¹ VC 115 and VC 116 are required for Voice primary students only. Organ and piano primary students may substitute four additional credits of free electives.

Courses and Descriptions

AR 111 Survey of Art History I 3 Credits

A survey of Western art - architecture, sculpture, painting - from prehistoric times, is presented against the background of chronological and intellectual history.

AR 112 Survey of Art History II 3 Credits

Crucial artistic tendencies in Western art of the 19th and 20th centuries are introduced and discussed against their historical and intellectual setting. A brief background of art history from previous centuries is presented in order to appreciate these developments.

AR 216 Acting I 3 Credits

This course provides an introduction to basic techniques of realistic acting using exercises, improvisation and scene study. The emphasis is on honesty and commitment to action in order to be able to create real life in an imaginary world.

AR 217 Improvisation & Movement 3 Credits

Using theater games, students explore themselves as individuals and members of a group. The course uses scenes, skits, dances and games to help students overcome their fears and insecurities, enabling them to develop their creativity, spontaneity, honesty, concentration, and commitment to action. The class also explores body movement as a means of heightening dramatic expression.

AS 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

AS 491 Arts & Science Internship 1-12 Credits

This course requires 95 hours for each three credits for which the student enrolls. The student is required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 12 credits of internships.

Prerequisite(s): at least junior level standing.

AS 691 Arts & Science Internship 1-3 Credits

This course requires 15 hours for each credit for which the student enrolls. The internship requires on-site participation at a pre-approved site. Students may enroll for a maximum of 3 credits.

Prerequisite(s): graduate standing.

LL 037 College Reading and Writing 3 Credits

Required for students placed into this course as a result of the basic skills English testing program. This intensive course reviews effective reading, writing, and study processes and leads students to the level of mastery required to begin CMP 125 Seminar in Writing and Research.

LL 141 French I 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 142 French II 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 141.

LL 145 Italian I 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 146 Italian II 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 145.

LL 151 German I 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

LL 152 German II 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 151.

LL 243 French III 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 142.

LL 244 French IV 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 243.

LL 247 Italian III 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 146.

LL 248 Italian IV 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 247.

LL 253 German III 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 152.

LL 254 German IV 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 253.

LL 280 Sacred Texts and Literature 3 Credits

Explore the cultural, theological, and artistic contexts of key themes (e.g. creation, journey, forgiveness, love) in the sacred texts of the major historical world religions as they are portrayed in contemporary poetry and drama, and in novels that have been adapted to film

Prerequisite(s): CMP 125 or CMP 120 or BHP 150.

LL 282 Major Poets 3 Credits

This course introduces students to poetry via the reading and analysis of different poetic forms. While reading, listening to, performing and discussing poems from a wide cultural spectrum, students learn to evaluate and appreciate poetry by understanding such elements as metaphor and persona.

Prerequisite(s): CMP 125 or BHP 150.

LL 285 Writing About Music: A Seminar for Performers, Teachers, and Academics 3 Credits

A writing intensive course focusing on the essential writing tasks encountered by musicians in their roles as performers, teachers, and scholars.

Prerequisite(s): BHP 150 or CMP 125.

LL 327 Dante's Commedia 3 Credits

An introduction to Dante Alighieri's *Commedia* ("Inferno", "Purgatorio" and "Paradiso") exploring key ethical and aesthetic elements of the poem through close reading and critical analysis of the primary text.

Prerequisite(s): BHP 150 or CMP 125.

LL 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

LL 640 German Reading 3 Credits

Designed for graduate students who have little or no previous experience with the German language. A functional course concentrating solely upon preparing students to translate German language sources pertinent to their fields of study. Completion of the course with a grade of "Y" satisfies the graduate language translation requirement. Recommended for Sacred Music, Organ Performance and Choral Conducting majors; not recommended for Voice Pedagogy and Performance or Piano Accompanying and Coaching majors.

LL 641 French Reading 3 Credits

Designed for graduate students who have little or no previous experience with the French language. A functional course concentrating solely upon preparing students to translate French language sources pertinent to their fields of study. Completion of the course with a grade of "Y" satisfies the graduate language translation requirement. Recommended for Sacred Music, Organ Performance and Choral Conducting majors; not recommended for Voice Pedagogy and Performance or Piano Accompanying and Coaching majors. This course is offered in the fall semester only. Offered in the Fall. 3 Credit hours.

RP 265 Lit of New Testament 3 Credits

An introduction to the thought of the early Christian church as expressed in the New Testament, this course will emphasize a literary and historical reading of the Gospels and Epistles. It will introduce students to the Jewish and Greco-Roman religious, political and cultural worlds in which Jesus and his disciples lived and within which earliest Christianity arose.

RP 268 Hebrew Bible & Old Testament 3 Credits

This course introduces students to the writings of the Hebrew Bible/Old Testament within their historical and literary contexts. By critically reading these books, students will become aware of the history, culture and religion of ancient Israel - all of which contributed to the traditions of Judaism and Christianity.

RP PTSEM SpTop:PtonTheologicalSeminary 3 Credits**SP 171 Western Civ I 3 Credits**

This survey history course presents a cohesive picture of the development of Western societies from prehistoric times to the early Renaissance. Social, political and economic aspects are covered; intellectual and cultural developments are emphasized. Familiarity with primary sources and critical reading are integral to the course.

SP 172 Western Civ II 3 Credits

Continuation of SP171. This survey history course covers developments in Western societies from the Renaissance to the present. Major intellectual and cultural trends and movements are presented, along with historical progress and socio-economic expansion.

SP 273 Developmental Psychology 3 Credits

The physical and psychological growth of the individual from infancy through adolescence is studied, with emphasis on cognitive, emotional, and social processes.

Prerequisite(s): SP 175.

SP 274 Educational Psychology 3 Credits

The psychological foundations of education, based on the findings of experimental research in learning, transfer, motivation, reinforcement, and behavioral modification.

Prerequisite(s): PSY 100.

SP 286 Life in Middle Ages 3 Credits

A seminar in which the life styles of medieval Europeans are studied. Students will develop an understanding of particular social organizations and problems of the period by examining the conditions and events of everyday medieval life. Offered in rotation with other History courses.

SP 408 Voice Science 3 Credits

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

Corequisite(s): CR 509.

Music Education

Program Overview

The undergraduate Music Education degree normally takes four years to complete and includes courses in music education, musicianship studies, general education, and field experiences. Each year students engage in increasingly intensive field experiences, culminating with a semester of full-time student teaching in the last year.

All music education majors must maintain a portfolio of work providing evidence of their suitability for teaching. Portfolios are reviewed as part of the Sophomore Review taken near the completion of 60 credits. Music Education majors must maintain a minimum cumulative grade point average of 3.0. Students whose general progress is unsatisfactory or whose cumulative grade point average falls below a minimum 3.0 level may be dropped from the Music Education major. If a student is dropped from the major because of failure to maintain the minimum grade point average, s/he may apply for readmission to the Music Education department. Readmission will be dependent upon various criteria, including the G.P.A., current academic progress and the student's general standing. Decisions regarding retention or appeals will be made in a manner consistent with state and institutional non-discrimination policies.

To graduate, students must complete all requirements for New Jersey teacher certification for Certified Educator with Advanced Standing (CEAS). **Students who want to be able to apply for teaching positions in other states should become familiar with teacher certification requirements for states of interest ASAP to determine if additional coursework is needed.** In addition to successfully completing required coursework, the State of New Jersey requires students to:

1. Satisfy basic skills (reading, writing, math) proficiency as a prerequisite for taking the Sophomore Review. Proficiency is satisfied for students who score at or above the identified cut scores on the SAT or ACT. Students who do not have sufficient SAT or ACT test scores must pass the Praxis Core Academic Skills (<https://www.ets.org/praxis/nj/requirements/>) tests to satisfy basic skills proficiency.
2. Complete a minimum of 50 hours of clinical experience during the first four semesters and 175 hours of clinical practice before full-time clinical practice (student teaching).

3. Pass the Praxis Music Content Exam.

4. Pass the performance-based edTPA Exam.

For more information about non-course program requirements, see links on Undergraduate Music Education Homepage. (<http://www.rider.edu/wcc/academics/undergraduate-programs/music-education/>)

Curriculum Overview

The Music Education curriculum includes courses in elementary and secondary general music education, choral music education, instrumental studies, music technology and creativity, and students with special needs. An innovative four-course sequence integrates theoretical foundations of planning, teaching, assessing, and musicianship development with practical application through peer teaching and field-based music teaching. The undergraduate Music Education curriculum is intended to develop teachers who are reflective, who acknowledge the connections music has to the child's world and who seek to promote an understanding of those connections in a social context.

Notes

¹ VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives for these two courses.

² Students must successfully complete a portfolio review at the end of the sophomore year in order to continue as music education majors. Transfer students with sophomore status must successfully complete the portfolio review at the end of the first year of study.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

ME 111 Music Education Lab 0 Credits

Undergraduates must meet the weekly attendance and participation requirement for Music Education Lab during every semester of enrollment up to seven semester as an undergraduate Music Education major except for the student teaching semester. Grading is "P" (satisfactory) or "U" (unsatisfactory). As part of the Music Education Lab experience, students are required to complete 15 hours of professional development.

ME 161 Art of Teaching Music I 3 Credits

Art of Teaching Music I (ATM I) is a first in the sequence of Music Education courses designed to prepare the undergraduate Music Education major students for their student teaching experience and completion of their teaching licensure. There will be field observations of master teachers under the aegis of a music education faculty that will allow students not only to observe, but to have guided experience in assessing how teaching and learning are experienced in real classrooms. Partnerships between local expert teachers and music education faculty will allow students to complete field observations as well as guided experience in teaching and assessing students in real classrooms.

ME 187 Instrumental Music: Strings 1 Credits

This course is designed as an introduction to the pedagogy of string instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring, and idiomatic writing are investigated. When available, instruments may be rented from the college. Rental fee, per instrument: \$25.

ME 188 Instrumental Music: Winds/Percussion 2 Credits

This course is designed as an introduction to the pedagogy of brass, woodwind, and percussion instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring and idiomatic writing are investigated. When available, instruments may be rented from the college. Students must provide their own drum pads and sticks. Rental fee, per instrument: \$60.

ME 471 Music and Hip Hop Culture 3 Credits

Hip Hop in the United States is arguably the most lucrative, popular, and culturally challenging contemporary musical force. The narratives of Hip Hop go beyond the boundaries of race and class as well as those of music, poetry and dance. As such, Hip Hop is a phenomenon that presents problems as well as great possibilities. This course explores them from the standpoint of educational sociology, looking at their implications for music in schools as well as in daily life.

ME 472 Teaching/Learning:Urban Schools 3 Credits

This course offers students theoretical and practical insight into teaching in urban schools. The class will present an analysis and practical implications for what is needed in order to successfully engage in teaching in urban centers in the United States. Students will balance field experiences with critical analyses of issues such as multicultural teaching, race, class, and economics in urban schools as well as their curricular and pedagogical implications.

Prerequisite(s): ME 581, ME 582.

ME 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

ME 491 Kodaly Music Reading 2 Credits**ME 492 Student Teaching 12 Credits**

A full semester internship in directed full-time teaching supervised by department members and carried out in schools with approved cooperating teachers. In addition to the field experience, students attend a weekly seminar on campus to discuss current issues in music education as they relate to individual teaching situations. Students discuss classroom management strategies, action research, authentic instruction, critical thinking, feeling and action as well as teaching to focused questions, concepts and objectives. Throughout student teaching, students maintain a digital portfolio that demonstrates how they meet the New Jersey State and INTASC teaching standards. At the conclusion of the semester, students attend a portfolio review with members of the Music Education faculty to assess the success of the teaching experience. Students must provide their own transportation to student teaching site. Student Teaching fee: \$245. Fees for the Praxis Examination and Teacher Certification are additional. Additional information regarding student teaching may be found in the department's Student Teaching Handbook at www.rider.edu/musiced.

Prerequisite(s): Minimum grade of B- in ME 564; Classification as a full senior; Satisfactory completion of music education courses numbered ME 161, ME 262, ME 563, ME 564, ME 187, ME 188, and either PSY 230 Child Developmental or PSY 231 Youth and Adolescent Development; Satisfactory completion of TH 241; For voice primary students, satisfaction of all requirements of PI 204; A minimum 3.0 cumulative GPA; Demonstrated aptitude, motivation and potential for success in teaching, as evidenced by the successful completion of portfolio reviews; Departmental approval; Students in the Master of Music Education (MME) degree program must take the following courses as prerequisites to student teaching; ME 563, ME 564, ME 725.

ME 499 Special Topics Music Education 2 Credits

The content of this course and the number of credits will vary with the special interests and qualifications of the professor teaching it.

Music Production

Program Overview

The B.A. in Music Production provides students with the skills necessary to make music at every step of the process. Students will take courses that help them germinate ideas for songs, flesh them out in arrangements, work fluidly in digital software, generate their own unique sounds through digital synthesis, and apply mixing techniques that make their songs ready to be shared with the world.

The Music Production B.A. grounds all of this work in an understanding of popular music theory and an exploration of the social and political histories of popular music, fostering well-rounded, deeply knowledgeable musicians. Music Production students are also encouraged to take courses in departments across the university that cover skills in radio, podcasting, and multimedia, as well as music publishing and other aspects of the music industry. The degree culminates in a capstone project or internship where the student applies all that they've learned in a self-directed study or a work environment in their future field.

Courses and Descriptions**CMP 120 Seminar in Writing and Rhetoric 3 Credits**

Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. The second of the department's three-course composition sequence, This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

CMP 125 Seminar in Writing and Research 3 Credits

Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CMP 120 or BHP 100.

MUS 106 Survey of Music History II 3 Credits

A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 113 Popular Music Theory I 3 Credits

Popular Music Theory I covers basic elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations. Practice in scales and chords; ear-training in rhythm, pitch, and timbre. Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice)

Corequisite(s): MUS 113L.

MUS 113L Popular Music Theory Lab I 1 Credits

Taken in conjunction with Popular Music Theory I, the lab applies theoretical concepts in a performance context. Applied aural training and improvisation skills on primary and secondary instruments.

Corequisite(s): MUS 113.

MUS 114 Popular Music Theory II 3 Credits

A continuation of Popular Music Theory I, progressing to intermediate elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations. Practice in scales and chords, ear-training in rhythm, pitch, and timbre. Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice).

MUS 114L Popular Music Theory Lab II 1 Credits

Taken in conjunction with Popular Music Theory II, the lab applies theoretical concepts in a performance context. Applied aural training and improvisation skills on primary and secondary instruments.

MUS 127 Pop, Rock & Hip-Hop Ensemble 1 Credits

This is a dynamic group rehearsal, performance and discussion of contemporary popular music of any genre including but not limited to: the blues, soul, country, gospel, pop, prog. rock, reggae, disco, punk, grunge, new wave, dub, rap and hip hop.

MUS 129 Contemporary Vocal Ensemble 1 Credits

The objective of the contemporary vocal ensemble course is to allow students to experience the aesthetics of popular music through the study, interpretation and performance of the music. Students will develop their ensemble skills, independent part singing, as they experience a wide range of popular music genres (jazz, pop, R&B, world, etc.) Students must pass an audition to participate in this course.

MUS 131 Beginning Piano I 2 Credits

Class approach to learning to play the piano. How to read music, basic piano technique, and appropriate piano pieces and songs are studied.

MUS 132 Beginning Piano II 2 Credits

Continuation of MUS 131. Emphasis on further development of technique and the ability to interpret piano music from a variety of styles.

Prerequisite(s): MUS 131 or equivalent.

MUS 133 Class Voice I 2 Credits

Class approach to learning pop vocals. How to read music, basic vocal production technique and appropriate vocal pieces and songs are studied, especially in popular genres.

MUS 134 Class Voice II 2 Credits

Continuation of class approach to learning pop vocals started in Class Voice I. Intermediate vocal technique for popular music

Prerequisite(s): MUS 133 or placement exam.

MUS 135 Class Guitar I 2 Credits

Class approach to learning to play the guitar. How to read tablature, basic guitar technique, and appropriate guitar pieces and songs are studied, especially in popular genres. Students must provide their own guitars; if electric, they should provide their own amps, too.

MUS 136 Class Guitar II 2 Credits

Continuation of class approach to learning to play the guitar started in Class Guitar I. Intermediate guitar technique for popular music. Students must provide their own guitars; if electric, they should provide their own amps, too.

Prerequisite(s): MUS 135 or placement exam.

MUS 204 Jazz History 3 Credits

Survey from 19th C. roots to 21st C. styles. Development of listening skills and overview of musical skills used by jazz performers. Exploration of the relationship between jazz and poetry, race relations, and the reputation of jazz in popular culture.

Prerequisite(s): CMP 120 or CMP 125.

MUS 205 History of Pop and Rock Part I 3 Credits

This course charts the history of popular music from its origins until the 1960s. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music from its roots in the blues, early jazz, ragtime and military band marches to the music of Elvis, Chuck Berry, Little Richard, Buddy Holly, the Rolling Stones and the Beatles. We look at the recording industry and the advent of the gramophone record and the important role of radio and television in expanding the reach of popular music directly into the home, creating a vibrant soundtrack for peoples lives.

MUS 206 History of Pop and Rock Part 2 3 Credits

Description: This course charts the history of popular music from the 1960s to today's. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music through Acid Rock, Progressive (Prog) Rock, Hard Rock, Singer-Songwriters, Disco, Reggae, Funk, Punk, Heavy Metal, New Wave, Grunge, Electronica and Rap & Hip-Hop. We look at the development of analog and digital media and how new forms of delivery of product shapes the business model of the industry and beyond.

MUS 213 Digital Composition of Popular Music 3 Credits

This course is an introduction to making music in a Digital Audio Workstation (DAW). Students learn software techniques by composing in multiple genre styles.

MUS 214 Writing about Music 3 Credits

This course instructs students in the art of writing about music, from small-form criticism to large scale scholarship, focusing especially on the ability to translate what one hears into engaging prose.

Prerequisite(s): CMP 120 and 125, MUS 110, 110L, and MUS 213.

MUS 216 Digital Comp of Pop Music II 3 Credits

This course is about "the doing of music." It ties music theory to pragmatic concerns with keyboards and software in the making and distribution of music, continuing the content begun in The Digital Composition of Popular Music I.

MUS 220 Songwriting 3 Credits

The Songwriting course is an introduction to songwriting in popular music styles. Students will learn to compose music by themselves and collaboratively. This course will develop comprehensive musicianship and compositional techniques, as well as further software skill development.

Prerequisite(s): MUS 113.

MUS 308 World Music 3 Credits

To understand world music as a means of appreciating and respecting our common inheritance as humans. To better understand in what ways music is a 'language' and how this functions within 'community' including aspect of ritual, celebration, religion and spirituality. The student will be expected to be able to discern between various genres of world music understanding the wider cultural context including, but not limited to, popular music within that same culture.

MUS 319 Pop Music Arranging II 3 Credits

The Pop Music Arranging II course is the terminal course of a two-semester sequence whose goal is to explore the advanced arranging techniques for popular music styles. Students will learn to arrange popular music for the standard instrumentation found in a pop/rock ensemble (bass guitar, drumset, rhythm guitar, and keyboard). This course will develop comprehensive musicianship and advanced arranging techniques, as well as develop advanced skills as they relate to the utilization of the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 219.

MUS 320 Pop Songwriting II 3 Credits

The Pop Songwriting II course is a continuation of the songwriting course sequence whose goal is to explore advanced compositional techniques for popular music styles. Students will learn to compose music by themselves and collaboratively. This course will develop comprehensive musicianship and advanced compositional techniques, as well as develop advanced skills as they relate to the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 220.

MUS 491 Internship in Music 1-4 Credits

Provides junior or senior music majors with the opportunity to gain practical experience working within a professional music environment. Students must be sponsored by a music professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

MUS 498 Popular Music Culture Capstone 3 Credits

The capstone is an independent, student-led project resulting in a material product (recording/performance/event/presentation) that demonstrates a student's interests and skills in the area of popular music.

Music Studies

Program Overview

The music studies minor provides students with insights that can help connect them to professional careers in music. Students will work closely with renowned faculty and recognized professionals in a variety of areas of study.

Prerequisite(s): CMP 120 or CMP 125.

MUS 205 History of Pop and Rock Part I 3 Credits

This course charts the history of popular music from its origins until the 1960s. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music from its roots in the blues, early jazz, ragtime and military band marches to the music of Elvis, Chuck Berry, Little Richard, Buddy Holly, the Rolling Stones and the Beatles. We look at the recording industry and the advent of the gramophone record and the important role of radio and television in expanding the reach of popular music directly into the home, creating a vibrant soundtrack for peoples lives.

MUS 206 History of Pop and Rock Part 2 3 Credits

Description: This course charts the history of popular music from the 1960s to today. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music through Acid Rock, Progressive (Prog) Rock, Hard Rock, Singer-Songwriters, Disco, Reggae, Funk, Punk, Heavy Metal, New Wave, Grunge, Electronica and Rap & Hip-Hop. We look at the development of analog and digital media and how new forms of delivery of product shapes the business model of the industry and beyond.

MUS 208 Music of the Theater 3 Credits

A study of music drama both historical and contemporary covering European opera of the Baroque, classical and romantic periods, and

the American musical theatre, especially the contemporary Broadway musical.

MUS 209 Great Composers 3 Credits

A study of selected major composers life, works, and historical significance with an emphasis on the listening experience. Bach, Mozart, Beethoven, Tchaikovsky, Stravinsky, or others.

MUS 217 Black Music in America 3 Credits

This course covers the history of music made by and/or about African Americans, from minstrel shows to hip-hop and everything in between.

MUS 218 Postmodernism & Popular Culture 3 Credits

This course considers music in light of the ideological trends of postmodernism in order to better understand contemporary music in its cultural context.

MUS 300 Beethoven and the Romantic Age 3 Credits

A study of the Romantic period with particular emphasis on Beethoven. The classical heritage, the transformation of that heritage into romantic terms, the prominent influence of Beethoven on 19th century musical style.

MUS 304 Music of the Beatles 3 Credits

This course is an in-depth analysis of the music and personalities of the Beatles. The student will gain deep insight to the Beatles songs and albums as the course proceeds through the music chronologically. This will be contextualized historically and sociologically where required.

MUS 306 Contemp Music Experience 3 Credits

A survey of European and American musical styles of the late 19th and 20th centuries. Topics include postromantic music, neoclassicism, serialism, electronic music, and the current avant garde.

MUS 307 The Music of Radiohead 3 Credits

This course investigates the music, lyrics, art and marketing strategies of the British so called "alternative" band, Radiohead, moving song by song through their demos, videos and albums.

MUS 309 Film Music 3 Credits

A study of music in feature film, documentary film, and television. A chronological survey of film music from silent to contemporary film, animated shorts, and television, with emphasis on listening to recorded performance of representative works.

MUS 495 Selected Topics in Music 3 Credits

Studies specialized aspects of the literature, history, or theory of music, to supplement the established curriculum. Emphasis on creative investigative work and individual experiences in music.

Musical Theatre (B.F.A)

Program Overview

The musical theatre major at Rider prepares students for a professional career in musical theatre with veteran faculty and regular interface with top industry professionals. This program is provided in a nurturing

liberal arts environment just one hour from New York City at Rider's Lawrenceville campus.

The musical theatre program offers development of well-rounded, competitive musical theatre professionals. Rider's professional musical theatre faculty members are committed to developing students' talents and technique in all areas – vocal, dance and acting – preparing them to succeed in the highly competitive world of professional musical theatre.

Rider musical theatre majors enjoy affordable, student-sponsored Broadway performance trips, special student discounts, class-related Broadway field-trips and backstage tours or just a quick visit via the nearby train.

Musical Theatre (B.F.A.) Program Requirements

(120 credits)

General Requirements

For all majors offered in the Theatre & Dance Department, students must earn a minimum grade of "C" in those courses required in the major area in order to make satisfactory progress. If a grade of "C-" or lower is earned, the student must repeat the course.

B.F.A. –Musical Theatre majors must earn a minimum grade of "B-" each semester in the primary applied music field in order to make satisfactory progress. If a grade of "C+" or lower is earned, the student must repeat the semester.

Students must meet attendance and performance requirements in studio performance classes and Musical Theatre Lab.

Applied Music – Voice Primary Study

Students in the B.F.A.-Musical Theatre degree must register for applied music in each semester of study, to a maximum of eight semesters. Six terms are taken under MUS 168A (2-credit, 1-hour lesson) and two semesters are taken under MUS 168B (1-credit, half-hour lesson). The section number corresponds to the instructor with whom the student will study.

Musical Theatre Lab

All majors are required to attend a weekly musical theatre lab during every semester of enrollment. The lab supplements curricular instruction with presentations by guest artists, managers, agents, and casting directors. This interface provides each student with an opportunity for interaction with some of the most important professionals in the musical theatre business.

Performing Opportunities at Rider University

The musical theatre program offers three fully staged productions led by faculty and experienced and notable directors, conductors and choreographers from the professional community. The Department of Theatre, Dance and Fine Arts also offers a well-established theatre program that provides additional performing opportunities in three major productions. Majors also are encouraged to participate in student-directed and produced events, presented each year on both campuses. The Department of Piano and Voice offers two Opera Theater productions each year. All productions are open by audition to all Rider University students except first-semester freshmen. Consult the Musical Theatre Handbook for the Audition Policy.

¹ This course may be taken in any semester. CMP 120 is a prerequisite for CMP 125 and must be completed first. HIS 150 is a prerequisite for HIS 151 and must be completed first.

² 2 credits for THE 190 may be completed in any semester.

MTR 105 Musical Theatre Practicum 1 Credits

This course explores the literature of musical theatre vocal ensembles. It emphasizes examining a wide range of styles. This is a studio/academic class, not a performance ensemble.

MTR 109 Beginning Ballet I 1 Credits

This course introduces the basic elements of ballet technique. Technique is based on the five positions of the legs and feet, coupled with appropriate arm positions. The class consists of a basic ballet barre warm-up that includes stretching and developing strength and turn-out used in dance positions and combinations. Instruction includes jumping, turning, and connecting steps with movement. Ballet terminology is addressed.

MTR 111 Musical Theatre Lab 0 Credits

MTR 112 Advanced Ballet I 1 Credits

Continuation of MTR 109, building upon techniques learned in that course.

MTR 113 Beginning Ballet II 1 Credits

Intermediate ballet, expanding upon Ballet I and concentrating upon the American lineage of ballet training.

MTR 114 Advanced Ballet II 1 Credits

Continuation of MTR 113. Intermediate ballet, expanding upon Ballet I and concentrating upon the American lineage of ballet training.

MTR 120 Hist of American Music Theater 3 Credits

The history of the American Musical from the first American production in 1750 of Gay's *The Beggar's Opera* up to the present will be traced. Emphasis will be placed upon those common elements which are solely intrinsic to the American stage. Developments and imported ideas (e.g., *The British Invasion*) will be highlighted.

MTR 131 Music Theory for MT 3 Credits

Teaches students to understand musical form, structure, melody, rhythm and harmony by applying these concepts to musical theatre literature. Includes full analysis of musical theatre songs. Required in the first year.

MTR 132 Group Piano 1 Credits

Offers the musical theatre student appropriate keyboard technique to play any vocal part and to play a rudimentary accompaniment. Required of all second-year students.

Prerequisite(s): MTR 131.

MTR 133 Sight Singing for MT 3 Credits

Intensive class in reading music, designed for musical theatre students. Traditional solfeggio techniques used with musical theatre texts whenever possible. Required of first-year students.

Prerequisite(s): MTR 131.

MTR 209 Tap Dance I 1 Credits

Introduction to the basic elements of tap dancing. Tap technique is geared to enhance rhythm and motor skills, basic elements that will be used to connect several steps and movements into combinations. Other variations such as "soft shoe" or "clogging" are included.

MTR 211 Ballet III 1 Credits

Intermediate ballet, expanding upon Ballet II and concentrating upon the American lineage of ballet training.

Prerequisite(s): MTR 110.

MTR 212 Ballet IV 1 Credits

Continuation of MTR 211. Intermediate ballet, expanding upon Ballet III and concentrating upon the American lineage of ballet training.

Prerequisite(s): MTR 211.

MTR 215 MT Performance: Song as Text 3 Credits

In this course the student will learn how to develop a performance of musical text by making doable, actable choices and applying those choices to musical monologues – solo songs.

Prerequisite(s): THE 110.

MTR 218 Musical Theatre Scene Study I 3 Credits

Scene study class exploring the literature of the musical theatre – emphasis placed on two- and three-character scenes. Required of all second-year students.

Prerequisite(s): MTR 215.

MTR 219 Musical Theatre Scene Study II 3 Credits

Further exploration of scenes in the musical theatre literature – emphasis on more complex scenes. Required of all third-year students.

Prerequisite(s): MTR 218.

MTR 255 Musical Theatre Repertoire I 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers through the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106 with a minimum grade of D and THE 311 with a minimum grade of D.

MTR 256 Musical Theater Repertoire II 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers since the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106, THE 107.

MTR 307 Tap III 1 Credits

This course is designed for the moderately advanced tap dancer. Course to be taken in the fall.

Prerequisite(s): MTR 210.

MTR 308 Tap IV 1 Credits

The course will allow the more advanced student to complete the work begun in Tap III.

Prerequisite(s): MTR 307.

MTR 309 Beginning Jazz Dance I 1 Credits

Based upon the ballet foundation, this course explores the expressive style of jazz dance, and basic Western theatrical dance forms and social dances used most often on the stage.

Prerequisite(s): MTR 109.

MTR 313 Ballet V 1 Credits

Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills.

Prerequisite(s): MTR 212.

MTR 314 Ballet VI 1 Credits

Continuation of MTR 313. Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills.

Prerequisite(s): MTR 313.

MTR 315 Advanced Jazz Dance I 1 Credits

Continuation of work begun in MTR 309.

MTR 317 MT Auditions:Preparation/Tech 3 Credits

This course, building upon skill-sets established in the Music Theatre singer-actor curriculum, will introduce and hone the required skill-sets for preparing to audition in Music Theatre. Genres and styles of music most often required for auditioning in the industry will be prepared and explored. An audition "book," based upon the demands of the industry, as well as the most suitable material for each student will be built. When appropriate, guests from the industry will be invited to present master classes and evaluations in a "mock audition" process.

Prerequisite(s): MTR 207, MTR 216, MTR 217, MTR 492.

MTR 319 Jazz Dance III 1 Credits

This course continues the work begun in MTR 318.

Prerequisite(s): MTR 318 and MTR 212.

MTR 320 Jazz Dance IV 1 Credits

This course continues the work begun in MTR 319.

Prerequisite(s): MTR 319 and MTR 212.

MTR 335 Speech for the Actor 3 Credits

This course introduces and develops speech techniques, specifically in the areas of relaxation, posture and alignment, respiration, phonation, support, registration, resonance, and articulation. Students learn to consistently produce a free, resonant, fully supported speaking voice. Exercises will increase flexibility and range of speaking and will foster heightened responsiveness to feeling. Regular practice in the delivery of both impromptu and prepared monologues is required. This course includes studies in Neutral American Speech.

MTR 415 Musical Theatre Dance I 1 Credits

This is the first capstone course in the Musical Theatre dance sequence. Practical and historical study of Broadway dance styles; main focus on jazz idiom. Emphasis placed on performance quality, auditioning skills, self-taping, and "how to swing/dance captain".

Prerequisite(s): Completion of Ballet, Tap, and Jazz requirements; senior standing.

MTR 416 Musical Theatre Dance II 1 Credits

This is the second capstone course in the Musical Theatre dance sequence. Emphasis is placed on other dance styles used on stage, film, music videos, and television. Primary focus is on Hip Hop and Street Jazz.

Prerequisite(s): MTR 415 with a minimum grade of C.

MTR 480 Dance for Performing Artist 3 Credits

This course is a culmination of the dance elements and forms studied in ballet, tap, and jazz dance. Context areas include movement used most often in performance of music theater and movement fundamentals applicable to all aspects of presentation and principle to refine and articulate the performer's awareness and use of the body through singing and dance. Performance issues and movement as a basis for music and sound production are addressed.

Prerequisite(s): MTR 209, MTR 309.

MTR 493 Music Theater Production 1 Credits

Preparation and performance of a solo or ensemble role in a fully staged music theatre production. Concurrent participation in stage crew activities is required.

MUS 168A Applied Voice 2 Credits**MUS 168B Applied Voice 1 Credits****THE 105 Theatre History to 1700 3 Credits**

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 107 Acting I: Intro to Acting 3 Credits

Exercises and improvisations developing the fundamental prerequisites for the actor are provided. The emphasis is on vocal and physical mobility and the ability to communicate emotional states from the stage.

THE 110 Acting II: Scene Study 3 Credits

Basic acting techniques. Emphasis on the ingredients of any action: what am I doing, where, why, who am I, what is my attitude toward partner?

Prerequisite(s): THE 107.

THE 115 Stagecraft 3 Credits

The theory and practice of construction and rigging of stage scenery is offered. Emphasis is on actual productions and road show set-ups. One lecture and two labs per week.

THE 127 Theatre Production 1 Credits

Students rehearse and perform roles in a play produced by the department and directed by a member of its faculty. Students may also prepare a major element of design or technology for the production. Maximum of eight credits are accepted in theatre production, band and/or choir.

THE 190 Production I 1 Credits

Students carry out a technical theatre crew position for one or more theatre, musical theatre or dance productions during the semester of course registration. May be repeated seven times, for a total of eight credits.

THE 310 Acting III 3 Credits

Students will study in-depth techniques for exploring characterization. They will be introduced to the “magic if” and study techniques for placing themselves in the circumstances of the characters they are portraying. They will learn the interior and exterior analysis of characters using “Adler” and “Practical Aesthetics” techniques.

Prerequisite(s): THE 107, THE 110.

THE 311 Acting IV 3 Credits

Students will learn the appropriate techniques to explore characters in the three styles of Elizabethan, Restoration, and Commedia dell’arte theatre. Sessions will include movement, effective speech, and finding appropriate actions for each style. Students will also learn proper research techniques to understand cultural influences on plays and characters.

Prerequisite(s): THE 107, THE 110, THE 310.

Musical Theatre: Musical Direction

Overview

The Musical Theatre: Musical Direction major at Rider prepares students for a professional career in musical theatre, working as a music director or in other aspects that focus on the music side of the industry. This program is provided in a nurturing liberal arts environment on Rider’s campus, just one hour from New York City.

Degree Offered

- B.M. in Musical Theatre: Musical Direction

Associated Department: Performing Arts

Related Programs

- Arts Entertainment Industries Management (p. 41)
- Dance (p. 143)
- Music Studies (p. 420)

General Requirements

B.M. - Musical Theatre majors must earn a minimum grade of “B-” each semester in the primary applied music field in order to make satisfactory progress. If a grade of “C+” or lower is earned, the student must repeat the semester.

Students must meet attendance and performance requirements in studio performance classes and Musical Theatre Lab.

All students must present a senior piano primary applied recital after qualifying according to applied area standards. Students must enroll for

primary applied study during the term when any recital is to be presented unless specifically excused from this requirement by the Associate Dean.

Applied Music – Piano Primary Study

Piano primary students in the B.M.-Music Theatre degree must register for two credits of applied music in each semester of study, to a maximum of eight semesters. Four terms are taken under MUS 165A; four terms under MUS 365A. The section number corresponds to the instructor with whom the student will study.

Musical Theatre Lab

All majors are required to attend a weekly musical theatre lab during every semester of enrollment. The lab supplements curricular instruction with presentations by guest artists, managers, agents, and casting directors. This interface provides each student with an opportunity for interaction with some of the most important professionals in the musical theatre business.

Performing Opportunities at Rider University

The musical theatre program offers three fully staged productions led by faculty and experienced and notable directors, conductors and choreographers from the professional community. The Department of Theatre, Dance and Fine Arts also offers a well-established theatre program that provides additional performing opportunities in three major productions. Majors also are encouraged to participate in student-directed and produced events, presented each year on both campuses. The Department of Piano and Voice offers two Opera Theater productions each year. All productions are open by audition to all Rider University students except first-semester freshmen.

¹ MUS 210 is a prerequisite for all four courses.

² Double majors should consult their advisors to determine the most pedagogically appropriate lab to attend. Students should not register in more than one lab per semester. Students are required to complete at least three lab sections in each of their majors before graduation. Students must meet the minimum lab requirements for each of their majors.

Additional Requirements

- Sophomore Review
- Piano Juries
- Senior Piano Recital

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions**CR 215 Fundamentals of Conducting 3 Credits**

This course provides the foundation of conducting technique and philosophy as it relates to choral ensemble. Primarily, it deals with the development of basic pedagogical proficiencies, specifically alignment, Laban gestural vocabulary, breathing, beat patterns, consistent tempo, and the development of expressive gesture for relaying various styles of music, i.e., legato, staccato and marcato. Basic philosophical understandings concerning the human aspects of the music making process and the role the conductor plays in that process also are emphasized. Specific techniques for dealing with technical elements, e.g., fermata, dynamics, changes of tempo, contrasts in style, also are covered. The overall focus of the course is to establish the important relationship between ear, body, and the choral sound.

Prerequisite(s): TH 141.

CR 315 Techniques of Conducting 3 Credits

Continued development of conducting technique with emphasis on more complex styles and patterns, and on communication through appropriate gestures. Further improvement in conducting various dynamics and articulations, as well as more effective use of the left hand. Rehearsal procedures, repertoire programming, score preparation, and baton techniques are incorporated into the course.

Prerequisite(s): CR 215.

MTR 105 Musical Theatre Practicum 1 Credits

This course explores the literature of musical theatre vocal ensembles. It emphasizes examining a wide range of styles. This is a studio/academic class, not a performance ensemble.

MTR 109 Beginning Ballet I 1 Credits

This course introduces the basic elements of ballet technique. Technique is based on the five positions of the legs and feet, coupled with appropriate arm positions. The class consists of a basic ballet barre warm-up that includes stretching and developing strength and turn-out used in dance positions and combinations. Instruction includes jumping, turning, and connecting steps with movement. Ballet terminology is addressed.

MTR 111 Musical Theatre Lab 0 Credits**MTR 120 Hist of American Music Theater 3 Credits**

The history of the American Musical from the first American production in 1750 of Gay's *The Beggar's Opera* up to the present will be traced. Emphasis will be placed upon those common elements which are solely intrinsic to the American stage. Developments and imported ideas (e.g., *The British Invasion*) will be highlighted.

MTR 215 MT Performance: Song as Text 3 Credits

In this course the student will learn how to develop a performance of musical text by making doable, actable choices and applying those choices to musical monologues – solo songs.

Prerequisite(s): THE 110.

MTR 218 Musical Theatre Scene Study I 3 Credits

Scene study class exploring the literature of the musical theatre – emphasis placed on two- and three-character scenes. Required of all second-year students.

Prerequisite(s): MTR 215.

MTR 255 Musical Theatre Repertoire I 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers through the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106 with a minimum grade of D and THE 311 with a minimum grade of D.

MTR 256 Musical Theater Repertoire II 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers since the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106, THE 107.

MTR 317 MT Auditions:Preparation/Tech 3 Credits

This course, building upon skill-sets established in the Music Theatre singer-actor curriculum, will introduce and hone the required skill-sets for preparing to audition in Music Theatre. Genres and styles of music most often required for auditioning in the industry will be prepared and explored. An audition "book," based upon the demands of the industry, as well as the most suitable material for each student will be built. When appropriate, guests from the industry will be invited to present master classes and evaluations in a "mock audition" process.

Prerequisite(s): MTR 207, MTR 216, MTR 217, MTR 492.

MTR 493 Music Theater Production 1 Credits

Preparation and performance of a solo or ensemble role in a fully staged music theatre production. Concurrent participation in stage crew activities is required.

MUS 106 Survey of Music History II 3 Credits

A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 110 Music Theory I 3 Credits

A practical introduction to the basic elements of music, beginning with the reading of music notation. Practice in scales and chords; ear-training in rhythm and pitch. Techniques may be applied to the student's own instrument (e.g., guitar, piano, winds) if he or she plays one.

Prerequisite(s): MUS 109S or placement.

Corequisite(s): MUS 110L.

MUS 110L Music Theory I Lab 1 Credits

Dictation, aural skills training, sight singing, and keyboard skills to accompany MUS 110 (Music Theory I). Prerequisite(s): MUS 109S or placement.

Corequisite(s): MUS 110.

MUS 111 Music Theory II 3 Credits

Continuation of MUS 110, leading to some original composition.

Prerequisite(s): MUS 110 and MUS 110L.

Corequisite(s): MUS 111L.

MUS 111L Music Theory II Lab 1 Credits

Dictation, aural skills training, sight singing, and keyboard skills to accompany MUS 111 (Music Theory II). Prerequisite(s): MUS 110 and MUS 110L or placement.

Corequisite(s): MUS 111.

MUS 165A Applied Piano 2 Credits**PI 513 Jazz Keyboard/Improv 3 Credits**

This course will enable pianists and organists to become familiar with the theory, harmony, and improvisational techniques of jazz piano. Emphasis will be placed upon getting each student to create spontaneous improvisations. The fundamental goal will be that of enabling students accustomed to following a score to move beyond it. Extensive exposure to material from the "Great American Songbook" as well as to jazz standards will provide a structural basis for the course.

Prerequisite(s): TH 142 and PI 201, or equivalent knowledge and technical proficiency.

TH 251 Analytical Studies I 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain only the harmonic vocabulary and formal structures studied in TH 141 and TH 142, may vary each time the course is offered. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 253 Orchestration 3 Credits

A study of the orchestra and its individual instruments from the standpoints of the composer, arranger and conductor. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 255 Song Writing 3 Credits

Solo vocal composition in various styles. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 259 Electroacoustic Music 3 Credits

An introduction to the history and literature of electroacoustic music emphasizing hands-on creative opportunities in sequencing and digital sound processing. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

THE 105 Theatre History to 1700 3 Credits

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 107 Acting I: Intro to Acting 3 Credits

Exercises and improvisations developing the fundamental prerequisites for the actor are provided. The emphasis is on vocal and physical mobility and the ability to communicate emotional states from the stage.

VC 103 Voice Secondary 1 Credits

Nursing: Online R.N. to B.S.N.

Program Overview

Designed for working nurses, Rider's asynchronous, online RN to BSN program lets students gain the knowledge, skills, and experiences to advance professionally while balancing their career and family life.

The experience, skills, and compassion an individual brings to their nursing role transforms the lives of the patients, families, and communities. Evolving and emerging changes to population health and healthcare environments presents nursing professionals with new challenges — and exciting opportunities. The RN to BSN program prepares nurses to care for diverse communities and to lead change to improve patient outcomes in a variety of healthcare settings.

Nursing Program Mission Statement

The nursing faculty uphold Rider University's Mission and the Rider Promise to prepare graduates to thrive professionally and be lifelong independent learners and responsible citizens who embrace diversity, support the common good, and contribute meaningfully to the changing world they live and work in. The RN to BSN program adheres to the principles of adult learning, which acknowledges previous learning and experiences within courses and provides content relevant to the nursing profession. The MSN program provides knowledge and skills for nurses to excel as nurse practitioners in various health care environments. Principles of advanced practice registered nurse (APRN) clinical practice and nursing scholarship improve health outcomes for patients, families, and diverse communities. Rider's Nursing Program adheres to the beliefs of the American Nurses Association Code of Ethics. It requires students to practice within the following tenets of respect for a patient's dignity, worth, autonomy, and advocacy for their rights, health, and safety. The mission of the Nursing Program aligns with that of Rider University to challenge nurses to grow and further develop skills needed to acquire, interpret, communicate, and become transformational leaders within nursing and across disciplines. The RN to BSN completion program allows the registered nurse to build upon the knowledge and skills learned in the pre-licensure undergraduate program. The MSN program builds on baccalaureate-level nursing education to expand the scope of practice of learners, from registered nurse to an APRN. Both programs allow for expanded opportunities for nurses to function as change agents and leaders within the nursing profession and across health disciplines.

RN to BSN Program Goals

1. Develop graduates that embrace diverse cultures and lifestyles and value individual differences while practicing their nursing role in their professional and personal communities.
2. Foster a commitment for professional nurses to maintain the highest quality knowledge, skills, and competencies based on professional

standards and evidence based practice guidelines in generalist nursing practice.

3. Develop graduates as nursing leaders with a command in moral and ethical agency as they advocate for patients, families, and communities through collaboration with healthcare disciplines and key stakeholders.

RN to BSN Student Learning Outcomes

Rider University's Bachelor of Science in Nursing Program prepares the graduate to:

1. Incorporate knowledge from arts, humanities, and sciences in the planning and provision of professional nursing care.
2. Use skills of inquiry and analysis to address practice issues.
3. Use written, verbal, non-verbal, and emerging technology methods to communicate effectively.
4. Apply leadership skills to engage others in ethical reasoning and actions to promote advocacy, collaboration, and social justice as a socially responsible citizen.
5. Apply knowledge of social and cultural factors to the care of diverse populations.
6. Engage in interprofessional collaboration and communication to deliver evidenced-based, patient-centered care to improve patient safety and health outcomes for individuals, families, and communities across the lifespan.
7. Discuss the implications of healthcare policy on issues of access, equity, affordability, and social justice in healthcare delivery.
8. Value lifelong learning and professional engagement in the pursuit of nursing practice excellence.

Curriculum Overview

The RN to BSN curriculum provides a seamless transition to the bachelor's prepared professional nurse role by building on the students' experiences as registered nurses. The curricular flexibility in distribution requirements will ensure that admitted students can readily transfer completed coursework from another academic institution into Rider University. The program's asynchronous, online delivery ensures flexibility and accessibility to a high-quality RN to BSN program for working nurses. All general education and nursing courses will be available to the students through asynchronous, online format. Several courses are offered in an accelerated, 7-week format. Clinical experiences are integrated into the course learning activities. Separate, precepted clinicals are not required.

The minimum passing grade for all NUR courses is a C (75). Any BSN student receiving below a C (75) in a NUR course will need to repeat the course to meet graduation requirements.

Admission Requirements

Students must meet the following requirements for admission to the program:

- Graduation from an accredited associate's degree or diploma in nursing; students who do not meet this requirement should contact admissions before applying
- Provide official transcripts from all institutions attended with a minimum 2.5 cumulative GPA
- Hold an unencumbered and current RN license; students with licensure pending should contact admissions before applying
- Submit a personal statement on philosophy of advancing nursing education at the baccalaureate level

Accreditation Statement

The baccalaureate degree program in nursing at Rider University is accredited by the Commission on Collegiate Nursing Education, 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791.

Course Offerings for Students Outside of Nursing

Students with 75 credits or more and a minimum, cumulative GPA of 3.0 interested in a career in nursing may take NUR courses with permission from their academic advisor and the nursing program director. Interested students must submit their request to their academic advisor. Requests are considered on a case by case basis. All students enrolled in NUR courses are expected to adhere to the course policies defined in the RN to BSN Student Handbook.

Students outside of the nursing program may request to take the following NUR courses:

- NUR 401 Organizational and Healthcare Systems Leadership
- NUR 402 Scholarship in Evidence-Based Practice
- NUR 403 Information Management and Application of Patient Care Technologies
- NUR 404 Healthcare Policy, Finance, and Regulatory Environments
- NUR 405 Interprofessional Collaboration and Communication for Improving Healthcare Outcomes

Degree Offered

- B.S. in Nursing

Semester Credit Hours		6

Spring Semester

NUR 409	BSN Capstone	3
NUR 404	Healthcare Policy, Finance, and Regulatory Environments	3
Semester Credit Hours		6
Total Credit Hours for Graduation		30

Students who have not completed any previous college-level statistics courses must also complete the following courses. Course offerings vary by semester.

Code	Title	Credits
MTH 120	Introduction to Applied Statistics	
PSY 201	Statistics and Research Design	

Courses and Descriptions

NUR 400 Professionalism and Professional Values 3 Credits

Professionalism and the inherent values of altruism, autonomy, human dignity, integrity, and social justice are fundamental to nursing. The nature and scope of professional nursing, critical thinking, professional accountability, ethical decision-making, and client education as integral parts of the nursing process are examined. Quality and Safety Education in Nursing (QSEN) concepts are emphasized. This course provides a foundation for the baccalaureate nurse to have a solid understanding of the broader professional standards of moral, ethical, and legal conduct in the nursing profession and to facilitate the role of the nurse as a change agent.

NUR 401 Organizational and Healthcare Systems Leadership 3 Credits

This course provides a foundation of principles of leadership based on contemporary needs for qualified nursing leaders who can function and manage in complex healthcare delivery environments. Learning activities and assignments will focus on strategies for self-assessment and self-reflection of one's own leadership skills, knowledge, and attitudes that foster and promote nursing leadership in diverse healthcare delivery settings, and strategies for best practice in nursing leadership in the 21st century.

NUR 402 Scholarship in Evidence-Based Practice 3 Credits

This course provides a foundation of evidence-based research principles to translate evidence into practice and how research informs professional nursing practice to improve patient safety and outcomes. Learning activities and assignments will focus on strategies for learning how to assess scientific merit of data-driven research, apply evidence-based practice in appropriate ways, monitor and evaluate the impact of evidence-based practice on informed nursing practice and outcomes of care as well as collaborate with interprofessional health care teams to improve patient safety and outcomes in a variety of healthcare delivery settings.

NUR 403 Information Management and Application of Patient Care Technology 3 Credits

This course provides a foundation of information management and application of patient care technology to enhance and improve patient safety and outcomes by examining linkages between information management systems and patient care technologies that support and are linked to safe nursing practice. The course examines how technology is used to inform nursing practice and enhance patient safety by applying safeguards and decision making support tools embedded in the technologies. Students are exposed to effective clinical information systems (CIS) to document nursing care, examine the ethical components of protecting patient information, challenges with data security, regulatory requirements, confidentiality and rights to privacy as well as examine the role of the professional nurse in updating and garnering information management resources and applying them in patient care settings.

NUR 404 Healthcare Policy, Finance, and Regulatory Environments 3 Credits

This course provides a foundation of U.S. healthcare policy, including financial and regulatory policies, as well as the nature and functioning of the U.S. healthcare delivery system. There is emphasis on policy processes at the organizational, local, state, national, and global levels. Learning activities and assignments focus on strategies for learning how to assess the role of the baccalaureate-prepared nurse in policy formation and reformation at all levels, demonstrating understanding of the political process at all levels, developing effective advocacy strategies for vulnerable populations, how to identify and influence key stakeholders in the policy process, the importance of effective communication of key healthcare issues, and how to influence change in the political process at all levels when there is social injustice.

NUR 405 Interprofessional Collaboration and Communication for Improving Healthcare Outcomes 3 Credits

This course provides a foundation of key concepts essential to promotion of effective interprofessional collaboration and communication for improving healthcare outcomes and patient safety. There is emphasis in the course on examination of the roles and perspectives of scope of practice for selected healthcare disciplines in intra-and interprofessional healthcare teams to improve healthcare outcomes and promote patient safety, and on effective strategies for advocacy and communication patterns in healthcare delivery settings as healthcare professionals develop trust and respect for all members of the healthcare team while recognizing unique differences and contributions of roles to patient safety and outcomes.

NUR 406 Population Health Promotion and Prevention Across the Lifespan 3 Credits

This course provides a foundation of key concepts essential to population-focused nursing, the aggregate, community or population as the unit of care. The focus of the course is on health promotion/disease prevention with emphasis on the professional nurse role in clinical prevention of disease and care of populations applying concepts of primary, secondary, and tertiary health promotion across the lifespan, identifying determinates of health, prioritizing primary prevention across the lifespan, actively identifying and targeting populations benefitting from evidence-based preventive initiatives and clinical preventive guidelines, assessment strategies for individuals and populations, applying evidence-based practice to health promotion/risk reduction, and being an advocate for vulnerable and disenfranchised populations without resources or a voice.

NUR 407 Cultural Diversity in a Global Society 3 Credits

This course provides a foundation of key concepts essential to nursing care and professional nursing leadership in assessment, planning, design, implementation, and evaluation of the knowledge, skills, and attitudes they must have as leaders of healthcare delivery focusing on improved system safety and effectiveness. There is particular emphasis on the nursing leadership role at the baccalaureate level for nursing to recognize, interrupt, evaluate, and correct healthcare errors and to implement safety principles and work with others to create a safe, caring environment for every healthcare delivery encounter as they provide care themselves, are acting in a leadership capacity, or are overseeing and delegating to other non-licensed assistive personnel. The course content focuses on identification, assessment, planning, design, and evaluation of evidence-based practice change to improve patient safety and outcomes.

NUR 408 Gerontological Nursing Concept 3 Credits

This course provides a foundation of key concepts essential to care of an aging population in a complex society. Given the diverse health status of the aging population, professional nurses must be able to develop competencies to provide high quality care to aging adults and their families or significant others. Specifically the course focuses on increased diversity and complexity of an aging society and selected health care needs, life transitions of aging adults, normal body system changes occurring with the aging process, the professional nurse role in principled care provided to a vulnerable population, and the role of the professional nurse as advocate and caregiver promoting the concepts of quality end-of-life care for aging adults, including pain and symptom management honoring the autonomy and self-wish of the aging client.

NUR 409 BSN Capstone 3 Credits

This course provides a foundation of key concepts essential to nursing care and professional nursing leadership in assessment, planning, design, implementation, and evaluation of the knowledge, skills, and attitudes they must have as leaders of healthcare delivery focusing on improved system safety and effectiveness. There is particular emphasis on the nursing leadership role at the baccalaureate level for nursing to recognize, interrupt, evaluate, and correct healthcare errors and to implement safety principles and work with others to create a safe, caring environment for every healthcare delivery encounter as they provide care themselves, are acting in a leadership capacity or are overseeing and delegating to other non-licensed assistive personnel. The course content focuses on identification, assessment, planning, design, and evaluation of evidence-based practice change to improve patient safety and outcomes.

Prerequisite(s): NUR 402, NUR 405.

Organizational Psychology

Program Overview

Are you interested in knowing what motivates a person to perform well at a job, or what qualities a company needs to look for to make a great hire? Today's businesses and organizations need professionals who understand human behavior, group dynamics and how to make the workplace function better. A major in Organizational Psychology will help prepare you for a career in one of America's fastest-growing professions.

Curriculum Overview

Rider University's program is one of just a handful in the nation offering a unique interdisciplinary major that combines business and psychology. This versatile degree can have a real impact on an organization's bottom line by helping to improve employee satisfaction and job performance. Majors in this program will gain a comprehensive understanding of the important contributions that organizational psychology plays in today's workplace.

The Organizational Psychology program focuses on the behavioral aspects of managing and supervising the human resources of an organization or business. You will learn the key concepts of management and psychology, including perception and attitudes, employee motivation and engagement, and organizational leadership and power — and gain an in-depth understanding of what makes employees and organizations function at their best.

As an Organizational Psychology major, you will:

- Develop a comprehensive understanding of human behavior in work settings;
- Learn how to enhance performance within an organization or business;
- Benefit from networking and gain real-world experience through internships and other professional opportunities.

The U.S. Bureau of Labor Statistics ranks Industrial-Organizational Psychology at the top of its list of 20-fastest growing occupations, with a projected growth rate of 53 percent between now and 2022. Organizational psychologists are in demand because their expertise results in better hires, increased productivity, reduced turnover and lower labor costs. They can work as consultants to organizations, or serve in-house in a variety of jobs, including:

- Human resource officer
- Employee development manager
- Organizational development director
- Quality performance manager
- Organizational psychologist
- Testing specialist
- Compensation and benefits specialist

Student Learning Outcomes

1. **Theory:** Students will demonstrate knowledge of major concepts, theoretical perspectives, and empirical findings within the field of organizational psychology. This will include study of organizational and career development, human decision making and performance, human factors, consumer behavior, group dynamics, and job and task analysis.

2. **Research:** Students will learn to plan, conduct, and critically evaluate psychological research on human behavior in organizations and work environments. Knowledge of ethical research practice, diversity issues, and effective written and oral communication will be emphasized.
3. **Practice:** Students will develop interpersonal and intrapersonal knowledge that fosters self-awareness, personal growth, and the development of leadership skills. Students will apply psychological knowledge and skills to promote attainment of post-graduation goals through participation in internships, organizational research, and/or leadership opportunities.

Organizational Psychology Certificate

The Organizational Psychology certificate provides a science-based, practical skill set for anyone who seeks better preparation for professional success and advancement opportunities, regardless of college majors (be they in business, arts, humanities, science or education) and post-graduate paths (in for-profit and non-profit organizations alike). The certificate offers rigorous training in the areas of Psychology that have direct, valuable applications to organizations, including: motivation, decision making, group dynamics, persuasion, leadership, and innovation.

Honors Program in Psychology

A student may receive honors in psychology by fulfilling the following conditions beyond the basic requirements for the psychology major: complete one Independent Research and Study project (490); earn a cumulative average of 3.25 and an average of 3.5 in psychology at the time of graduation.

Degree Offered

- B.A. in Organizational Psychology
- Certificate in Organizational Psychology

³ The following courses fulfill the Psychology Elective requirement: PSY 215, PSY 225, PSY 315, PSY 400, and PSY 490.

⁴ Courses which fulfill the General Education Curriculum can be found at: https://nextcatalog.rider.edu/undergraduate/colleges-schools/liberal-arts-sciences/general_education_requirements/ (http://catalog.rider.edu/undergraduate/colleges-schools/liberal-arts-sciences/general_education_requirements/)

Courses and Descriptions

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

HRM 315 Employee Selection & Training 3 Credits

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.
Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

Prerequisite(s): MGT 310.

Footnotes

¹ For course placement information see <http://www.rider.edu/offices-services/orientation/course-placement> (<http://www.rider.edu/offices-services/new-student-orientation/placement-testing-information/>)

² Please note that elective credits may be used to complete requirements in a second major or minor.

HRM 333 Employee Engagement 3 Credits

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

Prerequisite(s): MGT 310.

MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

Prerequisite(s): minimum 30 credits completed.

MGT 310 Intro to Human Resource Mgmt 3 Credits

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

Prerequisite(s): MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.

Prerequisite(s): MGT 201 or PSY 210.

MGT 355 Team Management 3 Credits

This course prepares students to work in organizations that use teams as an integral part of their functioning-an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

Prerequisite(s): MGT 201 or PSY 210.

MGT 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

Prerequisite(s): MGT 201 or permission of instructor.

MSD 105 Quantitative Methods for Business 3 Credits

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 205 Business Statistics 3 Credits

This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.

Prerequisite(s): MSD 105.

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 102 Explorations in Psychology Honors 3 Credits

The course introduces the history of psychology, and demonstrates how the discipline is a science. It provides students with experience exploring the mind, behavior, and the relationship between the two, from multiple perspectives, including biological, behavioral, cognitive, developmental, humanistic, social, and abnormal. It tackles questions including (but not limited to) how different areas of the brain are involved in behavior and are affected by injury, how humans sense and perceive the world, how states of consciousness differ from one another, how humans learn, remember, communicate, and develop, what motivates humans to behave in particular ways, how social groups affect behavior and decision-making, and what happens when behavior and emotions deviate from what is typical.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 110 Psychology: The Science of Well-being 3 Credits

This course is an overview of the science of psychology applied to the question of how to build well-being. The framework for PSY 110 mirrors Introduction to Psychology in its presentation of the major perspectives in psychology – Research Methods, Behaviorism, Cognition, Development, Social Behavior, Motivation and Mental Health. Topics in PSY 110 include: Perspectives in Psychology, Research Methods, Relationships, Social Behavior, Developmental Psychology, Behavior and Cognition, Motivation, Self & Identity, Positive Psychology, Optimism.

PSY 117 Psychology of Creativity 3 Credits

Is creativity reserved only for geniuses, or can ordinary individuals also be creative? Is it domain-specific or domain-general? How do we measure it? What is the connection between creativity and innovation? Can you and I become more creative, and if so, what factors influence creative thinking? This course surveys the modern theories of creativity and problem solving from a psychological perspective, and their applications to real-world challenges. Specific topics will focus on convergent and divergent thinking, the role of constraints, change, and motivation in creativity, social and personality factors, techniques such as brainstorming, design thinking, and creative problem solving, and innovation in organizations. You will apply what you have learned in hands-on activities that challenge you to propose creative solutions to real-world problems.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 210 Organizational Psychology 3 Credits

Focuses on issues related to human behavior in work settings. Topics include personnel issues such as hiring and promotion decisions, performance appraisals, and methods of on-the-job training. Issues of job satisfaction, motivation, productivity, and effective leadership styles are also examined. Finally, organizational structure as it relates to communication within organizations will be examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 212 Introduction to Applied Behavior Analysis 3 Credits

Presents a review of classical and operant conditioning, data collection and research design, data analysis and interpretation. In addition, assessment and treatment strategies in a variety of settings, contingency management in institution, classroom and home, systematic self-desensitization, and ethical consideration are discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 226 Cognitive Psychology 3 Credits

The study of the mind has been the focus of psychology since its inception in the 19th century. Today, the majority of psychological research focuses on the cognitive system and its biological basis. This course will provide an overview of knowledge regarding the components of the human cognitive system (e.g., attention, memory, executive processes) and how they form the basis for higher-order cognitive skills (e.g., language and decision making). The course will provide a history of the field and the methodologies that have been and are currently being used to study the human mind. Each section of the course will include an overview of basic and applied research to demonstrate how knowledge of the cognitive system can be used to enhance human functioning in applied settings and better understand human limitations and tendencies to commit certain types of errors.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 245 Stress, Health and Coping 3 Credits

This course will examine physical and psychological effects of stress including a discussion of the nervous system, and the various models of the stress/illness relationship such as General Adaptation, Cognitive Appraisal and Diathesis-Stress. Various ways of coping with/responding to stress will be considered along with the influence of personality and sociodemographic factors on differences in both the experience of stress and on coping mechanisms will be considered. Finally, this course will consider issues in the measurement of stress and coping as well as some of the noteworthy findings and methodological aspects of stress research.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers the general areas of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 367 Creativity and Innovation 3 Credits

What is creativity, and how do we measure, study, and enhance it? This course will survey the modern theories of creativity from a psychological perspective, with an emphasis on the processes that underlie creative thinking and the variables that influence creative idea generation. Specific topics will include: convergent and divergent thinking, the role of the unconscious in creative ideation, flow and mindfulness, individual and group creativity, techniques such as brainstorming and creative problem solving, the neuroscience of creativity, the role of motivation, and creativity and innovation in organizations. Discussions of theoretical findings will be complemented by in-class activities and assignments that highlight applications to day-to-day living and to larger-scale challenges that require creativity and innovation.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 379 Psychology and Law 3 Credits

Introduces students to a study of selected topics in psychology and law. Topics include eyewitness testimony, jury selection, and decision-making.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 383 Psychology and Culture 3 Credits

Students enrolled in this course will critically examine the intersection of culture and psychology. Topics covered include cultural influences on: identity, the perceptions and manifestations of mental illness, and treatment-seeking.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 384 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 384 is cross-listed with PSY 584.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion, and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional-quality writing, oral or multimedia presentations.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 75 credits.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and PSY 201 and 75 credits.

Organizational Psychology B.A. Online

Overview

Are you interested in knowing what motivates a person to perform well at a job, or what qualities a company needs to look for to make a great hire? Today's businesses and organizations need professionals who understand human behavior, group dynamics, and how to make the workplace function better. A major in Organizational Psychology as a Continuing Education student will help prepare you for a career in one of America's fastest-growing professions.

Curriculum Overview

Rider University's program is one of just a handful in the nation offering a unique interdisciplinary major that combines business and psychology. This versatile degree can have a real impact on an organization's bottom line by helping to improve employee satisfaction and job performance. Majors in this program will gain a comprehensive understanding of the important contributions that organizational psychology plays in today's workplace.

The Organizational Psychology program focuses on the behavioral aspects of managing and supervising the human resources of an organization or business. You will learn the key concepts of management and psychology, including perception and attitudes, employee motivation and engagement, and organizational leadership and power — and gain an in-depth understanding of what makes employees and organizations function at their best.

As an Organizational Psychology major, you will:

- Develop a comprehensive understanding of human behavior in work settings
- Learn how to enhance performance within an organization or business
- Benefit from networking and gain real-world experience through internships and other professional opportunities

The U.S. Bureau of Labor Statistics ranks Industrial-Organizational Psychology at the top of its list of 20-fastest growing occupations, with a projected growth rate of 53 percent between now and 2022. Organizational psychologists are in demand because their expertise results in better hires, increased productivity, reduced turnover and lower labor costs. They can work as consultants to organizations, or serve in-house in a variety of jobs, including:

- Human resource officer
- Employee development manager
- Organizational development director
- Quality performance manager
- Organizational psychologist
- Testing specialist
- Compensation and benefits specialist

Student Learning Outcomes

1. **Theory:** Students will demonstrate knowledge of major concepts, theoretical perspectives, and empirical findings within the field of organizational psychology. This will include study of organizational and career development, human decision making and performance, human factors, consumer behavior, group dynamics, and job and task analysis.
2. **Research:** Students will learn to plan, conduct, and critically evaluate psychological research on human behavior in organizations and work environments. Knowledge of ethical research practice, diversity issues, and effective written and oral communication will be emphasized.
3. **Practice:** Students will develop interpersonal and intrapersonal knowledge that fosters self-awareness, personal growth, and the development of leadership skills. Students will apply psychological knowledge and skills to promote attainment of post-graduation goals

through participation in internships, organizational research, and/or leadership opportunities.

Honors Program in Psychology

A student may receive honors in psychology by fulfilling the following conditions beyond the basic requirements for the psychology major: complete one Independent Research and Study project (490); earn a cumulative average of 3.25 and an average of 3.5 in psychology at the time of graduation.

Total Credits		40

¹ MSD 105 is a prerequisite for MSD 205 and must be completed first.

² Students may take either PSY 490 or MGT 490 to satisfy major requirements, but may not count both courses towards the major requirements.

HRM 315 Employee Selection & Training 3 Credits

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.

Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

Prerequisite(s): MGT 310.

HRM 333 Employee Engagement 3 Credits

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

Prerequisite(s): MGT 310.

MGT 310 Intro to Human Resource Mgmt 3 Credits

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

Prerequisite(s): MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.

Prerequisite(s): MGT 201 or PSY 210.

MGT 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 329L Research Methods: Org Psy Lab 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 355 Team Management 3 Credits

This course prepares students to work in organizations that use teams as an integral part of their functioning-an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

Prerequisite(s): MGT 201 or PSY 210.

MGT 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

Prerequisite(s): MGT 201 or permission of instructor.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers the general areas of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion, and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional-quality writing, oral or multimedia presentations.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 75 credits.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and PSY 201 and 75 credits.

Philosophy

Program Overview

The study of philosophy explores fundamental questions about persons and the universe. What is knowledge? What is the meaning of life? What is reality? How do psychology, religion, art, history, and science contribute to an understanding of the world and our place in it?

At Rider, philosophy students are encouraged to apply these questions toward pragmatic ends, with emphasis on both the academic discourse community and developing specific skills useful beyond the classroom. Specifically, the program teaches students how to formulate and defend positions, speak articulately and listen objectively, write clearly and persuasively, read complex material with comprehension, summarize and organize challenging materials and reason analytically and inferentially.

Curriculum Overview

Students begin with introductory courses in the teachings of Plato and Aristotle, the basics of logic and language and an historical and systematic analysis of ethics. Later coursework can focus on particular movements of philosophy including Modern Philosophy, Asian philosophy, Existentialism, Nietzsche's concept of nihilism, the philosophies of Wittgenstein and Hume, as well as a wide range of other courses related to the field. Most classes are taught as small weekly meetings in which students discuss the material in an intimate, supportive setting.

Introductory philosophy courses also hold small weekly discussion groups. In both upper and lower division courses students are also given the opportunity to develop their ability to verbally express their opinions and argue their basic points persuasively. During their senior year, students hone their writing and rhetorical skills by completing a thesis on a philosophic topic of their choice in consultation with a faculty advisor.

Student Learning Outcomes

Graduates of the Philosophy minor will be able to:

1. Recognize and interpret claims; recognize and reconstruct arguments; and evaluate arguments and justifications.
2. Articulate the main tenets of major philosophical schools and movements of thought in the history of philosophy and apply their knowledge to contemporary philosophical controversies and issues.
3. Take an active role in the discussion of philosophical issues; articulate and defend their views on controversial issues, and demonstrate open-mindedness in engaging other points of view.
4. Construct coherent and logical essays and other writings and use sources appropriately in accordance with the standards of the discipline.

Honors Program

Honors in philosophy may be achieved, upon the recommendation of the department, by earning a 3.5 cumulative average in the discipline and completing the senior thesis with distinction.

Philosophy Minor Requirements

(18 credits)

Code	Title	Credits
PHL 100	Plato and Aristotle	3
	One 400-level philosophy seminar	3
	Four philosophy electives, including one at the 300-level or above	12
Total Credits		18

Courses and Descriptions

PHL 100 Plato and Aristotle 3 Credits

The beginnings of Western scientific and humanistic thought among the early Greeks and their progress into the two great systems of Plato and Aristotle. Selections from Plato and Aristotle are read and discussed to determine the meaning and significance of philosophical ideas that have subsequently influenced the whole history of Western civilization. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 102 Philosophical Thinking 3 Credits

An introduction to philosophical thought with an emphasis on the enduring questions and problems of philosophy. We will explore such questions as: how do I know I am not dreaming? Is there an external world? What is truth? Is there a self? Is there a God? What is the relationship between the mind and the body? How can I tell right from wrong? What makes government legitimate? What is justice? What is the meaning of life? We will consider answers to these questions from diverse philosophical traditions, reading such philosophers as Plato, Descartes, Zhuangzi, Hume, Vasubandhu, Berkeley, Aquinas, Avicenna, Udayana, Kant, Mill, Russell, Camus, and Nishitani. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 110 Logic and Language 3 Credits

A study of the logical structure of argumentation in ordinary language, with an emphasis on the relation of logic to the uses of language in practical affairs. Traditional informal fallacies are studied as well. Discussions explore the nature of validity, truth, meaning, and evidence in relation to the evaluation of arguments. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 115 Ethics 3 Credits

A combined historical and systematic analysis of the problems of ethics. Such problems as the nature and meaning of moral values and judgments, moral responsibility and freedom, conscience and happiness, the good life, and the relativity of value, are explored through the writings of such philosophers as Plato, Aristotle, Aquinas, Kant, Mill, and Nietzsche. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 120 American Philosophy 3 Credits

The development of philosophical thought in the United States from the colonial era to the 20th century. Studies such thinkers as Edwards, Jefferson, Emerson, Thoreau, Peirce, James, Dewey, and King, and their ideas on human nature, free will, religion, morality, and politics. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 125 Philosophies of Education 3 Credits

Studies classical and contemporary theories of the nature, structure, and aims of education, including major works of such philosophers as Plato, Rousseau, and Dewey. The course will also introduce students to methods of critical philosophical analysis. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 130 Political Philosophy 3 Credits

An introduction to the problems of political philosophy with an emphasis on recent and contemporary issues, such as the conflict between liberal and conservative ideologies, fascism, revolution, civil disobedience, and the concept of legitimate political authority. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 202 Social Philosophy 3 Credits

Emphasizes social ethics through critical studies of such contemporary problems as abortion, euthanasia, the death penalty, pornography and censorship, animal rights, drug use, sexual morality, environmental ethics, and world hunger. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 203 Business Ethics 3 Credits

Surveys and examines ethical problems concerning the institutions and practices of contemporary business. Problems considered include: the conflicts of economic freedom and social responsibility; the relation of profits to work and alienation; the responsibilities of business to employees, minorities, consumers and the environment; the role of truthfulness in business practices; and the ethics of self-fulfillment and career ambitions. Readings selected from works of contemporary and historical philosophers, social theorists, and business people.

PHL 207 Asian Philosophy 3 Credits

A survey of the principal philosophical perspectives of Asia. Emphasis on the traditional Indian schools of Hinduism, Jainism, and Buddhism, Chinese Confucianism and Taoism, and the development of Zen Buddhism in China and Japan. Philosophical topics include: mystical experience, the ultimate nature of reality, the existence of a soul, the causes of human suffering, and the possibility of release, the nature of virtue and its development, and the nature of society and government. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 210 Symbolic Logic 3 Credits

An introduction to logic from the standpoint of modern symbolic methods, including techniques of formal deductive proof, quantification, the logic of relations, and properties of formal deductive systems. Discussions focus on philosophical issues in recent and contemporary logical theory. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 215 Environmental Ethics 3 Credits

A comprehensive introduction to environmental ethics that examines the major theoretical approaches, including anthropocentric (human-centered), zoocentric or sentientist (animal-centered), and biocentric or ecocentric (nature-centered) value systems, as well as the most important critiques of these ethical approaches. We will examine and analyze several classical ethical theories that are particularly relevant to a study of contemporary environmental controversies. We will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption. Students will analyze and discuss the ethical dimensions of several contemporary environmental controversies. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 225 Modern Philosophy 3 Credits

Examines one of the most exciting periods in the history of philosophy during which philosophers from Descartes to Kant tried to come to terms with the following questions: What is knowledge? Can we know the physical world exists? Can we have scientific knowledge? Can we know God exists? Can we even know whether we exist? The works of Descartes, Leibniz, Spinoza, Locke, Berkeley, Hume and Kant are read and discussed. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 230 Philosophy of the Sexes 3 Credits

Studies philosophical views of the differences between the sexes, sexual equality, love, marriage, and the family from ancient Greece to the 20th century. Texts from the contemporary women's and men's movements will also be examined. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 303 Philosophy of Law 3 Credits

An examination and analysis of selected topics including classical and contemporary theories in the philosophy of law and moral philosophy. Such topics as the nature of the law and legal reasoning, the legal enforcement of morality, protection of personal liberty, and the moral justification of punishment are considered. Such philosophers as Aquinas, Austin, Holmes, Bentham, Hart, and Dworkin are read and discussed.

PHL 304 Medical Ethics 3 Credits

Introduces the student to ethical problems associated with the practice of medicine, the pursuit of biomedical research, and health care social policy. The course will explore such issues as: Is a physician morally obligated to tell a terminally ill patient that he or she is dying? Is society ever justified in enacting laws that would commit an individual, against his or her will, to a mental institution? Does society have a moral obligation to ensure that all its members have access to health care? To what extent, if at all, is it ethically acceptable to clone a human being? Under what conditions is human experimentation ethically acceptable?

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 310 Problems in 20th-Century Philosophy 3 Credits

Consideration of major philosophical movements in the 20th century such as phenomenology, existentialism, pragmatism, and analytic philosophy. Within these movements such topics as the function of analysis, language and meaning, the nature of values, the nature of persons, the synthetic-analytic distinction, the mind-body problem, and the possibility of metaphysics are considered. The work of such figures as Wittgenstein, Russell, Heidegger, Husserl, Sartre, Whitehead, and Dewey are read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 315 Existentialism 3 Credits

Historical development and contemporary problems of existentialism with emphasis on the nature of man, his ability to know his situation, the relation between existence and essence, and the meaning of human life and activity. The works of such figures as Kierkegaard, Sartre, Heidegger, Camus, Kafka, Beckett, Buber, Laing, and Frankl are read and discussed.

PHL 320 Philosophy of Science 3 Credits

The logic of fundamental concepts of science and scientific methods are studied. Patterns of explanation are examined to understand the functions of laws, theories, and predictions in science. Inquiry is made into the relation between mathematics and empirical science; similarities and distinctions between the natural and social sciences. The role of science in human affairs and the value of scientific knowledge.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 334 Theories of Knowledge 3 Credits

An investigation of selected, representative theories of knowledge from classical and contemporary sources. Considers the analytic-synthetic distinctions, necessary truth, and the foundations of empirical knowledge. Such philosophers as Leibniz, Hume, Kant, Russell, and Quine are read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 336 Philosophy of Mind 3 Credits

An investigation of the nature, existence, and capacities of the mind and self in the light of recent philosophical and psychological theories, including psychoanalysis and behaviorism. Considers such topics as the interaction of mind and body, the unconscious, minds and machines, freedom of thought and action.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 343 Theories of Reality 3 Credits

An examination of metaphysical problems with an emphasis on philosophical views of human nature from ancient Greece to contemporary evolutionary theories. The writings of such classical, modern, and contemporary figures as Plato, Aristotle, Descartes, Kant, Hegel, and Darwin are read and discussed. Issues studied include the relation between mind and matter, freedom and determinism, and the existence of God.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 348 Indian Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of India. Emphasis on the disputes between the traditional Hindu and Buddhist schools of the classical period over logic, knowledge, and reality. Philosophical topics include: skepticism, the problem of universals, realism and idealism, the nature of perception, the problem of induction, the nature of causality, and the problem of identity over time. Philosophers such as Nagarjuna, Vasubandhu, Vatsyayana, Dharmakirti, and Udayana will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 358 Chinese Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of China. Emphasis on the political philosophies of ancient China. Topics include: human nature and the development of virtue, the nature and purpose of government, and the cognitive value of mystical experience. Philosophers such as Confucius, Laozi, Xunzi, Mencius, Mozi, and Zhuangzi will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 360 Contemporary Ethics 3 Credits

An examination of recent and contemporary challenges to traditional ethical theory including such movements as logical positivism, cultural relativism, feminism, environmentalism, multiculturalism, and postmodernism. Such problems as the meaning and cognitive status of value judgments, the relation between fact and value, the relativity of values, and how value judgments can be justified are considered.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 368 Japanese Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of Japan, with an emphasis on Zen Buddhism in Medieval Japan and the Kyoto school in the 20th century. Topics include: the use of meditation and koans in Zen practice, the relationship between practice and enlightenment, the nature of time, meaning and nihilism, and the relationship between science and religion. Philosophers such as Kukai, Mumon, Dogen, and Nishitani will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 402 Nietzsche and Nihilism 3 Credits

A seminar dealing with Nietzsche's provocative ideas on nihilism and the possibility of creating meaning, value, and truth for human existence. Many of his important works are read, analyzed, and critically discussed. Recent scholarly interpretations of Nietzsche's philosophy are considered.

Prerequisite(s): any previous philosophy course or permission of instructor.

PHL 408 The Philosophy of William James 3 Credits

Seminar involving a concentrated study of William James' contributions to philosophy with special attention to his pragmatism, pluralism, and radical empiricism. Many of James' philosophical works are read, analyzed, and critically discussed. Recent scholarly interpretations of James' philosophy are considered.

PHL 418 Great Buddhist Thinkers 3 Credits

Concentrated study of a single Buddhist philosopher, emphasizing the systematic views of that philosopher across a range of philosophical issues. Through an examination of primary sources in translation and recent scholarship, students will investigate the views and arguments of one important figure from the Buddhist philosophical tradition on a variety of philosophical problems regarding knowledge, existence, consciousness, religion, and ethics.

PHL 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

PHL 494 Preparation and Research for Senior Philosophy Thesis 1 Credits

Supervised by a faculty member, the Philosophy major chooses a topic, composes an outline and a bibliography. Must be completed prior to enrolling in PHL 495.

PHL 495 Senior Philosophy Thesis 3 Credits

In a tutorial setting, the Philosophy major will write a thesis which serves as the Capstone Experience in the Department.

Prerequisite(s): PHL 494.

Physics

Program Overview

Physics students at Rider develop a rigorous understanding of the natural world and the forces that govern it through a combination of traditional classes and hands-on laboratory experience. The small classes focus on a variety of topics including classical and modern physics, as well as scientific computing techniques and astrophysics. Physics students are presented with multiple research opportunities with our faculty, who actively attend national meetings and publish in international peer-reviewed journals.

The physics minor helps students seeking entrance to graduate or medical school as well as careers in physics, law, education, and business. This minor helps students develop laboratory skills, written and oral skills, as well as understanding how the laws of physics apply and can be manipulated or utilized in the real world.

Minor Offered

Physics Minor Requirements

(20 credits)

Code	Title	Credits
PHY 200 & 200L	General Physics I and General Physics I Lab	4
PHY 201 & 201L	General Physics II and General Physics II Lab	4
PHY 203	Introduction to Modern Physics	3
PHY 300	Mechanics	3

PHY 305	Electricity and Magnetism	3
One additional 300- or 400-level physics (PHY) course		3
Total Credits		20

Courses and Descriptions

PHY 200 General Physics I 4 Credits

Introductory classical physics; Newtonian mechanics, including the conservation laws, wave motion, gravity, thermodynamics. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 210 or concurrent enrollment

Corequisite(s): PHY 200L.

PHY 200L General Physics I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 200.

PHY 201 General Physics II 4 Credits

A continuation of the concepts developed in Physics 200. Electricity, electrical circuits, magnetism, Maxwell's equations. Light and optics, including lenses, interference, and diffraction. Three hours of lecture and one three-hour lab per week. Prerequisite(s): PHY 200, MTH 211 or concurrent enrollment.

Corequisite(s): PHY 201L.

PHY 201L General Physics II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 201.

PHY 203 Introduction to Modern Physics 3 Credits

Covers space-time relativity, elementary particles, and basic quantum mechanics, including solutions of the Schrodinger wave equation. Applications of quantum theory in atomic, nuclear, and solid-state physics.

Prerequisite(s): PHY 201 or permission of instructor.

PHY 300 Mechanics 3 Credits

Kinematics and dynamics of particles and systems, analysis of harmonic oscillator systems, normal modes, Lagrangian and Hamiltonian dynamics and classical waves are studied.

Prerequisite(s): PHY 201, MTH 250.

PHY 305 Electricity and Magnetism 3 Credits

Electro- and magnetostatics, fields and potentials, and boundary value problems are covered.

Prerequisite(s): PHY 201, MTH 250.

PHY 310 Advanced Electricity and Magnetism 3 Credits

Maxwell's equations; electromagnetic waves in vacuum and in material media; radiation, propagation, reflection, and refraction.

Prerequisite(s): PHY 305, MTH 308.

PHY 315 Thermodynamics and Statistical Mechanics 3 Credits

Thermodynamic systems; the first and second laws of thermodynamics; entropy and thermodynamic potentials; distribution of molecular speeds; Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac distributions.

Prerequisite(s): PHY 201.

PHY 320 Quantum Mechanics 3 Credits

Historical background; the Bohr Theory; the Schrodinger equation, its interpretation and applications; the uncertainty and exclusion principles; development of the formalism.

Prerequisite(s): PHY 300.

PHY 330 Basic Electronics 3 Credits

An experimental study of devices and circuits in analog and digital electronics. No previous experience with electronic circuits is assumed; introductory topics including signal acquisition, computer interfaces, and analog/digital signal processing will be covered. One hour of lecture plus two three-hour labs per week.

Prerequisite(s): PHY 201 or permission of instructor.

PHY 350 Advanced Laboratory 2 Credits

Experiments in atomic and nuclear physics, electricity and magnetism, and physical optics. Students have the opportunity to work intensively on a particular experiment. Minimum of five to six hours per week.

PHY 400 Atomic Physics 3 Credits

Quantum mechanics and the one-electron atom; atomic structure and optical spectra of multi-electron atoms. Quantum statistics, band theory of solids.

Prerequisite(s): PHY 320.

PHY 405 Fundamentals of Nuclear Physics 3 Credits

Nuclear mass and size; nuclear forces and some models of the nucleus; radioactivity and detection; subnuclear particles and resonances.

Prerequisite(s): PHY 320.

PHY 415 Physical Optics 3 Credits

Waves and the superposition principle; interference, Fraunhofer and Fresnel diffraction; electromagnetic nature of light; absorption and scattering; dispersion; polarization.

Prerequisite(s): PHY 201, MTH 250.

PHY 416 Modern Experimental Optics Lab 1 Credits

A laboratory course in geometrical and physical (wave) optics, designed to supplement the material presented in PHY 415. Serves as an introduction to the optical equipment and techniques that are employed in laboratory research. A series of experiments cover the topics of polarization, interference, image formation, Fourier optics and lasers, and optical spectroscopy.

Prerequisite(s): PHY 201.

PHY 450 Topics in Modern Physics 3 Credits

A selected topic of contemporary interest in physics, e.g., general relativity and gravity waves, is studied. Emphasis on current journal literature and research. May be taken more than once with departmental approval. An excellent introduction to independent research in one area of physics.

Prerequisite(s): PHY 201.

PHY 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

PHY 491 Internship in Physics 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the student's overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Political Communication

Program Overview

Political communication is an interdisciplinary minor that is designed to investigate the manner in which new technologies and strategies of communication change the emerging political order, and the manner in which the emerging political order structures the dissemination of information among citizens of the United States and other nations.

The minor in political communications provides preparation for those students planning further study in graduate or law school, careers in government, international affairs, political campaigns, political journalism, or private business concerned with government activity. Moreover, students will further their abilities to construct arguments based upon ethical and relevant data, think clearly and critically, and develop the facility to express themselves persuasively.

POL 491	Internship in Political Science

Total Credits 21

¹ May not be counted toward the minor by Communication and Journalism majors.

² Only one special project may be counted toward the minor.

Courses and Descriptions

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 205 Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

GLS 180 Understanding Global Relations 3 Credits

Offers an introduction to Global and Multinational Studies by exposing the student to basic concepts necessary to understand the dynamics underlying the emerging worldwide society of diverse nations. The student will become acquainted with the mechanisms by which contacts are built across nations, and the factors that shape the conception of and relations with "the other."

POL 210 Public Opinion 3 Credits

Public opinion as a social force and as expression of public sentiment on political and social issues. Topics include: development and dissemination of opinions, the measurement of public opinion, public opinion and governmental processes, and the reciprocal relationship between mass media and public opinion.

POL 230 Methods of Political Analysis 3 Credits

An overview of the various qualitative and quantitative methods that political scientists use to study their discipline. Themes include analyses of political participation and support, methods of studying elections, measures of political tolerance and liberalism.

POL 247 Political Campaigning 3 Credits

This course entails the study of campaigning for political office at the federal, state and local levels in the United States. While attention will be given to how the broader political environment and specific factors, e.g., partisanship, hot button issues, local interests, and money, affect the nature of campaigns, the course's primary focus will be on how to organize and conduct a successful and ethical campaign, including how to collect and analyze pertinent data, manage a staff, develop a communications plan, including social media, and get out the vote.

POL 295 Special Topics in Political Science 3 Credits

For non-seniors who engage in serious research in political science. Topic to be approved by instructor and department chairperson.

POL 301 Civil Liberties in the U.S. 3 Credits

The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as HLS 301. Students may not get credit for both HLS 301 and POL 301.

POL 305 Political Parties and Electoral Behavior 3 Credits

The structure, character, and functions of U.S. political parties and pressure groups, and their impact on public policy. Parties are analyzed within the broader scope of organizational theory and comparative party systems. Major emphases on their historical origins, their role in contemporary political life, and particular aspects of party politics—local organization, membership, campaigning and elections, policy-making roles, and leadership.

POL 306 American Political Film 3 Credits

This course analyzes the structure, history, and impact of the genre of political film. It begins with a discussion of how one distinguishes a political film from other forms of cinema. It then proposes insights into the manner in which these films evoke a particular time and place in politics, affect the viewer's interpretation of a political event or figure, and have an effect upon a viewer's political perceptions or behavior. The student will also learn to review films critically, both as political statements and as effective (or ineffective) conveyors of political messages.

POL 307 Political Communication 3 Credits

The meaning and uses of political communication are examined, the manner and forms such communication takes, and the history of political discourse. Major topics include the role of communication in elections and the development of public policy, how political communication strategies have changed with the rise of mass media, and the development of national and international publics for discourse.

POL 313 American Presidency 3 Credits

A description and analysis of the American presidency: its historical development, the internal organization, and ecological context. Basic issues include the intent of the framers of the Constitution, the historical accumulation of presidential powers, and institutional limits on presidential power (e.g., Congress and the bureaucracy).

POL 315 Global Issues 3 Credits

Military, economic, demographic, and environmental threats to global security in the post-Cold War era. Forces of transnational integration vs. forces of intrastate fragmentation. Inadequacy of international law and organization to deal with these problems within the confines of the sovereign nation-state system.

POL 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

POL 491 Internship in Political Science 1-4 Credits

Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of fieldwork per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.

Prerequisite(s): permission of instructor.

Political Science

Program Overview

How did American politics become so polarized? How can we understand the global shift to the right in electoral politics? Why does democracy matter? What causes politics to turn violent, and what can be done about it? How can citizens affect change in their own communities and beyond?

These are just some of the big questions students will confront in political science courses at Rider University. Through these courses, students will examine politics at every level: local, state, national, international and global. They will acquire a variety of methodological skills and theoretical perspectives in order to develop a broad understanding of political institutions and processes, political cultures, and political actors. Students enjoy experiential learning in many of their courses, including Congressional simulations, mock trials, and creative problem solving in foreign policy.

Curriculum Overview

Students take courses in many subfields of political science:

- American politics
- comparative politics
- constitutional law
- international relations
- political theory
- public policy

Beyond the Political Science major, the department also offers minors in Homeland Security Policy (<http://catalog.rider.edu/undergraduate/colleges-schools/liberal-arts-sciences/majors-minors-certificates/homeland-security/>) and Political Communication (<http://catalog.rider.edu/undergraduate/colleges-schools/liberal-arts-sciences/majors-minors-certificates/political-communication-minor/>). We also offer a Master's degree in Homeland Security (<http://catalog.rider.edu/graduate/colleges-schools/liberal-arts-sciences/programs-certificates/homeland-security/>), which Rider undergraduates can complete in one additional (fifth) year of study.

Rider's Political Science students have many opportunities for hands-on experiences which will help to complete their Engaged Learning (<https://www.rider.edu/academics/engaged-learning/about/>) graduation requirement:

- The Rebovich Institute for New Jersey Politics (<http://www.rider.edu/offices/services/rebovich-institute-new-jersey-politics/>) places students in internships in NJ, PA, NY, DC and beyond, offering fellowships to support students during unpaid summer internships. The Institute also brings many noteworthy speakers to campus, including former Speaker of the House Newt Gingrich (R) and Rep. Bonnie Watson Coleman (NJ-D).
- Rider's award winning Model United Nations (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-science/liberal-arts-programs/political-science/model-united-nations/>) (MUN) team has received Outstanding Delegation (the highest award) ten out of the last eleven years. Students in MUN earn course credit while preparing to represent their delegation in an annual week-long conference at the United Nations in New York City.
- Washington Semester Program (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-science/liberal-arts-programs/political-science/washington-semester-program/>) provides students with the opportunity to intern in Washington, D.C. while taking courses at American University.
- Student Global Village® course GLS 285 allows students to take a semester long course virtually alongside students in Iraq, Northern Ireland, or another international university.
- Political Science faculty offer multiple teach-ins every semester, where they offer expert analysis of current events in politics. Students also lead teach-ins about their experiences outside the classroom, including Model UN.
- In addition to joining the Political Science Club, students are encouraged to join the College Democrats or College Republicans.

Our political science faculty members are active researchers and practitioners who bring their expertise into the classroom. Rider students find many opportunities to collaborate with faculty on research and to present their work at disciplinary conferences. Recent research areas include:

- the politics of gas and oil pipelines
- campaign finance and political corruption
- the role of Hip Hop for under-privileged migrant youth
- world opinion and the Northern Ireland Peace Process
- presidential politics and impeachment
- the role of ignorance in American politics and political thought

The study of politics and government is an important part of a well-rounded liberal arts education. Studying political science and the liberal arts will enhance a student's skills in critical thinking, written and oral

communication, and problem solving, which will serve them well in any career. More and more business leaders, including Rider alumni, report that they seek precisely these skills in potential employees.

Graduates in Political Science pursue a wide range of careers and public service opportunities, as well as advanced study, including:

- graduate and law school
- local and national politics and government
- international politics and IGOs (international governmental organizations)
- non-governmental organizations (NGOs)
- community and political organizing
- think tanks and policy analysis
- journalism
- business
- education
- Peace Corps and Teach for America

Student Learning Outcomes

Graduates of the Political Science major will be able to:

1. Explain political institutions, processes and behaviors, as well as their variation, in the US and around the world.
2. Apply core concepts and theories in political science to analyze and engage with real world political problems.
3. Conceptualize research questions, adopt appropriate methodologies, and collect and interpret qualitative and/or quantitative data to answer these questions.
4. Produce persuasive original arguments, based upon suitable evidence and in conversation with varying perspectives, in written work and/or oral communication.

Honors Program in Political Science

Political Science majors who have completed eight courses in political science with a cumulative average of 3.5 may request candidacy for graduation with honors in political science. Students should submit to the chairperson of the department early in their sixth semester (March 15 or October 15) an Independent Research and Study project signed by a faculty sponsor and approved by the department. Applicants typically enroll in POL 490 in their seventh semester, to develop a thesis proposal.

Upon approval, students then take POL 499 Senior Honors Thesis, for six credits, in the final semester. A substantive research work should be presented no later than April 1 or November 1 to a committee made up of the thesis advisor and two faculty members approved by the department. Honors in political science is awarded upon the successful completion and oral defense of the thesis.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

³ One Social Perspectives General Education Requirement is included in the major.

Courses and Descriptions

POL 100 U.S. Politics in Crisis 3 Credits

It often seems like the American government achieves little other than stoking political animosities amongst the American people. We see daily news stories about gridlock, polarization, partisanship, and corruption. This course introduces students to the basic principles of the U.S. constitutional system and how they are served by the three branches of government, paying special attention to the democratic process, vital public issues, and civil rights and civil liberties. Students will gain a critical understanding of the function and dysfunction in American politics and government, as well as concrete ideas about what can be done about it. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

POL 102 Power, Politics and Justice 3 Credits

Who gets what, when, why, and how? The study of politics and government is, essentially, a study of power and justice. This course introduces students to major ideologies and political theories, systems of government (ranging from presidential to parliamentary to authoritarian), public opinion and political behavior, international relations and war, and contemporary policy issues. Students will learn how to evaluate political institutions and actors in terms of how power is distributed and exercised, and when (and why) justice is and is not achieved. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

POL 200 NJ Government and Politics 3 Credits

Political institutions, processes, and problems of state and local governments of New Jersey. Analysis of legislative, executive, judicial, regulatory bodies, special districts, and autonomous agencies. Aspects of personnel, finance, and services, as well as political parties and elections.

POL 201 Policy Issues, Advocacy, and Budgeting 3 Credits

Surveys various domestic economic and social policy issues, the government budgeting process, and how citizens and groups advocate their interest through organizing, coalition-building and lobbying. Emphasis on developing practical skills in issue analysis, lobbying, legislative tracking, and public budgeting.

POL 202 The Political System - Theories and Themes 3 Credits

This course serves as a gateway to the subfields of comparative politics and international relations. The concept of the political system helps political scientists to organize political interrelations into patterns that allow systematic selection and interpretation of information and the study of processes and outcomes of politics in a variety of settings. The course introduces students to the main brands of normative theory prescribing the principles directing the operation of the political system, to some of the most important methods used to compare political systems and/or their components, and to the foremost approaches utilized in the study of the relations between political systems and their environments. Note: This course is cross-listed as HLS 202. Students may not get credit for both POL 202 and HLS 202.

POL 203 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective. Note: This course is cross-listed as HLS 203. Students may not get credit for both HLS 203 and POL 203.

POL 204 Development and Structure of the US Intelligence Community 3 Credits

This course provides a historical review of intelligence following World War II. It will examine the major functions of intelligence, as well as intelligence as a part of the foreign policy process: collection, analysis, counterintelligence, and covert action. Students will be introduced to a range of collection procedures: human, open source, electronic, photographic, and signal, with emphasis placed on interpreting and writing intelligence summaries. Note: This course is cross-listed as HLS 204. Students may not get credit for both POL 204 and HLS 204.

POL 205 Introduction to Public Policy 3 Credits

The course provides students with an introduction to the study of public policy by linking the theoretical with the practical. The course focuses on three areas of analysis: 1) descriptive 2) evaluative and 3) prescriptive. Students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options. Last the course provides examples of public policy problems through the substantive policy areas of health, environment and education.

POL 206 Healthcare Regulation and Governance 3 Credits

Health Regulation and Governance explores the institutions, processes and actors involved in governing and regulating the healthcare system in the US. The course engages the topic through the lens of federalism by examining the role of the Executive, Legislative and Judicial branches of government in regulating and governing healthcare at the national level as well as the role of the states in this policy area. Students will not only be introduced to the structure of regulation and governance of healthcare in the US, but will also be able to contextualize contemporary issues in healthcare in order to not simply addresses problems in the sector, but to also begin to identify solutions to issues that impact the population.

POL 210 Public Opinion 3 Credits

Public opinion as a social force and as expression of public sentiment on political and social issues. Topics include: development and dissemination of opinions, the measurement of public opinion, public opinion and governmental processes, and the reciprocal relationship between mass media and public opinion.

POL 215 Global Politics 3 Credits

The struggle for power, wealth, and order at the global level involving nation-states, intergovernmental organizations (such as the United Nations, the European Union, etc.), non-governmental organizations, transnational enterprises and other non-state entities, using military, economic, diplomatic, legal, and communication instruments. Overview of global problems such as the proliferation of weapons of destruction, ethnic and religious conflicts, human rights, and the global environment in the 21st century.

POL 216 Comparative Political Systems 3 Credits

A general introduction to types of government and political regimes of the world as they try to cope with the dual challenge of ethnic micropolitics and transnational globalization. Major prototypes of democracy: the British parliamentary system, the American separation of powers system, and various combinations of these two. Traditional autocracy, totalitarian dictatorships, and late 20th-century authoritarian regimes. Students are expected to acquire in-depth knowledge of comparative political systems, and to develop a basic understanding and appreciation of the major concepts and themes in comparative political systems studies.

POL 220 Terrorism & Counter Terrorism 3 Credits

This course introduces students to the arguments about the definition of terrorism, the historical use of terrorism and the roles of ideology, religion, and psychological factors that help explain and predict it. The course seeks to identify the components of national security policy aimed at countering such elements and their cost, both in financial and civil right terms. Finally, to illuminate both the definition and the policies discussed, the course will offer brief comparisons with other states, especially Israel, the UK, and Russia.

POL 225 Nationalism in World Politics 3 Credits

Nations and nationalism. An overview of nationalistic manifestations in the world today. Nations, states, nation-states. Multinational states, stateless nations. Imperialism, anti-imperialism; nativism vs. internationalism and globalism. Topics include nationalisms in the Holy Land; in the former Yugoslavia; in the former Soviet Union and its successor states; and economic Nationalism vs. Globalization.

POL 230 Methods of Political Analysis 3 Credits

An overview of the various qualitative and quantitative methods that political scientists use to study their discipline. Themes include analyses of political participation and support, methods of studying elections, measures of political tolerance and liberalism.

POL 235 Race and Ethnicity in American Politics 3 Credits

Examines the changing political, economic, and social situation of racial and ethnic groups in American politics since the 1950s. Topics include the relationship between race/ethnicity and voting behavior, political parties, and election results. Includes an analysis of specific areas of contemporary racial and ethnic conflict, such as voting rights, immigration, and affirmative action.

POL 239 Modern Political Theory 3 Credits

A survey of the most significant political thought from Hobbes through Mill and Marx. Subject matter includes the social contract and discussion of such questions as the nature of freedom, natural law and right, political obligation, justice, and form of regime.

POL 247 Political Campaigning 3 Credits

This course entails the study of campaigning for political office at the federal, state and local levels in the United States. While attention will be given to how the broader political environment and specific factors, e.g., partisanship, hot button issues, local interests, and money, affect the nature of campaigns, the course's primary focus will be on how to organize and conduct a successful and ethical campaign, including how to collect and analyze pertinent data, manage a staff, develop a communications plan, including social media, and get out the vote.

POL 255 European Politics 3 Credits

A comparative analysis of the social and political systems of Britain, France, Germany and other Western countries within the European framework. Emphasis will be on the identification of ways in which countries similar in social characteristics are also similar in their political systems and on the extent and circumstances under which they differ. Similarities and contrasts will also be drawn with political structures and processes in the United States. This course, on occasion, may contain an optional travel component during January.

POL 260 Politics of Law and Order 3 Credits

The constitutional, legal, political, and administrative aspects of the criminal justice system in the United States are studied, including the court system at all levels of government, law enforcement agencies, correctional programs and institutions, probation, parole, and the relationship of our legal institutions to the broader political system.

POL 270 Interest Groups and Lobbying 3 Credits

The course will introduce students to the area of interest groups and lobbying. Topics to be covered include theoretical developments, methodological approaches of group formation, organizational maintenance, and strategies used to influence public policy in the executive, legislative, and judicial branches of government.

POL 280 Sex & Gender in International Politics 3 Credits

What's a student of political science, International Relations (IR), or another social science field to do about feminism? This is a question that has troubled IR for decades. While feminist debates engaged people in spaces outside the disciplines of political science and particularly IR, IR scholars did their best not to see the relevance of feminism for their own debates. That did not stop some feminists from rethinking key IR concepts like power, race and the state, but such contributions were largely ignored by IR scholars until very recently. It was only in the last decades, when feminist questions pushed their way onto the IR agenda through books, journals, and conferences, that feminism suddenly seemed attractive to IR scholars. Designed as an interdisciplinary course with a strong reference to Global and International Politics, this course will provide a basic introduction to some of the major global questions as seen through a feminist lens.

POL 281 Sex & Gender in U.S. Politics 3 Credits

Legal traditions have long maintained that a "man's home is his castle," beyond the reach of the state (thereby ignoring "private" injustices like domestic violence). But the state has always found ways to justify some interventions in citizens' private lives, including legislation of abortion and homosexuality. The personal has always been political, as second-wave feminists rightly insisted in the 1960s. This course examines the intersection of private and public, looking at the ways in which sex, identity and sexuality are implicated in and shaped by politics and policy-making: including the gendered division of labor inside and outside the home; the politics of gender identity; the legislation and policing of sex, sexuality, marriage and families; and the challenges facing women who enter politics. We will ask provocative and pressing questions like: How do sex and sexuality intersect with race, class, disability, and more? Can women (or anyone) really "have it all"? What is the future of transgender rights in the U.S.? Why do women still make up only 20% of Congress? Do women lead differently? To answer these questions, we will turn to political theory, political science, public policy, legal studies, and more.

POL 295 Special Topics in Political Science 3 Credits

For non-seniors who engage in serious research in political science. Topic to be approved by instructor and department chairperson.

POL 300 U.S. Constitutional Law 3 Credits

The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as HLS 300. Students may not get credit for both HLS 300 and POL 300.

POL 301 Civil Liberties in the U.S. 3 Credits

The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as HLS 301. Students may not get credit for both HLS 301 and POL 301.

POL 302 Insurgency 3 Credits

The course explores the occurrence of insurgencies and civil wars. It examines the causes of such conflicts by focusing on the role of resources, state capacity, ethnic/religious differences and power in the initiation of violence. Students will learn how recruitment tactics and access to funding sustain guerrilla warfare. Lastly, the course will focus on conflict management by emphasizing specific tools for terminating and preventing intrastate conflicts including the impact of international interventions, counterinsurgency strategy of winning the hearts and minds, institutional design, and reconciliation.

POL 303 Global Justice 3 Credits

This course examines some of the most vexing problems in today's world of global interconnectedness. How can we harness the potential of global cooperation to solve problems that cross national borders? We will critically analyze the potential for human rights to protect vulnerable individuals, including victims of human trafficking. We will also evaluate the distribution of global resources and costs, including natural resources, extreme poverty and environmental degradation. What do we owe those who live in distant lands? Throughout we will ask how reality matches up to our best hopes for the present and future.

POL 304 Political Behavior: Fear, Risk and Crisis 3 Credits

The course focuses on various analytical approaches in behavioral political science. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior-e.g., voting/non-voting, the formation of political partisanship and ideology, issue perceptions, responding to risk and uncertainty in the political environment, and engaging in civic political participation. Note: This course is cross-listed as HLS 304. Students may not get credit for both POL 304 and HLS 304.

POL 305 Political Parties and Electoral Behavior 3 Credits

The structure, character, and functions of U.S. political parties and pressure groups, and their impact on public policy. Parties are analyzed within the broader scope of organizational theory and comparative party systems. Major emphases on their historical origins, their role in contemporary political life, and particular aspects of party politics—local organization, membership, campaigning and elections, policy-making roles, and leadership.

POL 306 American Political Film 3 Credits

This course analyzes the structure, history, and impact of the genre of political film. It begins with a discussion of how one distinguishes a political film from other forms of cinema. It then proposes insights into the manner in which these films evoke a particular time and place in politics, affect the viewer's interpretation of a political event or figure, and have an effect upon a viewer's political perceptions or behavior. The student will also learn to review films critically, both as political statements and as effective (or ineffective) conveyors of political messages.

POL 307 Political Communication 3 Credits

The meaning and uses of political communication are examined, the manner and forms such communication takes, and the history of political discourse. Major topics include the role of communication in elections and the development of public policy, how political communication strategies have changed with the rise of mass media, and the development of national and international publics for discourse.

POL 308 Capitalism and Inequality 3 Credits

This class is about market economies: how they are theorized, how they operate, and how they affect the humans who live and work within them. The first part of this course offers an overview of major modern theorists of capitalism (with selections chosen for a political science audience), including Smith, Veblen, Schumpeter and Keynes. These thinkers have made influential contributions to debates about the proper role of government in regulating and shaping economic relations and conditions. We then turn to contemporary theories of distributive justice, including libertarianism and egalitarianism. The second half of the course explores realities of socioeconomic inequality, the experience of poverty in the U.S., as well as the kinds of policies which might alleviate or resolve various dimensions of inequality and poverty. This course prepares students to evaluate public policies and articulate policy positions while attending to their economic and human costs.

POL 310 Political Psychology and Human Nature 3 Credits

The 2016 presidential campaign season saw a marked increase in partisanship, polarization, animosity and resentment among Americans, mirroring a worldwide trend toward "tribalistic" group identification at the expense of outsiders. Why can't we all just get along? What makes it so hard to sympathize with those who seem different or unfamiliar, and so easy to assume the worst about them? This course will bring together classic political theory, psychology and the social sciences, in order to help explain political beliefs and behaviors. We will begin by considering how classic political theory has conceptualized human nature, and the various implications for political life. We will then consider scientific perspectives: evolutionary anthropology, social psychology and cognitive neuroscience. We will examine the role of bias in cognition and politics and we will critically interrogate assumptions about rationality. We will also see that different psychological dispositions underlay conservatism and liberalism. Ultimately, this course will consider how these features of human cognition shed light on partisanship and polarization, racial bias, and policy preferences, including popular reception of science concerning vital issues such as climate change and the safety of GMOs. We will conclude with considerations of how a better understanding of psychology might propel us toward a more productive political discourse.

POL 311 Sovereignty, the State and Borders 3 Credits

Borders have a prominent place in politics and human history. In the twentieth century, the best-known barriers were the militarized Maginot Line and the Iron Curtain. Today, the political popularity of borders persists but the nature and quality of these borders and the threats they were created to repel have changed. Modern borders are designed not to keep militaries out, but to deter a perceived invasion of “undesirables”—with terrorists and unwanted immigrants leading the list of state concerns. Nowhere is this more evident than along the geographic fault lines dividing rich and poor regions, e.g. the Mediterranean Sea and the U.S.-Mexican border region. This course will examine the dynamic interactions between the question of how to govern borders and the twenty-first century liberal state with its diluted sovereignty—due to immigration, trade and international laws and regimes.

POL 312 Congressional Politics 3 Credits

An intensive analysis of the legislative process in the United States, considering both the internal organization and operation of Congress, and Congress' role in the broader American political system. Fundamental issues include the theory and practice of representation; the committee system, seniority and expertise; executive and legislative interaction; and the politics of congressional reform.

POL 313 American Presidency 3 Credits

A description and analysis of the American presidency: its historical development, the internal organization, and ecological context. Basic issues include the intent of the framers of the Constitution, the historical accumulation of presidential powers, and institutional limits on presidential power (e.g., Congress and the bureaucracy).

POL 314 Congressional Power and National Security Policy 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. Particular attention is paid to the role of the US government being able to balance individual rights and liberties within the national security state. Last, the course also takes an in-depth analysis of the U.S. Congress, looking comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror? Note: This course is cross-listed as HLS 314. Students may not get credit for both HLS 314 and POL 314.

POL 315 Global Issues 3 Credits

Military, economic, demographic, and environmental threats to global security in the post-Cold War era. Forces of transnational integration vs. forces of intrastate fragmentation. Inadequacy of international law and organization to deal with these problems within the confines of the sovereign nation-state system.

POL 316 Presidential Power and National Security Policy 3 Credits

This course examines the development of the National Security State since the Second World War, and the ways in which it has affected, and been affected by, the Federal Executive. Topics to be covered will include the post-World War II redefinition of “national security”, the Cold War (with a special focus upon war powers during Korea and Vietnam) and the changes that have occurred with the “War on Terror.” Note: This course is cross-listed as HLS 316. Students may not get credit for both POL 316 and HLS 316.

POL 317 Model United Nations 3 Credits

Model United Nations (POL 317) is the course that prepares Rider University's award-winning Model United Nations (MUN) team for the annual National MUN competition in New York City. The team has brought home top awards for the past decade and continuously strives for excellence. POL 317 is a student-led course that hones writing, public-speaking and researching skills of student-delegates and it represents student engagement at the highest level. Chosen through a rigorous selection process in the fall semester, the student-delegates write position papers during the winter break, and develop caucusing, team-working, and presentation skills in class during the spring semester. During the past five decades, Rider University's MUN team has represented more than 50 countries, and competed with thousands of delegates from national and international universities. It is one of the premier engaged learning and cohort-building institutions on campus.

POL 318 Conflict Resolution 3 Credits

How do you craft a peace deal in a war-ravaged environment? Can negotiations with rogue regimes succeed and prevent the onset of conflict? With massive casualties, and unspeakable human rights abuses, conflicts continue to present a challenge to people around the globe. In this course, we will explore the dynamics of conflict management designed to keep countries from waging violence against each other. Our focus is both on ending existing violent conflicts and on preventing escalation of tensions. We will explore the impact of mediators and external interventions by international organizations or individual countries on conflict management. We will also examine the role of the International Court of Justice in resolving disputes when direct negotiations fail to succeed. Finally, we will study existing peacebuilding efforts designed to improve relations among victims and killers in post-conflict environment. Insights from theory on commitment problems will help us understand why peace is more vulnerable in domestic than in international conflicts. Throughout the semester, we will rely on various case illustrations from international and domestic conflicts, and participate in a simulation activity that will allow us to assume the roles of negotiators in disputes.

POL 319 Terrorism, Revolutions and Political Violence 3 Credits

Revolutions are the mad inspiration of history. Trotsky's characterization calls attention to three important dimensions of violent political participation: the historical settings, ideology, and emotional fervor of the practitioners. The course focuses on these dimensions by analyzing revolutionary and terrorist movements in the 20th century. Special attention is given to the use of violence in the post-Cold War new world disorder.

POL 320 Politics of the Middle East 3 Credits

The course emphasizes the relationships between social and political structures, the role of religion, and the problems of modernization in the Middle East. Similarities and contrasts will be drawn between the Arab and non-Arab countries of the Middle East. The political systems of Egypt, Syria, Israel and Saudi Arabia are examined in terms of political culture, structure, and political processes.

POL 321 International Law 3 Credits

This course covers the basic doctrines of international law and their relationship to the contemporary international community. These include the jurisprudence of international law; the history of the international legal system; customary international law; Treaty law; sovereignty, statehood and recognition; jurisdiction and immunities; the role of international organizations; international criminal responsibility; and the relationship of the international legal system to the U.S. domestic legal system. The objectives of international law are to foster the peaceful settlement of disputes; facilitate transnational communication and commerce; encourage respect for human rights; as well as to preserve the environment.

POL 322 African Politics 3 Credits

Africa is in a process of transition, a continent of growing strategic importance to the U.S. and a land with considerable variation in political and economic success. The course is an introduction to the politics of sub-Saharan Africa. To understand the continent's current challenges, the course examines the legacies of colonial rule, including colonialism on the politics of ethnicity; focuses on the rise of authoritarianism in Africa in the 1970s and 1980s; examines the success and failure of democratization that is transforming the continent today; embarks on the quest to understand the continent's struggle with poverty and debt. Lastly, the course explores some of the biggest obstacles to Africa's stability, including state collapse, wars, corruption, while contemplating the future that lies ahead.

POL 325 Public Administration 3 Credits

Public administration in modern society, emphasizing the administrative formulation of public policy and its implementation. Attention on who gets what, when, and how from the decisions of administrative units; the role administrators have in policy-making compared to elected legislators, chief executives and judges; the effect administrators have on the benefits citizens receive from government; and the effect administrators have on citizens' behavior. Note: This course is cross-listed as HLS 325. Students may not get credit for both HLS 325 and POL 325.

POL 326 Power in American Politics 3 Credits

Examines various explanations of who has power in American politics. Explores the roles of appointed and elected officials, business and interest groups, the media, and the general public in shaping public policy. Special attention to political change, including the impact of broad social movements on the responsiveness of the political system.

POL 327 Contemporary Issues in American Public Policy 3 Credits

An in-depth examination of current issues in American politics. Drunk driving, political corruption, drug policy, education, and poverty are among the issues to be considered. Emphasis on analyzing policy problems and on developing and evaluating proposed solutions.

POL 328 Environmental Politics 3 Credits

Environmental Politics examines how policymakers deal with the political challenges of unsustainable resource consumption, which is a primary determinant of environmental problems such as climate change, adverse health effects, and biodiversity loss. The course introduces students to environmental politics and policies at the local, state, national, and international levels. The course is designed to provide students with a framework for understanding how varied interests compete within political institutions in order to transform contending ideas into public policy. With that in mind, students will not only become more informed consumers of political information, but will also become more effective at analyzing and advocating for policies as it relates to the environment.

POL 329 Comparative Environmental Policy 3 Credits

Comparative Environmental Policy analyzes cross-national approaches in developing, implementing, and evaluating policy responses to environmental problems. The course analyzes the political factors, actors, and tools that help and explain why some societies have been more likely to develop effective responses to environmental threats.

POL 330 Geopolitics of Energy 3 Credits

Geopolitics of Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

POL 331 Political Corruptions 3 Credits

This course will introduce students to one of the central political issues in the USA as well as abroad: corruption. Whereas this was considered in earlier days as 'temporary malady' of third world systems, today it is considered a pervasive phenomenon in democratic systems as well. As such it acquired widespread scholarly as well as public attention in established democracies such as the USA (at least since the elections of 2016). The course will utilize a range of approaches to examine the meaning of corruption, the link between what the law defines as corruption and what is understood by the term by broad publics, the interaction between both conceptions and system legitimacy, and the methods by which corruption may be contained.

POL 335 Urban Politics 3 Credits

Political structure and administration of municipalities in the United States. Emphasis on challenges posed by suburbanization, global and regional shifts in business, economic dislocation, housing, mass transportation, race relations, and policing.

POL 340 Modern Democracy and Its Critics 3 Credits

The course examines the fundamental assumptions underlying modern democratic theories and the main theoretical attacks launched against them. Among the contending theories to be discussed are right and left-wing anarchism, the old and the new left, fascism, intellectual elitism, and techno-conservatism.

POL 342 Contemporary Political Theory: Freedom and Authority 3 Credits

Concepts of freedom and authority in 19th and 20th-century political theory. Emphasis on such important thinkers as Nietzsche, Freud, Sartre, Camus, and Marcuse.

POL 343 American Political Thought 3 Credits

The philosophical background and moral principles of American political society: liberty, equality, natural law and natural right; constitutionalism and nation-building. The development of the ideologies of liberalism, conservatism, and libertarianism are also covered.

POL 345 Ancient Political Theory: Justice 3 Credits

The existence of society over time requires high degree of predictability and hence laws, whether explicit or implicit. These derive their capacity to regulate life from the widespread notion that they are proper and that they should be obeyed. In a word, they accord to our notions of justice. These, however, are not stable. Resting on the understandings of man, society, nature and the relations between them, they develop under the impact of human thought and changing realities. The result is what can be compared to a layered cake. This course treats some of the main contributions made by philosophers from Plato to Rawls to our concept of justice and the manner by which they have shaped our concepts of justice in the US and West in general. Cases in which courts (mainly the US Supreme Court) made use and applied the thinking of earlier philosophies of justice will illustrate the process by which we adjust the boundaries between legality and criminality and determine how we should behave towards each other.

POL 346 The Politics and Ethics of Emergencies 3 Credits

This course examines historic and present day cases, ranging across Europe and the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, take on emergency powers to become so-called "states of exception." While in some cases such states have imposed mild and limited emergency measures, others have employed more draconian measures, suspending, if not dissolving, constitutionally guaranteed civil liberties, often for indeterminate and protracted periods. How various states have behaved in emergency situations will be the major content of this course. Note: This course is cross-listed as HLS 346. Students may not get credit for both HLS 346 and POL 346.

POL 350 U.S. Foreign Policy and Security Policy 3 Credits

Principles, institutions, and processes involved in the formulation and implementation of policies regarding the nation's military, economic, and environmental security within the global framework. Strands, trends, and problem areas in U.S. foreign policy, with focus on the changing global environment of the post-Cold World War. Note: This course is cross-listed as HLS 350. Students may get credit for only one.

POL 351 Critical Views of Global Security 3 Credits

This course will examine the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspective on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security. Note: This course is cross-listed as HLS 351. Students may not get credit for both HLS 351 and POL 351.

POL 361 Courts, Judges and Politics 3 Credits

In-depth examination of the nature of judicial decision-making and the impact that judicial decisions have on society. Considers the sources of judicial authority, judicial fact-finding, statutory and constitutional interpretation, individual and collective processes of judicial decision-making, relations between judges and other government officials, and the political consequences of judicial decisions with particular emphasis on federal courts and judges. Note: This course is cross-listed as HLS 361. Students may not get credit for both POL 361 and HLS 361.

POL 363 Human Rights in Global Context 3 Credits

Examines human rights – droits de l'homme, derechos humanos, Menschenrechte, "the rights of man" – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breath and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as HLS 363. Students may not get credit for both HLS 363 and POL 363.

POL 365 Politics of the Developing World 3 Credits

Studies the major political issues of the so-called "developing" world. Particular reference to political systems of Africa, Asia, Latin America, and the Middle East according to the relevance of the examples to large conceptual issues, and according to the major interests of the instructor. Typical issues include neocolonial dependency, the role of the state in newly developed countries, military rule and democratization.

POL 367 Global Immigration 3 Credits

This course analyzes mass migrations and refugee movements and what they mean for the stability of nations, the increasing potential of severe culture clashes within societies, and the root causes of (forced) migration movements, such as problems of violence, terror and genocide, as recently seen in Darfur, Rwanda and Bosnia. In certain European countries the frequently failed integration and assimilation policies resulted in an Islamic alienation; terrorist attacks and race riots are some of the consequences. Particular attention will be given to the conflict between the refugees' and migrants' needs that result from violent, socio-economic or ecological catastrophes in the countries of origin and the various forms of reception within the host countries. Students will explore theoretical, political, legal, and socio-economic dimensions of the refugee and immigration phenomena in a global world. Other themes will include international human rights and refugee laws, theories of immigration, for example, the feminization of migration, as well as problems of acculturation, assimilation and integration in different host societies.

POL 368 International Organizations 3 Credits

This course introduces students to the study of international organizations. The course examines mostly formal and governmental institutions as well as informal institutions or regimes. Topics to be covered include and are not limited to: the establishment of international organizations, evolution of international organizations, structure of international organizations, decision-making of international organizations and influence of international organizations. This course employs both theoretical and practical approaches in its examination of international organizations.

POL 371 The Arab-Israeli Conflict 3 Credits

The course will begin by introducing the main players: the neo-patrimonial Arab regimes on the one hand, and the democratic, economically modern Jewish sector in Palestine on the other. The analysis will focus on the impact of the social, economic, political and religious differences between the sides on their conception of the conflict among the participants and powers outside the region. The course will concurrently examine the impacts of the dynamics of the conflict itself, relations within Islam on the one hand and between Islam and the West on the other. The latter part of the course will consider the sources of perceptual shift that led simultaneously to the narrowing of the conflict with the withdrawal of some of its participants (most Arab states) and its widening with the addition of Al Qaeda and Iran (via Hezbollah).

POL 399 The Co-operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. IND 398 and (dept.) 399 combined cannot exceed 15 credits. Pass/fail. Prerequisite(s): junior standing and 2.75 GPA at the time of registration.

Corequisite(s): IND 398 The Co-operative Experience Seminar.

POL 415 Political Internship 3-6 Credits**POL 450 Seminar in Political Science 3 Credits**

A multidimensional framework within which to integrate the variety of perspectives and methodologies extant in the field of political science. Topics for discussion and analysis may range from broad concepts of political discourse such as power and interdependence to specific political issues such as executive-legislative relations and judicial policymaking.

POL 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

POL 491 Internship in Political Science 1-4 Credits

Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of fieldwork per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.

Prerequisite(s): permission of instructor.

POL 499 Senior Honors Thesis 3-6 Credits

Majors having completed the department's core requirements and having a minimum GPA of 3.5 in political science courses may apply for honors in their sixth semester. Applicants enroll in POL 490 Independent Research and Study in their seventh semester to develop and submit a thesis proposal to the department. With departmental approval, applicants prepare an honors thesis in their last semester. Upon acceptance of the thesis by the department, the student will be graduated with honors in political science.

Popular Music Studies

Overview

The Popular Music Studies minor provides students with a strong grounding in the history of popular music with a focus on the US and UK.

Students in the minor will study not only the history of rock, pop, jazz, and other genres but also the social and political contexts that shaped the sound of the music over time. The minor blends survey courses with seminar-style deep dives into some of the most influential musicians of the last century, from the Beatles to Radiohead to Bruce Springsteen.

Courses and Descriptions

MUS 106 Survey of Music History II 3 Credits

A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 204 Jazz History 3 Credits

Survey from 19th C. roots to 21st C. styles. Development of listening skills and overview of musical skills used by jazz performers. Exploration of the relationship between jazz and poetry, race relations, and the reputation of jazz in popular culture.

Prerequisite(s): CMP 120 or CMP 125.

MUS 205 History of Pop and Rock Part I 3 Credits

This course charts the history of popular music from its origins until the 1960s. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music from its roots in the blues, early jazz, ragtime and military band marches to the music of Elvis, Chuck Berry, Little Richard, Buddy Holly, the Rolling Stones and the Beatles. We look at the recording industry and the advent of the gramophone record and the important role of radio and television in expanding the reach of popular music directly into the home, creating a vibrant soundtrack for peoples lives.

MUS 206 History of Pop and Rock Part 2 3 Credits

Description: This course charts the history of popular music from the 1960s to today. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music through Acid Rock, Progressive (Prog) Rock, Hard Rock, Singer-Songwriters, Disco, Reggae, Funk, Punk, Heavy Metal, New Wave, Grunge, Electronica and Rap & Hip-Hop. We look at the development of analog and digital media and how new forms of delivery of product shapes the business model of the industry and beyond.

MUS 208 Music of the Theater 3 Credits

A study of music drama both historical and contemporary covering European opera of the Baroque, classical and romantic periods, and the American musical theatre, especially the contemporary Broadway musical.

MUS 209 Great Composers 3 Credits

A study of selected major composers life, works, and historical significance with an emphasis on the listening experience. Bach, Mozart, Beethoven, Tchaikovsky, Stravinsky, or others.

MUS 212 Cartoon and Anime Culture 3 Credits

This course investigates the music and culture of animated films and television shows, anime, animated shorts including cartoons, and related incidental music for documentary films.

MUS 214 Writing about Music 3 Credits

This course instructs students in the art of writing about music, from small-form criticism to large scale scholarship, focusing especially on the ability to translate what one hears into engaging prose.

Prerequisite(s): CMP 120 and 125, MUS 110, 110L, and MUS 213.

MUS 215 Music & Techn/Mobile Society 3 Credits

This course compares the recent history of music technology to past innovations, focusing on the aesthetic implications and ideological influences of an increasingly mobilized musical milieu.

MUS 218 Postmodernism & Popular Culture 3 Credits

This course considers music in light of the ideological trends of postmodernism in order to better understand contemporary music in its cultural context.

MUS 300 Beethoven and the Romantic Age 3 Credits

A study of the Romantic period with particular emphasis on Beethoven. The classical heritage, the transformation of that heritage into romantic terms, the prominent influence of Beethoven on 19th century musical style.

MUS 304 Music of the Beatles 3 Credits

This course is a very in-depth analysis of the music and personalities of the Beatles. The student will gain in depth insight to the Beatles songs and albums as the course proceeds through the music chronologically. This will be contextualized historically and sociologically where required.

MUS 306 Contemp Music Experience 3 Credits

A survey of European and American musical styles of the late 19th and 20th centuries. Topics include postromantic music, neoclassicism, serialism, electronic music, and the current avant garde.

MUS 307 The Music of Radiohead 3 Credits

This course investigates the music, lyrics, art and marketing strategies of the British so called "alternative" band, Radiohead, moving song by song through their demos, videos and albums.

MUS 308 World Music 3 Credits

To understand world music as a means of appreciating and respecting our common inheritance as humans. To better understand in what ways music is a 'language' and how this functions within 'community' including aspect of ritual, celebration, religion and spirituality. The student will be expected to be able to discern between various genres of world music understanding the wider cultural context including, but not limited to, popular music within that same culture.

MUS 309 Film Music 3 Credits

A study of music in feature film, documentary film, and television. A chronological survey of film music from silent to contemporary film, animated shorts, and television, with emphasis on listening to recorded performance of representative works.

MUS 310 The Film Music of Stanley Kubrick 3 Credits

This course is an in-depth study of the way in which music impacts society through the art of film. Focusing on the films of Stanley Kubrick (e.g. *The Shining*; *2001: A Space Odyssey*; *A Clockwork Orange*; *Full Metal Jacket*; *Eyes Wide Shut*; *Dr. Strangelove*; *Lolita*) we will study a variety of strategies within which music integrates, counterpoints or ironically resists themes such as war, sex, politics, religion, gender etc. Also we will observe how music interacts with other aesthetics in film such as light, camera methods, 1. diegetic/source, 2. non-diegetic/underscore and 3. metadiegetic (i.e. 1. music in the film; 2. music only the audience can hear; 3. music that seems to be coming from the mind of a character in the film) method as part of the narrative itself. In this way we will investigate the way film both integrates aspects of society and also radiates messages, indeed challenges, to society, both as a mirror but also didactically—with the direct intent of creating change.

MUS 311 Unpacking Bruce Springsteen 3 Credits

This course will survey the music of Bruce Springsteen. It will 'unpack' Springsteen's musical development not only across his official career (i.e. from signing with Columbia for his first album 'Greetings from Asbury Park, New Jersey' in 1973 to the present) but also from his childhood through his youth in Freehold, NJ. By closely studying Springsteen's life, music and lyrics as well as the themes of each album the student will become an expert in understanding how The Boss was able to universalize the Jersey Shore as well as his personal concerns into vital musical messages of great value and import today. This will also involve looking at music as varied as The British Invasion (i.e. The Beatles, The Animals & the Rolling Stones et al); Motown; Country; Soul; Folk; Rock and the American Songbook.

MUS 315 Black Music in America 3 Credits

This course covers the history of music made by and/or about African Americans, from minstrel shows to hip hop and everything in between.

MUS 495 Selected Topics in Music 3 Credits

Studies specialized aspects of the literature, history, or theory of music, to supplement the established curriculum. Emphasis on creative investigative work and individual experiences in music.

Psychology

Program Overview

The psychology major is designed to meet the needs of various types of students and to develop a broad understanding of the many topic areas within the field of psychology.

The program is committed to helping students understand and appreciate both the scientific foundations and human service aspects of the field of psychology; develop and apply oral, written, analytical and critical-thinking skills applied to psychological issues, questions and problems; understand issues in contemporary psychology and recognize and apply psychological knowledge in order to provide solutions to real world problems and develop both interpersonal and intrapersonal knowledge through academic experiences and extra-curricular activities.

The program is designed to foster self-awareness and personal growth, the development of leadership skills and a respect and understanding for human development and human diversity.

More information is available on the Department's website: Department of Psychology (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-sciences/liberal-arts-programs/psychology/>)

Curriculum Overview

The curriculum develops the fundamental skills that predict success in the profession of psychology, human services, corporate jobs, education and graduate school. Classes stress the development of writing skills, both technical report writing and literature research papers and provide a range of instruction on the statistical data analysis, online control of laboratory experiments, text processing and presentation software. In fieldwork placements, students gain work experience in a variety of human services programs within the community.

Members of the psychology faculty encourage students to become involved in research projects. Many Rider psychology seniors bound for graduate school receive offers of substantial financial aid in the form of assistantships and tuition waivers. These offers are made because our majors carry out research of high quality. Students have coauthored journal publications with the faculty and presented papers at regional and national conferences. Laboratories are always open for students and faculty supervision is always available.

Student Learning Outcomes

1. **Theory:** Students will demonstrate knowledge of major concepts, theoretical perspectives, and empirical findings within psychology. Students will learn to apply the knowledge for solving real-world problems through participation in internships, community-based research, and/or leadership opportunities.
2. **Research:** Students will learn how to plan, conduct, and critically evaluate psychological research that promotes understanding of human behavior, diversity, and individual differences. Students will demonstrate the ability to communicate scientific concepts and results in written and oral form.
3. **Practice:** Students will develop interpersonal and intrapersonal knowledge that fosters self-awareness and personal growth, the development of leadership skills, and a respect and understanding of human diversity. Students will apply psychological content and skills to promote attainment of post-graduation goals.

Honors Program in Psychology

A student may receive honors in psychology by fulfilling the following conditions beyond the basic requirements for the psychology major: complete one Independent Research and Study project (490); earn a cumulative average of 3.25 and an average of 3.5 in psychology at the time of graduation.

Degrees Offered

- B.A. in Psychology
- Minor in Psychology

Requirements for the Major

(49 credits)

Note: A grade of "C" or better is required in each Psychology course in order for the course to be counted toward the major.

Code	Title	Credits
CAS General Education Curriculum		
See CAS General Education Curriculum Page (http://catalog.rider.edu/undergraduate/colleges-schools/liberal-arts-sciences/general_education_requirements/)		
Required Psychology Courses		12
The following four courses must be completed by all majors. The first three must be completed in the sequence they are listed:		
PSY 100	Introduction to Psychology	
PSY 105	Introduction to Research in Psychology	
PSY 201	Statistics and Research Design	
PSY 292	Professional Development in Psychology	
Research Methods Course Requirement:		4
Select one of the following courses including the lab section. You must have already completed PSY 201.		
PSY 302/PSY 302L	Research Methods: Cognition	
PSY 303/PSY 303L	Research Methods: Social Psychology	
PSY 306/PSY306L	Research Methods: Sensation & Perception	
PSY 329/PSY 329L	Research Methods in Organizational Psychology	
PSY 335/PSY 335L	Research Methods: Human Cognitive Neuroscience	
PSY 336/PSY 336L	Research Methods: Animal Learning & Behavior	
PSY 339/PSY 339L	Research Methods in Applied Behavior Analysis	
PSY 340/PSY 340L	Research Methods: Group Dynamics	
PSY 350/PSY 350L	Research Methods: Developmental Psychology	
Pillars of Psychology - Lower-Level		
Select one course from each area:		
Biological Foundations of Psychology		3
PSY 238	Sensation and Perception	
PSY 255	Biopsychology	
Cognitive and Behavioral Psychology		3
PSY 225	Learning Theory	
PSY 226	Cognitive Psychology	
Developmental Psychology		3
PSY 230	Child Development	
PSY 231	Youth and Adolescent Development	

Mental and Behavioral Health		3
PSY 220	Abnormal Psychology	
PSY 245	Stress, Health and Coping	
Social and Personality		3
PSY 215	Personality	
PSY 240	Social Psychology	
Pillars of Psychology - Upper-level Depth Requirements		12
Students must complete all Lower-Level Pillar Requirements above before moving to the Depth requirements below.		
Select four courses from at least three different pillars: ¹		
Biological Pillar of Psychology		
PSY 330	Developmental Disabilities	
PSY 345	Health Psychology	
PSY 365	Drugs and Human Behavior	
PSY 382	Aging, Brain, and Cognition	
PSY 388	Learning and the Experimental Analysis of Behavior	
Cognitive and Behavioral Pillar of Psychology		
PSY 315	Psychological Tests	
PSY 325	Cognitive Development	
PSY 333	Autism Spectrum Disorder	
PSY 367	Creativity and Innovation	
PSY 379	Psychology and Law	
PSY 384	Positive Psychology	
PSY 388	Learning and the Experimental Analysis of Behavior	
PSY 389	Professional Issues in ABA	
Developmental Pillar of Psychology		
PSY 324	Play and Imagination	
PSY 325	Cognitive Development	
PSY 330	Developmental Disabilities	
PSY 374	Psychology of the Family	
PSY 377	Developmental Psychopathology	
PSY 382	Aging, Brain, and Cognition	
PSY 386	Introduction to Child Life: Working with Children and Families in Healthcare Settings	
Mental and Behavioral Health Pillar of Psychology		
PSY 305	Theories of Psychotherapy	
PSY 310	Introductory Counseling Skills	
PSY 315	Psychological Tests	
PSY 365	Drugs and Human Behavior	
PSY 377	Developmental Psychopathology	
PSY 383	Psychology and Culture	
PSY 384	Positive Psychology	
PSY 385	Death, Dying and Suicide	
PSY 386	Introduction to Child Life: Working with Children and Families in Healthcare Settings	
PSY 389	Professional Issues in ABA	
Social and Personality Pillar of Psychology		
PSY 324	Play and Imagination	
PSY 334	Disabilities Across Cultures	
PSY 345	Health Psychology	
PSY 360	Psychology of Peace & Conflict	

PSY 367	Creativity and Innovation
PSY 379	Psychology and Law
PSY 381	Psychology of Gender
PSY 385	Death, Dying and Suicide
Diversity Requirement:	3
Prerequisite: At least 55 credits or all lower-level Pillars are completed	
PSY 333	Autism Spectrum Disorder
PSY 334	Disabilities Across Cultures
PSY 374	Psychology of the Family
PSY 381	Psychology of Gender
PSY 383	Psychology and Culture
Capstone Requirement:	3
Select one of the following options. You must have completed 90 credits for the course to count as a capstone experience. ²	
PSY 400	Senior Seminar
PSY 420	History of Psychology
PSY 490	Independent Study: Research and Creative Expression
PSY 491	Internship in Psychology (Note: 105-139 hours = 3 credits, 140+ hours = 4 credits)
Electives	
Lower-level courses not included in the pillars. These courses do not count toward the major, but do count as elective credits for graduation.	
PSY 118	Psychology of Women
PSY 210	Organizational Psychology
PSY 212	Introduction to Applied Behavior Analysis
PSY 237	Cognitive Disabilities
PSY 250	Psychology of Aging
PSY 283	Sport Psychology
PSY 295	Directed Study in Psychology
Total Credits	49

¹ Courses may count only once to satisfy the Departmental Requirement of 12 credits.

² Students must have Senior status in order to select a Capstone course.

Psychology Minor Requirements

PSY 255	Biopsychology
PSY 283	Sport Psychology
PSY 295	Directed Study in Psychology
PSY 299	Field Placement in Applied Behavior Analysis
Upper Division (Select three of the following courses)	9
PSY 302 & 302L	Research Methods: Cognition and Research Methods: Cognition Lab (4 CR)
PSY 303 & 303L	Research Methods: Social Psychology and Research Methods: Social Psychology Lab (4 CR)
PSY 305	Theories of Psychotherapy
PSY 306 & 306L	Research Methods: Sensation & Perception and Sensation & Perception Lab (4 CR)
PSY 315	Psychological Tests
PSY 324	Play and Imagination
PSY 325	Cognitive Development
PSY 329 & 329L	Research Methods in Organizational Psychology and Research Methods in Organizational Psychology (4 CR)
PSY 330	Developmental Disabilities
PSY 333	Autism Spectrum Disorder
PSY 334	Disabilities Across Cultures
PSY 335 & 335L	Research Methods: Human Cognitive Neuroscience and Research Methods: Human Cognitive Neuroscience Lab (with 4 CR)
PSY 336 & 336L	Research Methods: Animal Learning & Behavior and Animal Learning and Behavior Lab (4 CR)
PSY 339 & 339L	Research Methods in Applied Behavior Analysis and Research Methods in ABA Lab (4 CR)
PSY 340 & 340L	Research Methods: Group Dynamics and Group Dynamics Lab (4 CR)
PSY 345	Health Psychology
PSY 350 & 350L	Research Methods: Developmental Psychology and Developmental Psychology Lab (4 CR)
PSY 360	Psychology of Peace & Conflict
PSY 365	Drugs and Human Behavior
PSY 367	Creativity and Innovation
PSY 372	States of Consciousness
PSY 373	Cyberpsychology
PSY 374	Psychology of the Family
PSY 375	Psychology and Film
PSY 377	Developmental Psychopathology
PSY 379	Psychology and Law
PSY 381	Psychology of Gender
PSY 382	Aging, Brain, and Cognition
PSY 383	Psychology and Culture

PSY 384	Positive Psychology	
PSY 385	Death, Dying and Suicide	
PSY 388	Learning and the Experimental Analysis of Behavior	
PSY 389	Professional Issues in ABA	
Total Credits		18

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
PSY 100	Introduction to Psychology	3
CMP 120	Seminar in Writing and Rhetoric	3
MTH 102	Finite Mathematics	3
HIS 150	World History to 1500	3
Foreign Language I ¹		3
Semester Credit Hours		15

² Please note that elective credits may be used to complete requirements in a second major or minor.

4 + 1 Master's in Applied Psychology

The 4+1 Masters in Applied Psychology, Applied Behavior Analysis concentration, is designed for students who wish to combine undergraduate study in psychology leading to a Bachelor's of Arts degree with graduate study leading to a Masters of Arts in Applied Psychology.

The admission process for this program ensures that only capable students are enrolled. Freshman students are encouraged to seek advice about the program from their advisor and the program coordinator.

The following courses must be completed if the student intends to apply to the program: PSY 212 Introduction to Applied Behavior Analysis and PSY 299 Field Placement in Applied Behavior Analysis. PSY 299 is intended to assist the student in determining if the program is a good match for them. The additional undergraduate courses in Applied Behavior Analysis (PSY 339 Research Methods in Applied Behavior Analysis & Lab, PSY 388 Learning & The Experimental Analysis of Behavior, and PSY 389 Professional Issues in Applied Behavior

Analysis) may be taken following application to the graduate program but must be completed prior to completion of the undergraduate program requirements. During the first semester of the junior year, the student will formally apply to the Applied Psychology program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Applied Psychology program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the Applied Psychology program;
- An interview with faculty from the Applied Psychology program; and
- Completion of PSY 212 and PSY 299 (prior to application).
- Completion of PSY 339 & PSY 339L, PSY 388, and PSY 389 (prior to completion of the requirements for the degree in psychology)

Students accepted into the Applied Psychology program at the end of their junior year will complete one graduate-level elective course during each semester of their senior year.

Students will be awarded the BA degree when they complete the requirements for that degree in psychology. The MA will be awarded upon completion of the Applied Psychology requirements.

Courses and Descriptions

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 102 Explorations in Psychology Honors 3 Credits

The course introduces the history of psychology, and demonstrates how the discipline is a science. It provides students with experience exploring the mind, behavior, and the relationship between the two, from multiple perspectives, including biological, behavioral, cognitive, developmental, humanistic, social, and abnormal. It tackles questions including (but not limited to) how different areas of the brain are involved in behavior and are affected by injury, how humans sense and perceive the world, how states of consciousness differ from one another, how humans learn, remember, communicate, and develop, what motivates humans to behave in particular ways, how social groups affect behavior and decision-making, and what happens when behavior and emotions deviate from what is typical.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 110 Psychology: The Science of Well-being 3 Credits

This course is an overview of the science of psychology applied to the question of how to build well-being. The framework for PSY 110 mirrors Introduction to Psychology in its presentation of the major perspectives in psychology – Research Methods, Behaviorism, Cognition, Development, Social Behavior, Motivation and Mental Health. Topics in PSY 110 include: Perspectives in Psychology, Research Methods, Relationships, Social Behavior, Developmental Psychology, Behavior and Cognition, Motivation, Self & Identity, Positive Psychology, Optimism.

PSY 117 Psychology of Creativity 3 Credits

Is creativity reserved only for geniuses, or can ordinary individuals also be creative? Is it domain-specific or domain-general? How do we measure it? What is the connection between creativity and innovation? Can you and I become more creative, and if so, what factors influence creative thinking? This course surveys the modern theories of creativity and problem solving from a psychological perspective, and their applications to real-world challenges. Specific topics will focus on convergent and divergent thinking, the role of constraints, change, and motivation in creativity, social and personality factors, techniques such as brainstorming, design thinking, and creative problem solving, and innovation in organizations. You will apply what you have learned in hands-on activities that challenge you to propose creative solutions to real-world problems.

PSY 118 Psychology of Women 3 Credits

Examines the psychological development of women in our culture from birth to maturity, with an emphasis on the interaction of biological and social influences on personality, social behavior, and achievement of women. Investigates psychological sex differences in terms of current measurement approaches. Readings and text are drawn from psychological theory and research.

PSY 131 The Science of Mental Illness 3 Credits

This course introduces students to the separate and interactive effects of the person and the nervous system in the etiology and treatment of mental illness. Effectively, students receive in-depth exposure to research methods, the process of making and evaluating evidence based claims, classic and clinical applications of learning theory, the development of personality and the role of personality theories in the major systems of psychotherapy, the role of the central and peripheral nervous systems in behavior and mental illness, selected major DSM-5 categories of mental illness (stress, anxiety, depression, schizophrenia, and neurocognitive disorders), the major systems of psychotherapy, and the classifications and neural bases of pharmacological treatments for mental illness.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 210 Organizational Psychology 3 Credits

Focuses on issues related to human behavior in work settings. Topics include personnel issues such as hiring and promotion decisions, performance appraisals, and methods of on-the-job training. Issues of job satisfaction, motivation, productivity, and effective leadership styles are also examined. Finally, organizational structure as it relates to communication within organizations will be examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 212 Introduction to Applied Behavior Analysis 3 Credits

Presents a review of classical and operant conditioning, data collection and research design, data analysis and interpretation. In addition, assessment and treatment strategies in a variety of settings, contingency management in institution, classroom and home, systematic self-desensitization, and ethical consideration are discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 226 Cognitive Psychology 3 Credits

The study of the mind has been the focus of psychology since its inception in the 19th century. Today, the majority of psychological research focuses on the cognitive system and its biological basis. This course will provide an overview of knowledge regarding the components of the human cognitive system (e.g., attention, memory, executive processes) and how they form the basis for higher-order cognitive skills (e.g., language and decision making). The course will provide a history of the field and the methodologies that have been and are currently being used to study the human mind. Each section of the course will include an overview of basic and applied research to demonstrate how knowledge of the cognitive system can be used to enhance human functioning in applied settings and better understand human limitations and tendencies to commit certain types of errors.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 230 Child Development 3 Credits

Presents theory and research on the social, emotional and cognitive development of children birth to age 12.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 231 Youth and Adolescent Development 3 Credits

Presents theories, research and problems concerning development in youth and adolescence.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 237 Cognitive Disabilities 3 Credits

Investigates various types of intellectual differences, focusing on etiology, methods of diagnosis, programs and services available to individuals and families. Considers problems relating to adjustment in academic, social, and vocational areas.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 238 Sensation and Perception 3 Credits

The facts and theories of sensation and perception, their role in the total psychology of the individual, and current application are examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 245 Stress, Health and Coping 3 Credits

This course will examine physical and psychological effects of stress including a discussion of the nervous system, and the various models of the stress/illness relationship such as General Adaptation, Cognitive Appraisal and Diathesis-Stress. Various ways of coping with/responding to stress will be considered along with the influence of personality and sociodemographic factors on differences in both the experience of stress and on coping mechanisms will be considered. Finally, this course will consider issues in the measurement of stress and coping as well as some of the noteworthy findings and methodological aspects of stress research.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 250 Psychology of Aging 3 Credits

This survey course focuses on basic psychological issues in the aging process and in the elderly. It examines myths and stereotypes about aging and the elderly by way of research evidence pertaining to physical, psychological, and social changes accompanying aging.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 255 Biopsychology 3 Credits

Basic biological structures and processes underlying behavior, including general neuroanatomy and neurophysiology; sensory physiology; structure and function of the motor systems; physiology of emotions, motivation, learning, memory; brain dysfunction; psychoactive drugs.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 283 Sport Psychology 3 Credits

This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 292 Professional Development in Psychology 3 Credits

This course is designed to help students understand the connections between the required curriculum in psychology and their professional and post-graduation goals. Through this required course all psychology majors will have the opportunity to recognize and use the many applications of psychology to their plans for career development and employment. Students will articulate individual goals beyond graduation, understand the individual characteristics that predict success in the work environment, recognize and apply selected research in psychology to their goals and the world of employment. The course will better prepare students to articulate post-graduation goals early in their education, and apply those goals to the following years of their education. PSY major/minor students only.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131.

PSY 295 Directed Study in Psychology 1-4 Credits

Provides an opportunity for students to obtain research experiences in psychology. Consists of a combination of project meetings, assigned readings and supervised research. Each student will work with a selected faculty member on a topic of mutual interest. Projects may include learning some components of research methods and applying these techniques to the collection and analysis of data. Provides focused reading and discussion as it relates to each student's research topic.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 or permission of instructor and chair.

PSY 299 Field Placement in Applied Behavior Analysis 1 Credits

The practicum provides hands-on experience using the tools of applied behavior analysis in a field setting. Provides supervised field placement experience in an approved institution or agency in order for students to gain knowledge in applications of applied behavior analysis. Placement is made in various community institutions and agencies that offer services to diverse populations.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131, and PSY 212.

PSY 302 Research Methods: Cognition 4 Credits

Provides students with an in-depth coverage of the expanding field of cognition and memory. Addresses issues and research within the field. Emphasis is on current views of human memory. Students learn how to design and conduct their own experiments from the topic areas of information processing, psycholinguistics, problem solving, learning and memory, social cognition, and cognitive neuroscience. Laboratory skills include programming computers, developing multimedia stimuli, recording psycho-physiological data, and composing an APA-format research report in a network-based writing lab. **Prerequisite(s):** (PSY 100 or PSY102 or PSY110 or PSY131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 302L.

PSY 302L Research Methods: Cognition Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Prerequisite(s):** (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201.

Corequisite(s): PSY 302.

PSY 303 Research Methods: Social Psychology 4 Credits

Covers research methodology within the context of social psychology (i.e., topics include altruism, aggression, attraction and social perception). Both experimental and descriptive methodologies will be covered. Students learn about various aspects of the research process (e.g., design and execution of a social psychological study, analyzing and interpreting the results). Students also learn to integrate their research findings to produce an APA-style paper. Students use computer-based word processing and statistical analysis packages to achieve these goals. **Prerequisite(s):** (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 303L.

PSY 303L Research Methods: Social Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Prerequisites(s):** (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201.

Corequisites: PSY 303.

PSY 305 Theories of Psychotherapy 3 Credits

An exploration of the history and theory of the psychoanalytic, behavioral, and humanistic approaches to psychotherapy. Comparisons and contrasts between these therapeutic modalities are discussed, as well as the theory underlying specific therapeutic techniques such as dynamic interpretations, dream analysis, the analysis of resistance and transference, counter-conditioning, modeling, and cognitive restructuring. Class exercises in addition to transcripts and tape recordings from therapy sessions are used to illustrate the various therapeutic approaches.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY131) and 45 credits.

PSY 306 Research Methods: Sensation & Perception 4 Credits

Provides instruction in research design, research methods, and integration of data analysis and methodology within the content framework of sensation and perception. All the general psychology research methods are taught. Special emphasis is given to the study of human vision and audition. Students design, conduct, and report laboratory research in the areas of sensation and perception. The computer-based components of the laboratory include lessons on interactive software instrumentation for research, and network-based technical writing using APA format. Projects are conducted during the term. Each student uses a dedicated networked Macintosh computer to: a) develop and generate research stimuli and procedures, b) analyze and report research data, and c) write formal research reports. **Prerequisite(s):** (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 306L.

PSY 306L Sensation & Perception Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Prerequisite(s):** (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 306.

PSY 310 Introductory Counseling Skills 3 Credits

This course examines theory and research related to the therapy process and outcome. Students will practice foundational counseling skills with one another within a culturally-sensitive framework, including active listening, reflections of feelings, open questions, interpretations, self-disclosures, and challenges. Through experiential learning activities, students will develop a working knowledge of when and how to implement counseling skills. Students should be willing to talk about personal issues in this class.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 324 Play and Imagination 3 Credits

This course surveys two of the most important manifestations of children's imagination: pretend play and imaginary companions. It will discuss the evolution of play, the purpose of play, the role of play in the development of creativity, and individual differences in play (e.g., among children of different gender, cultures, and ability levels). Finally, it will discuss the application of play to therapeutic methods for children.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 325 Cognitive Development 3 Credits

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers the general areas of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 330 Developmental Disabilities 3 Credits

Introduces students to the genetic, biological, sensory-motor, cognitive, and social-emotional foundations of developmental disabilities. Selected syndromes will be reviewed in-depth, as will treatments and intervention at the individual and family levels.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 333 Autism Spectrum Disorder 3 Credits

Provides students with a general understanding of the etiology, neurocognitive underpinnings, and general characteristics of the autism spectrum disorders. The course will examine the history of the study of these disorders, the main problems associated with these conditions, and will explore psycho-educational treatment alternatives.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 334 Disabilities Across Cultures 3 Credits

The course is designed around the question of how a culture defines the concept of "Disabilities", how societies perceive individuals with disabilities, and how historical, social and political circumstances might shape an individual's understanding of diversity. The course encourages critical thinking and a comparative analysis of cultural differences and psychological practices. Key challenges associated with diagnosis, intervention and integration of individuals with disabilities across the globe will be discussed. This course fulfills the College of Liberal Arts and Sciences Essential Competencies Requirement: Global Perspectives.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 335 Research Methods: Human Cognitive Neuroscience 4 Credits

Covers the interdisciplinary study of the nervous system integrating neurobiology, physiology, pharmacology, and psychology as explanations for both normal and pathological human behavior. Topics integrate molecular levels of analysis, such as neuron structure and function, neurotransmitters, action potentials, and receptors, with molar levels, such as sensory and hormonal processes, learning and memory, emotions, drug use, and biological rhythms. Introduces research techniques used to study the function of the nervous system and the neural bases of behavior in humans. Neuroanatomical, electrophysiological, pharmacological, and neuropsychological assessment techniques may be explored as part of laboratory or field research projects designed in collaboration with the instructor.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 335L.

PSY 335L Research Methods: Human Cognitive Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201

Corequisite(s): PSY 335.

PSY 336 Research Methods: Animal Learning & Behavior 4 Credits

Provides a comprehensive overview of the acquisition and modification of the behavior of animals, especially on laboratory strains of rodents and pigeons. Core topics include respondent and operant conditioning, animal cognition, observational learning, animal safety and welfare, single-subject and between-groups approaches to methodology, and the statistical analysis of the results of studies of behavior. The laboratory component of the course provides a comprehensive overview of animal handling and maintenance, animal welfare, and the recording of experimental results. Two substantial projects are undertaken; demonstration of a conditioned taste aversion and its effect upon the acquisition and extinction of an operant (bar press) response and subsequent discrimination and reversal learning. Results of both projects are written into APA-formatted reports. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 336L.

PSY 336L Animal Learning and Behavior Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201

Corequisite(s): PSY 336.

PSY 339 Research Methods in Applied Behavior Analysis 4 Credits

This upper-level laboratory course will provide students with an in-depth study of the principles and applications of Applied Behavior Analysis. Students will examine behavioral principles, ethical considerations, and real-life applications of ABA. Each student will design and implement a self-management plan to alter the behavior of their choosing. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and PSY 212 and a minimum grade of "C" in PSY 201 .

Corequisite(s): PSY 339L.

PSY 339L Research Methods in ABA Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and Psy212 and a minimum grade of "C" PSY 201.

Corequisite(s): PSY 339.

PSY 340 Research Methods: Group Dynamics 4 Credits

Focuses on selected issues pertaining to group dynamics. Emphasizes an understanding of the personality and social factors that influence the functioning of unstructured and task-oriented groups. Students participate in a task group for the purpose of conducting a comprehensive research project on selected issues in group dynamics and the psychology of groups. The task group prepares an APA-style paper describing their research as well as an in-class presentation. Each student also submits a midterm and final written analysis of the interactional processes and development of the task group. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 340L.

PSY 340L Group Dynamics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 340.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 349 Research Methods - Health Psychology 4 Credits

This course examines the methods used by health psychologists to study the relationships between behavior, health, and illness, including the standard methodologies of description, observation, correlation, quasi-experimental and experimental, as well as some of the methods within the field of epidemiology including cohort, case-control, and cross-sectional studies. Students will design and conduct an empirical investigation on a health and illness-related research question.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisites: PSY 349L.

PSY 349L Research Methods in Health Psychology Lab 0 Credits

This is the lab accompanying PSY 349. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisites: PSY 349.

PSY 350 Research Methods: Developmental Psychology 4 Credits

Focuses on one or more research areas in cognitive, personality, or social development. Includes an overview of major theoretical approaches to age-related change. Students review original research on selected aspects of behavioral change. The laboratory component of the course presents an overview of developmental research designs and methods focusing on the measurement of age-related changes in psychological functioning. Students conduct field research projects designed in collaboration with the instructor and prepare an APA-style research report. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 350L.

PSY 350L Developmental Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (Psy 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 350.

PSY 360 Psychology of Peace & Conflict 3 Credits

This course examines issues related to peace, conflict, violence, and conflict resolution. Theories and strategies that suggest ways of reducing and eliminating conflict are discussed. Psychological and social causes and consequences of violence and nonviolence are considered.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 367 Creativity and Innovation 3 Credits

What is creativity, and how do we measure, study, and enhance it? This course will survey the modern theories of creativity from a psychological perspective, with an emphasis on the processes that underlie creative thinking and the variables that influence creative idea generation. Specific topics will include: convergent and divergent thinking, the role of the unconscious in creative ideation, flow and mindfulness, individual and group creativity, techniques such as brainstorming and creative problem solving, the neuroscience of creativity, the role of motivation, and creativity and innovation in organizations. Discussions of theoretical findings will be complemented by in-class activities and assignments that highlight applications to day-to-day living and to larger-scale challenges that require creativity and innovation.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 372 States of Consciousness 3 Credits

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 373 Cyberpsychology 3 Credits

Cyberpsychology is the study of how emerging computer technologies, especially social media, affect the way people think, feel, and behave both online and in the face-to-face world. This course explores a wide range of topics concerning this rapidly developing field of psychology, including how individuals, interpersonal relationships, and groups function in cyberspace with both positive and negative consequences for mental health. It emphasizes an understanding of the basic concepts of cyberpsychology along with the implications of this knowledge for improving wellbeing in the digital age.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the variety of ways family impacts development across the lifespan.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 375 Psychology and Film 3 Credits

Attitudes, perceptions and memories are shaped by motion pictures. Filmmakers create enduring images by using cinematic techniques to portray social and interpersonal themes. This course will examine various cinematic techniques as well as how film portrays interpersonal relations, gender roles, race relations, mental illness, The Holocaust, and other genocides.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 377 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY131) and 45 credits.

PSY 379 Psychology and Law 3 Credits

Introduces students to a study of selected topics in psychology and law. Topics include eyewitness testimony, jury selection, and decision-making.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 381 Psychology of Gender 3 Credits

This course examines the meaning of sex and gender in modern society. The course readings and discussion will review and analyze the influence of gender on human behavior and emotions. The course will examine the significance of gender in shaping experience. Topics will include: gender differences in behavior, gender role development, gender and sexual identity, gender and social roles, cross-cultural perspectives on gender and transcending gender.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 383 Psychology and Culture 3 Credits

Students enrolled in this course will critically examine the intersection of culture and psychology. Topics covered include cultural influences on: identity, the perceptions and manifestations of mental illness, and treatment-seeking.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 384 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 384 is cross-listed with PSY 584.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 385 Death, Dying and Suicide 3 Credits

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 386 Introduction to Child Life: Working with Children and Families in Healthcare Settings 3 Credits

The course provides the student with an introduction to the practice of Child Life in healthcare settings, serving as an educational foundation for those interested in pursuing a Child Life internship or other career working with children and families in a healthcare setting. Child Life programs seek to promote optimum development of children, adolescents, and families within a healthcare setting by helping to maintain normal living patterns and minimizing psychological trauma. Various theoretical positions related to the field (including but not limited to child development, play, stress, illness, trauma, and bereavement) will be described and their implications discussed. Classroom activities and assignments will help to develop relevant clinical skills including therapeutic play techniques, procedural preparation and support, coping strategies, child assessment, promoting advocacy/family-centered care, and health education. Official documents created by the Child Life Council, the certifying body for the field, will be reviewed, in addition to other seminal Child Life publications. The necessity for evidence-based practice will be discussed and relevant empirical studies will be presented (including those conducted in analogous academic fields such as developmental pediatrics and behavioral medicine).

Prerequisite: PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 388 Learning and the Experimental Analysis of Behavior 3 Credits

Students will review principles of behavior covered in PSY 212 Intro to ABA (or PSY 225 Learning Theory) and move into more complex concepts and principles of behavior analysis including respondent behavior, respondent conditioning, motivating operations, schedules of reinforcement, and verbal operants. Students will also learn elements of behavior change and specific behavior-change procedures including verbal behavior training, discrete trial training, interventions based on motivating operations and discriminative stimuli, and stimulus equivalence procedures.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 389 Professional Issues in ABA 3 Credits

This course will provide students interested in working in the field of applied behavior analysis at the bachelor's level content based on the task list of the Behavior Analyst Certification Board (BACB) The course covers ethical and professional considerations relevant to the profession of applied behavior analysis as well as ethical and disciplinary standards of the profession. In addition, the course covers behavioral assessment and intervention, competency-based training, and evaluating the effectiveness of behavioral programs. Students will also have the opportunity to read seminal and current research literature on the topics.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 395 Special Topics in Psychology 3 Credits

This course examines contemporary issues in psychology, with the particular topic varying each time it is offered. New directions in the field and/or current controversies will be the focus. Past offerings include Positive Psychology, Creativity, and Brain Games.

Prerequisite(s):)PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion, and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional-quality writing, oral or multimedia presentations.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 75 credits.

PSY 420 History of Psychology 3 Credits

Provides a coverage of systems and schools of psychology; great psychologists, their contributions, and later influence in psychology. Current psychological problems are also discussed.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 75 credits.

PSY 450 Advanced Research Methods in Clinical Psychology 4 Credits

This advanced research methods lecture and lab provides a capstone experience in measurement, assessment, research methods, and data analysis within clinical psychology. The focus of the course will be on using research tools to answer practical questions about psychopathology (e.g., what is an extreme score on a depression scale?) and treatment effectiveness (are there improvements in anxiety scores based on participation in a program?). Content will also emphasize the importance of recruiting diverse samples and assessment of individuals of diverse cultural and social backgrounds. Regarding research methods, students will examine various research designs and how design decisions impact data analysis and interpretation. Students will work in teams to conduct a study in which they apply their learning to develop a series of hypotheses, collect and analyze data, and ultimately present their findings in APA format. This course is designed to build on students' understanding of research methods in prior courses and can help prepare students for graduate school with a counseling, clinical, or social work focus.

Prerequisites: PSY 201 with a minimum grade of B, PSY 3xx/3xxL with a minimum grade of B, and Earned Credits: 75.

PSY 450L Advanced Research Methods in Clinical Psychology Lab 0 Credits

This course is a co-requisite for the corresponding course.

Prerequisite(s): PSY 201 with a minimum grade of B, PSY 3xx/3xxL with a minimum grade of B, and Earned Credits: 75.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and PSY 201 and 75 credits.

PSY 491 Internship in Psychology 1-4 Credits

Provides supervised work experience in an approved institution or agency in order for students to gain knowledge in applications of psychology. Placement is made in various community institutions and agencies that offer services to both exceptional and normal individuals. Prerequisite(s): senior psychology majors or minors.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 75 credits.

Psychology B.A. Online

Overview

The Online Psychology degree program allows students to develop a strong foundation in the theory and scientific methodology behind psychology, as well as its many practical applications. Students will strengthen their critical thinking and communication skills, and learn how to conduct and analyze basic research. The insights and knowledge acquired will prepare students for a financially and personally rewarding career in fields ranging from business to education, health care to social service. In addition to strong basic and psychology core courses, the Online B.A. in Psychology gives students the flexibility to explore their academic and career interests in the field. Students will select from a variety of classes designed to build their understanding of themselves and the world around them.

Student Learning Outcomes

1. **Theory:** Students will demonstrate knowledge of major concepts, theoretical perspectives, and empirical findings within psychology. Students will learn to apply the knowledge for solving real-world problems through participation in internships, community-based research, and/or leadership opportunities.
2. **Research:** Students will learn how to plan, conduct, and critically evaluate psychological research that promotes understanding of human behavior, diversity, and individual differences. Students will demonstrate the ability to communicate scientific concepts and results in written and oral form.
3. **Practice:** Students will develop interpersonal and intrapersonal knowledge that fosters self-awareness and personal growth, the development of leadership skills, and a respect and understanding of human diversity. Students will apply psychological content and skills to promote attainment of post-graduation goals.

Degree Offered

- B.A. in Psychology

Courses and Descriptions

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 102 Explorations in Psychology Honors 3 Credits

The course introduces the history of psychology, and demonstrates how the discipline is a science. It provides students with experience exploring the mind, behavior, and the relationship between the two, from multiple perspectives, including biological, behavioral, cognitive, developmental, humanistic, social, and abnormal. It tackles questions including (but not limited to) how different areas of the brain are involved in behavior and are affected by injury, how humans sense and perceive the world, how states of consciousness differ from one another, how humans learn, remember, communicate, and develop, what motivates humans to behave in particular ways, how social groups affect behavior and decision-making, and what happens when behavior and emotions deviate from what is typical.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 110 Psychology: The Science of Well-being 3 Credits

This course is an overview of the science of psychology applied to the question of how to build well-being. The framework for PSY 110 mirrors Introduction to Psychology in its presentation of the major perspectives in psychology – Research Methods, Behaviorism, Cognition, Development, Social Behavior, Motivation and Mental Health. Topics in PSY 110 include: Perspectives in Psychology, Research Methods, Relationships, Social Behavior, Developmental Psychology, Behavior and Cognition, Motivation, Self & Identity, Positive Psychology, Optimism.

PSY 117 Psychology of Creativity 3 Credits

Is creativity reserved only for geniuses, or can ordinary individuals also be creative? Is it domain-specific or domain-general? How do we measure it? What is the connection between creativity and innovation? Can you and I become more creative, and if so, what factors influence creative thinking? This course surveys the modern theories of creativity and problem solving from a psychological perspective, and their applications to real-world challenges. Specific topics will focus on convergent and divergent thinking, the role of constraints, change, and motivation in creativity, social and personality factors, techniques such as brainstorming, design thinking, and creative problem solving, and innovation in organizations. You will apply what you have learned in hands-on activities that challenge you to propose creative solutions to real-world problems.

PSY 118 Psychology of Women 3 Credits

Examines the psychological development of women in our culture from birth to maturity, with an emphasis on the interaction of biological and social influences on personality, social behavior, and achievement of women. Investigates psychological sex differences in terms of current measurement approaches. Readings and text are drawn from psychological theory and research.

PSY 131 The Science of Mental Illness 3 Credits

This course introduces students to the separate and interactive effects of the person and the nervous system in the etiology and treatment of mental illness. Effectively, students receive in-depth exposure to research methods, the process of making and evaluating evidence based claims, classic and clinical applications of learning theory, the development of personality and the role of personality theories in the major systems of psychotherapy, the role of the central and peripheral nervous systems in behavior and mental illness, selected major DSM-5 categories of mental illness (stress, anxiety, depression, schizophrenia, and neurocognitive disorders), the major systems of psychotherapy, and the classifications and neural bases of pharmacological treatments for mental illness.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 210 Organizational Psychology 3 Credits

Focuses on issues related to human behavior in work settings. Topics include personnel issues such as hiring and promotion decisions, performance appraisals, and methods of on-the-job training. Issues of job satisfaction, motivation, productivity, and effective leadership styles are also examined. Finally, organizational structure as it relates to communication within organizations will be examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 212 Introduction to Applied Behavior Analysis 3 Credits

Presents a review of classical and operant conditioning, data collection and research design, data analysis and interpretation. In addition, assessment and treatment strategies in a variety of settings, contingency management in institution, classroom and home, systematic self-desensitization, and ethical consideration are discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 226 Cognitive Psychology 3 Credits

The study of the mind has been the focus of psychology since its inception in the 19th century. Today, the majority of psychological research focuses on the cognitive system and its biological basis. This course will provide an overview of knowledge regarding the components of the human cognitive system (e.g., attention, memory, executive processes) and how they form the basis for higher-order cognitive skills (e.g., language and decision making). The course will provide a history of the field and the methodologies that have been and are currently being used to study the human mind. Each section of the course will include an overview of basic and applied research to demonstrate how knowledge of the cognitive system can be used to enhance human functioning in applied settings and better understand human limitations and tendencies to commit certain types of errors.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 230 Child Development 3 Credits

Presents theory and research on the social, emotional and cognitive development of children birth to age 12.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 231 Youth and Adolescent Development 3 Credits

Presents theories, research and problems concerning development in youth and adolescence.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 237 Cognitive Disabilities 3 Credits

Investigates various types of intellectual differences, focusing on etiology, methods of diagnosis, programs and services available to individuals and families. Considers problems relating to adjustment in academic, social, and vocational areas.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 238 Sensation and Perception 3 Credits

The facts and theories of sensation and perception, their role in the total psychology of the individual, and current application are examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 245 Stress, Health and Coping 3 Credits

This course will examine physical and psychological effects of stress including a discussion of the nervous system, and the various models of the stress/illness relationship such as General Adaptation, Cognitive Appraisal and Diathesis-Stress. Various ways of coping with/responding to stress will be considered along with the influence of personality and sociodemographic factors on differences in both the experience of stress and on coping mechanisms will be considered. Finally, this course will consider issues in the measurement of stress and coping as well as some of the noteworthy findings and methodological aspects of stress research.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 250 Psychology of Aging 3 Credits

This survey course focuses on basic psychological issues in the aging process and in the elderly. It examines myths and stereotypes about aging and the elderly by way of research evidence pertaining to physical, psychological, and social changes accompanying aging.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 255 Biopsychology 3 Credits

Basic biological structures and processes underlying behavior, including general neuroanatomy and neurophysiology; sensory physiology; structure and function of the motor systems; physiology of emotions, motivation, learning, memory; brain dysfunction; psychoactive drugs.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 283 Sport Psychology 3 Credits

This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 292 Professional Development in Psychology 3 Credits

This course is designed to help students understand the connections between the required curriculum in psychology and their professional and post-graduation goals. Through this required course all psychology majors will have the opportunity to recognize and use the many applications of psychology to their plans for career development and employment. Students will articulate individual goals beyond graduation, understand the individual characteristics that predict success in the work environment, recognize and apply selected research in psychology to their goals and the world of employment. The course will better prepare students to articulate post-graduation goals early in their education, and apply those goals to the following years of their education. PSY major/minor students only.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131.

PSY 295 Directed Study in Psychology 1-4 Credits

Provides an opportunity for students to obtain research experiences in psychology. Consists of a combination of project meetings, assigned readings and supervised research. Each student will work with a selected faculty member on a topic of mutual interest. Projects may include learning some components of research methods and applying these techniques to the collection and analysis of data. Provides focused reading and discussion as it relates to each student's research topic.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 or permission of instructor and chair.

PSY 299 Field Placement in Applied Behavior Analysis 1 Credits

The practicum provides hands-on experience using the tools of applied behavior analysis in a field setting. Provides supervised field placement experience in an approved institution or agency in order for students to gain knowledge in applications of applied behavior analysis. Placement is made in various community institutions and agencies that offer services to diverse populations.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131, and PSY 212.

PSY 302 Research Methods: Cognition 4 Credits

Provides students with an in-depth coverage of the expanding field of cognition and memory. Addresses issues and research within the field. Emphasis is on current views of human memory. Students learn how to design and conduct their own experiments from the topic areas of information processing, psycholinguistics, problem solving, learning and memory, social cognition, and cognitive neuroscience. Laboratory skills include programming computers, developing multimedia stimuli, recording psycho-physiological data, and composing an APA-format research report in a network-based writing lab. Prerequisite(s): (PSY 100 or PSY102 or PSY110 or PSY131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 302L.

PSY 302L Research Methods: Cognition Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201.

Corequisite(s): PSY 302.

PSY 303 Research Methods: Social Psychology 4 Credits

Covers research methodology within the context of social psychology (i.e., topics include altruism, aggression, attraction and social perception). Both experimental and descriptive methodologies will be covered. Students learn about various aspects of the research process (e.g., design and execution of a social psychological study, analyzing and interpreting the results). Students also learn to integrate their research findings to produce an APA-style paper. Students use computer-based word processing and statistical analysis packages to achieve these goals. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 303L.

PSY 303L Research Methods: Social Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisites(s): (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201.

Corequisites: PSY 303.

PSY 305 Theories of Psychotherapy 3 Credits

An exploration of the history and theory of the psychoanalytic, behavioral, and humanistic approaches to psychotherapy. Comparisons and contrasts between these therapeutic modalities are discussed, as well as the theory underlying specific therapeutic techniques such as dynamic interpretations, dream analysis, the analysis of resistance and transference, counter-conditioning, modeling, and cognitive restructuring. Class exercises in addition to transcripts and tape recordings from therapy sessions are used to illustrate the various therapeutic approaches.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY131) and 45 credits.

PSY 306 Research Methods: Sensation & Perception 4 Credits

Provides instruction in research design, research methods, and integration of data analysis and methodology within the content framework of sensation and perception. All the general psychology research methods are taught. Special emphasis is given to the study of human vision and audition. Students design, conduct, and report laboratory research in the areas of sensation and perception. The computer-based components of the laboratory include lessons on interactive software instrumentation for research, and network-based technical writing using APA format. Projects are conducted during the term. Each student uses a dedicated networked Macintosh computer to: a) develop and generate research stimuli and procedures, b) analyze and report research data, and c) write formal research reports. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 306L.

PSY 306L Sensation & Perception Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 306.

PSY 310 Introductory Counseling Skills 3 Credits

This course examines theory and research related to the therapy process and outcome. Students will practice foundational counseling skills with one another within a culturally-sensitive framework, including active listening, reflections of feelings, open questions, interpretations, self-disclosures, and challenges. Through experiential learning activities, students will develop a working knowledge of when and how to implement counseling skills. Students should be willing to talk about personal issues in this class.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 324 Play and Imagination 3 Credits

This course surveys two of the most important manifestations of children's imagination: pretend play and imaginary companions. It will discuss the evolution of play, the purpose of play, the role of play in the development of creativity, and individual differences in play (e.g., among children of different gender, cultures, and ability levels). Finally, it will discuss the application of play to therapeutic methods for children.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 325 Cognitive Development 3 Credits

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers the general areas of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 330 Developmental Disabilities 3 Credits

Introduces students to the genetic, biological, sensory-motor, cognitive, and social-emotional foundations of developmental disabilities. Selected syndromes will be reviewed in-depth, as will treatments and intervention at the individual and family levels.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 333 Autism Spectrum Disorder 3 Credits

Provides students with a general understanding of the etiology, neurocognitive underpinnings, and general characteristics of the autism spectrum disorders. The course will examine the history of the study of these disorders, the main problems associated with these conditions, and will explore psycho-educational treatment alternatives.

Prerequisite(s): (PSY 100 or PSY 102 or PSY110 or PSY 131) and 45 credits.

PSY 334 Disabilities Across Cultures 3 Credits

The course is designed around the question of how a culture defines the concept of "Disabilities", how societies perceive individuals with disabilities, and how historical, social and political circumstances might shape an individual's understanding of diversity. The course encourages critical thinking and a comparative analysis of cultural differences and psychological practices. Key challenges associated with diagnosis, intervention and integration of individuals with disabilities across the globe will be discussed. This course fulfills the College of Liberal Arts and Sciences Essential Competencies Requirement: Global Perspectives.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 335 Research Methods: Human Cognitive Neuroscience 4 Credits

Covers the interdisciplinary study of the nervous system integrating neurobiology, physiology, pharmacology, and psychology as explanations for both normal and pathological human behavior. Topics integrate molecular levels of analysis, such as neuron structure and function, neurotransmitters, action potentials, and receptors, with molar levels, such as sensory and hormonal processes, learning and memory, emotions, drug use, and biological rhythms. Introduces research techniques used to study the function of the nervous system and the neural bases of behavior in humans. Neuroanatomical, electrophysiological, pharmacological, and neuropsychological assessment techniques may be explored as part of laboratory or field research projects designed in collaboration with the instructor.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 335L.

PSY 335L Research Methods: Human Cognitive Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201

Corequisite(s): PSY 335.

PSY 336 Research Methods: Animal Learning & Behavior 4 Credits

Provides a comprehensive overview of the acquisition and modification of the behavior of animals, especially on laboratory strains of rodents and pigeons. Core topics include respondent and operant conditioning, animal cognition, observational learning, animal safety and welfare, single-subject and between-groups approaches to methodology, and the statistical analysis of the results of studies of behavior. The laboratory component of the course provides a comprehensive overview of animal handling and maintenance, animal welfare, and the recording of experimental results. Two substantial projects are undertaken; demonstration of a conditioned taste aversion and its effect upon the acquisition and extinction of an operant (bar press) response and subsequent discrimination and reversal learning. Results of both projects are written into APA-formatted reports. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 336L.

PSY 336L Animal Learning and Behavior Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201

Corequisite(s): PSY 336.

PSY 339 Research Methods in Applied Behavior Analysis 4 Credits

This upper-level laboratory course will provide students with an in-depth study of the principles and applications of Applied Behavior Analysis. Students will examine behavioral principles, ethical considerations, and real-life applications of ABA. Each student will design and implement a self-management plan to alter the behavior of their choosing. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and PSY 212 and a minimum grade of "C" in PSY 201 .

Corequisite(s): PSY 339L.

PSY 339L Research Methods in ABA Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and Psy212 and a minimum grade of "C" PSY 201.

Corequisite(s): PSY 339.

PSY 340 Research Methods: Group Dynamics 4 Credits

Focuses on selected issues pertaining to group dynamics. Emphasizes an understanding of the personality and social factors that influence the functioning of unstructured and task-oriented groups. Students participate in a task group for the purpose of conducting a comprehensive research project on selected issues in group dynamics and the psychology of groups. The task group prepares an APA-style paper describing their research as well as an in-class presentation. Each student also submits a midterm and final written analysis of the interactional processes and development of the task group.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 340L.

PSY 340L Group Dynamics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 340.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 349 Research Methods - Health Psychology 4 Credits

This course examines the methods used by health psychologists to study the relationships between behavior, health, and illness, including the standard methodologies of description, observation, correlation, quasi-experimental and experimental, as well as some of the methods within the field of epidemiology including cohort, case-control, and cross-sectional studies. Students will design and conduct an empirical investigation on a health and illness-related research question.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisites: PSY 349L.

PSY 349L Research Methods in Health Psychology Lab 0 Credits

This is the lab accompanying PSY 349. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisites: PSY 349.

PSY 350 Research Methods: Developmental Psychology 4 Credits

Focuses on one or more research areas in cognitive, personality, or social development. Includes an overview of major theoretical approaches to age-related change. Students review original research on selected aspects of behavioral change. The laboratory component of the course presents an overview of developmental research designs and methods focusing on the measurement of age-related changes in psychological functioning. Students conduct field research projects designed in collaboration with the instructor and prepare an APA-style research report. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 350L.

PSY 350L Developmental Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 350.

PSY 360 Psychology of Peace & Conflict 3 Credits

This course examines issues related to peace, conflict, violence, and conflict resolution. Theories and strategies that suggest ways of reducing and eliminating conflict are discussed. Psychological and social causes and consequences of violence and nonviolence are considered.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 367 Creativity and Innovation 3 Credits

What is creativity, and how do we measure, study, and enhance it? This course will survey the modern theories of creativity from a psychological perspective, with an emphasis on the processes that underlie creative thinking and the variables that influence creative idea generation. Specific topics will include: convergent and divergent thinking, the role of the unconscious in creative ideation, flow and mindfulness, individual and group creativity, techniques such as brainstorming and creative problem solving, the neuroscience of creativity, the role of motivation, and creativity and innovation in organizations. Discussions of theoretical findings will be complemented by in-class activities and assignments that highlight applications to day-to-day living and to larger-scale challenges that require creativity and innovation.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 372 States of Consciousness 3 Credits

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 373 Cyberpsychology 3 Credits

Cyberpsychology is the study of how emerging computer technologies, especially social media, affect the way people think, feel, and behave both online and in the face-to-face world. This course explores a wide range of topics concerning this rapidly developing field of psychology, including how individuals, interpersonal relationships, and groups function in cyberspace with both positive and negative consequences for mental health. It emphasizes an understanding of the basic concepts of cyberpsychology along with the implications of this knowledge for improving wellbeing in the digital age.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the variety of ways family impacts development across the lifespan.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 375 Psychology and Film 3 Credits

Attitudes, perceptions and memories are shaped by motion pictures. Filmmakers create enduring images by using cinematic techniques to portray social and interpersonal themes. This course will examine various cinematic techniques as well as how film portrays interpersonal relations, gender roles, race relations, mental illness, The Holocaust, and other genocides.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 377 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY131) and 45 credits.

PSY 379 Psychology and Law 3 Credits

Introduces students to a study of selected topics in psychology and law. Topics include eyewitness testimony, jury selection, and decision-making.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 381 Psychology of Gender 3 Credits

This course examines the meaning of sex and gender in modern society. The course readings and discussion will review and analyze the influence of gender on human behavior and emotions. The course will examine the significance of gender in shaping experience. Topics will include: gender differences in behavior, gender role development, gender and sexual identity, gender and social roles, cross-cultural perspectives on gender and transcending gender.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 383 Psychology and Culture 3 Credits

Students enrolled in this course will critically examine the intersection of culture and psychology. Topics covered include cultural influences on: identity, the perceptions and manifestations of mental illness, and treatment-seeking.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 384 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 384 is cross-listed with PSY 584.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 385 Death, Dying and Suicide 3 Credits

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 386 Introduction to Child Life: Working with Children and Families in Healthcare Settings 3 Credits

The course provides the student with an introduction to the practice of Child Life in healthcare settings, serving as an educational foundation for those interested in pursuing a Child Life internship or other career working with children and families in a healthcare setting. Child Life programs seek to promote optimum development of children, adolescents, and families within a healthcare setting by helping to maintain normal living patterns and minimizing psychological trauma. Various theoretical positions related to the field (including but not limited to child development, play, stress, illness, trauma, and bereavement) will be described and their implications discussed. Classroom activities and assignments will help to develop relevant clinical skills including therapeutic play techniques, procedural preparation and support, coping strategies, child assessment, promoting advocacy/family-centered care, and health education. Official documents created by the Child Life Council, the certifying body for the field, will be reviewed, in addition to other seminal Child Life publications. The necessity for evidence-based practice will be discussed and relevant empirical studies will be presented (including those conducted in analogous academic fields such as developmental pediatrics and behavioral medicine).

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 388 Learning and the Experimental Analysis of Behavior 3 Credits

Students will review principles of behavior covered in PSY 212 Intro to ABA (or PSY 225 Learning Theory) and move into more complex concepts and principles of behavior analysis including respondent behavior, respondent conditioning, motivating operations, schedules of reinforcement, and verbal operants. Students will also learn elements of behavior change and specific behavior-change procedures including verbal behavior training, discrete trial training, interventions based on motivating operations and discriminative stimuli, and stimulus equivalence procedures.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 389 Professional Issues in ABA 3 Credits

This course will provide students interested in working in the field of applied behavior analysis at the bachelor's level content based on the task list of the Behavior Analyst Certification Board (BACB) The course covers ethical and professional considerations relevant to the profession of applied behavior analysis as well as ethical and disciplinary standards of the profession. In addition, the course covers behavioral assessment and intervention, competency-based training, and evaluating the effectiveness of behavioral programs. Students will also have the opportunity to read seminal and current research literature on the topics.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 395 Special Topics in Psychology 3 Credits

This course examines contemporary issues in psychology, with the particular topic varying each time it is offered. New directions in the field and/or current controversies will be the focus. Past offerings include Positive Psychology, Creativity, and Brain Games.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion, and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional-quality writing, oral or multimedia presentations.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 75 credits.

PSY 420 History of Psychology 3 Credits

Provides a coverage of systems and schools of psychology; great psychologists, their contributions, and later influence in psychology. Current psychological problems are also discussed.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 75 credits.

PSY 450 Advanced Research Methods in Clinical Psychology 4 Credits

This advanced research methods lecture and lab provides a capstone experience in measurement, assessment, research methods, and data analysis within clinical psychology. The focus of the course will be on using research tools to answer practical questions about psychopathology (e.g., what is an extreme score on a depression scale?) and treatment effectiveness (are there improvements in anxiety scores based on participation in a program?). Content will also emphasize the importance of recruiting diverse samples and assessment of individuals of diverse cultural and social backgrounds. Regarding research methods, students will examine various research designs and how design decisions impact data analysis and interpretation. Students will work in teams to conduct a study in which they apply their learning to develop a series of hypotheses, collect and analyze data, and ultimately present their findings in APA format. This course is designed to build on students' understanding of research methods in prior courses and can help prepare students for graduate school with a counseling, clinical, or social work focus.

Prerequisites: PSY 201 with a minimum grade of B, PSY 3xx/3xxL with a minimum grade of B, and Earned Credits: 75.

PSY 450L Advanced Research Methods in Clinical Psychology Lab 0 Credits

This course is a co-requisite for the corresponding course.

Prerequisite(s): PSY 201 with a minimum grade of B, PSY 3xx/3xxL with a minimum grade of B, and Earned Credits: 75.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and PSY 201 and 75 credits.

PSY 491 Internship in Psychology 1-4 Credits

Provides supervised work experience in an approved institution or agency in order for students to gain knowledge in applications of psychology. Placement is made in various community institutions and agencies that offer services to both exceptional and normal individuals. Prerequisite(s): senior psychology majors or minors.

Prerequisite(s): (PSY 100 or PSY 102 or PSY110 or PSY 131) and 75 credits.

Public Health Certificate

Overview

The COVID-19 epidemic has increased interest and focus on public health and the practices of public health professionals. The Public Health Certificate addresses different approaches to solving complex health concerns. Students in existing health-related programs (i.e., health sciences, health care management, health care policy, etc) will have the opportunity to explore these concepts in classroom education while experiencing the concepts in practice through field-based, experiential learning.

This certificate will provide a new lens for students to explore health and health-related concerns from a public/population level, affording them an opportunity to apply their knowledge and experiences (i.e. science, management, policy, psychology, etc).

This certificate program will allow students to explore the foundations of public health through both didactic and experiential/field based learning experiences. This program will provide additional perspective into solving the complex issues around human health, while providing students the opportunity to gain valuable experience toward a career path (with additional graduate training). This program will serve both current and prospective undergraduate students and prospective part-time students (adult learners, community members) seeking to increase their understanding and knowledge of public health practices.

Public Health Certificate Requirements

(10-13 credits)

Code	Title	Credits
Required Courses:		
HSC 150	Introduction to Public Health	3
HSC 250	Introduction to Epidemiology	3
HCP 303	Global Health and Human Rights	3
HSC 491	Internship in Health Sciences	1-4
or HTH 491	Health Management Internship	
Total Credits		10-13

Courses and Descriptors

HSC 150 Introduction to Public Health 3 Credits

Public Health is the science of protecting, promoting, and improving the health of people and the communities where they live, learn, work, and play. Students will gain an understanding of the history and functions of public health, strategies and methods used in public health research, and the determinants of health.

HSC 250 Introduction to Epidemiology 3 Credits

Epidemiology is the study of distribution and determinants of defects, disease, and injury in human populations and the application of that study to assess the magnitude of health problems and the result of interventions designed to control them. This course is designed to introduce students to the basic principles, methods, and uses of epidemiology to better understand and characterize health and disease at a population level. The role of epidemiological evidence in planning and evaluation will be also be explored.

Prerequisite(s): MTH 102 or higher OR MSD 105 or higher OR POI.

HCP 303 Global Health and Human Rights 3 Credits

This course introduces students to the basic concepts of human rights and their links to national/global health, as well as to issues where human rights and health collide. Students will become familiar with global efforts for developing practical and effective responses to global health challenges with a human rights framework.

HSC 491 Internship in Health Sciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty member and should include keeping a journal of activities, a term paper or project report and an oral or poster presentation.

Prerequisite(s): 2.5 GPA required.

HTH 491 Health Management Internship 3 Credits

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance. **Prerequisite(s):** HTH 205; junior or senior standing; and permission of faculty supervisor.

Public Relations**Program Overview**

The field of public relations is one of the fastest-growing and most rewarding professions in today's information-based global economy.

As Public Relations majors at Rider University, students learn how organizations and individuals proactively manage communication challenges and opportunities in real world contexts. Expert professors, as well as professionals in the field, help students sharpen their skills through hands-on assignments and class lead discussions using case studies and current trends. Throughout the program, students explore the importance of cultivating and maintaining productive relationships with clients, the media and opinion leaders. In the capstone course, students work with local corporate or nonprofit clients to learn all facets of planning and executing a public relations campaign.

Outside the classroom, Rider's Public Relations majors are encouraged to gain experience by working as interns in a variety of fields including fashion, sports, healthcare, government or a number of other exciting industries. In addition, students have the opportunity to join the nationally recognized Rider chapter of the Public Relations Student Society of America (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-sciences/liberal-arts-programs/communication-journalism/club-activities/>).

The Public Relations Student Society of America (PRSSA) is the foremost organization for students interested in public relations and communication. The organization seeks to advance the public relations profession by nurturing generations of future professionals. As a chartered chapter of the national organization, Rider University's Public Relations Major meets rigorous academic standards for public relations education, and subscribes to the highest ethical principles and diversity in the profession.

At the local level, the Rider University Chapter offers opportunities to meet leaders in the field through agency tours, guest speakers, workshops, professional mentoring, and trips to regional and national conferences. The Rider Chapter also provides opportunities to build your public relations portfolio through the chapter's activities including social media, event planning, and public relations consulting activities. Dr. Nancy Wienczek (<http://www.rider.edu/faculty/nancy-wienczek/>) is the Chapter advisor.

For more information, please visit the Rider University Chapter of PRSSA on Instagram (<https://www.instagram.com/prssarider/>).

Curriculum Overview

Core classes in the Public Relations major include public relations, publication design, feature writing, advanced speech, public relations writing and strategy, communication research methods, and cases and campaigns in public relations.

To round out the major, students also choose at least one other class to build their skills in areas such as social media, podcasting, intercultural communication, event planning, web design, photography, marketing, advertising, or grant writing and fundraising. In addition, students also choose at least one class to explore a career focus through classes focused on organizational communication, health communication, politics and law, sports communication, international communication, arts marketing or an internship.

Total Credits		48

¹ Students may not carry a double major within the department. Communication, Journalism and Media majors may declare only one minor in the department. No more than two courses may be used to meet the requirements for both a major and a minor in the department.

² If a student receives a grade lower than "C" in a course required in a major or minor in the department, the student must repeat the course. Credit will only be awarded once for a course that is repeatable. The student must also repeat the course before enrolling in any course which it is a prerequisite.

³ Students in the 4+1 MABC program may take COMM 503 to count towards the Skills-Based part of the curriculum.

Public Relations Minor

(18 credits)

Code	Title	Credits
COM 107	Writing for the Media	3
COM 203	Introduction to Social Media	3
COM 240	Public Relations	3

COM 348	Communication Research Methods	3
COM 440	Cases & Campaigns in Public Relations	3
Total Credits		18

¹ Note: Communication, Journalism and Media majors may declare only one minor in the department. No more than two courses may be used to meet the requirements for both a major and a minor in the department. (Exception: If a student elects the Event Planning and Production minor, then three courses may be used to meet the requirements for both the major and that minor in the department.)

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits

Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits

As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits

Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits

This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment – and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits

In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits

Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits

Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits

Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits

Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.

Prerequisite(s): COM 104 or COM 290.

COM 205 Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits

Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.

Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits

Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.

Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits

Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits

Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits

Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits

Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements.

Prerequisite(s): COM 104 or COM 290.

COM 232 Podcasting I 3 Credits

Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits

Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits

Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits

Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits

The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 247 Covering the Sports Betting Industry 3 Credits

This course will introduce students to the world of covering the sports betting landscape via traditional sports media. Emphasis will be placed on learning the jargon of sports betting, learning how to break down financial reports from both states and gambling operators, how to cover legislative action on the subject. In short: Covering the world of sports betting is quickly becoming akin to covering the world of financial markets, and students wishing to pursue a career in sports media will have to know how to navigate this world going forward.

Prerequisite(s): COM 104 or COM 290.

COM 251 Interpersonal Communication 3 Credits

Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application.

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits

Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

Prerequisite(s): COM 261 or permission of instructor.

COM 263 History and Principles of Graphic Design 3 Credits

Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits

Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits

Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.

Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 292 Content for Social Media 3 Credits

Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 312 Special Topics in Journalistic Writing 3 Credits

Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.

Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits

Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.

Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits

Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.

Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GND 318. Students may not get credit for both COM 318 and GND 318.

COM 321 Stand Up Comedy 3 Credits

Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.

Prerequisite(s): COM 104: Speech Communication or COM 290: Professional and Strategic Speech.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits

Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits

Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.

Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits

This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits

Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.

Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. **Prereq(s):** COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits

In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.

Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits

Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): COM 232, COM 233, COM 234.

COM 337 Music Production for Mass Media 3 Credits

Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.

Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits

Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits

Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.

Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 348 Communication Research Methods 3 Credits

Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.

Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator.

COM 353 Nonverbal Communication 3 Credits

Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 355 Social Justice and Journalism 3 Credits

The best of American journalism is rooted in exploring issues of social justice and shining a spotlight on abuse. In this course, students will learn about the role journalism has played to expose social injustice in America by exploring powerful investigations by the mass media and also press organizations employing and representing non-white and marginalized groups. Students will examine both historical and contemporary journalism examples. The course also will include critical assessment of journalism's failings, including an exploration of the discrimination and disenfranchisement historically perpetuated by media.

COM 360 Advanced Publication Design and Presentation 3 Credits

Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.

Prerequisite(s): COM 212.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits

Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits

Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.

Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits

Offers students education in graphic animation theories, animation development techniques, and animation preparation for various multimedia applications. Emphasis is placed on the design principles in animated communication and animation techniques. The course covers the integration of static images in animation, graphic animation techniques, animation compression, animation rendering, input/output file formats, and animation delivery. The primary software for this course is Adobe Photoshop and MacMedia Flash. Students will be expected to participate in critiques of professional animation designs in order to learn to evaluate critically their own work and their fellow students' work.

Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits

Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.

Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits

Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.

Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits

Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media.

COM 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits

Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.

Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits

A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.

Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits

This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits

Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits

Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.

Prerequisite(s): COM 234.

COM 440 Cases & Campaigns in Public Relations 3 Credits

Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.

Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits

Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

COM 460 Web Design III 3 Credits

Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.

Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits

Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation. Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.

Prerequisite(s): ART 103, ART 105, COM 262, and COM 360.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Publishing and Professional Writing

Overview

The Certificate in Publishing and Professional Writing enables students in any major to earn a separate career-focused credential. This 12-credit program is designed to fortify qualifications for employment in many fields and enhance preparation for success in the workplace. Students may choose from a range of applied-writing courses regularly offered by the Department of English.

Admission Requirements

Admission to the program requires completion of CMP 125 with a final grade of C+ or better. English majors are eligible to apply.

Degree Offered

- Certificate in Publishing and Professional Writing

Publishing and Professional Writing Certificate Requirements

(12 credits)

Code	Title	Credits
Select four courses from the following:		12
ENG 236	Applied Grammar & Syntax	
ENG 318	Food Writing	
ENG 320	Editing for Literary Publishing	
ENG 321	Business and Professional Contexts	
ENG 322	Grant Proposals, Fundraising and Development	
ENG 323	Reviewing and Publishing	
ENG 324	Workplace Writing: Online Contexts	
ENG 325	Jobs in Book Publishing	
ENG 336	Grammar and Style	
ENG 405	Advanced Prose Style	
ENG 407	Advanced Workplace Writing	
ENG 490	Independent Study: Research and Creative Expression	
Total Credits		12

Program Completion and Certification

To earn the Certificate in Publishing and Professional Writing, students must complete the selected courses with an average grade of B or better. In addition, students must submit a final e-portfolio representing their best work from each of the courses taken, including a short commentary on each piece. The portfolio must meet Department of English standards for competency and completeness.

ENG 236 Applied Grammar & Syntax 3 Credits

This course offers a review of the essential elements of English grammar and syntax and fosters understanding of how these elements work in notable argumentative and expository writing as well as in the student's own compositions. Focus is on both expert reading and effective writing. Changing attitudes toward usage, including influence of digital media on language use, are discussed. May be taken as preparation for, or independently of ENG 336, which addresses grammar, syntax, and style at a more advanced level.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 318 Food Writing 3 Credits

Food Writing is a thematically based course in essay writing. It develops students' ability to write effective informal prose while also extending their knowledge about food sources, preparation, and consumption. They learn through readings and exercises, however, that food writing is about more than food. It encompasses the pleasures of the table, history, culture, science, and politics.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 320 Editing for Literary Publishing 3 Credits

This course introduces students to the process of publishing literary magazines and books. Student will learn all aspects of publishing from solicitation of manuscripts to the production of copy. Specific skills will include copyediting, proofreading, and layout.

ENG 321 Business and Professional Contexts 3 Credits

Students practice writing effectively to achieve specific purposes in typical business and professional workplace environments. Genres include various kinds of internal and external communication, including print and social media, for a range of audiences.

Prerequisite(s): CMP 125 or COM 203 or BHP 150 or permission of instructor.

ENG 322 Grant Proposals, Fundraising and Development 3 Credits

Students employ their analytical and writing skills to research and write grants for non-profit organizations in their local or regional communities. Fundraising and development activities on behalf of area organizations introduce them to career opportunities in this growing field.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150 or permission of instructor.

ENG 323 Reviewing and Publishing 3 Credits

Students learn to write arts and literary criticism through studying the work of prominent critics in literature, theatre, film, dance, visual arts, and music. Students learn how to market themselves as potential reviewers for print and online publications.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150 or permission of instructor.

ENG 324 Workplace Writing: Online Contexts 3 Credits

This course will help students adapt their writing to online environments. A writing-intensive course grounded in rhetorical principles, it focuses upon planning, writing and producing online texts distributed entirely through virtual portals. Genres include E-mail, instant messages, text messages, blogs, wikis, workplace social-media, and online team collaborations.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 325 Jobs in Book Publishing 3 Credits

Students will practice the forms of writing used by literary agents and publishing professionals working in acquisitions, editorial, and production at trade, academic, and small literary presses. These forms may include the query letter, book proposal, reader's report, and marketing plan.

Prerequisite(s): Completion of composition requirements or permission of instructor.

ENG 336 Grammar and Style 3 Credits

By building a comprehensive knowledge of the conventions of English grammar, punctuation and syntax, students will learn how to analyze the way words, phrases, sentences, and paragraphs work in expert writing, and they will apply this knowledge to their own writing. Emphasis is on argument, exposition, and analysis.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 405 Advanced Prose Style 3 Credits

Students analyze prose styles in English from the Renaissance to the present, focusing on the development of syntax, diction, and content. Students will be encouraged to imitate stylistic models and to develop their own prose style.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 407 Advanced Workplace Writing 3 Credits

Students will learn to adapt their writing skills to match specialized writing needs in publishing; corporate and personal finance; health, medicine, science, and technology. This course helps students build a portfolio and introduces them to corporate and freelance writing opportunities in our NJ/PA/NY area.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. To count toward the Certificate in Workplace Writing, an ENG 490 project must focus on workplace-related writing and be structured to include substantial formative feedback and revision. No more than one ENG 490 may be counted toward the certificate.

Prerequisite(s): completion of composition requirements or permission of instructor.

Radio and Podcasting

Program Overview

Students majoring in Radio and Podcasting have the opportunity to participate in classes tailored especially to their interests. They learn the secrets behind creating successful studio productions in small, hands-on classes in the Department of Communication, Journalism and Media's state-of-the-art radio studio and media labs. In addition to class projects, internships and co-ops, students gain valuable experience in producing radio programs, even as freshmen, on 107.7, The Bronc (<http://www.1077thebronc.com>) - Rider's own radio station, or by creating their own unique podcasts. Students may also expand their interests to include participating in R.U.N., (<http://runetwork.weebly.com>) The Rider University Network (<http://runetwork.weebly.com>), Rider's student produced and hosted television network, as well as participate in the Semester in LA (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/liberal-arts-programs/communication-journalism/semester-in-la/>) program where students spend an entire semester studying and working in Los Angeles for major media companies.

Curriculum Overview

Core classes in the Radio and Podcasting major include writing for broadcast, audio production, advanced topics in podcasting and radio, and music production for mass media, among others. Students also choose a capstone experience that fits their interest from radio station operations, a hands-on internship, or a creative project.

Degree Offered

- B.A. in Radio and Podcasting

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits

Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits

As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits

Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits

This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment – and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits

In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits

Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits

Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits

Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits

Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.

Prerequisite(s): COM 104 or COM 290.

COM 205 Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits

Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.

Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits

Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.

Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits

Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits

Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits

Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits

Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements. **Prerequisite(s):** COM 104 or COM 290.

COM 232 Podcasting I 3 Credits

Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits

Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits

Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits

Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits

The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 247 Covering the Sports Betting Industry 3 Credits

This course will introduce students to the world of covering the sports betting landscape via traditional sports media. Emphasis will be placed on learning the jargon of sports betting, learning how to break down financial reports from both states and gambling operators, how to cover legislative action on the subject. In short: Covering the world of sports betting is quickly becoming akin to covering the world of financial markets, and students wishing to pursue a career in sports media will have to know how to navigate this world going forward.

Prerequisite(s): COM 104 or COM 290.

COM 251 Interpersonal Communication 3 Credits

Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application.

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits

Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

Prerequisite(s): COM 261 or permission of instructor.

COM 263 History and Principles of Graphic Design 3 Credits

Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits

Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits

Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.

Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 292 Content for Social Media 3 Credits

Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 312 Special Topics in Journalistic Writing 3 Credits

Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.

Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits

Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.

Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits

Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.

Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GND 318. Students may not get credit for both COM 318 and GND 318.

COM 321 Stand Up Comedy 3 Credits

Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.

Prerequisite(s): COM 104: Speech Communication or COM 290: Professional and Strategic Speech.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits

Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits

Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.

Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits

This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits

Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.

Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. **Prereq(s):** COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits

In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.

Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits

Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): COM 232, COM 233, COM 234.

COM 337 Music Production for Mass Media 3 Credits

Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.

Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits

Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits

Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.

Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 348 Communication Research Methods 3 Credits

Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.

Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator.

COM 353 Nonverbal Communication 3 Credits

Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 355 Social Justice and Journalism 3 Credits

The best of American journalism is rooted in exploring issues of social justice and shining a spotlight on abuse. In this course, students will learn about the role journalism has played to expose social injustice in America by exploring powerful investigations by the mass media and also press organizations employing and representing non-white and marginalized groups. Students will examine both historical and contemporary journalism examples. The course also will include critical assessment of journalism's failings, including an exploration of the discrimination and disenfranchisement historically perpetuated by media.

COM 360 Advanced Publication Design and Presentation 3 Credits

Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.

Prerequisite(s): COM 212.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits

Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits

Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.

Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits

Offers students education in graphic animation theories, animation development techniques, and animation preparation for various multimedia applications. Emphasis is placed on the design principles in animated communication and animation techniques. The course covers the integration of static images in animation, graphic animation techniques, animation compression, animation rendering, input/output file formats, and animation delivery. The primary software for this course is Adobe Photoshop and MacMedia Flash. Students will be expected to participate in critiques of professional animation designs in order to learn to evaluate critically their own work and their fellow students' work.

Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits

Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.

Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits

Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.

Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits

Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media.

COM 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits

Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.

Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits

A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.

Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits

This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits

Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits

Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.

Prerequisite(s): COM 234.

COM 440 Cases & Campaigns in Public Relations 3 Credits

Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.

Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits

Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

COM 460 Web Design III 3 Credits

Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.

Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits

Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation. Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.

Prerequisite(s): ART 103, ART 105, COM 262, and COM 360.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Research Methods in Psychology Certificate

Overview

The Certificate in Research Methods will prepare students for graduate study in many social and behavioral science areas. In addition, it will provide a background in research that will enable students to find employment as research assistants, engaged in data collection, coding, and analysis, after completing their undergraduate degrees. Finally, it will equip students with an informal credential that may be appealing in areas of employment where production, manipulation, and interpretation of data is an important function. Courses include an introductory level research methods course, upper-level research methods courses, a statistics course, and the opportunity to conduct independent research under the supervision of a faculty member

Research Methods in Psychology Certificate Requirements

(18-21 credits)

Code	Title	Credits
Required Courses:		
PSY 105	Introduction to Research in Psychology	3
PSY 201	Statistics and Research Design	3
PSY 315	Psychological Tests	3
PSY 490	Independent Study: Research and Creative Expression	3-4
Select two of the following:		8
PSY 302 & 302L	Research Methods: Cognition and Research Methods: Cognition Lab	
PSY 303 & 303L	Research Methods: Social Psychology and Research Methods: Social Psychology Lab	
PSY 306 & 306L	Research Methods: Sensation & Perception and Sensation & Perception Lab	
PSY 329 & 329L	Research Methods in Organizational Psychology and Research Methods in Organizational Psychology	
PSY 335 & 335L	Research Methods: Human Cognitive Neuroscience and Research Methods: Human Cognitive Neuroscience Lab	
PSY 336 & 336L	Research Methods: Animal Learning & Behavior and Animal Learning and Behavior Lab	
PSY 339 & 339L	Research Methods in Applied Behavior Analysis and Research Methods in ABA Lab	
PSY 340 & 340L	Research Methods: Group Dynamics and Group Dynamics Lab	
PSY 350 & 350L	Research Methods: Developmental Psychology and Developmental Psychology Lab	
Total Credits		20-21

Courses and Descriptions

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and PSY 201 and 75 credits.

PSY 302 Research Methods: Cognition 4 Credits

Provides students with an in-depth coverage of the expanding field of cognition and memory. Addresses issues and research within the field. Emphasis is on current views of human memory. Students learn how to design and conduct their own experiments from the topic areas of information processing, psycholinguistics, problem solving, learning and memory, social cognition, and cognitive neuroscience. Laboratory skills include programming computers, developing multimedia stimuli, recording psycho-physiological data, and composing an APA-format research report in a network-based writing lab. **Prerequisite(s):** (PSY 100 or PSY102 or PSY110 or PSY131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 302L.

PSY 302L Research Methods: Cognition Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Prerequisite(s):** (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201.

Corequisite(s): PSY 302.

PSY 303 Research Methods: Social Psychology 4 Credits

Covers research methodology within the context of social psychology (i.e., topics include altruism, aggression, attraction and social perception). Both experimental and descriptive methodologies will be covered. Students learn about various aspects of the research process (e.g., design and execution of a social psychological study, analyzing and interpreting the results). Students also learn to integrate their research findings to produce an APA-style paper. Students use computer-based word processing and statistical analysis packages to achieve these goals. **Prerequisite(s):** (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 303L.

PSY 303L Research Methods: Social Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Prerequisites(s):** (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201.

Corequisites: PSY 303.

PSY 306 Research Methods: Sensation & Perception 4 Credits

Provides instruction in research design, research methods, and integration of data analysis and methodology within the content framework of sensation and perception. All the general psychology research methods are taught. Special emphasis is given to the study of human vision and audition. Students design, conduct, and report laboratory research in the areas of sensation and perception. The computer-based components of the laboratory include lessons on interactive software instrumentation for research, and network-based technical writing using APA format. Projects are conducted during the term. Each student uses a dedicated networked Macintosh computer to: a) develop and generate research stimuli and procedures, b) analyze and report research data, and c) write formal research reports. **Prerequisite(s):** (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 306L.

PSY 306L Sensation & Perception Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Prerequisite(s):** (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 306.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers the general areas of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 335 Research Methods: Human Cognitive Neuroscience 4 Credits

Covers the interdisciplinary study of the nervous system integrating neurobiology, physiology, pharmacology, and psychology as explanations for both normal and pathological human behavior. Topics integrate molecular levels of analysis, such as neuron structure and function, neurotransmitters, action potentials, and receptors, with molar levels, such as sensory and hormonal processes, learning and memory, emotions, drug use, and biological rhythms. Introduces research techniques used to study the function of the nervous system and the neural bases of behavior in humans. Neuroanatomical, electrophysiological, pharmacological, and neuropsychological assessment techniques may be explored as part of laboratory or field research projects designed in collaboration with the instructor. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 335L.

PSY 335L Research Methods: Human Cognitive Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201

Corequisite(s): PSY 335.

PSY 336 Research Methods: Animal Learning & Behavior 4 Credits

Provides a comprehensive overview of the acquisition and modification of the behavior of animals, especially on laboratory strains of rodents and pigeons. Core topics include respondent and operant conditioning, animal cognition, observational learning, animal safety and welfare, single-subject and between-groups approaches to methodology, and the statistical analysis of the results of studies of behavior. The laboratory component of the course provides a comprehensive overview of animal handling and maintenance, animal welfare, and the recording of experimental results. Two substantial projects are undertaken; demonstration of a conditioned taste aversion and its effect upon the acquisition and extinction of an operant (bar press) response and subsequent discrimination and reversal learning. Results of both projects are written into APA-formatted reports. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 336L.

PSY 336L Animal Learning and Behavior Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201

Corequisite(s): PSY 336.

PSY 339 Research Methods in Applied Behavior Analysis 4 Credits

This upper-level laboratory course will provide students with an in-depth study of the principles and applications of Applied Behavior Analysis. Students will examine behavioral principles, ethical considerations, and real-life applications of ABA. Each student will design and implement a self-management plan to alter the behavior of their choosing. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and PSY 212 and a minimum grade of "C" in PSY 201 .

Corequisite(s): PSY 339L.

PSY 339L Research Methods in ABA Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and Psy212 and a minimum grade of "C" PSY 201 .

Corequisite(s): PSY 339.

PSY 340 Research Methods: Group Dynamics 4 Credits

Focuses on selected issues pertaining to group dynamics. Emphasizes an understanding of the personality and social factors that influence the functioning of unstructured and task-oriented groups. Students participate in a task group for the purpose of conducting a comprehensive research project on selected issues in group dynamics and the psychology of groups. The task group prepares an APA-style paper describing their research as well as an in-class presentation. Each student also submits a midterm and final written analysis of the interactional processes and development of the task group.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 .

Corequisite(s): PSY 340L.

PSY 340L Group Dynamics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 .

Corequisite(s): PSY 340.

PSY 350 Research Methods: Developmental Psychology 4 Credits

Focuses on one or more research areas in cognitive, personality, or social development. Includes an overview of major theoretical approaches to age-related change. Students review original research on selected aspects of behavioral change. The laboratory component of the course presents an overview of developmental research designs and methods focusing on the measurement of age-related changes in psychological functioning. Students conduct field research projects designed in collaboration with the instructor and prepare an APA-style research report. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 .

Corequisite(s): PSY 350L.

PSY 350L Developmental Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (Psy 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 .

Corequisite(s): PSY 350.

SAP Student Recognition Award Certificate

Program Overview

As a member of the SAP University Alliances program, Rider's Norm Brodsky College of Business offers the *SAP Student Recognition Award* certificate to students who satisfactorily complete a minimum of three courses with at least one-third SAP hands-on content in each course. Students who earn the award will demonstrate the depth and breadth of their knowledge using state-of-the-art software, developing valuable skills relevant to their careers and chosen fields.

SAP is the global leader in enterprise application software, with more than 170,000 customers in more than 120 countries. They provide enterprise resource planning (ERP), business intelligence (BI) and related applications and services that enable companies of all sizes and in more than 25 industries. Global demand for certified SAP professionals

increases every year. Hit the ground running at companies using SAP software!

SAP Student Recognition Award Certificate Requirements

(9 credits)

Students who complete three of the following SAP integrated CIS courses with a grade of "C" or better are eligible to receive the SAP Recognition Award Certificate. (Students who plan to take any of these courses specifically to obtain the certificate should check with the instructor to ensure the required SAP content will be covered that semester.)

Code	Title	Credits
Choose three of the following:		
CIS 315	Integrated Business with SAP	
CIS 360	Data Mining	
GSC 385	Management Information Systems for Global Supply Chain Management	
CIS 430	Enterprise Integration	
Total Credits		9

Courses and Descriptions

CIS 315 Integrated Business with SAP 3 Credits

This course provides an introduction to enterprise resource planning (ERP) systems and addresses how integrated information systems improve business operations. Students will learn about functional business areas and business processes, and understand the problems inherent in un-integrated enterprise information systems. Using SAP software and case studies, students will learn how ERP systems are being used to facilitate integrated, real-time management decision making.

Prerequisite(s): CIS 185 and ACC 210.

CIS 360 Data Mining 3 Credits

This course deals with modern technologies for data analysis. Hands-on exercises for data retrieval, data visualization and predictive analytics will be carried out using up-to-date methodologies and software tools. The full data mining life cycle will be covered from recognizing business problems and opportunities amenable to data mining analysis through deploying and monitoring solutions.

Prerequisite(s): CIS 185 with a minimum grade of D .

GSC 385 Management Information Systems for Global Supply Chain Management 3 Credits

The purpose of this junior level management information systems course is to prepare students for today's dynamic business environment by increasing their understanding of IT-enabled global information processing and management. This course has a specific emphasis on the impact and effective utilization of information systems and technology for the global supply chain. Students will gain a solid understanding of the value of business process integration through a combination of conceptual learning, business process analysis, and collaborative decision-making. This will be facilitated through hands-on experience with SAP ERP and analytical software as well as Microsoft Excel. GSC 385 is required for the Global Supply Chain Management major and can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

Prerequisite(s): CIS 185 and junior standing.

CIS 430 Enterprise Integration 3 Credits

The major focus of this course includes the forces driving enterprise integration as well as the management decisions associated with the design and implementation of enterprise systems. Students will use SAP ERP extensively to configure, build, test, and implement an enterprise system for a real business environment from the ground up.

Prerequisite(s): CIS 315.

Sales

Program Overview

The Sales Minor is complementary to a wide range of majors in that it prepares students to effectively and persuasively represent an organization's offerings in negotiation and exchange situations. The employment outlook for sales positions is positive in a variety of industries such as manufacturing, wholesale, insurance, real estate and financial services. The core of the minor establishes a solid base of concepts and skills in sales and negotiation while elective courses allow students to focus on complementary knowledge areas and/or industries.

The minor is available to both business and non-business majors.

As a member of the SAP University Alliances program, Rider's Norm Brodsky College of Business also offers the SAP Student Recognition Award certificate to students who satisfactorily complete a minimum of three courses with at least one-third SAP hands-on content in each course. Students who earn the award will demonstrate depth and breadth of their knowledge using state-of-the-art software, developing valuable skills relevant to their careers and chosen fields. Sales Minor with SAP Student Award Certificate

Code	Title	Credits
Students must take three of the following electives in addition to the three required courses for a total of 18 credits:		
CIS 315	Integrated Business with SAP	
CIS 360	Data Mining	
CIS 430	Enterprise Integration	
GSC 385	Management Information Systems for Global Supply Chain Management	

The sales minor is open to all students at the University. For students pursuing a major in the Norm Brodsky College of Business, no more than two courses in the minor can be double counted as satisfying either core or major requirements.

Courses and Descriptions

BUS 210 Intro to Law: Contracts 3 Credits

An introduction to the origin of current law, with emphasis on the development of business law, students are exposed to legal terminology and acquainted with the system of application of rules of law to actual situations. The laws of contracts, particularly common-law developments, are considered in great detail.

CIS 315 Integrated Business with SAP 3 Credits

This course provides an introduction to enterprise resource planning (ERP) systems and addresses how integrated information systems improve business operations. Students will learn about functional business areas and business processes, and understand the problems inherent in un-integrated enterprise information systems. Using SAP software and case studies, students will learn how ERP systems are being used to facilitate integrated, real-time management decision making.

Prerequisite(s): CIS 185 and ACC 210.

CIS 390 Project Management 3 Credits

This course introduces students to general project management, the process of organizing resources to achieve business goals. Topics include the identification, approval, analysis, and general management of complex business projects. Project management tools, reports, techniques, and approaches will be covered.

Prerequisite(s): CIS 185.

CIS 430 Enterprise Integration 3 Credits

The major focus of this course includes the forces driving enterprise integration as well as the management decisions associated with the design and implementation of enterprise systems. Students will use SAP ERP extensively to configure, build, test, and implement an enterprise system for a real business environment from the ground up.

Prerequisite(s): CIS 315.

FIN 200 Managing Your Money 3 Credits

An introduction to the analysis of a wide range of financial decisions which individuals encounter over their careers and lifetime. Topics include financial goals, tax planning, home ownership versus renting, consumer credit, money management and investments, and managing risk with insurance. This course is open to all Rider students, and it counts as a free elective or a business elective. It cannot be used as finance elective.

FIN 305 Personal Financial Planning 3 Credits

This course focuses on practical issues and problems involving personal financial budgeting, use of credit, selection of banking services, insurance needs, real estate, investments, tax planning, and retirement planning. An important objective of the course is to provide the student with the tools that are utilized in making personal financial decisions and how to apply those tools for a variety of financial needs.

Prerequisite(s): FIN 220.

GSC 385 Management Information Systems for Global Supply Chain Management 3 Credits

The purpose of this junior level management information systems course is to prepare students for today's dynamic business environment by increasing their understanding of IT-enabled global information processing and management. This course has a specific emphasis on the impact and effective utilization of information systems and technology for the global supply chain. Students will gain a solid understanding of the value of business process integration through a combination of conceptual learning, business process analysis, and collaborative decision-making. This will be facilitated through hands-on experience with SAP ERP and analytical software as well as Microsoft Excel.

GSC 385 is required for the Global Supply Chain Management major and can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

Prerequisite(s): CIS 185 and junior standing.

MGT 346 Negotiation 3 Credits

The purpose of this course is first, to explore the major concepts and theories behind effective negotiating practices and second, to develop negotiating skills applicable to a wide range of contexts. A knowledge of negotiation is a crucial requirement for anyone interested in a business career since it is a common mechanism for implementing change and for resolving conflict in the workplace. Topics will include two-party negotiations, power and politics, mediation, arbitration, and collective bargaining. A variety of teaching techniques will be used including readings, discussion, and role-playing.

Prerequisite(s): MGT 201 or permission of the instructor.

MKT 260 Service Marketing 3 Credits

Focuses on the unique challenges of managing services and delivering quality service to customers. Emphasis is placed on the total organization, and how effective marketing and customer focus must be coordinated across multiple functions. The course is applicable to service organizations and to organizations that depend on service excellence for competitive advantage. Topics include customer-focused management, and customer satisfaction, retention, lifetime value and profitability. Students will learn to map services, understand customer expectations, and develop relationship marketing strategies.

Prerequisite(s): MKT 200.

MKT 310 Business to Business Marketing 3 Credits

This course examines the business-to-business marketplace, and the planning and control tools used by its entities in managing the product, pricing, promotion, channel and supply chain management strategies.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 320 Consumer Behavior 3 Credits

The nature and determinants of consumer behavior are studied, with attention given to the influence of socio-psychological factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumer attitudes, consumption patterns, and purchasing behavior.

Prerequisite(s): MKT 200.

MKT 340 Personal Selling 3 Credits

Examines persuasive techniques utilized in sales presentations conducted on a person-to-person basis. Major course emphasis is on developing effective selling techniques; understanding the company, its products and the role of the salesperson in implementing product/market strategies; understanding the customers and the selling environment; application of effective sales presentation techniques; recognizing selling opportunities and careers.

Prerequisite(s): MKT 200; 30 credits completed.

MKT 440 Sales Management 3 Credits

By means of lectures, discussions, and case studies, the field of marketing management is analyzed from the viewpoint of sales executives. The responsibilities for planning and administering personal selling operations are emphasized. Considerable attention is given to other activities for which sales executives may be wholly or jointly responsible, such as decision making on promotion and brand management.

Prerequisite(s): MKT 200 and senior standing.

Social Justice Through Civic Engagement

Program Overview

Morally and civically responsible individuals recognizes themselves as a member of a larger social fabric and therefore considers social problems to be at least partly their own. Such an individual is willing to see the moral and civic dimensions of issues, to make and justify informed moral and civic judgments, and to take action when appropriate. The Social Justice through Civic Engagement minor focuses on those populations that are "non-hegemonic" in society, adding to a students' diversity of ideas regarding these groups.

Curriculum Overview

The minor is available to students from all colleges/schools, allowing them to combine rigorous coursework with experiential learning. The coursework provides students with an academically meaningful foundation from which they can put their experiences in a larger social context. The broad range of courses available address social topics such as economics, politics, ethnicity, culture, or gender, fostering discussions that allow a student to reflect on their own experiences and consider new solutions to social problems.

Courses and Descriptions

AMS 212 Multicultural America 3 Credits

Focusing primarily on the new century, this course explores the experiences of the remarkably diverse range of ethnic groups who have come to the U.S. in recent years, including Hispanics, Europeans, Asians and Africans. How these groups have impacted the communities where they have settled, how they have interacted with other ethnic groups, and how they have assimilated (or not) and prospered (or not) are among the issues examined and discussed.

AMS 227 Martin Luther King Jr's America 3 Credits

This course studies Martin Luther King Jr's writings, speeches, and sermons, the context of the America he saw in his lifetime, and the implications of his message for today's America and its place in the world. King envisioned a wholly democratic America free of racism, poverty, and military aggression. Students will critically assess the political, economic, and religious thought at the root of his call for change.

AMS 309 Hip Hop and American Culture 3 Credits

Explore hip-hop culture via the music, dance, art, and poetry created in some of the poorest and most segregated neighborhoods in America. Students will examine the social conditions that fostered the creation of hip-hop and delve into a range of issues confronted in hip-hop music and culture.

Prerequisites: CMP 125 or CMP 203 or BHP 150.

ECO 336 Economics of Health Care Sys 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomic tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

Prerequisite(s): ECO 201 or HTH 205.

ENG 228 Black American Lit 3 Credits

A survey of writings by black Americans, presented historically from early slave narratives through emancipation, reconstruction, the Harlem Renaissance, and literature from the 1930s to the present. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 229 Multi-Ethnic Literature in America 3 Credits

Surveys the literature of various ethnic groups including African Americans, American Indians, Asian Americans, Hispanic Americans, Jewish Americans and European Americans. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 230 Women In Literature 3 Credits

A range of literary presentations of the female experience and of the conditions of women's lives is explored. These works are placed in historical and social contexts in order to see behind and beyond traditional literary conventions. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

HIS 200 Native American History 3 Credits

Traces the experiences of North American Indians from early colonial times to the present day, demonstrating how Indian life has varied and changed throughout our nation's history. Topics include strategies of resistance and accommodation to colonial powers, 19th-century impacts of U.S. government removal and cultural assimilation policies, and 20th-century cultural and political developments among the nation's surviving tribes. Rather than "vanishing," American Indians are a vital and expanding force in modern America.

HIS 201 African American History 3 Credits

Examines the actions and thought of peoples of African ancestry in the United States. Briefly considers Africa before the Atlantic slave trade, then concentrates on major themes in African-American history—the slave trade, slavery, and the genesis of African American society, emancipation and its consequences, urbanization and industrialization, Black Nationalism, the Civil Rights Movement, and African Americans today. Emphasizes African Americans' dynamic and creative role both in shaping their society and establishing their place in United States society. The on-going struggle for freedom and equality provides thematic continuity for analyzing nearly 400 years of African-American history.

HIS 307 The Immigrant in American Life 3 Credits

Examines the experiences of immigrants in the United States, their assimilation, the reactions to them, and their contributions.

HIS 309 Women in American History 3 Credits

Examines the roles, status, and influence of women from the colonial era to the present. Studies the origins and development of feminism, including legal, political, educational, economic, and sexual rights; and studies social feminism, including reform movements in such fields as abolition, prohibition, pacifism, child labor, and social welfare.

HIS 319 Gender and Sexuality in American History 3 Credits

What makes a man, exactly, and what makes a woman? What kinds of sex are normal, and what kinds are abnormal? Who decides, and why? The answers to these questions are not fixed. Throughout American history, popular understandings of gender and sexual norms evolved in close relationship with the political, economic, racial, and social dictates of the time. This course will trace the evolution of ideas on sex and gender from the 18th century to the present using various historical sources including fiction and film, particular attention will be given to analyzing dominant models of proper behavior and the complex relationships of power enmeshed within them.

PHL 230 Philosophy of the Sexes 3 Credits

Studies philosophical views of the differences between the sexes, sexual equality, love, marriage, and the family from ancient Greece to the 20th century. Texts from the contemporary women's and men's movements will also be examined. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

POL 205 Introduction to Public Policy 3 Credits

The course provides students with an introduction to the study of public policy by linking the theoretical with the practical. The course focuses on three areas of analysis: 1) descriptive 2) evaluative and 3) prescriptive. Students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options. Last the course provides examples of public policy problems through the substantive policy areas of health, environment and education.

POL 235 Race and Ethnicity in American Politics 3 Credits

Examines the changing political, economic, and social situation of racial and ethnic groups in American politics since the 1950s. Topics include the relationship between race/ethnicity and voting behavior, political parties, and election results. Includes an analysis of specific areas of contemporary racial and ethnic conflict, such as voting rights, immigration, and affirmative action.

POL 280 Sex & Gender in International Politics 3 Credits

What's a student of political science, International Relations (IR), or another social science field to do about feminism? This is a question that has troubled IR for decades. While feminist debates engaged people in spaces outside the disciplines of political science and particularly IR, IR scholars did their best not to see the relevance of feminism for their own debates. That did not stop some feminists from rethinking key IR concepts like power, race and the state, but such contributions were largely ignored by IR scholars until very recently. It was only in the last decades, when feminist questions pushed their way onto the IR agenda through books, journals, and conferences, that feminism suddenly seemed attractive to IR scholars. Designed as an interdisciplinary course with a strong reference to Global and International Politics, this course will provide a basic introduction to some of the major global questions as seen through a feminist lens.

POL 327 Contemporary Issues in American Public Policy 3 Credits

An in-depth examination of current issues in American politics. Drunk driving, political corruption, drug policy, education, and poverty are among the issues to be considered. Emphasis on analyzing policy problems and on developing and evaluating proposed solutions.

POL 328 Environmental Politics 3 Credits

Environmental Politics examines how policymakers deal with the political challenges of unsustainable resource consumption, which is a primary determinant of environmental problems such as climate change, adverse health effects, and biodiversity loss. The course introduces students to environmental politics and policies at the local, state, national, and international levels. The course is designed to provide students with a framework for understanding how varied interests compete within political institutions in order to transform contending ideas into public policy. With that in mind, students will not only become more informed consumers of political information, but will also become more effective at analyzing and advocating for policies as it relates to the environment.

POL 363 Human Rights in Global Context 3 Credits

Examines human rights – droits de l'homme, derechos humanos, Menschenrechte, “the rights of man” – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breath and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as HLS 363. Students may not get credit for both HLS 363 and POL 363.

PSY 118 Psychology of Women 3 Credits

Examines the psychological development of women in our culture from birth to maturity, with an emphasis on the interaction of biological and social influences on personality, social behavior, and achievement of women. Investigates psychological sex differences in terms of current measurement approaches. Readings and text are drawn from psychological theory and research.

SOC 207 Racial and Ethnic Relations 3 Credits

Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

Prerequisite(s): SOC 101.

SOC 230 Foundations of Civic Engagement 3 Credits

This course is an introduction to civic engagement: its meanings, opportunities and limitations. Students will learn about the different opportunities for civic engagement in the community as well as the theories and skills associated with it. Students will learn the role of formal and informal institutions in community engagement and will identify a specific organization for in depth investigation.

Prerequisite(s): SOC 101.

SOC 245 Social Problems 3 Credits

American social, economic, and political institutions and their interrelationships are analyzed, with an emphasis on the causes, directions, and consequences of social change in American society.

Prerequisite(s): SOC 101.

SOC 312 Women in Society 3 Credits

Examines changes in women's roles and in male-female relationships. Focuses on impact of law, economy and social movements in shaping women's positions as wives and as workers. Explores theories and evidence concerning the nature and extent of sex differences. Attention to women's socialization through language, schools and media.

Prerequisite(s): SOC 101.

SOC 313 Gender and Criminal Justice 3 Credits

This course will examine women's experiences with the criminal justice system as offenders, victims, prisoners, and practitioners. It will consider how gender has shaped theories of crime and criminological research. It will explore how cultural constructions of gender have influenced substantive and procedural criminal law, the ways criminal justice agencies respond to crime, and how these have changed historically. Attention will be given to the development of new approaches, reforms, and challenges.

Prerequisite(s): SOC 101.

SOC 340 Power and Politics 3 Credits

Examines the nature and distribution of power in contemporary societies; analyzes the relationships between power and politics.

Prerequisite(s): SOC 101.

SOC 345 Race and Crime 3 Credits

Examines the impact of crime policy on minority communities in the United States, with particular attention to the impact of “The War on Drugs”, three-strike laws, and mandatory sentencing on minorities and minority communities. Drawing on sociological research, the course explores myths and realities concerning the relationship between race and crime. The relationship between racial attitudes, historical race relations, and mass incarceration are discussed.

Prerequisite(s): SOC 101.

SOC 346 Health Care and Society 3 Credits

Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.

Prerequisite(s): SOC 101.

SOC 350 Social Policy 3 Credits

Investigates the relationship between economic development and social policy in comparative and historical context. The main features of preindustrial, early industrial, and advanced industrial social welfare systems are described. Social, economic and political factors that shape social policy are investigated.

Prerequisite(s): SOC 101.

SOC 490 Independent Study: Research and Creative Expression 1-4 Credits

Juniors or seniors who have completed at least 12 credit hours in sociology may propose an independent research project with the aid and advice of any full-time faculty member of the department. Proposals must be reviewed and approved by the sponsoring faculty member and submitted to the department's Independent Study Committee at least four weeks prior to the last day of classes for the semester preceding Independent Study.

Prerequisite(s): SOC 101.

SOC 491 Internship in Sociology 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of applications of sociology in work settings and to analyze work settings using sociological knowledge and research methods. Placements are made in business, government, and community offices that utilize sociological knowledge or research skills.

Prerequisite(s): 2.75 GPA.

Social Media Strategies

Overview

Social media has forever changed the communication and journalism professions. For today's students, being able to effectively plan, manage, and evaluate social media as an integrated communication tool has become a requirement for success in the communication discipline. This minor will provide students with a foundation to employ social media as an effective communication tool in a variety of professional settings by providing practical and applied learning.

The program combines theory and best professional practices with hands-on application, development of critical media skills (including writing and multimedia content creation), and necessary management and strategy in a variety of organizational settings that will culminate in a capstone experience. The Social Media Strategies minor will provide students with the background needed and qualifications required in a wide variety of communication positions.

Total Credits		21

Courses and Descriptions

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

Social Work

Program Overview

By completing a sequence of three social work courses, students learn about the development of welfare and social service programs. They will

acquire skills in interviewing, case management, and group dynamics; and gain work experience in a social service agency.

Minor Offered

- Minor in Social Work

SOC 248	Social Service Organizations	
SOC 350	Social Policy	
Group II		3
PSY 230	Child Development ¹	
PSY 231	Youth and Adolescent Development	
One additional course in an area of concentration relevant to social work ²		3
Total Credits		18

¹ PSY 100 is a prerequisite for all Psychology courses.

² Examples of such areas are: Aging, Human Service Organizations, Psychological Counseling, and Criminal Justice. This course is chosen in consultation with an advisor.

Courses and Descriptions

SOW 200 Social Services & Social Work 3 Credits

An overview of the historical development of social work. Emphasis on current issues in social welfare and social service programs in the United States. Among the programs explored are those in public welfare, mental health, medical services, child abuse/neglect, school social work, and care for the elderly.

SOW 300 Methods Social Work Practice 3 Credits

Interviewing techniques are taught and practiced. Skills in forming and running small groups, working with community organizations, and administering social programs are emphasized. Students study how to gather pertinent psycho-social facts about clients, make an assessment, plan an intervention, and successfully complete service to the client. Students who next will take SOW 301 Field Work Experience will be placed in a social service agency by the end of the semester.

Prerequisite(s): SOW 200.

SOW 301 Field Work Experience 3 Credits

Students observe and work in a social service agency. They study the structure of the agency and the people and roles within it, and develop helping skills with clients. Approximately six to eight hours of field work a week for each three credits are required, plus class sessions during the semester.

Prerequisite(s): SOW 200, SOW 300. May be taken twice in two separate semesters for a maximum of six credits toward the total credits required for graduation.

SOC 205 Families 3 Credits

Examines families in the United States, past and present, emphasizing the variety of family experiences in different social contexts and the relationship between family life and social change. Includes comparative material on families in other countries and considers possible alternatives to current family forms.

Prerequisite(s): SOC 101.

SOC 248 Social Service Organizations 3 Credits

Examines the growth and variety of social service organizations. The training of providers, such as teachers and physicians, and relationships between professionals and clients in settings such as schools and hospitals are studied as well as organizational decision-making, finances, and community relations.

Prerequisite(s): SOC 101.

SOC 350 Social Policy 3 Credits

Investigates the relationship between economic development and social policy in comparative and historical context. The main features of preindustrial, early industrial, and advanced industrial social welfare systems are described. Social, economic and political factors that shape social policy are investigated.

Prerequisite(s): SOC 101.

PSY 230 Child Development 3 Credits

Presents theory and research on the social, emotional and cognitive development of children birth to age 12.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 231 Youth and Adolescent Development 3 Credits

Presents theories, research and problems concerning development in youth and adolescence.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

Sociology

Program Overview

Sociology helps us to understand how social groups, organizations, social institutions and societies function, how they change over time, how they impact our lives, how they are created and sustained, and how they change.

Sociological research and scholarship overlaps with an array of disciplines and professions beyond sociology. Organizational and management studies, communication and media studies, criminology, race studies, gender studies and psychology all integrate sociological concepts into their scholarship. Likewise, elements of these disciplines can be found in the work of sociologists. That is why training in sociology provides an excellent background and skillset for a wide range of careers beyond the classroom.

While many students decide to pursue advanced degrees in the social sciences, sociologists can be found working in diverse settings. You will likely find sociologists working as management consultants, market researchers, public opinion researchers, social workers, public service workers, government officials, and just about any setting where the skillsets developed in sociology apply. As it turns out, that includes just about anywhere where social institutions, people and human interaction exist.

Curriculum Overview

Sociology students take a total of 15 three-credit courses to complete the major. The curriculum includes a collection of required courses, taken sequentially, that introduce students to Sociology as a discipline and provide more advanced training in the development of their sociological imaginations as they move through the degree. Along the way, majors are exposed to the basic concepts, theories, and methods of sociology while exploring various topics of sociological interest in such things as inequality, race and ethnic relations, and social interaction, to name but a few. Seminars at the freshman and senior levels provide extensive class participation, personalized instruction, and carefully supervised individual research.

Student Learning Outcomes

Graduates of the Sociology major will be able to:

1. Use sociological theories to interpret the world around them.
2. Interpret how social structure, culture, power, inequality, and economic forces impact our understanding of social institutions and social interaction.
3. Effectively collect, interpret, and analyze social data using sociological theories as a framework throughout the process.
4. Communicate their sociological knowledge using both verbal and written techniques.

Honors Program in Sociology

Honors in sociology may be achieved by earning a 3.5 cumulative average in the discipline and completing, through honors in sociology (SOC 496), a senior honors thesis with distinction.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

SOC 101 Sociological Imagination 3 Credits

Introduction to principles and concepts for the sociological analysis of human societies. Social relations, social structure, and institutions characteristic of societies past and present are examined, and causes and directions of social change are considered. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

SOC 110 Cultural Anthropology 3 Credits

The anthropological perspective is introduced, placing human behavior and institutions within their evolutionary, ecological, structural, and ideological contexts. Examples are drawn from the full range of human societies, with an emphasis on nonindustrial forms.

SOC 119 Introduction to Criminal Justice: Police, Courts, Corrections 3 Credits

This course introduces students to the sociological study of the criminal justice system. It examines the cultural and social foundations of this system, and review debates about problems with the criminal justice system and proposals to change it. Topics covered include nature of the crime problem, requirements of criminal law, policing, the role of the courts and legal professionals, sentencing, incarceration and alternatives to it.

Prerequisite(s): SOC 101.

SOC 142 The Legal & Policy Dimensions of Cannabis 1.5 Credits

In this course, you will learn about drug policy in the United States through the lens of cannabis. Theoretical and empirical arguments for, and consequences of, prohibition, and legalization will be considered with special attention to race, class, and gender. Opportunities and challenges springing from recent legal reforms and a rapidly expanding legal industry will be considered using a variety of cultural, legal, and academic sources.

SOC 143 From Plant to Profession: Practical Skills & Applications 1.5 Credits

Put your new cannabis knowledge to use in real world settings! In this final skills-based course of Rider's Cannabis Studies certificate, you will expand on the initial knowledge you've obtained through completing Rider's foundational courses in business, biology, and the law. You will learn directly from key experts in the field, whose knowledge about key trends in the cannabis industry will prepare you to explore unmatched opportunities to enter the rapidly expanding cannabis industry. Content will expose students to cannabis horticulture, science, clinical practice, and legal compliance to prepare them to enter into a variety of cannabis industry positions.

Prerequisite(s): SOC 142, BIO 102, and BUS 150.

SOC 150 Introduction to Forensics 3 Credits

Introduces students to principles of forensic science. Whether the issue is establishing paternity or cause of death, determining arson or liability, or deciding criminal guilt or innocence, collecting and evaluating forensic material is typically involved. Students will learn the meaning and significance of scientific evidence and its role in criminal investigations and civil and criminal trials. Students will learn how forensic scientists work, define a problem, collect data, and analyze results. Case studies, crime simulations and examination of criminal evidence will highlight the application of scientific principles.

SOC 201 Intro Seminar in Sociology 3 Credits

Designed for students considering a major or minor in sociology. The seminar locates sociology in relation to other disciplines; reviews the basic perspectives used by sociologists to study human behavior; and considers the methods and applications of sociological inquiry.

Prerequisite(s): SOC 101.

SOC 204 Law, Literature, and Film in America 3 Credits

Focuses in an interdisciplinary manner on law and justice as represented in American literature and films. It analyzes novels, short stories, and selected non-fiction texts from the perspectives of literary criticism, social history, and cultural and American studies.

SOC 205 Families 3 Credits

Examines families in the United States, past and present, emphasizing the variety of family experiences in different social contexts and the relationship between family life and social change. Includes comparative material on families in other countries and considers possible alternatives to current family forms.

Prerequisite(s): SOC 101.

SOC 206 Deviance and Crime 3 Credits

Considers deviant behavior as violation of social norms. Examines the concepts of deviance and crime in socio-historical context. Evaluates major theories advanced to explain deviance. Surveys different types of deviance, including conventional crime, non-criminal deviant behavior, and white-collar corporate, and government crime.

Prerequisite(s): SOC 101.

SOC 207 Racial and Ethnic Relations 3 Credits

Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

Prerequisite(s): SOC 101.

SOC 210 Criminal Investigation 3 Credits

Approaches criminal investigation conceptually. Students consider the social issues involved in criminal investigation, as well as ethical and legal aspects of it. The course covers such topics such as the principles of criminal investigations, the rules and procedures of preliminary and follow-up investigations, the art of interrogation, recording of statements, confessions, and the collection and preservation of physical evidence at the crime scene. Emphasis is placed on the need for meticulous adherence to rules of law and ethical practices, as an investigation proceeds from initial actions to arrest, and eventual prosecution. The course also examines the methods used in scientific interpretation of evidence and the preparation of criminal cases for trials, as well as its role in today's criminal justice system.

Prerequisite(s): SOC 150.

SOC 211 Social Movements 3 Credits

This course examines social movements that seek change in the social, cultural and political structures of society. The social, economic and political contexts of these movements are treated as well as their origins, tactics, organization, recruitment, and successes and failures. Case studies focus on movements in the areas of labor, civil rights, feminism, the environment, "right wing politics", and neighborhood activism.

Prerequisite(s): SOC 101.

SOC 216 Youth and Crime 3 Credits

In-depth examination of the nature and extent of youth criminality in the U.S. Explores changes in youth culture and theories of delinquency. Social policies are related to youth criminality and the youth justice system is considered.

Prerequisite(s): SOC 101.

SOC 225 Population Study 3 Credits

Demography; its definition, historical emergence, and growth; population as a social problem in developing and developed nations; population theories, sources and methods of demographic data, population composition, and distribution; demographic processes including fertility, mortality, and migration.

Prerequisite(s): SOC 101.

SOC 230 Foundations of Civic Engagement 3 Credits

This course is an introduction to civic engagement: its meanings, opportunities and limitations. Students will learn about the different opportunities for civic engagement in the community as well as the theories and skills associated with it. Students will learn the role of formal and informal institutions in community engagement and will identify a specific organization for in depth investigation.

Prerequisite(s): SOC 101.

SOC 245 Social Problems 3 Credits

American social, economic, and political institutions and their interrelationships are analyzed, with an emphasis on the causes, directions, and consequences of social change in American society.

Prerequisite(s): SOC 101.

SOC 246 Drugs, Crime & American Society 3 Credits

Explores the nature and extent of drug use in the U.S., how drugs are legally defined and socially constructed, and considers how and why drug policies have developed and changed historically. Considers how the criminalization of drugs has impacted policing strategies, courts, probation programs, sentencing and corrections, as well as other social institutions. Examines the role of local and federal agencies in enforcing drug laws, and considers debates about directions for legal reforms.

Prerequisite(s): SOC 101.

SOC 247 Aging 3 Credits

The emergence of social gerontology, demographic foundation of aging, the aging process, comparative study of aging and aged, effect of aging on the individual, social institutions and aging, and problems of aging and some solutions.

Prerequisite(s): SOC 101.

SOC 248 Social Service Organizations 3 Credits

Examines the growth and variety of social service organizations. The training of providers, such as teachers and physicians, and relationships between professionals and clients in settings such as schools and hospitals are studied as well as organizational decision-making, finances, and community relations.

Prerequisite(s): SOC 101.

SOC 252 Media, Culture and Society 3 Credits

Examines mass-produced commercial culture, how it has developed, and the role it plays in modern society. Analyzes the content of these cultural forms, how its production is organized, and how audiences perceive it.

Prerequisite(s): SOC 101.

SOC 261 Schools and Schooling 3 Credits

Schools and the process of schooling are analyzed within a broad historical perspective as well as within the structural and cultural context of American society. Education within a global perspective is also considered. Issues discussed include school funding, integration, tracking, technology, bureaucratization, and the "cultural wars" fought within the schools.

Prerequisite(s): SOC 101.

SOC 269 Physical Anthropology 3 Credits

An analysis of the biological development of the human capacity for culture. Topics include: modern theories of evolution and their application to human evolution; the relationship of human beings to other primates, the human fossil record, and variation among modern human populations. A background in biological studies is not necessary.

Prerequisite(s): SOC 101.

SOC 270 Area Studies: Africa 3 Credits

An intensive investigation of problems arising from historical and contemporary studies of tribal, peasant, and transitional societies in Africa south of the Sahara.

Prerequisite(s): SOC 101.

SOC 271 Area Studies 3 Credits

Studies problems arising from historical and contemporary studies of peasant populations of Europe.

Prerequisite(s): SOC 101.

SOC 272 Area Studies: Indians of North America 3 Credits

Societies and cultures of the Indians of North America from the Arctic to Mesoamerica. Emphasis on evidence of these tribal groups prior to extensive acculturation and their contemporary situation.

Prerequisite(s): SOC 101.

SOC 280 Social Movements Abroad 3 Credits

This course will provide students with an international perspective on community-engaged strategies for addressing social problems, with a special focus on social welfare and justice. This course utilizes an international experiential component via a faculty led study abroad course and is mixed modal: online and on site internationally. Through seminars with local experts, case examples, dialogue, and visits to exemplary organizations, students will learn about strategies for engaging communities in creating change, honoring indigenous knowledge and practice, working to enhance leadership, and facilitating change in the context of larger social institutions. Through readings, online discussions, and self-reflection students will gain a greater understanding of social movements across the host country, with special emphasis on the culture and experiences of international residents.

SOC 300 Work and Occupations 3 Credits

Analyzes the nature and organization of work in modern society. Focuses on such issues as division of labor, specialization, alienation, professionalization, and the role of technological change. Includes an examination of the historical development of work in the 20th century, and a consideration of contemporary and future patterns of work organization.

Prerequisite(s): SOC 101.

SOC 301 Methods of Sociological Research 3 Credits

One of the required courses in both the Sociology and Criminal Justice majors, Methods of Sociological Research introduces students to basic research processes in the social sciences. The course introduces students to both quantitative and qualitative approaches and data analysis using both original and secondary sources. Students will also complete an original research paper in this course.

Prerequisite(s): SOC 101.

SOC 302 Crime & Justice in the Media 3 Credits

This course focuses on the impact of media on Americans' perceptions and understanding of the extent and causes of crime, and the effectiveness and purposes of crime policy. It examines how criminals, types of crime, crime policies and the criminal justice system are portrayed in various media outlets, including film, tv, newspaper, and electronic/internet. It explores the historical and contemporary relationships between media representations of criminal behavior, crime as a social problem, and the nature of the criminal justice system and contrasts these to their social realities.

SOC 304 Women and Law 3 Credits

Explores the social, economic, political and cultural context of laws relating to women and gender, such as workplace discrimination, divorce and child custody and reproductive rights. It examines how such laws have changed historically and the impact such laws have had on women as well as on men and on American social institutions, such as the family, politics, and the workplace. The course also examines women in the legal profession and their impact on the practice of law and legal reasoning.

SOC 307 Criminal Justice Practice 3 Credits

This course will consider the ways criminal justice agencies and occupations are shaped by social, economic, political, technological and legal changes. Through case studies and projects students will examine the work, culture, and work settings of various criminal justice practitioners, assess the impact of social policies on criminal justice careers, and identify new directions in the field. Students will develop the reading and writing skills needed by an array of criminal justice practitioners.

SOC 308 Cities And Suburbs 3 Credits

Examines the growth of an urban way of life under the influence of industrialism. Study of community, political, and economic institutions in cities. Comparisons between urban and suburban areas.

Prerequisite(s): SOC 101.

SOC 309 Peasant Society 3 Credits

A comparative view of peasants and their significance in agrarian, colonial, and industrial societies. Peasant economic, political, and social institutions are analyzed with an eye to both their internal operation and the way they relate to non-peasant groups who hold power in these societies. The changes that have occurred in the peasant world are viewed both as a consequence and a cause of wide reaching political and economic upheaval.

Prerequisite(s): SOC 101.

SOC 310 Pre-Industrial Economies 3 Credits

The anthropological study of technology, production, and exchange in nonmarket cultures, as related to the social, ideological, and ecological systems in which they are embedded. The question of whether the concepts that derive from market economies can be applied to all economic systems is considered in detail.

Prerequisite(s): SOC 101.

SOC 311 Social and Cultural Change 3 Credits

Investigates the process of change in both industrial and nonindustrial settings. Particular attention paid to the role of the individual in change as well as the roles played by the mode of production, social organization, and ideological constructs. Case studies are drawn from non-Western as well as Western sources.

Prerequisite(s): SOC 101.

SOC 312 Women in Society 3 Credits

Examines changes in women's roles and in male-female relationships. Focuses on impact of law, economy and social movements in shaping women's positions as wives and as workers. Explores theories and evidence concerning the nature and extent of sex differences. Attention to women's socialization through language, schools and media.

Prerequisite(s): SOC 101.

SOC 313 Gender and Criminal Justice 3 Credits

This course will examine women's experiences with the criminal justice system as offenders, victims, prisoners, and practitioners. It will consider how gender has shaped theories of crime and criminological research. It will explore how cultural constructions of gender have influenced substantive and procedural criminal law, the ways criminal justice agencies respond to crime, and how these have changed historically. Attention will be given to the development of new approaches, reforms, and challenges.

Prerequisite(s): SOC 101.

SOC 314 Social Theory 3 Credits

Introduces the major thinkers and conceptual problems characterizing the development of sociological thought. Required of sociology majors.

Prerequisite(s): SOC 201.

SOC 315 Issues in Modern Social Theory 3 Credits

Examines current trends and issues in sociological thought.

Prerequisite(s): SOC 314 or permission of instructor.

SOC 316 Feminist Social Thought 3 Credits

An introduction to feminist social theory, with emphasis on its breadth and variety. Special attention paid to the ways feminist theorists have analyzed the relationship of gender to other kinds of group differences.

Prerequisite(s): SOC 101.

SOC 317 Law and Lawyers 3 Credits

Relationships between law, the economy, and the state are explored. Discussion of laws, legal systems and legal reasoning using cross-cultural comparisons and historical analysis of these in the United States. Particular attention given to impact of law on corporations, workers, women, and minorities. Changes in legal profession and legal education are examined.

Prerequisite(s): SOC 101.

SOC 318 Hate Crimes in the United States 3 Credits

Provides an interdisciplinary exploration of hate crimes in the United States, its causes and consequences. It will examine the social, political, and legal issues that have shaped policies and laws designed to respond to hate crimes and assess their effectiveness. Debates about the nature of hate crimes and the special laws and sentencing provisions developed to deal with them will be discussed. Topics include hate crimes on college campuses, hate on the Internet, legal and constitutional issues, and criminal justice enforcement.

SOC 320 Religion and Belief Systems 3 Credits

The relation of religious phenomena to social structures and processes; religion in cross-cultural perspective.

Prerequisite(s): SOC 101.

SOC 321 White Collar & Corporate Crime 3 Credits**SOC 322 Punishment and Corrections 3 Credits**

This course explores the nature, forms, rationales, and effectiveness of punishment as a form of crime control. It traces the development of corrections in the U.S., identifies cultural trends and developments in penology, including mass incarceration and supermax prisons, considers the ways race and class have shaped these, and the reverberating effects penal policies have had on American culture and society beyond the criminal justice system. It examines the role of laws, politics, crime control agencies, as well as of media, and corporations in shaping penal policies. Topics also include: prison subcultures, inmate rights, correctional practices, privatization of prisons, and alternatives to punitive policies of incarceration and capital punishment.

Prerequisite(s): SOC 101.

SOC 325 Population Study 3 Credits**SOC 330 Class and Economic Inequality 3 Credits**

Social, economic, and political aspects of the division of society into classes are considered. Theories of stratification and the distribution of wealth, power, and prestige in societies past and present are examined.

Prerequisite(s): SOC 101.

SOC 340 Power and Politics 3 Credits

Examines the nature and distribution of power in contemporary societies; analyzes the relationships between power and politics.

Prerequisite(s): SOC 101.

SOC 341 Developing Societies 3 Credits

Examines theories explaining patterns of development; indicators and measures of social well-being; and problems such as population, hunger and environmental crises in developing countries. Focuses especially on patterns of development in Latin America or China.

Prerequisite(s): SOC 101.

SOC 342 Police and American Society 3 Credits

This course examines important issues regarding police in American society, such as the paradoxes inherent in police work, police organization and strategies and their effectiveness, the dilemmas of supervising police work, police unionism, the nature and implications of police occupational subculture, the use of police discretion, forms of police misconduct and accountability, professionalization of police and the trend toward police privatization. It also considers the diversity of the police force, trends in the delivery of policing services, the impact of new technologies on policing, and the challenges of policing in a multicultural society.

Prerequisite(s): SOC 101.

SOC 343 Policing and Counter Terrorism 3 Credits

This course is designed as an upper level (undergraduate/graduate) combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

Prerequisite(s): SOC 101.

SOC 344 Gangs in America 3 Credits

This course explores the extent and nature of street gangs in the US and public reaction to them. The course considers what gang membership means, and when gangs are cohesive or not. The course will focus on the functioning and process of the justice system and its response to gangs. Students will examine potential strategies to address gang crime, weigh the costs and benefits of these various actions, and discuss how to rehabilitate both low level and serious gang offenders.

Prerequisite(s): CMP 125.

SOC 345 Race and Crime 3 Credits

Examines the impact of crime policy on minority communities in the United States, with particular attention to the impact of "The War on Drugs", three-strike laws, and mandatory sentencing on minorities and minority communities. Drawing on sociological research, the course explores myths and realities concerning the relationship between race and crime. The relationship between racial attitudes, historical race relations, and mass incarceration are discussed.

Prerequisite(s): SOC 101.

SOC 346 Health Care and Society 3 Credits

Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.

Prerequisite(s): SOC 101.

SOC 347 Aging and the Elderly 3 Credits**SOC 348 Human Service Organizations 3 Credits****SOC 349 Retirement and Leisure 3 Credits**

Examines the social phenomena of retirement as an event, process, social role, and life stage. Explores the meaning of leisure, time utilization, and creativity among the elderly. Defines related problems and issues, i.e., financial, physical, psychosocial, and environmental. Positive as well as negative implications are presented and evaluated.

Prerequisite(s): SOC 247 recommended.

SOC 350 Social Policy 3 Credits

Investigates the relationship between economic development and social policy in comparative and historical context. The main features of preindustrial, early industrial, and advanced industrial social welfare systems are described. Social, economic and political factors that shape social policy are investigated.

Prerequisite(s): SOC 101.

SOC 351 The Rights of the Accused 3 Credits

Analyzes the major substantive and procedural rights accorded to the criminally accused by the United States Constitution. Particular attention will be given to the right to counsel, confessions and self-incrimination, arrest, search and seizure. Students will learn to argue and write hypothetical case opinions.

SOC 355 Social Interaction 3 Credits

Examines the interpersonal relation between and among people in private life, public places, and at work. Explains how such relations affect and are affected by changes in the larger social structure.

Prerequisite(s): SOC 101.

SOC 360 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 361 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 362 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 363 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 364 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 365 Selected Top: Social Movements 3 Credits

FALL 2012 - This course examines movements that seek change in the social, cultural and political structures of society. The social, economic and political contexts of these movements are treated as well as their origins, tactics, organization, recruitment, and successes and failures. Case studies focus on movements in the areas of labor, civil rights, feminism, the environment, "right wing politics", and neighborhood activism. In today's world, social movements abound. Movements such as the Tea Party and the Occupy movements demonstrate that they can take place across the political spectrum of society. Moreover, the interconnectedness of the world economy creates social movements throughout the world, whether in Asia, the Mid-East or Europe that have direct affects on the United States. Because the coverage of these movements are given considerable media exposure, students (and the public) tend to accept the interpretations of these movements as presented in the narratives of the media coverage. This class will provide a systematic academic treatment of social movements. Because social movements target structural and cultural institutions in society, the study of these movements will not only provide an understanding of these movements, but of larger social problems in society as well.

Prerequisite(s): SOC 101.

SOC 367 Selected Topics: Environment 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 368 Selected Topics in Sociology 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 369 Selected Topics in Sociology 3 Credits**SOC 396 Applied Sociology 3 Credits**

Shows how sociology can be applied in work settings. As participant observers in organizations related to their career objectives, students learn to apply sociological knowledge, perspectives, and skills. In class meetings and individual consultations with the instructor, students examine the applied dimensions of sociology, the uses of sociology in various occupations, the ethical issues involved in applied sociology, and the culture and structure of their work organization.

Prerequisite(s): SOC 101.

SOC 400 Senior Seminar 3 Credits

For sociology majors only. This seminar involves in-depth examination and research of a specific issue of current importance in the discipline. Learning to do sociology is emphasized.

Prerequisite(s): SOC 201, SOC 301, SOC 314.

SOC 401 Sex and the Body in Society 3 Credits

Examines cultural meanings and social practices associated with sex and the body. Contemporary cultural norms and practices in the U.S. will be compared to other societies, historically and cross-culturally. Variations in sexual practices, ideals of sexual attractiveness according to age, gender, race, ethnicity, class and sexual orientation also will be discussed. Topics may include beauty industries (e.g. cosmetics, diet, fashion, surgery, drugs), sex and the workplace, the impact of media, social policy, and technology on ideals of sexual attractiveness, birth control, and sexual violence.

Prerequisite(s): SOC 101.

SOC 460 Criminal Justice Senior Seminar 3 Credits

Draws on and develops students' knowledge and understanding of crime, criminal law and criminal justice institutions, and applies these to a specific topic, method, institution, or controversy. Topics vary. Students will be expected to contribute to seminar discussions and to complete research projects related to the seminar theme. Required for senior criminal justice majors; open to others only by permission of the chair.

SOC 490 Independent Study: Research and Creative Expression 1-4 Credits

Juniors or seniors who have completed at least 12 credit hours in sociology may propose an independent research project with the aid and advice of any full-time faculty member of the department. Proposals must be reviewed and approved by the sponsoring faculty member and submitted to the department's Independent Study Committee at least four weeks prior to the last day of classes for the semester preceding Independent Study.

Prerequisite(s): SOC 101.

SOC 491 Internship in Sociology 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of applications of sociology in work settings and to analyze work settings using sociological knowledge and research methods. Placements are made in business, government, and community offices that utilize sociological knowledge or research skills.

Prerequisite(s): 2.75 GPA.

SOC 496 Honors in Sociology 3-6 Credits

Training in the efficient collection of data that has a bearing on the problem being investigated. Stresses the technique of proper summarization of the collected material as well as the integration of that material into a comprehensive report. A research design is prepared and hypotheses tested in the field. The original library research is then combined with the findings to produce a mini-thesis. Approval of student's program by a sponsoring faculty member and the department Independent Study Committee is required.

Prerequisite(s): SOC 201, SOC 301.

SOC 497 Honors in Sociology 3-6 Credits

Training in the efficient collection of data that has a bearing on the problem being investigated. Stresses the technique of proper summarization of the collected material as well as the integration of that material into a comprehensive report. A research design is prepared and hypotheses tested in the field. The original library research is then combined with the findings to produce a mini-thesis. Approval of student's program by a sponsoring faculty member and the department Independent Study Committee is required.

Prerequisite(s): SOC 201, SOC 301.

Spanish

Program Overview

Majoring in a foreign language such as Spanish allows students to pursue careers in business, management, law, government, teaching, translation, publishing, communications, and travel.

At Rider, Spanish majors acquire an international perspective and a unique intercultural sensitivity. Advanced foreign language skills combined with intercultural expertise increase the employment prospects of students in the global marketplace of today.

A major or minor in Spanish offers students the opportunity to receive a practical grounding in language and culture through a challenging curriculum which may include study abroad. In addition, our language, literature, film, and culture courses prepare students to understand cultural diversity abroad and at home, to appreciate their own language and culture, and to gain global awareness. An individual fluent in another language acquires insight into the world in which we live. Advanced foreign language skills, combined with an international perspective and intercultural expertise, position our students for productive careers in the global and multicultural marketplaces of the 21st century. Faculty engagement in research and teaching excellence combines with our unique "accent on the individual" through advisement and co-curricular opportunities to create a challenging yet supportive atmosphere in which students can realize their potential.

A major or minor in Spanish will complement many degree programs in business, education, music, and the liberal arts.

Students have access to a Foreign Language Media Center with 25 computer workstations with internet access for self-paced work and classroom instruction including interactive audio, video, and text-based materials.

Curriculum Overview

Classes in the Spanish major include Spanish for business, advanced communication in Spanish, Spanish culture and civilization, Latinx Cultures, Latin American/Latino culture, Introduction to Spanish literature,

Cervantes, the Spanish golden age, and modern Hispanic literature and cinema.

Some requirements may be met by studying abroad. Students may also minor in French or Chinese.

Student Learning Outcomes

Graduates with a degree in Spanish will be able to:

- demonstrate communicative competence in Spanish;
- discuss cross-cultural topics;
- analyze and critique the products, practices, and perspectives of world cultures of Spanish-speaking communities;
- compare and contrast value systems across cultures.

Honors Programs in Languages, Literatures and Cultures

The department faculty will identify prospective honors students at the earliest possible moment and offer them challenges and encouragement to develop to their highest potential. A student who has a 3.25 cumulative average and a 3.5 in the major may be invited by the department, upon recommendation of a faculty member, to become a candidate for the 3-credit honors thesis or capstone project. Details of the thesis or capstone project will be arranged to accommodate the interests of the individual student.

The thesis/capstone project is completed during the senior year. It represents the culmination of a student's academic experience and is an irreplaceable learning experience for the development of research, writing, and critical thinking skills for graduate school admissions and success, as well as work in numerous careers. Students who successfully complete the thesis or capstone project and retain the required cumulative and major grade point average will graduate with honors.

Degree Offered

- B.A. in Spanish

Option I		
Four courses of language:		
a. two courses in two different languages OR		
b. four courses in one language		
Option II		
Three classes of one language and one additional class from among the following options:		
a. Masterworks 250 or 251 OR		

b. one course in Latin American Studies OR

c. one course in European Area Studies

Option III

Two classes from one language and two additional classes from among the following options:

a. Masterworks 250 and/or 251 OR

b. 1-2 courses in Latin American Studies OR

c. 1-2 courses in European Area Studies

Total Credits

39

Note:

1. Students who complete SPA 490 during their senior year may substitute with one of the collateral requirements.
2. Some of the requirements for the major may be met by Study Abroad. Students are strongly encouraged to spend at least one semester abroad.
3. All majors must take at least one Spanish course per semester in the senior year.
4. Students must receive a grade of "C" or better in courses required for the major or minor in the department. If a student receives a grade lower than "C" in a required course, the student must meet with his/her academic advisor to discuss the appropriate action that must be taken to remedy the situation.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions**SPA 100 Spanish I 3 Credits**

Introduction to the fundamentals of Spanish grammar, with emphasis on communicative skills, in culturally authentic contexts. Students are required to work extensively with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): placement test if Spanish has been studied elsewhere.

SPA 101 Spanish II 3 Credits

Continuation of Spanish 100. Emphasizes the use of language for communicative and cultural competency while developing a solid grammar foundation in Spanish. Students are required to work extensively with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): SPA 100 or placement test.

SPA 102 Elementary Spanish II Abroad 3 Credits

This course is the second part of the first-year experience in Spanish and is designed for students who have taken Spanish for Beginners I and who are interested in experiences abroad in a Spanish speaking culture. The aim is to develop the four basic skills (listening comprehension, speaking, reading, and writing) in and beyond the classroom. The discussion of distinctive cultural aspects of the Hispanic world is an integral part of this course as well as to encourage students to experience the world through the eyes of the other culture by exposing them to the literature and arts of the local culture. This course takes 8 weeks in total, 7 weeks at Rider online and 1 week abroad. During the seven weeks, students practice linguistic skills and gain cultural knowledge related to the country of destination. These skills and knowledge will prepare the students for the one week abroad experience.

Prerequisite(s): SPA 100 with a minimum grade of D.

SPA 103 Introductory Medical Spanish 3 Credits

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive, and presentational communication skills as well as growth in cultural, literary, and interdisciplinary knowledge as they move through a sequence of study. This course is the second part of the first-year experience in Spanish during which the development of communicative and cultural competencies is at the center of this experience. At the end of the course, successful students will be able to handle a variety of uncomplicated communicative tasks in straightforward social situations. They will also develop a sense of the cultural aspects of peoples who speak the target language. This course offers an additional focus on the use of Spanish across a variety of medical professions. Students interested in careers in medicine, nursing, counseling, physical therapy, chiropractic education, healthcare communication, public policy or other related fields will benefit from the linguistic (i.e., vocabulary and grammar) and sociocultural topics examined in this course. In addition to learning grammar and vocabulary that will translate into real-world skills in medical and healthcare professions (e.g., talking to patients, navigating a hospital setting, diagnosing illnesses), students will also explore sociocultural topics on how Latinx communities in the United States relate to medical and healthcare services and industries. In order to take this course, students must have taken Spanish I (SPA 100) at Rider or placed into Spanish II or Introductory Medical Spanish (SPA 101 or SPA 103) on the Foreign Language Placement Test.

SPA 200 Spanish III 3 Credits

A focus on key communicative structures in Spanish with emphasis on aural-oral (listening and speaking skills) and composition writing. Cultural and literary readings and films will be used to develop these skills. A special section may be offered to address the needs of native speakers. Students may be required to work with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): SPA 101, 102, 103 or placement test.

SPA 201 Spanish IV 3 Credits

A continuation of communicative Spanish review with emphasis on aural-oral and written skills to prepare students for further study. The discussion of distinctive cultural aspects of the Hispanic world is an integral part of this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisites: SPA 200 or placement test.

SPA 300 Advanced Grammar & Composition 3 Credits

A systematic review of grammatical structure. The development of writing skills, in preparation for upper level courses in literature, culture and professional language.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 301 Spanish for Business 3 Credits

A solid foundation in business vocabulary and cultural concepts; situational practice in geographic and cultural contexts necessary to be successful in today's Spanish-speaking world. Practice in writing business letters and other documents. Oral and written assignments to help students improve their critical thinking and become better communicators.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 302 Writing and Translating 3 Credits

Practice in writing and an introduction to translation for students who will use Spanish in their professional lives. Using literary, cultural and journalistic sources, students learn various writing discourses including narration, description, exposition, argumentation, and journalistic and letter writing. Translation involves preliminary study of translation theory and techniques, and practice with texts from students' chosen careers. Additional study of Spanish grammar as necessary.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 303 Advanced Communication and Popular Cultures 3 Credits

The focus of the course is to strengthen the student's aural comprehension and speaking skills by providing a framework for regular guided practice of fundamental grammar structures and vocabulary enhancement in the context of Hispanic cultures. Listening activities will include live speech, video recordings, film shorts and one full-length movie. Speaking tasks will be reinforced with written exercises.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 305 Cervantes 3 Credits

A detailed study of Cervantes' masterpiece, *El ingenioso hidalgo Don Quijote de la Mancha*. Lectures, discussions, and supplementary readings.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 310 Spanish Culture & Civilization 3 Credits

Spain's cultural achievements are studied in light of the country's unique historical and social reality through the use of historical, artistic, architectural, cinematic and literary sources. Cross-cultural awareness is enhanced through exercises that compare Spanish and American society. Classes are in English. No knowledge of Spanish required. This course may contain an optional travel component offered before or after the semester or during spring break.

SPA 311 Latin American Cultures 3 Credits

A panoramic survey of Latin American cultural achievements in light of the unique social and political history from the pre-Columbian period to the present. Classes are in English. No knowledge of Spanish is required.

SPA 312 Latinx Cultures 3 Credits

This course focuses on the cultural formation of Latinos/as/x in the United States, as well as the social and political motivations for Latin American migration to this country. Our class will analyze and question how various Latinx communities are grouped into a single U.S.-Latino Diaspora. This course takes a transdisciplinary approach, thus we will consider literary texts (short stories, poems, films, novels), historical and anthropological studies, and sociological works in our examination of Latinx cultures. The main goals of the course are for students to begin to conceptualize: 1) how the United States has been shaped by the presence of Latino/a/x communities, and 2) how Latino/a/x experiences are reflected in literature and art. Classes are in English. No knowledge of Spanish is required.

SPA 320 Introduction to Spanish Literature 3 Credits

Examines through lectures, readings and class discussions selected texts and their relationship to the main currents of European literary history. Introduction to the practice of literary analysis through written composition. Required for majors. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 325 Introduction to Latin-American/Latino Literature 3 Credits

A study of the development of Latin-American and Latino literature from its origins to the present through the reading, analysis and discussion of representative works by major authors. This course increases the understanding of how social, historical, and political events, together with native as well as foreign literary movements, create a unique literature, conveying the Hispanic-American reality. Required for majors. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 395 Phonetics for Communication 3 Credits

A systematic study of the production of Spanish sounds with practice in phonetic transcription and a preliminary investigation of dialects.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 403 Medieval Literature 3 Credits

Surveys the literature of Spain during the Middle Ages, with special emphasis on major writers such as Gonzalo de Berceo and Don Juan Manuel, and attention to the epic and the medieval ballad. Modern versions of medieval Spanish are used.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 410 Modern Hispanic Poetry 3 Credits

Surveys the poetic genre, emphasizing how to read, analyze, and appreciate poetry. Major poets from Spain and Spanish America of the 19th and 20th centuries representing the main currents of modern lyricism are studied. Focuses on such major writers as Rosalía de Castro, Darío, Jiménez, Machado, Vallejo, Mistral, Neruda, Lorca, Paz, Ana Rossetti, Nicolas Guillen, and Nancy Morejon.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 411 Modern Spanish Novel 3 Credits

Traces the development of the Spanish novel, paying particular attention to the masters of the 19th-century Realism (Galdos and Clarín), the innovations and experimentation of the Generation of '98 (Unamuno, Baroja, Valle-Inclán, and Pérez de Ayala), and the novelists of the post-Civil War and contemporary periods (Cela, Delibes, Goytisolo, Martín Gaité, Matute, Fernandez Cubas, and Javier Marías). Emphasis on the aesthetics of the novel as a literary form.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 412 Theater and Film of the Hispanic World 3 Credits

This course explores through theater and cinema the compelling issues that have shaped Hispanic cultures and consciousness throughout the centuries. Sample topics include war and remembrance; myth and history; freedom and authority; immigration; globalization; and race, class, and gender. The course may focus on specific authors or historical periods. Representative playwrights include Lope de Vega, Zayas, Zorrilla, Avellaneda, Lorca, Buero Vallejo, Sastre, Solorzano, Carballido, Lopez Mozo, and Pedrero. Directors include Buñuel, Saura, Gutiérrez Alea, Almodovar, Rocha, Salles, Erice, Zambrano, and Bollain.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 413 The Hispanic Short Story: Transatlantic Connections 3 Credits

This course will introduce students to the most representative writers of the short story in Spain and Latin America from Romanticism to the present. Students will be prepared to perform close readings of the literary genre under study, to analyze the form and content of the texts read, paying due attention to all internal and external aspects that impact the narrative process and the evolution of the short story. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 415 Spanish Renaissance 3 Credits

The origins and evolution of the Renaissance in Spain and of the literary expression of Renaissance culture as reflected in the development and perfection of prose and lyrical styles through the 16th century. Topics include the medieval heritage, Spanish Humanism, the Celestina, the Renaissance ideal in amatory prose and poetry, mysticism, the ballad, and the picaresque novel.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 416 The Spanish Golden Age 3 Credits

The literature of Spain during a period of political decline and outstanding aesthetic achievement: Lope de Vega and the rise of a national theatre; Calderon's drama of ideas; the development of the novella and the picaresque novel; the poetry and prose of Gongora, Quevedo, and Gracian. Also includes an introduction to literary theory.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 420 From Colonies to Nations 3 Credits

This course consists of a panoramic survey of Colonial Latin American literature in light of the unique social, cultural and political history from the pre-Columbian to the Independence period (1825). Course taught in Spanish. Note: This course is cross-listed as LAC 420. Students may not get credit for both SPA 420 and LAC 420.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 426 Latin American/Latino Film and Fiction 3 Credits

A study of the main trends in contemporary Hispanic fiction written in Latin America and the United States. Analysis and discussion of selected novels and short stories, and their cinematic representation on film. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 430 Latinx Community Engagement 3 Credits

This course explores the experiences of Latinx individuals and communities across the United States through a) class meetings and discussions, and b) community engagement with pre-established partner organizations in and around Lawrenceville, NJ. Broadly, our course will examine questions related to identity, race, ethnicity, language, transnationalism, (im)migration, the border, (im)migrant detention, and solidarity movements.

Prerequisite(s): SPA 201 or above.

SPA 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

SPA 491 Internship in Foreign Languages 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of the importance and interrelationship of foreign languages and cultures in the workplace. Placements can be made in international governmental agencies, international trade associations, multinational corporations, social service agencies and other appropriate workplace environments both in the United States and abroad. With permission of the supervisor and faculty advisor, a three-credit internship may be substituted for a collateral requirement as credit toward the major.

Prerequisite(s): students should have completed at least one 300-level course in the foreign language.

SPA 496 Special Studies 3 Credits

A seminar open to a variety of topics treating a particular author, period, genre, theme, or issue.

Prerequisite(s): permission of instructor.

Sport Management

Program Overview

The sport management co-major prepares students for a career in one of the world's biggest businesses: the fast-growing multi-billion dollar sport industry. Students gain a competitive edge as they develop a working understanding of the critical role business plays in every facet of sports and sports-related organizations.

This dual major program leads to a Bachelor of Science in Business Administration (B.S.B.A.) degree with two majors, sport management and a second major offered by one of the six departments in the Norm Brodsky College of Business.

Student Learning Outcomes

A sport management graduate will be able to:

- demonstrate information literacy in gathering, evaluating, and synthesizing research material;
- demonstrate competence in oral and written communication;
- demonstrate the ability to apply information technology in the analysis of sport business problems;
- appraise and evaluate sports related ethical issues;
- demonstrate the ability to analyze sports business cases and formulate viable policy alternatives;
- demonstrate professional competence in their experiential learning activities.

Curriculum Overview

The sport management co-major is designed to give students a broad-based business education by combining it with another discipline offered by Rider's Norm Brodsky College of Business. This unique pairing provides students a deeper understanding of the legal, ethical, economic, social and managerial issues related to sports.

The business-based curriculum prepares students for diverse career opportunities in professional sport organizations, college and high school athletic administration, sport governing bodies, event and facility management, marketing firms, media organizations and entrepreneurial ventures.

¹ CIS 185 Information Systems Essentials and CBA 110 Business in Action can be taken in the Fall or Spring of Year 1.

² Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3 credit Free Elective.

³ Students are required to complete 6 credits of International Business which can be fulfilled as major courses or as Free Electives.

⁴ Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.

Courses and Descriptions

AMS 211 Sports in American Life 3 Credits

Literary, sociological, and psychological views of sports in 20th-century American life are examined, focusing on sports as a symbol and reflection of our ideals and tensions.

CBA 315 International Business Tour 3 Credits

Provides students with the opportunity to observe various international business environments outside of the United States. Students should gain a better appreciation of how culture, history, and politics influence organizational dynamics, business functions, and business customs.

Prerequisite(s): Junior or senior standing and permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

ECO 326 Economics of Sports 3 Credits

The overall objective of this course is to deepen student understanding of microeconomic principles by applying microeconomic concepts to the analysis of professional and amateur sports. This course will utilize concepts from many different microeconomic specialties, (primarily Industrial Organization, Labor Economics and Public Finance). The tools from these different microeconomic fields will be used to explain and analyze the operation of professional sports teams and leagues in the U.S. with an emphasis on baseball, football, basketball and hockey. International comparisons will be made between professional sports in the U.S. and the rest of the world. The course will also analyze the not-for-profit sports sector, focusing on college sports and the National Collegiate Athletic Association.

Prerequisite(s): ECO 201.

ENT 210 Sports Entrepreneurship 3 Credits

Sports Entrepreneurship will introduce students to entrepreneurship in the sports industries as they explore opportunities and challenges for new ventures in this sector. Using an industry's business model, students will identify competitive advantages and understand what is required for startup success.

GSS 333 Gender and Sport 3 Credits

Typical thoughts of sport include ticket prices, player salaries, team rosters, and league standings; rarely is it viewed from a gender perspective. This course will go beyond the examination of Title IX to better understand the relationship between masculinity, femininity and sports. This course will examine various aspects of gender and sport, including media and gender representation, race and ethnicity, drugs and violence, men and masculinities, sexualities, policy and politics, the feminist critique of sport, the initiation rites and hazing in college sports, sports wagering, and the internationalization of sport, including but not limited to the Olympics and Paralympics.

MKT 280 Sports Marketing 3 Credits

The course focuses on the unique challenges of marketing sports at a variety of levels: youth, college, professional, and international. The challenges of attracting and retaining fans and participants as well as of building and maintaining strong brand identity are at the heart of the course content. By evaluating case studies and examining current issues in sports marketing, students will gain an understanding of what it means to be a professional marketer of a sports organization and/or event.

Prerequisite(s): MKT 200.

PSY 283 Sport Psychology 3 Credits

This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

SPT 250 Introduction to the Business of Sports 3 Credits

This course is designed to introduce the student to the business of sports. Business principles, such as management, marketing, law, finance and economics will be applied to the business of sports. The course will also explore the various career opportunities in the world of sports.

SPT 320 Business of Global Sport 3 Credits

The course explores the diverse challenges and issues facing the managers of sport enterprises in the context of the global marketplace. Issues of governance, cross-cultural interactions and business activities will be examined as they relate to modern sport at the international level. By evaluating case studies and examining current issues in the field, students will gain an understanding of the relationships and responsibilities associated with being a business professional in the global sport industry.

SPT 322 Sports Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of statistical techniques and visualizations to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations and fantasy competitions. Classwork will consist of readings, lectures, discussions, presentations from guest speakers, and hands-on labs. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite(s): CIS 185, MSD 200 or MSD 205, and SPT 250.

SPT 325 Financial Management in the Sport Industry 3 Credits

This course is designed to build upon earlier knowledge from courses in economics, accounting and finance that emphasizes the sports industry and the challenge for financial managers in areas such as stadium/arena financing, financial analysis and valuation. Business models and their financial implications for media and sports related enterprises as well as the business of college athletics will also be covered.

SPT 355 Sports and the Law 3 Credits

Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. This course is cross-listed as LAW 355. Students may not get credit for both SPT 355 and LAW 355.

SPT 444 Selected Topics in Sport Management 3 Credits

This course is offered occasionally with topics and prerequisites set by the Business of Sports Program faculty. This course can be used as an elective for the Sport Management major, Sport Studies minor, or as a free elective. This course is graded on a letter grade basis.

Prerequisite: SPT 250.

SPT 450 Contemporary Issues in Sport Management 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of lectures, discussions, and guest speakers from the sports industry. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite: SPT 250, senior standing, and completion of 15 credit hours in business of sports coursework or permission of instructor.

SPT 490 Independent Research and Study 1-4 Credits

Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

Prerequisite(s): Junior standing, 9 credits in Sport Management courses (including SPT 250) and permission of instructor.

SPT 491 Sport Management Internship 1-3 Credits

Sports related internships can be used to satisfy an elective requirement for the Sport Management Major, Business of Sports Minor and Sport Studies Minor. The course is graded as Pass/Fail.

Sport Studies

Program Overview

The sport studies minor is an interdisciplinary program available to all Rider students. The curriculum has been designed to provide students with courses relevant to the examination of the multi-dimensional world of sports and to appreciate the important role of sports in shaping culture.

Departments and programs from across the University have developed courses for this program enabling students to study and critically evaluate the social, political, ethical, legal, economic and media related issues in sports.

Curriculum Overview

The curriculum gives students the opportunity to use the expertise and perspectives from their major to pursue in-depth study of sports related issues. On campus coursework is complemented by hands on internships, experiential learning through international sports related travel courses and presentations from guest speakers employed in a variety of roles in the sports industry. The experiential component of the minor also helps to give students a greater understanding of sports related employment possibilities as well as preparation for graduate work in sports management and administration programs.

This course is designed to introduce the student to the business of sports. Business principles, such as management, marketing, law, finance and economics will be applied to the business of sports. The course will also explore the various career opportunities in the world of sports.

SPT 320 Business of Global Sport 3 Credits

The course explores the diverse challenges and issues facing the managers of sport enterprises in the context of the global marketplace. Issues of governance, cross-cultural interactions and business activities will be examined as they relate to modern sport at the international level. By evaluating case studies and examining current issues in the field, students will gain an understanding of the relationships and responsibilities associated with being a business professional in the global sport industry.

SPT 322 Sports Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of statistical techniques and visualizations to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations and fantasy competitions. Classwork will consist of readings, lectures, discussions, presentations from guest speakers, and hands-on labs. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite(s): CIS 185, MSD 200 or MSD 205, and SPT 250.

SPT 325 Financial Management in the Sport Industry 3 Credits

This course is designed to build upon earlier knowledge from courses in economics, accounting and finance that emphasizes the sports industry and the challenge for financial managers in areas such as stadium/arena financing, financial analysis and valuation. Business models and their financial implications for media and sports related enterprises as well as the business of college athletics will also be covered.

SPT 355 Sports and the Law 3 Credits

Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. This course is cross-listed as LAW 355. Students may not get credit for both SPT 355 and LAW 355.

SPT 444 Selected Topics in Sport Management 3 Credits

This course is offered occasionally with topics and prerequisites set by the Business of Sports Program faculty. This course can be used as an elective for the Sport Management major, Sport Studies minor, or as a free elective. This course is graded on a letter grade basis.

Prerequisite: SPT 250.

SPT 450 Contemporary Issues in Sport Management 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of lectures, discussions, and guest speakers from the sports industry. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite: SPT 250, senior standing, and completion of 15 credit hours in business of sports coursework or permission of instructor.

SPT 491 Sport Management Internship 1-3 Credits

Sports related internships can be used to satisfy an elective requirement for the Sport Management Major, Business of Sports Minor and Sport Studies Minor. The course is graded as Pass/Fail.

Sports Media

Program Overview

Sports Media students at Rider focus their interest and communication skills to prepare themselves to be professionals in the growing area of sports media.

Curriculum Overview

Students will learn the fundamental and advanced procedures involved with journalism, television and public relations. All of these academic areas are focused on sports content in order to make a student well versed in both communication skills and the inner workings of the sports media industry.

Classes will utilize the Department of Communication, Media and Performing Arts' three state-of-the-art journalism labs, television studio, radio studio and have access to college and professional sports organizations.

Because of Rider's commitment to personalized learning, students will be able to produce content for The Rider News, The Rider University Network, Bronc Vision, and intern with the many college and professional teams located within minutes from campus.

The capstone experience for Sports Media students is a live sports reporting class in which students attend multiple live sporting events and create content from the press box and have access to post-game interviews.

³ Please note that elective credits may be used to complete requirements in a second major or minor.

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. **Prereq(s):** COM 270, COM 347, and MKT 280.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

SPT 250 Introduction to the Business of Sports 3 Credits

This course is designed to introduce the student to the business of sports. Business principles, such as management, marketing, law, finance and economics will be applied to the business of sports. The course will also explore the various career opportunities in the world of sports.

Sustainability Studies

Program Overview

Environmental sustainability is clearly a defining issue of the 21st century. Alarming patterns of environmental degradation have emerged since the beginning of the industrial revolution. Creating social, systematic, and commercial structures that reverse this trend by explicitly acknowledging and nurturing the interconnectedness of the natural and human environment is an important challenge facing Rider's graduates. Educators, entrepreneurs, chemists, journalists, psychologists and analysts will all need to understand the ways that our economic, natural and social systems work together to sustain the collective human enterprise.

Concentrating on the interdependence of natural, economic and human systems, the sustainability studies minor helps students explore the complex task of protecting the earth while generating economic welfare and ensuring social justice. Because the minor draws on a network of approaches (social, scientific, economic), students will be equipped to take on increasingly pressing challenges in areas ranging from education and energy, communications and design to ecosystems management, business and government.

The program also provides students with opportunities to get under the hood, exploring what "going green" really means. Coursework is application-intensive. The introductory course will expose students to a wide range of issues, from food to packaging, from natural lands preservation to building sustainable communities. Other coursework complements students exploration of these issues. A broad range of internship and independent study opportunities are available for interested students. The capstone course brings together a team of

students to address a real problem on the Rider campus, hopefully making significant changes along the way.

Students in the sustainability studies minor will take six courses (20-21 credits) in environmental and social sciences, ethics and business. Sustainability-related courses that contribute to the minor are offered within many majors. The introductory course is deeply interdisciplinary, drawing on expertise from across the University in the social sciences, business, history, philosophy, ecology, physics and marketing. After this introduction, students are expected to complete an independent study or internship project on or off campus that provides hands-on experience with the complex tasks required to make systems more sustainable. The capstone course draws on the interests and expertise of the enrolled students who together will identify a specific sustainability challenge on the Rider campus and devise, implement, and measure the effects of a plan to address it.

Courses and Descriptions

SUS 100 Introduction to Sustainability Studies 4 Credits

Sustainability is an idea that will shape the lives of all in the 21st century. Students will explore how we arrived at our current precarious environmental situation and investigate cutting-edge methods that support human development and protect the natural ecosystems on which we will depend. By exploring principles of sustainability (whole-systems approaches, resource limitations, stewardship) through many different lenses, students will appreciate the interdisciplinarity of the sustainability enterprise. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): SUS 100L.

SUS 100L Intro to Sustainability Lab 0 Credits

For students concurrently taking SUS 100. Field trips, visiting speakers, and films to complement topics covered in the introductory course. One three-hour laboratory per week.

Corequisite(s): SUS 100.

ENV 100 Introduction to Environmental Sciences 4 Credits

Examines how ecosystems function, with emphasis on the interactions between biological organisms and their physical environment, and the chemical processes that govern these interactions. The impact of human populations on natural ecosystems is investigated in detail using case studies from history and current events. The laboratory provides for hands-on experiences and/or short field trips to local sites for a better understanding of many of the concepts discussed. Weekday and weekend field trips may be required. Three hours of lecture and one three-hour lab per week. CLAS general education areas addressed: DP, SP, GP. **Corequisite(s):** ENV 100L.

ENV 100L Introduction to Environmental Sciences Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): ENV 100.

GSC 115 Introduction to Global Supply Chain Mgt. 3 Credits

This course introduces students to components of global supply chains and issues of managing the global supply chain. It is designed as a survey course to give first or second year business students a general view of supply chain management at both domestic and international levels, as well as familiarize them with basic concepts and major challenges of supply chain management. Delivery of course material will include lectures and guest speakers from industry, and in-class logistics mini cases.

PHL 215 Environmental Ethics 3 Credits

A comprehensive introduction to environmental ethics that examines the major theoretical approaches, including anthropocentric (human-centered), zoocentric or sentientist (animal-centered), and biocentric or ecocentric (nature-centered) value systems, as well as the most important critiques of these ethical approaches. We will examine and analyze several classical ethical theories that are particularly relevant to a study of contemporary environmental controversies. We will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption. Students will analyze and discuss the ethical dimensions of several contemporary environmental controversies. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

SUS 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in applying sustainability principles in a field setting. Students are expected to assess the outcomes of their projects and communicate their results verbally and in writing to interested audiences.

SUS 491 Internship in Sustainability 1-4 Credits

A supervised work/service experience in an approved organization where students gain understanding and experience with applying sustainability principles. Placements may be in private, public, educational, non-profit or governmental organizations. Students are expected to include measurement and documentation of the environmental, social, and economic impact of their work. A minimum of 50 hours of work is required for one credit. At least 150 hours are required to earn 3 credits.

Teaching English to Speakers of Other Languages (TESOL)

Overview

The Certificate in TESOL is for non-education students and it is geared to those interested in teaching English or other content areas such as mathematics, biology, philosophy, or history among others, in bilingual settings abroad or in adult education programs after graduation. This 9-credit program links current research to best practices in the field of language teaching. It offers an introduction to language learning theories, teaching methodology, and classroom management, with opportunities to work with actual students and receive feedback from professors.

Admission Requirements

Advanced low in the ACTFL English proficiency scale or B2 in the Common European Framework of Reference for Languages for those who are not native speakers of English.

Degree Offered

Courses and Descriptions

CHI 310 Chinese Culture and Civilization 3 Credits

This course introduces students to Chinese Civilization and Culture. Through reading, viewing, discussion, and presentation, students will have a chance to “experience” Chinese cultural riches and “interact with” its long history, religions, philosophies, literature and art, politics, as well as its different peoples and diverse customs. We will learn about China’s ancient dynasties and its cultural and aesthetic achievements in the past, and its modern revolutions, nationalism, communism, and post-Mao economic and political reforms today. We will also explore Chinese customs, particularly festivals, and try to gain an appreciation of different social relationships and diverse cultural practices. No knowledge of Chinese required. This course offers an optional TRIP TO CHINA during Spring Break or in May WHICH WILL EARN 3 ENGAGED LEARNING POINTS. Interested students must register for the travel course separately from taking CHI 310.

CHI 311 Calligraphy As a Window to Chinese Language and Culture 3 Credits

This course provides students with a chance to gain an intimate knowledge of Chinese language and culture through calligraphy. Students will learn the basic principles and techniques of writing Chinese characters with the writing brush. They will be introduced to the pronunciation, the composition and evolution of Chinese characters so that they will be able to read and understand what they write. Students will also learn how calligraphy is immersed in various aspects of Chinese culture. The main content of the course derives from examining applications of calligraphy to poetry, painting, and core concepts of Confucianism, Daoism and Buddhism. They will have a chance to cross time and space, having dialogues with Confucius, experiencing Buddhist bliss of final “awakening” or “enlightenment” and abandoning themselves to the Daoist spontaneous flow with the movement of Nature and the cosmos. No knowledge of Chinese language is required.

ENG 236 Applied Grammar & Syntax 3 Credits

This course offers a review of the essential elements of English grammar and syntax and fosters understanding of how these elements work in notable argumentative and expository writing as well as in the student’s own compositions. Focus is on both expert reading and effective writing. Changing attitudes toward usage, including influence of digital media on language use, are discussed. May be taken as preparation for, or independently of ENG 336, which addresses grammar, syntax, and style at a more advanced level.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 336 Grammar and Style 3 Credits

By building a comprehensive knowledge of the conventions of English grammar, punctuation and syntax, students will learn how to analyze the way words, phrases, sentences, and paragraphs work in expert writing, and they will apply this knowledge to their own writing. Emphasis is on argument, exposition, and analysis.

Prerequisite(s): completion of composition requirements or permission of instructor.

FLE 320 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to general linguistics and basic contrastive study of English, French, German, and Spanish sounds, forms, and syntax. Students visit schools where they interview language learners and sample their speech for analysis. Applications of these studies are made to creating instructional materials and to teaching. Theories of language acquisition as well as factors affecting second language learning, including learning styles and personality, are studied. A rationale for communicative language teaching and learning is constructed. Note: This course is cross-listed as EDU 320. Students may not get credit for both FLE 320 and EDU 320.

FLE 420 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolios and philosophy of second language teaching, prepare a thematic unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. Note: This course is cross-listed as EDU 420 and EDUC 521. Students may not get credit for FLE 420, EDU 420, and EDUC 521. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

FRE 311 French Culture 3 Credits

A study of modern France and French value orientations as they are rooted in tradition and history and continue to shape everyday life as well as institutions, social organizations, artistic expression, education, attitudes and human interaction. A comparative approach will examine the underlying differences between France and the United States. Classes are in English.

GLS 180 Understanding Global Relations 3 Credits

Offers an introduction to Global and Multinational Studies by exposing the student to basic concepts necessary to understand the dynamics underlying the emerging worldwide society of diverse nations. The student will become acquainted with the mechanisms by which contacts are built across nations, and the factors that shape the conception of and relations with "the other."

IND 210 Global Encounters 3 Credits

This course provides students with an exposure to foreign cultures consisting of both travel and study components. Destinations may include countries in Europe, Latin America, or Asia. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political, and aesthetic cultural components appropriate to the location(s) visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. A travel fee is required. No foreign language skills are required unless otherwise indicated.

MCS 110 Race, Class and Gender in Contemporary American Society 3 Credits

This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with GSS 110. Students may only get credit for one course: MCS 110 or GSS 110.

MCS 220 Issues in Multicultural Studies 3 Credits

An examination of issues and questions posed by the existence of diversity in social life. Students build on what they have learned in MCS 110 by focusing in greater depth on selected aspects of multicultural interaction. Topics change each semester and are listed in the course roster. Recent topics include "Understanding Privilege," "The Meaning of Difference," and "Narratives of Human Difference: Science, Politics, Literature."

Prerequisite(s): MCS 110 or permission of instructor.

SOC 207 Racial and Ethnic Relations 3 Credits

Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

Prerequisite(s): SOC 101.

SPA 102 Elementary Spanish II Abroad 3 Credits

This course is the second part of the first-year experience in Spanish and is designed for students who have taken Spanish for Beginners I and who are interested in experiences abroad in a Spanish speaking culture. The aim is to develop the four basic skills (listening comprehension, speaking, reading, and writing) in and beyond the classroom. The discussion of distinctive cultural aspects of the Hispanic world is an integral part of this course as well as to encourage students to experience the world through the eyes of the other culture by exposing them to the literature and arts of the local culture. This course takes 8 weeks in total, 7 weeks at Rider online and 1 week abroad. During the seven weeks, students practice linguistic skills and gain cultural knowledge related to the country of destination. These skills and knowledge will prepare the students for the one week abroad experience.

Prerequisite(s): SPA 100 with a minimum grade of D.

SPA 310 Spanish Culture & Civilization 3 Credits

Spain's cultural achievements are studied in light of the country's unique historical and social reality through the use of historical, artistic, architectural, cinematic and literary sources. Cross-cultural awareness is enhanced through exercises that compare Spanish and American society. Classes are in English. No knowledge of Spanish required. This course may contain an optional travel component offered before or after the semester or during spring break.

SPA 311 Latin American Cultures 3 Credits

A panoramic survey of Latin American cultural achievements in light of the unique social and political history from the pre-Columbian period to the present. Classes are in English. No knowledge of Spanish is required.

Theatre

Program Overview

In addition to a full array of theatre coursework, six main-stage productions each year give students a wide variety of experiences and opportunities. As a theatre major at Rider, students have the choice

of pursuing a musical theatre, design & technology or contemporary theatre practice track. Musical theatre majors receive an education in the various areas necessary to develop as a professional musical theatre performer. Design & Technology majors are offered a wide range of courses in the various aspects of theatre production. Contemporary Theatre Practice majors use their degree to pursue careers as educators, directors, playwrights, producers, and dramaturgs. All three tracks allow you the ability to add a second major or minor.

Audition or Interview

A satisfactory audition or interview must be completed before a student is accepted into this major. Audition and interview requirements may be found on the Admissions audition website (<http://www.rider.edu/ugauditions/>).

Degrees Offered

- B.A. in Theatre: Musical Theatre
- B.A. in Theatre: Contemporary Theatre Practice
- B.A. in Theatre: Design & Technology

Two Theatre elective courses		6
THE 190 or THE 127	Production I ¹ Theatre Production	2
Total Credits		20

¹ THE 190 or THE 127 must be taken twice to earn 2 credits.

Academic Plans of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

THE 103 The Authentic Instrument I: Introduction to Performance Skills 3 Credits

Through Alexander Technique and other methodologies, actors gain awareness of personal habits and begin to find their authentic, truth-telling voice and body—a dynamic and expressive instrument to serve them in any medium.

THE 104 The Authentic Instrument II: Developing the Imaginative Performer 3 Credits

Continuing from THE 103, actors explore psycho-physical techniques (e.g. Michael Chekhov, Viewpoints, Laban) to develop the actor’s imagination. The class culminates in a public presentation using the tools that have been cultivated in Authentic Instrument I & II.

Prerequisite(s): THE 103.

THE 105 Theatre History to 1700 3 Credits

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 107 Acting I: Intro to Acting 3 Credits

Exercises and improvisations developing the fundamental prerequisites for the actor are provided. The emphasis is on vocal and physical mobility and the ability to communicate emotional states from the stage.

THE 110 Acting II: Scene Study 3 Credits

Basic acting techniques. Emphasis on the ingredients of any action: what am I doing, where, why, who am I, what is my attitude toward partner?

Prerequisite(s): THE 107.

THE 111 Theatre Lab 0 Credits

This class serves as a forum for students to cultivate practical professional skills. Through seminars, guest speakers and master classes, this lab will give the students necessary tools to enter the professional theater. Theater majors must meet the weekly attendance and participation requirements during every semester up to a total of six.

THE 115 Stagecraft 3 Credits

The theory and practice of construction and rigging of stage scenery is offered. Emphasis is on actual productions and road show set-ups. One lecture and two labs per week.

THE 116 Stagecraft Practicum 1 Credits

Work in the various shops and stages specializing in different areas such as carpentry, scenic painting, lighting and electrics, costumes and props, assisting main stage productions under the supervision of the design or technical staff.

Prerequisite(s): THE 115.

THE 118 Visual Imagination 3 Credits

Introduction to the visual world of theater design. Visual examples, physical exercises and handcraft of composition and style, with dramatic input and meaning. The course explores how to translate ideas in a dramatic text into a visual context.

THE 120 Theater Appreciation 3 Credits

By exploration of dramatic literature, conclusions are drawn as to man’s relationship to his particular period, style, political, social, and psychological environment. Appreciation of the theatrical event is included. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 127 Theatre Production 1 Credits

Students rehearse and perform roles in a play produced by the department and directed by a member of its faculty. Students may also prepare a major element of design or technology for the production. Maximum of eight credits are accepted in theatre production, band and/or choir.

THE 190 Production I 1 Credits

Students carry out a technical theatre crew position for one or more theatre, musical theatre or dance productions during the semester of course registration. May be repeated seven times, for a total of eight credits.

THE 199 The Arts in Contemporary Civil 3 Credits

An integrated study of the arts and their place in contemporary American life. Includes attendance at several events in art, music, and drama.

THE 201 Devised Theatre 3 Credits

Devised theatre is a process in which a whole creative team – from actors to technicians - develop a new work collaboratively. Students will create an original production inspired by a theme, topic, poem, or circumstance using multimedia, interviews, and other methods and build them through collaborative workshops and rehearsals.

THE 206 American Theatre History 3 Credits

The history of the American theater from the colonial period to the present, emphasizing dramatic scripts and theatrical conventions. Examines important playwrights, theorists, and practitioners representative of each period of American history, emphasizing the 19th and 20th centuries.

THE 215 Introduction to Theatrical Lighting and Sound 3 Credits

This course will introduce students to basic lighting and sound principles and how those integrate into a theatrical performance. The main focus of the class will be analysis and application of lighting and sound equipment commonly used in live performance and how that equipment functions and is installed. The class will also touch on the design process, script analysis, and lighting color theory. These objectives will be achieved through in-depth lectures, class discussions, and hands-on demonstration sessions.

THE 216 Introduction to Scenic Construction 3 Credits

This course will expose students to reading construction drawings, construction techniques, generating material lists, problem-solving, and material and time management as related to scenic construction. A shop participation requirement will allow students to apply course objectives within a real-time production schedule and construction environment.

THE 219 Stage Management 3 Credits

Provide necessary tools to get started as a production stage manager (PSM), including management, leadership, communication and organizational skills. Providing guidelines to prepare production paperwork. Overview of the relationship between the PSM and other production personnel.

Prerequisite(s): THE 115.

THE 220 Movement for the Actor I 3 Credits

This course is an introduction to movement training methodologies, and emphasizes physical awareness and expressivity as it relates to development of character.

Prerequisite(s): THE 110, For Acting majors or by permission of the instructor.

THE 221 Voice for the Actor 3 Credits

Focuses on exploration of the basic principles of vocal production and cultivating natural expressivity of the voice. Class work is based upon the classic progression of voice exercises of Kristin Linklater.

Prerequisite(s): THE 107; Open to Theatre majors or minor, or by permission of the instructor.

THE 222 Speech and Dialects for the Actor 3 Credits

Focuses on exploration of the International Phonetic Alphabet (IPA) and the use of the IPA in learning dialects (including Standard Neutral American) for the stage.

Prerequisite(s): THE 107; Open to Theater majors or minor, or by permission of the instructor.

THE 224 Stage Make Up 3 Credits

Basic application of make up artistry and techniques for the stage. How it can help build a character, and how to apply to self and others.

THE 226 Drafting for the Stage 3 Credits

Covers essential drafting language for staged productions. Drafting of ground plans, sections, elevations, and renderings by hand and with computers.

Prerequisite(s): THE 115.

THE 227 Properties and Scenic Painting 3 Credits

Covers general aspects of scenic painting and props for the stage. Hands on exercises, needs and challenges of each area, how work is usually accomplished in the professional world. Explore different textures, materials and how to combine them.

Prerequisite(s): THE 115 or THE 118.

THE 228 Projection Design 3 Credits

In this course students will learn the basics of video editing software and its application to the performing arts. It will provide them with a general understanding of the needs for projection design, visual possibilities, explore the reasons to use video or projection in a production and its most effective applications within theatrical production limitations.

Prerequisite(s): THE 115, THE 118.

THE 229 Movement for the Actor II 3 Credits

This course is a continuation of study in movement training methodologies (Alexander Technique, Viewpoints, Laban). It will emphasize developing physical awareness and expressiveness as it relates to the development of character work. It will also continue the further cultivation of awareness of habitual psycho-physical patterns that inhibit students in their professional development.

Prerequisite(s): THE 220, THE 221.

THE 240 Script Analysis 3 Credits

This course provides students with a technique for analyzing a theatrical script in terms of its theatrical requirements and aesthetic qualities.

Students will use critical research and develop the abilities to write and speak clearly about dramatic literature, the requirements of production, and the experience of performance.

Prerequisite(s): THE 107 with a minimum grade of C.

THE 250 Introduction to Costume Construction 3 Credits

This course will introduce students to basic costume construction methods and alteration skills used by professional costume shops and costume houses to create theatrical costumes. Students will complete several projects, covering hand and machine sewing, cutting, fabric identification, and will also learn how to use home and commercial patterns to cut out garments and simple patterning and draping techniques. Students will also get practical experience by assisting the costume designer and/or shop manager in supporting the needs of the current productions and will have experience taking measurements, fitting and the alteration of actual costumes.

THE 260 History of Style and Decor 3 Credits

This class is a survey of elements, furnishings, decorative motifs and trends in architecture, decor and fashion, starting with prehistory and moving through the early part of the 21st century. It is intended to be a visual survey of the major "periods" of both decor and fashion and is intended to help theatre artists to develop an understanding of visual history.

THE 290 Production II 1 Credits

Students carry out an intermediate level technical theatre crew position for one or more theatre, musical theatre, or dance productions during the semester of course registration. Intermediate level technical theatre positions are supervisory positions or assistants to department heads which include, but not limited to, assistant to a designer, Stage Manager, Wardrobe Supervisor, and Master Carpenter.

Prerequisite(s): SO standing; 3 credits of THE 190.

THE 300 Acting for the Camera 3 Credits

Focuses on the craft and artistry of acting in television and film. Examination of TV production and the styles needed for work in various media will be discussed. Physicalization, simplicity, listening, marking and other technical requirements will be explored. Staging involving different camera angles will be rehearsed. The emphasis of this class is on adapting the performance to the special needs of the camera.

Prerequisite(s): THE 107.

THE 307 Contemporary Theater 3 Credits

The richness and diversity of contemporary theatre artists across the world are discussed. Focusing on playwrights and innovative performing arts practitioners, the form and content of dramatic literature and production styles considered most significant today are examined from a global context.

THE 308 Modern Drama 3 Credits

Surveys American and European drama from 1920 to 1970. All plays are read in English translation. In these plays, theatrical artists address the great themes of this century. While doing so, they also expand the limits of theatrical expression.

THE 310 Acting III 3 Credits

Students will study in-depth techniques for exploring characterization. They will be introduced to the "magic if" and study techniques for placing themselves in the circumstances of the characters they are portraying. They will learn the interior and exterior analysis of characters using "Adler" and "Practical Aesthetics" techniques.

Prerequisite(s): THE 107, THE 110.

THE 311 Acting IV 3 Credits

Students will learn the appropriate techniques to explore characters in the three styles of Elizabethan, Restoration, and Commedia dell'arte theatre. Sessions will include movement, effective speech, and finding appropriate actions for each style. Students will also learn proper research techniques to understand cultural influences on plays and characters.

Prerequisite(s): THE 107, THE 110, THE 310.

THE 312 The Arts Abroad 3 Credits

A two-week trip abroad that includes a critical study of the music and theatre. Students are required to attend all performances, guided tours, and classes before and after the trip. A travel journal and final paper is required. A travel fee is required. Travel sites and artistic disciplines may vary year to year. May be taken more than once for credit.

Prerequisite(s): Permission of instructor.

THE 313 Advanced Voice and Speech for the Actor I 3 Credits

Actors continue their study of vocal progression of Kristen Linklater and the speech work of Patsy Rodenberg, Edith Skinner and Louis Colaizzi to develop physical freedom, energy and expressivity. Advanced diagnostic work of students' voice and speech habits is explored in relationship to work with contemporary, heightened, and stylized texts.

Prerequisite(s): THE 221, THE 222.

THE 314 Advanced Voice and Speech for the Actor II 3 Credits

Continuing from THE 313, actors apply advanced principles of vocal production and speech work to contemporary, heightened and stylized texts.

Prerequisite(s): THE 313.

THE 315 Acting V: Advanced Acting for the Camera 3 Credits

This course is a continuation of the study of acting for Television, Film, Internet Content, Voiceover and other mediums.

Prerequisite(s): THE 229, THE 311.

THE 317 Scenic Design 3 Credits

The study and application of design principles as related to the stage. Incorporates the design process, decor research, styles, materials, and construction technology.

Prerequisite(s): THE 118.

THE 318 Stage Lighting Design 3 Credits

The theory and practice of stage lighting as utilized in concept, dance, and theatre. Considers the nature of light, controlling light, color theory, electricity, electrical safety, and lighting design.

Prerequisite(s): THE 118 ([https://nextcatalog.rider.edu/search/?P=THE %20118](https://nextcatalog.rider.edu/search/?P=THE%20118))

THE 319 Costume Design 3 Credits

Introduction to tasks, skills and expertise of costume design and costuming techniques, relationship with other creative production and cast members. Students will create sketches and develop basic construction plans. Develop familiarity with fabrics, patterns, common challenges in costume design.

Prerequisite(s): THE 115 (for other Theatre majors) or THE 118 (for Design and Technology majors).

THE 325 Sound Design 3 Credits

Introduction to sound design and its diverse use and practice for the staged productions, e.g. plays, musicals, operas and dance.

Prerequisite(s): THE 115.

THE 329 Movement for the Actor III 3 Credits

This course is a continuation of study in movement training methodologies focusing on continued development of expressivity, ease, dynamics and authenticity in character development.

Prerequisite(s): THE 229.

THE 390 Production III 1 Credits

Students carry out an advanced level technical theatre crew position for one or more theatre, musical theatre, or dance productions during the semester of course registration. These positions include, but are not limited to, Designer, Production Stage Manager, Props Master, and Technical Director. This course may be taken up to three times for credit.

Prerequisite(s): JR or SR standing; 2 credits of THE 290 and related management/design course or permission of Instructor.

THE 400 Directing for the Stage I 3 Credits

The technique of play directing and production management. Lectures present aesthetic and theoretical concepts that are explored in workshops.

Prerequisite(s): THE 107, THE 115.

THE 401 Directing for the Stage II 3 Credits

This course is designed to provide students with an opportunity to practice and discuss the art of directing, building upon the fundamentals of directing studied in THE 400: Directing I. Further exploration of directing challenges and application of artistic vision is accomplished through the direction of scenes and short scripts.

Prerequisite(s): THE 400.

THE 410 Advanced Performance Workshop 3 Credits

An opportunity to work an entire semester on a specific style or period of theatre, e.g., Shakespeare, farce, Readers' Theater.

Prerequisite(s): THE 107, THE 110.

THE 411 Advanced Performance Online Workshop 3 Credits

An opportunity to work an entire term on a specific style or period of theatre that is most conducive to online instruction.

Prerequisite(s): THE 107, THE 110.

THE 450 NY Experience: Professional Audition Technique and the Business of Acting 3 Credits

Students engage weekly with New York professionals to learn the business of acting and strategies for successful auditions in the NY Film, Television and Theatre industry. Students will participate in mock auditions with casting directors and theatre and on camera directors to refine audition skills. Travel costs to New York are the responsibility of the student.

THE 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credits. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing, good academic standing.

THE 491 Internship in Theater 1-12 Credits

Provides junior or senior theatre majors the practical experience of working within a professional theater environment. Students must be sponsored by a theatre professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

THE 493 Contemporary Theatre Ensemble 1 Credits

This course gives Contemporary Theatre Practice students the opportunity to create a full season of student-directed, acted and designed productions.

Prerequisite(s): THE 190 (3 times) and 60 semester hours.

THE 495 Selected Topics in Theatre History 3 Credits

Intensive study of a particular topic, such as the work of one dramatic movement, one period in dramatic history, or one nation's history. Students become deeply involved in an area through research, class discussions, and individual consultation with the instructor.

THE 496 Senior Internship 6-12 Credits**THE 497 Theatre Senior Showcase 1 Credits**

This course is a senior level experience for BFA acting students, and acts as a bridge between life in the university and life as a professional actor. Through this course the students will, in collaboration with the teacher, compile and put together a showcase to introduce the students to casting and agent professionals in the industry by way of getting the showcase performance in front of a diverse range of industry professionals who will be useful in both casting and representing recently graduated talent.

THE 498 Senior Capstone 3 Credits

The senior capstone is intended for technical theatre students in their final year. Depending on the required abilities, students will be able to design sets, lights, costumes, props or sound for a mainstage show at Rider University, do research on topics related to technical Theatre, internships outside Rider University or work on projects that will improve the use of facilities, storage or equipment for Theater and Dance Department.

THE 499 Senior Honors Program 3 Credits

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, to be planned under the direction of a faculty advisor, will represent a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

MTR 105 Musical Theatre Practicum 1 Credits

This course explores the literature of musical theatre vocal ensembles. It emphasizes examining a wide range of styles. This is a studio/academic class, not a performance ensemble.

MTR 109 Beginning Ballet I 1 Credits

This course introduces the basic elements of ballet technique. Technique is based on the five positions of the legs and feet, coupled with appropriate arm positions. The class consists of a basic ballet barre warm-up that includes stretching and developing strength and turn-out used in dance positions and combinations. Instruction includes jumping, turning, and connecting steps with movement. Ballet terminology is addressed.

MTR 111 Musical Theatre Lab 0 Credits**MTR 112 Advanced Ballet I 1 Credits**

Continuation of MTR 109, building upon techniques learned in that course.

MTR 113 Beginning Ballet II 1 Credits

Intermediate ballet, expanding upon Ballet I and concentrating upon the American lineage of ballet training.

MTR 114 Advanced Ballet II 1 Credits

Continuation of MTR 113. Intermediate ballet, expanding upon Ballet I and concentrating upon the American lineage of ballet training.

MTR 120 Hist of American Music Theater 3 Credits

The history of the American Musical from the first American production in 1750 of Gay's *The Beggar's Opera* up to the present will be traced. Emphasis will be placed upon those common elements which are solely intrinsic to the American stage. Developments and imported ideas (e.g., *The British Invasion*) will be highlighted.

MTR 131 Music Theory for MT 3 Credits

Teaches students to understand musical form, structure, melody, rhythm and harmony by applying these concepts to musical theatre literature. Includes full analysis of musical theatre songs. Required in the first year.

MTR 132 Group Piano 1 Credits

Offers the musical theatre student appropriate keyboard technique to play any vocal part and to play a rudimentary accompaniment. Required of all second-year students.

Prerequisite(s): MTR 131.

MTR 133 Sight Singing for MT 3 Credits

Intensive class in reading music, designed for musical theatre students. Traditional solfeggio techniques used with musical theatre texts whenever possible. Required of first-year students.

Prerequisite(s): MTR 131.

MTR 209 Tap Dance I 1 Credits

Introduction to the basic elements of tap dancing. Tap technique is geared to enhance rhythm and motor skills, basic elements that will be used to connect several steps and movements into combinations. Other variations such as "soft shoe" or "clogging" are included.

MTR 210 Tap Dance II 1 Credits

Continuation of MTR 209. Combinations most often used in music theater productions are emphasized.

Prerequisite(s): MTR 209.

MTR 211 Ballet III 1 Credits

Intermediate ballet, expending upon Ballet II and concentrating upon the American lineage of ballet training.

Prerequisite(s): MTR 110.

MTR 212 Ballet IV 1 Credits

Continuation of MTR 211. Intermediate ballet, expanding upon Ballet III and concentrating upon the American lineage of ballet training.

Prerequisite(s): MTR 211.

MTR 215 MT Performance: Song as Text 3 Credits

In this course the student will learn how to develop a performance of musical text by making doable, actable choices and applying those choices to musical monologues – solo songs.

Prerequisite(s): THE 110.

MTR 216 Acting for Music Theater I 3 Credits

This professional skills course, intended for music theater majors, builds upon the student's previous acting training. Through various exercises and activities (both individual and group), the student will begin to develop a clear method for preparation that addresses first their own instrument, and then (through various methods of analysis) the character and the play. Students will begin to utilize and apply the studied techniques and exercises to simple monologues and a scene. Behavioral truth will precede the more sophisticated studies of emotional truth.

MTR 217 Acting for Music Theater Major II 3 Credits

Continuation of MTR 216. Methods for preparation are expanded as students learn and experience techniques for exploring and developing characters. This semester will focus on the application of the skills and acting techniques studied in the first semester to the needs of dramatic and sung material. Students are expected to synthesize content and skills acquired in the Speech for the Actor, Body Awareness and Movement classes.

Prerequisite(s): MTR 216.

MTR 218 Musical Theatre Scene Study I 3 Credits

Scene study class exploring the literature of the musical theatre – emphasis placed on two- and three-character scenes. Required of all second-year students.

Prerequisite(s): MTR 215.

MTR 219 Musical Theatre Scene Study II 3 Credits

Further exploration of scenes in the musical theatre literature – emphasis on more complex scenes. Required of all third-year students.

Prerequisite(s): MTR 218.

MTR 251 Styles and Genres I 3 Credits

Focuses teaching and learning on the ways in which musical and textual understanding inform the interpretation and performing of representative composers from the Standard, Classical, and Traditional periods of musical theater. Composers to be studied will include Rodgers and Hammerstein, Lerner and Loewe, Kern, Berlin, Gershwin, Porter, Arlen, Blitstein and Weill.

Prerequisite(s): MUS 111, MUS 111L, THE 107, MTR 216.

MTR 252 Styles and Genres II 3 Credits

Focuses teaching and learning on the ways in which musical and textual understanding inform the interpretation and performing of representative composers from the Contemporary (Non-Pop/Rock) period of music theater. Composers to be studied will include Sondheim, Styne, Kander and Ebb, Guettel, Matby and Shire, and Bernstein.

Prerequisite(s): MUS 111, MUS 111L, THE 107, MTR 216.

MTR 253 Styles and Genres III 3 Credits

Focuses teaching and learning on the ways in which musical and textual understanding inform the interpretation and performing of representative composers from the Contemporary, Pop/Rock period of music theater. Composers to be studied will include Webber, Schwartz, Fenn, Flaherty, Menkin, Brown, LaChiusa, and Lippa.

Prerequisite(s): MUS 111, MUS 111L, THE 107, MTR 216.

MTR 255 Musical Theatre Repertoire I 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers through the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106 with a minimum grade of D and THE 311 with a minimum grade of D.

MTR 256 Musical Theater Repertoire II 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers since the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106, THE 107.

MTR 307 Tap III 1 Credits

This course is designed for the moderately advanced tap dancer. Course to be taken in the fall.

Prerequisite(s): MTR 210.

MTR 308 Tap IV 1 Credits

The course will allow the more advanced student to complete the work begun in Tap III.

Prerequisite(s): MTR 307.

MTR 309 Beginning Jazz Dance I 1 Credits

Based upon the ballet foundation, this course explores the expressive style of jazz dance, and basic Western theatrical dance forms and social dances used most often on the stage.

Prerequisite(s): MTR 109.

MTR 313 Ballet V 1 Credits

Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills.

Prerequisite(s): MTR 212.

MTR 314 Ballet VI 1 Credits

Continuation of MTR 313. Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills.

Prerequisite(s): MTR 313.

MTR 315 Advanced Jazz Dance I 1 Credits

Continuation of work begun in MTR 309.

MTR 316 Beginning Jazz Dance II 1 Credits

This course continues the work begun in MTR 309 and MTR 315.

MTR 317 MT Auditions:Preparation/Tech 3 Credits

This course, building upon skill-sets established in the Music Theatre singer-actor curriculum, will introduce and hone the required skill-sets for preparing to audition in Music Theatre. Genres and styles of music most often required for auditioning in the industry will be prepared and explored. An audition "book," based upon the demands of the industry, as well as the most suitable material for each student will be built. When appropriate, guests from the industry will be invited to present master classes and evaluations in a "mock audition" process.

Prerequisite(s): MTR 207, MTR 216, MTR 217, MTR 492.

MTR 318 Advanced Jazz Dance II 1 Credits

This course continues the work begun in MTR 309, MTR 315 and MTR 316.

Prerequisite(s): MTR 211.

MTR 319 Jazz Dance III 1 Credits

This course continues the work begun in MTR 318.

Prerequisite(s): MTR 318 and MTR 212.

MTR 320 Jazz Dance IV 1 Credits

This course continues the work begun in MTR 319.

Prerequisite(s): MTR 319 and MTR 212.

MTR 335 Speech for the Actor 3 Credits

This course introduces and develops speech techniques, specifically in the areas of relaxation, posture and alignment, respiration, phonation, support, registration, resonance, and articulation. Students learn to consistently produce a free, resonant, fully supported speaking voice. Exercises will increase flexibility and range of speaking and will foster heightened responsiveness to feeling. Regular practice in the delivery of both impromptu and prepared monologues is required. This course includes studies in Neutral American Speech.

MTR 402 Directing Music Theater/Opera 3 Credits

This elective course investigates how conceptual ideas and the process of script analysis are used in putting together a music theatre production for performance. Instruction includes staging ideas and elements needed for a complete production. Other theatrical aspects of choreography, properties, costumes, lighting, and set design are addressed. It is recommended that students complete MTR 496 before taking MTR 402.

MTR 411 Musical Theatre Ensemble 1 Credits**MTR 415 Musical Theatre Dance I 1 Credits**

This is the first capstone course in the Musical Theatre dance sequence. Practical and historical study of Broadway dance styles; main focus on jazz idiom. Emphasis placed on performance quality, auditioning skills, self-taping, and "how to swing/dance captain".

Prerequisite(s): Completion of Ballet, Tap, and Jazz requirements; senior standing.

MTR 416 Musical Theatre Dance II 1 Credits

This is the second capstone course in the Musical Theatre dance sequence. Emphasis is placed on other dance styles used on stage, film, music videos, and television. Primary focus is on Hip Hop and Street Jazz.

Prerequisite(s): MTR 415 with a minimum grade of C.

MTR 480 Dance for Performing Artist 3 Credits

This course is a culmination of the dance elements and forms studied in ballet, tap, and jazz dance. Context areas include movement used most often in performance of music theater and movement fundamentals applicable to all aspects of presentation and principle to refine and articulate the performer's awareness and use of the body through singing and dance. Performance issues and movement as a basis for music and sound production are addressed.

Prerequisite(s): MTR 209, MTR 309.

MTR 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credit hours. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing, good academic standing.

MTR 491 Internship in Music Theater 1-12 Credits

Provides junior or senior musical theatre majors with the opportunity to gain practical experience working within a professional environment. Students must be sponsored by a musical theatre or theatre professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

MTR 492 Singing Actor: Music Theater 3 Credits

This semester combines all dramatic and musical studies to create an authentic and believable character that is both emotionally truthful and musically expressive. Music is studied as "script" and dramatic choices are prepared in relationship to all elements present in the score.

Prerequisite(s): MTR 216 and MTR 217.

MTR 493 Music Theater Production 1 Credits

Preparation and performance of a solo or ensemble role in a fully staged music theatre production. Concurrent participation in stage crew activities is required.

MTR 495 Special Topics in Theater Dance 1 Credits

This class covers discrete movement styles, techniques, or forms for the advanced dancer such as the choreography and techniques of Bob Fosse, Jerome Robbins, Jack Cole, and other theatrical dance choreographers.

Prerequisite(s): MTR 319, MTR 212, and MTR 308.

MTR 496 Music Theater Workshop 3 Credits

This class, building upon the foundational studies associated with preparation and exploration (both dramatic and musical), focuses on performances. Students are taught methods for synthesizing all former training in acting, music, and movement to the needs of the character and the play/score. Each student fully prepares at least two complete roles from the music theater repertoire. The class culminates in a performance of scenes—the Junior Cabaret!

Prerequisite(s): MTR 216, MTR 217, MTR 492.

MTR 497 Musical Theatre Senior Showcase 1 Credits

This course is a senior level capstone experience for BFA Musical Theatre students, and acts as a bridge between life in the university and life as a professional musical theatre performer. Through this course the students will, in collaboration with the teacher, compile and put together a showcase to introduce the students to casting and agent professionals in the industry by way of getting the showcase performance in front of a diverse range of industry professionals who will be useful in both casting and representing recently graduated talent.

MTR 511 Music Theater Ensemble 1 Credits

The performance-based, auditioned music theater ensemble engages multiple singers/actors/dancers in performance, utilizing scenes from music theater literature as the primary material. Emphasis is placed upon group interaction and building an ensemble. This ensemble often is asked to perform for University sponsored events.

Voice Performance

Overview

The voice performance program seeks to develop the musician by establishing a sound vocal technique and a thorough understanding of the singing voice, its literature and pedagogy. These tools are essential for the study and performance of vocal and choral literature and for training students as solo performers, professional teachers or choral conductors.

Students will build and demonstrate a healthy vocal technique, become acquainted with voice literature, and develop an understanding of the complex relationships between music and poetry. They will also learn how to sing with correct diction in English, Italian, French and German, as well as to understand both the general meaning and specific nuances of their sung texts.

As they progress in the program, students will integrate musicianship skills and use their increasing understanding of musical structure and form to communicate musically, with stylistic and textual understanding. Students will also build vocal and performance skills that equip them for the demands of solo and ensemble singing.

Curriculum Overview

Every undergraduate must satisfy departmental requirements for graduation. Juries and other tests are conducted periodically for the purpose of evaluating progress; details may be obtained from the Voice Department.

Instruction for voice performance majors entails private lessons, recitals, diction, voice literature, performance/opera classes and voice pedagogy. Weekly studio and performance classes offer regular performing opportunities. Two fully-staged operas, one with orchestra, are presented each year, along with an additional undergraduate-only opera offering. Private vocal coaching is available for upperclassmen and graduate students.

The curriculum has been revised for the class entering in the fall of 2015. Current students may continue to follow their original curriculum, or adopt the new curriculum.

Notes

¹ Students must complete six semesters of foreign language study. Students must complete Italian I and II. They must complete additional semesters of either French or German. Semesters five and six may be of a third language (French or German) or additional semesters of Italian, French or German. If students are exempted from one or more semesters of foreign language study, they must replace the missing course credits with other Arts and Sciences electives.

² Attendance at weekly studio classes is required during all semesters of applied study.

³ A half recital must be presented in the junior year. A full recital must be presented in the senior year.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

CMP 125 Seminar in Writing and Research 3 Credits

Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CMP 120 or BHP 100.

CR 109 Chapel Choir 1 Credits

Comprised of undergraduate students in their first year of study, Chapel Choir focuses on music for men's, women's, and mixed chorus. The ensemble provides the fundamentals of artistic choral ensemble singing and a foundation for all Westminster choral ensembles. Placement hearing required.

CR 209 Schola Cantorum 1 Credits

Comprised of undergraduate students in their second year of study, Schola Cantorum focuses on music for mixed chorus and continues to build and refine the skills developed in Chapel Choir. This ensemble presents campus, community, and regional performances. Placement hearing required.

CR 215 Fundamentals of Conducting 3 Credits

This course provides the foundation of conducting technique and philosophy as it relates to choral ensemble. Primarily, it deals with the development of basic pedagogical proficiencies, specifically alignment, Laban gestural vocabulary, breathing, beat patterns, consistent tempo, and the development of expressive gesture for relaying various styles of music, i.e., legato, staccato and marcato. Basic philosophical understandings concerning the human aspects of the music making process and the role the conductor plays in that process also are emphasized. Specific techniques for dealing with technical elements, e.g., fermata, dynamics, changes of tempo, contrasts in style, also are covered. The overall focus of the course is to establish the important relationship between ear, body, and the choral sound.

Prerequisite(s): TH 141.

CR 509 Symphonic Choir 1 Credits

A large mixed chorus comprised of students above the lower division, including graduate students from all disciplines. The ensemble regularly performs in the region and focuses on the major choral/orchestral repertoire along with a wide variety of repertoire for large mixed chorus. Placement hearing required.

LL 141 French I 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 142 French II 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 141.

LL 145 Italian I 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 146 Italian II 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 145.

LL 151 German I 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

LL 152 German II 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 151.

LL 243 French III 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 142.

LL 244 French IV 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 243.

LL 247 Italian III 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 146.

LL 248 Italian IV 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 247.

LL 253 German III 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 152.

LL 254 German IV 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 253.

MH 247 Music Historiography I 3 Credits

Historiography I begins by exploring similarities and differences between various music cultures around the world, and continues with an examination of selected genres of Western Art Music of the Medieval, Renaissance and Baroque periods. Basic information literacy skills, such as searching library catalogs, databases and reading academic articles also will be covered.

Prerequisite(s): CMP 125.

MH 248 Music Historiography II 3 Credits

Examines Western Art Music since 1750 and includes a research assignment that builds upon the information literacy skills gained in MH 247.

Prerequisite(s): MH 247.

MH 345 Music Since 1900 3 Credits

Examines controversies and aesthetic movements in 20th and 21st century music. Emphasis is placed upon critical reading and writing skills.

Prerequisite(s): MH 248.

TH 141 Musicianship I 4 Credits

This course assists students in learning and integrating aural, performance, analytical and composition skills involving diatonic melody and harmony. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade.

Prerequisite(s): TH 045 or passing a placement test.

TH 142 Musicianship II 4 Credits

A continuation of TH 141 involving chromatic melody and harmony with an introduction to binary and ternary form.

Prerequisite(s): minimum "C-" grade in TH 141.

TH 241 Musicianship III 4 Credits

A continuation of TH 142 with an introduction to larger musical forms and counterpoint.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 342 Contemporary Trends 3 Credits

An analytical study of the compositional techniques of the 20th and 21st centuries.

Prerequisite(s): TH 241.

VC 101A Voice Primary 2 Credits**VC 114 Introduction to Lyric Diction 2 Credits**

Introduction to the International Phonetic Alphabet (IPA) and the sounds of all major sung languages through oral and written drill. Open to Voice Performance majors only.

VC 118 Italian Diction 2 Credits

Introduction to the rules for singing Italian through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 119 French Diction 2 Credits

Introduction to the rules for singing French through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 120 German Diction 2 Credits

Introduction to the rules for singing German through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 191 Movement for the Performer 2 Credits

Movement exercises and etudes help students develop proper alignment, physical freedom, unification of voice, breath, and body, and help them explore the body as an expressive instrument.

VC 201A Voice Primary 2 Credits**VC 291 The Singing Actor 2 Credits**

The introduction to vocal performance entails coaching of selected songs, arias or repertoire from music theater and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

Prerequisite(s): successful completion of Level I voice jury.

VC 301A Voice Primary 2 Credits**VC 305 Singing in Italian and French 2 Credits**

Master class and private coaching in vocal performance of Italian and French language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung Italian and French.

Prerequisite(s): Successful completion of Level I jury; VC 118, VC 119.

VC 306 Singing in German and English 2 Credits

Master class and private coaching in vocal performance of German and English language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung German and English.

Prerequisite(s): Successful completion of Level I Jury; VC 120.

VC 401A Voice Primary 2 Credits**VC 408 Voice Science 3 Credits**

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

VC 433 Song Literature I 2 Credits

A survey of solo literature for voice and accompanying instrument including solo vocal music of the Baroque period and German lieder.

Prerequisite(s): MH 248.

VC 434 Song Literature II 2 Credits

A survey of solo literature for voice and accompanying instrument including French mélodie, songs by nationalist composers, English and American song.

Prerequisite(s): MH 248.

VC 591 Performing in Lyric Theater 2 Credits

Performing in Lyric Theater offers techniques for the preparation of lyric roles in a theatrical setting. It will develop elements of stagecraft, systematize a process for preparations and exploration, and introduce the working relationship with director and conductor.

Prerequisite(s): Undergraduates, VC 291 and the successful completion of Level II jury, or permission of the Chair.

VC 592 Opera Workshop 2 Credits

Introduction to opera performance. Acting exercises, character development, dramatic exploration and musical coaching culminating in a workshop-format presentation. It is recommended that VC 491 or 691 be taken before this course. This course may be repeated for credit.

Prerequisite(s): Undergraduates, successful completion of the level II voice test or permission of the chair.

VC 593E Opera Theater (Ensemble) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593R Opera Theater (Role) 2 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593T Opera Theater (Tech) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

Web Design

Program Overview

Designing and implementing web pages and interactive media, as well as learning the secrets of effective print design and production, are the focuses of Rider's Web Design minor. Students learn about design and visual-communication theory while creating portfolios and web-based interactive resumes. In the capstone course, students work with real clients to create a web presence.

Curriculum Overview

Core classes in the minor include writing for the communication professions, publication design, multimedia production I: interactive design, advanced publication design, multimedia production II: web design and multimedia production II: advanced interactive design.

Other classes include communication theory, advanced speech, theories of persuasion, audio production, graphic imaging for multimedia and photography, 3D graphic animation, covering digital media and more.

COM 363	Converging Digital Media	
COM 365	Graphic Animation	
CIS 185	Information Systems Essentials	
CIS 220	Application Development with JavaScript and Python	
CIS 340	Electronic Commerce	
Total Credits		21

Note: Communication and Journalism majors may declare only one minor in the department. No more than two courses may be used to meet the requirements for both a major and a minor in the department. (Exception: If a student elects the Event Planning and Production minor, then three courses may be used to meet the requirements for both the major and that minor in the department.)

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits

Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits

As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits

Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits

This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment – and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits

In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits

Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits

Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits

Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits

Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.

Prerequisite(s): COM 104 or COM 290.

COM 205 Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits

Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.

Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits

Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.

Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits

Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits

Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits

Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits

Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements.

Prerequisite(s): COM 104 or COM 290.

COM 232 Podcasting I 3 Credits

Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits

Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits

Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits

Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/ reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits

The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 247 Covering the Sports Betting Industry 3 Credits

This course will introduce students to the world of covering the sports betting landscape via traditional sports media. Emphasis will be placed on learning the jargon of sports betting, learning how to break down financial reports from both states and gambling operators, how to cover legislative action on the subject. In short: Covering the world of sports betting is quickly becoming akin to covering the world of financial markets, and students wishing to pursue a career in sports media will have to know how to navigate this world going forward.

Prerequisite(s): COM 104 or COM 290.

COM 251 Interpersonal Communication 3 Credits

Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application.

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits

Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

Prerequisite(s): COM 261 or permission of instructor.

COM 263 History and Principles of Graphic Design 3 Credits

Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits

Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits

Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.

Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 292 Content for Social Media 3 Credits

Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 312 Special Topics in Journalistic Writing 3 Credits

Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.

Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits

Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.

Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits

Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.

Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GND 318. Students may not get credit for both COM 318 and GND 318.

COM 321 Stand Up Comedy 3 Credits

Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.

Prerequisite(s): COM 104: Speech Communication or COM 290: Professional and Strategic Speech.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits

Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits

Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.

Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits

This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits

Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.

Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. **Prereq(s):** COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits

In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.

Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits

Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): COM 232, COM 233, COM 234.

COM 337 Music Production for Mass Media 3 Credits

Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.

Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits

Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits

Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.

Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 348 Communication Research Methods 3 Credits

Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.

Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator.

COM 353 Nonverbal Communication 3 Credits

Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 355 Social Justice and Journalism 3 Credits

The best of American journalism is rooted in exploring issues of social justice and shining a spotlight on abuse. In this course, students will learn about the role journalism has played to expose social injustice in America by exploring powerful investigations by the mass media and also press organizations employing and representing non-white and marginalized groups. Students will examine both historical and contemporary journalism examples. The course also will include critical assessment of journalism's failings, including an exploration of the discrimination and disenfranchisement historically perpetuated by media.

COM 360 Advanced Publication Design and Presentation 3 Credits

Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.

Prerequisite(s): COM 212.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits

Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits

Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.

Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits

Offers students education in graphic animation theories, animation development techniques, and animation preparation for various multimedia applications. Emphasis is placed on the design principles in animated communication and animation techniques. The course covers the integration of static images in animation, graphic animation techniques, animation compression, animation rendering, input/output file formats, and animation delivery. The primary software for this course is Adobe Photoshop and MacMedia Flash. Students will be expected to participate in critiques of professional animation designs in order to learn to evaluate critically their own work and their fellow students' work.

Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits

Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.

Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits

Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.

Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits

Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media.

COM 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits

Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.

Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits

A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.

Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits

This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits

Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits

Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.

Prerequisite(s): COM 234.

COM 440 Cases & Campaigns in Public Relations 3 Credits

Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.

Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits

Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

COM 460 Web Design III 3 Credits

Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.

Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits

Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation. Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.

Prerequisite(s): ART 103, ART 105, COM 262, and COM 360.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Undergraduate Colleges and Schools

Originally founded in 1865 as a business college to prepare professionals for the booming post-Civil War economy, in 1959 Rider moved from Trenton to its current 280-acre campus in Lawrenceville, New Jersey. Thirty-three years later, a merger took place between Rider University and Westminster Choir College in Princeton, NJ. Considered one of the leading schools of music of its kind in the world, the merger also led to the successful integration of the theatre and dance programs at Rider University, and the college in its entirety became the Westminster College of the Arts in 2007. Housing both the School of the Fine and Performing Arts and Westminster Choir College, WCA was formed to offer select music and theatre programs on both the Princeton and Lawrenceville campuses, providing a complement to our liberal arts, sciences, education and business programs. In 2020, Westminster Choir College moved to Rider University's main campus in Lawrenceville, N.J.

In 2022, Westminster College of the Arts and the College of Liberal Arts and Sciences were combined to create the College of Arts and Sciences.

The colleges and schools within Rider University include:

- Norm Brodsky College of Business (p. 562)
- College of Education and Human Services (p. 664)
- College of Arts and Sciences (p. 750)
 - School of Science, Technology and Mathematics
 - School of Humanities and Social Sciences
 - School of Communication, Media and Performing Arts
 - School of Westminster Choir College

Norm Brodsky College of Business

A business education is for anyone who wants to develop the skills needed to turn ideas and dreams into reality. Whether it's creating your own company or rising to the top of a major corporation, the key is having the skills to make it happen.

The Norm Brodsky College of Business offers curricula at the undergraduate level leading to the degree of Bachelor of Science in Business Administration (BSBA).

Vision Statement

We will be a premier college of business known for the engaged learning of our students, the career success of our graduates, the connectedness of our network, and the impact of our academic, professional, and societal contributions.

Mission Statement

The mission of Rider University's Norm Brodsky College of Business is to provide a dynamic and innovative integrated business education within a strong community of learners, faculty teacher-scholars, and professional partners. With emphases on engaged learning, personal attention, and interaction with industry, our students are prepared to be productive, confident, and socially responsible contributors in their careers and the rapidly changing global marketplace.

Core Values

In carrying out our mission, the Norm Brodsky College of Business commits to the following core values:

Engaged Learning: Drawing connections between what is learned in the classroom with what is learned in high-impact real-world experiences

Diverse Scholarship: Blend of pedagogical, applied, and discipline-based research that enhances teaching effectiveness, and contributes to professional practice and the common good

Curricular Rigor: High standards for students in curricula based on current discipline-specific and interdisciplinary theory and practice

Career Relevance: Development of in-demand competencies including critical thinking, technology tools, oral and written communication, business analytics, teamwork, leadership, and problem-solving

The Common Good: Striving to practice and reinforce principles of social responsibility, sustainability, equity and inclusion, social justice, ethics, and societal good

Sense of Community: Opportunities to connect with, and support relationships among, students, alumni, faculty, employers, community members, and industry professionals

Entrepreneurial Spirit: A mindset that focuses on finding opportunities, overcoming challenges, maximizing resources, embracing ambiguity, innovating, improving, and taking ownership

Professional Accreditation

Rider University's Norm Brodsky College of Business programs were accredited by AACSB International—The Association to Advance Collegiate Schools of Business — in 1993 and most recently reaffirmed in 2017. In addition, the accounting program was further recognized for excellence with accreditation in accounting by AACSB International in 2000 and recently reaffirmed in 2017.

BSBA/Graduate Business Option

It is possible to apply to the graduate business program after completing 90 credits in a Rider undergraduate business degree program. Those students admitted may enter the program upon the completion of the BSBA degree. Courses waived should permit them to graduate with an

advanced degree in one year by taking the required graduate course work. See the Graduate Academic Catalog (p. 1340) for requirements for the Master of Business Administration (MBA), the Master of Accountancy (MAcc), the Master of Science in Corporate Finance, and the Master of Science in Information Systems degrees.

Students are eligible to take graduate business courses in the spring of their senior year if they are senior business majors with a minimum cumulative GPA of 3.5 for courses with the PMBA prefix and 3.3 for courses with the MACC prefix. In order to take a MACC course, a student must be an accounting major. Graduate business courses do not count toward both the undergraduate and graduate program requirements. Up to six credits of graduate-level courses may be taken and would be included in the regular full-time tuition fee.

Degree

The degree that the Norm Brodsky College of Business offers at the undergraduate level is the Bachelor of Science in Business Administration (BSBA). To receive this degree, a student must complete the core requirements (p. 564) for the college.

(For master's level work, see the Graduate Academic Catalog (p. 1335).)

Fields of Study: Majors, Minors, Concentrations and Certificates

All business undergraduate students are encouraged to select a discipline-specific or interdisciplinary major by completing the coursework of 18 to 33 credit hours required for the major.

Students who are undecided regarding an area of business specialization are enrolled as business administration majors.

A student may elect to double major, but there is no guarantee that the student will be able to complete the second major within the 120 credit hours required for graduation.

Besides majors, students may also choose to complete a minor, a concentration within the major, or a certificate.

To see the variety of programs of study that the Norm Brodsky College of Business has to offer, please visit the list of Majors, Minors and Certificates (p. 566) available.

Independent Study and Research

Students are offered opportunities for independent study in business-related areas for which formal courses are not available. Each program in the Norm Brodsky College of Business provides these opportunities during the regular semester via offerings labeled 490, Independent Research and Study. Projects may be taken by an individual or a group of students working together. Each person must submit an independent study proposal including definitive statements on the following: an elaborate, clear statement of the study's significance; the study's design and objective; the utilization and expectation of on- and off-campus resources related to the study; and method to be used to demonstrate the results of the study.

Independent study proposal requests can be obtained and approved by the appropriate chairperson and the Dean's Office. Such proposals must be submitted prior to the semester of the independent study and must include a timeline for completion.

Departments

The Norm Brodsky College of Business consists of five departments:

Department of Accounting

Dr. Evelyn McDowell, Chairperson (emcdowell@rider.edu)

Departmental Discipline:

Accounting (p. 20)

Department of Finance and Economics

Dr. Jason Chiu, Chairperson (cchiu@rider.edu)

Departmental Disciplines:

Economics (<http://catalog.rider.edu/undergraduate/colleges-schools/business-administration/majors-minors-certificates/economics/>)

Finance (p. 262)

Department of Information Systems, Analytics and Supply Chain Management

Dr. Katarina Tsakiri, Chairperson (ktsakiri@rider.edu (jtsakiri@rider.edu))

Departmental Disciplines:

Business Analytics

Global Supply Chain Management

Information Systems

Department of Management

Dr. Hee Young Kim, Chairperson (kimmgt @rider.edu (mpromislo@rider.edu))

Departmental Disciplines:

Entrepreneurial Studies (p. 234)

Health Care Management (p. 307)

Human Resource Management (p. 327)

Management and Leadership (p. 375)

Sport Management (p. 527)

Department of Marketing

Dr. Anubha Mishra, Chairperson (amishra@rider.edu)

Departmental Discipline:

Marketing

The Norm Brodsky College of Business Core Requirements

- Core Requirements Overview (p. 564)
- Business Subjects (p. 565)
- Non-business Subjects (p. 566)
- Free Electives (p. 566)

Core Requirements Overview

Students in the Norm Brodsky College of Business are required to take a core of business courses, providing them with a solid foundation in business, global perspective, and professional, technological, and data analytical skills that are essential for career success. In addition, business students are required to take general education courses in

written and oral communications and courses that provide liberal arts perspectives.

Business core courses provide students with:

- An integrative application of fundamental concepts of essential business disciplines in a business practice through an Introduction to Business course;
- A background of the concepts, processes, and institutions in the production and marketing of goods and/or services, and the financing of business enterprises or other forms of organization. This perspective is covered in such courses as Marketing Principles, Introduction to Finance, and Operations Management;
- A background of the economic and legal environment as it pertains to profit or nonprofit organizations, along with ethical considerations and social and political influences as they affect such organizations. Courses that satisfy this requirement are Principles of Macroeconomics, Principles of Microeconomics, The Legal and Ethical Environment of Business, as well as several elective courses;
- A basic understanding of the concepts and applications of accounting, quantitative methods, and management information systems, including computer applications. This area is covered through such courses as Introduction to Accounting, Managerial Uses of Accounting, Business Statistics, Information Systems Essentials, and Management Information Systems;
- A fundamental skill set to discover new insights from analyzing big data to inform an organization's operational and strategic decisions through the Introduction of Business Analytics course;
- A study of organizational theory and behavior and interpersonal communications. Course work in Fundamentals of Management and Organizational Behavior cover this area, as well as courses in composition and speech;
- A skill set of effective business written and oral communications for both individual and group workplace settings in a Business Communications course;
- A study of decision processes under conditions of uncertainty, including integrating analysis and policy determination at the overall management level. The course, Strategic Management and Policy, which serves as the capstone course, provides the necessary coverage in this area;
- An understanding of international business, necessary to engage effectively in the global economy. This area is covered by two required international business electives;
- A study of professional, development, and career management focused on individual career goals and strategies for a successful job search. A course in Career Planning covers this area;
- A study of leadership and interpersonal skills reinforced with participation in a team environment. This area is covered by a required leadership elective.

In addition to the core courses, all students in the Norm Brodsky College of Business are required to complete a program of study prescribed by the major or program in which they are enrolled. This phase of study typically begins in the junior year. Courses in the major are designed to

provide the student with a general competence in one of the principal areas of business.

All business students must successfully complete one writing-intensive, one oral presentation-intensive, and one data analytic-intensive course with at least one of their three intensive courses within their major or minor field of study. The courses that have been approved for intensive course designations are:

- Writing-Intensive Courses: BUS 300, FIN 405, MKT 460
- Oral Presentation-Intensive Courses: ACC 410, CBA 320, FIN 305, MKT 340
- Data Analytic-Intensive Courses: ACC 320, CIS 360, MKT 366, MKT 367

Students are required to have 54 semester hours completed before enrolling in most 300- or 400-level business courses.

Fifty percent of all business credits must be taken through Rider. Transfer students may bring in 30 credits from business courses plus Quantitative Methods, Business Statistics, Macroeconomics, and Microeconomics. At least half of the required credits in the area of a student's major must be taken at Rider.

All business students must have a 2.0 GPA in their major and overall to graduate.

Program-Level Learning Competencies

- Communicate effectively in writing about business topics in a concise, informative, and well-researched manner;
- Communicate effectively orally about business topics using appropriate media in a manner that is informative as well as persuasive;
- Apply ethical understanding and reasoning to address ethical issues that arise in business contexts in a socially responsible manner ;
- Work effectively with others in a team environment, in person, and/or virtually;
- Use current technologies in the business environment;
- Apply analytical skills in the business environment;
- Integrate knowledge of business theories, concepts, and principles to conduct a critical analysis of business practice.

Free Electives

The minimum requirements in business and non-business subjects normally leave a student needing an additional 24 credits that must be completed to satisfy the 120 required for graduation.

Accounting, Actuarial Science, Business Analytics, Global Supply Chain Management, Health Care Management, Human Resource Management, Information Systems, Marketing, and Organizational Psychology majors have a reduced number of free elective credits due to the additional major requirements.

Free elective credits may be used to fulfill the International Business Elective requirement. Courses from a second major or a minor may also be used to fill free elective credits.

Free elective credits may be taken in any discipline at Rider, provided the student meets the requirements imposed by the department or program offering the course.

Majors, Minors and Certificates

The programs below are offered through the Norm Brodsky College of Business. Some offerings are restricted to Continuing Education Program students only and are indicated with the CEP designation.

Accounting

Program Overview

Rider's accounting program is designed to build professionals. The B.S.B.A. in accounting provides students with the skills and knowledge needed for careers with corporations, public accounting firms, and governmental organizations.

Accounting majors learn in the classroom, through co-op and internship positions, and through ongoing networking opportunities with accounting executives.

Student Learning Outcomes:

An accounting graduate will:

- demonstrate an ability to apply knowledge of fundamental U.S. accounting, auditing and tax techniques and standards to accounting problems;
- demonstrate effective oral communication and presentation skills;
- demonstrate effective written communication skills;
- demonstrate proficiency in the appropriate application of relevant information technology skills for professional tasks;
- demonstrate basic professional skills for problem-solving and critical thinking;
- demonstrate an ability to research accounting, auditing and tax issues;
- demonstrate an understanding of the importance of ethics in the accounting profession and the ability to apply ethical reasoning to accounting decision making.

Curriculum Overview

The B.S.B.A. accounting curriculum prepares students for a variety of career paths in the dynamic field of accounting. The curriculum emphasizes technical knowledge, professional development, written and oral communication, information technology, ethics and global perspectives.

The B.S.B.A. program has an active co-op and internship program in which students work in paid positions during the semester or summer and earn academic credit for the program. Both the co-op and internship can be completed within the four year program and often lead to full-time employment. The B.S.B.A. also offers a business forensic concentration.

Students who want to pursue **CPA certification** can meet the 150 hour requirement for CPA licensure by double majoring in the B.S.B.A. program or by continuing in the **4+1 Master of Accountancy (MAcc) program**.

Undergraduate accounting majors are encouraged to work closely with their advisor to select courses which will best address their career and certification plans. Students should consult the specific certification requirements of the state jurisdiction in which they plan to become certified and plan accordingly. To learn more about individual state requirements for CPA licensure see [www.nasba.org](http://www.nasba.org/exams/cpaexam/).

Master of Accountancy (4 + 1 MAcc Program)

The 4+1 MAcc program is the fastest growing program in the Norm Brodsky College of Business. The MAcc prepares students for CPA licensure and allows for an area of specialization. Students may enter the program directly from the B.S.B.A. program, and for students with overall and accounting GPA of 3.0, the GMAT requirement for admission is waived. The MAcc can be completed on either a full-time or part-time basis.

Accreditation Information

The accounting program is one of less than 3% of accounting programs worldwide to hold the prestigious AACSB business and accounting accreditation. The accounting faculty are committed to continuous improvement in curriculum, faculty and student preparation.

Degrees Offered

- B.S.B.A. in Accounting
- Master of Accountancy (fifth year program, 4+1)

ACC 400	Principles of Auditing	3
ACC 405	Acct Problems & Practice	3
ACC 410	Fund of Federal Taxation	3
BUS 210	Intro to Law: Contracts	3
FIN 308	International Finance	3
Total Credits		27

Students who plan to take the CPA exam may, with the Department Chair's permission, take MACC 658 Governmental and Not-for-Profit Accounting during their senior year. These credits may be used to fulfill the 120 undergraduate credit requirement. Students who are not entering into the MAcc but plan on taking the CPA test are allowed to take MACC 658 as part of the undergraduate program. The student will need to have an overall and accounting GPA of 3.3.

Students desiring to become certified public accountants (CPAs) will be required to have 120 credit hours of education to take the CPA exam and have completed 150 credit hours of education for licensure. Rider accounting majors may graduate after four years (120 credit hours) or seek to achieve the additional credit hours directly through admission to the Master of Accountancy (MACC) program at the University. It is possible to apply to the MACC program at Rider after completion of 90 credit hours. (Please consult the Rider University Graduate Academic Catalog for details on the MACC program (p. 1352).) Undergraduate accounting majors are encouraged to work closely with their advisor to select courses that will best address their career and certification plans. Students should consult the specific certification requirements of the state jurisdiction in which they plan to become certified and plan accordingly.

Students majoring in accounting must receive a grade of at least "C-" in a prerequisite course for any advanced course in accounting, and must have a cumulative average of at least 2.0 in the major.

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

¹ Students must take four Liberal Arts Electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Liberal Arts and Sciences.

² Choose from LDP 398 The Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service Learning Through Minding Our Bus, MGT 355 Team Management, or MGT 363 Management Skills.

Students taking ACC 399 The Co-Operative Experience are required to take LDP 398 The Co-op Experience Seminar during the co-op semester.

³ CIS 185 Information Systems Essentials and CBA 110 Introduction to Business can be taken in the Fall or Spring of Year 1.

⁴ Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

NOTES

- **Business Fraud and Forensic Concentration:** Students should take ACC 325 Fraud Examination and Business Forensics in the spring of sophomore year, ACC 321 Internal Auditing in the fall of junior year, and ACC 450 Business Forensic Application in the spring of senior year.
- **CPA Licensure Requirements for Students Not Entering the MAcc:** Students should also work with their academic advisor to plan the additional 30 credits.
- Students are required to take FIN 308 International Finance as one of the required International Business Electives, as well as BUS 210 Intro to Law: Contracts.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., Internship, Co-op, Study Tour, study abroad, ENT 448 Seminar in Small Business Consulting, ECO 450 Seminar in Economic Research).
- Students working co-op positions in the spring of their third year will substitute ACC 399 (6 credits of free electives) for MSD 301 and one liberal arts elective. MSD 301 and the liberal arts elective must be taken in another semester.

3 Year Academic Plan of Study

The following educational plan is provided as a sample only. NOTES

- The above plan assumes no AP or other credits were transferred into Rider University.
- Students are required to take 6 credits of International Business Electives. One of the courses must be FIN 308 International Finance.
- Business Honors students will have a different sequence.
- For the Leadership Elective, choose from LDP 200 Foundations of Leadership, LDP 220 Service Learning Through Minding Our Bus, LDP 398 The Co-op Experience Seminar, MGT 355 Team Management, or MGT 363 Management Skills.
- It is strongly suggested that students complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448 Small Business Consulting Sem, ECO 450 Seminar in Economic Research).
- Students are required to take FIN 308 International Finance as one of the required International Business Electives, as well as BUS 210 Intro to Law: Contracts.

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

ACC 220 Managerial Uses of Accounting 3 Credits

This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.

Prerequisite(s): ACC 210.

ACC 302 Cost Management 3 Credits

This course focuses on firm strategy and the role managerial accounting information plays in the decision making process. Topics include the balanced scorecard, the value chain, product life cycles, target costing, theory of constraints, strategic pricing, management and control of quality cost systems, traditional and activity-based costing, cost control, standard costs and variances, and capital budgeting.

Prerequisite(s): ACC 220 and CIS 185.

ACC 310 Acct Theory & Concepts I 3 Credits

This is the first upper-level course in a sequence in financial accounting courses. Topics include the conceptual framework, and standard setting process followed by application and evaluation of generally accepted accounting principles including content, and structure of financial statements, present value concepts, current assets, current liabilities, property, plant, and equipment, intangible assets and non-current liabilities are studied. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): ACC 210 and ACC 220.

ACC 311 Acct Theory & Concepts II 3 Credits

This course is a continuation of ACC 310. Topics include long-term investments, stockholders' equity, earnings per share, interperiod income tax allocation, accounting changes, revenue recognition, pensions, leases and cash flow analysis. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): ACC 310.

ACC 320 Accounting Info Systems 3 Credits

This course provides an introduction to accounting information systems and enterprise-wide, process-focused information systems. Topics include quality of data for decision usefulness, internal control concepts and documentation tools, and database theory and applications.

Prerequisite(s): ACC 220 and CIS 185.

ACC 321 Internal Auditing 3 Credits

This course provides an introduction to the internal audit profession, including understanding the nature and activities associated with the internal audit process. Topics include: international auditing standards, risk assessment including internal control system evaluation, business processes, and the relationship of management and employee fraud to the internal audit process.

Prerequisite(s): ACC 220.

ACC 325 Fraud Examination and Business Forensics 3 Credits

This course provides an introduction to the prevalence of fraud in all forms of business, including the many methods used by employees and managers to perpetrate fraud. Topics include: the motivation of individuals to commit fraud, various types of fraud schemes perpetrated in the workplace, as well as the various tools and techniques that are used to investigate, detect and prevent fraud.

Prerequisite(s): ACC 210.

ACC 399 The Co-Operative Experience 6 Credits

This course provides the student with a semester long supervised employment with participating companies. Students are evaluated periodically by senior staff members of the participating firms and required to complete a work journal, self-assessment and reflection paper. Eligible students include junior and senior accounting majors with a minimum GPA of 3.0 in accounting coursework. Co-op credits can be applied toward business or free elective requirements. Grading is on a pass/fail basis.

Prerequisite(s): ACC 210, ACC 220, and ACC 310 and permission of department chairperson.

ACC 400 Principles of Auditing 3 Credits

This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.

Prerequisite(s): ACC 310.

ACC 405 Acct Problems & Practice 3 Credits

This course provides additional coverage of financial reporting issues and procedures. Topics include business combinations, consolidated financial statements, foreign currency translation, the effects of diversity across countries, disclosure and SEC reporting issues. Governmental and not-for-profit accounting standards are also covered.

Prerequisite(s): ACC 311.

ACC 406 Integrative Professional Capstone 3 Credits

This course provides an integrative experience that applies financial statement and data analysis tools to a variety of accounting settings. Topics include issues of ethics and professionalism and linkages between accounting methods and company policy, equity valuation, bond ratings and other decision areas.

Prerequisite(s): ACC 405 or permission of department chairperson.

ACC 410 Fund of Federal Taxation 3 Credits

This course provides fundamental federal tax concepts applicable to individuals, partnerships, corporations, estates, and gifts. Topics are considered from a tax compliance and planning perspective. Preparation of individual and corporate tax returns is also included.

Prerequisite(s): ACC 311 with a minimum grade of D or ACC 311P with a minimum grade of D or VL03 with a score of WV.

ACC 410P Fund of Federal Taxation - PM 3 Credits

This course provides fundamental federal tax concepts applicable to individuals, partnerships, corporations, estates, and gifts. Topics are considered from a tax compliance and planning perspective. Preparation of individual and corporate tax returns is also included.

Prerequisite(s): ACC 311 or ACC 311P. Restricted to students in the MAcc program.

ACC 450 Business Forensic Application 3 Credits

This course provides an opportunity to perform complex investigative cases and analyses, thus demonstrating mastery of the knowledge and skills required to be effective forensic professionals. The course covers how to manage and present digital and technical evidence gathered for forensic litigation cases, including the ability to be an expert witness in court.

Prerequisite(s): ACC 325 and ACC 321.

ACC 490 Independent Research and Study 3-4 Credits

Topic to be approved by professor and department chairperson. Available to juniors and seniors.

ACC 491 Accounting Internship 3 Credits

This course provides the student with approximately two months of supervised employment with participating companies. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a term paper. Eligible students include junior and senior accounting majors with a minimum GPA of 3.0 in accounting coursework. Upon completion of course, a letter grade will be awarded.

Prerequisite(s): Permission of department chairperson.

BUS 210 Intro to Law: Contracts 3 Credits

An introduction to the origin of current law, with emphasis on the development of business law, students are exposed to legal terminology and acquainted with the system of application of rules of law to actual situations. The laws of contracts, particularly common-law developments, are considered in great detail.

FIN 308 International Finance 3 Credits

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

Prerequisite(s): FIN 220.

Actuarial Science

Program Overview

In a world of uncertainty, actuaries use mathematics, statistics and computer software to assess and manage financial risk. Considered the backbone of the insurance and financial security industries, actuarial science is a highly regarded field that businesses and government rely on to improve forecasting and decision-making.

Actuarial Science graduates can pursue rewarding careers as actuaries, analysts, consultants, underwriters, brokers, and senior executives with national and regional industry leaders in consulting, health care, insurance, and finance.

Student Learning Outcomes

Students graduating from the Actuarial Science program will be able to

- Be prepared to take the Society of Actuaries (SOA) exams required for employment in the actuarial science profession.
- Demonstrate the proficiency in all three Validation by Educational Experience (VEE) requirements by SOA.
- Write technical reports and make technical presentations containing statistical and actuarial results.
- Apply statistical methods using relevant software to solve real world problems.
- Gain the foundation in finance, mathematics, statistics, and other related fields to continue their study for and take additional SOA exams to advance their career.

Curriculum Overview

The BSBA actuarial science curriculum provides students with a strong foundation in mathematics, statistics, finance, and other key business principles to prepare students for multiple actuarial exams and other requirements to achieve professional certification through the Casualty Actuarial Society (CAS) (<http://www.casact.org/>) or the Society of Actuaries (SOA). (<https://www.soa.org/Member/>)

Besides specialized knowledge, the skills developed and honed through the curricular and co-curricular activities include keen analytical and problem solving skills, solid oral and written communication skills, and strong computer skills.

In addition, students will develop business acumen and leadership qualities through the business core and leadership requirements.

Degree Offered

³ Instructor approval needed to take MTH 212 concurrently.

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

ACC 220 Managerial Uses of Accounting 3 Credits

This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.

Prerequisite(s): ACC 210.

ECO 200 Principles of Macroeconomics 3 Credits

A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ECO 201 Principles of Microeconomics 3 Credits

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are re explored in the light of price theory. The role of the United States in the world economy is explored.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

Prerequisite(s): ACC 210 and ECO 201.

FIN 307 Financial Markets & Institutions 3 Credits

This course provides an introduction to the organization and behavior of financial markets and institutions in the economy. The factors determining security prices and interest rates in the money and capital markets are analyzed. An overview of all major financial institutions is presented. In addition, market returns, the regulatory environment, and monetary policy are examined.

Prerequisite(s): FIN 220 or concurrent with FIN 220.

FIN 308 International Finance 3 Credits

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

Prerequisite(s): FIN 220.

FIN 309 Intermediate Corporate Finance 3 Credits

This course builds on and extends the concepts of financial management learned in FIN 220. The course examines long-term corporate financing and investment decisions and how those decisions interface with each other. Topics covered include: cost of capital, financial planning and analysis, capital budgeting, capital structure and dividend policy.

Prerequisite(s): FIN 220.

FIN 312 Investments 3 Credits

The fundamentals of investing in stocks, bonds, and other negotiable instruments are covered. Major topics include trading on securities markets, mutual funds, international investing, margin accounts, short sales, determinants of securities prices, and investment risks. Stock options, financial futures, convertible securities, and implications of taxes on investment decisions are also discussed.

Prerequisite(s): FIN 220.

FIN 340 Risk Management 3 Credits

This course examines the risk management process as applied to the firm as a whole. It integrates the management of all risks facing the firm: strategic, financial, hazard, and operational. Techniques for identifying risk, measuring and analyzing it, and selecting an appropriate treatment will be explored.

Prerequisite(s): FIN 220.

FIN 360 Fixed Income and Derivatives 3 Credits

This course centers on the quantitative portion of the Chartered Financial Analyst (CFA) level 1 curriculum, which includes materials on fixed-income risk and return, fundamentals of risk analysis, derivative instruments and risk management applications of option strategies. The goal is to help students prepare for the exam, as well as introduce them to a variety of topics in finance.

Prerequisite(s): FIN 312.

HTH 336 Economics of Health Care System 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

MSD 320 Statistics for Risk Modeling I 3 Credits

This is the first course in a two course sequence to prepare actuarial science students for the Society of Actuaries' (SOA) new exam "Statistics for Risk Modeling." This course (SRM I), together with the second course of the sequence SRM II, cover all the topics in the SOA's proposed syllabus for the exam. The course covers two major topics: (i) Generalized Linear Models, and (ii) Regression-based time series models and forecasting.

Prerequisite(s): MSD 205 or MTH 341.

MSD 325 Statistics for Risk Modeling II 3 Credits

This is the second course in the two course sequence to prepare actuarial science students for the Society of Actuaries (SOA) new exam "Statistics for Risk Modeling." This course, together with MSD 320, will cover all the topics in the SOA's proposed syllabus for the exam. This course examines the use of statistical learning methods to adequately model and understand complex datasets in business and economics. The use of the statistics software R to analyze realistic data sets is an important component of the course. Topics include: (i) Basics of Statistical Learning; (ii) Principal Components Analysis; (iii) Decision Trees; and (iv) Cluster Analysis.

Prerequisite(s): MSD 205 or MTH 341 or equivalent course.

MSD 350 Financial Mathematics 3 Credits

A thorough treatment of the theory and applications of compound interest. Topics include the measurement of interest, elementary and general annuities, amortization schedules and sinking funds, and bonds and other securities.

Prerequisite(s): MSD 205 or equivalent. Fall.

MTH 210 Calculus I 4 Credits

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 or MTH 106 with a grade of C or higher.

MTH 211 Calculus II 4 Credits

The definite integral, differentiation of transcendental functions, methods of integration and approximate integration, determination of area, volume, and surface area.

Prerequisite(s): MTH 210 with a grade of C or higher.

MTH 212 Calculus III 4 Credits

Infinite series; functions of two and three variables, vectors and tangent planes, partial derivatives, multiple integrals, determination of volume and density.

Prerequisite(s): MTH 211 with a grade of C or higher.

MTH 240 Linear Algebra 3 Credits

Systems of linear equations; vector spaces; linear independence; determinants; orthogonality; linear maps; eigenvectors.

Prerequisite(s): MTH 210 or as corequisite; sophomore standing; or permission of instructor.

MTH 340 Probability & Statistical Analysis I 3 Credits

Theory of sets and probability; discrete and continuous random variables and probability distributions. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite(s): MTH 212 or MSD 111.

MTH 341 Probability & Statistical Analysis II 3 Credits

Continuation of MTH 340. Foundations of mathematical statistics: normal distributions, estimation, confidence intervals and hypothesis testing; topics chosen from student's t- test, chi-square tests, analysis of variance and regression analysis. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite: MTH 340. Spring.

Business Administration B.S.B.A.

Program Overview

Rider's business administration major provides students with a general business focus, and is ideal for students who do not want to concentrate in a particular functional area, but instead intend to pursue one of the following goals:

- attend graduate school, such as law school or a MBA or Ph.D. program;
- enter a management training or marketing program with a future employer;
- enter a family business or start a new one.

Student Learning Outcomes

A business administration graduate will demonstrate the ability to:

- define the concepts of corporate social responsibility and business ethics;
- construct organizational strategies for implementing an effective ethics program for an organization;
- use oral communication effectively in a professional setting;
- use written communication effectively in a professional setting;
- apply a broad base of knowledge and skills that are necessary for a career in business;
- explain the impact that businesses and stakeholders have on one another in a given business enterprise.

Curriculum Overview

The Business Administration major requires completion of 18 credit hours of upper-level business courses across a variety of disciplines, including: economics, finance, management, and marketing. For graduation students must achieve an overall GPA of 2.0 in the major. Business Administration majors may not count more than six credit hours toward a second major, with the exception of International Business. Students majoring in Business Administration can count up to nine credit hours toward the International Business major.

¹ Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.

² For the Leadership Elective, choose from LDP 200, LDP 220, LDP 398, MGT 355, or MGT 363.

³ Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit course.

⁴ CIS 185 Information Systems Essentials and CBA 110 Introduction to Business can be taken in the Fall or Spring of Year 1.

Notes:

- The Plan assumes no AP or other credits were transferred into Rider University.

- Students are required to take 6 credits of International Business Electives which can be fulfilled as major courses or as free elective courses.
- Business Administration majors are required to take an upper level ECO Elective, an upper level FIN Elective, an upper level HRM/MGT Elective, an ADV/MKT Elective, and 6 credits of additional upper level business electives for a total of 18 credits.
- Business Honors students will have a different sequence.
- It is strongly suggested that students complete a credit-bearing experiential course (e.g., Internship, Co-op, Study Tour, Study Abroad, ENT 448, or ECO 450.)

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

ACC 220 Managerial Uses of Accounting 3 Credits

This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.

Prerequisite(s): ACC 210.

BDA 201 Introduction to Business Analytics 3 Credits

This course introduces students to the process of analyzing big data and discovering new information to support business decision making. The course covers descriptive, predictive, and prescriptive analytics. Some topics covered include data visualization, data forecasting, and data mining. This course provides students with the fundamental concepts and tools needed to understand the role of business analytics in organizations and shows students how to apply basic business analytics tools in a spreadsheet environment. It also includes how to communicate with analytics professionals to effectively use and interpret analytic models and results for making better business decisions. Emphasis is given on applications, concepts and interpretation of results. Students utilize Excel for data analysis.

Prerequisite(s): MSD 205 or MSD 200.

BUS 300 The Legal and Ethical Environment of Business 3 Credits

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

Prerequisite(s): 54 credits.

BUS 400 Strategic Mgmt and Policy 3 Credits

This capstone course for seniors in business administration provides a framework for problem identification, analysis, and decision making within the organization. Students are given the opportunity to integrate and apply previously acquired knowledge of accounting, decision sciences, economics, finance, marketing, management, and statistics. Case studies, critical incidents, and other appropriate techniques are utilized.

Prerequisite(s): 84 credits, CIS 185, ACC 210, ACC 220, MKT 200, MGT 201, FIN 220 or FIN 300, MSD 340 or MSD 301, BUS 300, CIS 385 or or GSC 385.

CBA 110 Business in Action 3 Credits

This course will provide students with the opportunity to develop a foundational understanding of the business environment and various business functions. Students will be introduced to core concepts in accounting, e-business, finance, human resource management, information technology, macroeconomics, management, marketing, and production and operations management. In addition, the student will have ample opportunity to improve his/her communication and teamwork skills, as well as further develop problem-solving, analytical, and decision-making abilities through a Business in Action project.

CBA 212 Business Communications 3 Credits

Good communication is a vital skill in any environment where interpersonal interaction occurs. Communication skills do not, however, come naturally to everyone. This course introduces students to skills, practices, and strategies that will help them effectively communicate in the workplace and highlights the value of carefully documenting interactions between client and vendor. Students will engage in developmental activities intended to help them learn key aspects of communication, including, but not limited to: different formats of business writing (e.g., executive summaries, client and corporate correspondence, email messages, memos, reports, etc.); visual aids and presentations; active listening; small group facilitation; professional presence; and establishing credibility. Deliverables will include written documents and oral presentations, both individually and in teams. These skills cut across all disciplines and are qualitative tools that enhance overall career development.

Prerequisite(s): CMP 120 or BHP 100, and CMP 125 or BHP 150, and CBA 110 or CBA 110 with a score of WV.

CBA 236 Career Planning 3 Credits

How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this course. The meaning of work and the development of careers are discussed, and careers are examined in the context of important changes occurring today in the world of work. Students undertake self-assessments, learn career search strategies and resources, and enhance resume and interviewing skills to maximize their career preparation.

CIS 185 Information Systems Essentials 3 Credits

This course will provide students with a conceptual understanding and hands-on practice developing spreadsheets, creating effective visualizations, and utilizing relational databases. Students will also be expected to complete a project related to a current technology-related topic. At the completion of this course students will be able to apply the appropriate information systems technology tools (specifically spreadsheets, visualization applications, and relational databases) to a variety of problem solving activities.

CIS 385 Management Information Systems 3 Credits

This course will enhance students' digital dexterity and familiarity with existing and emerging information technologies, emphasizing skills of abstraction in relation to digital strategy and organizational change, innovation, analytics, and ethics. This course will also provide hands-on experience with at least one essential business technology. At the completion of the course, students will have an understanding of the business-related, policy, societal, and ethical implications associated with modern information systems.

Prerequisite(s): CIS 185 and junior or senior standing.

CMP 120 Seminar in Writing and Rhetoric 3 Credits

Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. The second of the department's three-course composition sequence, This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

CMP 125 Seminar in Writing and Research 3 Credits

Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CMP 120 or BHP 100.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

ECO 200 Principles of Macroeconomics 3 Credits

A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ECO 201 Principles of Microeconomics 3 Credits

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

Prerequisite(s): ACC 210 and ECO 201.

MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

Prerequisite(s): minimum 30 credits completed.

MKT 200 Marketing Principles 3 Credits

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

Prerequisite(s): 15 credits.

MSD 105 Quantitative Methods for Business 3 Credits

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 205 Business Statistics 3 Credits

This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.

Prerequisite(s): MSD 105.

MSD 301 Operations Management 3 Credits

This course introduces students to the concepts and techniques necessary to manage firm operations. The course emphasizes enhancing students' ability in problem-solving and decision-making by (1) identifying operations problems, (2) structuring decision-making process, (3) evaluating options that provide resolution of the problems using appropriate and proven techniques. It is well recognized that today's global business competition is among supply chains. Operations management concentrates on the supply side of the corporate strategy of a supply chain, where the bulk of the organization resources are committed. Good management of operations, which may also be called management of supply chain operations, is crucial in achieving an effective supply chain. The emphasis on systematic thinking and analytic decision model discussed the course will also provide students with necessary skills and useful tools in the emerging field of Business Analytics.

Prerequisite(s): MSD 200 or MSD 205 or MTH 341.

Business Analytics

Program Overview

Due to technological advancements and exponential growth in data, businesses are increasingly relying on the use of analytics to create new opportunities, address business challenges and outperform their peers. Companies such as Google (Alphabet), Facebook (Meta), Amazon, Netflix, and LinkedIn rise above their competition through continual innovations driven by actionable business insights uncovered from analyzing their data. With the increasing demand for professionals who are capable of sifting through zettabytes of data to uncover insights and find business value, there is a shortage of talent in the analytics space.

Student Learning Outcomes

A business analytics graduate will demonstrate the ability to:

- formulate a business problem through developing a hypothesis;
- apply various descriptive, predictive, and prescriptive analytics techniques;
- implement all steps in the business analytics (BA) process (e.g., CRISP-DM);
- convey the results of analytics through visualization, oral, and written communication;
- apply information technology knowledge and domain-specific business knowledge to solve a business analytics problem (e.g. Marketing);
- apply ethical, socially responsible, and global perspectives in business analytics projects and/or processes.

Curriculum Overview

The structure of the program consists of six required courses and two elective courses. The six required courses provide core data analytics skills that are ubiquitously applicable for all analytics professionals. The two electives provide various track options that allow students to customize their program of study based on their choice of career path and interest in a specific industry or a business functional area.

Another key feature of the program is its emphasis on experiential learning through course projects embedded in multiple required courses

and a practicum/capstone course that gives students the opportunity to apply their analytical skills to solve a real business problem and to communicate their findings to real-world clients.

Degree Offered

- B.S.B.A. in Business Analytics
- Minor in Business Analytics

Business Analytics Major Requirements

(24 credits)

Code	Title	Credits
Complete the following required courses:		
BDA 205	Introduction to Visual Data Analytics	3
BDA 355	Business Analytics with Python	3
BDA 398	Business Data Analytics Practicum	3
CIS 330	Database Systems	3
CIS 350	Practical Business Analytics with Excel	3
CIS 360	Data Mining	3
Select two courses from one of the following tracks:		6
Accounting Track		
ACC 302	Cost Management	
ACC 320	Accounting Info Systems	
Marketing Track		
MKT 366	Marketing Research	
MKT 367	Marketing Web Analytics	
Finance Track		
FIN 312	Investments	
FIN 315	Financial Modeling	
FIN 360	Fixed Income and Derivatives	
Programming Track		
CIS 200	Application Development with JavaScript	
CIS 220	Application Development with JavaScript and Python	
Applied Statistics Track		
MSD 320	Statistics for Risk Modeling I	
MSD 325	Statistics for Risk Modeling II	
Global Supply Chain Management Track		
GSC 115	Introduction to Global Supply Chain Mgt.	
GSC 235	Supply Chain External Focus: Customer and Supplier Logistics	
GSC 355	Supply Chain Internal Focus: Firm Operations	
Health Care Management Track		
ECO 450	Seminar in Economic Research	
HTH 215	Population Health Care Management	
Sport Analytics Track		

SPT 250	Introduction to the Business of Sports	
SPT 322	Sports Analytics	
Total Credits		24

Notes:

- Only two CIS courses may count towards both the Information Systems Major and the Business Analytics Major.
- Students majoring in Business Analytics are permitted to count a maximum of three courses toward a second major of Global Supply Chain Management.

Business Analytics Minor Requirements

(15 credits)

The Minor in Business Analytics is open to all Rider students.

Code	Title	Credits
Prerequisite Courses		
CIS 185	Information Systems Essentials ¹	3
MSD 205	Business Statistics ²	3
Required Courses		
CIS 330	Database Systems	
CIS 350	Practical Business Analytics with Excel	
CIS 360	Data Mining	
Select two of the following:		
ACC 320	Accounting Info Systems	
BDA 205	Introduction to Visual Data Analytics	
BDA 355	Business Analytics with Python	
ECO 450	Seminar in Economic Research	
FIN 315	Financial Modeling	
HTH 215	Population Health Care Management	
MKT 366	Marketing Research	
MKT 367	Marketing Web Analytics	
MSD 320	Statistics for Risk Modeling I	
MSD 325	Statistics for Risk Modeling II	
Total Credits		15

¹ Business students pursuing the Business Analytics Minor are advised to take GSC 385 in lieu of CIS 385 for their business core.

² For non-business students, the following courses may be used as a substitute for MSD 205: MTH 120, ENV 200, PSY 105, PSY 201, or POL 230.

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

² Students are required to take six credits of International Business Electives.

³ Select from LDP 200, LDP 220, LDP 398, MGT 355, or MGT 363.

Notes:

- The above plan assumes no AP or other credits transferred into Rider University.
- Business Honors students may have a different course sequence.
- Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.
- It is strongly suggested that students complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448, ECO 450).

Courses and Descriptions

BDA 201 Introduction to Business Analytics 3 Credits

This course introduces students to the process of analyzing big data and discovering new information to support business decision making. The course covers descriptive, predictive, and prescriptive analytics. Some topics covered include data visualization, data forecasting, and data mining. This course provides students with the fundamental concepts and tools needed to understand the role of business analytics in organizations and shows students how to apply basic business analytics tools in a spreadsheet environment. It also includes how to communicate with analytics professionals to effectively use and interpret analytic models and results for making better business decisions. Emphasis is given on applications, concepts and interpretation of results. Students utilize Excel for data analysis.

Prerequisite(s): MSD 205 or MSD 200.

BDA 205 Introduction to Visual Data Analytics 3 Credits

This course will equip the students with the fundamental skills to perform visual data analytics. Students will learn how to prepare a dataset for visual analysis, create basic and advanced visualizations using Tableau, and “tell a story” using data visualization. At the completion of the course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience.

Prerequisite(s): CIS 185 and BDA 201.

BDA 355 Business Analytics with Python 3 Credits

Python has become essential for data analysis in recent years. Research shows that Python is the most popular and growing programming language for business analytics mainly because it is flexible, easy to learn, easily accessible due to its open-source nature, and well supported by plenty of useful analytics libraries since it is heavily used in industry and academy. This course provides students with the required knowledge of working with popular Python data analytics libraries such as Pandas, NumPy, Matplotlib, SciPy, and Scikit-Learn as well as basic programming with Python such as Python syntax, data structure, conditional statements, and functions. Some topics covered include data retrieval and manipulation with Pandas (Python's most popular library for data analytics) and SQL, data visualization with Matplotlib, statistical distributions with NumPy, hypothesis testing with SciPy, and multiple regression with Scikit-Learn.

Prerequisite(s): BDA 201.

BDA 360 Optimization and Simulation 3 Credits

This course is designed to provide undergraduate students with the current knowledge and practice of optimization and simulation in business analytics. Optimization is an area in business analytics that finds the optimal, or most efficient, way of using limited resources to achieve the objectives of an individual or a business. Simulation is a technique that measures and describes various characteristics of the bottom-line performance measure of a model when one or more values for the independent variables are uncertain. The main focus of this course will be on developing modeling skills by using Excel (and Analytic Solver add-on) to gain insights into a wide variety of business decision problems. First, they will learn how to analyze the problem and choose an appropriate optimization/simulation method. Next, they learn how to formulate the problem in a format that can be implemented in a spreadsheet. Then, they will be taught to use Excel with add-on to solve the problem. Once the results are obtained, the students will be trained to interpret them and conduct sensitivity analyses. Eventually, the students are required to make a recommendation to managers after considering some implementation issues.

Prerequisite(s): BDA 205.

BDA 398 Business Data Analytics Practicum 3 Credits

This course develops and sharpens the skills for a successful career in analytical business consulting, such as analysis, critical thinking, presentation, problem solving, and teamwork. This class will develop skills in each of these areas through discussion of the principles underlying best practices and feedbacks in a series of applied exercises and cases that will prepare students to obtain and succeed in analytical business consulting problems. The students will analyze the data provided by professionals from experts in the field, and they will present the project at the end of the semester.

Prerequisite(s): BDA 205; MSD 201 Statistical Methods II; Junior or Senior Standing; Completion of 12 credit hours in business analytics coursework or Permission of Instructor.

BDA 399 The Co-Operative Experience 6 Credits

This Co-Operative Experience will provide Business Analytics majors with supervised employment (approximately four months), where the students will have an opportunity to apply what they have learned in their business analytics and other business classes.

Prerequisite(s): Business Analytics major, Junior or Senior standing, GPA of 3.0 or above.

BDA 491 Business Data Analytics Internship 3 Credits

This Internship course will provide Business Analytics majors students with supervised employment (approximately two months), where the students will have an opportunity to apply what they have learned in their business analytics and other business classes.

Prerequisite(s): Business Analytics major, Junior or Senior standing, GPA of 2.75 or above.

CIS 330 Database Systems 3 Credits

This course involves the study of computer databases. Major topics include relational databases, use of the structured query language (SQL) to query relational databases, and design and maintenance of relational databases.

Prerequisite(s): CIS 185.

CIS 350 Practical Business Analytics with Excel 3 Credits

This is a required course for the Business Analytics major/minor. This course will provide the student with an opportunity to gain proficiency in analyzing and visualizing data using Excel. The learning experience includes not only classic data tools, such as PivotTables, VLOOKUP, and data visualization, but also more advanced data tools such as descriptive statistics, inferential statistics, predictive analytics, and optimization using Excel Solver.

Prerequisite(s): BDA 201.

CIS 360 Data Mining 3 Credits

This course deals with modern technologies for data analysis. Hands-on exercises for data retrieval, data visualization and predictive analytics will be carried out using up-to-date methodologies and software tools. The full data mining life cycle will be covered from recognizing business problems and opportunities amenable to data mining analysis through deploying and monitoring solutions.

Prerequisite(s): CIS 185 with a minimum grade of D .

Entrepreneurial Studies

Program Overview

Rider entrepreneurial studies (ES) students develop the skills and knowledge needed to become independent, innovative and informed entrepreneurs. Entrepreneurs look at the world differently, and see opportunity where others do not. The programs emphasize practical experience and holistic thinking, encourage students to develop their own business concepts, and enhance analytical skills through experiential classes.

Entrepreneurs and small businesses are the engines for job creation and economic growth. Career opportunities for entrepreneurial students are as boundless as their creativity, imagination and work ethic. Many employers value students with an entrepreneurial attitude and their ability to think outside the box.

The ES program has two key learning objectives. First, encourage entrepreneurial thinking among students. This entails the ability to recognize, evaluate and pursue opportunities. Second, build professional skills relevant for starting and/or managing a venture. These include research, business planning, and understanding functional aspects of small business management and operations.

Student Learning Outcomes:

An Entrepreneurial Studies graduate will demonstrate the ability to:

- Evaluate entrepreneurial opportunities in the marketplace;
- Assess the business viability of an idea using secondary research;
- Use primary research to create a minimum viable product ;
- Articulate how to manage and grow an entrepreneurial venture;
- Create a business plan.

Curriculum Overview

Rider entrepreneurial studies students gain an education in business, plus the skills, attitude and experience needed to create new ventures or revitalize established/family businesses. They learn to identify and understand different types of start-up ventures, how to build and present business concepts, and how to evaluate sources of financing for start-up and other types of ventures.

The program's interdisciplinary format offers the option of double majoring with another business discipline, such as management, marketing, finance, sports management, information systems, and others.

Students also can choose the entrepreneurial studies minor, a four-course program that is paired with a major in the Norm Brodsky College of Business.

Degree Offered

- B.S.B.A. in Entrepreneurial Studies

- For the Leadership Elective, choose from LDP 200, LDP 220, LDP 398, MGT 355, or MGT 363.

- Students are strongly suggested to complete a credit-bearing experiential course (e.g., Internship, Co-op, Study Tour, study abroad, ENT 448, ECO 450.)

Courses and Descriptions

ENT 100 Innovation and Entrepreneurship 3 Credits

This course provides students with an introduction to creativity, innovation, and the concept of an entrepreneurial mindset. Students explore the excitement and challenges faced by individuals and businesses as they create, develop, and evaluate innovative business opportunities. We also discuss the probable paths of career development for students pursuing entrepreneurship. In this course, students evaluate their own views of innovation and entrepreneurship within the framework of entrepreneurial thinking, and putting this mindset into action.

ENT 210 Sports Entrepreneurship 3 Credits

Sports Entrepreneurship will introduce students to entrepreneurship in the sports industries as they explore opportunities and challenges for new ventures in this sector. Using an industry's business model, students will identify competitive advantages and understand what is required for startup success.

ENT 220 Inside The Entrepreneurial Mind 3 Credits

Inside the Entrepreneurial Mind is not just for Entrepreneurship majors! Whether you're starting your own business or want to succeed in running a division for another firm, you will need to adopt an entrepreneurial mindset. This mindset takes a holistic approach to running a business, realizes that failure is part of the journey and that resilience in overcoming obstacles are necessary skills for success. In this course, students will hear from entrepreneurs and industry leaders as they share their personal experiences, the challenges they've overcome and the paths they've taken to arrive at success in their businesses and careers. Through these entrepreneurial stories, students will be introduced to the skills and strategies that will help them overcome challenges in both their careers and personal lives. Available to undergraduate Sophomores, Juniors, and Seniors.

ENT 260 Family Business Management 3 Credits

This course is directed at understanding the family-owned and managed firm. Topics included are the strengths and weaknesses of a family firm, the dynamics of the family and business interactions, conflict resolution, succession planning and ownership transfer. The course will help individuals involved with a family firm, regardless if they are a family member.

Prerequisite(s): MGT 201 and junior standing.

ENT 335 Small Business Tax Planning 3 Credits

This course provides an understanding of the key tax issues faced by small businesses and their business implications. It also familiarizes prospective business owners with various tax filing requirements so that they can use the expertise of tax professionals more effectively.

Prerequisite(s): ACC 210.

ENT 348 Small Business Management 3 Credits

This course provides students with an introduction to ownership/management in the world of small business as well as an understanding of what is needed to start/buy/sell a small business. In addition, the course endeavors to help students move from a consumer orientation to a producer orientation, and to learn project management and research skills through participation in a hands-on project. The project has students investigate the market potential of an innovative business concept, and then use this research to evaluate the business concept as an entrepreneurial opportunity.

ENT 350 Entrepreneurial Finance 3 Credits

This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.

Prerequisite(s): FIN 300.

ENT 375 International Entrepreneurship 3 Credits

Students will learn how new or small ventures enter international markets. Requirements include developing a case about starting or running a venture in a single country of the student's choice.

Prerequisite(s): MGT 201 and junior standing.

ENT 399 Entrepreneurship Co-Op 6 Credits

This course provides students with a semester-long supervised employment with an entrepreneurial firm/organization. Students are required to maintain a journal, complete a reflection paper and are evaluated by the participating firm/organization. Eligible students are entrepreneurial studies juniors or seniors with a 3.0 GPA or better. Co-op credits count as free electives. Grading is on a pass/fail basis.

Prerequisite(s): ENT 348 or permission of program director.

ENT 410 New Venture Planning 3 Credits

This course will require students to select a business and prepare a complete new venture plan for it. This plan would identify the product and its target market, analyze its market potential, choose the location, scale of operation, layout, staffing, type of financing, estimate the revenues and profits, and present the income statement, balance sheet, and the cash flow projections.

Prerequisite(s): ENT 348 or permission of instructor.

ENT 420 Student Venture Experience 3 Credits

Students will start and run a small business while under the supervision and guidance of faculty. Students will take a business plan developed through New Venture Planning (ENT 410) and execute it. Students will experience the launch process and learn, hands on, how to adapt to the marketplace. Some businesses started in this class may also be eligible for seed venture funding from Rider.

Prerequisite(s): ENT 348, ENT 410, and permission of instructor.

ENT 444 Special Topics 3 Credits

ENT 448 Small Business Consulting Sem 3 Credits

This course utilizes student teams to assist existing small businesses in solving problems or researching opportunities. Students will spend the majority of time in the field utilizing an experiential learning approach. Weekly activity logs, proposal development, and project completion are required. Restricted to seniors.

Prerequisite(s): ENT 348 and permission of instructor.

ENT 490 Independent Research and Study 3-4 Credits

Topic to be approved by professor and program chairperson. Available to juniors and seniors.

ENT 491 Internship 3 Credits

Entrepreneurship Minor

Program Overview

Rider students wishing to take a minor in entrepreneurship will develop the skills and know-how they need to become independent, innovative and informed entrepreneurs. The minor emphasizes practical experience

and holistic thinking, encourages students to develop their own business concepts, and enhances analytical skills through experiential classes.

For students in the arts, sciences, business, or education who may want to start or have a significant role in a business, based on their skills and talents, the minor in entrepreneurship can help you reach your dream.

Entrepreneurs and small businesses are the engines for job creation and economic growth. Career opportunities for entrepreneurship students are as boundless as their creativity, imagination and work ethic. Many employers value students with an entrepreneurial attitude and their ability to think outside the box.

The entrepreneurship minor has two key learning objectives. First, to encourage entrepreneurial thinking among students. This entails the ability to recognize, evaluate and pursue opportunities. Second, to build professional skills relevant for starting and managing a venture. These include research, business planning, and understanding functional aspects of small business management and operation.

Rider entrepreneurship students gain an education in business, plus the skills, attitude and experience needed to create new ventures or revitalize established/family businesses. They learn to identify and understand different types of start-up ventures, how to build and present business concepts, and how to evaluate sources of financing for start-up and other types of ventures.

Finance

Program Overview

The Finance major combines practical classroom training with internship opportunities to prepare students for a professional business career. Rider Finance majors find careers regionally and globally in business, industry, government service, and the non-profit sector. Career paths of our finance graduates include portfolio manager, financial analyst, banker, financial advisor, corporate financial manager, credit analyst, financial consultant and more.

Student Learning Outcomes

A Finance graduate will demonstrate the ability to:

- Compare and contrast the characteristics, features and uses of financial instruments from the corporate, investor and government perspectives;
- Compute the value of stocks, bonds and other financial securities using the appropriate valuation models;
- Calculate the returns and degree of risk associated with widely used investment strategies;
- Perform capital budgeting and other decision-making analyses in order to solve financial problems;
- Interpret the structure of financial markets and evaluate the role and functions of financial institutions within them.

Curriculum Overview

Rider offers three main areas of specialization within the Finance major. All programs lead to nationally recognized professional credentials that align with student career goals and demonstrate competency in the industry.

For students interested in pursuing a career in Financial Advising we offer a Concentration in Private Wealth Management (p. 263). This program prepares students to take the Securities Industry Essentials (SIE) exam that is now part of the Series 7 exam prior to graduation.

The Concentration in Investment Analysis (p. 263) prepares students for a variety of careers in investments and corporate finance. The program includes courses for students who plan to take the Chartered Financial Analyst® (CFA) Level 1 Exam.

The Concentration in Financial Management (p. 263) helps prepare students to take the Certified Management Accounting (CMA) examinations. This certification can be very worthwhile for those who intend to enter careers in Corporate Finance.

There are many options that can meet your specific needs: highly motivated students with multiple interests may specialize in two or more finance concentrations or double major (e.g., Business Analytics is a valuable supplement to Finance). Alternatively, students may choose a well-rounded exposure to the many facets of financial decision making and forego any specific concentration.

Non-business majors can minor in Finance. Students can receive a non-business degree and at the same time acquire considerable business knowledge and skills from our Finance minor (p. 263).

Degree Offered

Finance Major Requirements

(18 credits)

Students must achieve a grade of "C-" or better in FIN 220 Introduction to Finance to be entered into the Finance major program.

In addition to the requirements below, students must select one area of concentration (p. 263) to complete.

Code	Title	Credits
Business Core		
See Business Core Requirements (p. 564)		
Major Requirements		
FIN 307	Financial Markets & Institut	3
FIN 309	Intermediate Corporate Finance	3
FIN 312	Investments	3
Three upper level FIN electives (300-400 level), excluding FIN 491 Finance Internship and FIN 399 Finance Co-op.		9
Total Credits		18

Students must achieve a grade of at least "C-" in each of the major courses with a minimum GPA of 2.0 in the major. Finance concentrations have stricter requirements that are designed to assist you in identifying the correct path within the discipline.

Finance Minor Requirements

(Available to all non-business majors)

(18 credits)

Code	Title	Credits
ACC 210	Introduction to Accounting	3
ECO 201	Principles of Microeconomics	3
FIN 220	Introduction to Finance	3
Select three of the following:		9
FIN 305	Personal Financial Planning	
FIN 307	Financial Markets & Institut	
FIN 308	International Finance	
FIN 309	Intermediate Corporate Finance	
FIN 312	Investments	
FIN 315	Financial Modeling	
FIN 330	Corporate Cash Management	
FIN 350	Entrepreneurial Finance	
FIN 360	Fixed Income and Derivatives	
FIN 370	Financial Analysis and Ethics	
FIN 405	Private Wealth Management	
FIN 412	Investment Analysis	
Total Credits		18

Students must achieve a minimum 2.0 GPA in the minor with no course grade below a "C-."

Finance Concentrations

Concentration in Private Wealth Management (p. 263)

Concentration in Investment Analysis (p. 264)

Concentration in Financial Management (p. 264)

Concentration in Private Wealth Management

(21 credits)

The Concentration in Private Wealth Management (PWM) prepares students for a career as a Financial Advisor. The course sequence will provide a foundation for students to take the Securities Industry Essentials (SIE) (<https://www.finra.org/industry/essentials-exam/>) exam during their senior year prior to graduation. The SIE is a portion of the Series 7 exam required by all brokerages and advisory firms and is the entry-level credential that all financial advisors must earn in order to advance in their career in Finance. Students will undergo frequent benchmark testing through their finance courses, assessing necessary knowledge and thinking to achieve mastery. (A double major or minor in Business Analytics (p. 97) is a recommended complement. Students who are sales-oriented may consider the concentration in Financial Services Marketing.)

Admission

This program is only available to Rider undergraduate Norm Brodsky College of Business students majoring in Finance. With the exception of Finance-Accounting double majors, all Finance majors with a GPA of 2.50 who have completed 30 credits are automatically enrolled in the Concentration in PWM. Transfer students entering with 30 credits are automatically enrolled in PWM during their first semester.

Finance-Accounting double majors are permitted to enroll in this concentration at their discretion. Students can switch to or add the concentration in Financial Management, if desired, after earning

30 credits. Students may “opt-out” of having a concentration with permission of the Department Chair.

Graduation Requirement

A minimum cumulative GPA of 2.50 at graduation and a minimum grade of C is necessary in each of the following courses:

Code	Title	Credits
ACC 210	Introduction to Accounting	3
ACC 220	Managerial Uses of Accounting	3
FIN 220	Introduction to Finance	3
FIN 305	Personal Financial Planning	3
FIN 307	Financial Markets & Institut	3
FIN 312	Investments	3
FIN 405	Private Wealth Management	3
Total Credits		21

ratner@rider.edu (cchiu@rider.edu)

Concentration in Investment Analysis

(15 credits)

This program prepares students for a variety of careers in investments and corporate finance. By taking the required courses for the program, participants will receive in-depth training involving investment tools, valuation of assets, and management of investments that will position them to enter the fields of security analysis and portfolio management. Although the focus of the program is on investments, the knowledge that participants gain from the required courses is highly valued in other finance fields such as financial planning and treasury management. (A double major or minor in Business Analytics is a recommended complement).

This program is also designed to prepare students for the Chartered Financial Analyst (CFA) Level 1 Exam (<https://www.cfainstitute.org/programs/cfa/exam/level-i/>). The CFA designation is globally recognized by employers and investment professionals. The content of the required courses for the concentration, along with the other required courses for a business undergraduate degree, cover a significant portion of the CFA Level 1 Exam curriculum.

Admission

Rider undergraduate Norm Brodsky College of Business students majoring in Finance or double-majoring in Finance may apply for this concentration after completing 60 credits. Students enrolled in the Concentration in Private Wealth Management are encouraged to add this second program if they meet the following criteria:

- minimum cumulative GPA of 3.25
- minimum grade of "B" in FIN 220

Code	Title	Credits
Required Courses for the Concentration:		
FIN 309	Intermediate Corporate Finance	3

FIN 312	Investments	3
FIN 360	Fixed Income and Derivatives	3
FIN 370	Financial Analysis and Ethics ¹	3
FIN 405	Private Wealth Management	3
Total Credits		15

¹ Students who are a double major in Finance and Accounting are permitted to waive FIN 370.

Graduation Requirement:

Students must have a minimum GPA of 3.25 in the 15 semester hours of required coursework and a minimum cumulative GPA of 3.25 in order to successfully complete the program.

For information on the Concentration in Investment Analysis please contact:

Jason Chiu, Ph.D., CFA

Associate Professor and Chairperson
609-896-5299
Sweigart Hall 262
cchiu@rider.edu

Concentration in Financial Management

(12-15 credits)

This program prepares Finance majors for careers in Corporate Finance that combine skills in both finance and accounting. Corporate Finance is used by both financial and non-financial firms, and by investment banks that help firms raise capital. The program is also designed to prepare students for the Certified Management Accountant (CMA) (<https://www.imanet.org/cma-certification/?ssopc=1>) examinations that students are encouraged to complete prior to graduation. This credential is valued in a number of careers relating to both Corporate Finance and Accounting. (A double major or minor in Business Analytics (p. 97) is a recommended complement.)

Admission

Rider undergraduate Norm Brodsky College of Business students majoring in Finance or any other business discipline excluding Accounting majors may choose this program after completing 30 credits and a minimum cumulative GPA of 2.50.

Graduation Requirement

A minimum cumulative GPA of 2.50 at graduation and a minimum grade of C is necessary in each of the following courses:

Code	Title	Credits
Required Courses:		
ACC 302	Cost Management	3
FIN 309	Intermediate Corporate Finance	3
FIN 315	Financial Modeling	3
FIN 370	Financial Analysis and Ethics ¹	3
Total Credits		12

¹ The FIN 370 course requirement can be satisfied by completion of both ACC 310 and ACC 311.

For information on the Financial Management Concentration please contact:

* Students are required to complete 6 credits of International Business Electives which can be fulfilled as major course elective (FIN 308 International Finance) or free elective courses.

Notes:

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.
- Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.
- Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, FIN 399 or FIN 491).

Courses and Descriptions

FIN 200 Managing Your Money 3 Credits

An introduction to the analysis of a wide range of financial decisions which individuals encounter over their careers and lifetime. Topics include financial goals, tax planning, home ownership versus renting, consumer credit, money management and investments, and managing risk with insurance. This course is open to all Rider students, and it counts as a free elective or a business elective. It cannot be used as finance elective.

FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk

and return, capital budgeting, cost of capital, and international financial management.

Prerequisite(s): ACC 210 and ECO 201.

FIN 305 Personal Financial Planning 3 Credits

This course focuses on practical issues and problems involving personal financial budgeting, use of credit, selection of banking services, insurance needs, real estate, investments, tax planning, and retirement planning. An important objective of the course is to provide the student with the tools that are utilized in making personal financial decisions and how to apply those tools for a variety of financial needs.

Prerequisite(s): FIN 220.

FIN 307 Financial Markets & Institutions 3 Credits

This course provides an introduction to the organization and behavior of financial markets and institutions in the economy. The factors determining security prices and interest rates in the money and capital markets are analyzed. An overview of all major financial institutions is presented. In addition, market returns, the regulatory environment, and monetary policy are examined.

Prerequisite(s): FIN 220 or concurrent with FIN 220.

FIN 308 International Finance 3 Credits

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

Prerequisite(s): FIN 220.

FIN 309 Intermediate Corporate Finance 3 Credits

This course builds on and extends the concepts of financial management learned in FIN 220. The course examines long-term corporate financing and investment decisions and how those decisions interface with each other. Topics covered include: cost of capital, financial planning and analysis, capital budgeting, capital structure and dividend policy.

Prerequisite(s): FIN 220.

FIN 312 Investments 3 Credits

The fundamentals of investing in stocks, bonds, and other negotiable instruments are covered. Major topics include trading on securities markets, mutual funds, international investing, margin accounts, short sales, determinants of securities prices, and investment risks. Stock options, financial futures, convertible securities, and implications of taxes on investment decisions are also discussed.

Prerequisite(s): FIN 220.

FIN 315 Financial Modeling 3 Credits

Provides instruction in computer use beyond what is available in other finance courses. Topics include more sophisticated applications of computers in financial management, investments, and other areas of finance and business. Students work on cases and projects which require more advanced usage of spreadsheets and other software and databases.

Prerequisite(s): CIS 185 and FIN 220.

FIN 330 Corporate Cash Management 3 Credits

This course is designed for business students seeking an understanding of modern principles and techniques for corporate treasury management. The course material is useful for finance, accounting, and banking professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multi-national cash management, and other related topics.

Prerequisite(s): FIN 220.

FIN 340 Risk Management 3 Credits

This course examines the risk management process as applied to the firm as a whole. It integrates the management of all risks facing the firm: strategic, financial, hazard, and operational. Techniques for identifying risk, measuring and analyzing it, and selecting an appropriate treatment will be explored.

Prerequisite(s): FIN 220.

FIN 350 Entrepreneurial Finance 3 Credits

This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.

Prerequisite(s): FIN 220.

FIN 360 Fixed Income and Derivatives 3 Credits

This course centers on the quantitative portion of the Chartered Financial Analyst (CFA) level 1 curriculum, which includes materials on fixed-income risk and return, fundamentals of risk analysis, derivative instruments and risk management applications of option strategies. The goal is to help students prepare for the exam, as well as introduce them to a variety of topics in finance.

Prerequisite(s): FIN 312.

FIN 370 Financial Analysis and Ethics 3 Credits

This course covers the topics of financial reporting and analysis and related ethical issues. The course would benefit students interested in augmenting their ability to understand, analyze and apply the information in financial statements. It provides essential knowledge for students seeking either the Certified Management Accountant (CMA) or Chartered Financial Analyst (CFA) certifications. Specifically, the course covers the Ethics and Professional Standards of the CFA curriculum, and materials on financial reporting quality and financial statement analysis for the CFA level 1 exam. Course goals are to help students prepare for the certification exams, as well as introduce all interested students to a variety of topics in financial analysis and ethics.

Prerequisite(s): FIN 312 or POI.

FIN 380 Real Estate 3 Credits

Real estate finance and related subjects in real estate are examined. Topics include measuring cash flows and taxes, valuation methods for

real estate investment decisions, location and value in real estate, home ownership, legal matters, and financing methods and techniques.

Prerequisite(s): FIN 220.

FIN 399 The Co-Operative Experience 6 Credits

The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their finance and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Eligible students include finance majors with at least junior status, a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in any finance coursework completed prior to the submission of the co-op application. Co-op credits can be applied toward business or free elective requirements but not toward finance elective requirements for majors. Grading is on a pass/fail basis.

Prerequisite(s): FIN 220.

FIN 405 Private Wealth Management 3 Credits

This course utilizes the Chartered Financial Analyst (CFA) curriculum and focuses on private asset management for high-net-worth investors. A wide range of topics including managing individual investor portfolios, taxes, estate planning, concentrated single-asset positions and individual risk management will be covered via lecture discussions. The main objective for the course is to help students develop the skills for a career in wealth management.

Prerequisite(s): FIN 305.

FIN 412 Investment Analysis 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory introduced in FIN 312 (<http://catalog.rider.edu/search/?P=FIN%20312>). Students interact with and make recommendations to professional portfolio managers. Topics include analysis and forecasts of business conditions, market interest rates, international opportunities, and corporate profits. Emphasis is placed on the valuation of securities, stock selection, investment timing, technical analysis, and management of portfolio risk with options, futures, and other tools.

Prerequisite(s): FIN 312 or permission of instructor.

FIN 469 Special Topics in Finance 3 Credits

This course is occasionally offered, with the topics and prerequisites set by the finance program.

FIN 490 Independent Study: Research and Creative Expression 3 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation. This course can be used as a business or free elective, but with prior approval it can also be used as finance elective.

FIN 491 Finance Internship 1-3 Credits

The internship offers qualified junior and senior finance majors supervised employment with participating companies. The internship may be taken during the fall or spring semester or during the summer session. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a term paper that

will be reviewed by the major's internship director. Internship credits can be applied toward business or free elective requirements but not toward finance elective requirements for majors. Grading is on a pass/fail basis.

Prerequisite(s): permission of instructor.

Finance Minor for Non-business Majors

Program Overview

The finance minor is designed to meet the needs of students who have a variety of career goals. For many types of jobs, it is essential that one understands the process of financial decision-making and the environment in which those decisions take place. To provide this understanding, the minor program consists of a well-rounded course of study in principles of macroeconomics, personal financial planning, management, entrepreneurial finance and other related courses.

This program is offered to all non-business students.

Note: Students must achieve a minimum 2.0 GPA in the minor with no course grade below a "C-".

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

ECO 201 Principles of Microeconomics 3 Credits

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

Prerequisite(s): ACC 210 and ECO 201.

FIN 305 Personal Financial Planning 3 Credits

This course focuses on practical issues and problems involving personal financial budgeting, use of credit, selection of banking services, insurance needs, real estate, investments, tax planning, and retirement planning. An important objective of the course is to provide the student with the tools that are utilized in making personal financial decisions and how to apply those tools for a variety of financial needs.

Prerequisite(s): FIN 220.

FIN 307 Financial Markets & Institut 3 Credits

This course provides an introduction to the organization and behavior of financial markets and institutions in the economy. The factors determining security prices and interest rates in the money and capital markets are analyzed. An overview of all major financial institutions is presented. In addition, market returns, the regulatory environment, and monetary policy are examined.

Prerequisite(s): FIN 220 or concurrent with FIN 220.

Real-world application of the concepts and techniques of investment analysis and portfolio theory introduced in FIN 312. Students interact with and make recommendations to professional portfolio managers. Topics include analysis and forecasts of business conditions, market interest rates, international opportunities, and corporate profits. Emphasis is placed on the valuation of securities, stock selection, investment timing, technical analysis, and management of portfolio risk with options, futures, and other tools.

Prerequisite(s): FIN 312 or permission of instructor.

Fraud and Business Forensics Certificate**Program Overview**

The Business Forensics certificate is designed to prepare students for a career in the field of fraud investigation and forensics. The curriculum encompasses fraud examinations, financial investigations, the psychology of white-collar crime, forensic interrogations and evidence management, and presentation for civil and criminal trials. A variety of teaching tools are employed including case studies, mock investigations, mock trials, guest speakers and professionals who are experts in their areas.

The program offers a track in either Accounting or Information Systems.

Admission

Current undergraduate Norm Brodsky College of Business students may choose a certificate in Fraud and Business Forensics. Students who want to declare this certificate should do so through the Norm Brodsky College of Business Dean's Office in Sweigart Hall one semester prior to beginning coursework.

Degree Offered

Fraud and Business Forensics Requirements

(12 credits)

A certificate in Fraud and Business Forensics consists of four courses that can be completed as part of the undergraduate Accounting or Information Systems program. The certificate prepares students for a career in the field of fraud investigation and forensics by providing skills and tools to both prevent fraud from occurring and discovering fraud after it has occurred.

Code	Title	Credits
Required Courses		
ACC 321	Internal Auditing	3

ACC 325	Fraud Examination and Business Forensics	3
ACC 450	Business Forensic Application	3

Tracks

Select one of the following Tracks: **3**

Accounting Track

ACC 320	Accounting Info Systems
or ACC 400	Principles of Auditing

Information Systems Track

CIS 370	Systems Analysis and Design Project
---------	-------------------------------------

Total Credits **12**

Students must achieve a minimum 2.5 GPA in the coursework required for the certificate, with no grade lower than a "C" in any course in the certificate.

Courses and Descriptions**ACC 320 Accounting Info Systems 3 Credits**

This course provides an introduction to accounting information systems and enterprise-wide, process-focused information systems. Topics include quality of data for decision usefulness, internal control concepts and documentation tools, and database theory and applications.

Prerequisite(s): ACC 220 and CIS 185.

ACC 321 Internal Auditing 3 Credits

This course provides an introduction to the internal audit profession, including understanding the nature and activities associated with the internal audit process. Topics include: international auditing standards, risk assessment including internal control system evaluation, business processes, and the relationship of management and employee fraud to the internal audit process.

Prerequisite(s): ACC 220.

ACC 325 Fraud Examination and Business Forensics 3 Credits

This course provides an introduction to the prevalence of fraud in all forms of business, including the many methods used by employees and managers to perpetrate fraud. Topics include: the motivation of individuals to commit fraud, various types of fraud schemes perpetrated in the workplace, as well as the various tools and techniques that are used to investigate, detect and prevent fraud.

Prerequisite(s): ACC 210.

ACC 400 Principles of Auditing 3 Credits

This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.

Prerequisite(s): ACC 310.

ACC 450 Business Forensic Application 3 Credits

This course provides an opportunity to perform complex investigative cases and analyses, thus demonstrating mastery of the knowledge and skills required to be effective forensic professionals. The course covers how to manage and present digital and technical evidence gathered for forensic litigation cases, including the ability to be an expert witness in court.

Prerequisite(s): ACC 325 and ACC 321.

CIS 370 Systems Analysis and Design Project 3 Credits

Topics include modeling techniques and methodologies to address the planning, analysis, design, and implementation of high quality systems, delivered on time and within budget. Using rapid application development tools, students will also construct an operational system within the span of a single semester. Issues and tools related to the management of project teams are also discussed.

Prerequisite(s): CIS 330.

General Business for Non-business Majors

Program Overview

Available to all non-business majors, the General Business minor at Rider University provides students an understanding of the language and basic concepts of business. A minor in business administration can complement any major and may expand career opportunities. Students outside of the CBA can augment their understanding of business by joining business clubs, such as DAARSTOC (<http://www.rider.edu/academics/colleges-schools/college-business-administration/clubs-organizations/daarstoc/>), and participate in club events like the Accounting Society's guest speakers' nights.

Curriculum Overview

Students will learn foundational knowledge in business, including the fundamentals of economics and core concepts in financial accounting, management, finance and marketing. In addition, students will understand the legal environment in which business operates.

General Business Minor Requirements

Available to all non-business majors

(24 credits)

Code	Title	Credits
MSD 105	Quantitative Methods for Business	3
or MTH 102	Finite Mathematics	
or MTH 105	Algebra and Trigonometry	
or MTH 210	Calculus I	
Select one of the following:		3
MSD 205	Business Statistics	
MTH 120	Introduction to Applied Statistics	
ENV 200	Statistical and Computer Applications in the Natural Sciences	
PSY 201	Statistics and Research Design	
BNS 250	Biostatistics	
ACC 210	Introduction to Accounting	3
ECO 201	Principles of Microeconomics	3
MGT 201	Fund Management & Org Behavior	3
MKT 200	Marketing Principles	3
BUS 300	The Legal and Ethical Environment of Business	3
FIN 220	Introduction to Finance	3
Total Credits		24

A minimum of six courses must be taken in business administration and students must achieve a minimum GPA of 2.0 in the minor.

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

BUS 300 The Legal and Ethical Environment of Business 3 Credits

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

Prerequisite(s): 54 credits.

ECO 201 Principles of Microeconomics 3 Credits

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits

This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.

Corequisite(s): ENV 200L.

FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

Prerequisite(s): ACC 210 and ECO 201.

MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

Prerequisite(s): minimum 30 credits completed.

MKT 200 Marketing Principles 3 Credits

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

Prerequisite(s): 15 credits.

MSD 105 Quantitative Methods for Business 3 Credits

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 205 Business Statistics 3 Credits

This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.

Prerequisite(s): MSD 105.

MTH 120 Introduction to Applied Statistics 3 Credits

Collection and presentation of data. Measures of location and variation, sampling theory, hypothesis testing, confidence intervals, t-tests, chi-square tests, regression, and correlation. Emphasizes practical applications. Not open to business administration, chemistry, environmental, geosciences, marine sciences, math or liberal studies: marine ecological or environmental emphasis majors.

Prerequisite(s): MTH 102 or MTH 105.

MTH 210 Calculus I 4 Credits

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 or MTH 106 with a grade of C or higher.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

Global Supply Chain Management

Program Overview

Rider's award-winning global supply chain management program prepares students for one of the most in-demand specializations in today's business world.

Consistently honored as one of the top curriculums of its kind in the nation by research firm Gartner Inc., the GSCM program equips students with the skills and experiences needed for a career in the exciting field of global supply chain management.

Through every phase of a product's life cycle, global supply chain management professionals ensure that customers get the products and services they need and want — faster, better and more cost-effectively — from across town or around the world. They play a critical role to the successful functioning of businesses, healthcare, nonprofit agencies and governments.

Student Learning Outcomes

At the completion of the Global Supply Chain (GSC) Management degree, a GSC major will demonstrate the ability to:

- Apply knowledge of the components of global supply chains to address real world supply chain management (SCM) trade-offs and management problems.
- Develop appropriate SCM operating strategies.
- Recognize how organizations operate to comply with regional and international governing laws and cultural norms that affect the conduct of business.
- Develop SCM policies and procedures based on research.
- Apply SCM methods and concepts to real world problems through experience acquired in a required co-op or internship in SCM.

Curriculum Overview

Rider's interdisciplinary global supply chain management program combines theory and practice with hands-on internship and mentoring experiences to provide students with an understanding of the important role of supply chain management in domestic and international business.

Faculty include professors with expertise in supply chain management and logistics, information systems, marketing, international business and management science, as well as supply chain professionals from private industry and non-profits. Students learn the many dimensions of supply chain networks that businesses use to acquire, produce, and deliver goods and services across the global marketplace. They also gain skills that prepare them for success in this fast-growing field

Degree Offered

- B.S.B.A. in Global Supply Chain Management

Certificates Offered

- Certificate in Global Supply Chain Management
- Certificate in Supply Chain Analytics

Concentration Offered

- Concentration in Supply Chain Analytics

Total Credits **33**

¹ Students majoring in Global Supply Chain Management are required to take a 6-credit co-op OR a 3-credit Internship and a 3-credit business elective.

² Students majoring in Global Supply Chain Management may not take CIS 385 Management Information Systems.

³ Students majoring in Global Supply Chain Management may take a maximum of one 200 level BDA, CIS or MKT course to count as a GSC Major Elective.

Students must achieve a grade of at least "C-" in each of the major courses with a minimum GPA of 2.0 in the major.

Global Supply Chain Certificate (p. 290) Supply Chain Analytics Certificate (p. 290)

Global Supply Chain Certificate

(9 credits)

Overview

The Global Supply Chain Certificate (GSCC), housed within the Global Supply Chain Program, is a certificate-bearing program that is open to all undergraduate students in the Norm Brodsky College of Business and in the College of Liberal Arts and Sciences (except GSC majors)¹. The GSCC is designed to complement students' major areas of study with relevant content from the supply chain discipline. In professional practice, supply chain management requires a high degree of interaction and collaboration with other major corporate functions. Managers in Finance, Marketing, Accounting, Human Resources and other functions need to understand and are often expected to work closely with corporate supply chain colleagues. The GSCC will provide students with the knowledge and skills to be effective in these cross-functional, interdisciplinary roles while the credential will provide differentiation and advantage in their job search.

Requirements

Upon successful completion of the requirements listed below, students will obtain a Global Supply Chain Analytics Certificate upon graduation from Rider. All GSCC participants must successfully complete and achieve grades of C- or better in each of three courses they take to complete the certificate, as described below:

Code	Title	Credits
Required Course for Certificate:		3
GSC 115	Introduction to Global Supply Chain Mgt.	
Choose 2 of the following:		6
GSC 235	Supply Chain External Focus: Customer and Supplier Logistics	
GSC 290	Strategic Sourcing and Procurement	
GSC 345	Customer Focus: The Customer Driven Supply Chain	
GSC 355	Supply Chain Internal Focus: Firm Operations	
Total Credits		9

¹The GSC Certificate is open to and intended for all students except GSC majors.

Supply Chain Analytics Certificate

(9 credits)

Overview

The Supply Chain Analytics Certificate (SCAC) will be available to all GSC Certificate students in the Norm Brodsky College of Business. Students who exhibit strong technical skills and/or interest in analytic methods will be particularly encouraged to consider the SCA Certificate. Thus, this certificate offers an advanced "analytics study option" for GSC Certificate students.

The SCAC provides a meaningful and externally recognizable analytics credential for students without requiring the full effort of completing a major in Business Data Analytics (BDA), which requires the completion of six courses in the major. The credential will help these students differentiate themselves from peers at Rider and other universities as they compete for positions in the field of supply chain management.

Requirements

The SCAC is open to all Global Supply Chain (GSC) Certificate students in the Norm Brodsky College of Business. Upon successful completion of the requirements listed below, students will obtain a Supply Chain Analytics Certificate upon graduation from Rider.

The SCA Certificate is only awarded to students who have also completed the GSC Certificate. Students can work on both the SCA and GSC Certificates concurrently. However, the SCA Certificate will only be awarded upon the successful completion of the requirements for both the GSC Certificate and SCA Certificate by a student.

All SCAC participants must successfully complete and achieve grades of C- or better in each of three courses they take to complete the certificate, as described below:

Code	Title	Credits
Required Courses:		6
BDA 205	Introduction to Visual Data Analytics	
BDA 355	Business Analytics with Python	
Select one of the following:		3
CIS 330	Database Systems	
or CIS 360	Data Mining	
Total Credits		9

Supply Chain Analytics Concentration Requirements

(9 credits)

The SCA Concentration is open to all GSC Majors in the Norm Brodsky College of Business. Upon successful completion of the requirements listed below, students will obtain a Supply Chain Analytics Concentration upon graduation from Rider.

The SCA Concentration is only awarded to students who have also completed the GSC Major. Students can and are expected to work on both the SCA Concentration and the GSC Major concurrently. However, the SCA Concentration will only be awarded upon the successful completion of the requirements for both the GSC Major and SCA Concentration by a student.

All SCA Concentration participants must successfully complete and achieve grades of C- or better in each of three courses they take to complete the concentration, as described below:

Courses and Descriptions

GSC 115 Introduction to Global Supply Chain Mgt. 3 Credits

This course introduces students to components of global supply chains and issues of managing the global supply chain. It is designed as a survey course to give first or second year business students a general view of supply chain management at both domestic and international levels, as well as familiarize them with basic concepts and major challenges of supply chain management. Delivery of course material will include lectures and guest speakers from industry, and in-class logistics mini cases.

GSC 235 Supply Chain External Focus: Customer and Supplier Logistics 3 Credits

This course is a detailed discussion of some of the major issues and components of supply chain management that are mainly external to an organization. In other words, it provides an “outward looking” perspective of supply chain management. Topics to be covered include sourcing, procurement, transportation, customer logistics, and distribution. The linkages to internal issues and components of supply chain will be made.

Prerequisite(s): GSC 115.

GSC 290 Strategic Sourcing and Procurement 3 Credits

Sourcing and procurement are vital components of a well-functioning and efficient supply chain. Obtaining raw materials, components, finished and semi-finished goods, critical technology, and essential services from different suppliers and countries with different languages, currencies, legal and cultural norms is a complex and risky task and made essential due to the value of these activities to the bottom-line of any global business today. Additionally, globalization raises issues involving not just costs but reliability, quality, credibility, product safety, product liability, and related social, ethical, governance, and environmental impact. In this course, students will learn and apply the concepts, principles, and techniques required to manage the sourcing process effectively. Topics include purchasing, outsourcing, materials management, inventory management, forecasting, price and cost analysis, transportation analysis, supplier selection, negotiation strategies, auctions, and legal framework. Students will apply the concepts covered in lectures, articles, case study analysis, a team project, and discussions. Additionally, a special component of this course will include participating in a multi-week real world procurement simulation where students will have an opportunity to interact in a purchasing process with senior industry procurement executives. The simulation will both teach and allow students to participate in developing and implementing bidding and negotiating strategies in real world vendor-customer relationships. Sophomore standing or higher.

Prerequisite(s): at least one of the following courses: ACC 210, or ECO 200, or ECO 201, or GSC 115.

GSC 315 International Business Tour 3 Credits

GSC 345 Customer Focus: The Customer Driven Supply Chain 3 Credits

Marketing and supply chain management programs are concerned with the creation and delivery of value to customers and organizations. No longer simply the domain of the warehouse manager or logistics director, supply chain management is viewed by most companies as a mission critical element. Marketing focuses on developing an understanding of customers and markets, creating products and services based on that understanding, and communicating and delivering the value added. This course will teach the student the essential role of marketing in all aspects of successful supply chain management - relationship management, technological and financial management - and it will help the student understand the structure, functions, principles and methods employed in discovering and translating consumer needs and wants into product and service specifications, and then transferring these goods and services from producers to consumers or end users.

Prerequisite(s): GSC 115 and MKT 200.

GSC 355 Supply Chain Internal Focus: Firm Operations 3 Credits

This course is a detailed discussion of some of the major issues and components of supply chain management that are mainly internal to an organization. In other words, it provides an “inward looking” perspective of supply chain management. Topics to be covered include: manufacturing, quality, product design, inventory, and warehousing. The linkages to external issues and components of supply chain will be made.

Prerequisite(s): GSC 115 and MSD 340.

GSC 375 Adv.Sem in Global Outsourcing 3 Credits

The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Various referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.

Prerequisite(s): junior standing.

GSC 385 Management Information Systems for Global Supply Chain Management 3 Credits

The purpose of this junior level management information systems course is to prepare students for today's dynamic business environment by increasing their understanding of IT-enabled global information processing and management. This course has a specific emphasis on the impact and effective utilization of information systems and technology for the global supply chain. Students will gain a solid understanding of the value of business process integration through a combination of conceptual learning, business process analysis, and collaborative decision-making. This will be facilitated through hands-on experience with SAP ERP and analytical software as well as Microsoft Excel. GSC 385 is required for the Global Supply Chain Management major and can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

Prerequisite(s): CIS 185 and junior standing.

GSC 399 GSC Co-op Program 6 Credits

The co-op program provides students with an opportunity to work full-time in an organization and apply what they have learned in their global supply chain and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first-step before they hire full-time employees. Eligible students include junior and senior global supply chain management majors with a minimum GPA of 3.0. The six credits are intended to be used as business electives, but it is also possible for them to be used as a combination of business and free electives.

Prerequisite(s): GSC 115 plus one additional course within the global supply chain management major, and permission of instructor.

GSC 445 Supply Chain Strategy and Design 3 Credits

This course introduces the student to the concepts and techniques necessary to design and operate global supply chains. It covers some of the strategic issues of managing a global supply chain and emphasizes the importance of understanding the organization, its value chain, industry, competitors, suppliers, and customers in a global framework. The course covers various strategies as well as different supply chain design models and approaches for efficient and effective supply chain operation.

Prerequisite(s): GSC 235 and GSC 355.

GSC 490 The GSC Consulting Elective 3 Credits

This is a special topics Independent Research and Study course. A Global Supply Chain professor will supervise a semester long project in which a team of students completes a consulting project for one or more local firms. The consulting project, which will be determined by the GSC faculty and local firm(s), provides valuable experience for students on the team as they perform analysis of important supply chain and logistics problems that a local firm must address. The work includes analytic and research activities, and culminates in a recommendation on how the firm should address the logistics/supply chain issues that it had engaged the student team to evaluate. This experience also provides valuable lessons on how to work with clients, and how to develop and make presentations to effectively communicate recommendations.

Prerequisite(s): GSC 115 and permission of instructor.

GSC 491 GSC Internship 3 Credits

The Global Supply Chain Management (GSCM) Program formally sponsors an internship in global supply chain management. The intention of the course is to supplement theoretical foundations and other material introduced in the classroom with an opportunity to work in a sponsoring organization. Through the internship experience, the student will get a chance to see how supply chains are managed and will get a chance to apply supply chain concepts for themselves. If used in place of the co-op, internship credits will count toward GSCM major requirements, but can also be used as a business or free elective.

Prerequisite(s): GSC 115 plus one additional course within the GSCM major, and permission of instructor.

Health Administration

Program Overview

The Health Administration minor recognizes the diversity of skills required in the health care sector, and allows students from a variety of programs to minor in health care administration. Majors particularly well-suited to health administration are:

- **Sciences** (biology, chemistry, biochemistry, psychology)
- **Social sciences** (economics, sociology, social work, political science)
- **Business** (marketing, management, business administration, human resources management, business economics, finance, actuarial science, and information systems).

Classes include a diversity of student majors, which allows science, social science and business students to interact and learn alternative points of view. The health administration minor, combined with other initiatives of the integrated science and business curriculum at Rider, place graduates at a strong advantage in the employment marketplace.

Minor Offered

- Minor in Health Administration

PSY 382	Aging, Brain, and Cognition	
PSY 385	Death, Dying and Suicide	
Non-business majors must select one of the following:		0-3
MGT 201	Fund Management & Org Behavior	
MKT 200	Marketing Principles	

Total Credits 21-24

Courses and Descriptions

BHP 309 Honors Seminar: Genetic Engineering and the Philosophy of Science 3 Credits

Highlights the different perspectives held by scientists and philosophers regarding current bioethical issues. Topics include classical ethical theory, applied ethics, and basic biology as it relates to topics such as stem cells, cloning, and assisted reproduction. Students will learn how to construct and present rational, objective arguments during class discussions and presentations. At the end of this course, students will have gained a strong perspective both the ethical and biological foundations behind modern "hot-button" topics in genetics.

BIO 100 Life Science 3 Credits

An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BIO 110 Life Science: Inquiry Approach 4 Credits

An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 110.

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 206 The Pharmaceutical Industry 3 Credits

An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.

Prerequisite(s): BIO 100 or BIO 101 or BIO 106 or BIO 108 or BNS 107 or CHE 115.

BIO 221 Human Anatomy & Physiology I 4 Credits

A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.

Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 221.

BNS 107 Life Science: Brain and Behavior 3 Credits

An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

CHE 115 Chemistry & Society 3 Credits

Designed to give the nonscientist an appreciation of the role of chemistry in today's world. The approach is conceptual rather than mathematical. Topics include basic principles of chemical theory, energy sources, elementary organic chemistry, drugs, food additives, polymers, chemistry of living systems, inorganic solids in modern technology, and problems involving pollution of the environment. Three hours of lecture per week. This course satisfies the core requirements for education and business majors.

CHE 118 Exploration of Chemical Principles 4 Credits

A one-semester introduction to the principles of chemical sciences. Students will utilize inquiry-based learning methods to examine contextual problems as a means to explore introductory models and concepts of chemistry. Students will also gain an understanding of how scientific models are used to explain experimental observations. The laboratory component of this course is designed to provide students with an experimental context within which to develop some of the models described in the classroom. Three hours of lecture and one three-hour lab per week.

CHE 118L Exploration of Chemical Principles Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 118.

CHE 120 Principles of Chemistry 3 Credits

For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. **Prerequisite(s):** High school chemistry or CHE 100 is recommended before taking this course.

Corequisite(s): CHE 121.

HTH 205 Introduction to Health Care 3 Credits

This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 336 Economics of Health Care System 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

HTH 450 Seminar in Health Research 3 Credits

Students in the course learn to conduct health administration-related research by engaging in an actual community-based research project. At the beginning of the semester, students are assigned to a health-related community-based organization. As a team, students meet with the client, devise a plan of action, collect and analyze data and other information, and write a report to the client. At the end of the semester, students present their findings to the client.

Prerequisite(s): Permission of instructor.

HTH 491 Health Management Internship 3 Credits

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.

Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

HTH 315 Health Care Law, Ethics and Policy 3 Credits

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

HTH 215 Population Health Care Management 3 Credits

In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.

Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

Prerequisite(s): minimum 30 credits completed.

MKT 200 Marketing Principles 3 Credits

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

Prerequisite(s): 15 credits.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the variety of ways family impacts development across the lifespan.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

Health Care Management

Program Overview

The B.S.B.A. in Health Care Management allows students to learn the business of health care – and prepare for a career in America's fastest growing sector. This program allows students to earn a well-rounded

business degree from Rider's distinguished AACSB-accredited Norm Brodsky College of Business, hone their business skills and focus on health care management studies, explore different roles in the complex issues facing health care and benefit from ongoing advice and support from professionally well-connected and experienced faculty.

Student Learning Outcomes

A health care management graduate will demonstrate the ability to:

- Synthesize the major sectors in the US Health Care System and define jargon in health care administration to communicate with professionals.
- Apply knowledge of the health care system and the economic and policy environment to a real-world situation.
- Analyze the constraints and incentives facing an organization based on its placement within the health care sector.
- Analyze the effect of policies or economic factors on health care outcomes.
- Conduct both quantitative and qualitative research methodological studies.
- Communicate effectively through strong written skills.
- Demonstrate oral communication skills.

Curriculum Overview

The curriculum provides a core education in business combined with critical topics in health care management. The program is designed to provide students with an understanding of both the business and health fields, including a deeper grasp of the legal, ethical, economic, social and managerial issues related to health care.

Faculty include professors with expertise in economics, finance, information systems, law, and marketing.

The courses are designed to provide real-world experiences and the program offers students the opportunity to learn through required participation in one of the following: a semester-long internship, large-data group project for a client and health care marketing courses where students design their own marketing plans.

Notes:

- The above plan assumes no AP or other credits were transferred into Rider University.
- Students are required to take 6 credits of International Business Electives.
- Business Honors students will have a different sequence.
- Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.
- Students may be required to take MSD 104 (<http://catalog.rider.edu/search/?P=MSD%20104>) Intro to Quantitative Methods based on placement. MSD 104 (<http://catalog.rider.edu/search/?P=MSD%20104>) counts as a 3-credit Free Elective.
- For the Leadership Elective, choose from LDP 200 Foundations of Leadership, LDP 220 Service Learning Through Minding Our Bus, LDP 398 The Co-op Experience Seminar, MGT 355 Team Management, or MGT 363 Management Skills.

Courses and Course Descriptions

BUS 315 Health Care Law, Ethics & Policy 3 Credits

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

Prerequisite(s): 24 credits.

ECO 336 Economics of Health Care Sys 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomic tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

Prerequisite(s): ECO 201 or HTH 205.

HTH 201 Excel for Healthcare Management and Administration 1 Credits

This course is a refresher on Excel designed to fill gaps in knowledge and application of skills for students who are preparing for their internships. Students will review the essentials of Microsoft Excel. Within seven weeks, students will learn to expertly navigate the Excel user interface, perform basic calculations with formulas and functions, professionally format spreadsheets, and create visualizations of data through charts and graphs. This course will provide students with a practical hands-on opportunity that is designed for students to gain the skills necessary to proficiently create pivot tables, analyze data, utilize more advanced Excel data tools, and interpret statistical results.

HTH 205 Introduction to Health Care 3 Credits

This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits

In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.

Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 225 Health Care Financing 3 Credits

The goals of this course are: (1) to provide a description of how Americans pay for health care; (2) to explain how payment arrangements affect the health care system; and (3) to evaluate newly emerging arrangements. Specifically, we will focus on insurance (both public and private) in the United States, provider payment reform, the incentives of the parties in these arrangements and how these incentives impact cost containment in health care.

Prerequisite(s): HTH 205 and sophomore standing.

HTH 365 Health Care Information Systems 3 Credits

The Electronic Health Record (EHR) is one of the most complex technological projects ever undertaken. EHR involves the shared management, potentially on a global scale, of a variety of private, time-sensitive, multimedia data across activities including capture, processing, storage and access. The purpose of this course is to provide the future Health Administration professional with specifics of the socio-technical issues involved in this effort. The goals of this course are to study data standards used in modern EHR systems, technology platforms used to implement EHR in various types of organizations, data governance and regulations associated with health data, analytics that support quality of care and evidence-based practice.

Prerequisite(s): HTH 205; CIS 385 or GSC 385; HTH 215 or CIS 360; and junior standing.

HTH 491 Health Management Internship 3 Credits

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.

Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

MKT 380 Health Care Marketing 3 Credits

The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.

Prerequisite(s): MKT 200; junior & senior standing.

HTH 450 Seminar in Health Research 3 Credits

Students in the course learn to conduct health administration-related research by engaging in an actual community-based research project. At the beginning of the semester, students are assigned to a health-related community-based organization. As a team, students meet with the client, devise a plan of action, collect and analyze data and other information, and write a report to the client. At the end of the semester, students present their findings to the client.

Prerequisite(s): Permission of instructor.

HTH 490 Independent Study in Health Admin 3 Credits

An independent study in health administration allows a student to conduct an in-depth exploration of a topic in health administration under the supervision of a faculty member. The project helps develop a student's research and written skills.

Prerequisite(s): JR or SR standing, Permission of Instructor.

Human Resource Management

Program Overview

Human Resource Management (HRM) professionals perform many vital business activities in organizations. As both private and public sector organizations have become more concerned about such issues as legal compliance, corporate culture, and ensuring employee work behaviors are aligned with strategic objectives, the demand for well-trained HRM professionals has increased greatly.

Practitioners in HRM are involved in a variety of important, interesting, and challenging activities. They establish and implement policies that affect such organizational functions as recruitment, selection, training and development, performance management, compensation and benefits.

Our program has been ranked among the top 20 Human Resource Management programs in the U.S., and placed as the #3 undergraduate HRM program in New Jersey by College Factual. The Society of Human Resource Management (SHRM) has acknowledged that our curriculum is fully aligned with SHRM's competency model for the HR profession. This connection to the profession, coupled with Rider's engaged learning program, makes Rider a great place to study Human Resource Management.

Curriculum Overview

Courses in the program include Introduction to Human Resource Management, Introduction to Labor Relations, Employee Selection and Training, Employee Compensation Systems, Employee Engagement, Managing Workforce Diversity, International Management, Team Management, Management Skills, and more.

Degree Offered

- B.S.B.A. in Human Resource Management

Human Resource Management Major Requirements

(21 credits)

Code	Title	Credits
Business Core		
See Business Core Requirements (p. 564)		
MGT 310	Intro to Human Resource Mgmt	3
HRM 315	Employee Selection & Training	3
HRM 316	Employee Compensation Systems	3
MGT 375	International Management	3
Select three of the following, with at least one being an HRM course:		
HRM 312	Intro to Labor Relations	9

HRM 333	Employee Engagement	
HRM 441	Sel. Topics: Human Res Mgt	
MGT 320	Managing Workforce Diversity	
MGT 346	Negotiation	
MGT 355	Team Management ¹	
MGT 363	Management Skills ¹	
MGT 410	Ethical Management	
HRM 490	Independent Research and Study	
Total Credits		21

¹ Human Resource Management majors have the option of completing MGT 355 Team Management or MGT 363 Management Skills for their major requirements as well as for their Leadership Elective requirement. If a student chooses to count MGT 355 or MGT 363 toward both the major requirements and the Leadership Elective, the student must complete 3 credits of free elective for graduation.

An average of "C" or better is required in the 21 semester credit hours required of the human resource management major. Majors are encouraged to take HRM 491 Internship in Human Res Mgt or HRM 492 Internship in Human Res Mgt as a free elective.

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

¹ Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses (MGT 375 International Management) or as free elective courses.

² For the Leadership Elective, choose from LDP 200, LDP 398, MGT 355, or MGT 363. If a Human Resource Management major takes MGT 355 or MGT 363 as their Leadership Elective, they can also count it as a Major Course Elective, and they must take an additional 3-credit Free Elective.

Notes:

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.
- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448, ECO 450.)

Courses and Descriptions

HRM 312 Intro to Labor Relations 3 Credits

This course deals with the relationship of labor unions and management, the fundamentals of collective bargaining, and labor legislation. The structure and growth of unions as well as the relationships and problems that exist among private and public sector organizations, the labor force, and government are surveyed.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 313 Legal Aspects of Human Res Mgt 3 Credits

This course deals with the various laws that affect human resource management, including social insurance, legislation, minimum wage laws, OSHA, ERISA, as well as equal employment opportunity legislation. This course is concerned not only with the provisions of these laws, but also with their constitutionality, their effects, and how they are administered.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 315 Employee Selection & Training 3 Credits

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.

Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

Prerequisite(s): MGT 310.

HRM 333 Employee Engagement 3 Credits

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

Prerequisite(s): MGT 310.

HRM 441 Sel. Topics: Human Res Mgt 3 Credits

Deals with one area of study in the field of human resource management such as protective labor legislation, mediation and arbitration, the administration of labor unions, or case problems in human resource management. The topic varies each semester and is announced at the time of registration.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or HRM major elective.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 491 Internship 1-4 Credits

Provides the student with the opportunity to supplement and apply human resource management coursework in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing work experiences. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

Prerequisite(s): Junior or Senior; Major in human resource management and MGT 310; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

HRM 492 Internship in Human Res Mgt 3 Credits

Provides the student with the opportunity to supplement and apply their human resource management classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions. 2.75 GPA overall and 3.0 GPA in the major is required.

Prerequisite(s): major in human resource management or management and leadership, and MGT 310; senior status; and permission of instructor.

Information Systems

Program Overview

Students with a major in information systems develop a solid understanding of the use, design, development, and management of information systems and information technology. Rider's information systems courses are designed to give students the opportunity to develop and manage a variety of projects that can be applied to real business settings immediately.

Increasingly, organizations that seek individuals with an information systems specialization expect excellent organizational, communication, interpersonal and analytical skills. All information systems students are encouraged to participate in a full semester co-op or summer internship experiences during their junior year.

Student Learning Outcomes

An Information Systems graduate will demonstrate the ability to:

- Create user friendly applications following the principles of good programming, syntax, logic, and structure.
- Understand, use and manage computer networking and telecommunication technologies.
- Understand, use, and manage relational databases in a business environment.
- Evaluate emerging Information Technology trends, issues, and best-practices plus their implications for business and society.
- Apply ethical reasoning to the design and use of information technologies.

Curriculum Overview

The required freshman-level information systems core course trains students to apply practical knowledge in their use of computer-based productivity tools. Core courses also allow students to develop an understanding of enterprise integration applications such as SAP R/3. The courses also explain the value of electronically integrating

the major functional areas of an organization in order to facilitate more effective management decision-making.

Students gain an understanding of the enabling information technologies (IT) that organizations use to develop and sustain a strategic and competitive position in the marketplace. Students also learn about the benefits and drawbacks of adopting and using these information technologies.

Students with a major or a minor in information systems will be able to demonstrate their understanding of information technology by applying their technical knowledge and skills to provide a practical solution to a business problem, business need or business opportunity.

Students who satisfactorily complete a minimum of three courses with at least one-third SAP hands-on content in each course have the opportunity to earn the **SAP Student Recognition Award Certificate**. Click here (p. 504) to learn more about this certificate program.

Select four of the following:		
BDA 205	Introduction to Visual Data Analytics	
CIS 220	Application Development with JavaScript and Python	
CIS 255	Intro to Game Design & Development	
CIS 260	Business Graphics	
CIS 300	Programming with Java	
CIS 309	Data Structures & Cmptr Archit	
CIS 315	Integrated Business with SAP	

CIS 319	Computer Forensics
CIS 325	User Experience Design
CIS 340	Electronic Commerce
CIS 345	Enterprise Security
CIS 350	Practical Business Analytics with Excel
CIS 360	Data Mining
CIS 370	Systems Analysis and Design Project
CIS 375	Business Process Design for a Global Economy
CIS 377	Risk Management and Compliance for Information Security
CIS 388	Design Thinking
CIS 390	Project Management
CIS 399	The Co-Operative Experience ¹
CIS 410	Selected Topics in Information Systems
CIS 430	Enterprise Integration
CIS 491	Computer Information Systems Internship
Total Credits	21

¹ The total credits that count towards the major from the internship and co-op experience cannot exceed 3.

Note:

- For graduation, the student must achieve an overall GPA of 2.0 in the major, with no course grade less than "C-".

Information Systems Minor Requirements

(15 credit program is available to all Rider University students except for Information Systems majors)

Code	Title	Credits
Gateway Course		3
CIS 185	Information Systems Essentials	
Required Courses		6
Select two of the following three courses:		
CIS 200	Application Development with JavaScript	
CIS 240	Cloud Computing Infrastructure	
CIS 330	Database Systems	
Electives		6
Select any two CIS courses from the following to fulfill the remaining requirements:		
CIS 220	Application Development with JavaScript and Python	
CIS 255	Intro to Game Design & Development	
CIS 260	Business Graphics	
CIS 300	Programming with Java	
CIS 309	Data Structures & Cmptr Archit	
CIS 315	Integrated Business with SAP	
CIS 319	Computer Forensics	
CIS 325	User Experience Design	
CIS 340	Electronic Commerce	
CIS 345	Enterprise Security	
CIS 350	Practical Business Analytics with Excel	
CIS 360	Data Mining	

CIS 370	Systems Analysis and Design Project
CIS 375	Business Process Design for a Global Economy
CIS 377	Risk Management and Compliance for Information Security
CIS 388	Design Thinking
CIS 390	Project Management

Notes:

- The above plan assumes no AP or other credits were transferred into Rider University.
- Students are required to take 6 credits of International Business Electives which can be fulfilled as major courses or as free elective courses.
- Business Honors students will have a different sequence.
- Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.
- Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.
- For the Leadership Elective, choose from LDP 398 Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service Learning Through MOB, MGT 355 Team Management, or MGT 363 Management Skills.
- Students are strongly encouraged to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448 Seminar in Small Business Consulting, ECO 450 Seminar in Economic Research).

Courses and Descriptions**CIS 185 Information Systems Essentials 3 Credits**

This course will provide students with a conceptual understanding and hands-on practice developing spreadsheets, creating effective visualizations, and utilizing relational databases. Students will also be expected to complete a project related to a current technology-related topic. At the completion of this course students will be able to apply the appropriate information systems technology tools (specifically spreadsheets, visualization applications, and relational databases) to a variety of problem solving activities.

CIS 200 Application Development with JavaScript 3 Credits

In the early 1990s, Tim Berners-Lee created a set of technologies to allow information sharing at the CERN particle accelerator in Europe. These technologies dramatically changed the face of computing and became what we know today as the Web. Understanding how to develop and manage applications for the Web is a requirement for the information system professional. Because of the ease of development, deployment, maintenance and general scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using HTML and CCS, how to control user interaction with those pages using the JavaScript programming language. The programming basics of variable declaration and usage, program flow of control, function declaration and calling, and object usage and declaration will also be shown. The use of the JQuery Javascript library to ease the development of Web pages will also be shown.

CIS 220 Application Development with JavaScript and Python 3 Credits

In the early 1990s, a set of network technologies was combined to create a platform for application development. These technologies are now referred to as the Web. Because of the ease of development, deployment, maintenance, and scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. Understanding how to develop and manage applications for the Web is vital for information systems professionals. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using the Hypertext Markup Language (HTML) and Cascading Style Sheets (CSS), and managing user interaction in those pages using the JavaScript programming language. The process of creating dynamic web pages using the PHP programming language on the Web server will also be taught.

Prerequisite(s): CIS 200.

CIS 240 Cloud Computing Infrastructure 3 Credits

Cloud computing represents a form of utilizing hardware resources in a way which allows a business to be more responsive to a changing environment. Computer networks are a critical component of cloud computing. This class will cover the components of a computer network, the process of configuring networks, and the creation and provisioning a cloud computing environment. Students will also learn the process of computer operating system installation, configuration and maintenance. Virtualization, the process of creating multiple operating system environments on a single piece of hardware will also be covered using both the Windows and Linux operating systems.

Prerequisite(s): CIS 185.

CIS 255 Intro to Game Design & Development 3 Credits

The basic concepts, logic, techniques, tools, and vocabulary associated with interactive, digital game and simulation development will be explored through a combination of lectures, discussions, and hands-on learning. Knowledge and skills derived can be applied to a wide variety of business and other organizational settings globally for interactive simulations, games, and education.

CIS 260 Business Graphics 3 Credits

Basic color theory, typography, and page/slide layout are presented. Students utilize presentation, word processing and photo editing applications to create and edit various documents through hands-on labs and projects.

Prerequisite(s): CIS 185 or permission of instructor.

CIS 270 Computer Networking 3 Credits

This course provides an introduction to business data communications and networking. The Internet and OSI models are discussed. Network technologies include local area networks, backbone, wide area networks, and the Internet. Introduction to network design, security, and network management are also provided.

Prerequisite(s): CIS 185.

CIS 300 Programming with Java 3 Credits

Students will learn the basic concepts of object-oriented programming as contrasted with traditionally structured programming and will develop applications using the Java programming language.

Prerequisite(s): CIS 200.

CIS 309 Data Structures & Cmptr Archit 3 Credits

An introduction to linked lists, stacks, queues, trees, pointers, and sorting and searching algorithms. Students will learn the technical details of data storage and manipulation along with the concepts of program execution, and will use tools such as hex-editors and debuggers.

Prerequisite(s): CIS 185 or permission of instructor.

CIS 315 Integrated Business with SAP 3 Credits

This course provides an introduction to enterprise resource planning (ERP) systems and addresses how integrated information systems improve business operations. Students will learn about functional business areas and business processes, and understand the problems inherent in un-integrated enterprise information systems. Using SAP software and case studies, students will learn how ERP systems are being used to facilitate integrated, real-time management decision making.

Prerequisite(s): CIS 185 and ACC 210.

CIS 319 Computer Forensics 3 Credits

Students will use computers to obtain and analyze evidence found on storage devices such as those confiscated under warrant, and learn how to trace digital activities. Criminal and investigative procedures will be explored in depth.

Prerequisite(s): CIS 185.

CIS 320 Cloud Computing Administration 3 Credits

Students will learn the process of creating or provisioning a cloud computing environment. Content will include the provisioning of operating system resources in a cloud environment, operating system installation, configuration and maintenance. Virtualization, the process of creating multiple operating system environments on a single piece of hardware will be covered in some detail. Troubleshooting problems in the virtualization environment and in the operating system environment will also be covered. Hands-on labs will be used throughout. Both Windows and Linux operating systems will be used.

Prerequisites: CIS 185.

CIS 325 User Experience Design 3 Credits

This course focuses on the critical role user experience plays in today's technology-driven business world. While technology advances make the design of functionality more readily in interactive products, usability plays a critical role in determining their success in the real world. Increasingly, business leaders realize the need to consider the emotional and social experiences as well as functional requirements and the steps users take to complete a task. This course explores User Experience Design (UXD), and its strategic importance in creating competitive advantage. Students will be able to discover, define, develop, and deliver a complete user experience. They will understand the role of usability and design principles, build innovative and pleasurable user experience prototypes, and validate them to achieve human, social, and business goals.

CIS 330 Database Systems 3 Credits

This course involves the study of computer databases. Major topics include relational databases, use of the structured query language (SQL) to query relational databases, and design and maintenance of relational databases.

Prerequisite(s): CIS 185.

CIS 340 Electronic Commerce 3 Credits

Students will learn about the most current e-commerce technologies and business models through readings, case studies, and hands-on projects. Students will gain experience using business data analytics tools to understand and evaluate the value of data that is generated and collected from various e-commerce platforms on the Internet.

CIS 345 Enterprise Security 3 Credits

This course introduces students to cybersecurity, the process of securing computers and the information they store. Coverage includes security attacks and attack prevention and mediation, security firewalls, PC and server security, authentication methods and procedures, and network security. Through lecture and hands-on labs students will learn how computer systems can be attacked and how computer professionals can manage the risks and potential damage from these attacks.

CIS 350 Practical Business Analytics with Excel 3 Credits

This is a required course for the Business Analytics major/minor. This course will provide the student with an opportunity to gain proficiency in analyzing and visualizing data using Excel. The learning experience includes not only classic data tools, such as PivotTables, VLOOKUP, and data visualization, but also more advanced data tools such as descriptive statistics, inferential statistics, predictive analytics, and optimization using Excel Solver.

Prerequisite(s): BDA 201.

CIS 360 Data Mining 3 Credits

This course deals with modern technologies for data analysis. Hands-on exercises for data retrieval, data visualization and predictive analytics will be carried out using up-to-date methodologies and software tools. The full data mining life cycle will be covered from recognizing business problems and opportunities amenable to data mining analysis through deploying and monitoring solutions.

Prerequisite(s): CIS 185 with a minimum grade of D .

CIS 370 Systems Analysis and Design Project 3 Credits

Topics include modeling techniques and methodologies to address the planning, analysis, design, and implementation of high quality systems, delivered on time and within budget. Using rapid application development tools, students will also construct an operational system within the span of a single semester. Issues and tools related to the management of project teams are also discussed.

Prerequisite(s): CIS 330.

CIS 375 Business Process Design for a Global Economy 3 Credits

The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Various referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.

Prerequisite(s): junior standing.

CIS 377 Risk Management and Compliance for Information Security 3 Credits

This course will use a holistic approach to examine the management of information security risk in relation to the strategic goals of the business organization. Students taking this course will learn to identify threats, threat agents, potential exploits and the information assets which will be impacted by those exploits. The risk management process will specifically examine threat agents, and the amplifiers, catalysts, and inhibitors to those threats. Using a process which assigns a weight to various threats, and a comprehensive risk analysis model will be developed.

CIS 385 Management Information Systems 3 Credits

This course will enhance students' digital dexterity and familiarity with existing and emerging information technologies, emphasizing skills of abstraction in relation to digital strategy and organizational change, innovation, analytics, and ethics. This course will also provide hands-on experience with at least one essential business technology. At the completion of the course, students will have an understanding of the business-related, policy, societal, and ethical implications associated with modern information systems.

Prerequisite(s): CIS 185 and junior or senior standing.

CIS 388 Design Thinking 3 Credits

This undergraduate course on Design Thinking provides students with a framework for dealing with unstructured problems to create innovative business solutions. Students in this course will learn about the complex and iterative process of design thinking and its several phases, including problem finding, observation, visualization and sense making, ideation, prototyping and testing, and explore the value of design thinking for creating business solutions with lasting impact. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

Prerequisite(s): JR/SR, 54+ credits, or POI.

CIS 390 Project Management 3 Credits

This course introduces students to general project management, the process of organizing resources to achieve business goals. Topics include the identification, approval, analysis, and general management of complex business projects. Project management tools, reports, techniques, and approaches will be covered.

Prerequisite(s): CIS 185.

CIS 399 The Co-Operative Experience 6 Credits

The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their computer information systems and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Eligible students include junior computer information systems majors with a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in any computer information systems coursework completed prior to submission of the co-op application. Three of the co-op credits can be applied toward the computer information systems major, and three credits can be applied toward business or free elective requirements. Grading is on a pass/fail basis.

Prerequisite(s): Completion of two of the three courses: CIS 200, CIS 270, and CIS330.

CIS 410 Selected Topics in Information Systems 3 Credits

Information and communication technologies are evolving rapidly and continually. The Special Topics course facilitates the exploration of a selected topic (or combination of topics) that represents a recent technological advance with important and direct implications in the field of computer information systems. Current research, readings, lectures, discussions and/or hands-on computer experience or other appropriate measures will be employed to stimulate student learning.

Prerequisite(s): to be determined by instructor.

CIS 430 Enterprise Integration 3 Credits

The major focus of this course includes the forces driving enterprise integration as well as the management decisions associated with the design and implementation of enterprise systems. Students will use SAP ERP extensively to configure, build, test, and implement an enterprise system for a real business environment from the ground up.

Prerequisite(s): CIS 315.

CIS 490 Independent Study: Research and Creative Expression 1-4 Credits

Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

Prerequisite(s): permission of instructor.

CIS 491 Computer Information Systems Internship 3 Credits

This is an honors course that provides the student with approximately two months of supervised employment with participating companies. Students are given a variety of information technology experiences. They are required to complete a term paper and/or to make an oral presentation to the faculty. Grading is on a pass/fail basis.

Prerequisite(s): permission of instructor.

MSD 104 Intro to Quantitative Methods 3 Credits

The aim of this course is to give students the preparation in algebra needed for successful completion of other required courses in management sciences and the functional areas of business administration. Topics covered include linear and quadratic equations and functions, systems of linear equations, exponential functions, logarithms, linear inequalities, radicals, percent change, scientific notation and scientific digits.

MSD 105 Quantitative Methods for Business 3 Credits

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 110 Math for Actuarial Science I 3 Credits

The first of two courses designed to give the actuarial science student the necessary background in calculus. Topics include a brief review of a function, and introduces limits and continuity, the derivative and its applications, implicit differentiation, differentiating an inverse function, differentials, related rates, curve sketching, optimization problems, L'Hopital's rule, and an introduction to the indefinite integral. Fall.

MSD 111 Math for Actuarial Science II 3 Credits

A continuation of MSD 110. Topics include the definite integral and the fundamental theorem of calculus, change-of-variable theorems, the area between two graphs, integration by parts, improper integrals, infinite series, partial differentiation of a function of two variables and its optimization applications, and the double integral of a function of two variables.

MSD 205 Business Statistics 3 Credits

This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.

Prerequisite(s): MSD 105.

MSD 301 Operations Management 3 Credits

This course introduces students to the concepts and techniques necessary to manage firm operations. The course emphasizes enhancing students' ability in problem-solving and decision-making by (1) identifying operations problems, (2) structuring decision-making process, (3) evaluating options that provide resolution of the problems using appropriate and proven techniques. It is well recognized that today's global business competition is among supply chains. Operations management concentrates on the supply side of the corporate strategy of a supply chain, where the bulk of the organization resources are committed. Good management of operations, which may also be called management of supply chain operations, is crucial in achieving an effective supply chain. The emphasis on systematic thinking and analytic decision model discussed the course will also provide students with necessary skills and useful tools in the emerging field of Business Analytics.

Prerequisite(s): MSD 200 or MSD 205 or MTH 341.

MSD 320 Statistics for Risk Modeling I 3 Credits

This is the first course in a two course sequence to prepare actuarial science students for the Society of Actuaries' (SOA) new exam "Statistics for Risk Modeling." This course (SRM I), together with the second course of the sequence SRM II, cover all the topics in the SOA's proposed syllabus for the exam. The course covers two major topics: (i) Generalized Linear Models, and (ii) Regression-based time series models and forecasting.

Prerequisite(s): MSD 205 or MTH 341.

MSD 325 Statistics for Risk Modeling II 3 Credits

This is the second course in the two course sequence to prepare actuarial science students for the Society of Actuaries (SOA) new exam "Statistics for Risk Modeling." This course, together with MSD 320, will cover all the topics in the SOA's proposed syllabus for the exam. This course examines the use of statistical learning methods to adequately model and understand complex datasets in business and economics. The use of the statistics software R to analyze realistic data sets is an important component of the course. Topics include: (i) Basics of Statistical Learning; (ii) Principal Components Analysis; (iii) Decision Trees; and (iv) Cluster Analysis.

Prerequisite(s): MSD 205 or MTH 341 or equivalent course.

MSD 350 Financial Mathematics 3 Credits

A thorough treatment of the theory and applications of compound interest. Topics include the measurement of interest, elementary and general annuities, amortization schedules and sinking funds, and bonds and other securities.

Prerequisite(s): MSD 205 or equivalent. Fall.

MSD 490 Independent Research and Study 3 Credits

Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

MSD 491 Summer Mgt Sciences Internship 3 Credits

An honors course that provides the student with approximately two months of supervised employment with participating companies. Students are given a variety of work experiences. They are required to complete a term paper and to make an oral presentation to the faculty. Grading is on a pass/fail basis.

Prerequisite(s): Permission of instructor.

International Business

Program Overview

The international business co-major is designed to enable students in the Norm Brodsky College of Business to expand the breadth and depth of their knowledge by combining international business with another business major.

Concurrent business majors include accounting, actuarial science, business administration, business analytics, economics, entrepreneurial studies, finance, global supply chain management, health care management, human resource management, information systems, management and leadership, marketing, organizational psychology, and sport management.

Student Learning Outcomes

An international business graduate will demonstrate the ability to:

- analyze cultural groups to discover how their differences affect their relation to one another;
- analyze cultural differences and rules regarding business practices;
- articulate how their own sense of culture has developed responsiveness to other cultures;
- identify culturally conscious communication practices with other cultures.

Curriculum Overview

Students in the international business co-major take four international business electives from a list including such courses as international advertising, international business law, business of global sport, business process design for a global economy, international trade and investment, comparative economic systems, international entrepreneurship, international finance, international management, and international marketing. Students may also use an independent research and study (CBA 490) with an international business focus to count as an international business elective.

Students also take an experiential elective such as a global business internship, a global business study tour, independent study or a study abroad program.

To further expand students' global perspective, international business co-majors are required to take a global liberal arts elective course. This can count as one of the four liberal arts electives required for the degree.

Degree Offered

- B.S.B.A. in International Business

SPA 311	Latin American Cultures

Any foreign language elective

Total Credits **18**

¹ A semester-long study abroad program may be used to count toward this requirement.

² International Business majors can use IND 210 to fulfill the Experiential Elective requirement or the Global Liberal Arts requirement but not both.

Courses and Descriptions

BUS 375 International Business Law 3 Credits

This course considers the impact of international organizations and treaties on global business and examines the various methods of international dispute resolution. Important legal and ethical issues related to conducting business overseas are discussed including the topics of labor and employment rights, environmental law, and intellectual property.

Prerequisite(s): 54 credits.

CIS 375 Business Process Design for a Global Economy 3 Credits

The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Various referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.

Prerequisite(s): junior standing.

ECO 305 Internatl Trade and Investment 3 Credits

Studies the theory, institutions, and structures underlying the international flow of trade and investment. Topics are: the theory of international trade; balance of payment analysis; the international monetary system; adjustment to balance of payment disequilibrium; regional economic integration; the economic effects of trade restrictions; and trade and foreign investment problems of developing nations.

Prerequisite(s): ECO 200 and ECO 201.

ECO 315 Comparative Economic Systems 3 Credits

Provides a conceptual framework for classifying and comparing economic systems. Presents theory of the capitalist market economy and case studies of the U.S., Japanese, French, and Swedish economies. Examines theory of the centrally planned economy, its transition, and case studies of the Soviet and its successor states, Chinese, and East European economies. Case studies are necessarily limited, concentrating on selected topics, such as transition strategies, industrial policy, etc.

Prerequisite(s): ECO 200 and ECO 201.

ENT 375 International Entrepreneurship 3 Credits

Students will learn how new or small ventures enter international markets. Requirements include developing a case about starting or running a venture in a single country of the student's choice.

Prerequisite(s): MGT 201 and junior standing.

FIN 308 International Finance 3 Credits

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

Prerequisite(s): FIN 220.

GSC 115 Introduction to Global Supply Chain Mgt. 3 Credits

This course introduces students to components of global supply chains and issues of managing the global supply chain. It is designed as a survey course to give first or second year business students a general view of supply chain management at both domestic and international levels, as well as familiarize them with basic concepts and major challenges of supply chain management. Delivery of course material will include lectures and guest speakers from industry, and in-class logistics mini cases.

MGT 375 International Management 3 Credits

This course explores the ways in which culture impacts management practices and organizational behavior and dynamics. Topics include cross cultural communication, expatriate selection and training, leading and motivating cross cultural teams, developing organizational strategies to compete in a global market place, international business ethics, and current topics.

Prerequisite(s): MGT 201.

MKT 330 International Marketing 3 Credits

This course examines the global marketplace and the complexities of its environmental influences, and necessary adaptations in formulating the strategies for product, pricing, promotion, channel and supply chain management.

Prerequisite(s): MKT 200; 30 credits completed.

MKT 369 International Advertising 3 Credits

This course introduces students to the general landscape of international advertising with emphasis on understanding the opportunities and challenges entailed in international advertising management. The course will cover the subject from three aspects, including the international advertising environment, the international advertising industry, and international advertising strategies.

Prerequisite: MKT 200; 30 credits completed.

SPT 320 Business of Global Sport 3 Credits

The course explores the diverse challenges and issues facing the managers of sport enterprises in the context of the global marketplace. Issues of governance, cross-cultural interactions and business activities will be examined as they relate to modern sport at the international level. By evaluating case studies and examining current issues in the field, students will gain an understanding of the relationships and responsibilities associated with being a business professional in the global sport industry.

Legal Studies

Program Overview

The Legal Studies minor provides students with an in-depth knowledge and understanding of the nature and development of law, legal institutions and processes, and the relationship ethical and social issues in the business world. Courses in the program include a wide spectrum of academic departments and programs so students may benefit from studying law from diverse perspectives. Students can focus their course of study around their specific career goals by completing the required courses and selecting from a range of elective courses within the program. In addition, the Legal Studies minor can often be combined with other major and minor programs.

Degree Offered:

- Minor in Legal Studies

LAW 310	Cyberspace Law and Policy	3
LAW 355/SPT 355	Sports and the Law	3
LAW 490	Independent Study: Research and Creative Expression	3
LAW 491	Internship in Law and Justice	3
POL 300	U.S. Constitutional Law	3
Total Credits		18

Note:

Business majors may double-count a maximum of two courses toward another program.

Courses and Descriptions

BUS 210 Intro to Law: Contracts 3 Credits

An introduction to the origin of current law, with emphasis on the development of business law, students are exposed to legal terminology and acquainted with the system of application of rules of law to actual situations. The laws of contracts, particularly common-law developments, are considered in great detail.

BUS 211 Commercial Law 3 Credits

The law as related to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code is considered in depth. Warranties, guarantees, remedies, and product liability are explored. The laws of bankruptcy and insurance are also considered.

Prerequisite(s): BUS 210.

BUS 214 Advanced Business Law 3 Credits

This course provides students with an introduction to the fundamentals of individual and organizational forms of doing business. The laws governing agency, partnerships, corporations, and the purchase and sale of securities will be explored. The legal consequences of the relationships, and the rights and duties of the parties and entities will be discussed, as will the rules of law governing real, personal, and intellectual property, including the transfer of title to real property, the various types of bailments, the landlord-tenant relationship, and the laws concerning wills, trusts, and estates. The concerns of businesses that compete in the global environment through the study of international law will also be discussed. This course replaces the property (BUS 213) and business associations (BUS 212) courses; you may not take this course if you have taken either of these courses.

Prerequisite(s): BUS 210.

BUS 300 The Legal and Ethical Environment of Business 3 Credits

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

Prerequisite(s): 54 credits.

BUS 315 Health Care Law, Ethics & Policy 3 Credits

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

Prerequisite(s): 24 credits.

BUS 375 International Business Law 3 Credits

This course considers the impact of international organizations and treaties on global business and examines the various methods of international dispute resolution. Important legal and ethical issues related to conducting business overseas are discussed including the topics of labor and employment rights, environmental law, and intellectual property.

Prerequisite(s): 54 credits.

BUS 444 Selected Topics Business Policy 3 Credits

The study of a selected topic of contemporary interest related to one or more of the following: strategic management, business law, business ethics, social responsibility, legal environment of business. Readings, research, lectures, discussions, and other methods will be used.

Prerequisite(s): to be determined by instructor.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

HIS 301 Constitutional History of U.S. 3 Credits

Surveys the English, Colonial, and Confederation backgrounds of American law and constitutionalism; the framing, adoption, and implementation of the Federal Constitution and its later development; the role of law in the nation's history; the changing interpretations of federalism; the growth of judicial review; and the increasing role of the Supreme Court.

HRM 312 Intro to Labor Relations 3 Credits

This course deals with the relationship of labor unions and management, the fundamentals of collective bargaining, and labor legislation. The structure and growth of unions as well as the relationships and problems that exist among private and public sector organizations, the labor force, and government are surveyed.

Prerequisite(s): MGT 310 or permission of instructor.

LAW 305 Trial Advocacy 3 Credits

Students will apply fundamental legal concepts and rules of evidence to specific cases. By engaging in trial simulations, students will evaluate various forms of evidence, identify legal principles and evidentiary rules that impact a criminal trial, learn about trial procedures, pursuit of case theories, and witness, exhibit and jury selection.

LAW 308 Conflict & Conflict Resolution 3 Credits

Focuses on understanding the meaning of conflict and strategies for its resolution. The course examines the ways conflict functions in various social contexts including professional, community, family, education, and international relations. Traditional models of adjudication will be compared to alternative forms of dispute resolution. Students will be introduced to research on the practice and effectiveness of various forms of conflict and conflict resolution. Students will participate in various class exercises, including role-plays, simulations, and case studies.

LAW 310 Cyberspace Law and Policy 3 Credits

Explores the legal and policy concerns raised by the Internet, nationally and globally. The course considers issues of legal regulation of the Internet, and consider the debate about whether cyberspace can or should be regulated. Attention will be given to the applicability of principles of law and models of regulation. Topics addressed will include jurisdiction, freedom of expression, intellectual property, privacy protection, safety concerns, equal access, electronic commerce, and computer crime.

LAW 355 Sports and the Law 3 Credits

Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. Note: This course is cross-listed as SPT 355. Students may not get credit for both LAW 355 and SPT 355.

LAW 450 Law & Justice Senior Seminar 3 Credits

Draws on and develops students' knowledge and understanding of law and legal institutions and applies it to a specific legal topic, method, institution, or controversy. Topics will vary. Students explore the social, political, ethical, and economic issues relevant to the topic. Students will be expected to contribute to seminar discussions and to complete projects related to the seminar theme. Required for seniors in law and justice minor and open to others by permission of the Director of the Law and Justice Program.

LAW 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

LAW 491 Internship in Law and Justice 1-4 Credits

Provides supervised work experience in an institution, office, or agency related to law or law enforcement, such as courts, prosecutor/defense attorney offices, private law offices, state agencies, and local police departments. Students are expected to apply and broaden the knowledge obtained from law and justice minor courses to their fieldwork experience.

Prerequisite(s): 2.75 GPA and permission of the Director of the Law and Justice program.

POL 300 U.S. Constitutional Law 3 Credits

The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as HLS 300. Students may not get credit for both HLS 300 and POL 300.

Management and Leadership

Program Overview

The manager's job is fast-paced and requires the ability to make decisions and facilitate the work of others. The management and leadership major gives students the knowledge and skills they need to compete in a rapidly changing global marketplace. Firms of all sizes and in all fields need good managers who know how to motivate subordinates, manage teams, resolve conflicts, and lead by example. Businesses want new employees who can handle themselves as subordinates, supervisors, and team members. Whether students are looking for a position with a medium to large organization or thinking of starting companies of their own, the management and leadership major provides the knowledge and skills they will need to be successful.

Curriculum Overview

Courses in the program include Team Management, Management Skills, Introduction to Human Resource Management, Managing Workforce Diversity, Ethical Management, Small Business Management, Negotiation, International Management, Advanced Leadership, and more.

¹ Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses (MGT 375 International Management) or as free elective courses.

² The Leadership Elective requirement is not listed because MGT 355 Team Management and MGT 363 Management Skills (required for the Management major) both satisfy the Leadership Elective requirement. An additional 3-credit free elective has been added.

Additional Notes:

- This accelerated plan assumes no AP or other credits were transferred into Rider University.
- Business Honors students will have a different sequence.

- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448, ECO 450.)

MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored. **Prerequisite(s):** minimum 30 credits completed.

MGT 310 Intro to Human Resource Mgmt 3 Credits

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline. **Prerequisite(s):** MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth. **Prerequisite(s):** MGT 201 or PSY 210.

MGT 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 329L Research Methods: Org Psy Lab 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 336 Career Management 3 Credits

How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this course.

The meaning of work and the development of careers are discussed, and students undertake self-assessment for the purpose of career planning. Careers are examined in the context of important changes occurring today in the world of work. The impact of the executive, organizational counselors and trainers, and the educational system upon the development of human potential is examined, along with the techniques for human resource planning and development.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 346 Negotiation 3 Credits

The purpose of this course is first, to explore the major concepts and theories behind effective negotiating practices and second, to develop negotiating skills applicable to a wide range of contexts. A knowledge of negotiation is a crucial requirement for anyone interested in a business career since it is a common mechanism for implementing change and for resolving conflict in the workplace. Topics will include two-party negotiations, power and politics, mediation, arbitration, and collective bargaining. A variety of teaching techniques will be used including readings, discussion, and role-playing.

Prerequisite(s): MGT 201 or permission of the instructor.

MGT 355 Team Management 3 Credits

This course prepares students to work in organizations that use teams as an integral part of their functioning—an increasingly common practice.

The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

Prerequisite(s): MGT 201 or PSY 210.

MGT 363 Management Skills 3 Credits

The focus of this course is on specific skills necessary for success in a management role. These skills include leading, communicating effectively, delegating, conflict and time management and motivating others. Students will have opportunities to practice skills and to apply their knowledge to business cases.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 375 International Management 3 Credits

This course explores the ways in which culture impacts management practices and organizational behavior and dynamics. Topics include cross cultural communication, expatriate selection and training, leading and motivating cross cultural teams, developing organizational strategies to compete in a global market place, international business ethics, and current topics.

Prerequisite(s): MGT 201.

MGT 399 Co-Op in Management and Leadership 6 Credits

This co-op program provides management students with an opportunity to work full-time in a company and apply what they have learned in their Management and Leadership classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a work journal and reflection paper. Supervising faculty will meet with the student regularly to discuss their progress and accomplishments in the co-op. Co-op credits can be applied toward business or free elective requirements.

Prerequisites: Junior status with a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in the major.

MGT 410 Ethical Management 3 Credits

Managers today face a broad range of ethically challenging situations. This course will help students to confront and analyze ethical dilemmas effectively in the workplace. Cases, simulations, hands-on content will engage students with the material, and will generate robust class discussion.

Prerequisite(s): Completion of MGT 201 and Leadership Requirement course.

MGT 421 Sel Topics:Mgt & Organztn Behv 3 Credits

The seminar focuses on an area of study announced at the time of registration (students should check the registration material). Examples of possible topics are: leadership, motivation, and organizational behavior research. Prerequisites vary according to the topic and are listed in the registration material.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 450 Advanced Leadership 3 Credits

Leadership is the ability to influence a group of people towards a goal. In this course, students will increase their own leadership capacities so that they can become effective leaders of organizations and teams. They will integrate what they have learned from their experience and other coursework with diverse reading and writing assignments and team projects as they explore complex leadership issues related to vision, communication, motivation, ethics, team dynamics, power, and change management.

Prerequisite(s): MGT 201; Leadership elective (LDP 200, LDP 220, LDP 398, MGT 355, MGT 363).

MGT 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 491 Intern Management/Org Behavior 3 Credits

Provides the student with the opportunity to supplement and apply their management and leadership classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

Prerequisite(s): major in management and leadership or human resource management and MGT 363, or senior status; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

Management and Leadership/Human Resource Management Double Major

Program Overview

Rider's management and leadership major gives students the knowledge and skills they need to compete in a rapidly changing global marketplace. Whether students are looking for a position with a medium to large organization or thinking of starting companies of their own, the management and leadership major provides the knowledge and skills they will need to be successful.

Human Resource Management (HRM) professionals are vital to organizations. With private and public-sector organizations becoming more concerned with issues such as legal compliance, corporate culture and ensuring employee work behaviors are aligned with strategic objectives, the demand for well-trained HRM professionals is constantly growing. They establish and implement policies that affect such organizational functions as recruitment, selection, training and development, performance management, compensation and benefits.

Curriculum Overview

Management and Leadership

Rider's management and leadership major opens the possibility of becoming a manager and leader in any industry or field. Businesses want their new employees to handle themselves as subordinates, supervisors and team members. Our management and leadership major provides hands-on training in these people skills. The major also provides students with a comprehensive understanding of management theories, so that students don't have to learn what works and what doesn't by trial-and-error on-the-job.

Human Resource Management

Human resource management professionals establish and implement policies that influence recruitment, selection, training and development of employees. They also work in areas of development, performance management, compensation, and benefits. HRM professionals may be involved with human resource planning, job design and developing and implementing strategy.

Our HRM program has been ranked among the top 20 Human Resource Management programs in the US, and placed as the #3 undergraduate HRM program in New Jersey by College Factual. The Society of Human Resource Management (SHRM) has acknowledged that our curriculum is fully aligned with SHRM's competency model for the HR profession. This connection to the profession, coupled with Rider's engaged learning program, makes Rider a great place to study Human Resource Management.

The department majors are valuable for students who want to pursue graduate studies in HRM, management, law and psychology. The majors may be taken alone, together or in combination with another major offered by the College of Business Administration.

¹ CIS 185 Information Systems Essentials can be taken in the Fall or Spring of Year 1.

² Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

³ Students are required to complete 6 credits of International Business Electives which can be fulfilled as major courses or as free electives.

Note: The Leadership Elective requirement is not listed because MGT 355 (Team Management) and MGT 363 (Management Skills) which are required for the Management & Leadership major both satisfy the Leadership Elective requirement. An additional 3-credit free elective has been added.

HRM 312 Intro to Labor Relations 3 Credits

This course deals with the relationship of labor unions and management, the fundamentals of collective bargaining, and labor legislation. The structure and growth of unions as well as the relationships and problems that exist among private and public sector organizations, the labor force, and government are surveyed.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 313 Legal Aspects of Human Res Mgt 3 Credits

This course deals with the various laws that affect human resource management, including social insurance, legislation, minimum wage laws, OSHA, ERISA, as well as equal employment opportunity legislation. This course is concerned not only with the provisions of these laws, but also with their constitutionality, their effects, and how they are administered.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 315 Employee Selection & Training 3 Credits

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.

Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

Prerequisite(s): MGT 310.

HRM 333 Employee Engagement 3 Credits

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

Prerequisite(s): MGT 310.

HRM 441 Sel. Topics: Human Res Mgt 3 Credits

Deals with one area of study in the field of human resource management such as protective labor legislation, mediation and arbitration, the administration of labor unions, or case problems in human resource management. The topic varies each semester and is announced at the time of registration.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or HRM major elective.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 491 Internship 1-4 Credits

Provides the student with the opportunity to supplement and apply human resource management coursework in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing work experiences. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

Prerequisite(s): Junior or Senior; Major in human resource management and MGT 310; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

HRM 492 Internship in Human Res Mgt 3 Credits

Provides the student with the opportunity to supplement and apply their human resource management classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions. 2.75 GPA overall and 3.0 GPA in the major is required.

Prerequisite(s): major in human resource management or management and leadership, and MGT 310; senior status; and permission of instructor.

MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

Prerequisite(s): minimum 30 credits completed.

MGT 310 Intro to Human Resource Mgmt 3 Credits

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

Prerequisite(s): MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves.

Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.

Prerequisite(s): MGT 201 or PSY 210.

MGT 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 329L Research Methods: Org Psy Lab 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 336 Career Management 3 Credits

How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this course. The meaning of work and the development of careers are discussed, and students undertake self-assessment for the purpose of career planning. Careers are examined in the context of important changes occurring today in the world of work. The impact of the executive, organizational counselors and trainers, and the educational system upon the development of human potential is examined, along with the techniques for human resource planning and development.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 346 Negotiation 3 Credits

The purpose of this course is first, to explore the major concepts and theories behind effective negotiating practices and second, to develop negotiating skills applicable to a wide range of contexts. A knowledge of negotiation is a crucial requirement for anyone interested in a business career since it is a common mechanism for implementing change and for resolving conflict in the workplace. Topics will include two-party negotiations, power and politics, mediation, arbitration, and collective bargaining. A variety of teaching techniques will be used including readings, discussion, and role-playing.

Prerequisite(s): MGT 201 or permission of the instructor.

MGT 355 Team Management 3 Credits

This course prepares students to work in organizations that use teams as an integral part of their functioning—an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

Prerequisite(s): MGT 201 or PSY 210.

MGT 363 Management Skills 3 Credits

The focus of this course is on specific skills necessary for success in a management role. These skills include leading, communicating effectively, delegating, conflict and time management and motivating others. Students will have opportunities to practice skills and to apply their knowledge to business cases.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 375 International Management 3 Credits

This course explores the ways in which culture impacts management practices and organizational behavior and dynamics. Topics include cross cultural communication, expatriate selection and training, leading and motivating cross cultural teams, developing organizational strategies to compete in a global market place, international business ethics, and current topics.

Prerequisite(s): MGT 201.

MGT 399 Co-Op in Management and Leadership 6 Credits

This co-op program provides management students with an opportunity to work full-time in a company and apply what they have learned in their Management and Leadership classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a work journal and reflection paper. Supervising faculty will meet with the student regularly to discuss their progress and accomplishments in the co-op. Co-op credits can be applied toward business or free elective requirements.

Prerequisites: Junior status with a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in the major.

MGT 410 Ethical Management 3 Credits

Managers today face a broad range of ethically challenging situations. This course will help students to confront and analyze ethical dilemmas effectively in the workplace. Cases, simulations, hands-on content will engage students with the material, and will generate robust class discussion.

Prerequisite(s): Completion of MGT 201 and Leadership Requirement course.

MGT 421 Sel Topics:Mgt & Organztn Behv 3 Credits

The seminar focuses on an area of study announced at the time of registration (students should check the registration material). Examples of possible topics are: leadership, motivation, and organizational behavior research. Prerequisites vary according to the topic and are listed in the registration material.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 450 Advanced Leadership 3 Credits

Leadership is the ability to influence a group of people towards a goal. In this course, students will increase their own leadership capacities so that they can become effective leaders of organizations and teams. They will integrate what they have learned from their experience and other coursework with diverse reading and writing assignments and team projects as they explore complex leadership issues related to vision, communication, motivation, ethics, team dynamics, power, and change management.

Prerequisite(s): MGT 201; Leadership elective (LDP 200, LDP 220, LDP 398, MGT 355, MGT 363).

MGT 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 491 Intern Management/Org Behavior 3 Credits

Provides the student with the opportunity to supplement and apply their management and leadership classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

Prerequisite(s): major in management and leadership or human resource management and MGT 363, or senior status; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

Marketing

Program Overview

A degree in marketing provides students with the knowledge they need to compete in today's global marketplace. Graduates from the marketing program enter the workforce with a strong background in business, a critical understanding of consumer behavior, ad trends and the know-how needed to reach target audiences and to promote services and products.

Student Learning Outcomes:

A marketing graduate will demonstrate the ability to:

- apply knowledge of the interaction of marketing mix variables with environmental variables and the resulting outcome;
- apply ethical thinking to decision making;
- work with others in team environment;
- use current and emerging technology in the field of marketing;
- demonstrate basic professional skills in oral communication;
- demonstrate basic professional skills in written communication.

Curriculum Overview

As a marketing major at Rider, students have the choice of pursuing one of five marketing tracks: general marketing, advertising, digital marketing, pharmaceutical and health care marketing, or professional selling. These tracks provide all marketing majors with the foundation of knowledge and skills necessary for a marketing career while offering students the opportunity to focus their curriculum on a path that best suits their career interests and goals.

Possible employment opportunities can be found with profit and non-profit and public or private organizations marketing goods or services to consumers, businesses or other organizations.

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Marketing General Concentration (p. 391)
Advertising Concentration (p. 392)
Digital Concentration (where COM 212 is selected) (p. 392)
Digital Concentration (where BDA 205 is selected) (p. 393)
Health Care and Pharmaceutical Concentration (p. 394)
Professional Selling Concentration (p. 394)

¹ CIS 185 Information Systems Essentials and CBA 110 Business in Action can be taken in the Fall or Spring of Year 1.

² Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3-credit Free Elective.

Notes:

- The plans above assume no AP or other credits were transferred into Rider University.
- Business Honors students may have a different sequence.

- For the Leadership Elective, select either LDP 398 Co-op Experience Seminar, LDP 200 Foundations of Leadership, LDP 220 Service Learning, MGT 355 Team Management, or MGT 363 Management Skills.

- **Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits may be any other course offered by the College of Arts and Sciences.**

- Students are required to complete 6 credits of International Business electives. Marketing majors may only count 3 credits of International Business electives in their major.

- Students are strongly suggested to complete a credit-bearing experiential course (e.g., internship, co-op, study tour, study abroad, ENT 448 Seminar in Small Business Consulting, or ECO 450 Seminar in Economic Research.)

3 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Marketing General Concentration (p. 395)

Advertising Concentration (p. 396)

Digital Concentration (where COM 212 is selected) (p. 397)

Digital Concentration (where BDA 205 is selected) (p. 398)

Health Care and Pharmaceutical Concentration (p. 398)

Professional Selling Concentration (p. 399)

Courses and Descriptions

MKT 200 Marketing Principles 3 Credits

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

Prerequisite(s): 15 credits.

MKT 205 Advertising Principles 3 Credits

Basic theory, functions, principles, and applications of advertising are the focus of this course. The relation of advertising to our economy, the advertising department and the ad agency, selection of media, advertising practices, and the use of research to improve advertising techniques are covered.

Prerequisite(s): MKT 200.

MKT 250 Retailing Management 3 Credits

The principles underlying successful retailing are analyzed within the framework of the strategic-planning process. Topics covered include location, merchandise planning, customer service, image, atmosphere, layout, pricing, promotion, personnel and operations management.

Prerequisite(s): MKT 200.

MKT 260 Service Marketing 3 Credits

Focuses on the unique challenges of managing services and delivering quality service to customers. Emphasis is placed on the total organization, and how effective marketing and customer focus must be coordinated across multiple functions. The course is applicable to service organizations and to organizations that depend on service excellence for competitive advantage. Topics include customer-focused management, and customer satisfaction, retention, lifetime value and profitability. Students will learn to map services, understand customer expectations, and develop relationship marketing strategies.

Prerequisite(s): MKT 200.

MKT 280 Sports Marketing 3 Credits

The course focuses on the unique challenges of marketing sports at a variety of levels: youth, college, professional, and international. The challenges of attracting and retaining fans and participants as well as of building and maintaining strong brand identity are at the heart of the course content. By evaluating case studies and examining current issues in sports marketing, students will gain an understanding of what it means to be a professional marketer of a sports organization and/or event.

Prerequisite(s): MKT 200.

MKT 310 Business to Business Marketing 3 Credits

This course examines the business-to-business marketplace, and the planning and control tools used by its entities in managing the product, pricing, promotion, channel and supply chain management strategies.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 320 Consumer Behavior 3 Credits

The nature and determinants of consumer behavior are studied, with attention given to the influence of socio-psychological factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumer attitudes, consumption patterns, and purchasing behavior.

Prerequisite(s): MKT 200.

MKT 330 International Marketing 3 Credits

This course examines the global marketplace and the complexities of its environmental influences, and necessary adaptations in formulating the strategies for product, pricing, promotion, channel and supply chain management.

Prerequisite(s): MKT 200; 30 credits completed.

MKT 340 Personal Selling 3 Credits

Examines persuasive techniques utilized in sales presentations conducted on a person-to-person basis. Major course emphasis is on developing effective selling techniques; understanding the company, its products and the role of the salesperson in implementing product/market strategies; understanding the customers and the selling environment; application of effective sales presentation techniques; recognizing selling opportunities and careers.

Prerequisite(s): MKT 200; 30 credits completed.

MKT 345 Customer Focus 3 Credits

Marketing supply chain management programs are concerned with the creation and delivery of value to customer and organizations. No longer simply the domain of the warehouse manager or logistics director, supply chain management is viewed by most companies as a mission-critical element. Marketing focuses on developing an understanding of customers and markets, creating products and services based on that understanding, and communicating and delivering the value added. This course will teach the student the essential role of marketing in all aspects of successful supply chain management - relationship management, technological and financial - and it will help the student understand the structure, functions, principles and methods employed in discovering and translating consumer needs and wants into product and service specifications and then transferring these goods and services from producers to consumers or end users.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 350 Retailing Management 3 Credits

The principles underlying successful retailing are analyzed within the framework of the strategic-planning process. Topics covered include location, merchandise planning, customer service, image, atmosphere, layout, pricing, promotion, personnel and operations management.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 366 Marketing Research 3 Credits

Topics include specific research procedures in gathering, processing, analyzing, and presenting information relevant to marketing problems: advertising planning and effectiveness; product development; distribution channels; sales techniques; consumer behavior; and forecasting. Student learning about research planning, implementation, and interpretation is facilitated by the use of projects or cases.

Prerequisite(s): MKT 200 and MSD 205; junior standing.

MKT 367 Marketing Web Analytics 3 Credits

This course teaches web analytics through practical applications with a focus on deriving actionable insights. It provides a broad overview of key web analytics strategies, concepts, issues, challenges and tools. Topics covered include: • How to choose a web analytics tool • Metrics and key performance indicators • Best ways to analyze effectiveness of blogs, marketing campaigns, SEO, SEM and emails • How to utilize quantitative, qualitative and competitive tools to derive actionable insights • How to optimize web sites by incorporating testing and experimentation • Analytics in social, mobile and video • Best practices and pitfalls in web analytics.

Prerequisite(s): MKT 200; junior or senior standing.

MKT 369 International Advertising 3 Credits

This course introduces students to the general landscape of international advertising with emphasis on understanding the opportunities and challenges entailed in international advertising management. The course will cover the subject from three aspects, including the international advertising environment, the international advertising industry, and international advertising strategies.

Prerequisite: MKT 200; 30 credits completed.

MKT 370 Internet Marketing 3 Credits

This course emphasizes the discipline of internet marketing, including practices of leading online marketing companies, state of the art online research and demonstrates how the Internet is creating value for customers and profits for businesses while also fitting into a firm's complete marketing strategy. This course will provide a strategic and tactical toolkit for the online marketer, help students understand how and why the Internet is changing traditional marketing and allow students to develop the skills, strategies and tactics important to develop successful Internet marketing plans.

Prerequisite(s): MKT 200 and CIS 185; junior & senior standing.

MKT 375 Digital Advertising and Social Media 3 Credits

This course surveys the concepts, principles, practices and industry standards of digital advertising, including standard display and rich media advertising, search advertising, email advertising, game advertising, and mobile advertising. It also introduces the strategies and tactics in social media marketing. The course emphasizes a strategic, holistic view of digital advertising and social media as marketing communication tools that are situated in the marketing strategic framework and employed to engage consumers in community building.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 380 Health Care Marketing 3 Credits

The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 435 Advertising Campaigns 3 Credits

This capstone course for advertising majors provides an opportunity for students to plan comprehensive advertising campaigns. Coverage includes segmentation research, creative development of the campaign, media planning, and determining advertising effectiveness. Integration of advertising into the marketing program will be emphasized.

Prerequisite(s): MKT 205 + additional 9 credits from the Marketing courses for the Advertising Concentration; senior standing.

MKT 440 Sales Management 3 Credits

By means of lectures, discussions, and case studies, the field of marketing management is analyzed from the viewpoint of sales executives. The responsibilities for planning and administering personal selling operations are emphasized. Considerable attention is given to other activities for which sales executives may be wholly or jointly responsible, such as decision making on promotion and brand management.

Prerequisite(s): MKT 200 and senior standing.

MKT 444 Special Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations, as well as special applications of marketing decision-making, may be explored. Readings, research, lectures, discussions, or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): MKT 200; any additional prereqs requested by the instructor.

MKT 460 Marketing Management Seminar 3 Credits

This capstone course for marketing majors employs a top management approach to the overall marketing task, including planning, organizing, controlling, and integrating all the activities of the marketing program. Integration of marketing with other operations of the business unit is emphasized. Major problems and current trends are identified and analyzed through case discussion. Required for marketing majors.

Prerequisite(s): 15 Marketing credits, senior standing.

MKT 469 Selected Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision making may be explored. Readings, research, lectures, discussions, or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): MKT 200 and senior standing.

MKT 490 Independent Research and Study 1-4 Credits

Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

MKT 491 Internship-Based Indep Study 3 Credits

Provides the student an opportunity to supplement and apply classroom work in supervised employment with participating marketing and advertising firms. Requirements include a journal with a log of daily activities, and a project or term paper presented to and evaluated by the internship sponsor. Evaluation will also include a report by the company on the intern's performance. Credits may be used to satisfy business or free elective requirements.

Prerequisite(s): permission of instructor.

Organizational Psychology B.S.B.A.

Overview

Are you interested in knowing what motivates a person to perform well at a job, or what qualities a company needs to look for to make a great hire? Today's businesses and organizations need professionals who understand human behavior, group dynamics and how to make the workplace function better. A major in Organizational Psychology from Rider University will help prepare you for a career in one of America's fastest-growing professions.

Curriculum Overview

Rider University's program is one of just a handful in the nation offering a unique interdisciplinary major that combines business and psychology. This versatile degree can have a real impact on an organization's bottom line by helping to improve employee satisfaction and job performance.

Majors in this program will gain a comprehensive understanding of the important contributions that organizational psychology plays in today's workplace.

The Organizational Psychology program focuses on the behavioral aspects of managing and supervising the human resources of an organization or business. You will learn the key concepts of management and psychology, including perception and attitudes, employee motivation and engagement, and organizational leadership and power — and gain an in-depth understanding of what makes employees and organizations function at their best.

As an Organizational Psychology major, you will:

- Develop a comprehensive understanding of human behavior in work settings;
- Learn how to enhance performance within an organization or business;
- Benefit from networking and gain real-world experience through internships and other professional opportunities.

The U.S. Bureau of Labor Statistics ranks Industrial-Organizational Psychology at the top of its list of 20-fastest growing occupations, with a projected growth rate of 53 percent between now and 2022. Organizational psychologists are in demand because their expertise results in better hires, increased productivity, reduced turnover and lower labor costs. They can work as consultants to organizations, or serve in-house in a variety of jobs, including:

- Human resource officer
- Employee development manager
- Organizational development director
- Quality performance manager
- Organizational psychologist
- Testing specialist
- Compensation and benefits specialist

Degree Offered

⁴ Students are required to complete 6 credits of International Business electives which can be fulfilled as major courses or as free electives.

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

ACC 220 Managerial Uses of Accounting 3 Credits

This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.

Prerequisite(s): ACC 210.

BUS 300 The Legal and Ethical Environment of Business 3 Credits

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

Prerequisite(s): 54 credits.

BUS 400 Strategic Mgmt and Policy 3 Credits

This capstone course for seniors in business administration provides a framework for problem identification, analysis, and decision making within the organization. Students are given the opportunity to integrate and apply previously acquired knowledge of accounting, decision sciences, economics, finance, marketing, management, and statistics. Case studies, critical incidents, and other appropriate techniques are utilized.

Prerequisite(s): 84 credits, CIS 185, ACC 210, ACC 220, MKT 200, MGT 201, FIN 220 or FIN 300, MSD 340 or MSD 301, BUS 300, CIS 385 or or GSC 385.

CBA 102 Career Plan & Perspective I 1 Credits

In this course students will explore their own history, goals and values as input to their definition of success. The course will set the stage for the remainder of students' college career, and will encourage them to draw connections among their career goals, educational performance, extra-curricular experiences, and available resources.

CBA 202 Career Plan & Perspect II 1 Credits

In this course, students will build on their CBA 102 self assessments to identify specific occupations that match who they are and where they want to go. The course will provide students with the understanding of the changed nature of the current work and career environment they will be entering when they graduate from Rider. They will acquire career management skills and apply these skills to develop short and long term career goals and plans for achieving them while at Rider. The course will also touch on the intersection of work and family roles.

Prerequisite(s): CBA 102.

CBA 302 Career Plan & Perspect III 1 Credits

This one credit course will be targeted to second semester sophomores and juniors. In this course, students will build on their CBA 102 and 202 self assessments to develop strategies for a successful job search. The course will provide students with an understanding of the changed nature of the current work and career environment they will be entering when they graduate from Rider. They will acquire career management and job search skills and apply these skills to developing, networks, identify job search resources and enhance resume and interview skills. Students will understand how to research potential employers and translate their experiences into a successful job search strategy.

Prerequisite(s): CBA 102 and CBA 202.

CIS 185 Information Systems Essentials 3 Credits

This course will provide students with a conceptual understanding and hands-on practice developing spreadsheets, creating effective visualizations, and utilizing relational databases. Students will also be expected to complete a project related to a current technology-related topic. At the completion of this course students will be able to apply the appropriate information systems technology tools (specifically spreadsheets, visualization applications, and relational databases) to a variety of problem solving activities.

CIS 385 Management Information Systems 3 Credits

This course will enhance students' digital dexterity and familiarity with existing and emerging information technologies, emphasizing skills of abstraction in relation to digital strategy and organizational change, innovation, analytics, and ethics. This course will also provide hands-on experience with at least one essential business technology. At the completion of the course, students will have an understanding of the business-related, policy, societal, and ethical implications associated with modern information systems.

Prerequisite(s): CIS 185 and junior or senior standing.

CMP 120 Seminar in Writing and Rhetoric 3 Credits

Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. The second of the department's three-course composition sequence, This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

CMP 125 Seminar in Writing and Research 3 Credits

Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CMP 120 or BHP 100.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

ECO 200 Principles of Macroeconomics 3 Credits

A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ECO 201 Principles of Microeconomics 3 Credits

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are re explored in the light of price theory. The role of the United States in the world economy is explored.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

Prerequisite(s): ACC 210 and ECO 201.

HRM 315 Employee Selection & Training 3 Credits

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.

Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

Prerequisite(s): MGT 310.

HRM 333 Employee Engagement 3 Credits

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

Prerequisite(s): MGT 310.

MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

Prerequisite(s): minimum 30 credits completed.

MGT 310 Intro to Human Resource Mgmt 3 Credits

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

Prerequisite(s): MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves.

Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.

Prerequisite(s): MGT 201 or PSY 210.

MGT 355 Team Management 3 Credits

This course prepares students to work in organizations that use teams as an integral part of their functioning-an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

Prerequisite(s): MGT 201 or PSY 210.

MGT 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

Prerequisite(s): MGT 201 or permission of instructor.

MKT 200 Marketing Principles 3 Credits

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

Prerequisite(s): 15 credits.

MSD 105 Quantitative Methods for Business 3 Credits

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion, and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional-quality writing, oral or multimedia presentations.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 75 credits.

SAP Student Recognition Award Certificate

Program Overview

As a member of the SAP University Alliances program, Rider's Norm Brodsky College of Business offers the *SAP Student Recognition Award* certificate to students who satisfactorily complete a minimum of three courses with at least one-third SAP hands-on content in each course. Students who earn the award will demonstrate the depth and breadth of their knowledge using state-of-the-art software, developing valuable skills relevant to their careers and chosen fields.

SAP is the global leader in enterprise application software, with more than 170,000 customers in more than 120 countries. They provide enterprise resource planning (ERP), business intelligence (BI) and related applications and services that enable companies of all sizes and in more than 25 industries. Global demand for certified SAP professionals increases every year. Hit the ground running at companies using SAP software!

Choose three of the following:		
CIS 315	Integrated Business with SAP	
CIS 360	Data Mining	
GSC 385	Management Information Systems for Global Supply Chain Management	
CIS 430	Enterprise Integration	
Total Credits		9

Courses and Descriptions

CIS 315 Integrated Business with SAP 3 Credits

This course provides an introduction to enterprise resource planning (ERP) systems and addresses how integrated information systems improve business operations. Students will learn about functional business areas and business processes, and understand the problems inherent in un-integrated enterprise information systems. Using SAP software and case studies, students will learn how ERP systems are being used to facilitate integrated, real-time management decision making.

Prerequisite(s): CIS 185 and ACC 210.

CIS 360 Data Mining 3 Credits

This course deals with modern technologies for data analysis. Hands-on exercises for data retrieval, data visualization and predictive analytics will be carried out using up-to-date methodologies and software tools. The full data mining life cycle will be covered from recognizing business problems and opportunities amenable to data mining analysis through deploying and monitoring solutions.

Prerequisite(s): CIS 185 with a minimum grade of D .

GSC 385 Management Information Systems for Global Supply Chain Management 3 Credits

The purpose of this junior level management information systems course is to prepare students for today's dynamic business environment by increasing their understanding of IT-enabled global information processing and management. This course has a specific emphasis on the impact and effective utilization of information systems and technology for the global supply chain. Students will gain a solid understanding of the value of business process integration through a combination of conceptual learning, business process analysis, and collaborative decision-making. This will be facilitated through hands-on experience with SAP ERP and analytical software as well as Microsoft Excel. GSC 385 is required for the Global Supply Chain Management major and can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

Prerequisite(s): CIS 185 and junior standing.

CIS 430 Enterprise Integration 3 Credits

The major focus of this course includes the forces driving enterprise integration as well as the management decisions associated with the design and implementation of enterprise systems. Students will use SAP ERP extensively to configure, build, test, and implement an enterprise system for a real business environment from the ground up.

Prerequisite(s): CIS 315.

Sales

Program Overview

The Sales Minor is complementary to a wide range of majors in that it prepares students to effectively and persuasively represent an organization's offerings in negotiation and exchange situations. The employment outlook for sales positions is positive in a variety of industries such as manufacturing, wholesale, insurance, real estate and financial services. The core of the minor establishes a solid base of concepts and skills in sales and negotiation while elective courses allow students to focus on complementary knowledge areas and/or industries.

The minor is available to both business and non-business majors.

As a member of the SAP University Alliances program, Rider's Norm Brodsky College of Business also offers the SAP Student Recognition Award certificate to students who satisfactorily complete a minimum of three courses with at least one-third SAP hands-on content in each course. Students who earn the award will demonstrate depth and breadth of their knowledge using state-of-the-art software, developing valuable skills relevant to their careers and chosen fields. For more information, please visit:

Sales Minor with SAP Student Award Certificate

Code	Title	Credits
Students must take three of the following electives in addition to the three required courses for a total of 18 credits:		
CIS 315	Integrated Business with SAP	
CIS 360	Data Mining	
CIS 430	Enterprise Integration	

GSC 385 Management Information Systems for Global Supply Chain Management

The sales minor is open to all students at the University. For students pursuing a major in the Norm Brodsky College of Business, no more than two courses in the minor can be double counted as satisfying either core or major requirements.

Courses and Descriptions

BUS 210 Intro to Law: Contracts 3 Credits

An introduction to the origin of current law, with emphasis on the development of business law, students are exposed to legal terminology and acquainted with the system of application of rules of law to actual situations. The laws of contracts, particularly common-law developments, are considered in great detail.

CIS 315 Integrated Business with SAP 3 Credits

This course provides an introduction to enterprise resource planning (ERP) systems and addresses how integrated information systems improve business operations. Students will learn about functional business areas and business processes, and understand the problems inherent in un-integrated enterprise information systems. Using SAP software and case studies, students will learn how ERP systems are being used to facilitate integrated, real-time management decision making.

Prerequisite(s): CIS 185 and ACC 210.

CIS 390 Project Management 3 Credits

This course introduces students to general project management, the process of organizing resources to achieve business goals. Topics include the identification, approval, analysis, and general management of complex business projects. Project management tools, reports, techniques, and approaches will be covered.

Prerequisite(s): CIS 185.

CIS 430 Enterprise Integration 3 Credits

The major focus of this course includes the forces driving enterprise integration as well as the management decisions associated with the design and implementation of enterprise systems. Students will use SAP ERP extensively to configure, build, test, and implement an enterprise system for a real business environment from the ground up.

Prerequisite(s): CIS 315.

FIN 200 Managing Your Money 3 Credits

An introduction to the analysis of a wide range of financial decisions which individuals encounter over their careers and lifetime. Topics include financial goals, tax planning, home ownership versus renting, consumer credit, money management and investments, and managing risk with insurance. This course is open to all Rider students, and it counts as a free elective or a business elective. It cannot be used as finance elective.

FIN 305 Personal Financial Planning 3 Credits

This course focuses on practical issues and problems involving personal financial budgeting, use of credit, selection of banking services, insurance needs, real estate, investments, tax planning, and retirement planning. An important objective of the course is to provide the student with the tools that are utilized in making personal financial decisions and how to apply those tools for a variety of financial needs.

Prerequisite(s): FIN 220.

GSC 385 Management Information Systems for Global Supply Chain Management 3 Credits

The purpose of this junior level management information systems course is to prepare students for today's dynamic business environment by increasing their understanding of IT-enabled global information processing and management. This course has a specific emphasis on the impact and effective utilization of information systems and technology for the global supply chain. Students will gain a solid understanding of the value of business process integration through a combination of conceptual learning, business process analysis, and collaborative decision-making. This will be facilitated through hands-on experience with SAP ERP and analytical software as well as Microsoft Excel. GSC 385 is required for the Global Supply Chain Management major and can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

Prerequisite(s): CIS 185 and junior standing.

MGT 346 Negotiation 3 Credits

The purpose of this course is first, to explore the major concepts and theories behind effective negotiating practices and second, to develop negotiating skills applicable to a wide range of contexts. A knowledge of negotiation is a crucial requirement for anyone interested in a business career since it is a common mechanism for implementing change and for resolving conflict in the workplace. Topics will include two-party negotiations, power and politics, mediation, arbitration, and collective bargaining. A variety of teaching techniques will be used including readings, discussion, and role-playing.

Prerequisite(s): MGT 201 or permission of the instructor.

MKT 260 Service Marketing 3 Credits

Focuses on the unique challenges of managing services and delivering quality service to customers. Emphasis is placed on the total organization, and how effective marketing and customer focus must be coordinated across multiple functions. The course is applicable to service organizations and to organizations that depend on service excellence for competitive advantage. Topics include customer-focused management, and customer satisfaction, retention, lifetime value and profitability. Students will learn to map services, understand customer expectations, and develop relationship marketing strategies.

Prerequisite(s): MKT 200.

MKT 310 Business to Business Marketing 3 Credits

This course examines the business-to-business marketplace, and the planning and control tools used by its entities in managing the product, pricing, promotion, channel and supply chain management strategies.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 320 Consumer Behavior 3 Credits

The nature and determinants of consumer behavior are studied, with attention given to the influence of socio-psychological factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumer attitudes, consumption patterns, and purchasing behavior.

Prerequisite(s): MKT 200.

MKT 340 Personal Selling 3 Credits

Examines persuasive techniques utilized in sales presentations conducted on a person-to-person basis. Major course emphasis is on developing effective selling techniques; understanding the company, its products and the role of the salesperson in implementing product/market strategies; understanding the customers and the selling environment; application of effective sales presentation techniques; recognizing selling opportunities and careers.

Prerequisite(s): MKT 200; 30 credits completed.

MKT 440 Sales Management 3 Credits

By means of lectures, discussions, and case studies, the field of marketing management is analyzed from the viewpoint of sales executives. The responsibilities for planning and administering personal selling operations are emphasized. Considerable attention is given to other activities for which sales executives may be wholly or jointly responsible, such as decision making on promotion and brand management.

Prerequisite(s): MKT 200 and senior standing.

Sport Management

Program Overview

The sport management co-major prepares students for a career in one of the world's biggest businesses: the fast-growing multi-billion dollar sport industry. Students gain a competitive edge as they develop a working understanding of the critical role business plays in every facet of sports and sports-related organizations.

This dual major program leads to a Bachelor of Science in Business Administration (B.S.B.A.) degree with two majors, sport management and a second major offered by one of the six departments in the Norm Brodsky College of Business.

Student Learning Outcomes

A sport management graduate will be able to:

- demonstrate information literacy in gathering, evaluating, and synthesizing research material;
- demonstrate competence in oral and written communication;
- demonstrate the ability to apply information technology in the analysis of sport business problems;
- appraise and evaluate sports related ethical issues;
- demonstrate the ability to analyze sports business cases and formulate viable policy alternatives;
- demonstrate professional competence in their experiential learning activities.

Curriculum Overview

The sport management co-major is designed to give students a broad-based business education by combining it with another discipline offered by Rider's Norm Brodsky College of Business. This unique pairing provides students a deeper understanding of the legal, ethical, economic, social and managerial issues related to sports.

The business-based curriculum prepares students for diverse career opportunities in professional sport organizations, college and high school athletic administration, sport governing bodies, event and facility management, marketing firms, media organizations and entrepreneurial ventures.

¹ CIS 185 Information Systems Essentials and CBA 110 Business in Action can be taken in the Fall or Spring of Year 1.
² Students may be required to take MSD 104 Intro to Quantitative Methods based on placement. MSD 104 counts as a 3 credit Free Elective.
³ Students are required to complete 6 credits of International Business which can be fulfilled as major courses or as Free Electives.
⁴ Students must take four liberal arts electives; 3 credits must be in Natural Science, 3 credits must be in Social Science, 3 credits must be in Humanities, and 3 credits can be any course offered by the College of Arts and Sciences.

Courses and Descriptions

AMS 211 Sports in American Life 3 Credits

Literary, sociological, and psychological views of sports in 20th-century American life are examined, focusing on sports as a symbol and reflection of our ideals and tensions.

CBA 315 International Business Tour 3 Credits

Provides students with the opportunity to observe various international business environments outside of the United States. Students should gain a better appreciation of how culture, history, and politics influence organizational dynamics, business functions, and business customs.
Prerequisite(s): Junior or senior standing and permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.
Prerequisite(s): COM 240 or permission of instructor.

ECO 326 Economics of Sports 3 Credits

The overall objective of this course is to deepen student understanding of microeconomic principles by applying microeconomic concepts to the analysis of professional and amateur sports. This course will utilize concepts from many different microeconomic specialties, (primarily Industrial Organization, Labor Economics and Public Finance). The tools from these different microeconomic fields will be used to explain and analyze the operation of professional sports teams and leagues in the U.S. with an emphasis on baseball, football, basketball and hockey. International comparisons will be made between professional sports in the U.S. and the rest of the world. The course will also analyze the not-for-profit sports sector, focusing on college sports and the National Collegiate Athletic Association.
Prerequisite(s): ECO 201.

ENT 210 Sports Entrepreneurship 3 Credits

Sports Entrepreneurship will introduce students to entrepreneurship in the sports industries as they explore opportunities and challenges for new ventures in this sector. Using an industry's business model, students will identify competitive advantages and understand what is required for startup success.

GSS 333 Gender and Sport 3 Credits

Typical thoughts of sport include ticket prices, player salaries, team rosters, and league standings; rarely is it viewed from a gender perspective. This course will go beyond the examination of Title IX to better understand the relationship between masculinity, femininity and sports. This course will examine various aspects of gender and sport, including media and gender representation, race and ethnicity, drugs and violence, men and masculinities, sexualities, policy and politics, the feminist critique of sport, the initiation rites and hazing in college sports, sports wagering, and the internationalization of sport, including but not limited to the Olympics and Paralympics.

MKT 280 Sports Marketing 3 Credits

The course focuses on the unique challenges of marketing sports at a variety of levels: youth, college, professional, and international. The challenges of attracting and retaining fans and participants as well as of building and maintaining strong brand identity are at the heart of the course content. By evaluating case studies and examining current issues in sports marketing, students will gain an understanding of what it means to be a professional marketer of a sports organization and/or event.
Prerequisite(s): MKT 200.

PSY 283 Sport Psychology 3 Credits

This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

SPT 250 Introduction to the Business of Sports 3 Credits

This course is designed to introduce the student to the business of sports. Business principles, such as management, marketing, law, finance and economics will be applied to the business of sports. The course will also explore the various career opportunities in the world of sports.

SPT 320 Business of Global Sport 3 Credits

The course explores the diverse challenges and issues facing the managers of sport enterprises in the context of the global marketplace. Issues of governance, cross-cultural interactions and business activities will be examined as they relate to modern sport at the international level. By evaluating case studies and examining current issues in the field, students will gain an understanding of the relationships and responsibilities associated with being a business professional in the global sport industry.

SPT 322 Sports Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of statistical techniques and visualizations to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations and fantasy competitions. Classwork will consist of readings, lectures, discussions, presentations from guest speakers, and hands-on labs. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite(s): CIS 185, MSD 200 or MSD 205, and SPT 250.

SPT 325 Financial Management in the Sport Industry 3 Credits

This course is designed to build upon earlier knowledge from courses in economics, accounting and finance that emphasizes the sports industry and the challenge for financial managers in areas such as stadium/arena financing, financial analysis and valuation. Business models and their financial implications for media and sports related enterprises as well as the business of college athletics will also be covered.

SPT 355 Sports and the Law 3 Credits

Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. This course is cross-listed as LAW 355. Students may not get credit for both SPT 355 and LAW 355.

SPT 444 Selected Topics in Sport Management 3 Credits

This course is offered occasionally with topics and prerequisites set by the Business of Sports Program faculty. This course can be used as an elective for the Sport Management major, Sport Studies minor, or as a free elective. This course is graded on a letter grade basis.

Prerequisite: SPT 250.

SPT 450 Contemporary Issues in Sport Management 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of lectures, discussions, and guest speakers from the sports industry. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite: SPT 250, senior standing, and completion of 15 credit hours in business of sports coursework or permission of instructor.

SPT 490 Independent Research and Study 1-4 Credits

Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

Prerequisite(s): Junior standing, 9 credits in Sport Management courses (including SPT 250) and permission of instructor.

SPT 491 Sport Management Internship 1-3 Credits

Sports related internships can be used to satisfy an elective requirement for the Sport Management Major, Business of Sports Minor and Sport Studies Minor. The course is graded as Pass/Fail.

Sport Studies

Program Overview

The sport studies minor is an interdisciplinary program available to all Rider students. The curriculum has been designed to provide students with courses relevant to the examination of the multi-dimensional world of sports and to appreciate the important role of sports in shaping culture.

Departments and programs from across the University have developed courses for this program enabling students to study and critically evaluate the social, political, ethical, legal, economic and media related issues in sports.

Curriculum Overview

The curriculum gives students the opportunity to use the expertise and perspectives from their major to pursue in-depth study of sports related issues. On campus coursework is complemented by hands on internships, experiential learning through international sports related travel courses and presentations from guest speakers employed in a variety of roles in the sports industry. The experiential component of the minor also helps to give students a greater understanding of sports related employment possibilities as well as preparation for graduate work in sports management and administration programs.

Analytics refers to the use of statistical techniques and visualizations to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations and fantasy competitions. Classwork will consist of readings, lectures, discussions, presentations from guest speakers, and hands-on labs. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite(s): CIS 185, MSD 200 or MSD 205, and SPT 250.

SPT 325 Financial Management in the Sport Industry 3 Credits

This course is designed to build upon earlier knowledge from courses in economics, accounting and finance that emphasizes the sports industry and the challenge for financial managers in areas such as stadium/arena financing, financial analysis and valuation. Business models and their financial implications for media and sports related enterprises as well as the business of college athletics will also be covered.

SPT 355 Sports and the Law 3 Credits

Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. This course is cross-listed as LAW 355. Students may not get credit for both SPT 355 and LAW 355.

SPT 444 Selected Topics in Sport Management 3 Credits

This course is offered occasionally with topics and prerequisites set by the Business of Sports Program faculty. This course can be used as an elective for the Sport Management major, Sport Studies minor, or as a free elective. This course is graded on a letter grade basis.

Prerequisite: SPT 250.

SPT 450 Contemporary Issues in Sport Management 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of lectures, discussions, and guest speakers from the sports industry. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite: SPT 250, senior standing, and completion of 15 credit hours in business of sports coursework or permission of instructor.

SPT 491 Sport Management Internship 1-3 Credits

Sports related internships can be used to satisfy an elective requirement for the Sport Management Major, Business of Sports Minor and Sport Studies Minor. The course is graded as Pass/Fail.

Norm Brodsky College of Business Faculty

Edward Adams

Priority Adjunct Assistant Professor, Department of Finance and Economics
B.S. Rider University; M.B.A. St. John's University

Barry D. Ashmen

Assistant Professor, Department of Marketing
B.S. Rider University; M.A. Rider University; Ed.D. Temple University

Devon Baranek

Assistant Professor, Department of Accounting
B.S. Villanova University; MBA Baruch College; Ph.D. Baruch College

Beverly Braddock

Lecturer, Department of Marketing
B.A., M.A. Rider University

Mark N. Burgess

Priority Adjunct Instructor, Department of Marketing
B.A. University of Pittsburgh; MBA Fairleigh Dickinson University

Nandini Chandar

Associate Professor, Department of Accounting
B.Com. Osmania University, India; PGDM Indian Institute of Management Calcutta; Ph.D. Case Western Reserve University

Chih-Chieh (Jason) Chiu

Associate Professor, Department of Finance and Economics
B.Sc. University of Witwatersrand; MBA Columbia University; Ph.D. Baruch College

Ronald G. Cook

Professor, Department of Management
B.S.B.A. State University of New York at Oswego; MBA Syracuse University; Ph.D. Syracuse University

Quinn W. Cunningham

Associate Professor, Department of Management
B.A. Randolph-Macon College; M.S. Virginia Commonwealth University; Ph.D. Drexel University

Robert D'Avanzo

Lecturer, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Syracuse University

Jie Joyce Ding

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Xi'an Jiaotong University, P.R. China; M.S. Xi'an Jiaotong University, P.R. China; Ph.D. The University of Texas at Austin

Kathleen Dunne

Associate Professor, Department of Accounting
B.A. University at Buffalo, The State University of New York; M.S. State University College of Buffalo; Ph.D. Temple University

Herbert E. Gishlick

Professor, Department of Finance and Economics
A.B. Muhlenberg College; M.A. University of Pennsylvania; Ph.D. University of Pennsylvania

Linguo Gong

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Tsinghua University, Beijing, China; M.S. Tsinghua University, Beijing, China; Ph.D. The University of Texas at Austin

Cengiz Haksever

Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Middle East Technical University, Ankara, Turkey; M.S. Middle East Technical University, Ankara, Turkey; MBA Texas A & M University; Ph.D. The University of Texas at Austin

M. Elizabeth Haywood-Sullivan

Associate Professor, Department of Accounting
B.S. The College of Charleston; M.P.A. The University of Texas at Austin; Ph.D. The University of Georgia

Meng-Chen (Melinda) Hsieh

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S.B.A. National Taiwan University; M.S. National Chengchi University; M.S. New York University Stern School of Business; Ph.D. New York University Stern School of Business

Mayank Jaiswal

Assistant Professor, Department of Management
B.E. University of Delhi; M.B.A. University of Chicago; Ph.D. Georgia Institute of Technology

Hee Young Kim

Assistant Professor, Department of Management
B.A. University of Pennsylvania; Ph.D. Stern School of Business, New York University

Eugene J. Kutcher

Associate Professor, Department of Management
B.S. Rutgers, The State University of New Jersey; M.A. Montclair State University; Ph.D. Virginia Polytechnic Institute and State University

Sherry Fang Li

Associate Professor, Department of Accounting
B.Ec. Tsinghua University; Ph.D. University of Massachusetts Amherst

Charmen Loh

Associate Professor, Department of Finance and Economics
B.S.I.E. University of Arkansas; MBA University of Arkansas; Ph.D. University of Arkansas

Morteza Mashayekhy

Assistant Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A. University of Tehran; M.B.A. Sharif University of Technology; M.M.Sc Ryerson University; Ph.D. McMaster University

Biju Mathew

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A. Nizam College, Hyderabad, India; M.A. XLRI – Xavier School of Management, Jamshedpur, India; Ph.D. University of Pittsburgh

Kristin McCarthy

Assistant Professor, Department of Finance and Economics
B.A. Dickinson College; M.P.H. Hunter College; Dr.P.H. Columbia University

Evelyn A. McDowell

Associate Professor, Department of Accounting
B.B.A. Baldwin Wallace University; MAcc Case Western Reserve University; Ph.D. Case Western Reserve University; CPA, CGMA

Dorothy A. McMullen

Associate Professor, Department of Accounting

University of Pittsburgh

Policies

Credit Hour Requirements for Norm Brodsky College of Business Undergraduate Students

At least fifty percent of semester hours of credit in the area of a student's major must be taken at Rider.

Students are required to have 54 semester hours completed before enrolling in **most** 300- or 400-level business courses.

At least fifty percent of all business credits must be taken through Rider. Transfer students can bring in 30 credits in business plus Quantitative Methods, Business Statistics, Macroeconomics and Microeconomics. All business students must have a 2.0 GPA in their major and overall to graduate.

For all students, of the 120 semester hours of credit required for graduation, the last 30 must be taken at Rider.

Once a student has matriculated for a degree, credit for off-campus courses will be granted only with prior approval of the academic dean.

Online Course Policy

The following online course policy applies to full-time undergraduate students enrolled in the Norm Brodsky College of Business. This policy does not apply to students enrolled in the fully online programs offered by Norm Brodsky College of Business.

1. Other than transfer students, students in their first or second semester shall not enroll in online courses.
2. Students with 24 or more credits completed are limited to enrolling in one online course per semester; if a student is enrolled in a co-op or internship course, the permission of the Associate Dean for Undergraduate Programs in consultation with the chair or program director is required to enroll in more than one online course in that semester.
3. Out of 120 credits, students may take no more than 18 credits online during the fall and spring semesters.
4. Students may take up to 12 credits of online classes during the j-term and/or summer semesters (in addition to the 18 credits allowed during the fall and spring semesters).
5. Students cannot take more than 6 credits online in any one major.
6. Students must have a minimum GPA of 2.5 to enroll in an online course.

College of Education and Human Services

<http://www.rider.edu/cehs> (<http://www.rider.edu/cehs/>)

Since 1913, the College of Education and Human Services at Rider University has made a difference, responding with scholarship and

imagination to the education profession by preparing graduates for the opportunities and challenges of the teaching profession.

Committed to excellence, the College of Education and Human Services keeps all of its programs relevant to the changing needs of students, the professional communities it serves, and society, by anticipating those needs and taking measures to meet them. This commitment to excellence is based on the belief that today's teacher must be able to demonstrate sensitivity to students, familiarity with curriculum, and a thorough knowledge of subject matter and the learning process.

Rider University's teacher preparation programs are grounded in current research on learning, curriculum, teaching, and exemplary practice of reflective teachers.

Rider University prepares teachers who understand:

- that learning involves the active construction of knowledge through posing questions, exploring materials, and testing ideas;
- that this learning may take place in cooperative learning groups as well as individual learning activities;
- that teaching is not just the performance of various learned strategies and methods but a reflective process of observation, deliberation and assessment throughout one's career;
- that all curriculum content is interrelated and often is learned best in integrated or thematic units of study;
- that assessment and teaching are dynamic processes that go hand in hand;
- and that curriculum and teaching must be responsive to the culture, class, gender, strengths, needs, past experiences, and interests of individual students.

When students enroll in the College of Education and Human Services they have the opportunity to work with a professor who will personally advise and assist them in developing their specific programs. In their classes they work directly with members of the faculty who have been successful practitioners in their respective fields. Students enrolled in Rider's teacher preparation programs receive structured experiences working with children, teachers, school administrators, and community agencies.

Many of the teacher education courses are taught in conjunction with a semester-long field experience in a public, nonpublic, or charter school in which students work with an experienced classroom teacher and a Rider professor. Over the course of their professional preparation, students are placed in a variety of grade levels in both urban and suburban schools.

In the sophomore year, students work as teacher assistants. They observe and help conduct learning activities that the teacher has planned. In the junior year, students continue to observe and assist but also plan for and teach individuals, small groups, and full classes. In the senior year, students will be student teaching full-time.

The future offers unique challenges and opportunities for all education students. The College of Education and Human Services welcomes those students who want to make a difference in their own lives and the lives of others. The program prepares students to learn how to affect change in an ever-changing world.

Mission Statement

- The College of Education and Human Services prepares undergraduate and graduate students for professions in education,

health and wellness, organizations, and agencies in the diverse American society.

- The College of Education and Human Services fosters the intellectual, personal, and social development of each student for a changing world by creating and providing programs that embody the highest academic and professional standards.
- The College of Education and Human Services develops students who are committed and knowledgeable, professional, reflective, and who value service, ethical behavior, and the improvement of one's self and profession.
- The College of Education and Human Services promotes a climate of scholarly inquiry, high expectations for achievement, and best professional practices, while establishing beneficial relationships with the public and exchanging relevant ideas and services that speak to emerging needs.

This mission statement is based on the Conceptual Framework of the College of Education and Human Services (<https://www.rider.edu/academics/colleges-schools/college-education-human-services/office-dean/accreditation-information/conceptual-framework-quality-assurance-system/>).

Accreditation

Rider is regionally accredited by the Middle States Commission on Higher Education. All teacher preparation programs offered by the College of Education and Human Services are approved by the New Jersey State Department of Education using the New Jersey Professional Standards for Teachers and School Leaders. In addition, the College of Education and Human Services is accredited by the Council for the Accreditation of Education Preparation (CAEP (<http://caepnet.org/>)), the highest accreditation possible in teacher education. This helps our graduates as they seek employment nationwide.

Rider's online R.N. to B.S.N. baccalaureate degree program is accredited by the Commission on Collegiate Nursing Education (<https://www.aacnursing.org/CCNE/>).

Degrees

At the undergraduate level, the College of Education and Human Services offers three degree programs.

1. **Bachelor of Arts in Elementary Education**, with a major in elementary education and a second major in a liberal arts or science; or a concentration in Multidisciplinary Studies;
2. **Bachelor of Arts in Secondary Education**, with majors/options in English, mathematics, science (biochemistry, biology, chemistry, earth sciences, environmental sciences, geology, marine sciences), history, and world language.
3. **Bachelor of Science in Nursing**, an online R.N. to B.S.N. program designed for working nurses.

Students may also elect to pursue minors, certificates and endorsements in:

- early childhood education (p. 156)
- middle school education (p. 156)
- special education (p. 156)
- bilingual education (p. 156)
- English as a second language (ESL) (p. 156)

In addition, an internal certificate in technology is also available.

Admission

Admission to the College of Education and Human Services places great responsibility upon students. In enrolling, students enter into a relationship with instructors and fellow students in which there are shared responsibilities. Students are expected to display a commitment to study and to initiate intellectual pursuits. Further, students are expected to recognize that learning involves bringing interests, enthusiasm, curiosity, and reflection to their work. The experiences that unfold during class meetings should be considered opportunities for personal growth and learning. These opportunities are by no means limited to the classroom but include work in the field and on campus as well.

For more information about admissions please contact, Undergraduate Admissions (<http://www.rider.edu/ugradadmission/>).

Teacher Education Program Design Self-Development

In the freshman year, emphasis is placed on developing those basic skills that enable a prospective teacher to become a scholar and to engage successfully in college-level studies.

Studies Strengthening Teaching and Learning

Early experience through courses in the social sciences and behavioral studies, emphasizing psychology, provide an important scholarly foundation for educational practice. In addition, college-level study of subjects related to the student's teaching field is an important element in this phase of the teacher education program.

Selective Retention in Teacher Education

Education students must demonstrate competence in their academic work to continue in the teacher preparation program. Competence is assessed in a variety of ways and at different levels. Education students must maintain a cumulative grade-point average of 2.75 in all courses taken at Rider. Students must also earn C+ or higher in any education course (a) that is specifically required for a major or minor in Education and (b) in which enrollment is limited to education majors. It is the individual student's responsibility to retake any education course in which a grade lower than C+ has been earned. Students will be permitted to undertake student teaching only if they have received C+ or higher in all education courses and have a minimum cumulative GPA of 3.00.

The undergraduate education department also reviews the professional development of all students to ensure that they meet departmental standards for professional conduct and that they show promise of success in teaching. This review is in addition to the grade requirements listed above. Students must earn a passing score on all sections (reading, writing and math) of the Praxis Core Academic Skills for Educators Test before registering for any methods courses. This is a New Jersey Department of Education rule that applies to all elementary and secondary education students. Students with 60 or more credits who have not passed all three sections of the Praxis Core Academic Skills for Educators Test will be referred to the Academic Standing Committee for dismissal from the Program. Transfer students with 60 or more credits will have one semester to pass these three sections. Students dismissed from the Program who later pass all sections of this test may apply for readmission.

All students must present evidence of a passing score on the Praxis Subject Assessments test in their specialization area six months prior to the beginning of the student teaching semester. This is the same Praxis Subject Assessments test score students will need for certification.

As appropriate, students who fail to meet the department's standards will be advised on ways to improve their performance, or be asked to leave the program.

Dismissal from Field Experience Prior to Student Teaching

In the event that termination is requested by the school in which the student is completing his or her field experience or by the faculty member of the course of which the field experience is a part, the student will be removed from the assignment immediately.

Any student who is removed from a field experience shall have his or her case referred to a departmental committee on Professional Development in Teacher Education, which shall determine whether the termination was for good cause and, if so, whether the student shall be dismissed from the College of Education and Human Services. The committee may consist of the field course instructor(s), the department chair, the advisor, and other appropriate Rider personnel.

Teacher Certification and Placement

Teacher candidates are recommended for certification only when they have:

- successfully completed all course requirements of a particular program and be formally enrolled in that program; and
- successfully demonstrated continued competence, aptitude, motivation, and potential for outstanding success in teaching. Students must have attained at least a C+ in student teaching along with a cumulative GPA of 3.00.

It should be noted that for New Jersey certification (and many other states as well) it is necessary to pass the edTPA performance assessment during the student teaching semester in addition to passing the appropriate Praxis Subject Assessment(s).

Graduates who have completed all the requirements of an approved program in which they are formally enrolled in teacher education are eligible to receive, upon passing a Praxis Subject Assessments of academic knowledge related to the field of certification, a New Jersey Certificate of Eligibility with Advanced Standing.

The Certificate of Eligibility with Advanced Standing is valid for the lifetime of its holder. It authorizes the holder to seek and accept offers of employment in New Jersey schools.

Students seeking out-of-state certification will find that completing a CAEP-approved program will enable them to become certified in many states. Since each state has its own requirements for teacher certification, it is recommended that students first contact the State Department of Education to learn the requirements of each specific state.

Transfer Requests

Students transferring from other institutions are encouraged to become familiar with the education programs. Transcripts are reviewed in terms of Rider's program requirements, and this review is made available to prospective students.

Students enrolled in other colleges at Rider who wish to transfer into teacher education programs must have a 2.75 GPA and file a written request with the chair of the Department of Teacher Education.

General Studies Electives

The minimum requirements in the second major subjects normally leave a student with additional credits that must be completed to satisfy the 126 credits required for graduation.

Any course offered by another college within the University may be used as a General Studies Elective (GSE) provided the prerequisites have been met. Courses required to fulfill a minor may be used as GSEs.

Policy Regarding Undergraduate Students Enrolling in Graduate Education Courses

Students are eligible to take College of Education and Human Services graduate courses if the following conditions are met: 1) completion of 90 undergraduate credits, 2) a minimum cumulative GPA of 3.0, and 3) permission of the Graduate Education, Leadership, and Counseling department/graduate program director and the undergraduate department chair. These credits may be applied towards the undergraduate degree requirements if permitted by the undergraduate degree program, including in the calculation of undergraduate GPA.

Should the student be accepted and matriculate into the College of Education and Human Services graduate program, these credits, but not the grades, would be subsequently transferred to the graduate transcript, provided the grade meets minimum requirements for Graduate Education, Leadership, and Counseling. Master of Arts programs in the College of Education and Human Services require 30 graduate credits taken after the completion of the undergraduate degree. For those Master of Arts programs that are more than 30 credits, graduate credits taken as an undergraduate may apply toward both the graduate and undergraduate degrees. Only graduate credits above the 30 credits may be applied to both degrees. Undergraduate to graduate accelerated programs may have different policies regarding undergraduate students taking graduate credits. For those policies, see the specific accelerated program.

Degree Programs

Rider's education programs in teacher preparation combine classroom study with laboratory and field experiences to help students develop a high degree of professional expertise and become generally well educated.

All undergraduate baccalaureate degree programs require broad liberal studies and concentrated study in subjects related to the program specialization. Students can major in:

- elementary education (p. 154)
- secondary education (p. 55)

Elementary education majors can pursue minors, certificates and endorsements in:

- early childhood education (p. 156)
- middle school education (p. 156)
- special education (p. 156)
- bilingual education (p. 156)
- English as a second language (ESL) (p. 156).

Secondary education students can pursue minors, certificates and endorsements in:

- bilingual education (p. 61)
- English as a second language (ESL) (p. 61)
- special education (p. 61)

In addition, an internal certificate in technology is also available.

Elementary Education

Program Overview

The elementary education program at Rider's College of Education and Human Services prepares students for fulfilling teaching careers in America's diverse society. The College of Education and Human Services is accredited by the [Council for the Accreditation of Education Preparation \(CAEP\)](http://ncate.org/), (<http://ncate.org/>) the highest accreditation possible in teacher education and we offer graduates added value and recognition nationwide when seeking employment or admission to graduate study.

Curriculum Overview

As they begin their path to becoming effective and skilled elementary school teachers, students in Rider's elementary education program engage in studies that provide an academic background for those subjects they will be teaching.

Elementary education majors select a liberal arts discipline in which they fulfill the requirements for the major. The fulfillment of these requirements, together with general studies courses, provides a substantial liberal studies background as well as a foundation for professional development.

In addition, elementary education majors can elect to pursue the following minors, certifications and endorsements: dual license in early childhood and elementary education; middle school minor; English as a second language; bilingual education; interdisciplinary minor in special education for elementary education with a second major in a content area. Please see the Minor Requirements tab on this page for further information on these programs.

Related Programs

- Secondary Education (p. 55)

Elementary education majors select a second major in a liberal arts or science concentration or a Multidisciplinary Studies concentration (p. 208). Students may also select a second major in art, dance studies, popular music studies, or theater studies in the School of Communication, Media & Performing Arts. The fulfillment of these second major or concentration requirements together with the general studies courses provides a substantial liberal studies background as well as a foundation for professional development. Please see the second major selections below. (p. 156)

Elementary Education General Studies and Academic Major Requirements

(96-99 credits minimum)

Code	Title	Credits
CMP 120 or BHP 100	Seminar in Writing and Rhetoric Honors Seminar: Great Ideas I	3
CMP 125 or BHP 150	Seminar in Writing and Research Honors Seminar: Great Ideas II	3
MTH 150	Mathematics for Education Majors I	3
COM 104	Speech Communication	3
PSY 100	Introduction to Psychology	3
EDU 106	Contexts Of Schooling	3
EDU 206	Developmental Education Psychology	3
Fine Arts elective		3
Foreign Language elective ¹		3
History elective		3
Literature elective		3
Requirements of a selected academic major (varies according to major or concentration)		34-66
Science electives (one lab)		7
Social Science elective		3
Technology elective		3
General Studies Electives (varies according to second major or concentration)		6-16

Professional Education

(27 credits)

Code	Title	Credits
Methodology, curriculum and instruction courses, with associated field experiences: ²		
ELD 307	Emergent Literacy P-3	3
ELD 308	Fostering Language and Literacy Development	3
ELD 375	Methods of Teaching Mathematics in Elementary Classrooms	3
ELD 376	Teaching Science, Social Studies and the Arts N-6	3
SPE 300	Inclusive Practices for General Education Teachers	3
Capstone professional semester of full-time student teaching:		
EDU 465	Student Teaching and Seminar ³	12
Total Credits		27

¹ For proper course placement please visit this website. (<https://www.rider.edu/about/offices-services/transition-programs/new-student-orientation/placement-testing/>)

² ALL students must show evidence of having taken and passed all sections of the Praxis Core Academic Skills For Educators Test prior to being able to register for ALL Education Methods Courses.

³ Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465. In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

Note: Students may be required to fulfill entrance requirements for certain second majors.

Second Major/Concentration Selections

College of Education and Human Services

- Multidisciplinary Studies Concentration

College of Arts and Sciences

- Behavioral Neuroscience
- Biochemistry
- Biology
- Chemistry
- Communication Studies
- Criminal Justice
- Dance Studies
- Earth Sciences
- English Literature
- English Writing
- Environmental Sciences
- Environmental Studies
- Film and Television
- Graphic Design
- Health Sciences
- History
- Integrated Sciences and Mathematics: Earth Sciences Concentration
- Integrated Sciences and Mathematics: Life Sciences Concentration
- Integrated Sciences and Mathematics: Mathematics Concentration
- Integrated Sciences and Mathematics: Physical Sciences Concentration
- Journalism
- Marine Sciences
- Mathematics
- Music Production
- Political Science
- Psychology
- Public Relations
- Radio and Podcasting
- Sociology
- Spanish
- Theatre: Contemporary Theatre Practice

Elementary Education Minor Requirements

Undergraduate elementary education majors can elect to pursue the following minors, certifications and endorsements:

- Early Childhood / Elementary Dual Licensure Progra (p. 156)m
- Elementary Education and Interdisciplinary Minor in Special Education with a Second Major in a Content Area (p. 156)
- Elementary Education and Interdisciplinary Minor in Special Education with a Second Major in Psychology (p. 157)
- Bilingual Education (p. 157)
- English as a Second Language (p. 157)
- Middle School Education (p. 158)
 - (p. 158)Middle School with a Subject Matter Specialization in Chinese (p. 158)

- Middle School with a Subject Matter Specialization in French (p. 158)
- Middle School with a Subject Matter Specialization in Spanish (p. 158)
- Certificate in Technology (p. 158)

Early Childhood/Elementary Dual Licensure Program

The early childhood/elementary dual licensure program leads to two teaching certificates: preschool through third grade (P-3) and elementary (kindergarten through sixth grade). In addition to the professional education courses required of elementary education students, students in this dual licensure program are required to take the following 12-credit sequence of courses:

Code	Title	Credits
PSY 230	Child Development	3
ECE 200	Infant and Toddler Care and Education	3
ECE 332	Families, Community, and Diversity in Early Childhood Education	3
ECE 450	Developmental Methods and Assessment in Early Childhood Education	3

This program is available to any student who maintains a 2.75 GPA and meets all other requirements for admission and retention in the elementary education program.

Note: Students seeking early childhood certification are required to also take and pass the Early Childhood Content Knowledge Praxis test prior to student teaching.

Elementary Education and Interdisciplinary Minor in Special Education with a Second Major in a Content Area

The elementary education interdisciplinary minor in special education is designed for students majoring in elementary education and a content area (other than psychology) who wish to effectively work with students with disabilities, particularly in inclusive settings. This program includes the courses required by the New Jersey Department of Education for a Teacher of Students with Disabilities licensure endorsement.

The 21-credit sequence of courses is to be taken in addition to the requirements of both the elementary education and content area majors. The required courses may be included as general studies electives where appropriate. Students enrolled in the interdisciplinary minor in special education are required to maintain a GPA of 2.75. The following courses are required for this program:

Code	Title	Credits
SPE 201	Foundations in Special Education and Inclusive Practice	3
SPE 202	Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities	3

SPE 303	Assessment and Instruction for Students with Disabilities	3
SPE 304	Assessment and Instruction in the Inclusive Classroom	3
PSY 212	Introduction to Applied Behavior Analysis	3
PSY 237	Cognitive Disabilities	3
TEC 404	Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities	3
Total Credits		21

For information regarding this program please contact:

dgiannola@rider.edu

Elementary Education and Interdisciplinary Minor in Special Education with a Second Major in Psychology

This interdisciplinary minor in special education is designed for undergraduate students who are enrolled in elementary education with a second major in psychology. In addition to the courses required for the elementary education major, students enrolled in the minor program are required to take a specific sequence of courses within the psychology major. The following 15-credit sequence of courses is designed to teach concepts and applications in special education:

Code	Title	Credits
SPE 201	Foundations in Special Education and Inclusive Practice	3
SPE 202	Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities	3
SPE 303	Assessment and Instruction for Students with Disabilities	3
SPE 304	Assessment and Instruction in the Inclusive Classroom	3
TEC 404	Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities	3
Total Credits		15

Students enrolled in the interdisciplinary minor in special education are required to maintain a GPA of 2.75. The prescribed sequence of courses fulfills the requirements for a New Jersey Endorsement for Teacher of Students with Disabilities. Graduates of this dual licensure program also receive certification in elementary education.

For information regarding this program please contact:

Diane Casale-Giannola, Ed.D.

Professor
Bierenbaum Fisher Hall 102E
609-896-5078
dgiannola@rider.edu

Bilingual Education

Certification in bilingual education is available to elementary education majors and secondary education majors who upon completion of the

program have demonstrated competence in both English and another language. Candidates for this certification will complete:

Code	Title	Credits
Multicultural Studies Elective ¹		
EDU 320	Introduction to Linguistics and Psycholinguistics	3
EDU 358	Literacy and the Bilingual/Bicultural Child	3
EDU 420	Teaching a Second Language	3
EDU 460	Educating and Evaluating the Bilingual Child	3
Total Credits		12

Language proficiency evaluations such as the Oral Proficiency Interview (OPI) and Written Proficiency Test (WPT) are required.

¹ Possible multicultural electives: SPA 102, SPA 311, SPA 325; MCS 110, MCS 220, MCS 280; AMS 210, AMS 212; COM 252; HIS 307; POL 235; SOC 207.

Language proficiency evaluations such as the Oral Proficiency Interview (OPI) and Written Proficiency Test (WPT) are required.

mvillalobos@rider.edu

English as a Second Language

Certification in English as a second language (ESL) is available to elementary and secondary education majors. It may be achieved by an additional 3-6 credits by majors in English or a foreign language (French, German or Spanish). All candidates for this certification will complete:

(15 credits)

Code	Title	Credits
EDU 320	Introduction to Linguistics and Psycholinguistics	3
Multicultural Studies elective ¹		3
EDU 358	Literacy and the Bilingual/Bicultural Child	3
EDU 420	Teaching a Second Language	3
EDU 460	Educating and Evaluating the Bilingual Child	3
Total Credits		15

¹ Possible multicultural electives: SPA 102, SPA 311, SPA 325, MCS 110, MCS 220, MCS 280, AMS 210, AMS 212, COM 252, HIS 307, POL 235, SOC 207.

Middle School Education

The minor in middle school education leads to an endorsement in middle school teaching of either English, mathematics, social studies, science, Chinese, French or Spanish. In order to qualify for the middle school endorsement, students must major in elementary education, minor in middle school education, take the required five credits in middle school education listed below, take a minimum of 15 credits in one of the above disciplines, and must also take the Middle School Praxis test for their content area.

In addition to the professional education courses required of elementary education students, students in this program are required to take:

Code	Title	Credits
ELD 350	Early Adolescence	1
ELD 360	Structure and Culture of Middle School Classroom	1
Select one of the following, depending upon your discipline:		3
EDU 420	Teaching a Second Language (required for students completing a specialization in Chinese, French, or Spanish)	
ELD 380	Methods of Teaching Mathematics in the Middle School	
ELD 385	Teaching Science in the Middle School	
ELD 390	Teaching Social Studies in the Middle School	
ELD 395	Literacy Learning in the Middle School	
Total Credits		5

For information regarding this program please contact:

Susan Dougherty, Ed.D.

Associate Professor and Chairperson
Department of Teacher Education
Bierenbaum Fisher Hall 102D
609-896-5162
sdougherty@rider.edu

In addition to the Middle School Education requirements above, students who specialize in Chinese, French, or Spanish must complete the following required courses:

Middle School Minor with a Subject Matter Specialization in Chinese

(20 credits: 15 credits shown below plus 5 credits for the Middle School Education Minor)

Code	Title	Credits
Complete the following courses:		
CHI 100	Chinese I	3
CHI 101	Chinese II	3
CHI 200	Chinese III	3
CHI 201	Chinese IV	3
CHI 300	Advanced Chinese Reading and Composition	3
Total Credits		15

Middle School Minor with a Subject Matter Specialization in French

(20 credits: 15 credits shown below plus 5 credits for the Middle School Education Minor)

Code	Title	Credits
Complete the following courses:		
FRE 200	French III	3
FRE 201	French IV	3
FRE 300	French Composition/Translation	3
FRE 305	An Introduction to French Literature	3
FRE 320	French Phonetics and Conversation	3
Total Credits		15

Middle School Minor with a Subject Matter Specialization in Spanish

(20 credits: 15 credits shown below plus 5 credits for the Middle School Education Minor)

Code	Title	Credits
Complete the following courses:		
SPA 200	Spanish III	3
SPA 201	Spanish IV	3
SPA 300	Advanced Grammar & Composition	3
SPA 302	Writing and Translating	3
Select one course from the following:		
SPA 320	Introduction to Spanish Literature	3
SPA 325	Introduction to Latin-American/Latino Literature	3
SPA 403	Medieval Literature	3
SPA 410	Modern Hispanic Poetry	3
SPA 411	Modern Spanish Novel	3
SPA 412	Theater and Film of the Hispanic World	3
SPA 413	The Hispanic Short Story: Transatlantic Connections	3
SPA 415	Spanish Renaissance	3
SPA 416	The Spanish Golden Age	3
Total Credits		15

Certificate in Technology

Students enrolled in education who successfully complete nine credits in technology-based courses are eligible for a Rider University Certificate in Technology indicating proficiency in instructional technology. Transfer students may transfer in a maximum of three credits for an appropriate technology course. The certificate is issued by the Department of Teacher Education and is obtained from the chair of the department.

For information regarding this certificate please contact:

Susan Dougherty, Ed.D.

³ ELD 307 and ELD 375 must be taken concurrently. Students must pass all sections of the Praxis Core Academic Skills for Educators Test (Test Cole 5752) in order to register for these courses.

⁴ ELD 308 and ELD 376 must be taken concurrently in the semester preceding student teaching. Students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for these courses.

⁵ Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465 (<http://catalog.rider.edu/search/?P=EDU%20465>). In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

Academic Plan for Elementary Education / English Writing

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Semester Credit Hours	12
Total Credit Hours for Graduation	126

¹ For proper course placement please visit this website (<https://www.rider.edu/about/offices-services/transition-programs/new-student-orientation/placement-testing/>).

² Program must include at least two courses at the 200 level and at least two at the 300 level. At least two courses must be Diversity courses.

³ EDU 106 and EDU 206 must be taken concurrently in either the fall or spring of the second year.

⁴ ELD 307 and ELD 375 must be taken concurrently. Students must pass all sections of the Praxis Core Academic Skills for Educators Test (Test Code 5752) in order to register for these courses.

⁵ ELD 308 and ELD 376 must be taken concurrently in the semester preceding student teaching. Students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for these courses.

⁶ Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465 (<http://catalog.rider.edu/search/?P=EDU%20465>). In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

Academic Plan for Elementary Education / Integrated Sciences and Mathematics: Earth Sciences Concentration

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
CMP 120	Seminar in Writing and Rhetoric	3
ISM 100	Introduction to the Integrated Sciences and Math	4
Select one of the following: ¹		3-4
MTH 102	Finite Mathematics	
MTH 105	Algebra and Trigonometry	
MTH 210	Calculus I	
MTH 211	Calculus II

⁵ ELD 308 and ELD 376 must be taken concurrently in the semester preceding student teaching. Students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for these courses.

⁶ Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465 (<http://catalog.rider.edu/search/?P=EDU%20465>). In addition, students must present evidence of a passing score on the Praxis Subject Assessments test: Elementary Education Multiple Subjects test must be passed prior to registering for ELD 308 and ELD 376 and before applying for student teaching.

Academic Plan for Elementary Education / Theater: Contemporary Theatre Practice

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

BED 410 Prin/Strat Voc & Coop Ed 3 Credits

Designed as one of the specialized courses in the preparation of business and marketing education teachers and teacher-coordinators of cooperative work experience programs. The philosophy and history of education for and about work, including technology, are studies along with the principles and strategies for organizing and administering vocational cooperative education programs. Developmental/reflective evaluative techniques will be applied for the assessment of self, students, instruction and selected case studies. Current instructional concepts, organizational and administrative strategies, legislative enactments, and regulations pertaining to the employment of youth are included. Special attention is given to the role of vocational student organizations and advisory committees. Open to all students. A cumulative GPA of 2.75 is required.

BED 415 Teaching Business Subjects 3 Credits

Instructional strategies in the teaching of business and marketing subjects are analyzed and demonstrated. Students are required to prepare lesson plans, teach demonstration lessons, develop a unit plan, and compile a resource file of teaching materials. Videotaping of demonstration lessons is integrated with the course work to encourage developing teaching competency through a series of instructional modules appropriate to the student's certification interests. A cumulative GPA of 2.75 is required.

BED 445 Work Experience Cooperative Program 3-6 Credits

A minimum of 300 hours in a supervised occupational experience or a supervised internship program in an approved work station or institution. The experience is coordinated and supervised by a qualified coordinator of occupational education. A series of activities are designed to relate job and intern experiences to the student's future role as an employee or a professional teacher. The student will be evaluated by the supervising employer and the University supervisor.

BED 490 Independent Research & Study 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hours credit to be assigned is determined by the department.

ECE 200 Infant and Toddler Care and Education 3 Credits

Focuses on nutritional and psychological influences on infant and toddler growth and development, including current research in infant development; childbirth; breast feeding; infant stimulation; intellectual development; attachment behavior; and infants in group care. Recognizing that there is increased demand for infant/toddler care, it is increasingly important to assure that America's infants receive a safe, healthy, emotionally secure, and intellectually rich start in life. High quality care and education of very young children are based upon responsive and respectful relationships among all of the people in each child's life.

ECE 332 Families, Community, and Diversity in Early Childhood Education 3 Credits

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ECE 450 Developmental Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

EDE 200 Effective Classroom Management 3 Credits

Issues of classroom management often pose the biggest challenges for novice teachers. However, with the proper training many of these obstacles can be prevented, which results in more time spent on effective instruction. This course is based on two premises: (1) that most problems of classroom order can be prevented through the use of effective, research-based classroom management strategies, positive teacher-student relationships, and engaging instruction; and (2) that the goal of classroom management is the development of an environment conducive to both academic and social emotional learning. Given these premises, the course focuses not on disciplinary interventions designed to control students, but on ways of preventing disruptive behavior, creating a peaceful, caring community, resolving conflicts, and meeting the needs of diverse students through the use of effective motivational and instructional strategies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

EDE 225 Guided Field Experience in K-12 Classrooms 3 Credits

This is a field-based course in which students will spend an intensive three-week term in a designated school setting, mediated by University faculty. Students will participate in the daily routines of elementary, middle, or secondary schools. Field-site teachers will mentor students by articulating decisions that they make regarding classroom instruction and assessment. Students will meet regularly in seminar to analyze and discuss issues related to teaching and learning. This course will be offered J-Term, Summer I or other three week period.

EDE 226 Teaching and Managing in the Urban Classroom 3 Credits

This course focuses on teaching and managing K-12 classrooms in urban settings. Through four weeks of on-line instruction, students will learn key principles of classroom management and examine foundational issues that can underpin educational inequality, such as racial, ethnic and linguistic diversity, poverty, high student mobility and frequent teacher turnover. The course culminates with the Philadelphia Urban Seminar, a two-week residential experience (mediated by Rider University faculty) that includes ten days of intensive field experience in central Philadelphia classrooms, weekday seminars with faculty, and historical/cultural experiences and community service project activities on the weekend.

EDE 306 Thinking Critically with Data 1 Credits

This course will help students develop the kinds of data literacy skills needed for success in teaching. It will focus on five related that teachers need: (1) finding the relevant pieces of data in the data system or display available to them (data location); (2) understanding what the data signify (data comprehension); (3) figuring out what the data mean (data interpretation); (4) selecting an instructional approach that addresses the situation identified through the data (instructional decision making); (5).

EDE 307 Assessment in 21st Century Classrooms 1 Credits

This course offers an in-depth look at assessment to meet the need of 21st century teaching and learning. Students learn how to plan, develop, interpret, and manage valid assessments of student learning. Students will learn the following assessment-related skills and understandings: (1) the purpose of assessment in 21st century classrooms; (2), basics of assessments: reliability and validity; formative and summative assessment; alignment of assessments with objectives; and determining what can (what cannot) be reliably and validly assessed; (3) basics of rubric development; (4) holistic scoring; (5) assessment of critical thinking skills in diverse domains; (6) assesment of creativity in diverse domains. The course will be taught online.

EDE 375 Applications for Teaching Mathematics in Grades 4-5 1 Credits

This course will provide students the experience to share and learn about the practical applications of teaching mathematics to the 4th and 5th grade children as they are based on the field site classrooms of these grades. Students complete reflections about their work with mathematics and their observations of their cooperating teachers' lessons. The developmental aspect of math skills will be reviewed, looking at the Learning Progressions that are the basis for the new Common CORE State Standards. This course will provide an opportunity for students to have guidance in the teaching and learning of mathematics in the upper elementary grades. Upon completion of this course, students should have the knowledge, skills and confidence to meet the needs of all students, K-6. Prerequisite(s): ELD 375.

Corequisite(s): ELD 376 or ELD 308 or as prerequisite.

EDU 101 First Year and Transfer Education Seminar 1 Credits

First year/transfer seminar provides an engaging orientation to the undergraduate teacher education program at Rider University. During this course, students new to the Department of Teacher Education will explore their beliefs about teaching, learning and school. This focus will be broken into four areas of inquiry that include: (a) What knowledge is of "greatest worth" for educators? (b) What is the purpose of a policy and who gets to make the decisions? (c) What is a "safe" school? (d) What role do unions and professional communities play in the lives of educators and children?.

EDU 106 Contexts Of Schooling 3 Credits

Students in this field-based course will begin to examine aims, practices, and contemporary issues of schooling in their historical, sociological, philosophical, and futuristic contexts and from the perspectives of various multicultural constituencies-- students, parents, local community, wider economic community, government, and the profession. In doing so, they will begin to develop professional skills of observation, reflection, analysis, and argument. This course must be taken concurrently with EDU 206. A cumulative GPA of 2.75 is required.

EDU 206 Developmental Education Psychology 3 Credits

This field-based course focuses on: a) the cognitive, personality, social, creative, and moral development of children and adolescents; b) influential theories, concepts, and research findings of educational psychology; and c) the translation of psychological theory into classroom practices. This course must be taken concurrently with EDU 106. A cumulative GPA of 2.75 is required.

EDU 320 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester. A cumulative GPA of 2.75 is required. NOTE: This course is cross-listed with FLE 320. Students cannot get credit for both FLE 320 and EDU 320.

EDU 358 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDU 420 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. A cumulative GPA of 2.75 is required.

*NOTE: This course is cross-listed as FLE 420. Students cannot get credit for both FLE 420 and EDU 420.

Prerequisite(s): EDU 106 with a minimum grade of C+ or EDU 106 with a minimum grade of TR and EDU 206 with a minimum grade of C+ or EDU 206 with a minimum grade of TR.

EDU 451 Special Topics in Education 1-6 Credits

Student teachers, graduate interns, Rider faculty, cooperating teachers, and building-level administrators will engage in collaborative study of a topic through reading, writing, discussion, observation, and reflection on their work in classrooms. Work in these seminars will help student teachers synthesize knowledge from their professional courses and all participants extend their understanding of a particular topic pertaining to teaching. Teacher research methods will be employed as participants analyze their own teaching through perspectives of the seminar topic. Topics will vary each semester. This course is dual-listed for undergraduate and graduate credit. Enrollment is limited to students concurrently enrolled in student teaching and to cooperating teachers and principals working with them.

EDU 460 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal, and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing, and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study. A cumulative GPA of 2.75 is required.

EDU 465 Student Teaching and Seminar 12 Credits

A full-time program for seniors providing practical teaching experience in an accredited elementary or secondary school. Under the direct supervision of the cooperating teacher, student teachers are responsible for the planning of lessons and for teaching in their areas of specialization and for developing a high level of teaching competency. Supervisors from Rider observe the student teachers at work, confer with the cooperating teachers and student teachers, and evaluate the growth of the student teachers throughout the internship period. Special topics are considered in seminars held in conjunction with student teaching. These topics include school health and substance abuse, school law, teacher certification and placement, classroom management, mainstreaming, professionalism, and other topics deemed appropriate by the faculty and student teachers.

Prerequisite(s): 1. Satisfactory completion of junior-level professional courses; 2. Cumulative GPA of at least 3.0 prior to commencing the semester in which student teaching is to be completed; 3. All professional education courses, with the exception of those taken concurrently with student teaching, must be completed with a grade of "C +" or better; 4. A candidate for student teaching must be approved by the education division and the coordinator of student teaching. There is an additional fee for Student Teaching.

ELD 128 Developing Mathematical Ideas for Elementary School Teachers 1 Credits

Prospective teachers will examine the mathematics content and curriculum that is taught in grades K-6, focusing upon the multi-layered aspects of the topics that successful elementary teachers need to understand profoundly in order to provide appropriate instruction. There will be a series of topics selected from those that have historically been especially difficult for teachers to thoroughly understand at the depth needed to teach effectively. Some of the topics may vary each semester.

ELD 307 Emergent Literacy P-3 3 Credits

This course is needed to meet the requirements for the specialized endorsement in Early Childhood. The course establishes a solid foundation of knowledge about literacy in the early years and dispels myths regarding readiness to read and write. In addition, the course contains the foundational aspects of literacy, including the relationship between oral language and literacy, the linguistic foundation of literacy, and the social contexts of literacy learning. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 308 Fostering Language and Literacy Development 3 Credits

Explores current understanding of the fields of reading/language arts from the perspectives of theory and practice. Students write lesson plans, critique methods of instruction and assessment and develop a portfolio of an individual student from their field site. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206; ELD 307.

ELD 350 Early Adolescence 1 Credits

This course will focus on common dilemmas faced by young people as they move from childhood into adolescence. It will examine age-related differences between children and adolescents and consider ways to create stimulating environments that fit this developmental transition. Representations of adolescence in the media and in research will be compared, including common stereotypes.

ELD 355 Teaching in the Inclusive Middle School Classroom 1 Credits

This course will highlight the legal and ethical responsibilities of general education teachers in the middle school classroom. The special education process will be discussed and methods to address special needs in the classroom will be shared. Strategies to differentiate instruction and work collaboratively with school community members will help pre-service teachers develop and implement effective instruction that meets diverse needs in the middle school inclusive classroom.

Prerequisite(s): EDU 106 and EDU 206 and a cumulative GPA of 2.75 is required.

ELD 360 Structure and Culture of Middle School Classroom 1 Credits

This course focuses on the teaching of those concepts critical to the understanding of the structure and culture of middle school education. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 375 Methods of Teaching Mathematics in Elementary Classrooms 3 Credits

This course focuses on the teaching of mathematics that is developmentally appropriate for students from nursery to grade eight. In keeping with ACET, NAEYC, and NCTM Standards, emphasis is placed on planning for and implementing an integrated curriculum approach, discovery learning, hands-on experience, theme cycles, use of technology, and traditional and non-traditional assessment strategies. Field experiences will consist of classroom observations and teaching individuals and/or small groups of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206, MTH 102 or MTH 105 or MTH 150 or MTH 210.

ELD 376 Teaching Science, Social Studies and the Arts N-6 3 Credits

This course focuses on methods and materials of instruction in science, social studies, and the arts that are developmentally appropriate for students in preschool through grade six (based on NCSS, NSTA, and NAEA Standards). Emphasis is placed on an integrated approach to curriculum, with lesson and unit planning activities that incorporate hands-on-experiences, discovery learning and traditional and non-traditional assessment strategies. Field experience will consist of observation and analysis of classroom instruction and the teaching of lessons to individual and/or small groups of children. A cumulative GPA of 2.75 is required.

Prerequisite(s): ELD 307 and ELD 375.

ELD 380 Methods of Teaching Mathematics in the Middle School 3 Credits

This course focuses on the teaching of mathematics that is developmentally appropriate for students in grades six through eight. In keeping with the National Council of Teachers of Mathematics (NCTM) Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experience, use of technology, and traditional and non-traditional assessment. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 385 Teaching Science in the Middle School 3 Credits

This course focuses on the teaching of sciences that is developmentally appropriate for students in grades six through eight. In keeping with the National Science Education Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experiences, use of technology and traditional and non-traditional assessment strategies. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 390 Teaching Social Studies in the Middle School 3 Credits

This course focuses on the teaching of social studies that is developmentally appropriate for students in grades six through eight. Its focus will explore understanding of United States history, geography and civics from the perspective of the middle school. The course emphasizes the ten themes of social studies as developed by the National Council for the Social Studies. In addition to the facts, concepts and generalizations encompassed by the ten themes, the course works with academic, social, thinking and citizenship skills. The required, intensive field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 395 Literacy Learning in the Middle School 3 Credits

This course focuses on the teaching of literacy that is developmentally appropriate for students in grades six through eight. It explores processes in reading, writing, speaking, listening and viewing, relationships among the language arts and other subject areas, and the development of critical literacy and cognitive strategies. The intense field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 490 Independent Study: Research and Creative Expression 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hour's credit to be assigned is determined by the department.

SPE 201 Foundations in Special Education and Inclusive Practice 3 Credits

This course emphasizes the foundations of special education and introduces students to inclusive practice. Philosophical, historical, and legal foundations of special education and characteristics of students with disabilities will be examined. Students will learn the components of an Individualized Education Program (IEP), how to adapt learning environments and curricular materials, as well as how to select and implement modifications for students with disabilities. Inclusive educational practices including communication, coteaching, and collaborative partnerships will be addressed through case studies and fieldwork. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours.

Prerequisite(s): A cumulative GPA of 2.75 is required.

SPE 202 Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities 3 Credits

This course is designed to examine the characteristics of individuals with Autism Spectrum Disorder (ASD) and strategies to support their academic, communication, and social/behavioral growth, including the use of assistive technology and positive behavioral supports. Methods and strategies for ASD and other low incidence disabilities will be explored. Through active participation in class and field sites, students will become aware of the various social issues related to family, education, transition, community resources and work experiences of individuals with these disabilities. Students will be required to complete a minimum of 30 weekday field hours in addition to regularly scheduled class hours.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 210 Global Encounters 3 Credits

This course is an international learning experience focused on exploring educational opportunities in the United States and abroad. Students will study the history, policy and practice of special education in the United States and compare it with another country and culture first hand, through lectures, school visits and reflection. Current strategies and challenges of educators and families supporting individuals with disabilities will be examined. Through this cross-cultural experience, students will broaden perspectives and develop cultural awareness, knowledge, and understanding of diversity. This course is open to all students and disciplines. There are no prerequisites.

SPE 300 Inclusive Practices for General Education Teachers 3 Credits

This online course is designed to introduce preservice general education teachers students to special education and the inclusive classroom. Students will explore current issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours. Prerequisite(s): EDU 106 and EDU 206. A cumulative gpa of 2.75 is required.

SPE 303 Assessment and Instruction for Students with Disabilities 3 Credits

This course will emphasize the relationship between assessment and instructional design and implementation. Coursework includes the evaluation, selection, development, and adaptation of standardized, normreferenced, and functional assessments, such as a Functional Behavioral Assessment (FBA) and Ecological Assessment. Strategies to support literacy instruction for students with disabilities will be examined. Transition planning, program development, and agencies available to support students with disabilities and their families will be explored. This course requires a field experience in order to help students apply theory to practice.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 304 Assessment and Instruction in the Inclusive Classroom 3 Credits

This course will emphasize assessment, planning, and instructional design to maximize the learning of all students, including those with exceptional learning needs, in the inclusive classroom. Students will have the opportunity to explore a variety of instructional strategies to meet the needs of diverse learners. Organization of learning environments and the collaborative process, including co-teaching models, will be utilized to design a long-term unit plan. This course requires a field experience in order to help students apply theory to practice.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 305 Assessment and Instruction for Students with Autism Spectrum Disorders 3 Credits

Through this course, teacher candidates will learn both theories related to teaching students with Autism Spectrum Disorder (ASD) as well as best practices in the classroom related to academic instruction, as well as emotional, behavioral, and communicative interventions. This course also includes a field component, in which teacher candidates are expected to complete 10 hours of observation in a classroom with students with ASD. The course begins by examining the characteristics of the disability, causes, early warning signs, diagnostic procedures, and early intervention practices. Specific practices related to instruction and intervention as well as how to best structure a classroom for students will be examined. Teacher candidates will receive instruction in a variety of strategies and practices, even those that do not yet qualify as EBPs, as well as their theoretical underpinnings. Strategies for communicating effectively and efficiently with parents, as well as the most current and/or special issues in the field will also be discussed. Issues related to post-secondary transition will also be examined.

Prerequisites: A cumulative GPA of 2.75 and SPE 201.

SST 300 Historical & Contemporary Issues in the Social Studies 3 Credits

This course is designed to provide education and non-education majors a comprehensive introduction to, and understanding of, social studies knowledge. This knowledge covers a broad array of academic disciplines, including American/World History, Government and Politics, Geography, Economics, and the various behavioral sciences. The course is aimed at engendering a theoretical grasp of the essential elements of these disciplines, as well as a practical understanding of how the content areas exist in both human society and contemporary policies/issues.

TEC 200 Google® Educator Level One Training 3 Credits

This course will provide the skills and knowledge for pre-service teachers in undergraduate education to successfully take the Google® Educator Level One Exam.

TEC 201 Internet Ethics 1 Credits

This course focuses on using the Internet to explore and reflect on current ethical issues involving technology. These include individual privacy, legal issues such as fair use and copyright laws, and social issues such as bullying and social networking. Students will explore these topics using a variety of search engines and will reflect on the information found in terms of its impact on society as well as its appropriate uses in personal life, education and business. Pass/fail.

TEC 202 Smartboard 1 Credits

This course is designed to provide an opportunity for students to become familiar with the features and applications of Smartboard, an interactive whiteboard that can be used in classrooms and professional presentations. Students will gain experience using the touch screen and in integrating the features of the program into learning and professional materials. Pass/fail.

TEC 203 Desktop Publishing and Web Page Design 1 Credits

This course provides students with the ability to use desktop publishing software to create materials suitable for use in classrooms, professional settings, and personal use, and with the ability to design web pages.

The course is appropriate for anyone who will be involved in designing classroom and student publications and for those who will use web pages in their teaching or personal lives. Discussion will be held on how to use desktop publishing and web page design in elementary and secondary school settings. A project involving application of various desktop publishing and web page design techniques will be completed and demonstrated to the class. Pass/fail.

TEC 204 Electronic Spreadsheets and Classroom Management Software 1 Credits

Basic electronic spreadsheet concepts and applications are taught using a major spreadsheet program. Topics include writing basic formulas, copying formulas, playing "What If," customizing a worksheet, and printing a spreadsheet. Discussions will be held on how to integrate spreadsheets into elementary and secondary classes and activities. Pass/fail.

TEC 206 Teaching and Presenting with Technology 1 Credits

This course covers designing, planning, and using technology enhanced instruction and presentations. Group assignments will enable students to explore uses of technology to enhance instruction and presentations. Collaboration will be encouraged when discussing the efficient and effective use of technology. Three collaborative group reports will be submitted dealing with discussion questions and chapter topics. Appropriate web sites and programs will be visited. Students will design a final original application that could be used to create motivation and visual learning in a specific classroom or other professional setting related to their major areas of study. Emphasis will be given to technology integration strategies. A final oral presentation of individual projects will be given.

TEC 207 Social Media for Education 3 Credits

Social Media for Education will introduce students to the structure and culture of social media and how social networking applies to the educational environment. This three-credit course will foster a deep understanding of how social media in education can benefit students, teachers, administrators, staff, and stakeholders.

TEC 307 Concepts Instruct Media & Tech 3 Credits

Designed to provide the student with familiarity and appreciation of the role of educational technology in the workplace as it applies to students, teachers, administrators, and trainers. The student will explore the Internet, various educational multimedia, distance learning, virtual reality environments, learning theories, and integration models. Appropriate developmental/reflective strategies will be incorporated with instruction. Although multimedia microcomputers will be utilized throughout the course, prior microcomputer knowledge and experience is not a critical element. Multimedia expertise will be developed as the course progresses.

TEC 308 Directed Study in Instruct 3 Credits

Designed to enable the student to develop instructional presentations utilizing the advantages of multimedia technology. Each student will be required to create a multimedia portfolio that contains information presentations, cumulative records, presenter notes, work samples, photo library, video animation, and audio narration. Cooperative learning strategies will be utilized throughout the course. Developmental/reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail. Expertise will be developed as the course progresses.

TEC 309 Instruct Media/Technology Management 3 Credits

Designed to develop technology management skills that can be used for individual classrooms, training centers, subject area specializations, grade levels, school laboratories, curriculum integration, administrative functions, system networks, community services, communication systems and connecting linkages between educational/work environments and home. Various management strategies will be explored and each student will have an opportunity to design, via a multimedia microcomputer, an instructional technology system of their choice along with a management plan. Cooperative learning strategies will be utilized throughout the course. Developmental/reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail.

Prerequisite(s): At least six semester hours of technology courses or modules.

TEC 404 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners.

Prerequisite: SPE 201 or SPE 300.

TEC 490 Independent Research and Study 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hours credit to be assigned is determined by the department.

IND 210 Global Encounters 3 Credits

This course provides students with an exposure to foreign cultures consisting of both travel and study components. Destinations may include countries in Europe, Latin America, or Asia. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political, and aesthetic cultural components appropriate to the location(s) visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. A travel fee is required. No foreign language skills are required unless otherwise indicated.

Elementary Education with a Concentration in Multidisciplinary Studies

Program Overview

The elementary education program in the Department of Teacher Education prepares students for fulfilling teaching careers in America's diverse society. Rider was the first private New Jersey institution to hold the highest accreditation possible in teaching from the National Council for the Accreditation of Teacher Education (<http://caepnet.org/>) (NCATE/CAEP) and we offer graduates added value and recognition nationwide when seeking employment or admission to graduate study.

Curriculum Overview

As they begin their path to becoming effective and skilled elementary school teachers, students in Rider's elementary education program engage in studies that provide an academic background for those subjects they will be teaching.

The Multidisciplinary Studies concentration seeks to provide students with a broad-based liberal arts education in four areas: English, mathematics, science, and history. By combining these different areas of study, students will be able to develop a unique plan of study to achieve their personal and career goals. In addition to being qualified to teach all four areas in grades kindergarten through 6, students will also accumulate at least 15 credits in one of the four areas so that they will be highly qualified in the state of New Jersey to teach, additionally, in grades 6 through 8 in one particular subject area. This course of study will enable students to expand their level of certification and thus be marketable to teach at either the elementary or middle school level.

In addition, elementary education majors may also elect to pursue an endorsement, minor, and/or certification in English as a second language/bilingual education, middle school, early childhood, or special education. Please see the Concentration Requirements tab on this page for further information on these programs.

Academic Plans of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

- Elementary Education with a concentration in Multidisciplinary Studies (p. 213)
- Elementary Education with a concentration in Multidisciplinary Studies with an ESL/Bilingual Endorsement (p. 214)
- Elementary Education with a concentration in Multidisciplinary Studies with a minor in Middle School (p. 215)
- Elementary Education with a concentration in Multidisciplinary Studies with a minor in Early Childhood Education (p. 216)
- Elementary Education with a concentration in Multidisciplinary Studies with a minor in Special Education (p. 217)

ECE 200 Infant and Toddler Care and Education 3 Credits

Focuses on nutritional and psychological influences on infant and toddler growth and development, including current research in infant development; childbirth; breast feeding; infant stimulation; intellectual development; attachment behavior; and infants in group care. Recognizing that there is increased demand for infant/toddler care, it is increasingly important to assure that America's infants receive a safe, healthy, emotionally secure, and intellectually rich start in life. High quality care and education of very young children are based upon responsive and respectful relationships among all of the people in each child's life.

ECE 332 Families, Community, and Diversity in Early Childhood Education 3 Credits

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ECE 450 Developmental Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

EDU 101 First Year and Transfer Education Seminar 1 Credits

First year/transfer seminar provides an engaging orientation to the undergraduate teacher education program at Rider University. During this course, students new to the Department of Teacher Education will explore their beliefs about teaching, learning and school. This focus will be broken into four areas of inquiry that include: (a) What knowledge is of "greatest worth" for educators? (b) What is the purpose of a policy and who gets to make the decisions? (c) What is a "safe" school? (d) What role do unions and professional communities play in the lives of educators and children?.

EDU 106 Contexts Of Schooling 3 Credits

Students in this field-based course will begin to examine aims, practices, and contemporary issues of schooling in their historical, sociological, philosophical, and futuristic contexts and from the perspectives of various multicultural constituencies— students, parents, local community, wider economic community, government, and the profession. In doing so, they will begin to develop professional skills of observation, reflection, analysis, and argument. This course must be taken concurrently with EDU 206. A cumulative GPA of 2.75 is required.

EDU 206 Developmental Education Psychology 3 Credits

This field-based course focuses on: a) the cognitive, personality, social, creative, and moral development of children and adolescents; b) influential theories, concepts, and research findings of educational psychology; and c) the translation of psychological theory into classroom practices. This course must be taken concurrently with EDU 106. A cumulative GPA of 2.75 is required.

EDU 320 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester. A cumulative GPA of 2.75 is required. NOTE: This course is cross-listed with FLE 320. Students cannot get credit for both FLE 320 and EDU 320.

EDU 358 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDU 420 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. A cumulative GPA of 2.75 is required. *NOTE: This course is cross-listed as FLE 420. Students cannot get credit for both FLE 420 and EDU 420.

Prerequisite(s): EDU 106 with a minimum grade of C+ or EDU 106 with a minimum grade of TR and EDU 206 with a minimum grade of C+ or EDU 206 with a minimum grade of TR.

EDU 451 Special Topics in Education 1-6 Credits

Student teachers, graduate interns, Rider faculty, cooperating teachers, and building-level administrators will engage in collaborative study of a topic through reading, writing, discussion, observation, and reflection on their work in classrooms. Work in these seminars will help student teachers synthesize knowledge from their professional courses and all participants extend their understanding of a particular topic pertaining to teaching. Teacher research methods will be employed as participants analyze their own teaching through perspectives of the seminar topic. Topics will vary each semester. This course is dual-listed for undergraduate and graduate credit. Enrollment is limited to students concurrently enrolled in student teaching and to cooperating teachers and principals working with them.

EDU 460 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal, and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing, and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study. A cumulative GPA of 2.75 is required.

EDU 465 Student Teaching and Seminar 12 Credits

A full-time program for seniors providing practical teaching experience in an accredited elementary or secondary school. Under the direct supervision of the cooperating teacher, student teachers are responsible for the planning of lessons and for teaching in their areas of specialization and for developing a high level of teaching competency. Supervisors from Rider observe the student teachers at work, confer with the cooperating teachers and student teachers, and evaluate the growth of the student teachers throughout the internship period. Special topics are considered in seminars held in conjunction with student teaching. These topics include school health and substance abuse, school law, teacher certification and placement, classroom management, mainstreaming, professionalism, and other topics deemed appropriate by the faculty and student teachers.

Prerequisite(s): 1. Satisfactory completion of junior-level professional courses; 2. Cumulative GPA of at least 3.0 prior to commencing the semester in which student teaching is to be completed; 3. All professional education courses, with the exception of those taken concurrently with student teaching, must be completed with a grade of "C+" or better; 4. A candidate for student teaching must be approved by the education division and the coordinator of student teaching. There is an additional fee for Student Teaching.

ELD 128 Developing Mathematical Ideas for Elementary School Teachers 1 Credits

Prospective teachers will examine the mathematics content and curriculum that is taught in grades K-6, focusing upon the multi-layered aspects of the topics that successful elementary teachers need to understand profoundly in order to provide appropriate instruction. There will be a series of topics selected from those that have historically been especially difficult for teachers to thoroughly understand at the depth needed to teach effectively. Some of the topics may vary each semester.

ELD 307 Emergent Literacy P-3 3 Credits

This course is needed to meet the requirements for the specialized endorsement in Early Childhood. The course establishes a solid foundation of knowledge about literacy in the early years and dispels myths regarding readiness to read and write. In addition, the course contains the foundational aspects of literacy, including the relationship between oral language and literacy, the linguistic foundation of literacy, and the social contexts of literacy learning. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 308 Fostering Language and Literacy Development 3 Credits

Explores current understanding of the fields of reading/language arts from the perspectives of theory and practice. Students write lesson plans, critique methods of instruction and assessment and develop a portfolio of an individual student from their field site. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206; ELD 307.

ELD 350 Early Adolescence 1 Credits

This course will focus on common dilemmas faced by young people as they move from childhood into adolescence. It will examine age-related differences between children and adolescents and consider ways to create stimulating environments that fit this developmental transition. Representations of adolescence in the media and in research will be compared, including common stereotypes.

ELD 355 Teaching in the Inclusive Middle School Classroom 1 Credits

This course will highlight the legal and ethical responsibilities of general education teachers in the middle school classroom. The special education process will be discussed and methods to address special needs in the classroom will be shared. Strategies to differentiate instruction and work collaboratively with school community members will help pre-service teachers develop and implement effective instruction that meets diverse needs in the middle school inclusive classroom.

Prerequisite(s): EDU 106 and EDU 206 and a cumulative GPA of 2.75 is required.

ELD 360 Structure and Culture of Middle School Classroom 1 Credits

This course focuses on the teaching of those concepts critical to the understanding of the structure and culture of middle school education. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 375 Methods of Teaching Mathematics in Elementary Classrooms 3 Credits

This course focuses on the teaching of mathematics that is developmentally appropriate for students from nursery to grade eight. In keeping with ACET, NAEYC, and NCTM Standards, emphasis is placed on planning for and implementing an integrated curriculum approach, discovery learning, hands-on experience, theme cycles, use of technology, and traditional and non-traditional assessment strategies. Field experiences will consist of classroom observations and teaching individuals and/or small groups of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206, MTH 102 or MTH 105 or MTH 150 or MTH 210.

ELD 376 Teaching Science, Social Studies and the Arts N-6 3 Credits

This course focuses on methods and materials of instruction in science, social studies, and the arts that are developmentally appropriate for students in preschool through grade six (based on NCSS, NSTA, and NAEA Standards). Emphasis is placed on an integrated approach to curriculum, with lesson and unit planning activities that incorporate hands-on-experiences, discovery learning and traditional and non-traditional assessment strategies. Field experience will consist of observation and analysis of classroom instruction and the teaching of lessons to individual and/or small groups of children. A cumulative GPA of 2.75 is required.

Prerequisite(s): ELD 307 and ELD 375.

ELD 380 Methods of Teaching Mathematics in the Middle School 3 Credits

This course focuses on the teaching of mathematics that is developmentally appropriate for students in grades six through eight. In keeping with the National Council of Teachers of Mathematics (NCTM) Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experience, use of technology, and traditional and non-traditional assessment. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 385 Teaching Science in the Middle School 3 Credits

This course focuses on the teaching of sciences that is developmentally appropriate for students in grades six through eight. In keeping with the National Science Education Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experiences, use of technology and traditional and non-traditional assessment strategies. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 390 Teaching Social Studies in the Middle School 3 Credits

This course focuses on the teaching of social studies that is developmentally appropriate for students in grades six through eight. Its focus will explore understanding of United States history, geography and civics from the perspective of the middle school. The course emphasizes the ten themes of social studies as developed by the National Council for the Social Studies. In addition to the facts, concepts and generalizations encompassed by the ten themes, the course works with academic, social, thinking and citizenship skills. The required, intensive field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 395 Literacy Learning in the Middle School 3 Credits

This course focuses on the teaching of literacy that is developmentally appropriate for students in grades six through eight. It explores processes in reading, writing, speaking, listening and viewing, relationships among the language arts and other subject areas, and the development of critical literacy and cognitive strategies. The intense field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 490 Independent Study: Research and Creative Expression 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hour's credit to be assigned is determined by the department.

SPE 201 Foundations in Special Education and Inclusive Practice 3 Credits

This course emphasizes the foundations of special education and introduces students to inclusive practice. Philosophical, historical, and legal foundations of special education and characteristics of students with disabilities will be examined. Students will learn the components of an Individualized Education Program (IEP), how to adapt learning environments and curricular materials, as well as how to select and implement modifications for students with disabilities. Inclusive educational practices including communication, coteaching, and collaborative partnerships will be addressed through case studies and fieldwork. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours.

Prerequisite(s): A cumulative GPA of 2.75 is required.

SPE 202 Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities 3 Credits

This course is designed to examine the characteristics of individuals with Autism Spectrum Disorder (ASD) and strategies to support their academic, communication, and social/behavioral growth, including the use of assistive technology and positive behavioral supports. Methods and strategies for ASD and other low incidence disabilities will be explored. Through active participation in class and field sites, students will become aware of the various social issues related to family, education, transition, community resources and work experiences of individuals with these disabilities. Students will be required to complete a minimum of 30 weekday field hours in addition to regularly scheduled class hours.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 210 Global Encounters 3 Credits

This course is an international learning experience focused on exploring educational opportunities in the United States and abroad. Students will study the history, policy and practice of special education in the United States and compare it with another country and culture first hand, through lectures, school visits and reflection. Current strategies and challenges of educators and families supporting individuals with disabilities will be examined. Through this cross-cultural experience, students will broaden perspectives and develop cultural awareness, knowledge, and understanding of diversity. This course is open to all students and disciplines. There are no prerequisites.

SPE 300 Inclusive Practices for General Education Teachers 3 Credits

This online course is designed to introduce preservice general education teachers students to special education and the inclusive classroom. Students will explore current issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours. Prerequisite(s): EDU 106 and EDU 206. A cumulative gpa of 2.75 is required.

SPE 303 Assessment and Instruction for Students with Disabilities 3 Credits

This course will emphasize the relationship between assessment and instructional design and implementation. Coursework includes the evaluation, selection, development, and adaptation of standardized, normreferenced, and functional assessments, such as a Functional Behavioral Assessment (FBA) and Ecological Assessment. Strategies to support literacy instruction for students with disabilities will be examined. Transition planning, program development, and agencies available to support students with disabilities and their families will be explored. This course requires a field experience in order to help students apply theory to practice.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 304 Assessment and Instruction in the Inclusive Classroom 3 Credits

This course will emphasize assessment, planning, and instructional design to maximize the learning of all students, including those with exceptional learning needs, in the inclusive classroom. Students will have the opportunity to explore a variety of instructional strategies to meet the needs of diverse learners. Organization of learning environments and the collaborative process, including co-teaching models, will be utilized to design a long-term unit plan. This course requires a field experience in order to help students apply theory to practice.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 305 Assessment and Instruction for Students with Autism Spectrum Disorders 3 Credits

Through this course, teacher candidates will learn both theories related to teaching students with Autism Spectrum Disorder (ASD) as well as best practices in the classroom related to academic instruction, as well as emotional, behavioral, and communicative interventions. This course also includes a field component, in which teacher candidates are expected to complete 10 hours of observation in a classroom with students with ASD. The course begins by examining the characteristics of the disability, causes, early warning signs, diagnostic procedures, and early intervention practices. Specific practices related to instruction and intervention as well as how to best structure a classroom for students will be examined. Teacher candidates will receive instruction in a variety of strategies and practices, even those that do not yet qualify as EBPs, as well as their theoretical underpinnings. Strategies for communicating effectively and efficiently with parents, as well as the most current and/or special issues in the field will also be discussed. Issues related to post-secondary transition will also be examined.

Prerequisites: A cumulative GPA of 2.75 and SPE 201.

Secondary Education

Program Overview

Since 1913, Rider University's College of Education and Human Services has made a difference in the lives of future teachers with its commitment to excellence. The College of Education and Human Services (CEHS) keeps its programs relevant to the changing needs of students, the professional communities it serves, and society.

The College of Education and Human Services prepares students to be effective educators. CEHS is accredited by the Council for the Accreditation of Education Preparation (CAEP) (<http://caepnet.org/>), the highest accreditation possible in teacher education and we offer graduates added value and recognition nationwide when seeking employment or admission to graduate study.

Preparation to teach a particular academic subject is accomplished through a program requiring completion of the major requirements of the appropriate liberal arts or science major, general studies, and professional education major requirements.

Curriculum Overview

Areas of study for secondary education at Rider are English education, foreign language education: Spanish, history education, mathematics education, and science education (biochemistry, biology, chemistry, earth sciences, environmental sciences, geology, marine sciences).

In addition, secondary education majors can elect to pursue the following minors, certifications and endorsements: English as a second language; bilingual education; or interdisciplinary minor in special education.

Degree Offered

- B.A. in Secondary Education

Secondary Education Major Requirements

Preparation to teach a particular academic subject in secondary education is accomplished through a program requiring completion of the major requirements of the appropriate liberal arts or science major, general studies and professional education major requirements.

Second major/options include:

- English Education (p. 56)
- Foreign Language Education: Spanish (p. 56)
- History Education (p. 57)
- Mathematics Education (p. 57)
- Science Education: (Biochemistry (p. 58), Biology (p. 59), Chemistry, (p. 59) Earth Sciences (p. 60), Environmental Sciences, (p. 60) or Marine Sciences (p. 61))

Secondary Education Minor Requirements

Undergraduate secondary education majors can elect to pursue the following minors, certifications and endorsements:

- Bilingual Education (p. 61)
- English as a Second Language (ESL) (p. 62)
- Secondary Education and Interdisciplinary Minor in Special Education (p. 62)

Bilingual Education

Certification in bilingual education is available to secondary education majors in the areas of Math, Science, Social Studies and English who upon completion of the program have demonstrated competence in both English and another language. Candidates for this certification will complete:

Code	Title	Credits
Multicultural Studies elective		
EDU 320	Introduction to Linguistics and Psycholinguistics	3
EDU 358	Literacy and the Bilingual/Bicultural Child	3
EDU 420	Teaching a Second Language	3
EDU 460	Educating and Evaluating the Bilingual Child	3
Bilingual field experiences are required.		

Language proficiency evaluations are required.

For information regarding this program please contact:

Maria Villalobos-Buehner, Ph.D.
Associate Professor

Fine Arts 354
609-895-5596
mvillalobos@rider.edu

English as a Second Language

Certification in English as a second language (ESL) is available to elementary and secondary education majors. It may be achieved by an additional 3-6 semester hours by majors in English or foreign language (French or Spanish). All candidates for this certification will complete:

Code	Title	Credits
	Multicultural Studies elective	3
EDU 320	Introduction to Linguistics and Psycholinguistics	3
EDU 358	Literacy and the Bilingual/Bicultural Child	3
EDU 420	Teaching a Second Language	3
EDU 460	Educating and Evaluating the Bilingual Child	3

English as a Second Language field experiences are required.

English proficiency evaluations are required.

For information regarding this program please contact:

Maria Villalobos-Buehner, Ph.D.

Associate Professor

Fine Arts 354

609-895-5596

Secondary Education and Interdisciplinary Minor in Special Education

The secondary education interdisciplinary minor in special education curriculum is an additional option for students majoring in secondary education and a content area who wish to effectively work with students with disabilities, particularly in inclusive settings. This program includes the courses required by the New Jersey Department of Education for a Teacher of Students with Disabilities licensure endorsement. The following courses are required for this program:

Code	Title	Credits
SPE 201	Foundations in Special Education and Inclusive Practice	3
SPE 202	Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities	3
SPE 303	Assessment and Instruction for Students with Disabilities	3
SPE 304	Assessment and Instruction in the Inclusive Classroom	3
PSY 212	Introduction to Applied Behavior Analysis	3
PSY 237	Cognitive Disabilities	3
TEC 404	Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities	3

For information regarding this program please contact:

Diane Casale-Giannola, Ed.D.

Professor

Bierenbaum Fisher Hall 102E

Academic Plans of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

- Secondary Education / Biochemistry (p. 62)
- Secondary Education / Biology (p. 63)
- Secondary Education / Chemistry (p. 64)
- Secondary Education / Earth Sciences (p. 65)
- Secondary Education / English Literature (p. 66)
- Secondary Education / English Writing (p. 67)
- Secondary Education / Environmental Sciences (p. 68)
- Secondary Education / Geology (p. 69)
- Secondary Education / History (p. 70)
- Secondary Education / Marine Science (p. 71)
- Secondary Education / Mathematics (p. 72)
- Secondary Education / Spanish (p. 72)

Academic Plan for Secondary Education / Biochemistry

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

¹ For proper course placement please visit this website (<https://www.rider.edu/about/offices-services/transition-programs/new-student-orientation/placement-testing/>). (<http://www.rider.edu/offices-services/orientation/course-placement/>)

² EDU 106 and EDU 206 must be taken concurrently in either the fall or spring of the second year.

³ Special Education minors should replace this course with a General Studies Elective.

⁴ ELD 385 is offered in spring semester only.

⁵ SED 410 is offered in fall semester only.

⁶ Five or more credits of upper level courses required. At least two of the five credits must be connected to laboratory courses.

⁷ Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465 (<http://catalog.rider.edu/search/?P=EDU%20465>). In addition, students must present evidence of a passing score on the Praxis Content Knowledge for Teaching Assessments test for their specific subject area six months prior to student teaching (by March 1 for those students applying for student teaching in the fall semester and July 1 for those students applying for student teaching in the spring)

Academic Plan for Secondary Education / Biology

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

⁵ ELD 385 offered spring semester only.

⁶ SED 370 offered fall semester only.

⁷ SED 410 offered fall semester only.

⁸ Students must have a "C+" or higher in all education courses and a minimum cumulative GPA of 3.0 before enrolling in EDU 465. In addition, students must present evidence of a passing score on the Praxis Content Knowledge for Teaching Assessments test for their specific subject area six months prior to student teaching (by March 1 for those students applying for student teaching in the fall semester and July 1 for those students applying for student teaching in the spring).

Academic Plan for Secondary Education / History

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Course	Title	Credits

Courses and Descriptions

BED 410 Prin/Strat Voc & Coop Ed 3 Credits

Designed as one of the specialized courses in the preparation of business and marketing education teachers and teacher-coordinators of cooperative work experience programs. The philosophy and history of education for and about work, including technology, are studied along with the principles and strategies for organizing and administering vocational cooperative education programs. Developmental/reflective evaluative techniques will be applied for the assessment of self, students, instruction and selected case studies. Current instructional concepts, organizational and administrative strategies, legislative enactments, and regulations pertaining to the employment of youth are included. Special attention is given to the role of vocational student organizations and advisory committees. Open to all students. A cumulative GPA of 2.75 is required.

BED 415 Teaching Business Subjects 3 Credits

Instructional strategies in the teaching of business and marketing subjects are analyzed and demonstrated. Students are required to prepare lesson plans, teach demonstration lessons, develop a unit plan, and compile a resource file of teaching materials. Videotaping of demonstration lessons is integrated with the course work to encourage developing teaching competency through a series of instructional modules appropriate to the student's certification interests. A cumulative GPA of 2.75 is required.

BED 445 Work Experience Cooperative Program 3-6 Credits

A minimum of 300 hours in a supervised occupational experience or a supervised internship program in an approved work station or institution. The experience is coordinated and supervised by a qualified coordinator of occupational education. A series of activities are designed to relate job and intern experiences to the student's future role as an employee or a professional teacher. The student will be evaluated by the supervising employer and the University supervisor.

BED 490 Independent Research & Study 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hours credit to be assigned is determined by the department.

EDU 101 First Year and Transfer Education Seminar 1 Credits

First year/transfer seminar provides an engaging orientation to the undergraduate teacher education program at Rider University. During this course, students new to the Department of Teacher Education will explore their beliefs about teaching, learning and school. This focus will be broken into four areas of inquiry that include: (a) What knowledge is of "greatest worth" for educators? (b) What is the purpose of a policy and who gets to make the decisions? (c) What is a "safe" school? (d) What role do unions and professional communities play in the lives of educators and children?.

EDU 106 Contexts Of Schooling 3 Credits

Students in this field-based course will begin to examine aims, practices, and contemporary issues of schooling in their historical, sociological, philosophical, and futuristic contexts and from the perspectives of various multicultural constituencies— students, parents, local community, wider economic community, government, and the profession. In doing so, they will begin to develop professional skills of observation, reflection, analysis, and argument. This course must be taken concurrently with EDU 206. A cumulative GPA of 2.75 is required.

EDU 206 Developmental Education Psychology 3 Credits

This field-based course focuses on: a) the cognitive, personality, social, creative, and moral development of children and adolescents; b) influential theories, concepts, and research findings of educational psychology; and c) the translation of psychological theory into classroom practices. This course must be taken concurrently with EDU 106. A cumulative GPA of 2.75 is required.

EDU 320 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester. A cumulative GPA of 2.75 is required. NOTE: This course is cross-listed with FLE 320. Students cannot get credit for both FLE 320 and EDU 320.

EDU 358 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDU 420 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. A cumulative GPA of 2.75 is required.

*NOTE: This course is cross-listed as FLE 420. Students cannot get credit for both FLE 420 and EDU 420.

Prerequisite(s): EDU 106 with a minimum grade of C+ or EDU 106 with a minimum grade of TR and EDU 206 with a minimum grade of C+ or EDU 206 with a minimum grade of TR.

EDU 451 Special Topics in Education 1-6 Credits

Student teachers, graduate interns, Rider faculty, cooperating teachers, and building-level administrators will engage in collaborative study of a topic through reading, writing, discussion, observation, and reflection on their work in classrooms. Work in these seminars will help student teachers synthesize knowledge from their professional courses and all participants extend their understanding of a particular topic pertaining to teaching. Teacher research methods will be employed as participants analyze their own teaching through perspectives of the seminar topic. Topics will vary each semester. This course is dual-listed for undergraduate and graduate credit. Enrollment is limited to students concurrently enrolled in student teaching and to cooperating teachers and principals working with them.

EDU 460 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal, and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing, and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study. A cumulative GPA of 2.75 is required.

EDU 465 Student Teaching and Seminar 12 Credits

A full-time program for seniors providing practical teaching experience in an accredited elementary or secondary school. Under the direct supervision of the cooperating teacher, student teachers are responsible for the planning of lessons and for teaching in their areas of specialization and for developing a high level of teaching competency. Supervisors from Rider observe the student teachers at work, confer with the cooperating teachers and student teachers, and evaluate the growth of the student teachers throughout the internship period. Special topics are considered in seminars held in conjunction with student teaching. These topics include school health and substance abuse, school law, teacher certification and placement, classroom management, mainstreaming, professionalism, and other topics deemed appropriate by the faculty and student teachers.

Prerequisite(s): 1. Satisfactory completion of junior-level professional courses; 2. Cumulative GPA of at least 3.0 prior to commencing the semester in which student teaching is to be completed; 3. All professional education courses, with the exception of those taken concurrently with student teaching, must be completed with a grade of "C+" or better; 4. A candidate for student teaching must be approved by the education division and the coordinator of student teaching. There is an additional fee for Student Teaching.

ELD 128 Developing Mathematical Ideas for Elementary School Teachers 1 Credits

Prospective teachers will examine the mathematics content and curriculum that is taught in grades K-6, focusing upon the multi-layered aspects of the topics that successful elementary teachers need to understand profoundly in order to provide appropriate instruction. There will be a series of topics selected from those that have historically been especially difficult for teachers to thoroughly understand at the depth needed to teach effectively. Some of the topics may vary each semester.

ELD 307 Emergent Literacy P-3 3 Credits

This course is needed to meet the requirements for the specialized endorsement in Early Childhood. The course establishes a solid foundation of knowledge about literacy in the early years and dispels myths regarding readiness to read and write. In addition, the course contains the foundational aspects of literacy, including the relationship between oral language and literacy, the linguistic foundation of literacy, and the social contexts of literacy learning. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 308 Fostering Language and Literacy Development 3 Credits

Explores current understanding of the fields of reading/language arts from the perspectives of theory and practice. Students write lesson plans, critique methods of instruction and assessment and develop a portfolio of an individual student from their field site. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206; ELD 307.

ELD 350 Early Adolescence 1 Credits

This course will focus on common dilemmas faced by young people as they move from childhood into adolescence. It will examine age-related differences between children and adolescents and consider ways to create stimulating environments that fit this developmental transition. Representations of adolescence in the media and in research will be compared, including common stereotypes.

ELD 355 Teaching in the Inclusive Middle School Classroom 1 Credits

This course will highlight the legal and ethical responsibilities of general education teachers in the middle school classroom. The special education process will be discussed and methods to address special needs in the classroom will be shared. Strategies to differentiate instruction and work collaboratively with school community members will help pre-service teachers develop and implement effective instruction that meets diverse needs in the middle school inclusive classroom.

Prerequisite(s): EDU 106 and EDU 206 and a cumulative GPA of 2.75 is required.

ELD 360 Structure and Culture of Middle School Classroom 1 Credits

This course focuses on the teaching of those concepts critical to the understanding of the structure and culture of middle school education. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 375 Methods of Teaching Mathematics in Elementary Classrooms 3 Credits

This course focuses on the teaching of mathematics that is developmentally appropriate for students from nursery to grade eight. In keeping with ACET, NAEYC, and NCTM Standards, emphasis is placed on planning for and implementing an integrated curriculum approach, discovery learning, hands-on experience, theme cycles, use of technology, and traditional and non-traditional assessment strategies. Field experiences will consist of classroom observations and teaching individuals and/or small groups of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206, MTH 102 or MTH 105 or MTH 150 or MTH 210.

ELD 376 Teaching Science, Social Studies and the Arts N-6 3 Credits

This course focuses on methods and materials of instruction in science, social studies, and the arts that are developmentally appropriate for students in preschool through grade six (based on NCSS, NSTA, and NAEA Standards). Emphasis is placed on an integrated approach to curriculum, with lesson and unit planning activities that incorporate hands-on-experiences, discovery learning and traditional and non-traditional assessment strategies. Field experience will consist of observation and analysis of classroom instruction and the teaching of lessons to individual and/or small groups of children. A cumulative GPA of 2.75 is required.

Prerequisite(s): ELD 307 and ELD 375.

ELD 380 Methods of Teaching Mathematics in the Middle School 3 Credits

This course focuses on the teaching of mathematics that is developmentally appropriate for students in grades six through eight. In keeping with the National Council of Teachers of Mathematics (NCTM) Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experience, use of technology, and traditional and non-traditional assessment. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 385 Teaching Science in the Middle School 3 Credits

This course focuses on the teaching of sciences that is developmentally appropriate for students in grades six through eight. In keeping with the National Science Education Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experiences, use of technology and traditional and non-traditional assessment strategies. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 390 Teaching Social Studies in the Middle School 3 Credits

This course focuses on the teaching of social studies that is developmentally appropriate for students in grades six through eight. Its focus will explore understanding of United States history, geography and civics from the perspective of the middle school. The course emphasizes the ten themes of social studies as developed by the National Council for the Social Studies. In addition to the facts, concepts and generalizations encompassed by the ten themes, the course works with academic, social, thinking and citizenship skills. The required, intensive field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 395 Literacy Learning in the Middle School 3 Credits

This course focuses on the teaching of literacy that is developmentally appropriate for students in grades six through eight. It explores processes in reading, writing, speaking, listening and viewing, relationships among the language arts and other subject areas, and the development of critical literacy and cognitive strategies. The intense field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 490 Independent Study: Research and Creative Expression 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hour's credit to be assigned is determined by the department.

SED 370 Teaching in the High School 3 Credits

This field-based course focuses on general pedagogy in grades nine through 12. Emphasis will be on generic teaching approaches, planning lessons and developing units of study, learning styles, issues and techniques of evaluation, and multiculturalism. Working in local high schools, students continue observing and begin teaching lessons in their subject area specialization. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 400 Teaching English Language Arts in the Secondary School 3 Credits

Students preparing to teach English in middle schools and senior high schools explore strategies for the imaginative teaching of literature, poetry, drama, grammar, composing processes, vocabulary, and oral language use. Students research, develop, and critique thematic units, analyze curriculum, and study the selection, development, and use of a wide variety of teaching materials. Traditional and alternative methods of assessment are explored. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 405 Teaching Social Studies in Secondary Schools 3 Credits

The theoretical foundations of teaching social studies in junior and senior high schools. Basic goals and aims of social studies instruction are studied, and specific methodological techniques are described and practiced. Demonstration lessons are prepared and presented. Considers typical problems with which teachers are confronted. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 410 Teaching Science in Secondary Schools 3 Credits

Classroom interaction analysis systems are utilized in the study of the teaching-learning process. Students develop their own repertoire of teaching strategies. Emphasis on the investigation and interpretation of recent curriculum developments, and the use of the laboratory in science instruction. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 415 Teaching Mathematics in Secondary Schools 3 Credits

The critical analysis of the aims of teaching mathematics in the secondary school; review of recent research in the content and teaching of mathematics by individuals and groups; demonstration lessons (reflective teaching) to illustrate techniques of teaching; the planning of lessons; selection and organization of materials and subject matter; and evaluation of lesson presentation. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 431 Content Area Reading and Writing 3 Credits

Explores theoretical and methodological issues concerned with teaching reading and writing within content area classes. Students analyze junior high and high school textbooks and other reading materials, study methods of adjusting instruction to varying reading and writing needs of students, prepare directed reading activities in their specific content areas, and use informal diagnostic reading tools. Included is the preparation of content area writing assignments and the evaluation of student writing as well as the teaching of study skills? Emphasis throughout is on the integration of reading and writing into secondary school subject classes. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 490 Independent Research and Study 1-6 Credits

The outline for study must be accepted by the professor and approved by the department. The semester hours credit to be assigned is determined by the department.

SPE 201 Foundations in Special Education and Inclusive Practice 3 Credits

This course emphasizes the foundations of special education and introduces students to inclusive practice. Philosophical, historical, and legal foundations of special education and characteristics of students with disabilities will be examined. Students will learn the components of an Individualized Education Program (IEP), how to adapt learning environments and curricular materials, as well as how to select and implement modifications for students with disabilities. Inclusive educational practices including communication, coteaching, and collaborative partnerships will be addressed through case studies and fieldwork. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours.

Prerequisite(s): A cumulative GPA of 2.75 is required.

SPE 202 Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities 3 Credits

This course is designed to examine the characteristics of individuals with Autism Spectrum Disorder (ASD) and strategies to support their academic, communication, and social/behavioral growth, including the use of assistive technology and positive behavioral supports. Methods and strategies for ASD and other low incidence disabilities will be explored. Through active participation in class and field sites, students will become aware of the various social issues related to family, education, transition, community resources and work experiences of individuals with these disabilities. Students will be required to complete a minimum of 30 weekday field hours in addition to regularly scheduled class hours.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 210 Global Encounters 3 Credits

This course is an international learning experience focused on exploring educational opportunities in the United States and abroad. Students will study the history, policy and practice of special education in the United States and compare it with another country and culture first hand, through lectures, school visits and reflection. Current strategies and challenges of educators and families supporting individuals with disabilities will be examined. Through this cross-cultural experience, students will broaden perspectives and develop cultural awareness, knowledge, and understanding of diversity. This course is open to all students and disciplines. There are no prerequisites.

SPE 300 Inclusive Practices for General Education Teachers 3 Credits

This online course is designed to introduce preservice general education teachers students to special education and the inclusive classroom. Students will explore current issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours. Prerequisite(s): EDU 106 and EDU 206. A cumulative gpa of 2.75 is required.

SPE 303 Assessment and Instruction for Students with Disabilities 3 Credits

This course will emphasize the relationship between assessment and instructional design and implementation. Coursework includes the evaluation, selection, development, and adaptation of standardized, normreferenced, and functional assessments, such as a Functional Behavioral Assessment (FBA) and Ecological Assessment. Strategies to support literacy instruction for students with disabilities will be examined. Transition planning, program development, and agencies available to support students with disabilities and their families will be explored. This course requires a field experience in order to help students apply theory to practice.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 304 Assessment and Instruction in the Inclusive Classroom 3 Credits

This course will emphasize assessment, planning, and instructional design to maximize the learning of all students, including those with exceptional learning needs, in the inclusive classroom. Students will have the opportunity to explore a variety of instructional strategies to meet the needs of diverse learners. Organization of learning environments and the collaborative process, including co-teaching models, will be utilized to design a long-term unit plan. This course requires a field experience in order to help students apply theory to practice.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 305 Assessment and Instruction for Students with Autism Spectrum Disorders 3 Credits

Through this course, teacher candidates will learn both theories related to teaching students with Autism Spectrum Disorder (ASD) as well as best practices in the classroom related to academic instruction, as well as emotional, behavioral, and communicative interventions. This course also includes a field component, in which teacher candidates are expected to complete 10 hours of observation in a classroom with students with ASD. The course begins by examining the characteristics of the disability, causes, early warning signs, diagnostic procedures, and early intervention practices. Specific practices related to instruction and intervention as well as how to best structure a classroom for students will be examined. Teacher candidates will receive instruction in a variety of strategies and practices, even those that do not yet qualify as EBPs, as well as their theoretical underpinnings. Strategies for communicating effectively and efficiently with parents, as well as the most current and/or special issues in the field will also be discussed. Issues related to post-secondary transition will also be examined.

Prerequisites: A cumulative GPA of 2.75 and SPE 201.

TEC 200 Google® Educator Level One Training 3 Credits

This course will provide the skills and knowledge for pre-service teachers in undergraduate education to successfully take the Google® Educator Level One Exam.

TEC 201 Internet Ethics 1 Credits

This course focuses on using the Internet to explore and reflect on current ethical issues involving technology. These include individual privacy, legal issues such as fair use and copyright laws, and social issues such as bullying and social networking. Students will explore these topics using a variety of search engines and will reflect on the information found in terms of its impact on society as well as its appropriate uses in personal life, education and business. Pass/fail.

TEC 202 Smartboard 1 Credits

This course is designed to provide an opportunity for students to become familiar with the features and applications of Smartboard, an interactive whiteboard that can be used in classrooms and professional presentations. Students will gain experience using the touch screen and in integrating the features of the program into learning and professional materials. Pass/fail.

TEC 203 Desktop Publishing and Web Page Design 1 Credits

This course provides students with the ability to use desktop publishing software to create materials suitable for use in classrooms, professional settings, and personal use, and with the ability to design web pages. The course is appropriate for anyone who will be involved in designing classroom and student publications and for those who will use web pages in their teaching or personal lives. Discussion will be held on how to use desktop publishing and web page design in elementary and secondary school settings. A project involving application of various desktop publishing and web page design techniques will be completed and demonstrated to the class. Pass/fail.

TEC 204 Electronic Spreadsheets and Classroom Management Software 1 Credits

Basic electronic spreadsheet concepts and applications are taught using a major spreadsheet program. Topics include writing basic formulas, copying formulas, playing "What If," customizing a worksheet, and printing a spreadsheet. Discussions will be held on how to integrate spreadsheets into elementary and secondary classes and activities. Pass/fail.

TEC 206 Teaching and Presenting with Technology 1 Credits

This course covers designing, planning, and using technology enhanced instruction and presentations. Group assignments will enable students to explore uses of technology to enhance instruction and presentations. Collaboration will be encouraged when discussing the efficient and effective use of technology. Three collaborative group reports will be submitted dealing with discussion questions and chapter topics. Appropriate web sites and programs will be visited. Students will design a final original application that could be used to create motivation and visual learning in a specific classroom or other professional setting related to their major areas of study. Emphasis will be given to technology integration strategies. A final oral presentation of individual projects will be given.

TEC 207 Social Media for Education 3 Credits

Social Media for Education will introduce students to the structure and culture of social media and how social networking applies to the educational environment. This three-credit course will foster a deep understanding of how social media in education can benefit students, teachers, administrators, staff, and stakeholders.

TEC 307 Concepts Instruct Media & Tech 3 Credits

Designed to provide the student with familiarity and appreciation of the role of educational technology in the workplace as it applies to students, teachers, administrators, and trainers. The student will explore the Internet, various educational multimedia, distance learning, virtual reality environments, learning theories, and integration models. Appropriate developmental/reflective strategies will be incorporated with instruction. Although multimedia microcomputers will be utilized throughout the course, prior microcomputer knowledge and experience is not a critical element. Multimedia expertise will be developed as the course progresses.

TEC 308 Directed Study in Instruct 3 Credits

Designed to enable the student to develop instructional presentations utilizing the advantages of multimedia technology. Each student will be required to create a multimedia portfolio that contains information presentations, cumulative records, presenter notes, work samples, photo library, video animation, and audio narration. Cooperative learning strategies will be utilized throughout the course. Developmental/reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail. Expertise will be developed as the course progresses.

TEC 309 Instruct Media/Technology Management 3 Credits

Designed to develop technology management skills that can be used for individual classrooms, training centers, subject area specializations, grade levels, school laboratories, curriculum integration, administrative functions, system networks, community services, communication systems and connecting linkages between educational/work environments and home. Various management strategies will be explored and each student will have an opportunity to design, via a multimedia microcomputer, an instructional technology system of their choice along with a management plan. Cooperative learning strategies will be utilized throughout the course. Developmental/reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail.

Prerequisite(s): At least six semester hours of technology courses or modules.

TEC 404 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners.

Prerequisite: SPE 201 or SPE 300.

TEC 490 Independent Research and Study 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hours credit to be assigned is determined by the department.

Nursing: Online R.N. to B.S.N.

Program Overview

Designed for working nurses, Rider's asynchronous, online RN to BSN program lets students gain the knowledge, skills, and experiences to advance professionally while balancing their career and family life.

The experience, skills, and compassion an individual brings to their nursing role transforms the lives of the patients, families, and communities. Evolving and emerging changes to population health and healthcare environments presents nursing professionals with new challenges — and exciting opportunities. The RN to BSN program prepares nurses to care for diverse communities and to lead change to improve patient outcomes in a variety of healthcare settings.

Nursing Program Mission Statement

The nursing faculty uphold Rider University's Mission and the Rider Promise to prepare graduates to thrive professionally and be lifelong independent learners and responsible citizens who embrace diversity, support the common good, and contribute meaningfully to the changing world they live and work in. The RN to BSN program adheres to the principles of adult learning, which acknowledges previous learning and experiences within courses and provides content relevant to the nursing profession. The MSN program provides knowledge and skills for nurses to excel as nurse practitioners in various health care environments. Principles of advanced practice registered nurse (APRN) clinical practice and nursing scholarship improve health outcomes for patients, families, and diverse communities. Rider's Nursing Program adheres to the beliefs of the American Nurses Association Code of Ethics. It requires students to practice within the following tenets of respect for a patient's dignity, worth, autonomy, and advocacy for their rights, health, and safety. The mission of the Nursing Program aligns with that of Rider University to challenge nurses to grow and further develop skills needed to acquire, interpret, communicate, and become transformational leaders within nursing and across disciplines. The RN to BSN completion program allows the registered nurse to build upon the knowledge and skills learned in the pre-licensure undergraduate program. The MSN program builds on baccalaureate-level nursing education to expand the scope of practice of learners, from registered nurse to an APRN. Both programs allow for expanded opportunities for nurses to function as change agents and leaders within the nursing profession and across health disciplines.

RN to BSN Program Goals

1. Develop graduates that embrace diverse cultures and lifestyles and value individual differences while practicing their nursing role in their professional and personal communities.
2. Foster a commitment for professional nurses to maintain the highest quality knowledge, skills, and competencies based on professional standards and evidence based practice guidelines in generalist nursing practice.
3. Develop graduates as nursing leaders with a command in moral and ethical agency as they advocate for patients, families, and communities through collaboration with healthcare disciplines and key stakeholders.

RN to BSN Student Learning Outcomes

Rider University's Bachelor of Science in Nursing Program prepares the graduate to:

1. Incorporate knowledge from arts, humanities, and sciences in the planning and provision of professional nursing care.
2. Use skills of inquiry and analysis to address practice issues.
3. Use written, verbal, non-verbal, and emerging technology methods to communicate effectively.
4. Apply leadership skills to engage others in ethical reasoning and actions to promote advocacy, collaboration, and social justice as a socially responsible citizen.
5. Apply knowledge of social and cultural factors to the care of diverse populations.
6. Engage in interprofessional collaboration and communication to deliver evidenced-based, patient-centered care to improve patient safety and health outcomes for individuals, families, and communities across the lifespan.
7. Discuss the implications of healthcare policy on issues of access, equity, affordability, and social justice in healthcare delivery.
8. Value lifelong learning and professional engagement in the pursuit of nursing practice excellence.

Curriculum Overview

The RN to BSN curriculum provides a seamless transition to the bachelor's prepared professional nurse role by building on the students' experiences as registered nurses. The curricular flexibility in distribution requirements will ensure that admitted students can readily transfer completed coursework from another academic institution into Rider University. The program's asynchronous, online delivery ensures flexibility and accessibility to a high-quality RN to BSN program for working nurses. All general education and nursing courses will be available to the students through asynchronous, online format. Several courses are offered in an accelerated, 7-week format. Clinical experiences are integrated into the course learning activities. Separate, precepted clinicals are not required.

The minimum passing grade for all NUR courses is a C (75). Any BSN student receiving below a C (75) in a NUR course will need to repeat the course to meet graduation requirements.

Admission Requirements

Students must meet the following requirements for admission to the program:

- Graduation from an accredited associate's degree or diploma in nursing; students who do not meet this requirement should contact admissions before applying
- Provide official transcripts from all institutions attended with a minimum 2.5 cumulative GPA
- Hold an unencumbered and current RN license; students with licensure pending should contact admissions before applying
- Submit a personal statement on philosophy of advancing nursing education at the baccalaureate level

Accreditation Statement

The baccalaureate degree program in nursing at Rider University is accredited by the Commission on Collegiate Nursing Education, 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791.

Course Offerings for Students Outside of Nursing

Students with 75 credits or more and a minimum, cumulative GPA of 3.0 interested in a career in nursing may take NUR courses with permission from their academic advisor and the nursing program director. Interested students must submit their request to their academic advisor. Requests are considered on a case by case basis. All students enrolled in NUR courses are expected to adhere to the course policies defined in the RN to BSN Student Handbook.

Students outside of the nursing program may request to take the following NUR courses:

- NUR 401 Organizational and Healthcare Systems Leadership
- NUR 402 Scholarship in Evidence-Based Practice
- NUR 403 Information Management and Application of Patient Care Technologies
- NUR 404 Healthcare Policy, Finance, and Regulatory Environments
- NUR 405 Interprofessional Collaboration and Communication for Improving Healthcare Outcomes

Degree Offered

- B.S. in Nursing

Spring Semester

NUR 409	BSN Capstone	3
NUR 404	Healthcare Policy, Finance, and Regulatory Environments	3
Semester Credit Hours		6
Total Credit Hours for Graduation		30

Students who have not completed any previous college-level statistics courses must also complete the following courses. Course offerings vary by semester.

Code	Title	Credits
MTH 120	Introduction to Applied Statistics	
PSY 201	Statistics and Research Design	

Courses and Descriptions**NUR 400 Professionalism and Professional Values 3 Credits**

Professionalism and the inherent values of altruism, autonomy, human dignity, integrity, and social justice are fundamental to nursing. The nature and scope of professional nursing, critical thinking, professional accountability, ethical decision-making, and client education as integral parts of the nursing process are examined. Quality and Safety Education in Nursing (QSEN) concepts are emphasized. This course provides a foundation for the baccalaureate nurse to have a solid understanding of the broader professional standards of moral, ethical, and legal conduct in the nursing profession and to facilitate the role of the nurse as a change agent.

NUR 401 Organizational and Healthcare Systems Leadership 3 Credits

This course provides a foundation of principles of leadership based on contemporary needs for qualified nursing leaders who can function and manage in complex healthcare delivery environments. Learning activities and assignments will focus on strategies for self-assessment and self-reflection of one's own leadership skills, knowledge, and attitudes that foster and promote nursing leadership in diverse healthcare delivery settings, and strategies for best practice in nursing leadership in the 21st century.

NUR 402 Scholarship in Evidence-Based Practice 3 Credits

This course provides a foundation of evidence-based research principles to translate evidence into practice and how research informs professional nursing practice to improve patient safety and outcomes. Learning activities and assignments will focus on strategies for learning how to assess scientific merit of data-driven research, apply evidence-based practice in appropriate ways, monitor and evaluate the impact of evidence-based practice on informed nursing practice and outcomes of care as well as collaborate with interprofessional health care teams to improve patient safety and outcomes in a variety of healthcare delivery settings.

NUR 403 Information Management and Application of Patient Care Technology 3 Credits

This course provides a foundation of information management and application of patient care technology to enhance and improve patient safety and outcomes by examining linkages between information management systems and patient care technologies that support and are linked to safe nursing practice. The course examines how technology is used to inform nursing practice and enhance patient safety by applying safeguards and decision making support tools embedded in the technologies. Students are exposed to effective clinical information systems (CIS) to document nursing care, examine the ethical components of protecting patient information, challenges with data security, regulatory requirements, confidentiality and rights to privacy as well as examine the role of the professional nurse in updating and garnering information management resources and applying them in patient care settings.

NUR 404 Healthcare Policy, Finance, and Regulatory Environments 3 Credits

This course provides a foundation of U.S. healthcare policy, including financial and regulatory policies, as well as the nature and functioning of the U.S. healthcare delivery system. There is emphasis on policy processes at the organizational, local, state, national, and global levels. Learning activities and assignments focus on strategies for learning how to assess the role of the baccalaureate-prepared nurse in policy formation and reformation at all levels, demonstrating understanding of the political process at all levels, developing effective advocacy strategies for vulnerable populations, how to identify and influence key stakeholders in the policy process, the importance of effective communication of key healthcare issues, and how to influence change in the political process at all levels when there is social injustice.

NUR 405 Interprofessional Collaboration and Communication for Improving Healthcare Outcomes 3 Credits

This course provides a foundation of key concepts essential to promotion of effective interprofessional collaboration and communication for improving healthcare outcomes and patient safety. There is emphasis in the course on examination of the roles and perspectives of scope of practice for selected healthcare disciplines in intra- and interprofessional healthcare teams to improve healthcare outcomes and promote patient safety, and on effective strategies for advocacy and communication patterns in healthcare delivery settings as healthcare professionals develop trust and respect for all members of the healthcare team while recognizing unique differences and contributions of roles to patient safety and outcomes.

NUR 406 Population Health Promotion and Prevention Across the Lifespan 3 Credits

This course provides a foundation of key concepts essential to population-focused nursing, the aggregate, community or population as the unit of care. The focus of the course is on health promotion/disease prevention with emphasis on the professional nurse role in clinical prevention of disease and care of populations applying concepts of primary, secondary, and tertiary health promotion across the lifespan, identifying determinates of health, prioritizing primary prevention across the lifespan, actively identifying and targeting populations benefitting from evidence-based preventive initiatives and clinical preventive guidelines, assessment strategies for individuals and populations, applying evidence-based practice to health promotion/risk reduction, and being an advocate for vulnerable and disenfranchised populations without resources or a voice.

NUR 407 Cultural Diversity in a Global Society 3 Credits

This course provides a foundation of key concepts essential to nursing care and professional nursing leadership in assessment, planning, design, implementation, and evaluation of the knowledge, skills, and attitudes they must have as leaders of healthcare delivery focusing on improved system safety and effectiveness. There is particular emphasis on the nursing leadership role at the baccalaureate level for nursing to recognize, interrupt, evaluate, and correct healthcare errors and to implement safety principles and work with others to create a safe, caring environment for every healthcare delivery encounter as they provide care themselves, are acting in a leadership capacity, or are overseeing and delegating to other non-licensed assistive personnel. The course content focuses on identification, assessment, planning, design, and evaluation of evidence-based practice change to improve patient safety and outcomes.

NUR 408 Gerontological Nursing Concept 3 Credits

This course provides a foundation of key concepts essential to care of an aging population in a complex society. Given the diverse health status of the aging population, professional nurses must be able to develop competencies to provide high quality care to aging adults and their families or significant others. Specifically the course focuses on increased diversity and complexity of an aging society and selected health care needs, life transitions of aging adults, normal body system changes occurring with the aging process, the professional nurse role in principled care provided to a vulnerable population, and the role of the professional nurse as advocate and caregiver promoting the concepts of quality end-of-life care for aging adults, including pain and symptom management honoring the autonomy and self-wish of the aging client.

NUR 409 BSN Capstone 3 Credits

This course provides a foundation of key concepts essential to nursing care and professional nursing leadership in assessment, planning, design, implementation, and evaluation of the knowledge, skills, and attitudes they must have as leaders of healthcare delivery focusing on improved system safety and effectiveness. There is particular emphasis on the nursing leadership role at the baccalaureate level for nursing to recognize, interrupt, evaluate, and correct healthcare errors and to implement safety principles and work with others to create a safe, caring environment for every healthcare delivery encounter as they provide care themselves, are acting in a leadership capacity or are overseeing and delegating to other non-licensed assistive personnel. The course content focuses on identification, assessment, planning, design, and evaluation of evidence-based practice change to improve patient safety and outcomes.

Prerequisite(s): NUR 402, NUR 405.

The College of Arts and Sciences (CAS) is dedicated to educating students for engaged citizenship, career success, and personal growth in a diverse and complex world.

CAS cultivates intellectual reflection, artistic creativity, and academic maturity by promoting both broad academic inquiry and in-depth

disciplinary study, while nurturing effective and ethical applications of transferable critical skills.

The CAS faculty demonstrate an expert and practical dedication in and out of the classroom, advancing the free exploration of ideas and artistry as well as encouraging the exploration of difficult problems within their fields of specialization.

In addition, CAS fosters engaged learning by encouraging students to spend time studying abroad; researching in collaboration with faculty; participating in creative and artistic works; and shadowing and interning at nationally renowned companies, governmental agencies, and not-for-profit organizations. The impact of these activities will stay with students forever, significantly enhancing the value of their education in the arts and sciences.

CAS aims not only to provide students with expertise and experience in their chosen field, but also to guide their learning of life-long skills that cut across disciplines. Abilities such as critical thinking, quantitative analysis, effective communication, informational and emotional literacy, and technological competencies prepare students to participate in a globalized world where active learning, not static knowledge, is essential.

In short, CAS inspires students to develop a deep understanding and appreciation of the foundational areas of human knowledge and values. It does so by means of a clear and well-defined general education curriculum and a wide array of specialized majors, minors and certificates.

Majors, Minors, and Certificates

CAS Majors, Minors, and Certificates (<https://nextcatalog.rider.edu/undergraduate/colleges-schools/arts-sciences/majors-minors-certificates/>) Students interested in pursuing a major, minor, or certificate need the approval of the chairperson or director of the minor program and the dean.

General Liberal Arts and Sciences Studies (GLASS) is available to all CAS students who are undecided regarding the selection of a major. For GLASS, specially designated advisors are assigned to help students explore the full range of their academic options. Students have until the completion of 60 credits to select a major. When the major is declared, a new advisor from that field is assigned for course selection and continued academic guidance.

General Science Program (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/science-technology-math/undergraduate/general-science/>) is structured to prepare selected first-year students for the rigors of college study in science, technology and mathematics. In this program, you'll strengthen your academic readiness for college-level STEM courses and prepare for a successful transition into your intended major of choice through targeted coursework, faculty advisement and personalized resources. Students may declare the science, technology or mathematics major of their choice as a sophomore after fulfilling the program requirements (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/science-technology-math/undergraduate/general-science/>).

Accreditation

Rider is regionally accredited by the Middle States Commission on Higher Education. Rider's online R.N. to B.S.N. baccalaureate degree program is accredited by the Commission on Collegiate Nursing Education (<https://www.aacnursing.org/CCNE/>).

Degrees

At the undergraduate level, the College of Arts and Sciences offers:

1. Bachelor of Arts - B.A.
2. Bachelor of Arts in Music - B.A.M.
3. Bachelor of Fine Arts - B.F.A.
4. Bachelor of Music - B.M.
5. Bachelor of Science - B.S.
6. Bachelor of Science in Nursing - B.S.N.

Resources

Preparation for the Study of Medicine and Dentistry

The College of Arts and Sciences offers a premedical studies advising program (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/programs-opportunities/pre-med/>) that focuses on preparation for admission to medical, dental, or other health-related professional schools such as chiropractic and podiatry. A background in the liberal arts also is provided, since many professional schools stress a broad general education.

A premedical committee and pre-professional advisors meet on a regular basis with students to assist in the selection of science and non-science courses, to provide information on the MCAT and DAT, and to advise students regarding procedures for admission to professional schools. As admission requirements vary slightly from school to school, students are urged to consult catalogs of the institutions where they desire to continue their education to make certain that they are completing the most appropriate undergraduate courses.

Students may major in any field of study and need not formally major in one of the sciences as long as they take the minimum number of required science courses. As a matter of practice, however, most pre-dental and premedical students major in biology, behavioral neuroscience, biochemistry, or chemistry. Students who intend to enter medical doctor programs must excel to ensure the adequacy of preparation and favorable consideration of their applications.

Preparation for Study in Allied Health Programs

The College of Arts and Sciences offers pre-allied health professions advising that focuses on preparation for admission to allied health professions such as nursing, physical therapy, sports medicine, physician assistant, occupational therapy, diagnostic imaging and radiologic sciences, medical laboratory sciences and pharmacy. Each of these disciplines has different prerequisite science and non-science coursework and other experiential requirements, and these may vary among institutions. There are also multiple pathways to bachelor's, combined bachelor's/master's, entry level master's degrees, or doctoral degrees in many of them.

The pre-allied health advisor at Rider offers ongoing availability to help students educate themselves on these varying professional fields and the requirements for entry into them. Students are also urged to consult with admissions personnel at institutions in which they seek to study in order to ensure that they are preparing competitive applications.

Rider University has an affiliation with the College of Health Professions at Thomas Jefferson University to facilitate paths of entry into their allied health programs.

Preparation for the Study of Law

The College of Arts and Sciences offers pre-law advising that focuses on exploring legal careers and preparation for admission to law school.

Army Reserve Officer's Training Corps (ROTC)

Rider University students are eligible to participate in the Princeton Army ROTC program through a formal cross-town enrollment agreement with the U.S. Army Cadet Command. Princeton Army ROTC will recruit, educate, develop, and inspire ROTC Cadets at off-campus locations in order to commission officers of character for the Total Army; and develop citizens of character for a lifetime of commitment and service to the nation.

The Army ROTC course is designed as a four-year leadership program divided into two phases: the basic course and the advanced course. The basic course is open to all students (100 series only. 200 series and above upon approval by the Princeton Army ROTC Professor of Military Science). The advanced course is available to cadets who complete the basic course and wish to be commissioned as either active or reserve component officers. For further information, please go to ROTC (<http://catalog.rider.edu/policies/reserve-officers-training-corps-rotc/>).

Schools and Departments

Schools and Departments in the College of Arts and Sciences

School of Science, Technology and Mathematics (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/science-technology-math/>)

Departments:

- Biology, Behavioral Neuroscience, and Health Sciences (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/science-technology-math/faculty-departments/biology-behavioral-neuroscience-health/>)
- Earth (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/science-technology-math/faculty-departments/geo-environmental-marine-sciences/>) and Chemical Sciences (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/science-technology-math/faculty-departments/chemistry-biochemistry/>)
- Computer Science and Physics (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/science-technology-math/faculty-departments/computer-science-physics/>)
- Mathematics (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/science-technology-math/faculty-departments/mathematics/>)

School of Humanities and Social Sciences (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/humanities-social-sciences/>)

Departments:

- English (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/humanities-social-sciences/faculty-departments/english/>)
- History and Philosophy (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/humanities-social-sciences/faculty-departments/history-philosophy/>)
- Languages, Literatures, and Cultures (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/humanities-social-sciences/faculty-departments/languages-literatures-cultures/>)
- Political Science (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/humanities-social-sciences/faculty-departments/political-science/>)
- Psychology (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/humanities-social-sciences/faculty-departments/psychology/>)
- Sociology and Criminology (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/humanities-social-sciences/faculty-departments/sociology-criminology/>)

School of Communication, Media and Performing Arts (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/communication-media-arts/>)

Departments:

- Communication, Journalism, and Media (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/communication-media-arts/faculty-departments/communication-journalism/>)
- Media Arts (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/communication-media-arts/faculty-departments/media-arts/>)
- Performing Arts (p. 1150)

Westminster Choir College (<https://www.rider.edu/academics/colleges-schools/college-arts-sciences/westminster-choir-college/>)

Departments:

- Choral Studies (p. 752), Music Education (p. 754) and Sacred Music (p. 757)
- Music Composition, History and Theory (p. 753)
- Piano (p. 756) and Voice (p. 758)

Choral Studies

General Remarks

The reputation of Westminster Choir College rests in large part upon the excellence of the choirs and the success of its graduates. The nation's leading critics and orchestra conductors continue to find the choirs worthy of the highest praise. Choral music is therefore the focus of all curricula. Westminster alumni are employed by schools, universities, churches, professional choruses and orchestras and opera houses throughout the world. Opportunities for choral performance on a professional level are unparalleled, and students acquire a strong foundation in conducting technique and knowledge of choral literature.

Ensemble Grading Policy

A. Attendance

- Two absences are allowed per semester. No absences are allowed for dress rehearsals or performances.
- All events on the syllabus are required.
- Any absences over two will result in a lowered letter grade.
- Extenuating circumstances should be discussed with the director before they occur.
- Be on time. Two tardies will count as one absence.
- Missing a dress rehearsal or concert will result in a failing grade for the semester.

B. Participation/General Information

- Positive participation factors into your grade.
- Music and pencil are required at each rehearsal.
- Memorization, written translations and other analytical study may be required.

Required Ensembles

Required ensembles are the essence of Westminster Choir College. These experiences enrich the entire student body and create the opportunity to form a creative musical core.

Chapel Choir and Schola Cantorum are designed to meet the needs of freshmen and sophomores. Each ensemble provides a dynamic and focused experience to build a strong foundation of rehearsal skills, choral tone, language and musicianship. Both ensembles use a variety of repertoire to build a strong foundation for each student.

The Symphonic Choir is at the heart of the college choral community. The ensemble appears with symphony orchestras of the United States and Europe. Students above the lower division sing in the Symphonic Choir, preparing choral/orchestral repertoire for performance at major venues along with local and regional concerts.

Elective Ensembles

Elective ensembles are open to students by audition only. Auditions are held in the fall semester, and students perform in that ensemble for the academic year. The elective ensembles are Westminster Choir, Williamson Voices, Kantorei, Jubilee Singers and Concert Handbell Choir I.

Conducting Major: Graduate

The graduate choral conducting program, generally a two-year program, trains conductors to be marketable and effective musicians. Westminster offers a balance of academic and performance opportunities. Graduate conducting majors take a core of research, literature, conducting, pedagogy and ensemble. Applied study and ensemble conducting offer each candidate the opportunity to work with the conducting faculty. Candidates must successfully complete a comprehensive oral exam before a degree is conferred. Graduate Conducting majors are admitted by audition in order to assure quality conducting experiences and contact with the graduate faculty.

Conducting Concentration: Graduate

Graduate students majoring in Sacred Music and those Master of Music Education majors admitted with conducting as the performance field participate in Symphonic Choir for two semesters and in Master Singers for two to three semesters. A half recital in conducting is presented at the

culmination of study. For Sacred Music majors, the conducting recital is a requirement in addition to the solo recital.

Faculty

James Jordan • Professor, Conducting, 1991. B.M., Susquehanna University; M.M., Ph.D., Temple University; D.Mus., University of Aberdeen, Scotland.

Music Composition, History, and Theory

General Remarks

The program in composition, music history and theory aims to develop the aural skills needed by all musicians, to provide the necessary theoretical knowledge for the continuing study and performance of music, to build an understanding of music's function in society, to develop analytical and aesthetic understanding of music forms and styles and to foster the creative impulse in music.

Undergraduate Music History Curriculum

Music history is concerned with why music matters to us both aesthetically and socially, what the past can teach us about ourselves, and how we arrive at our understandings of the past. It asks such questions as: why did this style or trend occur at this time? Why do we consider this composer to be more important than another composer? What social or political ideas are incorporated into this music? How can music communicate social or political ideas and change society for the better or the worse?

All undergraduates are required to take the two-semester Historiography sequence, Music Since 1900 and a music history elective at or above the 400 level. After completing the required courses, students will have:

- gained a working knowledge of the history of Western Art Music,
- some exposure to music of several other music cultures,
- acquired information literacy skills that will allow them to conduct further research in music history,
- improved their ability to read and critique academic writings and
- completed at least one major research project.

Undergraduate Music Theory Curriculum

Required musicianship courses, Contemporary Trends, and elective theory courses form the core of the undergraduate music theory curriculum. All baccalaureate candidates must elect a level I theory course; Bachelor of Music candidates also must elect a level II theory course. All theory electives are defined as level I or level II under course descriptions. Also see "Music Theory Electives" below.

Incoming undergraduates take placement tests and may be required to take Introduction to Musicianship before beginning the core sequence of studies in musicianship. Exemption from and credit for required college-level courses may be earned by passing examinations administered by the department. These examinations are intended for entering freshmen and transfer students only.

Incoming undergraduates who hold scores of 4 or 5 on the Advanced Placement Examination in Music Theory will receive credit by examination for TH 141 (<http://catalog.rider.edu/search/?P=TH%20141>) Musicianship I. Students receiving credit for TH 141 (<http://catalog.rider.edu/search/?P=TH%20141>) are eligible to take a placement

test to determine if credit by examination may be granted for additional theory courses.

Theory/Composition Major: Undergraduate

The curriculum for the undergraduate Theory/Composition major is designed to foster individual creative ability and to develop a broad and informed musicianship along with a knowledge of the literature of all periods. The department welcomes diversity of compositional styles and esthetic viewpoints and encourages exploration on the part of its students. The program culminates with a recital of original music written while a student is enrolled at Westminster.

Composition Major: Graduate

Composition majors are expected to write works for soloists, for chamber ensembles, and for large wind or orchestral ensembles. The department welcomes diversity of compositional styles and esthetic viewpoints and encourages exploration on the part of its students. The program culminates with a recital of original music written while a student is enrolled at Westminster.

Composition Primary: Graduate

Graduate students majoring in Sacred Music or Music Education may be admitted with a composition primary. Such a student must complete three semesters of Composition Primary and must present a composition recital as a conductor, accompanist, soloist, or ensemble performer. For Sacred Music majors, the composition recital is distinct from the required conducting recital.

Music History Elective

The Music History elective (MH 433 (<http://catalog.rider.edu/search/?P=MH%20433>), MH 733 (<http://catalog.rider.edu/search/?P=MH%20733>), MH 635 (<http://catalog.rider.edu/search/?P=MH%20635>), or MH 734 (<http://catalog.rider.edu/search/?P=MH%20734>)) is an in-depth exploration of a single topic (e.g., a composer, a genre, a country). Topics will vary from year to year. Generally, offerings include at least one course in Western Art Music before 1800, one course in Western Art Music since 1800, one course in Asian, Latin American or African music, and one course in Popular Music (broadly defined) on a regular basis. The goal of the elective is not only to teach students about the specific topic of the course, but also to develop students' research skills so that they can teach themselves about any topic in music history in the future. The Music History elective includes a significant research paper (2000+ words at the 400 level; 3000+ words at the 600 or 700 level).

Music Theory Electives

Elective courses provide students with opportunities to apply their skills to specific areas of inquiry after satisfying specific prerequisites. The core requirements for Bachelor of Music students include two music theory electives. Bachelor of Music students may meet the theory requirement by taking one level I elective (preferably after completing TH 142 (<http://catalog.rider.edu/search/?P=TH%20142>) and before taking TH 241 (<http://catalog.rider.edu/search/?P=TH%20241>)) and one level II elective, or else by taking two level II electives.

Level I theory electives include:

Code	Title	Credits
TH 237	Composition Class	3
TH 251	Analytical Studies I	3
TH 253	Orchestration	3

TH 255	Song Writing	3
TH 259	Electroacoustic Music	3

Level II theory electives include:

Code	Title	Credits
TH 424	Choral and Instrumental Arranging	3
TH 431	Form and Analysis	3
TH 432	Contrapuntal Techniques	3
TH 433	Special Topics in Theory	3
TH 452	Analytical Studies II	3
TH 550	Keyboard Harmony	3

Music Computing Center

Westminster maintains a music computing facility in which students can compose, orchestrate, and print their compositions in publishable quality using computers interfaced with sampler/synthesizers as well as sequencing and music printing software.

Faculty

Sharon Mirchandani (chair) • Professor, Music History/Theory, 1997. B.M., Bowling Green State University; M.M., Temple University; Ph.D., Rutgers University.

Christian Carey • Associate Professor, Theory/Composition/Music History, 2004. B.M., Juilliard; M.M., Boston University; Ph.D., Rutgers University.

Charles Frantz • Adjunct Associate Professor, Music History/Theory, 2000. B.M., M.M., Temple University; Ph.D., Rutgers University.

Ronald A. Hemmel • Professor, Theory/Composition. B.M., Westminster Choir College; M.M., James Madison University; M.Phil., Ph.D., Rutgers University.

Jay Kawarsky • Professor, Theory/Composition, 1989. B.M.E., Iowa State University; M.M., D.M., Northwestern University.

Anthony Kosar • Professor, Theory, 1984. B.M., West Liberty State College; M.M., Southern Illinois University; Ph.D., The Ohio State University.

Joel Phillips • Professor, Theory/Composition, 1985. M.M., Eastman School of Music, University of Rochester; B.M., D.M.A., University of Alabama.

Stefan Young • Professor, Theory/Composition, 1979. B.M., Rollins College; M.M., The Juilliard School; Ph.D., Rutgers University.

Music Education

General Remarks

The undergraduate Music Education curriculum is planned to develop teachers who are reflective, who acknowledge the connections music has to the child's world and who seek to promote an understanding of those connections in a social context. Students come to know and understand:

- the central concepts, tools of inquiry and structures of music education as they relate to the New Jersey Core Curriculum Content Standards for the Visual and Performing Arts and how to design appropriate learning experiences that connect to the students' world and help students to broaden their perceptions of the world around them;
- how children learn and adapt to instruction that meets a diversity of learning styles and special learning needs in a variety of school contexts;
- the importance of teaching that is culturally responsive;

- instructional planning and curriculum design that promote critical thinking, action and feeling through teaching constructivist and other appropriate strategies;
- how to engage students in problem solving, problem posing and meaningful dialogue;
- the appropriate use of multiple assessments;
- sound principles of effective classroom management;
- effective verbal, nonverbal and written communication techniques and the tools of information literacy;
- the importance of being articulate advocates for music education in the schools;
- the importance of schooling within the context of the community and of learning to build partnerships with parents, families and agencies within the community to support students' learning and well-being;
- the importance of ongoing professional development.

The curriculum includes a state-approved music education program that leads to a letter of certification eligibility for teaching vocal and instrumental music at all levels in New Jersey. Transfer of certificates to other states is greatly facilitated by accreditation of the program by the National Council for the Accreditation of teacher Education (NCATE) and by membership of the State of New Jersey in the National Association of State Directors of Teacher Education and Certification program (NASDTEC) and the Interstate New Teacher Assessment and Support Consortium (INTASC).

Music Education majors must maintain a minimum cumulative grade point average of 3.0. Students whose general progress is unsatisfactory or whose cumulative grade point average falls below a minimum 3.0 level may be dropped from the Music Education major. If a student is dropped from the major because of failure to maintain the minimum grade point average, s/he may apply for readmission to the Department of Music Education and Conducting, Organ and Sacred Music. Readmission will be dependent upon various criteria, including the G.P.A., current academic progress and the student's general standing. Decisions regarding retention or appeals will be made in a manner consistent with state and institutional non-discrimination policies.

Applications for certification are processed each year on November 15 and April 15, and at no other time.

Music Education Lab

Undergraduates must meet the weekly attendance and participation requirements for Music Education Lab during every semester of enrollment up to seven semesters as an undergraduate Music Education major except for the senior student teaching semester. Grading is "P" (satisfactory) or "U" (unsatisfactory). As part of the Music Education Lab experience, students are required to complete 15 hours of professional development. Students propose their own Professional Development Activity (PDA) to be approved by the lab instructor each semester.

Graduate students have no departmental requirements in Music Education Lab.

National Association for Music Education

Music Education majors are encouraged to join the Westminster student chapter of the National Association for Music Education (NAfME.org (<http://www.nafme.org/>)). Membership enables them to attend state, regional and national meetings, providing them with a connection to active members of the profession. Members also receive the Music

Educators Journal, Tempo and Teaching Music, which are used as supplementary texts in several courses.

Music Education Portfolios

All Music Education majors must maintain portfolios of work providing evidence of their suitability for teaching. Portfolios of undergraduates are reviewed by the department with students when they have earned at least 60 credits as well as upon completion of ME 492 (<http://catalog.rider.edu/search/?P=ME%20492>). Students must pass the portfolio review to continue in the department. Portfolios of graduate students are reviewed each year.

Practicums and Field-based Observations

In addition to the standard student teaching semester in the senior year, a special feature of the Westminster Choir College program is the experience of observation and teaching in the context of the Art of Teaching Music courses ME 161 (<http://catalog.rider.edu/search/?P=ME%20161>), ME 262 (<http://catalog.rider.edu/search/?P=ME%20262>), ME 563 (<http://catalog.rider.edu/search/?P=ME%20563>) and ME 564 (<http://catalog.rider.edu/search/?P=ME%20564>). These combine instruction in music methods with practical experience in public school contexts. Several music education courses require students to make observations of music classes in urban, suburban, public and/or private schools.

Students must be prepared to arrange for transportation to and from practicums at a reasonable distance from the college and to sustain related expenses.

Students will be required to obtain a background clearance in an assigned school district in order to participate in a field experience. Students who have been convicted of a felony may not be approved for field experiences, and are not able to receive New Jersey State Teacher Licensure.

Priority Registration

Because of the demand for these courses, Music Education majors will receive priority registration for:

Code	Title	Credits
ME 111	Music Education Lab	0
ME 161	Art of Teaching Music I	3
ME 262	Art of Teaching Music II	4
ME 563	Art of Teaching Music III	4
ME 564	Art of Teaching Music IV	4

Students who register after pre-registration are not assured places in these classes. Students need the permission of the chair to register for student teaching. All pre-requisites for student teaching must be completed before permission is granted. Therefore, students are urged to complete pre-requisites (including PI 204 (<http://catalog.rider.edu/search/?P=PI%20204>)) by the end of the spring semester of their junior year. It is recommended that students meet piano proficiency requirements by the end of their sophomore year.

Student Teaching

Student teaching is a full semester in duration and is usually completed during the seventh or eighth semester of study. Students may not enroll for any applied or classroom courses during the semester of student teaching, except for ME 587 (<http://catalog.rider.edu/search/?P=ME>

%20587). In addition, students may not present or participate in recitals or choral performances or ensembles during the semester of student teaching. Further departmental policies regarding the student teaching semester are contained in the Music Education Department Handbook. Students are referred to the paragraph above which relates to registering for the student teaching semester.

Master of Music Education (M.M.E)

The Master of Music Education program is for music teachers who wish to complete graduate study in three to four summers or in two academic years. Students may also combine summer and academic terms to accelerate completion. The degree is for those who hold an undergraduate degree in music education and a teaching certificate. Students do not earn teacher certification through this degree program.

Our 32-33 credit graduate curriculum is designed for music educators who wish to improve their practice, challenge their thinking and develop the skills to bring about positive change in their school. Students design their own 12-credit "focus area" of courses tailored to their particular interests and goals. Some areas of focus selected by recent MME students include choral pedagogy, choral conducting, voice pedagogy, Kodály (with certification) and music technology. The MME degree culminates in either a thesis or capstone project.

For more information on this program please visit Graduate Programs: Music Education (<http://www.rider.edu/wcc/academics/graduate-programs/music-education/>)

Music Education Courses Online

The following music education courses are offered in traditional (fall, spring and summer terms) and online formats throughout the year. The online versions may be offered in 13-week, 6-week or 3-week formats. Students in the MM, MME or BM-MME programs may take either the traditional or online format to complete their degree. Students in other degree programs may take these courses as free electives:

Code	Title	Credits
ME 685	Improving Musical Practice: Research in Music Education	3
ME 692	Social Justice in Music Education: History, Philosophy, and Practice	3
ME 693	Seminar in Music Educ	3
ME 721	Curriculum Development & Evaluation	3
ME 723	Social, Emotional, and Musical Learning	3

The following courses may be used as electives in graduate music education programs. They are taught quarterly online, in 8-week modules throughout the year:

- CP-600 Creative Practices in Music Teaching and Learning
- CP-620 Creative Practices in Vocal Science
- CP-640 Creative Practices in Choral Pedagogy
- CP-660 Creative Practices in Classroom

Faculty

Jason Vodicka • Associate Professor and Chair, Music Education, 2018. B.M., M.M., Westminster Choir College of Rider University; D.M.A., University of Georgia.
Frank Abrahams • Professor Emeritus, Music Education, 1992. B.M.E., Temple University; M.M., New England Conservatory; Ed.D., Temple University.

Sangmi Kang • Assistant Professor, Music Education, 2018. B.M., M.M., Seoul National University; Ph.D., University of Florida.
Maureen Murphy-Fernandez • Adjunct Instructor, Music Education, 2016. B.S., West Chester University.
Marshall Onofrio • Professor, Music Education, 2007. B.M., B.S., University of Connecticut; M.M., University of Illinois; M.M., University of Nebraska-Lincoln; D.M.A., The Ohio State University.
Sarah Perry • Assistant Professor, Music Education, 2021. B.S., Elizabethtown College; M.A., Ed.D., Teachers College, Columbia University.
G. Preston Wilson, Jr. • Assistant Professor, Music Education, 2021. B.M., Fisk University; M.M., Bowling Green State University.

Piano

General Remarks

Piano at Westminster Choir College has multiple dimensions at both the undergraduate and graduate levels. It fosters the development of students who perform on a high level as soloists, as artist-teachers and as collaborators with other performing artists. A strong foundation of technique and knowledge of piano literature and style are essential to all of these aspects of pianism. The department also provides instruction for undergraduate students who need keyboard skills in order to function effectively throughout their professional careers.

Programs of Study

Piano Major: Undergraduate (http://catalog.rider.edu/westminster-choir-college/program-course-descriptions/piano/#Piano_Major_UG)
 Piano Primary: Undergraduate (http://catalog.rider.edu/westminster-choir-college/program-course-descriptions/piano/#Piano_Primary_UG)
 Piano Major: Graduate (http://catalog.rider.edu/westminster-choir-college/program-course-descriptions/piano/#Piano_Major_GR)
 Piano Primary: Graduate (http://catalog.rider.edu/westminster-choir-college/program-course-descriptions/piano/#Piano_Primary_GR)
 Piano Secondary: Undergraduate (http://catalog.rider.edu/westminster-choir-college/program-course-descriptions/piano/#Piano_Secondary_UG)
 Piano as an Elective (http://catalog.rider.edu/westminster-choir-college/program-course-descriptions/piano/#Piano_Elective)
 Piano Pedagogy Lab (http://catalog.rider.edu/westminster-choir-college/program-course-descriptions/piano/#Piano_Ped_Lab)
 Piano Performance Class (http://catalog.rider.edu/westminster-choir-college/program-course-descriptions/piano/#Piano_Perf_Class)

Piano Major: Undergraduate

Undergraduate Piano majors are encouraged to play at least twice in performance classes each semester. Semester juries, a recital in either the sophomore or junior year and a senior recital are required.

Piano Primary: Undergraduate

Piano primary students majoring in Sacred Music, Bachelor of Arts in Music, or Music Education are expected to play once each semester in performance class. Seniors give a full or half recital, as determined by the instructor and the department following the jury examination at the end of the junior year. Freshmen have required juries at the end of each semester; sophomores and juniors, at the end of each year.

Piano Major: Graduate

Students majoring in Piano receive private lessons and play in weekly studio and are expected to play at least twice in performance classes. The program culminates with a full recital. Semester juries are required.

Piano Primary: Graduate

Graduate piano primary students majoring in Sacred Music or Music Education receive private lessons and are required to present a half recital. Students are expected to play at least twice in performance class each semester. Annual juries are required.

Piano Secondary: Undergraduate

All undergraduate voice primary students must enroll for piano secondary study until the capstone course (PI 204 (<http://catalog.rider.edu/search/?P=PI%20204>), PI 205 (<http://catalog.rider.edu/search/?P=PI%20205>), PI 207 (<http://catalog.rider.edu/search/?P=PI%20207>), or PI 208 (<http://catalog.rider.edu/search/?P=PI%20208>)) is passed. Instruction is in the form of piano classes. Incoming undergraduates take a placement test and may be required to successfully complete PI 045 (<http://catalog.rider.edu/search/?P=PI%20045>) before beginning the sequence of Piano Secondary courses. The sequence consists of four courses: PI 103 (<http://catalog.rider.edu/search/?P=PI%20103>), PI 104 (<http://catalog.rider.edu/search/?P=PI%20104>), PI 203 (<http://catalog.rider.edu/search/?P=PI%20203>) and the capstone course, each of which must be passed with a grade of B- or higher.

For any student with a double major that includes the Bachelor of Music in Music Education or the Bachelor of Music in Music Education/Master of Arts in Teaching degree program, that student must successfully complete PI 204 (<http://catalog.rider.edu/search/?P=PI%20204>), the Piano Secondary capstone course. For any other student with a double major, not including the B.M. in Music Education or the B.M. in Music Education/M.A.T. degree program, the capstone course required for that student will be determined by the piano secondary faculty and coordinator of Piano Secondary in consultation with the Associate Dean.

Instruction entails study and performance of piano literature from the Baroque through the 21st Century as well as development of proficiency in areas of functional keyboard skills. If the capstone is passed in fewer than four semesters, further study is not required.

Piano as an Elective

Students may elect private instruction in piano for credit. There are no audition requirements, but an extra fee is charged. Elective lessons are provided on a space-available basis to qualified students.

Piano Pedagogy Lab

PI 611 (<http://catalog.rider.edu/search/?P=PI%20611>) is a required graduate Piano Pedagogy course for the purpose of solving problems related to piano teaching. The class format includes discussion of observations, supervised and independent teaching, questions relating to repertoire, materials, and technique, comparative philosophies and psychologies and their applications, group and private teaching, business issues (e.g. studio policies), professional organizations and publications, use of technology, career planning, recital and audition planning. Preparation for graduate oral examination is included. The weekly lab is required for two semesters, but recommended for all four semesters.

Piano Performance Class

This is a weekly recital and lecture hour during which programs are given by students and guest performers. Attendance and participation at weekly studio and performance classes is required for all undergraduate and graduate piano major and primary students. All Westminster Choir College students are invited to attend.

Faculty

Ena Bronstein Barton • Adjunct Associate Professor, Piano, 1983. Artist Diploma, Escuela Moderna de Musica and Conservatorio Nacional de Musica, Santiago, Chile.

Ingrid Clarfield • Professor, Piano, 1982. B.M., Oberlin College; M.M., Eastman School of Music, University of Rochester

James Goldsworthy • Professor, Piano, 1996. B.M., M.M., Southern Methodist University; D.M.A., Stanford University.

Phyllis Lehrer • Professor Emerita, Piano, 1975. A.B., University of Rochester; M.S., Juilliard School.

Agnes Poltorak • Adjunct Assistant Professor, Piano, 2000. B.M., University of British Columbia, Canada; M.M., Westminster Choir College of Rider University.

Sacred Music

General Remarks

The Sacred Music Department offers education of the highest quality and broadest scope to Sacred Music majors who aspire to be leaders of the future.

The department is inter-denominational and seeks to explore the excellence of various traditions of sacred music. The faculty have wide experience and expertise in such traditions as Anglican, Lutheran, Methodist, Presbyterian, Reformed, Roman Catholic, Synagogue and Temple, and others.

The curricula at both undergraduate and graduate levels aim, on the one hand, to explore how familiar tradition can be blended with unfamiliar contemporary creativity in choral, congregational, and instrumental music for worship and, on the other hand, to provide a balanced study of theoretical matters and practical concerns. Technique, repertoire, and performance practice are therefore considered with theology, Biblical and post-Biblical religious history, and the development and practice of liturgy and worship.

Underlying all the offerings of the department is the understanding that sacred music is neither an optional extra nor merely a spiritual entertainment within the service of the church. It is rather an essential part of the liturgy and worship and therefore must have integrity and quality appropriate for its twin functions of carrying the Word of God to us, and our words of praise to God.

Undergirding the sacred music program are the offerings of the other Westminster academic and performance departments, the specialized collections containing sacred music materials in Talbot Library, and the vast network of affiliate churches in the greater New York-Philadelphia metropolitan area in which Westminster students are enabled to gain personal experience of a wide range of sacred music practice.

Sacred Music Lab

All full-time undergraduate Sacred Music majors are expected to enroll in and meet the requirements for SM 511 (<http://catalog.rider.edu/search/?P=SM%20511>) for a total of eight semesters. All full-time graduate

Sacred Music majors are expected to enroll in and meet the requirements for SM 511 (<http://catalog.rider.edu/search/?P=SM%20511>) for a total of two semesters. Grading is "P" (satisfactory) or "U" (unsatisfactory).

Handbell Program

The Westminster handbell program was instituted in 1979 to fill the need to train church musicians in the art of handbell ringing. It became the first curriculum of handbell ringing in an institution of higher learning. Concert Handbell Choir I, open to students by audition, goes on tour annually, has appeared on national television, and has five recordings to its credit.

Jubilee Singers

The Westminster Jubilee Singers is an auditioned ensemble dedicated to the performance of repertoire from the rich body of sacred music from the African-American tradition. Jubilee Singers performs regularly on- and off-campus.

Sacred Music Internship

All undergraduate Sacred Music majors are placed in local churches during the junior year as part of the requirement for church field education. The placement decision is made at the end of the sophomore year to permit planning over the summer before employment begins in the fall. Church field education gives the opportunity for students to exercise their skills in a church setting under faculty supervision and guidance.

Sacred Music Major: Undergraduate

The undergraduate sacred music program is designed for students who are preparing for professional careers in church music. The curriculum provides courses in theological, liturgical, sociological, and practical dimensions of music ministry and requires at least one year of supervised field education in an affiliate church.

Sacred Music Major: Graduate

The graduate sacred music program provides advanced training for church musicians from a wide variety of educational, professional, and denominational backgrounds. It is expected that applicants for this program will bring a thorough grounding of musical knowledge and significant experience in full- or part-time music ministry. The curriculum includes general as well as specialized courses in sacred music studies, theology, history, musicology, and applied skills.

Special Performance Option for Graduate Students

Graduate applicants who have outstanding promise in sacred music as conductors but who have limited backgrounds in voice, organ or piano may apply for special consideration as performers in an instrumental field not normally part of the graduate sacred music program. A candidate should have an undergraduate major or emphasis or the equivalent on the instrument. A recommendation from the undergraduate applied music instructor is required. The candidate will audition for a committee composed of an associate dean, the faculty chair, and an appropriate member of the Westminster Conservatory faculty.

An admitted student will choose an instrumental teacher with whom to study, subject to the approval of the auditioning committee. The student is required to complete satisfactorily the equivalent of two semesters of study (at least 12 hours of lessons per semester) and to present a 30-minute recital under the instrumental teacher's supervision. All fees

and expenses for this study are separate from those charged by the college and are the responsibility of the student. The requirement of three semesters of voice, organ or piano study, with satisfactory completion of an appropriate jury, remains for a student admitted under this option, but audition and recital requirements in these areas are waived.

Princeton Theological Seminary

A reciprocal arrangement with Princeton Theological Seminary allows Westminster graduate students to take certain courses offered by the Seminary. Enrollment in such courses is arranged after consultation with Sacred Music faculty. Speer Library at the Seminary, housing one of the nation's most important theological collections, is another invaluable resource for Westminster students.

Faculty

Tom T. Shelton, Jr. • Associate Professor and Chair, Sacred Music, 2012. B.M., M.M., University of North Carolina at Greensboro.

Vinroy Brown • Adjunct Instructor, Sacred Music, 2017. B.M., Westminster Choir College of Rider University; M.A., Regent University.

Steve Pilkington • Associate Professor, Sacred Music, and Director of Chapel, 1992. B.A., St. Olaf College; M.M., University of Illinois; Ph.D., Drew University.

Kathleen Ebling Shaw • Adjunct Instructor, Sacred Music, 1991. B.M., Westminster Choir College.

Voice

General Remarks

Since its founding, Westminster Choir College has made a unique contribution to the world of music because of its emphasis upon vocal training. All undergraduates are required to study voice in order to become well grounded in the fundamentals of singing. Many graduate students also study voice as a major, primary, or elective.

The Voice Department seeks to develop the musician by establishing a sound vocal technique and a thorough understanding of the singing voice, its literature, and pedagogy. These tools are essential for the study and performance of vocal and choral literature and for training students as solo performers, professional teachers, or choral conductors. Every undergraduate must satisfy departmental requirements for graduation. Juries and other tests are conducted periodically for the purpose of evaluating progress; details may be obtained from the Voice Department.

Voice Primary: Undergraduate

Voice primary students majoring in Sacred Music, Music Education, Theory/Composition, Music Theater, or the Bachelor of Arts in Music receive instruction which includes private lessons, diction, vocal pedagogy, voice literature and recitals. Weekly studio and performance classes offer regular performing opportunities.

Voice Major: Undergraduate

Instruction for Voice Performance majors entails private lessons, coaching, recitals, diction, voice literature, opera, and vocal pedagogy. Weekly studio and performance classes offer regular performing opportunities.

Voice Performance Repertoire List

(This requirement is effective as of the Fall 2010 semester for all students who entered or were readmitted into the Bachelor of Music, Voice Performance major for Fall 2008 or later.)

Students will document and present a Voice Performance Repertoire List demonstrating that they have satisfied the repertoire requirements stated in the Voice Handbook. The completed Voice Performance Repertoire List, signed by the voice teacher, must be submitted to the Academic Coordinator, along with documentation of the senior recital. Failure to complete the requirements of the Voice Performance Repertoire List will result in failure to graduate.

Secondary Voice: Undergraduate

Organ and piano primary students are required to study voice as a secondary applied field until they pass the Voice Proficiency Test. The test may be passed at the end of any semester, but those who do not pass it after four semesters of instruction are required to continue study until the test is passed. If the test is passed in fewer than four semesters, further voice secondary study is not required. Instruction includes class and private lessons as well as optional diction and vocal pedagogy courses. Qualified students may sing in performance classes at the discretion of their teachers or may request departmental approval to present voice recitals.

Voice Pedagogy and Performance Major: Graduate

This program has two emphases or tracks. The pedagogy emphasis entails private lessons, voice literature, opera, vocal pedagogy, supervised student teaching and a full recital. The performance emphasis entails private lessons, voice literature, opera, vocal coaching, vocal pedagogy, and a full recital supported by carefully researched program notes. For students whose undergraduate work has not included a public recital, presentation of a 30-minute recital is required before work on the graduate recital may begin. Weekly coaching classes as well as studio and performance classes offer frequent performance opportunities.

Voice Primary: Graduate

Graduate students majoring in Sacred Music or Music Education may study voice as a primary instrument. The program culminates in a graduate recital of 30 to 50 minutes of singing. Weekly studio and performance classes offer frequent performance opportunities.

Voice as an Elective

Undergraduate and graduate students may elect to study voice for credit toward their degrees if it is not otherwise a specific requirement. Instruction is in the form of private lessons and an extra tuition fee is assessed. There are no specific entrance or jury requirements. Elective lessons are provided on a space-available basis to qualified Princeton and Lawrenceville students.

Voice Performance Class

Attendance and participation at weekly studio and performance classes is required for all voice primary students. All Westminster students are invited to attend. The class functions primarily to provide performance opportunities, to acquaint students with a wide variety of vocal literature, and to equip them to teach voice to others.

Master of Voice Pedagogy (M.V.P.)

The Master of Voice Pedagogy program is designed for summer study. It includes courses in vocal pedagogy and literature, music core courses, and choral ensemble participation. The program culminates in a vocal pedagogy project completed under the guidance of a Westminster voice faculty member.

Presser Voice Laboratory

The Presser Voice Laboratory at Westminster is a state-of-the-art lab for voice analysis and research. It is used as a tool for students and their teachers to work interactively with visual and acoustical feedback, and for them to engage in individual research interests. Open Lab Days encourage everyone at Westminster to explore the lab's technology, and classes routinely work on lab assignments there to gain knowledge and experience in voice science.

Laboratory equipment includes KayPENTAX's Computerized Speech Laboratory (CSL), the Phonatory Aerodynamic System (PAS) for airflow analysis, VoceVista software and electroglottograph, and professional-quality microphones, recorders, and sound level meters. Various models and teaching aids are also housed in the lab, and the Talbott Library collaborates with the Presser Lab to provide access to books, journals, recordings, and Visible body software.

Faculty

Margaret Cusack • Professor, Voice, and Chair of Voice and Piano Faculties, 1994. B.M., M.M.T., Oberlin College.

Christopher Arneson • Professor, Voice, 2003. B.A., M.M., Binghamton University; D.M.A., Rutgers University.

Susan S. Ashbaker • Associate Professor, Voice, 2006. B.M., M.M., Southern Illinois University; M.M., University of Illinois.

Lauren Athey-Janka • Adjunct Assistant Professor, Voice, 2016. B.M., Boston University, M.M., Westminster Choir College of Rider University.

Victoria Browers • Adjunct Assistant Professor, Voice, 2017. B.M., Ohio Wesleyan University, M.M. Westminster Choir College of Rider University; D.M.A. State University of New York at Stony Brook.

Elem Eley • Professor Emeritus, Voice, 1987. B.M., Baylor University; M.M., Southwestern Baptist Theological Seminary.

Rochelle Ellis • Adjunct Assistant Professor, Voice, 1995. B.M.E., University of Missouri, Kansas City; M.M.E., Westminster Choir College of Rider University.

Faith Esham • Adjunct Assistant Professor, Voice, 2000. B.A., Columbia Union College; B.M., M.M., The Juilliard School.

Thomas Faracco • Associate Professor Emeritus, Voice, 1983. B.M., M.M., Westminster Choir College of Rider University.

Nancy Froyland Hoerl • Adjunct Assistant Professor, Voice, 1995. B.A., Moorhead State University; M.M., Westminster Choir College of Rider University.

Katherine Johnson • Adjunct Assistant Professor, Voice, 2006. B.M., University of Calgary; M.M., Manhattan School of Music.

Rachelle Jonck • Adjunct Associate Professor, Voice, 2007. B.M., University of Stellenbosch (South Africa).

Robin Massie • Adjunct Assistant Professor, Voice, 2008. B.M., Westminster Choir College of Rider University; M.M., Yale University.

Sean McCarther • Associate Professor, Voice, 2012. B.M., Baylor University; M.M., D.M., Indiana University.

Mark Moliterno • Adjunct Associate Professor, Voice, 2005. B.M., M.M., Oberlin College Conservatory of Music.

Carolann Page • Adjunct Assistant Professor, Voice, 2008. B.M., Curtis Institute of Music.

Kathy Kessler Price • Professor, Voice, 2012. B.A., University of Richmond; M.M., University of Maryland; Ph.D., University of Kansas, Lawrence.

Debra Scurto-Davis • Adjunct Assistant Professor, Voice, 2004. B.M.E., Evangel College; M.M., Baylor University; S.M., University of Michigan.

Elizabeth Sutton • Adjunct Assistant Professor, Voice, 2005. B.A., Bowling Green State University; M.M., College-Conservatory of Music, University of Cincinnati.

Charles J. Walker • Adjunct Instructor, Voice, 1995. B.M., University of Delaware.

Sally Wolf • Adjunct Assistant Professor, Voice, 2001. B.M., Kent State University; Artist Diploma, Curtis Institute of Music.

Amy Zorn • Adjunct Assistant Professor, Voice, 1996. B.M., University of Wisconsin, Madison; M.M., Boston University.

Majors, Minors and Certificates

College of Arts and Sciences

The College of Arts and Sciences is separated into four distinct schools. The programs below are listed under the school in which they are offered. Some offerings are restricted to Continuing Education Program students only and are indicated with the CEP designation.

Acting for Film, Television or Theatre

Program Overview

The B.F.A. in Acting is a professional training program preparing students for entry in stage, film and television. The program consists of comprehensive training in acting, voice and movement as well as training in the business of acting, directing, script analysis and theatre history. They will learn from a faculty of working professionals from every aspect of the discipline. Rider's close proximity to New York City and Philadelphia allows students to interface with many industry experts and to help nurture their professional aspirations in the vibrant cultural atmosphere of these major entertainment markets.

Acting for Film, Television or Theatre (BFA) Major Requirements

(78 credits)

General Requirements

Students must earn a minimum grade of "C" in those courses required in the major area in order to make satisfactory progress. If a grade of "C-" or lower is earned, the student must repeat the course.

Students in the BFA in Acting for Film, Television or Theatre program must pass the sophomore review to remain in good standing in the major.

Total Credits		120

¹ Double majors should consult their advisors to determine the most pedagogically appropriate lab to attend. Students should not register in more than one lab per semester. Students are required to complete at least three lab sections in each of their majors before graduation.

Students must meet the minimum total credits of lab required by each major though some of those credits may come from a different discipline.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

THE 103 The Authentic Instrument I: Introduction to Performance Skills 3 Credits

Through Alexander Technique and other methodologies, actors gain awareness of personal habits and begin to find their authentic, truth-telling voice and body—a dynamic and expressive instrument to serve them in any medium.

THE 104 The Authentic Instrument II: Developing the Imaginative Performer 3 Credits

Continuing from THE 103, actors explore psycho-physical techniques (e.g. Michael Chekhov, Viewpoints, Laban) to develop the actor's imagination. The class culminates in a public presentation using the tools that have been cultivated in Authentic Instrument I & II.

Prerequisite(s): THE 103.

THE 105 Theatre History to 1700 3 Credits

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 107 Acting I: Intro to Acting 3 Credits

Exercises and improvisations developing the fundamental prerequisites for the actor are provided. The emphasis is on vocal and physical mobility and the ability to communicate emotional states from the stage.

THE 110 Acting II: Scene Study 3 Credits

Basic acting techniques. Emphasis on the ingredients of any action: what am I doing, where, why, who am I, what is my attitude toward partner?

Prerequisite(s): THE 107.

THE 111 Theatre Lab 0 Credits

This class serves as a forum for students to cultivate practical professional skills. Through seminars, guest speakers and master classes, this lab will give the students necessary tools to enter the professional theater. Theater majors must meet the weekly attendance and participation requirements during every semester up to a total of six.

THE 115 Stagecraft 3 Credits

The theory and practice of construction and rigging of stage scenery is offered. Emphasis is on actual productions and road show set-ups. One lecture and two labs per week.

THE 127 Theatre Production 1 Credits

Students rehearse and perform roles in a play produced by the department and directed by a member of its faculty. Students may also prepare a major element of design or technology for the production. Maximum of eight credits are accepted in theatre production, band and/or choir.

THE 220 Movement for the Actor I 3 Credits

This course is an introduction to movement training methodologies, and emphasizes physical awareness and expressivity as it relates to development of character.

Prerequisite(s): THE 110, For Acting majors or by permission of the instructor.

THE 221 Voice for the Actor 3 Credits

Focuses on exploration of the basic principles of vocal production and cultivating natural expressivity of the voice. Class work is based upon the classic progression of voice exercises of Kristin Linklater.

Prerequisite(s): THE 107; Open to Theatre majors or minor, or by permission of the instructor.

THE 222 Speech and Dialects for the Actor 3 Credits

Focuses on exploration of the International Phonetic Alphabet (IPA) and the use of the IPA in learning dialects (including Standard Neutral American) for the stage.

Prerequisite(s): THE 107; Open to Theater majors or minor, or by permission of the instructor.

THE 229 Movement for the Actor II 3 Credits

This course is a continuation of study in movement training methodologies (Alexander Technique, Viewpoints, Laban). It will emphasize developing physical awareness and expressiveness as it relates to the development of character work. It will also continue the further cultivation of awareness of habitual psycho-physical patterns that inhibit students in their professional development.

Prerequisite(s): THE 220, THE 221.

THE 240 Script Analysis 3 Credits

This course provides students with a technique for analyzing a theatrical script in terms of its theatrical requirements and aesthetic qualities. Students will use critical research and develop the abilities to write and speak clearly about dramatic literature, the requirements of production, and the experience of performance.

Prerequisite(s): THE 107 with a minimum grade of C.

THE 300 Acting for the Camera 3 Credits

Focuses on the craft and artistry of acting in television and film. Examination of TV production and the styles needed for work in various media will be discussed. Physicalization, simplicity, listening, marking and other technical requirements will be explored. Staging involving different camera angles will be rehearsed. The emphasis of this class is on adapting the performance to the special needs of the camera.

Prerequisite(s): THE 107.

THE 310 Acting III 3 Credits

Students will study in-depth techniques for exploring characterization. They will be introduced to the "magic if" and study techniques for placing themselves in the circumstances of the characters they are portraying. They will learn the interior and exterior analysis of characters using "Adler" and "Practical Aesthetics" techniques.

Prerequisite(s): THE 107, THE 110.

THE 311 Acting IV 3 Credits

Students will learn the appropriate techniques to explore characters in the three styles of Elizabethan, Restoration, and Commedia dell'arte theatre. Sessions will include movement, effective speech, and finding appropriate actions for each style. Students will also learn proper research techniques to understand cultural influences on plays and characters.

Prerequisite(s): THE 107, THE 110, THE 310.

THE 313 Advanced Voice and Speech for the Actor I 3 Credits

Actors continue their study of vocal progression of Kristen Linklater and the speech work of Patsy Rodenberg, Edith Skinner and Louis Colaianni to develop physical freedom, energy and expressivity. Advanced diagnostic work of students' voice and speech habits is explored in relationship to work with contemporary, heightened, and stylized texts.

Prerequisite(s): THE 221, THE 222.

THE 314 Advanced Voice and Speech for the Actor II 3 Credits

Continuing from THE 313, actors apply advanced principles of vocal production and speech work to contemporary, heightened and stylized texts.

Prerequisite(s): THE 313.

THE 315 Acting V: Advanced Acting for the Camera 3 Credits

This course is a continuation of the study of acting for Television, Film, Internet Content, Voiceover and other mediums.

Prerequisite(s): THE 229, THE 311.

THE 329 Movement for the Actor III 3 Credits

This course is a continuation of study in movement training methodologies focusing on continued development of expressivity, ease, dynamics and authenticity in character development.

Prerequisite(s): THE 229.

THE 400 Directing for the Stage I 3 Credits

The technique of play directing and production management. Lectures present aesthetic and theoretical concepts that are explored in workshops.

Prerequisite(s): THE 107, THE 115.

THE 410 Advanced Performance Workshop 3 Credits

An opportunity to work an entire semester on a specific style or period of theatre, e.g., Shakespeare, farce, Readers' Theater.

Prerequisite(s): THE 107, THE 110.

THE 450 NY Experience: Professional Audition Technique and the Business of Acting 3 Credits

Students engage weekly with New York professionals to learn the business of acting and strategies for successful auditions in the NY Film, Television and Theatre industry. Students will participate in mock auditions with casting directors and theatre and on camera directors to refine audition skills. Travel costs to New York are the responsibility of the student.

FTV 135 Filmmaking I 3 Credits

Filmmaking I introduces students to basic film and television production theories, techniques, and applications. Students will gain competency in a number of production areas including composition, lighting, filmic storytelling, sound, production planning and editing. As well as gaining practical production experience, students will also be introduced to basic art theory in relation to composition and visual storytelling.

FTV 238 Screenplay Fundamentals 3 Credits

Screenplay Fundamentals will instruct students in how to write for the screen. Students will learn how to convey story and character through the medium of film and television, how to write effective dialogue, and understand the basics of dramatic writing and scene structure.

Prerequisite: COM 131.

FTV 243 The Actor and Filmmaker 3 Credits

A practicum course that instructs the student on how actors and directors work together to build a performance. The course will provide on-hands experience in technical aspects of behind and in front of camera processes in capturing an actor's performance, exploring the demands and particularities of acting for the camera. This course will also serve as an introduction to basic acting theories and practices as they relate to how actors work to express a character onscreen. Elements of this course include monologue and scene rehearsal and performance (both multi-camera and single camera), audition techniques (for both actors and directors), and how film directors block and cover a scene. Students will gain experience both behind and in front of the camera, **Prerequisite(s):** COM 131 or FTV 135 for Film/TV majors or THE 110 for Theater majors.

FTV 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; .

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

Actuarial Science

Program Overview

The Actuarial Science program is designed to provide students with the knowledge, skills and tools they will need to obtain employment as an actuary. The program incorporates a blend of business and liberal arts courses in mathematics to provide a deep understanding of critical thinking, analysis, and communication skills as well as project management and teamwork.

Employment projections predict a high demand for actuarial science positions over the next several years. Students interested in actuarial science will find this program contains all the components that contribute to a successful actuarial career and an excellent track record of placement upon graduation.

Student Learning Outcomes

Students graduating from the Actuarial Science program will be:

1. prepared to take the Society of Actuaries (SOA) exams required for employment in the actuarial science profession.
2. able to demonstrate the proficiency in the three Validation by Educational Experience (VEE) requirements by SOA.
3. able to write technical reports and make technical presentations containing statistical and actuarial results.
4. able to apply statistical methods using relevant software to solve real-world problems.
5. prepared to continue their study in finance, mathematics, statistics, and other related fields and take additional SOA exams to advance their career.

Degree Offered

- B.A. in Actuarial Science

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

ECO 200 Principles of Macroeconomics 3 Credits

A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ECO 201 Principles of Microeconomics 3 Credits

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

Prerequisite(s): ACC 210 and ECO 201.

FIN 307 Financial Markets & Institutions 3 Credits

This course provides an introduction to the organization and behavior of financial markets and institutions in the economy. The factors determining security prices and interest rates in the money and capital markets are analyzed. An overview of all major financial institutions is presented. In addition, market returns, the regulatory environment, and monetary policy are examined.

Prerequisite(s): FIN 220 or concurrent with FIN 220.

FIN 308 International Finance 3 Credits

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

Prerequisite(s): FIN 220.

FIN 309 Intermediate Corporate Finance 3 Credits

This course builds on and extends the concepts of financial management learned in FIN 220. The course examines long-term corporate financing and investment decisions and how those decisions interface with each other. Topics covered include: cost of capital, financial planning and analysis, capital budgeting, capital structure and dividend policy.

Prerequisite(s): FIN 220.

FIN 312 Investments 3 Credits

The fundamentals of investing in stocks, bonds, and other negotiable instruments are covered. Major topics include trading on securities markets, mutual funds, international investing, margin accounts, short sales, determinants of securities prices, and investment risks. Stock options, financial futures, convertible securities, and implications of taxes on investment decisions are also discussed.

Prerequisite(s): FIN 220.

FIN 340 Risk Management 3 Credits

This course examines the risk management process as applied to the firm as a whole. It integrates the management of all risks facing the firm: strategic, financial, hazard, and operational. Techniques for identifying risk, measuring and analyzing it, and selecting an appropriate treatment will be explored.

Prerequisite(s): FIN 220.

FIN 360 Fixed Income and Derivatives 3 Credits

This course centers on the quantitative portion of the Chartered Financial Analyst (CFA) level 1 curriculum, which includes materials on fixed-income risk and return, fundamentals of risk analysis, derivative instruments and risk management applications of option strategies. The goal is to help students prepare for the exam, as well as introduce them to a variety of topics in finance.

Prerequisite(s): FIN 312.

HTH 336 Economics of Health Care System 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

MSD 320 Statistics for Risk Modeling I 3 Credits

This is the first course in a two course sequence to prepare actuarial science students for the Society of Actuaries' (SOA) new exam "Statistics for Risk Modeling." This course (SRM I), together with the second course of the sequence SRM II, cover all the topics in the SOA's proposed syllabus for the exam. The course covers two major topics: (i) Generalized Linear Models, and (ii) Regression-based time series models and forecasting.

Prerequisite(s): MSD 205 or MTH 341.

MSD 325 Statistics for Risk Modeling II 3 Credits

This is the second course in the two course sequence to prepare actuarial science students for the Society of Actuaries (SOA) new exam "Statistics for Risk Modeling." This course, together with MSD 320, will cover all the topics in the SOA's proposed syllabus for the exam. This course examines the use of statistical learning methods to adequately model and understand complex datasets in business and economics. The use of the statistics software R to analyze realistic data sets is an important component of the course. Topics include: (i) Basics of Statistical Learning; (ii) Principal Components Analysis; (iii) Decision Trees; and (iv) Cluster Analysis.

Prerequisite(s): MSD 205 or MTH 341 or equivalent course.

MSD 350 Financial Mathematics 3 Credits

A thorough treatment of the theory and applications of compound interest. Topics include the measurement of interest, elementary and general annuities, amortization schedules and sinking funds, and bonds and other securities.

Prerequisite(s): MSD 205 or equivalent. Fall.

MTH 210 Calculus I 4 Credits

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 or MTH 106 with a grade of C or higher.

MTH 211 Calculus II 4 Credits

The definite integral, differentiation of transcendental functions, methods of integration and approximate integration, determination of area, volume, and surface area.

Prerequisite(s): MTH 210 with a grade of C or higher.

MTH 212 Calculus III 4 Credits

Infinite series; functions of two and three variables, vectors and tangent planes, partial derivatives, multiple integrals, determination of volume and density.

Prerequisite(s): MTH 211 with a grade of C or higher.

MTH 240 Linear Algebra 3 Credits

Systems of linear equations; vector spaces; linear independence; determinants; orthogonality; linear maps; eigenvectors.

Prerequisite(s): MTH 210 or as corequisite; sophomore standing; or permission of instructor.

MTH 340 Probability & Statistical Analysis I 3 Credits

Theory of sets and probability; discrete and continuous random variables and probability distributions. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite(s): MTH 212 or MSD 111.

MTH 341 Probability & Statistical Analysis II 3 Credits

Continuation of MTH 340. Foundations of mathematical statistics: normal distributions, estimation, confidence intervals and hypothesis testing; topics chosen from student's t- test, chi-square tests, analysis of variance and regression analysis. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite: MTH 340. Spring.

African American Studies

Overview

Housed in the Multicultural Studies program, the African American Studies minor addresses issues surrounding race, class, and gender, focusing on the specific history and obstacles associated with the unique experiences of African Americans in the United States. The coursework draws from many disciplines, including history, sociology, political science, literature, culture, and American studies, providing a broad range of ideas and information.

Learning Outcomes

Upon completing the minor in African and African American Studies, students will be able to:

1. Describe major social, cultural, and political events in the African and African American experience.
2. Explore and analyze the African and African American experience through the lens of different disciplines.
3. Compare and contrast the different experiences of African descent peoples within the United States and across the African diaspora.
4. Identify major figures in African and African American history and understand their impact on global and American society.

Total Credits		18

Courses and Descriptions

MCS 110 Race, Class and Gender in Contemporary American Society 3 Credits

This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with GSS 110. Students may only get credit for one course: MCS 110 or GSS 110.

MCS 210 Power and Privilege in a Multicultural Society 3 Credits

This course will examine how the intersection of power and privilege shapes race, gender and class relationships in the United States. Analyses will show how the legal, economic, political and social manifestations of power influence the assignments and distribution of privilege in the United States, both in historical and contemporary contexts. The impositions of power on identity in the social assignment of privilege will be an important component of the course. The two "big questions" to be examined in this course are: How do issues of race, ethnicity, class, age, religion, gender, and sexual orientation interact with privilege? How do the tensions between power, privilege, oppression and inequality lead to movements for social justice? Various interlocking systems of privileges—justice system, educational system, medical system, political system, economic system, etc.—will be examined, using the theoretical frameworks of inequality, oppression and dependency. Prominent public policies and social movements that have challenged the notions of power and privilege, both historically and contemporarily, will be examined: civil rights, women's suffrage, affirmative action, Occupy Wall Street, LGBT rights, Metoo movement, Equal Rights Amendment, Title IX, Lilly Ledbetter Fair Pay Act, etc.

HIS 201 African American History 3 Credits

Examines the actions and thought of peoples of African ancestry in the United States. Briefly considers Africa before the Atlantic slave trade, then concentrates on major themes in African-American history—the slave trade, slavery, and the genesis of African American society, emancipation and its consequences, urbanization and industrialization, Black Nationalism, the Civil Rights Movement, and African Americans today. Emphasizes African Americans' dynamic and creative role both in shaping their society and establishing their place in United States society. The on-going struggle for freedom and equality provides thematic continuity for analyzing nearly 400 years of African-American history.

AMS 212 Multicultural America 3 Credits

Focusing primarily on the new century, this course explores the experiences of the remarkably diverse range of ethnic groups who have come to the U.S. in recent years, including Hispanics, Europeans, Asians and Africans. How these groups have impacted the communities where they have settled, how they have interacted with other ethnic groups, and how they have assimilated (or not) and prospered (or not) are among the issues examined and discussed.

AMS 227 Martin Luther King Jr's America 3 Credits

This course studies Martin Luther King Jr's writings, speeches, and sermons, the context of the America he saw in his lifetime, and the implications of his message for today's America and its place in the world. King envisioned a wholly democratic America free of racism, poverty, and military aggression. Students will critically assess the political, economic, and religious thought at the root of his call for change.

AMS 307 Depictions of Racism in American Literature, Music, and Film 3 Credits

Depictions of Racism in American Literature, Music, and Film will study representations of racism in the American arts in historical context. Students will examine artistic representations of practices that disadvantage and disfranchise non-white Americans, with an eye toward understanding the ways America's history of racist practices has prompted responses from American writers, musicians, and filmmakers.

Prerequisites: CMP 125 or CMP 203 or BHP 150.

AMS 309 Hip Hop and American Culture 3 Credits

Explore hip-hop culture via the music, dance, art, and poetry created in some of the poorest and most segregated neighborhoods in America. Students will examine the social conditions that fostered the creation of hip-hop and delve into a range of issues confronted in hip-hop music and culture.

Prerequisites: CMP 125 or CMP 203 or BHP 150.

AMS 313 Black American Thought 3 Credits

This course introduces students to the critical and constructive nature of Black social and political thought through a survey of Black American leaders, with a focus on ideology, society and politics. Through readings and discussions, students will assess the complexities of various Black leaders and their ideological positions, often comparing and contrasting the attitudes, values and beliefs of Black thought leaders. Through the study of Black American leaders, students will gain an appreciation for the impact of Black history on the past and present of American public life. As we focus our attention on Black leaders of the 19th and 20th century, we will be mindful of the complex ways in which these leaders have agreed and disagreed on themes such as, but not limited to: achievement of Black liberation, direct action versus armed protests, the role of historical memory in modern political life, the economic and political significance of Black culture, and the tensions between Black segregation versus integration, as well as the defining of such core political concepts as citizenship, freedom, equality, progress, power, and justice.

ENG 228 Black American Lit 3 Credits

A survey of writings by black Americans, presented historically from early slave narratives through emancipation, reconstruction, the Harlem Renaissance, and literature from the 1930s to the present. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 229 Multi-Ethnic Literature in America 3 Credits

Surveys the literature of various ethnic groups including African Americans, American Indians, Asian Americans, Hispanic Americans, Jewish Americans and European Americans. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 366 Black and Multi-Ethnic Literature 3 Credits

A Survey of the literary writings of selected writers of Black and Multi-Ethnic America. Writers may include Zora Neale Hurston, Dorothy West, Maxine Hong Kingston, Anzia Yezierska, Louise Erdrich, Don Lee and Amy Tan.

POL 235 Race and Ethnicity in American Politics 3 Credits

Examines the changing political, economic, and social situation of racial and ethnic groups in American politics since the 1950s. Topics include the relationship between race/ethnicity and voting behavior, political parties, and election results. Includes an analysis of specific areas of contemporary racial and ethnic conflict, such as voting rights, immigration, and affirmative action.

POL 365 Politics of the Developing World 3 Credits

Studies the major political issues of the so-called "developing" world. Particular reference to political systems of Africa, Asia, Latin America, and the Middle East according to the relevance of the examples to large conceptual issues, and according to the major interests of the instructor. Typical issues include neocolonial dependency, the role of the state in newly developed countries, military rule and democratization.

SOC 207 Racial and Ethnic Relations 3 Credits

Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

Prerequisite(s): SOC 101.

SOC 345 Race and Crime 3 Credits

Examines the impact of crime policy on minority communities in the United States, with particular attention to the impact of “The War on Drugs”, three-strike laws, and mandatory sentencing on minorities and minority communities. Drawing on sociological research, the course explores myths and realities concerning the relationship between race and crime. The relationship between racial attitudes, historical race relations, and mass incarceration are discussed.

Prerequisite(s): SOC 101.

Allied Health Studies

Program Overview

Designed for working professionals in allied health fields, the Allied Health Studies degree for Continuing Education students allows them to gain the skills and credentials to advance in their field – while balancing both their career and family life.

The experience, skills and compassion an individual brings to his or her job transforms the lives of the patients in one’s care every day. But rapid changes in today’s health care environment now present allied health professionals with new challenges – and exciting opportunities. The B.S. in Allied Health Studies program prepares students for these challenges while still training them to be compassionate caregivers and partners.

Curriculum Overview

The curriculum is designed to provide a seamless transition from an Associate degree or a diploma program, building on the students’ experiences in allied health professions. Separate clinicals are not required.

Admissions Requirement

- Official transcripts from all institutions attended with a minimum 2.5 cumulative GPA
- Copies of a current/unrestricted license (in any allied health field)

Degree Offered

- B.S. in Allied Health Studies

Courses and Descriptions

BIO 100 Life Science 3 Credits

An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BIO 110 Life Science: Inquiry Approach 4 Credits

An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 110.

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 206 The Pharmaceutical Industry 3 Credits

An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.

Prerequisite(s): BIO 100 or BIO 101 or BIO 106 or BIO 108 or BNS 107 or CHE 115.

BIO 221 Human Anatomy & Physiology I 4 Credits

A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training.

Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.

Corequisite(s): BIO 221L.

BNS 107 Life Science: Brain and Behavior 3 Credits

An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BNS 275 Behavioral Neuroscience 4 Credits

An introductory behavioral neuroscience course including basic neuroanatomy and neurophysiology of movement, ingestive, reproductive, emotional, and learning behaviors. Emphasis is on the structure/function relationships that allow animals to make appropriate physiological and behavioral responses to the environment. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115 & BIO 116.

Corequisite(s): BNS 275L.

BNS 275L Behavioral Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 275.

CHE 115 Chemistry & Society 3 Credits

Designed to give the nonscientist an appreciation of the role of chemistry in today's world. The approach is conceptual rather than mathematical. Topics include basic principles of chemical theory, energy sources, elementary organic chemistry, drugs, food additives, polymers, chemistry of living systems, inorganic solids in modern technology, and problems involving pollution of the environment. Three hours of lecture per week. This course satisfies the core requirements for education and business majors.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

GLS 325 Global Perspectives on Health and Illness 3 Credits

Explores the different international perspectives on health and illness. Themes include how men, women, and children in respective civilizations are treated and viewed within their communities or nations, as they become ill. Particular attention is given to the contrast between various types of traditional healing and Western medical practices, and their interactions. Discussions will also compare the usefulness of national versus international health agencies in dealing with global health problems.

HTH 205 Introduction to Health Care 3 Credits

This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits

In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.

Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 315 Health Care Law, Ethics and Policy 3 Credits

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

HTH 336 Economics of Health Care System 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

HTH 491 Health Management Internship 3 Credits

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.

Prerequisite(s): HTH 205; junior or senior standing; and permission(s) of faculty supervisor.

MKT 380 Health Care Marketing 3 Credits

The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.

Prerequisite(s): MKT 200; junior & senior standing.

NUR 404 Healthcare Policy, Finance, and Regulatory Environments 3 Credits

This course provides a foundation of U.S. healthcare policy, including financial and regulatory policies, as well as the nature and functioning of the U.S. healthcare delivery system. There is emphasis on policy processes at the organizational, local, state, national, and global levels. Learning activities and assignments focus on strategies for learning how to assess the role of the baccalaureate-prepared nurse in policy formation and reformation at all levels, demonstrating understanding of the political process at all levels, developing effective advocacy strategies for vulnerable populations, how to identify and influence key stakeholders in the policy process, the importance of effective communication of key healthcare issues, and how to influence change in the political process at all levels when there is social injustice.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the variety of ways family impacts development across the lifespan.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 385 Death, Dying and Suicide 3 Credits

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

SOC 247 Aging 3 Credits

The emergence of social gerontology, demographic foundation of aging, the aging process, comparative study of aging and aged, effect of aging on the individual, social institutions and aging, and problems of aging and some solutions.

Prerequisite(s): SOC 101.

SOC 346 Health Care and Society 3 Credits

Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.

Prerequisite(s): SOC 101.

SOC 347 Aging and the Elderly 3 Credits

Allied Health Studies Online

Program Overview

Designed for working professionals in allied health fields, the Allied Health Studies degree for Continuing Education students allows them to gain the skills and credentials to advance in their field – while balancing both their career and family life. This online degree program provides flexibility and convenience to students.

The experience, skills and compassion an individual brings to his or her job transforms the lives of the patients in one's care every day. But rapid changes in today's health care environment now present allied health professionals with new challenges – and exciting opportunities. The B.S. in Allied Health Studies program prepares students for these challenges while still training them to be compassionate caregivers and partners.

Curriculum Overview

The curriculum is designed to provide a seamless transition from an Associate degree or a diploma program, building on the students' experiences in allied health professions. Separate clinicals are not required.

Admissions Requirement

- Official transcripts from all institutions attended with a minimum 2.5 cumulative GPA
- Copies of a current/unrestricted license (in any allied health field)

Degree Offered

- B.S. in Allied Health Studies

Courses and Descriptions

BIO 110 Life Science: Inquiry Approach 4 Credits

An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 110.

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 206 The Pharmaceutical Industry 3 Credits

An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.

Prerequisite(s): BIO 100 or BIO 101 or BIO 106 or BIO 108 or BNS 107 or CHE 115.

BIO 221 Human Anatomy & Physiology I 4 Credits

A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. **Prerequisite(s):** HSC major ONLY or Permission of instructor.

HTH 491 Health Management Internship 3 Credits

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.

Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

MKT 380 Health Care Marketing 3 Credits

The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.

Prerequisite(s): MKT 200; junior & senior standing.

NUR 404 Healthcare Policy, Finance, and Regulatory Environments 3 Credits

This course provides a foundation of U.S. healthcare policy, including financial and regulatory policies, as well as the nature and functioning of the U.S. healthcare delivery system. There is emphasis on policy processes at the organizational, local, state, national, and global levels. Learning activities and assignments focus on strategies for learning how to assess the role of the baccalaureate-prepared nurse in policy formation and reformation at all levels, demonstrating understanding of the political process at all levels, developing effective advocacy strategies for vulnerable populations, how to identify and influence key stakeholders in the policy process, the importance of effective communication of key healthcare issues, and how to influence change in the political process at all levels when there is social injustice.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the variety of ways family impacts development across the lifespan.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 385 Death, Dying and Suicide 3 Credits

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

SOC 247 Aging 3 Credits

The emergence of social gerontology, demographic foundation of aging, the aging process, comparative study of aging and aged, effect of aging on the individual, social institutions and aging, and problems of aging and some solutions.

Prerequisite(s): SOC 101.

SOC 346 Health Care and Society 3 Credits

Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.

Prerequisite(s): SOC 101.

Applied Behavior Analysis Certificate

Overview

The Certificate in Applied Behavior Analysis (ABA) is designed to provide undergraduate students a depth of academic and practical experience relevant for employment in behavioral technician-and related- jobs immediately after finishing their Bachelor of Arts degree. Moreover, the Certificate in ABA will provide students with a solid foundation for Rider University's Masters in applied psychology program with concentration in Applied Behavior Analysis.

The 17-18 credit certificate includes introductory and advanced courses that focus on ABA (PSY 212, PSY 299), the Experimental Analysis of Behavior (PSY 388), Research Methods in ABA (PSY 339/PSY 339L), and Professional Issues in ABA (PSY 389), as well as engaged learning experience conducting research in ABA (PSY 490), or interning for a school, clinic or agency that uses ABA (PSY 491).

Degree Offered

Applied Behavior Analysis Certificate Requirements

(17-18 credits)

Code	Title	Credits
Required Courses:		
PSY 212	Introduction to Applied Behavior Analysis	3
PSY 299	Field Placement in Applied Behavior Analysis	1
PSY 339	Research Methods in Applied Behavior Analysis	4
PSY 339L	Research Methods in ABA Lab	0
PSY 388	Learning and the Experimental Analysis of Behavior	3
PSY 389	Professional Issues in ABA	3
PSY 490	Independent Study: Research and Creative Expression ¹	3-4
or PSY 491	Internship in Psychology	
Total Credits		17-18

¹ PSY 490 Independent Study must have ABA focus; PSY 491 Internship site must have ABA focus.

Certificate Completion

To complete the ABA Certificate Program, students must meet the following requirements:

- A grade of "C+" or better in each course is required for the certificate.
- Completion of a capstone paper from PSY 490/ PSY 491 is required.

Courses and Descriptions

PSY 212 Introduction to Applied Behavior Analysis 3 Credits

Presents a review of classical and operant conditioning, data collection and research design, data analysis and interpretation. In addition, assessment and treatment strategies in a variety of settings, contingency management in institution, classroom and home, systematic self-desensitization, and ethical consideration are discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 299 Field Placement in Applied Behavior Analysis 1 Credits

The practicum provides hands-on experience using the tools of applied behavior analysis in a field setting. Provides supervised field placement experience in an approved institution or agency in order for students to gain knowledge in applications of applied behavior analysis. Placement is made in various community institutions and agencies that offer services to diverse populations.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131, and PSY 212.

PSY 339 Research Methods in Applied Behavior Analysis 4 Credits

This upper-level laboratory course will provide students with an in-depth study of the principles and applications of Applied Behavior Analysis. Students will examine behavioral principles, ethical considerations, and real-life applications of ABA. Each student will design and implement a self-management plan to alter the behavior of their choosing. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and PSY 212 and a minimum grade of "C" in PSY 201 .
Corequisite(s): PSY 339L.

PSY 339L Research Methods in ABA Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and Psy212 and a minimum grade of "C" PSY 201.
Corequisite(s): PSY 339.

PSY 388 Learning and the Experimental Analysis of Behavior 3 Credits

Students will review principles of behavior covered in PSY 212 Intro to ABA (or PSY 225 Learning Theory) and move into more complex concepts and principles of behavior analysis including respondent behavior, respondent conditioning, motivating operations, schedules of reinforcement, and verbal operants. Students will also learn elements of behavior change and specific behavior-change procedures including verbal behavior training, discrete trial training, interventions based on motivating operations and discriminative stimuli, and stimulus equivalence procedures.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 389 Professional Issues in ABA 3 Credits

This course will provide students interested in working in the field of applied behavior analysis at the bachelor's level content based on the task list of the Behavior Analyst Certification Board (BACB) The course covers ethical and professional considerations relevant to the profession of applied behavior analysis as well as ethical and disciplinary standards of the profession. In addition, the course covers behavioral assessment and intervention, competency-based training, and evaluating the effectiveness of behavioral programs. Students will also have the opportunity to read seminal and current research literature on the topics.
Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and PSY 201 and 75 credits.

PSY 491 Internship in Psychology 1-4 Credits

Provides supervised work experience in an approved institution or agency in order for students to gain knowledge in applications of psychology. Placement is made in various community institutions and agencies that offer services to both exceptional and normal individuals. Prerequisite(s): senior psychology majors or minors.

Prerequisite(s): (PSY 100 or PSY 102 or PSY110 or PSY 131) and 75 credits.

Art Minor

Overview

Students completing a minor in visual art will focus on creating art and pursuing an understanding of the history and theory of art and its importance in society.

Minor Offered

- Minor in Art

Courses and Descriptions

ART 103 Fundamentals of Drawing 3 Credits

An intensive study of drawing techniques in charcoal, pencil, and pen and ink.

ART 104 Survey of Art History I 3 Credits

The history of Western art, architecture, sculpture, painting from prehistoric times through the Middle Ages, emphasizing the relation between the arts and ideas of each period.

ART 105 Design 3 Credits

Basic concepts of composition, form, texture, value, and color in two-dimensional design are explored.

ART 106 Survey of Art History II 3 Credits

The history of Western art, architecture, sculpture, painting from the Renaissance to the present, emphasizing the relation between the arts and ideas of each period.

ART 150 Digital Foundations 3 Credits

Industry standard digital tools are used to explore the basic concepts of composition, form, texture, value, and color in two-dimensional design. Further consideration of digital formats and technologies in the visual arts will be highlighted.

ART 201 Art of the Ancient World 3 Credits

The arts of ancient man from prehistoric times to the fall of the Roman Empire.

ART 207 Medieval and Renaissance Art 3 Credits

A study of the major monuments of architecture, painting, and sculpture created in Western Europe between 300 and 1600. Particular emphasis on the history of Christian art, from its beginnings in the Roman catacombs, to the great monasteries and cathedrals of the High Middle Ages, to the revival of ancient Roman grandeur and forms in the Renaissance.

ART 209 Art of the Baroque 3 Credits

The art of the 17th century in southern and northern Europe.

ART 214 American Art 3 Credits

The development of the arts from colonial America to World War I. Discusses major economic, social, and political factors that influenced the course of American art history.

ART 230 Three-Dimensional Design 3 Credits

Beginning problems in traditional sculptural materials (clay, wood, stone) and design-construction in mixed media.

ART 303 19th Century Art 3 Credits

An in-depth study of the major art movements in 19th-century Europe, from Neoclassicism to Postimpressionism.

ART 304 Drawing II 3 Credits

Studies the art of drawing beyond the introductory level with an emphasis on greater self-expression, advanced technical skills, and a variety of drawing media.

Prerequisite(s): ART 103.

ART 305 Intermediate Painting A-B-C 3 Credits

Studio courses designed to expand the student's creative experience in painting with emphasis of greater self-expression. Students will be presented with specific painting projects that originate from conceptual or perceptual responses to reality (still life, landscape, figure) and to imagination (dreams, fantasy, invention). Class trips to galleries and museums are included. May be taken three times.

Prerequisite(s): ART 204.

ART 306 Art of the 20th Century 3 Credits

The major artists and movements in the history of 20th-century painting and sculpture from Postimpressionism. Slide lectures, class discussion, field trips.

ART 310 Figure Drawing and Painting 3 Credits

Students will draw and paint from various sources, including the live model, clothed and nude, to understand the structures, gestures, and psychological aspects of the human body in art.

Prerequisite(s): ART 103 and ART 204.

ART 335 Printmaking 3 Credits

A studio introduction to various traditional and contemporary relief printmaking techniques.

ART 493 Special Topics in Studio Art 3 Credits

Study in drawing and painting of a particular style, such as abstraction or subject, such as still life; or particular aspects on a museum collection, such as the Metropolitan.

Prerequisite(s): ART 103 and ART 105 or Permission of Instructor.

ART 495 Selected Topics in Art History 3 Credits

An intensive study of a particular art history topic, e.g., a single artist, artistic center, or artistic medium. Slide lectures, class discussion, field trips, class reports. Topics to be announced.

MUS 105 Survey of Music History I 3 Credits

A chronological survey of Western music from the Medieval through the Baroque periods stressing the origin and evolution of musical forms, musical styles, and the important composers before 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 106 Survey of Music History II 3 Credits

A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 204 Jazz History 3 Credits

Survey from 19th C. roots to 21st C. styles. Development of listening skills and overview of musical skills used by jazz performers. Exploration of the relationship between jazz and poetry, race relations, and the reputation of jazz in popular culture.

Prerequisite(s): CMP 120 or CMP 125.

MUS 205 History of Pop and Rock Part I 3 Credits

This course charts the history of popular music from its origins until the 1960s. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music from its roots in the blues, early jazz, ragtime and military band marches to the music of Elvis, Chuck Berry, Little Richard, Buddy Holly, the Rolling Stones and the Beatles. We look at the recording industry and the advent of the gramophone record and the important role of radio and television in expanding the reach of popular music directly into the home, creating a vibrant soundtrack for peoples lives.

MUS 206 History of Pop and Rock Part 2 3 Credits

Description: This course charts the history of popular music from the 1960s to today. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music through Acid Rock, Progressive (Prog) Rock, Hard Rock, Singer-Songwriters, Disco, Reggae, Funk, Punk, Heavy Metal, New Wave, Grunge, Electronica and Rap & Hip-Hop. We look at the development of analog and digital media and how new forms of delivery of product shapes the business model of the industry and beyond.

MUS 208 Music of the Theater 3 Credits

A study of music drama both historical and contemporary covering European opera of the Baroque, classical and romantic periods, and the American musical theatre, especially the contemporary Broadway musical.

MUS 209 Great Composers 3 Credits

A study of selected major composers life, works, and historical significance with an emphasis on the listening experience. Bach, Mozart, Beethoven, Tchaikovsky, Stravinsky, or others.

MUS 218 Postmodernism & Popular Culture 3 Credits

This course considers music in light of the ideological trends of postmodernism in order to better understand contemporary music in its cultural context.

MUS 300 Beethoven and the Romantic Age 3 Credits

A study of the Romantic period with particular emphasis on Beethoven. The classical heritage, the transformation of that heritage into romantic terms, the prominent influence of Beethoven on 19th century musical style.

MUS 304 Music of the Beatles 3 Credits

This course is a very in-depth analysis of the music and personalities of the Beatles. The student will gain in depth insight to the Beatles songs and albums as the course proceeds through the music chronologically. This will be contextualized historically and sociologically where required.

MUS 306 Contemp Music Experience 3 Credits

A survey of European and American musical styles of the late 19th and 20th centuries. Topics include postromantic music, neoclassicism, serialism, electronic music, and the current avant garde.

MUS 309 Film Music 3 Credits

A study of music in feature film, documentary film, and television. A chronological survey of film music from silent to contemporary film, animated shorts, and television, with emphasis on listening to recorded performance of representative works.

MUS 315 Black Music in America 3 Credits

This course covers the history of music made by and/or about African Americans, from minstrel shows to hip hop and everything in between.

THE 105 Theatre History to 1700 3 Credits

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 206 American Theatre History 3 Credits

The history of the American theater from the colonial period to the present, emphasizing dramatic scripts and theatrical conventions. Examines important playwrights, theorists, and practitioners representative of each period of American history, emphasizing the 19th and 20th centuries.

THE 307 Contemporary Theater 3 Credits

The richness and diversity of contemporary theatre artists across the world are discussed. Focusing on playwrights and innovative performing arts practitioners, the form and content of dramatic literature and production styles considered most significant today are examined from a global context.

THE 308 Modern Drama 3 Credits

Surveys American and European drama from 1920 to 1970. All plays are read in English translation. In these plays, theatrical artists address the great themes of this century. While doing so, they also expand the limits of theatrical expression.

THE 495 Selected Topics in Theatre History 3 Credits

Intensive study of a particular topic, such as the work of one dramatic movement, one period in dramatic history, or one nation's history. Students become deeply involved in an area through research, class discussions, and individual consultation with the instructor.

Arts and Entertainment Industries Management

Program Overview

Arts and Entertainment Industries Management (AEIM) combines passion for arts and entertainment with the business know-how that keeps these industries strong. Opportunities abound for satisfying and rewarding management careers in: music business, film & television, Broadway & regional theatre, professional dance, symphonies, galleries, and many more. With more than four million jobs in the AEIM field - ranging from music, Broadway, or film producer to entertainment lawyer, fund developer, touring manager or marketing executive - the industry needs you. For aspiring performing artists, AEIM is a smart compliment to your performance degree, as U.S. Labor statistics demonstrate that only 1/17th of 1% will make above poverty wage as a performer, while

there are over 4.8M jobs on the management side of the industry. What better way to bolster your arts aspirations than with AEIM! With its comprehensive, dynamic curriculum options, Rider affords you the know-how to succeed in this and many other career paths!

Curriculum Overview

The degree requirements within Arts and Entertainment Industries Management (BA) incorporate a core curriculum of 36 credits, a selected path with either a Commercial/For-Profit or Non-commercial/Institutional focus of 12 credits, and a Commercial or Traditional/Institutional Emphasis of 12 credits based upon the path and arts discipline that interests you. Each emphasis incorporates studio or applied skills courses with historical and practical coursework. In addition, majors select elective courses which expand professional skills development beyond those specific to the Arts. Elective course selections range from public relations and communications to professional writing and other options housed beyond the School of Fine and Performing Arts.

Rounding out the degree are the general university requirements and a number of "free electives" which commonly are applied to minors or second majors in one of the arts disciplines or related administrative fields of interest (ie: marketing (<https://rider-curr.courseleaf.com/undergraduate/colleges-schools/business-administration/majors-minors-certificates/marketing/>), event planning and production (<https://rider-curr.courseleaf.com/undergraduate/colleges-schools/liberal-arts-sciences/majors-minors-certificates/event-planning-production/>), business administration (<https://rider-curr.courseleaf.com/undergraduate/colleges-schools/business-administration/majors-minors-certificates/business-administration/>), etc.).

Degrees Offered

- B.A. in Arts and Entertainment Industries Management: Commercial/For Profit Path
- B.A. in Arts and Entertainment Industries Management: Non-commercial/Institutional Path
- A "plus-one" online MA, Arts Management & Executive Leadership (<https://www.rider.edu/academics/colleges-schools/westminster-college-arts/sfpa/programs/ma-arts-management-executive-leadership/>) adds significant value!

MUS 216	Digital Synthesis	3
MUS 219	Popular Music Arranging	3
MUS 220	Songwriting	3
MUS 301	Skills Ensemble II	1

Complete 3 credits in an industry-specific administrative internship:

AAD 491	Arts Management Internship ¹	
---------	---	--

Option 2: Institutional Theatre (regional theatres, touring, etc.)

Select 3 credits in Theatre History from the following:

THE 105	Theatre History to 1700	3
THE 106	Theater History Since 1700	3
THE 206	American Theatre History	3
THE 260	History of Style and Decor	3

Select 6 credits in Theatre Making and/or Performing from the following:

THE 107	Acting I: Intro to Acting	3
---------	---------------------------	---

THE 115	Stagecraft	3
THE 118	Visual Imagination	3
THE 127	Theatre Production	1
THE 290	Production II	3
THE 390	Production III ²	3
THE 317	Scenic Design ²	3
THE 318	Stage Lighting Design ²	3
THE 319	Costume Design ²	3
THE 325	Sound Design ²	3
Complete 3 credits in an industry-specific administrative internship:		
AAD 491	Arts Management Internship ¹	3
Option 3: Dance (ballet and contemporary dance companies, etc.)		
Complete the following courses (4 credits):		
DAN 350	History of Ballet, Modern & Jazz Dance	3
DAN 151	Pilates and Modern	1
Select 2 credits in dance studio courses from the following:		
DAN 100A	Ballet I ³	1
DAN 100G	Jazz I ³	1
DAN 100J	Modern Dance I ³	1
Select 3 credits in a related Theatre course from the following:		
THE 107	Acting I: Intro to Acting	3
THE 118	Visual Imagination	3
Complete 3 credits in an industry-specific administrative internship:		
AAD 491	Arts Management Internship ¹	3
Option 4: Visual Arts (galleries, museums, etc.)		
Complete the following course (3 credits):		
ART 227	Gallery Management	3
Select one 3 credit Art History course from the following:		
ART 104	Survey of Art History I	3
ART 106	Survey of Art History II	3
ART 207	Medieval and Renaissance Art	3
ART 209	Art of the Baroque	3
ART 214	American Art	3
ART 303	19th Century Art	3
ART 306	Art of the 20th Century	3
Select 3 credits in Creating Art or Graphic Design from the following:		
ART 103	Fundamentals of Drawing	3
ART 105	Design	3
ART 150	Digital Foundations	3
ART 204	Fundamentals of Painting	3
COM 212	Digital Publication Design	3
COM 262	Graphic Imaging for Digital Media	3
COM 265	3D Graphic Animation	3
COM 361	Photography	3
Complete 3 credits in an industry-specific administrative internship:		
AAD 491	Arts Management Internship ¹	3

¹ Two internships are required; one completed in your Path and one in your Emphasis selection.
² This course has a prerequisite that must be met first.
³ Determination of placement in this level or a higher level will be made by the instructor.

Arts and Entertainment Industries Management Minor Requirements

(15 credits)

Any Rider University student may choose to pursue the Arts Administration minor. Interested students should declare the minor by completing a form available in the Department Office.

Code	Title	Credits
Required Courses		9
AAD 121	Intro to Arts Administration	
AAD 202	Commun/Marketing in Arts	
AAD 203	Arts Fundraising

AAD 350	Arts Venue and Patron Services Management	
Total Credits		15

Academic Plans of Study

The following educational plans are provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Commercial Emphasis Options - Path 1

- Commercial Theatre Emphasis (p. 44)
- Film and Television Industries Emphasis (p. 45)
- Music Business Emphasis (p. 44)
- Sport Entertainment Emphasis (p. 46)

Traditional/Institutional Emphasis Options - Path 2

- Dance Emphasis (p. 46)
- Music Institutions/Non-Commercial Emphasis (p. 47)
- Theatre Emphasis (p. 47)
- Visual Art Emphasis (p. 48)

Courses and Descriptions**AAD 121 Intro to Arts Administration 3 Credits**

A survey course that covers topics relevant to administering the arts, and includes reviewing state and federal legislation to non-profit organizations, non-profit agency structure, long range planning, board development, marketing, fundraising, public relations, advocacy, budget, human resources and ongoing compliance issues. Students will have opportunities to interact with professionals in the field and explore career options.

AAD 202 Commun/Marketing in Arts 3 Credits

Intended for arts or business majors interested in arts management, this course immerses students in the fundamentals of promoting the arts, from grassroots public relations to basic marketing concepts and applications. Students will have opportunities to interact with professionals in the field and explore career options.

Prerequisite(s): AAD 121 and CMP 125, or permission of instructor.

AAD 203 Arts Fundraising 3 Credits

Provides students with an understanding of the ethics, strategies and practices of fundraising for non-profit arts agencies. Students gain an understanding of the role of the development office in a non-profit arts agency, prepare for careers in arts management by increasing the skills necessary to function, and learn to plan a multi-faceted fundraising campaign effectively.

Prerequisite(s): CMP 120 or CMP 125.

AAD 204 Arts Outreach & Education 3 Credits

This course examines essential educational components of arts institutions, how they evolve and are produced, and will assess the importance of educational programming to arts organizations and the communities they serve.

Prerequisite(s): AAD 121.

AAD 225 Arts Administration Practicum 1 Credits

Under faculty advisement and project site supervision, students complete a total of three, 1-credit (33-hour) "mini-internships" or practicum projects in service to the field, sequentially in the Sophomore Fall, Sophomore Spring, and Junior Fall semesters, simultaneous to Arts Administration Lab. The first practicum project is in connection with Box Office and Patron Service to Rider Performing Arts. The second is in connection with a project of the student's choosing in service to the arts on campus or beyond. The third is in connection with a project of the student's choosing in service to the field in an outside, professional setting.

Prerequisite(s): AAD 121.

AAD 295 Art & Business of Entertainment 3 Credits

Students explore traditional and emerging models in entertainment and the impacts which social media, online service and other emerging platforms continue to have on the evolution of the industry. Students will identify and define pivotal functions and functionaries across all sectors who apply innovation, effective leadership and essential skills to produce and distribute various forms of entertainment to the masses. Through the application of a "wheel of fortune" research & analysis approach to each commercial entertainment sector, students will come to understand the multiple aspects of each (film, television, media, commercial theatre and entertainment in sports), the people who drive them and the critical functions which they serve.

Prerequisite(s): AAD 121, AAD 202 and AAD 203.

AAD 306 Music Business 3 Credits

Survey of the music business. Responsibilities of the label and producer, copyrights, royalties, residuals, publishing, contracts and artist development, promotion, distribution, product management, domestic and international licensing, and related technology.

Prerequisite(s): AAD 121.

AAD 307 Touring and Production Management 3 Credits

Organizing, marketing and managing tours. Responsibilities of the booking agent, tour manager, and performers. Case studies, relationships, contracts with venues, transportation companies, housing, and unions, budgeting, press kits, and insurance.

Prerequisite(s): AAD 121, CBA 110.

AAD 308 Legal Aspects of Arts & Entertainment 3 Credits

A survey of legal issues in the arts and entertainment industries, examining the relationship between arts and the law – from cultural property rights to intellectual property, copyright and beyond.

Prerequisite(s): AAD 121.

AAD 309 Arts Events & Festivals Mgt 3 Credits

Students learn to develop, produce, and staff successful arts events while refining planning skills through practice with theoretical and real arts event venues and participating in the production and management of actual events.

Prerequisite(s): AAD 121.

AAD 310 Acquiring & Managing Talent in Arts & Entertainment Industries 3 Credits

This course teaches foundations of professional talent management and explores the many ways by which the role of today's artist manager has evolved and expanded, particularly in an era of "independent" artists seeking managers who can act as CEO's. The course explores the many facets which an artist manager oversees, from launching an artist's career to building a successful and enduring business and fan base. Topics of exploration include talent acquisition, the artist/manager partnership, contracts, strategic planning, branding and more relating to managing all key aspects of an artist's career. Students will gain deep understanding of the dynamic roles which managers and agents play in the entertainment business as the "backbone of our industry" and of the pathways to career success as artist managers & representatives. Aspiring artists will find guidance in self-management and choosing the right partners. Other aspiring entertainment professionals will learn how to effectively engage with artist managers & agents as essential components in the broader ecology of professional arts & entertainment.

Prerequisite: Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 312 Deal-Making in Arts & Entertainment 3 Credits

This course explores all practical aspects of deal-making in commercial entertainment and the art of negotiation as the catalyst for success. Through forensic analysis & discussion of multiple types and structures of short and long-form agreements and the wide variety of provisions to be found therein, students will gain knowledge of key legal, historical, discipline-specific and industry-wide contexts of deal-making. Readings and lectures will focus on the nuts and bolts of negotiation – from essential research processes to finding and exercising bargaining power to knowing when to compromise and when to withdraw. Skills gained will be exercised through role-play, writing and ongoing analysis of peer and professional contracts. Students will gain and exercise deep understanding of agreements across multiple disciplines and the common elements therein including agency, personal management, personal appearance, merchandising, endorsements, creative ownership and union influence will be explored, as well as the unique characteristics which apply to distinct disciplines. For Arts & Entertainment Industries Management majors or minors only except by permission of Dean.

Prerequisite(s): AAD 121, AAD 202.

AAD 314 Commerce and Merchandising in Arts & Entertainment 3 Credits

This course builds upon foundational knowledge gained in "Arts Marketing & Communications," exploring the far-reaching and highly lucrative aspects of commercializing and merchandizing creative output across the many disciplines which comprise the arts & entertainment industries. Creative output in the form of a commercial film, Broadway hit, top-selling album or live performance establishes a point of departure into a massive world of merchandising where brand is king, franchises flourish and sequels make (and break) futures. Students will gain deep understanding of how strategic marketing campaigns develop, run and catalyze broader merchandising, commerce and franchise potential. Readings, lectures and case-based analyses will investigate successful corporate models, strategies and tools for maximizing commercial potential and earnings in the global commercial arts & entertainment marketplace. From relationship and influencer-based approaches across traditional and digital platforms to the tools which maximize celebrity branding, tap global merchandising capacity and harness new technologies that drive innovation, this course introduces aspiring arts & entertainment leaders to the foundations of commercial success.

Prerequisite: Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 315 Arts & Entertainment Industries Professional Development 3 Credits

Arts & Entertainment Industries (AEIM) Professional Development is designed to prepare AEIM majors for successful internship and career placement, growth and development. Through this course, AEIM majors will engage in best possible selves vision mission goals and objectives-setting, transferrable skills identification and articulation, resume development, informational and formal interview skills practice and application as well as refine and package their individual portfolios comprised of final projects/portfolios from several prior courses. These and other assets, including personal web-page and social media profile work and editorial bio, will be developed in the creation of a comprehensive professional "toolkit" of assets to aid in their pre-professional and professional career pursuits. Over the course of a semester, students will work on professional communication skills including public speaking, writing, and corresponding etiquette, and interviewing techniques for both in-person and virtual meetings. Students will explore their own strengths and weaknesses through industry-leading personality and professional skills and traits analyses and how to apply them to maximal effect. Industry guests from all arts disciplines will afford "real-world" perspectives and build networking capacity. Restricted to AEIM Majors, Junior standing or above.

AAD 318 Music Publishing 3 Credits

This course teaches foundational concepts, context, tools, and function of music publishing as an essential force in today's ever-evolving music industry. Students examine the many roles which the music publisher plays in the acquisition, market development and administration of copyrighted musical works. Through case-based analysis of the inner workings of major, independent and self-owned music publishing companies, students will gain understanding of the depth, breadth and scope of this fascinating aspect of the business. Discussion will encompass the fundamentals of copyright, types of publishing deals, income streams, registrations and collection, foreign sub-publishing deals, and the rights and royalties applicable to copyrighted musical work. Students will also learn how music is licensed for use in film, television, advertising, theatrical performance, game and other forms of interactive media, as well as an overview of the administrative aspects of these uses and the ways by which legislative action impacts opportunities and earnings of copyright holders. Lastly, students will explore the creative and administrative responsibilities involved in establishing their own music publishing company.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 320 Licensing & Distributing Arts & Entertainment 3 Credits

Course Description: Licensing and/or distribution of creative output powers nearly every aspect of the arts and entertainment industries as significant brand builders and revenue-generators for intellectual property owners. This course delivers foundational knowledge of the many ways by which music, theater, dance film and other media are licensed for commercial use or otherwise distributed directly to vendors and consumers. Discussion encompasses the various types and purposes of license, key points of negotiation, parties, agreements and business constructs involved in licensing and distribution deals across multiple entertainment sectors. Through readings, lectures and case-based analysis students will study the means of directly and indirectly getting works out into the marketplace, as well as the risks and rewards that may result. Through comparative analysis of traditional and contemporary professional agreements, students will come to understand how licensing and distribution contracts, modalities, administration and payments have evolved, and what the future holds for this vital engine of the arts & entertainment industries.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 322 Policy Perspectives on Arts & Entertainment 3 Credits

This course delivers foundational knowledge of the historical evolution, current state, and anticipated future of legislative actions, general policies and protocols impacting the many diverse components of arts and entertainment. Students will gain understanding of the several stakeholders, advocates and allies involved in the process of shaping policy and effectuating legislation, from lobbyists and industry leaders to politicians and the constituents whom they represent. Discussion will also encompass the expanding role and reach of the internet and streaming services which have often driven, and too often outpaced legislative agendas, putting the rights and benefits of intellectual property owners at risk through inequitable compensation practices, usurping of rights and expanding of global piracy. Case-based analysis will afford insight into current and anticipated lobbying agendas, legislative action (or inaction) on Capitol Hill, resolutions in process and recent legislation in action. Students will create an advocacy campaign around a pertinent issue facing arts & entertainment today, and strategize an effective lobbying process in order to gain direct insight and inspiration to become lifelong agents for change.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 308.

AAD 350 Arts Venue and Patron Services Management 3 Credits

Integrating workplace with organizational mission: administration, staff, general public, artists. Internal control, artist/employee contracts, collective bargaining, health and safety issues, facilities operation, inventory, cultivation and maintenance of clientele and audience.

Prerequisite(s): AAD 121.

AAD 401 New York Arts Network 3 Credits

Students learn how arts institutions of varying scope, size and function and how administrators keep them running by spending focused, intensive time with them on their own turf.

Prerequisite(s): AAD 121, AAD 202 and AAD 203.

AAD 491 Arts Management Internship 3-12 Credits

Arts Administration majors are required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 6 credits of internships.

Prerequisite(s): Junior standing.

Behavioral Neuroscience

Program Overview

The Behavioral Neuroscience major educates the next generation of scientists with a foundation in biological sciences and behavioral neuroscience. Students in the behavioral neuroscience major are prepared to join the workforce or attend professional or graduate school. Rider achieves this through small class and laboratory sizes allowing direct, hands-on instruction, and faculty accessibility. Students also have opportunities to do research with faculty via work study or independent study. Each student is assigned a faculty advisor who provides academic advice and career guidance tailored to the student's needs. Areas of professional and graduate study include medical, dental, and veterinary school; allied health programs in optometry, podiatry, physical therapy, occupational therapy, nursing; as well as programs leading to M.S. or Ph.D. degrees in the life sciences; and programs in science education.

Many graduates of the Behavioral Neuroscience program have pursued graduate studies at prestigious institutions including Johns Hopkins University, University of Pennsylvania, Dartmouth College and Cornell University. Others have entered medical school, or have gone on to become educators, surgical assistants, marine biologists, mental health technicians, nurses, behavioral therapists, occupational therapists or physical therapists.

Curriculum Overview

The curriculum for majors has been shaped to prepare students for a life of learning in the sciences. Students are expected to gain knowledge, and develop technical and analytical skills and competency in writing and speaking. Classes include coursework focused on the principles of evolution and diversity, neuroscience, and psychology, among other courses. Rider's faculty are research-oriented, and encourage students to take advantage of the opportunity to engage in internships and research by doing work study, an independent research project and/or a senior thesis. Students also have the opportunity to take part in a three-week internship course through the Capital Health System Hospitals, summer research and other off-campus internships.

Student Learning Outcomes

Graduates of the Behavioral Neuroscience major will be able to:

1. Explain foundational concepts in biological sciences.
2. Apply scientific methods of inquiry through testing of newly formed hypotheses with observation and experimentation.
3. Apply concepts from other disciplines in the analysis and interpretation of biological information.
4. Demonstrate the ability to locate, critically analyze, and communicate relevant scientific information.
5. Explain the ethical practice of scientific research and its societal applications.

Honors Programs

Honors in Behavioral Neuroscience

The objective of the honors program in Behavioral Neuroscience is to introduce talented undergraduate majors to the methods of basic research in behavioral neuroscience. Qualified biology or behavioral neuroscience majors may participate in the Departmental Honors program. For consideration, a student must have at least a 3.25 overall grade point average at the end of their junior year. In the senior year, a student seeking Honors must write and orally defend a written honors thesis based upon their independent research. A candidate who has a 3.25 cumulative average, a 3.5 average in their science courses, and who has completed an acceptable Honors Thesis, will be awarded Honors in Behavioral Neuroscience upon graduation.

Beta Beta Beta Biological Honor Society

"Tri-Beta" is a national honor society affiliated with the American Association for Advancement of Science and the American Institute of Biological Sciences. Invitations for membership are extended to majors in the life sciences who have demonstrated superior academic achievement. Students are usually invited to join in their sophomore year when they have accumulated 12 credits in the sciences. Active membership is available to those with an overall grade point average of at least 2.8, and at least 3.0 in their science courses. The benefits of membership include academic recognition; a subscription to the journal *Bios*, to which members may submit research articles; opportunities to present papers at conventions; and research awards. Behavioral neuroscience majors should make membership in Tri-Beta one of their goals.

Pre-medical and Pre-allied Health Advising Programs

The pre-medical studies and pre-allied health advising programs assist students with academic and extra-curricular planning required to become competitive applicants for programs in the health professions.

Rider and Thomas Jefferson University have a long-standing articulation agreement for students who wish to pursue training in the allied health professions. This agreement does not guarantee admission of Rider students into Jefferson's programs; it does mean that Rider faculty members are familiar with Jefferson's academic requirements and that Rider's courses are eligible for transfer to Jefferson.

Rider University offers students with baccalaureate degrees the opportunity to take the undergraduate science course prerequisites for medical, dental, veterinary or graduate school. For more information, visit the Premedical Studies (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/programs-opportunities/pre-med/>) page.

Any PSY 300-level course with a lab		
Any BCH 200 or higher course with a lab		
Senior Capstone Seminar		
BNS 415	Seminar in Behavioral Neuroscience	3
Total Credits		51-54

¹ Students must earn a grade of "C" or better in this course to meet the major requirements and before enrolling in upper-level courses for which these courses are prerequisites.

² Students must place into MTH 105 Algebra & Trigonometry or higher level mathematics in order to register for BIO 115, BIO 116 and BNS 275.

Department of Biology, Behavioral Neuroscience, and Health Sciences Course Repeat Policy

The following guidelines apply to courses offered by the Department of Biology, Behavioral Neuroscience, and Health Sciences. Students may repeat any biology (BIO), behavioral neuroscience (BNS), health sciences (HSC) or exercise science (EXS) course once without special permission. A course will be considered repeated if the student has previously earned a letter grade in the course, or if the student has previously withdrawn from the course after the Friday of the seventh week of classes (previously Withdrawal II or Withdrawal III). To take a biology, behavioral neuroscience, health science, or exercise science course for a third time, written permission must be obtained from the department chair before the registrar will allow the student to enroll in that course.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

¹ For course placement information see <http://www.rider.edu/offices-services/orientation/course-placement> . (<http://www.rider.edu/offices-services/orientation/course-placement/>)

² Elective credits may be used to complete requirements in a second major or minor.

³ Natural and Physical Sciences and Mathematics core requirements are included in the major.

Courses and Descriptions

BNS 107 Life Science: Brain and Behavior 3 Credits

An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BNS 250 Biostatistics 4 Credits

This course will assist students with acquiring the skills necessary to design, conduct, and interpret research studies. Emphasis will be on learning how to develop experimental designs to translate theoretical concepts into testable hypotheses. Experiments conducted during laboratory sessions will use laboratory mice and will use equipment for measuring animal behavior. Students will gain experience collecting, analyzing, writing and orally presenting their research results. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 105 or higher or placement into MTH 210, grade of "C" or better in one lab science course.

Corequisite(s): BNS 250L.

BNS 250L Biostatistics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): BNS 250.

BNS 275 Behavioral Neuroscience 4 Credits

An introductory behavioral neuroscience course including basic neuroanatomy and neurophysiology of movement, ingestive, reproductive, emotional, and learning behaviors. Emphasis is on the structure/function relationships that allow animals to make appropriate physiological and behavioral responses to the environment. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115 & BIO 116.

Corequisite(s): BNS 275L.

BNS 275L Behavioral Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 275.

BNS 310 Neurobiology 4 Credits

A lecture-laboratory course investigating the structure and function of the nervous system. Lecture topics include organization of the nervous system, neuroanatomy, neurophysiology, neurochemistry, physiology of sensory systems, biological aspects of nervous system diseases, and behavior. Laboratory exercises include study of anatomy of the nervous system, nerve cell recording, modern neuroanatomical techniques, and the neural basis of animal behavior. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course. Corequisite(s): BNS 310L.

BNS 310L Neurobiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 310.

BNS 360 Neurochemistry 4 Credits

Examines the fundamentals of neurochemistry, including the neuroanatomical distribution, pharmacology, and functions of neurotransmitters; signal transduction pathways; behavioral and physiological effects of chemicals either used therapeutically to treat biopsychological disorders or that may be abused for their psychotropic effects; and mechanisms and models for the study of drug action. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116, CHE 122, CHE 123 with a grade of C or better in each course.

Corequisite(s): BNS 360L.

BNS 360L Neurochemistry Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): BNS 360.

BNS 375 Neuroethology: Circuits of Behavior 4 Credits

Neuroethology is the study of the neural and physiological basis of animal behavior. This course focuses on the specific behavioral problems faced by animals in their natural habitats, and the ways in which their nervous systems solve these problems. The mechanisms that underlie complex behaviors such as spatial orientation and navigation, escape mechanisms, and animal communication will be examined, as well as the extraordinary sensory adaptation of organisms to their environments (e.g., echolocation, electroreception, and magnetic reception). The neural control of motor programs and temporally-patterned behaviors will be studied in simpler neuronal systems. Finally, recent cellular and molecular approaches to the study of behavior will be addressed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BNS 375L.

BNS 375L Neuroethology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 375.

BNS 415 Seminar in Behavioral Neuroscience 3 Credits

Critical analysis of the scientific literature pertaining to current topics in behavioral neuroscience. Topics include mechanisms through which the brain influences physiology and behavior and the integration of nervous and endocrine systems. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116 or BNS 118, BIO 117, junior standing and permission of instructor.

BNS 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BNS 491 Internship in Behavioral Neuroscience 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and should include keeping a journal of activities, a term paper or project report and a poster presentation.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Biochemistry

Program Overview

Students in the biochemistry major will find themselves taking part in small classes that encourage close and frequent interaction between students and professors, helping to create a stimulating learning environment.

Students in this major are offered abundant research opportunities (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/departments/chemistry-biochemistry/student-research/>) both during the academic year and during the summer months. Faculty are engaged in research projects which lend themselves to undergraduate participation. In tackling the challenge of advanced and independent laboratory work, students begin to understand the nature of science and the scientific method. Participation in research by all students is strongly encouraged, as it builds a greater appreciation of the nature of their chosen field. The opportunity to perform independent research has motivated many students to continue their education either in an accredited graduate program or in a professional school in a number of medical fields.

Often, faculty and students jointly present their research results at national professional meetings, the Rider Independent Scholarly Research & Creative Activities Presentations (ISCAP) Day, or as written research papers submitted to scholarly journals.

Curriculum Overview

Core chemistry classes include one year of general chemistry, one year of organic chemistry, one year of biochemistry, three semesters of general biology and courses in quantitative analysis, physical chemistry and genetics.

Students also must earn advanced course credits at the 300 level or above in chemistry, biochemistry, biology or behavioral neuroscience. Independent research, BCH 490, is also a requirement of the biochemistry major.

Student Learning Outcomes

Graduates of the Biochemistry major will demonstrate the ability to:

1. Apply their chemical knowledge and make predictions about the outcome of fundamental chemical processes.

2. Generate and interpret raw data from standard research instrumentation and computational tools.
3. Utilize databases to locate relevant primary literature articles and evaluate the validity of resources.
4. Communicate data and advanced chemical concepts via meaningful and effective representations in both oral and written forms.

Courses and Descriptions

BCH 325 Biochemistry 3 Credits

Outlines the chemistry and biological function of carbohydrates, proteins, lipids, nucleic acids, vitamins, and enzymes, and introduces enzyme kinetics and biological energetics. Degradative metabolic pathways of carbohydrates and lipids, and their controlled interrelationships are discussed in detail.

Prerequisite(s): CHE 122, CHE 214 with a minimum grade of D.

BCH 326 Biochem and Enzymology I Lab 1 Credits

The laboratory work illustrates techniques and methods essential to the biochemist. Methods for quantification of proteins, purification of enzymes and determination of their kinetic parameters, polarimetry, and structure proof of carbohydrates. The lab must be taken concurrently with BCH 325 by biochemistry and biology majors, but is optional for others.

Prerequisite(s): CHE 123, CHE 214.

BCH 400 Advanced Biochemistry. 3 Credits

Continuation of Biochemistry I. Includes molecular analysis of biological membrane structure and function and a molecular level analysis of information flow from DNA through RNA to proteins. Other topics include mechanisms of hormone action and an expansion on metabolic concepts.

Prerequisite(s): BCH 325.

BCH 410 Metabolism and Bioenergetics 3 Credits

An examination of principles of energetics and chemical transformations as they pertain to metabolism. Students will explore general issues of bioenergetics and will delve into biochemical pathways of catabolism and anabolism of biological molecules, including key nutrients, and xenobiotic compounds, including drugs and toxins. Attention will be placed on the enzymes and cofactors that mediate critical metabolic transformations, and students will use the scientific literature to investigate mechanisms of regulation and integration of metabolic pathways as well as consequences of aberrant enzyme function to human disease.

Prerequisite(s): BCH 325.

BCH 415 Signal Transduction 3 Credits

Cells in multicellular organisms are in constant communication with each other. One way that cells communicate is through the sharing of chemical signals through a process called "signal transduction." In this course, we will study the basic biochemical principles of signal transduction to better understand life on a molecular level. Topics to be covered include a broad overview of signal transduction mechanisms, including basic receptor theory and the use of second messengers; investigations into specific signaling strategies, including signaling via receptor ion channels, G protein-coupled receptors, and nuclear hormone receptors; and examinations of cellular mechanisms used to coordinate signaling spatially and temporally. Special focus will be placed on roles of signal transduction pathways in health and disease.

Prerequisite(s): BCH 325.

BCH 425 Medicinal Chemistry 3 Credits

A comprehensive description of the important principles of medicinal chemistry including principles of rational drug design with synthetic strategies, mechanisms of drug actions, structure-activity relationships, the absorption, distribution, metabolism and elimination of drugs. Specific classes of drugs to be discussed include: anticancer agents, analgesics, anti-inflammatory drugs, steroids, drugs acting on the nervous system and antibiotics.

Prerequisite(s): BCH 325 or permission of instructor.

BCH 430 Advanced Lab Techniques in Biochemistry. 1 Credits

Methods of protein analysis, building on techniques and principles learned in BCH 326. Students will use bioinformatics and molecular biological techniques, including PCR, to harness and change protein sequence. They will implement modern protein purification techniques, develop enzyme assays, and perform equilibrium binding assays to investigate the relationships among protein sequence, structure, and function.

Prerequisite(s): BCH 326.

BCH 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurement, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits

An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 116.

BIO 260 Principles of Biology: Evolution, Diversity, and Biology of Cells 4 Credits

Lectures and labs focus on basic cell biology. Cell diversity and function, genetics and biotechnology are emphasized. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115/115L and BIO 116/116L or BIO 115, BIO 117, (BNS 118 or BNS 275).

Corequisite(s): BIO 260L.

BIO 260L Principle of Biology: Cells Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 260.

BIO 265 Genetics 4 Credits

A comprehensive course focusing on molecular, Mendelian, and population genetics. Topics covered will include molecular advances in the study of genetics, including genomics and bioinformatics; evolution and the effects of genetic mutations; the application of population genetics to forensic science; genetic problem solving, including genetic crosses and statistical analysis; and regulation of gene expression. The laboratory for this course will introduce students to commonly used genetic model organisms and basic molecular biology techniques. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 265L.

BIO 265L Genetics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 265.

CHE 120 Principles of Chemistry 3 Credits

For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.

Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits

For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits

A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.

Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits

Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.

Corequisite(s): CHE 122.

CHE 211 Organic Chemistry I 4 Credits

The structure, chemical properties, and methods of preparation of the more important classes of carbon compounds are studied, with an emphasis on the relationship of structure, stereochemistry, and conformation to chemical reactivity. The preparation and reactivity of organic functional groups is introduced. The use of infrared and nuclear magnetic resonance spectroscopy, and mass spectrometry for elucidating structures of organic molecules is discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 120, CHE 121.

Corequisite(s): CHE 211L.

CHE 211L Organic Chemistry I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 211.

CHE 214 Organic Chemistry II 4 Credits

A continuation of Chemistry 211, emphasizing the mechanism of organic reactions, structural interpretations of properties, preparations, reactivity and identification of organic compounds. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 211.

Corequisite(s): CHE 214L.

CHE 214L Organic Chemistry II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 214.

CHE 250 Quantitative Analysis and Statistics Methods 4 Credits

This course will provide a deeper exploration of topics in chemistry that are steeped in numerical analysis. These topics include advanced analysis of equilibrium systems, acid-base systems and electrochemical systems. Additional detail will be given to methods of chemical measurement, statistical methods of data analysis and determination of data validity and reliability. Both lecture and laboratory will show an emphasis on using computer-based tools to analyze experimental data. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 122 & CHE 123

Corequisite(s): CHE 250L.

CHE 250L Quantitative Analysis and Statistical Methods Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 250.

CHE 305 Physical Chemistry I 3 Credits

The mathematic and conceptual foundations of physical chemistry will be introduced with an over-arching theme of determination of energy allocation within atomic and molecular systems. Topics will include determination and measurement of energy states in atoms and molecules, simple quantum mechanical systems, distribution of energies and the connection to thermodynamic quantities, the three laws of thermodynamics, spontaneity, equilibrium and experimental kinetics.

Prerequisite(s): CHE 122, CHE 214, MTH 211, PHY 201.

MTH 210 Calculus I 4 Credits

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 or MTH 106 with a grade of C or higher.

MTH 211 Calculus II 4 Credits

The definite integral, differentiation of transcendental functions, methods of integration and approximate integration, determination of area, volume, and surface area.

Prerequisite(s): MTH 210 with a grade of C or higher.

PHY 200 General Physics I 4 Credits

Introductory classical physics; Newtonian mechanics, including the conservation laws, wave motion, gravity, thermodynamics. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 210 or concurrent enrollment

Corequisite(s): PHY 200L.

PHY 200L General Physics I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 200.

PHY 201 General Physics II 4 Credits

A continuation of the concepts developed in Physics 200. Electricity, electrical circuits, magnetism, Maxwell's equations. Light and optics, including lenses, interference, and diffraction. Three hours of lecture and one three-hour lab per week. Prerequisite(s): PHY 200, MTH 211 or concurrent enrollment.

Corequisite(s): PHY 201L.

PHY 201L General Physics II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 201.

Biology B.S. / Biology B.A.**Program Overview**

Rider's biology major educates the next generation of scientists by providing students with a foundation in the life sciences that prepares them to join the workforce or attend professional or graduate school. Rider achieves this through small class and laboratory sizes allowing direct, hands-on instruction, and faculty accessibility. Students also have opportunities to do research with faculty via work study or independent study. Each student is assigned a faculty advisor who provides academic advice and career guidance tailored to the student's needs. Areas of professional and graduate study pursued by students in this major include medical, dental, and veterinary school; allied health programs such as optometry, podiatry, physical therapy, occupational therapy and nursing; programs leading to M.S. or Ph.D. degrees in the life sciences; and programs in science education.

Graduates of the biology program have pursued their graduate studies at prestigious institutions such as John Hopkins University, Cornell University, Princeton University, University of North Carolina at Chapel Hill, University of Pennsylvania, Harvard University, Dartmouth College and The Scripps Research Institute, among others.

Bachelor of Science Curriculum Overview

The curriculum for biology majors is structured to prepare students for a life of learning in the sciences. Students are expected to master content, develop technical skills, analytical skills and competency in oral and written communication. Foundational courses in biology, chemistry, physics and mathematics prepare students for the rigor of upper-level courses in microbiology, evolutionary biology, developmental biology, immunology, physiology, plant biology, ecology and neurobiology. Capstone seminars allow students to explore one area of the life sciences in depth through exploration and analysis of original scientific literature. Rider's science faculty are research-oriented and encourage students to take advantage of opportunities to engage in independent research. Students also have the opportunity to take part in a three-week internship course through the Capital Health System Hospitals, summer research and other off-campus internships.

Bachelor of Arts Option

The curriculum described above is for a Bachelor of Science program.

All students admitted to the College of Arts and Sciences seeking a biology degree will be enrolled in the B.S. program consisting of 62-63 credits. However, there is the option to be enrolled in a Bachelor of Arts program in biology. This program consists of 52 credits in the major and is designed for students who may desire a biology degree, but do not have a full eight semesters to commit to the program. Such students may be those enrolled in the College of Education and Human Services, transfer students or students choosing a second major. However, students may not choose to double-major in the B.A. program in biology and a closely-related B.S. program such as Behavioral Neuroscience or Health Science.

Students seeking to enroll in the Bachelor of Arts program in Biology must consult with the Chair of the Department of Biology, Behavioral Neuroscience & Health Sciences before being considered for this program.

Student Learning Outcomes

Graduates of the Biology major will be able to:

1. Explain foundational concepts in biological sciences.
2. Apply scientific methods of inquiry through testing of newly formed hypotheses with observation and experimentation.
3. Apply concepts from other disciplines in the analysis and interpretation of biological information.
4. Demonstrate the ability to locate, critically analyze, and communicate relevant scientific information.
5. Explain the ethical practice of scientific research and its societal applications.

Honors Programs**Honors in Biology**

The objective of the honors program in biology is to introduce talented undergraduate majors to the methods of basic research in the biological sciences. For consideration a student must have a 3.25 average at the end of their junior year. In the senior year, participating students must complete an independent research project and present a written honors thesis. At graduation a student who has a 3.25 cumulative average, a 3.5 average in biology courses, and who has completed an acceptable honors thesis will be awarded Honors in Biology.

Beta Beta Beta Biological Honor Society

"Tri-Beta" is a national honor society affiliated with the American Association for Advancement of Science and the American Institute of Biological Sciences. Invitations for membership are extended to majors in the life sciences who have demonstrated superior academic achievement. Students are usually invited to join in their sophomore year when they have accumulated 12 credits in the sciences. Active membership is available to those with an overall grade point average of at least 2.8, and at least 3.0 in their science courses. The benefits of membership include academic recognition; a subscription to the journal *Bios*, to which members may submit research articles; opportunities to present papers at conventions; and research awards. Biology and behavioral neuroscience majors should make membership in *Tri-Beta* one of their goals.

Pre-medical and Pre-allied Health Advising Programs

Students pursuing medical school or pre-allied health programs upon graduation from Rider are encouraged to consult with the department's pre-medical advisor. The pre-medical studies and pre-allied health advisor assists students with academic and extra-curricular planning required to become competitive applicants for programs in the health professions.

Rider and Thomas Jefferson University have a long-standing articulation agreement for students who wish to pursue training in the allied health professions. This agreement does not guarantee admission of Rider students into Jefferson's programs; it does mean that Rider faculty members are familiar with Jefferson's academic requirements and that Rider's courses are eligible for transfer to Jefferson.

Rider University offers students with baccalaureate degrees the opportunity to take the undergraduate science course prerequisites for medical, dental, veterinary or graduate school. For more information, visit the Premedical Studies (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/programs-opportunities/pre-med/>) page.

General Education Curriculum		
See CAS General Education Curriculum Page (http://catalog.rider.edu/undergraduate/colleges-schools/liberal-arts-sciences/general_education_requirements/)		
Both of these foundational courses:		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab ¹	4
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab ¹	4
Select five courses from Group I and Group II, with at least one course selected from each Group:		20
Group I		
BIO 272 & 272L	Intro to Marine Biology and Marine Biology Laboratory	

BIO 335 & 335L	Plant Biology and Modern Plant Biology Lab	
BIO 340 & 340L	Evolutionary Biology and Evolutionary Biology Lab	
BIO 350 & 350L	General Ecology and General Ecology Lab	
BIO 372 & 372L	Behavior of Marine Organisms: Evolutionary Approach and Behavior of Marine Organisms: Evolutionary Approach Lab	
MAR 325 & 325L	Marine Vertebrates and Marine Vertebrates Lab	
Group II		
BIO 215 & 215L	Medical Microbiology and Microbiology Lab	
BIO 260 & 260L	Principles of Biology: Evolution, Diversity, and Biology of Cells and Principle of Biology: Cells Lab	
BIO 265 & 265L	Genetics and Genetics Lab	
BIO 300 & 300L	Developmental Biology and Developmental Biology Lab	
BIO 305 & 305L	Vertebrate Physiology and Vertebrate Physiology Lab	
BIO 370 & 370L	Immunology and Immunology Lab	
BNS 275 & 275L	Behavioral Neuroscience and Behavioral Neuroscience Lab	
BNS 310 & 310L	Neurobiology and Neurobiology Lab	
BNS 360 & 360L	Neurochemistry and Neurochemistry Lab	
BNS 375 & 375L	Neuroethology: Circuits of Behavior and Neuroethology Lab	
BCH 325 & BCH 326	Biochemistry and Biochem and Enzymology I Lab	
Mathematics		
Select two of the following:		7-8
MTH 105	Algebra and Trigonometry ²	
MTH 210	Calculus I ²	
MTH 211	Calculus II ²	
BNS 250	Biostatistics (plus lab) ²	
or ENV 200	Statistical and Computer Applications in the Natural Sciences	
or MTH 120	Introduction to Applied Statistics	
Chemistry		
CHE 120 & CHE 121	Principles of Chemistry and Principles of Chemistry Lab	4
CHE 122 & CHE 123	Intro to Chemical Systems and Quantitative Methods Lab	4
CHE 211 & 211L	Organic Chemistry I and Organic Chemistry I Lab	4
CHE 214 & 214L	Organic Chemistry II and Organic Chemistry II Lab	4
Physics		

PHY 100 & 100L	Principles of Physics I and Principles of Physics I Lab	4
or PHY 200 & 200L	General Physics I and General Physics I Lab	
PHY 101 & 101L	Principles of Physics II and Principles of Physics II Lab	4
or PHY 201 & 201L	General Physics II and General Physics II Lab	
Senior Capstone Seminar		3
Select one of the following:		
BIO 400	Seminar in Cellular and Molecular Biology	
BIO 420	Seminar in Organismal Biology	
BIO 416	Bioinformatics	
BIO 450	Seminar in Ecology & Evolution	

Total Credits **62-63**

¹ Students must earn a grade of "C" or better in these courses in order to meet the major requirement and before enrolling in upper-level courses for which these courses are prerequisites.

² Students must place into MTH 105 Algebra & Trigonometry or higher level mathematics in order to register for BIO 115 and BIO 116.

Biology B.A. Requirements for other than College of Arts and Sciences students

(52 credits)

Code	Title	Credits
Requirements for the Major		
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	4
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	4

BIO 372 & 372L	Behavior of Marine Organisms: Evolutionary Approach and Behavior of Marine Organisms: Evolutionary Approach Lab	

BCH 325	Biochemistry	
BNS 310 & 310L	Neurobiology and Neurobiology Lab	
BNS 360 & 360L	Neurochemistry and Neurochemistry Lab	
BNS 375 & 375L	Neuroethology: Circuits of Behavior and Neuroethology Lab	
Senior Capstone		4
Select one of the following paths:		
BIO 490	Independent Study: Research and Creative Expression (4 credits)	
OR		
BIO 400 or BIO 420 or BIO 450	Seminar in Cellular and Molecular Biology Seminar in Organismal Biology Seminar in Ecology & Evolution	
AND		
BIO 491	Internship in Biology (as a lab facilitator (1 credit))	
Required Courses:		8
CHE 120 & CHE 121	Principles of Chemistry and Principles of Chemistry Lab	
CHE 122 & CHE 123	Intro to Chemical Systems and Quantitative Methods Lab	
Select two of the following:		8
MTH 105	Algebra and Trigonometry	
MTH 210	Calculus I	
BNS 250 & 250L	Biostatistics and Biostatistics Lab	
Select one of the following:		4
BCH 225 & 225L	Introduction to Organic and Biochemistry and Introduction to Organic & Biochemistry Lab	
CHE 211 & 211L	Organic Chemistry I and Organic Chemistry I Lab	
Select one of the following:		4
PHY 100 & 100L	Principles of Physics I and Principles of Physics I Lab	
PHY 200 & 200L	General Physics I and General Physics I Lab	
Total Credits		52

Department of Biology, Behavioral Neuroscience, and Health Sciences Course Repeat Policy

The following guidelines apply to courses offered by the Department of Biology, Behavioral Neuroscience, and Health Sciences. Students may repeat any biology (BIO), behavioral neuroscience (BNS), health sciences (HSC) or exercise science (EXS) course once without special permission. A course will be considered repeated if the student has previously earned a letter grade in the course, or if the student has previously withdrawn from the course after the Friday of the seventh week of classes (previously Withdrawal II or Withdrawal III). To take a biology, behavioral neuroscience, health science, or exercise science course for a third time, written permission must be obtained from the department chair before the registrar will allow the student to enroll in that course.

Requirements for the Minor ¹

(20 credits)

¹ Not available to Behavioral Neuroscience, Biochemistry, Health Sciences or Science Education majors.

² Students must earn a grade of "C" or better in this course to meet the major requirements and before enrolling in upper-level courses for which these courses are prerequisites.

³ Students must place into MTH 105 Algebra & Trigonometry or higher level mathematics in order to register for BIO 115 and BIO 116.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who are in a Continuing Education Program; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

² Please note that elective credits may be used to complete requirements in a second major or minor.

³ Natural and Physical Sciences and Mathematics Core requirements are included in the major.

Courses and Descriptions

BIO 100 Life Science 3 Credits

An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BIO 102 The Biology of Cannabis 1.5 Credits

In this course, you will learn about many aspects of the biology of cannabis, including botany, genetics, growth techniques, strain selection, and health benefits. Emphasis is placed on current methods in the marijuana industry to help legal growers and professionals understand best practices for cultivation, management, and medicinal use. Current literature and sources will be discussed.

BIO 110 Life Science: Inquiry Approach 4 Credits

An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 110.

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits

An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 116.

BIO 206 The Pharmaceutical Industry 3 Credits

An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.

Prerequisite(s): BIO 100 or BIO 101 or BIO 106 or BIO 108 or BNS 107 or CHE 115.

BIO 210 Hospital Intern Program 2 Credits

An internship that provides students with the experience in the practical aspects of medicine. Major departments in the hospital such as the emergency room, operating room, clinic, radiology, and the laboratory will be open for student rotations. Field trips to various medical schools in the area will provide information on professional school educational opportunities available in the health professions.

Prerequisite(s): sophomore standing or above and permission of instructor.

BIO 215 Medical Microbiology 4 Credits

Biology of prokaryotes of medical interest with emphasis placed on diversity and host-pathogen interaction. Current research literature will be covered and presented by students. Methods of microbial identification are introduced in the laboratory and applied in the identification of mock clinical isolates. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course,

Corequisite(s): BIO 215L.

BIO 215L Microbiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 215.

BIO 221 Human Anatomy & Physiology I 4 Credits

A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training.

Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. **Prerequisite(s):** HSC major ONLY or Permission of instructor.

Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 221.

BIO 222 Human Anatomy & Physiology II 4 Credits

A comprehensive survey of the organ systems of the body including special senses, cardiovascular, respiratory, digestive, excretory, reproduction and development. Physiological components include electrolytes, metabolism, nutrition, and the mechanisms of homeostasis and cell reception. Lab studies support lecture material through dissections, wet labs, computer-assisted learning, microscopy, and models. Assessment includes lab practicums, exams, and reports. Course emphasis supports allied health and pre-professional training. Designed for allied health students; does not satisfy requirements for the biology major. **Prerequisite(s):** BIO 221.

Corequisite(s): BIO 222L.

BIO 222L Human Anatomy & Phys II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Prerequisite(s):** BIO 221L.

Corequisite(s): BIO 222.

BIO 250 Field Natural History 4 Credits

Identification, life history, and interrelationships of plants and animals in natural landscapes of New Jersey. Field, lab, discussion and lecture exercises will prepare students to lead informative and safe nature walks. Nature writing and natural resources management also covered. Three lectures and one three-hour laboratory per week; most labs take place outdoors. Two Saturday field trips (laboratory time will be adjusted accordingly). Designed for education majors; does not satisfy requirements for the biology major.

Corequisite(s): BIO 250L.

BIO 250L Field Natural History Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 250.

BIO 260 Principles of Biology: Evolution, Diversity, and Biology of Cells 4 Credits

Lectures and labs focus on basic cell biology. Cell diversity and function, genetics and biotechnology are emphasized. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115/115L and BIO 116/116L or BIO 115, BIO 117, (BNS 118 or BNS 275).

Corequisite(s): BIO 260L.

BIO 260L Principle of Biology: Cells Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 260.

BIO 265 Genetics 4 Credits

A comprehensive course focusing on molecular, Mendelian, and population genetics. Topics covered will include molecular advances in the study of genetics, including genomics and bioinformatics; evolution and the effects of genetic mutations; the application of population genetics to forensic science; genetic problem solving, including genetic crosses and statistical analysis; and regulation of gene expression. The laboratory for this course will introduce students to commonly used genetic model organisms and basic molecular biology techniques. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 265L.

BIO 265L Genetics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 265.

BIO 272 Intro to Marine Biology 4 Credits

Introduces students to the study of marine environments, emphasizing the diversity, ecology, and physiology of marine animals, algae, and plants. Aspects of the human impact on marine environments are also discussed. Prerequisite(s): BIO 115 or BIO 116 or BNS 118 and grade of "C" or better.

Corequisite(s): BIO 272L.

BIO 272L Marine Biology Laboratory 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 272.

BIO 290 Special Topics in Biology 3 Credits**BIO 300 Developmental Biology 4 Credits**

Lectures and laboratories explore molecular, cellular, and genetic mechanisms of animal development. Aspects of gametogenesis, fertilization, induction, cytoplasmic determinants, morphogenetic movements, differentiation and developmental evolution are discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 300L.

BIO 300L Developmental Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 300.

BIO 305 Vertebrate Physiology 4 Credits

Study of the principles and mechanisms of mammalian physiology. Topics include the nervous system, muscle physiology, cardiovascular physiology, respiration, gastrointestinal activity, renal function, and endocrine physiology. Lectures and laboratory exercises emphasize homeostatic mechanisms and organ-system interactions. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 305L.

BIO 305L Vertebrate Physiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 305.

BIO 321 Microbiology 4 Credits

An introduction to the discipline of microbiology, with an emphasis on the biology of prokaryotes found in all the natural realms of our environment, including the oceans, soil, atmosphere, and extreme habitats. Emphasis will be placed on microbial diversity, fundamental microbial processes, and the continual interaction between microbes and the natural environment. Classical and modern methods of identification are introduced in the laboratory. Three hours of lecture and one three-hour lab per week. Some field trips are required. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 321L.

BIO 321L Microbiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 321.

BIO 335 Plant Biology 4 Credits

Biology of seed plants, including growth, development, and reproduction of flowering plants. Emphasis is placed on acclimation and adaptations demonstrating environmental influences on plant structure and function. Current literature involving molecular mechanisms of control will be discussed. Three hours of lecture and one three-hour lab per week. One Saturday field trip. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C.

Corequisite(s): BIO 335L.

BIO 335L Modern Plant Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 335.

BIO 340 Evolutionary Biology 4 Credits

Where did we come from? This course will explore the generation of biological diversity on earth. Course topics will include: the history of evolutionary thought; the different lines of evidence and fields of inquiry that bear on our understanding of evolution; selection vs. random changes in populations over time; speciation; extinction; the molecular basis of evolution; and evolutionary developmental biology. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116, BIO260 with a grade of C or better in each course Co-requisite(s): BIO 340L.

BIO 340L Evolutionary Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): BIO 340.

BIO 350 General Ecology 4 Credits

An investigation of the processes that regulate the distribution of plants and animals throughout the biosphere. Relationships among species and their interactions with the environment are stressed. Quantitative analyses of experimental results and current research in basic and applied ecology are discussed. Laboratory activities explore conceptual models using both field activities and computer simulations. Three hours of lecture and one three-hour lab per week. One Saturday field trip (laboratory time will be adjusted accordingly). Prerequisite(s): BIO 115, BIO 116, with a grade of "C" or better in each course.

Corequisite(s): BIO 350L.

BIO 350L General Ecology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 350.

BIO 370 Immunology 4 Credits

An introduction to the cells and molecules of the immune system with emphasis on recent advances. Topics include AIDS, autoimmunity, transplantation, and cancer. Readings from current journals will be discussed and presented by students. The laboratory will introduce current research techniques and then apply these to a research problem with critical analyses of the data generated. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 370L.

BIO 370L Immunology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 370.

BIO 372 Behavior of Marine Organisms: Evolutionary Approach 4 Credits

An examination of the underlying mechanisms and evolutionary causes of behavior, including habitat use, feeding, and mate choice, particularly in marine organisms. The laboratory will involve collecting, analyzing and interpreting field data and performing experiments in the lab using a variety of marine organisms including fish and crabs. Three hours of lecture and one three-hour lab per week. Some full-day field trips (usually on a weekend) are required. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 372L.

BIO 372L Behavior of Marine Organisms: Evolutionary Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 372.

BIO 390 Special Topics in Biology 4 Credits

This course will provide students the opportunity to deeply explore a specialized topic in the broad field of biological sciences. The course entails 3 hours of lecture and 3 hours of laboratory per week, and may satisfy upper-level biology course requirements for the Biology, Behavioral Neuroscience, and/or Health Sciences majors. Examples may include such topics as ornithology, ethnobotany, entomology, neuroelectrophysiology, or exercise physiology, among other possibilities. Prerequisite(s): BIO 115/BIO 115L and BIO 116/BIO 116L.

Corequisite(s): BIO 390L.

BIO 390L Special Topics in Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 390.

BIO 400 Seminar in Cellular and Molecular Biology 3 Credits

Critical analysis of the scientific literature pertaining to current topics in cell and molecular biology. Topics may include: genomics, regulation of gene expression, development, and molecular processes of disease. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116, (BIO 260 or BIO 117) with a grade of C or better in each course, junior standing, and permission of instructor.

BIO 416 Bioinformatics 3 Credits

A comprehensive overview of relevant computer-based technologies used in genome research, DNA sequence analysis, and evolutionary biology. Will focus extensively on Internet resources and predictive algorithm usage for determining evolutionary relationships of organisms based on molecular evidence. Lectures will focus on terms and concepts frequently used in genomic and bioinformatic research, while computer labs will allow students to perform hands-on projects with actual DNA sequence data.

Prerequisite(s): BIO 115, BIO 116, (BIO 260 or BIO 117) with a grade of C or better in each course, junior standing, permission of instructor and BIO 265 recommended.

BIO 420 Seminar in Organismal Biology 3 Credits

Critical analysis of the scientific literature pertaining to current topics in physiology and organismal biology. Topics may include hormonal control of behavior, immune pathogen interactions, and other aspects of whole animal and/or plant biology. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course; junior standing, and permission of instructor.

BIO 450 Seminar in Ecology & Evolution 3 Credits

Critical analysis of the scientific literature pertaining to current topics in ecology and evolutionary biology. Ecology and evolution of terrestrial and aquatic systems may include scales of adaptation, mechanisms, or human impacts. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course; junior standing, and permission of instructor.

BIO 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BIO 491 Internship in Biology 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and should include keeping a journal of activities, a term paper or project report and a poster presentation. 2.5 GPA required.

Prerequisite(s): Permission of the instructor.

Cannabis Studies Certificate

Overview

The cannabis industry is one of the fastest-growing industries with a variety of employment opportunities throughout the country. In New Jersey, there are currently 2,356 cannabis jobs and is projected to climb up to 321,393 cannabis-related jobs within five years. Across the United States, there are an estimated 321,000 people working in the legal cannabis industry.

The Cannabis Studies Certificate prepares students for roles that go beyond the budtender. While in the program, students can acquire industry experience and build connections through internship and affiliate programs. Those studying in close proximity to Rider's Lawrenceville, NJ campus can also benefit from easy access to the state capital of Trenton, Newark and major cities New York and Philadelphia that offer opportunities for gaining experience and networking with local, state and federal government.

After earning the certificate, students at varying stages of their careers will possess the knowledge and credentials that can help them stand out. Potential roles students can explore include accounting and finance, communications, marketing and sales, management, public policy, government and law, research and development, and supply chain management.

Curriculum Overview
