Traditional models of adjudication will be compared to alternative forms of dispute resolution. Students will be introduced to research on the practice and effectiveness of various forms of conflict and conflict resolution. Students will participate in various class exercises, including role-plays, simulations, and case studies.

### **LAW 310 Cyberspace Law and Policy 3 Credits**

Explores the legal and policy concerns raised by the Internet, nationally and globally. The course considers issues of legal regulation of the Internet, and consider the debate about whether cyberspace can or should be regulated. Attention will be given to the applicability of principles of law and models of regulation. Topics addressed will include jurisdiction, freedom of expression, intellectual property, privacy protection, safety concerns, equal access, electronic commerce, and computer crime.

### **LAW 355 Sports and the Law 3 Credits**

Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. Note: This course is cross-listed as SPT 355. Students may not get credit for both LAW 355 and SPT 355.

**LAW 450 Law & Justice Senior Seminar 3 Credits**

Draws on and develops students' knowledge and understanding of law and legal institutions and applies it to a specific legal topic, method, institution, or controversy. Topics will vary. Students explore the social, political, ethical, and economic issues relevant to the topic. Students will be expected to contribute to seminar discussions and to complete projects related to the seminar theme. Required for seniors in law and justice minor and open to others by permission of the Director of the Law and Justice Program.

**LAW 490 Independent Study: Research and Creative Expression 1-4 Credits**

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

**LAW 491 Internship in Law and Justice 1-4 Credits**

Provides supervised work experience in an institution, office, or agency related to law or law enforcement, such as courts, prosecutor/defense attorney offices, private law offices, state agencies, and local police departments. Students are expected to apply and broaden the knowledge obtained from law and justice minor courses to their fieldwork experience.

**Prerequisite(s):** 2.75 GPA and permission of the Director of the Law and Justice program.

**POL 300 U.S. Constitutional Law 3 Credits**

The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as HLS 300. Students may not get credit for both HLS 300 and POL 300.

## Management and Leadership

### Program Overview

The manager's job is fast-paced and requires the ability to make decisions and facilitate the work of others. The management and leadership major gives students the knowledge and skills they need to compete in a rapidly changing global marketplace. Firms of all sizes and in all fields need good managers who know how to motivate subordinates, manage teams, resolve conflicts, and lead by example. Businesses want new employees who can handle themselves as subordinates, supervisors, and team members. Whether students are looking for a position with a medium to large organization or thinking of starting companies of their own, the management and leadership major provides the knowledge and skills they will need to be successful.

### Curriculum Overview

Courses in the program include Team Management, Management Skills, Introduction to Human Resource Management, Managing Workforce Diversity, Ethical Management, Small Business Management, Negotiation, International Management, Advanced Leadership, and more.

International Business Elective <sup>1</sup>	3
Semester Credit Hours	
15	
Total Credit Hours for Graduation	
120	

<sup>1</sup> Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses (MGT 375 International Management) or as free elective courses.

<sup>2</sup> The Leadership Elective requirement is not listed because MGT 355 Team Management and MGT 363 Management Skills (required for the Management major) both satisfy the Leadership Elective requirement. An additional 3-credit free elective has been added.

#### Notes:

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.
- Global/Cultural Liberal Arts Elective can be satisfied by courses that are designated as global/cultural, including language courses at the 101-level or above.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448, ECO 450.)

#### **MGT 201 Fund Management & Org Behavior 3 Credits**

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored. **Prerequisite(s):** minimum 30 credits completed.

#### **MGT 310 Intro to Human Resource Mgmt 3 Credits**

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

**Prerequisite(s):** MGT 201 or PSY 210.

#### **MGT 320 Managing Workforce Diversity 3 Credits**

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves.

Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.

**Prerequisite(s):** MGT 201 or PSY 210.

**MGT 329 Research Methods in Organizational Psychology 4 Credits**

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

**MGT 329L Research Methods: Org Psy Lab 0 Credits**

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

**MGT 336 Career Management 3 Credits**

How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this course. The meaning of work and the development of careers are discussed, and students undertake self-assessment for the purpose of career planning. Careers are examined in the context of important changes occurring today in the world of work. The impact of the executive, organizational counselors and trainers, and the educational system upon the development of human potential is examined, along with the techniques for human resource planning and development.

**Prerequisite(s):** MGT 201 or permission of instructor.

**MGT 346 Negotiation 3 Credits**

The purpose of this course is first, to explore the major concepts and theories behind effective negotiating practices and second, to develop negotiating skills applicable to a wide range of contexts. A knowledge of negotiation is a crucial requirement for anyone interested in a business career since it is a common mechanism for implementing change and for resolving conflict in the workplace. Topics will include two-party negotiations, power and politics, mediation, arbitration, and collective bargaining. A variety of teaching techniques will be used including readings, discussion, and role-playing.

**Prerequisite(s):** MGT 201 or permission of the instructor.

**MGT 355 Team Management 3 Credits**

This course prepares students to work in organizations that use teams as an integral part of their functioning—an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

**Prerequisite(s):** MGT 201 or PSY 210.

**MGT 363 Management Skills 3 Credits**

The focus of this course is on specific skills necessary for success in a management role. These skills include leading, communicating effectively, delegating, conflict and time management and motivating others. Students will have opportunities to practice skills and to apply their knowledge to business cases.

**Prerequisite(s):** MGT 201 or permission of instructor.

**MGT 375 International Management 3 Credits**

This course explores the ways in which culture impacts management practices and organizational behavior and dynamics. Topics include cross cultural communication, expatriate selection and training, leading and motivating cross cultural teams, developing organizational strategies to compete in a global market place, international business ethics, and current topics.

**Prerequisite(s):** MGT 201.

**MGT 410 Ethical Management 3 Credits**

Managers today face a broad range of ethically challenging situations. This course will help students to confront and analyze ethical dilemmas effectively in the workplace. Cases, simulations, hands-on content will engage students with the material, and will generate robust class discussion.

**Prerequisite(s):** Completion of MGT 201 and Leadership Requirement course.

**MGT 421 Sel Topics:Mgt & Organztn Behv 3 Credits**

The seminar focuses on an area of study announced at the time of registration (students should check the registration material). Examples of possible topics are: leadership, motivation, and organizational behavior research. Prerequisites vary according to the topic and are listed in the registration material.

**Prerequisite(s):** MGT 201 or permission of instructor.

**MGT 450 Advanced Leadership 3 Credits**

Leadership is the ability to influence a group of people towards a goal. In this course, students will increase their own leadership capacities so that they can become effective leaders of organizations and teams. They will integrate what they have learned from their experience and other coursework with diverse reading and writing assignments and team projects as they explore complex leadership issues related to vision, communication, motivation, ethics, team dynamics, power, and change management.

**Prerequisite(s):** MGT 201; Leadership elective (LDP 200, LDP 220, LDP 398, MGT 355, MGT 363).

**MGT 490 Independent Research and Study 1-4 Credits**

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

**Prerequisite(s):** MGT 201 or permission of instructor.

**MGT 491 Intern Management/Org Behavior 3 Credits**

Provides the student with the opportunity to supplement and apply their management and leadership classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

**Prerequisite(s):** major in management and leadership or human resource management and MGT 363, or senior status; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

# Management and Leadership/Human Resource Management Double Major

## Program Overview

Rider's management and leadership major gives students the knowledge and skills they need to compete in a rapidly changing global marketplace. Whether students are looking for a position with a medium to large organization or thinking of starting companies of their own, the management and leadership major provides the knowledge and skills they will need to be successful.

Human Resource Management (HRM) professionals are vital to organizations. With private and public-sector organizations becoming more concerned with issues such as legal compliance, corporate culture and ensuring employee work behaviors are aligned with strategic objectives, the demand for well-trained HRM professionals is constantly growing. They establish and implement policies that affect such organizational functions as recruitment, selection, training and development, performance management, compensation and benefits.

## Curriculum Overview

### Management and Leadership

Rider's management and leadership major opens the possibility of becoming a manager and leader in any industry or field. Businesses want their new employees to handle themselves as subordinates, supervisors and team members. Our management and leadership major provides hands-on training in these people skills. The major also provides students with a comprehensive understanding of management theories, so that students don't have to learn what works and what doesn't by trial-and-error on-the-job.

### Human Resource Management

Human resource management professionals establish and implement policies that influence recruitment, selection, training and development of employees. They also work in areas of development, performance management, compensation, and benefits. HRM professionals may be involved with human resource planning, job design and developing and implementing strategy.

Our HRM program has been ranked among the top 20 Human Resource Management programs in the US, and placed as the #3 undergraduate HRM program in New Jersey by College Factual. The Society of Human Resource Management (SHRM) has acknowledged that our curriculum is fully aligned with SHRM's competency model for the HR profession. This connection to the profession, coupled with Rider's engaged learning program, makes Rider a great place to study Human Resource Management.

The department majors are valuable for students who want to pursue graduate studies in HRM, management, law and psychology. The majors may be taken alone, together or in combination with another major offered by the College of Business Administration.

## Degree Offered

- B.S.B.A. in Management and Leadership
- B.S.B.A. in Human Resource Management

#### HRM 312 Intro to Labor Relations 3 Credits

This course deals with the relationship of labor unions and management, the fundamentals of collective bargaining, and labor legislation. The structure and growth of unions as well as the relationships and problems that exist among private and public sector organizations, the labor force, and government are surveyed.

**Prerequisite(s):** MGT 310 or permission of instructor.

**HRM 313 Legal Aspects of Human Res Mgt 3 Credits**

This course deals with the various laws that affect human resource management, including social insurance, legislation, minimum wage laws, OSHA, ERISA, as well as equal employment opportunity legislation. This course is concerned not only with the provisions of these laws, but also with their constitutionality, their effects, and how they are administered.

**Prerequisite(s):** MGT 310 or permission of instructor.

**HRM 315 Employee Selection & Training 3 Credits**

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.

**Prerequisite(s):** MGT 310.

**HRM 316 Employee Compensation Systems 3 Credits**

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

**Prerequisite(s):** MGT 310.

**HRM 333 Employee Engagement 3 Credits**

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

**Prerequisite(s):** MGT 310.

**HRM 441 Sel. Topics: Human Res Mgt 3 Credits**

Deals with one area of study in the field of human resource management such as protective labor legislation, mediation and arbitration, the administration of labor unions, or case problems in human resource management. The topic varies each semester and is announced at the time of registration.

**Prerequisite(s):** MGT 310 or permission of instructor.

**HRM 490 Independent Research and Study 1-4 Credits**

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or HRM major elective.

**Prerequisite(s):** MGT 310 or permission of instructor.

**HRM 491 Internship 1-4 Credits**

Provides the student with the opportunity to supplement and apply human resource management coursework in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing work experiences. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

**Prerequisite(s):** Junior or Senior; Major in human resource management and MGT 310; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

**HRM 492 Internship in Human Res Mgt 3 Credits**

Provides the student with the opportunity to supplement and apply their human resource management classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions. 2.75 GPA overall and 3.0 GPA in the major is required.

**Prerequisite(s):** major in human resource management or management and leadership, and MGT 310; senior status; and permission of instructor.

**MGT 201 Fund Management & Org Behavior 3 Credits**

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

**Prerequisite(s):** minimum 30 credits completed.

**MGT 310 Intro to Human Resource Mgmt 3 Credits**

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

**Prerequisite(s):** MGT 201 or PSY 210.

**MGT 320 Managing Workforce Diversity 3 Credits**

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves.

Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.

**Prerequisite(s):** MGT 201 or PSY 210.

**MGT 329 Research Methods in Organizational Psychology 4 Credits**

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

**MGT 329L Research Methods: Org Psy Lab 0 Credits**

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

**MGT 336 Career Management 3 Credits**

How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this course. The meaning of work and the development of careers are discussed, and students undertake self-assessment for the purpose of career planning. Careers are examined in the context of important changes occurring today in the world of work. The impact of the executive, organizational counselors and trainers, and the educational system upon the development of human potential is examined, along with the techniques for human resource planning and development.

**Prerequisite(s):** MGT 201 or permission of instructor.

**MGT 346 Negotiation 3 Credits**

The purpose of this course is first, to explore the major concepts and theories behind effective negotiating practices and second, to develop negotiating skills applicable to a wide range of contexts. A knowledge of negotiation is a crucial requirement for anyone interested in a business career since it is a common mechanism for implementing change and for resolving conflict in the workplace. Topics will include two-party negotiations, power and politics, mediation, arbitration, and collective bargaining. A variety of teaching techniques will be used including readings, discussion, and role-playing.

**Prerequisite(s):** MGT 201 or permission of the instructor.

**MGT 355 Team Management 3 Credits**

This course prepares students to work in organizations that use teams as an integral part of their functioning—an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

**Prerequisite(s):** MGT 201 or PSY 210.

**MGT 363 Management Skills 3 Credits**

The focus of this course is on specific skills necessary for success in a management role. These skills include leading, communicating effectively, delegating, conflict and time management and motivating others. Students will have opportunities to practice skills and to apply their knowledge to business cases.

**Prerequisite(s):** MGT 201 or permission of instructor.

**MGT 375 International Management 3 Credits**

This course explores the ways in which culture impacts management practices and organizational behavior and dynamics. Topics include cross cultural communication, expatriate selection and training, leading and motivating cross cultural teams, developing organizational strategies to compete in a global market place, international business ethics, and current topics.

**Prerequisite(s):** MGT 201.

**MGT 410 Ethical Management 3 Credits**

Managers today face a broad range of ethically challenging situations. This course will help students to confront and analyze ethical dilemmas effectively in the workplace. Cases, simulations, hands-on content will engage students with the material, and will generate robust class discussion.

**Prerequisite(s):** Completion of MGT 201 and Leadership Requirement course.

**MGT 421 Sel Topics:Mgt & Organztn Behv 3 Credits**

The seminar focuses on an area of study announced at the time of registration (students should check the registration material). Examples of possible topics are: leadership, motivation, and organizational behavior research. Prerequisites vary according to the topic and are listed in the registration material.

**Prerequisite(s):** MGT 201 or permission of instructor.

**MGT 450 Advanced Leadership 3 Credits**

Leadership is the ability to influence a group of people towards a goal. In this course, students will increase their own leadership capacities so that they can become effective leaders of organizations and teams. They will integrate what they have learned from their experience and other coursework with diverse reading and writing assignments and team projects as they explore complex leadership issues related to vision, communication, motivation, ethics, team dynamics, power, and change management.

**Prerequisite(s):** MGT 201; Leadership elective (LDP 200, LDP 220, LDP 398, MGT 355, MGT 363).

**MGT 490 Independent Research and Study 1-4 Credits**

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

**Prerequisite(s):** MGT 201 or permission of instructor.

**MGT 491 Intern Management/Org Behavior 3 Credits**

Provides the student with the opportunity to supplement and apply their management and leadership classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

**Prerequisite(s):** major in management and leadership or human resource management and MGT 363, or senior status; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

## Marketing

### Program Overview

A degree in marketing provides students with the knowledge they need to compete in today's global marketplace. Graduates from the marketing program enter the workforce with a strong background in business, a

critical understanding of consumer behavior, ad trends and the know-how needed to reach target audiences and to promote services and products.

## Curriculum Overview

As a marketing major at Rider, students have the choice of pursuing one of five marketing tracks: general marketing, advertising, digital marketing, pharmaceutical and health care marketing, or professional selling. These tracks provide all marketing majors with the foundation of knowledge and skills necessary for a marketing career while offering students the opportunity to focus their curriculum on a path that best suits their career interests and goals.

Possible employment opportunities can be found with profit and non-profit and public or private organizations marketing goods or services to consumers, businesses or other organizations.

<sup>1</sup> BIO 206 can count as a required natural science elective. If you count BIO 206 as a natural science elective, you must complete an additional 3-credit free elective.

### Concentration in Financial Services for Finance (p. 345) or Marketing (p. 345) Majors

(12 credits)

This program is designed for students interested in the many careers requiring knowledge of finance as well as strong marketing skills, including banking, investment banking, and insurance.

The concentration is available to Finance or Marketing majors in CBA. Students majoring in Finance are required to complete 12 credit hours in marketing coursework; and students majoring in Marketing are required to complete 12 credit hours in finance coursework. Finance majors may only select this program as a second concentration after they select a primary concentration such as Private Wealth Management.

#### Finance Majors

-----------------------------------	--	-----

- Marketing majors are required to choose 1 of 5 concentrations. Please refer to the concentration requirements to determine required major courses.
- Assumes no AP or other credits transferred into Rider University.
- Students are required to take 6 credits of International Business Electives. One of the International Business Electives can count in the

major. The 2nd International Business Elective must count as Free Elective only.

- Business Honors students will have a different sequence.
- Global/Cultural Liberal Arts Elective can be satisfied by courses that are designated as global/cultural, including language courses at the 101-level or above.
- For the Leadership Elective, choose from LDP 398 Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service Learning Through MOB, MGT 355 Team Management, or MGT 363 Management Skills.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448 Seminar in Small Business Consulting, ECO 450 Seminar in Economic Research.)

**Courses and Descriptions****MKT 200 Marketing Principles 3 Credits**

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

**MKT 205 Advertising Principles 3 Credits**

Basic theory, functions, principles, and applications of advertising are the focus of this course. The relation of advertising to our economy, the advertising department and the ad agency, selection of media, advertising practices, and the use of research to improve advertising techniques are covered.

**Prerequisite:** MKT 200. Required for advertising majors.

**MKT 250 Retailing Management 3 Credits**

The principles underlying successful retailing are analyzed within the framework of the strategic-planning process. Topics covered include location, merchandise planning, customer service, image, atmosphere, layout, pricing, promotion, personnel and operations management.

**Prerequisite(s):** MKT 200.

**MKT 260 Service Marketing 3 Credits**

Focuses on the unique challenges of managing services and delivering quality service to customers. Emphasis is placed on the total organization, and how effective marketing and customer focus must be coordinated across multiple functions. The course is applicable to service organizations and to organizations that depend on service excellence for competitive advantage. Topics include customer-focused management, and customer satisfaction, retention, lifetime value and profitability. Students will learn to map services, understand customer expectations, and develop relationship marketing strategies.

**Prerequisite(s):** MKT 200.

**MKT 280 Sports Marketing 3 Credits**

The course focuses on the unique challenges of marketing sports at a variety of levels: youth, college, professional, and international. The challenges of attracting and retaining fans and participants as well as of building and maintaining strong brand identity are at the heart of the course content. By evaluating case studies and examining current issues in sports marketing, students will gain an understanding of what it means to be a professional marketer of a sports organization and/or event.

**Prerequisite(s):** MKT 200.

**MKT 310 Business to Business Marketing 3 Credits**

This course examines the business-to-business marketplace, and the planning and control tools used by its entities in managing the product, pricing, promotion, channel and supply chain management strategies.

**Prerequisite(s):** MKT 200.

**MKT 320 Consumer Behavior 3 Credits**

The nature and determinants of consumer behavior are studied, with attention given to the influence of socio-psychological factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumer attitudes, consumption patterns, and purchasing behavior.

**Prerequisite(s):** MKT 200; Required for advertising majors.

**MKT 330 International Marketing 3 Credits**

This course examines the global marketplace and the complexities of its environmental influences, and necessary adaptations in formulating the strategies for product, pricing, promotion, channel and supply chain management.

**Prerequisite(s):** MKT 200.

**MKT 340 Personal Selling 3 Credits**

Examines persuasive techniques utilized in sales presentations conducted on a person-to-person basis. Major course emphasis is on developing effective selling techniques; understanding the company, its products and the role of the salesperson in implementing product/market strategies; understanding the customers and the selling environment; application of effective sales presentation techniques; recognizing selling opportunities and careers.

**Prerequisite(s):** MKT 200.

**MKT 345 Customer Focus 3 Credits**

Marketing supply chain management programs are concerned with the creation and delivery of value to customer and organizations. No longer simply the domain of the warehouse manager or logistics director, supply chain management is viewed by most companies as a mission-critical element. Marketing focuses on developing an understanding of customers and markets, creating products and services based on that understanding, and communicating and delivering the value added. This course will teach the student the essential role of marketing in all aspects of successful supply chain management - relationship management, technological and financial - and it will help the student understand the structure, functions, principles and methods employed in discovering and translating consumer needs and wants into product and service specifications and then transferring these goods and services from producers to consumers or end users.

**Prerequisite(s):** MKT 200 and GSC 115 or permission of instructor.

**MKT 350 Retailing Management 3 Credits**

The principles underlying successful retailing are analyzed within the framework of the strategic-planning process. Topics covered include location, merchandise planning, customer service, image, atmosphere, layout, pricing, promotion, personnel and operations management.

**Prerequisite(s):** MKT 200.

**MKT 366 Marketing Research 3 Credits**

Topics include specific research procedures in gathering, processing, analyzing, and presenting information relevant to marketing problems: advertising planning and effectiveness; product development; distribution channels; sales techniques; consumer behavior; and forecasting. Student learning about research planning, implementation, and interpretation is facilitated by the use of projects or cases.

**Prerequisite(s):** MKT 200; MSD 200, MSD 201; junior standing; Required for marketing and advertising majors.

**MKT 367 Marketing Web Analytics 3 Credits**

This course teaches web analytics through practical applications with a focus on deriving actionable insights. It provides a broad overview of key web analytics strategies, concepts, issues, challenges and tools. Topics covered include: • How to choose a web analytics tool • Metrics and key performance indicators • Best ways to analyze effectiveness of blogs, marketing campaigns, SEO, SEM and emails • How to utilize quantitative, qualitative and competitive tools to derive actionable insights • How to optimize web sites by incorporating testing and experimentation • Analytics in social, mobile and video • Best practices and pitfalls in web analytics

**Prerequisite(s):** MKT 200.

**MKT 369 International Advertising 3 Credits**

This course introduces students to the general landscape of international advertising with emphasis on understanding the opportunities and challenges entailed in international advertising management. The course will cover the subject from three aspects, including the international advertising environment, the international advertising industry, and international advertising strategies.

**Prerequisite:** MKT 200 or permission of instructor.

**MKT 370 Internet Marketing 3 Credits**

This course emphasizes the discipline of internet marketing, including practices of leading online marketing companies, state of the art online research and demonstrates how the Internet is creating value for customers and profits for businesses while also fitting into a firm's complete marketing strategy. This course will provide a strategic and tactical toolkit for the online marketer, help students understand how and why the Internet is changing traditional marketing and allow students to develop the skills, strategies and tactics important to develop successful Internet marketing plans.

**Prerequisite(s):** MKT 200 and CIS 185.

**MKT 375 Digital Advertising and Social Media 3 Credits**

This course surveys the concepts, principles, practices and industry standards of digital advertising, including standard display and rich media advertising, search advertising, email advertising, game advertising, and mobile advertising. It also introduces the strategies and tactics in social media marketing. The course emphasizes a strategic, holistic view of digital advertising and social media as marketing communication tools that are situated in the marketing strategic framework and employed to engage consumers in community building.

**Prerequisite(s):** MKT 200.

**MKT 380 Health Care Marketing 3 Credits**

The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.

**Prerequisite(s):** MKT 200 or permission of instructor.

**MKT 440 Sales Management 3 Credits**

By means of lectures, discussions, and case studies, the field of marketing management is analyzed from the viewpoint of sales executives. The responsibilities for planning and administering personal selling operations are emphasized. Considerable attention is given to other activities for which sales executives may be wholly or jointly responsible, such as decision making on promotion and brand management.

**Prerequisite(s):** MKT 200 and senior standing.

**MKT 444 Spec. Topics Honors: Mkt & Law 3 Credits****MKT 460 Marketing Management Seminar 3 Credits**

This capstone course for marketing majors employs a top management approach to the overall marketing task, including planning, organizing, controlling, and integrating all the activities of the marketing program. Integration of marketing with other operations of the business unit is emphasized. Major problems and current trends are identified and analyzed through case discussion.

**Prerequisite(s):** Marketing major and 15 semester hours of marketing; Required for marketing majors.

**MKT 469 Selected Topics in Marketing 3 Credits**

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision making may be explored. Readings, research, lectures, discussions, or other appropriate methods are employed to stimulate student learning.

**Prerequisite(s):** MKT 200 and senior standing or permission of instructor.

**MKT 490 Independent Research and Study 1-4 Credits**

Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

**MKT 491 Internship-Based Indep Study 3 Credits**

Provides the student an opportunity to supplement and apply classroom work in supervised employment with participating marketing and advertising firms. Requirements include a journal with a log of daily activities, and a project or term paper presented to and evaluated by the internship sponsor. Evaluation will also include a report by the company on the intern's performance. Credits may be used to satisfy business or free elective requirements.

**Prerequisite(s):** permission of instructor.

## Organizational Psychology B.S.B.A.

### Overview

Are you interested in knowing what motivates a person to perform well at a job, or what qualities a company needs to look for to make a great hire? Today's businesses and organizations need professionals who understand human behavior, group dynamics and how to make the

workplace function better. A major in Organizational Psychology from Rider University will help prepare you for a career in one of America's fastest-growing professions.

## Curriculum Overview

Rider University's program is one of just a handful in the nation offering a unique interdisciplinary major that combines business and psychology. This versatile degree can have a real impact on an organization's bottom line by helping to improve employee satisfaction and job performance.

Majors in this program will gain a comprehensive understanding of the important contributions that organizational psychology plays in today's workplace.

The Organizational Psychology program focuses on the behavioral aspects of managing and supervising the human resources of an organization or business. You will learn the key concepts of management and psychology, including perception and attitudes, employee motivation and engagement, and organizational leadership and power — and gain an in-depth understanding of what makes employees and organizations function at their best.

As an Organizational Psychology major, you will:

- Develop a comprehensive understanding of human behavior in work settings;
- Learn how to enhance performance within an organization or business;
- Benefit from networking and gain real-world experience through internships and other professional opportunities.

The U.S. Bureau of Labor Statistics ranks Industrial-Organizational Psychology at the top of its list of 20-fastest growing occupations, with a projected growth rate of 53 percent between now and 2022. Organizational psychologists are in demand because their expertise results in better hires, increased productivity, reduced turnover and lower labor costs. They can work as consultants to organizations, or serve in-house in a variety of jobs, including:

- Human resource officer
- Employee development manager
- Organizational development director
- Quality performance manager
- Organizational psychologist
- Testing specialist
- Compensation and benefits specialist

## Degree Offered

- B.S.B.A. in Organizational Psychology

-----------------------------------	--	-----

- Assumes no AP or other credits transferred into Rider University.
- Students are required to take 6 credits of International Business Electives.

- Business Honors students may have a different sequence.
- Global/Cultural Liberal Arts Electives can be satisfied by courses that are designated as global/cultural, including language courses at the 101-level or above.

**ACC 210 Introduction to Accounting 3 Credits**

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

**ACC 220 Managerial Uses of Accounting 3 Credits**

This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.

**Prerequisite(s):** ACC 210.

**BUS 300 The Legal and Ethical Environment of Business 3 Credits**

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

**Prerequisite(s):** 54 credits.

**BUS 400 Strategic Mgmt and Policy 3 Credits**

This capstone course for seniors in business administration provides a framework for problem identification, analysis, and decision making within the organization. Students are given the opportunity to integrate and apply previously acquired knowledge of accounting, decision sciences, economics, finance, marketing, management, and statistics. Case studies, critical incidents, and other appropriate techniques are utilized.

**Prerequisite(s):** 84 credits, CIS 185, ACC 210, ACC 220, MKT 200, MGT 201, FIN 220, MSD 340, BUS 300, CIS 385 or GSC 385.

**CBA 102 Career Plan & Perspective I 1 Credits**

In this course students will explore their own history, goals and values as input to their definition of success. The course will set the stage for the remainder of students' college career, and will encourage them to draw connections among their career goals, educational performance, extra-curricular experiences, and available resources.

**CBA 202 Career Plan & Perspect II 1 Credits**

In this course, students will build on their CBA 102 self assessments to identify specific occupations that match who they are and where they want to go. The course will provide students with the understanding of the changed nature of the current work and career environment they will be entering when they graduate from Rider. They will acquire career management skills and apply these skills to develop short and long term career goals and plans for achieving them while at Rider. The course will also touch on the intersection of work and family roles.

**Prerequisite(s):** CBA 102.

**CBA 302 Career Plan & Perspect III 1 Credits**

This one credit course will be targeted to second semester sophomores and juniors. In this course, students will build on their CBA 102 and 202 self assessments to develop strategies for a successful job search. The course will provide students with an understanding of the changed nature of the current work and career environment they will be entering when they graduate from Rider. They will acquire career management and job search skills and apply these skills to developing, networks, identify job search resources and enhance resume and interview skills. Students will understand how to research potential employers and translate their experiences into a successful job search strategy.

**Prerequisite(s):** CBA 102 and CBA 202.

**CIS 185 Information Systems Essentials 3 Credits**

This course will enable students to use Microsoft Excel and Access to design and create complex applications to support effective decision making. Students will use Excel to design and create spreadsheets to support business analytics. Access will be used to understand, design, create, and utilize relational databases.

**CIS 385 Management Information Systems 3 Credits**

The course focuses on the management and use of information systems and technology for the strategic and operational advantage of the firm. Students explore the business value of information resources including current communication, database, as well as hardware and software technologies. GSC 385 can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

**Prerequisite(s):** CIS 185 and junior or senior standing.

**CMP 120 Expository Writing 3 Credits**

Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. The second of the department's three-course composition sequence, This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

**Prerequisite(s):** SAT EBRW score greater than or equal to 550 and SAT or CMP 115 with a minimum grade of D.

**CMP 125 Research Writing 3 Credits**

Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

**Prerequisite(s):** CMP 120 or BHP 100.

**COM 290 Professional/Strategic Speech 3 Credits**

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

**ECO 200 Principles of Macroeconomics 3 Credits**

A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.

**Prerequisite(s):** Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

**ECO 201 Principles of Microeconomics 3 Credits**

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

**Prerequisite(s):** Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

**FIN 220 Introduction to Finance 3 Credits**

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

**Prerequisite(s):** ACC 210 and ECO 201.

**HRM 315 Employee Selection & Training 3 Credits**

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.

**Prerequisite(s):** MGT 310.

**HRM 316 Employee Compensation Systems 3 Credits**

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

**Prerequisite(s):** MGT 310.

**HRM 333 Employee Engagement 3 Credits**

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

**Prerequisite(s):** MGT 310.

**MGT 201 Fund Management & Org Behavior 3 Credits**

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

**Prerequisite(s):** minimum 30 credits completed.

**MGT 310 Intro to Human Resource Mgmt 3 Credits**

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

**Prerequisite(s):** MGT 201 or PSY 210.

**MGT 320 Managing Workforce Diversity 3 Credits**

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves.

Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.

**Prerequisite(s):** MGT 201 or PSY 210.

**MGT 355 Team Management 3 Credits**

This course prepares students to work in organizations that use teams as an integral part of their functioning-an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

**Prerequisite(s):** MGT 201 or PSY 210.

**MGT 490 Independent Research and Study 1-4 Credits**

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

**Prerequisite(s):** MGT 201 or permission of instructor.

**MKT 200 Marketing Principles 3 Credits**

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

**MSD 105 Quantitative Methods for Business 3 Credits**

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

**Prerequisite(s):** MSD 104 or a passing grade on the Math Placement Exam.

**MSD 200 Statistical Methods I 3 Credits**

This course is designed to give the student an understanding of continuous random variables, the elements of statistical inference, and an introduction to how these tools may be useful in one's attempt to reach intelligent conclusions in real-world settings. The focus is on the normal random variable, descriptive statistics, sampling distributions, and the frameworks of estimation and hypothesis testing, particularly as they apply to inference for unknown population means and proportions in the one- and two-sample settings.

**Prerequisite(s):** MSD 105 or equivalent.

**MSD 201 Statistical Methods II 3 Credits**

The sequel to Statistical Methods I is designed to prepare the student to be able to recognize a variety of additional common inferential scenarios, select and apply appropriate techniques in their analyses, and be aware of the usefulness of computer packages in performing certain relatively complicated statistical calculations. The course covers the one-way analysis of variance, Chi-square tests for non parametric inferences, and regression analysis. Students are expected to submit, for evaluation, the analysis of a real-world data set.

**Prerequisite(s):** MSD 200.

**MSD 340 Production and Operations 3 Credits**

This course introduces the concepts and techniques of designing and managing manufacturing and service systems and their operations effectively and efficiently. Major topics include product and process design, facility location, forecasting, aggregate planning, inventory management, supply chain management, project management, just-in-time systems, quality assurance, linear programming, and the transportation problem. Current issues such as productivity, global competitiveness, and quality are also discussed.

**Prerequisite(s):** MSD 105 or MSD 110, MSD 200 or MTH 340, MSD 201 or MTH 341.

**PSY 100 Introduction to Psychology 3 Credits**

An orientation to psychology, covering major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

**PSY 105 Introduction to Research in Psychology 3 Credits**

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

**Prerequisite(s):** a grade of "C" in PSY 100.

**PSY 215 Personality 3 Credits**

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

**Prerequisite(s):** PSY 100.

**PSY 225 Learning Theory 3 Credits**

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving. Prerequisite(s): PSY 100.

**PSY 240 Social Psychology 3 Credits**

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

**Prerequisite(s):** PSY 100.

**PSY 315 Psychological Tests 3 Credits**

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

**Prerequisite(s):** any statistics course.

**PSY 329 Research Methods in Organizational Psychology 4 Credits**

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

**PSY 400 Senior Seminar 3 Credits**

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional quality writing, oral or multimedia presentations.

# SAP Student Recognition Award Certificate

## Program Overview

As a member of the SAP University Alliances program, Rider's College of Business Administration offers the *SAP Student Recognition Award* certificate to students who satisfactorily complete a minimum of three courses with at least one-third SAP hands-on content in each course. Students who earn the award will demonstrate the depth and breadth of their knowledge using state-of-the-art software, developing valuable skills relevant to their careers and chosen fields.

SAP is the global leader in enterprise application software, with more than 170,000 customers in more than 120 countries. They provide enterprise resource planning (ERP), business intelligence (BI) and related applications and services that enable companies of all sizes and in more than 25 industries. Global demand for certified SAP professionals increases every year. Hit the ground running at companies using SAP software!

Choose three of the following:		
CIS 315	Integrated Business with SAP	
CIS 360	Data Mining	
GSC 385	Management Information Systems for Global Supply Chain Management	

CIS 430 Enterprise Systems Configuratr

Total Credits 9

## Courses and Descriptions

### CIS 315 Integrated Business with SAP 3 Credits

This course provides an introduction to enterprise resource planning (ERP) systems and addresses how integrated information systems improve business operations. Students will learn about functional business areas and business processes, and understand the problems inherent in un-integrated enterprise information systems. Using SAP software and case studies, students will learn how ERP systems are being used to facilitate integrated, real-time management decision making.

**Prerequisite(s):** CIS 185 and ACC 210.

### CIS 360 Data Mining 3 Credits

This course deals with modern technologies for data analysis. Hands-on exercises for data retrieval, data visualization and predictive analytics will be carried out using up-to-date methodologies and software tools. The full data mining life cycle will be covered from recognizing business problems and opportunities amenable to data mining analysis through deploying and monitoring solutions.

**Prerequisite(s):** CIS 185.

### GSC 385 Management Information Systems for Global Supply Chain Management 3 Credits

The purpose of this junior level management information systems course is to prepare students for today's dynamic business environment by increasing their understanding of IT-enabled global information processing and management. This course has a specific emphasis on the impact and effective utilization of information systems and technology for the global supply chain. Students will gain a solid understanding of the value of business process integration through a combination of conceptual learning, business process analysis, and collaborative decision-making. This will be facilitated through hands-on experience with SAP ERP and analytical software as well as Microsoft Excel. GSC 385 is required for the Global Supply Chain Management major and can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

**Prerequisite(s):** CIS 185 and junior standing.

### CIS 430 Enterprise Integration 3 Credits

The major focus of this course includes the forces driving enterprise integration as well as the management decisions associated with the design and implementation of enterprise systems. Students will use SAP ERP extensively to configure, build, test, and implement an enterprise system for a real business environment from the ground up.

**Prerequisite(s):** CIS 315.

## Sales

### Program Overview

The Sales Minor is complementary to a wide range of majors in that it prepares students to effectively and persuasively represent an organization's offerings in negotiation and exchange situations. The employment outlook for sales positions is positive in a variety of industries such as manufacturing, wholesale, insurance, real estate and financial services. The core of the minor establishes a solid base of concepts and skills in sales and negotiation while elective courses allow students to focus on complementary knowledge areas and/or industries.

The minor is available to both business and non-business majors.

### Sales Minor with SAP Student Award Certificate

Code	Title	Credits
Students must take three of the following electives in addition to the three required courses for a total of 18 credits:		
CIS 315	Integrated Business with SAP	
CIS 360	Data Mining	
CIS 430	Enterprise Systems Configuratr	
GSC 385	Management Information Systems for Global Supply Chain Management	

The sales minor is open to all students at the University. For students pursuing a major in the College of Business Administration, no more than two courses in the minor can be double counted as satisfying either core or major requirements.

## Courses and Descriptions

### BUS 210 Intro to Law: Contracts 3 Credits

An introduction to the origin of current law, with emphasis on the development of business law, students are exposed to legal terminology and acquainted with the system of application of rules of law to actual situations. The laws of contracts, particularly common-law developments, are considered in great detail.

### CIS 315 Integrated Business with SAP 3 Credits

This course provides an introduction to enterprise resource planning (ERP) systems and addresses how integrated information systems improve business operations. Students will learn about functional business areas and business processes, and understand the problems inherent in un-integrated enterprise information systems. Using SAP software and case studies, students will learn how ERP systems are being used to facilitate integrated, real-time management decision making.

**Prerequisite(s):** CIS 185 and ACC 210.

### CIS 390 Project Management 3 Credits

This course introduces students to general project management, the process of organizing resources to achieve business goals. Topics include the identification, approval, analysis, and general management of complex business projects. Project management tools, reports, techniques, and approaches will be covered.

**Prerequisite(s):** CIS 185.

### CIS 430 Enterprise Integration 3 Credits

The major focus of this course includes the forces driving enterprise integration as well as the management decisions associated with the design and implementation of enterprise systems. Students will use SAP ERP extensively to configure, build, test, and implement an enterprise system for a real business environment from the ground up.

**Prerequisite(s):** CIS 315.

### FIN 200 Managing Your Money 3 Credits

An introduction to the analysis of a wide range of financial decisions which individuals encounter over their careers and lifetime. Topics include financial goals, tax planning, home ownership versus renting, consumer credit, money management and investments, and managing risk with insurance. This course is open to all Rider students, and it counts as a free elective or a business elective. It cannot be used as finance elective.

### FIN 305 Personal Financial Planning 3 Credits

This course focuses on practical issues and problems involving personal financial budgeting, use of credit, selection of banking services, insurance needs, real estate, investments, tax planning, and retirement planning. An important objective of the course is to provide the student with the tools that are utilized in making personal financial decisions and how to apply those tools for a variety of financial needs.

**Prerequisite(s):** FIN 220.

**GSC 385 Management Information Systems for Global Supply Chain Management 3 Credits**

The purpose of this junior level management information systems course is to prepare students for today's dynamic business environment by increasing their understanding of IT-enabled global information processing and management. This course has a specific emphasis on the impact and effective utilization of information systems and technology for the global supply chain. Students will gain a solid understanding of the value of business process integration through a combination of conceptual learning, business process analysis, and collaborative decision-making. This will be facilitated through hands-on experience with SAP ERP and analytical software as well as Microsoft Excel. GSC 385 is required for the Global Supply Chain Management major and can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

**Prerequisite(s):** CIS 185 and junior standing.

**MGT 346 Negotiation 3 Credits**

The purpose of this course is first, to explore the major concepts and theories behind effective negotiating practices and second, to develop negotiating skills applicable to a wide range of contexts. A knowledge of negotiation is a crucial requirement for anyone interested in a business career since it is a common mechanism for implementing change and for resolving conflict in the workplace. Topics will include two-party negotiations, power and politics, mediation, arbitration, and collective bargaining. A variety of teaching techniques will be used including readings, discussion, and role-playing.

**Prerequisite(s):** MGT 201 or permission of the instructor.

**MKT 260 Service Marketing 3 Credits**

Focuses on the unique challenges of managing services and delivering quality service to customers. Emphasis is placed on the total organization, and how effective marketing and customer focus must be coordinated across multiple functions. The course is applicable to service organizations and to organizations that depend on service excellence for competitive advantage. Topics include customer-focused management, and customer satisfaction, retention, lifetime value and profitability. Students will learn to map services, understand customer expectations, and develop relationship marketing strategies.

**Prerequisite(s):** MKT 200.

**MKT 310 Business to Business Marketing 3 Credits**

This course examines the business-to-business marketplace, and the planning and control tools used by its entities in managing the product, pricing, promotion, channel and supply chain management strategies.

**Prerequisite(s):** MKT 200.

**MKT 320 Consumer Behavior 3 Credits**

The nature and determinants of consumer behavior are studied, with attention given to the influence of socio-psychological factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumer attitudes, consumption patterns, and purchasing behavior.

**Prerequisite(s):** MKT 200; Required for advertising majors.

**MKT 340 Personal Selling 3 Credits**

Examines persuasive techniques utilized in sales presentations conducted on a person-to-person basis. Major course emphasis is on developing effective selling techniques; understanding the company, its products and the role of the salesperson in implementing product/market strategies; understanding the customers and the selling environment; application of effective sales presentation techniques; recognizing selling opportunities and careers.

**Prerequisite(s):** MKT 200.

**MKT 440 Sales Management 3 Credits**

By means of lectures, discussions, and case studies, the field of marketing management is analyzed from the viewpoint of sales executives. The responsibilities for planning and administering personal selling operations are emphasized. Considerable attention is given to other activities for which sales executives may be wholly or jointly responsible, such as decision making on promotion and brand management.

**Prerequisite(s):** MKT 200 and senior standing.

## Sport Management

### Program Overview

The sport management co-major prepares students for a career in one of the world's biggest businesses: the fast-growing multi-billion dollar sport industry. Students gain a competitive edge as they develop a working understanding of the critical role business plays in every facet of sports and sports-related organizations.

This dual major program leads to a Bachelor of Science in Business Administration (B.S.B.A.) degree with two majors, sport management and a second major offered by one of the five departments in the College of Business Administration.

### Curriculum Overview

The sport management co-major is designed to give students a broad-based business education by combining it with another discipline offered by Rider's College of Business Administration. This unique pairing provides students a deeper understanding of the legal, ethical, economic, social and managerial issues related to sports.

The business-based curriculum prepares students for diverse career opportunities in professional sport organizations, college and high school athletic administration, sport governing bodies, event and facility management, marketing firms, media organizations and entrepreneurial ventures.

**Courses and Descriptions****AMS 211 Sports in American Life 3 Credits**

Literary, sociological, and psychological views of sports in 20th-century American life are examined, focusing on sports as a symbol and reflection of our ideals and tensions.

**CBA 315 International Business Tour 3 Credits**

Provides students with the opportunity to observe various international business environments outside of the United States. Students should gain a better appreciation of how culture, history, and politics influence organizational dynamics, business functions, and business customs.

**Prerequisite(s):** Junior or senior standing and permission of instructor.

**COM 347 Sports Communication 3 Credits**

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

**Prerequisite(s):** COM 240 or permission of instructor.

**ECO 326 Economics of Sports 3 Credits**

The overall objective of this course is to deepen student understanding of microeconomic principles by applying microeconomic concepts to the analysis of professional and amateur sports. This course will utilize concepts from many different microeconomic specialties, (primarily Industrial Organization, Labor Economics and Public Finance). The tools from these different microeconomic fields will be used to explain and analyze the operation of professional sports teams and leagues in the U.S. with an emphasis on baseball, football, basketball and hockey. International comparisons will be made between professional sports in the U.S. and the rest of the world. The course will also analyze the not-for-profit sports sector, focusing on college sports and the National Collegiate Athletic Association.

**Prerequisite(s):** ECO 201.

**ENT 210 Sports Entrepreneurship 3 Credits**

Sports Entrepreneurship will introduce students to entrepreneurship in the sports industries as they explore opportunities and challenges for new ventures in this sector. Using an industry's business model, students will identify competitive advantages and understand what is required for startup success.

**GSS 333 Gender and Sport 3 Credits**

Typical thoughts of sport include ticket prices, player salaries, team rosters, and league standings; rarely is it viewed from a gender perspective. This course will go beyond the examination of Title IX to better understand the relationship between masculinity, femininity and sports. This course will examine various aspects of gender and sport, including media and gender representation, race and ethnicity, drugs and violence, men and masculinities, sexualities, policy and politics, the feminist critique of sport, the initiation rites and hazing in college sports, sports wagering, and the internationalization of sport, including but not limited to the Olympics and Paralympics.

**MKT 280 Sports Marketing 3 Credits**

The course focuses on the unique challenges of marketing sports at a variety of levels: youth, college, professional, and international. The challenges of attracting and retaining fans and participants as well as of building and maintaining strong brand identity are at the heart of the course content. By evaluating case studies and examining current issues in sports marketing, students will gain an understanding of what it means to be a professional marketer of a sports organization and/or event.

**Prerequisite(s):** MKT 200.

**PSY 283 Sport Psychology 3 Credits**

This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

**Prerequisite(s):** PSY 100.

**SPT 250 Introduction to the Business of Sports 3 Credits**

This course is designed to introduce the student to the business of sports. Business principles, such as management, marketing, law, finance and economics will be applied to the business of sports. The course will also explore the various career opportunities in the world of sports.

**SPT 320 Business of Global Sport 3 Credits**

The course explores the diverse challenges and issues facing the managers of sports enterprises in the context of the global marketplace. Issues of governance, cross-cultural interactions and business activities will be examined as they relate to modern sport at the international level. By evaluating case studies and examining current issues in the field, students will gain an understanding of the relationships and responsibilities associated with being a business professional in the global sport industry.

**SPT 325 Financial Management in the Sport Industry 3 Credits**

This course is designed to build upon earlier knowledge from courses in economics, accounting and finance that emphasizes the sports industry and the challenge for financial managers in areas such as stadium/arena financing, financial analysis and valuation. Business models and their financial implications for media and sports related enterprises as well as the business of college athletics will also be covered.

**SPT 355 Sports and the Law 3 Credits**

Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. This course is cross-listed as LAW 355. Students may not get credit for both SPT 355 and LAW 355.

**SPT 444 Selected Topics in Sport Management 3 Credits**

This course is offered occasionally with topics and prerequisites set by the Business of Sports Program faculty. This course can be used as an elective for the Sport Management major, Sport Studies minor, or as a free elective. This course is graded on a letter grade basis.

**Prerequisite:** SPT 250.

**SPT 450 Contemporary Issues in Sport Management 3 Credits**

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of lectures, discussions, and guest speakers from the sports industry. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

**Prerequisite:** SPT 250, senior standing, and completion of 15 credit hours in business of sports coursework or permission of instructor.

**SPT 490 Independent Research and Study 1-4 Credits**

Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

**Prerequisite(s):** Junior standing, 9 credits in Sport Management courses (including SPT 250) and permission of instructor.

**SPT 491 Sport Management Internship 1-3 Credits**

Sports related internships can be used to satisfy an elective requirement for the Sport Management Major, Business of Sports Minor and Sport Studies Minor. The course is graded as Pass/Fail.

## Sport Studies

### Program Overview

The sport studies minor is an interdisciplinary program available to all Rider students. The curriculum has been designed to provide students with courses relevant to the examination of the multi-dimensional world of sports and to appreciate the important role of sports in shaping culture.

Departments and programs from across the University have developed courses for this program enabling students to study and critically evaluate the social, political, ethical, legal, economic and media related issues in sports.

### Curriculum Overview

The curriculum gives students the opportunity to use the expertise and perspectives from their major to pursue in-depth study of sports related issues. On campus coursework is complemented by hands on internships, experiential learning through international sports related travel courses and presentations from guest speakers employed in a variety of roles in the sports industry. The experiential component of the minor also helps to give students a greater understanding of sports related employment possibilities as well as preparation for graduate work in sports management and administration programs.

### Minor Offered

- Minor in Sports Studies
