 B.F.A. New York University; M.A. Northwestern University; Ph.D. University of Pittsburgh

Robert Isenhower

Assistant Professor, Department of Psychology
 B.S. Clemson University; Ph.D. University of Connecticut

Danielle L. Jacobs

Associate Professor, Department of Chemistry and Biochemistry
 B.S. Haverford College; Ph.D. The University of North Carolina at Chapel Hill

Jeannette Jacobson

Adjunct Assistant Professor, University Libraries
 B.S. University of Wisconsin, Stevens Point; M.S. in L.S. University of Wisconsin

Mayank Jaiswal

Assistant Professor, Department of Management
 B.E. University of Delhi; M.B.A. University of Chicago; Ph.D. Georgia Institute of Technology

Barry T. Janes

Professor, Department of Film and Television
 B.A. Rutgers, The State University of New Jersey; M.A. Rutgers, The State University of New Jersey; Ph.D. New York University

Paul R. Jivoff

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
 B.A. Hartwick College; M.S. The Ohio State University; Ph.D. University of Maryland

Howard H. Joffe

Priority Adjunct Associate Professor, Department of Communication and Journalism
 B.A. Rutgers, The State University of New Jersey; J.D. Benjamin N. Cardozo School of Law, Yeshiva University

Katherine L. Johnson

Priority Adjunct Assistant Professor, Department of Piano and Voice
 B.M. University of Calgary; M.M. Manhattan School of Music

Julia Johnson Thick

Priority Adjunct Assistant Professor, Department of Theatre and Dance
 B.A. Rutgers, The State University of New Jersey

Rachelle Jonck

Priority Adjunct Associate Professor, Department of Piano and Voice
 B.Mus. University of Stellenbosch, South Africa

James Jordan

Professor, Department of Choral Studies, Music Education, and Sacred Music
B.M. Susquehanna University; M.M., Ph.D. Temple University; D.Mus. University of Aberdeen, Scotland

Terra Walston Joseph

Associate Professor, Department of English
B.A. Indiana University; M.A. University of Illinois; Ph.D. University of Illinois

Jonathan Karp

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Colgate University; Ph.D. Vanderbilt University

Jay A. Kawarsky

Professor, Department of Music Composition, History and Theory
B.M.E. Iowa State University; M.M., D.M. Northwestern University

Mamadou Keita

Lecturer, Department of Computer Science and Physics
B.A. Ecole Normale Supérieure Bamako; M.S. Ohio University; Ph.D. University of Miami; M.S. University of Miami

Toufik Khyat

Acting Assistant Professor, Department of Mathematics
B.Sc. Mohammed V University; M.A. Rhode Island College; Ph.D. University of Rhode Island

Shawn P. Kildea

Associate Professor, Department of Film and Television
B.A. Rider University; M.A. Rider University; Ph.D. Rutgers, The State University of New Jersey

Hee Young Kim

Assistant Professor, Department of Management
B.A. University of Pennsylvania; Ph.D. Stern School of Business, New York University

Jennifer King

Lecturer, Department of Psychology
B.A. The College of New Jersey; M.S. Villanova University; M.S. University of Maryland; Ph.D. University of Maryland

Anthony Kosar

Professor, Department of Music Composition, History and Theory
B.M. West Liberty State College; M.M. Southern Illinois University; Ph.D. The Ohio State University

Joanna Kubik

Assistant Professor, Department of Sociology and Criminology
B.A. Boston University; M.A. Jagiellonian University; Ph.D. Rutgers School of Criminal Justice

Eugene J. Kutcher

Associate Professor, Department of Management
B.S. Rutgers, The State University of New Jersey; M.A. Montclair State University; Ph.D. Virginia Polytechnic Institute and State University

Robert J. Lackie

Professor-Librarian, University Libraries
B.S. The University of the State of New York; M.L.I.S. University of South Carolina; M.A. Rider University

Lois Laverty

Online Lecturer, Department of Piano and Voice
B.M. Westminster Choir College; M.M. Westminster Choir College; Artist's Diploma Vienna Academy of Music, Austria

Anne Law

Professor, Department of Psychology
B.A. University of New Hampshire; M.A. University of New Hampshire; Ph.D. University of New Hampshire

Robin W. Lewis

Associate Professor, Department of Theatre and Dance
B.S. The University of Alabama at Birmingham

Sherry Fang Li

Associate Professor, Department of Accounting
B.Ec. Tsinghua University; Ph.D. University of Massachusetts Amherst

Wil Lindsay

Associate Professor, Department of Fine Arts
B.F.A. The University of Arizona; M.F.A. Rensselaer

Ruowen Liu

Lecturer, Department of Mathematics
B.S. Beijing Normal University; Ph.D. Arizona State University

Charmen Loh

Associate Professor, Department of Finance and Economics
B.S.I.E. University of Arkansas; MBA University of Arkansas; Ph.D. University of Arkansas

Linda Lorence-Critelli

Assistant Professor, Department of Fine Arts
A.A. Ferrum College; B.A. Berklee College of Music

Phillip L. Lowrey

Associate Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Vanderbilt University; Ph.D. Northwestern University

Duo Lu

Assistant Professor, Department of Computer Science and Physics
B.E. Shanghai Jiao Tong University; M.S., Ph.D. Arizona State University

Cynthia Lucia

Professor, Department of Film and Television
B.S. Indiana University of Pennsylvania; M.A. New York University; M.A. New York University; Ph.D. New York University

Zhengping Luo

Assistant Professor, Department of Computer Science and Physics
B.S. Hebei University of Science and Technology; M.S. Jinan University; Ph.D. University of South Florida

Katherine G. Magrino

Priority Adjunct Instructor, Department of Communication and Journalism
B.A. The College of New Jersey; M.A. Thomas Edison State College

Bhesh Manali

Assistant Professor, Department of Teacher Education
I.Sc. Tribhuvan University; B.Sc. Tribhuvan University; M.Sc. Tribhuvan University; M.S. University of Amsterdam; Ph.D. University of Central Florida

Cynthia Martinez

Assistant Professor, Department of Languages, Literatures and Cultures
B.A. Murray State University; M.A. University of Louisville; Ph.D. Indiana University

Morteza Mashayekhy

Assistant Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A. University of Tehran; M.B.A. Sharif University of Technology; M.M.Sc Ryerson University; Ph.D. McMaster University

Sarah Mason

Instructor - Librarian, University Libraries
B.A. Tarleton State University; M.L.S. Indiana University

Robin Massie

Priority Adjunct Assistant Professor, Department of Piano and Voice
B.M. Westminster Choir College of Rider University; M.M. Yale University

Biju Mathew

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A. Nizam College, Hyderabad, India; M.A. XLRI – Xavier School of Management, Jamshedpur, India; Ph.D. University of Pittsburgh

Sean McCarther

Associate Professor, Department of Piano and Voice
B.M. Baylor University; M.M., D.M. Indiana University

Kristin McCarthy

Assistant Professor, Department of Finance and Economics
B.A. Dickinson College; M.P.H. Hunter College; Dr.P.H. Columbia University

Evelyn A. McDowell

Associate Professor, Department of Accounting
B.B.A. Baldwin Wallace University; MAcc Case Western Reserve University; Ph.D. Case Western Reserve University; CPA, CGMA

Adam McMahan

Assistant Professor, Department of Political Science
B.A. Bowling Green State University; M.S. Portland State University; Ph.D. City University of New York

Dorothy A. McMullen

Associate Professor, Department of Accounting
B.S. LaSalle University; MBA Drexel University; Ph.D. Drexel University

Jonathan Mendilow

Professor, Department of Political Science
B.A. The Hebrew University of Jerusalem; M.A. The Hebrew University of Jerusalem; Ph.D. The Hebrew University of Jerusalem

Tan Miller

Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A. Haverford College; MBA The Wharton School, University of Pennsylvania; M.A. University of Pennsylvania; Ph.D. University of Pennsylvania

Eri Millrod

Assistant Professor, Department of Theatre and Dance
A.B. Columbia University; M.A. New York University; Ph.D. Drexel University

Miriam N. Mills

Associate Professor, Department of Theatre and Dance
B.A. Rutgers, The State University of New Jersey; M.F.A. Mason Gross School of the Arts, Rutgers, The State University of New Jersey

Sharon Mirchandani

Professor, Department of Music Composition, History and Theory
B.M. Bowling Green State University; M.M. Temple University; Ph.D. Rutgers University

Anubha Mishra

Associate Professor, Department of Marketing
B.Com. Symbiosis College of Arts and Commerce; MBA Pune University; Ph.D. University of Arizona

Ahmad Mojiri

Associate Professor, Department of Mathematics
B.S. Isfahan University of Technology; M.S. Isfahan University of Technology; Ph.D. University of Ottawa

Aaron J. Moore

Associate Professor, Department of Communication and Journalism
B.A. La Salle University; M.A. Temple University; Ph.D. Temple University

Mourya Reddy Narasareddygar

Assistant Professor, Department of Computer Science and Physics
B.A. Sri Krishnadevaraya University; M.S. North Dakota State University; Ph.D. North Dakota State University

Stéphane Natan

Professor, Department of Languages, Literatures and Cultures
B.A. Université Jean Moulin Lyon 3, France; M.A. Université Lumière Lyon 2, France; Ph.D. Université Jean Moulin Lyon 3, France

Vanita Neelakanta

Professor, Department of English
B.A. Jadavpur University, India; M.A. Jadavpur University, India; Ph.D. Brandeis University

Cynthia M. Newman

Professor, Department of Marketing
B.S.B.A. Rider University; MBA Rider University; Ph.D. University of Pennsylvania

Olivia Newman

Associate Professor, Department of Political Science
B.A. The Evergreen State College; M.A. The New School; Ph.D. The New School

Carol J. Nicholson

Professor, Department of History and Philosophy
B.A. Earlham College; Ph.D. Bryn Mawr College

Lan Ma Nygren

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Jiangsu Institute of Technology; M.S. Renmin University of China; M.A. The Ohio State University; Ph.D. Stern School of Business, New York University

Thomas O'Connor

Assistant Professor, Department of Management
B.A. Seton Hall University; M.A. Seton Hall University; Ph.D. Seton Hall University

Marge O'Reilly-Allen

Associate Professor, Department of Accounting
B.S.B.A. Temple University; MBA Drexel University; Ph.D. Drexel University

Susan O'Sullivan-Gavin

Associate Professor, Department of Marketing
B.A. Seton Hall University; J.D. Seton Hall University School of Law

Seiwoong Oh

Professor, Department of English
B.A. Chung-Ang University, Seoul; M.A. West Texas A&M University; Ph.D. University of North Texas

Jessica Oliano

Lecturer, Department of Communication and Journalism
B.A. Rider University; M.B.A. Rider University

Susan Onofrio

Priority Adjunct Assistant Professor, Department of Fine Arts
B.A. Muskingum University; M.A. Marshall University

Philip Orr

Priority Adjunct Professor, Department of Fine Arts
B.M. Rider University; M.M. Rider University

Anne R. Osborne

Professor, Department of History and Philosophy
B.A. New York University; M.A. Columbia University; Ph.D. Columbia University

Carolann Page

Priority Adjunct Assistant Professor, Department of Piano and Voice
B.M. The Curtis Institute of Music; Artist Diploma in Voice The Curtis Institute of Music

Mark Percy

Associate Professor, Department of Teacher Education
B.A. University of Florida; M.Ed. University of Florida; Ph.D. University of South Florida

J.J. Penna

Associate Professor, Department of Piano and Voice
B.M. Binghamton University, State University of New York; D.M.A. UNIVERSITY OF MICHIGAN; M.F.A. Warren Wilson College

Francis A. Perrin

Priority Adjunct Assistant Professor, Department of Psychology
B.S. Stockton University; M.S. Temple University; Ph.D. Temple University

Sarah Perry

Assistant Professor, Department of Choral Studies, Music Education, and Sacred Music
B.S. Elizabethtown College; M.A., M.E., Ed.D. Teachers College, Columbia University

Obeua S. Persons

Associate Professor, Department of Accounting
B.A. Chulalongkorn University, Thailand; M.P.A. The University of Texas at Austin; Ph.D. The University of Texas at Austin

Pearlie Peters

Professor, Department of English
B.S. Grambling State University; Ph.D. State University of New York at Buffalo

Steven Pilkington

Associate Professor, Department of Choral Studies, Music Education, and Sacred Music
B.A. St. Olaf College; M.M. University of Illinois; Ph.D. Drew University

Mary Poteau-Tralie

Professor, Department of Languages, Literatures and Cultures
B.A. Temple University; M.A. Princeton University; Ph.D. Princeton University

Susan Power

Priority Adjunct Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Trinity College; Ph.D. University College Dublin

Kathy Kessler Price

Professor, Department of Piano and Voice
B.A. University of Richmond; M.M. University of Maryland; Ph.D. The University of Kansas, Lawrence

Jonathan Price

Priority Adjunct Assistant Professor, Department of Fine Arts
B.M. The University of Cincinnati, College-Conservatory of Music; M.M., Professional Studies Certificate Boston Conservatory

J. Drew Procaccino

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A.B.A. Ursinus College; B.S.B.A. Rider University; MBA Rider University; Ph.D. Drexel University

Mark D. Promislo

Associate Professor, Department of Management
B.S. Tulane University; MBA Northwestern University; Ph.D. Temple University

Magnolia Pérez-Garrido

Priority Adjunct Assistant Professor, Department of Languages, Literatures and Cultures
B.A. The College of New Jersey; M.A. Villanova University

William Quirk

Priority Adjunct Instructor, Department of English
B.A. University of Colorado; M.A. University of Washington

Mitchell Ratner

Professor, Department of Finance and Economics
A.B. Lafayette College; MBA Drexel University; Ph.D. Drexel University

Charles Ray

Lecturer, Department of Marketing
B.A. Louisiana State University; J.D. Rutgers University School of Law

T. Oliver Reid

Assistant Professor, Department of Theatre and Dance
B.M. University of North Carolina School of the Arts

James E. Riggs

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Delaware Valley College; M.S. University of Massachusetts Amherst; Ph.D. University of Massachusetts Amherst

Jane E. Rosenbaum

Priority Adjunct Assistant Professor, Department of English
B.A. The City College of New York; M.A. University of Pittsburgh; Ph.D.
University of Pittsburgh

Kelly Ross

Assistant Professor, Department of English
B.A. The College of William & Mary; M.A. The University of North Carolina
at Chapel Hill; Ph.D. The University of North Carolina at Chapel Hill

Lisa Rufer

Assistant Professor, Department of Marketing, Sport Management and
Legal Studies
B.S. State University of New York College; M.B.A. SUNY; Ph.D. Virginia
Commonwealth University

Frank L. Rusciano

Professor, Department of Political Science
B.A. Cornell University; M.A. University of Chicago; Ph.D. University of
Chicago

Erica J. Ryan

Associate Professor, Department of History and Philosophy
B.A. Sarah Lawrence College; A.M. Brown University; Ph.D. Brown
University

Maria H. Sanchez

Professor, Department of Accounting
B.S. Villanova University; MBA Drexel University; Ph.D. Drexel University

Elizabeth S. Scheiber

Professor, Department of Languages, Literatures and Cultures
B.A. Western Kentucky University; M.A. Indiana University; Ph.D. Indiana
University

Joy A. Schneer

Professor, Department of Management
B.A. Barnard College, Columbia University; MBA Baruch College; Ph.D.
The City University of New York

Charles Schneider

Priority Adjunct Assistant Professor, Department of Fine Arts
B.M. Rutgers, The State University of New Jersey; M.M. The University of
North Carolina-Greensboro; D.M.A. Rutgers, The State University of New
Jersey

Reed A. Schwimmer

Associate Professor, Department of Geological, Environmental, and
Marine Sciences
B.S. Rider University; M.A. Bryn Mawr College; Ph.D. University of
Delaware

Elaine A. Scorpio

Associate Professor, Department of Psychology
B.A. Rhode Island College; M.A. Rhode Island College; Ph.D. Syracuse
University

Kerrie Sendall

Assistant Professor, Department of Biology, Behavioral Neuroscience, and
Health Sciences
B.S. California State University; M.S. California State University; Ph.D.
University of Minnesota and Macquarie University

Raymond Setters, II

Priority Adjunct Assistant Professor, Department of English
B.A. Rider University; M.F.A. Rosemont College

Robin Shane

Assistant Professor, Department of Theatre and Dance
B.A. Wesleyan University; M.F.A. NYU, Tisch School of the Arts

Tom T. Shelton, Jr.

Associate Professor, Department of Choral Studies, Music Education, and
Sacred Music
B.M., M.M. The University of North Carolina at Greensboro

Jia Shen

Professor, Department of Information Systems, Analytics, and Supply
Chain Management
B.S. Beijing University of Technology; M.S. New Jersey Institute of
Technology; Ph.D. New Jersey Institute of Technology

Nikki Shepardson

Associate Professor, Department of History and Philosophy
B.A. University of Rochester; M.A. Rutgers, The State University of New
Jersey; Ph.D. Rutgers, The State University of New Jersey

Nitin Singh

Assistant Professor, Department of Management
B. Com. Nagpur University; MBA Nagpur University; Ph.D. The University
of Texas in Arlington

Gabriela W. Smalley

Associate Professor, Department of Geological, Environmental, and
Marine Sciences
B.S. University of Maryland; Ph.D. University of Maryland

Bryan D. Spiegelberg

Associate Professor, Department of Chemistry and Biochemistry
B.S. Denison University; Ph.D. Duke University

Ira Sprotzer

Associate Professor, Department of Marketing, Sport Management and
Legal Studies
B.A. Binghamton University, State University of New York; J.D. Boston
College Law School; MBA Miami University

Drue Stapleton

Assistant Professor, Department of Biology, Behavioral Neuroscience, and
Health Sciences
A.A. Hudson Valley Community College; B.S. State University of New York
at Cortland; M.Ed. Salisbury University; Ph.D. West Virginia University

Jay Stern

Assistant Professor, Department of Film and Television
B.A. Columbia University; M.A. European Graduate School

Joshua Stratton

Assistant Professor, Department of Chemistry and Biochemistry
B.A. Wartburg College; Ph.D. Colorado State University

David Y. Suk

Associate Professor, Department of Finance and Economics
B.A. Sogang University; M.A. The Ohio State University; Ph.D. The Ohio
State University

Helen T. Sullivan

Priority Adjunct Assistant Professor, Department of Psychology
B.F.A. Saint Mary's College; M.S. Saint Louis University; Ph.D. Saint Louis University

Jack Sullivan

Professor, Department of English
B.A. Furman University; M.A. Columbia University; M.Phil. Columbia University; Ph.D. Columbia University

Hongbing Sun

Professor, Department of Geological, Environmental, and Marine Sciences
B.A. Nanjing University, China; M.S. Chinese Academy of Geological Sciences, Beijing; Ph.D. Florida State University

Chirag Surti

Assistant Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.Eng. Mumbai University; M.Sc. SUNY; Ph.D. McMaster University

Stephanie Sussmeier

Assistant Professor-Librarian, University Libraries

Elizabeth Sutton

Priority Adjunct Assistant Professor, Department of Piano and Voice
MusEd Bowling Green State University; M.M. Cincinnati Conservatory of Music

Leonore Shever Taga

Associate Professor, Department of Finance and Economics
A.B. University of Michigan; M.A. University of California, Berkeley; Ph.D. University of California, Berkeley

Yoshi Tanokura

Assistant Professor, Department of Theatre and Dance
B.F.A. The Indiana University of Pennsylvania; M.F.A. The University of Connecticut; M.A. Central Saint Martins College of Art and Design

Arthur R. Taylor

Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A. University of South Florida; M.S.I.S. George Mason University; Ph.D. Rutgers, The State University of New Jersey

Robert D. Terrio

Associate Professor-Librarian, University Libraries
B.M. Berklee College of Music; M.M. University of Massachusetts Amherst; M.L.I.S. Rutgers, The State University of New Jersey

Alison D. Thomas-Cottingham

Associate Professor, Department of Psychology
B.S. University of Maryland; M.A. Binghamton University, State University of New York; Ph.D. Binghamton University, State University of New York

Victor R. Thompson

Associate Professor, Department of Sociology and Criminology
B.A. University of Illinois at Urbana-Champaign; M.A. Stanford University; Ph.D. Stanford University

Megan L. Titus

Associate Professor, Department of English
B.A. Muhlenberg College; M.A. Montclair State University; Ph.D. Ohio University

Sarah Trocchio

Assistant Professor, Department of Sociology and Criminology
B.A. Clark University; M.S.W. Boston University School of Social Work; M.A. Rutgers University; Ph.D. Rutgers University of Criminal Justice

Barry E. Truchil

Associate Professor, Department of Sociology and Criminology
B.A. American University; M.A. American University; Ph.D. Binghamton University, State University of New York

Katerina Tsakiri

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. National Technical University of Athens; M.A. University at Albany, State University of New York; Ph.D. University at Albany, State University of New York

Kim Chandler Vaccaro

Associate Professor, Department of Theatre and Dance
B.A. University of California, Santa Barbara; M.A. University of California, Los Angeles; Ed.D. Temple University

Cynthia Vieth

Lecturer, Department of Communication and Journalism
B.A. Rutgers, The State University of New Jersey; M.C.I.S. Rutgers, The State University of New Jersey; Ed.D. Rowan University

Maria F. Villalobos-Buehner

Professor, Department of Languages, Literatures and Cultures
B.A. Universidad del Valle, Cali-Colombia; M.A. University of Portsmouth, Portsmouth-England; Ph.D. Michigan State University

Jason Vodicka

Associate Professor, Department of Choral Studies, Music Education, and Sacred Music
B.M., M.M. Westminster Choir College of Rider University; D.M.A. The University of Georgia

Katherine Vroman

Lecturer, Department of Teacher Education
B.A. Boston University; E.D. Boston University; Ph.D. Syracuse University

Shunzhu Wang

Professor, Department of Languages, Literatures and Cultures
B.A. Soochow University, Suzhou, China; M.A. Wayne State College; Ph.D. Purdue University

Lisa Warden

Lecturer, Department of Biology, Behavioral Neuroscience, and Health Sciences

Nancy C. Weber

Priority Adjunct Instructor, Department of Chemistry and Biochemistry
B.S. Alderson Broaddus University; M.S. The Pennsylvania State University

E. Todd Weber

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Slippery Rock University; M.S. The University of Illinois at Urbana-Champaign; Ph.D. The University of Illinois at Urbana-Champaign

Allison D. Weidhaas

Associate Professor, Department of Communication and Journalism
B.A. Rowan University; M.A. Rowan University; M.S. University of South Florida; Ph.D. University of South Florida

Sharon Whitfield

Assistant Professor-Librarian, University Libraries
B.A. University of Pittsburgh; M.L.I.S. University of Pittsburgh; Ed.D. Rowan University

Nancy A. Wienczek

Associate Professor, Department of Communication and Journalism
B.A. Douglass College, Rutgers, The State University of New Jersey; M.S. University of Louisiana at Lafayette; Ph.D. Rutgers, The State University of New Jersey

George Preston Wilson, Jr.

Assistant Professor, Department of Choral Studies, Music Education, and Sacred Music
B.S. Fisk University; M.M. Bowling Green State University; Ph.D. University of Missouri - Columbia

James Wojtowicz

Lecturer, Department of Sociology and Criminology
B.A. Rutgers University; M.S. Rutgers University

Sally Wolf

Priority Adjunct Assistant Professor, Department of Piano and Voice
B.M. Kent State University; Opera Diploma Curtis Institute Of Music

Yun Xia

Professor, Department of Communication and Journalism
B.A. Sichuan University, China; M.A. Sichuan University, China; Ph.D. Southern Illinois University

Sharon Q. Yang

Professor-Librarian, University Libraries
B.A. Beijing Foreign Studies University; M.S. Columbia University; D.L.S. Columbia University

Emre Yetgin

Assistant Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Middle East Technical University; MBA Binghamton University, State University of New York; Ph.D. University of Oklahoma

Min Young Yoon

Assistant Professor, Department of Management
B.S. Yonsei University; M.A. The University of Warwick; ABD Pennsylvania State University

Stefan Young

Professor, Department of Music Composition, History and Theory
B.M. Rollins College; Certificates American School of the Arts, Fontainebleau, France; M.M. The Juilliard School; Ph.D. Rutgers, The State University of New Jersey

Lecturer, Department of Sociology and Criminology
B.Sc. Carnegie Mellon University; M.A. The University of Chicago

Amy Zorn

Priority Adjunct Assistant Professor, Department of Piano and Voice
B.M. University of Wisconsin–Madison; M.M Boston University

Cathleen Zucco-Teveloff

Priority Adjunct Lecturer, Department of Information Systems, Analytics, and Supply Chain Management
B.A. LeMoyne College; M.S. Syracuse University

Emeriti Faculty**Mohammad Ahsanullah**

Professor Emeritus, Department of Information Systems, Analytics, and Supply Chain Management
B.S.C. Presidency College; M.S.C. Calcutta University; Ph.D. North Carolina State University

Ava Baron

Professor Emerita, Department of Sociology and Criminology
B.A. Brooklyn College, C.U.N.Y.; M.A. New York University; Ph.D. New York University

Gary Barricklow

Professor Emeritus, Department of English
B.A. California State University, Sacramento; M.A. California State University, Sacramento; Ph.D. University of New Mexico

Barton Bartle

Professor Emeritus, Department of Music Composition, History and Theory
B.M. University of Michigan; M.M. University of Michigan; Ph.D. University of Illinois

Ciprian S. Borcea

Professor Emeritus, Department of Mathematics
B.S. University of Bucharest, Romania; Diploma in Mathematics University of Bucharest, Romania; Ph.D. University of Bucharest, Romania

Carol Brown

Professor Emerita, Department of Teacher Education
B.A. Muhlenberg College; M.A. University of Pennsylvania; Ph.D. University of Pennsylvania

Pamela Brown

Professor Emerita, Department of Communication and Journalism
B.A. Rider University; M.A. The Ohio State University; Ph.D. The University of Iowa

Richard Burgh

Professor Emeritus, Department of History and Philosophy
B.A. Rider University; M.A. University of Wisconsin; Ph.D. University of Wisconsin

Dennis Buss

Professor Emeritus, Department of Teacher Education
A.B. University of Pennsylvania; M.A.T. Brown University; Ed.D. Rutgers University

Richard Butsch

Professor Emeritus, Department of Sociology and Criminology
B.S. University of Cincinnati; M.S. University of Cincinnati; Ph.D. Rutgers University

Inez Calcerano

Professor Emerita, Department of Arts and Sciences
A.B. Kalamazoo College; M.A. Miami University of Ohio

Thomas Callahan

Professor Emeritus, Department of History and Philosophy
B.A. State University of New York at Albany; M.A. University of Connecticut; Ph.D. University of Connecticut

James Carlson

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Fenn College; M.S. Ohio State University; Ph.D. Ohio State University

Radharao Chaganti

Professor Emerita, Department of Management
B.A. Osmania University, India; M.A. Osmania University, India; PGDM Indian Institute of Management Calcutta; Ph.D. University at Buffalo, The State University of New York

Harriet Chase

Professor Emerita, Department of Music Composition, History and Theory
B.M. University of Wisconsin; M.M. Eastman School of Music, University of Rochester; Ph.D. Indiana University

Patrick Chmel

Professor Emeritus, Department of Theatre and Dance
B.S. Bemidji State University; M.A. University of Missouri at Columbia; Ph.D. University of Missouri at Columbia

Mi-Hye K. Chyun

Professor-Librarian Emerita, University Libraries
B.A. Sungkyunkwan University, Seoul, Korea; M.L.S. University of Maryland

Lewis Coopersmith

Professor Emeritus, Department of Management
B.A. University of Pennsylvania; M.S. New York University; Ph.D. New York University

Hope Corman

Professor Emerita, Department of Finance and Economics
B.A. University of Illinois at Urbana–Champaign; Ph.D. The City University of New York

Jean Darian

Professor Emerita, Department of Marketing, Sport Management and Legal Studies
B.A. University of Liverpool; M.C.D. University of Liverpool; Ph.D. University of Pennsylvania

Marvin Darter

Professor Emeritus, Department of Information Systems, Analytics, and Supply Chain Management
B.A. University of California at Los Angeles; M.B.A. University of Maine; Ph.D. Georgia State University

Jesse DeEsch

Professor Emeritus, Department of Teacher Education
B.S. East Stroudsburg State College; M.A. Ohio State University; Ph.D. Indiana State University

Susan Denbo

Professor Emerita, Department of Marketing, Sport Management and Legal Studies
B.S. Cornell University; J.D. Villanova Law School

James M. Dickinson

Professor Emeritus, Department of Sociology and Criminology
B.A. University of Kent, Canterbury, UK; M.A. American University; Ph.D. University of Toronto

Mervin Dissinger

Professor Emeritus, Department of Psychology
B.S. Millersville State College; M.A. Temple University; Ph.D. Temple University

Lauren B. Eder

Professor Emerita, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Boston University; MBA Drexel University; Ph.D. Drexel University

Robert Edney

Professor Emeritus, Department of Accounting
B.S. Temple University; M.B.A. Temple University; C.P.A. University of Pennsylvania

Walter Eliason

Professor Emeritus, Department of Teacher Education
B.A. LaSalle College; M.A. Villanova University; Ed.D. Temple University

Michael Epstein

Professor Emeritus, Department of Psychology
B.S. University of Washington; B.A. University of Washington; Ph.D. University of Washington

Robert Evans

Professor Emeritus, Department of Arts and Sciences
B.A. Standord University; B.D. Princeton Theological Seminary; D.Theol. University of Basel, Switzerland

Thomas Faracco

Professor Emeritus, Department of Piano and Voice
B.M. Westminster Choir College; M.M. Westminster Choir College

Kenneth Fields

Professor Emeritus, Department of Mathematics
S.B. Massachusetts Institute of Technology; Ph.D. University of California at Berkeley

Joseph Flummerfelt

Professor Emeritus, Department of Choral Studies, Music Education, and Sacred Music
B.S.M. DePauw University; M.M. Philadelphia Conservatory of Music; D.M. (hon.) DePauw University; D.M.A. University of Illinois

Professor Emerita, Department of Political Science
B.A. Douglass College; M.A. Rutgers University; Ph.D. Rutgers University

Marguerite Frank

Professor Emerita, Department of Information Systems, Analytics, and Supply Chain Management
B.A. University of Toronto; M.A. Radcliffe College; Ph.D. Radcliffe College

Charles Frischmann

Professor Emeritus, Department of Music Composition, History and Theory
B.M. Westminster Choir College; M.M. Westminster Choir College

Walter Gebhart

Professor Emeritus, Department of Marketing, Sport Management and Legal Studies
B.S. University of Pennsylvania; J.D. Temple University School of Law; C.P.A. University of Pennsylvania

Suzanne Gespass

Professor Emerita, Department of Teacher Education
B.A. Sarah Lawrence College; M.Ed. University of Arizona; Ph.D. University of Arizona

Ilene Goldberg

Professor Emerita, Department of Marketing, Sport Management and Legal Studies
B.A. The Pennsylvania State University; J.D. Temple University James E. Beasley School of Law

Marvin Goldstein

Professor Emeritus, Department of Psychology
B.A. Hofstra University; M.A. Hofstra University; Ph.D. New School for Social Research

Robert Good

Professor Emeritus, Department of History and Philosophy
A.B. Princeton University; M.A. University of Wisconsin–Madison; Ph.D. University of Wisconsin–Madison

Joseph Gowaskie

Professor Emeritus, Department of History and Philosophy
B.A. St. Norbert College; M.A. Catholic University of America; Ph.D. Catholic University of America

Anne Gray

Professor Emerita, Department of Piano and Voice
B.A. Sarah Lawrence College; M.M. New England Conservatory

Jean Gray

Professor Emerita, Department of Finance and Economics
B.A. Michigan State University; M.A. University of California at Berkeley; Ph.D. University of California at Berkeley

James Guimond

Professor Emeritus, Department of English
B.A. Kalamazoo College; M.A. Ohio Wesleyan University; Ph.D. University of Illinois

William Guthrie

Professor Emeritus, Department of Teacher Education
B.S. Trenton State College; M.A. Trenton State College; Ph.D. New York University

Myra G. Gutin

Professor Emerita, Department of Communication and Journalism
B.A. Emerson College; M.A. Emerson College; Ph.D. University of Michigan

Mary Jo Hall

Professor Emeritus, Department of Geological, Environmental, and Marine Sciences
B.S. Pennsylvania State University; M.Ed. West Chester State College; Ph.D. Lehigh University

Henry Halpern

Professor-Librarian Emeritus, University Libraries
B.A. City College of New York; M.A. New York University; M.L.S. Pratt Institute

Belmont Haydel

Professor Emeritus, Department of Marketing
B.S. Loyola University of Chicago; B.A. American Institute for Foreign Trade; M.S. Louisiana State University; Ph.D. North Texas State University

Sigfredo Hernandez

Professor Emeritus, Department of Marketing
B.A. University of Puerto Rico; M.A. Boston University; Ph.D. Temple University

Jane Hettrick

Professor Emeritus, Department of Fine Arts
B.A. Queens College; M.M. University of Michigan; D.M.A. University of Michigan

John Hillje

Professor Emeritus, Department of History and Philosophy
B.J. University of Texas; M.A. University of Texas; Ph.D. University of Texas

Katharine Hoff

Professor Emerita, Department of English
A.B. Oberlin College; M.A. Yale University; Ph.D. Yale University

Kathryn Holden

Professor-Librarian Emeritus, University Libraries
B.A. William Smith College; M.A. Pennsylvania State University; M.S.L.S. University of Kentucky

Richard Homan

Professor Emeritus, Department of Fine Arts
B.A. University of Notre Dame; M.A. University of Minnesota; Ph.D. University of Minnesota

John Hulsman

Professor Emeritus, Department of English
B.A. St. Vincent College; Ph.D. Ohio University

Jonathan M. Husch

Professor Emeritus, Department of Geological, Environmental, and Marine Sciences
B.A. Colgate University; M.A. Princeton University; Ph.D. Princeton University

Judith Johnston

Professor Emerita, Department of English
B.A. Rice University; Ph.D. Stanford University

Mildred Rice Jordan

Professor Emerita, Department of Teacher Education
B.S. Temple University; M.A. Beaver College; Ed.D. Temple University

Marvin Keenze

Professor Emeritus, Department of Piano and Voice
B.M. Westminster Choir College; M.M. Westminster Choir College

Helen Kemp

Professor Emerita, Department of Choral Studies, Music Education, and Sacred Music
B.M. Westminster Choir College; D.M. (hon.) Westminster Choir College

Joe H. Kim

Professor Emeritus, Department of Marketing
B.A. Soongsil University; MBA Yonsei University; Ph.D. Saint Louis University

Gerald Klein

Professor Emeritus, Department of Management
B.S. Drexel University; M.B.A. Harvard Graduate School of Business; Ph.D. Case Western Reserve University

Michael Kole

Professor Emeritus, Department of Accounting
B.M.E. Rensselaer Polytechnic Institute; Ph.D. University of Massachusetts

Harvey R. Kornberg

Professor Emeritus, Department of Political Science
B.B.A. The City College of New York; M.A. Brown University; Ph.D. Brown University

Robin Leaver

Professor Emeritus, Department of Choral Studies, Music Education, and Sacred Music
Dipl. in Theol. Trinity College, Bristol, England; D.Theol. State University of Groningen, Netherlands

Mary Leck

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences

Phyllis A. Lehrer

Professor Emerita, Department of Piano and Voice
B.A. University of Rochester; M.S. The Juilliard School of Music

Christine Lentz

Professor Emerita, Department of Management
B.A. Drexel University; M.S. Northwestern University; Ph.D Northwestern University

Patricia Leonard

Professor Emerita, Department of Teacher Education
B.S. Eastern Michigan University; M.A. Central Michigan University; Ed.S. Michigan State University; Ph.D. University of Tennessee

Marilyn Levitt

Professor Emerita, Department of Fine Arts
A.B. Syracuse University; M.A. Syracuse University

Joan Hult Lippincott

Professor Emerita, Department of Choral Studies, Music Education, and Sacred Music
B.M. Westminster Choir College; M.M. Westminster Choir College; , ,

Linda Materna

Professor Emerita, Department of Languages, Literatures and Cultures
B.A. Beloit College; M.A. University of Wisconsin-Madison; Ph.D. University of Wisconsin-Madison

Thomas Mayer

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. University of Tennessee; M.A. Johns Hopkins University; Ph.D. Louisiana State University

Katherine K. Maynard

Professor Emerita, Department of English
B.S. The College at Brockport: State University of New York; Ph.D. University of Rochester

Charles W. McCall

Professor Emeritus, Department of Finance and Economics
B.A. Lycoming College; M.A. Temple University; Ph.D. Temple University

Roderick A. McDonald

Professor Emeritus, Department of History and Philosophy
M.A. University of Aberdeen; M.A. The University of Kansas; Ph.D. The University of Kansas

E. Graham McKinley

Professor Emeritus, Department of Communication and Journalism
B.A. Yale University; M.M. Westminster Choir College, Rider University; Ph.D. Rutgers, The State University of New Jersey

Sharon McKool

Professor Emerita, Department of Teacher Education
B.S.Ed. Texas State University; M.Ed. Texas State University; Ph.D. The University of Texas at Austin

Ilhan Meric

Professor Emeritus, Department of Finance and Economics
B.A. Ankara University; M.S. Lehigh University; Ph.D. Lehigh University

Bernard Miller

Professor Emeritus, Department of Teacher Education
B.S. Newark State College; M.A. New York University; Ed.D. Yeshiva University

Regina Mladineo Williams

Professor Emerita, Department of Management
B.S. Denison University; Ph.D. Rutgers University

Mary Morse

Professor Emerita, Department of English
B.A. St. Olaf College; M.A. University of Minnesota; Ph.D. Marquette University

John Moussourakis

Professor Emeritus, Department of Management
B.A. New York University; M.B.A. Iona College; Ph.D. New York University

Harry I. Naar

Professor Emeritus, Department of Fine Arts
B.F.A. The University of the Arts; M.F.A. Indiana University Bloomington

Jane Nowakowski

Professor-Librarian Emerita, University Libraries
B.M. Westminster Choir College; M.L.S. Rutgers, The State University of New Jersey

Thomas J. Parente

Professor Emeritus, Department of Piano and Voice
B.A. New Jersey City University; B.M. Manhattan School of Music; M.A. Rutgers, The State University of New Jersey; Ed.D. Teachers College, Columbia University

Chau Phan

Professor Emeritus, Department of Political Science
B.A. Marian College; M.A. University of Detroit; Ph.D. University of Denver

Marilyn Quinn

Professor-Librarian Emerita, University Libraries
B.A. Clark University; M.A. Brown University; M.L.S. Drexel University

Maury R. Randall

Professor Emeritus, Department of Finance and Economics
A.B. New York University; M.A. University of Chicago; Ph.D. New York University

Laura Brooks Rice

Professor Emerita, Department of Piano and Voice
B.M. Georgia Southern College; M.M. Indiana University

Jerry Rife

Professor Emeritus, Department of Fine Arts
B.S. Kansas State University; M.M. Kansas State University; Ph.D. Michigan State University

George Ritchie

Professor Emeritus, Department of Computer Science and Physics
B.S. Hampden-Sydney College; Ph.D. University of Pennsylvania

Deborah Rosenthal

Professor Emerita, Department of Fine Arts
A.B. Barnard College; M.F.A. Pratt Institute

Thomas Ruble

Professor Emeritus, Department of Management
B.S. University of California at Los Angeles; M.B.A. University of California at Los Angeles; Ph.D. University of California at Los Angeles

Arthur Russomano

Professor Emeritus, Department of Teacher Education
B.A. Kean University; M.A. Seton Hall University; Ed.D. Rutgers University

Anne T. Salvatore

Professor Emerita, Department of English
A.B. Chestnut Hill College; M.A. The College of New Jersey; Ph.D. Temple University

Mark Sandberg

Professor Emeritus, Department of Management
B.S. Drexel University; M.B.A. Drexel University; Ph.D. Cornell University

Margaret R. Schleissner

Professor Emerita, Department of Languages, Literatures and Cultures
B.A. Kirkland College; M.A. Princeton University; Ph.D. Princeton University

Charles F. Schwartz

Professor Emeritus, Department of Mathematics
A.B. University of Pennsylvania; Ph.D. Rutgers, the State University of New Jersey

Harriett Schwartz

Professor Emerita, Department of Communication and Journalism
B.A. University of Maryland; M.S. Purdue University

Barry Seldes

Professor Emeritus, Department of Political Science
B.A. City College of New York; M.A. City College of New York; Ph.D. Rutgers University

Prakash Sharma

Professor Emeritus, Department of Sociology and Criminology
B.S. Agra University; M.S. Agra University; M.S. University of Guelph; Ph.D. University of Georgia

John Sheats

Professor Emeritus, Department of Chemistry and Biochemistry
B.S. Duke University; Ph.D. Massachusetts Institute of Technology

Thomas Simonet

Professor Emeritus, Department of Communication and Journalism
B.A. Georgetown University; M.S. Columbia University; Ph.D. Temple University

Ruth Simpkins

Professor Emerita, Department of Psychology
A.B. Roberts Wesleyan College; A.M. Temple University; Ph.D. Temple University

Wayne Smeltz

Professor Emeritus, Department of Management
B.B.A. College of Insurance; M.B.A. University of Houston; Ph.D. University of Houston

Sandra Stein

Professor Emerita, Department of Teacher Education
B.S. University of Wisconsin; M.S. Northern Illinois University; Ed.D. Northern Illinois University

Marcia Steinberg

Professor Emerita, Department of Sociology and Criminology
B.A. Hunter College; M.A. Columbia University; Ph.D. City University of New York

John R. Suler

Professor Emeritus, Department of Psychology
B.A. State University of New York at Stony Brook; Ph.D. State University of New York at Buffalo

Alan R. Sumutka

Professor Emeritus, Department of Accounting
B.S. Rider University; MBA Seton Hall University

Richard Swain

Professor Emeritus, Department of Fine Arts
B.A. Oberlin College; Ph.D. University of Michigan

Sharon Sweet

Professor Emerita, Department of Piano and Voice
B.S. Roberts Wesleyan College; M.A. Ithaca College

Frederick Turner

Professor Emeritus, Department of Communication and Journalism
B.S. Millersville State College; M.A. Temple University; Ph.D. Temple University

Lise Vogel

Professor Emerita, Department of Sociology and Criminology
A.B. Radcliffe College; A.M. Harvard University; M.A. Brandeis University; Ph.D. Brandeis University

James Volpi

Professor Emeritus, Department of Accounting
B.S. Drexel University; M.B.A. Drexel University; C.P.A. New Jersey, Pennsylvania

Minmin Wang

Professor Emerita, Department of Communication and Journalism
B.A. Xian Foreign Languages University; M.A. Bowling Green State University; Ph.D. Bowling Green State University

Jean Warner

Professor Emerita, Department of Teacher Education
B.S. Rider University; M.A. Rider University; Ph.D. New York University

Carol Watson

Professor Emerita, Department of Management
B.A. University of Akron; M.A. Stanford University; Ph.D. Columbia University

Samuel Weigh

Professor-Librarian Emeritus, University Libraries
B.A. Hong Kong Baptist College; M.S. Columbia University; M.A. Rider University

Nancy Westberg

Professor Emerita, Department of Teacher Education
B.A. Holy Family College; M.S. Chestnut Hill College; Ph.D. Indiana State University

Alan Wiman

Professor Emeritus, Department of Marketing
B.S. Virginia Polytechnic Institute and State University; M.B.A. University of Tennessee; D.B.A. University of Tennessee

Peter Wright

Professor Emeritus, Department of Music Composition, History and Theory
B.S. Juniata College; M.A. Eastman School of Music, University of Rochester; Ph.D. Eastman School of Music, University of Rochester

Donald Wygal

Professor Emeritus, Department of Accounting
B.A. Slippery Rock State College; M.B.A. University of Pittsburgh; Ph.D. University of Pittsburgh

David Stanley York

Professor Emeritus, Department of Music Composition, History and Theory
B.M. Yale University; M.M. Westminster Choir College

Robert Carwithen

Adjunct Professor Emeritus, Department of Choral Studies, Music Education, and Sacred Music
B.M. Curtis Institute of Music; M.M. Westminster Choir College

Accounting (ACC)

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

ACC 220 Managerial Uses of Accounting 3 Credits

This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.

Prerequisite(s): ACC 210.

ACC 302 Cost Management 3 Credits

This course focuses on firm strategy and the role managerial accounting information plays in the decision making process. Topics include the balanced scorecard, the value chain, product life cycles, target costing, theory of constraints, strategic pricing, management and control of quality cost systems, traditional and activity-based costing, cost control, standard costs and variances, and capital budgeting.

Prerequisite(s): ACC 220 and CIS 185.

ACC 302P Cost Management 3 Credits

This course focuses on firm strategy and the role managerial accounting information plays in the decision making process. Topics include the balanced scorecard, the value chain, product life cycles, target costing, theory of constraints, strategic pricing, management and control of quality cost systems, traditional and activity-based costing, cost control, standard costs and variances, and capital budgeting.

Prerequisite(s): PMBA 8020 or PMBA 8020 waiver. This course is restricted to students in the MAcc program.

ACC 310 Acct Theory & Concepts I 3 Credits

This is the first upper-level course in a sequence in financial accounting courses. Topics include the conceptual framework, and standard setting process followed by application and evaluation of generally accepted accounting principles including content, and structure of financial statements, present value concepts, current assets, current liabilities, property, plant, and equipment, intangible assets and non-current liabilities are studied. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): ACC 210 and ACC 220.

ACC 310P Acct Theory & Concepts I 3 Credits

This is the first upper-level course in a sequence in financial accounting courses. Topics include the conceptual framework, and standard setting process followed by application and evaluation of generally accepted accounting principles including content, and structure of financial statements, present value concepts, current assets, current liabilities, property, plant, and equipment, intangible assets and non-current liabilities are studied. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): PMBA 8020. This course is restricted to students in the MAcc program.

ACC 311 Acct Theory & Concepts II 3 Credits

This course is a continuation of ACC 310. Topics include long-term investments, stockholders' equity, earnings per share, interperiod income tax allocation, accounting changes, revenue recognition, pensions, leases and cash flow analysis. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): ACC 310.

ACC 311P Acct Theory & Concepts II 3 Credits

This course is a continuation of ACC 310. Topics include long-term investments, stockholders' equity, earnings per share, interperiod income tax allocation, accounting changes, revenue recognition, pensions, leases and cash flow analysis. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): ACC 310 or ACC 310-P. Restricted to students in the MAcc program.

ACC 320 Accounting Info Systems 3 Credits

This course provides an introduction to accounting information systems and enterprise-wide, process-focused information systems. Topics include quality of data for decision usefulness, internal control concepts and documentation tools, and database theory and applications.

Prerequisite(s): ACC 220 and CIS 185.

ACC 321 Internal Auditing 3 Credits

This course provides an introduction to the internal audit profession, including understanding the nature and activities associated with the internal audit process. Topics include: international auditing standards, risk assessment including internal control system evaluation, business processes, and the relationship of management and employee fraud to the internal audit process.

Prerequisite(s): ACC 220.

ACC 325 Fraud Examination and Business Forensics 3 Credits

This course provides an introduction to the prevalence of fraud in all forms of business, including the many methods used by employees and managers to perpetrate fraud. Topics include: the motivation of individuals to commit fraud, various types of fraud schemes perpetrated in the workplace, as well as the various tools and techniques that are used to investigate, detect and prevent fraud.

Prerequisite(s): ACC 210.

ACC 335 Small Business Taxation 3 Credits

This course provides an understanding of the key tax issues faced by small businesses and their business implications. It also familiarizes prospective business owners with various tax filing requirements so that they can use the expertise of tax professionals more effectively.

Prerequisite(s): ACC 210.

ACC 399 The Co-Operative Experience 6 Credits

This course provides the student with a semester long supervised employment with participating companies. Students are evaluated periodically by senior staff members of the participating firms and required to complete a work journal, self-assessment and reflection paper. Eligible students include junior and senior accounting majors with a minimum GPA of 3.0 in accounting coursework. Co-op credits can be applied toward business or free elective requirements. Grading is on a pass/fail basis.

Prerequisite(s): ACC 210, ACC 220, and ACC 310 and permission of department chairperson.

ACC 400 Principles of Auditing 3 Credits

This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.

Prerequisite(s): ACC 310.

ACC 400P Principles of Auditing 3 Credits

This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.

Prerequisite(s): ACC 310 or ACC 310P. Restricted to students in the MAcc.

ACC 405 Acct Problems & Practice 3 Credits

This course provides additional coverage of financial reporting issues and procedures. Topics include business combinations, consolidated financial statements, foreign currency translation, the effects of diversity across countries, disclosure and SEC reporting issues. Governmental and not-for-profit accounting standards are also covered.

Prerequisite(s): ACC 311.

ACC 405P Accounting Problems & Practice - PM 3 Credits

This course provides additional coverage of financial reporting issues and procedures. Topics include business combinations, consolidated financial statements, foreign currency translation, the effects of diversity across countries, disclosure and SEC reporting issues. Governmental and not-for-profit accounting standards are also covered.

Prerequisite(s): ACC 311 or ACC 311P. Restricted to students in the MAcc program.

ACC 406 Integrative Professional Capstone 3 Credits

This course provides an integrative experience that applies financial statement and data analysis tools to a variety of accounting settings. Topics include issues of ethics and professionalism and linkages between accounting methods and company policy, equity valuation, bond ratings and other decision areas.

Prerequisite(s): ACC 405 or permission of department chairperson.

ACC 410 Fund of Federal Taxation 3 Credits

This course provides fundamental federal tax concepts applicable to individuals, partnerships, corporations, estates, and gifts. Topics are considered from a tax compliance and planning perspective. Preparation of individual and corporate tax returns is also included.

Prerequisite(s): ACC 311 with a minimum grade of D or ACC 311P with a minimum grade of D or VL03 with a score of WV.

ACC 410P Fund of Federal Taxation - PM 3 Credits

This course provides fundamental federal tax concepts applicable to individuals, partnerships, corporations, estates, and gifts. Topics are considered from a tax compliance and planning perspective. Preparation of individual and corporate tax returns is also included.

Prerequisite(s): ACC 311 or ACC 311P. Restricted to students in the MAcc program.

ACC 450 Business Forensic Application 3 Credits

This course provides an opportunity to perform complex investigative cases and analyses, thus demonstrating mastery of the knowledge and skills required to be effective forensic professionals. The course covers how to manage and present digital and technical evidence gathered for forensic litigation cases, including the ability to be an expert witness in court.

Prerequisite(s): ACC 325 and ACC 321.

ACC 490 Independent Research and Study 3-4 Credits

Topic to be approved by professor and department chairperson. Available to juniors and seniors.

ACC 491 Accounting Internship 3 Credits

This course provides the student with approximately two months of supervised employment with participating companies. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a term paper. Eligible students include junior and senior accounting majors with a minimum GPA of 3.0 in accounting coursework. Upon completion of course, a letter grade will be awarded.

Prerequisite(s): Permission of department chairperson.

Advertising (ADV)

Courses and Descriptions

ADV 315 Media Planning and Strategy 3 Credits

This course focuses on the essential principles, measurements, procedures and problems encountered in determining appropriate media in which to place specific kinds of advertising messages designed to reach closely defined target audiences. The advantages and disadvantages of all media will be discussed from an advertising perspective. Specific audience and cost calculations and analyses will be used to develop comprehensive media plans.

Prerequisite(s): either ADV 200 or MKT 205. Required for advertising majors.

ADV 490 Independent Research and Study 1-4 Credits

Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

ADV 491 Internship-Based Indep Study 3 Credits

Provides the student an opportunity to supplement and apply classroom work in supervised employment with participating marketing and advertising firms. Requirements include a journal with a log of daily activities, and a project or term paper presented to and evaluated by the internship sponsor. Evaluation will also include a report by the company on the intern's performance. Credits may be used to satisfy business or free elective requirements.

Prerequisite(s): Permission of instructor.

American Studies (AMS)

Courses and Descriptions

AMS 200 Introduction to American Studies 3 Credits

An introduction to various historical definitions of the American experience and national identity and the methods of research used by American Studies scholars. Students will explore multiple routes into American Studies (sociocultural, literary, anthropological, and historical) and practice methods that may include historical/archival research, public policy analysis, ethnography, literary analysis, cultural studies/media analysis, and other interdisciplinary approaches.

AMS 210 American Memoir and Autobiography 3 Credits

Studies American memoir and autobiography through analysis of literary and cultural tropes such as the self-made American, the immigrant who achieves the American Dream, bootstraps and rags-to-riches stories, etc. Texts represent the experiences of Americans of different genders, classes, races, ethnicities, and religions.

AMS 211 Sports in American Life 3 Credits

Literary, sociological, and psychological views of sports in 20th-century American life are examined, focusing on sports as a symbol and reflection of our ideals and tensions.

AMS 212 Multicultural America 3 Credits

Focusing primarily on the new century, this course explores the experiences of the remarkably diverse range of ethnic groups who have come to the U.S. in recent years, including Hispanics, Europeans, Asians and Africans. How these groups have impacted the communities where they have settled, how they have interacted with other ethnic groups, and how they have assimilated (or not) and prospered (or not) are among the issues examined and discussed.

AMS 213 American Myth in Literature, Landscape, and Music 3 Credits

A study of the New World and related myths from an interdisciplinary perspective. Students will read essays, fiction, and poetry by Poe, Melville, Emerson, Whitman, James, and others. Paintings and musical works embodying New World concepts will be examined in connection with the above authors.

AMS 214 Special Topics in American Studies 3 Credits

Studies in specialized areas of American culture, including travel courses to New Orleans and Spoleto USA. Topics change each semester and are listed in the course roster.

AMS 215 Alfred Hitchcock in America 3 Credits

Explores the influence of American culture on the films of Alfred Hitchcock following his immigration to the United States. Students will study one of the cinema's greatest auteurs through the lens of American culture and its impact on Hitchcock's European sensibility. Also explores the reverse dynamic: how Hitchcock transformed American cinema.

AMS 225 American Folklore 3 Credits

An introduction to folk language, custom, and material culture in the United States. Proverbs; myths, legends, and tales; superstitions; music; arts and crafts are treated from both aesthetic and social perspectives. Students will collect and examine folklore within their own cultural contexts.

AMS 226 The New South in Literature, Music and Film 3 Credits

An exploration of Southern culture since World War II and how it has influenced American society as a whole. In literature, music, and film, the Sun Belt has been a significant, innovative region. From the spread of New Orleans jazz through the plays of Tennessee Williams to the fiction of Flannery O'Connor, Southern art has helped shape the larger American culture. This course examines that influence from an interdisciplinary perspective. This course offers a cross-listed section to those who wish to travel to a great southern city.

AMS 227 Martin Luther King Jr's America 3 Credits

This course studies Martin Luther King Jr's writings, speeches, and sermons, the context of the America he saw in his lifetime, and the implications of his message for today's America and its place in the world. King envisioned a wholly democratic America free of racism, poverty, and military aggression. Students will critically assess the political, economic, and religious thought at the root of his call for change.

AMS 228 Studies in American Jewish Culture 3 Credits

Focuses on important fiction, criticism, social/philosophical commentary, history, and films by 20th-century Jewish American intellectuals, including Michael Gold, Anzia Yezierska, Saul Bellow, Bernard Malamud, Philip Roth, Cynthia Ozick, Grace Paley, Rebecca Goldstein, Art Spiegelman, Arthur Hertzberg, Leslie Fiedler, Chaim Potok, Woody Allen, and David Mamet.

AMS 229 American Popular Culture 3 Credits

An exploration of American popular culture and its profound impact on both the United States and the rest of the world. Pop-culture theorists regard American culture as a dominant force; this course examines the development of this trend from historical, political, and artistic perspectives.

AMS 250 America and the Future 3 Credits

Examines the projections of the American future in terms of the past and present. Emphasizes American studies methodologies, drawing upon philosophical, literary, environmental, and other varieties of futuristic speculations.

AMS 304 Technology and Science in America 3 Credits

An overview of the development and impact of technology and science on American institutions. Topics include innovation, economic growth, science and its relation to technology, social theory, and the politics of science.

AMS 305 Religion in America 3 Credits

Introduces the changing patterns of American development from the sectarianism of colonial America to the pluralism and growing secularism of the 20th-century American religious scene.

AMS 306 Poetry and Poetics in American Culture 3 Credits

Examines American poetry and poetics in relation to American culture and history of the 18th through the 21st centuries. Students read poems and statements about poetry, view artworks, hear recordings, and examine hypertext versions of poems.

AMS 307 Depictions of Racism in American Literature, Music, and Film 3 Credits

Depictions of Racism in American Literature, Music, and Film will study representations of racism in the American arts in historical context. Students will examine artistic representations of practices that disadvantage and disfranchise non-white Americans, with an eye toward understanding the ways America's history of racist practices has prompted responses from American writers, musicians, and filmmakers.

Prerequisites: CMP 125 or CMP 203 or BHP 150.

AMS 308 Kurt Vonnegut's America 3 Credits

Kurt Vonnegut's America will introduce students to Kurt Vonnegut's novels, short stories, essays, and plays, as well as critical approaches to his work. Students will examine Vonnegut's career and life as they speak to larger themes in American Studies and examine several aspects of this author's unique view of America, which challenged the easy embracing of complicated values like freedom and equality as symbols that America has seen disconnected from their meanings and origins.

Prerequisites: CMP 125 or CMP 203 or BHP 150.

AMS 309 Hip Hop and American Culture 3 Credits

Explore hip-hop culture via the music, dance, art, and poetry created in some of the poorest and most segregated neighborhoods in America. Students will examine the social conditions that fostered the creation of hip-hop and delve into a range of issues confronted in hip-hop music and culture.

Prerequisites: CMP 125 or CMP 203 or BHP 150.

AMS 310 American Identity in the Arts 3 Credits

Studies the place of the arts and the position of the creative artist in contemporary American society, with particular emphasis on the problems of the artist's search for an American identity in the complex cultural milieu.

Prerequisites: CMP 125 or CMP 203 or BHP 150.

AMS 311 Radicalism in 20th-Century America 3 Credits

Discusses a number of radical intellectual, literary, and political movements, organizations, and parties from the points of view of their members and leaders, and their historical genesis and development within the context of 20th-century American political life.

AMS 312 American Photography 3 Credits

An intensive analysis of the documentary, aesthetic, and expressive significance of photography in American culture from 1850 to the present. Particular emphasis on the interrelationships between photography and developments in American history, painting, literature, and the social sciences. This course does not deal with the technical aspects of still photography.

AMS 313 Black American Thought 3 Credits

This course introduces students to the critical and constructive nature of Black social and political thought through a survey of Black American leaders, with a focus on ideology, society and politics. Through readings and discussions, students will assess the complexities of various Black leaders and their ideological positions, often comparing and contrasting the attitudes, values and beliefs of Black thought leaders. Through the study of Black American leaders, students will gain an appreciation for the impact of Black history on the past and present of American public life. As we focus our attention on Black leaders of the 19th and 20th century, we will be mindful of the complex ways in which these leaders have agreed and disagreed on themes such as, but not limited to: achievement of Black liberation, direct action versus armed protests, the role of historical memory in modern political life, the economic and political significance of Black culture, and the tensions between Black segregation versus integration, as well as the defining of such core political concepts as citizenship, freedom, equality, progress, power, and justice.

AMS 338 Social Impact of Rock and Roll 3 Credits

Explores rock and roll music as a communication medium of American popular culture. The focus is on both how rock and roll music has influenced, and is influenced by, society. It addresses the origins, development and impact of rock music in relation to some of the critical cultural dynamics that provided not only its context, but also much of its content.

AMS 350 American Gothic 3 Credits

An introduction to American Gothic literature as a genre, including its historical development, governing conventions, politics, and aesthetics, as well as its emotional and cultural impact.

AMS 400 Seminar in American Studies I 3 Credits

A study of arts and letters in America from the Puritan period through the Civil War. Should be taken junior year if possible.

Prerequisite(s): AMS 200.

AMS 401 Seminar in American Studies II 3 Credits

A study of arts and letters in America from Reconstruction to the present. Should be taken junior year if possible.

Prerequisite(s): AMS 200.

AMS 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

AMS 491 Internship in American Studies 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of various manifestations of American society in workplace settings. Placements can be made in business, government, and non-profit organizations and local grassroots movements that draw on the knowledge acquired in the American studies curriculum.

Arts and Sciences - Arts (AR)**AR 111 Survey of Art History I 3 Credits**

A survey of Western art - architecture, sculpture, painting - from prehistoric times, is presented against the background of chronological and intellectual history.

AR 112 Survey of Art History II 3 Credits

Crucial artistic tendencies in Western art of the 19th and 20th centuries are introduced and discussed against their historical and intellectual setting. A brief background of art history from previous centuries is presented in order to appreciate these developments.

AR 216 Acting I 3 Credits

This course provides an introduction to basic techniques of realistic acting using exercises, improvisation and scene study. The emphasis is on honesty and commitment to action in order to be able to create real life in an imaginary world.

AR 217 Improvisation & Movement 3 Credits

Using theater games, students explore themselves as individuals and members of a group. The course uses scenes, skits, dances and games to help students overcome their fears and insecurities, enabling them to develop their creativity, spontaneity, honesty, concentration, and commitment to action. The class also explores body movement as a means of heightening dramatic expression.

Arts and Sciences - Sciences (AS)**AS 490 Independent Research and Study 1-3 Credits**

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

AS 491 Arts & Science Internship 1-12 Credits

This course requires 95 hours for each three credits for which the student enrolls. The student is required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 12 credits of internships.

Prerequisite(s): at least junior level standing.

Arts and Entertainment Industries Management (AAD)**Courses and Descriptions****AAD 121 Intro to Arts Administration 3 Credits**

A survey course that covers topics relevant to administering the arts, and includes reviewing state and federal legislation to non-profit organizations, non-profit agency structure, long range planning, board development, marketing, fundraising, public relations, advocacy, budget, human resources and ongoing compliance issues. Students will have opportunities to interact with professionals in the field and explore career options.

AAD 202 Commun/Marketing in Arts 3 Credits

Intended for arts or business majors interested in arts management, this course immerses students in the fundamentals of promoting the arts, from grassroots public relations to basic marketing concepts and applications. Students will have opportunities to interact with professionals in the field and explore career options.

Prerequisite(s): AAD 121 and CMP 125, or permission of instructor.

AAD 203 Arts Fundraising 3 Credits

Provides students with an understanding of the ethics, strategies and practices of fundraising for non-profit arts agencies. Students gain an understanding of the role of the development office in a non-profit arts agency, prepare for careers in arts management by increasing the skills necessary to function, and learn to plan a multi-faceted fundraising campaign effectively.

Prerequisite(s): CMP 120 or CMP 125.

AAD 204 Arts Outreach & Education 3 Credits

This course examines essential educational components of arts institutions, how they evolve and are produced, and will assess the importance of educational programming to arts organizations and the communities they serve.

Prerequisite(s): AAD 121.

AAD 225 Arts Administration Practicum 1 Credits

Under faculty advisement and project site supervision, students complete a total of three, 1-credit (33-hour) "mini-internships" or practicum projects in service to the field, sequentially in the Sophomore Fall, Sophomore Spring, and Junior Fall semesters, simultaneous to Arts Administration Lab. The first practicum project is in connection with Box Office and Patron Service to Rider Performing Arts. The second is in connection with a project of the student's choosing in service to the arts on campus or beyond. The third is in connection with a project of the student's choosing in service to the field in an outside, professional setting.

Prerequisite(s): AAD 121.

AAD 295 Art & Business of Entertainment 3 Credits

Students explore traditional and emerging models in entertainment and the impacts which social media, online service and other emerging platforms continue to have on the evolution of the industry. Students will identify and define pivotal functions and functionaries across all sectors who apply innovation, effective leadership and essential skills to produce and distribute various forms of entertainment to the masses. Through the application of a "wheel of fortune" research & analysis approach to each commercial entertainment sector, students will come to understand the multiple aspects of each (film, television, media, commercial theatre and entertainment in sports), the people who drive them and the critical functions which they serve.

Prerequisite(s): AAD 121, AAD 202 and AAD 203.

AAD 306 Music Business 3 Credits

Survey of the music business. Responsibilities of the label and producer, copyrights, royalties, residuals, publishing, contracts and artist development, promotion, distribution, product management, domestic and international licensing, and related technology.

Prerequisite(s): AAD 121.

AAD 307 Touring and Production Management 3 Credits

Organizing, marketing and managing tours. Responsibilities of the booking agent, tour manager, and performers. Case studies, relationships, contracts with venues, transportation companies, housing, and unions, budgeting, press kits, and insurance.

Prerequisite(s): AAD 121, CBA 110.

AAD 308 Legal Aspects of Arts & Entertainment 3 Credits

A survey of legal issues in the arts and entertainment industries, examining the relationship between arts and the law – from cultural property rights to intellectual property, copyright and beyond.

Prerequisite(s): AAD 121.

AAD 309 Arts Events & Festivals Mgt 3 Credits

Students learn to develop, produce, and staff successful arts events while refining planning skills through practice with theoretical and real arts event venues and participating in the production and management of actual events.

Prerequisite(s): AAD 121.

AAD 310 Acquiring & Managing Talent in Arts & Entertainment Industries 3 Credits

This course teaches foundations of professional talent management and explores the many ways by which the role of today's artist manager has evolved and expanded, particularly in an era of "independent" artists seeking managers who can act as CEO's. The course explores the many facets which an artist manager oversees, from launching an artist's career to building a successful and enduring business and fan base. Topics of exploration include talent acquisition, the artist/manager partnership, contracts, strategic planning, branding and more relating to managing all key aspects of an artist's career. Students will gain deep understanding of the dynamic roles which managers and agents play in the entertainment business as the "backbone of our industry" and of the pathways to career success as artist managers & representatives. Aspiring artists will find guidance in self-management and choosing the right partners. Other aspiring entertainment professionals will learn how to effectively engage with artist managers & agents as essential components in the broader ecology of professional arts & entertainment.

Prerequisite: Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 312 Deal-Making in Arts & Entertainment 3 Credits

This course explores all practical aspects of deal-making in commercial entertainment and the art of negotiation as the catalyst for success. Through forensic analysis & discussion of multiple types and structures of short and long-form agreements and the wide variety of provisions to be found therein, students will gain knowledge of key legal, historical, discipline-specific and industry-wide contexts of deal-making. Readings and lectures will focus on the nuts and bolts of negotiation – from essential research processes to finding and exercising bargaining power to knowing when to compromise and when to withdraw. Skills gained will be exercised through role-play, writing and ongoing analysis of peer and professional contracts. Students will gain and exercise deep understanding of agreements across multiple disciplines and the common elements therein including agency, personal management, personal appearance, merchandising, endorsements, creative ownership and union influence will be explored, as well as the unique characteristics which apply to distinct disciplines. For Arts & Entertainment Industries Management majors or minors only except by permission of Dean.

Prerequisite(s): AAD 121, AAD 202.

AAD 314 Commerce and Merchandising in Arts & Entertainment 3 Credits

This course builds upon foundational knowledge gained in "Arts Marketing & Communications," exploring the far-reaching and highly lucrative aspects of commercializing and merchandizing creative output across the many disciplines which comprise the arts & entertainment industries. Creative output in the form of a commercial film, Broadway hit, top-selling album or live performance establishes a point of departure into a massive world of merchandising where brand is king, franchises flourish and sequels make (and break) futures. Students will gain deep understanding of how strategic marketing campaigns develop, run and catalyze broader merchandising, commerce and franchise potential. Readings, lectures and case-based analyses will investigate successful corporate models, strategies and tools for maximizing commercial potential and earnings in the global commercial arts & entertainment marketplace. From relationship and influencer-based approaches across traditional and digital platforms to the tools which maximize celebrity branding, tap global merchandising capacity and harness new technologies that drive innovation, this course introduces aspiring arts & entertainment leaders to the foundations of commercial success.

Prerequisite: Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 315 Arts & Entertainment Industries Professional Development 3 Credits

Arts & Entertainment Industries (AEIM) Professional Development is designed to prepare AEIM majors for successful internship and career placement, growth and development. Through this course, AEIM majors will engage in best possible selves vision mission goals and objectives-setting, transferrable skills identification and articulation, resume development, informational and formal interview skills practice and application as well as refine and package their individual portfolios comprised of final projects/portfolios from several prior courses. These and other assets, including personal web-page and social media profile work and editorial bio, will be developed in the creation of a comprehensive professional "toolkit" of assets to aid in their pre-professional and professional career pursuits. Over the course of a semester, students will work on professional communication skills including public speaking, writing, and corresponding etiquette, and interviewing techniques for both in-person and virtual meetings. Students will explore their own strengths and weaknesses through industry-leading personality and professional skills and traits analyses and how to apply them to maximal effect. Industry guests from all arts disciplines will afford "real-world" perspectives and build networking capacity. Restricted to AEIM Majors, Junior standing or above.

AAD 316 Data Analytics in Commercial Entertainment 3 Credits

Data analytics is a driving force of today's entertainment industry as companies face new business models for creating, marketing and distributing creative output to consumers who access content anywhere, at any time and on any device. It is transforming businesses, social interactions and how entertainment is marketed and consumed. With the explosion of social media, entertainment streaming platforms and online distribution, the amount of data available has reached unprecedented levels. Hiring skilled people who know how to collect and interpret big data is crucial. This course explores the many ways by which data is used to develop detailed understanding of consumer preferences and behaviors, inform production, advertising and distribution strategies, forecast performance and help increase efficiency. Students will learn how to retrieve, analyze and apply data for successful outcomes in today's entertainment industry, helping companies seize upon ever-expanding opportunities to utilize data to identify and understand new audiences, increase content exposure and identify new products and services.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 318 Music Publishing 3 Credits

This course teaches foundational concepts, context, tools, and function of music publishing as an essential force in today's ever-evolving music industry. Students examine the many roles which the music publisher plays in the acquisition, market development and administration of copyrighted musical works. Through case-based analysis of the inner workings of major, independent and self-owned music publishing companies, students will gain understanding of the depth, breadth and scope of this fascinating aspect of the business. Discussion will encompass the fundamentals of copyright, types of publishing deals, income streams, registrations and collection, foreign sub-publishing deals, and the rights and royalties applicable to copyrighted musical work. Students will also learn how music is licensed for use in film, television, advertising, theatrical performance, game and other forms of interactive media, as well as an overview of the administrative aspects of these uses and the ways by which legislative action impacts opportunities and earnings of copyright holders. Lastly, students will explore the creative and administrative responsibilities involved in establishing their own music publishing company.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 322 Policy Perspectives on Arts & Entertainment 3 Credits

This course delivers foundational knowledge of the historical evolution, current state, and anticipated future of legislative actions, general policies and protocols impacting the many diverse components of arts and entertainment. Students will gain understanding of the several stakeholders, advocates and allies involved in the process of shaping policy and effectuating legislation, from lobbyists and industry leaders to politicians and the constituents whom they represent. Discussion will also encompass the expanding role and reach of the internet and streaming services which have often driven, and too often outpaced legislative agendas, putting the rights and benefits of intellectual property owners at risk through inequitable compensation practices, usurping of rights and expanding of global piracy. Case-based analysis will afford insight into current and anticipated lobbying agendas, legislative action (or inaction) on Capitol Hill, resolutions in process and recent legislation in action. Students will create an advocacy campaign around a pertinent issue facing arts & entertainment today, and strategize an effective lobbying process in order to gain direct insight and inspiration to become lifelong agents for change.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 308.

AAD 350 Arts Venue and Patron Services Management 3 Credits

Integrating workplace with organizational mission: administration, staff, general public, artists. Internal control, artist/employee contracts, collective bargaining, health and safety issues, facilities operation, inventory, cultivation and maintenance of clientele and audience.

Prerequisite(s): AAD 121.

AAD 351 Crossing Cultural Borders 3 Credits

Course includes two weeks at an international arts organization, meeting and shadowing administrative staff, studying management styles, finance, and operational procedures, and attending all possible events during the visit. Travel fee required. May be repeated.

Prerequisite(s): Junior standing.

AAD 375 Special Topics: Arts Admin 3 Credits

Intensive study or activity in a specific area of Arts Administration. The content will vary with social/cultural events and/or interests and qualifications of the professor. May be repeated for credit. Fee may be required.

Prerequisite(s): AAD 121 or CBA 110 or permission of instructor.

AAD 401 New York Arts Network 3 Credits

Students learn how arts institutions of varying scope, size and function and how administrators keep them running by spending focused, intensive time with them on their own turf.

Prerequisite(s): AAD 121, AAD 202 and AAD 203.

AAD 490 Independent Research and Study 1-4 Credits

This self-motivated, self-directed course culminates in a complete project. The student and the faculty advisor will mutually develop the scope of each project. It will be designed to demonstrate the student's entrepreneurial skills and provide an opportunity for practical application of the curriculum.

Prerequisite(s): AAD 202, AAD 203, and either AAD 121 or CBA 110.

AAD 491 Arts Management Internship 3-12 Credits

Arts Administration majors are required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 6 credits of internships.

Prerequisite(s): Junior standing.

Baccalaureate Honors (BHP)

Courses and Descriptions

BHP 100 Honors Seminar: Great Ideas I 3 Credits

Traces the impact of great ideas on society, politics, economics, science, and the arts. This writing-intensive course substitutes for CMP 120 Expository Writing. Freshmen only.

BHP 150 Honors Seminar: Great Ideas II 3 Credits

A continuation of Great Ideas I, the introductory Freshman Baccalaureate Honors Seminar. Great ideas are studied in their cultural and historical contexts and from an interdisciplinary perspective. Students are guided in writing an effective research paper. This writing-intensive course substitutes for CMP 125 Research Writing. Freshmen only.

BHP 201 Age of Shakespeare: A Study in Cultural History 3 Credits

Studies the cultural history of Elizabethan and Jacobean England and of its visual and literary arts. More specifically, the course will investigate the peculiarly English synthesis of the old and new, Medieval and Renaissance, Continental and English in the arts and ideas of the Age of Shakespeare.

BHP 203 Nineteen Eighty-Four in Context: George Orwell's Enduring Legacy 3 Credits

"Big Brother is watching you." "Some animals are more equal than others." Contemporary discussions of politics, journalism, and social issues regularly reflect the influence of George Orwell's classic novels, *Animal Farm* and *Nineteen Eighty-Four*. The term "Orwellian" routinely appears in modern speech and writings. Published in the aftermath of World War II, Orwell's dystopian projections, along with other provocative writing by this courageous thinker and writer, reflect the turbulent world experienced by Orwell from the waning of British colonialism to the rise of the Cold War. To contextualize the composition and importance of his most influential works, this course will explore a wide range of Orwell's writings; the historical and cultural contexts that shaped him; and the use of his work and ideas by his contemporaries and by subsequent artists, critics, and social analysts.

Prerequisite(s): BHP 100 or CMP 120.

BHP 205 Under the Influence: Drugs, Deviance, and Culture 3 Credits

This course explores the powerful influence the varied substances we call drugs have had on our institutions and on our culture. Drawing from the social sciences and the study of literature and media, we ask how drug policies and practices within institutions and social systems intersect with representations of drugs and drug use in literature and other forms of art and media.

BHP 206 Honors Seminar: Politics/Literacy 3 Credits

Students will analyze literary texts in the context of selected political periods and ideologies, going beyond literary content to understand how language, genre, and structure mirror, otherwise represent, or criticize the political order within which the author writes.

BHP 209 Honor Seminars: Law and Arts 3 Credits

Fosters analysis of controversial art images from a range of genres (e.g., films, paintings, photographs, music, literature, and sculpture) and asks students to consider connections between the art and political/social/legal issues. Topics will include censorship, propaganda, and intellectual property.

BHP 212 Children and the Media 3 Credits

This course examines how children and adolescents use and understand media and analyzes the role of media in their social and cognitive development. After studying the socializing presence of the media, students will analyze how exposure to television programs, movies, magazines and the Internet shapes children's socio-emotional development and their understanding of cultural norms. This course will also explore the effects that media use has on children's health, aggressiveness, and academic performance. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BHP 213 Honors Seminar: Text and Context 3 Credits

Studies the major themes of a period of cultural change as they are expressed in important social, scientific, literary, and artistic works. Students will immerse themselves in a single major literary work and will interpret it in light of a number of coordinate texts and works from the social sciences, from contemporary comment, and from the arts.

BHP 222 Honors Seminar: Existentialism in Literature 3 Credits

Introduces students to Existentialism as a 20th-century movement with roots going back to the 19th century and as a philosophy that has special relevance and importance for understanding today's world. Reading and discussion are based on topics of special concern to Existentialist philosophers: lying and the nature of reality, faith and reason, reevaluation of values, and the meaninglessness of life. Readings will comprise a variety of fiction and non-fiction genres. Authors may include Dostoevsky, Unamuno, Camus, Sartre, Kierkegaard, Nietzsche, Brecht, Kafka, Pirandello, Weil, and Beckett.

BHP 227 Race, Gender, and Sexuality in the Age of Empire 3 Credits

This course examines the history and literature of British and American imperialism from 1890 to the present, focusing on the intersections of race, gender, class, and sexuality. The course will cover themes of national identity, representations of colonized peoples, and imperialism as a cultural project. The history of imperialism as understood through literary and cultural analyses will focus on the functioning of gender, sexuality, and race in the ideologies and strategies of imperialism and anti-imperialism and in the psychological impact of colonial rule. Overall, we will consider how such analyses can inform a(re)defining of the colonial project.

BHP 240 Chemistry and Conflict 3 Credits

Chemistry and other sciences have radically changed the conduct of war and mechanisms of human conflict. Using case studies from the Chemical Revolution to present day, this course examines how knowledge of matter altered warfare – in terms of its scale, its boundaries, and its meaning. To this end, we study Antoine Lavoisier's work with gunpowder in the 18th century alongside a more famous case of wartime chemistry: Fritz Haber's development of chemical weapons during World War I. We also study the Manhattan Project, which produced the world's first atomic bomb in the final days of World War II. Secondly, this course investigates the many legacies of these new weapons. We follow the development of the military-industrial complex, the use of war chemicals as pesticides, and the deployment of Agent Orange in Vietnam. Finally, we examine more recent uses of chemical weapons, including in Japan, Iraq, and Syria. Throughout the course, students will bring knowledge of chemistry to bear on these historical episodes. They will demonstrate how knowledge of key chemical principles – such as atomic structure, bonding, and reactivity – help to contextualize the development of modern war.

BHP 251 Idea to Innovation 3 Credits

The pharmaceutical industry comprises an incredibly diverse team of thinkers, including accountants and biochemists, who are all on a quest to improve human health. The development of medical treatments relies on pivotal insights from the scientific laboratory, but turning these ideas into practical medical innovations requires the solving of many problems outside of the scientific field. Through the examination of historical and contemporary case studies, this course will investigate the nature of science as it is practiced in the real world. How are problems identified and ideas generated and refined? What political and sociological challenges does the industry encounter? Who pays for all of this? By exploring growth in the pharmaceutical industry from the inside, students in this class will gain a deeper understanding of both science and business and how these disciplines interact in order to enhance and extend human life.

BHP 252 Creativity and Design Thinking 3 Credits

Creative, interdisciplinary, and collaborative work is being recognized as increasingly important for innovation and solving global problems of the 21st century. This course will introduce students to a much-needed framework for dealing with unstructured problems for creative problem solving, and a process for innovation. The course consists of two related parts: the psychology of creativity provides a foundational basis of knowledge and discussion, and the design thinking framework serves as an example of a powerful creative thinking strategy that an increasing number of individuals and organizations have used successfully over the past decade.

Prerequisite(s): BHP 100 or CMP 120; non-BHP students POI only.

BHP 253 A Cross-Cultural Comparison of Play 3 Credits

This course examines how children from two different countries – the United States and Japan – play, and analyzes the influences of factors such as parents, environment, school, and culture. If travel is permitted, students will directly observe children at play in several different locations in each country – including (but not limited to) playgrounds, schools, play therapist's offices, museums, indoor play places, zoos, and theme parks. Interviews with parents, teachers, therapists, and potentially children themselves will help to clarify how play is viewed and practiced in each culture. Readings on the evolution of play, the benefits of play, the practical applications of play (e.g., in education and in therapy), and cultural differences in play will be used to support and help to inform the data students will collect through the interviews and observations.

Prerequisite(s): BHP 100 or CMP 120.

BHP 259 Honors Seminar: The Environment: a Conflict of Interest 3 Credits

Examines critical environmental issues such as global warming; food, water and energy resources; population trends; and global industrialization. Topics for context will include the origin of the elements, the origin of solar systems, and the origin of life as well as the basic principles of the current biotechnical revolution. Scientific understanding will be combined with knowledge about strategies for raising community awareness in order to (re)formulate public policy. In teams, students will be asked to define the problems; research available and prospective solutions; identify the technical, social, political, and economic constraints; and finally propose a workable strategy for making progress toward solutions.

BHP 261 The Online Explosion: Radical Changes in Business and Communication 3 Credits

Compared to a world just one generation ago when business people composed memos on typewriters and communicated with fax machines, the online explosion has brought forward a flood of new communication tools and social media platforms. It has created new types of businesses that would have been unimaginable just a short time ago and has revolutionized the way people communicate, socialize, and shop. The explosion of the web has also led to work environments in which employees are always "connected," and has raised concerns about personal privacy. We will guide students through a critical evaluation of these radical changes, with an eye on their benefits as well as potential negative consequences.

BHP 268 Honors Seminar: Love and Chivalry in the Arthurian Tradition 3 Credits

The legends attached to King Arthur of Britain and the Knights of the Roundtable have fascinated audiences for the past 1500 years. This course will examine the origins, development and meanings of love and chivalry, two essential themes in the Arthurian legends. Through study of the two major love triangles in the tradition—Arthur- Guinevere- Lancelot, and Tristan-Isolde-Mark—and the chivalrous quests of Lancelot, Tristan, Gawain, Parzival, and other Knights of the Roundtable, students will discover how Arthurian ideals regarding love, chivalry, kingship, and heroism were established and why they still resonate in popular culture. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BHP 270 Interdisciplinary Studies 3 Credits

Exploration of interdisciplinary topics and themes in honors courses team-taught by instructors representing different disciplinary specialties.

BHP 271 Special Topics in Interdisciplinary Studies 3 Credits

Exploration of interdisciplinary topics and themes in honors courses team-taught by instructors representing different disciplinary specialties.

BHP 281 The Rhetoric of Science 3 Credits

This course will examine the rhetoric of science in an effort to see how science has used language and various text types to answer questions, resolve disputes, and legitimize the knowledge contained within its disciplinary borders, and conversely how language and communication have guided scientific discovery throughout history. Reading texts from ancient and contemporary scientists, philosophers, historians, and literary authors, we will identify the key linguistic and rhetorical traits employed within the discourse communities of modern science, and consider consequences of—and the scientific developments enabled by—such language and textual practices. These concepts will be emphasized and elucidated vis-à-vis some of the most significant scientific and medical discoveries impacting the modern world.

BHP 290 Shakespeare: Page, Stage & Screen 3 Credits

This course aims to explore, in depth, the translation of Shakespeare's texts into performance by combining theatre history, cinematic adaptation, and textual analysis with a strong emphasis on practical, creative, and collaborative work. We will study 5 plays over the course of the semester and consider each as a performance piece as well as a literary artifact. Each play will be examined from multiple perspectives that are theatrical/performative/cinematic (staging, costume, sets, dramaturgy, camera, editing) as well as literary (historicist, psychoanalytic, gender and sexuality focused, Marxist, eco-critical, post-colonial), thereby bridging the artificial divide between Shakespeare as literature and Shakespeare as performance.

BHP 301 The Law and Racial Progress 3 Credits

This course is designed to enhance knowledge of the ways in which racial progress intersects with the law. Different areas of the law are emphasized, as well as the criminal justice system, with an emphasis on understanding the role and behavior of different stakeholders and participants in these areas. Ethical issues are discussed throughout the semester in order to sensitize students to the ethical considerations integral to bringing legal disputes to closure. The course will focus on three primary fields to illustrate the complicated relationship between the law and racial progress: 1) The Workplace, 2) The Police, and 3) Higher Education.

Prerequisite(s): BHP 100 or CMP 120.

BHP 302 Mirrors of the Mind: The Interplay of Literature and Psychology 3 Credits

In exploring the longstanding and evolving partnership between literature and psychology, this course addresses the following questions: How does understanding of psychological theory enhance our reading of literature? How does reading of literature affect our judgements and our responses to real-world situations? How can literary texts aid psychologists in refining theories explaining human behavior? Readings include classics, as well selections by recent writers and theorists representing both disciplines. Among the themes typically discussed are struggles in achieving stage-salient goals in life (separation from parents during adolescence and beginning the assumption of adult roles, etc.); complexities in social interactions (familial, romantic, etc.); the development of empathy; perceptions of self and other; loss and grief, morality; and the influence of culture on personality and behavior.

Prerequisite(s): Completion of BHP 100 or CMP 120 and minimum GPA 3.3; or POI.

BHP 307 Presence of Mind – Artificial Intelligence and Human Creativity 3 Credits

What is Artificial Intelligence (AI)? In what ways can computers “think”? How is their “thinking” similar to and different from that of humans? Through readings, lectures, discussions, and creative projects, students will investigate evidence of intelligence and creativity in various disciplines including music composition, art, and human and non-human systems. We will examine historical precedents and ponder likely developments in this area in the twenty-first century. No prior experience with computers or music is required.

BHP 309 Honors Seminar: Genetic Engineering and the Philosophy of Science 3 Credits

Highlights the different perspectives held by scientists and philosophers regarding current bioethical issues. Topics include classical ethical theory, applied ethics, and basic biology as it relates to topics such as stem cells, cloning, and assisted reproduction. Students will learn how to construct and present rational, objective arguments during class discussions and presentations. At the end of this course, students will have gained a strong perspective both the ethical and biological foundations behind modern “hot-button” topics in genetics.

BHP 312 Honors Seminar: Musical Expression 3 Credits

Examines the relationships between political culture (e.g., enlightened reform, revolution, or reaction) and musical discourse in periods selected from Viennese classicism, Biedermeier/romanticism, post-romanticism and expressionism. Major emphasis will be placed upon how composers such as Mozart, Beethoven, Schubert, Mahler, and Schoenberg exploited and developed musical forms, and chose and set texts to respond to the imperatives of their political and cultural environments.

BHP 315 Honors Seminar: 20th Century European Ideologies 3 Credits

Covers the origins and development of 20th-century European ideologies in a comparative perspective. Topics include the condition of European political culture at the turn of both centuries (i.e., 1900 and 2000), methods of spreading Nationalism and national culture, the First World War and the emergence of Fascism and Communism, the origins and consequences of the Cold War, the development and fate of the Socialist and Capitalist systems, and the ideology of Conservatism/Liberalism. We will also reflect upon the condition of European political culture in our day.

BHP 333 Music and Social Justice 3 Credits

From Folk to Rock & Roll, music plays a vital role in shaping social justice on a global scale. The Music & Social Justice course is designed for students interested in learning how music can engage and advocate for those on the margins of society. Music can provoke and impact social justice movements, which address moral and social problems and allow society to be more equitable, responsive, and inclusive. In other ways, music can also be a response to the current climate, allowing those impacted by social justice movements to express how they think and feel. This course will examine different periods in history, on both a US and global scale, and the impact of music on social movements, specifically including its influence on African Americans in the US, feminism, and global social issues.

BHP 340 Nature and Nurture 3 Credits

Nature and Nurture explores questions of innate and environmental influences on who we are. The history of the false Nature v Nurture debate as well as our current understanding of how innate and environmental factors influence human characteristics are explored via discussion of current scholarly articles from the social and life sciences.

BHP 350 Genocide and Human Rights 3 Credits

Explores one of the main paradoxes of the modern era: the development of human rights standards and, at the same time, the expansion and intensification of genocide, ethnic cleansing, systematic torture, and other crimes against humanity. A central question runs through the course: How are these two polar opposites, human rights and genocide, related? Concentrating on the period from the eighteenth century to the present, and encompassing virtually every area of the globe, we will discuss and debate the meaning of contested key terms, investigate particular historical cases of mass atrocities, and examine critically some of the recent efforts at redress, justice, and memory.

BHP 351 Genocide, Human Rights & Literature 3 Credits

This course is designed to introduce students to one of the most troublesome and unnerving aspects of the modern world: the systematic cleansing and killing of populations defined by ethnicity, nationality, or race. Genocides are not the only form of political killings, and are certainly not the only form assumed by violations of human rights. They have existed in some fashion since the beginning of recorded history. But in the modern world, genocides have become more systematic, more extensive, and more deadly. In response to these and other forms of crimes against humanity, new human rights standards have arisen and the effort to define and prosecute genocides is now a major aspect of international law. Literary writers and cinematic producers have also begun to examine the causes and effects of genocides in their work. Genocide is a contested term, and we will explore its various meanings. Ethnicity, nationality, and race are all historically specific ways of categorizing the human population. The course will concentrate on genocides and crimes against humanity in the 20th century. We will discuss the meaning of key terms like human rights, humanitarianism, and genocide, and investigate particular cases of mass atrocities, starting with the Holocaust and a number of historic cases of genocide, e.g., the Khmer Rouge in Cambodia, and focus on contemporary atrocities in Rwanda, ex-Yugoslavia, and Darfur. We will also explore the historical process of establishing human rights standards, and examine critically some of the recent efforts at redress, justice, and memory through criminal tribunals, truth and reconciliation commissions, and restitution. A central question runs through the course: how are these two polar opposites, human rights and genocide, related? Do modern forms of thinking about politics and the diversity of human society enable and encourage both phenomena? These discussions will continue as we also examine literary and cinematic repr.

BHP 360 Moral Psychology 3 Credits

This course will cover moral philosophy and moral psychology and where they intersect. What are moral development and moral injury? What does our taste in aesthetics say about our morality? Topics covered will include character, responsibility, naturalism and psychological science, ethics, and aesthetics are covered.

BHP 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours.

BHP 499 Baccalaureate Honors Thesis 3 Credits

Students completing the Baccalaureate Honors Program undertake a capstone project, which may be research-based and/or creative. Minimum 3 credits in total, which may be completed in fall or spring of senior year or distributed across both semesters. For details, see BHP Web site: http://www.rider.edu/15478_6437.htm.

Behavioral Neuroscience (BNS)

Courses and Descriptions

BNS 107 Life Science: Brain and Behavior 3 Credits

An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BNS 250 Biostatistics 4 Credits

This course will assist students with acquiring the skills necessary to design, conduct, and interpret research studies. Emphasis will be on learning how to develop experimental designs to translate theoretical concepts into testable hypotheses. Experiments conducted during laboratory sessions will use laboratory mice and will use equipment for measuring animal behavior. Students will gain experience collecting, analyzing, writing and orally presenting their research results. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 105 or higher or placement into MTH 210, grade of "C" or better in one lab science course.

Corequisite(s): BNS 250L.

BNS 250L Biostatistics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): BNS 250.

BNS 275 Behavioral Neuroscience 4 Credits

An introductory behavioral neuroscience course including basic neuroanatomy and neurophysiology of movement, ingestive, reproductive, emotional, and learning behaviors. Emphasis is on the structure/function relationships that allow animals to make appropriate physiological and behavioral responses to the environment. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115 & BIO 116.

Corequisite(s): BNS 275L.

BNS 275L Behavioral Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 275.

BNS 310 Neurobiology 4 Credits

A lecture-laboratory course investigating the structure and function of the nervous system. Lecture topics include organization of the nervous system, neuroanatomy, neurophysiology, neurochemistry, physiology of sensory systems, biological aspects of nervous system diseases, and behavior. Laboratory exercises include study of anatomy of the nervous system, nerve cell recording, modern neuroanatomical techniques, and the neural basis of animal behavior. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course. Corequisite(s): BNS 310L.

BNS 310L Neurobiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 310.

BNS 360 Neurochemistry 4 Credits

Examines the fundamentals of neurochemistry, including the neuroanatomical distribution, pharmacology, and functions of neurotransmitters; signal transduction pathways; behavioral and physiological effects of chemicals either used therapeutically to treat biopsychological disorders or that may be abused for their psychotropic effects; and mechanisms and models for the study of drug action. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116, CHE 122, CHE 123 with a grade of C or better in each course.

Corequisite(s): BNS 360L.

BNS 360L Neurochemistry Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): BNS 360.

BNS 375 Neuroethology: Circuits of Behavior 4 Credits

Neuroethology is the study of the neural and physiological basis of animal behavior. This course focuses on the specific behavioral problems faced by animals in their natural habitats, and the ways in which their nervous systems solve these problems. The mechanisms that underlie complex behaviors such as spatial orientation and navigation, escape mechanisms, and animal communication will be examined, as well as the extraordinary sensory adaptation of organisms to their environments (e.g., echolocation, electroreception, and magnetic reception). The neural control of motor programs and temporally-patterned behaviors will be studied in simpler neuronal systems. Finally, recent cellular and molecular approaches to the study of behavior will be addressed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BNS 375L.

BNS 375L Neuroethology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 375.

BNS 415 Seminar in Behavioral Neuroscience 3 Credits

Critical analysis of the scientific literature pertaining to current topics in behavioral neuroscience. Topics include mechanisms through which the brain influences physiology and behavior and the integration of nervous and endocrine systems. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116 or BNS 118, BIO 117, junior standing and permission of instructor.

BNS 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BNS 491 Internship in Behavioral Neuroscience 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and should include keeping a journal of activities, a term paper or project report and a poster presentation.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Biochemistry (BCH)

Courses and Descriptions

BCH 225 Introduction to Organic and Biochemistry 4 Credits

An introductory course describing the basic principles of organic chemistry and biochemistry as they relate to human metabolism and disease. The nature of the chemical structure and reactivity of organic functional groups such as alcohols, aldehydes, ketones, carboxylic acids and amines will be presented with biological processes in mind. The biochemistry of the macromolecules DNA, RNA, proteins, carbohydrates and lipids will be discussed leading in to a discussion of some of the more important metabolic pathways. This course is intended for science majors who do not take the full two semester sequence of organic chemistry and two semesters of biochemistry and desire a background in biochemistry. Non-science major students who have had one semester of general chemistry and one semester of biology may also enroll in the course. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): CHE 110 or CHE 122, CHE 123; BIO 115.

Corequisite(s): BCH 225L.

BCH 225L Introduction to Organic & Biochemistry Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BCH 225.

BCH 325 Biochemistry 3 Credits

Outlines the chemistry and biological function of carbohydrates, proteins, lipids, nucleic acids, vitamins, and enzymes, and introduces enzyme kinetics and biological energetics. Degradative metabolic pathways of carbohydrates and lipids, and their controlled interrelationships are discussed in detail.

Prerequisite(s): CHE 122, CHE 214 with a minimum grade of D.

BCH 326 Biochem and Enzymology I Lab 1 Credits

The laboratory work illustrates techniques and methods essential to the biochemist. Methods for quantification of proteins, purification of enzymes and determination of their kinetic parameters, polarimetry, and structure proof of carbohydrates. The lab must be taken concurrently with BCH 325 by biochemistry and biology majors, but is optional for others.

Prerequisite(s): CHE 123, CHE 214.

BCH 330 Biochemistry II 3 Credits

Continuation of Biochemistry I. Includes molecular analysis of biological membrane structure and function and a molecular level analysis of information flow from DNA through RNA to proteins. Other topics include mechanisms of hormone action and an expansion on metabolic concepts.

Prerequisite(s): BCH 325.

BCH 331 Biochemistry II Lab 1 Credits

Methods of protein analysis, building on techniques and principles learned in BCH 326. Students will use bioinformatics and molecular biological techniques, including PCR, to harness and change protein sequence. They will implement modern protein purification techniques, develop enzyme essays, and perform equilibrium binding assays to investigate the relationships among protein sequence, structure, and function.

Prerequisite(s): BCH 326, BIO 117.

BCH 400 Advanced Biochemistry. 3 Credits

Continuation of Biochemistry I. Includes molecular analysis of biological membrane structure and function and a molecular level analysis of information flow from DNA through RNA to proteins. Other topics include mechanisms of hormone action and an expansion on metabolic concepts.

Prerequisite(s): BCH 325.

BCH 410 Metabolism and Bioenergetics 3 Credits

An examination of principles of energetics and chemical transformations as they pertain to metabolism. Students will explore general issues of bioenergetics and will delve into biochemical pathways of catabolism and anabolism of biological molecules, including key nutrients, and xenobiotic compounds, including drugs and toxins. Attention will be placed on the enzymes and cofactors that mediate critical metabolic transformations, and students will use the scientific literature to investigate mechanisms of regulation and integration of metabolic pathways as well as consequences of aberrant enzyme function to human disease.

Prerequisite(s): BCH 325.

BCH 415 Signal Transduction 3 Credits

Cells in multicellular organisms are in constant communication with each other. One way that cells communicate is through the sharing of chemical signals through a process called "signal transduction." In this course, we will study the basic biochemical principles of signal transduction to better understand life on a molecular level. Topics to be covered include a broad overview of signal transduction mechanisms, including basic receptor theory and the use of second messengers; investigations into specific signaling strategies, including signaling via receptor ion channels, G protein-coupled receptors, and nuclear hormone receptors; and examinations of cellular mechanisms used to coordinate signaling spatially and temporally. Special focus will be placed on roles of signal transduction pathways in health and disease.

Prerequisite(s): BCH 325.

BCH 425 Medicinal Chemistry 3 Credits

A comprehensive description of the important principles of medicinal chemistry including principles of rational drug design with synthetic strategies, mechanisms of drug actions, structure-activity relationships, the absorption, distribution, metabolism and elimination of drugs. Specific classes of drugs to be discussed include: anticancer agents, analgesics, anti-inflammatory drugs, steroids, drugs acting on the nervous system and antibiotics.

Prerequisite(s): BCH 325 or permission of instructor.

BCH 430 Advanced Lab Techniques in Biochemistry. 1 Credits

Methods of protein analysis, building on techniques and principles learned in BCH 326. Students will use bioinformatics and molecular biological techniques, including PCR, to harness and change protein sequence. They will implement modern protein purification techniques, develop enzyme essays, and perform equilibrium binding assays to investigate the relationships among protein sequence, structure, and function.

Prerequisite(s): BCH 326.

BCH 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurement, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BCH 491 Internship in Biochemistry 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the students' overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Biology (BIO)

Courses and Descriptions

BIO 100 Life Science 3 Credits

An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BIO 102 The Biology of Cannabis 1.5 Credits

In this course, you will learn about many aspects of the biology of cannabis, including botany, genetics, growth techniques, strain selection, and health benefits. Emphasis is placed on current methods in the marijuana industry to help legal growers and professionals understand best practices for cultivation, management, and medicinal use. Current literature and sources will be discussed.

BIO 110 Life Science: Inquiry Approach 4 Credits

An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 110.

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits

An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 116.

BIO 206 The Pharmaceutical Industry 3 Credits

An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.

Prerequisite(s): BIO 100 or BIO 101 or BIO 106 or BIO 108 or BNS 107 or CHE 115.

BIO 210 Hospital Intern Program 2 Credits

An internship that provides students with the experience in the practical aspects of medicine. Major departments in the hospital such as the emergency room, operating room, clinic, radiology, and the laboratory will be open for student rotations. Field trips to various medical schools in the area will provide information on professional school educational opportunities available in the health professions.

Prerequisite(s): sophomore standing or above and permission of instructor.

BIO 215 Medical Microbiology 4 Credits

Biology of prokaryotes of medical interest with emphasis placed on diversity and host-pathogen interaction. Current research literature will be covered and presented by students. Methods of microbial identification are introduced in the laboratory and applied in the identification of mock clinical isolates. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course,

Corequisite(s): BIO 215L.

BIO 215L Microbiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 215.

BIO 221 Human Anatomy & Physiology I 4 Credits

A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training.

Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. **Prerequisite(s):** HSC major ONLY or Permission of instructor.

Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 221.

BIO 222 Human Anatomy & Physiology II 4 Credits

A comprehensive survey of the organ systems of the body including special senses, cardiovascular, respiratory, digestive, excretory, reproduction and development. Physiological components include electrolytes, metabolism, nutrition, and the mechanisms of homeostasis and cell reception. Lab studies support lecture material through dissections, wet labs, computer-assisted learning, microscopy, and models. Assessment includes lab practicums, exams, and reports. Course emphasis supports allied health and pre-professional training. Designed for allied health students; does not satisfy requirements for the biology major. **Prerequisite(s):** BIO 221.

Corequisite(s): BIO 222L.

BIO 222L Human Anatomy & Phys II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Prerequisite(s):** BIO 221L.

Corequisite(s): BIO 222.

BIO 250 Field Natural History 4 Credits

Identification, life history, and interrelationships of plants and animals in natural landscapes of New Jersey. Field, lab, discussion and lecture exercises will prepare students to lead informative and safe nature walks. Nature writing and natural resources management also covered. Three lectures and one three-hour laboratory per week; most labs take place outdoors. Two Saturday field trips (laboratory time will be adjusted accordingly). Designed for education majors; does not satisfy requirements for the biology major.

Corequisite(s): BIO 250L.

BIO 250L Field Natural History Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 250.

BIO 260 Principles of Biology: Evolution, Diversity, and Biology of Cells 4 Credits

Lectures and labs focus on basic cell biology. Cell diversity and function, genetics and biotechnology are emphasized. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115/115L and BIO 116/116L or BIO 115, BIO 117, (BNS 118 or BNS 275).

Corequisite(s): BIO 260L.

BIO 260L Principle of Biology: Cells Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 260.

BIO 265 Genetics 4 Credits

A comprehensive course focusing on molecular, Mendelian, and population genetics. Topics covered will include molecular advances in the study of genetics, including genomics and bioinformatics; evolution and the effects of genetic mutations; the application of population genetics to forensic science; genetic problem solving, including genetic crosses and statistical analysis; and regulation of gene expression. The laboratory for this course will introduce students to commonly used genetic model organisms and basic molecular biology techniques. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 265L.

BIO 265L Genetics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 265.

BIO 272 Intro to Marine Biology 4 Credits

Introduces students to the study of marine environments, emphasizing the diversity, ecology, and physiology of marine animals, algae, and plants. Aspects of the human impact on marine environments are also discussed. Prerequisite(s): BIO 115 or BIO 116 or BNS 118 and grade of "C" or better.

Corequisite(s): BIO 272L.

BIO 272L Marine Biology Laboratory 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 272.

BIO 290 Special Topics in Biology 3 Credits

BIO 300 Developmental Biology 4 Credits

Lectures and laboratories explore molecular, cellular, and genetic mechanisms of animal development. Aspects of gametogenesis, fertilization, induction, cytoplasmic determinants, morphogenetic movements, differentiation and developmental evolution are discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 300L.

BIO 300L Developmental Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 300.

BIO 305 Vertebrate Physiology 4 Credits

Study of the principles and mechanisms of mammalian physiology. Topics include the nervous system, muscle physiology, cardiovascular physiology, respiration, gastrointestinal activity, renal function, and endocrine physiology. Lectures and laboratory exercises emphasize homeostatic mechanisms and organ-system interactions. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 305L.

BIO 305L Vertebrate Physiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 305.

BIO 321 Microbiology 4 Credits

An introduction to the discipline of microbiology, with an emphasis on the biology of prokaryotes found in all the natural realms of our environment, including the oceans, soil, atmosphere, and extreme habitats. Emphasis will be placed on microbial diversity, fundamental microbial processes, and the continual interaction between microbes and the natural environment. Classical and modern methods of identification are introduced in the laboratory. Three hours of lecture and one three-hour lab per week. Some field trips are required. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 321L.

BIO 321L Microbiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 321.

BIO 335 Plant Biology 4 Credits

Biology of seed plants, including growth, development, and reproduction of flowering plants. Emphasis is placed on acclimation and adaptations demonstrating environmental influences on plant structure and function. Current literature involving molecular mechanisms of control will be discussed. Three hours of lecture and one three-hour lab per week. One Saturday field trip. Prerequisite(s): BIO 115 with a minimum grade of C and BIO 116 with a minimum grade of C.

Corequisite(s): BIO 335L.

BIO 335L Modern Plant Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 335.

BIO 340 Evolutionary Biology 4 Credits

Where did we come from? This course will explore the generation of biological diversity on earth. Course topics will include: the history of evolutionary thought; the different lines of evidence and fields of inquiry that bear on our understanding of evolution; selection vs. random changes in populations over time; speciation; extinction; the molecular basis of evolution; and evolutionary developmental biology. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116, BIO260 with a grade of C or better in each course Co-requisite(s): BIO 340L.

BIO 340L Evolutionary Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): BIO 340.

BIO 350 General Ecology 4 Credits

An investigation of the processes that regulate the distribution of plants and animals throughout the biosphere. Relationships among species and their interactions with the environment are stressed. Quantitative analyses of experimental results and current research in basic and applied ecology are discussed. Laboratory activities explore conceptual models using both field activities and computer simulations. Three hours of lecture and one three-hour lab per week. One Saturday field trip (laboratory time will be adjusted accordingly). Prerequisite(s): BIO 115, BIO 116, with a grade of "C" or better in each course.

Corequisite(s): BIO 350L.

BIO 350L General Ecology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 350.

BIO 370 Immunology 4 Credits

An introduction to the cells and molecules of the immune system with emphasis on recent advances. Topics include AIDS, autoimmunity, transplantation, and cancer. Readings from current journals will be discussed and presented by students. The laboratory will introduce current research techniques and then apply these to a research problem with critical analyses of the data generated. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 370L.

BIO 370L Immunology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 370.

BIO 372 Behavior of Marine Organisms: Evolutionary Approach 4 Credits

An examination of the underlying mechanisms and evolutionary causes of behavior, including habitat use, feeding, and mate choice, particularly in marine organisms. The laboratory will involve collecting, analyzing and interpreting field data and performing experiments in the lab using a variety of marine organisms including fish and crabs. Three hours of lecture and one three-hour lab per week. Some full-day field trips (usually on a weekend) are required. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 372L.

BIO 372L Behavior of Marine Organisms: Evolutionary Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 372.

BIO 390 Special Topics in Biology 4 Credits

This course will provide students the opportunity to deeply explore a specialized topic in the broad field of biological sciences. The course entails 3 hours of lecture and 3 hours of laboratory per week, and may satisfy upper-level biology course requirements for the Biology, Behavioral Neuroscience, and/or Health Sciences majors. Examples may include such topics as ornithology, ethnobotany, entomology, neuroelectrophysiology, or exercise physiology, among other possibilities. Prerequisite(s): BIO 115/BIO 115L and BIO 116/BIO 116L.

Corequisite(s): BIO 390L.

BIO 390L Special Topics in Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 390.

BIO 400 Seminar in Cellular and Molecular Biology 3 Credits

Critical analysis of the scientific literature pertaining to current topics in cell and molecular biology. Topics may include: genomics, regulation of gene expression, development, and molecular processes of disease. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116, (BIO 260 or BIO 117) with a grade of C or better in each course, junior standing, and permission of instructor.

BIO 416 Bioinformatics 3 Credits

A comprehensive overview of relevant computer-based technologies used in genome research, DNA sequence analysis, and evolutionary biology. Will focus extensively on Internet resources and predictive algorithm usage for determining evolutionary relationships of organisms based on molecular evidence. Lectures will focus on terms and concepts frequently used in genomic and bioinformatic research, while computer labs will allow students to perform hands-on projects with actual DNA sequence data.

Prerequisite(s): BIO 115, BIO 116, (BIO 260 or BIO 117) with a grade of C or better in each course, junior standing, permission of instructor and BIO 265 recommended.

BIO 420 Seminar in Organismal Biology 3 Credits

Critical analysis of the scientific literature pertaining to current topics in physiology and organismal biology. Topics may include hormonal control of behavior, immune pathogen interactions, and other aspects of whole animal and/or plant biology. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course; junior standing, and permission of instructor.

BIO 450 Seminar in Ecology & Evolution 3 Credits

Critical analysis of the scientific literature pertaining to current topics in ecology and evolutionary biology. Ecology and evolution of terrestrial and aquatic systems may include scales of adaptation, mechanisms, or human impacts. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course; junior standing, and permission of instructor.

BIO 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BIO 491 Internship in Biology 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and should include keeping a journal of activities, a term paper or project report and a poster presentation. 2.5 GPA required.

Prerequisite(s): Permission of the instructor.

Business Administration (BUS)

Courses and Descriptions

BUS 150 The Business of Cannabis 1.5 Credits

In this online course, you will learn about trends and best practices in the business operations of the cannabis industry. Emphasis will be placed on financial strategies, marketing, customer service, and the regulatory environment.

BUS 210 Intro to Law: Contracts 3 Credits

An introduction to the origin of current law, with emphasis on the development of business law, students are exposed to legal terminology and acquainted with the system of application of rules of law to actual situations. The laws of contracts, particularly common-law developments, are considered in great detail.

BUS 211 Commercial Law 3 Credits

The law as related to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code is considered in depth. Warranties, guarantees, remedies, and product liability are explored. The laws of bankruptcy and insurance are also considered.

Prerequisite(s): BUS 210.

BUS 214 Advanced Business Law 3 Credits

This course provides students with an introduction to the fundamentals of individual and organizational forms of doing business. The laws governing agency, partnerships, corporations, and the purchase and sale of securities will be explored. The legal consequences of the relationships, and the rights and duties of the parties and entities will be discussed, as will the rules of law governing real, personal, and intellectual property, including the transfer of title to real property, the various types of bailments, the landlord-tenant relationship, and the laws concerning wills, trusts, and estates. The concerns of businesses that compete in the global environment through the study of international law will also be discussed. This course replaces the property (BUS 213) and business associations (BUS 212) courses; you may not take this course if you have taken either of these courses.

Prerequisite(s): BUS 210.

BUS 300 The Legal and Ethical Environment of Business 3 Credits

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

Prerequisite(s): 54 credits.

BUS 315 Health Care Law, Ethics & Policy 3 Credits

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

Prerequisite(s): 24 credits.

BUS 375 International Business Law 3 Credits

This course considers the impact of international organizations and treaties on global business and examines the various methods of international dispute resolution. Important legal and ethical issues related to conducting business overseas are discussed including the topics of labor and employment rights, environmental law, and intellectual property.

Prerequisite(s): 54 credits.

BUS 400 Strategic Mgmt and Policy 3 Credits

This capstone course for seniors in business administration provides a framework for problem identification, analysis, and decision making within the organization. Students are given the opportunity to integrate and apply previously acquired knowledge of accounting, decision sciences, economics, finance, marketing, management, and statistics. Case studies, critical incidents, and other appropriate techniques are utilized.

Prerequisite(s): 84 credits, CIS 185, ACC 210, ACC 220, MKT 200, MGT 201, FIN 220 or FIN 300, MSD 340 or MSD 301, BUS 300, CIS 385 or GSC 385.

BUS 410 New Venture Planning 3 Credits

This course will require students to select a business and prepare a complete new venture plan for it. This plan would identify the product and its target market, analyze its market potential, choose the location, scale of operation, layout, staffing, type of financing, estimate the revenues and profits, and present the income statement, balance sheet, and the cash flow projections.

Prerequisite(s): ENT 348 or permission of instructor.

BUS 444 Selected Topics Business Policy 3 Credits

The study of a selected topic of contemporary interest related to one or more of the following: strategic management, business law, business ethics, social responsibility, legal environment of business. Readings, research, lectures, discussions, and other methods will be used.

Prerequisite(s): to be determined by instructor.

BUS 490 Independent Research and Study 3 Credits**BUS 491 Business Admin Internship 1-4 Credits****BUS 492 Global Business Internship 3 Credits**

Business Data Analytics (BDA)

Courses and Descriptions

BDA 201 Introduction to Business Analytics 3 Credits

This course introduces students to the process of analyzing big data and discovering new information to support business decision making. The course covers descriptive, predictive, and prescriptive analytics. Some topics covered include data visualization, data forecasting, and data mining. This course provides students with the fundamental concepts and tools needed to understand the role of business analytics in organizations and shows students how to apply basic business analytics tools in a spreadsheet environment. It also includes how to communicate with analytics professionals to effectively use and interpret analytic models and results for making better business decisions. Emphasis is given on applications, concepts and interpretation of results. Students utilize Excel for data analysis.

Prerequisite(s): MSD 205 or MSD 200.

BDA 205 Introduction to Visual Data Analytics 3 Credits

This course will equip the students with the fundamental skills to perform visual data analytics. Students will learn how to prepare a dataset for visual analysis, create basic and advanced visualizations using Tableau, and “tell a story” using data visualization. At the completion of the course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience.

Prerequisite(s): CIS 185 and BDA 201.

BDA 355 Business Analytics with Python 3 Credits

Python has become essential for data analysis in recent years. Research shows that Python is the most popular and growing programming language for business analytics mainly because it is flexible, easy to learn, easily accessible due to its open-source nature, and well supported by plenty of useful analytics libraries since it is heavily used in industry and academy. This course provides students with the required knowledge of working with popular Python data analytics libraries such as Pandas, NumPy, Matplotlib, SciPy, and Scikit-Learn as well as basic programming with Python such as Python syntax, data structure, conditional statements, and functions. Some topics covered include data retrieval and manipulation with Pandas (Python's most popular library for data analytics) and SQL, data visualization with Matplotlib, statistical distributions with NumPy, hypothesis testing with SciPy, and multiple regression with Scikit-Learn.

Prerequisite(s): BDA 201.

BDA 360 Optimization and Simulation 3 Credits

This course is designed to provide undergraduate students with the current knowledge and practice of optimization and simulation in business analytics. Optimization is an area in business analytics that finds the optimal, or most efficient, way of using limited resources to achieve the objectives of an individual or a business. Simulation is a technique that measures and describes various characteristics of the bottom-line performance measure of a model when one or more values for the independent variables are uncertain. The main focus of this course will be on developing modeling skills by using Excel (and Analytic Solver add-on) to gain insights into a wide variety of business decision problems. First, they will learn how to analyze the problem and choose an appropriate optimization/simulation method. Next, they learn how to formulate the problem in a format that can be implemented in a spreadsheet. Then, they will be taught to use Excel with add-on to solve the problem. Once the results are obtained, the students will be trained to interpret them and conduct sensitivity analyses. Eventually, the students are required to make a recommendation to managers after considering some implementation issues.

Prerequisite(s): BDA 205.

BDA 398 Business Data Analytics Practicum 3 Credits

This course develops and sharpens the skills for a successful career in analytical business consulting, such as analysis, critical thinking, presentation, problem solving, and teamwork. This class will develop skills in each of these areas through discussion of the principles underlying best practices and feedbacks in a series of applied exercises and cases that will prepare students to obtain and succeed in analytical business consulting problems. The students will analyze the data provided by professionals from experts in the field, and they will present the project at the end of the semester.

Prerequisite(s): BDA 205; MSD 201 Statistical Methods II; Junior or Senior Standing; Completion of 12 credit hours in business analytics coursework or Permission of Instructor.

BDA 399 The Co-Operative Experience 6 Credits

This Co-Operative Experience will provide Business Analytics majors with supervised employment (approximately four months), where the students will have an opportunity to apply what they have learned in their business analytics and other business classes.

Prerequisite(s): Business Analytics major, Junior or Senior standing, GPA of 3.0 or above.

BDA 491 Business Data Analytics Internship 3 Credits

This Internship course will provide Business Analytics majors students with supervised employment (approximately two months), where the students will have an opportunity to apply what they have learned in their business analytics and other business classes.

Prerequisite(s): Business Analytics major, Junior or Senior standing, GPA of 2.75 or above.

Business Education - UG (BED)

Courses and Descriptions

BED 410 Prin/Strat Voc & Coop Ed 3 Credits

Designed as one of the specialized courses in the preparation of business and marketing education teachers and teacher-coordinators of cooperative work experience programs. The philosophy and history of education for and about work, including technology, are studied along with the principles and strategies for organizing and administering vocational cooperative education programs. Developmental/reflective evaluative techniques will be applied for the assessment of self, students, instruction and selected case studies. Current instructional concepts, organizational and administrative strategies, legislative enactments, and regulations pertaining to the employment of youth are included. Special attention is given to the role of vocational student organizations and advisory committees. Open to all students. A cumulative GPA of 2.75 is required.

BED 415 Teaching Business Subjects 3 Credits

Instructional strategies in the teaching of business and marketing subjects are analyzed and demonstrated. Students are required to prepare lesson plans, teach demonstration lessons, develop a unit plan, and compile a resource file of teaching materials. Videotaping of demonstration lessons is integrated with the course work to encourage developing teaching competency through a series of instructional modules appropriate to the student's certification interests. A cumulative GPA of 2.75 is required.

BED 445 Work Experience Cooperative Program 3-6 Credits

A minimum of 300 hours in a supervised occupational experience or a supervised internship program in an approved work station or institution. The experience is coordinated and supervised by a qualified coordinator of occupational education. A series of activities are designed to relate job and intern experiences to the student's future role as an employee or a professional teacher. The student will be evaluated by the supervising employer and the University supervisor.

BED 490 Independent Research & Study 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hours credit to be assigned is determined by the department.

Chemistry (CHE)

Courses and Descriptions

CHE 100 Intro to College Chemistry 3 Credits

Open to all students, but designed primarily for those who wish to major in a science which requires chemistry but whose chemistry background is not sufficient to allow entrance into Chemistry 120. It focuses on the nomenclature used in chemistry including the symbols used to designate the chemical elements, the construction of chemical formulas, and the writing and balancing of chemical equations. Other topics will include interpreting the Periodic Table, the valences of the elements, the mole concept, and simple stoichiometry. In addition, chemical calculations involving units, scientific notation, significant figures, and the algebraic manipulations of simple equations will be included. Three hours of lecture per week. This course does not satisfy the requirements for the biochemistry or chemistry degree, but does satisfy the core requirements for education and business majors.

CHE 110 Survey of General Chemistry 4 Credits

A one-semester survey of basic general chemical principles designed to be applied to questions in health-related fields. Students will explore the fundamental structures of atoms and simple compounds that comprise living beings; basic patterns in chemical reactivity, especially oxidation-reduction and acid-base reactions; quantitative analyses of biologically-relevant compounds and chemical reactions; properties of substances; and kinetic and thermodynamic principles underlying such chemicals and chemical processes. In the laboratory portion of this course, students will learn and apply principles of experimental safety and will apply knowledge gained in the class via application in basic experimental contexts. No prerequisites. Students who have completed CHE 120 and/or CHE 122 will not be permitted to enroll in CHE 110/110L. Furthermore CHE 110 will not serve as a prerequisite for CHE 122.

CHE 110L Survey of Gen Chemistry Lab 0 Credits

In the laboratory portion of this course, students will learn and apply principles of experimental safety and will apply knowledge gained in the class via application in basic experimental contexts.

CHE 114 Chemistry in the Kitchen 4 Credits

Chemistry permeates aspects of our daily lives in which we are often unaware. In this course, students will learn the core tenets of chemistry including atomic and molecular structure, bonding, intermolecular and macromolecular interactions, and chemical reactivity, and will personally investigate these properties in the context of cooking, baking, metabolism, and other kitchen-related activities. This 4-credit course will include a weekly 3-hour lab in which students will perform experiments that allow them to prepare dishes that illustrate key chemical concepts. As part of the course, students will collaborate with the Trenton Area Soup Kitchen to prepare and serve food to the community, as well as share their understanding about the chemical properties that are involved in the development of various dishes. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): CHE 114L.

CHE 114L Chemistry in the Kitchen Lab 0 Credits

This is the laboratory portion of CHE 114.

Corequisite(s): CHE 114.

CHE 115 Chemistry & Society 3 Credits

Designed to give the nonscientist an appreciation of the role of chemistry in today's world. The approach is conceptual rather than mathematical. Topics include basic principles of chemical theory, energy sources, elementary organic chemistry, drugs, food additives, polymers, chemistry of living systems, inorganic solids in modern technology, and problems involving pollution of the environment. Three hours of lecture per week. This course satisfies the core requirements for education and business majors.

CHE 118 Exploration of Chemical Principles 4 Credits

A one-semester introduction to the principles of chemical sciences. Students will utilize inquiry-based learning methods to examine contextual problems as a means to explore introductory models and concepts of chemistry. Students will also gain an understanding of how scientific models are used to explain experimental observations. The laboratory component of this course is designed to provide students with an experimental context within which to develop some of the models described in the classroom. Three hours of lecture and one three-hour lab per week.

CHE 118L Exploration of Chemical Principles Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 118.

CHE 120 Principles of Chemistry 3 Credits

For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.

Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits

For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits

A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.

Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits

Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.

Corequisite(s): CHE 122.

CHE 211 Organic Chemistry I 4 Credits

The structure, chemical properties, and methods of preparation of the more important classes of carbon compounds are studied, with an emphasis on the relationship of structure, stereochemistry, and conformation to chemical reactivity. The preparation and reactivity of organic functional groups is introduced. The use of infrared and nuclear magnetic resonance spectroscopy, and mass spectrometry for elucidating structures of organic molecules is discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 120, CHE 121.

Corequisite(s): CHE 211L.

CHE 211L Organic Chemistry I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 211.

CHE 214 Organic Chemistry II 4 Credits

A continuation of Chemistry 211, emphasizing the mechanism of organic reactions, structural interpretations of properties, preparations, reactivity and identification of organic compounds. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 211.

Corequisite(s): CHE 214L.

CHE 214L Organic Chemistry II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 214.

CHE 225 Introduction to Organic and Biochemistry 4 Credits

An introductory course describing the basic principles of organic chemistry and biochemistry as they relate to human metabolism and disease. The nature of the chemical structure and reactivity of organic functional groups such as alcohols, aldehydes, ketones, carboxylic acids and amines will be presented with biological processes in mind. The biochemistry of the macromolecules DNA, RNA, proteins, carbohydrates and lipids will be discussed leading in to a discussion of some of the more important metabolic pathways. This course is intended for science majors who do not take the full two semester sequence of organic chemistry and two semesters of biochemistry and desire a background in biochemistry. Non-science major students who have had one semester of general chemistry and one semester of biology may also enroll in the course. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 110 or CHE 122, CHE 123; BIO 115.

Corequisite(s): CHE 225L.

CHE 225L Introduction to Organic and Biochemistry Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): CHE 110 or CHE 122, CHE 123; BIO 115

Corequisite(s): CHE 225.

CHE 250 Quantitative Analysis and Statistics Methods 4 Credits

This course will provide a deeper exploration of topics in chemistry that are steeped in numerical analysis. These topics include advanced analysis of equilibrium systems, acid-base systems and electrochemical systems. Additional detail will be given to methods of chemical measurement, statistical methods of data analysis and determination of data validity and reliability. Both lecture and laboratory will show an emphasis on using computer-based tools to analyze experimental data. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 122 & CHE 123

Corequisite(s): CHE 250L.

CHE 250L Quantitative Analysis and Statistical Methods Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 250.

CHE 305 Physical Chemistry I 3 Credits

The mathematic and conceptual foundations of physical chemistry will be introduced with an over-arching theme of determination of energy allocation within atomic and molecular systems. Topics will include determination and measurement of energy states in atoms and molecules, simple quantum mechanical systems, distribution of energies and the connection to thermodynamic quantities, the three laws of thermodynamics, spontaneity, equilibrium and experimental kinetics.

Prerequisite(s): CHE 122, CHE 214, MTH 211, PHY 201.

CHE 306 Physical Chemistry II 3 Credits

Physical chemistry concepts are explored in more detail with emphasis on examination of systems that require multiple models in physical chemistry to explain. Topics will include, kinetic theory and transition state theory, statistical mechanics and its connections to thermodynamic functions, temperature dependence of spontaneity and equilibrium, the thermodynamics of condensed phases and multi-component equilibria, electrochemistry, multi-electron quantum mechanical systems, approximations in quantum mechanics, symmetry and advanced molecular spectroscopy.

Prerequisite(s): CHE 305, MTH 212.

CHE 315 Inorganic Chemistry 3 Credits

The periodic table as a tool for predicting the physical and chemical properties of chemical systems is developed and examined in conjunction with various theories of bonding, including valence bond, molecular orbital, valence shell electron repulsion, and ligand field theory. Emphasizes structure of crystalline solids, coordination compounds, reaction mechanisms, and structure-property relationships. Three hours of lecture per week.

Prerequisite(s): CHE 122, CHE 214.

CHE 316 Inorganic Chemistry Laboratory 1 Credits

Students will explore a variety of synthetic methodologies for the growth of inorganic molecular systems, and solid-state materials. A transition metal or main group metal plays a central structural role in all systems that will be examined. Modern analytical methods will be applied to characterize synthesis products, such as FT-IR spectroscopy, polarimetry, NMR, and powder X-ray diffraction analysis. **Prerequisite(s):** CHE 123, CHE 214.

Corequisite: CHE 315.

CHE 320 Polymer Chemistry 3 Credits

Designed to acquaint students with the structure and properties of polymers, the contrast between small molecules and polymers, methods of measuring molecular weight, the mechanism of polymerization, and the methods of fabricating polymers.

Prerequisite(s): CHE 214, CHE 305 or CHE 306.

CHE 325 Physical Chemistry Laboratory 1 Credits

Measurements are made of physical properties of molecules and chemical dynamical processes. These measurements will be used to develop models which explain the physical chemical nature of the systems under examination. Experiments will utilize various instrumental techniques such as infrared spectrometry, nuclear magnetic resonance, fluorescence and UV/Vis spectrometry. One three-hour lab per week.

Prerequisite(s): CHE 250, CHE 305.

CHE 330 Instrumental Analysis Laboratory 2 Credits

This course is designed to give students practical experience using modern analytical instrumentation and to provide students with the background theory and principles of operation. The instrumental methods introduced in this course include: ultraviolet and visible spectroscopy, atomic emission spectroscopy, gas chromatography (GC), high performance liquid chromatography (HPLC), X-ray powder diffraction analysis and electrochemical analysis. This experimental laboratory course meets two times per week with three hours for each session. One session will be focused on instrumentation background theory and discussion and the other session will be experimental practice.

Prerequisite(s): CHE 214, CHE 250, PHY 201.

CHE 340 Environmental Chemistry 3 Credits

This course is an advanced quantitative and qualitative study of the sources of environmental pollutants, their chemical reactions and mechanism of formation, their fate in the environment, and ultimately their impact on environmental systems and services including ozone cycling, ozone hole formation, smog formation, heavy metals in drinking water, energy, and global climate change. This course will review scientific literature to identify advances in science and technology to combat these environmental problems. The course is aimed principally at chemistry majors, but other science majors that desire a chemical understanding of the environment and meet the course prerequisites are welcome. This course satisfies the global perspectives (GP) requirement at Rider University. Recommended courses include MTH 210 and CHE 250.

Prerequisite(s): (CHE 211 and 211L) or (BCH 225 and 225L) or (CHE 225 and CHE 225L) and MTH 105 or higher.

CHE 350 Advanced Organic Synthesis 2 Credits

The first of four experimental chemistry labs designed for chemistry majors. It presents the use of modern techniques, and instrumentation in organic chemistry, including distillation, chromatography, infrared, ultraviolet, nuclear magnetic spectroscopy, and mass spectrometry. Two three-hour labs per week.

Prerequisite(s): CHE 214.

CHE 375 Computational Chemistry Lab 2 Credits

This course will provide students with a means to explore various methods in computational chemistry. Basic computational methods will be developed from first principles and these methods will then be tested using various modeling and computational software packages. Methods will include, but are not limited to, molecular mechanics, semi-empirical molecular orbital calculations, ab initio methods, and density functional calculations. Students will be exposed to various computational software packages and the strengths and limitations of each methodology will be explored. The course will meet in a computer laboratory for two for three-hour lab periods a week.

Prerequisite(s): CHE 305.

CHE 400 Chemical Bonding 3 Credits

The effects of the chemical bond on the structure and properties of molecules are investigated. Molecular orbital theories of bonding are introduced. Emphasis is placed on group theoretical methods utilizing molecular symmetry to simplify the description of the electronic structure of molecules and to predict their geometric structures and reactivity. Three hours of lecture per week.

Prerequisite(s): CHE 305, MTH 212.

CHE 415 Special Topics in Chemistry 3 Credits

An advanced level of one or more areas of modern chemistry. Emphasis on research and the literature of an area of current importance. Three hours of lecture per week.

CHE 420 Physical Organic Chemistry 4 Credits

In-depth studies of the methods for elucidating mechanisms of organic reactions for students who have completed one year of organic chemistry and physical chemistry. Topics include conformational analysis, linear free energy relationships, frontier molecular orbital theory, transition state theory, and chemical reaction kinetics. Isotopic scrambling, kinetic isotope effects, NMR and IR spectroscopy, polarimetry, and ultraviolet-visible spectrophotometry will be employed to investigate these concepts. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): CHE 214, CHE 305.

Corequisite(s): CHE 214L.

CHE 420L Physical Organic Chemistry Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 420.

CHE 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

CHE 491 Internship in Chemistry 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in a private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the students' overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Chinese (CHI)

Courses and Descriptions

CHI 100 Chinese I 3 Credits

This course is designed to foster mastery of the basic skills of Mandarin Chinese: speaking, listening, reading, and writing. The focus of the course is on communicative competency and accuracy. Together with Chinese 101, the course provides a thorough foundation in basic Chinese grammar. Students will have opportunities to work extensively with audio and/or video resources/ materials and other technology, and above all, students from China. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): placement test if Chinese has been studied elsewhere.

CHI 101 Chinese II 3 Credits

A continuation of Chinese 100. This course continues to foster mastery of the basic skills of Mandarin Chinese: speaking, listening, reading and writing. The focus of the course is on communicative competency and accuracy. Together with Chinese 100, the course provides a thorough foundation in basic Chinese grammar. Students will have opportunities to work extensively with audio and/or video resources/ materials and other technology and above all, students from China. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): Chinese 100 or placement test.

CHI 150 Chinese Culture and Basic Language 3 Credits

This course integrates beginning-level functional Mandarin Chinese language skills acquisition with the knowledge of Chinese business practices and culture as well as hands-on information and strategies for successful inter-cultural encounters. Students gain practical basic language skills through classroom practice and the use of audio/video and computer materials. Readings, films, documentaries, and lectures in English by members of the business community enable students to integrate language acquisition with practical cultural knowledge and cross-cultural awareness. Examination of Chinese customs highlights social relationships and cultural practices. No knowledge of Chinese language is required. This course does not fulfill the CLAS foreign language requirement.

CHI 200 Chinese III 3 Credits

This course is designed to foster mastery of the intermediate skills of Mandarin Chinese: speaking, listening, reading, and writing. The focus of the course is on communicative competency and accuracy. Together with Chinese 201, the course provides intermediate-level Chinese grammar, vocabulary, and cultural knowledge through the use of film clips, simple newspaper articles, the Internet, and other multimedia resources. Students are required to work extensively with audio and/or video resources/ materials and other technology and they have a unique opportunity to work with students from China. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CHI 101 or placement test.

CHI 201 Chinese IV 3 Credits

This course is designed to foster mastery of the intermediate skills of Mandarin Chinese: speaking, listening, reading, and writing. The focus is on communicative competency and accuracy. Together with Chinese 200, the course provides intermediate-level Chinese grammar, vocabulary, and cultural knowledge through the use of film clips, simple newspaper articles, the Internet, and other multimedia resources. Students are required to work extensively with audio and/or video resources/ materials and other technology and they have a unique opportunity to work with students from China. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CHI 200 or placement test.

CHI 300 Advanced Chinese Reading and Composition 3 Credits

This course develops Chinese reading and writing skills within a cultural context and aided by a systematic review and expansion of grammar and vocabulary. Using literary, journalistic, business and other sources, students learn various writing discourses and their Chinese variants including narration, description, exposition, and journalistic, business documentation and letter writing. Some translation is used to encourage linguistic analysis. Interviews with native speakers, Chinese Americans, and working with students from China enhance the cultural understanding of students necessary for meaningful reading and writing.

Prerequisite(s): CHI 201 or placement test.

CHI 307 Images of Women in Chinese Literature and Film 3 Credits

This course will introduce students to the (change of) status of women in China through literature and film. Students will explore the rich Chinese literary traditions and examine how the images of women are represented by both male and female writers/directors in fiction and film of different historical periods. In the process of such exploration and examination, students will also examine how the literary movements and their historical, social, cultural and political contexts shape, and are shaped by, each other. They will learn to understand how diverse the experiences of Chinese women are. While students will be exposed to both classic and modern/contemporary literary traditions, the focus will be on the latter, such as May 4th New Culture Movement, Maoist revolutionary literature, (Post-Mao) Wound/Scar Literature, Root-Searching Literature, etc. Classes are in English.

CHI 310 Chinese Culture and Civilization 3 Credits

This course introduces students to Chinese Civilization and Culture. Through reading, viewing, discussion, and presentation, students will have a chance to “experience” Chinese cultural riches and “interact with” its long history, religions, philosophies, literature and art, politics, as well as its different peoples and diverse customs. We will learn about China’s ancient dynasties and its cultural and aesthetic achievements in the past, and its modern revolutions, nationalism, communism, and post-Mao economic and political reforms today. We will also explore Chinese customs, particularly festivals, and try to gain an appreciation of different social relationships and diverse cultural practices. No knowledge of Chinese required. This course offers an optional TRIP TO CHINA during Spring Break or in May WHICH WILL EARN 3 ENGAGED LEARNING POINTS. Interested students must register for the travel course separately from taking CHI 310.

CHI 311 Calligraphy As a Window to Chinese Language and Culture 3 Credits

This course provides students with a chance to gain an intimate knowledge of Chinese language and culture through calligraphy. Students will learn the basic principles and techniques of writing Chinese characters with the writing brush. They will be introduced to the pronunciation, the composition and evolution of Chinese characters so that they will be able to read and understand what they write. Students will also learn how calligraphy is immersed in various aspects of Chinese culture. The main content of the course derives from examining applications of calligraphy to poetry, painting, and core concepts of Confucianism, Daoism and Buddhism. They will have a chance to cross time and space, having dialogues with Confucius, experiencing Buddhist bliss of final “awakening” or “enlightenment” and abandoning themselves to the Daoist spontaneous flow with the movement of Nature and the cosmos. No knowledge of Chinese language is required.

CHI 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

College Reading (CRC)**Courses and Descriptions****CRC 100 College Reading 3 Credits**

This elective course helps students develop greater skill and efficiency in meeting the demands of college reading. Primary emphasis is placed upon introducing, demonstrating, and practicing appropriate study strategies that will enhance overall academic performance. Instruction focuses on reading college textbooks more efficiently and effectively, improving comprehension and retention, and reading critically. Time management, note-taking skills, and other study strategies are introduced, demonstrated, and practiced. Reading and writing assignments complement and reinforce class instruction. Student placement based on HS GPA.

College of Business Administration (CBA)**Courses and Descriptions****CBA 102 Career Plan & Perspective I 1 Credits**

In this course students will explore their own history, goals and values as input to their definition of success. The course will set the stage for the remainder of students’ college career, and will encourage them to draw connections among their career goals, educational performance, extra-curricular experiences, and available resources.

CBA 110 Business in Action 3 Credits

This course will provide students with the opportunity to develop a foundational understanding of the business environment and various business functions. Students will be introduced to core concepts in accounting, e-business, finance, human resource management, information technology, macroeconomics, management, marketing, and production and operations management. In addition, the student will have ample opportunity to improve his/her communication and teamwork skills, as well as further develop problem-solving, analytical, and decision-making abilities through a Business in Action project.

CBA 202 Career Plan & Perspect II 1 Credits

In this course, students will build on their CBA 102 self assessments to identify specific occupations that match who they are and where they want to go. The course will provide students with the understanding of the changed nature of the current work and career environment they will be entering when they graduate from Rider. They will acquire career management skills and apply these skills to develop short and long term career goals and plans for achieving them while at Rider. The course will also touch on the intersection of work and family roles.

Prerequisite(s): CBA 102.

CBA 212 Business Communications 3 Credits

Good communication is a vital skill in any environment where interpersonal interaction occurs. Communication skills do not, however, come naturally to everyone. This course introduces students to skills, practices, and strategies that will help them effectively communicate in the workplace and highlights the value of carefully documenting interactions between client and vendor. Students will engage in developmental activities intended to help them learn key aspects of communication, including, but not limited to: different formats of business writing (e.g., executive summaries, client and corporate correspondence, email messages, memos, reports, etc.); visual aids and presentations; active listening; small group facilitation; professional presence; and establishing credibility. Deliverables will include written documents and oral presentations, both individually and in teams. These skills cut across all disciplines and are qualitative tools that enhance overall career development.

Prerequisite(s): CMP 120 or BHP 100, and CMP 125 or BHP 150, and CBA 110 or CBA 110 with a score of WV.

CBA 236 Career Planning 3 Credits

How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this course. The meaning of work and the development of careers are discussed, and careers are examined in the context of important changes occurring today in the world of work. Students undertake self-assessments, learn career search strategies and resources, and enhance resume and interviewing skills to maximize their career preparation.

CBA 302 Career Plan & Perspect III 1 Credits

This one credit course will be targeted to second semester sophomores and juniors. In this course, students will build on their CBA 102 and 202 self assessments to develop strategies for a successful job search. The course will provide students with an understanding of the changed nature of the current work and career environment they will be entering when they graduate from Rider. They will acquire career management and job search skills and apply these skills to developing, networks, identify job search resources and enhance resume and interview skills. Students will understand how to research potential employers and translate their experiences into a successful job search strategy.

Prerequisite(s): CBA 102 and CBA 202.

CBA 310 Global Business Studies-Paris 12-18 Credits

A regular course load in an approved program at the Institut de Gestion Sociale Universite/American Business School in Paris, France. Courses will be selected from a list pre-approved by the global business program at Rider. All business courses are taught in English. Two of the regular courses for all students in the program will be French language and civilization courses.

Prerequisite(s): 2.5 GPA; junior standing; permission of global business program director and CBA dean.

CBA 311 Global Business Studies-Paris 12-18 Credits

A regular course load in an approved program at the Institut de Gestion Sociale Universite/American Business School in Paris, France. Courses will be selected from a list pre-approved by the global business program at Rider. All business courses are taught in English. Two of the regular courses for all students in the program will be French language and civilization courses.

Prerequisite(s): 2.5 GPA; junior standing; permission of global business program director and CBA dean.

CBA 312 Global Business Studies-Paris 12-18 Credits

A regular course load in an approved program. See director of global business major for details of any programs being offered abroad.

Prerequisite(s): 2.5 GPA; junior standing; permission of global business program director and CBA dean.

CBA 313 Global Business Studies-Paris 12-18 Credits

A regular course load in an approved program. See director of global business major for details of any programs being offered abroad.

Prerequisite(s): 2.5 GPA; junior standing; permission of global business program director and CBA dean.

CBA 315 International Business Tour 3 Credits

Provides students with the opportunity to observe various international business environments outside of the United States. Students should gain a better appreciation of how culture, history, and politics influence organizational dynamics, business functions, and business customs.

Prerequisite(s): Junior or senior standing and permission of instructor.

CBA 316 Nature's Business 3 Credits

This interdisciplinary business-science course examines the relationship between economic, legal, biological, and environmental concerns and analyzes how a particular country attempts to preserve its biological diversity without sacrificing its economic development. Topics include ecotourism and the biodiversity, geology, cultural norms, and legal and political systems of the country. The study tour component of the course provides students with an opportunity to observe various international business and scientific environments outside of the United States.

Prerequisite(s): Permission of instructor.

CBA 317 Emerging Nations Study Tour 3 Credits

Through readings, lectures, student-led discussions, guest speakers, and a short-term study abroad experience, students become familiar with the culture, history, religion, and political structure of an emerging country or region. This includes an overview of economic conditions and business practices, insights on doing business with the country or region, and the importance of the country or region in the global economy.

Prerequisite(s): junior or senior standing and permission of instructor.

CBA 320 Case Analysis & Presentation 3 Credits

This case analysis and presentation course provides the student with an opportunity to analyze real-world business opportunities or problems, to develop the ability to analyze a company and to then develop and present a set of recommendations. Students work in teams and present their analysis and recommendations to a panel of executives.

Prerequisite(s): No Freshmen.

CBA 366 Selected Topics in Business 3 Credits

The study of a topic (or combination of topics) that represent some dimension of business or has important implications for business. This study may be theoretical and/or applied in nature.

Prerequisite(s): Permission of instructor.

CBA 367 Selected Topics in Business 3 Credits

The study of a topic (or combination of topics) that represent some dimension of business or has important implications for business. This study may be theoretical and/or applied in nature.

Prerequisite(s): Permission of instructor.

CBA 368 Selected Topics in Business 3 Credits

The study of a topic (or combination of topics) that represent some dimension of business or has important implications for business. This study may be theoretical and/or applied in nature.

Prerequisite(s): Permission of instructor.

CBA 369 Selected Topics in Business 3 Credits

The study of a topic (or combination of topics) that represent some dimension of business or has important implications for business. This study may be theoretical and/or applied in nature.

Prerequisite(s): Permission of instructor.

CBA 399 CBA Co-Op 6 Credits

The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Eligible students include junior and senior business students with a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in the major. Co-op credits can be applied toward business or free elective requirements. Grading is on a pass/fail basis.

Prerequisite(s): All 200 level business core and non business core courses, BUS 300, and FIN 300.

CBA 410 Intercultural Communic Sem I 2 Credits

The seminar provides non-U.S. native students with a supportive forum for discussing intercultural and communication challenges. The course seeks to make the Rider experience personal and academically fulfilling and successful. The specific course objectives include providing information about culture transitions and differences, providing cultural information and enhanced communication skills, reflecting upon and analyzing culture communication differences inside and outside of the classroom, and building study cases to help future international students with their transition and adaptation to U.S. life. Pass/fail.

Prerequisite(s): Permission of instructor.

CBA 411 Intercultural Communic Sem II 1 Credits

The seminar provides non-U.S. native students with a supportive forum for discussing intercultural and communication challenges. The course seeks to make the Rider experience personal and academically fulfilling and successful. The specific course objectives include providing information about culture transitions and differences, providing cultural information and enhanced communication skills, reflecting upon and analyzing culture communication differences inside and outside of the classroom, and building study cases to help future international students with their transition and adaptation to U.S. life. Pass/fail.

Prerequisite(s): Permission of instructor.

CBA 490 Independent Research and Study 1-4 Credits**CBA 491 College of Business Internship 1-4 Credits**

Provides students an opportunity to supplement and apply classroom work in supervised employment with participating businesses, government offices or not-for-profit organizations. Requirements are to be determined by the faculty sponsor prior to the period of the internship and must include an academic component, preferably a written paper of project. There must also be a final evaluation from the organization on the intern's performance.

Prerequisite(s): Permission of instructor.

Communication-UG (COM)

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits

Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits

As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits

Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits

This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment – and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits

In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits

Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits

Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits

Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits

Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.

Prerequisite(s): COM 104 or COM 290.

COM 205 Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits

Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.

Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits

Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.

Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits

Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits

Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits

Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits

Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements. **Prerequisite(s):** COM 104 or COM 290.

COM 232 Podcasting I 3 Credits

Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits

Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits

Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits

Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/ reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits

The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 247 Covering the Sports Betting Industry 3 Credits

This course will introduce students to the world of covering the sports betting landscape via traditional sports media. Emphasis will be placed on learning the jargon of sports betting, learning how to break down financial reports from both states and gambling operators, how to cover legislative action on the subject. In short: Covering the world of sports betting is quickly becoming akin to covering the world of financial markets, and students wishing to pursue a career in sports media will have to know how to navigate this world going forward.

Prerequisite(s): COM 104 or COM 290.

COM 251 Interpersonal Communication 3 Credits

Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application.

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits

Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

Prerequisite(s): COM 261 or permission of instructor.

COM 263 History and Principles of Graphic Design 3 Credits

Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits

Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits

Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.

Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 292 Content for Social Media 3 Credits

Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 312 Special Topics in Journalistic Writing 3 Credits

Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.

Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits

Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources.

Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.

Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits

Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.

Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GND 318. Students may not get credit for both COM 318 and GND 318.

COM 321 Stand Up Comedy 3 Credits

Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.

Prerequisite(s): COM 104: Speech Communication or COM 290: Professional and Strategic Speech.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits

Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits

Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.

Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits

This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits

Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.

Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. Prereq(s): COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits

In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.

Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits

Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): COM 232, COM 233, COM 234.

COM 337 Music Production for Mass Media 3 Credits

Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.

Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits

Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits

Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.

Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 348 Communication Research Methods 3 Credits

Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.

Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator.

COM 353 Nonverbal Communication 3 Credits

Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 355 Social Justice and Journalism 3 Credits

The best of American journalism is rooted in exploring issues of social justice and shining a spotlight on abuse. In this course, students will learn about the role journalism has played to expose social injustice in America by exploring powerful investigations by the mass media and also press organizations employing and representing non-white and marginalized groups. Students will examine both historical and contemporary journalism examples. The course also will include critical assessment of journalism's failings, including an exploration of the discrimination and disenfranchisement historically perpetuated by media.

COM 360 Advanced Publication Design and Presentation 3 Credits

Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.

Prerequisite(s): COM 212.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits

Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits

Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.

Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits

Offers students education in graphic animation theories, animation development techniques, and animation preparation for various multimedia applications. Emphasis is placed on the design principles in animated communication and animation techniques. The course covers the integration of static images in animation, graphic animation techniques, animation compression, animation rendering, input/output file formats, and animation delivery. The primary software for this course is Adobe Photoshop and MacMedia Flash. Students will be expected to participate in critiques of professional animation designs in order to learn to evaluate critically their own work and their fellow students' work.

Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits

Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.

Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits

Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.

Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits

Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media.

COM 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. **Prerequisite(s):** junior standing and 2.75 GPA at the time of registration; Pass/fail.

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits

Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.

Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits

A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.

Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits

This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits

Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits

Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.

Prerequisite(s): COM 234.

COM 440 Cases & Campaigns in Public Relations 3 Credits

Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations.

Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.

Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits

Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

COM 460 Web Design III 3 Credits

Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.

Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits

Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation. Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.

Prerequisite(s): ART 103, ART 105, COM 262, and COM 360.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Computer Information Systems (CIS)

Courses and Descriptions

CIS 185 Information Systems Essentials 3 Credits

This course will provide students with a conceptual understanding and hands-on practice developing spreadsheets, creating effective visualizations, and utilizing relational databases. Students will also be expected to complete a project related to a current technology-related topic. At the completion of this course students will be able to apply the appropriate information systems technology tools (specifically spreadsheets, visualization applications, and relational databases) to a variety of problem solving activities.

CIS 200 Application Development with JavaScript 3 Credits

In the early 1990s, Tim Berners-Lee created a set of technologies to allow information sharing at the CERN particle accelerator in Europe. These technologies dramatically changed the face of computing and became what we know today as the Web. Understanding how to develop and manage applications for the Web is a requirement for the information system professional. Because of the ease of development, deployment, maintenance and general scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using HTML and CCS, how to control user interaction with those pages using the JavaScript programming language. The programming basics of variable declaration and usage, program flow of control, function declaration and calling, and object usage and declaration will also be shown. The use of the JQuery Javascript library to ease the development of Web pages will also be shown.

CIS 220 Application Development with JavaScript and Python 3 Credits

In the early 1990s, a set of network technologies was combined to create a platform for application development. These technologies are now referred to as the Web. Because of the ease of development, deployment, maintenance, and scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. Understanding how to develop and manage applications for the Web is vital for information systems professionals. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using the Hypertext Markup Language (HTML) and Cascading Style Sheets (CSS), and managing user interaction in those pages using the JavaScript programming language. The process of creating dynamic web pages using the PHP programming language on the Web server will also be taught.

Prerequisite(s): CIS 200.

CIS 240 Cloud Computing Infrastructure 3 Credits

Cloud computing represents a form of utilizing hardware resources in a way which allows a business to be more responsive to a changing environment. Computer networks are a critical component of cloud computing. This class will cover the components of a computer network, the process of configuring networks, and the creation and provisioning a cloud computing environment. Students will also learn the process of computer operating system installation, configuration and maintenance. Virtualization, the process of creating multiple operating system environments on a single piece of hardware will also be covered using both the Windows and Linux operating systems.

Prerequisite(s): CIS 185.

CIS 255 Intro to Game Design & Development 3 Credits

The basic concepts, logic, techniques, tools, and vocabulary associated with interactive, digital game and simulation development will be explored through a combination of lectures, discussions, and hands-on learning. Knowledge and skills derived can be applied to a wide variety of business and other organizational settings globally for interactive simulations, games, and education.

CIS 260 Business Graphics 3 Credits

Basic color theory, typography, and page/slide layout are presented. Students utilize presentation, word processing and photo editing applications to create and edit various documents through hands-on labs and projects.

Prerequisite(s): CIS 185 or permission of instructor.

CIS 270 Computer Networking 3 Credits

This course provides an introduction to business data communications and networking. The Internet and OSI models are discussed. Network technologies include local area networks, backbone, wide area networks, and the Internet. Introduction to network design, security, and network management are also provided.

Prerequisite(s): CIS 185.

CIS 300 Programming with Java 3 Credits

Students will learn the basic concepts of object-oriented programming as contrasted with traditionally structured programming and will develop applications using the Java programming language.

Prerequisite(s): CIS 200.

CIS 309 Data Structures & Cmptr Archit 3 Credits

An introduction to linked lists, stacks, queues, trees, pointers, and sorting and searching algorithms. Students will learn the technical details of data storage and manipulation along with the concepts of program execution, and will use tools such as hex-editors and debuggers.

Prerequisite(s): CIS 185 or permission of instructor.

CIS 315 Integrated Business with SAP 3 Credits

This course provides an introduction to enterprise resource planning (ERP) systems and addresses how integrated information systems improve business operations. Students will learn about functional business areas and business processes, and understand the problems inherent in un-integrated enterprise information systems. Using SAP software and case studies, students will learn how ERP systems are being used to facilitate integrated, real-time management decision making.

Prerequisite(s): CIS 185 and ACC 210.

CIS 319 Computer Forensics 3 Credits

Students will use computers to obtain and analyze evidence found on storage devices such as those confiscated under warrant, and learn how to trace digital activities. Criminal and investigative procedures will be explored in depth.

Prerequisite(s): CIS 185.

CIS 320 Cloud Computing Administration 3 Credits

Students will learn the process of creating or provisioning a cloud computing environment. Content will include the provisioning of operating system resources in a cloud environment, operating system installation, configuration and maintenance. Virtualization, the process of creating multiple operating system environments on a single piece of hardware will be covered in some detail. Troubleshooting problems in the virtualization environment and in the operating system environment will also be covered. Hands-on labs will be used throughout. Both Windows and Linux operating systems will be used.

Prerequisites: CIS 185.

CIS 325 User Experience Design 3 Credits

This course focuses on the critical role user experience plays in today's technology-driven business world. While technology advances make the design of functionality more readily in interactive products, usability plays a critical role in determining their success in the real world. Increasingly, business leaders realize the need to consider the emotional and social experiences as well as functional requirements and the steps users take to complete a task. This course explores User Experience Design (UXD), and its strategic importance in creating competitive advantage. Students will be able to discover, define, develop, and deliver a complete user experience. They will understand the role of usability and design principles, build innovative and pleasurable user experience prototypes, and validate them to achieve human, social, and business goals.

CIS 330 Database Systems 3 Credits

This course involves the study of computer databases. Major topics include relational databases, use of the structured query language (SQL) to query relational databases, and design and maintenance of relational databases.

Prerequisite(s): CIS 185.

CIS 340 Electronic Commerce 3 Credits

Students will learn about the most current e-commerce technologies and business models through readings, case studies, and hands-on projects. Students will gain experience using business data analytics tools to understand and evaluate the value of data that is generated and collected from various e-commerce platforms on the Internet.

CIS 345 Enterprise Security 3 Credits

This course introduces students to cybersecurity, the process of securing computers and the information they store. Coverage includes security attacks and attack prevention and mediation, security firewalls, PC and server security, authentication methods and procedures, and network security. Through lecture and hands-on labs students will learn how computer systems can be attacked and how computer professionals can manage the risks and potential damage from these attacks.

CIS 350 Practical Business Analytics with Excel 3 Credits

This is a required course for the Business Analytics major/minor. This course will provide the student with an opportunity to gain proficiency in analyzing and visualizing data using Excel. The learning experience includes not only classic data tools, such as PivotTables, VLOOKUP, and data visualization, but also more advanced data tools such as descriptive statistics, inferential statistics, predictive analytics, and optimization using Excel Solver.

Prerequisite(s): BDA 201.

CIS 360 Data Mining 3 Credits

This course deals with modern technologies for data analysis. Hands-on exercises for data retrieval, data visualization and predictive analytics will be carried out using up-to-date methodologies and software tools. The full data mining life cycle will be covered from recognizing business problems and opportunities amenable to data mining analysis through deploying and monitoring solutions.

Prerequisite(s): CIS 185 with a minimum grade of D .

CIS 370 Systems Analysis and Design Project 3 Credits

Topics include modeling techniques and methodologies to address the planning, analysis, design, and implementation of high quality systems, delivered on time and within budget. Using rapid application development tools, students will also construct an operational system within the span of a single semester. Issues and tools related to the management of project teams are also discussed.

Prerequisite(s): CIS 330.

CIS 375 Business Process Design for a Global Economy 3 Credits

The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Various referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.

Prerequisite(s): junior standing.

CIS 377 Risk Management and Compliance for Information Security 3 Credits

This course will use a holistic approach to examine the management of information security risk in relation to the strategic goals of the business organization. Students taking this course will learn to identify threats, threat agents, potential exploits and the information assets which will be impacted by those exploits. The risk management process will specifically examine threat agents, and the amplifiers, catalysts, and inhibitors to those threats. Using a process which assigns a weight to various threats, and a comprehensive risk analysis model will be developed.

CIS 385 Management Information Systems 3 Credits

This course will enhance students' digital dexterity and familiarity with existing and emerging information technologies, emphasizing skills of abstraction in relation to digital strategy and organizational change, innovation, analytics, and ethics. This course will also provide hands-on experience with at least one essential business technology. At the completion of the course, students will have an understanding of the business-related, policy, societal, and ethical implications associated with modern information systems.

Prerequisite(s): CIS 185 and junior or senior standing.

CIS 388 Design Thinking 3 Credits

This undergraduate course on Design Thinking provides students with a framework for dealing with unstructured problems to create innovative business solutions. Students in this course will learn about the complex and iterative process of design thinking and its several phases, including problem finding, observation, visualization and sense making, ideation, prototyping and testing, and explore the value of design thinking for creating business solutions with lasting impact. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

Prerequisite(s): JR/SR, 54+ credits, or POI.

CIS 390 Project Management 3 Credits

This course introduces students to general project management, the process of organizing resources to achieve business goals. Topics include the identification, approval, analysis, and general management of complex business projects. Project management tools, reports, techniques, and approaches will be covered.

Prerequisite(s): CIS 185.

CIS 399 The Co-Operative Experience 6 Credits

The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their computer information systems and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Eligible students include junior computer information systems majors with a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in any computer information systems coursework completed prior to submission of the co-op application. Three of the co-op credits can be applied toward the computer information systems major, and three credits can be applied toward business or free elective requirements. Grading is on a pass/fail basis.

Prerequisite(s): Completion of two of the three courses: CIS 200, CIS 270, and CIS330.

CIS 410 Selected Topics in Information Systems 3 Credits

Information and communication technologies are evolving rapidly and continually. The Special Topics course facilitates the exploration of a selected topic (or combination of topics) that represents a recent technological advance with important and direct implications in the field of computer information systems. Current research, readings, lectures, discussions and/or hands-on computer experience or other appropriate measures will be employed to stimulate student learning.

Prerequisite(s): to be determined by instructor.

CIS 430 Enterprise Integration 3 Credits

The major focus of this course includes the forces driving enterprise integration as well as the management decisions associated with the design and implementation of enterprise systems. Students will use SAP ERP extensively to configure, build, test, and implement an enterprise system for a real business environment from the ground up.

Prerequisite(s): CIS 315.

CIS 490 Independent Study: Research and Creative Expression 1-4 Credits

Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

Prerequisite(s): permission of instructor.

CIS 491 Computer Information Systems Internship 3 Credits

This is an honors course that provides the student with approximately two months of supervised employment with participating companies. Students are given a variety of information technology experiences. They are required to complete a term paper and/or to make an oral presentation to the faculty. Grading is on a pass/fail basis.

Prerequisite(s): permission of instructor.

Computer Science (CSC)

Courses and Descriptions

CSC 105 Fundamentals of Computer Science 3 Credits

This course offers an introduction to fundamental areas of study in computer science - their applications, capabilities, and boundaries. Topics include computer organization, algorithms design and analysis, programming paradigms, software development process, operating systems responsibilities, applications, and communications. Hands-on python programming is also introduced in this course from a non-mathematical problem-solving point of view. Basic programming constructs include statements, expressions, variables, control structures, functions, and file operation.

CSC 110 Computer Science I 3 Credits

This course is an introduction to computer science and modern computing fundamentals. Students will develop programs and algorithms to solve a variety of problems posed in the natural sciences. Students will learn to code in Python, a widely adopted language, and learn the basics of algorithms, data types, program structure and development,

Prerequisite(s): MTH 105 or concurrent enrollment or MTH 210 or concurrent enrollment.

CSC 120 Computer Science II 3 Credits

This course is an introduction to developing algorithms using abstract data types and the object-oriented methodology. Students will design and implement robust ADTs using Java, an object-oriented programming language. Students will learn how to develop their own algorithms and the best techniques for analyzing their performance. Students will be able to adapt the course knowledge to real world, practical challenges.

Prerequisite(s): CSC 110.

CSC 130 Data Structures and Algorithms 3 Credits

This course is a study of data structures and the algorithms used to process them. Topics include stacks, queues, lists, trees, graphs, sorting and searching techniques, recursive algorithms, and efficiency considerations. This course will give students a comprehensive study in data structures and algorithms which are the building blocks in programming.

Prerequisite(s): CSC 120.

CSC 140 Discrete Structures 3 Credits

This course is an introduction to the ideas and techniques from discrete mathematics as widely applied to Computer Science. Topics include sets, numbers, algorithms, logic, combinatorics, recursion principles, graph theory, trees, and discrete probability.

Prerequisite(s): MTH 105 or concurrent enrollment or MTH 210 or concurrent enrollment.

CSC 150 Cyber Ethics and Societal Impact 3 Credits

This course will investigate the ethical and social challenges stemming from computing and telecommunication technology, as well as from mobile information-enabling devices. Topics include: cyber ethics, global and societal impact of the Internet, ethical analysis tools, ethical dimensions of computer system reliability, professional ethics, ethical frontiers in emerging technologies, privacy, security, intellectual property, cybercrime, and civil liberties in cyberspace. CSC 150 is a required course for CSC majors and minors. This course will be open to other math and science majors.

Prerequisite(s): CMP 120 or CMP 125 or BHP 100 or BHP 150 may be taken concurrently.

CSC 200 Introduction to Software Engineering 3 Credits

This course introduces software engineering ideas and concepts in the context of the software development life cycle. The course will discuss fundamental methodologies of software engineering, the Software Development Life Cycle (SDLC) and Unified Modeling Language (UML), which is a modeling language in the field of software engineering. It also concentrates on the five major phases of the SDLC: requirements engineering, requirements analysis, design, coding/implementation, and testing. Students will also learn about project management which is used for delivering high-quality software that satisfies customer needs and budgets. **Prerequisite(s):** Sophomore or Junior Standing

Prerequisite(s): CSC 120.

CSC 220 Computer Organization and Architecture 3 Credits

An introduction to the fundamental concepts of computer organization and architecture, this course explores how computer systems execute programs and manipulate data, working from the C programming language down to the microprocessor. Topics include: processor organization, Assembly and C programming languages, machine-level code, data representation, digital logic gates and Boolean algebra, computer arithmetic, code compilation, memory organization and management, interrupts, and performance evaluation and optimization. CS 220 is a required course for CS majors.

Prerequisite(s): CSC 130, CSC 140.

CSC 230 Probability for Computer Science 3 Credits

This course is an overview of probability theory and its application to computer science. Students will develop an understanding of combinatorics, variables, distributions, and parameter estimation. Applications to real world data and large datasets are also studied, with an introduction to machine learning.

Prerequisite(s): MTH 211 or concurrent enrollment.

CSC 240 Operating Systems 3 Credits

The course will study the basic concepts, design and implementation of operating systems. Topics to be covered include an overview of basic computing hardware components, operating system structures, process management, memory management, concurrency, resource allocation and scheduling, file systems, input/output systems, protection and security. CS 240 is a required course for CS majors.

Prerequisite(s): CSC 130.

CSC 250 Software Security Engineering 3 Credits

Secure software engineering focuses on both theoretical and practical perspectives in the development of software systems, exploring secure software design and development methods, software analysis, and reverse engineering. Emphasis is placed on security as part of the software engineering lifecycle, as well as on the correctness and robustness of code. CSC 250 is a required course for CS majors.

Prerequisite(s): CSC 200.

CSC 301 Software Requirements & Modeling 3 Credits

This course is intended to introduce students with the techniques for eliciting requirements. The course will consider the past, present and future standards and approaches in requirements engineering. This course will specifically focus on identifying and analyzing requirements for various types of systems: embedded systems, consumer systems, web-based systems, business systems, systems for scientists and other engineers. Prereq(s): CSC 200.

CSC 310 Theory of Computation 3 Credits

This course introduces a formal framework for investigating both the computability and complexity of problems. Theoretical foundations of computer science and formal models of computation are covered. Students study several models of computation including finite automata, regular expressions, formal languages, Chomsky language hierarchy, context-free grammars and Turing machines. Topics include undecidable problems, the halting problem and the P versus NP problem.

Prerequisite(s): CSC 130 and CSC 140.

CSC 320 Human-Computer Interaction 3 Credits

This course presents Human-Computer Interaction (HCI) as a discipline that is concerned with technical advance, and that must integrate different disciplinary perspectives. Foundational theoretical issues deal with principles of human perception, visual representation and purposeful action, discussed in the context of novel interactive technologies and computer-based systems. It examines issues in the design of system interfaces from a number of perspectives: user, programmer, and designer.

Prerequisite(s): CSC 130.

CSC 340 Cybersecurity Essentials 3 Credits

This course is an in-depth study of the theories and practices for prevention of cyber attacks. Countermeasures discussed include education, encryption, virtual private networks, policies, practices, access controls, secure systems development, software assurance, verification and validation, firewall architectures, anti-virus, patching practices, personnel security practices, and physical security practices. Topics also include incident response, forensic investigations, business continuity plans, disaster recovery plans, and critical infrastructure protection.

Prerequisite(s): CSC 150.

CSC 350 Analysis of Algorithms 3 Credits

This course investigates methods for analyzing and designing efficient and reliable algorithms, emphasizing methods useful in practice. It introduces several algorithm design strategies that build on data structures and programming techniques learned in the introductory computer science course sequence. Topic coverage includes induction, divide-and-conquer, dynamic programming, network flow, randomization, complexity theory, greedy algorithms, searching and sorting algorithms, cryptographic algorithms, graph theory, hashing, and advanced data structures. CSC 350 is a required course for CS majors.

Prerequisite(s): CSC 130 and CSC 140.

CSC 360 Concept of Artificial Intelligence 3 Credits

This course offers an introduction to the basic principles, techniques, and applications of Artificial Intelligence. Topics to be covered include agent design, advanced search algorithms and heuristics, knowledge representation, logic, inference, game theory, advanced planning, and learning. Prereq(s): CSC 130 and CSC 230.

CSC 380 Parallel and Distributed Systems 3 Credits

Widely deployed in scientific computing centers and commercial data centers, large-scale parallel and distributed systems (PDS) are crucial to scientific discovery, business success, national security, and technology innovation. This course examines the design and analysis of large scale computing systems for processor- and data-intensive applications with the focus on the technologies and factors that impact the performance, power, resilience, and scalability of modern parallel and distributed systems. Topics include the organization of multicore computers, parallel computer clusters, computing grids, supercomputers, client-server systems, and peer-to-peer systems; computer networks and network protocols; network security; multithreaded programming; and network programming.

Prerequisite(s): CSC 220 and (CSC 240 or CYB 200).

CSC 390 Software Design & Construction 3 Credits

This course introduces students to software design methodologies and also equips them with the knowledge and skills necessary to design large-scale software and to improve the quality of end products. Design techniques and methodologies for improving the productivity of software development and the quality of software are introduced. The course explores fundamental design concepts and notations with emphasis on Unified Modeling Languages (UML) and design patterns.

Prerequisite(s): CSC 200.

CSC 400 Introduction to Machine Learning 3 Credits

This course focuses on the fundamental concepts, theories, and algorithms for machine learning. The course briefly covers topics in supervised, unsupervised, reinforced, and deep learning including clustering, association, regression, neural network, support vector machines, Bayesian decision theory, decision trees, ensemble learning-the nearest neighbor algorithm and random forest.

Prerequisite(s): MTH 240 and CSC 360.

CSC 410 Data Science and Big Data Analytics 3 Credits

This course serves as an introduction to the interdisciplinary and emerging fields of data science and big data analytics. Students learn to combine tools and techniques from computer science, statistics, data visualization and the social sciences to solve problems using data. Central themes include: the data science and data analytics processes; advanced analytical theory and methods; tools for working with both big and small datasets, statistical modeling, and machine learning. Specific topics and tools include: data wrangling and munging, machine learning algorithms, statistical models, data visualization, NoSQL, Weka, RapidMiner, R, Python, Hadoop, and MapReduce.

Prerequisite(s): CSC 360.

CSC 420 Software Testing, Verification, and Validation 3 Credits

This course discusses the concept software quality assurance and source code review. This course will help students understand the testing concepts and how they can easily apply the concepts to any software testing situation. This course presents the concepts and techniques for testing software and assuring its quality. Concepts that are taught as part of this course are software testing at the unit, module, subsystem, and system levels, automatic and manual techniques for generating and validating test data, the testing process, static vs. dynamic analysis, functional testing, web application testing, and reliability assessments.

Prerequisite(s): CSC 200.

CSC 430 Software Quality Assurance 3 Credits

The course aims to teach the basics of quality management in software development projects. Students will learn the definitions of quality of software product and software process. Students will learn about software quality assurance, software metrics and models in quality management, internal quality and external quality.

Prerequisite(s): CSC 420.

CSC 470 Special Topics in Artificial Intelligence 3 Credits

This is an upper level undergraduate course that covers advanced topics in Artificial Intelligence. Topics vary from one offering to the other. Topics that may be discussed include: Artificial Intelligence/ Machine Learning for Cybersecurity, Computer Vision, Robotics and Automation, Game Theory, Planning and Acting in the real World, Deep Learning, Reinforcement Learning, Decision-making under uncertainty, Image Processing, and Natural Language for Communication.

Prerequisite(s): CSC 360.

CSC 490 Independent Research and Study 3 Credits

Immerses the student in guided research. The student learns to organize material, use the literature, obtain reproducible data, and synthesize the results of the study. If possible, the student will publish the results or present them at a scientific meeting. Available to Junior or Senior students or Sophomores with permission of the department chair.

CSC 491 Internship in Computer Science 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the student's overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester. Available for juniors and seniors.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Conducting (CR)

Courses and Descriptions

CR 109 Chapel Choir 1 Credits

Comprised of undergraduate students in their first year of study, Chapel Choir focuses on music for men's, women's, and mixed chorus. The ensemble provides the fundamentals of artistic choral ensemble singing and a foundation for all Westminster choral ensembles. Placement hearing required.

CR 209 Schola Cantorum 1 Credits

Comprised of undergraduate students in their second year of study, Schola Cantorum focuses on music for mixed chorus and continues to build and refine the skills developed in Chapel Choir. This ensemble presents campus, community, and regional performances. Placement hearing required.

CR 215 Fundamentals of Conducting 3 Credits

This course provides the foundation of conducting technique and philosophy as it relates to choral ensemble. Primarily, it deals with the development of basic pedagogical proficiencies, specifically alignment, Laban gestural vocabulary, breathing, beat patterns, consistent tempo, and the development of expressive gesture for relaying various styles of music, i.e., legato, staccato and marcato. Basic philosophical understandings concerning the human aspects of the music making process and the role the conductor plays in that process also are emphasized. Specific techniques for dealing with technical elements, e.g., fermata, dynamics, changes of tempo, contrasts in style, also are covered. The overall focus of the course is to establish the important relationship between ear, body, and the choral sound.

Prerequisite(s): TH 141.

CR 315 Techniques of Conducting 3 Credits

Continued development of conducting technique with emphasis on more complex styles and patterns, and on communication through appropriate gestures. Further improvement in conducting various dynamics and articulations, as well as more effective use of the left hand. Rehearsal procedures, repertoire programming, score preparation, and baton techniques are incorporated into the course.

Prerequisite(s): CR 215.

CR 490 Independent Study and Research 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

CR 509 Symphonic Choir 1 Credits

A large mixed chorus comprised of students above the lower division, including graduate students from all disciplines. The ensemble regularly performs in the region and focuses on the major choral/orchestral repertoire along with a wide variety of repertoire for large mixed chorus. Placement hearing required.

CR 511 Westminster Choir 1 Credits

A highly select ensemble that performs and records a wide variety of choral repertoire, the Westminster Choir regularly tours nationally and internationally, and aspires to the highest professional standards. Members are selected by audition from all Westminster students above the freshman level. The requirements for selection include good academic standing, strong musicianship, and superior vocal talent. Auditions are held in the fall semester and students participate for the academic year.

Cybersecurity (CYB)

Courses and Descriptions

CYB 105 Introduction to Cybersecurity 3 Credits

Introduction to Cybersecurity introduces students to this interdisciplinary field by exploring the technology, policies, and processes that enable assured computer operations. Students will be introduced to recent developments in cybercrime such as phishing, ransomware, viruses, and worms. Students will also learn about the policy and legislation regarding privacy, terrorism, hacktivism, and the dark web. Students will also be introduced to programming and networking concepts.

CYB 110 Cybercrime and Cyberterrorism 3 Credits

This course explores the world of cybercrime and cyber terrorism. Students will learn about the social and legal aspects of cybercrime and the technical tools that enable the investigation of these acts. They will discuss and review several definitions and types of cybercrime, and the roles of private sectors and law enforcement in detecting, investigating and preventing these acts.

CYB 130 IT Fundamentals 3 Credits

IT Fundamentals is designed to immerse students in the essentials of computer hardware and software. The IT Fundamentals course provides students with principles of data and technology that frame and define cybersecurity and insight into the importance of cybersecurity and the integral role of cybersecurity professionals. Students will explore foundational cybersecurity principles, security architecture, risk management, attacks, incidents, and emerging IT and IS technologies.

CYB 200 Operating Systems & Cybersecurity 3 Credits

This course focuses on the fundamental properties of three major operating systems (Linux, MacOS, and Windows). The course covers file systems, command line interfaces, and shell scripting. Students will learn how to manage user groups while focusing on security. They will also be introduced to SQL database architecture.

Prerequisite(s): CYB 130.

CYB 240 Ethical Hacking and Penetration Testing 3 Credits

This course introduces students to the methods of penetration testing and hacking as method of locating and successfully exploiting computer systems for the purpose of making computer systems more secure. This process includes probing for vulnerabilities as well as providing proof of concept attacks to demonstrate the vulnerabilities are real and generating specific and effective recommendations for addressing and fixing security issues discovered vulnerability assessments and penetration.

Prerequisite(s): (CYB 200 or CSC 240) and CIS 270.

CYB 260 Network Defenses and Countermeasures 3 Credits

This course in network defenses and countermeasures prepares students to defend networks against attacks by implementing proactive protection measures and by responding to active and potential threats. It covers multiple techniques for network defense, including firewalls, intrusion-detection systems, VPNs, encryption, and system hardening.

Prerequisite(s): CYB 240.

CYB 300 Developing & Deploying Cybersecurity Programs 3 Credits

In Developing and Deploying Cybersecurity Programs, students will learn how to create cybersecurity policies, standards, guidelines and plans, and the differences between them. Students will learn how threats develop, and how threat actors launch attacks on their targets. The material in this course conforms to the NIST Cybersecurity Framework and the ISO/IEC 27000-series standards.

Prerequisite(s): CIS 270.

CYB 320 Cyber Forensics 3 Credits

This course covers the technical and legal aspects of cyber forensics, including general forensic procedures, electronic discovery, imaging, hashing, file recovery, mismatched file types, and preserving the chain of evidence. Students will perform detailed cyber forensic analyses on compromised system images, using both open-source and court-approved digital forensic software tools to conduct forensic examinations, write analytical reports, and practice mock courtroom presentations.

Prerequisite(s): CYB 200.

CYB 490 Cybersecurity Independent Study and Research 3 Credits

Immerses the student in guided research. The student learns to organize material, use the literature, obtain reproducible data, and synthesize the results of the study. If possible, the student will publish the results or present them at a scientific meeting.

CYB 491 Internship in Cybersecurity 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 40 hours of internship per credit is required. The grade for the course will be determined by the student's overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester. Available for juniors and seniors.

Prerequisite(s): 2.5 GPA and Permission of Dept. Chair/Program Director.

Dance (DAN)

Courses and Descriptions

DAN 100 Fundamentals of Dance 1 Credits

Designed to offer students concurrent participation and theoretical inquiry in specific dance forms. Students must register for two classes per week at the Princeton Ballet School. One additional hour per week is comprised of video observation, lecture, or readings, and is taught at Rider's Lawrenceville campus. Prerequisite(s): permission of dance advisor; Dance Studio Courses Ballet I.

DAN 100A Ballet I 0 Credits

DAN 100B Ballet II 0 Credits

DAN 100C Ballet III 0 Credits

DAN 100D Ballet IV 0 Credits

DAN 100E Ballet V 0 Credits

DAN 100F Ballet VI 0 Credits

DAN 100G Jazz I 0 Credits

DAN 100H Jazz II 0 Credits

DAN 100I Jazz III 0 Credits

DAN 100J Modern Dance I 0 Credits

DAN 100K Modern Dance II 0 Credits

DAN 100L Modern Dance III 0 Credits

DAN 100M Spanish Dance I 0 Credits

DAN 100N Spanish Dance II 0 Credits

DAN 100O Spanish Dance III 0 Credits

DAN 100P Pilates Mat Class 0 Credits

DAN 100Q Accelerated Adult Ballet I 0 Credits

DAN 100R Accelerated Adult Ballet II 0 Credits

DAN 100S Accelerated Adult Ballet III 0 Credits

DAN 100T Accelerated Adult Ballet IV 0 Credits

DAN 100U World Dance Forms 0 Credits

DAN 100V Yoga 0 Credits

DAN 100W Tap 0 Credits

DAN 100X Ballet VII 0 Credits

DAN 100Y Hip Hop 0 Credits

Fusion dance influenced by older street dance styles.

DAN 100Z Movement Fundamentals 0 Credits

DAN 105 Survey of Dance History 3 Credits

An introductory course to familiarize students with the breadth and depth of dance in human society. It will chronologically examine dance through four lenses: Dance and Community, Dance and Religion, Dance and Politics, and Dance as Art. Students will be exposed to various dance forms from around the world with varying purposes, functions, and motivations from the beginning of recorded history to present.

DAN 111 Dance Lab 0 Credits

DAN 112 Ballet I: The Point of Departure 1 Credits

This is an entry-level, mandatory ballet class that covers all of the safest fundamental practices, including proper use of alignment, feet, rotation, and use of the core in the classical vocabulary.

DAN 113 Ballet II: Next Steps 1 Credits

This is a continuation of the safest fundamental practices covered in Ballet I, including proper use of alignment, feet, rotation, and use of the core in the classical vocabulary. In addition this course extends the coverage of discourse, terminology and vocabulary of the classical technique. DAN 113 may be repeated two times for a total of three credits.

Prerequisite(s): Ballet I or equivalent.

DAN 121 Introduction to Dance Science 3 Credits

This orientation to dance science will consider important aspects of the study of human performance including anatomy, biology, kinesiology, and psychology of movement and performance. Covered are the foundations and research findings in Movement Theory, Motor Development, and Well-Being. Topics include the Care and Prevention of Injuries, Movement Analysis, Dance Movement Therapy, Mind-body Connection, Dance Fitness and Optimal Performance.

DAN 151 Pilates and Modern 1 Credits

DAN 152 World Dance & Improvisation 1 Credits

DAN 180 History of Movement Theory 3 Credits

Investigation of the mind-body connection, somatic experience, body therapies, movement, and theories. The essential question is: How is it that we move with awareness, fluidity, efficiency, and precision?

DAN 190 Dalcroze Eurhythmics 3 Credits

This movement course familiarizes students with the basic elements of music theory (staff, clefs, time signatures, notations, chords, etc.) and the Dalcroze principles regarding music, movement and improvisation.

DAN 201 Vaganova I 1 Credits

This studio course focuses on fundamental knowledge about the vocabulary, discourse, performance and style of the classical ballet, especially as it pertains to the Vaganova Technique.

DAN 202 Vaganova II 1 Credits

This studio course continues the development of knowledge concerning the vocabulary, discourse, performance and style of the classical ballet, especially as it pertains to the Vaganova Technique. Repeatable twice for total of three times taken. May only be repeated if there are open spots after those taking it for the first time have registered.

Prerequisite(s): DAN 201.

DAN 210 Rider Dances: Repertory & Productions 1 Credits

This course provides an in-depth experience with the art of dance production from creation to performance. Students will be chosen to learn and perform repertory; fulfill technical roles such as sound, lighting and costume design; and assume production and managerial responsibilities such as promotion, publicity, front of house management and stage management.

Prerequisite(s): permission of instructor.

DAN 210T Rider Dances Rep&Produc:Tech 1 Credits

DAN 220 History of Choreography 3 Credits

This course prepares the dance student for the creating of dance through critical analysis, reading, writing and practical assignments. Students will examine creative process as applied to dance artists and various forms of dance.

DAN 300 Lecture & Studio in Dance 2 Credits

Dance 300 series is also designed to offer students concurrent participation and theoretical inquiry in specific dance forms. Students must register for four classes per week at the Princeton Ballet School. One additional hour is comprised of video observation, lecture, or readings and is held at Rider's Lawrenceville campus. Prerequisite(s): permission of instructor; Dance Studio Courses Ballet I.

DAN 300A Ballet I 0 Credits**DAN 300B Ballet II 0 Credits****DAN 300C Ballet III 0 Credits****DAN 300D Ballet IV 0 Credits****DAN 300E Ballet V 0 Credits****DAN 300F Ballet VI 0 Credits****DAN 300G Jazz I 0 Credits****DAN 300H Jazz II 0 Credits****DAN 300I Jazz III 0 Credits****DAN 300J Modern Dance I 0 Credits****DAN 300K Modern Dance II 0 Credits****DAN 300L Modern Dance III 0 Credits****DAN 300M Spanish Dance I 0 Credits****DAN 300N Spanish Dance II 0 Credits****DAN 300O Spanish Dance III 0 Credits****DAN 300P Pilates Mat Class 0 Credits****DAN 300Q Accelerated Adult Ballet I 0 Credits****DAN 300R Accelerated Adult Ballet II 0 Credits****DAN 300S Accelerated Adult Ballet III 0 Credits****DAN 300T Accelerated Adult Ballet IV 0 Credits****DAN 300U World Dance Forms 0 Credits****DAN 300V Yoga 0 Credits****DAN 300W Tap 0 Credits****DAN 300X Ballet VII 0 Credits****DAN 300Y Choreography 0 Credits****DAN 300Z Movement Fundamentals 0 Credits****DAN 350 History of Ballet, Modern & Jazz Dance 3 Credits**

Studies the major periods in the development of Western Theatrical Dance from the Renaissance to the present focusing on ballet, modern, jazz, tap and musical theater dance. The course will examine the ideas and individuals that caused the development of choreographers, producers, designers and productions.

DAN 450 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. Cross-listing existing entry-level teaching course with analogous graduate-level course (CURR 711).

DAN 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credit hours. Approval of the faculty sponsor, department chair, and dean required prior to enrollment. Prerequisite(s): junior or senior standing, good academic standing.

DAN 491 Internship in Dance 1-4 Credits

Provides junior or senior dance majors with the practical experience of working within an educational or professional dance environment. Students must be sponsored by a dance professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

DAN 493 Special Topics in Dance Studio 1 Credits

This class covers a discrete movement style, technique, or form such as the choreography of Balanchine, the technique of Cecchetti or dance theater fusion.

Prerequisite(s): DAN 100.

DAN 495 Selected Topics in Dance History 3 Credits

Intensive study of a particular topic in dance history or theory. This may include one era, movement or nation's dance history and practice. Students will become deeply involved in an area through research, class discussions and group projects.

DAN 498 Senior Capstone 3 Credits**DAN 499 Seniors Honor Program 3 Credits**

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, to be planned under the direction of a faculty advisor, will represent a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Early Childhood Education-UG (ECE)

Courses and Descriptions

ECE 200 Infant and Toddler Care and Education 3 Credits

Focuses on nutritional and psychological influences on infant and toddler growth and development, including current research in infant development; childbirth; breast feeding; infant stimulation; intellectual development; attachment behavior; and infants in group care. Recognizing that there is increased demand for infant/toddler care, it is increasingly important to assure that America's infants receive a safe, healthy, emotionally secure, and intellectually rich start in life. High quality care and education of very young children are based upon responsive and respectful relationships among all of the people in each child's life.

ECE 332 Families, Community, and Diversity in Early Childhood Education 3 Credits

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ECE 450 Developmental Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

Economics (ECO)

Courses and Descriptions

ECO 200 Principles of Macroeconomics 3 Credits

A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ECO 201 Principles of Microeconomics 3 Credits

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ECO 210 Intermediate Macroeconomics 3 Credits

An analytical study of modern aggregate economic theory. Emphasizes the measurement and determination of income, employment, and price levels, as well as economic policy in theory and practice.

Prerequisite(s): ECO 200 and ECO 201.

ECO 211 Intermediate Microeconomics 3 Credits

This course is designed to give the student a thorough understanding of microeconomic theory. As such, the course will analyze the behavior of both consumers and producers, and how this behavior determines the price and quantity observed in the market. The course objective is to provide students with the necessary theoretical background to enable them to solve meaningful and practical problems. Thus, the course is both theoretical and applied in its orientation. The course will emphasize that economic theory can be used not only to solve market oriented problems, but social and public policy problems as well.

Prerequisite(s): ECO 200 and ECO 201.

ECO 300 Business Conditions Analysis/Forecast 3 Credits

Business conditions change daily. Students study them as they change, learning to understand them in the light of economic theory, learning how each part of the economy is affected, and learning the advantages and limitations of the most reliable forecasting methods.

Prerequisite(s): ECO 200, MSD 201.

ECO 301 Managerial Economics 3 Credits

Intensively examines the theory of the firm with applications to the solution of such managerial problems as demand forecasting, the nature and behavior of costs, and product pricing. Introduces the use of simple mathematical and statistical tools that are employed with economic analysis for solving managerial problems.

Prerequisite(s): ECO 200 and ECO 201 and MSD 201 or permission of instructor.

ECO 305 International Trade and Investment 3 Credits

Studies the theory, institutions, and structures underlying the international flow of trade and investment. Topics are: the theory of international trade; balance of payment analysis; the international monetary system; adjustment to balance of payment disequilibrium; regional economic integration; the economic effects of trade restrictions; and trade and foreign investment problems of developing nations.

Prerequisite(s): ECO 200 and ECO 201.

ECO 315 Comparative Economic Systems 3 Credits

Provides a conceptual framework for classifying and comparing economic systems. Presents theory of the capitalist market economy and case studies of the U.S., Japanese, French, and Swedish economies. Examines theory of the centrally planned economy, its transition, and case studies of the Soviet and its successor states, Chinese, and East European economies. Case studies are necessarily limited, concentrating on selected topics, such as transition strategies, industrial policy, etc.

Prerequisite(s): ECO 200 and ECO 201.

ECO 325 Industrial Organization 3 Credits

Explores the relationship between market structure and performance. Topics include concentration in individual industries, product differentiation and entry barriers, pricing and marketing policies, and antitrust policies and their consequences.

Prerequisite(s): ECO 200 and ECO 201.

ECO 326 Economics of Sports 3 Credits

The overall objective of this course is to deepen student understanding of microeconomic principles by applying microeconomic concepts to the analysis of professional and amateur sports. This course will utilize concepts from many different microeconomic specialties, (primarily Industrial Organization, Labor Economics and Public Finance). The tools from these different microeconomic fields will be used to explain and analyze the operation of professional sports teams and leagues in the U.S. with an emphasis on baseball, football, basketball and hockey. International comparisons will be made between professional sports in the U.S. and the rest of the world. The course will also analyze the not-for-profit sports sector, focusing on college sports and the National Collegiate Athletic Association.

Prerequisite(s): ECO 201.

ECO 330 Labor Market Analysis 3 Credits

Intensive study of the economics of the labor market, which examines the determinants of labor supply and demand, and market equilibrium in the labor market. This enables the student to understand what determines wages, labor force participation, occupational choice, the extent of education and training, unemployment, poverty, union membership, and discrimination in the labor market.

Prerequisite(s): ECO 200 and ECO 201.

ECO 335 Economics of the Public Sector 3 Credits

Analyzes the economic roles of government: allocation; distribution; and stabilization. The course examines the tools used by governments, especially the federal government, such as taxation, expenditures, regulations and laws in order to achieve economic goals. The course will give special attention to social regulation.

Prerequisite(s): ECO 200 and ECO 201.

ECO 336 Economics of Health Care Sys 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomic tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

Prerequisite(s): ECO 201 or HTH 205.

ECO 365 Post-Soviet Economy 3 Credits

Studies the contemporary post-Soviet economic system, with emphasis on institutions, policies and issues related to business opportunities in this area. Topics covered include the historic, geographic, political, and cultural setting, planning and plan implementation in the traditional system, current reforms and prospects for the future, with special reference to the foreign trade institutions and experience of foreign firms doing business in the post-Soviet Union and Eastern European countries.

Prerequisite(s): ECO 200 and ECO 201 or permission of instructor.

ECO 450 Seminar in Economic Research 3 Credits

Students in the course learn to conduct economic research by engaging in an actual community-based research project. At the beginning of the semester, students are assigned to a community-based organization. As a team, students meet with the client, devise a plan of action, collect and analyze data and other information, and write a report to the client. At the end of the semester, students present their findings to the client. Students are permitted to take ECO 450 up to two times for credit.

Prerequisite(s): Permission of instructor.

ECO 490 Independent Research and Study 3 Credits

Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

ECO 491 Internship/Independent Study 3 Credits

This course is available to qualified economics majors and minors. Evaluation is based on a performance appraisal provided by the participating firm and a project/paper judged by the major's internship director. This course can be used as a business or free elective. Grading is done on a pass/fail basis.

Prerequisite(s): Permission of instructor.

Education Foundation (EDE)

Courses and Descriptions

EDE 200 Effective Classroom Management 3 Credits

Issues of classroom management often pose the biggest challenges for novice teachers. However, with the proper training many of these obstacles can be prevented, which results in more time spent on effective instruction. This course is based on two premises: (1) that most problems of classroom order can be prevented through the use of effective, research-based classroom management strategies, positive teacher-student relationships, and engaging instruction; and (2) that the goal of classroom management is the development of an environment conducive to both academic and social emotional learning. Given these premises, the course focuses not on disciplinary interventions designed to control students, but on ways of preventing disruptive behavior, creating a peaceful, caring community, resolving conflicts, and meeting the needs of diverse students through the use of effective motivational and instructional strategies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

EDE 225 Guided Field Experience in K-12 Classrooms 3 Credits

This is a field-based course in which students will spend an intensive three-week term in a designated school setting, mediated by University faculty. Students will participate in the daily routines of elementary, middle, or secondary schools. Field-site teachers will mentor students by articulating decisions that they make regarding classroom instruction and assessment. Students will meet regularly in seminar to analyze and discuss issues related to teaching and learning. This course will be offered J-Term, Summer I or other three week period.

EDE 226 Teaching and Managing in the Urban Classroom 3 Credits

This course focuses on teaching and managing K-12 classrooms in urban settings. Through four weeks of on-line instruction, students will learn key principles of classroom management and examine foundational issues that can underpin educational inequality, such as racial, ethnic and linguistic diversity, poverty, high student mobility and frequent teacher turnover. The course culminates with the Philadelphia Urban Seminar, a two-week residential experience (mediated by Rider University faculty) that includes ten days of intensive field experience in central Philadelphia classrooms, weekday seminars with faculty, and historical/cultural experiences and community service project activities on the weekend.

EDE 306 Thinking Critically with Data 1 Credits

This course will help students develop the kinds of data literacy skills needed for success in teaching. It will focus on five related that teachers need: (1) finding the relevant pieces of data in the data system or display available to them (data location); (2) understanding what the data signify (data comprehension); (3) figuring out what the data mean (data interpretation); (4) selecting an instructional approach that addresses the situation identified through the data (instructional decision making); (5).

EDE 307 Assessment in 21st Century Classrooms 1 Credits

This course offers an in-depth look at assessment to meet the need of 21st century teaching and learning. Students learn how to plan, develop, interpret, and manage valid assessments of student learning. Students will learn the following assessment-related skills and understandings: (1) the purpose of assessment in 21st century classrooms; (2), basics of assessments: reliability and validity; formative and summative assessment; alignment of assessments with objectives; and determining what can (what cannot) be reliably and validly assessed; (3) basics of rubric development; (4) holistic scoring; (5) assessment of critical thinking skills in diverse domains; (6) assessment of creativity in diverse domains. The course will be taught online.

EDE 375 Applications for Teaching Mathematics in Grades 4-5 1 Credits

This course will provide students the experience to share and learn about the practical applications of teaching mathematics to the 4th and 5th grade children as they are based on the field site classrooms of these grades. Students complete reflections about their work with mathematics and their observations of their cooperating teachers' lessons. The developmental aspect of math skills will be reviewed, looking at the Learning Progressions that are the basis for the new Common CORE State Standards. This course will provide an opportunity for students to have guidance in the teaching and learning of mathematics in the upper elementary grades. Upon completion of this course, students should have the knowledge, skills and confidence to meet the needs of all students, K-6. Prerequisite(s): ELD 375.

Corequisite(s): ELD 376 or ELD 308 or as prerequisite.

Education-UG (EDU)

Courses and Descriptions

EDU 101 First Year and Transfer Education Seminar 1 Credits

First year/transfer seminar provides an engaging orientation to the undergraduate teacher education program at Rider University. During this course, students new to the Department of Teacher Education will explore their beliefs about teaching, learning and school. This focus will be broken into four areas of inquiry that include: (a) What knowledge is of "greatest worth" for educators? (b) What is the purpose of a policy and who gets to make the decisions? (c) What is a "safe" school? (d) What role do unions and professional communities play in the lives of educators and children?

EDU 106 Contexts Of Schooling 3 Credits

Students in this field-based course will begin to examine aims, practices, and contemporary issues of schooling in their historical, sociological, philosophical, and futuristic contexts and from the perspectives of various multicultural constituencies— students, parents, local community, wider economic community, government, and the profession. In doing so, they will begin to develop professional skills of observation, reflection, analysis, and argument. This course must be taken concurrently with EDU 206. A cumulative GPA of 2.75 is required.

EDU 206 Developmental Education Psychology 3 Credits

This field-based course focuses on: a) the cognitive, personality, social, creative, and moral development of children and adolescents; b) influential theories, concepts, and research findings of educational psychology; and c) the translation of psychological theory into classroom practices. This course must be taken concurrently with EDU 106. A cumulative GPA of 2.75 is required.

EDU 320 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester. A cumulative GPA of 2.75 is required. NOTE: This course is cross-listed with FLE 320. Students cannot get credit for both FLE 320 and EDU 320.

EDU 358 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDU 420 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. A cumulative GPA of 2.75 is required.

*NOTE: This course is cross-listed as FLE 420. Students cannot get credit for both FLE 420 and EDU 420.

Prerequisite(s): EDU 106 with a minimum grade of C+ or EDU 106 with a minimum grade of TR and EDU 206 with a minimum grade of C+ or EDU 206 with a minimum grade of TR.

EDU 451 Special Topics in Education 1-6 Credits

Student teachers, graduate interns, Rider faculty, cooperating teachers, and building-level administrators will engage in collaborative study of a topic through reading, writing, discussion, observation, and reflection on their work in classrooms. Work in these seminars will help student teachers synthesize knowledge from their professional courses and all participants extend their understanding of a particular topic pertaining to teaching. Teacher research methods will be employed as participants analyze their own teaching through perspectives of the seminar topic. Topics will vary each semester. This course is dual-listed for undergraduate and graduate credit. Enrollment is limited to students concurrently enrolled in student teaching and to cooperating teachers and principals working with them.

EDU 460 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal, and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing, and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study. A cumulative GPA of 2.75 is required.

EDU 465 Student Teaching and Seminar 12 Credits

A full-time program for seniors providing practical teaching experience in an accredited elementary or secondary school. Under the direct supervision of the cooperating teacher, student teachers are responsible for the planning of lessons and for teaching in their areas of specialization and for developing a high level of teaching competency. Supervisors from Rider observe the student teachers at work, confer with the cooperating teachers and student teachers, and evaluate the growth of the student teachers throughout the internship period. Special topics are considered in seminars held in conjunction with student teaching. These topics include school health and substance abuse, school law, teacher certification and placement, classroom management, mainstreaming, professionalism, and other topics deemed appropriate by the faculty and student teachers.

Prerequisite(s): 1. Satisfactory completion of junior-level professional courses; 2. Cumulative GPA of at least 3.0 prior to commencing the semester in which student teaching is to be completed; 3. All professional education courses, with the exception of those taken concurrently with student teaching, must be completed with a grade of "C+" or better; 4. A candidate for student teaching must be approved by the education division and the coordinator of student teaching. There is an additional fee for Student Teaching.

Educational Technology (TEC)

Courses and Descriptions

TEC 200 Google® Educator Level One Training 3 Credits

This course will provide the skills and knowledge for pre-service teachers in undergraduate education to successfully take the Google® Educator Level One Exam.

TEC 201 Internet Ethics 1 Credits

This course focuses on using the Internet to explore and reflect on current ethical issues involving technology. These include individual privacy, legal issues such as fair use and copyright laws, and social issues such as bullying and social networking. Students will explore these topics using a variety of search engines and will reflect on the information found in terms of its impact on society as well as its appropriate uses in personal life, education and business. Pass/fail.

TEC 202 Smartboard 1 Credits

This course is designed to provide an opportunity for students to become familiar with the features and applications of Smartboard, an interactive whiteboard that can be used in classrooms and professional presentations. Students will gain experience using the touch screen and in integrating the features of the program into learning and professional materials. Pass/fail.

TEC 203 Desktop Publishing and Web Page Design 1 Credits

This course provides students with the ability to use desktop publishing software to create materials suitable for use in classrooms, professional settings, and personal use, and with the ability to design web pages. The course is appropriate for anyone who will be involved in designing classroom and student publications and for those who will use web pages in their teaching or personal lives. Discussion will be held on how to use desktop publishing and web page design in elementary and secondary school settings. A project involving application of various desktop publishing and web page design techniques will be completed and demonstrated to the class. Pass/fail.

TEC 204 Electronic Spreadsheets and Classroom Management Software 1 Credits

Basic electronic spreadsheet concepts and applications are taught using a major spreadsheet program. Topics include writing basic formulas, copying formulas, playing "What If," customizing a worksheet, and printing a spreadsheet. Discussions will be held on how to integrate spreadsheets into elementary and secondary classes and activities. Pass/fail.

TEC 206 Teaching and Presenting with Technology 1 Credits

This course covers designing, planning, and using technology enhanced instruction and presentations. Group assignments will enable students to explore uses of technology to enhance instruction and presentations. Collaboration will be encouraged when discussing the efficient and effective use of technology. Three collaborative group reports will be submitted dealing with discussion questions and chapter topics. Appropriate web sites and programs will be visited. Students will design a final original application that could be used to create motivation and visual learning in a specific classroom or other professional setting related to their major areas of study. Emphasis will be given to technology integration strategies. A final oral presentation of individual projects will be given.

TEC 207 Social Media for Education 3 Credits

Social Media for Education will introduce students to the structure and culture of social media and how social networking applies to the educational environment. This three-credit course will foster a deep understanding of how social media in education can benefit students, teachers, administrators, staff, and stakeholders.

TEC 307 Concepts Instuct Media & Tech 3 Credits

Designed to provide the student with familiarity and appreciation of the role of educational technology in the workplace as it applies to students, teachers, administrators, and trainers. The student will explore the Internet, various educational multimedia, distance learning, virtual reality environments, learning theories, and integration models. Appropriate developmental/reflective strategies will be incorporated with instruction. Although multimedia microcomputers will be utilized throughout the course, prior microcomputer knowledge and experience is not a critical element. Multimedia expertise will be developed as the course progresses.

TEC 308 Directed Study in Instruct 3 Credits

Designed to enable the student to develop instructional presentations utilizing the advantages of multimedia technology. Each student will be required to create a multimedia portfolio that contains information presentations, cumulative records, presenter notes, work samples, photo library, video animation, and audio narration. Cooperative learning strategies will be utilized throughout the course. Developmental/reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail. Expertise will be developed as the course progresses.

TEC 309 Instruct Media/Technology Management 3 Credits

Designed to develop technology management skills that can be used for individual classrooms, training centers, subject area specializations, grade levels, school laboratories, curriculum integration, administrative functions, system networks, community services, communication systems and connecting linkages between educational/work environments and home. Various management strategies will be explored and each student will have an opportunity to design, via a multimedia microcomputer, an instructional technology system of their choice along with a management plan. Cooperative learning strategies will be utilized throughout the course. Developmental/reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail.

Prerequisite(s): At least six semester hours of technology courses or modules.

TEC 404 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners.

Prerequisite: SPE 201 or SPE 300.

TEC 490 Independent Research and Study 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hours credit to be assigned is determined by the department.

Elementary Education (ELD)

Courses and Descriptions

ELD 128 Developing Mathematical Ideas for Elementary School Teachers 1 Credits

Prospective teachers will examine the mathematics content and curriculum that is taught in grades K-6, focusing upon the multi-layered aspects of the topics that successful elementary teachers need to understand profoundly in order to provide appropriate instruction. There will be a series of topics selected from those that have historically been especially difficult for teachers to thoroughly understand at the depth needed to teach effectively. Some of the topics may vary each semester.

ELD 307 Emergent Literacy P-3 3 Credits

This course is needed to meet the requirements for the specialized endorsement in Early Childhood. The course establishes a solid foundation of knowledge about literacy in the early years and dispels myths regarding readiness to read and write. In addition, the course contains the foundational aspects of literacy, including the relationship between oral language and literacy, the linguistic foundation of literacy, and the social contexts of literacy learning. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 308 Fostering Language and Literacy Development 3 Credits

Explores current understanding of the fields of reading/language arts from the perspectives of theory and practice. Students write lesson plans, critique methods of instruction and assessment and develop a portfolio of an individual student from their field site. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206; ELD 307.

ELD 350 Early Adolescence 1 Credits

This course will focus on common dilemmas faced by young people as they move from childhood into adolescence. It will examine age-related differences between children and adolescents and consider ways to create stimulating environments that fit this developmental transition. Representations of adolescence in the media and in research will be compared, including common stereotypes.

ELD 355 Teaching in the Inclusive Middle School Classroom 1 Credits

This course will highlight the legal and ethical responsibilities of general education teachers in the middle school classroom. The special education process will be discussed and methods to address special needs in the classroom will be shared. Strategies to differentiate instruction and work collaboratively with school community members will help pre-service teachers develop and implement effective instruction that meets diverse needs in the middle school inclusive classroom.

Prerequisite(s): EDU 106 and EDU 206 and a cumulative GPA of 2.75 is required.

ELD 360 Structure and Culture of Middle School Classroom 1 Credits

This course focuses on the teaching of those concepts critical to the understanding of the structure and culture of middle school education. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 375 Methods of Teaching Mathematics in Elementary Classrooms 3 Credits

This course focuses on the teaching of mathematics that is developmentally appropriate for students from nursery to grade eight. In keeping with ACET, NAEYC, and NCTM Standards, emphasis is placed on planning for and implementing an integrated curriculum approach, discovery learning, hands-on experience, theme cycles, use of technology, and traditional and non-traditional assessment strategies. Field experiences will consist of classroom observations and teaching individuals and/or small groups of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206, MTH 102 or MTH 105 or MTH 150 or MTH 210.

ELD 376 Teaching Science, Social Studies and the Arts N-6 3 Credits

This course focuses on methods and materials of instruction in science, social studies, and the arts that are developmentally appropriate for students in preschool through grade six (based on NCSS, NSTA, and NAEA Standards). Emphasis is placed on an integrated approach to curriculum, with lesson and unit planning activities that incorporate hands-on-experiences, discovery learning and traditional and non-traditional assessment strategies. Field experience will consist of observation and analysis of classroom instruction and the teaching of lessons to individual and/or small groups of children. A cumulative GPA of 2.75 is required.

Prerequisite(s): ELD 307 and ELD 375.

ELD 380 Methods of Teaching Mathematics in the Middle School 3 Credits

This course focuses on the teaching of mathematics that is developmentally appropriate for students in grades six through eight. In keeping with the National Council of Teachers of Mathematics (NCTM) Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experience, use of technology, and traditional and non-traditional assessment. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 385 Teaching Science in the Middle School 3 Credits

This course focuses on the teaching of sciences that is developmentally appropriate for students in grades six through eight. In keeping with the National Science Education Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experiences, use of technology and traditional and non-traditional assessment strategies. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 390 Teaching Social Studies in the Middle School 3 Credits

This course focuses on the teaching of social studies that is developmentally appropriate for students in grades six through eight. Its focus will explore understanding of United States history, geography and civics from the perspective of the middle school. The course emphasizes the ten themes of social studies as developed by the National Council for the Social Studies. In addition to the facts, concepts and generalizations encompassed by the ten themes, the course works with academic, social, thinking and citizenship skills. The required, intensive field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 395 Literacy Learning in the Middle School 3 Credits

This course focuses on the teaching of literacy that is developmentally appropriate for students in grades six through eight. It explores processes in reading, writing, speaking, listening and viewing, relationships among the language arts and other subject areas, and the development of critical literacy and cognitive strategies. The intense field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 490 Independent Study: Research and Creative Expression 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hour's credit to be assigned is determined by the department.

English (ENG)

Courses and Descriptions

ENG 205 Understanding Literature 3 Credits

The novel, the short story, drama, and poetry are studied, with a view to the insights to be gained from literature. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 206 Introduction to Creative Writing 3 Credits

A workshop that introduces students to basic conventions and techniques of creative writing. Students will read and study published writing in multiple genres, such as short fiction, drama, poetry, and creative nonfiction, and write and revise their own creative pieces.

ENG 208 Arthurian Legends in Literature 3 Credits

The legends attached to King Arthur and the Knights of the Round Table have become cultural touchstones in England and the United States. This survey of medieval to contemporary Arthurian literature examines the legends and their written versions within their respective cultural, historical, philosophical and aesthetic contexts. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 210 Major American Authors 3 Credits

An introductory course focusing on major American poets, novelists, essayists, and playwrights. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 211 Major British Authors 3 Credits

An introductory course focusing on major British poets, novelists, essayists, and playwrights. Students will learn to understand, interpret, and evaluate literary works. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 213 Literature and Mythology 3 Credits

The interrelationships that exist between literary works and folklore, ritual, and religious scriptures and beliefs are explored. The primary emphasis is on analyzing the presence of mythic patterns in specific literary works; the secondary emphasis is on theories of mythology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 214 Monsters in Literature 3 Credits

This course examines various texts on the topic of monsters. Students read and watch films, and explore the answers to the following: Who are they? Undead, alien, satanic, outcast, hidden, hostile, tragic. Where are they? Crossroads, arctic wastes, moors, abandoned buildings, forests, outer reaches, inside. What do they want? Revenge, bodies, lives, escape, life, contact, humanity. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 215 Satire and Comedy 3 Credits

Explores these two related modes of literature with the primary emphasis on satire. Possible readings include works by Euripedes, Jonson, Shakespeare, Moliere, Voltaire, Pope, Swift, Dickens, Twain, Wilde, Waugh, Orwell, and Heller. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 217 Introduction To Shakespeare 3 Credits

Students in this course study Shakespearean drama on an introductory level through close reading, analysis, and discussion of selected plays. They learn the relevance and importance of Shakespeare's themes, characterizations, and imagery. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 218 Literature and the Environment 3 Credits

Students examine literature on important environmental issues, such as climate change, pollution, dams, oil pipelines, and nuclear energy. The class focuses on how literature, which may include fiction, poetry, drama, and essays, helps readers understand and grapple with these complex global challenges.

ENG 219 Literature and Violence 3 Credits

This course will examine and critique themes of violence that have become a pervasive and recurring artistic thread in classic literary texts. Through careful, close textual readings and critical analyses of thematically selected texts that contain multiple artistic representations of violence in varied literary genres, students will explore literary violence as a possible metaphor for understanding dimensions of power, control and dominance. In analytical studies of thematically selected texts, students will gain new insights and critical perspectives on modern American society and the social causes and ills of violence. Students will delve into the root, cause and meaning of violence and they will further grow to understand why and how violence still maintains a pervasive presence in their daily lives and in the very literature they read. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 220 Literature & Society 3 Credits

Literature is examined, emphasizing human behavior as it relates to such social phenomena as war, alienation, social disorganization, injustice, and poverty. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 221 Literature and Psychology 3 Credits

Students will study Freudian and other psychoanalytical concepts as they appear in literature, plus psychological patterns of behavior such as aggression, frustration, and submission, that have been utilized by creative literary artists to expand the reader's understanding of the human experience. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 222 Crime and Literature 3 Credits

This introductory course focuses on representations of crime in novels and short stories. The primary goal of this course is to equip you with the basic tools you need to interpret fiction. Examining how narrative elements such as plot, character, point of view, and setting function in literature will enable you to analyze, not just comprehend and summarize, fiction. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 224 Science Fiction 3 Credits

This course is designed to introduce students to science fiction, its major themes and preoccupations, as well as some of its significant authors and genres. It has been argued that science fiction or "speculative" fiction represents a viable way to make sense of our everyday world. Our primary focus, therefore, will be on how these texts—written and visual—help us understand our culture and ourselves through encounters with alien and unfamiliar worlds, species, and technology. By the end of the course, students are expected to be able to critically engage with science fiction, and to identify its broad cultural impact. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 226 Introduction to Film 3 Credits

Focuses on various cinematic techniques used to develop underlying thematic and symbolic concepts and to shape viewer response. Students will analyze classical and contemporary features for their masterful use of visual language.

ENG 228 Black American Lit 3 Credits

A survey of writings by black Americans, presented historically from early slave narratives through emancipation, reconstruction, the Harlem Renaissance, and literature from the 1930s to the present. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 229 Multi-Ethnic Literature in America 3 Credits

Surveys the literature of various ethnic groups including African Americans, American Indians, Asian Americans, Hispanic Americans, Jewish Americans and European Americans. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 230 Women In Literature 3 Credits

A range of literary presentations of the female experience and of the conditions of women's lives is explored. These works are placed in historical and social contexts in order to see behind and beyond traditional literary conventions. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 236 Applied Grammar & Syntax 3 Credits

This course offers a review of the essential elements of English grammar and syntax and fosters understanding of how these elements work in notable argumentative and expository writing as well as in the student's own compositions. Focus is on both expert reading and effective writing. Changing attitudes toward usage, including influence of digital media on language use, are discussed. May be taken as preparation for, or independently of ENG 336, which addresses grammar, syntax, and style at a more advanced level.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 240 Methods of Literary Analysis 3 Credits

The study and application of various modes of literary criticism practiced, including formal, structural, psychological, and sociocultural methods of analysis. Required of all English literature and writing majors.

ENG 245 Creativity 3 Credits

This course is an introduction to the history of literary creativity and the related topics of invention, genius, imagination, and originality. It examines theories of literary creativity throughout history from ancient ideas about the origins of inventiveness to recent theories. It looks at select works in English and other sources, and it looks at the subject of creativity in poetic, prose, and dramatic works.

Prerequisite(s): English Literature majors should take all Gateway Courses before they take 300- and 400- level courses.

ENG 250 Literary History I 3 Credits

Surveys British literature beginning with the old English epic of Beowulf and ending in 1785. Students analyze diverse works of literature from different genres, movements, and periods while taking into account historical context. Students learn to analyze literature using formal strategies and terms, and to develop arguments about literature. All English majors and writing concentration minors must take this course. Literature and cinema studies concentration minors must take either ENG 250 or 251. Students are advised to take this course prior to upper-level English courses.

ENG 251 Literary History II 3 Credits

Surveys literature in English since 1785. Students analyze diverse works of literature from different genres, movements, and periods while taking into account historical context. Students learn to analyze literature using formal strategies and terms, and to develop arguments about literature. All English majors and writing concentration minors must take this course. Literature and cinema studies concentration minors must take either ENG 250 or 251. Students are advised to take this course prior to upper-level English courses..

Prerequisite(s): ENG 250 or permission of the instructor or chairperson.

ENG 270 Major Poets 3 Credits

Studies major American and British poets. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 275 Posthumanism: Bodies and Technology in Literature 3 Credits

This course explores the concept of posthumanism in speculative and futuristic literature. Who counts as human? How do advances in science and technology change what it means to be human? How much can we change our bodies before we stop being human? Categories of posthumanism that may be explored include virtual reality, cybercultures, and bodily transcendence; cyborgs; body modification, duplication, and replacement; cloning; genetic engineering; and postapocalyptic/ecocritical narratives.

ENG 280 Special Topics in Literature 3 Credits

Uses literary works to achieve insights into different areas of human experience. Topics change annually as announced by the English department.

ENG 281 Global Film History: Origins to 1960 3 Credits

Examines major technological and aesthetic developments in both American and international cinema of the period, with an emphasis on global cinema. From silent comedy and melodrama to German Expressionism and Soviet activist cinema; from French poetic realism and Italian Neo-realism to Hollywood sound cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. ENG 281 is crosslisted with FMS 250 and this course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

ENG 282 Global Film History: 1961 to Present 3 Credits

Examines major technological, industrial and aesthetic developments in both American and international cinema of the period. From the decline of the studio system and the emergence of the 'New Hollywood' to the digital revolution; from the renaissance in Western and Eastern European cinemas to Latin American, Asian, and Middle Eastern cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. ENG 282 is crosslisted with FMS 251 and fulfills the general education global perspectives requirement.

ENG 284 Language of Film Analysis 3 Credits

Provides students with the fundamentals necessary for achieving beginning proficiency in methods of cinema studies scholarship. The course provides an in-depth introduction to concepts of film analysis, theory, and history, as well as to the field of cinema studies as an academic discipline. Through close analysis of selected films and readings, students will examine the various and complex ways in which formal elements shape meaning. Students also will study key concepts in film theory, applying these concepts as a further means of understanding the ways in which film positions viewers and mediates ideology. Required of all English majors and minors with a cinema studies concentration. ENG 284 is crosslisted with FMS 284.

ENG 285 American Film History: Origins to 1960 3 Credits

Examines major technological and aesthetic developments in American cinema as it grew from the days of one-reel silent shorts exhibited in storefront theaters through the days of studio productions exhibited in lavish picture palaces and featuring iconic stars the system manufactured and promoted. From the inception of sound and color, to the later development of lightweight equipment that freed filmmakers from the confines of the studio, from the "golden age" to the gradual decline of the Hollywood studio system in the 1950s, we will study the lasting genres that grew out of the system, the filmmakers who flourished and those who rebelled against the system, and the ground-breaking films that established the American film industry as a dominant force within the world. ENG 285 is crosslisted with FMS 252.

ENG 286 American Film History: 1961 to Present 3 Credits

Examines the transitions of Hollywood in the post-studio era— the rise of the 1960's-1970s New Hollywood and its ground-breaking films, the rise of the blockbuster as an industry standard; the responses of independent filmmakers and the avant-garde to blockbuster dominance; the transition from the Production Code to the ratings system, the move back to studio-owned theaters, and the emergence of digital cinema and CGI. We will look at how genres are being redefined, how major filmmakers are re-shaping their work to fit 21st century demands, how "gaming," YouTube, and other media sources are altering the very definition of cinema.

ENG 290 The Short Story 3 Credits

Presents the development of the short story from the 19th century to the present with an emphasis on the techniques of plot, setting, characterization, theme, and point of view. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 295 Human Relationships in Literature (HONORS) 3 Credits

Through in-depth analysis of significant pairs of literary works from a variety of time periods, students in this honors course will study the dynamics of human relationships as they are presented in literature. Emphasis will be on portrayal of interpersonal relationships as inflected by conventions, constraints, and taboos. Social and psychological theories will complement esthetic and formal analysis of fiction, drama, poetry, and film. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): 3.3 GPA.

ENG 303 Creative Writing: Poetry 3 Credits

A workshop analyzing the techniques of poetic expression, with a focus on the student's original experiments in traditional and contemporary verse forms.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 304 Creative Writing: Fiction 3 Credits

Students write original fiction and analyze the techniques of writing fiction in discussion of both their own drafts and published examples of the form.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 305 Creative Writing: Nonfiction 3 Credits

A workshop in Creative Nonfiction (aka Literary Nonfiction or Narrative Nonfiction, abbreviated CNF) in which students will write and read different forms of memoir and essay, including Personal Essay, Lyric Essay, Travel Writing, Oral History, and Personal Profiles. Creative Nonfiction (CNF) tells true stories using the literary techniques of fiction-writing, such as building dramatic scenes, establishing suspense, and developing a narrative sequence of events, or plot. CNF employs vivid sensory detail and builds characters and scenes to enhance the reader's experience of the story. Challenging the traditional journalist's stance of objectivity and emotional distance from her topics, CNF writers often put themselves into their stories to create a voice of reflection. We'll talk about what types of creative license CNF gives writers, and also about the ethics of storytelling, especially when your story's characters are real, living people.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 306 Creative Writing: Drama 3 Credits

Examines cultural developments in the United States from the late 19th century to the present. Topics include popular culture, intellectual history, gender history, literary history, film, institutions like museums and department stores, subcultures and countercultures, popular commemorations like World's Fairs, and political culture. Some of the largest trends explored include the development of the modern culture of consumption, the urban landscape, and the polarization of cultural values.

ENG 311 Creative Writing: Playwriting 3 Credits

A workshop teaching and analyzing how students write for the stage that pays particular attention to the demands of the genre. Through reading and writing assignments, students will discuss and analyze the development of their own dramatic scripts for theatrical performance. A portfolio of revisions will serve as a final for the course.

ENG 312 Creative Writing: Screenwriting 3 Credits

A workshop teaching and analyzing how students write for the screen, both television and film, that pays particular attention to the demands of the genre. Through reading and writing assignments, students will discuss and analyze the development of their own dramatic scripts for production. A portfolio of revisions will serve as a final for the course.

ENG 313 Creative Writing: Experimental Writing 3 Credits

A creative writing workshop dedicated to developing a wider range of literary techniques. For the purposes of this course, Experimental Writing is defined as writing that departs – in form, structure, or style – from the conventions of literary realism. Students will demonstrate proficiency in writing and reading experimental fiction, nonfiction, and poetry, with an emphasis on experimental narrative techniques such as metafiction, magic realism, the unreliable narrator, multi-genre and hybrid forms (works that blur the lines between poetry and prose, for example), nonlinear storytelling, fragmentation, and poetic techniques such as found text and readymades, self-imposed constraints, and the collage or mashup.

ENG 315 Topics in Specialized Writing 3 Credits

A workshop in which students will write on specialized topics chosen by the instructor.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 316 Theories of Writing & Tutoring 3 Credits

A workshop on writing and tutoring theory for students interested in becoming writing tutors or teachers.

Prerequisite(s): minimum GPA 3.0, sophomore standing, and permission of the instructor.

ENG 318 Food Writing 3 Credits

Food Writing is a thematically based course in essay writing. It develops students' ability to write effective informal prose while also extending their knowledge about food sources, preparation, and consumption. They learn through readings and exercises, however, that food writing is about more than food. It encompasses the pleasures of the table, history, culture, science, and politics.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 320 Editing for Literary Publishing 3 Credits

This course introduces students to the process of publishing literary magazines and books. Student will learn all aspects of publishing from solicitation of manuscripts to the production of copy. Specific skills will include copyediting, proofreading, and layout.

ENG 321 Business and Professional Contexts 3 Credits

Students practice writing effectively to achieve specific purposes in typical business and professional workplace environments. Genres include various kinds of internal and external communication, including print and social media, for a range of audiences.

Prerequisite(s): CMP 125 or COM 203 or BHP 150 or permission of instructor.

ENG 322 Grant Proposals, Fundraising and Development 3 Credits

Students employ their analytical and writing skills to research and write grants for non-profit organizations in their local or regional communities. Fundraising and development activities on behalf of area organizations introduce them to career opportunities in this growing field.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150 or permission of instructor.

ENG 323 Reviewing and Publishing 3 Credits

Students learn to write arts and literary criticism through studying the work of prominent critics in literature, theatre, film, dance, visual arts, and music. Students learn how to market themselves as potential reviewers for print and online publications.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150 or permission of instructor.

ENG 324 Workplace Writing: Online Contexts 3 Credits

This course will help students adapt their writing to online environments. A writing-intensive course grounded in rhetorical principles, it focuses upon planning, writing and producing online texts distributed entirely through virtual portals. Genres include E-mail, instant messages, text messages, blogs, wikis, workplace social-media, and online team collaborations.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 325 Jobs in Book Publishing 3 Credits

Students will practice the forms of writing used by literary agents and publishing professionals working in acquisitions, editorial, and production at trade, academic, and small literary presses. These forms may include the query letter, book proposal, reader's report, and marketing plan.

Prerequisite(s): Completion of composition requirements or permission of instructor.

ENG 331 Medieval Literature 3 Credits

A seminar in Old and Middle English authors, such as Bede, Chaucer, and Kempe, and texts, such as Beowulf, moralities, and mystery cycles. Students may be introduced to linguistic issues, historical and political concerns and critical topics such as literacy, canon formation, and gender.

ENG 332 British Literature, 20th-Century to Present 3 Credits

A seminar on literature in the United Kingdom from 1900 to the present, emphasizing formal experiments as well as historical contexts, and including such writers as Joyce, Woolf, Beckett, Rhys, Eliot, and Ishiguro.

ENG 333 16th-Century Literature 3 Credits

A seminar on Renaissance literature including such writers as More, Wyatt, Surrey, Spenser, Sidney, Shakespeare, and Marlowe.

ENG 335 17th-Century Literature 3 Credits

A seminar on literature in England from 1600 to 1660, including such writers as Donne, Jonson, Browne, Herbert, and Marvell.

ENG 336 Grammar and Style 3 Credits

By building a comprehensive knowledge of the conventions of English grammar, punctuation and syntax, students will learn how to analyze the way words, phrases, sentences, and paragraphs work in expert writing, and they will apply this knowledge to their own writing. Emphasis is on argument, exposition, and analysis.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 337 Global Literature 3 Credits

A study of the recent literature, in English, of one or more writers whose cultural identification is with one of the former colonies of the British Empire, as it was defined at the beginning of the 20th century. Literature in the English language, written by authors of African, Caribbean, Pacific Island, East Asian, or South Asian cultures may be included.

ENG 340 Restoration & 18th Century Literature 3 Credits

An exploration of literature in England from 1660 to 1800, including such writers as Astell, Pope, Finch, Swift, Defoe, Fielding, Johnson, and Wollstonecraft.

ENG 344 Gods and Monsters: Biblical and Classical Influence in Literature 3 Credits

This course surveys biblical and classical influences on western literature and beyond, analyzing adaptations of seminal texts with special attention to gender, race, and sexuality. We will read selections from the Old and New Testaments, Homer, Sophocles, Virgil, Ovid, and Dante (to name a few) as well as adaptations of that material by popular writers, artists, and musicians.

ENG 345 Romantic Literature 3 Credits

A seminar on literature in England from 1780-1830, emphasizing a close study of the poetry of Blake, Wordsworth, Coleridge, Shelley, Byron, and Keats, as well as important novelists and female poets of the period.

ENG 346 Victorian Literature, 1830-1900 3 Credits

A seminar on literature in England from 1830 to 1900, emphasizing close study of the literary culture, including such writers as Dickens, Browning, Mill, and Ruskin.

ENG 347 20th-Century British Literature 3 Credits

A seminar on literature in the United Kingdom from 1900 to 1960, emphasizing formal experiments as well as historical contexts, and including such writers as Joyce, Woolf, Beckett, Rhys, Delaney, and Eliot.

ENG 348 Contemporary British Literature 3 Credits

A study of contemporary literature written in English after 1945, in the U.K. and elsewhere, by writers of British, Irish, Scots, Welsh, and other cultural traditions. Poetry, fiction, literary essays, and drama will be included.

ENG 350 Sex and Sin in Early American Literature 3 Credits

A seminar on literature in the United States from its beginnings to 1800, emphasizing the changing and conflicted nature of religious beliefs and sexual identities in Early America. Students will read and analyze diverse literary genres including diaries, letters, essays, novels, short stories, poems, and sermons.

ENG 351 19th-Century American Literature 3 Credits

A seminar on literature in the United States from 1800 to 1900, emphasizing literary genres and the definition of an American literature as distinct from English literature.

ENG 353 Contemporary American Literature 3 Credits

A seminar on American literature from 1945 to the present.

ENG 354 Selected Topics in English 3 Credits

Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 355 Selected Topics in English 3 Credits

Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 356 Selected Topics in English 3 Credits

Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 357 American Literature, 20th century to Present 3 Credits

"A seminar on American literature from 1900 to the present, including such writers as O'Neill, Hemingway, Faulkner, Richard Wright, Stevens, Moore, and Williams, and Morrison."

ENG 361 Selected Topics in English 3 Credits

Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 362 The Novel 3 Credits

A close reading of novels from various historical periods and cultures.

ENG 363 The Drama 3 Credits

A close reading of drama, with attention to cultural contexts and the genres of tragedy and comedy.

ENG 364 The Poem 3 Credits

A close reading of poetry, with attention to historical periods and poetic genres.

ENG 365 Short Fiction 3 Credits

A close reading of short fiction from a variety of cultures, with attention to the various genres of short fiction: short-short, short story, long story, and novella.

ENG 366 Black and Multi-Ethnic Literature 3 Credits

A Survey of the literary writings of selected writers of Black and Multi-Ethnic America. Writers may include Zora Neale Hurston, Dorothy West, Maxine Hong Kingston, Anzia Yezierska, Louise Erdrich, Don Lee and Amy Tan.

ENG 371 Classics of Children's Literature 3 Credits

An analytic study of classic and contemporary literature for children. Students will be introduced to a variety of critical approaches, including psychoanalytic, social/historical and feminist. The course may be of particular interest, but is not restricted, to students majoring in education or psychology.

ENG 372 Children's Literature: The Adolescent Experience 3 Credits

A study of enduring literature examines how exemplary writers chronicle the challenges of growing up. Texts may include influential Young Adult fiction, classics such as *The Catcher in the Rye* and *To Kill a Mockingbird*, and contemporary fiction by important writers who focus on the relevant themes.

ENG 375 Literature and Sexuality 3 Credits

The study and application of theories of gender and sexuality in various periods of British and/or American literature. Possible course topics include the literature of AIDS, the literary history of sexuality, Gothic literature and sexuality, colonialism and desire, and sensibility and sexuality in the later 18th century.

ENG 381 Studies in Film Genre 3 Credits

Provides an in-depth examination of a variety of film genres (such as the gangster film, the western, the musical, the screwball comedy, the science fiction film, and the horror film, among others), to be examined through the perspective of film genre theory. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing specific genres, and will trace the development of those genres within the dual contexts of the film industry and cultural ideology. Note: This course is cross-listed as FMS 381.

ENG 382 Comparative Film Directors 3 Credits

Provides an in-depth comparative study of major American, international, independent and avant-garde filmmakers. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing the work of individual directors and will draw meaningful comparisons among directors sharing similar aesthetic and thematic approaches. Students will trace the artistic development of directors through their careers, assessing individual works in the context of film criticism and theory, and in the context of multi-layered intertextual influences. Note: This course is cross-listed as FMS 382.

ENG 383 Global Cinemas 3 Credits

Provides an in-depth study of the history and defining characteristics of national cinemas. Through close analysis of selected films and readings, students will examine the general movements within the history and development of various national cinemas, with attention to film historiography when considering how patterns are to be viewed in light of the culture, politics, and history of a particular producing nation. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as FMS 383.

ENG 384 Film Adaptation 3 Credits

Provides an in-depth study of intertextual influence, as film enters into "dialogue" with various literary forms. Through close analysis of selected films and various forms of literature-including novels, graphic novels, short stories, plays, poetry, and journalism- students will study the aesthetic specificity of both film and literary genres and will analyze the transformative qualities at play when a work is adapted from page or stage to screen. Note: This course is cross-listed as FMS 384.

ENG 400 Creative Writing: Advanced Creative Writing 3 Credits

An advanced workshop in creative writing.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 405 Advanced Prose Style 3 Credits

Students analyze prose styles in English from the Renaissance to the present, focusing on the development of syntax, diction, and content. Students will be encouraged to imitate stylistic models and to develop their own prose style.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 407 Advanced Workplace Writing 3 Credits

Students will learn to adapt their writing skills to match specialized writing needs in publishing; corporate and personal finance; health, medicine, science, and technology. This course helps students build a portfolio and introduces them to corporate and freelance writing opportunities in our NJ/PA/NY area.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 411 History of the English Language 3 Credits

A seminar on the historical development of the English language, including phonetics, diversity, and present-day usage.

ENG 425 Seminar in Shakespeare 3 Credits

A seminar on Shakespearean drama and poetry.

ENG 435 Seminar In Milton 3 Credits

A seminar on Milton's lyric poetry, *Samson Agonistes*, *Paradise Lost*, and prose.

ENG 440 Seminar in Selected Major Authors 3 Credits

Seminar focusing on literature by one or two authors.

ENG 441 Seminar in American Literature 3 Credits

A seminar focusing on literature by one writer or by a small group of writers.

ENG 443 Seminar in Literary Modernism 3 Credits

A seminar on literature from 1900 to 1940, by British, Irish, and American writers such as Hardy, Yeats, Woolf, Joyce, Eliot, Williams, Hurston, and Faulkner.

ENG 445 Seminar in Black/Multi-Ethnic Literature 3 Credits

A seminar focusing on literature by black, Native American, Hispanic, Asian American and first-generation immigrant writers.

ENG 455 Seminar in Chaucer 3 Credits

An examination of Geoffrey Chaucer's writings from a number of critical perspectives, including close reading of the texts in Middle English, context and history, gender and sexuality, linguistics, and paleography and codicology.

ENG 465 James Joyce 3 Credits

This course will offer advanced English majors an in-depth exploration of the fiction of James Joyce with a particular focus on Joyce's novel *Ulysses*, considered one of the most (if not the most) important novels written in the twentieth century. Through a carefully scaffolded reading of Joyce's challenging work, students will explore the technical, aesthetic, and social innovations of modernist fiction and its contemporary and continuing cultural impact; recognize and articulate classical, biographical, and cultural influences on Joyce's work; and understand how editors, publishers, critics, and readers contribute to the production of seminal works of literature.

ENG 484 Seminar in Cinema Studies 3 Credits

Provides an in-depth study of areas central to discussion and debate in the field of cinema studies (such as film violence, cinema censorship, feminism and film, post-colonial cinema, African-American cinema, blaxploitation, The French New Wave, and Italian Neorealism, among others). Through close analysis of selected films and readings, students will examine the impact of specialized influential movements in film history and in film theory and criticism. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as FMS 484.

ENG 485 Cinema Studies for Teachers 3 Credits

Designed for teachers and education students who (will) use film in their classrooms, ENG 485 provides approaches to teaching basic film analysis; approaches to helping students recognize the permeable boundaries between film, culture, and ideology; and approaches to understanding selected issues crucial in cinema studies as a field of scholarly study. The course provides teachers and prospective teachers with various methodological approaches and flexible uses of fiction and documentary films across the curriculum, whether to supplement or reinforce existing curricula or in stand-alone courses devoted to the study of film.

ENG 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. To count toward the Certificate in Workplace Writing, an ENG 490 project must focus on workplace-related writing and be structured to include substantial formative feedback and revision. No more than one ENG 490 may be counted toward the certificate.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 491 Internship in Writing and Publishing 1-6 Credits

Students work under the supervision of English faculty and on-site supervisors to complete real-world assignments in writing, publishing, and cinema studies. Their performance is assessed by professional standards. A minimum of 48 hours of field work per credit is required. Students report to faculty and on-site supervisors regularly, submit all work required by on-site supervisors, maintain a log, and complete a final report. Three credits required to count toward English writing concentration. Restricted to juniors and seniors.

ENG 497 Advanced Study 3 Credits

Qualified majors may apply for honors in their senior year. Upon approval from the department of English, a candidate for honors enrolls in Advanced Study, writes a thesis, and submits it for departmental approval. The student must achieve a course grade of "B+" or better to be graduated with honors in English.

Prerequisite(s): senior standing; 3.5 GPA in English; 3.25 cumulative GPA.

English Composition (CMP)

Courses and Descriptions

CMP 100 Intro to College Writing 3 Credits

Students will develop their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. Pass or fail.

CMP 100S Intro to College Writing 1-3 Credits

Students will develop their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. Pass or fail.

CMP 115 Intro to Expository Writing 3 Credits

Students will develop college-level skills in critical reading of challenging texts and in writing expository essays responding to those texts. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): SAT EBRW score less than 550 or ACT English score less.

CMP 120 Seminar in Writing and Rhetoric 3 Credits

Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. The second of the department's three-course composition sequence, This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

CMP 125 Seminar in Writing and Research 3 Credits

Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CMP 120 or BHP 100.

CMP 203 Literature and Composition 3 Credits

Students will write research papers and do library research through the use of literary materials. The course emphasizes increasing the comprehension of ideas and experiences by means of selected readings. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CMP 203 is open to students who receive a grade of "A" or "B" in CMP 120; it may be used as a substitute for CMP 125.

Entrepreneurial Studies (ENT)

Courses and Descriptions

ENT 100 Innovation and Entrepreneurship 3 Credits

This course provides students with an introduction to creativity, innovation, and the concept of an entrepreneurial mindset. Students explore the excitement and challenges faced by individuals and businesses as they create, develop, and evaluate innovative business opportunities. We also discuss the probable paths of career development for students pursuing entrepreneurship. In this course, students evaluate their own views of innovation and entrepreneurship within the framework of entrepreneurial thinking, and putting this mindset into action.

ENT 210 Sports Entrepreneurship 3 Credits

Sports Entrepreneurship will introduce students to entrepreneurship in the sports industries as they explore opportunities and challenges for new ventures in this sector. Using an industry's business model, students will identify competitive advantages and understand what is required for startup success.

ENT 220 Inside The Entrepreneurial Mind 3 Credits

Inside the Entrepreneurial Mind is not just for Entrepreneurship majors! Whether you're starting your own business or want to succeed in running a division for another firm, you will need to adopt an entrepreneurial mindset. This mindset takes a holistic approach to running a business, realizes that failure is part of the journey and that resilience in overcoming obstacles are necessary skills for success. In this course, students will hear from entrepreneurs and industry leaders as they share their personal experiences, the challenges they've overcome and the paths they've taken to arrive at success in their businesses and careers. Through these entrepreneurial stories, students will be introduced to the skills and strategies that will help them overcome challenges in both their careers and personal lives. Available to undergraduate Sophomores, Juniors, and Seniors.

ENT 260 Family Business Management 3 Credits

This course is directed at understanding the family-owned and managed firm. Topics included are the strengths and weaknesses of a family firm, the dynamics of the family and business interactions, conflict resolution, succession planning and ownership transfer. The course will help individuals involved with a family firm, regardless if they are a family member.

Prerequisite(s): MGT 201 and junior standing.

ENT 335 Small Business Tax Planning 3 Credits

This course provides an understanding of the key tax issues faced by small businesses and their business implications. It also familiarizes prospective business owners with various tax filing requirements so that they can use the expertise of tax professionals more effectively.

Prerequisite(s): ACC 210.

ENT 348 Small Business Management 3 Credits

This course provides students with an introduction to ownership/management in the world of small business as well as an understanding of what is needed to start/buy/sell a small business. In addition, the course endeavors to help students move from a consumer orientation to a producer orientation, and to learn project management and research skills through participation in a hands-on project. The project has students investigate the market potential of an innovative business concept, and then use this research to evaluate the business concept as an entrepreneurial opportunity.

ENT 350 Entrepreneurial Finance 3 Credits

This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.

Prerequisite(s): FIN 300.

ENT 375 International Entrepreneurship 3 Credits

Students will learn how new or small ventures enter international markets. Requirements include developing a case about starting or running a venture in a single country of the student's choice.

Prerequisite(s): MGT 201 and junior standing.

ENT 399 Entrepreneurship Co-Op 6 Credits

This course provides students with a semester-long supervised employment with an entrepreneurial firm/organization. Students are required to maintain a journal, complete a reflection paper and are evaluated by the participating firm/organization. Eligible students are entrepreneurial studies juniors or seniors with a 3.0 GPA or better. Co-op credits count as free electives. Grading is on a pass/fail basis.

Prerequisite(s): ENT 348 or permission of program director.

ENT 410 New Venture Planning 3 Credits

This course will require students to select a business and prepare a complete new venture plan for it. This plan would identify the product and its target market, analyze its market potential, choose the location, scale of operation, layout, staffing, type of financing, estimate the revenues and profits, and present the income statement, balance sheet, and the cash flow projections.

Prerequisite(s): ENT 348 or permission of instructor.

ENT 420 Student Venture Experience 3 Credits

Students will start and run a small business while under the supervision and guidance of faculty. Students will take a business plan developed through New Venture Planning (ENT 410) and execute it. Students will experience the launch process and learn, hands on, how to adapt to the marketplace. Some businesses started in this class may also be eligible for seed venture funding from Rider.

Prerequisite(s): ENT 348, ENT 410, and permission of instructor.

ENT 444 Special Topics 3 Credits**ENT 448 Small Business Consulting Sem 3 Credits**

This course utilizes student teams to assist existing small businesses in solving problems or researching opportunities. Students will spend the majority of time in the field utilizing an experiential learning approach. Weekly activity logs, proposal development, and project completion are required. Restricted to seniors.

Prerequisite(s): ENT 348 and permission of instructor.

ENT 490 Independent Research and Study 3-4 Credits

Topic to be approved by professor and program chairperson. Available to juniors and seniors.

ENT 491 Internship 3 Credits

Environmental Sciences (ENV)

Courses and Descriptions

ENV 100 Introduction to Environmental Sciences 4 Credits

Examines how ecosystems function, with emphasis on the interactions between biological organisms and their physical environment, and the chemical processes that govern these interactions. The impact of human populations on natural ecosystems is investigated in detail using case studies from history and current events. The laboratory provides for hands-on experiences and/or short field trips to local sites for a better understanding of many of the concepts discussed. Weekday and weekend field trips may be required. Three hours of lecture and one three-hour lab per week. CLAS general education areas addressed: DP, SP, GP.

Corequisite(s): ENV 100L.

ENV 100L Introduction to Environmental Sciences Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): ENV 100.

ENV 110 Future of Natural Resources 3 Credits

In this course, students are introduced to topics in the natural sciences through studies of human exploitation of selected natural resources (e.g. water, fisheries, mineral resources, energy, etc.). The course work includes a study of the scientific process and how it can contribute to solutions to contemporary issues. Topics covered will include factors that influence real-world decisions to manage natural resources more sustainably (e.g. political, economic, ethical factors). During the three hours of class meetings each week, lecture and exercises will be integrated. Field trips will be required. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENV 120 Introduction to Climate Change 3 Credits

This course offers students an overview of the human impacts on Earth's climate and emerging solutions to limit future climate change. Students will learn scientific insights into the interconnected components of Earth's climate as a system including the atmosphere, oceans, land, geology, and ice. Human effects on Earth's climate system will be contrasted with natural climate variation that preceded the industrial revolution. Students will also consider the personal, societal, and ethical implications of climate change through the lens of environmental justice.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits

This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.

Corequisite(s): ENV 200L.

ENV 200L Statistical and Computer Applications in the Natural Sciences Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): ENV 200.

ENV 205 Introduction to Geographic Information Systems 3 Credits

This course introduces the computer-based concepts and skills of Geographic Information Systems (GIS). It covers the basic GIS concepts, such as map characteristics and projections, spatial data models and analysis, and relational databases. It explores data sources, data quality, and metadata, as well as implementation and management of specific GIS projects. Hands-on experience with ArcGIS software is provided through a series of student exercises completed throughout the semester. Students will also be taught how to process both vector and raster data using ArcGIS software. The course is relevant for students from numerous disciplines in the natural sciences, social sciences, and business, which require the analysis and graphical representation of spatial data. Three hours of lecture per week.

ENV 220 Weather and Climate Change 3 Credits

This course introduces students to the concepts of weather and climate change. These concepts frame a continuum from short-term or daily changes in the atmosphere (meteorology) to those changes averaged over much longer periods of time (climatology). Students will learn the fundamentals of weather forecasting, the causes of natural variation in the Earth's climate, and the impact of human actions on the Earth's climate. Connections will be drawn to other current issues in the Earth system, including land use change, biodiversity, and pollution. Three hours of lecture per week.

Prerequisite(s): GEO 100 or permission of instructor.

ENV 290 Directed Research and Study in Environmental Sciences 1-4 Credits

Provides an opportunity for freshman and sophomore students to gain hands-on research experience in the environmental sciences. This is an individual program of study and each student will work with a selected faculty member on a topic of mutual interest. The course consists of a combination of project meetings, supervised research, and guided readings. The focus will be on formulating research questions, designing and conducting experiments, collecting the necessary data, reviewing the scientific literature as it relates to each student's research topic in weekly meetings with the instructor, and communicating the findings by writing a final project report.

ENV 320 Global Biogeochemistry 4 Credits

This course introduces students to global biogeochemical processes in the earth system and their influences on marine and terrestrial ecosystems. With a focus on systems thinking and interdisciplinary science, students will learn about the interactions of the biosphere, lithosphere, hydrosphere and atmosphere through elemental cycling and energy transfers. The course extends from the origin of our planet to the modern earth system and considers the anthropogenic impacts of climate change and pollution on humans and other species. Students will analyze scientific data with examples in regulatory and research settings. Students will also gain first-hand experience with field methods including sampling ocean and freshwater using various techniques and equipment and interpreting chemical data. Field trips may be required for this course. Course

Prerequisites: GEO 100 or GEO 113; GEO 102; CHE 120 & 121.

ENV 320L Global Biogeochemistry Lab 0 Credits

This course introduces students to global biogeochemical processes in the earth system and their influences on marine and terrestrial ecosystems. With a focus on systems thinking and interdisciplinary science, students will learn about the interactions of the biosphere, lithosphere, hydrosphere and atmosphere through elemental cycling and energy transfers. The course extends from the origin of our planet to the modern earth system and considers the anthropogenic impacts of climate change and pollution on humans and other species. Students will analyze scientific data with examples in regulatory and research settings. Students will also gain first-hand experience with field methods including sampling ocean and freshwater using various techniques and equipment and interpreting chemical data. Field trips may be required for this course. Course

Prerequisites: GEO 100 or GEO 113; GEO 102; CHE 120 & 121.

ENV 340 Environmental Field Methods and Data Analysis 3 Credits

This course will provide students with practical experience in field methods and data analyses within the environmental sciences. The course will include advanced activities incorporating field-based exercises, GIS analyses, statistical analyses, and database management. Students will also complete an independent project focused on a relevant topic. Local field trips during lab and on weekends may be required.

Prerequisite(s): MTH 105, GEO 100, GEO 102, and ENV 100; or Permission of Instructor.

ENV 350 Principles of Environmental Toxicology 3 Credits

A comprehensive description of the important principles of toxicology, including the absorption, distribution, metabolism, and excretion of toxic substances. Target organs systems will be discussed as well as mechanisms of carcinogenesis and teratogenesis. Specific groups of toxins to be discussed include: pesticides, metals, radiation, solvents and vapors, and plant and animal toxins. Three hours of lecture per week.

Prerequisite(s): BCH 225 or CHE 211, BIO 115 or BIO 117.

ENV 375 Environmental Biogeochemistry 3 Credits

This course examines the biogeochemical interactions among various environmental components, including water, rock, soil, organisms, and atmosphere. Covered topics focus on the relation between the biosphere and changes in the Earth's environment and atmosphere. The transfer of energy and nutrients within terrestrial ecosystems also is explored. Case studies from various examples will be used to understand ecosystem dynamics. Long-term environmental change and present-day ecosystem restoration activities are examined in the context of biotic offsets and land-use planning. The biogeochemical cycles of some environmentally sensitive compounds and elements in natural systems, such pesticides, mercury, and lead, also may be examined. Three hours of lecture per week.

Prerequisite(s): GEO 100 or GEO 113, CHE 120, CHE 121, CHE 122, CHE 123.

ENV 480 Senior Thesis 3 Credits

A senior thesis is optional for environmental science majors. However, a senior thesis is required for eligibility to graduate with honors in environmental science. The topic for investigation will be chosen by the student in consultation with the faculty of the Department of Geological, Environmental, and Marine Sciences. The student must initiate consideration of a proposal to the Department. The proposal must contain a discussion of the proposed project and a timetable to be followed in the study. A departmental committee consisting of a major and minor advisor will evaluate the written paper submitted at the conclusion of the study. An oral presentation before the department at the conclusion of the semester in which the study is completed is required. Proposals must be submitted in final form no later than the end of the ninth week of the semester prior to the semester in which the study is undertaken.

Prerequisite(s): senior standing in the geosciences major and permission of instructor.

ENV 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

ENV 491 Internship in Environmental Sciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placements may be in private, public, non-profit, or governmental organizations. These can include consulting firms, regulatory agencies, advocacy groups, and educational or research institutions. Normally, 50 hours of internship per credit is required. A mutually agreed upon method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and could include a term paper or project report and a poster presentation.

Prerequisite(s): 2.5 GPA and permission of instructor.

Exercise Science (EXS)

Courses and Descriptions

EXS 121 Exercise Injury Control and Management 3 Credits

This course is designed to provide the participant with entry level knowledge, competence, and skill in the care and prevention of injuries sustained during physical activity, sport, and exercise. This course includes units dealing with basic anatomy of common injuries, evaluation techniques, preventive measures to reduce the incidences of injuries and a knowledge of basic treatment procedures to be used after injuries occur. Legal and ethical issues will also be discussed.

EXS 320 Exercise Physiology 3 Credits

An entry level exploration of the physiological processes, metabolic requirements, and consequences of exercise in humans. Emphasis is placed on bioenergetics, as well as circulatory, respiratory, and neuromuscular responses to the physical stress of exercise performed for health and disease prevention.

Prerequisite(s): BIO 221, BIO 222.

EXS 321 Exercise Physiology Laboratory 1 Credits

EXS 321 is the laboratory course that accompanies EXS 320. Topics will include entry-level practical skills and competencies related to exercise capacity evaluation, interpretation of exercise data, and application of exercise interventions in a clinical setting. **Prerequisite(s):** BIO 221, 222 **Co-requisite(s):** EXS 320.

EXS 340 Exercise Testing & Prescription 3 Credits

An advanced, competency based course in the evidence based evaluation and prescription of exercise interventions in healthy and clinical populations. Prerequisite(s): EXS 320 Co-requisite(s): EXS 341.

EXS 341 Exercise Testing & Prescription - Lab 1 Credits

An advance, competency based laboratory course in the evidence based evaluation and prescription of exercise interventions in healthy and clinical populations Prerequisite(s): EXS 320 Co-requisite(s): EXS 340.

EXS 360 Foundations of Strength and Conditioning 4 Credits

This course examines the advanced methods and techniques associated with the design of strength and conditioning programs to enhance human performance in sport and fitness. This course is designed to develop, enhance, and apply knowledge and skills to prepare the student for the profession of strength and conditioning. Prerequisite(s): EXS 320, EXS 321, HSC 302.

Corequisite(s): EXS 360L.

EXS 360L Foundations of Strength and Conditioning Lab 0 Credits

This course examines the advanced methods and techniques associated with the design of strength and conditioning programs to enhance human performance in sport and fitness. Prerequisite(s): EXS 320, EXS 321, HSC 302.

Corequisite(s): EXS 360.

EXS 401 Organization and Administration in Exercise Science 3 Credits

This course examines the various issues, policies, and procedures involved with administrative aspects of exercise science in traditional and non-traditional settings. Emphasis is on administrative concepts, facility design, budgeting and equipment purchasing, personnel management, record keeping, and legal liability.

Prerequisite(s): EXS 360.

EXS 405 Special Populations & Considerations 3 Credits

This course is an advanced course in exercise programming for a variety of unique populations. Pathophysiology and considerations relative to diseases of the musculoskeletal, neuromuscular, and immunologic systems will be discussed. Recommended modifications and evidence based techniques that support fitness programming for individuals with specific exercise needs will be explored.

Prerequisite(s): EXS 320.

EXS 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in exercise science-related research. The student learns to organize material, use relevant medical/scientific literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

Prerequisite(s): Junior or senior standing; minimum GPA 2.5; EXS majors only; permission of instructor.

EXS 491 Internship in Exercise Science 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty member and should include keeping a journal of activities, a term paper or project report and an oral or poster presentation.

Prerequisite(s): Junior or senior standing; minimum GPA of 2.5; permission of instructor.

Film and Media Studies (FMS)

Courses and Descriptions

FMS 250 Global Film History: Origins to 1960 3 Credits

Examines major technological and aesthetic developments in both American and international cinema of the period, with an emphasis on global cinema. From silent comedy and melodrama to German Expressionism and Soviet activist cinema; from French poetic realism and Italian Neo-realism to Hollywood sound cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. FMS 250 is cross-listed with ENG 281 and fulfills the general education global perspectives requirement.

FMS 251 Global Film History: 1961 to Present 3 Credits

Examines major technological, industrial, and aesthetic developments in both American and international cinema of the period, with an emphasis on global cinema. From the decline of the studio system and the emergence of the "New Hollywood" to the digital revolution; from the renaissance in Western and Eastern European cinemas to Latin American, Asian, and Middle Eastern cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. FMS 251 is cross-listed with ENG 282 and fulfills the general education global perspectives requirement.

FMS 252 American Film History: Origins to 1960 3 Credits

Examines major technological and aesthetic developments in American cinema as it grew from the days of one-reel silent shorts exhibited in storefront theaters through the days of studio productions exhibited in lavish picture palaces and featuring iconic stars the system manufactured and promoted. From the inception of sound and color, to the later development of lightweight equipment that freed filmmakers from the confines of the studio, from the "golden age" to the gradual decline of the Hollywood studio system in the 1950s, we will study the lasting genres that grew out of the system, the filmmakers who flourished and those who rebelled against the system, and the ground-breaking films that established the American film industry as a dominant force within the world. FMS 252 is cross-listed with ENG 285.

FMS 253 American Film History: 1961 to Present 3 Credits

Examines the transitions of Hollywood in the post-studio era— the rise of the 1960s-1970s New Hollywood and its ground-breaking films, the rise of the blockbuster as an industry standard; the responses of independent filmmakers and the avant-garde to blockbuster dominance; the transition from the Production Code to the ratings system, the move back to studio-owned theaters, and the emergence of digital cinema and CGI. We will look at how genres are being redefined, how major filmmakers are re-shaping their work to fit 21st century demands, how "gaming," YouTube, and other media sources are altering the very definition of cinema. FMS 253 is cross-listed with ENG 286.

FMS 260 Great Performances in Film 3 Credits

Examines major accomplishments in film acting from the silent era to the present day. Students will acquire knowledge of the historical and critical contexts and the artistic vocabulary necessary to understanding, appreciating and assessing screen performances in a range of genres— from comedy and the musical, to the melodrama, psychological thriller, and "hard-boiled" film noir. Students will be asked to read, evaluate, and analyze film performance texts, as well as to research and write about performances in numerous films.

FMS 284 Language of Film Analysis 3 Credits

Provides students with the fundamentals necessary for achieving beginning proficiency in methods of cinema studies scholarship. The course provides an in-depth introduction to concepts of film analysis, theory, and history, as well as to the field of cinema studies as an academic discipline. Through close analysis of selected films and readings, students will examine the various and complex ways in which formal elements shape meaning. Students also will study key concepts in film theory, applying these concepts as a further means of understanding the ways in which film positions viewers and mediates ideology. Required of all Film and Media Studies minors. FMS 284 is cross-listed with ENG 284.

FMS 286 Writing Short Screenplays for Digital Cinema 3 Credits

Writing Short Screenplays for Digital Cinema will focus solely on the creation of a short screenplay for digital film. The course will ask that students conceive of and execute a viably producible screenplay, shooting script, and industry pitch for the modern market.

FMS 300 Special Topics in Film and Media Studies 3 Credits

Courses in specialized and interdisciplinary areas of Film and Media Studies explore all three phases of the media experience: the industry that produces, distributes and exhibits; the textual products themselves; and audience reception of these products. FMS 300 Special Topics in Film and Media Studies courses will focus on each of the phases individually and/or on intersections of all three phases. Special topics courses will devote attention to the relationship of film to both traditional as well as new media; the relationship of film to the other arts; the relationship of film to the ancillary products and industries it both creates and depends upon for financial profit; and the relationship of film as an industry and institution to the various cultural institutions film and media texts routinely represent.

FMS 340 Film and Media Audiences 3 Credits

Provides students with the fundamentals necessary for understanding media audiences and reception within the interdisciplinary framework of film and media studies. The course introduces students to the field of audience and reception studies, including theory, empirical scholarship and history. Students will learn about who composed audiences, how they behaved, how they responded to the medium and the texts it delivered, how they interpreted what it meant to be an audience, how audiences were defined and treated by others, both today and historically. This will include audiences of movies, radio, television and news media.

FMS 342 Artists of the Cinema 3 Credits

Provides the opportunity to delve into the work of an individual film artist (whether a director, producer, screenwriter, cinematographer, costume designer, art director, musical composer, actor) or to examine a creative team (various combinations of a director, actor, cinematographer, screenwriter) that has collaborated in producing a series of films together. The course will pose the daunting question: Who is the author of the film? Even when studying individual artists, we will explore the influences and the working relationships that have shaped their work, and we will look outward to the way in which they have influenced other artists of their own generation and beyond.

FMS 380 Women in Film 3 Credits

Examines the work of women filmmakers from the silent to the contemporary eras. Drawing from different periods, genres, and contexts of film production, this course will explore questions including: How does a focus on women filmmakers reframe our understanding of film history and production? How are feminist theoretical approaches to film challenged or reinforced in films made by women? Does a "female gaze" exist, and what would this idea mean for understanding and analyzing audiovisual narrative? The exploration of these questions will enable greater historical and theoretical awareness of cinematic contexts and hone skills in film analysis.

FMS 381 Studies in Film Genre 3 Credits

Provides an in-depth examination of a variety of film genres (such as the gangster film, the western, the musical, the screwball comedy, the science fiction film, and the horror film, among others), to be examined through the perspective of film genre theory. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing specific genres, and will trace the development of those genres within the dual contexts of the film industry and cultural ideology. Note: This course is cross-listed as ENG 381. Students may not get credit for both ENG 381 and FMS 381.

FMS 382 Comparative Film Directors 3 Credits

Provides an in-depth comparative study of major American, international, independent and avant-garde filmmakers. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing the work of individual directors and will draw meaningful comparisons among directors sharing similar aesthetic and thematic approaches. Students will trace the artistic development of directors through their careers, assessing individual works in the context of film criticism and theory, and in the context of multi-layered intertextual influences. Note: This course is cross-listed as ENG 382. Students may not get credit for both ENG 382 and FMS 382.

FMS 383 Global Cinemas 3 Credits

Provides an in-depth study of the history and defining characteristics of national cinemas. Through close analysis of selected films and readings, students will examine the general movements within the history and development of various national cinemas, with attention to film historiography when considering how patterns are to be viewed in light of the culture, politics, and history of a particular producing nation. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as ENG 383. Students may not get credit for both ENG 383 and FMS 383.

FMS 384 Film Adaptation 3 Credits

Provides an in-depth study of intertextual influence, as film enters into "dialogue" with various literary forms. Through close analysis of selected films and various forms of literature-including novels, graphic novels, short stories, plays, poetry, and journalism-students will study the aesthetic specificity of both film and literary genres and will analyze the transformative qualities at play when a work is adapted from page or stage to screen. Note: This course is cross-listed as ENG 384. Students may not get credit for both ENG 384 and FMS 384.

FMS 484 Seminar in Cinema Studies 3 Credits

Provides an in-depth study of areas central to discussion and debate in the field of cinema studies (such as film violence, cinema censorship, feminism and film, post-colonial cinema, African- American cinema, blaxploitation, The French New Wave, and Italian Neorealism, among others). Through close analysis of selected films and readings, students will examine the impact of specialized influential movements in film history and in film theory and criticism. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as ENG 484. Students may not get credit for both ENG 484 and FMS 484.

FMS 490 Independent Study: Research and Creative Expression 1-4 Credits

FMS 490 Independent Study will allow Film and Media Studies minors to pursue specialized areas of study, research and/or creative work relevant to the field of Film and Media Studies in consultation and close collaboration with a Film and Media Studies faculty member.

FMS 491 Internship in Film and Media Studies 1-4 Credits

FMS 491 Internship in Film and Media Studies will provide approved juniors and seniors minoring in Film and Media Studies with the opportunity to gain practical experience through work in various outside film and media-related publications, businesses, organizations, and production companies.

Film and Television (FTV)

Courses and Descriptions

FTV 135 Filmmaking I 3 Credits

Filmmaking I introduces students to basic film and television production theories, techniques, and applications. Students will gain competency in a number of production areas including composition, lighting, filmic storytelling, sound, production planning and editing. As well as gaining practical production experience, students will also be introduced to basic art theory in relation to composition and visual storytelling.

FTV 202 Global Film & Media Industries 3 Credits

An introductory survey of the international film and television industry that will provide students with a global perspective of this ever-evolving industry. First, providing a basic foundation of key historical, economic and cultural factors and initiatives impacting and shaping films and television programs, this course will provide students with the tools to better understand the influence that globalization has on the film and television industry and the impact the products of this industry may have throughout the world.

FTV 221 Animation: History, Art, Industry & Culture 3 Credits

An introduction to the history of animation in film and television, this course will explore animation as art, industry, and purveyor of culture. Through this course, students will gain a greater appreciation for aesthetics, technology, and the cultural and communication theories impacting and influencing the genre, and gain a greater understanding of the role played by key individuals and companies in the development of both iconic characters and in the shaping of an industry. Students will view a variety of important animated films and television programs and discuss the artistic, technical and narrative developments in animation from the early 20th century to the present. This course will provide students with a more nuanced understanding of the magic of animation and its impact and influence on culture and society throughout the globe.

FTV 230 Foundations of Film, Television and Radio 3 Credits

Examines film, television and radio industries, the programs they create and the powerful role they play in society. This course will examine the history, technology, structure, programming and regulation of these industries including issues, trends, and the impact of new and evolving technologies.

FTV 231 Film and Television Special Studies 1 Credits

Course descriptions will vary from topic to topic. This course will be offered Pass/Fail.

FTV 235 Filmmaking II 3 Credits

This course will build on the basic technical proficiency gained in COM 135 as applied to narrative filmmaking. Working as individuals and in groups, students will develop skills in narrative cinematic storytelling, and gain a basic proficiency in filmmaking theory, techniques and applications. Students will gain competency in a number of production areas including idea generation and scripting, production planning, cinematography, lighting, sound and editing.

Prerequisite(s): COM 131.

FTV 236 The Aesthetics of Filmmaking 3 Credits

Introduces general students (other than FTV majors or FMS minors) to a greater appreciation of film art and the various generic and artistic approaches adopted by noteworthy filmmakers through the course of film history. Through film viewing, class discussion, readings, essay writing and creative responses, students will learn how formal choices in cinematography, production and sound design, screenwriting, and acting shape cinematic themes and atmosphere, while forging viewer identification and eliciting emotional response. Among readings will be those on introductory film theory, key works of film criticism, interviews with filmmakers, and scholarship on the aesthetics and ideological underpinnings within various film genres and in the work of selected filmmakers.

FTV 238 Screenplay Fundamentals 3 Credits

Screenplay Fundamentals will instruct students in how to write for the screen. Students will learn how to convey story and character through the medium of film and television, how to write effective dialogue, and understand the basics of dramatic writing and scene structure.

Prerequisite: COM 131.

FTV 239 YouTube: Content and Culture 3 Credits

YouTube, one of the most well-known and widely discussed examples of participatory media in the social media environment, is the first generally popular platform for user-created video. Blending theory and practice, this course examines the social, cultural, economic, and political implications of YouTube; the empowerment and pitfalls of the user-generated content it relies on; and the implication of the participatory media which has transformed passive viewers into active producers. Students will learn the historical roots of YouTube, become familiar with modes of media production, and study legal, ethical, and social justice issues related to the creation of channels and videos for YouTube. While the course has a significant theoretical component, students will engage directly in participatory practices by designing and creating course related content for YouTube. Through this course, students will gain a critical understanding of and a greater appreciation for the impacts of user generated video content on social and political participation locally and globally.

FTV 241 Sound Design 3 Credits

This course is an introduction to sound design and editing for film, television and game design. The course examines the use and placement of sound and music in visual media from both an artistic and technological perspective, and discusses how sound and music might be used to convey meaning, enhance and strengthen visual elements, provide narrative cues, create a sense of depth and place, focus attention on actions and provide structure and ambience to the visual. Along with covering the basics of sound recording, microphone selection and use, and mixing techniques, topics such as ADR (Automatic Dialog Replacement), Foley, sound and music synchronization and sound in post-production are covered. Numerous examples of sound design for film, television and gaming will be analyzed and discussed in class.

FTV 243 The Actor and Filmmaker 3 Credits

A practicum course that instructs the student on how actors and directors work together to build a performance. The course will provide on-hands experience in technical aspects of behind and in front of camera processes in capturing an actor's performance, exploring the demands and particularities of acting for the camera. This course will also serve as an introduction to basic acting theories and practices as they relate to how actors work to express a character onscreen. Elements of this course include monologue and scene rehearsal and performance (both multi-camera and single camera), audition techniques (for both actors and directors), and how film directors block and cover a scene. Students will gain experience both behind and in front of the camera.
Prerequisite(s): COM 131 or FTV 135 for Film/TV majors or THE 110 for Theater majors.

FTV 250 Television Studio Production I 3 Credits

This introductory course is designed to expose students to the processes, equipment, production roles, techniques and goals of in-studio television production. Serving as directors, writers, on-camera hosts, etc., students will gain valuable, direct hands-on experience with the technical and creative challenges faced during the various phases of studio production from pre-production planning through actual remote and live studio work. Emphasis will be placed on studio operation and technology; the roles and responsibilities of the production crew; and the pressures faced during the direction of live, multi-camera productions.
Prerequisite(s): COM 131 or FTV 135.

FTV 261 Television: Past, Present & Future 3 Credits

This course will survey television from its early days through the modern digital eras and examine how historically specific social, cultural and economic forces have influenced and shaped content, regulation, technology, audiences, the industry, and society itself. From the early days of Live TV and the advent of programming genres, through the New Golden Age of Television in the modern era, this course will provide a critical framework for better understanding of how various factors have interacted to shape the development and evolution of television broadcasting and allowed television to become a significant and influential socio-cultural institution.

FTV 282 Solo Filmmaking 3 Credits

Solo Filmmaking takes an individual/DYI approach to all aspects of filmmaking. Over the course of a semester, students will do it all on a solo short film project: conceive an idea, write the script, run all aspects of pre-production (casting, location scouting, shot listing, production design), perform all technical sides of production (scheduling, directing, sound recording, cinematography) as well as post production (editing, color, sound mix). Designed for the fiercely-independent student, this course is of value to the experienced and inexperienced filmmaker alike.

FTV 291 Documentary Film and Video 3 Credits

Surveys the history of documentary film, including reportorial, exploratory, persuasive, symphonic, compilational, reflexive, and fictional traditions through screenings, lectures, and readings. Provides practice in film criticism. Explores philosophical questions about the relationship between non-fiction films and videos and the reality they purport to record. Analyzes ethical problems of filmmaking.

FTV 295 Cinematography I 3 Credits

This course introduces the art of cinematography from historical, aesthetic and practical perspectives. Students will learn the principles of cinematic composition, lenses, lighting, and camera operation while studying the work of great cinematographers in film history.
Prerequisite(s): COM 131.

FTV 305 Editing and Post-Production 3 Credits

This course covers the theories and principles of editing and post-production processes for film, television, and digital media. Through exercises and assignments, students will be introduced to editing as both a technical process and an artistic endeavor. Students will learn editing theory, the technique and workflow of picture and sound editing, basic post-production terminology, editing rules and how to break them, editing aesthetics, color timing, and color correction. Strong emphasis will be placed on the technical, analytical, and practical techniques necessary to further creative expression.
Prerequisite(s): FTV 235.

FTV 328 Sitcoms and American Culture 3 Credits

Provides an overview to the unique and highly structured form of the American television situation comedy. The primary focus will be on history and development with in-depth study of situation comedy themes, characters, and settings. Through lectures, case discussions, in-class assignments, and class projects, students will examine the social and cultural meanings and implications of this incredibly popular and durable genre of programming.

FTV 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a different culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

FTV 333 Media Program Development and Distribution 3 Credits

Critically analyzes the theory, practice, structure, and function of media program development and distribution. Examines the structure of the field as it relates to programming, the industry and audiences. Studies program categories, formats, genres, trends, and audience measurement and analysis as well as the new and evolving technologies responsible for program development and distribution.
Prerequisite(s): FTV 230.

FTV 335 Documentary Production 3 Credits

This course serves as an introduction to documentary filmmaking. Students will be introduced to a wide variety of documentary styles and approaches and learn the basics of documentary production. Working in teams, students will gain firsthand experience with on-camera interviews, conducting documentary research, using practical and source lighting, scripting, and working with a variety of source material in constructing their own short documentary projects.

Prerequisite(s): FTV 135 or COM 131.

FTV 339 Developing The Feature-Length Script 3 Credits

Developing the Feature Length Script will instruct students how to write a full-length film or television program. Students will learn the mechanics of 3-act and 7-act structure, and during the course they will develop a logline, synopsis, treatment, and sample scenes of a full-length project.

Prerequisite(s): FTV 238.

FTV 343 Actor and Filmmaker Practicum 1 Credits

A workshop class designed to give acting and filmmaking students an opportunity to collaborate on narrative film and television projects. During this class students will work closely with the directors on building compelling performances for the screen. Students will gain practical experience with auditioning, blocking of scenes, developing their characters and techniques for working effectively and efficiently with a director and crew.

Prerequisite(s): FTV 135 or THE 110.

FTV 390 Film, Television and Society 3 Credits

Examines in a topical manner the influence of film and television upon significant issues affecting people and society. May explore important media figures such as directors, producers, and actors, and their importance in these industries. May also explore various genres of narrative, documentary, commercial, music video, web-based, and other types of media production. May be taken more than once with different emphasis.

FTV 392 Media History: Personalities and Trend 3 Credits

Presents in a topical manner the history of the media from various perspectives, seeking to place the material into a meaningful economic, cultural, political, and/or social context. Different issues and related individuals are examined, such as the golden age of radio, motion picture economics, and media empire builders, with a view toward understanding their significant impact on the development and functioning of the media today. This course may be taken more than once with a different emphasis.

FTV 395 Los Angeles Media Experience 3 Credits

This course is a practical exploration of the workings of the contemporary film and media industries in Los Angeles, California, and is designed as a required compliment for students enrolled in Rider's Semester in Los Angeles program. Focused on both major studios and independent production companies, this course explores how media are created, distributed and consumed in the U.S. and around the world. Students will examine the role of creativity, economics, an ever-evolving technology and the impact they have on how this industry operates today and where it may be heading into the future. The class will stay current by regularly reading trade publications and, through guest lectures, have many opportunities to hear directly from industry professionals about issues and challenges facing the field.

Prerequisite(s): POI (restricted to students enrolled in the Department of Film and Television Semester in Los Angeles program).

FTV 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. **Prerequisite(s):** junior standing and 2.75 GPA at the time of registration; .

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

FTV 402 Directing for Film 3 Credits

This course approaches directing both creatively and critically, and examines the role and importance of the director to the filmmaking process. The transformation of the written script into a film is explored through readings, viewing and analyzing the films of accomplished directors. Lectures and exercises illustrated with film clips and readings emphasize plot development, script analysis, developing storyboards and shot lists, rehearsal, blocking, collaborating with talent and production crew, and using the camera to effectively capture action and performance. Students will gain an effective understanding of the role of the director through the various stages of film production, and be provided the opportunity to demonstrate and cultivate his/her effectiveness as a director through individual and group assignments.

Prerequisite(s): FTV 235 and COM 338.

FTV 435 Filmmaking III 3 Credits

This is an intensive hands-on course in advanced digital filmmaking. Students will gain proficiencies in a number of filmmaking areas including production planning, aesthetics, scripting, script breakdown, camera movement, selecting and directing talent, creating scenes and sequences, visualizing action, establishing mood and conflict, as well as advanced lighting, sound and digital editing techniques. The students' use of high definition digital imaging systems as a medium for narrative cinematography will be developed and refined. In addition, students will explore how filmmaking techniques and technology can impact the visual storytelling process. Students will work cooperatively in groups, modeling the interdependent structure of professional film crews. Throughout the class, there will be an important integration of theory and practice which will enable students to produce meaningful film projects that will not only be technically effective, but strong in content and context as well.

Prerequisite(s): FTV 235.

FTV 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

FTV 491 Internship in Film and TV 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Finance (FIN)

Courses and Descriptions

FIN 200 Managing Your Money 3 Credits

An introduction to the analysis of a wide range of financial decisions which individuals encounter over their careers and lifetime. Topics include financial goals, tax planning, home ownership versus renting, consumer credit, money management and investments, and managing risk with insurance. This course is open to all Rider students, and it counts as a free elective or a business elective. It cannot be used as finance elective.

FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

Prerequisite(s): ACC 210 and ECO 201.

FIN 305 Personal Financial Planning 3 Credits

This course focuses on practical issues and problems involving personal financial budgeting, use of credit, selection of banking services, insurance needs, real estate, investments, tax planning, and retirement planning. An important objective of the course is to provide the student with the tools that are utilized in making personal financial decisions and how to apply those tools for a variety of financial needs.

Prerequisite(s): FIN 220.

FIN 307 Financial Markets & Institut 3 Credits

This course provides an introduction to the organization and behavior of financial markets and institutions in the economy. The factors determining security prices and interest rates in the money and capital markets are analyzed. An overview of all major financial institutions is presented. In addition, market returns, the regulatory environment, and monetary policy are examined.

Prerequisite(s): FIN 220 or concurrent with FIN 220.

FIN 308 International Finance 3 Credits

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

Prerequisite(s): FIN 220.

FIN 309 Intermediate Corporate Finance 3 Credits

This course builds on and extends the concepts of financial management learned in FIN 220. The course examines long-term corporate financing and investment decisions and how those decisions interface with each other. Topics covered include: cost of capital, financial planning and analysis, capital budgeting, capital structure and dividend policy.

Prerequisite(s): FIN 220.

FIN 312 Investments 3 Credits

The fundamentals of investing in stocks, bonds, and other negotiable instruments are covered. Major topics include trading on securities markets, mutual funds, international investing, margin accounts, short sales, determinants of securities prices, and investment risks. Stock options, financial futures, convertible securities, and implications of taxes on investment decisions are also discussed.

Prerequisite(s): FIN 220.

FIN 315 Financial Modeling 3 Credits

Provides instruction in computer use beyond what is available in other finance courses. Topics include more sophisticated applications of computers in financial management, investments, and other areas of finance and business. Students work on cases and projects which require more advanced usage of spreadsheets and other software and databases.

Prerequisite(s): CIS 185 and FIN 220.

FIN 330 Corporate Cash Management 3 Credits

This course is designed for business students seeking an understanding of modern principles and techniques for corporate treasury management. The course material is useful for finance, accounting, and banking professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multi-national cash management, and other related topics.

Prerequisite(s): FIN 220.

FIN 340 Risk Management 3 Credits

This course examines the risk management process as applied to the firm as a whole. It integrates the management of all risks facing the firm: strategic, financial, hazard, and operational. Techniques for identifying risk, measuring and analyzing it, and selecting an appropriate treatment will be explored.

Prerequisite(s): FIN 220.

FIN 350 Entrepreneurial Finance 3 Credits

This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.

Prerequisite(s): FIN 220.

FIN 360 Fixed Income and Derivatives 3 Credits

This course centers on the quantitative portion of the Chartered Financial Analyst (CFA) level 1 curriculum, which includes materials on fixed-income risk and return, fundamentals of risk analysis, derivative instruments and risk management applications of option strategies. The goal is to help students prepare for the exam, as well as introduce them to a variety of topics in finance.

Prerequisite(s): FIN 312.

FIN 370 Financial Analysis and Ethics 3 Credits

This course covers the topics of financial reporting and analysis and related ethical issues. The course would benefit students interested in augmenting their ability to understand, analyze and apply the information in financial statements. It provides essential knowledge for students seeking either the Certified Management Accountant (CMA) or Chartered Financial Analyst (CFA) certifications. Specifically, the course covers the Ethics and Professional Standards of the CFA curriculum, and materials on financial reporting quality and financial statement analysis. Course goals are to help students prepare for the certification exams, as well as introduce all interested students to a variety of topics in financial analysis and ethics.

Prerequisite(s): FIN 312 or POI.

FIN 380 Real Estate 3 Credits

Real estate finance and related subjects in real estate are examined. Topics include measuring cash flows and taxes, valuation methods for real estate investment decisions, location and value in real estate, home ownership, legal matters, and financing methods and techniques.

Prerequisite(s): FIN 220.

FIN 399 The Co-Operative Experience 6 Credits

The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their finance and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Eligible students include finance majors with at least junior status, a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in any finance coursework completed prior to the submission of the co-op application. Co-op credits can be applied toward business or free elective requirements but not toward finance elective requirements for majors. Grading is on a pass/fail basis.

Prerequisite(s): FIN 220.

FIN 405 Private Wealth Management 3 Credits

This course utilizes the Chartered Financial Analyst (CFA) curriculum and focuses on private asset management for high-net-worth investors. A wide range of topics including managing individual investor portfolios, taxes, estate planning, concentrated single-asset positions and individual risk management will be covered via lecture discussions. The main objective for the course is to help students develop the skills for a career in wealth management.

Prerequisite(s): FIN 305.

FIN 412 Investment Analysis 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory introduced in FIN 312. Students interact with and make recommendations to professional portfolio managers. Topics include analysis and forecasts of business conditions, market interest rates, international opportunities, and corporate profits. Emphasis is placed on the valuation of securities, stock selection, investment timing, technical analysis, and management of portfolio risk with options, futures, and other tools.

Prerequisite(s): FIN 312 or permission of instructor.

FIN 469 Special Topics in Finance 3 Credits

This course is occasionally offered, with the topics and prerequisites set by the finance program.

FIN 490 Independent Study: Research and Creative Expression 3 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation. This course can be used as a business or free elective, but with prior approval it can also be used as finance elective.

FIN 491 Finance Internship 1-3 Credits

The internship offers qualified junior and senior finance majors supervised employment with participating companies. The internship may be taken during the fall or spring semester or during the summer session. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a term paper that will be reviewed by the major's internship director. Internship credits can be applied toward business or free elective requirements but not toward finance elective requirements for majors. Grading is on a pass/fail basis.

Prerequisite(s): permission of instructor.

Fine Arts (ART)

Courses and Descriptions

ART 103 Fundamentals of Drawing 3 Credits

An intensive study of drawing techniques in charcoal, pencil, and pen and ink.

ART 104 Survey of Art History I 3 Credits

The history of Western art, architecture, sculpture, painting from prehistoric times through the Middle Ages, emphasizing the relation between the arts and ideas of each period.

ART 105 Design 3 Credits

Basic concepts of composition, form, texture, value, and color in two-dimensional design are explored.

ART 106 Survey of Art History II 3 Credits

The history of Western art, architecture, sculpture, painting from the Renaissance to the present, emphasizing the relation between the arts and ideas of each period.

ART 120 Art and Society 3 Credits

Masterpieces of architecture, painting, and sculpture are related to their historical periods, providing an appreciation for and understanding of the vital interaction of art and society.

ART 150 Digital Foundations 3 Credits

Industry standard digital tools are used to explore the basic concepts of composition, form, texture, value, and color in two-dimensional design. Further consideration of digital formats and technologies in the visual arts will be highlighted.

ART 199 Arts in Contemporary Civilization 3 Credits

An integral study of the arts and their place in contemporary American life. Includes attendance at several events in art, music, and drama. Spring.

ART 201 Art of the Ancient World 3 Credits

The arts of ancient man from prehistoric times to the fall of the Roman Empire.

ART 204 Fundamentals of Painting 3 Credits

Introduces students to the materials and techniques of oil or acrylic painting. Emphasis on experimentation and the development of individual expression in a variety of subject matters.

Prerequisite(s): ART 103 or concurrently.

ART 207 Medieval and Renaissance Art 3 Credits

A study of the major monuments of architecture, painting, and sculpture created in Western Europe between 300 and 1600. Particular emphasis on the history of Christian art, from its beginnings in the Roman catacombs, to the great monasteries and cathedrals of the High Middle Ages, to the revival of ancient Roman grandeur and forms in the Renaissance.

ART 209 Art of the Baroque 3 Credits

The art of the 17th century in southern and northern Europe.

ART 214 American Art 3 Credits

The development of the arts from colonial America to World War I. Discusses major economic, social, and political factors that influenced the course of American art history.

ART 227 Gallery Management 3 Credits

Designed to provide students with the experience of working in all aspects of art gallery management. It is intended for students regardless of their major who wish to add the dimension of art to their college experience through direct hands-on curatorship of the Rider Art Gallery.

ART 230 Three-Dimensional Design 3 Credits

Beginning problems in traditional sculptural materials (clay, wood, stone) and design-construction in mixed media.

ART 303 19th Century Art 3 Credits

An in-depth study of the major art movements in 19th-century Europe, from Neoclassicism to Postimpressionism.

ART 304 Drawing II 3 Credits

Studies the art of drawing beyond the introductory level with an emphasis on greater self-expression, advanced technical skills, and a variety of drawing media.

Prerequisite(s): ART 103.

ART 305 Intermediate Painting A-B-C 3 Credits

Studio courses designed to expand the student's creative experience in painting with emphasis of greater self-expression. Students will be presented with specific painting projects that originate from conceptual or perceptual responses to reality (still life, landscape, figure) and to imagination (dreams, fantasy, invention). Class trips to galleries and museums are included. May be taken three times.

Prerequisite(s): ART 204.

ART 306 Art of the 20th Century 3 Credits

The major artists and movements in the history of 20th-century painting and sculpture from Postimpressionism. Slide lectures, class discussion, field trips.

ART 310 Figure Drawing and Painting 3 Credits

Students will draw and paint from various sources, including the live model, clothed and nude, to understand the structures, gestures, and psychological aspects of the human body in art.

Prerequisite(s): ART 103 and ART 204.

ART 335 Printmaking 3 Credits

A studio introduction to various traditional and contemporary relief printmaking techniques.

ART 352 Motion Graphics 3 Credits

This course will provide an introduction to the use of industry standard tools and methods employed in motion and animation design. Concepts of composition, form, style, and continuity of motion will be key. Focus will be placed on 2D rendering with contemporary tools, as well as underlying theory and critique. Consideration of cross-media techniques utilized in game design, streaming media, film and television will be highlighted.

Prerequisite(s): ART 150.

ART 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1 to 4 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing, good academic standing.

ART 491 Internship in Art 1-12 Credits

Provides junior or senior fine arts majors with concentrations in art with the practical experience of working with a museum or professional art gallery. Students must be sponsored by an art professor. For each academic credit, interns must work 48 hours for the semester or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

ART 492 Advanced Studio Workshop 3 Credits

Intensive course in various media for students working at an advanced level in studio disciplines. A high level of achievement is expected. May be taken more than once for credit.

Prerequisite(s): two upper-level studio courses.

ART 493 Special Topics in Studio Art 3 Credits

Study in drawing and painting of a particular style, such as abstraction or subject, such as still life; or particular aspects on a museum collection, such as the Metropolitan.

Prerequisite(s): ART 103 and ART 105 or Permission of Instructor.

ART 495 Selected Topics in Art History 3 Credits

An intensive study of a particular art history topic, e.g., a single artist, artistic center, or artistic medium. Slide lectures, class discussion, field trips, class reports. Topics to be announced.

ART 496 Fine Arts Internship 6-12 Credits**ART 499 Senior Honors Program 3 Credits**

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, planned under the direction of a faculty advisor, represents a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Foreign Language and Literature Education (FLE)

Courses and Descriptions

FLE 320 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to general linguistics and basic contrastive study of English, French, German, and Spanish sounds, forms, and syntax. Students visit schools where they interview language learners and sample their speech for analysis. Applications of these studies are made to creating instructional materials and to teaching. Theories of language acquisition as well as factors affecting second language learning, including learning styles and personality, are studied. A rationale for communicative language teaching and learning is constructed. Note: This course is cross-listed as EDU 320. Students may not get credit for both FLE 320 and EDU 320.

FLE 420 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolios and philosophy of second language teaching, prepare a thematic unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. Note: This course is cross-listed as EDU 420 and EDUC 521. Students may not get credit for FLE 420, EDU 420, and EDUC 521. A cumulative GPA of 2.75 is required. **Prerequisite(s):** EDU 106 and EDU 206.

Foreign Literature (LIT)

Courses and Descriptions

LIT 250 Masterworks of Western Literature I 3 Credits

Introduces the classical heritage and the development of a connected Western literary tradition as reflected in the classics of Western literature from the Greeks to the Renaissance. This course focuses particularly on the qualities, which make each work great. Works by Homer, Aeschylus, Sophocles, Euripides, Virgil, St. Augustine, Dante, and Shakespeare are read and discussed in English. Required for all foreign language majors.

LIT 251 Masterworks of Western Literature II 3 Credits

Introduces modern world literature and the further development of the Western literary tradition from the Enlightenment, through Romanticism, to the contemporary period. Major writers such as Moliere, Racine, Voltaire, Rousseau, Goethe, Tolstoy, Baudelaire, Yeats, Rilke, Ibsen, Mann, Kafka, and Borges are read and discussed in English. Required for all foreign language majors.

LIT 310 Russian Literature 988-1850 3 Credits

A reading and discussion of some of the greatest Russian writers of the first half of the 19th century. Writers include Pushkin, Lermontov, Gogol, Turgenev, and Tolstoy. Classes are in English. No knowledge of Russian required. Required for majors.

LIT 311 Russian Literature 1850-1917 3 Credits

A reading and discussion of some of the greatest Russian writers of the second half of the 19th century and early 20th century. Writers include Dostoevsky, Leskov, Chekhov, Bunin, Gorky, Blok, Bely, and Sologub. Classes are in English. No knowledge of Russian required. Required for majors.

LIT 312 20th Century Russian Literature 3 Credits

A reading and discussion of some major Russian writers from 1917 to 1970. Writers include Akhmatova, Tsvetaeva, Babel, Bulgakov, Pasternak, Mayakovsky, and Evtushenko. Classes are in English. No knowledge of Russian required. Required for majors.

LIT 315 Tolstoy 3 Credits

Reading and discussion of selected works of Tolstoy including his fables; novellas, such as Master and Man and The Kreutzer Sonata; and either Anna Karenina or War and Peace. Classes are in English. No knowledge of Russian is required.

LIT 317 Dostoevsky 3 Credits

Reading and discussion of selected works of Dostoevsky, with special emphasis on Crime and Punishment and The Brothers Karamazov. Classes are in English. No knowledge of Russian required.

LIT 322 German Literature & Film in English Translation 3 Credits

Reading and discussion in English of German literary masterpieces and their film adaptations. The material varies from year to year, e.g., German-Jewish writers, German Romanticism, German literature to 1700, modern fiction, or 20th-century women's literature and film. No knowledge of German required.

LIT 325 The Folk Tale 3 Credits

Introduction to the study of folk tales from a literary point of view, to the place of folk tales in European culture, and to the contrast between folk tales and written fairy tales such as Beauty and the Beast and Cupid and Psyche.

LIT 330 Russian Culture 3 Credits

Readings highlighting both the uniqueness of Russian culture and the ways Russian culture has had the greatest impact on Western culture in general. The course is divided into topics such as folklore, religion, painting, music, ballet, and film. Readings from Russian literature will be used to illustrate significant aspects of Russian culture. Classes are in English. No knowledge of Russian is required.

LIT 340 Hispanic Literature & Film in English Translations 3 Credits

This course explores literary and cinematic masterpieces in English translation. Attention is focused on their relationship to the intellectual, artistic, and historical background of Spain, Latin America, and/or United States Latino cultures. No knowledge of Spanish is required. Open to Spanish majors, but no credit given toward the specific requirements of the major.

LIT 370 European Short Novel 3 Credits

Introduces students to the study of the novella as a distinct literary genre in Europe. Discusses various theories of the novella and the history of the novella in Europe. Will read and discuss such masterpieces of the novella as O, The Queen of Spades, A Simple Heart, and Death in Venice.

LIT 390 The Bible As Literature 3 Credits

This course takes a literary approach to the Bible: only one, of course, of the many possible approaches to this rich and fascinating text. Nevertheless this approach to the Bible is justified both because the Bible is a literary masterpiece and because such an approach provides a clear focus for students. Students will read and discuss selections from the three major divisions of the Bible: the Old Testament, the New Testament, and the Apocrypha. Students will also read famous stories such as Joseph and his Brothers, Moses and Exodus, Samson and Delilah, Jonah and the Whale, Susanne and the Elders, The Raising of Lazarus, and The Trial and Execution of Jesus.

French (FRE)**Courses and Descriptions****FRE 100 French I 3 Credits**

Conversational French is taught through basic vocabulary and grammar building. Students will enjoy an immersion-style method emphasizing real-life situations and vocabulary in authentic cultural context, through an interactive textbook, videos, on-line resources, and oral/aural skill building using the technology in the Foreign Language Media Center to enhance learning. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): Placement test if French has been studied elsewhere.

FRE 101 French II 3 Credits

Building on learning in French I, students will begin to converse using more complicated grammatical structures within immersion-style classroom interactions. While the focus is still on conversation and aural skill building, composition skills receive greater emphasis. Students will enjoy an interactive textbook, Internet usage, and authentic videos shot on location in France. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): FRE 100 or placement test.

FRE 200 French III 3 Credits

This course builds on linguistic skills previously acquired through an emphasis on conversation and oral comprehension, and through vocabulary building. Grammar study is continued at a more advanced level, and students begin to read short passages focusing mainly on francophone culture and civilization. Film clips, Internet resources, and other computer-aided learning tools are used to create a dynamic immersion-style learning experience. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): FRE 101 or placement test.

FRE 201 French IV 3 Credits

While continuing the emphasis on aural/oral production and grammar and vocabulary building, short passages of greater complexity taken from literary texts, newspapers, and magazines will become the focus of conversation/composition activities. Technological resources will continue to enhance the immersion-style learning experience consistent with a course in advanced French. Successful completion of this course, or its equivalent, serves as a prerequisite for French courses at the 300 and 400 level. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): FRE 200 or placement test.

FRE 300 French Composition/Translation 3 Credits

An in-depth study of style, shades of meaning, and correctness of expression. Translation of business/professional/scientific/political texts will receive emphasis, and students will continue to perfect their writing skills, and review and improve advanced grammatical structures.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 301 French for Business 3 Credits

The fundamentals needed to survive in the French professional and business world are taught. Students will continue to perfect oral/written/aural skills while learning about the cultural climate within which these skills will be used. Students will learn how to prepare effective business/professional correspondence and, through role-playing activities, will use their knowledge in such real-life situations as interviewing, telephone conversations, and business meetings.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 305 An Introduction to French Literature 3 Credits

A chronological overview of the evolution of French literature from the Middle Ages to the present. Study and interpretation of selected works, authors or literary movements through the Renaissance, the classical period, Enlightenment, romanticism, realism, naturalism to representative works by authors of our century from Proust to existentialism, the nouveau Roman, theatre absurde and beyond.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 311 French Culture 3 Credits

A study of modern France and French value orientations as they are rooted in tradition and history and continue to shape everyday life as well as institutions, social organizations, artistic expression, education, attitudes and human interaction. A comparative approach will examine the underlying differences between France and the United States. Classes are in English.

FRE 320 French Phonetics and Conversation 3 Credits

This course is an introduction to French phonetics and is designed to help students further develop their skills in speaking French accurately and fluently. The course requires students to learn basic linguistic symbols and the phonetic alphabet as a theoretical step toward improving articulation and pronunciation. Moreover, special emphasis will be placed on the development of vocabulary and of appropriate communication techniques to participate in discussions in French. The course will be a mix of lectures, class discussions, debates, face-to-face conversations, and role games requiring a strong active participation. Counts toward major and minor requirements.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 422 Cultural Expression in French Film and Television 3 Credits

A systematic analysis of selected French films and television broadcasts will reveal cultural value orientations as they relate to love, family, community, leisure, work, social, and political organization. A comparative approach will stress the underlying cultural differences between France and the United States. Course taught in French.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 425 Portrait of the Hero in French Fiction 3 Credits

This course deals with modern French fiction and its depiction of the role of the hero as a figure who gradually loses control over his fate (Stendhal, Balzac) and is changed into someone who struggles against ever increasing odds, only to be finally vanquished (Flaubert). The main character may find fulfillment in recollections of the past (Proust), explore the moral parameters of existence (Gide, Camus) or become the incapacitated anti-hero of Beckett's novels. Course taught in French
Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 430 Mask & Reality in French Theater 3 Credits

A study of theater through the optic of a unifying theme: the mask and reality. The goal is to gain a greater appreciation of the art of dramatic illusion whereby actors, while wearing the masks of the characters they play, allow us to examine ourselves and reality in true, unmasked form. Playwrights to be studied will range from the classical theater of Racine and Corneille, through the modern avant-garde, existentialist and Theater of the Absurd works of such playwrights as Ionesco and Beckett. Course taught in French.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 435 Self in French Prose & Poetry 3 Credits

Are we determining or pre-determined creatures? What is our essential nature? Is the quest for salvation justified? A study of the historical, political, and social realities in which the texts were composed will shed light on the concept of the self. Representative authors from the Renaissance to modern times will include: Montaigne, Descartes, Pascal, Montesquieu, Rousseau, Hugo, Baudelaire, Apollinaire, Sartre, Camus, Duras, Sarraute, Colette, de Beauvoir. Course taught in French.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 440 A Quest for Identity: Francophone Literature and Culture 3 Credits

This course introduces the cultures of countries or regions where French is used either as the (or one of the) official language(s) or, in a less official capacity, by a segment of the population. In readings, discussions, songs, film viewings, and written assignments, students will experience the Francophone cultures of specific areas and the amazing diversity of the Francophone world. They will also explore the difficult relation of the Francophone countries with France. The course considers issues of social status, history, resistance, and identity. Counts toward major and minor requirements. Course taught in French.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

FRE 491 Internship in Foreign Languages 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of the importance and interrelationship of foreign languages and cultures in the workplace. Placements can be made in international governmental agencies, international trade associations, multinational corporations, social service agencies, and other appropriate workplace environments both in the United States and abroad. With permission of the supervisor and faculty advisor, a three-credit internship may be substituted for a collateral requirement as credit toward the major.

Prerequisite(s): students should have completed at least one 300-level course in the foreign language.

FRE 496 Special Studies 3 Credits

Offered as needed to complement the program in French. A seminar open to a variety of topics treating a particular author, period, genre or critical approach.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

Game and Interactive Media Design (GAM)

Courses and Descriptions

GAM 100 Game & Interactive Media Forum 0 Credits

Game & Interactive Media Forum is a once-per-month gathering of all Game majors from across the university's different Colleges. The forum will be an opportunity for students focusing on different backgrounds to engage together in industry-related topics and skills.

GAM 150 Intro to Game Studies 3 Credits

Intro to Game Studies surveys the history of video games and gaming culture against the social and political contexts that shape and are shaped by games.

GAM 200 Game Design 3 Credits

Game Design introduces students to the basic concepts of game design, covering game rules, iterations, and playtesting. Students will work with hands-on material to develop design techniques and instincts outside of digital work spaces.

GAM 201 Game Development I 3 Credits

Game Development I introduces students to industry-standard software and the basics of user experience and collaborative game design.

Prerequisite(s): ART 150, CIS 200 and GAM 200.

GAM 301 Game Development II 3 Credits

Game Development II extends students' knowledge of industry-standard software, building on GAM 201 and progressing toward advanced concepts of user experience and collaborative game design.

Prerequisite(s): GAM 201.

GAM 310 Special Topics in Game Design 3 Credits

Special Topics in Game Design applies students' knowledge of game design and the development software that helps them realize their design toward specific prototyping goals. The subject of GAM 310 will rotate each semester; GAM majors must complete two semesters of 310 without duplicating topics.

Prerequisite(s): GAM 200.

GAM 330 Soundtracks and Foley 3 Credits

Soundtracks and Foley covers dialog, music, and foley in filmic settings, with a specific focus on game environments.

Prerequisite(s): MUS 216.

GAM 401 Game Workshop I 3 Credits

Game Workshop I places students in multidisciplinary project teams. Each team will create a game prototype over the course of the semester that demonstrates each student's mastery of their area of specialization and the each group's ability to work together.

Prerequisite(s): GAM 310.

GAM 402 Game Workshop II 3 Credits

Game Workshop II places students in multidisciplinary project teams and builds on skills developed in Game Workshop I.

Prerequisite(s): GAM 310.

GAM 491 Internship in Game Design 3-6 Credits

Internship in Game Design places students in industry work environments, overseen by a site supervisor.

Prerequisite(s): GAM 310.

Gender and Sexuality Studies (GSS)

Courses and Descriptions

GSS 100 Introduction to Gender Studies 3 Credits

An introduction to the role of gender in human experience, examining the biological, historical, literary, artistic, and institutional manifestations of gender, and exploring the intersections of gender, sex, and sexuality.

GSS 110 Race, Class and Gender in Contemporary American Society 3 Credits

This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with MCS 110. Students may only get credit for one course: MCS 110 or GSS 110.

GSS 200 Introduction to Women's Studies 3 Credits

An interdisciplinary investigation of traditional and contemporary gender roles, and of women's status, identity, and potential. Required for minor.

GSS 230 Women In Literature 3 Credits

A range of literary presentations of the female experience and of the conditions of women's lives is explored. These works are placed in historical and social contexts in order to see behind and beyond traditional literary conventions. Cross-listed with ENG 230.

GSS 235 Current Feminist Issues 3 Credits

This course examines historical and contemporary debates about controversial issues involving women, gender, and equality. The course will highlight feminist concerns with race, class, sexuality, and gender norms, focusing broadly on society, culture, the economy, politics, and law. Students will learn to contextualize, analyze, and evaluate arguments on multiple sides of these controversies.

GSS 240 Sex and Human Nature 3 Credits

This course provides an introduction to the scientific study of human sexual behavior, mate choice, and reproduction. Questions of interest include: How is sex determined? How are males, females, and intersex individuals different biologically? How do individuals' sexual strategies tend to differ? Why do we experience sexual jealousy? Are humans actually evolved to form long-term pair-bonds? What determines sexual orientation? Answers to these questions will be considered in light of the reproductive science of humans and our evolutionary ancestors.

GSS 245 Popular Constructions of Gender and Sexuality 3 Credits

This course takes an interdisciplinary approach to investigate the constructs that society creates and maintains with relation to sexuality and gender. As we are increasingly confronted with images of gender and sexuality, it becomes vital to interrogate the origins of these images from a variety of disciplinary perspectives in order to analyze and critique these constructs. Students will be introduced to theoretical approaches to analyzing popular constructs of gender and sexuality from a variety of areas, including (but not limited to) the humanities, the physical sciences, and the social sciences.

GSS 300 Feminist Literary Criticism 3 Credits

This seminar explores the diversity within feminist literary analysis. Various national, ethnic and cultural standpoints are represented and the different as well as the common assumptions within feminist thought will be discussed.

GSS 309 Women in American History 3 Credits

Examines the roles, status, and influence of women from the colonial era to the present. Studies the origins and development of feminism, including legal, political, educational, economic, and sexual rights; and studies social feminism, including reform movements in such fields as abolition, prohibition, pacifism, child labor, and social welfare.

GSS 310 Special Topics 3 Credits

Studies in specialized areas of feminist scholarship. Topics change according to instructor and are listed in the course roster.

Prerequisite: one previous course in gender and sexuality studies or permission of instructor.

GSS 312 Gender, War and Peace 3 Credits

Through readings in literature, history, political science, philosophy, and psychology, the course will explore critically the myths linking feminine gender with pacifism and masculine gender with aggression. Various perspectives on peace and war, the history of peace movements, and women's as well as men's participation in war will be considered.

GSS 313 Gender and Ethics 3 Credits

An interdisciplinary seminar involving a concentrated study of recent works in feminist theory, with special attention to issues such as: Do men and women have different ethical perspectives and different styles of moral reasoning? How do the "ethics of care" differ from the traditional "ethics of justice?" Can the models of justice and care be integrated into a more comprehensive theory?.

GSS 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GSS 318. Students may not get credit for both COM 318 and GSS 318.

GSS 319 Gender and Sexuality in American History 3 Credits

What makes a man, exactly, and what makes a woman? What kinds of sex are normal, and what kinds are abnormal? Who decides, and why? The answers to these questions are not fixed. Throughout American history, popular understandings of gender and sexual norms evolved in close relationship with the political, economic, racial, and social dictates of the time. This course will trace the evolution of ideas on sex and gender from the 18th century to the present using various historical sources including fiction and film, particular attention will be given to analyzing dominant models of proper behavior and the complex relationships of power enmeshed within them.

GSS 320 Sex, Gender, and Fairy Tales 3 Credits

From the early literary fairy tale by Italian authors, to 17th-century French women writers who named and popularized the genre, to the 18th- and 19th-century stories geared toward children, to Disney and beyond, students will analyze fairy tales to see what they tell us about gender and sexuality historically and today. Students will read classic fairy tales from around the world and look at feminist and queer retellings, examining how fairy tale themes and motifs permeate our culture.

Prerequisites: CMP 125 or BHP 150.

GSS 322 Witch Hunts: Femicide Through Centuries 3 Credits

We will look at the perceived definitions of “witch” and “witchcraft” in relation to establishing medieval to modern gender codes. Our detailed study of perceptions of witches and their practices will reveal the power dynamics, social constructions and definitions that aided in the demise of countless women labeled as “witches” throughout history. Considerable time will be spent in exploring the internal controversy within the field of witchcraft studies regarding the use of words such as “genocide,” “femicide,” and “gendercide.”

GSS 333 Gender and Sport 3 Credits

Typical thoughts of sport include ticket prices, player salaries, team rosters, and league standings; rarely is it viewed from a gender perspective. This course will go beyond the examination of Title IX to better understand the relationship between masculinity, femininity and sports. This course will examine various aspects of gender and sport, including media and gender representation, race and ethnicity, drugs and violence, men and masculinities, sexualities, policy and politics, the feminist critique of sport, the initiation rites and hazing in college sports, sports wagering, and the internationalization of sport, including but not limited to the Olympics and Paralympics.

GSS 350 Leadership and Community 3 Credits

Designed for all students whose future plans include community service, organizing, and leadership, this course will study organizing in response to domestic violence, discrimination on the basis of gender and sexuality, sexual harassment, and other issues that are significant for women and/or the LGBTQ community. Building coalitions, skills for leadership, and strategies for effective organization will be covered in readings and in class discussions and students will practice what they have learned by volunteering in a local nonprofit organization.

GSS 375 Transgender Narratives 3 Credits

An introduction for Gender and Sexuality Studies minors and other interested students to the interdisciplinary field of transgender studies. Students will learn to distinguish between transsexual, transgender, transvestite, and intersex identities; to explore cross-cultural gender diversity; to recognize diverse subcultural expressions of gender, such as cross-dressing, camp, and drag; to identify long-standing stereotypes about trans people; and to understand trans people’s narratives about hormonal or surgical gender transition through literary and multimedia genres.

GSS 400 Seminar in Transcultural Gender and Sexuality 3 Credits

This seminar offers an opportunity for upper-level students to engage in a multidisciplinary study of the constructions of gender and sexuality in a variety of cultural contexts across the globe. Topics change according to instructor. Required for minor.

Prerequisite(s): Junior or senior standing.

GSS 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

GSS 491 Internship 1-4 Credits

Geosciences (GEO)

Courses and Descriptions

GEO 100 Earth Systems Science 3 Credits

Investigates the major global processes that occur on Earth. These processes can be grouped into four major systems: atmosphere, hydrosphere, lithosphere, and cosmosphere. Each system interacts with and affects the other systems creating, in a sense, a single Earth process. With this approach, the student will view the Earth as a whole, and understand that the many seemingly separate components that make up this planet are, in fact, a set of interacting processes, that operate in cycles through time, within a single global system. Three hours of lecture per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 102 Earth Materials and Processes Lab 1 Credits

This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week.

Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 102SP Earth Materials and Processes Lab 1 Credits

This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 110 Geology of National Parks 3 Credits

U.S. national parks highlight the geologic wonders of our country and provide us with some of the best examples of the many processes that initially formed our planet and those that continue to shape it. This course is an introduction to the geological setting of selected U.S. national parks. It provides an overview of geological concepts and relates the geology of each park to the processes that initially formed, and subsequently shaped, their characteristic landforms. Such processes include: plate tectonics, volcanic and plutonic activity, glaciation, cave formation, stream and coastal processes, and erosional processes. Consequently, students not only will understand how the physical geography of the U.S. varies from coast to coast, but also will connect these varied landscapes with the geologic processes that formed them and relate them to unique wildlife or vegetation in the parks studied.

GEO 113 Environmental Geology 3 Credits

Examines the fundamental premise that "society exists by geologic consent subject to change without notice" by studying a number of important global geologic processes and cycles, and the hazards and/or resources they present to individuals, societies, and the natural environment. Topics discussed include earthquakes, volcanism, stream flooding, coastal erosion, global climate change, and global water, soil, mineral, and energy resources. Cost/benefit considerations, hazard mitigation concepts, economic and political ramifications, and interactions among the lithosphere, hydrosphere, atmosphere, and biosphere also are presented. The course is designed to give non-science majors a deeper appreciation and understanding of the basic scientific concepts involved, as well as individual and societal connections to the global geologic environment, leading to better, more informed business, political, policy, and personal decisions. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 168 Mesozoic Ruling Reptiles 3 Credits

This course provides an introduction to the vertebrate groups that dominated the land (Dinosaurs), the seas (Mosasaurs, Plesiosaurs, Pliosaurus, Tylosaurus, and Ichthyosaurs) and the skies (Pterosaurs, Pterodactyls) during the Mesozoic Era (65-250 million years ago). Students study the diversity of skeletal architectures and their reconstructed function and the often controversial, inferred anatomy, physiology, reproductive strategy, habit, and social behaviors of these animals that are different from mainstream reptiles, birds, and mammals. They also learn about the paleogeographical, and paleoclimatological conditions that facilitated the evolutionary rise to dominance and diversification of these vertebrate groups and the debated causes of their eventual extinction. These topics also serve to illustrate how the scientific approach works and how competing hypotheses are evaluated. Three hours of lecture per week. Weekend field trips may be required.. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 290 Directed Research and Study in Geosciences 1-4 Credits

Directed Research and Study in Geosciences will provide an opportunity for freshman and sophomore students to gain hands-on research experience in the geosciences. This is an individual program of study and each student will work with a selected faculty member on a topic of mutual interest. The course consists of a combination of project meetings, supervised research, and guided readings. The focus will be on formulating research questions, designing and conducting experiments, collecting the necessary data, reviewing the scientific literature as it relates to each student's research topic in a weekly meetings with the instructor, and communicating the findings by writing a final project report.

GEO 304 Elements of Mineralogy 4 Credits

This course examines the physical properties, chemistry, atomic structure, crystallography, uses, and environmental impacts of important minerals found in the Earth's lithosphere and biosphere. In addition, lab assignments and exercises emphasize crystal symmetry and chemistry; polarizing microscope, ICP, SEM, and x-ray analytical techniques; the graphical display and interpretation of compositional data; optical properties of isotropic and uniaxial minerals; and the identification of mineral hand specimens. Three hours of lecture and one three-hour lab per week. At least one weekend field trip required. Prerequisite(s): GEO 100 or GEO 113, and GEO 102, and CHE 120, CHE 121 taken prior or concurrently; or permission of instructor.

Corequisite(s): GEO 304L.

GEO 304L Mineralogy Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 304.

GEO 305 Petrology and Petrography 4 Credits

The origin, evolution, and terrestrial distribution of igneous and metamorphic rocks are presented and detailed. Classroom lectures and discussions emphasize rock geochemistry, mineralogic variability, the constraints placed on petrogenetic models by physio-chemical studies of natural and synthetic systems, and the relation of the various rock types to current plate tectonic theory and other whole-earth processes. The laboratory emphasizes the continuing development of optical microscopy skills, the identification of rock texture and mineralogy in thin section and hand specimen, the optical determination of mineral composition, and the recognition of possible petrogenetic processes as recorded in the rocks themselves. Three hours of lecture and one three-hour lab per week. Two weekend field trips required. Prerequisite(s): GEO 304, and CHE 122 and CHE 123 or taken prior or concurrently; or permission of instructor.

Corequisite(s): GEO 305L.

GEO 305L Petrology and Petrography Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 305.

GEO 306 Sedimentology and Stratigraphy 4 Credits

The principles of weathering, erosion, transportation, and deposition of sediment are the focus of this course. Sediment characteristics are examined to identify the processes involved in transporting grains and the specific environment in which the grains were deposited. Students will learn how to collect, analyze, and interpret sedimentary data and how to interpret surface and subsurface stratigraphic data using various techniques, such as lithostratigraphic, biostratigraphic, and geophysical, correlations. Field trips will expose students to different sedimentary environments and provide opportunities for students to learn how to conduct fieldwork. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required. Prerequisite(s): GEO 100.

Corequisite(s): GEO 306L.

GEO 306L Sedimentology and Stratigraphy Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 306.

GEO 308 Mineralogy and Petrology 4 Credits

This course examines the origin, evolution, and distribution of igneous and metamorphic rocks based on mineralogy, chemistry, and tectonic relationships. Mineral content and rock texture are used to identify and classify igneous and metamorphic rocks. The physical and chemical properties of these rocks are used to understand their tectonic setting, process of formation, and pressure-temperature conditions.

Prerequisite(s): GEO 100 (or GEO 113) and GEO 102.

GEO 308L Mineralogy and Petrology Lab 0 Credits

This is the laboratory course that accompanies GEO 308. Laboratory work consists of the identification of mineral and rock hand specimens. Microscopic analyses include the identification and interpretation of optical properties of minerals and rock textures. Field trips provide opportunities for students to examine outcrops of igneous and metamorphic rocks.

Prerequisite(s): GEO 100 (or GEO 113) and GEO 102.

GEO 310 Structural Geology 4 Credits

The origin, distinguishing characteristics, and geographic distribution of deformational structures of the Earth's crust. In the laboratory, GPS, GIS, geologic maps, and three-dimensional problems are used in the study of typical surface and subsurface geologic problems. Three hours of lecture and one three-hour lab per week. Weekday and/or weekend field trips may be required. Prerequisite(s): GEO 100 or GEO 113, GEO 102.

Corequisite(s): GEO 310L.

GEO 310L Structural Geology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 310.

GEO 350 Soil and Surficial Processes 4 Credits

This course examines the physical, chemical, hydrological, and biological aspects of soil and their relation to geomorphologic development. Specific topics include descriptions of soil texture and structures, soil classification, soil colloids, soil redox and pH, and their effect on vadose zone water chemistry. Soil genesis and erosion controls, microbiology/ecology, nutrient cycles, and modern soil pollution from sludge and pesticide applications, as well as domestic and industrial chemical spills, also are discussed. The lab portion of the course introduces the basic techniques of soil analysis, both physical and chemical, and field survey methods. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, and GEO 102.

Corequisite(s): GEO 350L.

GEO 350L Soil and Surficial Processes Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 350.

GEO 407 Hydrology and Water Resources 4 Credits

This course introduces the principles that govern both surface water and groundwater flows that have applications to societal water needs. Surface water topics cover the basics of the hydrologic cycle, the processes of precipitation, evapotranspiration, runoff, and infiltration, and various factors affecting water supply and water quality issues in a modern watershed. Groundwater topics examine the principles that govern flow through a porous medium and the basics of well hydraulics under different pumping conditions that community development requires. Laboratory exercises will give students hands-on experience with the delineation of watersheds, analysis of precipitation data, and flow contaminant transport modeling. The field portion of the laboratory includes runoff and stream discharge measurements, as well as hydraulic conductivity estimations from both slug and pumping tests. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, GEO 102, and MTH 105 or higher.

Corequisite(s): GEO 407L.

GEO 407L Hydrology and Water Resources Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 407.

GEO 480 Senior Thesis 3 Credits

A senior thesis is optional for geosciences majors. However, a senior thesis is required for eligibility to graduate with honors in geosciences. The topic for investigation will be chosen by the student in consultation with the faculty of the Department of Geological, Environmental, and Marine Sciences. The student must initiate consideration of a proposal to the Department. The proposal must contain a discussion of the proposed project and a timetable to be followed in the study. A departmental committee consisting of a major and minor advisor will evaluate the written paper submitted at the conclusion of the study or other approved venue. An oral presentation before the department at the conclusion of the semester in which the study is completed is required. Proposals must be submitted in final form no later than the end of the ninth week of the semester prior to the semester in which the study is undertaken.

Prerequisite(s): senior standing in the geosciences major and permission of instructor.

GEO 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

GEO 491 Internship in Geosciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placements may be in private, public, non-profit, or governmental organizations. These can include consulting firms, regulatory agencies, advocacy groups, and educational or research institutions. Normally, 50 hours of internship per credit is required. A mutually agreed upon method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and could include a term paper or project report and a poster presentation.

Prerequisite(s): 2.5 GPA and permission of instructor.

German (GER)

Courses and Descriptions

GER 100 German I 3 Credits

An introduction to German stressing the spoken language and the fundamentals of grammar. Students are required to work extensively with audio CDs. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): placement test if German has been studied elsewhere.

GER 101 German II 3 Credits

A continuation of German 100. Communication skills are broadened, fundamental grammar is studied in more depth, and basic vocabulary is expanded. Students are required to work extensively with audio files. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): GER 100 with a minimum grade of D or LL 151 with a minimum grade of C or placement test.

GER 200 German III 3 Credits

Intensive review of German grammar and syntax with a systematic approach to oral expression and composition. Readings on contemporary German life and selections from modern literature. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): GER 101 or placement test.

GER 201 German IV 3 Credits

Continuation of grammar review and readings. Special emphasis on oral expression and composition of increasing sophistication, proceeding from concrete observations to theoretical and abstract discussion. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): GER 200 or placement test.

GER 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

Global Studies (GLS)

Courses and Descriptions

GLS 180 Understanding Global Relations 3 Credits

Offers an introduction to Global and Multinational Studies by exposing the student to basic concepts necessary to understand the dynamics underlying the emerging worldwide society of diverse nations. The student will become acquainted with the mechanisms by which contacts are built across nations, and the factors that shape the conception of and relations with "the other."

GLS 200 The Social Construction of Global Society 3 Credits

This course discusses the emergence of an "imagined global community" in the final years of the 20th century, and the beginning of the 21st. The course will examine the forces that contribute to these changes, including the global dissemination of values, the changes in communication technologies, the globalization of the economy, and the spread of international non-governmental institutions and lobbying forces.

GLS 201 Politics of the Global Economy 3 Credits

An examination of global political-economic institutions and governmental policies in a period of global structural change and economic crisis. Emphasis will be placed upon the attempts by advanced and newly industrializing governments to attract and to regulate transnational industrial and financial enterprise.

GLS 285 The Student Global Village 3 Credits

This course involves deliberative discussions carried out internationally among college students using videoconferencing technology. The project involves a series of 12 weekly videoconferences between students at Rider University and students at the American University of Cairo, or another international university. Students will be provided with materials to supplement their knowledge of the other country, and to allow them to discuss chosen themes in depth. The students will be required to write papers that describe their attitudes and impressions of the other country at the beginning and the end of the project, and to summarize what they have learned based upon the conferences and readings. Short papers will be required each week to prepare the students for the videoconference theme of the week.

GLS 295 Emerging Issues in Global Studies 3 Credits

The process of globalization defines a condition of rapid political, social, and economic change. As such, subjects for study become relevant at an alarming speed in the current international environment. This course will give students the opportunity to study a current critical issue or subject, chosen according to its relevance or the special expertise of a visiting or current professor. Topics may include political, economic, or social crises that exist currently, how to deal with specific global problems such as global warming, humanitarian crises, or wars, but may also concentrate on the background of relevant areas such as Iraq or the European Union.

GLS 309 Will China Be Next Superpower? 3 Credits

This course has two focal points: one is the rise and fall of great powers in the history of world transformation; the other is China's whereabouts in this transition. The former deals with a group of International Relations theories, which focuses on systematic transformation. Students are expected to learn extant theoretical knowledge on how and why a great power rises and falls. The latter is our empirical referent. Students are led to study China's contemporary history, geopolitics, political economy, and international relations as to make a learned connection between theoretical wisdom and practical data on China. This course will provide students with a better understanding of China in general and its superpower status in the making in world politics in particular, offer students a chance to review the sources and consequences of different national approaches to greatness, and help students find his or her own analytical framework for understanding international political events that may have transforming effects in Northeast Asia as well as on the world stage. This course is cross-listed as POL 309. Students may not get credit for both GLS 309 and POL 309.

GLS 310 Ethnographic Film 3 Credits

Explores the manner in which different civilizations are depicted through the medium of documentary film. Discusses the manner in which film may contribute to ethnographic understanding of a given people, and the limitations of the genre that may misrepresent the subject matter. Special attention is given to the role of the filmmaker and his/her position as participant, observer, and recorder of the events shown on the film. The films will be analyzed in terms of how they reflect, and potentially affect, a civilization's international image and global standing. These factors will then be considered in terms of their effects upon the place and actions of the civilization in global politics.

GLS 318 Global Political Film 3 Credits

Political films are a powerful form of political communication. This power derives from the ability of the filmmaker to control the characters, plot, dialogue, setting, and other aspects of the context in which the political message is delivered. It is difficult to conceive of any other form of political communication in which the individual or individuals presenting the message have so much control. Even the most programmed of political events or "photo opportunities" provide instances where outside factors or events may intervene. Further, audiences who watch a film are willing to suspend disbelief for the period of viewing; as such, the filmmaker has a willing participant in the narrative he or she develops. Since political communication is the primary means by which political reality is constructed, and since films provide a very persuasive visual and auditory means of creative narratives, they are important subjects for study and analysis. Nearly all scholars recognize the importance of film as a means of affecting, and reflecting, the political climate of a society, especially during specific historical eras. President Woodrow Wilson, upon first seeing *Birth of a Nation*, said it was like "watching history written in lightning"; by contrast, James Baldwin referred to the film as "an elaborate justification for mass murder." Both recognized the persuasive powers of film and its potential propaganda value.

GLS 325 Global Perspectives on Health and Illness 3 Credits

Explores the different international perspectives on health and illness. Themes include how men, women, and children in respective civilizations are treated and viewed within their communities or nations, as they become ill. Particular attention is given to the contrast between various types of traditional healing and Western medical practices, and their interactions. Discussions will also compare the usefulness of national versus international health agencies in dealing with global health problems.

GLS 490 Independent Study: Research and Creative Expression 1-4 Credits

This course allows students with permission of the instructor to conduct an independent research project in Global Studies in a relevant area of interest to the student and faculty member.

GLS 491 Internship in Global Studies 1-4 Credits

Students work under supervision, either in the United States or abroad, in an environment which provides experiential learning in institutions that operate in a global environment, including those in government, business, and international non-governmental organizations (INGOs). Domestic internships might also include work in agencies that deal with global problems such as an international environmental group or a refugee resettlement center. A minimum of 52 hours of field work per credit is required, with regular reports and a concluding critique analyzing the experience. No more than six credits allowed toward graduation.

Global Supply Chain Management (GSC)

Courses and Descriptions

GSC 115 Introduction to Global Supply Chain Mgt. 3 Credits

This course introduces students to components of global supply chains and issues of managing the global supply chain. It is designed as a survey course to give first or second year business students a general view of supply chain management at both domestic and international levels, as well as familiarize them with basic concepts and major challenges of supply chain management. Delivery of course material will include lectures and guest speakers from industry, and in-class logistics mini cases.

GSC 235 Supply Chain External Focus: Customer and Supplier Logistics 3 Credits

This course is a detailed discussion of some of the major issues and components of supply chain management that are mainly external to an organization. In other words, it provides an "outward looking" perspective of supply chain management. Topics to be covered include sourcing, procurement, transportation, customer logistics, and distribution. The linkages to internal issues and components of supply chain will be made.

Prerequisite(s): GSC 115.

GSC 290 Strategic Sourcing and Procurement 3 Credits

Sourcing and procurement are vital components of a well-functioning and efficient supply chain. Obtaining raw materials, components, finished and semi-finished goods, critical technology, and essential services from different suppliers and countries with different languages, currencies, legal and cultural norms is a complex and risky task and made essential due to the value of these activities to the bottom-line of any global business today. Additionally, globalization raises issues involving not just costs but reliability, quality, credibility, product safety, product liability, and related social, ethical, governance, and environmental impact. In this course, students will learn and apply the concepts, principles, and techniques required to manage the sourcing process effectively. Topics include purchasing, outsourcing, materials management, inventory management, forecasting, price and cost analysis, transportation analysis, supplier selection, negotiation strategies, auctions, and legal framework. Students will apply the concepts covered in lectures, articles, case study analysis, a team project, and discussions. Additionally, a special component of this course will include participating in a multi-week real world procurement simulation where students will have an opportunity to interact in a purchasing process with senior industry procurement executives. The simulation will both teach and allow students to participate in developing and implementing bidding and negotiating strategies in real world vendor-customer relationships. Sophomore standing or higher.

Prerequisite(s): at least one of the following courses: ACC 210, or ECO 200, or ECO 201, or GSC 115.

GSC 315 International Business Tour 3 Credits**GSC 345 Customer Focus: The Customer Driven Supply Chain 3 Credits**

Marketing and supply chain management programs are concerned with the creation and delivery of value to customers and organizations. No longer simply the domain of the warehouse manager or logistics director, supply chain management is viewed by most companies as a mission critical element. Marketing focuses on developing an understanding of customers and markets, creating products and services based on that understanding, and communicating and delivering the value added. This course will teach the student the essential role of marketing in all aspects of successful supply chain management - relationship management, technological and financial management - and it will help the student understand the structure, functions, principles and methods employed in discovering and translating consumer needs and wants into product and service specifications, and then transferring these goods and services from producers to consumers or end users.

Prerequisite(s): GSC 115 and MKT 200.

GSC 355 Supply Chain Internal Focus: Firm Operations 3 Credits

This course is a detailed discussion of some of the major issues and components of supply chain management that are mainly internal to an organization. In other words, it provides an "inward looking" perspective of supply chain management. Topics to be covered include: manufacturing, quality, product design, inventory, and warehousing. The linkages to external issues and components of supply chain will be made.

Prerequisite(s): GSC 115 and MSD 340.

GSC 375 Adv.Sem in Global Outsourcing 3 Credits

The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Various referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.

Prerequisite(s): junior standing.

GSC 385 Management Information Systems for Global Supply Chain Management 3 Credits

The purpose of this junior level management information systems course is to prepare students for today's dynamic business environment by increasing their understanding of IT-enabled global information processing and management. This course has a specific emphasis on the impact and effective utilization of information systems and technology for the global supply chain. Students will gain a solid understanding of the value of business process integration through a combination of conceptual learning, business process analysis, and collaborative decision-making. This will be facilitated through hands-on experience with SAP ERP and analytical software as well as Microsoft Excel. GSC 385 is required for the Global Supply Chain Management major and can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

Prerequisite(s): CIS 185 and junior standing.

GSC 399 GSC Co-op Program 6 Credits

The co-op program provides students with an opportunity to work full-time in an organization and apply what they have learned in their global supply chain and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first-step before they hire full-time employees. Eligible students include junior and senior global supply chain management majors with a minimum GPA of 3.0. The six credits are intended to be used as business electives, but it is also possible for them to be used as a combination of business and free electives.

Prerequisite(s): GSC 115 plus one additional course within the global supply chain management major, and permission of instructor.

GSC 445 Supply Chain Strategy and Design 3 Credits

This course introduces the student to the concepts and techniques necessary to design and operate global supply chains. It covers some of the strategic issues of managing a global supply chain and emphasizes the importance of understanding the organization, its value chain, industry, competitors, suppliers, and customers in a global framework. The course covers various strategies as well as different supply chain design models and approaches for efficient and effective supply chain operation.

Prerequisite(s): GSC 235 and GSC 355.

GSC 490 Independent Study: Research and Creative Expression 3 Credits

Topics to be approved by instructor, program director, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

Prerequisite(s): GSC 115 and permission of instructor.

GSC 491 GSC Internship 3 Credits

The Global Supply Chain Management (GSCM) Program formally sponsors an internship in global supply chain management. The intention of the course is to supplement theoretical foundations and other material introduced in the classroom with an opportunity to work in a sponsoring organization. Through the internship experience, the student will get a chance to see how supply chains are managed and will get a chance to apply supply chain concepts for themselves. If used in place of the co-op, internship credits will count toward GSCM major requirements, but can also be used as a business or free elective.

Prerequisite(s): GSC 115 plus one additional course within the GSCM major, and permission of instructor.

Harpsichord (HP)

Courses and Descriptions

HP 101B Harpsichord Primary 1 Credits

HP 101C Harpsichord Elective 2 Credits

HP 101D Harpsichord Elective 1 Credits

HP 101E Harpsichord Elective 2 Credits

HP 101F Harpsichord Elective 1 Credits

HP 101G Harpsichord Elective 2 Credits

HP 201B Harpsichord Primary 1 Credits

Health Administration (HTH)

Courses and Descriptions

HTH 201 Excel for Healthcare Management and Administration 1 Credits

This course is a refresher on Excel designed to fill gaps in knowledge and application of skills for students who are preparing for their internships. Students will review the essentials of Microsoft Excel. Within seven weeks, students will learn to expertly navigate the Excel user interface, perform basic calculations with formulas and functions, professionally format spreadsheets, and create visualizations of data through charts and graphs. This course will provide students with a practical hands-on opportunity that is designed for students to gain the skills necessary to proficiently create pivot tables, analyze data, utilize more advanced Excel data tools, and interpret statistical results.

HTH 205 Introduction to Health Care 3 Credits

This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits

In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.

Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 225 Health Care Financing 3 Credits

The goals of this course are: (1) to provide a description of how Americans pay for health care; (2) to explain how payment arrangements affect the health care system; and (3) to evaluate newly emerging arrangements. Specifically, we will focus on insurance (both public and private) in the United States, provider payment reform, the incentives of the parties in these arrangements and how these incentives impact cost containment in health care.

Prerequisite(s): HTH 205 and sophomore standing.

HTH 315 Health Care Law, Ethics and Policy 3 Credits

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

HTH 336 Economics of Health Care System 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

HTH 365 Health Care Information Systems 3 Credits

The Electronic Health Record (EHR) is one of the most complex technological projects ever undertaken. EHR involves the shared management, potentially on a global scale, of a variety of private, time-sensitive, multimedia data across activities including capture, processing, storage and access. The purpose of this course is to provide the future Health Administration professional with specifics of the socio-technical issues involved in this effort. The goals of this course are to study data standards used in modern EHR systems, technology platforms used to implement EHR in various types of organizations, data governance and regulations associated with health data, analytics that support quality of care and evidence-based practice.

Prerequisite(s): HTH 205; CIS 385 or GSC 385; HTH 215 or CIS 360; and junior standing.

HTH 367 Special Topics in Health Administration 3 Credits

This course covers a current area of health care administration. Topics will vary from semester to semester.

HTH 450 Seminar in Health Research 3 Credits

Students in the course learn to conduct health administration-related research by engaging in an actual community-based research project. At the beginning of the semester, students are assigned to a health-related community-based organization. As a team, students meet with the client, devise a plan of action, collect and analyze data and other information, and write a report to the client. At the end of the semester, students present their findings to the client.

Prerequisite(s): Permission of instructor.

HTH 490 Independent Study in Health Admin 3 Credits

An independent study in health administration allows a student to conduct an in-depth exploration of a topic in health administration under the supervision of a faculty member. The project helps develop a student's research and written skills.

Prerequisite(s): JR or SR standing, Permission of Instructor.

HTH 491 Health Management Internship 3 Credits

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.

Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

Health Care Policy (HCP)

Courses and Descriptions

HCP 301 Global Health Care Systems 3 Credits

Global Health Care Systems is an introduction to visions of global health care, drawing upon the fields of medical anthropology, global public health, and public policy. The course focuses upon different understandings of health care, reflected in the actual health systems in place around the world. Because responsible health-giving health systems respond to societies' changing needs and situations, students will learn about the skills needed for this kind of problem-solving, but also come to understand that there is an urgent and vital global need for the exchange of ideas in global health care systems.

HCP 302 Environmental Epidemiology, Pandemics and Globalization 3 Credits

This course is intended to provide basic knowledge of principles and methods of environmental epidemiology for students whose career interests in a health-related field may include using epidemiologic information. The course presents a holistic view of global health by crossing several disciplines, including medical anthropology and disease history, focusing upon the social processes by which groups are stigmatized during disease outbreaks, and public health policies for confronting outbreaks of epidemics and pandemics. The course emphasizes the conceptual aspects of epidemiologic investigation and application of these concepts in global health policy and related professions. Topics include: disease surveillance; population screening; interpreting epidemiologic associations, and the health risks and benefits of globalization. Salient foci will be: the evaluation of the role of health diplomacy in addressing shared global health problems among countries, and the evaluation of cultural, ethical, social, systemic, and anthropological determinants of global health problems.

HCP 303 Global Health and Human Rights 3 Credits

This course introduces students to the basic concepts of human rights and their links to national/global health, as well as to issues where human rights and health collide. Students will become familiar with global efforts for developing practical and effective responses to global health challenges with a human rights framework.

HCP 304 Health Policy, Administration, and Compliance 3 Credits

Health Policy, Administration, and Compliance explores the politics of health care policy at the local level. The course identifies and evaluates various measures of the health and function of populations, organizations, partnerships, systems, and communities. The course provides students with an overview of the realities, challenges, and requirements of practicing community oriented primary health care.

HCP 450 Seminar in Health Care Policy 3 Credits

Rider University is uniquely positioned through Global Studies to have access to the nongovernmental organization United Front against River Blindness (UFAR). It is an African-inspired, U.S.-based nonprofit and tax exempt organization. Its primary mission has been to participate in partnerships with other global health organizations in the elimination of onchocerciasis (river blindness), as a major public health problem in the Democratic Republic of the Congo (DRC). UFAR was founded and registered in the U.S. in 2004 by Dr. Daniel Shungu, a former Merck & Co. Inc. employee, who is a Congolese by birth and a naturalized U.S. citizen. The U.S. office is in Lawrenceville, N.J. and the Congo office is in Kinshasa, DRC. Dr. Roberta Fiske-Rusciano of Rider University's Global Studies faculty is a founding UFAR board member and has hosted Dr. Shungu several times in her course Global Perspectives on Health and Illness. For the past eleven years UFAR in partnership with several organizations (World Health Organization, Sightsavers Intl., Merck, DRC coalition group for onchocerciasis, and the DRC Health Minister, have successfully treated three million (as of 2015) Congolese with Ivermectin (Mectizan), donated by Merck and Co., Inc. Taken once a year for approximately ten years prevents infection of river blindness, by interrupting the cycle of the parasite. Because of UFAR's continued success in its mission, it has been asked to expand its work to include more neglected tropical diseases, using the same method of health delivery system: community directed treatment with the appropriate medication, e.g. Ivermectin. Now that treatments of other diseases have been added to UFAR's mission (trachoma, lymphatic filariasis, shistosomiasis, guinea worm and helminthes infestations), additional medical treatments are scheduled to be added once these conditions are thoroughly mapped in the population.

HCP 491 Health Care Policy Internship 1-3 Credits

Students will complete an internship that will build on prior work in the HCP major.

Health Sciences (HSC)

Courses and Descriptions

HSC 100 Intro to Human Nutrition 3 Credits

This course is designed to offer the student an understanding of fundamental human nutrition concepts including, but not limited to, digestion, absorption, metabolism, functions, and sources of macronutrients and micronutrients. The theme of the course will align with human health and disease states and the important conceptions about the food industry and its relation to healthy dietetic choices.

HSC 102 Medical Terminology 1 Credits

Medical terminology is the study of the principles of medical word building to help the student develop extensive medical vocabulary used in health care occupations. Students will gain an understanding of basic elements, rules of building and analyzing medical words, and medical terms associated with the body as a whole.

Prerequisite(s): Permission of instructor.

HSC 105 Introduction to Health Professions 1 Credits

Course Description: This course will provide a basic overview of the health science professions including but not limited to: athletic training, clinical exercise physiology & cardiac rehabilitation, chiropractic, physician assistant, occupational therapy, nursing, community health education specialist, and physical therapy. The course will also cover the professional activities (i.e. professional organizations, certifications, professional issues, and professional liabilities) that are related to these professional applications.

HSC 150 Introduction to Public Health 3 Credits

Public Health is the science of protecting, promoting, and improving the health of people and the communities where they live, learn, work, and play. Students will gain an understanding of the history and functions of public health, strategies and methods used in public health research, and the determinants of health.

HSC 200 Environmental Health & Human Health 3 Credits

The health of any individual is a function of both our genetics and environmental factors. Environmental factors most broadly defined include the air we breathe, the water we drink and the food we eat. This course will focus on numerous examples of how bacteria, viruses, and exposure to environmental chemicals result in human diseases. Examples range from failures in public health infrastructure (cholera, diphtheria, river blindness, etc), failures to vaccinate (polio, measles, hepatitis, etc) and chemical exposures (birth defects, cancer, etc). There is also much known about how diet and nutrition can prevent diseases.

Prerequisite(s): BIO 10X Life Science course or any biology laboratory course (BIO 115, 116 or 117).

HSC 201 Nutrition for Exercise and Physical Activity 3 Credits

An introductory exploration of evidence based nutritional theory and applications in sport and exercise.

HSC 250 Introduction to Epidemiology 3 Credits

Epidemiology is the study of distribution and determinants of defects, disease, and injury in human populations and the application of that study to assess the magnitude of health problems and the result of interventions designed to control them. This course is designed to introduce students to the basic principles, methods, and uses of epidemiology to better understand and characterize health and disease at a population level. The role of epidemiological evidence in planning and evaluation will be also be explored.

Prerequisite(s): MTH 102 or higher OR MSD 105 or higher OR POI.

HSC 302 Kinesiology 3 Credits

The purpose of this course is to explore human movement during performance of activities. This course will explore the relationship between anatomical structures and function in the production of movement. The application and relationships between the fundamental principles of mechanics and musculoskeletal system function will be addressed within the framework of clinical and research perspectives. Both qualitative and quantitative approaches will be applied towards a better understanding of human movement, the analysis of physical activity. **Prerequisite(s):** BIO 221 & MTH 105 (or equivalent) or POI.

Corequisite: HSC 302L.

HSC 302L Kinesiology Lab 1 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): HSC 302.

HSC 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in health science-related research. The student learns to organize material, use relevant medical/scientific literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

HSC 491 Internship in Health Sciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty member and should include keeping a journal of activities, a term paper or project report and an oral or poster presentation.

Prerequisite(s): 2.5 GPA required.

History (HIS)

Courses and Descriptions

HIS 150 World History to 1500 3 Credits

This course traces both regional histories and global interactions, and covers the development of societies and states in Africa, the Americas, Asia and Europe from prehistoric times until about 1500. Certain major topics will be pursued, including agriculture, great empires, the major world religions, long-distance trade, and early modern exploration. While learning about these topics, students will also gain an understanding of the practice of history, especially of the kinds of sources historians use and how they reconstruct and interpret the past.

HIS 151 World History Since 1500 3 Credits

Learn what college students should know about history as a discipline and why history matters by tracing the development and interactions of the cultures of Europe, Africa, Asia and the Americas from 1500 to the present. Students will gain an appreciation for the value of historical thinking and a greater understanding of the relationships among modern nations so necessary for global citizenship.

Prerequisite(s): HIS 150.

HIS 160 Seminar in History 3 Credits

This course introduces students to the discipline of history and to the skills needed for its pursuit. Students will learn to analyze and evaluate primary sources and to identify the thesis and argument of secondary sources, as well as to locate sources using library databases. They will complete a short research paper in which they put these skills into practice. The seminar is intended for History majors and minors and Social Studies majors in their freshman year. Transfer students with fewer than 45 credits should consult their advisor on the suitability of the course for their program. Enrollment limited to 16.

HIS 180 U.S. History I 3 Credits

A survey of American history from the early 17th century through 1877. Among the topics covered will be settlement and regional differences, the American Revolution and the formation of a national government by 1787. The beginning stages of industrialization, the rise of democratic and reform politics, westward expansion, the debate over slavery and growing sectional tensions through the Civil War and Reconstruction will be major themes in the 19th century. Included will be discussions of African Americans, Native Americans, and women.

HIS 181 U.S. History II 3 Credits

A survey of United States history from the end of the Civil War through the present. Included will be discussions of the maturing of an industrial economy, and expansion in the west and overseas. The role of the United States as a world power and the growth of presidential power will be shaped and sometimes challenged by movements designed to expand democratic institutions and human rights. Included will be discussions of African Americans, Native Americans, and women.

HIS 190 Europe to 1715 3 Credits

Examines the development of European civilization from late Roman times until 1715, stressing the Classical heritage, the main currents of European thought and letters, the Renaissance and Reformation, the Age of Discoveries, and the development of the Old Regime.

HIS 191 Europe Since 1715 3 Credits

Examines major political, economic, social, and cultural developments in Europe and the West from 1715 to the present.

HIS 200 Native American History 3 Credits

Traces the experiences of North American Indians from early colonial times to the present day, demonstrating how Indian life has varied and changed throughout our nation's history. Topics include strategies of resistance and accommodation to colonial powers, 19th-century impacts of U.S. government removal and cultural assimilation policies, and 20th-century cultural and political developments among the nation's surviving tribes. Rather than "vanishing," American Indians are a vital and expanding force in modern America.

HIS 201 African American History 3 Credits

Examines the actions and thought of peoples of African ancestry in the United States. Briefly considers Africa before the Atlantic slave trade, then concentrates on major themes in African-American history—the slave trade, slavery, and the genesis of African American society, emancipation and its consequences, urbanization and industrialization, Black Nationalism, the Civil Rights Movement, and African Americans today. Emphasizes African Americans' dynamic and creative role both in shaping their society and establishing their place in United States society. The on-going struggle for freedom and equality provides thematic continuity for analyzing nearly 400 years of African-American history.

HIS 218 America Between the Wars 3 Credits

This course will amplify the dynamic changes and deep challenges found in American society, politics, culture, and foreign policy in the years between 1918 and 1945. We will examine topics like America's purpose in WWI, immigration, antiradicalism, the "roaring twenties," the Harlem Renaissance, consumer culture, the Great Depression, the rise of unions, the New Deal, and the foreign and domestic juggernaut that was WWII.

HIS 220 America's Culture Wars 3 Credits

For much of the recent past Americans have lived in a state of "culture war." This course will examine the history of modern culture and the conflict that sprang up around it, focusing on the rise of cities, race and racism, shifting sex and gender norms, religion, pleasure, education, immigration, and politics. Students will assess cultural and political developments over the course of the twentieth century with an eye toward understanding the twenty-first.

HIS 224 American Environmental History 3 Credits

Surveys the history of the North American environment from pre-Columbian times through the 20th century. Topics include Native American uses of the environment; the reshaping of ecosystems under European colonization; U.S. frontier expansion; the ecological impact of industrialization and urbanization; and the rise of the environmental movement.

HIS 225 A History of American Business 3 Credits

Examines the history of business in the United States from the Colonial Era to the present. Emphasizes such themes as the changing capitalist system, the function of business institutions, the roles of the entrepreneur, the relationship between government and business, and the emergence of the corporation.

HIS 226 History of New Jersey 3 Credits

Explores the history of New Jersey from the colonial period to the present including the role of New Jersey in the American Revolution, the establishment of the Constitution, and the course of industrialization. Examines the impact of national and international developments on New Jersey and emphasizes the distinctive characteristics of the Garden State.

HIS 227 U.S. Cultural History I 3 Credits

Examines cultural developments in the United States through the Civil War. Topics include popular culture, the history of the body, reading and print culture, public celebrations and holidays, religion, race and ethnicity, and material culture. Some of the larger trends explored include the creation of American nationalism, the development of a consumer society, and the rise and decline of 19th-century family life and culture.

HIS 230 History on Screen 3 Credits

This course explores the ways in which feature films and documentaries construct the historical past and shape, reflect, or revise popular understandings and national or cultural myths about the past. We will consider films as products of particular moments in history (potential primary sources), as well as arguments about the moments they portray (potential secondary sources). We will explore how audiences take an active role in shaping the meaning of a film, and thus how that meaning may shift as audiences change over time. We will trace how and why filmed representations of our understanding and interpretation of the past have changed over time. The topics of the films analyzed in this course may vary.

HIS 240 History of Ancient Greece 3 Credits

Surveys the intellectual and cultural life of ancient Greek civilization against the background of its political, economic, and social history.

HIS 241 History of Ancient Rome 3 Credits

Studies the history and culture of Rome, emphasizing such topics as Roman law, government, literature, religion, art, and philosophy.

HIS 243 Italy Middle Ages to Present 3 Credits

Traces the history of Italy from the Middle Ages to the present, stressing the connection between culture, religion, politics, and wealth in successive historical periods. Students participating in the two-week travel component at the end of the course may receive four credits.

HIS 245 Britain to 1688 3 Credits

British history from pre-Roman times to the Glorious Revolution is examined, emphasizing the growth of royal government, parliament, and the origins of the British colonial empire.

HIS 246 Modern Britain 3 Credits

Examines British history from the Glorious Revolution to the present, stressing the reform movements of the 18th and 19th centuries, the Pax Britannica, the Industrial Revolution, imperialism, and the impact of the two world wars.

HIS 248 History of Ireland 3 Credits

Beginning with an overview of the Irish past, focuses upon the past century of the island's history—the problems, challenges, and accommodations that led to the present situation as one of the most protracted unresolved partitions in the modern nation-state system.

HIS 249 Women in Europe from Antiquity to the French Revolution 3 Credits

Traces the history of women in Europe from Rome to the French Revolution, covering the religious, social, political, and economic context in which women participated. Also offers a brief overview of theories and issues in women's history and gender history.

HIS 255 History Abroad 3 Credits

Two-week travel course to a destination chosen by the professor. Exposes students to historic and cultural sites and works of art that have been studied in class. Students must attend orientation sessions, read assigned writings, complete a travel journal, write a final paper on a topic relevant to the course, and attend all scheduled course activities abroad. Travel will take place in January or at the end of the spring semester.

HIS 260 Craft of History 3 Credits

This seminar focuses on historiography and research skills to further students' progress toward the major capstone experience of conducting independent historical research. Students will explore how historians approach, interpret, and write about a particular topic selected by the instructor, and discover how and why interpretations and methods have changed over time. Topics will vary by instructor. Course may be taken a second time on a different topic for 200-level credit. The course is required for History majors who are Sophomores or Juniors. Enrollment limited to 16.

HIS 273 Imperial Russia 3 Credits

Discusses the political, economic, social and cultural developments in Russia and its borderlands during the Imperial period, that is to say the 18th and 19th centuries from Peter the Great to the Revolutions of 1917. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 274 Modern Russia 3 Credits

Covers the background to the Russian revolutions of 1917, the revolutions themselves, and the evolution and dissolution of the Soviet regime. Cultural, social and economic aspects of this period receive as much attention as political aspects. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 280 Vietnam in Peace and War 3 Credits

Examines the history of modern Vietnam, with a focus on the struggle for independence from the late 18th century to the present. Discusses the traditional culture, French colonialism and the development of Vietnamese nationalism, the Japanese occupation in WWII, and the struggle against France and the U.S. in the First and Second Indochinese Wars, as well as the postwar period. Explores the American experience in Vietnam and the impact of the war in the United States.

HIS 281 Modern Middle East 3 Credits

Examines political, economic, social, and cultural developments in the Near East, from the rise of the Ottoman Empire to the present, stressing the impact of contacts with the West in the 19th and 20th centuries, and the emergence of the contemporary Arab World, Israel, Turkey, and Iran.

HIS 282 Colonial Latin America 3 Credits

Examines the pre-Columbian and colonial periods of Latin-American history. Discusses the Indian, African, and European peoples and pays particular attention to the colonial Spanish and Portuguese societies from their establishment up to the revolutions that brought about political independence.

HIS 283 Modern Latin America 3 Credits

Considers the post-independence history of Latin America, emphasizing the rise of export economies and external economic domination, modernization, and pan-Americanism. Examines the changes undergone by Latin-American nations in the 20th century through an analysis of Mexico, Argentina, Chile, Brazil, Peru, Cuba, and Central America.

HIS 284 Caribbean History 3 Credits

Analyzes the history of the West Indian islands and the lands bordering the Caribbean Sea from pre-Columbian times to the present.

HIS 286 Modern East Asia 3 Credits

Examines the disintegration of the Ch'ing dynasty in China and the Tokugawa Shogunate in Japan under internal stresses and foreign incursions, and the varied experience of those states in coming to terms with the challenges of modernization and westernization. Covers political, economic, social, and cultural factors in China, Japan, and East Asia.

HIS 288 African History 3 Credits

Traces the history of Africa, analyzing the unique problems of African historical evidence and the complexity of the continent's past. Examines the genesis of African culture, early African societies, and the character of African civilizations and empires, then considers external influences such as religion (especially Islam and Christianity), contacts with Europe, the slave trade, the colonial scramble for Africa, colonial rule, modernization and dependency, and concludes by assessing the rise of independent Africa after World War II, its present status and future prospects.

HIS 289 History of Modern Japan 3 Credits

Examines the history of modern Japan from the age of the samurai in the Tokugawa Shogunate to today's high-tech mass consumer society. It traces the interaction of elements of Japan's traditional culture with impacts from the outside to create a uniquely-Japanese modernity. It stresses social, economic, and cultural trends, as well as political history, and includes an examination of modern Japanese culture through fiction and film.

HIS 298 Special Topics in History 3 Credits

Exploration of special topics, themes or methodologies in history. This course may be repeated for credit on different topics.

Prerequisite(s): permission of instructor.

HIS 300 Economic History of the U.S. 3 Credits

Studies the main currents in the economic growth of America from colonial times to the present. Stresses the process of economic development from an agrarian to an industrial society, and examines the challenges and dislocations resulting from economic change.

HIS 301 Constitutional History of U.S. 3 Credits

Surveys the English, Colonial, and Confederation backgrounds of American law and constitutionalism; the framing, adoption, and implementation of the Federal Constitution and its later development; the role of law in the nation's history; the changing interpretations of federalism; the growth of judicial review; and the increasing role of the Supreme Court.

HIS 302 American Worker: Social History 3 Credits

Investigates the American workers' varied social, cultural, religious, and ethnic environment from post-Civil War to the present. Emphasizes worker response to industrialization, urbanization, the technical revolution, and automation.

HIS 303 American Urban History 3 Credits

Traces the growth of urbanism in America from colonial times to the present. Focuses on the interaction between the city dweller and the urban environment and explores the problems confronting urban America today.

HIS 304 Civil War and Reconstruction 3 Credits

Considers the Civil War as a watershed in the development of the American republic. Analyzes antebellum sectional conflict, the war years, and the era of Reconstruction.

HIS 306 U.S. Cultural History II 3 Credits

Examines cultural developments in the United States from the late 19th century to the present. Topics include popular culture, intellectual history, gender history, literary history, film, institutions like museums and department stores, subcultures and counter-cultures, popular commemorations like World's Fairs, and political culture. Some of the larger trends explored include the development of the modern culture of consumption, the urban landscape, and the polarization of cultural values.

HIS 307 The Immigrant in American Life 3 Credits

Examines the experiences of immigrants in the United States, their assimilation, the reactions to them, and their contributions.

HIS 309 Women in American History 3 Credits

Examines the roles, status, and influence of women from the colonial era to the present. Studies the origins and development of feminism, including legal, political, educational, economic, and sexual rights; and studies social feminism, including reform movements in such fields as abolition, prohibition, pacifism, child labor, and social welfare.

HIS 318 The American Revolution 3 Credits

Examines the growing rift between the American colonies and the British Empire, the War for Independence, and the creation of a new American republic. Explores the political, economic, social and cultural history of the Revolutionary era, and includes the experiences of various groups such as Native Americans, slaves, and women.

HIS 319 Gender and Sexuality in American History 3 Credits

What makes a man, exactly, and what makes a woman? What kinds of sex are normal, and what kinds are abnormal? Who decides, and why? The answers to these questions are not fixed. Throughout American history, popular understandings of gender and sexual norms evolved in close relationship with the political, economic, racial, and social dictates of the time. This course will trace the evolution of ideas on sex and gender from the 18th century to the present using various historical sources including fiction and film, particular attention will be given to analyzing dominant models of proper behavior and the complex relationships of power enmeshed within them.

HIS 320 The History of Christianity 3 Credits

Examines Christianity's role in world history from the life and times of Jesus to the present. Emphasizes the quest for the historical Jesus, the emergence of Christianity after his death and triumph during the later Roman Empire, and Christian relations with pagans, Jews, heretics, witches and Muslims. Traces the various branches of Christianity, its spread throughout the world, church-state relations and responses to secularism, capitalism and communism.

HIS 325 Church & Society in Med Europe 3 Credits

Studies the role of the church in the shaping of early medieval society. Emphasizes the emergence of Christianity as a world force, its challenge from Islam, and the church's impact on the politics, thought, and economy of early medieval Europe.

HIS 326 Renaissance and Reformation 3 Credits

Studies the Renaissance, including the development of humanism and art as well as the political and economic changes of the period. Discusses the Renaissance church and movements for religious reform, leading to a consideration of the origins, development, and consequences of the Reformation. Examines the influence of the Renaissance and Reformation on the development of capitalism and the dynamic, secular nation-state.

HIS 333 20th-Century Europe 3 Credits

This course covers the history of twentieth-century Europe, a time when major wars brought Europe from the heights of prosperity and power to the brink of ruin. Europe's experience in war, social upheaval, and ideological conflict shaped the twentieth century not just in Europe but globally. We begin with a look at the condition of Europe at the turn of the century and assess why the European states plunged into what was a disastrous series of conflicts. We will consider the First World War and its impact, including the Russian Revolution and the peace settlement, and then focus on attempts to find stability and the emergence of radically new political movements that challenged the postwar order. Next we will examine the ways in which Europe embarked on the path of near self-destruction during World War Two. A discussion of the origins and consequences of the Cold War and the fate of the socialist and capitalist systems follows. Throughout the course we will touch upon European art and culture. We will conclude with a look at the events of 1989 and attempt to understand the meaning of the twentieth century. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 334 The Era of World War II 3 Credits

Investigates selected topics relating to the origins, events, and outcome of World War II, emphasizing the war's impact on 20th-century civilization. Traces the roots of the conflict back to the World War I peace settlements, and examines the rise of totalitarianism, pre-war aggression and appeasement, the immediate causes of the war's outbreak, the course of military actions, the diplomacy of the belligerents, the War's impact on civilian life, and factors that shaped the post-war world. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 335 Nazi Germany & Hitler's Europe 3 Credits

Examines the Nazi dictatorship in all its complex dimensions, from the early life of Adolf Hitler to total war and genocide. Students will explore how the Nazi movement arose in the context of modern German and European history, and how the Nazis were able to win the support of significant segments of the German population. We will study the Nazis' massive project of social and biological engineering – pronationalism, forced sterilization, extermination of "social and biological deviants," and, ultimately, the genocide of the Jews. Through memoirs, state documents, and historical accounts, the class will examine life from the vantage point of perpetrators, accommodators, victims, and resisters. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 336 Modern European Intellectual History 3 Credits

Examines the 17th-century revolution in scientific, philosophical, and political thought; the Enlightenment; Romanticism; the ideologies of Conservatism, Liberalism, and Socialism; Positivism; Darwinism; the crisis of European thought (1880-1914); and the major intellectual trends of the 20th century.

HIS 337 Post-1945 United States History 3 Credits

This course will magnify American society, politics, culture, and foreign policy from 1945 to the present, tracing the rise and fall of the "American Century". We will focus on topics such as the Red Scare, suburbanization, mass culture, the power of the presidency, the Civil Rights movement, Vietnam, disco, and the war on terror, offering students a unique opportunity to delve deeply into our recent past.

HIS 341 China in Revolution 3 Credits

Treats the Chinese Revolution in terms of political, economic, and social transformation.

HIS 342 Women in East Asia 3 Credits

Treats the history of the relationship between women and society in traditional East Asia and the modern transformation of their relationship.

HIS 343 Ottoman Empire and the Balkans 3 Credits

This course is divided into two parts. Part one examines the rise, zenith, and gradual disintegration of the Ottoman Empire, one of the greatest, most extensive, and long lasting empires in history, with special focus on the southeastern projection of Europe, known as the Balkan Peninsula. The second half of the course concentrates on Balkan history proper, from the First World War until the demise of communist regimes in the late 1980s. Lastly, we will consider contemporary developments, especially the breakup of Yugoslavia and its aftermath. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 351 Warfare in History 3 Credits

Studies the evolution of international and intergroup conflict through the ages; principles, theories, and kinds of war; the great military practitioners and thinkers of world history. Briefly touches upon the American experience as a recent segment in world military and cultural history.

HIS 352 History of Socialism 3 Credits

Considers the historical development of socialist ideas and their adaptations from ancient times to the present, including ancient and Judaeo-Christian antecedents, Utopian Socialism, Marxism, Anarchism, Communism, and Democratic Socialism, emphasizing the historical comparisons among these schools. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 353 Oral History 3 Credits

A study of the theory and practice of oral history. Involves an examination of the methodology and functions of oral history, the nature and character of oral evidence, and the place of oral testimony within the historical discipline.

HIS 398 Special Topics in History 3 Credits

Advanced exploration of special topics, themes or methodologies in history. This course may be repeated for credit on different topics.

Prerequisite(s): Permission of Instructor.

HIS 460 Research Seminar 3 Credits

Students produce a major research paper in this topical capstone seminar. Topics and themes vary by instructor. The seminar has a maximum enrollment of 16 students, so professors and students have an opportunity to work together closely over the course of a semester.

Prerequisite(s): HIS 260, and permission of instructor.

HIS 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Proposals must be approved by the Dean's Office no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours.

Prerequisite: Permission of instructor. When taken to substitute for HIS 460, HIS 260 and permission of instructor.

HIS 491 Internship in History 1-4 Credits

Internships to be offered each semester with such institutions as the New Jersey State Archives and the David Library of the American Revolution. Four credits may be taken for Category III History credit. Additional credits may be taken for Liberal Arts elective credit.

Prerequisite: Permission of internship coordinator.

Homeland Security (HLS)

Courses and Descriptions

HLS 202 The Political System - Theories/Theme 3 Credits

This course serves as a gateway to the subfields of comparative politics and international relations. The concept of the political system helps political scientists to organize political interrelations into patterns that allow systematic selection and interpretation of information and the study of processes and outcomes of politics in a variety of settings. The course introduces students to the main brands of normative theory prescribing the principles directing the operation of the political system, to some of the most important methods used to compare political systems and/or their components, and to the foremost approaches utilized in the study of the relations between political systems and their environments. Note: This course is cross-listed as POL 202. Students may not get credit for both HLS 202 and POL 202.

HLS 203 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective. Note: This course is cross-listed as POL 203. Students may not get credit for both HLS 203 and POL 203.

HLS 204 Development and Structure of the US Intelligence Community 3 Credits

This course provides a historical review of intelligence following World War II. It will examine the major functions of intelligence, as well as intelligence as a part of the foreign policy process: collection, analysis, counterintelligence, and covert action. Students will be introduced to a range of collection procedures: human, open source, electronic, photographic, and signal, with emphasis placed on interpreting and writing intelligence summaries. Note: This course is cross-listed as POL 204. Students may not get credit for both POL 204 and HLS 204.

HLS 205 Spies, Double Agents, and Moles: The World of Counterintelligence 3 Credits

This course provides in-depth exposure to historical, open-source investigations and concepts that illustrate the defensive, offensive, investigative, and collection efforts of counterintelligence (CI) activities. This course looks through the ideological and political prisms of how and why the Western and Eastern blocs fought the Cold War with agents, double agents, sleepers, and moles, and how MICE (money, ideology, compromise, and ego) and RASCALS (reciprocation, authority, scarcity, commitment, liking, and social proof) caused thousands to betray their countries and become the 'enemy within'. Counterintelligence (CI) is a critical element of US national security policy and interests both in the United States and abroad, and the course will focus on activities that comprise counterintelligence functional activities, including the detection of espionage and elicitation; counterintelligence interviews/debriefings; and the collection of counterintelligence information.

Prerequisite(s): POL 100 or POL 102.

HLS 220 Terrorism & Counter Terrorism 3 Credits

This course introduces students to the arguments about the definition of terrorism, the historical use of terrorism and the roles of ideology, religion, and psychological factors that help explain and predict it. The course seeks to identify the components of national security policy aimed at countering such elements and their cost, both in financial and civil right terms. Finally, to illuminate both the definition and the policies discussed, the course will offer brief comparisons with other states, especially Israel, the UK, and Russia.

HLS 270 Networking/Telecommunications 3 Credits

This course provides an introduction to business data communications and networking. The Internet and OSI models are discussed. Network technologies include local area networks, backbone, wide area networks, and the Internet. Introduction to network design, security, and network management are also provided.

Prerequisite(s): CIS 185.

HLS 300 U.S. Constitutional Law 3 Credits

The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as POL 300. Students may not get credit for both HLS 300 and POL 300.

HLS 301 Civil Liberties in the US 3 Credits

The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as POL 301. Students may not get credit for both HLS 301 and POL 301.

HLS 304 Political Behavior: Fear, Risk and Crisis 3 Credits

The course focuses on various analytical approaches in behavioral political science. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior-e.g., voting/non-voting, the formation of political partisanship and ideology, issue perceptions, responding to risk and uncertainty in the political environment, and engaging in civic political participation. Note: This course is cross-listed as POL 304. Students may not get credit for both HLS 304 and POL 304.

HLS 311 Sovereignty, the State and Borders 3 Credits

Borders have a prominent place in politics and human history. In the twentieth century, the best known barriers were the militarized Maginot Line and the Iron Curtain. Today, the political popularity of borders persists but the nature and quality of these borders and the threats they are created to repel have changed. Modern borders are designed not to keep militaries out, but to deter a perceived invasion of "undesirables"—with terrorists and unwanted immigrants leading the list of state concerns. Nowhere is this more evident than along the geographic fault lines dividing rich and poor regions, e.g. the Mediterranean Sea and the U.S.-Mexican border region. This course will examine the dynamic interactions between the question of how to govern ones borders and the twenty-first century liberal state with its diluted sovereignty — due to immigration, trade and international laws and regimes. In the first post-Cold War decades it was intellectually fashionable to dismiss borders as increasingly irrelevant to the human experience in the age of globalization. Scholars saw the significance of national borders for the Western world as having been vastly reduced by the three forces of military change, economic development and modern communication technologies (Horsman and Marshall 1994). Some free market liberals have even popularized the notion of an emergent "borderless world" (Ohmae 1990). These cheerful views stressing the benign, pacifying effects of economic integration and interdependence that must lead to a rollback of the state and the erosion of borders, came crashing down on September 11, 2001. After two decades of debordering, the new rules of the game focus on rebordering, and the importance of state with its reassertion of border controls and an ideological redefinition of border functions (Andreas and Snyder 2000). To be sure, borders, with all their practical and formal features, are increasingly just one element in a larger emergent operational sp.

HLS 314 Congressional Power and National Security Policy 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. Particular attention is paid to the role of the US government being able to balance individual rights and liberties within the national security state. Last, the course also takes an in-depth analysis of the U.S. Congress, looking comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror? Note: This course is cross-listed as POL 314. Students may not get credit for both HLS 314 and POL 314.

HLS 316 Presidential Power and National Security Policy 3 Credits

This course examines the development of the National Security State since the Second World War, and the ways in which it has affected, and been affected by, the Federal Executive. Topics to be covered will include the post-World War II redefinition of "national security", the Cold War (with a special focus upon war powers during Korea and Vietnam) and the changes that have occurred with the "War on Terror." Note: This course is cross-listed as POL 316. Students may not get credit for both POL 316 and HLS 316.

HLS 319 Terrorism, Revolutions and Political Violence 3 Credits

Revolutions are the mad inspiration of history. Trotsky's characterization calls attention to three important dimensions of violent political participation: the historical settings, ideology, and emotional fervor of the practitioners. The course focuses on these dimensions by analyzing revolutionary and terrorist movements in the 20th century. Special attention is given to the use of violence in the post-Cold War new world disorder. Note: this course is cross-listed as POL 319 and GLS 319. Students may only get credit for one course: HLS 319, GLS 319 or POL 319.

HLS 325 Public Administration 3 Credits

Public administration in modern society, emphasizing the administrative formulation of public policy and its implementation. Attention on who gets what, when, and how from the decisions of administrative units; the role administrators have in policy-making compared to elected legislators, chief executives and judges; the effect administrators have on the benefits citizens receive from government; and the effect administrators have on citizens' behavior. Note: This course is cross-listed as POL 325. Students may not get credit for both HLS 325 and POL 325.

HLS 334 Cyber Strategy 3 Credits

The course examines issues and challenges related to national security concerns and cybersecurity. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation's cyber infrastructure. The emphasis of this course is on "hands-on" experience whereby students will "learn by doing" analysis.

Prerequisite(s): Completion or transfer of HLS 203 or HLS 204 or POL 100 or POL 102 or permission of instructor.

HLS 341 Cybersecurity Policy: Hacktivism and Cyberviolence 3 Credits

Hacktivism is a process designed to be "the creative use of computer technology for the purposes of facilitating online protests, performing civil disobedience in cyberspace.

Prerequisite(s): Completion or transfer of HLS 203 or HLS 204 or POL 100 or POL 102 or permission of instructor.

HLS 346 The Politics and Ethics of Emergencies 3 Credits

This course explores historic and present day cases, ranging across Europe and the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, take on emergency powers to become so-called "states of exception." While in some cases such states have imposed mild and limited emergency measures, others have employed more draconian measures, suspending, if not dissolving, constitutionally guaranteed civil liberties, often for indeterminate and protracted periods. How various states have behaved in emergency situations will be the major content of this course. Note: This course is cross-listed as POL 346. Students may not get credit for both HLS 346 and POL 346.

HLS 350 U.S. Foreign Policy and Security Policy 3 Credits

Principles, institutions, and processes involved in the formulation and implementation of policies regarding the nation's military, economic, and environmental security within the global framework. Strands, trends, and problem areas in U.S. foreign policy, with focus on the changing global environment of the post-Cold War world. Note: This course is cross-listed as POL 350, GLS 350. Students may get credit only once.

HLS 351 Critical Views of Global Security 3 Credits

This course will examine the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspective on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security. Note: This course is cross-listed as HLS 351. Students may not get credit for both HLS 351 and POL 351.

HLS 353 Cyber War 3 Credits

Cyber-attacks are a growing concern for the international community. When does a cyber-attack constitute an act of war, or is it merely an inconvenience? Is cyber power military power? How prevalent are such attacks, and to what extent can cyber-attacks lead to conventional conflicts? Will cyber-attacks by non-state actors render more power to such players in destabilizing states? This course explores the different types of issues experienced in cyber wars, including mechanisms through which targeting of communication technology could escalate tensions and lead to an armed conflict, and ways through which states and international organizations could limit the destructive potential of cyber technology.

HLS 361 Courts, Judges and Politics 3 Credits

In-depth examination of the nature of judicial decision-making and the impact that judicial decisions have on society. Considers the sources of judicial authority, judicial fact-finding, statutory and constitutional interpretation, individual and collective processes of judicial decision-making, relations between judges and other government officials, and the political consequences of judicial decisions with particular emphasis on federal courts and judges. Note: This course is cross-listed as POL 361. Students may not get credit for both POL 361 and HLS 361.

HLS 363 Human Rights in Global Context 3 Credits

Examines human rights – droits de l'homme, derechos humanos, Menschenrechte, "the rights of man" – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breadth and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as POL 363. Students may not get credit for both HLS 363 and POL 363.

HLS 420 Enterprise Security 3 Credits

Students will be provided with complete coverage of computer security in all forms including hardware, network, and software program security. Through hands-on labs, students will learn firsthand how enterprise systems can be comprised and how computer professionals can prevent and provide counterattacks for security intrusions.

Prerequisite(s): CIS 310 or permission of instructor.

HLS 491 Internship in NJ Homeland Security 1-4 Credits

Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of field work per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.

Prerequisite(s): permission of instructor.

Human Resource Mgt (HRM)**Courses and Descriptions****HRM 312 Intro to Labor Relations 3 Credits**

This course deals with the relationship of labor unions and management, the fundamentals of collective bargaining, and labor legislation. The structure and growth of unions as well as the relationships and problems that exist among private and public sector organizations, the labor force, and government are surveyed.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 313 Legal Aspects of Human Res Mgt 3 Credits

This course deals with the various laws that affect human resource management, including social insurance, legislation, minimum wage laws, OSHA, ERISA, as well as equal employment opportunity legislation. This course is concerned not only with the provisions of these laws, but also with their constitutionality, their effects, and how they are administered.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 315 Employee Selection & Training 3 Credits

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.

Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

Prerequisite(s): MGT 310.

HRM 333 Employee Engagement 3 Credits

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

Prerequisite(s): MGT 310.

HRM 441 Sel. Topics: Human Res Mgt 3 Credits

Deals with one area of study in the field of human resource management such as protective labor legislation, mediation and arbitration, the administration of labor unions, or case problems in human resource management. The topic varies each semester and is announced at the time of registration.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or HRM major elective.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 491 Internship 1-4 Credits

Provides the student with the opportunity to supplement and apply human resource management coursework in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing work experiences. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

Prerequisite(s): Junior or Senior; Major in human resource management and MGT 310; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

HRM 492 Internship in Human Res Mgt 3 Credits

Provides the student with the opportunity to supplement and apply their human resource management classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions. 2.75 GPA overall and 3.0 GPA in the major is required.

Prerequisite(s): major in human resource management or management and leadership, and MGT 310; senior status; and permission of instructor.

Integrated Sciences (SCI)**Courses and Descriptions****SCI 480 Science Seminar Series 1 Credits**

A companion 1 credit pass/fail seminar series to the Science Seminar series. Students in this class will critically evaluate journal articles in multiple scientific disciplines suggested by speakers and discuss them with peers and faculty mentors.

Integrated Sciences and Math (ISM)**Courses and Descriptions****ISM 100 Introduction to the Integrated Sciences and Math 4 Credits**

Traditional lectures and laboratory experiences are blended to encourage students to begin asking questions and designing experiments to learn about the physical, life, and Earth sciences. This is the entry-level course for the integrated sciences and math major, though it is open to all students who want to actively explore the nature of science. Two three-hour combined lab/lecture sessions per week.

ISM 410 Seminar in the Integrated Sciences and Math 3 Credits

As a senior seminar course, class discussion, presentation, and participation will be emphasized. Science topics covered will extend beyond the range of a single science discipline. Students will evaluate articles (from popular science magazines, newspapers, etc.) to discern the connections among various scientific disciplines. Students will present written critiques of the articles focusing on the proper use of the scientific method, data analysis techniques (e.g., statistics, mathematics, etc.), and on the plausibility of the interpretations. Students will also present a semester-long project (both written and oral) that focuses on the connections among disciplines of a scientific issue.

Prerequisite(s): ISM 100, senior standing, or permission of instructor.

Interdisciplinary Studies (IND)

Courses and Descriptions

IND 101 Introduction to Education 3 Credits

High School Partnership introduces high schools students to the teaching profession through four main tenants: growth and development of learners, history, structure, and trends in teaching, classroom instruction, and analysis and reflection. Facilitated by their teacher-mentors (instructors of the course), students will work in small groups to learn about the development and structure of the American education system, explore careers in the teaching profession, analyze ways a teacher's personality, disposition, and cultural competence impact how students learn, and observe, develop, implement, and evaluate lesson plans and teaching strategies. Students will have the opportunity to explore the various joys and challenges of teaching diverse learners in today's classrooms along with an opportunity to examine their own motivations of why they wish to pursue the teaching profession.

IND 133 Creativity: Edu & Psych Persp 3 Credits

This course will examine both psychological and educational research about creativity. It will consider the various definitions of creativity that have guided research and theory; compare current theories of creativity in the fields of education and psychology, including cognitive, personality, and motivational theories; review research regarding what has been termed the "dark side" of creativity, including possible links to mental illness; and consider if and how schools and colleges might include creativity in admissions and promote creativity among students.

IND 200 Study Away 3-17 Credits

Study Away programs are domestic, off-campus programs that enable students to engage in experiential learning complemented by academic credit-bearing coursework at an accredited institution.

Prerequisite(s): 2.5 GPA, sophomore standing or above, and permission of Dean required.

IND 210 Global Encounters 3 Credits

This course provides students with an exposure to foreign cultures consisting of both travel and study components. Destinations may include countries in Europe, Latin America, or Asia. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political, and aesthetic cultural components appropriate to the location(s) visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. A travel fee is required. No foreign language skills are required unless otherwise indicated.

IND 233 The Development of Children's Imagination 3 Credits

The Development of Children's Imagination will introduce students to key theories and research in developmental psychology related to the development of children's imaginations. It will focus especially on children's literature and how experiences with fiction in a variety of media influence the development of children's imaginations. Students will be introduced to relevant theory and research from the fields of developmental psychology and children's literature in class meetings at Rider University on weekends during Spring Term and use Disney World as a "laboratory" in which to apply developmental theory in a real-world context soon after Commencement.

IND 252 Cultural Transition: From China to U.S. 3 Credits

The primary purpose of this course is to help Sanda students adapting to American culture and college life at Rider. As a sequenced two-semester course, it will introduce students to a number of carefully selected intercultural theories/concepts that best explain major differences between Chinese and American culture and communication. In addition, this course is also designed to help Sanda students improving both oral and written communication in English. During the course, each Sanda student will be paired with a Rider student who takes Chinese language classes his or her study partner. This partnership is meant to be mutually beneficial to both Sanda and Rider students. Through their interaction, they can help each other to learn about their respective target languages and cultures. They will also be assigned a final project, such as a radio show or a presentation at the cultural event on campus, which will illustrate their effective collaboration and their understanding of each other's language and culture.

IND 300 Supervised Study 1-4 Credits

Juniors and seniors in good academic standing who, for reasons beyond their control, find that a required course has not been scheduled before they expect to graduate, may receive permission from a faculty sponsor, the chairperson, and the dean to register for a supervised study. Appropriate forms (available in the dean's office) must be completed and approved no later than the last day to add courses for the semester in which the supervised study is to be undertaken.

IND 316 Nature's Business 3 Credits

This interdisciplinary, team-taught, experiential learning course brings together various science, liberal arts, and business perspectives in examining the relationships among biological, social, environmental, economic, geological, and political issues. Topics to be discussed and researched by students can include, but are not limited to, ecotourism, sustainable development, biodiversity, local and regional environmental and historical geology, cultural norms, and the legal and political systems of the country being visited. The study tour component of the course provides students with a first-hand opportunity to observe and record field data from settings outside of the United States and in their discipline of interest. Typically, there are approximately 12 hours of pre-trip lectures, seminars, and/or faculty/student presentations during the fall semester, an international study tour, 9-14 days in length, during January (exact dates and length depend on the international location), and approximately three hours of post-trip meetings, seminars, and student presentations during the spring semester. Students enroll in the course during the spring semester. Note: This course is cross-listed as CBA 316; Students may not get credit for both CBA 316 and IND 316. For Business students who take the course as CBA 316, the course will count as a business course. If taken as IND 316, the Business student will receive credit as a liberal arts and science course.

Prerequisite(s): Permission of Instructor.

IND 350 The Rider Shadow Experience 1 Credits

The Rider Shadow Experiences provides students with the opportunity to gain hands-on experience in a professional setting connected to their academic goals and career plan. The Shadow Experience helps students connect classroom learning to real-world applications and build mentoring relationships and networking skills. Students must have a GPA minimum of 3.0 and submit an application with at least one letter of recommendation from a member of the Rider Faculty. IND 350 is a pass/fail course.

Prerequisite(s): This course is open to students with 45 or more completed credits.

IND 381 Training Residence Educ I 1 Credits

The focus of this course will be on the basics duties and skills of the resident advisor position. The skills introduced in this course will be used in their role as a resident advisor and will also enhance their everyday lives. Participation in shared learning experiences will be part of this course.

IND 382 Training Residence Educ II 1 Credits

This course builds upon the skills learned in IND 381, providing continued support and training for students to become successful resident advisors or house managers. Students will gain a greater understanding of the RA/HM position through the discussions and written reflection on their job experiences. Out of class readings will be used to reinforce the basic policies and procedures they have learned, as well as emphasizing the types of personal characteristics that will allow one to excel in the position. Participants are exposed to leadership content that deals with concepts such as diversity, teamwork, critical thinking, ethical decision making, and peer leadership.

IND 383 Training Residence Educ III 1 Credits

A reinforcement of the skills learned in IND 382 through discussions and written reflections of job experiences. Basic policies, procedures and leadership characteristics will be emphasized. Students will further examine the various concepts of diversity, teamwork, critical thinking, ethical decision making and peer leadership.

IND 398 The Co-Operative Experience Seminar 3-6 Credits

This course will typically meet one day per week during the co-operative experience. The seminar is designed to expose participants to appropriate interdisciplinary content, ethical principles, professionalism, group and organizational behavior, interpersonal communication skills, critical thinking and problem solving skills. Students may be assessed on presentations, papers, journals and other measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organizational representative of the placement site, and the student. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. Contact the appropriate department for additional information. Must have a 2.75 GPA at time of registration. Prerequisite(s): junior standing.

Corequisite(s): (dept) 399 The Cooperative Experience; IND 398 and (dept) 399 combined cannot exceed 15 credits.

IND 403 New Literacy for New Learning 3 Credits

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid (a mix of online and face-face meetings) course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for our own work as readers and writers across the varied disciplines and social and professional settings in which we engage as well as how we make sense of the information that streams across our bound books, our digital devices, and our visual landscapes. What counts? What doesn't? How do we decide? Is the 21st century digital context in which we are situated shaping literacy differently than before the information explosion?.

IND 490 Independent Study: Research and Creative Expression 3 Credits

Students who wish to pursue special topics that they have become interested in as a result of course work may take up to 12 semester hours of independent research and study toward graduation. To be eligible for independent research and study, however, a student must be a junior or a senior in good academic standing. Only one project can be scheduled in a semester, and for no more than four semester hours. Each independent research and study proposal must be approved by a faculty sponsor, the department chairperson, and the dean of liberal arts and sciences by no later than the third week of the semester in which the project is to be conducted.

International Study (INT)

Courses and Descriptions

INT 314 Study Abroad 12-18 Credits

Study Abroad options available to students through Rider study abroad agreements include a wide variety of academic locations and courses. Programs may include opportunities for intensive language study as well as courses in other academic disciplines that may include the local culture, literature, art, music, history, or politics of the site selected for study. Some sites provide courses taught in English. Students may be approved to enroll in Study Abroad for a semester, summer session, or a full year. Additional information is available from the study abroad office.

Prerequisite(s): 2.5 GPA; sophomore standing or above.

INT 315 Study Abroad 12-17 Credits

Study Abroad options available to students through Rider study abroad agreements include a wide variety of academic locations and courses. Programs may include opportunities for intensive language study as well as courses in other academic disciplines that may include the local culture, literature, art, music, history, or politics of the site selected for study. Some sites provide courses taught in English. Students may be approved to enroll in Study Abroad for a semester, summer session, or a full year. Additional information is available from the study abroad office.

Prerequisite(s): 2.5 GPA; sophomore standing or above.

INT 316 Study Abroad 1-14 Credits

Study Abroad options available to students through Rider study abroad agreements include a wide variety of academic locations and courses. Programs may include opportunities for intensive language study as well as courses in other academic disciplines that may include the local culture, literature, art, music, history, or politics of the site selected for study. Some sites provide courses taught in English. Students may be approved to enroll in Study Abroad for a semester, summer session, or a full year. Additional information is available from the study abroad office.

Prerequisite(s): 2.5 GPA; sophomore standing or above.

Italian (ITA)

Courses and Descriptions

ITA 100 Italian I 3 Credits

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive and presentational communication skills as well as growth in cultural, literary and interdisciplinary knowledge as they move through a sequence of study. This course is the first part of the first year experience in Italian during which the development of communicative and cultural competencies are at the center of this experience. At the end of the course, successful students will be able to communicate short messages on highly predictable, everyday topics that affect them directly. They will also develop a sense of the cultural aspects of people who speak the target language. Cultural components include the importance of regions in the construction of Italian identity; differences in American and Italian school and university systems; the role of the family in Italian life. The course is conducted in Italian. This course fulfills LAS Core Curriculum Requirement I. Essential Competencies: Foreign Language.

ITA 101 Italian II 3 Credits

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive and presentational communication skills as well as growth in cultural, literary and interdisciplinary knowledge as they move through a sequence of study. This course is the second part of the first year experience in Italian during which the development of communicative and cultural competencies are at the center of this experience. At the end of the course, successful students will be able to handle successfully a variety of uncomplicated communicative tasks in straightforward social situations. They will also develop a sense of the cultural aspects of people who speak the target language. Cultural components include differences between American and Italian cuisines, sports, routines, and healthcare systems. The course is conducted in Italian.

Prerequisite(s): ITA 100 with a minimum grade of D or LL 145 with a minimum grade of C. This course fulfills LAS Core Curriculum Requirement I. Essential Competencies: Foreign Language.

ITA 200 Italian III 3 Credits

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive and presentational communication skills as well as growth in cultural, literary and interdisciplinary knowledge as they move through a sequence of study. This course is the third part of the four-semester sequence in Italian. At the end of ITA 200, successful students achieve proficiency in Italian at the intermediate level in oral expression, listening comprehension, reading of short texts, and writing. Students will be able to successfully navigate conversational and written Italian in cultural contexts related to course themes: personal relationships, Italian communities, hobbies and free time activities, the value of social and political ideas, the Italian family across the generations. The course is conducted in Italian. This course fulfills LAS Core Curriculum Requirement I. Essential Competencies: Foreign Language.

Prerequisite(s): ITA 101 with a minimum grade of D or LL 146 with a minimum grade of C.

ITA 201 Italian IV 3 Credits

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive and presentational communication skills as well as growth in cultural, literary and interdisciplinary knowledge as they move through a sequence of study. This course is the fourth and final part of the four-semester sequence in Italian. At the end of ITA 201, successful students achieve proficiency in Italian at the intermediate level in oral expression, listening comprehension, reading of short texts, and writing. Students will be able to successfully navigate conversational and written Italian in cultural contexts related to course themes: societal changes in Italian culture, science and technology, Italian contributions to the arts, media, and the culture of business in Italy. The course is conducted in Italian.

Prerequisite(s): ITA 200 with a minimum grade of D or LL 247 with a minimum grade of D. This course fulfills LAS Core Curriculum Requirement I. Essential Competencies: Foreign Language.

Language & Literature (LL)

LL 037 College Reading and Writing 3 Credits

Required for students placed into this course as a result of the basic skills English testing program. This intensive course reviews effective reading, writing, and study processes and leads students to the level of mastery required to begin CMP 125 Seminar in Writing and Research.

LL 141 French I 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 142 French II 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 141.

LL 145 Italian I 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 146 Italian II 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 145.

LL 151 German I 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

LL 152 German II 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 151.

LL 243 French III 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 142.

LL 244 French IV 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 243.

LL 247 Italian III 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 146.

LL 248 Italian IV 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 247.

LL 253 German III 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 152.

LL 254 German IV 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 253.

LL 280 Sacred Texts and Literature 3 Credits

Explore the cultural, theological, and artistic contexts of key themes (e.g. creation, journey, forgiveness, love) in the sacred texts of the major historical world religions as they are portrayed in contemporary poetry and drama, and in novels that have been adapted to film

Prerequisite(s): CMP 125 or CMP 120 or BHP 150.

LL 282 Major Poets 3 Credits

This course introduces students to poetry via the reading and analysis of different poetic forms. While reading, listening to, performing and discussing poems from a wide cultural spectrum, students learn to evaluate and appreciate poetry by understanding such elements as metaphor and persona.

Prerequisite(s): CMP 125 or BHP 150.

LL 285 Writing About Music: A Seminar for Performers, Teachers, and Academics 3 Credits

A writing intensive course focusing on the essential writing tasks encountered by musicians in their roles as performers, teachers, and scholars.

Prerequisite(s): BHP 150 or CMP 125.

LL 327 Dante's Commedia 3 Credits

An introduction to Dante Alighieri's *Commedia* ("Inferno", "Purgatorio" and "Paradiso") exploring key ethical and aesthetic elements of the poem through close reading and critical analysis of the primary text.

Prerequisite(s): BHP 150 or CMP 125.

LL 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Law and Justice (LAW)

Courses and Descriptions

LAW 140 Intro Seminar in Law & Justice 3 Credits

Introduces students to the interdisciplinary study of law and justice.

The seminar is designed to enable students to think critically about legal issues, address legal problems from various viewpoints, and apply different types of theories of justice to analyze laws and legal institutions. Students will learn to examine law and legal issues from a variety of perspectives and approaches: anthropological, historical, literary, philosophical, political, psychological, and sociological. Open to freshmen and sophomores only.

LAW 305 Trial Advocacy 3 Credits

Students will apply fundamental legal concepts and rules of evidence to specific cases. By engaging in trial simulations, students will evaluate various forms of evidence, identify legal principles and evidentiary rules that impact a criminal trial, learn about trial procedures, pursuit of case theories, and witness, exhibit and jury selection.

LAW 308 Conflict & Conflict Resolution 3 Credits

Focuses on understanding the meaning of conflict and strategies for its resolution. The course examines the ways conflict functions in various social contexts including professional, community, family, education, and international relations. Traditional models of adjudication will be compared to alternative forms of dispute resolution. Students will be introduced to research on the practice and effectiveness of various forms of conflict and conflict resolution. Students will participate in various class exercises, including role-plays, simulations, and case studies.

LAW 310 Cyberspace Law and Policy 3 Credits

Explores the legal and policy concerns raised by the Internet, nationally and globally. The course considers issues of legal regulation of the Internet, and consider the debate about whether cyberspace can or should be regulated. Attention will be given to the applicability of principles of law and models of regulation. Topics addressed will include jurisdiction, freedom of expression, intellectual property, privacy protection, safety concerns, equal access, electronic commerce, and computer crime.

LAW 355 Sports and the Law 3 Credits

Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. Note: This course is cross-listed as SPT 355. Students may not get credit for both LAW 355 and SPT 355.

LAW 395 Selected Topics in Law/Justice 3 Credits

Studies specialized areas of scholarship related to laws, legal institutions, legal or law-related occupations, and/or legal decision making. The course will provide an interdisciplinary examination of a selected topic. Topics vary and are listed in the course roster.

LAW 450 Law & Justice Senior Seminar 3 Credits

Draws on and develops students' knowledge and understanding of law and legal institutions and applies it to a specific legal topic, method, institution, or controversy. Topics will vary. Students explore the social, political, ethical, and economic issues relevant to the topic. Students will be expected to contribute to seminar discussions and to complete projects related to the seminar theme. Required for seniors in law and justice minor and open to others by permission of the Director of the Law and Justice Program.

LAW 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

LAW 491 Internship in Law and Justice 1-4 Credits

Provides supervised work experience in an institution, office, or agency related to law or law enforcement, such as courts, prosecutor/defense attorney offices, private law offices, state agencies, and local police departments. Students are expected to apply and broaden the knowledge obtained from law and justice minor courses to their fieldwork experience.

Prerequisite(s): 2.75 GPA and permission of the Director of the Law and Justice program.

LAW 496 Honors Thesis in Law & Justice 3-6 Credits

Entails substantial research and writing on a topic selected by the student. Proposals must be reviewed and approved by the law and justice program committee. Proposals must be submitted at least four weeks prior to course registration.

Prerequisite(s): Seniors in the minor with a minimum cumulative GPA of 3.25 and a 3.25 GPA in law and justice minor courses.

Leadership Development Program (LDP)

Courses and Descriptions

LDP 200 Foundations of Leadership 3 Credits

This course provides students with a working model of leadership to guide their personal leadership development. It also exposes students to insights about leadership from respected commentators, scholars, and practitioners. Finally, it provides students with an opportunity to actively "do" leadership through experiential learning activities.

LDP 220 Service Learning Through Minding Our Bus 3 Credits

A community service mentoring project designed to promote leadership, teamwork, and entrepreneurship among Trenton youth through a school-based team mentoring model. Students will undergo intensive training in leadership skills, communication skills, team building skills, cultural diversity, small business entrepreneurship, and problems of early adolescent development prior to their fieldwork experience. Students will form teams to mentor groups of students at a Trenton middle-school in the creation and management of their own microbusinesses. Student journals, quizzes, field trips and class meetings will serve to organize and structure experiential learning.

Prerequisite(s): permission of instructor.

LDP 398 The Co-op Experience Seminar 3-6 Credits

This course will typically meet one day per week during the co-operative experience. The seminar is designed to expose participants to appropriate interdisciplinary content, ethical principles, professionalism, group and organizational behavior, interpersonal communication skills, critical thinking, and problem solving skills. Students may be assessed on presentations, papers, journals and other measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organizational representative of the placement site, and the student. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. Contact the appropriate department for additional information. **Prerequisite(s):** junior standing and 2.75 GPA at time of registration.

Corequisite(s): (dept) 399 The Co-operative Experience; LDP 398 and (dept) 399 combined cannot exceed 15 credits.

Liberal Studies (LIB)

Courses and Descriptions

LIB 200 Intro to Liberal Studies 3 Credits

Introduces students to the various perspectives and methods of the disciplines in liberal studies: natural and social sciences, humanities, and the arts. Students learn the multifaceted questions and answers offered by each discipline. They study the historical development of the university and the rise and transformation of liberal studies disciplines.

LIB 400 Seminar in Liberal Studies 3 Credits

A critical examination of the tradition of Western humanism and the way it has been transmitted through liberal arts education. Deals with a variable set of permanent problems in humanistic debate and learning e.g., specialization, the need for unifying theories of knowledge, the purpose of history, the place of intellectual life in mass society, the meaning of freedom, the modern problem of alienation, the responsibilities of the university, etc. Emphasis on why and how such problems have been addressed rather than any presumptive solutions.

LIB 490 Independent & Supervised Study 1-4 Credits

Independent and Supervised Study is available to CCS students for special study projects. Students must have completed a minimum of 45 credits applicable to a Rider degree and a minimum of 12 credit hours at Rider with a GPA of 2.5 or better. Each project may be taken for one-four credits and a maximum of six credits may be applied to the associate degree, 12 credits to the bachelor degree.

Management Science (MSD)

Courses and Descriptions

MSD 104 Intro to Quantitative Methods 3 Credits

The aim of this course is to give students the preparation in algebra needed for successful completion of other required courses in management sciences and the functional areas of business administration. Topics covered include linear and quadratic equations and functions, systems of linear equations, exponential functions, logarithms, linear inequalities, radicals, percent change, scientific notation and scientific digits.

MSD 105 Quantitative Methods for Business 3 Credits

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 110 Math for Actuarial Science I 3 Credits

The first of two courses designed to give the actuarial science student the necessary background in calculus. Topics include a brief review of a function, and introduces limits and continuity, the derivative and its applications, implicit differentiation, differentiating an inverse function, differentials, related rates, curve sketching, optimization problems, L'Hopital's rule, and an introduction to the indefinite integral. Fall.

MSD 111 Math for Actuarial Science II 3 Credits

A continuation of MSD 110. Topics include the definite integral and the fundamental theorem of calculus, change-of-variable theorems, the area between two graphs, integration by parts, improper integrals, infinite series, partial differentiation of a function of two variables and its optimization applications, and the double integral of a function of two variables.

MSD 205 Business Statistics 3 Credits

This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.

Prerequisite(s): MSD 105.

MSD 301 Operations Management 3 Credits

This course introduces students to the concepts and techniques necessary to manage firm operations. The course emphasizes enhancing students' ability in problem-solving and decision-making by (1) identifying operations problems, (2) structuring decision-making process, (3) evaluating options that provide resolution of the problems using appropriate and proven techniques. It is well recognized that today's global business competition is among supply chains. Operations management concentrates on the supply side of the corporate strategy of a supply chain, where the bulk of the organization resources are committed. Good management of operations, which may also be called management of supply chain operations, is crucial in achieving an effective supply chain. The emphasis on systematic thinking and analytic decision model discussed the course will also provide students with necessary skills and useful tools in the emerging field of Business Analytics.

Prerequisite(s): MSD 200 or MSD 205 or MTH 341.

MSD 320 Statistics for Risk Modeling I 3 Credits

This is the first course in a two course sequence to prepare actuarial science students for the Society of Actuaries' (SOA) new exam "Statistics for Risk Modeling." This course (SRM I), together with the second course of the sequence SRM II, cover all the topics in the SOA's proposed syllabus for the exam. The course covers two major topics: (i) Generalized Linear Models, and (ii) Regression-based time series models and forecasting.

Prerequisite(s): MSD 205 or MTH 341.

MSD 325 Statistics for Risk Modeling II 3 Credits

This is the second course in the two course sequence to prepare actuarial science students for the Society of Actuaries (SOA) new exam "Statistics for Risk Modeling." This course, together with MSD 320, will cover all the topics in the SOA's proposed syllabus for the exam. This course examines the use of statistical learning methods to adequately model and understand complex datasets in business and economics. The use of the statistics software R to analyze realistic data sets is an important component of the course. Topics include: (i) Basics of Statistical Learning; (ii) Principal Components Analysis; (iii) Decision Trees; and (iv) Cluster Analysis.

Prerequisite(s): MSD 205 or MTH 341 or equivalent course.

MSD 350 Financial Mathematics 3 Credits

A thorough treatment of the theory and applications of compound interest. Topics include the measurement of interest, elementary and general annuities, amortization schedules and sinking funds, and bonds and other securities.

Prerequisite(s): MSD 205 or equivalent. Fall.

MSD 490 Independent Research and Study 3 Credits

Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

MSD 491 Summer Mgt Sciences Internship 3 Credits

An honors course that provides the student with approximately two months of supervised employment with participating companies. Students are given a variety of work experiences. They are required to complete a term paper and to make an oral presentation to the faculty. Grading is on a pass/fail basis.

Prerequisite(s): Permission of instructor.

Management and Leadership (MGT)

Courses and Descriptions

MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

Prerequisite(s): minimum 30 credits completed.

MGT 310 Intro to Human Resource Mgmt 3 Credits

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

Prerequisite(s): MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves.

Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.

Prerequisite(s): MGT 201 or PSY 210.

MGT 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 329L Research Methods: Org Psy Lab 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 336 Career Management 3 Credits

How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this course.

The meaning of work and the development of careers are discussed, and students undertake self-assessment for the purpose of career planning. Careers are examined in the context of important changes occurring today in the world of work. The impact of the executive, organizational counselors and trainers, and the educational system upon the development of human potential is examined, along with the techniques for human resource planning and development.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 346 Negotiation 3 Credits

The purpose of this course is first, to explore the major concepts and theories behind effective negotiating practices and second, to develop negotiating skills applicable to a wide range of contexts. A knowledge of negotiation is a crucial requirement for anyone interested in a business career since it is a common mechanism for implementing change and for resolving conflict in the workplace. Topics will include two-party negotiations, power and politics, mediation, arbitration, and collective bargaining. A variety of teaching techniques will be used including readings, discussion, and role-playing.

Prerequisite(s): MGT 201 or permission of the instructor.

MGT 355 Team Management 3 Credits

This course prepares students to work in organizations that use teams as an integral part of their functioning-an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

Prerequisite(s): MGT 201 or PSY 210.

MGT 363 Management Skills 3 Credits

The focus of this course is on specific skills necessary for success in a management role. These skills include leading, communicating effectively, delegating, conflict and time management and motivating others. Students will have opportunities to practice skills and to apply their knowledge to business cases.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 375 International Management 3 Credits

This course explores the ways in which culture impacts management practices and organizational behavior and dynamics. Topics include cross cultural communication, expatriate selection and training, leading and motivating cross cultural teams, developing organizational strategies to compete in a global market place, international business ethics, and current topics.

Prerequisite(s): MGT 201.

MGT 399 Co-Op in Management and Leadership 6 Credits

This co-op program provides management students with an opportunity to work full-time in a company and apply what they have learned in their Management and Leadership classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a work journal and reflection paper. Supervising faculty will meet with the student regularly to discuss their progress and accomplishments in the co-op. Co-op credits can be applied toward business or free elective requirements.

Prerequisites: Junior status with a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in the major.

MGT 410 Ethical Management 3 Credits

Managers today face a broad range of ethically challenging situations. This course will help students to confront and analyze ethical dilemmas effectively in the workplace. Cases, simulations, hands-on content will engage students with the material, and will generate robust class discussion.

Prerequisite(s): Completion of MGT 201 and Leadership Requirement course.

MGT 421 Sel Topics:Mgt & Organztn Behv 3 Credits

The seminar focuses on an area of study announced at the time of registration (students should check the registration material). Examples of possible topics are: leadership, motivation, and organizational behavior research. Prerequisites vary according to the topic and are listed in the registration material.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 450 Advanced Leadership 3 Credits

Leadership is the ability to influence a group of people towards a goal. In this course, students will increase their own leadership capacities so that they can become effective leaders of organizations and teams. They will integrate what they have learned from their experience and other coursework with diverse reading and writing assignments and team projects as they explore complex leadership issues related to vision, communication, motivation, ethics, team dynamics, power, and change management.

Prerequisite(s): MGT 201; Leadership elective (LDP 200, LDP 220, LDP 398, MGT 355, MGT 363).

MGT 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 491 Intern Management/Org Behavior 3 Credits

Provides the student with the opportunity to supplement and apply their management and leadership classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

Prerequisite(s): major in management and leadership or human resource management and MGT 363, or senior status; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

Marine Sciences (MAR)

Courses and Descriptions

MAR 120 Oceanography 3 Credits

In this course, students will investigate the geological, chemical, physical, and biological processes that shape the ocean. Emphasis will be placed on how these processes interact with each other and with human populations. These interactions influence important global phenomena that impact all our lives, including weather and climate, the distribution of marine organisms and other natural resources, and coastal processes. Understanding these phenomena will enable students to make more informed decisions and contribute to serious global marine issues. Students will learn through a combination of hands-on exercises designed to foster a deeper understanding of the scientific content as well as the scientific process, practical experiences with real data, readings, and some lectures. CLAS general education areas addressed: DP & GP.

MAR 121 Introductory Oceanography Lab 1 Credits

This lab course introduces students to the fundamental aspects of geological, chemical, physical and biological oceanography. Students learn through inquiry-based, hands-on exercises and activities using actual data collected in the lab and in the field. Independent projects and local field trips during lab and on weekends may be required. One three-hour lab per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): MAR 120 or GLS 120 or as prerequisite(s).

MAR 210 Marine Life through Time 4 Credits

Survey of the important developments in marine life over the last three billion years from the Pre-Cambrian evolution of one-celled organisms, through the Cambrian explosion of complex marine invertebrate life and subsequent diversification of backboned organisms in the Ordovician time, to the colonization of marginal marine and freshwater habitats in the Silurian-Devonian geological periods, and ultimately to extinctions during global crises of the late Devonian, Permian, Triassic, Cretaceous, and Pleistocene time intervals. The emphasis is on evolutionary adaptive breakthroughs within each phylum, particularly the significant morphological and anatomical innovations, and the subsequent radiation of these higher taxa into new habitats and niches through geologic time. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): GEO 100 & GEO 102; or GEO 113 & GEO 102 (can be signed in to take 102 with 113); or BIO 115; or BIO 116; or permission of instructor.

MAR 210L Marine Life through Time Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): MAR 210.

Prerequisite(s): GEO 100 & GEO 102; or GEO 113 & GEO 102 (can be signed in to take 102 with 113); or BIO 115; or BIO 116; or permission of instructor.

MAR 290 Directed Research and Study in Marine Sciences 1-4 Credits

Provides an opportunity for freshman and sophomore students to gain hands-on research experience in the marine sciences. This is an individual program of study and each student will work with a selected faculty member on a topic of mutual interest. The course consists of a combination of project meetings, supervised research, and guided readings. The focus will be on formulating research questions, designing and conducting experiments, collecting the necessary data, reviewing the scientific literature as it relates to each student's research topic in a weekly meetings with the instructor, and communicating the findings by writing a final project report.

MAR 300 Introduction to Field Marine Science 4 Credits

In this two-week field course, students will explore various topics in marine science through practical, hands-on, inquiry-based exercises and activities. The course will focus on the biological, geological, chemical, and physical processes that influence diverse marine flora and fauna found in selected marine environments, emphasizing shallow subtidal and intertidal environments such as coral reefs, sandy beaches, turtle grass beds, rocky intertidal pools, coastal wetlands, mangrove swamps, etc. Topics will be examined using field team exercises, a group mapping project, and individual research projects. Activities will help students develop their skills in research, use of field and laboratory equipment, computer analysis of data, and scientific writing, along with gaining content knowledge about the components and processes of environments studied. The course is taught at an appropriate marine field station at a U.S. or international location. Field portion of course is completed during the summer. Additional travel costs vary, depending on location.

Prerequisite(s): BIO 115 or 116 or any 200 or higher level lab science class; and MAR 120; and permission of instructor.

MAR 325 Marine Vertebrates 4 Credits

A survey of the biology of marine vertebrate animals, including fish (jawless fish, sharks, rays, and bony fish), reptiles (sea turtles and sea snakes), sea birds, and mammals (manatees, seals, and whales). The evolution, physiology, natural history, ecological relationships, and human interactions of these groups are emphasized. Three hours of lecture and one three-hour lab per week. Field trips may be required. **Prerequisite(s):** BIO 272 and BIO 272L.

Corequisite(s): MAR 325L.

MAR 325L Marine Vertebrates Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 325.

MAR 330L Chemical Oceanography Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 330.

MAR 340 Marine Processes and Environments: Seminar 3 Credits

This course is designed as a seminar course. Therefore, students will learn to lead class discussions, to analyze and critique peer-reviewed journal articles, and to enhance their presentation skills. Students will interpret graphical, spatial, and numerical data to support their positions. Content will emphasize the interactions among marine processes, biological features, and geologic landforms.

Prerequisite(s): MAR 120 or GEO 100; GEO 306.

MAR 360 Plankton Ecology 4 Credits

Examines the diversity, physiology, and ecology of marine phytoplankton and zooplankton. Students will survey the dominant plankton groups, their distribution, nutritional requirements, growth kinetics, and behavior. Planktonic predator/prey interactions and food web dynamics will be discussed. Students will also examine the interdisciplinary nature and role of plankton in biogeochemical cycles. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required. **Prerequisite(s):** MAR 120 and MAR 121; or BIO 116.

Corequisite(s): MAR 360L.

MAR 360L Plankton Ecology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 360.

MAR 380 The Learning and Teaching of Marine Science 4 Credits

This field-based course provides a practical experience in integrating marine science with pedagogical concepts. Students will use scientific methodology to explain marine ecosystems through specially designed, inquiry-based exercises. During these activities, students will address the process of applying college-level content to their own classroom settings, considering national and state standards. Hands-on, field-based exercises will provide experience with a diversity of marine habitats and the biological, geological, hydrological, and physical processes that influence them. Visited habitats can include rocky intertidal, salt marsh, tidal flat, beach and channel sand bars. As a result, students will develop field and laboratory skills in marine science and use them in designing materials for their own classroom use.

MAR 401 Marine Ecology 4 Credits

The purpose of this course is to introduce students to fundamental principles in ecology, as it relates to marine systems. Topics include the marine environment and its influence on the organisms living there; biodiversity and speciation; factors regulating population dynamics in marine systems; larval and fisheries ecology; species interactions such as predation, competition, and symbiosis; factors regulating productivity and energy flow in marine systems; and marine conservation. Hands-on laboratory exercises will provide students with the opportunity to design and conduct experiments related to marine ecology, and to collect, analyze, and interpret data from those experiments. Ecosystem modeling will also be introduced. Three hours of lecture and one three-hour lab per week. Weekend field trips may be introduced. **Prerequisite(s):** BIO 272, BIO 272L.

Corequisite(s): MAR 401L.

MAR 401L Marine Ecology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 401.

MAR 410 Physical Oceanography 3 Credits

Introduction to the physical aspects and processes of the oceans and their influence on marine ecosystems and Earth processes. Topics include distribution of salinity and water temperature and their effect on water movement, the oceanic heat budget, atmospheric and oceanic interactions, ocean currents including surface and deep water circulation, waves, tides, and medium- to small-scale circulation features. Throughout the course, emphasis is placed on how these physical processes affect the biology and chemistry of the ocean. Three hours of lecture per week. Weekend field trips may be required.

Prerequisite(s): MAR 120.

MAR 480 Senior Thesis 3 Credits

A senior thesis is optional for marine sciences majors. However, a senior thesis is required for eligibility to graduate with honors in marine sciences. The topic for investigation will be chosen by the student in consultation with the faculty of the Department of Geological, Environmental, and Marine Sciences. The student must initiate consideration of a proposal to the Department. The proposal must contain a discussion of the proposed project and a timetable to be followed in the study. A departmental committee consisting of a major and minor advisor will evaluate the written paper submitted at the conclusion of the study or other approved venue. An oral presentation before the department at the conclusion of the semester in which the study is completed is required. Proposals must be submitted in final form no later than the end of the ninth week of the semester prior to the semester in which the study is undertaken.

Prerequisite(s): senior standing in the marine sciences major and permission of department chair.

MAR 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

MAR 491 Internship in Marine Sciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placements may be in private, public, non-profit, or governmental organizations. These can include consulting firms, regulatory agencies, advocacy groups, and educational or research institutions. Normally, 50 hours of internship per credit is required. A mutually agreed upon method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and could include a term paper or project report and a poster presentation.

Prerequisite(s): 2.5 GPA and permission of instructor.

Marketing (MKT)

Courses and Descriptions

MKT 200 Marketing Principles 3 Credits

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

Prerequisite(s): 15 credits.

MKT 205 Advertising Principles 3 Credits

Basic theory, functions, principles, and applications of advertising are the focus of this course. The relation of advertising to our economy, the advertising department and the ad agency, selection of media, advertising practices, and the use of research to improve advertising techniques are covered.

Prerequisite: MKT 200.

MKT 250 Retailing Management 3 Credits

The principles underlying successful retailing are analyzed within the framework of the strategic-planning process. Topics covered include location, merchandise planning, customer service, image, atmosphere, layout, pricing, promotion, personnel and operations management.

Prerequisite(s): MKT 200.

MKT 260 Service Marketing 3 Credits

Focuses on the unique challenges of managing services and delivering quality service to customers. Emphasis is placed on the total organization, and how effective marketing and customer focus must be coordinated across multiple functions. The course is applicable to service organizations and to organizations that depend on service excellence for competitive advantage. Topics include customer-focused management, and customer satisfaction, retention, lifetime value and profitability. Students will learn to map services, understand customer expectations, and develop relationship marketing strategies.

Prerequisite(s): MKT 200.

MKT 280 Sports Marketing 3 Credits

The course focuses on the unique challenges of marketing sports at a variety of levels: youth, college, professional, and international. The challenges of attracting and retaining fans and participants as well as of building and maintaining strong brand identity are at the heart of the course content. By evaluating case studies and examining current issues in sports marketing, students will gain an understanding of what it means to be a professional marketer of a sports organization and/or event.

Prerequisite(s): MKT 200.

MKT 310 Business to Business Marketing 3 Credits

This course examines the business-to-business marketplace, and the planning and control tools used by its entities in managing the product, pricing, promotion, channel and supply chain management strategies.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 320 Consumer Behavior 3 Credits

The nature and determinants of consumer behavior are studied, with attention given to the influence of socio-psychological factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumer attitudes, consumption patterns, and purchasing behavior.

Prerequisite(s): MKT 200.

MKT 330 International Marketing 3 Credits

This course examines the global marketplace and the complexities of its environmental influences, and necessary adaptations in formulating the strategies for product, pricing, promotion, channel and supply chain management.

Prerequisite(s): MKT 200; 30 credits completed.

MKT 340 Personal Selling 3 Credits

Examines persuasive techniques utilized in sales presentations conducted on a person-to-person basis. Major course emphasis is on developing effective selling techniques; understanding the company, its products and the role of the salesperson in implementing product/market strategies; understanding the customers and the selling environment; application of effective sales presentation techniques; recognizing selling opportunities and careers.

Prerequisite(s): MKT 200; 30 credits completed.

MKT 345 Customer Focus 3 Credits

Marketing supply chain management programs are concerned with the creation and delivery of value to customer and organizations. No longer simply the domain of the warehouse manager or logistics director, supply chain management is viewed by most companies as a mission-critical element. Marketing focuses on developing an understanding of customers and markets, creating products and services based on that understanding, and communicating and delivering the value added. This course will teach the student the essential role of marketing in all aspects of successful supply chain management - relationship management, technological and financial - and it will help the student understand the structure, functions, principles and methods employed in discovering and translating consumer needs and wants into product and service specifications and then transferring these goods and services from producers to consumers or end users.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 350 Retailing Management 3 Credits

The principles underlying successful retailing are analyzed within the framework of the strategic-planning process. Topics covered include location, merchandise planning, customer service, image, atmosphere, layout, pricing, promotion, personnel and operations management.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 366 Marketing Research 3 Credits

Topics include specific research procedures in gathering, processing, analyzing, and presenting information relevant to marketing problems: advertising planning and effectiveness; product development; distribution channels; sales techniques; consumer behavior; and forecasting. Student learning about research planning, implementation, and interpretation is facilitated by the use of projects or cases.

Prerequisite(s): MKT 200 and MSD 205; junior standing.

MKT 367 Marketing Web Analytics 3 Credits

This course teaches web analytics through practical applications with a focus on deriving actionable insights. It provides a broad overview of key web analytics strategies, concepts, issues, challenges and tools. Topics covered include: • How to choose a web analytics tool • Metrics and key performance indicators • Best ways to analyze effectiveness of blogs, marketing campaigns, SEO, SEM and emails • How to utilize quantitative, qualitative and competitive tools to derive actionable insights • How to optimize web sites by incorporating testing and experimentation • Analytics in social, mobile and video • Best practices and pitfalls in web analytics.

Prerequisite(s): MKT 200; junior or senior standing.

MKT 369 International Advertising 3 Credits

This course introduces students to the general landscape of international advertising with emphasis on understanding the opportunities and challenges entailed in international advertising management. The course will cover the subject from three aspects, including the international advertising environment, the international advertising industry, and international advertising strategies.

Prerequisite: MKT 200; 30 credits completed.

MKT 370 Internet Marketing 3 Credits

This course emphasizes the discipline of internet marketing, including practices of leading online marketing companies, state of the art online research and demonstrates how the Internet is creating value for customers and profits for businesses while also fitting into a firm's complete marketing strategy. This course will provide a strategic and tactical toolkit for the online marketer, help students understand how and why the Internet is changing traditional marketing and allow students to develop the skills, strategies and tactics important to develop successful Internet marketing plans.

Prerequisite(s): MKT 200 and CIS 185; junior & senior standing.

MKT 375 Digital Advertising and Social Media 3 Credits

This course surveys the concepts, principles, practices and industry standards of digital advertising, including standard display and rich media advertising, search advertising, email advertising, game advertising, and mobile advertising. It also introduces the strategies and tactics in social media marketing. The course emphasizes a strategic, holistic view of digital advertising and social media as marketing communication tools that are situated in the marketing strategic framework and employed to engage consumers in community building.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 380 Health Care Marketing 3 Credits

The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 435 Advertising Campaigns 3 Credits

This capstone course for advertising majors provides an opportunity for students to plan comprehensive advertising campaigns. Coverage includes segmentation research, creative development of the campaign, media planning, and determining advertising effectiveness. Integration of advertising into the marketing program will be emphasized.

Prerequisite(s): MKT 205 + additional 9 credits from the Marketing courses for the Advertising Concentration; senior standing.

MKT 440 Sales Management 3 Credits

By means of lectures, discussions, and case studies, the field of marketing management is analyzed from the viewpoint of sales executives. The responsibilities for planning and administering personal selling operations are emphasized. Considerable attention is given to other activities for which sales executives may be wholly or jointly responsible, such as decision making on promotion and brand management.

Prerequisite(s): MKT 200 and senior standing.

MKT 444 Special Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations, as well as special applications of marketing decision-making, may be explored. Readings, research, lectures, discussions, or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): MKT 200; any additional prereqs requested by the instructor.

MKT 460 Marketing Management Seminar 3 Credits

This capstone course for marketing majors employs a top management approach to the overall marketing task, including planning, organizing, controlling, and integrating all the activities of the marketing program. Integration of marketing with other operations of the business unit is emphasized. Major problems and current trends are identified and analyzed through case discussion. Required for marketing majors.

Prerequisite(s): 15 Marketing credits, senior standing.

MKT 469 Selected Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision making may be explored. Readings, research, lectures, discussions, or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): MKT 200 and senior standing.

MKT 490 Independent Research and Study 1-4 Credits

Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

MKT 491 Internship-Based Indep Study 3 Credits

Provides the student an opportunity to supplement and apply classroom work in supervised employment with participating marketing and advertising firms. Requirements include a journal with a log of daily activities, and a project or term paper presented to and evaluated by the internship sponsor. Evaluation will also include a report by the company on the intern's performance. Credits may be used to satisfy business or free elective requirements.

Prerequisite(s): permission of instructor.

Mathematics (MTH)

Courses and Descriptions

MTH 100 Intermediate Algebra 3 Credits

This course prepares science and mathematics majors for college level mathematics courses. Topics include linear and absolute value equations and inequalities, quadratic and polynomial functions and their graphs, rational and radical equations, and systems of linear equations. This course does not fulfill the mathematical reasoning requirement of the CLAS general education curriculum.

MTH 102 Finite Mathematics 3 Credits

This mathematically rigorous course begins with a review of the rational numbers, repeating decimals, irrational numbers and non-repeating decimals. The elementary theory of sets is discussed with applications to surveys and data mining. This is followed by a discussion of the cardinality of infinite sets. An introduction to elementary number theory includes various applications. The Cartesian plane and the idea of a function and its graph are introduced with applications. Counting theory then precedes an elementary discussion of probability.

MTH 105 Algebra and Trigonometry 4 Credits

The course is an in depth and rigorous study of functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses, trigonometric identities.

Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

MTH 106 Precalculus 4 Credits

The course is an in depth and rigorous study of the Cartesian plane, functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses and trigonometric identities. The course is characterized by an emphasis on establishing firm mathematical foundations for the topics presented. The ideas discussed will be accompanied with mathematical proofs wherever it is feasible so to do. The course is designed to accord with the level of material in MTH 210 Calculus I. Credit will not be granted for both MTH 105 and MTH 106.

Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

MTH 120 Introduction to Applied Statistics 3 Credits

Collection and presentation of data. Measures of location and variation, sampling theory, hypothesis testing, confidence intervals, t-tests, chi-square tests, regression, and correlation. Emphasizes practical applications. Not open to business administration, chemistry, environmental, geosciences, marine sciences, math or liberal studies: marine ecological or environmental emphasis majors.

Prerequisite(s): MTH 102 or MTH 105.

MTH 150 Mathematics for Education Majors I 3 Credits

This is the first course in a three-course sequence for education majors. This course covers the concept of Numbers, starting with counting numbers, decimals, negative numbers, fractions, and real numbers; different ways of representing numbers, and the relations between them are explored; different meanings and applications of the arithmetic operations are studied; standard and non-standard algorithms for arithmetic are considered in light of the representation of numbers. May not be used by CLAS students to satisfy the mathematics component of the core.

MTH 151 Mathematics for Education Majors II 3 Credits

This is the second course in a three-course sequence for elementary education majors. In this course, students will study proportional reasoning, Number Theory, Algebra, Geometry, and measurement. May not be used by SLAS students to satisfy the mathematics component of the core.

Prerequisite(s): MTH 150.

MTH 152 Mathematics for Education Majors III 3 Credits

This is the third course in a three-course sequence for elementary education majors. In this course, students will study area and volume, transformational geometry, statistics and probability.

Prerequisite(s): MTH 151.

MTH 210 Calculus I 4 Credits

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 or MTH 106 with a grade of C or higher.

MTH 211 Calculus II 4 Credits

The definite integral, differentiation of transcendental functions, methods of integration and approximate integration, determination of area, volume, and surface area.

Prerequisite(s): MTH 210 with a grade of C or higher.

MTH 212 Calculus III 4 Credits

Infinite series; functions of two and three variables, vectors and tangent planes, partial derivatives, multiple integrals, determination of volume and density.

Prerequisite(s): MTH 211 with a grade of C or higher.

MTH 230 Discrete Mathematics 4 Credits

An introduction to topics in Discrete Mathematics. This course covers methods of proof, induction and recursion, and other topics in discrete mathematics. Topics may include graph theory, trees, and symmetry groups.

Prerequisite(s): MTH 102, MTH 105 or MTH 210.

MTH 240 Linear Algebra 3 Credits

Systems of linear equations; vector spaces; linear independence; determinants; orthogonality; linear maps; eigenvectors.

Prerequisite(s): MTH 210 or as corequisite; sophomore standing; or permission of instructor.

MTH 250 Differential Equations 3 Credits

First order differential equations, separable and exact; integrating factors; second order linear differential equations; series solutions of second order linear differential equations; higher order equations; existence and uniqueness theorems; systems of linear differential equations.

Prerequisite(s): MTH 240, MTH 211.

Corequisite(s): MTH 212 or as prerequisite.

MTH 308 Advanced Calculus 3 Credits

Vectors, gradients, and directional derivatives, Lagrange multipliers, Taylor's theorem, multiple integrals, change of variables, line and surface integrals, Stokes' theorem.

Prerequisite(s): "B" average in MTH 210 and MTH 211; MTH 212, MTH 240.

MTH 315 Modern Geometry 3 Credits

Covers geometry from a modern point of view, with emphasis on non-Euclidean geometry, particularly projective geometry.

Prerequisite(s): MTH 211, MTH 240.

MTH 340 Probability & Statistical Analysis I 3 Credits

Theory of sets and probability; discrete and continuous random variables and probability distributions. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite(s): MTH 212 or MSD 111.

MTH 341 Probability & Statistical Analysis II 3 Credits

Continuation of MTH 340. Foundations of mathematical statistics: normal distributions, estimation, confidence intervals and hypothesis testing; topics chosen from student's t-test, chi-square tests, analysis of variance and regression analysis. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite: MTH 340. Spring.

MTH 401 Modern Algebra 3 Credits

Provides an introduction to modern abstract algebra. It emphasizes the axiomatic method to analyze the major algebraic systems. The instructor will choose the topics to be studied from among the following algebraic structures: integral domains, fields, complete ordered fields, groups, polynomials, rings, ideals and modules.

Prerequisite(s): MTH 240.

MTH 402 Topics in Advanced Mathematics 3 Credits

Chosen from advanced pure or applied mathematics. Topics vary, depending on instructor.

Prerequisite(s): MTH 308.

MTH 410 Complex Analysis 3 Credits

Analytic functions, conformal mapping, power series, Cauchy's theorem, calculus of residues.

Prerequisite(s): MTH 308.

MTH 420 Number Theory 3 Credits

Covers topics including divisibility theory, the prime numbers, the theories of congruences and of quadratic reciprocity, and Fermat's Last Theorem. Other topics may also include applications to cryptography, Pell's equations, continued fractions, and the theory of partitions.

Prerequisite(s): MTH 240 or permission of instructor.

MTH 430 Introduction to Topology 3 Credits

A comprehensive introduction to elementary topology. The concepts of topological spaces and metric spaces will be introduced. Connectedness, compactness and properties of subsets of the real numbers rooted in topology will also be considered. The quotient topology will be used to construct surfaces as identification spaces, and tools will be developed to distinguish one surface from another.

Prerequisite(s): MTH 212.

MTH 440 Real Analysis 3 Credits

Covers the theory of sets, the real number system and its properties, convergence of sequences and series of numbers and functions, and the theory of integration, including: measure theory, the Riemann integral, and introduction to the Lebesgue theory of integration.

Prerequisite(s): MTH 308 or as corequisite.

MTH 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in research and mathematical literature. If possible, the student will publish the results or present them at a scientific meeting.

Multicultural Studies (MCS)

Courses and Descriptions

MCS 109 Intro to Race, Class & Gender 3 Credits

This course introduces students to the concepts of race, class and gender as essential components in understanding how social identities are socially constructed in the United States. Using historical and contemporary references, the course explores the ways in which race, class, gender and ethnic relationships shape the experiences of people in the United States, and the implications of those experiences for social relationships. Part of this exploration is to expose students to inter-relatedness of race, class and gender, as identity markers, both historically and in contemporary society.

MCS 110 Race, Class and Gender in Contemporary American Society 3 Credits

This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with GSS 110. Students may only get credit for one course: MCS 110 or GSS 110.

MCS 110S Introduction to Race, Class and Gender in Contemporary Society 1 Credits

This course introduces students to the concepts of race, class and gender as essential components in understanding how social identities are socially constructed in the United States. Using historical and contemporary references, the course explores the ways in which race, class, gender and ethnic relationships shape the experiences of people in the United States, and the implications of those experiences for social relationships. Part of this exploration is to expose students to inter-relatedness of race, class and gender, as identity markers, both historically and in contemporary society.

MCS 210 Power and Privilege in a Multicultural Society 3 Credits

This course will examine how the intersection of power and privilege shapes race, gender and class relationships in the United States. Analyses will show how the legal, economic, political and social manifestations of power influence the assignments and distribution of privilege in the United States, both in historical and contemporary contexts. The impositions of power on identity in the social assignment of privilege will be an important component of the course. The two "big questions" to be examined in this course are: How do issues of race, ethnicity, class, age, religion, gender, and sexual orientation interact with privilege? How do the tensions between power, privilege, oppression and inequality lead to movements for social justice? Various interlocking systems of privileges—justice system, educational system, medical system, political system, economic system, etc.—will be examined, using the theoretical frameworks of inequality, oppression and dependency. Prominent public policies and social movements that have challenged the notions of power and privilege, both historically and contemporarily, will be examined: civil rights, women's suffrage, affirmative action, Occupy Wall Street, LGBT rights, Metoo movement, Equal Rights Amendment, Title IX, Lilly Ledbetter Fair Pay Act, etc.

MCS 220 Issues in Multicultural Studies 3 Credits

An examination of issues and questions posed by the existence of diversity in social life. Students build on what they have learned in MCS 110 by focusing in greater depth on selected aspects of multicultural interaction. Topics change each semester and are listed in the course roster. Recent topics include "Understanding Privilege," "The Meaning of Difference," and "Narratives of Human Difference: Science, Politics, Literature."

Prerequisite(s): MCS 110 or permission of instructor.

MCS 280 Directed Study in Multicultural Studies 1-4 Credits

An intensive study experience in multicultural studies. The student designs and carries out a course of focused study under the supervision of a multicultural studies faculty member. The student's proposed plan of work must be reviewed and approved by the faculty sponsor and by the multicultural studies advisory committee. May be repeated once for credit.

MCS 490 Independent Study: Research and Creative Expression 1-4 Credits

Individual program of study under close supervision by the instructor, with weekly meetings and reports. Topics to be approved by the department. Available to seniors who have a minimum of a 3.0 GPA. No more than six credits allowed toward graduation.

MCS 491 Internship in Multicultural Studies 1-4 Credits

A supervised community service of work experience at an approved site. Placements are made in accordance with each student's particular theme within multicultural studies. A minimum of three hours per week on site per credit (39 hours per semester); in addition, students complete readings and reports and meet weekly with the instructor. Primarily for multicultural studies minors in their junior or senior year.

Music (MUS)

Courses and Descriptions

MUS 001S Applied Voice Studio 0 Credits**MUS 100 Popular Music Lab 0 Credits**

Popular Music Lab is a required course for all Popular Music majors. Meetings include information sessions, guest speakers, and the sharing of student work.

MUS 105 Survey of Music History I 3 Credits

A chronological survey of Western music from the Medieval through the Baroque periods stressing the origin and evolution of musical forms, musical styles, and the important composers before 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 106 Survey of Music History II 3 Credits

A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 109S Basic Music Theory 3 Credits

This is a beginner's course in music theory. It familiarizes the student with the basic elements (e.g., staff, clefs, time signatures, musical notation, intervals, triads and chords). This course is ideal for both the student wanting to know only the essential, or the student wanting to go on to develop their theoretical skills. For non-music majors, MUS 109S counts toward graduation and grades are awarded on an A-F basis. For music majors, MUS 109S does not count toward graduation, and grading is on a pass ("Y") or fail ("Z") basis.

MUS 110 Music Theory I 3 Credits

A practical introduction to the basic elements of music, beginning with the reading of music notation. Practice in scales and chords; ear-training in rhythm and pitch. Techniques may be applied to the student's own instrument (e.g., guitar, piano, winds) if he or she plays one.

Prerequisite(s): MUS 109S or placement.

Corequisite(s): MUS 110L.

MUS 110L Music Theory I Lab 1 Credits

Dictation, aural skills training, sight singing, and keyboard skills to accompany MUS 110 (Music Theory I). **Prerequisite(s):** MUS 109S or placement.

Corequisite(s): MUS 110.

MUS 111 Music Theory II 3 Credits

Continuation of MUS 110, leading to some original composition.

Prerequisite(s): MUS 110 and MUS 110L.

Corequisite(s): MUS 111L.

MUS 111L Music Theory II Lab 1 Credits

Dictation, aural skills training, sight singing, and keyboard skills to accompany MUS 111 (Music Theory II). Prerequisite(s): MUS 110 and MUS 110L or placement.

Corequisite(s): MUS 111.

MUS 113 Popular Music Theory I 3 Credits

Popular Music Theory I covers basic elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations.

Practice in scales and chords; ear-training in rhythm, pitch, and timbre.

Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice)

Corequisite(s): MUS 113L.

MUS 113L Popular Music Theory Lab I 1 Credits

Taken in conjunction with Popular Music Theory I, the lab applies theoretical concepts in a performance context. Applied aural training and improvisation skills on primary and secondary instruments.

Corequisite(s): MUS 113.

MUS 114 Popular Music Theory II 3 Credits

A continuation of Popular Music Theory I, progressing to intermediate elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations. Practice in scales and chords, ear-training in rhythm, pitch, and timbre. Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice).

MUS 114L Popular Music Theory Lab II 1 Credits

Taken in conjunction with Popular Music Theory II, the lab applies theoretical concepts in a performance context. Applied aural training and improvisation skills on primary and secondary instruments.

MUS 116 Digital DJing 3 Credits

Digital DJing is a software-based course that develops musical mixing skills for the purpose of creating the kinds of DJ sets one may play on the radio or at live events. Includes repertory building across several popular and dance genres.

MUS 120 Music and Society 3 Credits

Introduction to the basic elements of music (rhythm, melody, harmony, etc.) and the appreciation of representative types of music from all historical periods.

MUS 127 Pop, Rock & Hip-Hop Ensemble 1 Credits

This is a dynamic group rehearsal, performance and discussion of contemporary popular music of any genre including but not limited to: the blues, soul, country, gospel, pop, prog. rock, reggae, disco, punk, grunge, new wave, dub, rap and hip hop.

MUS 128 Choir 1 Credits

Rehearsal and performance of multi-era Western and non-Western repertoire. Instruction in music fundamentals and vocal production. Pitch matching and part-singing abilities must be demonstrated in the first-week sectional hearing.

MUS 129 Contemporary Vocal Ensemble 1 Credits

The objective of the contemporary vocal ensemble course is to allow students to experience the aesthetics of popular music through the study, interpretation and performance of the music. Students will develop their ensemble skills, independent part singing, as they experience a wide range of popular music genres (jazz, pop, R&B, world, etc.) Students must pass an audition to participate in this course.

MUS 130 Music in Children's Lives 3 Credits

Students in this course will study how music interacts in the lives of children as they sing, listen, play instruments and move. Song repertoire and selections for listening and moving from the American, European and non-Western cultures will be introduced. Playing recorder as well as pitched and non-pitched percussion instruments will be demonstrated.

MUS 131 Beginning Piano I 2 Credits

Class approach to learning to play the piano. How to read music, basic piano technique, and appropriate piano pieces and songs are studied.

MUS 132 Beginning Piano II 2 Credits

Continuation of MUS 131. Emphasis on further development of technique and the ability to interpret piano music from a variety of styles.

Prerequisite(s): MUS 131 or equivalent.

MUS 133 Class Voice I 2 Credits

Class approach to learning pop vocals. How to read music, basic vocal production technique and appropriate vocal pieces and songs are studied, especially in popular genres.

MUS 134 Class Voice II 2 Credits

Continuation of class approach to learning pop vocals started in Class Voice I. Intermediate vocal technique for popular music

Prerequisite(s): MUS 133 or placement exam.

MUS 135 Class Guitar I 2 Credits

Class approach to learning to play the guitar. How to read tablature, basic guitar technique, and appropriate guitar pieces and songs are studied, especially in popular genres. Students must provide their own guitars; if electric, they should provide their own amps, too.

MUS 136 Class Guitar II 2 Credits

Continuation of class approach to learning to play the guitar started in Class Guitar I. Intermediate guitar technique for popular music. Students must provide their own guitars; if electric, they should provide their own amps, too.

Prerequisite(s): MUS 135 or placement exam.

MUS 150A Applied Flute 2 Credits**MUS 150B Applied Flute 1 Credits****MUS 150C Applied Flute 2 Credits****MUS 150D Applied Flute Elective 1 Credits****MUS 150F Applied Flute 1 Credits**

Applied Flute.

MUS 151A Applied Oboe 2 Credits
 MUS 151B Applied Oboe 1 Credits
 MUS 151C Applied Oboe 2 Credits
 MUS 151D Applied Oboe Elective 1 Credits
 MUS 152A Applied Clarinet 2 Credits
 MUS 152B Applied Clarinet 1 Credits
 MUS 152C Applied Clarinet 2 Credits
 MUS 152D Applied Clarinet Elective 1 Credits
 MUS 153A Applied Bassoon 2 Credits
 MUS 153D Applied Bassoon Elective 1 Credits
 MUS 154A Applied Saxophone 2 Credits
 MUS 154D Applied Saxophone Elective 1 Credits
 MUS 155A Applied French Horn 2 Credits
 MUS 155D Applied French Horn Elective 1 Credits
 MUS 156A Applied Trumpet 2 Credits
 MUS 156B Applied Trumpet 1 Credits
 MUS 156C Applied Trumpet 2 Credits
 MUS 156D Applied Trumpet Elective 1 Credits
 MUS 157A Applied Trombone 2 Credits
 MUS 157D Applied Trombone Elective 1 Credits
 MUS 158A Applied Euphonium 2 Credits
 MUS 158D Applied Euphonium Elective 1 Credits
 MUS 159A Applied Tuba 2 Credits
 MUS 159D Applied Tuba Elective 1 Credits
 MUS 160A Applied Guitar 2 Credits
 MUS 160B Applied Guitar 1 Credits
 MUS 160C Applied Guitar 2 Credits
 MUS 160D Applied Guitar Elective 1 Credits
 MUS 160E Applied Guitar 2 Credits
 MUS 161A Applied Violin 2 Credits
 MUS 161B Applied Violin 1 Credits
 MUS 161C Applied Violin 2 Credits
 MUS 161D Applied Violin Elective 1 Credits
 MUS 161E Applied Violin 2 Credits
 MUS 161G Applied Violin 2 Credits
 MUS 162A Applied Viola 2 Credits
 MUS 162D Applied Viola Elective 1 Credits
 MUS 163A Applied Cello 2 Credits
 MUS 163D Applied Cello Elective 1 Credits
 MUS 164A Applied String Bass 2 Credits
 MUS 164B Applied String Bass 1 Credits
 MUS 164C Applied String Bass 2 Credits
 MUS 164D Applied String Bass Elective 1 Credits
 MUS 165A Applied Piano 2 Credits
 MUS 165B Applied Piano 1 Credits
 MUS 165C Applied Piano 2 Credits
 MUS 165D Applied Piano Elective 1 Credits
 MUS 165G Applied Piano 2 Credits

MUS 201 Skills Ensemble I 1 Credits

A Contemporary Performance skills ensemble focusing on interactive musicianship, composition, ear training, transcription, and notation, for popular music studies majors. Students will develop proficiency in the following areas: • Developing ensemble skills • Preparing and rehearsing original compositions • Recognizing scales, intervals and chords • Harmonic, Melodic, and Rhythmic Transcription • Recognizing basic structural elements in different musical genres: Pop(Hip-Hop, R&B, Rock)/Jazz/Classical as well as understand their basic vernacular • Writing legible and clear musical scores (charts).

MUS 204 Jazz History 3 Credits

Survey from 19th C. roots to 21st C. styles. Development of listening skills and overview of musical skills used by jazz performers. Exploration of the relationship between jazz and poetry, race relations, and the reputation of jazz in popular culture.

Prerequisite(s): CMP 120 or CMP 125.

MUS 205 History of Pop and Rock Part I 3 Credits

This course charts the history of popular music from its origins until the 1960s. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music from its roots in the blues, early jazz, ragtime and military band marches to the music of Elvis, Chuck Berry, Little Richard, Buddy Holly, the Rolling Stones and the Beatles. We look at the recording industry and the advent of the gramophone record and the important role of radio and television in expanding the reach of popular music directly into the home, creating a vibrant soundtrack for peoples lives.

MUS 206 History of Pop and Rock Part 2 3 Credits

Description: This course charts the history of popular music from the 1960s to today's. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music through Acid Rock, Progressive (Prog) Rock, Hard Rock, Singer-Songwriters, Disco, Reggae, Funk, Punk, Heavy Metal, New Wave, Grunge, Electronica and Rap & Hip-Hop. We look at the development of analog and digital media and how new forms of delivery of product shapes the business model of the industry and beyond.

MUS 207 Masterworks in Music 3 Credits

Major works by great composers from different historical periods Mozart, Beethoven, Brahms, and Wagner, among others are studied. Up to 10 compositions by six composers are covered, with an emphasis on listening to recorded and live performances of representative works.

MUS 208 Music of the Theater 3 Credits

A study of music drama both historical and contemporary covering European opera of the Baroque, classical and romantic periods, and the American musical theatre, especially the contemporary Broadway musical.

MUS 209 Great Composers 3 Credits

A study of selected major composers life, works, and historical significance with an emphasis on the listening experience. Bach, Mozart, Beethoven, Tchaikovsky, Stravinsky, or others.

MUS 210 Music Theory III 3 Credits

Analysis of musical forms, including binary, rounded binary, ternary, and popular song. Identification of techniques that support musical form, including harmonic language, contrast/repetition, compositional process. Advanced sight singing and aural drills.

Prerequisite(s): MUS 111 and MUS 111L.

MUS 211 Music Theory for Music Theater 3 Credits

Analysis of music theater songs, scenes and scores. Various techniques, placement of examples into historical, musical, artistic, and literary perspective. Reading of full and piano/vocal scores, conducting, orchestration and harmonic language will be emphasized.

Prerequisite(s): MUS 111 and MUS 111L.

MUS 212 Cartoon and Anime Culture 3 Credits

This course investigates the music and culture of animated films and television shows, anime, animated shorts including cartoons, and related incidental music for documentary films.

MUS 213 Digital Composition of Popular Music 3 Credits

This course is an introduction to making music in a Digital Audio Workstation (DAW). Students learn software techniques by composing in multiple genre styles.

MUS 214 Writing about Music 3 Credits

This course instructs students in the art of writing about music, from small-form criticism to large scale scholarship, focusing especially on the ability to translate what one hears into engaging prose.

Prerequisite(s): CMP 120 and 125, MUS 110, 110L, and MUS 213.

MUS 215 Music & Techn/Mobile Society 3 Credits

This course compares the recent history of music technology to past innovations, focusing on the aesthetic implications and ideological influences of an increasingly mobilized musical milieu.

MUS 216 Digital Comp of Pop Music II 3 Credits

This course is about "the doing of music." It ties music theory to pragmatic concerns with keyboards and software in the making and distribution of music, continuing the content begun in The Digital Composition of Popular Music I.

MUS 217 Black Music in America 3 Credits

This course covers the history of music made by and/or about African Americans, from minstrel shows to hip-hop and everything in between.

MUS 218 Postmodernism & Popular Culture 3 Credits

This course considers music in light of the ideological trends of postmodernism in order to better understand contemporary music in its cultural context.

MUS 219 Popular Music Arranging 3 Credits

Pop Music Arranging explores the fundamental arranging techniques for popular music styles. Students will learn to arrange popular music for the standard instrumentation found in a pop/rock ensemble (bass guitar, drumset, rhythm guitar, and keyboard) and other ensemble instrumentations, as well. This course will develop comprehensive musicianship and fundamental arranging techniques, as well as develop skills as they relate to composition software platforms.

Prerequisite(s): MUS 113.

MUS 220 Songwriting 3 Credits

The Songwriting course is an introduction to songwriting in popular music styles. Students will learn to compose music by themselves and collaboratively. This course will develop comprehensive musicianship and compositional techniques, as well as further software skill development.

Prerequisite(s): MUS 113.

MUS 233 Intermediate Piano 3-12 Credits

Continuation of MUS 132 with further development of reading skills, piano techniques and interpretation. Each student studies a set of pieces selected together with the instructor tailored specifically to the students' needs and interests.

MUS 268A Applied Voice 2 Credits**MUS 268B Applied Voice 1 Credits****MUS 268C Applied Voice 2 Credits****MUS 268D Applied Voice 1 Credits****MUS 268E Applied Voice 2 Credits****MUS 268F Applied Voice 1 Credits****MUS 268G Applied Voice 2 Credits****MUS 300 Beethoven and the Romantic Age 3 Credits**

A study of the Romantic period with particular emphasis on Beethoven. The classical heritage, the transformation of that heritage into romantic terms, the prominent influence of Beethoven on 19th century musical style.

MUS 301 Skills Ensemble II 1 Credits

The Contemporary Performance Skills Ensemble II is a course whose focus is interactive musicianship, composition, ear training, transcription, and notation, for popular music studies majors. This course will require a higher level of musical ability, aptitude, and technical development than the Skills I Ensemble course. Students will develop proficiency in the following areas: • Developing ensemble skills • Preparing and rehearsing original compositions • Recognizing scales, intervals and chords • Harmonic, Melodic, and Rhythmic Transcription • Recognizing basic structural elements in different musical genres: Pop(Hip-Hop, R&B, Rock)/Jazz/Classical as well as understand their basic vernacular • Writing legible and clear musical scores (charts) • Improvisation.

MUS 303 Music Literature: Baroque Era 3 Credits

A survey of European musical styles from c. 1600 to 1750, approached by listening to the music of the period, including Bach, Handel, and many lesser known masters. Topics include the development of modern musical sound, instrumental forms, Lutheran and Catholic church music, and the beginnings of dramatic music.

MUS 304 Music of the Beatles 3 Credits

This course is a very in-depth analysis of the music and personalities of the Beatles. The student will gain in depth insight to the Beatles songs and albums as the course proceeds through the music chronologically. This will be contextualized historically and sociologically where required.

MUS 305 Words and Music 3 Credits**MUS 306 Contemp Music Experience 3 Credits**

A survey of European and American musical styles of the late 19th and 20th centuries. Topics include postromantic music, neoclassicism, serialism, electronic music, and the current avant garde.

MUS 307 The Music of Radiohead 3 Credits

This course investigates the music, lyrics, art and marketing strategies of the British so called "alternative" band, Radiohead, moving song by song through their demos, videos and albums.

MUS 308 World Music 3 Credits

To understand world music as a means of appreciating and respecting our common inheritance as humans. To better understand in what ways music is a 'language' and how this functions within 'community' including aspect of ritual, celebration, religion and spirituality. The student will be expected to be able to discern between various genres of world music understanding the wider cultural context including, but not limited to, popular music within that same culture.

MUS 309 Film Music 3 Credits

A study of music in feature film, documentary film, and television. A chronological survey of film music from silent to contemporary film, animated shorts, and television, with emphasis on listening to recorded performance of representative works.

MUS 310 The Film Music of Stanley Kubrick 3 Credits

This course is an in-depth study of the way in which music impacts society through the art of film. Focusing on the films of Stanley Kubrick (e.g. *The Shining*; *2001: A Space Odyssey*; *A Clockwork Orange*; *Full Metal Jacket*; *Eyes Wide Shut*; *Dr. Strangelove*; *Lolita*) we will study a variety of strategies within which music integrates, counterpoints or ironically resists themes such as war, sex, politics, religion, gender etc. Also we will observe how music interacts with other aesthetics in film such as light, camera methods, 1. diegetic/source, 2. non-diegetic/underscore and 3. metadiegetic (i.e. 1. music in the film; 2. music only the audience can hear; 3. music that seems to be coming from the mind of a character in the film) method as part of the narrative itself. In this way we will investigate the way film both integrates aspects of society and also radiates messages, indeed challenges, to society, both as a mirror but also didactically—with the direct intent of creating change.

MUS 311 Unpacking Bruce Springsteen 3 Credits

This course will survey the music of Bruce Springsteen. It will 'unpack' Springsteen's musical development not only across his official career (i.e. from signing with Columbia for his first album 'Greetings from Asbury Park, New Jersey' in 1973 to the present) but also from his childhood through his youth in Freehold, NJ. By closely studying Springsteen's life, music and lyrics as well as the themes of each album the student will become an expert in understanding how The Boss was able to universalize the Jersey Shore as well as his personal concerns into vital musical messages of great value and import today. This will also involve looking at music as varied as The British Invasion (i.e. The Beatles, The Animals & the Rolling Stones et al); Motown; Country; Soul; Folk; Rock and the American Songbook.

MUS 312 The Arts Abroad 3 Credits

A two week trip abroad that includes a critical study of music and theater. Students are required to attend all performances, guided tours, and classes before and after the trip.

MUS 315 Black Music in America 3 Credits

This course covers the history of music made by and/or about African Americans, from minstrel shows to hip hop and everything in between.

MUS 316 Digital Mixing and Mastering 3 Credits

Digital Mixing and Mastering is a practical skills class focusing on post-production skills in software interfaces. Students will learn how to work with multiple editing softwares and plug-in tools to achieve balanced, lively, professional mixes.

MUS 319 Pop Music Arranging II 3 Credits

The Pop Music Arranging II course is the terminal course of a two-semester sequence whose goal is to explore the advanced arranging techniques for popular music styles. Students will learn to arrange popular music for the standard instrumentation found in a pop/rock ensemble (bass guitar, drumset, rhythm guitar, and keyboard). This course will develop comprehensive musicianship and advanced arranging techniques, as well as develop advanced skills as they relate to the utilization of the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 219.

MUS 320 Pop Songwriting II 3 Credits

The Pop Songwriting II course is a continuation of the songwriting course sequence whose goal is to explore advanced compositional techniques for popular music styles. Students will learn to compose music by themselves and collaboratively. This course will develop comprehensive musicianship and advanced compositional techniques, as well as develop advanced skills as they relate to the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 220.

MUS 350A Applied Flute 2 Credits**MUS 350B Applied Flute 1 Credits****MUS 351A Applied Oboe 2 Credits****MUS 351B Applied Oboe 1 Credits****MUS 352A Applied Clarinet 2 Credits****MUS 353A Applied Bassoon 2 Credits****MUS 354A Applied Saxophone 2 Credits****MUS 355A Applied French Horn 2 Credits****MUS 356A Applied Trumpet 2 Credits****MUS 356B Applied Trumpet 1 Credits****MUS 357A Applied Trombone 2 Credits****MUS 358A Applied Euphonium 2 Credits****MUS 359A Applied Tuba 2 Credits****MUS 360A Applied Guitar 2 Credits****MUS 360B Applied Guitar 1 Credits****MUS 361A Applied Violin 2 Credits****MUS 362A Applied Viola 2 Credits****MUS 363A Applied Cello 2 Credits****MUS 364A Applied String Bass 2 Credits****MUS 364B Applied String Bass 1 Credits****MUS 365A Applied Piano 2 Credits****MUS 365B Applied Piano 1 Credits****MUS 366A Applied Organ 2 Credits****MUS 367A Applied Percussion 2 Credits****MUS 368A Applied Voice 2 Credits****MUS 368B Applied Voice 1 Credits****MUS 368C Applied Voice 2 Credits****MUS 368D Applied Voice 1 Credits****MUS 368E Applied Voice 2 Credits****MUS 368F Applied Voice 1 Credits****MUS 368G Applied Voice 2 Credits****MUS 369A Applied Composition 2 Credits****MUS 468A Applied Voice 2 Credits****MUS 468B Applied Voice 1 Credits****MUS 468C Applied Voice 2 Credits****MUS 468D Applied Voice 1 Credits****MUS 468E Applied Voice 2 Credits****MUS 468F Applied Voice 1 Credits****MUS 468G Applied Voice 2 Credits****MUS 490 Independent Research and Study 1-4 Credits**

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1 to 4 Credits. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing; good academic standing.

MUS 491 Internship in Music 1-4 Credits

Provides junior or senior music majors with the opportunity to gain practical experience working within a professional music environment. Students must be sponsored by a music professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

MUS 493 Selected Topics in Music Perf 3 Credits

Intensive study of a particular topic in applied music for the intermediate to advanced student. Students are led to understand the historic and aesthetic elements in music through critical listening, performance, research, and class projects.

MUS 495 Selected Topics in Music 3 Credits

Studies specialized aspects of the literature, history, or theory of music, to supplement the established curriculum. Emphasis on creative investigative work and individual experiences in music.

MUS 498 Popular Music Culture Capstone 3 Credits

The capstone is an independent, student-led project resulting in a material product (recording/performance/event/presentation) that demonstrates a student's interests and skills in the area of popular music.

MUS 499 Senior Honors Program 3 Credits

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, planned under the direction of a faculty advisor, represents a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Music Education (ME)

ME 111 Music Education Lab 0 Credits

Undergraduates must meet the weekly attendance and participation requirement for Music Education Lab during every semester of enrollment up to seven semester as an undergraduate Music Education major except for the student teaching semester. Grading is "P" (satisfactory) or "U" (unsatisfactory). As part of the Music Education Lab experience, students are required to complete 15 hours of professional development.

ME 161 Art of Teaching Music I 3 Credits

Art of Teaching Music I (ATM I) is a first in the sequence of Music Education courses designed to prepare the undergraduate Music Education major students for their student teaching experience and completion of their teaching licensure. There will be field observations of master teachers under the aegis of a music education faculty that will allow students not only to observe, but to have guided experience in assessing how teaching and learning are experienced in real classrooms. Partnerships between local expert teachers and music education faculty will allow students to complete field observations as well as guided experience in teaching and assessing students in real classrooms.

ME 187 Instrumental Music: Strings 1 Credits

This course is designed as an introduction to the pedagogy of string instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring, and idiomatic writing are investigated. When available, instruments may be rented from the college. Rental fee, per instrument: \$25.

ME 188 Instrumental Music: Winds/Percussion 2 Credits

This course is designed as an introduction to the pedagogy of brass, woodwind, and percussion instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring and idiomatic writing are investigated. When available, instruments may be rented from the college. Students must provide their own drum pads and sticks. Rental fee, per instrument: \$60.

ME 262 Art of Teaching Music II 4 Credits

Art of Teaching Music II (ATM II) is designed to build on the knowledge, skills, and dispositions, introduced in ATM I. Students will expand their abilities in the domains of planning, teaching, assessing, reflecting, developing musicianship, and philosophy in context of teaching general music. Moreover, they will have the opportunity to put these abilities into practice when teaching peers and teaching elementary and middle general school students.

Prerequisite(s): ME 161.

ME 471 Music and Hip Hop Culture 3 Credits

Hip Hop in the United States is arguably the most lucrative, popular, and culturally challenging contemporary musical force. The narratives of Hip Hop go beyond the boundaries of race and class as well as those of music, poetry and dance. As such, Hip Hop is a phenomenon that presents problems as well as great possibilities. This course explores them from the standpoint of educational sociology, looking at their implications for music in schools as well as in daily life.

ME 472 Teaching/Learning:Urban Schools 3 Credits

This course offers students theoretical and practical insight into teaching in urban schools. The class will present an analysis and practical implications for what is needed in order to successfully engage in teaching in urban centers in the United States. Students will balance field experiences with critical analyses of issues such as multicultural teaching, race, class, and economics in urban schools as well as their curricular and pedagogical implications.

Prerequisite(s): ME 581, ME 582.

ME 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

ME 491 Kodaly Music Reading 2 Credits**ME 492 Student Teaching 12 Credits**

A full semester internship in directed full-time teaching supervised by department members and carried out in schools with approved cooperating teachers. In addition to the field experience, students attend a weekly seminar on campus to discuss current issues in music education as they relate to individual teaching situations. Students discuss classroom management strategies, action research, authentic instruction, critical thinking, feeling and action as well as teaching to focused questions, concepts and objectives. Throughout student teaching, students maintain a digital portfolio that demonstrates how they meet the New Jersey State and INTASC teaching standards. At the conclusion of the semester, students attend a portfolio review with members of the Music Education faculty to assess the success of the teaching experience. Students must provide their own transportation to student teaching site. Student Teaching fee: \$245. Fees for the Praxis Examination and Teacher Certification are additional. Additional information regarding student teaching may be found in the department's Student Teaching Handbook at www.rider.edu/musiced.

Prerequisite(s): Minimum grade of B- in ME 564; Classification as a full senior; Satisfactory completion of music education courses numbered ME 161, ME 262, ME 563, ME 564, ME 187, ME 188, and either PSY 230 Child Developmental or PSY 231 Youth and Adolescent Development; Satisfactory completion of TH 241; For voice primary students, satisfaction of all requirements of PI 204; A minimum 3.0 cumulative GPA; Demonstrated aptitude, motivation and potential for success in teaching, as evidenced by the successful completion of portfolio reviews; Departmental approval; Students in the Master of Music Education (MME) degree program must take the following courses as prerequisites to student teaching; ME 563, ME 564, ME 725.

ME 499 Special Topics Music Education 2 Credits

The content of this course and the number of credits will vary with the special interests and qualifications of the professor teaching it.

ME 563 Art of Teaching Music III 4 Credits

Through course assignments, discussion, and clinical practice in varied school and community choral settings, course participants learn how to create meaningful elementary music experiences that foster individual success, accountability, a sense of accountability, critical thinking, independence, and life-long engagement with choral music.

Prerequisite(s): Minimum grade of C- in ME 262, successful completion of Sophomore Review, and must obtain substitute teaching credentials.

ME 564 Art of Teaching Music IV 4 Credits

Through course assignments, discussion, and clinical practice in varied school and community choral settings, course participants learn how to create meaningful school singing experiences that foster individual success, accountability, a sense of community, critical thinking, independence, and life-long engagement with choral music.

Prerequisite(s): Minimum grade of C- in ME 262, successful completion of Sophomore Review, and must obtain NJ substitute teaching credentials.

Music History (MH)

MH 100 Topics in Music History 3 Credits

The topics of courses carrying this number will vary with the special interests and qualifications of the instructors teaching them. They are meant to be at an introductory level, open to all Rider University students. Possible topics include music and social causes or distinct perspectives, or specific creative techniques in music such as songwriting for beginners.

MH 247 Music Historiography I 3 Credits

Historiography I begins by exploring similarities and differences between various music cultures around the world, and continues with an examination of selected genres of Western Art Music of the Medieval, Renaissance and Baroque periods. Basic information literacy skills, such as searching library catalogs, databases and reading academic articles also will be covered.

Prerequisite(s): CMP 125.

MH 248 Music Historiography II 3 Credits

Examines Western Art Music since 1750 and includes a research assignment that builds upon the information literacy skills gained in MH 247.

Prerequisite(s): MH 247.

MH 345 Music Since 1900 3 Credits

Examines controversies and aesthetic movements in 20th and 21st century music. Emphasis is placed upon critical reading and writing skills.

Prerequisite(s): MH 248.

MH 433 Seminar in Music History 3 Credits

The contents of courses carrying this number will vary with the special interests and qualifications of the instructors teaching them. Possible topics include period courses, courses from a distinct perspective, composer courses and genre courses.

Prerequisite(s): MH 248.

MH 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Musical Theatre (MTR)

Courses and Descriptions

MTR 105 Musical Theatre Practicum 1 Credits

This course explores the literature of musical theatre vocal ensembles. It emphasizes examining a wide range of styles. This is a studio/academic class, not a performance ensemble.

MTR 109 Beginning Ballet I 1 Credits

This course introduces the basic elements of ballet technique. Technique is based on the five positions of the legs and feet, coupled with appropriate arm positions. The class consists of a basic ballet barre warm-up that includes stretching and developing strength and turn-out used in dance positions and combinations. Instruction includes jumping, turning, and connecting steps with movement. Ballet terminology is addressed.

MTR 111 Musical Theatre Lab 0 Credits**MTR 112 Advanced Ballet I 1 Credits**

Continuation of MTR 109, building upon techniques learned in that course.

MTR 113 Beginning Ballet II 1 Credits

Intermediate ballet, expanding upon Ballet I and concentrating upon the American lineage of ballet training.

MTR 114 Advanced Ballet II 1 Credits

Continuation of MTR 113. Intermediate ballet, expanding upon Ballet I and concentrating upon the American lineage of ballet training.

MTR 120 Hist of American Music Theater 3 Credits

The history of the American Musical from the first American production in 1750 of Gay's *The Beggar's Opera* up to the present will be traced. Emphasis will be placed upon those common elements which are solely intrinsic to the American stage. Developments and imported ideas (e.g., *The British Invasion*) will be highlighted.

MTR 131 Music Theory for MT 3 Credits

Teaches students to understand musical form, structure, melody, rhythm and harmony by applying these concepts to musical theatre literature. Includes full analysis of musical theatre songs. Required in the first year.

MTR 132 Group Piano 1 Credits

Offers the musical theatre student appropriate keyboard technique to play any vocal part and to play a rudimentary accompaniment. Required of all second-year students.

Prerequisite(s): MTR 131.

MTR 133 Sight Singing for MT 3 Credits

Intensive class in reading music, designed for musical theatre students. Traditional solfeggio techniques used with musical theatre texts whenever possible. Required of first-year students.

Prerequisite(s): MTR 131.

MTR 209 Tap Dance I 1 Credits

Introduction to the basic elements of tap dancing. Tap technique is geared to enhance rhythm and motor skills, basic elements that will be used to connect several steps and movements into combinations. Other variations such as "soft shoe" or "clogging" are included.

MTR 210 Tap Dance II 1 Credits

Continuation of MTR 209. Combinations most often used in music theater productions are emphasized.

Prerequisite(s): MTR 209.

MTR 211 Ballet III 1 Credits

Intermediate ballet, expanding upon Ballet II and concentrating upon the American lineage of ballet training.

Prerequisite(s): MTR 110.

MTR 212 Ballet IV 1 Credits

Continuation of MTR 211. Intermediate ballet, expanding upon Ballet III and concentrating upon the American lineage of ballet training.

Prerequisite(s): MTR 211.

MTR 215 MT Performance: Song as Text 3 Credits

In this course the student will learn how to develop a performance of musical text by making doable,actable choices and applying those choices to musical monologues – solo songs.

Prerequisite(s): THE 110.

MTR 216 Acting for Music Theater I 3 Credits

This professional skills course, intended for music theater majors, builds upon the student's previous acting training. Through various exercises and activities (both individual and group), the student will begin to develop a clear method for preparation that addresses first their own instrument, and then (through various methods of analysis) the character and the play. Students will begin to utilize and apply the studied techniques and exercises to simple monologues and a scene. Behavioral truth will precede the more sophisticated studies of emotional truth.

MTR 217 Acting for Music Theater Major II 3 Credits

Continuation of MTR 216. Methods for preparation are expanded as students learn and experience techniques for exploring and developing characters. This semester will focus on the application of the skills and acting techniques studied in the first semester to the needs of dramatic and sung material. Students are expected to synthesize content and skills acquired in the Speech for the Actor, Body Awareness and Movement classes.

Prerequisite(s): MTR 216.

MTR 218 Musical Theatre Scene Study I 3 Credits

Scene study class exploring the literature of the musical theatre – emphasis placed on two- and three-character scenes. Required of all second-year students.

Prerequisite(s): MTR 215.

MTR 219 Musical Theatre Scene Study II 3 Credits

Further exploration of scenes in the musical theatre literature – emphasis on more complex scenes. Required of all third-year students.

Prerequisite(s): MTR 218.

MTR 251 Styles and Genres I 3 Credits

Focuses teaching and learning on the ways in which musical and textual understanding inform the interpretation and performing of representative composers from the Standard, Classical, and Traditional periods of musical theater. Composers to be studied will include Rodgers and Hammerstein, Lerner and Loewe, Kern, Berlin, Gershwin, Porter, Arlen, Blitstein and Weill.

Prerequisite(s): MUS 111, MUS 111L, THE 107, MTR 216.

MTR 252 Styles and Genres II 3 Credits

Focuses teaching and learning on the ways in which musical and textual understanding inform the interpretation and performing of representative composers from the Contemporary (Non-Pop/Rock) period of music theater. Composers to be studied will include Sondheim, Styne, Kander and Ebb, Guettel, Matby and Shire, and Bernstein.

Prerequisite(s): MUS 111, MUS 111L, THE 107, MTR 216.

MTR 253 Styles and Genres III 3 Credits

Focuses teaching and learning on the ways in which musical and textual understanding inform the interpretation and performing of representative composers from the Contemporary, Pop/Rock period of music theater. Composers to be studied will include Webber, Schwartz, Fenn, Flaherty, Menkin, Brown, LaChiusa, and Lipa.

Prerequisite(s): MUS 111, MUS 111L, THE 107, MTR 216.

MTR 255 Musical Theatre Repertoire I 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers through the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106 with a minimum grade of D and THE 311 with a minimum grade of D.

MTR 256 Musical Theater Repertoire II 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers since the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106, THE 107.

MTR 307 Tap III 1 Credits

This course is designed for the moderately advanced tap dancer. Course to be taken in the fall.

Prerequisite(s): MTR 210.

MTR 308 Tap IV 1 Credits

The course will allow the more advanced student to complete the work begun in Tap III.

Prerequisite(s): MTR 307.

MTR 309 Beginning Jazz Dance I 1 Credits

Based upon the ballet foundation, this course explores the expressive style of jazz dance, and basic Western theatrical dance forms and social dances used most often on the stage.

Prerequisite(s): MTR 109.

MTR 313 Ballet V 1 Credits

Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills.

Prerequisite(s): MTR 212.

MTR 314 Ballet VI 1 Credits

Continuation of MTR 313. Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills.

Prerequisite(s): MTR 313.

MTR 315 Advanced Jazz Dance I 1 Credits

Continuation of work begun in MTR 309.

MTR 316 Beginning Jazz Dance II 1 Credits

This course continues the work begun in MTR 309 and MTR 315.

MTR 317 MT Auditions:Preparation/Tech 3 Credits

This course, building upon skill-sets established in the Music Theatre singer-actor curriculum, will introduce and hone the required skill-sets for preparing to audition in Music Theatre. Genres and styles of music most often required for auditioning in the industry will be prepared and explored. An audition "book," based upon the demands of the industry, as well as the most suitable material for each student will be built. When appropriate, guests from the industry will be invited to present master classes and evaluations in a "mock audition" process.

Prerequisite(s): MTR 207, MTR 216, MTR 217, MTR 492.

MTR 318 Advanced Jazz Dance II 1 Credits

This course continues the work begun in MTR 309, MTR 315 and MTR 316.

Prerequisite(s): MTR 211.

MTR 319 Jazz Dance III 1 Credits

This course continues the work begun in MTR 318.

Prerequisite(s): MTR 318 and MTR 212.

MTR 320 Jazz Dance IV 1 Credits

This course continues the work begun in MTR 319.

Prerequisite(s): MTR 319 and MTR 212.

MTR 335 Speech for the Actor 3 Credits

This course introduces and develops speech techniques, specifically in the areas of relaxation, posture and alignment, respiration, phonation, support, registration, resonance, and articulation. Students learn to consistently produce a free, resonant, fully supported speaking voice. Exercises will increase flexibility and range of speaking and will foster heightened responsiveness to feeling. Regular practice in the delivery of both impromptu and prepared monologues is required. This course includes studies in Neutral American Speech.

MTR 402 Directing Music Theater/Opera 3 Credits

This elective course investigates how conceptual ideas and the process of script analysis are used in putting together a music theatre production for performance. Instruction includes staging ideas and elements needed for a complete production. Other theatrical aspects of choreography, properties, costumes, lighting, and set design are addressed. It is recommended that students complete MTR 496 before taking MTR 402.

MTR 411 Musical Theatre Ensemble 1 Credits**MTR 415 Musical Theatre Dance I 1 Credits**

This is the first capstone course in the Musical Theatre dance sequence. Practical and historical study of Broadway dance styles; main focus on jazz idiom. Emphasis placed on performance quality, auditioning skills, self-taping, and "how to swing/dance captain".

Prerequisite(s): Completion of Ballet, Tap, and Jazz requirements; senior standing.

MTR 416 Musical Theatre Dance II 1 Credits

This is the second capstone course in the Musical Theatre dance sequence. Emphasis is placed on other dance styles used on stage, film, music videos, and television. Primary focus is on Hip Hop and Street Jazz.

Prerequisite(s): MTR 415 with a minimum grade of C.

MTR 480 Dance for Performing Artist 3 Credits

This course is a culmination of the dance elements and forms studied in ballet, tap, and jazz dance. Context areas include movement used most often in performance of music theater and movement fundamentals applicable to all aspects of presentation and principle to refine and articulate the performer's awareness and use of the body through singing and dance. Performance issues and movement as a basis for music and sound production are addressed.

Prerequisite(s): MTR 209, MTR 309.

MTR 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credit hours. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing, good academic standing.

MTR 491 Internship in Music Theater 1-12 Credits

Provides junior or senior musical theatre majors with the opportunity to gain practical experience working within a professional environment. Students must be sponsored by a musical theatre or theatre professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

MTR 492 Singing Actor: Music Theater 3 Credits

This semester combines all dramatic and musical studies to create an authentic and believable character that is both emotionally truthful and musically expressive. Music is studied as "script" and dramatic choices are prepared in relationship to all elements present in the score.

Prerequisite(s): MTR 216 and MTR 217.

MTR 493 Music Theater Production 1 Credits

Preparation and performance of a solo or ensemble role in a fully staged music theatre production. Concurrent participation in stage crew activities is required.

MTR 495 Special Topics in Theater Dance 1 Credits

This class covers discrete movement styles, techniques, or forms for the advanced dancer such as the choreography and techniques of Bob Fosse, Jerome Robbins, Jack Cole, and other theatrical dance choreographers.

Prerequisite(s): MTR 319, MTR 212, and MTR 308.

MTR 496 Music Theater Workshop 3 Credits

This class, building upon the foundational studies associated with preparation and exploration (both dramatic and musical), focuses on performances. Students are taught methods for synthesizing all former training in acting, music, and movement to the needs of the character and the play/score. Each student fully prepares at least two complete roles from the music theater repertoire. The class culminates in a performance of scenes—the Junior Cabaret!

Prerequisite(s): MTR 216, MTR 217, MTR 492.

MTR 497 Musical Theatre Senior Showcase 1 Credits

This course is a senior level capstone experience for BFA Musical Theatre students, and acts as a bridge between life in the university and life as a professional musical theatre performer. Through this course the students will, in collaboration with the teacher, compile and put together a showcase to introduce the students to casting and agent professionals in the industry by way of getting the showcase performance in front of a diverse range of industry professionals who will be useful in both casting and representing recently graduated talent.

Music Theory (MT)

TH 045 Introduction to Musicianship 4 Credits

Integration of the basic elements of music, scales, intervals, key signatures, triads and rhythmic notation with the practical skills of sight singing, rhythmic reading, keyboard harmony and dictation. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade; 0 credits toward graduation, counts as 4 credits in the semester load.

TH 100 Topics in Music Theory 3 Credits

The topic of courses carrying this number will vary with the special interests and qualifications of the instructors teaching them. They are meant to be at an introductory level, open to all Rider University students. Possible topics include music and social causes or distinct perspectives, or specific creative techniques in music such as songwriting for beginners.

TH 101A Composition Primary 2 Credits**TH 101C Composition Elective 2 Credits****TH 101D Composition Elective 1 Credits****TH 101E Composition Primary 2 Credits****TH 101F Composition Primary 1 Credits****TH 141 Musicianship I 4 Credits**

This course assists students in learning and integrating aural, performance, analytical and composition skills involving diatonic melody and harmony. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade.

Prerequisite(s): TH 045 or passing a placement test.

TH 142 Musicianship II 4 Credits

A continuation of TH 141 involving chromatic melody and harmony with an introduction to binary and ternary form.

Prerequisite(s): minimum "C-" grade in TH 141.

TH 201A Composition Primary 2 Credits**TH 201E Composition Primary 2 Credits****TH 201F Composition Primary 1 Credits****TH 237 Composition Class 3 Credits**

Class instruction in original composition. May be taken as a level I elective.

Prerequisite(s): For non Theory/Composition majors only, minimum "C-" grade in TH 142.

TH 241 Musicianship III 4 Credits

A continuation of TH 142 with an introduction to larger musical forms and counterpoint.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 251 Analytical Studies I 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain only the harmonic vocabulary and formal structures studied in TH 141 and TH 142, may vary each time the course is offered. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 253 Orchestration 3 Credits

A study of the orchestra and its individual instruments from the standpoints of the composer, arranger and conductor. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 255 Song Writing 3 Credits

Solo vocal composition in various styles. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 259 Electroacoustic Music 3 Credits

An introduction to the history and literature of electroacoustic music emphasizing hands-on creative opportunities in sequencing and digital sound processing. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 301A Composition Primary 2 Credits**TH 301E Composition Primary 2 Credits****TH 301F Composition Primary 1 Credits****TH 342 Contemporary Trends 3 Credits**

An analytical study of the compositional techniques of the 20th and 21st centuries.

Prerequisite(s): TH 241.

TH 401A Composition Primary 2 Credits**TH 401E Composition Primary 2 Credits****TH 401F Composition Primary 1 Credits****TH 424 Choral and Instrumental Arranging 3 Credits**

Arranging for various ensembles of voices and instruments. May be taken as a level II theory elective.

Prerequisite(s): TH 241.

TH 431 Form and Analysis 3 Credits

Study of the compositional process as observed in selected examples of music literature, predominantly from the tonal repertoire. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 432 Contrapuntal Techniques 3 Credits

18th century counterpoint with an emphasis on analysis and writing of original compositions. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 433 Special Topics in Theory 3 Credits

The content of the course carrying this number will vary with the special interests and qualifications of the professor teaching it. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 452 Analytical Studies II 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain a more advanced harmonic vocabulary and larger formal structures than the music studied in TH 251, may vary each time the course is offered. May be taken as a level II theory elective.

Prerequisite(s): TH 241 with a minimum grade of C-.

TH 480 Senior Project 3 Credits

Independent study in theory or composition resulting in either a paper comparable to a substantial journal article or a composition in one of the larger forms.

Prerequisite(s): Five semesters of private composition study.

TH 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Nursing (NUR)

Courses and Descriptions

NUR 400 Professionalism and Professional Values 3 Credits

Professionalism and the inherent values of altruism, autonomy, human dignity, integrity, and social justice are fundamental to nursing. The nature and scope of professional nursing, critical thinking, professional accountability, ethical decision-making, and client education as integral parts of the nursing process are examined. Quality and Safety Education in Nursing (QSEN) concepts are emphasized. This course provides a foundation for the baccalaureate nurse to have a solid understanding of the broader professional standards of moral, ethical, and legal conduct in the nursing profession and to facilitate the role of the nurse as a change agent.

NUR 401 Organizational and Healthcare Systems Leadership 3 Credits

This course provides a foundation of principles of leadership based on contemporary needs for qualified nursing leaders who can function and manage in complex healthcare delivery environments. Learning activities and assignments will focus on strategies for self-assessment and self-reflection of one's own leadership skills, knowledge, and attitudes that foster and promote nursing leadership in diverse healthcare delivery settings, and strategies for best practice in nursing leadership in the 21st century.

NUR 402 Scholarship in Evidence-Based Practice 3 Credits

This course provides a foundation of evidence-based research principles to translate evidence into practice and how research informs professional nursing practice to improve patient safety and outcomes. Learning activities and assignments will focus on strategies for learning how to assess scientific merit of data-driven research, apply evidence-based practice in appropriate ways, monitor and evaluate the impact of evidence-based practice on informed nursing practice and outcomes of care as well as collaborate with interprofessional health care teams to improve patient safety and outcomes in a variety of healthcare delivery settings.

NUR 403 Information Management and Application of Patient Care Technology 3 Credits

This course provides a foundation of information management and application of patient care technology to enhance and improve patient safety and outcomes by examining linkages between information management systems and patient care technologies that support and are linked to safe nursing practice. The course examines how technology is used to inform nursing practice and enhance patient safety by applying safeguards and decision making support tools embedded in the technologies. Students are exposed to effective clinical information systems (CIS) to document nursing care, examine the ethical components of protecting patient information, challenges with data security, regulatory requirements, confidentiality and rights to privacy as well as examine the role of the professional nurse in updating and garnering information management resources and applying them in patient care settings.

NUR 404 Healthcare Policy, Finance, and Regulatory Environments 3 Credits

This course provides a foundation of U.S. healthcare policy, including financial and regulatory policies, as well as the nature and functioning of the U.S. healthcare delivery system. There is emphasis on policy processes at the organizational, local, state, national, and global levels. Learning activities and assignments focus on strategies for learning how to assess the role of the baccalaureate-prepared nurse in policy formation and reformation at all levels, demonstrating understanding of the political process at all levels, developing effective advocacy strategies for vulnerable populations, how to identify and influence key stakeholders in the policy process, the importance of effective communication of key healthcare issues, and how to influence change in the political process at all levels when there is social injustice.

NUR 405 Interprofessional Collaboration and Communication for Improving Healthcare Outcomes 3 Credits

This course provides a foundation of key concepts essential to promotion of effective interprofessional collaboration and communication for improving healthcare outcomes and patient safety. There is emphasis in the course on examination of the roles and perspectives of scope of practice for selected healthcare disciplines in intra-and interprofessional healthcare teams to improve healthcare outcomes and promote patient safety, and on effective strategies for advocacy and communication patterns in healthcare delivery settings as healthcare professionals develop trust and respect for all members of the healthcare team while recognizing unique differences and contributions of roles to patient safety and outcomes.

NUR 406 Population Health Promotion and Prevention Across the Lifespan 3 Credits

This course provides a foundation of key concepts essential to population-focused nursing, the aggregate, community or population as the unit of care. The focus of the course is on health promotion/disease prevention with emphasis on the professional nurse role in clinical prevention of disease and care of populations applying concepts of primary, secondary, and tertiary health promotion across the lifespan, identifying determinates of health, prioritizing primary prevention across the lifespan, actively identifying and targeting populations benefitting from evidence-based preventive initiatives and clinical preventive guidelines, assessment strategies for individuals and populations, applying evidence-based practice to health promotion/risk reduction, and being an advocate for vulnerable and disenfranchised populations without resources or a voice.

NUR 407 Cultural Diversity in a Global Society 3 Credits

This course provides a foundation of key concepts essential to nursing care and professional nursing leadership in assessment, planning, design, implementation, and evaluation of the knowledge, skills, and attitudes they must have as leaders of healthcare delivery focusing on improved system safety and effectiveness. There is particular emphasis on the nursing leadership role at the baccalaureate level for nursing to recognize, interrupt, evaluate, and correct healthcare errors and to implement safety principles and work with others to create a safe, caring environment for every healthcare delivery encounter as they provide care themselves, are acting in a leadership capacity, or are overseeing and delegating to other non-licensed assistive personnel. The course content focuses on identification, assessment, planning, design, and evaluation of evidence-based practice change to improve patient safety and outcomes.

NUR 408 Gerontological Nursing Concept 3 Credits

This course provides a foundation of key concepts essential to care of an aging population in a complex society. Given the diverse health status of the aging population, professional nurses must be able to develop competencies to provide high quality care to aging adults and their families or significant others. Specifically the course focuses on increased diversity and complexity of an aging society and selected health care needs, life transitions of aging adults, normal body system changes occurring with the aging process, the professional nurse role in principled care provided to a vulnerable population, and the role of the professional nurse as advocate and caregiver promoting the concepts of quality end-of-life care for aging adults, including pain and symptom management honoring the autonomy and self-wish of the aging client.

NUR 409 BSN Capstone 3 Credits

This course provides a foundation of key concepts essential to nursing care and professional nursing leadership in assessment, planning, design, implementation, and evaluation of the knowledge, skills, and attitudes they must have as leaders of healthcare delivery focusing on improved system safety and effectiveness. There is particular emphasis on the nursing leadership role at the baccalaureate level for nursing to recognize, interrupt, evaluate, and correct healthcare errors and to implement safety principles and work with others to create a safe, caring environment for every healthcare delivery encounter as they provide care themselves, are acting in a leadership capacity or are overseeing and delegating to other non-licensed assistive personnel. The course content focuses on identification, assessment, planning, design, and evaluation of evidence-based practice change to improve patient safety and outcomes.

Prerequisite(s): NUR 402, NUR 405.

Organ (OR)

OR 001S Applied Organ Studio 0 Credits

OR 101A Organ Primary 2 Credits

OR 101B Organ Primary 1 Credits

OR 101C Organ Elective 2 Credits

OR 101D Organ Elective 1 Credits

OR 101E Organ Primary 2 Credits

OR 101F Organ Primary 1 Credits

OR 101G Organ Primary 2 Credits

OR 201A Organ Primary 2 Credits

OR 201B Organ Primary 1 Credits

OR 201E Organ Primary 2 Credits

OR 201F Organ Primary 1 Credits

OR 201G Organ Primary 2 Credits

OR 301A Organ Primary 2 Credits

OR 301B Organ Primary 1 Credits

OR 301E Organ Primary 2 Credits

OR 301F Organ Primary 1 Credits

OR 301G Organ Primary 2 Credits

OR 401A Organ Primary 2 Credits

OR 401B Organ Primary 1 Credits

OR 401E Organ Primary 2 Credits

OR 401F Organ Primary 1 Credits

OR 401G Organ Primary 2 Credits

OR 433 Organ Literature I 3 Credits

Historical study of organ literature coordinated with a study of the development of the organ as a musical instrument.

OR 434 Organ Literature II 3 Credits

Continuation of OR 433.

OR 490 Independant Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation.

Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed.

Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Philosophy (PHL)

Courses and Descriptions

PHL 100 Plato and Aristotle 3 Credits

The beginnings of Western scientific and humanistic thought among the early Greeks and their progress into the two great systems of Plato and Aristotle. Selections from Plato and Aristotle are read and discussed to determine the meaning and significance of philosophical ideas that have subsequently influenced the whole history of Western civilization. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 102 Philosophical Thinking 3 Credits

An introduction to philosophical thought with an emphasis on the enduring questions and problems of philosophy. We will explore such questions as: how do I know I am not dreaming? Is there an external world? What is truth? Is there a self? Is there a God? What is the relationship between the mind and the body? How can I tell right from wrong? What makes government legitimate? What is justice? What is the meaning of life? We will consider answers to these questions from diverse philosophical traditions, reading such philosophers as Plato, Descartes, Zhuangzi, Hume, Vasubandhu, Berkeley, Aquinas, Avicenna, Udayana, Kant, Mill, Russell, Camus, and Nishitani. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 110 Logic and Language 3 Credits

A study of the logical structure of argumentation in ordinary language, with an emphasis on the relation of logic to the uses of language in practical affairs. Traditional informal fallacies are studied as well. Discussions explore the nature of validity, truth, meaning, and evidence in relation to the evaluation of arguments. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 115 Ethics 3 Credits

A combined historical and systematic analysis of the problems of ethics. Such problems as the nature and meaning of moral values and judgments, moral responsibility and freedom, conscience and happiness, the good life, and the relativity of value, are explored through the writings of such philosophers as Plato, Aristotle, Aquinas, Kant, Mill, and Nietzsche. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 120 American Philosophy 3 Credits

The development of philosophical thought in the United States from the colonial era to the 20th century. Studies such thinkers as Edwards, Jefferson, Emerson, Thoreau, Peirce, James, Dewey, and King, and their ideas on human nature, free will, religion, morality, and politics. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 125 Philosophies of Education 3 Credits

Studies classical and contemporary theories of the nature, structure, and aims of education, including major works of such philosophers as Plato, Rousseau, and Dewey. The course will also introduce students to methods of critical philosophical analysis. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 130 Political Philosophy 3 Credits

An introduction to the problems of political philosophy with an emphasis on recent and contemporary issues, such as the conflict between liberal and conservative ideologies, fascism, revolution, civil disobedience, and the concept of legitimate political authority. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 202 Social Philosophy 3 Credits

Emphasizes social ethics through critical studies of such contemporary problems as abortion, euthanasia, the death penalty, pornography and censorship, animal rights, drug use, sexual morality, environmental ethics, and world hunger. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 203 Business Ethics 3 Credits

Surveys and examines ethical problems concerning the institutions and practices of contemporary business. Problems considered include: the conflicts of economic freedom and social responsibility; the relation of profits to work and alienation; the responsibilities of business to employees, minorities, consumers and the environment; the role of truthfulness in business practices; and the ethics of self-fulfillment and career ambitions. Readings selected from works of contemporary and historical philosophers, social theorists, and business people.

PHL 207 Asian Philosophy 3 Credits

A survey of the principal philosophical perspectives of Asia. Emphasis on the traditional Indian schools of Hinduism, Jainism, and Buddhism, Chinese Confucianism and Taoism, and the development of Zen Buddhism in China and Japan. Philosophical topics include: mystical experience, the ultimate nature of reality, the existence of a soul, the causes of human suffering, and the possibility of release, the nature of virtue and its development, and the nature of society and government. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 210 Symbolic Logic 3 Credits

An introduction to logic from the standpoint of modern symbolic methods, including techniques of formal deductive proof, quantification, the logic of relations, and properties of formal deductive systems. Discussions focus on philosophical issues in recent and contemporary logical theory. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 215 Environmental Ethics 3 Credits

A comprehensive introduction to environmental ethics that examines the major theoretical approaches, including anthropocentric (human-centered), zoocentric or sentientist (animal-centered), and biocentric or ecocentric (nature-centered) value systems, as well as the most important critiques of these ethical approaches. We will examine and analyze several classical ethical theories that are particularly relevant to a study of contemporary environmental controversies. We will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption. Students will analyze and discuss the ethical dimensions of several contemporary environmental controversies. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 225 Modern Philosophy 3 Credits

Examines one of the most exciting periods in the history of philosophy during which philosophers from Descartes to Kant tried to come to terms with the following questions: What is knowledge? Can we know the physical world exists? Can we have scientific knowledge? Can we know God exists? Can we even know whether we exist? The works of Descartes, Leibniz, Spinoza, Locke, Berkeley, Hume and Kant are read and discussed. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 226 Limits of Reason: 19th Century Philosophy 3 Credits

Studies the nature and meaning of reason, freedom, individuality, and society in the writings of philosophers such as Fichte, Hegel, Schopenhauer, Emerson, Thoreau, Comte, Mill, Spencer, Marx, and Nietzsche. Examination of the impact of such philosophies as the dialectical theory of history, transcendentalism, evolutionary theory, positivism, and existentialism on ideas about the nature and limits of human reason.

PHL 230 Philosophy of the Sexes 3 Credits

Studies philosophical views of the differences between the sexes, sexual equality, love, marriage, and the family from ancient Greece to the 20th century. Texts from the contemporary women's and men's movements will also be examined. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 252 The Nature of Art 3 Credits

An inquiry into the nature of art, creativity, aesthetic experience, and value. Special attention to the importance of art in relation to the nature of man and society. Readings from classical theories of art (Plato, Hegel, Schopenhauer, Croce, Santayana), as well as from contemporary analyses of 20th-century art.

PHL 300 Philosophy and Civilization 3 Credits

An investigation of the rise and fall of civilizations in history, studying philosophical questions such as is history cyclical? Linear? Progressive? Directed toward a final goal? What is the role of the individual in history? Of economic, political, sociological, and psychological causes? Does history have a meaning? The works of St. Augustine, Vico, Hegel, Marx, and Toynbee, and the contemporary debate about the "clash of civilizations" between Islam and the West will be discussed.

PHL 303 Philosophy of Law 3 Credits

An examination and analysis of selected topics including classical and contemporary theories in the philosophy of law and moral philosophy. Such topics as the nature of the law and legal reasoning, the legal enforcement of morality, protection of personal liberty, and the moral justification of punishment are considered. Such philosophers as Aquinas, Austin, Holmes, Bentham, Hart, and Dworkin are read and discussed.

PHL 304 Medical Ethics 3 Credits

Introduces the student to ethical problems associated with the practice of medicine, the pursuit of biomedical research, and health care social policy. The course will explore such issues as: Is a physician morally obligated to tell a terminally ill patient that he or she is dying? Is society ever justified in enacting laws that would commit an individual, against his or her will, to a mental institution? Does society have a moral obligation to ensure that all its members have access to health care? To what extent, if at all, is it ethically acceptable to clone a human being? Under what conditions is human experimentation ethically acceptable? **Prerequisite(s):** CMP 125 or CMP 203 or BHP 150.

PHL 305 Philosophy of Religion 3 Credits

An inquiry into the meaning, significance, and fundamental problems of religion as they appear in their philosophical perspective. The relation between religion and science, between faith and reason; religious experience, religious truth, and symbolism, etc. will be explored. Selections from the works of Anselm, Aquinas, Augustine, Paley, Hume, Kant, James, and Wittgenstein will be discussed.

PHL 310 Problems in 20th-Century Philosophy 3 Credits

Consideration of major philosophical movements in the 20th century such as phenomenology, existentialism, pragmatism, and analytic philosophy. Within these movements such topics as the function of analysis, language and meaning, the nature of values, the nature of persons, the synthetic-analytic distinction, the mind-body problem, and the possibility of metaphysics are considered. The work of such figures as Wittgenstein, Russell, Heidegger, Husserl, Sartre, Whitehead, and Dewey are read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 315 Existentialism 3 Credits

Historical development and contemporary problems of existentialism with emphasis on the nature of man, his ability to know his situation, the relation between existence and essence, and the meaning of human life and activity. The works of such figures as Kierkegaard, Sartre, Heidegger, Camus, Kafka, Beckett, Buber, Laing, and Frankl are read and discussed.

PHL 320 Philosophy of Science 3 Credits

The logic of fundamental concepts of science and scientific methods are studied. Patterns of explanation are examined to understand the functions of laws, theories, and predictions in science. Inquiry is made into the relation between mathematics and empirical science; similarities and distinctions between the natural and social sciences. The role of science in human affairs and the value of scientific knowledge.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 334 Theories of Knowledge 3 Credits

An investigation of selected, representative theories of knowledge from classical and contemporary sources. Considers the analytic-synthetic distinctions, necessary truth, and the foundations of empirical knowledge. Such philosophers as Leibniz, Hume, Kant, Russell, and Quine are read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 336 Philosophy of Mind 3 Credits

An investigation of the nature, existence, and capacities of the mind and self in the light of recent philosophical and psychological theories, including psychoanalysis and behaviorism. Considers such topics as the interaction of mind and body, the unconscious, minds and machines, freedom of thought and action.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 343 Theories of Reality 3 Credits

An examination of metaphysical problems with an emphasis on philosophical views of human nature from ancient Greece to contemporary evolutionary theories. The writings of such classical, modern, and contemporary figures as Plato, Aristotle, Descartes, Kant, Hegel, and Darwin are read and discussed. Issues studied include the relation between mind and matter, freedom and determinism, and the existence of God.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 348 Indian Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of India. Emphasis on the disputes between the traditional Hindu and Buddhist schools of the classical period over logic, knowledge, and reality. Philosophical topics include: skepticism, the problem of universals, realism and idealism, the nature of perception, the problem of induction, the nature of causality, and the problem of identity over time. Philosophers such as Nagarjuna, Vasubandhu, Vatsyayana, Dharmakirti, and Udayana will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 358 Chinese Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of China. Emphasis on the political philosophies of ancient China. Topics include: human nature and the development of virtue, the nature and purpose of government, and the cognitive value of mystical experience. Philosophers such as Confucius, Laozi, Xunzi, Mencius, Mozi, and Zhuangzi will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 360 Contemporary Ethics 3 Credits

An examination of recent and contemporary challenges to traditional ethical theory including such movements as logical positivism, cultural relativism, feminism, environmentalism, multiculturalism, and postmodernism. Such problems as the meaning and cognitive status of value judgments, the relation between fact and value, the relativity of values, and how value judgments can be justified are considered.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 368 Japanese Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of Japan, with an emphasis on Zen Buddhism in Medieval Japan and the Kyoto school in the 20th century. Topics include: the use of meditation and koans in Zen practice, the relationship between practice and enlightenment, the nature of time, meaning and nihilism, and the relationship between science and religion. Philosophers such as Kukai, Mumon, Dogen, and Nishitani will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 402 Nietzsche and Nihilism 3 Credits

A seminar dealing with Nietzsche's provocative ideas on Nihilism and the possibility of creating meaning, value, and truth for human existence. Many of his important works are read, analyzed, and critically discussed. Recent scholarly interpretations of Nietzsche's philosophy are considered.

Prerequisite(s): any previous philosophy course or permission of instructor.

PHL 404 Philosophy of Wittgenstein 3 Credits

Seminar involving a concentrated study of Wittgenstein's contributions to philosophy with special attention to his analysis of language, meaning, and mental concepts.

Prerequisite(s): any previous philosophy course or permission of instructor.

PHL 406 Philosophy of David Hume 3 Credits

Seminar involving a concentrated study of Hume's contributions to philosophy, including his work on epistemology, metaphysics, ethics, philosophy of science, and philosophy of religion.

Prerequisite(s): any previous philosophy course or permission of instructor.

PHL 407 Philosophy of Hannah Arendt 3 Credits

Seminar involving a concentrated study of the philosophy of Hannah Arendt with special attention to her analysis of action, thought, and freedom.

Prerequisite(s): any previous philosophy course or permission of instructor.

PHL 408 The Philosophy of William James 3 Credits

Seminar involving a concentrated study of William James' contributions to philosophy with special attention to his pragmatism, pluralism, and radical empiricism. Many of James' philosophical works are read, analyzed, and critically discussed. Recent scholarly interpretations of James' philosophy are considered.

PHL 418 Great Buddhist Thinkers 3 Credits

Concentrated study of a single Buddhist philosopher, emphasizing the systematic views of that philosopher across a range of philosophical issues. Through an examination of primary sources in translation and recent scholarship, students will investigate the views and arguments of one important figure from the Buddhist philosophical tradition on a variety of philosophical problems regarding knowledge, existence, consciousness, religion, and ethics.

PHL 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

PHL 491 Internship in Philosophy 1-4 Credits

Students will work under supervision within an area hospital, corporation, or legal agency. The specific duties and tasks will be developed jointly by the intern, intern agency, and faculty supervisor. Within the hospital setting, students will work with the Hospital Medical Ethics Committee. Within the corporate setting, there will be two types of internships: students will work in the corporate office responsible for addressing the ethical issues that arise in the business environment; or students will work in a department that allows them to explore the potential business applications of their philosophic intellectual training. Within the legal setting, students will work with the federal magistrate, prosecutor, or public defender, exploring issues in the philosophy of law that arise in the practice of law. Students must have completed four philosophy courses, one at the 300 level, before applying for the internship. No more than six credits will be allowed toward graduation. A member of the department of philosophy will supervise the internship.

Prerequisite(s): juniors and seniors with a minimum of 2.7 cumulative GPA and 3.0 GPA in philosophy, or permission of the department of philosophy.

PHL 494 Preparation and Research for Senior Philosophy Thesis 1 Credits

Supervised by a faculty member, the Philosophy major chooses a topic, composes an outline and a bibliography. Must be completed prior to enrolling in PHL 495.

PHL 495 Senior Philosophy Thesis 3 Credits

In a tutorial setting, the Philosophy major will write a thesis which serves as the Capstone Experience in the Department.

Prerequisite(s): PHL 494.

Physics (PHY)

Courses and Descriptions

PHY 100 Principles of Physics I 3 Credits

Introductory noncalculus physics with applications for pre-professional, biology, and geological, environmental and marine sciences majors. Classical mechanics, energy, mechanical waves, fluid statics and dynamics, thermodynamics. Elements of modern physics are interwoven with those of classical physics from the beginning. Not open to chemistry, physics, or mathematics majors. Three hours of lecture per week. Prerequisite(s): MTH 105, MTH 210, MTH 211 or MTH 212. **Corequisite(s):** PHY 100L.

PHY 100L Principles of Physics I Lab 1 Credits

For students concurrently taking PHY 100. One three-hour lab per week. **Corequisite(s):** PHY 100.

PHY 101 Principles of Physics II 3 Credits

Continuation of Physics 100. Electrostatics, electricity, and magnetism; DC and AC circuits, physical and geometrical optics, introduction to elementary particle and quantum physics. Three hours of lecture per week. Prerequisite(s): PHY 100.

Corequisite(s): PHY 101L.

PHY 101L Principles of Physics II Lab 1 Credits

For students concurrently taking Physics 101. One three-hour lab per week.

Corequisite(s): PHY 101.

PHY 103 Science of Light and Color 3 Credits

An introduction to the science of light, color, and optics. Covers history of theories of light and vision, applications in art, photography, natural phenomena (rainbows, mirages, etc.), and modern technology, e.g., lasers and telecommunications. Many topics are illustrated by in-class demonstration experiments with lasers and other optical devices.

PHY 104 Energy, the Environment & Man 3 Credits

The many vital roles played by energy in the universe at large, on the earth, and in the activities of man are examined, including the basic sources of energy, the impact upon the environment due to these processes and possible future sources. A high school course in physics or chemistry is desirable but not necessary.

PHY 105 Matter, Forces, and Energy: A Exploration of Physics Concepts 4 Credits

An introduction to the basic principles of physics focusing on the concepts of matter, force, and energy. The course will study, in depth, simple physical systems chosen to emphasize the interconnection of these three basic concepts. It will explore the behavior of these simple physical systems using directed group exercises coordinated with hands-on laboratory activities. One three-hour lecture and one three-hour lab per week.

PHY 105L Matter, Forces and Energy Lab 0 Credits**PHY 180 Astronomy 3 Credits**

Examines mankind's quest to understand the origin and form of the universe. Emphasis on the ideas of modern cosmology and their impact on our changing perception of our place in the universe, making use of information gleaned by simply looking at the night sky as well as post Apollo-era views of the solar system and the evolving universe as a whole.

PHY 200 General Physics I 4 Credits

Introductory classical physics; Newtonian mechanics, including the conservation laws, wave motion, gravity, thermodynamics. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 210 or concurrent enrollment

Corequisite(s): PHY 200L.

PHY 200L General Physics I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 200.

PHY 201 General Physics II 4 Credits

A continuation of the concepts developed in Physics 200. Electricity, electrical circuits, magnetism, Maxwell's equations. Light and optics, including lenses, interference, and diffraction. Three hours of lecture and one three-hour lab per week. Prerequisite(s): PHY 200, MTH 211 or concurrent enrollment.

Corequisite(s): PHY 201L.

PHY 201L General Physics II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 201.

PHY 203 Introduction to Modern Physics 3 Credits

Covers space-time relativity, elementary particles, and basic quantum mechanics, including solutions of the Schrodinger wave equation. Applications of quantum theory in atomic, nuclear, and solid-state physics.

Prerequisite(s): PHY 201 or permission of instructor.

PHY 250 Scientific Computing 3 Credits

Introduces students to modern techniques and applications of scientific computing. Students will learn to write code in python, a popular, modern programming language used by scientists and industry around the world. They will also retrieve and analyze large datasets using SQL, a standard database language. Students will develop their own software and learn to manage it online using github, an online code repository.

PHY 300 Mechanics 3 Credits

Kinematics and dynamics of particles and systems, analysis of harmonic oscillator systems, normal modes, Lagrangian and Hamiltonian dynamics and classical waves are studied.

Prerequisite(s): PHY 201, MTH 250.

PHY 305 Electricity and Magnetism 3 Credits

Electro- and magnetostatics, fields and potentials, and boundary value problems are covered.

Prerequisite(s): PHY 201, MTH 250.

PHY 310 Advanced Electricity and Magnetism 3 Credits

Maxwell's equations; electromagnetic waves in vacuum and in material media; radiation, propagation, reflection, and refraction.

Prerequisite(s): PHY 305, MTH 308.

PHY 315 Thermodynamics and Statistical Mechanics 3 Credits

Thermodynamic systems; the first and second laws of thermodynamics; entropy and thermodynamic potentials; distribution of molecular speeds; Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac distributions.

Prerequisite(s): PHY 201.

PHY 320 Quantum Mechanics 3 Credits

Historical background; the Bohr Theory; the Schrodinger equation, its interpretation and applications; the uncertainty and exclusion principles; development of the formalism.

Prerequisite(s): PHY 300.

PHY 330 Basic Electronics 3 Credits

An experimental study of devices and circuits in analog and digital electronics. No previous experience with electronic circuits is assumed; introductory topics including signal acquisition, computer interfaces, and analog/digital signal processing will be covered. One hour of lecture plus two three-hour labs per week.

Prerequisite(s): PHY 201 or permission of instructor.

PHY 350 Advanced Laboratory 2 Credits

Experiments in atomic and nuclear physics, electricity and magnetism, and physical optics. Students have the opportunity to work intensively on a particular experiment. Minimum of five to six hours per week.

PHY 400 Atomic Physics 3 Credits

Quantum mechanics and the one-electron atom; atomic structure and optical spectra of multi-electron atoms. Quantum statistics, band theory of solids.

Prerequisite(s): PHY 320.

PHY 405 Fundamentals of Nuclear Physics 3 Credits

Nuclear mass and size; nuclear forces and some models of the nucleus; radioactivity and detection; subnuclear particles and resonances.

Prerequisite(s): PHY 320.

PHY 415 Physical Optics 3 Credits

Waves and the superposition principle; interference, Fraunhofer and Fresnel diffraction; electromagnetic nature of light; absorption and scattering; dispersion; polarization.

Prerequisite(s): PHY 201, MTH 250.

PHY 416 Modern Experimental Optics Lab 1 Credits

A laboratory course in geometrical and physical (wave) optics, designed to supplement the material presented in PHY 415. Serves as an introduction to the optical equipment and techniques that are employed in laboratory research. A series of experiments cover the topics of polarization, interference, image formation, Fourier optics and lasers, and optical spectroscopy.

Prerequisite(s): PHY 201.

PHY 450 Topics in Modern Physics 3 Credits

A selected topic of contemporary interest in physics, e.g., general relativity and gravity waves, is studied. Emphasis on current journal literature and research. May be taken more than once with departmental approval. An excellent introduction to independent research in one area of physics.

Prerequisite(s): PHY 201.

PHY 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

PHY 491 Internship in Physics 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the student's overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Piano (PI)

PI 001S Applied Piano Studio 0 Credits

PI 045 Introduction to Piano Secondary 1 Credits

Designed for student with little to no background in piano study or music reading. Students will develop a foundation (basic elements) of pianism/musicianship skills and will focus on the most fundamental aspects of music study at the piano. 0 credits toward graduation, counts as 4 credits in the semester load.

Prerequisite(s): placement; Students must pass this course with a grade of "Y" to progress to PI 103: Piano Secondary I.

PI 101A Piano Primary 2 Credits

PI 101B Piano Primary 1 Credits

PI 101C Piano Elective 2 Credits

PI 101D Piano Elective 1 Credits

PI 101E Piano Primary 2 Credits

PI 101F Piano Primary 1 Credits

PI 101G Piano Primary 2 Credits

PI 103 Piano Secondary I 1 Credits

Establishes a solid foundation of piano playing through integration of musicianship skills in addition to building facile digital independence and bilateral hand coordination. Minimum grade of "B-" required to pass the course.

Prerequisite(s): Grade of "Y" in PI 045 or placement.

PI 104 Piano Secondary II 1 Credits

Continuation of PI 103; appropriate for the advanced beginner. Minimum grade of "B-" required to pass the course.

Prerequisite(s): PI 103 or placement.

PI 201A Piano Primary 2 Credits

PI 201B Piano Primary 1 Credits

PI 201C Piano Elective 2 Credits

PI 201D Piano Elective 1 Credits

PI 201E Piano Primary 2 Credits

PI 201F Piano Primary 1 Credits

PI 201G Piano Primary 2 Credits

PI 203 Piano Secondary III 1 Credits

Establishes fluidity in piano playing through integration of musicianship skills, digital independence and bilateral hand coordination. Minimum grade of "B-" needed to pass the course.

Prerequisite(s): minimum grade of "B-" in PI 104 or placement.

PI 204 Piano Secondary for Mus Ed & Sacred Music 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of choral works; playing individual lines/parts of small-scale instrumental works; harmonizing and transposing melodies with accompaniments.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 205 Piano Secondary VCPER 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of songs and arias; warm-up exercises; transposing vocal lines and portions of accompaniments; harmonizing melodies.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 206 Piano Secondary for Music Theater Majors 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of songs and arias; warm-up exercises; transposing vocal lines and portions of accompaniments; harmonizing melodies.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 207 Piano Secondary for Theory Comp Majors 1 Credits

Development of practical keyboard skills in the areas of score reading (including one's own works), use of piano as a tool for composition, and realizing chord progressions.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 208 Piano Secondary BAM 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of songs and arias; warm-up exercises; transposing vocal lines and portions of accompaniments; harmonizing melodies.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 297 Fund of Piano Pedagogy I 3 Credits

Fundamentals I is devoted to study of techniques, methods, and materials suitable for beginning through early intermediate level students. Other areas of study include motivational strategies, establishment of effective practice habits, recital preparation, technique, and elementary duet materials. Students analyze and demonstrate teaching from three different beginning piano methods. Observation of professional teaching is done in the context of class and private lessons at the Westminster Conservatory.

PI 298 Fund of Piano Pedagogy II 3 Credits

In Fundamentals II, students continue to apply their experience with piano methods to the teaching of students. In addition, the semester is devoted to the study of materials from all style periods for upper elementary and intermediate level students. Students observe private and group lessons appropriate to these levels. The course culminates in an individual lecture recital demonstrating music from a variety of style periods.

Prerequisite(s): PI 297.

PI 301A Piano Primary 2 Credits

PI 301B Piano Primary 1 Credits

PI 301C Piano Elective 2 Credits

PI 301D Piano Elective 1 Credits

PI 301E Piano Primary 2 Credits

PI 301F Piano Primary 1 Credits

PI 301G Piano Primary 2 Credits

PI 397 Fund of Piano Pedagogy III 3 Credits

Fundamentals III involves supervised private and group teaching of beginning students. Emphasis is placed on lesson planning, presentation of concepts, use of technology, and the relationship between technique and musicianship skills. The course further addresses the different psychological and methodological approaches to teaching adults and children in class and private settings, and includes an overview of materials for the adult student and group classes. The course culminates in a lecture recital on a pedagogical subject of the students choice.

PI 401A Piano Primary 2 Credits**PI 401B Piano Primary 1 Credits****PI 401C Piano Elective 2 Credits****PI 401D Piano Elective 1 Credits****PI 401E Piano Primary 2 Credits****PI 401F Piano Primary 1 Credits****PI 401G Piano Primary 2 Credits****PI 413 Accompanying Class 2 Credits**

This course is designed with the twofold purpose of allowing undergraduate pianists to fulfill their piano ensemble elective requirement within the professional studies area as well as providing an opportunity for voice primary students to further their piano study in a challenging forum in situations directly related to their repertoire. The students in the class will receive instruction in the stylistic, technical, analytical and linguistic aspects of vocal literature. The many issues involved in vocal collaboration will be discussed along with in-depth study of the pianist's role in musical partnerships. Issues of musical freedom, language, and the varieties of sonic treatment unique to vocal literature will be discussed. Italian, French, German and English song repertoire from various style periods will provide the assignments for performance and discussion.

PI 435 Survey of Piano Literature I 3 Credits

A study of representative works from 1650-1800 by composers including J. S. Bach, C.P.E. Bach, J.C. Bach, Haydn, Mozart, and Beethoven.

Prerequisite(s): MH 248.

PI 436 Survey of Piano Literature II 3 Credits

A study of representative works from 1800 to the present by composers including Beethoven, Schubert, Mendelssohn, Schumann, Chopin, Liszt, Brahms, Debussy, Ravel, Prokofiev, and Bartók.

Prerequisite(s): MH 248.

PI 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed.

Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Political Science (POL)

Courses and Descriptions

POL 100 U.S. Politics in Crisis 3 Credits

It often seems like the American government achieves little other than stoking political animosities amongst the American people. We see daily news stories about gridlock, polarization, partisanship, and corruption. This course introduces students to the basic principles of the U.S. constitutional system and how they are served by the three branches of government, paying special attention to the democratic process, vital public issues, and civil rights and civil liberties. Students will gain a critical understanding of the function and dysfunction in American politics and government, as well as concrete ideas about what can be done about it. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

POL 102 Power, Politics and Justice 3 Credits

Who gets what, when, why, and how? The study of politics and government is, essentially, a study of power and justice. This course introduces students to major ideologies and political theories, systems of government (ranging from presidential to parliamentary to authoritarian), public opinion and political behavior, international relations and war, and contemporary policy issues. Students will learn how to evaluate political institutions and actors in terms of how power is distributed and exercised, and when (and why) justice is and is not achieved. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

POL 200 NJ Government and Politics 3 Credits

Political institutions, processes, and problems of state and local governments of New Jersey. Analysis of legislative, executive, judicial, regulatory bodies, special districts, and autonomous agencies. Aspects of personnel, finance, and services, as well as political parties and elections.

POL 201 Policy Issues, Advocacy, and Budgeting 3 Credits

Surveys various domestic economic and social policy issues, the government budgeting process, and how citizens and groups advocate their interest through organizing, coalition-building and lobbying. Emphasis on developing practical skills in issue analysis, lobbying, legislative tracking, and public budgeting.

POL 202 The Political System - Theories and Themes 3 Credits

This course serves as a gateway to the subfields of comparative politics and international relations. The concept of the political system helps political scientists to organize political interrelations into patterns that allow systematic selection and interpretation of information and the study of processes and outcomes of politics in a variety of settings. The course introduces students to the main brands of normative theory prescribing the principles directing the operation of the political system, to some of the most important methods used to compare political systems and/or their components, and to the foremost approaches utilized in the study of the relations between political systems and their environments. Note: This course is cross-listed as HLS 202. Students may not get credit for both POL 202 and HLS 202.

POL 203 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective. Note: This course is cross-listed as HLS 203. Students may not get credit for both HLS 203 and POL 203.

POL 204 Development and Structure of the US Intelligence Community 3 Credits

This course provides a historical review of intelligence following World War II. It will examine the major functions of intelligence, as well as intelligence as a part of the foreign policy process: collection, analysis, counterintelligence, and covert action. Students will be introduced to a range of collection procedures: human, open source, electronic, photographic, and signal, with emphasis placed on interpreting and writing intelligence summaries. Note: This course is cross-listed as HLS 204. Students may not get credit for both POL 204 and HLS 204.

POL 205 Introduction to Public Policy 3 Credits

The course provides students with an introduction to the study of public policy by linking the theoretical with the practical. The course focuses on three areas of analysis: 1) descriptive 2) evaluative and 3) prescriptive. Students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options. Last the course provides examples of public policy problems through the substantive policy areas of health, environment and education.

POL 206 Healthcare Regulation and Governance 3 Credits

Health Regulation and Governance explores the institutions, processes and actors involved in governing and regulating the healthcare system in the US. The course engages the topic through the lens of federalism by examining the role of the Executive, Legislative and Judicial branches of government in regulating and governing healthcare at the national level as well as the role of the states in this policy area. Students will not only be introduced to the structure of regulation and governance of healthcare in the US, but will also be able to contextualize contemporary issues in healthcare in order to not simply address problems in the sector, but to also begin to identify solutions to issues that impact the population.

POL 210 Public Opinion 3 Credits

Public opinion as a social force and as expression of public sentiment on political and social issues. Topics include: development and dissemination of opinions, the measurement of public opinion, public opinion and governmental processes, and the reciprocal relationship between mass media and public opinion.

POL 215 Global Politics 3 Credits

The struggle for power, wealth, and order at the global level involving nation-states, intergovernmental organizations (such as the United Nations, the European Union, etc.), non-governmental organizations, transnational enterprises and other non-state entities, using military, economic, diplomatic, legal, and communication instruments. Overview of global problems such as the proliferation of weapons of destruction, ethnic and religious conflicts, human rights, and the global environment in the 21st century.

POL 216 Comparative Political Systems 3 Credits

A general introduction to types of government and political regimes of the world as they try to cope with the dual challenge of ethnic micropolitics and transnational globalization. Major prototypes of democracy: the British parliamentary system, the American separation of powers system, and various combinations of these two. Traditional autocracy, totalitarian dictatorships, and late 20th-century authoritarian regimes. Students are expected to acquire in-depth knowledge of comparative political systems, and to develop a basic understanding and appreciation of the major concepts and themes in comparative political systems studies.

POL 220 Terrorism & Counter Terrorism 3 Credits

This course introduces students to the arguments about the definition of terrorism, the historical use of terrorism and the roles of ideology, religion, and psychological factors that help explain and predict it. The course seeks to identify the components of national security policy aimed at countering such elements and their cost, both in financial and civil right terms. Finally, to illuminate both the definition and the policies discussed, the course will offer brief comparisons with other states, especially Israel, the UK, and Russia.

POL 225 Nationalism in World Politics 3 Credits

Nations and nationalism. An overview of nationalistic manifestations in the world today. Nations, states, nation-states. Multinational states, stateless nations. Imperialism, anti-imperialism; nativism vs. internationalism and globalism. Topics include nationalisms in the Holy Land; in the former Yugoslavia; in the former Soviet Union and its successor states; and economic Nationalism vs. Globalization.

POL 230 Methods of Political Analysis 3 Credits

An overview of the various qualitative and quantitative methods that political scientists use to study their discipline. Themes include analyses of political participation and support, methods of studying elections, measures of political tolerance and liberalism.

POL 235 Race and Ethnicity in American Politics 3 Credits

Examines the changing political, economic, and social situation of racial and ethnic groups in American politics since the 1950s. Topics include the relationship between race/ethnicity and voting behavior, political parties, and election results. Includes an analysis of specific areas of contemporary racial and ethnic conflict, such as voting rights, immigration, and affirmative action.

POL 239 Modern Political Theory 3 Credits

A survey of the most significant political thought from Hobbes through Mill and Marx. Subject matter includes the social contract and discussion of such questions as the nature of freedom, natural law and right, political obligation, justice, and form of regime.

POL 247 Political Campaigning 3 Credits

This course entails the study of campaigning for political office at the federal, state and local levels in the United States. While attention will be given to how the broader political environment and specific factors, e.g., partisanship, hot button issues, local interests, and money, affect the nature of campaigns, the course's primary focus will be on how to organize and conduct a successful and ethical campaign, including how to collect and analyze pertinent data, manage a staff, develop a communications plan, including social media, and get out the vote.

POL 255 European Politics 3 Credits

A comparative analysis of the social and political systems of Britain, France, Germany and other Western countries within the European framework. Emphasis will be on the identification of ways in which countries similar in social characteristics are also similar in their political systems and on the extent and circumstances under which they differ. Similarities and contrasts will also be drawn with political structures and processes in the United States. This course, on occasion, may contain an optional travel component during January.

POL 260 Politics of Law and Order 3 Credits

The constitutional, legal, political, and administrative aspects of the criminal justice system in the United States are studied, including the court system at all levels of government, law enforcement agencies, correctional programs and institutions, probation, parole, and the relationship of our legal institutions to the broader political system.

POL 270 Interest Groups and Lobbying 3 Credits

The course will introduce students to the area of interest groups and lobbying. Topics to be covered include theoretical developments, methodological approaches of group formation, organizational maintenance, and strategies used to influence public policy in the executive, legislative, and judicial branches of government.

POL 280 Sex & Gender in International Politics 3 Credits

What's a student of political science, International Relations (IR), or another social science field to do about feminism? This is a question that has troubled IR for decades. While feminist debates engaged people in spaces outside the disciplines of political science and particularly IR, IR scholars did their best not to see the relevance of feminism for their own debates. That did not stop some feminists from rethinking key IR concepts like power, race and the state, but such contributions were largely ignored by IR scholars until very recently. It was only in the last decades, when feminist questions pushed their way onto the IR agenda through books, journals, and conferences, that feminism suddenly seemed attractive to IR scholars. Designed as an interdisciplinary course with a strong reference to Global and International Politics, this course will provide a basic introduction to some of the major global questions as seen through a feminist lens.

POL 281 Sex & Gender in U.S. Politics 3 Credits

Legal traditions have long maintained that a "man's home is his castle," beyond the reach of the state (thereby ignoring "private" injustices like domestic violence). But the state has always found ways to justify some interventions in citizens' private lives, including legislation of abortion and homosexuality. The personal has always been political, as second-wave feminists rightly insisted in the 1960s. This course examines the intersection of private and public, looking at the ways in which sex, identity and sexuality are implicated in and shaped by politics and policy-making: including the gendered division of labor inside and outside the home; the politics of gender identity; the legislation and policing of sex, sexuality, marriage and families; and the challenges facing women who enter politics. We will ask provocative and pressing questions like: How do sex and sexuality intersect with race, class, disability, and more? Can women (or anyone) really "have it all"? What is the future of transgender rights in the U.S.? Why do women still make up only 20% of Congress? Do women lead differently? To answer these questions, we will turn to political theory, political science, public policy, legal studies, and more.

POL 295 Special Topics in Political Science 3 Credits

For non-seniors who engage in serious research in political science. Topic to be approved by instructor and department chairperson.

POL 300 U.S. Constitutional Law 3 Credits

The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as HLS 300. Students may not get credit for both HLS 300 and POL 300.

POL 301 Civil Liberties in the U.S. 3 Credits

The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as HLS 301. Students may not get credit for both HLS 301 and POL 301.

POL 302 Insurgency 3 Credits

The course explores the occurrence of insurgencies and civil wars. It examines the causes of such conflicts by focusing on the role of resources, state capacity, ethnic/religious differences and power in the initiation of violence. Students will learn how recruitment tactics and access to funding sustain guerrilla warfare. Lastly, the course will focus on conflict management by emphasizing specific tools for terminating and preventing intrastate conflicts including the impact of international interventions, counterinsurgency strategy of winning the hearts and minds, institutional design, and reconciliation.

POL 303 Global Justice 3 Credits

This course examines some of the most vexing problems in today's world of global interconnectedness. How can we harness the potential of global cooperation to solve problems that cross national borders? We will critically analyze the potential for human rights to protect vulnerable individuals, including victims of human trafficking. We will also evaluate the distribution of global resources and costs, including natural resources, extreme poverty and environmental degradation. What do we owe those who live in distant lands? Throughout we will ask how reality matches up to our best hopes for the present and future.

POL 304 Political Behavior: Fear, Risk and Crisis 3 Credits

The course focuses on various analytical approaches in behavioral political science. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior-e.g., voting/non-voting, the formation of political partisanship and ideology, issue perceptions, responding to risk and uncertainty in the political environment, and engaging in civic political participation. Note: This course is cross-listed as HLS 304. Students may not get credit for both POL 304 and HLS 304.

POL 305 Political Parties and Electoral Behavior 3 Credits

The structure, character, and functions of U.S. political parties and pressure groups, and their impact on public policy. Parties are analyzed within the broader scope of organizational theory and comparative party systems. Major emphases on their historical origins, their role in contemporary political life, and particular aspects of party politics—local organization, membership, campaigning and elections, policy-making roles, and leadership.

POL 306 American Political Film 3 Credits

This course analyzes the structure, history, and impact of the genre of political film. It begins with a discussion of how one distinguishes a political film from other forms of cinema. It then proposes insights into the manner in which these films evoke a particular time and place in politics, affect the viewer's interpretation of a political event or figure, and have an effect upon a viewer's political perceptions or behavior. The student will also learn to review films critically, both as political statements and as effective (or ineffective) conveyors of political messages.

POL 307 Political Communication 3 Credits

The meaning and uses of political communication are examined, the manner and forms such communication takes, and the history of political discourse. Major topics include the role of communication in elections and the development of public policy, how political communication strategies have changed with the rise of mass media, and the development of national and international publics for discourse.

POL 308 Capitalism and Inequality 3 Credits

This class is about market economies: how they are theorized, how they operate, and how they affect the humans who live and work within them. The first part of this course offers an overview of major modern theorists of capitalism (with selections chosen for a political science audience), including Smith, Veblen, Schumpeter and Keynes. These thinkers have made influential contributions to debates about the proper role of government in regulating and shaping economic relations and conditions. We then turn to contemporary theories of distributive justice, including libertarianism and egalitarianism. The second half of the course explores realities of socioeconomic inequality, the experience of poverty in the U.S., as well as the kinds of policies which might alleviate or resolve various dimensions of inequality and poverty. This course prepares students to evaluate public policies and articulate policy positions while attending to their economic and human costs.

POL 310 Political Psychology and Human Nature 3 Credits

The 2016 presidential campaign season saw a marked increase in partisanship, polarization, animosity and resentment among Americans, mirroring a worldwide trend toward “tribalistic” group identification at the expense of outsiders. Why can’t we all just get along? What makes it so hard to sympathize with those who seem different or unfamiliar, and so easy to assume the worst about them? This course will bring together classic political theory, psychology and the social sciences, in order to help explain political beliefs and behaviors. We will begin by considering how classic political theory has conceptualized human nature, and the various implications for political life. We will then consider scientific perspectives: evolutionary anthropology, social psychology and cognitive neuroscience. We will examine the role of bias in cognition and politics and we will critically interrogate assumptions about rationality. We will also see that different psychological dispositions underlay conservatism and liberalism. Ultimately, this course will consider how these features of human cognition shed light on partisanship and polarization, racial bias, and policy preferences, including popular reception of science concerning vital issues such as climate change and the safety of GMOs. We will conclude with considerations of how a better understanding of psychology might propel us toward a more productive political discourse.

POL 311 Sovereignty, the State and Borders 3 Credits

Borders have a prominent place in politics and human history. In the twentieth century, the best-known barriers were the militarized Maginot Line and the Iron Curtain. Today, the political popularity of borders persists but the nature and quality of these borders and the threats they were created to repel have changed. Modern borders are designed not to keep militaries out, but to deter a perceived invasion of “undesirables”—with terrorists and unwanted immigrants leading the list of state concerns. Nowhere is this more evident than along the geographic fault lines dividing rich and poor regions, e.g. the Mediterranean Sea and the U.S.-Mexican border region. This course will examine the dynamic interactions between the question of how to govern borders and the twenty-first century liberal state with its diluted sovereignty—due to immigration, trade and international laws and regimes.

POL 312 Congressional Politics 3 Credits

An intensive analysis of the legislative process in the United States, considering both the internal organization and operation of Congress, and Congress’ role in the broader American political system. Fundamental issues include the theory and practice of representation; the committee system, seniority and expertise; executive and legislative interaction; and the politics of congressional reform.

POL 313 American Presidency 3 Credits

A description and analysis of the American presidency: its historical development, the internal organization, and ecological context. Basic issues include the intent of the framers of the Constitution, the historical accumulation of presidential powers, and institutional limits on presidential power (e.g., Congress and the bureaucracy).

POL 314 Congressional Power and National Security Policy 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution’s role in the Global War on Terror. Particular attention is paid to the role of the US government being able to balance individual rights and liberties within the national security state. Last, the course also takes an in-depth analysis of the U.S. Congress, looking comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror? Note: This course is cross-listed as HLS 314. Students may not get credit for both HLS 314 and POL 314.

POL 315 Global Issues 3 Credits

Military, economic, demographic, and environmental threats to global security in the post-Cold War era. Forces of transnational integration vs. forces of intrastate fragmentation. Inadequacy of international law and organization to deal with these problems within the confines of the sovereign nation-state system.

POL 316 Presidential Power and National Security Policy 3 Credits

This course examines the development of the National Security State since the Second World War, and the ways in which it has affected, and been affected by, the Federal Executive. Topics to be covered will include the post-World War II redefinition of “national security”, the Cold War (with a special focus upon war powers during Korea and Vietnam) and the changes that have occurred with the “War on Terror.” Note: This course is cross-listed as HLS 316. Students may not get credit for both POL 316 and HLS 316.

POL 317 Model United Nations 3 Credits

Model United Nations (POL 317) is the course that prepares Rider University’s award-winning Model United Nations (MUN) team for the annual National MUN competition in New York City. The team has brought home top awards for the past decade and continuously strives for excellence. POL 317 is a student-led course that hones writing, public-speaking and researching skills of student-delegates and it represents student engagement at the highest level. Chosen through a rigorous selection process in the fall semester, the student-delegates write position papers during the winter break, and develop caucusing, team-working, and presentation skills in class during the spring semester. During the past five decades, Rider University’s MUN team has represented more than 50 countries, and competed with thousands of delegates from national and international universities. It is one of the premier engaged learning and cohort-building institutions on campus.

POL 318 Conflict Resolution 3 Credits

How do you craft a peace deal in a war-ravaged environment? Can negotiations with rogue regimes succeed and prevent the onset of conflict? With massive casualties, and unspeakable human rights abuses, conflicts continue to present a challenge to people around the globe. In this course, we will explore the dynamics of conflict management designed to keep countries from waging violence against each other. Our focus is both on ending existing violent conflicts and on preventing escalation of tensions. We will explore the impact of mediators and external interventions by international organizations or individual countries on conflict management. We will also examine the role of the International Court of Justice in resolving disputes when direct negotiations fail to succeed. Finally, we will study existing peacebuilding efforts designed to improve relations among victims and killers in post-conflict environment. Insights from theory on commitment problems will help us understand why peace is more vulnerable in domestic than in international conflicts. Throughout the semester, we will rely on various case illustrations from international and domestic conflicts, and participate in a simulation activity that will allow us to assume the roles of negotiators in disputes.

POL 319 Terrorism, Revolutions and Political Violence 3 Credits

Revolutions are the mad inspiration of history. Trotsky's characterization calls attention to three important dimensions of violent political participation: the historical settings, ideology, and emotional fervor of the practitioners. The course focuses on these dimensions by analyzing revolutionary and terrorist movements in the 20th century. Special attention is given to the use of violence in the post-Cold War new world disorder.

POL 320 Politics of the Middle East 3 Credits

The course emphasizes the relationships between social and political structures, the role of religion, and the problems of modernization in the Middle East. Similarities and contrasts will be drawn between the Arab and non-Arab countries of the Middle East. The political systems of Egypt, Syria, Israel and Saudi Arabia are examined in terms of political culture, structure, and political processes.

POL 321 International Law 3 Credits

This course covers the basic doctrines of international law and their relationship to the contemporary international community. These include the jurisprudence of international law; the history of the international legal system; customary international law; Treaty law; sovereignty, statehood and recognition; jurisdiction and immunities; the role of international organizations; international criminal responsibility; and the relationship of the international legal system to the U.S. domestic legal system. The objectives of international law are to foster the peaceful settlement of disputes; facilitate transnational communication and commerce; encourage respect for human rights; as well as to preserve the environment.

POL 322 African Politics 3 Credits

Africa is in a process of transition, a continent of growing strategic importance to the U.S. and a land with considerable variation in political and economic success. The course is an introduction to the politics of sub-Saharan Africa. To understand the continent's current challenges, the course examines the legacies of colonial rule, including colonial mark on the politics of ethnicity; focuses on the rise of authoritarianism in Africa in the 1970s and 1980s; examines the success and failure of democratization that is transforming the continent today; embarks on the quest to understand the continent's struggle with poverty and debt. Lastly, the course explores some of the biggest obstacle to Africa's stability, including state collapse, wars, corruption, while contemplating the future that lies ahead.

POL 325 Public Administration 3 Credits

Public administration in modern society, emphasizing the administrative formulation of public policy and its implementation. Attention on who gets what, when, and how from the decisions of administrative units; the role administrators have in policy-making compared to elected legislators, chief executives and judges; the effect administrators have on the benefits citizens receive from government; and the effect administrators have on citizens' behavior. Note: This course is cross-listed as HLS 325. Students may not get credit for both HLS 325 and POL 325.

POL 326 Power in American Politics 3 Credits

Examines various explanations of who has power in American politics. Explores the roles of appointed and elected officials, business and interest groups, the media, and the general public in shaping public policy. Special attention to political change, including the impact of broad social movements on the responsiveness of the political system.

POL 327 Contemporary Issues in American Public Policy 3 Credits

An in-depth examination of current issues in American politics. Drunk driving, political corruption, drug policy, education, and poverty are among the issues to be considered. Emphasis on analyzing policy problems and on developing and evaluating proposed solutions.

POL 328 Environmental Politics 3 Credits

Environmental Politics examines how policymakers deal with the political challenges of unsustainable resource consumption, which is a primary determinant of environmental problems such as climate change, adverse health effects, and biodiversity loss. The course introduces students to environmental politics and policies at the local, state, national, and international levels. The course is designed to provide students with a framework for understanding how varied interests compete within political institutions in order to transform contending ideas into public policy. With that in mind, students will not only become more informed consumers of political information, but will also become more effective at analyzing and advocating for policies as it relates to the environment.

POL 329 Comparative Environmental Policy 3 Credits

Comparative Environmental Policy analyzes cross-national approaches in developing, implementing, and evaluating policy responses to environmental problems. The course analyzes the political factors, actors, and tools that help and explain why some societies have been more likely to develop effective responses to environmental threats.

POL 330 Geopolitics of Energy 3 Credits

Geopolitics of Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

POL 331 Political Corruptions 3 Credits

This course will introduce students to one of the central political issues in the USA as well as abroad: corruption. Whereas this was considered in earlier days as 'temporary malady' of third world systems, today it is considered a pervasive phenomenon in democratic systems as well. As such it acquired widespread scholarly as well as public attention in established democracies such as the USA (at least since the elections of 2016). The course will utilize a range of approaches to examine the meaning of corruption, the link between what the law defines as corruption and what is understood by the term by broad publics, the interaction between both conceptions and system legitimacy, and the methods by which corruption may be contained.

POL 335 Urban Politics 3 Credits

Political structure and administration of municipalities in the United States. Emphasis on challenges posed by suburbanization, global and regional shifts in business, economic dislocation, housing, mass transportation, race relations, and policing.

POL 340 Modern Democracy and Its Critics 3 Credits

The course examines the fundamental assumptions underlying modern democratic theories and the main theoretical attacks launched against them. Among the contending theories to be discussed are right and left-wing anarchism, the old and the new left, fascism, intellectual elitism, and techno-conservatism.

POL 342 Contemporary Political Theory: Freedom and Authority 3 Credits

Concepts of freedom and authority in 19th and 20th-century political theory. Emphasis on such important thinkers as Nietzsche, Freud, Sartre, Camus, and Marcuse.

POL 343 American Political Thought 3 Credits

The philosophical background and moral principles of American political society: liberty, equality, natural law and natural right; constitutionalism and nation-building. The development of the ideologies of liberalism, conservatism, and libertinism are also covered.

POL 345 Ancient Political Theory: Justice 3 Credits

The existence of society over time requires high degree of predictability and hence laws, whether explicit or implicit. These derive their capacity to regulate life from the widespread notion that they are proper and that they should be obeyed. In a word, they accord to our notions of justice. These, however, are not stable. Resting on the understandings of man, society, nature and the relations between them, they develop under the impact of human thought and changing realities. The result is what can be compared to a layered cake. This course treats some of the main contributions made by philosophers from Plato to Rawls to our concept of justice and the manner by which they have shaped our concepts of justice in the US and West in general. Cases in which courts (mainly the US Supreme Court) made use and applied the thinking of earlier philosophies of justice will illustrate the process by which we adjust the boundaries between legality and criminality and determine how we should behave towards each other.

POL 346 The Politics and Ethics of Emergencies 3 Credits

This course examines historic and present day cases, ranging across Europe and the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, take on emergency powers to become so-called "states of exception." While in some cases such states have imposed mild and limited emergency measures, others have employed more draconian measures, suspending, if not dissolving, constitutionally guaranteed civil liberties, often for indeterminate and protracted periods. How various states have behaved in emergency situations will be the major content of this course. Note: This course is cross-listed as HLS 346. Students may not get credit for both HLS 346 and POL 346.

POL 350 U.S. Foreign Policy and Security Policy 3 Credits

Principles, institutions, and processes involved in the formulation and implementation of policies regarding the nation's military, economic, and environmental security within the global framework. Strands, trends, and problem areas in U.S. foreign policy, with focus on the changing global environment of the post-Cold World War. Note: This course is cross-listed as HLS 350. Students may get credit for only one.

POL 351 Critical Views of Global Security 3 Credits

This course will examine the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspective on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security. Note: This course is cross-listed as HLS 351. Students may not get credit for both HLS 351 and POL 351.

POL 361 Courts, Judges and Politics 3 Credits

In-depth examination of the nature of judicial decision-making and the impact that judicial decisions have on society. Considers the sources of judicial authority, judicial fact-finding, statutory and constitutional interpretation, individual and collective processes of judicial decision-making, relations between judges and other government officials, and the political consequences of judicial decisions with particular emphasis on federal courts and judges. Note: This course is cross-listed as HLS 361. Students may not get credit for both POL 361 and HLS 361.

POL 363 Human Rights in Global Context 3 Credits

Examines human rights – droits de l'homme, derechos humanos, Menschenrechte, "the rights of man" – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breath and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as HLS 363. Students may not get credit for both HLS 363 and POL 363.

POL 365 Politics of the Developing World 3 Credits

Studies the major political issues of the so-called "developing" world. Particular reference to political systems of Africa, Asia, Latin America, and the Middle East according to the relevance of the examples to large conceptual issues, and according to the major interests of the instructor. Typical issues include neocolonial dependency, the role of the state in newly developed countries, military rule and democratization.

POL 367 Global Immigration 3 Credits

This course analyzes mass migrations and refugee movements and what they mean for the stability of nations, the increasing potential of severe culture clashes within societies, and the root causes of (forced) migration movements, such as problems of violence, terror and genocide, as recently seen in Darfur, Rwanda and Bosnia. In certain European countries the frequently failed integration and assimilation policies resulted in an Islamic alienation; terrorist attacks and race riots are some of the consequences. Particular attention will be given to the conflict between the refugees' and migrants' needs that result from violent, socio-economic or ecological catastrophes in the countries of origin and the various forms of reception within the host countries. Students will explore theoretical, political, legal, and socio-economic dimensions of the refugee and immigration phenomena in a global world. Other themes will include international human rights and refugee laws, theories of immigration, for example, the feminization of migration, as well as problems of acculturation, assimilation and integration in different host societies.

POL 368 International Organizations 3 Credits

This course introduces students to the study of international organizations. The course examines mostly formal and governmental institutions as well as informal institutions or regimes. Topics to be covered include and are not limited to: the establishment of international organizations, evolution of international organizations, structure of international organizations, decision-making of international organizations and influence of international organizations. This course employs both theoretical and practical approaches in its examination of international organizations.

POL 371 The Arab-Israeli Conflict 3 Credits

The course will begin by introducing the main players: the neo-patrimonial Arab regimes on the one hand, and the democratic, economically modern Jewish sector in Palestine on the other. The analysis will focus on the impact of the social, economic, political and religious differences between the sides on their conception of the conflict among the participants and powers outside the region. The course will concurrently examine the impacts of the dynamics of the conflict itself, relations within Islam on the one hand and between Islam and the West on the other. The latter part of the course will consider the sources of perceptual shift that led simultaneously to the narrowing of the conflict with the withdrawal of some of its participants (most Arab states) and its widening with the addition of Al Qaeda and Iran (via Hezbollah).

POL 399 The Co-operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. IND 398 and (dept.) 399 combined cannot exceed 15 credits. Pass/fail. Prerequisite(s): junior standing and 2.75 GPA at the time of registration.

Corequisite(s): IND 398 The Co-operative Experience Seminar.

POL 415 Political Internship 3-6 Credits**POL 450 Seminar in Political Science 3 Credits**

A multidimensional framework within which to integrate the variety of perspectives and methodologies extant in the field of political science. Topics for discussion and analysis may range from broad concepts of political discourse such as power and interdependence to specific political issues such as executive-legislative relations and judicial policymaking.

POL 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

POL 491 Internship in Political Science 1-4 Credits

Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of fieldwork per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.

Prerequisite(s): permission of instructor.

POL 499 Senior Honors Thesis 3-6 Credits

Majors having completed the department's core requirements and having a minimum GPA of 3.5 in political science courses may apply for honors in their sixth semester. Applicants enroll in POL 490 Independent Research and Study in their seventh semester to develop and submit a thesis proposal to the department. With departmental approval, applicants prepare an honors thesis in their last semester. Upon acceptance of the thesis by the department, the student will be graduated with honors in political science.

Psychology (PSY)

Courses and Descriptions

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 102 Explorations in Psychology Honors 3 Credits

The course introduces the history of psychology, and demonstrates how the discipline is a science. It provides students with experience exploring the mind, behavior, and the relationship between the two, from multiple perspectives, including biological, behavioral, cognitive, developmental, humanistic, social, and abnormal. It tackles questions including (but not limited to) how different areas of the brain are involved in behavior and are affected by injury, how humans sense and perceive the world, how states of consciousness differ from one another, how humans learn, remember, communicate, and develop, what motivates humans to behave in particular ways, how social groups affect behavior and decision-making, and what happens when behavior and emotions deviate from what is typical.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 110 Psychology: The Science of Well-being 3 Credits

This course is an overview of the science of psychology applied to the question of how to build well-being. The framework for PSY 110 mirrors Introduction to Psychology in its presentation of the major perspectives in psychology – Research Methods, Behaviorism, Cognition, Development, Social Behavior, Motivation and Mental Health. Topics in PSY 110 include: Perspectives in Psychology, Research Methods, Relationships, Social Behavior, Developmental Psychology, Behavior and Cognition, Motivation, Self & Identity, Positive Psychology, Optimism.

PSY 117 Psychology of Creativity 3 Credits

Is creativity reserved only for geniuses, or can ordinary individuals also be creative? Is it domain-specific or domain-general? How do we measure it? What is the connection between creativity and innovation? Can you and I become more creative, and if so, what factors influence creative thinking? This course surveys the modern theories of creativity and problem solving from a psychological perspective, and their applications to real-world challenges. Specific topics will focus on convergent and divergent thinking, the role of constraints, change, and motivation in creativity, social and personality factors, techniques such as brainstorming, design thinking, and creative problem solving, and innovation in organizations. You will apply what you have learned in hands-on activities that challenge you to propose creative solutions to real-world problems.

PSY 118 Psychology of Women 3 Credits

Examines the psychological development of women in our culture from birth to maturity, with an emphasis on the interaction of biological and social influences on personality, social behavior, and achievement of women. Investigates psychological sex differences in terms of current measurement approaches. Readings and text are drawn from psychological theory and research.

PSY 131 The Science of Mental Illness 3 Credits

This course introduces students to the separate and interactive effects of the person and the nervous system in the etiology and treatment of mental illness. Effectively, students receive in-depth exposure to research methods, the process of making and evaluating evidence based claims, classic and clinical applications of learning theory, the development of personality and the role of personality theories in the major systems of psychotherapy, the role of the central and peripheral nervous systems in behavior and mental illness, selected major DSM-5 categories of mental illness (stress, anxiety, depression, schizophrenia, and neurocognitive disorders), the major systems of psychotherapy, and the classifications and neural bases of pharmacological treatments for mental illness.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 210 Organizational Psychology 3 Credits

Focuses on issues related to human behavior in work settings. Topics include personnel issues such as hiring and promotion decisions, performance appraisals, and methods of on-the-job training. Issues of job satisfaction, motivation, productivity, and effective leadership styles are also examined. Finally, organizational structure as it relates to communication within organizations will be examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 212 Introduction to Applied Behavior Analysis 3 Credits

Presents a review of classical and operant conditioning, data collection and research design, data analysis and interpretation. In addition, assessment and treatment strategies in a variety of settings, contingency management in institution, classroom and home, systematic self-desensitization, and ethical consideration are discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 226 Cognitive Psychology 3 Credits

The study of the mind has been the focus of psychology since its inception in the 19th century. Today, the majority of psychological research focuses on the cognitive system and its biological basis. This course will provide an overview of knowledge regarding the components of the human cognitive system (e.g., attention, memory, executive processes) and how they form the basis for higher-order cognitive skills (e.g., language and decision making). The course will provide a history of the field and the methodologies that have been and are currently being used to study the human mind. Each section of the course will include an overview of basic and applied research to demonstrate how knowledge of the cognitive system can be used to enhance human functioning in applied settings and better understand human limitations and tendencies to commit certain types of errors.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 230 Child Development 3 Credits

Presents theory and research on the social, emotional and cognitive development of children birth to age 12.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 231 Youth and Adolescent Development 3 Credits

Presents theories, research and problems concerning development in youth and adolescence.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 237 Cognitive Disabilities 3 Credits

Investigates various types of intellectual differences, focusing on etiology, methods of diagnosis, programs and services available to individuals and families. Considers problems relating to adjustment in academic, social, and vocational areas.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 238 Sensation and Perception 3 Credits

The facts and theories of sensation and perception, their role in the total psychology of the individual, and current application are examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 245 Stress, Health and Coping 3 Credits

This course will examine physical and psychological effects of stress including a discussion of the nervous system, and the various models of the stress/illness relationship such as General Adaptation, Cognitive Appraisal and Diathesis-Stress. Various ways of coping with/responding to stress will be considered along with the influence of personality and sociodemographic factors on differences in both the experience of stress and on coping mechanisms will be considered. Finally, this course will consider issues in the measurement of stress and coping as well as some of the noteworthy findings and methodological aspects of stress research.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 250 Psychology of Aging 3 Credits

This survey course focuses on basic psychological issues in the aging process and in the elderly. It examines myths and stereotypes about aging and the elderly by way of research evidence pertaining to physical, psychological, and social changes accompanying aging.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 255 Biopsychology 3 Credits

Basic biological structures and processes underlying behavior, including general neuroanatomy and neurophysiology; sensory physiology; structure and function of the motor systems; physiology of emotions, motivation, learning, memory; brain dysfunction; psychoactive drugs.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 283 Sport Psychology 3 Credits

This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 292 Professional Development in Psychology 3 Credits

This course is designed to help students understand the connections between the required curriculum in psychology and their professional and post-graduation goals. Through this required course all psychology majors will have the opportunity to recognize and use the many applications of psychology to their plans for career development and employment. Students will articulate individual goals beyond graduation, understand the individual characteristics that predict success in the work environment, recognize and apply selected research in psychology to their goals and the world of employment. The course will better prepare students to articulate post-graduation goals early in their education, and apply those goals to the following years of their education. PSY major/minor students only.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131.

PSY 295 Directed Study in Psychology 1-4 Credits

Provides an opportunity for students to obtain research experiences in psychology. Consists of a combination of project meetings, assigned readings and supervised research. Each student will work with a selected faculty member on a topic of mutual interest. Projects may include learning some components of research methods and applying these techniques to the collection and analysis of data. Provides focused reading and discussion as it relates to each student's research topic.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 or permission of instructor and chair.

PSY 299 Field Placement in Applied Behavior Analysis 1 Credits

The practicum provides hands-on experience using the tools of applied behavior analysis in a field setting. Provides supervised field placement experience in an approved institution or agency in order for students to gain knowledge in applications of applied behavior analysis. Placement is made in various community institutions and agencies that offer services to diverse populations.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131, and PSY 212.

PSY 302 Research Methods: Cognition 4 Credits

Provides students with an in-depth coverage of the expanding field of cognition and memory. Addresses issues and research within the field. Emphasis is on current views of human memory. Students learn how to design and conduct their own experiments from the topic areas of information processing, psycholinguistics, problem solving, learning and memory, social cognition, and cognitive neuroscience. Laboratory skills include programming computers, developing multimedia stimuli, recording psycho-physiological data, and composing an APA-format research report in a network-based writing lab. **Prerequisite(s):** (PSY 100 or PSY102 or PSY110 or PSY131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 302L.

PSY 302L Research Methods: Cognition Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Prerequisite(s):** (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201.

Corequisite(s): PSY 302.

PSY 303 Research Methods: Social Psychology 4 Credits

Covers research methodology within the context of social psychology (i.e., topics include altruism, aggression, attraction and social perception). Both experimental and descriptive methodologies will be covered. Students learn about various aspects of the research process (e.g., design and execution of a social psychological study, analyzing and interpreting the results). Students also learn to integrate their research findings to produce an APA-style paper. Students use computer-based word processing and statistical analysis packages to achieve these goals. **Prerequisite(s):** (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 303L.

PSY 303L Research Methods: Social Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Prerequisites(s):** (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201.

Corequisites: PSY 303.

PSY 305 Theories of Psychotherapy 3 Credits

An exploration of the history and theory of the psychoanalytic, behavioral, and humanistic approaches to psychotherapy. Comparisons and contrasts between these therapeutic modalities are discussed, as well as the theory underlying specific therapeutic techniques such as dynamic interpretations, dream analysis, the analysis of resistance and transference, counter-conditioning, modeling, and cognitive restructuring. Class exercises in addition to transcripts and tape recordings from therapy sessions are used to illustrate the various therapeutic approaches.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY131) and 45 credits.

PSY 306 Research Methods: Sensation & Perception 4 Credits

Provides instruction in research design, research methods, and integration of data analysis and methodology within the content framework of sensation and perception. All the general psychology research methods are taught. Special emphasis is given to the study of human vision and audition. Students design, conduct, and report laboratory research in the areas of sensation and perception. The computer-based components of the laboratory include lessons on interactive software instrumentation for research, and network-based technical writing using APA format. Projects are conducted during the term. Each student uses a dedicated networked Macintosh computer to: a) develop and generate research stimuli and procedures, b) analyze and report research data, and c) write formal research reports. **Prerequisite(s):** (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 306L.

PSY 306L Sensation & Perception Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Prerequisite(s):** (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 306.

PSY 310 Introductory Counseling Skills 3 Credits

This course examines theory and research related to the therapy process and outcome. Students will practice foundational counseling skills with one another within a culturally-sensitive framework, including active listening, reflections of feelings, open questions, interpretations, self-disclosures, and challenges. Through experiential learning activities, students will develop a working knowledge of when and how to implement counseling skills. Students should be willing to talk about personal issues in this class.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 324 Play and Imagination 3 Credits

This course surveys two of the most important manifestations of children's imagination: pretend play and imaginary companions. It will discuss the evolution of play, the purpose of play, the role of play in the development of creativity, and individual differences in play (e.g., among children of different gender, cultures, and ability levels). Finally, it will discuss the application of play to therapeutic methods for children.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 325 Cognitive Development 3 Credits

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers the general areas of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201 or MSD 205.

PSY 330 Developmental Disabilities 3 Credits

Introduces students to the genetic, biological, sensory-motor, cognitive, and social-emotional foundations of developmental disabilities. Selected syndromes will be reviewed in-depth, as will treatments and intervention at the individual and family levels.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 333 Autism Spectrum Disorder 3 Credits

Provides students with a general understanding of the etiology, neurocognitive underpinnings, and general characteristics of the autism spectrum disorders. The course will examine the history of the study of these disorders, the main problems associated with these conditions, and will explore psycho-educational treatment alternatives.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 334 Disabilities Across Cultures 3 Credits

The course is designed around the question of how a culture defines the concept of "Disabilities", how societies perceive individuals with disabilities, and how historical, social and political circumstances might shape an individual's understanding of diversity. The course encourages critical thinking and a comparative analysis of cultural differences and psychological practices. Key challenges associated with diagnosis, intervention and integration of individuals with disabilities across the globe will be discussed. This course fulfills the College of Liberal Arts and Sciences Essential Competencies Requirement: Global Perspectives.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 335 Research Methods: Human Cognitive Neuroscience 4 Credits

Covers the interdisciplinary study of the nervous system integrating neurobiology, physiology, pharmacology, and psychology as explanations for both normal and pathological human behavior. Topics integrate molecular levels of analysis, such as neuron structure and function, neurotransmitters, action potentials, and receptors, with molar levels, such as sensory and hormonal processes, learning and memory, emotions, drug use, and biological rhythms. Introduces research techniques used to study the function of the nervous system and the neural bases of behavior in humans. Neuroanatomical, electrophysiological, pharmacological, and neuropsychological assessment techniques may be explored as part of laboratory or field research projects designed in collaboration with the instructor. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201

Corequisite(s): PSY 335L.

PSY 335L Research Methods: Human Cognitive Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201

Corequisite(s): PSY 335.

PSY 336 Research Methods: Animal Learning & Behavior 4 Credits

Provides a comprehensive overview of the acquisition and modification of the behavior of animals, especially on laboratory strains of rodents and pigeons. Core topics include respondent and operant conditioning, animal cognition, observational learning, animal safety and welfare, single-subject and between-groups approaches to methodology, and the statistical analysis of the results of studies of behavior. The laboratory component of the course provides a comprehensive overview of animal handling and maintenance, animal welfare, and the recording of experimental results. Two substantial projects are undertaken; demonstration of a conditioned taste aversion and its effect upon the acquisition and extinction of an operant (bar press) response and subsequent discrimination and reversal learning. Results of both projects are written into APA-formatted reports. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 336L.

PSY 336L Animal Learning and Behavior Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (Psy100 or Psy102 or Psy110 or Psy131) and 30 credits and a minimum grade of "C" in Psy201

Corequisite(s): PSY 336.

PSY 339 Research Methods in Applied Behavior Analysis 4 Credits

This upper-level laboratory course will provide students with an in-depth study of the principles and applications of Applied Behavior Analysis. Students will examine behavioral principles, ethical considerations, and real-life applications of ABA. Each student will design and implement a self-management plan to alter the behavior of their choosing.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and PSY 212 and a minimum grade of "C" in PSY 201 .

Corequisite(s): PSY 339L.

PSY 339L Research Methods in ABA Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and PSY 212 and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 339.

PSY 340 Research Methods: Group Dynamics 4 Credits

Focuses on selected issues pertaining to group dynamics. Emphasizes an understanding of the personality and social factors that influence the functioning of unstructured and task-oriented groups.

Students participate in a task group for the purpose of conducting a comprehensive research project on selected issues in group dynamics and the psychology of groups. The task group prepares an APA-style paper describing their research as well as an in-class presentation. Each student also submits a midterm and final written analysis of the interactional processes and development of the task group.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 340L.

PSY 340L Group Dynamics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 340.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health-enhancing behaviors such as exercise and nutrition, as well as health-compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 349 Research Methods - Health Psychology 4 Credits

This course examines the methods used by health psychologists to study the relationships between behavior, health, and illness, including the standard methodologies of description, observation, correlation, quasi-experimental and experimental, as well as some of the methods within the field of epidemiology including cohort, case-control, and cross-sectional studies. Students will design and conduct an empirical investigation on a health and illness-related research question.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisites: PSY 349L.

PSY 349L Research Methods in Health Psychology Lab 0 Credits

This is the lab accompanying PSY 349. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisites: PSY 349.

PSY 350 Research Methods: Developmental Psychology 4 Credits

Focuses on one or more research areas in cognitive, personality, or social development. Includes an overview of major theoretical approaches to age-related change. Students review original research on selected aspects of behavioral change. The laboratory component of the course presents an overview of developmental research designs and methods focusing on the measurement of age-related changes in psychological functioning.

Students conduct field research projects designed in collaboration with the instructor and prepare an APA-style research report. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 350L.

PSY 350L Developmental Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 30 credits and a minimum grade of "C" in PSY 201.

Corequisite(s): PSY 350.

PSY 360 Psychology of Peace & Conflict 3 Credits

This course examines issues related to peace, conflict, violence, and conflict resolution. Theories and strategies that suggest ways of reducing and eliminating conflict are discussed. Psychological and social causes and consequences of violence and nonviolence are considered.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 367 Creativity and Innovation 3 Credits

What is creativity, and how do we measure, study, and enhance it? This course will survey the modern theories of creativity from a psychological perspective, with an emphasis on the processes that underlie creative thinking and the variables that influence creative idea generation.

Specific topics will include: convergent and divergent thinking, the role of the unconscious in creative ideation, flow and mindfulness, individual and group creativity, techniques such as brainstorming and creative problem solving, the neuroscience of creativity, the role of motivation, and creativity and innovation in organizations. Discussions of theoretical findings will be complemented by in-class activities and assignments that highlight applications to day-to-day living and to larger-scale challenges that require creativity and innovation.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 372 States of Consciousness 3 Credits

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 373 Cyberpsychology 3 Credits

Cyberpsychology is the study of how emerging computer technologies, especially social media, affect the way people think, feel, and behave both online and in the face-to-face world. This course explores a wide range of topics concerning this rapidly developing field of psychology, including how individuals, interpersonal relationships, and groups function in cyberspace with both positive and negative consequences for mental health. It emphasizes an understanding of the basic concepts of cyberpsychology along with the implications of this knowledge for improving wellbeing in the digital age.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the variety of ways family impacts development across the lifespan.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 375 Psychology and Film 3 Credits

Attitudes, perceptions and memories are shaped by motion pictures. Filmmakers create enduring images by using cinematic techniques to portray social and interpersonal themes. This course will examine various cinematic techniques as well as how film portrays interpersonal relations, gender roles, race relations, mental illness, The Holocaust, and other genocides.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 377 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY131) and 45 credits.

PSY 379 Psychology and Law 3 Credits

Introduces students to a study of selected topics in psychology and law. Topics include eyewitness testimony, jury selection, and decision-making.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 381 Psychology of Gender 3 Credits

This course examines the meaning of sex and gender in modern society. The course readings and discussion will review and analyze the influence of gender on human behavior and emotions. The course will examine the significance of gender in shaping experience. Topics will include: gender differences in behavior, gender role development, gender and sexual identity, gender and social roles, cross-cultural perspectives on gender and transcending gender.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 383 Psychology and Culture 3 Credits

Students enrolled in this course will critically examine the intersection of culture and psychology. Topics covered include cultural influences on: identity, the perceptions and manifestations of mental illness, and treatment-seeking.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 384 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 384 is cross-listed with PSY 584.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 385 Death, Dying and Suicide 3 Credits

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 386 Introduction to Child Life: Working with Children and Families in Healthcare Settings 3 Credits

The course provides the student with an introduction to the practice of Child Life in healthcare settings, serving as an educational foundation for those interested in pursuing a Child Life internship or other career working with children and families in a healthcare setting. Child Life programs seek to promote optimum development of children, adolescents, and families within a healthcare setting by helping to maintain normal living patterns and minimizing psychological trauma. Various theoretical positions related to the field (including but not limited to child development, play, stress, illness, trauma, and bereavement) will be described and their implications discussed. Classroom activities and assignments will help to develop relevant clinical skills including therapeutic play techniques, procedural preparation and support, coping strategies, child assessment, promoting advocacy/family-centered care, and health education. Official documents created by the Child Life Council, the certifying body for the field, will be reviewed, in addition to other seminal Child Life publications. The necessity for evidence-based practice will be discussed and relevant empirical studies will be presented (including those conducted in analogous academic fields such as developmental pediatrics and behavioral medicine).

Prerequisite: PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 388 Learning and the Experimental Analysis of Behavior 3 Credits

Students will review principles of behavior covered in PSY 212 Intro to ABA (or PSY 225 Learning Theory) and move into more complex concepts and principles of behavior analysis including respondent behavior, respondent conditioning, motivating operations, schedules of reinforcement, and verbal operants. Students will also learn elements of behavior change and specific behavior-change procedures including verbal behavior training, discrete trial training, interventions based on motivating operations and discriminative stimuli, and stimulus equivalence procedures.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 389 Professional Issues in ABA 3 Credits

This course will provide students interested in working in the field of applied behavior analysis at the bachelor's level content based on the task list of the Behavior Analyst Certification Board (BACB) The course covers ethical and professional considerations relevant to the profession of applied behavior analysis as well as ethical and disciplinary standards of the profession. In addition, the course covers behavioral assessment and intervention, competency-based training, and evaluating the effectiveness of behavioral programs. Students will also have the opportunity to read seminal and current research literature on the topics.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 395 Special Topics in Psychology 3 Credits

This course examines contemporary issues in psychology, with the particular topic varying each time it is offered. New directions in the field and/or current controversies will be the focus. Past offerings include Positive Psychology, Creativity, and Brain Games.

Prerequisite(s):)PSY 100 or PSY 102 or PSY 110 or PSY 131) and 45 credits.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion, and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional-quality writing, oral or multimedia presentations.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 75 credits.

PSY 420 History of Psychology 3 Credits

Provides a coverage of systems and schools of psychology; great psychologists, their contributions, and later influence in psychology. Current psychological problems are also discussed.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and 75 credits.

PSY 450 Advanced Research Methods in Clinical Psychology 4 Credits

This advanced research methods lecture and lab provides a capstone experience in measurement, assessment, research methods, and data analysis within clinical psychology. The focus of the course will be on using research tools to answer practical questions about psychopathology (e.g., what is an extreme score on a depression scale?) and treatment effectiveness (are there improvements in anxiety scores based on participation in a program?). Content will also emphasize the importance of recruiting diverse samples and assessment of individuals of diverse cultural and social backgrounds. Regarding research methods, students will examine various research designs and how design decisions impact data analysis and interpretation. Students will work in teams to conduct a study in which they apply their learning to develop a series of hypotheses, collect and analyze data, and ultimately present their findings in APA format. This course is designed to build on students' understanding of research methods in prior courses and can help prepare students for graduate school with a counseling, clinical, or social work focus.

Prerequisites: PSY 201 with a minimum grade of B, PSY 3xx/3xxL with a minimum grade of B, and Earned Credits: 75.

PSY 450L Advanced Research Methods in Clinical Psychology Lab 0 Credits

This course is a co-requisite for the corresponding course.

Prerequisite(s): PSY 201 with a minimum grade of B, PSY 3xx/3xxL with a minimum grade of B, and Earned Credits: 75.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): (PSY 100 or PSY 102 or PSY 110 or PSY 131) and PSY 201 and 75 credits.

PSY 491 Internship in Psychology 1-4 Credits

Provides supervised work experience in an approved institution or agency in order for students to gain knowledge in applications of psychology.

Placement is made in various community institutions and agencies that offer services to both exceptional and normal individuals. Prerequisite(s): senior psychology majors or minors.

Prerequisite(s): (PSY 100 or PSY 102 or PSY110 or PSY 131) and 75 credits.

Religion & Philosophy (RP)**RP 265 Lit of New Testament 3 Credits**

An introduction to the thought of the early Christian church as expressed in the New Testament, this course will emphasize a literary and historical reading of the Gospels and Epistles. It will introduce students to the Jewish and Greco-Roman religious, political and cultural worlds in which Jesus and his disciples lived and within which earliest Christianity arose.

RP 268 Hebrew Bible & Old Testament 3 Credits

This course introduces students to the writings of the Hebrew Bible/Old Testament within their historical and literary contexts. By critically reading these books, students will become aware of the history, culture and religion of ancient Israel - all of which contributed to the traditions of Judaism and Christianity.

Sacred Music (SM)**SM 121 Survey of Sacred Music Lit 3 Credits**

Broad survey of Christian music. Through standard repertoire, major historical genres of sacred music are explored from biblical roots in the Old and New Testament to the postmodern expressions of our time.

SM 122 Worship and Theology 3 Credits

A study of the content, theology, and history of the Old and New Testament narratives that the church recounts and celebrates in its liturgical year.

SM 142 Intro to Music Ministry 2 Credits

An introduction to the vocational needs, professional relationships, administration styles and teaching roles of the church musician. In addition to an overview of professional standards, emphasis will also be placed on music engraving skills, budgeting, recruitment, endowments and fundraising.

SM 158 Intro Handbell Leadership 1 Credits

A hands-on course providing a strong foundation for the beginning director/ringer. It will include information about ringing instruments, maintenance, ringing and damping techniques, articulations, part assignments, a survey of handbell literature, and rehearsal planning and directing.

SM 250 Contemporary Worship 2 Credits

This course is an exploration of the various forms of worship being practiced in urban churches across America. Practical and skill-based, it is designed to allow the student to explore praise and worship music, different styles of gospel, and other forms of music used in non-traditional worship.

SM 340 Church Field Education 1 Credits

A practical program in which students take responsibility for the music program of an assigned affiliate church. Under supervision, students exercise the skills and concepts learned in the classroom. Enrolled students also meet in a weekly preceptorial. Sacred Music majors must take two consecutive semesters, normally in the junior year.

Prerequisite(s): SM 121, SM 122.

SM 354 Hymnody & Psalmody 3 Credits

A study of the origins and development of Christian song. The first part of the course deals with the nature of the Psalms in their Biblical setting and their use in the worship of different traditions. The second part of the course deals with the history of congregational hymnody - texts, tunes, styles and functions - from the 16th century to the present. The course aims to develop an awareness of the textual and musical treasures available for both congregational and choral use.

SM 360 History of American CM 3 Credits

A broad survey of American church music beginning with colonial psalm-singing and continuing through four centuries of musical development leading up to and including the vast panorama musical practices found in post-modern Christianity. A special emphasis will be placed on the development and influence of African-American church music on contemporary musical practices. Prerequisite(s): SM 121.

SM 365 Sacred Sounds 2 Credits

A study of the origins and development of Christian song. The first section of the course deals with the nature of the psalms and their use in the worship of different traditions. The second section of the course will be a survey of congregational hymnody – texts, tunes, styles and functions – from the 16th century to the present. The course aims to develop a context for the discussion congregational song as it might be practiced in the 21st century, the final part of the class.

SM 410 African Amer Choral Lit 3 Credits

This course is designed to give students a better understanding of the choral literature, historical context and text analysis of African American composers.

SM 454 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 455. Offered in rotation with other Sacred Music electives.

SM 455 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas. Complements SM 454. Offered in rotation with other Sacred Music electives.

SM 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 is required.

Prerequisite(s): junior or senior standing.

SM 491 SM Internship 1 Credits

A practical program in which students take responsibility for the music program of a local church or work as an intern in an assigned affiliate church. Under faculty supervision, students exercise the skills and concepts learned in the classroom. Enrolled students also meet in a weekly preceptorial. Sacred music majors must take two consecutive semesters, normally in the junior year.

Prerequisite(s): CR 215.

Secondary Education (SED)

Courses and Descriptions

SED 370 Teaching in the High School 3 Credits

This field-based course focuses on general pedagogy in grades nine through 12. Emphasis will be on generic teaching approaches, planning lessons and developing units of study, learning styles, issues and techniques of evaluation, and multiculturalism. Working in local high schools, students continue observing and begin teaching lessons in their subject area specialization. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 400 Teaching English Language Arts in the Secondary School 3 Credits

Students preparing to teach English in middle schools and senior high schools explore strategies for the imaginative teaching of literature, poetry, drama, grammar, composing processes, vocabulary, and oral language use. Students research, develop, and critique thematic units, analyze curriculum, and study the selection, development, and use of a wide variety of teaching materials. Traditional and alternative methods of assessment are explored. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 405 Teaching Social Studies in Secondary Schools 3 Credits

The theoretical foundations of teaching social studies in junior and senior high schools. Basic goals and aims of social studies instruction are studied, and specific methodological techniques are described and practiced. Demonstration lessons are prepared and presented. Considers typical problems with which teachers are confronted. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 410 Teaching Science in Secondary Schools 3 Credits

Classroom interaction analysis systems are utilized in the study of the teaching-learning process. Students develop their own repertoire of teaching strategies. Emphasis on the investigation and interpretation of recent curriculum developments, and the use of the laboratory in science instruction. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 415 Teaching Mathematics in Secondary Schools 3 Credits

The critical analysis of the aims of teaching mathematics in the secondary school; review of recent research in the content and teaching of mathematics by individuals and groups; demonstration lessons (reflective teaching) to illustrate techniques of teaching; the planning of lessons; selection and organization of materials and subject matter; and evaluation of lesson presentation. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 431 Content Area Reading and Writing 3 Credits

Explores theoretical and methodological issues concerned with teaching reading and writing within content area classes. Students analyze junior high and high school textbooks and other reading materials, study methods of adjusting instruction to varying reading and writing needs of students, prepare directed reading activities in their specific content areas, and use informal diagnostic reading tools. Included is the preparation of content area writing assignments and the evaluation of student writing as well as the teaching of study skills? Emphasis throughout is on the integration of reading and writing into secondary school subject classes. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 490 Independent Research and Study 1-6 Credits

The outline for study must be accepted by the professor and approved by the department. The semester hours credit to be assigned is determined by the department.

Social & Physical Science (SP)

SP 171 Western Civ I 3 Credits

This survey history course presents a cohesive picture of the development of Western societies from prehistoric times to the early Renaissance. Social, political and economic aspects are covered; intellectual and cultural developments are emphasized. Familiarity with primary sources and critical reading are integral to the course.

SP 172 Western Civ II 3 Credits

Continuation of SP171. This survey history course covers developments in Western societies from the Renaissance to the present. Major intellectual and cultural trends and movements are presented, along with historical progress and socio-economic expansion.

SP 273 Developmental Psychology 3 Credits

The physical and psychological growth of the individual from infancy through adolescence is studied, with emphasis on cognitive, emotional, and social processes.

Prerequisite(s): SP 175.

SP 274 Educational Psychology 3 Credits

The psychological foundations of education, based on the findings of experimental research in learning, transfer, motivation, reinforcement, and behavioral modification.

Prerequisite(s): PSY 100.

SP 286 Life in Middle Ages 3 Credits

A seminar in which the life styles of medieval Europeans are studied. Students will develop an understanding of particular social organizations and problems of the period by examining the conditions and events of everyday medieval life. Offered in rotation with other History courses.

SP 408 Voice Science 3 Credits

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

Corequisite(s): CR 509.

Social Studies Topics (SST)**Courses and Descriptions****SST 300 Historical & Contemporary Issues in the Social Studies 3 Credits**

This course is designed to provide education and non-education majors a comprehensive introduction to, and understanding of, social studies knowledge. This knowledge covers a broad array of academic disciplines, including American/World History, Government and Politics, Geography, Economics, and the various behavioral sciences. The course is aimed at engendering a theoretical grasp of the essential elements of these disciplines, as well as a practical understanding of how the content areas exist in both human society and contemporary policies/issues.

Social Work (SOW)**Courses and Descriptions****SOW 200 Social Services & Social Work 3 Credits**

An overview of the historical development of social work. Emphasis on current issues in social welfare and social service programs in the United States. Among the programs explored are those in public welfare, mental health, medical services, child abuse/neglect, school social work, and care for the elderly.

SOW 300 Methods Social Work Practice 3 Credits

Interviewing techniques are taught and practiced. Skills in forming and running small groups, working with community organizations, and administering social programs are emphasized. Students study how to gather pertinent psycho-social facts about clients, make an assessment, plan an intervention, and successfully complete service to the client. Students who next will take SOW 301 Field Work Experience will be placed in a social service agency by the end of the semester.

Prerequisite(s): SOW 200.

SOW 301 Field Work Experience 3 Credits

Students observe and work in a social service agency. They study the structure of the agency and the people and roles within it, and develop helping skills with clients. Approximately six to eight hours of field work a week for each three credits are required, plus class sessions during the semester.

Prerequisite(s): SOW 200, SOW 300. May be taken twice in two separate semesters for a maximum of six credits toward the total credits required for graduation.

Sociology & Criminology (SOC)**Courses and Descriptions****SOC 101 Sociological Imagination 3 Credits**

Introduction to principles and concepts for the sociological analysis of human societies. Social relations, social structure, and institutions characteristic of societies past and present are examined, and causes and directions of social change are considered. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

SOC 110 Cultural Anthropology 3 Credits

The anthropological perspective is introduced, placing human behavior and institutions within their evolutionary, ecological, structural, and ideological contexts. Examples are drawn from the full range of human societies, with an emphasis on nonindustrial forms.

SOC 119 Introduction to Criminal Justice: Police, Courts, Corrections 3 Credits

This course introduces students to the sociological study of the criminal justice system. It examines the cultural and social foundations of this system, and review debates about problems with the criminal justice system and proposals to change it. Topics covered include nature of the crime problem, requirements of criminal law, policing, the role of the courts and legal professionals, sentencing, incarceration and alternatives to it.

Prerequisite(s): SOC 101.

SOC 142 The Legal & Policy Dimensions of Cannabis 1.5 Credits

In this course, you will learn about drug policy in the United States through the lens of cannabis. Theoretical and empirical arguments for, and consequences of, prohibition, and legalization will be considered with special attention to race, class, and gender. Opportunities and challenges springing from recent legal reforms and a rapidly expanding legal industry will be considered using a variety of cultural, legal, and academic sources.

SOC 143 From Plant to Profession: Practical Skills & Applications 1.5 Credits

Put your new cannabis knowledge to use in real world settings! In this final skills-based course of Rider's Cannabis Studies certificate, you will expand on the initial knowledge you've obtained through completing Rider's foundational courses in business, biology, and the law. You will learn directly from key experts in the field, whose knowledge about key trends in the cannabis industry will prepare you to explore unmatched opportunities to enter the rapidly expanding cannabis industry. Content will expose students to cannabis horticulture, science, clinical practice, and legal compliance to prepare them to enter into a variety of cannabis industry positions.

Prerequisite(s): SOC 142, BIO 102, and BUS 150.

SOC 150 Introduction to Forensics 3 Credits

Introduces students to principles of forensic science. Whether the issue is establishing paternity or cause of death, determining arson or liability, or deciding criminal guilt or innocence, collecting and evaluating forensic material is typically involved. Students will learn the meaning and significance of scientific evidence and its role in criminal investigations and civil and criminal trials. Students will learn how forensic scientists work, define a problem, collect data, and analyze results. Case studies, crime simulations and examination of criminal evidence will highlight the application of scientific principles.

SOC 201 Intro Seminar in Sociology 3 Credits

Designed for students considering a major or minor in sociology. The seminar locates sociology in relation to other disciplines; reviews the basic perspectives used by sociologists to study human behavior; and considers the methods and applications of sociological inquiry.

Prerequisite(s): SOC 101.

SOC 204 Law, Literature, and Film in America 3 Credits

Focuses in an interdisciplinary manner on law and justice as represented in American literature and films. It analyzes novels, short stories, and selected non-fiction texts from the perspectives of literary criticism, social history, and cultural and American studies.

SOC 205 Families 3 Credits

Examines families in the United States, past and present, emphasizing the variety of family experiences in different social contexts and the relationship between family life and social change. Includes comparative material on families in other countries and considers possible alternatives to current family forms.

Prerequisite(s): SOC 101.

SOC 206 Deviance and Crime 3 Credits

Considers deviant behavior as violation of social norms. Examines the concepts of deviance and crime in socio-historical context. Evaluates major theories advanced to explain deviance. Surveys different types of deviance, including conventional crime, non-criminal deviant behavior, and white-collar corporate, and government crime.

Prerequisite(s): SOC 101.

SOC 207 Racial and Ethnic Relations 3 Credits

Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

Prerequisite(s): SOC 101.

SOC 210 Criminal Investigation 3 Credits

Approaches criminal investigation conceptually. Students consider the social issues involved in criminal investigation, as well as ethical and legal aspects of it. The course covers such topics such as the principles of criminal investigations, the rules and procedures of preliminary and follow-up investigations, the art of interrogation, recording of statements, confessions, and the collection and preservation of physical evidence at the crime scene. Emphasis is placed on the need for meticulous adherence to rules of law and ethical practices, as an investigation proceeds from initial actions to arrest, and eventual prosecution. The course also examines the methods used in scientific interpretation of evidence and the preparation of criminal cases for trials, as well as its role in today's criminal justice system.

Prerequisite(s): SOC 150.

SOC 211 Social Movements 3 Credits

This course examines social movements that seek change in the social, cultural and political structures of society. The social, economic and political contexts of these movements are treated as well as their origins, tactics, organization, recruitment, and successes and failures. Case studies focus on movements in the areas of labor, civil rights, feminism, the environment, "right wing politics", and neighborhood activism.

Prerequisite(s): SOC 101.

SOC 216 Youth and Crime 3 Credits

In-depth examination of the nature and extent of youth criminality in the U.S. Explores changes in youth culture and theories of delinquency. Social policies are related to youth criminality and the youth justice system is considered.

Prerequisite(s): SOC 101.

SOC 225 Population Study 3 Credits

Demography; its definition, historical emergence, and growth; population as a social problem in developing and developed nations; population theories, sources and methods of demographic data, population composition, and distribution; demographic processes including fertility, mortality, and migration.

Prerequisite(s): SOC 101.

SOC 230 Foundations of Civic Engagement 3 Credits

This course is an introduction to civic engagement: its meanings, opportunities and limitations. Students will learn about the different opportunities for civic engagement in the community as well as the theories and skills associated with it. Students will learn the role of formal and informal institutions in community engagement and will identify a specific organization for in depth investigation.

Prerequisite(s): SOC 101.

SOC 245 Social Problems 3 Credits

American social, economic, and political institutions and their interrelationships are analyzed, with an emphasis on the causes, directions, and consequences of social change in American society.

Prerequisite(s): SOC 101.

SOC 246 Drugs, Crime & American Society 3 Credits

Explores the nature and extent of drug use in the U.S., how drugs are legally defined and socially constructed, and considers how and why drug policies have developed and changed historically. Considers how the criminalization of drugs has impacted policing strategies, courts, probation programs, sentencing and corrections, as well as other social institutions. Examines the role of local and federal agencies in enforcing drug laws, and considers debates about directions for legal reforms.

Prerequisite(s): SOC 101.

SOC 247 Aging 3 Credits

The emergence of social gerontology, demographic foundation of aging, the aging process, comparative study of aging and aged, effect of aging on the individual, social institutions and aging, and problems of aging and some solutions.

Prerequisite(s): SOC 101.

SOC 248 Social Service Organizations 3 Credits

Examines the growth and variety of social service organizations. The training of providers, such as teachers and physicians, and relationships between professionals and clients in settings such as schools and hospitals are studied as well as organizational decision-making, finances, and community relations.

Prerequisite(s): SOC 101.

SOC 252 Media, Culture and Society 3 Credits

Examines mass-produced commercial culture, how it has developed, and the role it plays in modern society. Analyzes the content of these cultural forms, how its production is organized, and how audiences perceive it.

Prerequisite(s): SOC 101.

SOC 261 Schools and Schooling 3 Credits

Schools and the process of schooling are analyzed within a broad historical perspective as well as within the structural and cultural context of American society. Education within a global perspective is also considered. Issues discussed include school funding, integration, tracking, technology, bureaucratization, and the "cultural wars" fought within the schools.

Prerequisite(s): SOC 101.

SOC 269 Physical Anthropology 3 Credits

An analysis of the biological development of the human capacity for culture. Topics include: modern theories of evolution and their application to human evolution; the relationship of human beings to other primates, the human fossil record, and variation among modern human populations. A background in biological studies is not necessary.

Prerequisite(s): SOC 101.

SOC 270 Area Studies: Africa 3 Credits

An intensive investigation of problems arising from historical and contemporary studies of tribal, peasant, and transitional societies in Africa south of the Sahara.

Prerequisite(s): SOC 101.

SOC 271 Area Studies 3 Credits

Studies problems arising from historical and contemporary studies of peasant populations of Europe.

Prerequisite(s): SOC 101.

SOC 272 Area Studies: Indians of North America 3 Credits

Societies and cultures of the Indians of North America from the Arctic to Mesoamerica. Emphasis on evidence of these tribal groups prior to extensive acculturation and their contemporary situation.

Prerequisite(s): SOC 101.

SOC 280 Social Movements Abroad 3 Credits

This course will provide students with an international perspective on community-engaged strategies for addressing social problems, with a special focus on social welfare and justice. This course utilizes an international experiential component via a faculty led study abroad course and is mixed modal: online and on site internationally. Through seminars with local experts, case examples, dialogue, and visits to exemplary organizations, students will learn about strategies for engaging communities in creating change, honoring indigenous knowledge and practice, working to enhance leadership, and facilitating change in the context of larger social institutions. Through readings, online discussions, and self-reflection students will gain a greater understanding of social movements across the host country, with special emphasis on the culture and experiences of international residents.

SOC 300 Work and Occupations 3 Credits

Analyzes the nature and organization of work in modern society. Focuses on such issues as division of labor, specialization, alienation, professionalization, and the role of technological change. Includes an examination of the historical development of work in the 20th century, and a consideration of contemporary and future patterns of work organization.

Prerequisite(s): SOC 101.

SOC 301 Methods of Sociological Research 3 Credits

One of the required courses in both the Sociology and Criminal Justice majors, Methods of Sociological Research introduces students to basic research processes in the social sciences. The course introduces students to both quantitative and qualitative approaches and data analysis using both original and secondary sources. Students will also complete an original research paper in this course.

Prerequisite(s): SOC 101.

SOC 302 Crime & Justice in the Media 3 Credits

This course focuses on the impact of media on Americans' perceptions and understanding of the extent and causes of crime, and the effectiveness and purposes of crime policy. It examines how criminals, types of crime, crime policies and the criminal justice system are portrayed in various media outlets, including film, tv, newspaper, and electronic/internet. It explores the historical and contemporary relationships between media representations of criminal behavior, crime as a social problem, and the nature of the criminal justice system and contrasts these to their social realities.

SOC 304 Women and Law 3 Credits

Explores the social, economic, political and cultural context of laws relating to women and gender, such as workplace discrimination, divorce and child custody and reproductive rights. It examines how such laws have changed historically and the impact such laws have had on women as well as on men and on American social institutions, such as the family, politics, and the workplace. The course also examines women in the legal profession and their impact on the practice of law and legal reasoning.

SOC 307 Criminal Justice Practice 3 Credits

This course will consider the ways criminal justice agencies and occupations are shaped by social, economic, political, technological and legal changes. Through case studies and projects students will examine the work, culture, and work settings of various criminal justice practitioners, assess the impact of social policies on criminal justice careers, and identify new directions in the field. Students will develop the reading and writing skills needed by an array of criminal justice practitioners.

SOC 308 Cities And Suburbs 3 Credits

Examines the growth of an urban way of life under the influence of industrialism. Study of community, political, and economic institutions in cities. Comparisons between urban and suburban areas.

Prerequisite(s): SOC 101.

SOC 309 Peasant Society 3 Credits

A comparative view of peasants and their significance in agrarian, colonial, and industrial societies. Peasant economic, political, and social institutions are analyzed with an eye to both their internal operation and the way they relate to non-peasant groups who hold power in these societies. The changes that have occurred in the peasant world are viewed both as a consequence and a cause of wide reaching political and economic upheaval.

Prerequisite(s): SOC 101.

SOC 310 Pre-Industrial Economies 3 Credits

The anthropological study of technology, production, and exchange in nonmarket cultures, as related to the social, ideological, and ecological systems in which they are embedded. The question of whether the concepts that derive from market economies can be applied to all economic systems is considered in detail.

Prerequisite(s): SOC 101.

SOC 311 Social and Cultural Change 3 Credits

Investigates the process of change in both industrial and nonindustrial settings. Particular attention paid to the role of the individual in change as well as the roles played by the mode of production, social organization, and ideological constructs. Case studies are drawn from non-Western as well as Western sources.

Prerequisite(s): SOC 101.

SOC 312 Women in Society 3 Credits

Examines changes in women's roles and in male-female relationships. Focuses on impact of law, economy and social movements in shaping women's positions as wives and as workers. Explores theories and evidence concerning the nature and extent of sex differences. Attention to women's socialization through language, schools and media.

Prerequisite(s): SOC 101.

SOC 313 Gender and Criminal Justice 3 Credits

This course will examine women's experiences with the criminal justice system as offenders, victims, prisoners, and practitioners. It will consider how gender has shaped theories of crime and criminological research. It will explore how cultural constructions of gender have influenced substantive and procedural criminal law, the ways criminal justice agencies respond to crime, and how these have changed historically. Attention will be given to the development of new approaches, reforms, and challenges.

Prerequisite(s): SOC 101.

SOC 314 Social Theory 3 Credits

Introduces the major thinkers and conceptual problems characterizing the development of sociological thought. Required of sociology majors.

Prerequisite(s): SOC 201.

SOC 315 Issues in Modern Social Theory 3 Credits

Examines current trends and issues in sociological thought.

Prerequisite(s): SOC 314 or permission of instructor.

SOC 316 Feminist Social Thought 3 Credits

An introduction to feminist social theory, with emphasis on its breadth and variety. Special attention paid to the ways feminist theorists have analyzed the relationship of gender to other kinds of group differences.

Prerequisite(s): SOC 101.

SOC 317 Law and Lawyers 3 Credits

Relationships between law, the economy, and the state are explored. Discussion of laws, legal systems and legal reasoning using cross-cultural comparisons and historical analysis of these in the United States. Particular attention given to impact of law on corporations, workers, women, and minorities. Changes in legal profession and legal education are examined.

Prerequisite(s): SOC 101.

SOC 318 Hate Crimes in the United States 3 Credits

Provides an interdisciplinary exploration of hate crimes in the United States, its causes and consequences. It will examine the social, political, and legal issues that have shaped policies and laws designed to respond to hate crimes and assess their effectiveness. Debates about the nature of hate crimes and the special laws and sentencing provisions developed to deal with them will be discussed. Topics include hate crimes on college campuses, hate on the Internet, legal and constitutional issues, and criminal justice enforcement.

SOC 320 Religion and Belief Systems 3 Credits

The relation of religious phenomena to social structures and processes; religion in cross-cultural perspective.

Prerequisite(s): SOC 101.

SOC 321 White Collar & Corporate Crime 3 Credits**SOC 322 Punishment and Corrections 3 Credits**

This course explores the nature, forms, rationales, and effectiveness of punishment as a form of crime control. It traces the development of corrections in the U.S., identifies cultural trends and developments in penology, including mass incarceration and supermax prisons, considers the ways race and class have shaped these, and the reverberating effects penal policies have had on American culture and society beyond the criminal justice system. It examines the role of laws, politics, crime control agencies, as well as of media, and corporations in shaping penal policies. Topics also include: prison subcultures, inmate rights, correctional practices, privatization of prisons, and alternatives to punitive policies of incarceration and capital punishment.

Prerequisite(s): SOC 101.

SOC 325 Population Study 3 Credits**SOC 330 Class and Economic Inequality 3 Credits**

Social, economic, and political aspects of the division of society into classes are considered. Theories of stratification and the distribution of wealth, power, and prestige in societies past and present are examined.

Prerequisite(s): SOC 101.

SOC 340 Power and Politics 3 Credits

Examines the nature and distribution of power in contemporary societies; analyzes the relationships between power and politics.

Prerequisite(s): SOC 101.

SOC 341 Developing Societies 3 Credits

Examines theories explaining patterns of development; indicators and measures of social well-being; and problems such as population, hunger and environmental crises in developing countries. Focuses especially on patterns of development in Latin America or China.

Prerequisite(s): SOC 101.

SOC 342 Police and American Society 3 Credits

This course examines important issues regarding police in American society, such as the paradoxes inherent in police work, police organization and strategies and their effectiveness, the dilemmas of supervising police work, police unionism, the nature and implications of police occupational subculture, the use of police discretion, forms of police misconduct and accountability, professionalization of police and the trend toward police privatization. It also considers the diversity of the police force, trends in the delivery of policing services, the impact of new technologies on policing, and the challenges of policing in a multicultural society.

Prerequisite(s): SOC 101.

SOC 343 Policing and Counter Terrorism 3 Credits

This course is designed as an upper level (undergraduate/graduate) combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

Prerequisite(s): SOC 101.

SOC 344 Gangs in America 3 Credits

This course explores the extent and nature of street gangs in the US and public reaction to them. The course considers what gang membership means, and when gangs are cohesive or not. The course will focus on the functioning and process of the justice system and its response to gangs. Students will examine potential strategies to address gang crime, weigh the costs and benefits of these various actions, and discuss how to rehabilitate both low level and serious gang offenders.

Prerequisite(s): CMP 125.

SOC 345 Race and Crime 3 Credits

Examines the impact of crime policy on minority communities in the United States, with particular attention to the impact of "The War on Drugs", three-strike laws, and mandatory sentencing on minorities and minority communities. Drawing on sociological research, the course explores myths and realities concerning the relationship between race and crime. The relationship between racial attitudes, historical race relations, and mass incarceration are discussed.

Prerequisite(s): SOC 101.

SOC 346 Health Care and Society 3 Credits

Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.

Prerequisite(s): SOC 101.

SOC 347 Aging and the Elderly 3 Credits**SOC 348 Human Service Organizations 3 Credits****SOC 349 Retirement and Leisure 3 Credits**

Examines the social phenomena of retirement as an event, process, social role, and life stage. Explores the meaning of leisure, time utilization, and creativity among the elderly. Defines related problems and issues, i.e., financial, physical, psychosocial, and environmental. Positive as well as negative implications are presented and evaluated.

Prerequisite(s): SOC 247 recommended.

SOC 350 Social Policy 3 Credits

Investigates the relationship between economic development and social policy in comparative and historical context. The main features of preindustrial, early industrial, and advanced industrial social welfare systems are described. Social, economic and political factors that shape social policy are investigated.

Prerequisite(s): SOC 101.

SOC 351 The Rights of the Accused 3 Credits

Analyzes the major substantive and procedural rights accorded to the criminally accused by the United States Constitution. Particular attention will be given to the right to counsel, confessions and self-incrimination, arrest, search and seizure. Students will learn to argue and write hypothetical case opinions.

SOC 355 Social Interaction 3 Credits

Examines the interpersonal relation between and among people in private life, public places, and at work. Explains how such relations affect and are affected by changes in the larger social structure.

Prerequisite(s): SOC 101.

SOC 360 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 361 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 362 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 363 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 364 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 365 Selected Top: Social Movements 3 Credits

FALL 2012 - This course examines movements that seek change in the social, cultural and political structures of society. The social, economic and political contexts of these movements are treated as well as their origins, tactics, organization, recruitment, and successes and failures. Case studies focus on movements in the areas of labor, civil rights, feminism, the environment, "right wing politics", and neighborhood activism. In today's world, social movements abound. Movements such as the Tea Party and the Occupy movements demonstrate that they can take place across the political spectrum of society. Moreover, the interconnectedness of the world economy creates social movements throughout the world, whether in Asia, the Mid-East or Europe that have direct affects on the United States. Because the coverage of these movements are given considerable media exposure, students (and the public) tend to accept the interpretations of these movements as presented in the narratives of the media coverage. This class will provide a systematic academic treatment of social movements. Because social movements target structural and cultural institutions in society, the study of these movements will not only provide an understanding of these movements, but of larger social problems in society as well.

Prerequisite(s): SOC 101.

SOC 367 Selected Topics: Environment 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 368 Selected Topics in Sociology 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 369 Selected Topics in Sociology 3 Credits**SOC 396 Applied Sociology 3 Credits**

Shows how sociology can be applied in work settings. As participant observers in organizations related to their career objectives, students learn to apply sociological knowledge, perspectives, and skills. In class meetings and individual consultations with the instructor, students examine the applied dimensions of sociology, the uses of sociology in various occupations, the ethical issues involved in applied sociology, and the culture and structure of their work organization.

Prerequisite(s): SOC 101.

SOC 400 Senior Seminar 3 Credits

For sociology majors only. This seminar involves in-depth examination and research of a specific issue of current importance in the discipline. Learning to do sociology is emphasized.

Prerequisite(s): SOC 201, SOC 301, SOC 314.

SOC 401 Sex and the Body in Society 3 Credits

Examines cultural meanings and social practices associated with sex and the body. Contemporary cultural norms and practices in the U.S. will be compared to other societies, historically and cross-culturally. Variations in sexual practices, ideals of sexual attractiveness according to age, gender, race, ethnicity, class and sexual orientation also will be discussed. Topics may include beauty industries (e.g. cosmetics, diet, fashion, surgery, drugs), sex and the workplace, the impact of media, social policy, and technology on ideals of sexual attractiveness, birth control, and sexual violence.

Prerequisite(s): SOC 101.

SOC 460 Criminal Justice Senior Seminar 3 Credits

Draws on and develops students' knowledge and understanding of crime, criminal law and criminal justice institutions, and applies these to a specific topic, method, institution, or controversy. Topics vary. Students will be expected to contribute to seminar discussions and to complete research projects related to the seminar theme. Required for senior criminal justice majors; open to others only by permission of the chair.

SOC 490 Independent Study: Research and Creative Expression 1-4 Credits

Juniors or seniors who have completed at least 12 credit hours in sociology may propose an independent research project with the aid and advice of any full-time faculty member of the department. Proposals must be reviewed and approved by the sponsoring faculty member and submitted to the department's Independent Study Committee at least four weeks prior to the last day of classes for the semester preceding Independent Study.

Prerequisite(s): SOC 101.

SOC 491 Internship in Sociology 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of applications of sociology in work settings and to analyze work settings using sociological knowledge and research methods. Placements are made in business, government, and community offices that utilize sociological knowledge or research skills.

Prerequisite(s): 2.75 GPA.

SOC 496 Honors in Sociology 3-6 Credits

Training in the efficient collection of data that has a bearing on the problem being investigated. Stresses the technique of proper summarization of the collected material as well as the integration of that material into a comprehensive report. A research design is prepared and hypotheses tested in the field. The original library research is then combined with the findings to produce a mini-thesis. Approval of student's program by a sponsoring faculty member and the department Independent Study Committee is required.

Prerequisite(s): SOC 201, SOC 301.

SOC 497 Honors in Sociology 3-6 Credits

Training in the efficient collection of data that has a bearing on the problem being investigated. Stresses the technique of proper summarization of the collected material as well as the integration of that material into a comprehensive report. A research design is prepared and hypotheses tested in the field. The original library research is then combined with the findings to produce a mini-thesis. Approval of student's program by a sponsoring faculty member and the department Independent Study Committee is required.

Prerequisite(s): SOC 201, SOC 301.

Spanish (SPA)

Courses and Descriptions

SPA 100 Spanish I 3 Credits

Introduction to the fundamentals of Spanish grammar, with emphasis on communicative skills, in culturally authentic contexts. Students are required to work extensively with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): placement test if Spanish has been studied elsewhere.

SPA 101 Spanish II 3 Credits

Continuation of Spanish 100. Emphasizes the use of language for communicative and cultural competency while developing a solid grammar foundation in Spanish. Students are required to work extensively with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): SPA 100 or placement test.

SPA 102 Elementary Spanish II Abroad 3 Credits

This course is the second part of the first-year experience in Spanish and is designed for students who have taken Spanish for Beginners I and who are interested in experiences abroad in a Spanish speaking culture. The aim is to develop the four basic skills (listening comprehension, speaking, reading, and writing) in and beyond the classroom. The discussion of distinctive cultural aspects of the Hispanic world is an integral part of this course as well as to encourage students to experience the world through the eyes of the other culture by exposing them to the literature and arts of the local culture. This course takes 8 weeks in total, 7 weeks at Rider online and 1 week abroad. During the seven weeks, students practice linguistic skills and gain cultural knowledge related to the country of destination. These skills and knowledge will prepare the students for the one week abroad experience.

Prerequisite(s): SPA 100 with a minimum grade of D.

SPA 103 Introductory Medical Spanish 3 Credits

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive, and presentational communication skills as well as growth in cultural, literary, and interdisciplinary knowledge as they move through a sequence of study. This course is the second part of the first-year experience in Spanish during which the development of communicative and cultural competencies is at the center of this experience. At the end of the course, successful students will be able to handle a variety of uncomplicated communicative tasks in straightforward social situations. They will also develop a sense of the cultural aspects of peoples who speak the target language. This course offers an additional focus on the use of Spanish across a variety of medical professions. Students interested in careers in medicine, nursing, counseling, physical therapy, chiropractic education, healthcare communication, public policy or other related fields will benefit from the linguistic (i.e., vocabulary and grammar) and sociocultural topics examined in this course. In addition to learning grammar and vocabulary that will translate into real-world skills in medical and healthcare professions (e.g., talking to patients, navigating a hospital setting, diagnosing illnesses), students will also explore sociocultural topics on how Latinx communities in the United States relate to medical and healthcare services and industries. In order to take this course, students must have taken Spanish I (SPA 100) at Rider or placed into Spanish II or Introductory Medical Spanish (SPA 101 or SPA 103) on the Foreign Language Placement Test.

SPA 200 Spanish III 3 Credits

A focus on key communicative structures in Spanish with emphasis on aural-oral (listening and speaking skills) and composition writing. Cultural and literary readings and films will be used to develop these skills. A special section may be offered to address the needs of native speakers. Students may be required to work with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): SPA 101, 102, 103 or placement test.

SPA 201 Spanish IV 3 Credits

A continuation of communicative Spanish review with emphasis on aural-oral and written skills to prepare students for further study. The discussion of distinctive cultural aspects of the Hispanic world is an integral part of this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisites: SPA 200 or placement test.

SPA 300 Advanced Grammar & Composition 3 Credits

A systematic review of grammatical structure. The development of writing skills, in preparation for upper level courses in literature, culture and professional language.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 301 Spanish for Business 3 Credits

A solid foundation in business vocabulary and cultural concepts; situational practice in geographic and cultural contexts necessary to be successful in today's Spanish-speaking world. Practice in writing business letters and other documents. Oral and written assignments to help students improve their critical thinking and become better communicators.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 302 Writing and Translating 3 Credits

Practice in writing and an introduction to translation for students who will use Spanish in their professional lives. Using literary, cultural and journalistic sources, students learn various writing discourses including narration, description, exposition, argumentation, and journalistic and letter writing. Translation involves preliminary study of translation theory and techniques, and practice with texts from students' chosen careers. Additional study of Spanish grammar as necessary.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 303 Advanced Communication and Popular Cultures 3 Credits

The focus of the course is to strengthen the student's aural comprehension and speaking skills by providing a framework for regular guided practice of fundamental grammar structures and vocabulary enhancement in the context of Hispanic cultures. Listening activities will include live speech, video recordings, film shorts and one full-length movie. Speaking tasks will be reinforced with written exercises.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 305 Cervantes 3 Credits

A detailed study of Cervantes' masterpiece, *El ingenioso hidalgo Don Quijote de la Mancha*. Lectures, discussions, and supplementary readings.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 310 Spanish Culture & Civilization 3 Credits

Spain's cultural achievements are studied in light of the country's unique historical and social reality through the use of historical, artistic, architectural, cinematic and literary sources. Cross-cultural awareness is enhanced through exercises that compare Spanish and American society. Classes are in English. No knowledge of Spanish required. This course may contain an optional travel component offered before or after the semester or during spring break.

SPA 311 Latin American Cultures 3 Credits

A panoramic survey of Latin American cultural achievements in light of the unique social and political history from the pre-Columbian period to the present. Classes are in English. No knowledge of Spanish is required.

SPA 312 Latinx Cultures 3 Credits

This course focuses on the cultural formation of Latinos/as/x in the United States, as well as the social and political motivations for Latin American migration to this country. Our class will analyze and question how various Latinx communities are grouped into a single U.S.-Latino Diaspora. This course takes a transdisciplinary approach, thus we will consider literary texts (short stories, poems, films, novels), historical and anthropological studies, and sociological works in our examination of Latinx cultures. The main goals of the course are for students to begin to conceptualize: 1) how the United States has been shaped by the presence of Latino/a/x communities, and 2) how Latino/a/x experiences are reflected in literature and art. Classes are in English. No knowledge of Spanish is required.

SPA 320 Introduction to Spanish Literature 3 Credits

Examines through lectures, readings and class discussions selected texts and their relationship to the main currents of European literary history. Introduction to the practice of literary analysis through written composition. Required for majors. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 325 Introduction to Latin-American/Latino Literature 3 Credits

A study of the development of Latin-American and Latino literature from its origins to the present through the reading, analysis and discussion of representative works by major authors. This course increases the understanding of how social, historical, and political events, together with native as well as foreign literary movements, create a unique literature, conveying the Hispanic-American reality. Required for majors. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 395 Phonetics for Communication 3 Credits

A systematic study of the production of Spanish sounds with practice in phonetic transcription and a preliminary investigation of dialects.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 403 Medieval Literature 3 Credits

Surveys the literature of Spain during the Middle Ages, with special emphasis on major writers such as Gonzalo de Berceo and Don Juan Manuel, and attention to the epic and the medieval ballad. Modern versions of medieval Spanish are used.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 410 Modern Hispanic Poetry 3 Credits

Surveys the poetic genre, emphasizing how to read, analyze, and appreciate poetry. Major poets from Spain and Spanish America of the 19th and 20th centuries representing the main currents of modern lyricism are studied. Focuses on such major writers as Rosalía de Castro, Darío, Jiménez, Machado, Vallejo, Mistral, Neruda, Lorca, Paz, Ana Rossetti, Nicolas Guillen, and Nancy Morejon.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 411 Modern Spanish Novel 3 Credits

Traces the development of the Spanish novel, paying particular attention to the masters of the 19th-century Realism (Galdos and Clarin), the innovations and experimentation of the Generation of '98 (Unamuno, Baroja, Valle-Inclan, and Pérez de Ayala), and the novelists of the post-Civil War and contemporary periods (Cela, Delibes, Goytisolo, Martín Gaité, Matute, Fernandez Cubas, and Javier Marías). Emphasis on the aesthetics of the novel as a literary form.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 412 Theater and Film of the Hispanic World 3 Credits

This course explores through theater and cinema the compelling issues that have shaped Hispanic cultures and consciousness throughout the centuries. Sample topics include war and remembrance; myth and history; freedom and authority; immigration; globalization; and race, class, and gender. The course may focus on specific authors or historical periods. Representative playwrights include Lope de Vega, Zayas, Zorrilla, Avellaneda, Lorca, Buero Vallejo, Sastre, Solorzano, Carballido, Lopez Mozo, and Pedrero. Directors include Buñuel, Saura, Gutiérrez Alea, Almodovar, Rocha, Salles, Erice, Zambrano, and Bollain.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 413 The Hispanic Short Story: Transatlantic Connections 3 Credits

This course will introduce students to the most representative writers of the short story in Spain and Latin America from Romanticism to the present. Students will be prepared to perform close readings of the literary genre under study, to analyze the form and content of the texts read, paying due attention to all internal and external aspects that impact the narrative process and the evolution of the short story. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 415 Spanish Renaissance 3 Credits

The origins and evolution of the Renaissance in Spain and of the literary expression of Renaissance culture as reflected in the development and perfection of prose and lyrical styles through the 16th century. Topics include the medieval heritage, Spanish Humanism, the Celestina, the Renaissance ideal in amatory prose and poetry, mysticism, the ballad, and the picaresque novel.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 416 The Spanish Golden Age 3 Credits

The literature of Spain during a period of political decline and outstanding aesthetic achievement: Lope de Vega and the rise of a national theatre; Calderon's drama of ideas; the development of the novella and the picaresque novel; the poetry and prose of Gongora, Quevedo, and Gracian. Also includes an introduction to literary theory.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 420 From Colonies to Nations 3 Credits

This course consists of a panoramic survey of Colonial Latin American literature in light of the unique social, cultural and political history from the pre-Columbian to the Independence period (1825). Course taught in Spanish. Note: This course is cross-listed as LAC 420. Students may not get credit for both SPA 420 and LAC 420.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 426 Latin American/Latino Film and Fiction 3 Credits

A study of the main trends in contemporary Hispanic fiction written in Latin America and the United States. Analysis and discussion of selected novels and short stories, and their cinematic representation on film. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 430 Latinx Community Engagement 3 Credits

This course explores the experiences of Latinx individuals and communities across the United States through a) class meetings and discussions, and b) community engagement with pre-established partner organizations in and around Lawrenceville, NJ. Broadly, our course will examine questions related to identity, race, ethnicity, language, transnationalism, (im)migration, the border, (im)migrant detention, and solidarity movements.

Prerequisite(s): SPA 201 or above.

SPA 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

SPA 491 Internship in Foreign Languages 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of the importance and interrelationship of foreign languages and cultures in the workplace. Placements can be made in international governmental agencies, international trade associations, multinational corporations, social service agencies and other appropriate workplace environments both in the United States and abroad. With permission of the supervisor and faculty advisor, a three-credit internship may be substituted for a collateral requirement as credit toward the major.

Prerequisite(s): students should have completed at least one 300-level course in the foreign language.

SPA 496 Special Studies 3 Credits

A seminar open to a variety of topics treating a particular author, period, genre, theme, or issue.

Prerequisite(s): permission of instructor.

Special Education-UG (SPE)

Courses and Descriptions

SPE 201 Foundations in Special Education and Inclusive Practice 3 Credits

This course emphasizes the foundations of special education and introduces students to inclusive practice. Philosophical, historical, and legal foundations of special education and characteristics of students with disabilities will be examined. Students will learn the components of an Individualized Education Program (IEP), how to adapt learning environments and curricular materials, as well as how to select and implement modifications for students with disabilities. Inclusive educational practices including communication, coteaching, and collaborative partnerships will be addressed through case studies and fieldwork. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours.

Prerequisite(s): A cumulative GPA of 2.75 is required.

SPE 202 Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities 3 Credits

This course is designed to examine the characteristics of individuals with Autism Spectrum Disorder (ASD) and strategies to support their academic, communication, and social/behavioral growth, including the use of assistive technology and positive behavioral supports. Methods and strategies for ASD and other low incidence disabilities will be explored. Through active participation in class and field sites, students will become aware of the various social issues related to family, education, transition, community resources and work experiences of individuals with these disabilities. Students will be required to complete a minimum of 30 weekday field hours in addition to regularly scheduled class hours.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 210 Global Encounters 3 Credits

This course is an international learning experience focused on exploring educational opportunities in the United States and abroad. Students will study the history, policy and practice of special education in the United States and compare it with another country and culture first hand, through lectures, school visits and reflection. Current strategies and challenges of educators and families supporting individuals with disabilities will be examined. Through this cross-cultural experience, students will broaden perspectives and develop cultural awareness, knowledge, and understanding of diversity. This course is open to all students and disciplines. There are no prerequisites.

SPE 300 Inclusive Practices for General Education Teachers 3 Credits

This online course is designed to introduce preservice general education teachers students to special education and the inclusive classroom. Students will explore current issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours. Prerequisite(s): EDU 106 and EDU 206. A cumulative gpa of 2.75 is required.

SPE 303 Assessment and Instruction for Students with Disabilities 3 Credits

This course will emphasize the relationship between assessment and instructional design and implementation. Coursework includes the evaluation, selection, development, and adaptation of standardized, normreferenced, and functional assessments, such as a Functional Behavioral Assessment (FBA) and Ecological Assessment. Strategies to support literacy instruction for students with disabilities will be examined. Transition planning, program development, and agencies available to support students with disabilities and their families will be explored. This course requires a field experience in order to help students apply theory to practice.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 304 Assessment and Instruction in the Inclusive Classroom 3 Credits

This course will emphasize assessment, planning, and instructional design to maximize the learning of all students, including those with exceptional learning needs, in the inclusive classroom. Students will have the opportunity to explore a variety of instructional strategies to meet the needs of diverse learners. Organization of learning environments and the collaborative process, including co-teaching models, will be utilized to design a long-term unit plan. This course requires a field experience in order to help students apply theory to practice.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 305 Assessment and Instruction for Students with Autism Spectrum Disorders 3 Credits

Through this course, teacher candidates will learn both theories related to teaching students with Autism Spectrum Disorder (ASD) as well as best practices in the classroom related to academic instruction, as well as emotional, behavioral, and communicative interventions. This course also includes a field component, in which teacher candidates are expected to complete 10 hours of observation in a classroom with students with ASD. The course begins by examining the characteristics of the disability, causes, early warning signs, diagnostic procedures, and early intervention practices. Specific practices related to instruction and intervention as well as how to best structure a classroom for students will be examined. Teacher candidates will receive instruction in a variety of strategies and practices, even those that do not yet qualify as EBPs, as well as their theoretical underpinnings. Strategies for communicating effectively and efficiently with parents, as well as the most current and/or special issues in the field will also be discussed. Issues related to post-secondary transition will also be examined.

Prerequisites: A cumulative GPA of 2.75 and SPE 201.

Sport Management (SPT)

Courses and Descriptions

SPT 250 Introduction to the Business of Sports 3 Credits

This course is designed to introduce the student to the business of sports. Business principles, such as management, marketing, law, finance and economics will be applied to the business of sports. The course will also explore the various career opportunities in the world of sports.

SPT 320 Business of Global Sport 3 Credits

The course explores the diverse challenges and issues facing the managers of sport enterprises in the context of the global marketplace. Issues of governance, cross-cultural interactions and business activities will be examined as they relate to modern sport at the international level. By evaluating case studies and examining current issues in the field, students will gain an understanding of the relationships and responsibilities associated with being a business professional in the global sport industry.

SPT 322 Sports Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of statistical techniques and visualizations to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations and fantasy competitions. Classwork will consist of readings, lectures, discussions, presentations from guest speakers, and hands-on labs. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite(s): CIS 185, MSD 200 or MSD 205, and SPT 250.

SPT 325 Financial Management in the Sport Industry 3 Credits

This course is designed to build upon earlier knowledge from courses in economics, accounting and finance that emphasizes the sports industry and the challenge for financial managers in areas such as stadium/arena financing, financial analysis and valuation. Business models and their financial implications for media and sports related enterprises as well as the business of college athletics will also be covered.

SPT 355 Sports and the Law 3 Credits

Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. This course is cross-listed as LAW 355. Students may not get credit for both SPT 355 and LAW 355.

SPT 444 Selected Topics in Sport Management 3 Credits

This course is offered occasionally with topics and prerequisites set by the Business of Sports Program faculty. This course can be used as an elective for the Sport Management major, Sport Studies minor, or as a free elective. This course is graded on a letter grade basis.

Prerequisite: SPT 250.

SPT 450 Contemporary Issues in Sport Management 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of lectures, discussions, and guest speakers from the sports industry. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite: SPT 250, senior standing, and completion of 15 credit hours in business of sports coursework or permission of instructor.

SPT 490 Independent Research and Study 1-4 Credits

Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

Prerequisite(s): Junior standing, 9 credits in Sport Management courses (including SPT 250) and permission of instructor.

SPT 491 Sport Management Internship 1-3 Credits

Sports related internships can be used to satisfy an elective requirement for the Sport Management Major, Business of Sports Minor and Sport Studies Minor. The course is graded as Pass/Fail.

Sustainability Studies (SUS)**Courses and Descriptions****SUS 100 Introduction to Sustainability Studies 4 Credits**

Sustainability is an idea that will shape the lives of all in the 21st century. Students will explore how we arrived at our current precarious environmental situation and investigate cutting-edge methods that support human development and protect the natural ecosystems on which we will depend. By exploring principles of sustainability (whole-systems approaches, resource limitations, stewardship) through many different lenses, students will appreciate the interdisciplinarity of the sustainability enterprise. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): SUS 100L.

SUS 100L Intro to Sustainability Lab 0 Credits

For students concurrently taking SUS 100. Field trips, visiting speakers, and films to complement topics covered in the introductory course. One three-hour laboratory per week.

Corequisite(s): SUS 100.

SUS 400 Sustainability Studies Seminar 3 Credits

To synthesize sustainability studies coursework and internship experiences, students will collaboratively develop and implement a sustainability project on the Rider campus, aiming to simultaneously reduce both depletable resource use and environmental impact. Seminar sessions will explore the historical development of current systems and innovative thinking related to sustainability planning related to the focal issue. Specific topic at discretion of the instructor. **Prerequisite(s):** SUS 100, SUS 100L.

Corequisite(s): SUS 400 or as prerequisite or permission of instructor.

SUS 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in applying sustainability principles in a field setting. Students are expected to assess the outcomes of their projects and communicate their results verbally and in writing to interested audiences.

SUS 491 Internship in Sustainability 1-4 Credits

A supervised work/service experience in an approved organization where students gain understanding and experience with applying sustainability principles. Placements may be in private, public, educational, non-profit or governmental organizations. Students are expected to include measurement and documentation of the environmental, social, and economic impact of their work. A minimum of 50 hours of work is required for one credit. At least 150 hours are required to earn 3 credits.

Theatre (THE)**Courses and Descriptions****THE 103 The Authentic Instrument I: Introduction to Performance Skills 3 Credits**

Through Alexander Technique and other methodologies, actors gain awareness of personal habits and begin to find their authentic, truth-telling voice and body—a dynamic and expressive instrument to serve them in any medium.

THE 104 The Authentic Instrument II: Developing the Imaginative Performer 3 Credits

Continuing from THE 103, actors explore psycho-physical techniques (e.g. Michael Chekhov, Viewpoints, Laban) to develop the actor's imagination. The class culminates in a public presentation using the tools that have been cultivated in Authentic Instrument I & II.

Prerequisite(s): THE 103.

THE 105 Theatre History to 1700 3 Credits

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 107 Acting I: Intro to Acting 3 Credits

Exercises and improvisations developing the fundamental prerequisites for the actor are provided. The emphasis is on vocal and physical mobility and the ability to communicate emotional states from the stage.

THE 110 Acting II: Scene Study 3 Credits

Basic acting techniques. Emphasis on the ingredients of any action: what am I doing, where, why, who am I, what is my attitude toward partner?

Prerequisite(s): THE 107.

THE 111 Theatre Lab 0 Credits

This class serves as a forum for students to cultivate practical professional skills. Through seminars, guest speakers and master classes, this lab will give the students necessary tools to enter the professional theater. Theater majors must meet the weekly attendance and participation requirements during every semester up to a total of six.

THE 115 Stagecraft 3 Credits

The theory and practice of construction and rigging of stage scenery is offered. Emphasis is on actual productions and road show set-ups. One lecture and two labs per week.

THE 116 Stagecraft Practicum 1 Credits

Work in the various shops and stages specializing in different areas such as carpentry, scenic painting, lighting and electrics, costumes and props, assisting main stage productions under the supervision of the design or technical staff.

Prerequisite(s): THE 115.

THE 118 Visual Imagination 3 Credits

Introduction to the visual world of theater design. Visual examples, physical exercises and handcraft of composition and style, with dramatic input and meaning. The course explores how to translate ideas in a dramatic text into a visual context.

THE 120 Theater Appreciation 3 Credits

By exploration of dramatic literature, conclusions are drawn as to man's relationship to his particular period, style, political, social, and psychological environment. Appreciation of the theatrical event is included. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 127 Theatre Production 1 Credits

Students rehearse and perform roles in a play produced by the department and directed by a member of its faculty. Students may also prepare a major element of design or technology for the production. Maximum of eight credits are accepted in theatre production, band and/or choir.

THE 190 Production I 1 Credits

Students carry out a technical theatre crew position for one or more theatre, musical theatre or dance productions during the semester of course registration. May be repeated seven times, for a total of eight credits.

THE 199 The Arts in Contemporary Civil 3 Credits

An integrated study of the arts and their place in contemporary American life. Includes attendance at several events in art, music, and drama.

THE 201 Devised Theatre 3 Credits

Devised theatre is a process in which a whole creative team – from actors to technicians - develop a new work collaboratively. Students will create an original production inspired by a theme, topic, poem, or circumstance using multimedia, interviews, and other methods and build them through collaborative workshops and rehearsals.

THE 206 American Theatre History 3 Credits

The history of the American theater from the colonial period to the present, emphasizing dramatic scripts and theatrical conventions. Examines important playwrights, theorists, and practitioners representative of each period of American history, emphasizing the 19th and 20th centuries.

THE 215 Introduction to Theatrical Lighting and Sound 3 Credits

This course will introduce students to basic lighting and sound principles and how those integrate into a theatrical performance. The main focus of the class will be analysis and application of lighting and sound equipment commonly used in live performance and how that equipment functions and is installed. The class will also touch on the design process, script analysis, and lighting color theory. These objectives will be achieved through in-depth lectures, class discussions, and hands-on demonstration sessions.

THE 216 Introduction to Scenic Construction 3 Credits

This course will expose students to reading construction drawings, construction techniques, generating material lists, problem-solving, and material and time management as related to scenic construction. A shop participation requirement will allow students to apply course objectives within a real-time production schedule and construction environment.

THE 219 Stage Management 3 Credits

Provide necessary tools to get started as a production stage manager (PSM), including management, leadership, communication and organizational skills. Providing guidelines to prepare production paperwork. Overview of the relationship between the PSM and other production personnel.

Prerequisite(s): THE 115.

THE 220 Movement for the Actor I 3 Credits

This course is an introduction to movement training methodologies, and emphasizes physical awareness and expressivity as it relates to development of character.

Prerequisite(s): THE 110, For Acting majors or by permission of the instructor.

THE 221 Voice for the Actor 3 Credits

Focuses on exploration of the basic principles of vocal production and cultivating natural expressivity of the voice. Class work is based upon the classic progression of voice exercises of Kristin Linklater.

Prerequisite(s): THE 107; Open to Theatre majors or minor, or by permission of the instructor.

THE 222 Speech and Dialects for the Actor 3 Credits

Focuses on exploration of the International Phonetic Alphabet (IPA) and the use of the IPA in learning dialects (including Standard Neutral American) for the stage.

Prerequisite(s): THE 107; Open to Theater majors or minor, or by permission of the instructor.

THE 224 Stage Make Up 3 Credits

Basic application of make up artistry and techniques for the stage. How it can help build a character, and how to apply to self and others.

THE 226 Drafting for the Stage 3 Credits

Covers essential drafting language for staged productions. Drafting of ground plans, sections, elevations, and renderings by hand and with computers.

Prerequisite(s): THE 115.

THE 227 Properties and Scenic Painting 3 Credits

Covers general aspects of scenic painting and props for the stage. Hands on exercises, needs and challenges of each area, how work is usually accomplished in the professional world. Explore different textures, materials and how to combine them.

Prerequisite(s): THE 115 or THE 118.

THE 228 Projection Design 3 Credits

In this course students will learn the basics of video editing software and its application to the performing arts. It will provide them with a general understanding of the needs for projection design, visual possibilities, explore the reasons to use video or projection in a production and its most effective applications within theatrical production limitations.

Prerequisite(s): THE 115, THE 118.

THE 229 Movement for the Actor II 3 Credits

This course is a continuation of study in movement training methodologies (Alexander Technique, Viewpoints, Laban). It will emphasize developing physical awareness and expressiveness as it relates to the development of character work. It will also continue the further cultivation of awareness of habitual psycho-physical patterns that inhibit students in their professional development.

Prerequisite(s): THE 220, THE 221.

THE 240 Script Analysis 3 Credits

This course provides students with a technique for analyzing a theatrical script in terms of its theatrical requirements and aesthetic qualities. Students will use critical research and develop the abilities to write and speak clearly about dramatic literature, the requirements of production, and the experience of performance.

Prerequisite(s): THE 107 with a minimum grade of C.

THE 250 Introduction to Costume Construction 3 Credits

This course will introduce students to basic costume construction methods and alteration skills used by professional costume shops and costume houses to create theatrical costumes. Students will complete several projects, covering hand and machine sewing, cutting, fabric identification, and will also learn how to use home and commercial patterns to cut out garments and simple patterning and draping techniques. Students will also get practical experience by assisting the costume designer and/or shop manager in supporting the needs of the current productions and will have experience taking measurements, fitting and the alteration of actual costumes.

THE 260 History of Style and Decor 3 Credits

This class is a survey of elements, furnishings, decorative motifs and trends in architecture, decor and fashion, starting with prehistory and moving through the early part of the 21st century. It is intended to be a visual survey of the major "periods" of both decor and fashion and is intended to help theatre artists to develop an understanding of visual history.

THE 290 Production II 1 Credits

Students carry out an intermediate level technical theatre crew position for one or more theatre, musical theatre, or dance productions during the semester of course registration. Intermediate level technical theatre positions are supervisory positions or assistants to department heads which include, but not limited to, assistant to a designer, Stage Manager, Wardrobe Supervisor, and Master Carpenter.

Prerequisite(s): SO standing; 3 credits of THE 190.

THE 300 Acting for the Camera 3 Credits

Focuses on the craft and artistry of acting in television and film. Examination of TV production and the styles needed for work in various media will be discussed. Physicalization, simplicity, listening, marking and other technical requirements will be explored. Staging involving different camera angles will be rehearsed. The emphasis of this class is on adapting the performance to the special needs of the camera.

Prerequisite(s): THE 107.

THE 307 Contemporary Theater 3 Credits

The richness and diversity of contemporary theatre artists across the world are discussed. Focusing on playwrights and innovative performing arts practitioners, the form and content of dramatic literature and production styles considered most significant today are examined from a global context.

THE 308 Modern Drama 3 Credits

Surveys American and European drama from 1920 to 1970. All plays are read in English translation. In these plays, theatrical artists address the great themes of this century. While doing so, they also expand the limits of theatrical expression.

THE 310 Acting III 3 Credits

Students will study in-depth techniques for exploring characterization. They will be introduced to the "magic if" and study techniques for placing themselves in the circumstances of the characters they are portraying. They will learn the interior and exterior analysis of characters using "Adler" and "Practical Aesthetics" techniques.

Prerequisite(s): THE 107, THE 110.

THE 311 Acting IV 3 Credits

Students will learn the appropriate techniques to explore characters in the three styles of Elizabethan, Restoration, and Commedia dell'arte theatre. Sessions will include movement, effective speech, and finding appropriate actions for each style. Students will also learn proper research techniques to understand cultural influences on plays and characters.

Prerequisite(s): THE 107, THE 110, THE 310.

THE 312 The Arts Abroad 3 Credits

A two-week trip abroad that includes a critical study of the music and theatre. Students are required to attend all performances, guided tours, and classes before and after the trip. A travel journal and final paper is required. A travel fee is required. Travel sites and artistic disciplines may vary year to year. May be taken more than once for credit.

Prerequisite(s): Permission of instructor.

THE 313 Advanced Voice and Speech for the Actor I 3 Credits

Actors continue their study of vocal progression of Kristen Linklater and the speech work of Patsy Rodenberg, Edith Skinner and Louis Colaianni to develop physical freedom, energy and expressivity. Advanced diagnostic work of students' voice and speech habits is explored in relationship to work with contemporary, heightened, and stylized texts.

Prerequisite(s): THE 221, THE 222.

THE 314 Advanced Voice and Speech for the Actor II 3 Credits

Continuing from THE 313, actors apply advanced principles of vocal production and speech work to contemporary, heightened and stylized texts.

Prerequisite(s): THE 313.

THE 315 Acting V: Advanced Acting for the Camera 3 Credits

This course is a continuation of the study of acting for Television, Film, Internet Content, Voiceover and other mediums.

Prerequisite(s): THE 229, THE 311.

THE 317 Scenic Design 3 Credits

The study and application of design principles as related to the stage. Incorporates the design process, decor research, styles, materials, and construction technology.

Prerequisite(s): THE 118.

THE 319 Costume Design 3 Credits

Introduction to tasks, skills and expertise of costume design and costuming techniques, relationship with other creative production and cast members. Students will create sketches and develop basic construction plans. Develop familiarity with fabrics, patterns, common challenges in costume design.

Prerequisite(s): THE 115 (for other Theatre majors) or THE 118 (for Design and Technology majors).

THE 325 Sound Design 3 Credits

Introduction to sound design and its diverse use and practice for the staged productions, e.g. plays, musicals, operas and dance.

Prerequisite(s): THE 115.

THE 329 Movement for the Actor III 3 Credits

This course is a continuation of study in movement training methodologies focusing on continued development of expressivity, ease, dynamics and authenticity in character development.

Prerequisite(s): THE 229.

THE 390 Production III 1 Credits

Students carry out an advanced level technical theatre crew position for one or more theatre, musical theatre, or dance productions during the semester of course registration. These positions include, but are not limited to, Designer, Production Stage Manager, Props Master, and Technical Director. This course may be taken up to three times for credit.

Prerequisite(s): JR or SR standing; 2 credits of THE 290 and related management/design course or permission of Instructor.

THE 400 Directing for the Stage I 3 Credits

The technique of play directing and production management. Lectures present aesthetic and theoretical concepts that are explored in workshops.

Prerequisite(s): THE 107, THE 115.

THE 401 Directing for the Stage II 3 Credits

This course is designed to provide students with an opportunity to practice and discuss the art of directing, building upon the fundamentals of directing studied in THE 400: Directing I. Further exploration of directing challenges and application of artistic vision is accomplished through the direction of scenes and short scripts.

Prerequisite(s): THE 400.

THE 410 Advanced Performance Workshop 3 Credits

An opportunity to work an entire semester on a specific style or period of theatre, e.g., Shakespeare, farce, Readers' Theater.

Prerequisite(s): THE 107, THE 110.

THE 411 Advanced Performance Online Workshop 3 Credits

An opportunity to work an entire term on a specific style or period of theatre that is most conducive to online instruction.

Prerequisite(s): THE 107, THE 110.

THE 450 NY Experience: Professional Audition Technique and the Business of Acting 3 Credits

Students engage weekly with New York professionals to learn the business of acting and strategies for successful auditions in the NY Film, Television and Theatre industry. Students will participate in mock auditions with casting directors and theatre and on camera directors to refine audition skills. Travel costs to New York are the responsibility of the student.

THE 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credits. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing, good academic standing.

THE 491 Internship in Theater 1-12 Credits

Provides junior or senior theatre majors the practical experience of working within a professional theater environment. Students must be sponsored by a theatre professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

THE 493 Contemporary Theatre Ensemble 1 Credits

This course gives Contemporary Theatre Practice students the opportunity to create a full season of student-directed, acted and designed productions.

Prerequisite(s): THE 190 (3 times) and 60 semester hours.

THE 495 Selected Topics in Theatre History 3 Credits

Intensive study of a particular topic, such as the work of one dramatic movement, one period in dramatic history, or one nation's history. Students become deeply involved in an area through research, class discussions, and individual consultation with the instructor.

THE 496 Senior Internship 6-12 Credits**THE 497 Theatre Senior Showcase 1 Credits**

This course is a senior level experience for BFA acting students, and acts as a bridge between life in the university and life as a professional actor. Through this course the students will, in collaboration with the teacher, compile and put together a showcase to introduce the students to casting and agent professionals in the industry by way of getting the showcase performance in front of a diverse range of industry professionals who will be useful in both casting and representing recently graduated talent.

THE 498 Senior Capstone 3 Credits

The senior capstone is intended for technical theatre students in their final year. Depending on the required abilities, students will be able to design sets, lights, costumes, props or sound for a mainstage show at Rider University, do research on topics related to technical Theatre, internships outside Rider University or work on projects that will improve the use of facilities, storage or equipment for Theater and Dance Department.

THE 499 Senior Honors Program 3 Credits

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, to be planned under the direction of a faculty advisor, will represent a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

The introduction to vocal performance entails coaching of selected songs, arias or repertoire from music theater and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

Prerequisite(s): successful completion of Level I voice jury.

VC 301A Voice Primary 2 Credits**VC 301B Voice Primary 1 Credits****VC 301C Voice Primary 2 Credits****VC 301E Voice Primary 2 Credits****VC 301F Voice Primary 1 Credits****VC 301G Voice Primary 2 Credits****VC 305 Singing in Italian and French 2 Credits**

Master class and private coaching in vocal performance of Italian and French language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung Italian and French.

Prerequisite(s): Successful completion of Level I jury; VC 118, VC 119.

VC 306 Singing in German and English 2 Credits

Master class and private coaching in vocal performance of German and English language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung German and English.

Prerequisite(s): Successful completion of Level I Jury; VC 120.

VC 401A Voice Primary 2 Credits**VC 401B Voice Primary 1 Credits****VC 401E Voice Primary 2 Credits****VC 401F Voice Primary 1 Credits****VC 401G Voice Primary 2 Credits****VC 408 Voice Science 3 Credits**

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

VC 433 Song Literature I 2 Credits

A survey of solo literature for voice and accompanying instrument including solo vocal music of the Baroque period and German lieder.

Prerequisite(s): MH 248.

VC 434 Song Literature II 2 Credits

A survey of solo literature for voice and accompanying instrument including French mélodie, songs by nationalist composers, English and American song.

Prerequisite(s): MH 248.

VC 457 Private Coaching 2 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 457 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 458 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 458 Private Coaching 1 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 457 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 458 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 467 Private Dramatic/Role Coaching 2 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 467 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 468 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 468 Private Dramatic/Role Coaching 1 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 467 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 468 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

GRADUATE STUDIES

Rider University's Vision and Mission

Rider's Vision

Rider University will be a premier, forward-looking university known for its Engaged Learning Program that, together with dynamic academic programs, enriching co-curricular experiences and a vibrant living and learning community, challenges students, excites their imaginations and instills in them excellence in thought and action, preparing them for highly engaged and fulfilling professional and personal lives.

Rider's Mission

Rider University welcomes students from throughout the region, across the nation, and around the world who seek to be challenged and supported as active members of our inclusive and vibrant living and learning community. Committed to student growth, transformation and leadership, we connect rigorous academic, artistic and professional programs of study with a rich array of learning experiences that engage students inside and outside the classroom. We prepare graduates to thrive professionally and to be lifelong independent learners and responsible citizens who embrace diversity, support the common good, and contribute meaningfully to the changing world in which they live and work.

Our students, alumni, faculty, staff and administrators live the **RIDER PROMISE** by being forever:

P - prepared to contribute meaningfully to the changing world in which they live and work

R - respectful of all people, rights, freedoms and individual differences

O - open to a life of independent learning

M - motivated to be responsible citizens who support the common good

I - innovative, creative and resourceful

S - skilled and thriving professionals, educators, artists and performers

E - engaged in their communities as leaders and role models

Accreditations

Rider University is regionally accredited by the Middle States Commission on Higher Education (<https://www.msche.org/>).

The University also holds many specialized accreditations that attest to the quality of its academic programs. Rider is among the select business schools to have attained AACSB International (<https://www.aacsb.edu/>) (Association to Advance Collegiate Schools of Business) accreditation in both Business and Accounting. Education programs are accredited by the Council for the Accreditation of Educator Preparation (<http://caepnet.org/>) (CAEP). The undergraduate and graduate music programs of Westminster Choir College are accredited by the National Association of Schools of Music (<https://nasm.arts-accredit.org/>) (NASM). In addition, Rider's graduate counseling programs in the College of Education and Human Services hold the Council for Accreditation of Counseling and Related Education Programs (<https://www.cacrep.org/>) (CACREP) national accreditation, and its school psychology program holds the National Association of School Psychologists (<https://www.nasponline.org/>) (NASP) accreditation. Rider's B.S. in Chemistry program is approved by the Committee on the Professional Training of

the American Chemical Society (<https://www.acs.org/content/acs/en/about/governance/committees/training.html>).

Rider University is a member of the National Collegiate Athletic Association (<http://www.ncaa.org/>) (NCAA) for both men's and women's athletics. The University offers 20 NCAA Division I sports—10 men's and 10 women's. Rider is a member of the Metro Atlantic Athletic Conference (<https://maacsports.com/>) (MAAC) for most sports while wrestling competes in the Mid-American Conference (<https://getsomemaction.com/news/2019/3/4/mac-announces-historic-wrestling-expansion.aspx>) (MAC) and field hockey competes in the Northeast Conference (<https://northeastconference.org/?path=fhockey>) (NEC).

Notice of the Title IX Coordinator

As a community of educators and learners, Rider University is committed to fostering an environment dedicated to learning and mutual respect as reflected in the University's mission, Statement of Community Values, Anti-Harassment and Non-Discrimination Policy and Title IX. All students, faculty, administrators and staff at the University have the right to expect an environment that allows them to enjoy the full benefits of their work or learning experience. The University, therefore, does not condone violations of its Anti-Harassment and Non-Discrimination Policy and treats all allegations about violations very seriously. As outlined in the Anti-Harassment and Non-Discrimination Policy (<https://www.rider.edu/about/consumer-information/handbooks-policies/ahnd>) (<https://www.rider.edu/about/consumer-information/handbooks-policies/ahnd/>) (http://www.rider.edu/sites/default/files/docs/anti-harassment-non-discrimination-2015-16_v08012016.pdf), the University prohibits all forms of discrimination, harassment, sexual assault, sexual misconduct, sexual harassment, dating violence, domestic violence and stalking.

Rider University is an Equal Opportunity and Affirmative Action Employer.

No one will be denied employment at, admission to, or the opportunity to participate in educational programs and activities at the University on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law. The University does not discriminate on the basis of any of the aforementioned protected bases in the recruitment and admission of students, the recruitment and employment of faculty, administrators and staff, and the operation of any of its programs and activities.

The Vice President for Diversity, Equity and Inclusion serves as both the Affirmative Action Officer and the Title IX Coordinator for the University, and is the resource available to anyone seeking additional information or wishing to file a complaint related to Affirmative Action and discrimination on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era, qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law.

The Affirmative Action Officer and the Title IX Coordinator for the University may be contacted as follows:

Barbara J. Lawrence

Vice President for Diversity, Equity and Inclusion
Moore Library, Room 111
609-896-5395

blawrence@rider.edu

Rider University is an Equal Opportunity and Affirmative Action Employer.

The Vice President for Diversity, Equity and Inclusion serves as both the Affirmative Action Officer and the Title IX Coordinator for the University, and is the resource available to anyone seeking additional information or wishing to file a complaint related to Affirmative Action and discrimination on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation or national origin. Norm Brodsky College of Business

The Norm Brodsky College of Business seeks to develop in students the skills needed to perform effectively in a variety of organizational settings—small business, multinational corporations, service industry, not-for-profits, family companies, government, or Wall Street—depending upon the student's interests and goals. Each graduate degree program is designed to provide an educational experience for the whole person by combining theory and practice. Since most of the students in our degree programs are employed in professional or managerial positions, they bring a wealth of business experience to share with their peers as part of the networking and learning process.

Mission Statement

The Norm Brodsky College of Business mission is to provide a dynamic and innovative business education that builds functional expertise as well as professional competencies that enable our students to be productive, confident, ethical, inclusive, and socially responsible participants in their careers and the rapidly changing global marketplace.

Within a culture that values engaged learning, a community environment, and an entrepreneurial spirit, our students develop communication, teamwork, leadership, analytical, and critical thinking skills for integrated problem solving.

Our faculty produce a combination of discipline-based, pedagogical, and applied scholarly research, and engage in professional activity that benefits our programs, the life of the college, and the common good of the external community.

Professional Accreditation

Rider University's Norm Brodsky College of Business graduate and undergraduate programs are accredited by AACSB International – The Association to Advance Collegiate Schools of Business. The initial accreditation was achieved in 1993 and reaffirmed regularly thereafter. In addition, the accounting program was further recognized for excellence with AACSB International Accounting Accreditation in 2000 and also is reaffirmed on a regular basis.

Faculty

Courses are taught in small sections, usually by full-time faculty holding doctorates. Faculty members are engaged in research in their fields, and many have relevant business experience as well. Adjunct faculty come to Rider from the ranks of executives from major corporations and thought leaders in business and service organizations.

Graduate Degree Programs and Certificate Summary

Introduction

The Norm Brodsky College of Business offers six degree programs and four certificate programs that provide individuals seeking a graduate degree in business or accounting with options to fit their career goals. The various programs offer students the flexibility to balance school with on-going professional and life demands. Whether a student is a full-time professional wanting to complete the degree on a part-time basis or is looking to pursue a degree on a full-time basis, there is a program and a mode of delivery to suit every students' needs.

The Master of Accountancy (MAcc)

The MAcc program prepares individuals for a flexible career path and, ultimately, leadership positions in the accounting profession. Those students who wish to pursue a career in public accounting will develop specialized technical competencies to meet the 150 credit-hour requirement for licensure. Accounting career paths in corporate, financial or governmental sectors are facilitated through the core curriculum and specialized elective courses. The comprehensive curriculum focuses on development of analytical and professional skills necessary for success in today's global business environment. Learn more by visiting the Master of Accountancy (p. 1352) (<http://catalog.rider.edu/graduate/colleges-schools/business-administration/graduate/colleges-schools/business-administration/programs-certificates/master-accountancy/>)page in this catalog.

Students have the option to pursue a dual degree combining the MAcc and the Master of Science in Information Systems within the Norm Brodsky College of Business. Our dual degree offering allows students to earn both degrees with fewer total credits than if earning the degrees separately. Learn more by visiting the MAcc/MS Dual Degrees (p. 1348) page in the catalog.

Please see the MAcc website at www.rider.edu/macc (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/graduate-programs/master-of-accountancy/>) for up-to-date information on the program and faculty.

The Online Master of Accountancy (OL MAcc)

Similar to the on-campus MAcc, the Online MAcc program prepares individuals for a range of careers in the accounting profession, using the online educational format. Students may enter the Online MAcc in one of six start dates and follow a structured progression of courses, earning the same graduate degree as our on-campus Master of Accountancy. An online orientation is required for all students entering the program. Learn more by visiting the Online Master of Accountancy (p. 1365) page in this catalog.

Please see the Online MAcc website at www.rider.edu/onlinemacc (https://online.rider.edu/online-masters-degrees/masters-accountancy/?Access_Code=RDU-MACC-SEO2&utm_campaign=RDU-MACC-SEO2) for up-to-date information on the program and faculty.

The Master of Business Administration (MBA)

The MBA program prepares individuals for career advancement as business professionals, managers and leaders of organizations. Structured around contemporary business knowledge and the development of strong analytical and leadership skills, Rider has developed a forward-looking MBA program built on a long tradition of business education excellence. The curriculum provides a distinctive and effective business learning environment that emphasizes advanced business theory, interpersonal and communication skills, cross-functional integration of business theory and practice, and the ability to manage in a changing environment. Learn more by visiting the Master of Business Administration (p. 1355) page in this catalog.

Students have the option to pursue a dual degree combining the MBA and the Master of Science in Information Systems degree within the Norm Brodsky College of Business. Our dual degree offering allows students to earn both degrees with fewer total credits than if earning the degrees separately. Learn more by visiting the MBA/MS Dual Degree (<http://catalog.rider.edu/graduate/colleges-schools/business-administration/mba-dual-degree-info-sys-corp-fin/>) page in the catalog.

Please see the MBA website at www.rider.edu/mba (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/graduate-programs/mba-master-of-business-administration/>) for up-to-date information on the program and faculty.

The Online Master of Business Administration (OL MBA)

The Online MBA program prepares individuals for career advancement as business professionals, managers and leaders of organizations, offering the same high quality graduate degree as our on-campus MBA, but in a flexible, online educational format. An online orientation is required for all students entering the program. Learn more by visiting the Online Master of Business Administration (p. 1367) page in this catalog.

Please see the Online MBA website at www.rider.edu/onlinemba (https://online.rider.edu/online-masters-degrees/masters-business-administration/?Access_Code=RDU-MBA-SEO2&utm_campaign=RDU-MBA-SEO2) for up-to-date information on the program and faculty.

The Master of Science in Information Systems

The Master of Science in Information Systems is a STEM designated degree that provides students with a strong foundation in information

technology and organizational leadership, followed by electives personalized to each student's career goals. The mission is to graduate a new class of information and business leaders ready to rise as CTO/ CIOs and other senior information management roles. The program begins with a core foundation of management, information technology, and analytics, followed by in-depth investigations into the relationship between technology systems and high-level business strategies. The curriculum offers universal skills for students from all over the world at our convenient central New Jersey campus. Students will graduate with a deep and profound understanding of information systems for businesses – and how to execute innovative strategies in their own work. Learn more by visiting the Master of Science in Information Systems (p. 1362) page in this catalog.

Students have the option to pursue a dual degree combining the Master of Science in Information Systems and the MBA or MAcc. Our dual degree offerings allow students to earn both degrees with fewer total credits than if earning the degrees separately. Learn more by visiting the MBA/MS Dual Degrees (p. 1348) and MAcc/MS Dual Degree pages in the catalog.

Please see the MS in Information Systems website at www.rider.edu/infosystems (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/graduate-programs/master-science-information-systems/>) for up-to-date information on the program and faculty.

Business Analytics Graduate Certificate Program

The Graduate Certificate Program in Business Analytics has been developed in response to the overwhelming demand from corporations and organizations for employees with skills and knowledge of technologies, applications and processes to analyze data in order to better inform the decisions of the organization. This skill set is applicable in all aspects of business including finance, marketing, accounting and operations. This program is designed for people with limited background in statistics and business analytics. Learn more by visiting the Business Analytics Graduate Certificate Program (p. 1342) page in this catalog.

Please see the Business Analytics Graduate Certificate Program website at www.rider.edu/businessanalytics (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/graduate-programs/business-analytics-certificate/>) for unique admission requirements, program schedules and other relevant information.

Forensic Accounting Graduate Certificate Program

The Graduate Certificate Program in Forensic Accounting is designed to meet the needs of businesses and organizations who know they must make the detection, prevention and prosecution of financial fraud a priority. There has been a tremendous increase in demand for employees with skills and knowledge of technologies, applications and processes to analyze data in order to better inform the decisions of the organization. Career opportunities in forensic investigation include positions in the government, public accounting, insurance, law, business and non-profit sectors. Students acquire the skills to identify, collect and examine evidence for accounting fraud and abuse. Learn more by visiting the Forensic Accounting Graduate Certificate Program (p. 1351) page in this catalog.

Please see the Forensic Accounting Graduate Certificate Program website at www.rider.edu/forensicacct (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/graduate-programs/forensic-accounting-graduate-certificate-program/>) for

unique admission requirements, program schedules and other relevant information.

Sport Management Graduate Certificate Program

The Graduate Certificate Program in Sport Management is designed to provide students with an edge to enter into or enhance their current business careers in the continually growing sport industry, deemed one of the most challenging industries to break into. The curriculum develops a students' breadth of knowledge on sport management business ideologies, as well as their ability to apply these concepts to the sport business industry to become effective leaders and decision makers in this unique field. Learn more by visiting the Sport Management Graduate Certificate Program (p. 1373) page in this catalog.

Please see the Sport Management Graduate Certificate Program website at <https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/certificates/sport-management-certificate> (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/certificates/sport-management-certificate/>) for unique admission requirements, program schedules and other relevant information.

Online Post-Baccalaureate Accounting Certificate Program

The Online Post-Baccalaureate Accounting Certificate provides individuals with an undergraduate degree the opportunity to enhance skill sets related to practical knowledge in the field of accounting. Course work in the program offers the opportunity to learn accounting theory and practice, and to supplement that knowledge with courses in disciplines of your choosing, including tax, decision-making, cost management, financial statements and reporting, and others. The online program offers two tracks: the Professional Accounting Track and the CPA Track. Learn more by visiting the Online Post-Baccalaureate Accounting Certificate Program (p. 1373) page in this catalog.

Please see the Online Post Baccalaureate Accounting Certificate Program website at <https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/certificates/postbacc-accounting-certificate> (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/certificates/postbacc-accounting-certificate/>) for unique admission requirements, program schedules and other relevant information.

Business Analytics Graduate Certificate Program

Program Overview

Rider's Graduate Certificate program in Business Analytics helps business professionals, with no prior background in statistics or business analytics, to develop the skills and gain the knowledge of the technologies, applications and processes used by organizations to analyze data and drive their decision making across all aspects of business.

Redesigned with the valuable input of executives in the analytics field, this certificate takes a hands-on, business approach to analytics and exposes students to a variety of software from Tableau and Excel to Rapidminer and Python.

Curriculum Overview

The Business Analytics Graduate Certificate consists of 15 graduate credits that can be completed in one year on a part-time basis. The classes are highly applied in nature, integrating project-based learning, simulations, and case studies. Students learn both the technical and management sides of business analytics to harness the power of this critical tool in both operational and strategic decision making. There is one foundation course in statistics (PMBA 8051) which must be satisfied before starting on the core of the certificate.

Completion of the Certificate

To complete this certificate program, students must meet the following requirements:

- Overall GPA of 3.0 in the Business Analytics Certificate Program; and,
- Cannot have any grades below a "C".

Current MAcc, MBA or MS-IS students at Rider

Current grad business students can work the Business Analytics Graduate Certificate Program into their graduate degree program. Please contact the dean's office to plan how the Business Analytics Graduate Certificate will fit into your graduate program.

Certificate Awarded:

- Business Analytics Graduate Certificate

Business Analytics Graduate Certificate Program Requirements

(15 credits)

Foundation Course for the Program

Students must demonstrate proficiency in statistics by satisfying ONE of the following conditions before they can move into the main requirements of the program:

- Earn a grade of "B" or better in course work equivalent to Rider's MSD 205 Business Statistics and BDA 201 Introduction to Business Analytics at an accredited four-year institution within six years prior to the semester admitted; OR
- Complete PMBA 8051 Fundamentals of Statistical Analysis with a grade of "B" or better; OR

- Take the proficiency exam for PMBA 8051 and pass with a grade of 80% or better. Student must have approval from the Dean's Office in order to use this option.

Core Curriculum

Code	Title	Credits
PMBA 8351	Business Analytics Fundamentals ¹	3
PMBA 8312	Business Intelligence Tech-Data Mining	3
PMBA 8317	Applied Data Management for Business Users	3
PMBA 8355	Visual Analytics ²	3
PMBA 8358	Data-Driven Strategies for Business	3
Total Credits		15

¹ PMBA 8351 is a prerequisite for PMBA 8355 and PMBA 8358.

² PMBA 8355 is waived for students who have taken BDA 205 or equivalent in which case a substitution will be made using another PMBA class approved by the department.

Certificate Completion

To complete the BA Certificate Program, students must meet the following requirements:

- Overall GPA of 3.0 in the Business Analytics Certificate Program;
- Cannot have any grades below a "C".

Business Analytics Graduate Certificate Program Policies

Admission

To be admitted to the Business Analytics Graduate Certificate Program, students must meet the following requirement:

Completion of at least a bachelor's degree or equivalent from an accredited institution of higher learning with a GPA of 3.0 or better.

Certificate Completion

To complete the BA Certificate Program, students must meet the following requirements:

- Overall GPA of 3.0 in the Business Analytics Certificate Program;
- Cannot have any grades below at "C".

Courses and Descriptions

PMBA 8051 Fundamentals of Statistical Analysis 3 Credits

Covers basic statistical techniques useful in business decision making. Includes descriptive statistics, event probability, random variables, sampling distributions, regression analysis and topics in statistical inference.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions.

This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8351 Business Analytics Fundamentals 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis. Students who have earned credits for CIS 350 or equivalent cannot take PMBA 8351 for credit.

Prerequisite(s): PMBA 8051.

PMBA 8355 Visual Analytics 3 Credits

This graduate course will equip the students with the fundamental skills to perform visual analytics with Tableau. Specifically, students will learn how to prepare a dataset for visual analysis, and how to “tell a good story” using basic and advanced visualizations. At the completion of this course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience. Students who have earned credits for BDA 205 or equivalent cannot take PMBA 8355 for credit.

Prerequisite(s): PMBA 8351.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

Concentrations for MBA, MACC & EMBA Students

Concentrations Overview

The required courses in the MBA, MAcc and EMBA provide a distinct and consistent advanced business knowledge and skill structure for all students in the programs. The electives allow the student to tailor the

graduate educational experience to fit their individual needs by pursuing a specific concentration or strategically selecting different elective classes that enhance their overall professional skills.

Concentrations are comprised of three-course elective (nine credit hours) sequences selected from a menu of electives by either the functional area (**business analytics, finance, forensic accounting, information systems**) or interdisciplinary area (**sport management**.) Students in the online MAcc or MBA may have a limited selection of electives based on what is available in the online format.

Electives counted toward a concentration must carry a grade of “B” or better, and students must achieve a 3.2 GPA in those electives.

Courses and Descriptions

MACC 662 Auditing Practice & Problems 3 Credits

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

Prerequisite(s): ACC 400 or ACC 400P.

MACC 663 Fraud and Forensic Accounting 3 Credits

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8040 and PMBA 8020 or the Preliminary Accounting Requirements.

Prerequisites: PMBA 8040 or VL12 with a score of WV AND PMBA 8020 or VL10 with a score of WV OR VL25 with a score of WV OR VL26 with a score of WV.

PMBA 8311 Information Security for the Enterprise 3 Credits

This course will teach students how businesses can implement security policies which will protect their significant investment in computer systems. The course topics include but are not limited to security attacks, attack prevention and mediation and security audits. Security devices, firewalls, PC and server security, authentication methods and procedures, and network security will all be discussed. The course will be delivered through a combination of hands-on labs where students will evaluate and implement computer security on computers, and class lectures.

Prerequisite(s): PMBA 8210.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8315 Globalization and Technology 3 Credits

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8318 Business Analysis and Design 3 Credits

This course will integrate the skills of business analysis with those of system design. Students will learn a dynamic visioning/planning process which will guide the development of a technology architecture model for the business enterprise. Students will learn requirements elicitation techniques and use cases. Design methods such as object modeling and prototyping and data modeling with enterprise relationship diagrams will also be covered.

Prerequisite(s): PMBA 8210.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8344 Financial Market Operations 3 Credits

Flow of funds analysis is used to study financial intermediation and interest rate determination in money and capital markets. Includes the flow of funds accounts, funds flow through financial institutions, the demands for and supply of credit by economic sectors, and the impact of public policies on financial market behavior.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8346 Financial Modeling 3 Credits

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8347 Portfolio Management 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8348 Fixed Income Securities and Alternative Investments 3 Credits

This is an introductory course in fixed income securities and alternative investments. The first part of the course covers the markets for fixed income securities and their derivatives. Valuation of these securities and determination of the risk inherent in these securities are discussed. Methods for managing that risk, such as hedging and credit derivatives, are also discussed. The second part of the course covers a variety of alternative investments, including real estate funds, venture capital, hedge funds, and commodities. Valuation of these investments and determination of their risk are discussed.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8349 Personal Financial Planning 3 Credits

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8351 Business Analytics Fundamentals 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis. Students who have earned credits for CIS 350 or equivalent cannot take PMBA 8351 for credit.

Prerequisite(s): PMBA 8051.

PMBA 8352 Design Thinking and Innovation 3 Credits

This graduate course on Design Thinking and Innovation provides students with a framework for dealing with unstructured problems, and for managing the innovation process. This course introduces students to design thinking as a systematic approach to innovation, but also guide students through the process to identify and translate broadly defined opportunities into actionable innovation possibilities. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

Prerequisite(s): PMBA 8210.

PMBA 8353 Digital Futures 3 Credits

This course is a holistic course drawing on all areas of Information Technology. It leverages the in-depth understanding of Technology that MSIS students possess and transforms such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. It will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future. Case studies and readings will familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology/innovation. Students will be engaged in a discussion of multi-firm cases of strategic innovation and will examine policy decisions by the firm and various ethical dilemmas engendered by technological changes of the last four decades.

Prerequisites: PMBA 8210.

PMBA 8355 Visual Analytics 3 Credits

This graduate course will equip the students with the fundamental skills to perform visual analytics with Tableau. Specifically, students will learn how to prepare a dataset for visual analysis, and how to "tell a good story" using basic and advanced visualizations. At the completion of this course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience. Students who have earned credits for BDA 205 or equivalent cannot take PMBA 8355 for credit.

Prerequisite(s): PMBA 8351.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

PMBA 8402 The Business of Sports 3 Credits

This course examines diverse managerial issues involving the sports industry. The course covers topics at the league level, the team level, the athlete-agent level, and the college level. The constituencies with interests in sports issues such as athletes, fans, media, companies, advertisers, and legislators are discussed along with global aspects of sports enterprises. Valuation issues related to sports teams are also covered. The course is designed to integrate all aspects of businesses as they apply to sports with an emphasis on strategy, management, marketing, and finance.

PMBA 8403 Sport Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of hands-on labs, a data project, a research project, quizzes, and online discussions. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports. This course assumes a basic level of skill working with Microsoft Excel.

Prerequisite(s): PMBA 8051 or waiver.

PMBA 8404 Sports Marketing 3 Credits

This course explores the complex and diverse nature of sports marketing. It applies fundamental marketing concepts to the sports industry, including the marketing mix, consumer behavior, marketing research, segmentation analysis, and assessment of marketing programs specific to sports. Guidelines for the formulation of marketing plans and strategies will be included. Trends, issues, and problems influencing the industry will also be examined. Discussions cover professional, collegiate, non-profit, and other areas of the sport industry.

PMBA 8405 Legal and Ethical Issues in Sports 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues which will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be performed at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and, during the semester he/she receives credit for the internship, is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

Dual Degrees

Overview

The Dual Degree Program allows students to build on the best of Rider's MBA or MAcc program by combining it with the in-depth technical expertise developed in its Master of Science degree in Information Systems. The Dual Degree permits students to share three classes (9 credits) from the MBA or the MAcc with the requirements of the

MS degree to earn the second degree with only 21 additional credits. (assuming all foundation requirements have been met.)

Students who are currently in the MBA, MAcc or MS program may easily opt into the dual degree program. Planning should begin early so students can ensure they are taking the correct elective classes that are shared between the two degrees. Students who have completed the MBA, MAcc or MS degree in the last five years may be eligible to add the second degree by applying for readmission to the University.

As with the other graduate business degree programs at Rider, the curriculum within the dual degree may include foundation classes, depending on the background of the individual student. Foundation courses are shared between the MBA or MAcc and the MS degrees. Students will be provided with a list of all the classes they will need to take in the program when they are admitted.

Rider's Graduate Business Programs are accredited by the AACSB International (<http://www.aacsb.edu/>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide

Classes are offered in the evening, Monday through Thursday, and in the online and hybrid formats. Courses are offered during the fall, spring and summer semesters. Students can pursue dual degrees on a full or part-time basis. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well.

Degree Offered:

- MBA/MS in Information Systems
- MAcc/MS in Information Systems

MBA/MS in Information Systems

(57 credits)

Code	Title	Credits
Courses Required for the MBA:		36
PMBA 8000	Executive Communications	
PMBA 8210	Information Technology Management ¹	
PMBA 8220	Strategic Accounting for Manager	
PMBA 8230	Managerial Economics	
PMBA 8240	Applied Corporate Finance	
PMBA 8250	Operations & Supply Chain Management ¹	
PMBA 8260	Mkt Analysis & Decision Making	
PMBA 8270	Adv. Organizational Behavior	
PMBA 8290	Legal and Ethical Aspects of Management	
PMBA 8880	Strategic Management	

Two Elective Courses (one shared with the MS in Information Systems elective) ^{1,2}	
Additional Required Courses for the MS:	21
PMBA 8311 Information Security for the Enterprise	
PMBA 8314 Project Management	
PMBA 8317 Applied Data Management for Business Users	
PMBA 8318 Business Analysis and Design	
PMBA 8352 Design Thinking and Innovation	
PMBA 8353 Digital Futures	
One Elective Course ³	
Total Credits	57

¹ These courses are shared between programs and counted only once to satisfy both MBA and MS dual degree requirements.

² One of these electives may be selected from any MAcc or PMBA course (except for PMBA 80xx foundation courses) for which the student has satisfied the foundation requirement. Must be different from any of the courses, including the elective, taken in the MS in Information Systems. The second elective must be selected from the following list: PMBA 8312, PMBA 8351, PMBA 8353, PMBA 8355, or PMBA 8358, and will be shared with the MS in Information Systems program.

³ This elective must be selected from the following list: PMBA 8312, PMBA 8351, PMBA 8353, PMBA 8355, PMBA 8358 and must be different than the MBA electives taken.

MAcc/MS in Information Systems

(51 credits)

Code	Title	Credits
Required Courses for the MAcc:¹		21
MAcc 611	Professional Research and Communication	
MAcc 650	Seminar in Federal Taxes	
MAcc 652	Analysis of Accounting Data	
MAcc 654	Issues in Financial Reporting	
MAcc 664	Issues in Managerial Accounting	
MAcc 662	Auditing Practice & Problems	
PMBA 8312	Business Intelligence Tech-Data Mining ² or PMBA 831 Business Analytics Fundamentals	
Required Courses for the MS in Information Systems :		24
PMBA 8210	Information Technology Management	
PMBA 8250	Operations & Supply Chain Management	
PMBA 8311	Information Security for the Enterprise	
PMBA 8314	Project Management	
PMBA 8317	Applied Data Management for Business Users ³	
PMBA 8318	Business Analysis and Design	
PMBA 8352	Design Thinking and Innovation	
PMBA 8353	Digital Futures	
Elective Courses for the Dual Degree:		6
Select one of the following:		
PMBA 8260	Mkt Analysis & Decision Making	
PMBA 8270	Adv. Organizational Behavior	
PMBA 8290	Legal and Ethical Aspects of Management	
PMBA 8351	Business Analytics Fundamentals	
PMBA 8355	Visual Analytics	
PMBA 8358	Data-Driven Strategies for Business	

Select one PMBA or MAcc class not already completed as a requirement.⁴

Total Credits **51**

¹ The MAcc requires three elective courses. Two of those electives must be shared with classes in the MS in Information Systems. These shared classes are denoted in the footnotes below. The last elective is shown in the "electives" section.

² One of these required classes in the MAcc is shared with the MS in Information Systems as an elective in that program.

³ This required class in the MS in Information Systems is shared with the MAcc as an elective in that program.

⁴ This elective may be taken in any PMBA or MBA class except for PMBA 8010, PMBA 8020, PMBA 8030, PMBA 8040, PMBA 8052, PMBA 8060, or PMBA 8070. This elective is not shared between programs.

Courses and Descriptions

PMBA 8000 Executive Communications 3 Credits

Professionals spend about seventy percent (70%) of their work-time communicating with other people. It is therefore no surprise that, without good communication skills, it is impossible to succeed in one's workplace. Yet, effective communication skills do not come naturally for most people. This course aims to prepare you to speak compellingly, write clearly and concisely, listen actively and critically, and persuade others by constructing sound arguments. To that end, we will learn the key aspects of communication: audience analysis, communicator credibility, message construction, and delivery. Deliverables will include written documents and oral presentations, as well as both individual and team presentations. Importantly, in doing so, you will enhance your leadership potential in your workplace by motivating your colleagues, team, and organization to work toward important goals.

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): PMBA 8020.

PMBA 8230 Managerial Economics 3 Credits

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8020.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of PMBA 8051 and 8052.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): PMBA 8060.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): PMBA 8070.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8311 Information Security for the Enterprise 3 Credits

This course will teach students how businesses can implement security policies which will protect their significant investment in computer systems. The course topics include but are not limited to security attacks, attack prevention and mediation and security audits. Security devices, firewalls, PC and server security, authentication methods and procedures, and network security will all be discussed. The course will be delivered through a combination of hands-on labs where students will evaluate and implement computer security on computers, and class lectures.

Prerequisite(s): PMBA 8210.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8318 Business Analysis and Design 3 Credits

This course will integrate the skills of business analysis with those of system design. Students will learn a dynamic visioning/planning process which will guide the development of a technology architecture model for the business enterprise. Students will learn requirements elicitation techniques and use cases. Design methods such as object modeling and prototyping and data modeling with enterprise relationship diagrams will also be covered.

Prerequisite(s): PMBA 8210.

PMBA 8351 Business Analytics Fundamentals 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis. Students who have earned credits for CIS 350 or equivalent cannot take PMBA 8351 for credit.

Prerequisite(s): PMBA 8051.

PMBA 8352 Design Thinking and Innovation 3 Credits

This graduate course on Design Thinking and Innovation provides students with a framework for dealing with unstructured problems, and for managing the innovation process. This course introduces students to design thinking as a systematic approach to innovation, but also guide students through the process to identify and translate broadly defined opportunities into actionable innovation possibilities. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

Prerequisite(s): PMBA 8210.

PMBA 8353 Digital Futures 3 Credits

This course is a holistic course drawing on all areas of Information Technology. It leverages the in-depth understanding of Technology that MSIS students possess and transforms such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. It will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future. Case studies and readings will familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology/innovation. Students will be engaged in a discussion of multi-firm cases of strategic innovation and will examine policy decisions by the firm and various ethical dilemmas engendered by technological changes of the last four decades.

Prerequisites: PMBA 8210.

PMBA 8355 Visual Analytics 3 Credits

This graduate course will equip the students with the fundamental skills to perform visual analytics with Tableau. Specifically, students will learn how to prepare a dataset for visual analysis, and how to "tell a good story" using basic and advanced visualizations. At the completion of this course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience. Students who have earned credits for BDA 205 or equivalent cannot take PMBA 8355 for credit.

Prerequisite(s): PMBA 8351.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

PMBA 8880 Strategic Management 3 Credits

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

Prerequisite(s): All other MBA breadth courses.

Forensic Accounting Graduate Certificate

Program Overview

Over the last four decades, the field of forensic accounting has grown tremendously as increased federal legislation and more stringent auditing standards have helped to make the detection, prevention and prosecution of financial fraud a priority.

Career opportunities in forensic investigation include positions in the government, public accounting, insurance, law, business and non-profit sectors. The role of forensic accountants is far-reaching: these skilled professionals combine their accounting knowledge with critical investigative and analysis skills. They help to manage and reduce risk; identify and prosecute criminal activities such as embezzlement or illegally obtained funds; and advise on critical financial transactions from mergers and acquisitions to bankruptcy proceedings.

For the convenience of professionals, Rider's 12-credit Forensic Accounting Graduate Certificate program is offered in a variety of delivery formats: all-online, blended or on-campus evening classes. Classes are offered year-round with start dates in the spring, summer and fall.

You can complete the certificate in as little as two semesters, acquiring the skills to identify, collect and examine evidence for accounting fraud and abuse. Learning outcomes are:

- Identify, detect and prevent common fraud schemes and fraudulent financial reporting
- Recognize misappropriation of assets and corruption
- Gather and deliver evidence for the purpose of litigation
- Support fraud cases through documentation and analysis for litigation support
- Understand how internal control systems minimize or mitigate the potential for fraud including control frameworks and specific control procedures

Completion of the Certificate

You must achieve an overall GPA of 3.0 in the program, with no grades earned below a "C", to earn the certificate.

Certificate Offered

- Certificate in Forensic Accounting

Related Programs

- Master of Accountancy (MAcc) (p. 1352)
- Business Analytics Graduate Certificate (p. 1342)

Program Requirements

(12 credits)

The Forensic Accounting Graduate Certificate requires students to complete four graduate-level courses (12 credit hours) to complete the program.

Foundation Courses for the Program

Before starting with the core program's courses, students must demonstrate technology proficiency by satisfying ONE of the following conditions:

1. Earn a grade of "C" or better in Rider University's ACC 310, ACC 311 and ACC 400 or similar coursework at an accredited four-year institution within six years prior to the semester admitted;

OR

2. Complete PMBA 8020 with a grade of B or better AND PMBA 8324 and ACC 400 with a grade of C or better.

Core Requirements for the Program

Code	Title	Credits
MAcc 663	Fraud and Forensic Accounting	3
MAcc 665	Fraud Detection and Deterrence	3
MAcc 667	Business Valuations: Fundamentals, Techniques and Theory	3
PMBA 8351	Business Analytics Fundamentals ¹	3
	or PMBA 8312 Business Intelligence Tech-Data Mining	
Total Credits		12

¹ The prerequisite for PMBA 8351 is PMBA 8051. Students who choose to take this class must either take PMBA 8051 or have it waived with previous coursework. Please email gradbusiness@rider.edu (<http://catalog.rider.edu/graduate/colleges-schools/business-administration/forensic-accounting-grad-cert/> & a href=mailto:gradbusiness@rider.edu>gradbusiness@rider.edu & (/) for more information.

Courses and Descriptions

MAcc 663 Fraud and Forensic Accounting 3 Credits

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MAcc 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MAcc 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8040 and PMBA 8020 or the Preliminary Accounting Requirements.

Prerequisites: PMBA 8040 or VL12 with a score of WV AND PMBA 8020 or VL10 with a score of WV OR VL25 with a score of WV OR VL26 with a score of WV.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions.

This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

Master of Accountancy (MAcc)

Program Overview

The Master of Accountancy develops the technical and interpersonal skills necessary for success in the accounting profession and fulfills the 150 credit-hour requirement for CPA licensure. Students can choose a concentration in business analytics, finance, information systems, sport management, or forensic accounting. This approach allows students to customize their degree.

Many full-time students enter the MAcc directly after completing their undergraduate degree and take sections of the CPA exam during the MAcc program. Most part-time students in the program are employed in professional or managerial positions and bring business experience to share. There are internship opportunities for MAcc students.

Student Learning Outcomes

The learning outcomes and competencies below are the core of the Rider University Norm Brodsky College of Business MAcc program. They provide the foundation for its curriculum and are designed to enhance student success, both throughout the program and post-graduation as they pursue their career paths in accounting and beyond.

- Comprehend the conceptual foundations and the legal and regulatory environment of accounting and research, and analyze current issues

in financial reporting within these frameworks using critical thinking and professional judgment.

- Demonstrate technical accounting knowledge and the ability to apply and integrate this knowledge through financial statement analysis using appropriate techniques in various decision-making settings.
- Exhibit professional competencies including working in teams, presentation and written communication skills, analytical reasoning, and problem solving ability.
- Identify, research and analyze international accounting issues.

Curriculum Overview

Courses are taught in small sections by full-time faculty who research in their fields and by part-time faculty who are active in the profession. The accounting program has earned the AACSB Accounting accreditation (<https://www.aacsb.edu/>), the international standard of excellence in accounting and business education that is held by less than 3% of accounting programs worldwide.

Classes are offered in the evening, Monday through Thursday, and in the online format. All required courses are offered during the fall, spring and summer semesters. Students can pursue the MAcc on a full or part-time basis.

- Information Systems (p. 330)
- Sport Management (p. 1373)

Master of Accountancy Program Requirements

The MAcc program consists of 30 semester hours at the graduate level (MAcc and PMBA only). The program includes 21 semester hours in required courses and 9 semester hours in MBA or MAcc electives. Please refer to the MBA course descriptions for a listing of PMBA elective courses. MAcc students may choose to use both MAcc and MBA electives to create concentrations. See the "Concentration (p. 1344)" section provided in this catalog. Required graduate accounting courses are offered each semester. Graduate accounting electives are typically offered on a three-semester rotational basis. Students without an educational background in accounting may also be required to take an additional 22.5 credit hours of foundation requirements based on their educational and professional experience.

(30 credits)

Code	Title	Credits
MAcc 650	Seminar in Federal Taxes	3

¹ The prerequisite for PMBA 8351 is PMBA 8051. Students who choose to take this class must either take PMBA 8051 or have it waived with previous coursework. Please email gradbusiness@rider.edu (<http://catalog.rider.edu/graduate/colleges-schools/business-administration/programs-certificates/master-accountancy/gradbusiness@rider.edu>) for more information.

Foundation Requirements

MAcc students who hold an undergraduate degree in an area other than business will need to complete all of the Business Foundation Requirements and Accounting Foundation Requirements before taking graduate level Accounting courses.

MAcc students who hold an undergraduate business degree in an area other than accounting may be eligible to waive the Business Foundation Requirements but must complete the Accounting Foundation Requirements before taking graduate level Accounting Courses.

MAcc students who hold an undergraduate degree in accounting may be eligible to waive the Business Prerequisite Requirements and the Accounting Prerequisite Requirements.

Waiver of these courses follows the guidelines defined under the Waiver of Courses section.

Business Foundation Requirements

4.5 credits (for students with a non-business undergraduate degree or outdated course work that does not meet the waiver requirements).

Code	Title	Credits
PMBA 8020	Fundamentals of Accounting	3
PMBA 8040	Basic Financial Principles	1.5
Total Credits		4.5

Accounting Foundation Requirements

18 credits (for non-accounting business undergraduate degree or outdated course work that does not meet the waiver requirements)

Code	Title	Credits
ACC 302	Cost Management	3
ACC 310	Acct Theory & Concepts I	3
ACC 311	Acct Theory & Concepts II	3
ACC 400	Principles of Auditing	3

ACC 405	Acct Problems & Practice	3
ACC 410	Fund of Federal Taxation	3
Total Credits		18

The Master of Accountancy (MAcc)–Waiver of Courses

A waiver of a course from PMBA and ACC foundation requirements in the MAcc may be granted under the following conditions:

- Student has taken the equivalent course less than six years ago and received a grade of C or above.
- Student has taken the equivalent course more than six years ago and received a grade of C or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Dean's Office.

A PMBA or ACC foundation course must be taken if:

- Student has never taken the undergraduate equivalent class.
- Student received below a C in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

When the MAcc "Foundation Requirements" are waived, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced coursework. The student also has the option to take the foundation course despite it being waived. Any appeal of a waiver decision based on previous course work must be made to the Dean's Office within the first semester of the program.

Courses and Descriptions

MAcc 611 Professional Research and Communication 3 Credits

Effective communication and interpersonal skills are key for success in the accounting profession. This course is an interactive seminar designed to provide a strong foundation in professional research and to develop communication and interpersonal skills with an emphasis on the communication and interpersonal challenges that accountants commonly face. Course work is primarily base based and includes a wide variety of video and written assignments that require research to develop accounting services and present to guest professionals and the "client".

Prerequisite(s): completion of Preliminary Accounting requirements.

MAcc 650 Seminar in Federal Taxes 3 Credits

The course examines tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts. Topics include tax issues involved in the decision to select a particular form of business organization, fundamental concepts of interstate, international, and New Jersey taxation, and to expose the student to a variety of common tax returns, applicable to the above topics.

Prerequisite(s): completion of ACC 410 or ACC 410P.

MAcc 652 Analysis of Accounting Data 3 Credits

This course uses information technology and data analytical techniques to conduct analysis needs commonly faced by accounting professionals. The course uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics.

Prerequisite(s): completion of Preliminary Accounting requirements.

MAcc 654 Issues in Financial Reporting 3 Credits

This course uses the conceptual framework to examine standards for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MAcc 656 International Dimensions of Accounting 3 Credits

This course examines the global applications of accounting principles and practices, including the relationship between international accounting issues and company strategy. Topics include theoretical and societal considerations of international accounting issues, the identification of transnational accounting practices, and attempts at harmonization.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MAcc 658 Governmental and Not-for-Profit Accounting 3 Credits

This course provides an in-depth study of the concepts, objectives and techniques of the evolving field of accounting for nonprofit institutions and organizations. Areas emphasized include municipal and state governmental units, hospitals, colleges and universities and service organizations. Problems, cases and selected readings are employed.

Prerequisite(s): completion of Preliminary Accounting requirements.

MAcc 662 Auditing Practice & Problems 3 Credits

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

Prerequisite(s): ACC 400 or ACC 400P.

MAcc 663 Fraud and Forensic Accounting 3 Credits

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 664 Issues in Managerial Accounting 3 Credits

This course examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

Prerequisite(s): completion of ACC 302, ACC 302P or PMBA 8220.

MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8040 and PMBA 8020 or the Preliminary Accounting Requirements.

Prerequisites: PMBA 8040 or VL12 with a score of WV AND PMBA 8020 or VL10 with a score of WV OR VL25 with a score of WV OR VL26 with a score of WV.

MACC 668 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisites: ACC 302, ACC 302P or PMBA 8220.

MACC 670 Accounting Internship 3 Credits

This course provides on-site experiential learning through supervised employment with a participating company. Students will be reviewed periodically by senior staff. Academic assignments, including a formal report, will be developed in conjunction with a faculty member. Permission of the instructor is required.

MACC 690 Special Topics 3 Credits

This course provides study of a timely topic that represents a dimension of business administration or accounting that not covered in a regular course. Such a topic may be offered by the Accounting Department. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions.

This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8351 Business Analytics Fundamentals 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis. Students who have earned credits for CIS 350 or equivalent cannot take PMBA 8351 for credit.

Prerequisite(s): PMBA 8051.

Master of Business Administration (MBA)

Program Overview

In recent years, businesses have become more global in their outreach, increasingly driven by analytics in their decision making and progressively more entrepreneurial in their approach. These shifts have lead to a need for business professionals to regularly make decisions outside of their functional areas of operation, to be better problem solvers and decisions makers who understand how their actions impact the entire organization and the competitive landscape. The Rider MBA program provides advanced preparation for successful participation in a rapidly changing world. Students are exposed to real-world situations that encourage them to question and analyze.

Student Learning Outcomes

The learning outcomes and competencies below are the core of the Rider University Norm Brodsky College of Business MBA program. They provide the foundation for its curriculum and are designed to enhance student success, both throughout the program and post-graduation. There are three main focus areas: decision-making, leadership, and communication.

Decision-making - Make strategic decisions that are integrative.

Leadership - Manage organizational activities in a global environment.

Communication - Effectively communicate business information in the appropriate format.

Curriculum Overview

The Rider MBA classes include foundation, core and elective classes. Depending on the background of the individual student, completion of the degree will require between 36 and 51 credits. The MBA program is accredited by the AACSB International (<http://www.aacsb.edu/>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide

Classes are offered in the evening, Monday through Thursday, as well as in the online and hybrid formats. All prerequisite courses are offered during the fall, spring and summer semesters. Students can pursue the MBA on a full or part-time basis. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well.

There are two electives in the MBA program which allows MBA students to customize their degree to suit their needs. By adding a third elective, MBA students may choose to concentrate in a particular area of interest. See the "Concentrations (p. 1344)" section provided in this catalog to learn more about the concentrations that are available. The other

approach to electives is to select two classes that enhance the student's knowledge in selected topics.

Program Requirements

(36 credits)

Course Requirements

The MBA Program requires a core of 30 credit hours of Breadth course requirements and 6 credit hours of elective courses. Students may also be required to take up to an additional 15 credit hours of Foundation requirements based on their educational and work experience. A student must complete between 36 and 51 semester hours for the MBA, depending on the number of Foundation courses that are waived. To enrich the MBA degree, students may take electives in the areas of finance, information systems, business analytics, forensic accounting and sport management.

Breadth Course Requirements

Code	Title	Credits
PMBA 8000	Executive Communications ¹	3
PMBA 8210	Information Technology Management	3
PMBA 8220	Strategic Accounting for Manager	3
PMBA 8230	Managerial Economics	3
PMBA 8240	Applied Corporate Finance	3
PMBA 8250	Operations & Supply Chain Management	3
PMBA 8260	Mkt Analysis & Decision Making	3
PMBA 8270	Adv. Organizational Behavior	3
PMBA 8290	Legal and Ethical Aspects of Management	3
PMBA 8880	Strategic Management	3

Elective Courses

Students are required to complete 6 semester hours of electives to complete the program requirements. ²

Total Credits 36

¹ Students are required to take PMBA 8000 as one of the first breadth classes they take in the program.

² Students pursuing a concentration as part of their degree will need to complete 9 semester hours of electives by taking an additional elective.

Foundation Requirements – Courses

(15 credits for non-business undergraduates or business undergraduates with outdated course work or course work that did not meet waiver standards)

Code	Title	Credits
PMBA 8020	Fundamentals of Accounting	3
PMBA 8030	Economic Analysis	3
PMBA 8040	Basic Financial Principles	1.5
PMBA 8051	Fundamentals of Statistical Analysis	3

PMBA 8070	Management: Theory & Application	1.5
Total Credits		15

The Master of Business Administration (MBA) – Waiver of Courses

A waiver of a course from foundation requirements may be granted under the following conditions:

I) *PMBA foundation class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Dean's Office.

II) *PMBA foundation class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Dean's Office.

III) *PMBA foundation class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

If a student is granted a waiver for any foundation requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or

seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Dean's Office within the first semester of the program.

MBA Breadth Course Waivers

It is possible for students to substitute an elective for an MBA Breadth course in the following situations, so as not to duplicate course work that may have been done as undergraduates:

- Students who graduated in the last five years as marketing majors and had at least a 3.0 in their marketing courses will not need to take PMBA 8260 Mkt Analysis & Decision Making. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years as accounting majors who graduated with at least a 3.0 in their accounting courses, will not need to take PMBA 8220 Strategic Accounting for Manager. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years with an undergraduate degree in Information Systems/Technology, Computer Science or Electrical Engineering with at least a 3.0 GPA in their major area courses and have at least five years professional experience in IS/IT and strategy, OR for students with a graduate degree in Information Systems/Technology, Computer Science or Electrical Engineering and over five years professional experience in IS/IT and strategy will not need to take PMBA 8210 Information Technology Management. In its place, students must take an elective from either the MBA or MAcc program.
- Students who graduated in the last five years as supply chain majors and had at least a 3.0 in their supply chain courses will not need to take PMBA 8250 Operations & Supply Chain Management. In its place, students must take an additional elective from the MBA or MAcc programs.

Course Descriptions

PMBA 8000 Executive Communications 3 Credits

Professionals spend about seventy percent (70%) of their work-time communicating with other people. It is therefore no surprise that, without good communication skills, it is impossible to succeed in one's workplace. Yet, effective communication skills do not come naturally for most people. This course aims to prepare you to speak compellingly, write clearly and concisely, listen actively and critically, and persuade others by constructing sound arguments. To that end, we will learn the key aspects of communication: audience analysis, communicator credibility, message construction, and delivery. Deliverables will include written documents and oral presentations, as well as both individual and team presentations. Importantly, in doing so, you will enhance your leadership potential in your workplace by motivating your colleagues, team, and organization to work toward important goals.

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): PMBA 8020.

PMBA 8230 Managerial Economics 3 Credits

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8020.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of PMBA 8051 and 8052.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): PMBA 8060.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): PMBA 8070.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8303 International Business Study Tour 3 Credits

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8319 Selected Topics in CIS 3 Credits

The study of a topic (or combination of topics) that represents some dimensions of computer information systems or has important and direct implications for CIS management. Topics recently covered include project management, data mining and data privacy. Theoretical foundations as well as applications may be explored. Readings, research, lectures, projects, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8321 Managerial Taxation and Strategy 3 Credits

This course is designed for students who are embarking on (or already in) careers in investment banking, corporate finance, strategy consulting, money management, or venture capital. The focus of the course comes from integrating the tax law with the fundamentals of corporate finance and microeconomics.

Prerequisite(s): PMBA 8020.

PMBA 8324 Financial Accounting & Report 3 Credits

Focus is on analysis and evaluation of alternative accounting methods and the relationship to company policy. Insight is gained through the reading of articles in leading accounting and financial periodicals and Internet research. Cases demonstrating financial reporting methods are assigned and discussed in class. Term project required. Topics include financial instruments, earnings per share, deferred taxes, post-retirement benefits and the accounting rule-making process.

Prerequisite(s): PMBA 8020 and PMBA 8040.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8346 Financial Modeling 3 Credits

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8347 Portfolio Management 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8348 Fixed Income Securities and Alternative Investments 3 Credits

This is an introductory course in fixed income securities and alternative investments. The first part of the course covers the markets for fixed income securities and their derivatives. Valuation of these securities and determination of the risk inherent in these securities are discussed. Methods for managing that risk, such as hedging and credit derivatives, are also discussed. The second part of the course covers a variety of alternative investments, including real estate funds, venture capital, hedge funds, and commodities. Valuation of these investments and determination of their risk are discussed.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8349 Personal Financial Planning 3 Credits

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8365 International Marketing Management 3 Credits

Examination of the nature and scope of global marketing activities, including the theoretical framework of international marketing, foreign marketing environments, multinational markets, MNC information systems, strategic marketing decisions, and organization for transnational marketing. This course applies to the Global Business concentration.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8369 Selected Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision-making may be explored. Readings, research, lectures, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8371 Human Resource Management 3 Credits

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

Prerequisite(s): PMBA 8070.

PMBA 8372 Management Skills 3 Credits

This is a practicum in interpersonal skills that are useful for practicing managers. Topics include motivating oneself and others, persuasive communication, creative problem-solving, managing conflict, using power constructively, managing change, and team management. Students are given opportunities to practice these skills in class and are asked to apply them to their current lives and report on the results of their applications. The course will provide students with a better understanding of the art of managing and of themselves as current or future managers.

Prerequisite(s): PMBA 8070.

PMBA 8375 International Management 3 Credits

This course focuses on the complexities of working and managing in a global business environment. Emphasis is placed on cross-cultural awareness, international communication, and negotiations. Students will explore the effect of culture on organizational behavior, managerial decision making, and global leadership.

Prerequisite: PMBA 8070.

PMBA 8383 Entrepreneurship 3 Credits

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8384 Consulting for New and Small Ventures 3 Credits

This course provides experience-based learning to students through the use of student teams to assist area small businesses/organizations. These small firms could have a variety of needs ranging from market research, improving financial reporting and bookkeeping, business planning, streamlining operational procedures, etc. This course will provide students the opportunity to experience in-depth analysis of an individual organization. The emphasis is on student consultants generating immediate, actionable recommendations for the client. Thus, this course is useful not only for those considering small business ownership, but provides an opportunity to students to learn entrepreneurial thinking.

Prerequisite(s): Completion of MBA pre-program courses and permission of instructor.

PMBA 8385 New Venture Launch 3 Credits

Students will start and run a new venture while under the supervision and guidance of faculty. Students will take a business plan they have developed and execute it. This is an opportunity to experience the launch process and learn hands-on how to adapt to the marketplace. Some businesses started in this class may also be eligible to receive venture funding from Rider.

PMBA 8386 Green Entrepreneurship 3 Credits

This course is both a traditionally academic graduate course and a practical, case study based, business development course. Lectures will present the scientific, technical, financial, and business underpinnings required to understand the rationale for and the range of solutions possible that businesses can utilize when initiating or developing sustainable practices or new entrepreneurs can consider as they develop new businesses. Students will be learning about real business examples and discussing how the technical aspects of sustainability interact with the more practical and immediate demands of running a business – making a profit and maintaining positive cash flow while acting ethically.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8491 Business Law 3 Credits

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement.

Prerequisite(s): BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

PMBA 8880 Strategic Management 3 Credits

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

Prerequisite(s): All other MBA breadth courses.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be performed at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and, during the semester he/she receives credit for the internship, is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

PMBA 8906 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8907 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8908 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8909 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8351 Business Analytics Fundamentals 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis. Students who have earned credits for CIS 350 or equivalent cannot take PMBA 8351 for credit.

Prerequisite(s): PMBA 8051.

PMBA 8353 Digital Futures 3 Credits

This course is a holistic course drawing on all areas of Information Technology. It leverages the in-depth understanding of Technology that MSIS students possess and transforms such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. It will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future. Case studies and readings will familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology/innovation. Students will be engaged in a discussion of multi-firm cases of strategic innovation and will examine policy decisions by the firm and various ethical dilemmas engendered by technological changes of the last four decades.

Prerequisites: PMBA 8210.

PMBA 8355 Visual Analytics 3 Credits

This graduate course will equip the students with the fundamental skills to perform visual analytics with Tableau. Specifically, students will learn how to prepare a dataset for visual analysis, and how to "tell a good story" using basic and advanced visualizations. At the completion of this course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience. Students who have earned credits for BDA 205 or equivalent cannot take PMBA 8355 for credit.

Prerequisite(s): PMBA 8351.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

PMBA 8402 The Business of Sports 3 Credits

This course examines diverse managerial issues involving the sports industry. The course covers topics at the league level, the team level, the athlete-agent level, and the college level. The constituencies with interests in sports issues such as athletes, fans, media, companies, advertisers, and legislators are discussed along with global aspects of sports enterprises. Valuation issues related to sports teams are also covered. The course is designed to integrate all aspects of businesses as they apply to sports with an emphasis on strategy, management, marketing, and finance.

PMBA 8403 Sport Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of hands-on labs, a data project, a research project, quizzes, and online discussions. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports. This course assumes a basic level of skill working with Microsoft Excel.

Prerequisite(s): PMBA 8051 or waiver.

PMBA 8404 Sports Marketing 3 Credits

This course explores the complex and diverse nature of sports marketing. It applies fundamental marketing concepts to the sports industry, including the marketing mix, consumer behavior, marketing research, segmentation analysis, and assessment of marketing programs specific to sports. Guidelines for the formulation of marketing plans and strategies will be included. Trends, issues, and problems influencing the industry will also be examined. Discussions cover professional, collegiate, non-profit, and other areas of the sport industry.

PMBA 8405 Legal and Ethical Issues in Sports 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues which will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

PMBA 8904 Micro-Internship 1 Credits

In order to supplement in-class learning with practical training, this micro-internship may be taken for 1 elective credit. The internship may not be performed with a student's current employer. The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined following the internship guidelines available from the Dean's office.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

Master of Science in Information Systems

Program Overview

The Information Technology (IT) job market continues its rapid growth as the lower cost of developing applications and expanding user platforms creates additional demands for qualified IT employees. The Master of Science in Information Systems is a STEM designated degree designed for early to mid-career professionals who aspire to become CTO's / CIO's or rise to other senior management roles in career tracks that have a significant technological component. Such career advancements are possible through multiple pathways because of the role of technology in every aspect of an organization's functioning. This program helps students to develop the knowledge and skills needed to evaluate IS for a business organization and develop and implement the appropriate IT strategies, all while attending to the ethical and legal implications of data and technology-related issues. The program also provides students with practical experience to develop their professional communication skills and ability to work with others in diverse environments to solve IT problems.

Curriculum Overview

The Rider MS in Information Systems curriculum includes prerequisite, core and elective classes. Depending on the background of the individual student, completion of the degree may require between 30-36 credits. Rider's Norm Brodsky College of Business is accredited by the AACSB International (<http://www.aacsb.edu/>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide

Classes for the program are offered in the evening, Monday through Thursday, with some courses offered online. Students may enter the program in the fall, spring or summer semesters and can elect to pursue the MS in Information Systems on a full or part-time basis. Students who would like to complete the program within a year must start in the fall or spring. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well.

Master of Science in Information Systems Program

(30 credits)

Code	Title	Credits
Required Business Core		6
PMBA 8210	Information Technology Management	
PMBA 8250	Operations & Supply Chain Management	
Required Information Systems Core		18
PMBA 8311	Information Security for the Enterprise	
PMBA 8314	Project Management	
PMBA 8317	Applied Data Management for Business Users	
PMBA 8318	Business Analysis and Design	
PMBA 8352	Design Thinking and Innovation	
PMBA 8353	Digital Futures	
Elective Courses		6
Select two of the following:		
PMBA 8260	Mkt Analysis & Decision Making	
PMBA 8270	Adv. Organizational Behavior	
PMBA 8290	Legal and Ethical Aspects of Management	
PMBA 8312	Business Intelligence Tech-Data Mining	
PMBA 8313	Electronic Commerce	
PMBA 8315	Globalization and Technology	
PMBA 8316	Application Development for the Web	
PMBA 8351	Business Analytics Fundamentals	
PMBA 8355	Visual Analytics	
PMBA 8358	Data-Driven Strategies for Business	
Total Credits		30

Foundation Curriculum

6 credits (for students with a non-business undergraduate degree or outdated course work that does not meet the waiver requirements).

Code	Title	Credits
Foundation Curriculum ¹		
PMBA 8010	Information Technology Proficiency	1.5
PMBA 8051	Fundamentals of Statistical Analysis	3
PMBA 8052	Models and Methods of Operations Management	1.5
Total Credits		6

¹ Students must earn a minimum grade of B in each foundation course.

MS in Information Systems –Waiver of Foundation Courses

A waiver of a course from foundation requirements may be granted under the following conditions:

1) *PMBA foundation class is waived based on previous undergraduate coursework if:*

- Student has taken the equivalent course less than six years ago and received a grade of B or above.
- Student has taken the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Dean's Office.

II) *PMBA foundation class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student has taken the equivalent course less than six years ago and received a grade of B- or C+.
- Student has taken the equivalent course more than six years ago and received a grade of B or better.
- Student has taken the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Dean's Office.

III) *PMBA foundation class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

If a student is granted a waiver for any foundation requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation for advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Dean's Office within the first semester of the program.

Courses and Descriptions

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of PMBA 8051 and 8052.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): PMBA 8060.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): PMBA 8070.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8311 Information Security for the Enterprise 3 Credits

This course will teach students how businesses can implement security policies which will protect their significant investment in computer systems. The course topics include but are not limited to security attacks, attack prevention and mediation and security audits. Security devices, firewalls, PC and server security, authentication methods and procedures, and network security will all be discussed. The course will be delivered through a combination of hands-on labs where students will evaluate and implement computer security on computers, and class lectures.

Prerequisite(s): PMBA 8210.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8315 Globalization and Technology 3 Credits

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8316 Application Development for the Web 3 Credits

This class will examine application development for the Web platform in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications and the skills needed to develop applications using that architecture. Specific skills learned include programming with the JavaScript programming language, creating Web pages using the HyperText Markup Language (HTML) and Cascading Style Sheets (CSS). Other skills learned in this course include how to create user-friendly user interfaces, and how to retrieve and update information stored on computer servers.

Prerequisite(s): PMBA 8210.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8318 Business Analysis and Design 3 Credits

This course will integrate the skills of business analysis with those of system design. Students will learn a dynamic visioning/planning process which will guide the development of a technology architecture model for the business enterprise. Students will learn requirements elicitation techniques and use cases. Design methods such as object modeling and prototyping and data modeling with enterprise relationship diagrams will also be covered.

Prerequisite(s): PMBA 8210.

PMBA 8351 Business Analytics Fundamentals 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis. Students who have earned credits for CIS 350 or equivalent cannot take PMBA 8351 for credit.

Prerequisite(s): PMBA 8051.

PMBA 8352 Design Thinking and Innovation 3 Credits

This graduate course on Design Thinking and Innovation provides students with a framework for dealing with unstructured problems, and for managing the innovation process. This course introduces students to design thinking as a systematic approach to innovation, but also guide students through the process to identify and translate broadly defined opportunities into actionable innovation possibilities. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

Prerequisite(s): PMBA 8210.

PMBA 8353 Digital Futures 3 Credits

This course is a holistic course drawing on all areas of Information Technology. It leverages the in-depth understanding of Technology that MSIS students possess and transforms such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. It will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future. Case studies and readings will familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology/innovation. Students will be engaged in a discussion of multi-firm cases of strategic innovation and will examine policy decisions by the firm and various ethical dilemmas engendered by technological changes of the last four decades.

Prerequisites: PMBA 8210.

PMBA 8355 Visual Analytics 3 Credits

This graduate course will equip the students with the fundamental skills to perform visual analytics with Tableau. Specifically, students will learn how to prepare a dataset for visual analysis, and how to "tell a good story" using basic and advanced visualizations. At the completion of this course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience. Students who have earned credits for BDA 205 or equivalent cannot take PMBA 8355 for credit.

Prerequisite(s): PMBA 8351.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

Online Master of Accountancy (OL MAcc)

Program Overview

The Online Master of Accountancy (MAcc) is designed for working professionals with a background in accounting who seek advanced credentials and education for CPA or other professional licensures but want the flexibility and convenience of a totally online program. The Online Macc program offers the same course work as the in-person MAcc program, with which it shares the prestigious AACSB Accounting accreditation, the international standard of excellence in accounting and business education. The accounting faculty who teach in the program publish research in top accounting publications and are actively involved in the professional community. Students in the Online MAcc may not take in-person classes on the Rider campus.

Curriculum Overview

The Online MAcc program enhances the knowledge and skills required of accounting professionals while meeting the educational requirements for CPA licensure.

Acceptance into the online program assumes that students have mastered the basic foundation of accounting and business courses at the undergraduate level. Students who do not have this background will need to complete the prerequisite courses before beginning the core of the MAcc program. The core of the MAcc is comprised of seven required courses which cover relevant topics and skills needed to be successful in the field of accounting. Those skills and knowledge include oral and written communication skills, ability to do in-depth research, knowledge of data analytics and the manipulation of accounting data. The MAcc also requires the completion of three electives, which include the courses for a concentration in forensic accounting, finance, information systems, sport management or business analytics. See the "Concentration (p. 1344)" section provided in this catalog. There is a required online orientation before a student can begin in the program.

Course work and connections with fellow students and faculty are facilitated through our user friendly technology platform. Students also have access to the MAcc resource center including webinars from leading accounting professionals on matters in the profession and CPA licensure.

Online MAcc Program Requirements

The Online MAcc program is designed for students who have completed an undergraduate accounting major or have completed a series of both business and accounting prerequisite courses as part of an undergraduate/graduate program or independently at a four year university. The program consists of 30 semester hours at the graduate level and is completed with students following a set course schedule so they may complete their program in as few as 21 months.

Code	Title	Credits
Complete the following courses:		
MAcc 650	Seminar in Federal Taxes	3
MAcc 652	Analysis of Accounting Data	3
MAcc 654	Issues in Financial Reporting	3
MAcc 662	Auditing Practice & Problems	3
MAcc 664	Issues in Managerial Accounting	3
MAcc 611	Professional Research and Communication	3
PMBA 8351	Business Analytics Fundamentals ¹	3
	or PMBA 8312 Business Intelligence Tech-Data Mining	
Electives		9
Total Credits		30

¹ The prerequisite for PMBA 8351 is PMBA 8051. Students who choose to take this class must either take PMBA 8051 or have it waived with previous coursework. Please email gradbusiness@rider.edu (http://catalog.rider.edu/graduate/colleges-schools/business-administration/programs-certificates/online-master-accountancy/&utm_campaign=mailto:gradbusiness@rider.edu&utm_campaign=gradbusiness@rider.edu&utm_campaign=gradbusiness@rider.edu) for more information.

Foundation Requirements

MAcc students who hold an undergraduate degree in an area other than business will need to complete the Business Foundation Requirements and Accounting Foundation Requirements before taking upper level Accounting Courses.

MAcc students who hold an undergraduate business degree in an area other than accounting may be eligible to waive the Business Foundation Requirements but must complete the Accounting Foundation Requirements before taking upper level Accounting Courses.

MAcc students who hold an undergraduate degree in accounting may be eligible to waive the Business Foundation Requirements and the Accounting Foundation Requirements.

Waiver of these courses follows the guidelines defined under the Waiver of Courses section.

Business Foundation Requirements

4.5 credits (for students with a non-business undergraduate degree or outdated course work that does not meet the waiver requirements).

Code	Title	Credits
PMBA 8020	Fundamentals of Accounting	3
PMBA 8040	Basic Financial Principles	1.5
Total Credits		4.5

Accounting Foundation Requirements

18 credits (for non-accounting business undergraduate degree or outdated course work that does not meet the waiver requirements)

Code	Title	Credits
ACC 302	Cost Management	3
ACC 310	Acct Theory & Concepts I	3
ACC 311	Acct Theory & Concepts II	3
ACC 400	Principles of Auditing	3
ACC 405	Acct Problems & Practice	3
ACC 410	Fund of Federal Taxation	3
Total Credits		18

MAcc and Online MAcc–Waiver of Courses

A waiver of a course from PMBA and ACC foundation requirements in the MAcc may be granted under the following conditions:

- Student took the equivalent course less than six years ago and received a grade of C or above.
- Student took the equivalent course more than six years ago and received a grade of C or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Dean's Office.

A PMBA or ACC foundation course must be taken if:

- Student has never taken the undergraduate equivalent class.
- Student received below a C in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

When the MAcc "Foundation Requirements" are waived, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. The student also has the option to take the foundation course despite it being waived. Any appeal of a waiver decision based on previous course work must be made to the Dean's Office within the first semester of the program.

Courses and Descriptions

MACC 611 Professional Research and Communication 3 Credits

Effective communication and interpersonal skills are key for success in the accounting profession. This course is an interactive seminar designed to provide a strong foundation in professional research and to develop communication and interpersonal skills with an emphasis on the communication and interpersonal challenges that accountants commonly face. Course work is primarily base based and includes a wide variety of video and written assignments that require research to develop accounting services and present to guest professionals and the "client".

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 650 Seminar in Federal Taxes 3 Credits

The course examines tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts. Topics include tax issues involved in the decision to select a particular form of business organization, fundamental concepts of interstate, international, and New Jersey taxation, and to expose the student to a variety of common tax returns, applicable to the above topics.

Prerequisite(s): completion of ACC 410 or ACC 410P.

MACC 652 Analysis of Accounting Data 3 Credits

This course uses information technology and data analytical techniques to conduct analysis needs commonly faced by accounting professionals. The course uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 654 Issues in Financial Reporting 3 Credits

This course uses the conceptual framework to examine standards for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 662 Auditing Practice & Problems 3 Credits

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

Prerequisite(s): ACC 400 or ACC 400P.

MACC 663 Fraud and Forensic Accounting 3 Credits

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 664 Issues in Managerial Accounting 3 Credits

This course examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

Prerequisite(s): completion of ACC 302, ACC 302P or PMBA 8220.

MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8040 and PMBA 8020 or the Preliminary Accounting Requirements.

Prerequisites: PMBA 8040 or VL12 with a score of WV AND PMBA 8020 or VL10 with a score of WV OR VL25 with a score of WV OR VL26 with a score of WV.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions.

This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8491 Business Law 3 Credits

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement.

Prerequisite(s): BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

Online Master of Business Administration

Program Overview

The Rider Online MBA program is designed to offer flexibility, convenience, and value to students preparing for advanced careers as decision makers in a rapidly changing world. Students are provided with a broad understanding of overall business concepts and operations, moving from a "one-dimensional" focus to one that mirrors the complexity of today's business enterprise. By utilizing the case study approach to analyze real-world situations, students are encouraged to question, apply business knowledge and develop informed decisions.

This program is accredited by the AACSB International (<http://www.aacsb.edu/>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide.

Student Learning Outcomes

The learning outcomes and competencies below are the core of the Rider University Norm Brodsky College of Business MBA program. They provide the foundation for its curriculum and are designed to enhance student success, both throughout the program and post-graduation. There are three main focus areas: decision-making, leadership, and communication.

Decision-making - Make strategic decisions that are integrative.

Leadership - Manage organizational activities in a global environment.

Communication - Effectively communicate business information in the appropriate format.

Curriculum Overview

Rider's Online MBA classes include foundation, breadth and elective classes that provide the same knowledge and experience as in-person MBA courses. Students within the Online MBA program are not eligible to take in-person classes on the Rider campus. Depending on the background of the individual student, selected foundation courses may be waived, leaving students with between 36 and 54 credits to complete the degree. With six start dates (two in fall, two in spring and two in summer), students may complete the MBA on a part-time basis in as few as 24 months. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well. There is a required online orientation before a student can begin in the program.

To enrich the MBA degree, students may take electives in the areas of finance, information systems, sport management and business analytics.

See the “[Concentrations \(p. 1344\)](#)” section provided in this catalog.

Online Masters in Business Administration Program Requirements

(36 credits)

The Online MBA Program requires a core of 30 credit hours of breadth course requirements and six (6) credit hours of elective courses. Students may also be required to take up to an additional 15 credit hours of foundation courses based on their educational and work experience. To enrich the MBA degree, students may take electives in the areas of finance, information systems, sport management and business analytics.

Breadth Course Requirements

Code	Title	Credits
PMBA 8000	Executive Communications ¹	3
PMBA 8210	Information Technology Management	3
PMBA 8220	Strategic Accounting for Manager	3
PMBA 8230	Managerial Economics	3
PMBA 8240	Applied Corporate Finance	3

The Master of Business Administration (MBA) – Waiver of Courses

Waiver of Foundation Courses

A waiver of a course from foundation requirements may be granted under the following conditions:

I) *PMBA foundation class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Dean's Office.

II) *PMBA foundation class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Dean's Office.

III) *PMBA foundation class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

If a student is granted a waiver for any foundation requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or

seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Dean's Office within the first semester of the program.

MBA Breadth Course Waivers

It is possible for students to substitute an elective for an MBA Breadth course in the following situations, so as not to duplicate course work that may have been done as undergraduates:

- Students who graduated in the last five years as marketing majors and had at least a 3.0 in their marketing courses will not need to take PMBA 8260. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years as accounting majors with at least a 3.0 in their accounting courses will not need to take PMBA 8220. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years with an undergraduate degree in Information Systems/Technology, Computer Science or Electrical Engineering with at least a 3.0 GPA in their major area courses and have at least five years professional experience in IS/IT and strategy, OR for students with a graduate degree in Information Systems/Technology, Computer Science or Electrical Engineering and over five years professional experience in IS/IT and strategy, will not need to take PMBA 8210. In its place, students must take an elective from either the MBA or MAcc program.

Courses and Descriptions

PMBA 8000 Executive Communications 3 Credits

Professionals spend about seventy percent (70%) of their work-time communicating with other people. It is therefore no surprise that, without good communication skills, it is impossible to succeed in one's workplace. Yet, effective communication skills do not come naturally for most people. This course aims to prepare you to speak compellingly, write clearly and concisely, listen actively and critically, and persuade others by constructing sound arguments. To that end, we will learn the key aspects of communication: audience analysis, communicator credibility, message construction, and delivery. Deliverables will include written documents and oral presentations, as well as both individual and team presentations. Importantly, in doing so, you will enhance your leadership potential in your workplace by motivating your colleagues, team, and organization to work toward important goals.

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): PMBA 8020.

PMBA 8230 Managerial Economics 3 Credits

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8020.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of PMBA 8051 and 8052.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): PMBA 8060.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): PMBA 8070.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8303 International Business Study Tour 3 Credits

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8325 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisites: ACC 302 or ACC 302P or PMBA 8220.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8349 Personal Financial Planning 3 Credits

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8371 Human Resource Management 3 Credits

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

Prerequisite(s): PMBA 8070.

PMBA 8383 Entrepreneurship 3 Credits

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8492 Ethical Issues in International Business 3 Credits

This course is an introduction to identifying, analyzing and resolving ethical dilemmas in both U.S. and international business, including reference to legal and regulatory issues. The course begins with a general introduction to ethics, considers ethical issues connected with the economic, legal and regulatory systems within which modern business takes place and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues, including cases resulting in civil and criminal litigation. The primary focus of this course will be ethics in the international business environment. Most of the readings and discussion board topics, the group case studies and the individual research paper will have an international focus.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8880 Strategic Management 3 Credits

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

Prerequisite(s): All other MBA breadth courses.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be performed at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and, during the semester he/she receives credit for the internship, is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

Post-Baccalaureate Accounting Certificate Curriculum Overview

The Post Baccalaureate Accounting Certificate consists of 21 to 27 credits in undergraduate and graduate accounting classes that provide individuals who already have their undergraduate degree the opportunity to develop practical knowledge and skills in the field of accounting so they can pursue a new career path or add to their business education and credentials.

To be admitted to the Post Baccalaureate Accounting Certificate Program, students must meet the following requirement:

- Completion of at least a bachelor's degree or equivalent from an accredited institution of higher learning with a GPA of 3.0 or better.

Certificate Completion Requirements

To complete the Post Baccalaureate Accounting Certificate Program, students must meet the following requirements:

- Overall GPA of 3.0 in the Post Baccalaureate Accounting Certificate Program;
- Cannot have any grades below a "C".

Courses and Descriptions

ACC 302P Cost Management 3 Credits

This course focuses on firm strategy and the role managerial accounting information plays in the decision making process. Topics include the balanced scorecard, the value chain, product life cycles, target costing, theory of constraints, strategic pricing, management and control of quality cost systems, traditional and activity-based costing, cost control, standard costs and variances, and capital budgeting.

Prerequisite(s): PMBA 8020 or PMBA 8020 waiver. This course is restricted to students in the MAcc program.

ACC 310P Acct Theory & Concepts I 3 Credits

This is the first upper-level course in a sequence in financial accounting courses. Topics include the conceptual framework, and standard setting process followed by application and evaluation of generally accepted accounting principles including content, and structure of financial statements, present value concepts, current assets, current liabilities, property, plant, and equipment, intangible assets and non-current liabilities are studied. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): PMBA 8020. This course is restricted to students in the MAcc program.

ACC 311P Acct Theory & Concepts II 3 Credits

This course is a continuation of ACC 310. Topics include long-term investments, stockholders' equity, earnings per share, interperiod income tax allocation, accounting changes, revenue recognition, pensions, leases and cash flow analysis. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): ACC 310 or ACC 310-P. Restricted to students in the MAcc program.

ACC 400P Principles of Auditing 3 Credits

This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.

Prerequisite(s): ACC 310 or ACC 310P. Restricted to students in the MAcc.

ACC 405P Accounting Problems & Practice - PM 3 Credits

This course provides additional coverage of financial reporting issues and procedures. Topics include business combinations, consolidated financial statements, foreign currency translation, the effects of diversity across countries, disclosure and SEC reporting issues. Governmental and not-for-profit accounting standards are also covered.

Prerequisite(s): ACC 311 or ACC 311P. Restricted to students in the MAcc program.

ACC 410P Fund of Federal Taxation - PM 3 Credits

This course provides fundamental federal tax concepts applicable to individuals, partnerships, corporations, estates, and gifts. Topics are considered from a tax compliance and planning perspective. Preparation of individual and corporate tax returns is also included.

Prerequisite(s): ACC 311 or ACC 311P. Restricted to students in the MAcc program.

MACC 611 Professional Research and Communication 3 Credits

Effective communication and interpersonal skills are key for success in the accounting profession. This course is an interactive seminar designed to provide a strong foundation in professional research and to develop communication and interpersonal skills with an emphasis on the communication and interpersonal challenges that accountants commonly face. Course work is primarily base based and includes a wide variety of video and written assignments that require research to develop accounting services and present to guest professionals and the "client".

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 654 Issues in Financial Reporting 3 Credits

This course uses the conceptual framework to examine standards for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 658 Governmental and Not-for-Profit Accounting 3 Credits

This course provides an in-depth study of the concepts, objectives and techniques of the evolving field of accounting for nonprofit institutions and organizations. Areas emphasized include municipal and state governmental units, hospitals, colleges and universities and service organizations. Problems, cases and selected readings are employed.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 662 Auditing Practice & Problems 3 Credits

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

Prerequisite(s): ACC 400 or ACC 400P.

MACC 664 Issues in Managerial Accounting 3 Credits

This course examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

Prerequisite(s): completion of ACC 302, ACC 302P or PMBA 8220.

MACC 670 Accounting Internship 3 Credits

This course provides on-site experiential learning through supervised employment with a participating company. Students will be reviewed periodically by senior staff. Academic assignments, including a formal report, will be developed in conjunction with a faculty member. Permission of the instructor is required.

PMBA 8020 Fundamentals of Accounting 3 Credits

For those students having no previous knowledge of accounting. Subject is approached from the point of view of the user of accounting information rather than that of the accountant who supplies the information. Surveys mechanics of accounting as a means to an end, emphasizing accounting as a tool of management and the language of business. Problems and cases bring out the managerial implications of accounting.

PMBA 8491 Business Law 3 Credits

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement.

Prerequisite(s): BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

Sport Management Graduate Certificate

Overview

Rider's Sport Management Graduate Certificate program is designed to provide its students with an edge to enter into, or enhance their current business careers, in the continually growing sports industry, deemed one of the most challenging industries to break into. The curriculum

develops students' breadth of knowledge on sport management business ideologies, as well as their ability to apply these concepts to the sport business industry to become effective leaders and decision makers in this unique field.

Situated in Central New Jersey, Rider University is uniquely positioned between two of the largest sports cities in the U.S., New York and Philadelphia, and in a state with numerous sports leagues, associations and businesses. This proximity allows Rider's Sport Management program to build relationships with sports industry employers that benefit Rider students in the classroom and in the job market.

Current MBA and MAcc students can earn the Sport Management Certificate, while pursuing their graduate degree, with minimal additional courses.

Program Requirements

1. Communication skills with a particular emphasis on sport management concepts and modes of operation;
2. Information literacy, which includes the research and collection of information, evaluating its quality and synthesizing it for effective use within the organization;
3. Analytical and critical thinking including identifying issues occurring in the sport industry and organizations, applying quantitative or qualitative problem-solving tools, drawing logical conclusions through critical analysis, and making strategic decisions for the organization.
4. Ethics and social responsibility, which includes the ability to identify and evaluate ethical and social responsibility issues within the sport industry and organizations and understand their impact on decisions within a diverse personal and professional setting.

PMBA 8902 Independent Studies in Business Administration

PMBA 8905 Internship

Total Credits

12

¹ PMBA 8051 - Fundamentals of Statistics is a prerequisite for this course. It may be waived with previous coursework. Email gradbusiness@rider.edu (<http://catalog.rider.edu/graduate/colleges-schools/business-administration/programs-certificates/sport-management-graduate-cert/gradbusiness@rider.edu>) for more information.

Certificate Completion

To complete the BA Certificate Program, students must meet the following requirements:

- Overall GPA of 3.0 in the Business Analytics Certificate Program;
- Cannot have any grades below at "C".

Courses and Descriptions

PMBA 8402 The Business of Sports 3 Credits

This course examines diverse managerial issues involving the sports industry. The course covers topics at the league level, the team level, the athlete-agent level, and the college level. The constituencies with interests in sports issues such as athletes, fans, media, companies, advertisers, and legislators are discussed along with global aspects of sports enterprises. Valuation issues related to sports teams are also covered. The course is designed to integrate all aspects of businesses as they apply to sports with an emphasis on strategy, management, marketing, and finance.

PMBA 8403 Sport Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of hands-on labs, a data project, a research project, quizzes, and online discussions. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports. This course assumes a basic level of skill working with Microsoft Excel.

Prerequisite(s): PMBA 8051 or waiver.

PMBA 8404 Sports Marketing 3 Credits

This course explores the complex and diverse nature of sports marketing. It applies fundamental marketing concepts to the sports industry, including the marketing mix, consumer behavior, marketing research, segmentation analysis, and assessment of marketing programs specific to sports. Guidelines for the formulation of marketing plans and strategies will be included. Trends, issues, and problems influencing the industry will also be examined. Discussions cover professional, collegiate, non-profit, and other areas of the sport industry.

PMBA 8405 Legal and Ethical Issues in Sports 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues which will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be performed at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and, during the semester he/she receives credit for the internship, is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

Graduate Program Policies

Academic Integrity (p. 1376)

Admission Classifications (p. 1376)

Admission Requirements (p. 1375)

Advising (p. 1376)

Course Repeat Policy (p. 1376)

Dismissal (p. 1376)

Graduation Requirements and Application (p. 1377)

Honors Graduates (p. 1376)

Transfer of Courses (p. 1376)

Undergraduate Students Taking Graduate Business Courses (p. 1377)

Admission Requirements

No decision is made on an application for admission to the graduate programs of business administration until all required documents have been submitted. These include a completed application form, the \$50 application fee, official notification by GMAC as to the score achieved on the GMAT - Graduate Management Admissions Test (unless waived), your resume, statement of aims and objectives, and an official transcript from every institution of higher learning attended. To be admitted to the programs, an applicant must show evidence that he or she has earned a bachelor's degree or equivalent from an accredited institution of higher

learning and has the potential to perform satisfactorily at the graduate level. The primary criteria used in making admission decisions are the undergraduate grade point average, the score achieved on the GMAT (unless waived), professional experience, and graduate level GPA (if applicable). The Graduate Record Examination (GRE) is acceptable as an admissions examination in place of the GMAT.

International Applicants

International students are required to present evidence of completion of a university degree equivalent to, or higher than, a bachelor's degree in the United States. If you studied at a previous higher education institution that was outside the United States, you will be required to have a course-by-course evaluation of your credits by any credential evaluation service that is a member of the National Association of Credential Evaluation Services (NACES). View a list of members (<https://www.naces.org/members/>), such as Spantran (<https://spanside.secure.force.com/SpantranApplication?Id=23dfa95b-4665-4414-80c0-89578b0508e6>), Josef Silny & Associates, Inc. (<https://www.jsilny.org/pdf/RiderUniversity.pdf>), or International Education Evaluators (<https://myiee.org/university/rider-university/>).

GMAT/GRE Waiver Guidelines

MBA / Online MBA/MS in Information Systems Applicants

MBA/MBA Online/MS in Information Systems applicants who meet the one of the following criteria established by the Norm Brodsky College of Business would qualify for a waiver for the GMAT/GRE:

1. Applicant has graduated from a regionally accredited undergraduate program with a bachelor's degree AND has one of the following:
 - a. A minimum cumulative undergraduate GPA of 3.0.
 - b. 5 or more years of professional experience (reviewed on a case-by-case basis)
2. Applicant has earned a graduate degree from a regionally accredited program.
3. Applicant has passed a business-related, professional certifying exam, such as the CPA, CFA, CMA, etc (reviewed on a case-by-case basis).

MAcc / Online MAcc Applicants

MAcc/ MAcc Online applicants are not required to provide a GMAT or GRE score with their application.

Executive MBA Admission Requirements

To qualify for the program, you must demonstrate the following:

Academic Background

- Bachelor's degree from an accredited university;
- Minimum 3.0 GPA (if the student's GPA is less than 3.0, the GMAT may be required.)

Business-Related Background

- Full-time employment;
- Minimum five years of work experience;
- Three years managerial/supervisory experience;
- Two work-related recommendations (employer or another business-related source.)

Interview

- Students will also have a personal interview with the EMBA Program Director to assess their academic and professional qualifications and readiness for the program.

Graduate Business Certificate Programs - Business Analytics, Forensic Accounting and Sport Management - Admission Requirements

An application for admission to the graduate certificate program of business administration is not reviewed for a decision until all required documents have been submitted. These include a completed application form, the \$50 application fee, your resume, and an official transcript from every institution of higher learning attended.

To be considered for admission into one of Rider's Graduate Certificate Programs, you must hold a minimum of a bachelor's degree or its equivalent from an accredited institution of higher learning with a GPA of 3.0 or better.

Admission Classifications

Each student admitted to the MBA, MS-IS or MAcc program is assigned to one of the following classifications:

Full Standing

Students who have full standing are permitted to register for any foundation courses that have not been waived or for certain breadth courses, if those courses are needed by the student.

Conditional Admission

Conditionally admitted students have been admitted into the graduate business program with specific conditions outlined for them to meet within the first 6 credits they take in the program. These conditions may include maintaining a certain GPA and taking specific courses within the program as part of those first 6 credits.

Conditionally admitted students must meet the foundation course requirements for the specific classes they take and may not take classes that could be waived if they were admitted to the program.

Non-Degree Students

Prospective students may take MBA classes as non-degree students under the following conditions:

- graduated with an undergraduate degree from an accredited university with a minimum 3.0 GPA OR has earned a graduate degree
- meets prerequisite requirements for desired course(s).

Non-degree students will only be allowed to take 6 credits in the graduate business program. If a non-degree student desires to take more than 6 credits in the graduate business program, he/she will need to fully apply to the program.

Special

Special student status is granted to those students enrolled in a graduate program at another institution who have been granted permission to take graduate business courses at Rider.

Executive MBA students and graduate certificate program students are admitted as "full standing" only.

Transfer of Courses

A student may request the transfer of a graduate course taken at an AACSB-accredited institution. Such a request may be granted if the course was taken within the past three years, was passed with a grade of "B" or higher, and was taken before admission to the graduate program at Rider. Once a student has been admitted to the program, graduate courses taken at other AACSB-accredited institutions must have prior

approval of the Dean's Office before transfer credit will be allowed. A maximum of six semester hours of transfer credit may be granted for application against the elective requirements. No academic credit will be granted for corporate-sponsored management or professional development courses.

As the EMBA program is cohort-based, the transfer of courses does not apply.

Advising

The Dean's Office is the advisor to students in all graduate business programs (except the EMBA) and tracks program progress. The Director of the Executive MBA Program is the advisor to the EMBA students. Students are also encouraged to contact members of the faculty and the program's executives-in-residence for career and related advising.

Note: The most significant policies and procedures for the graduate business programs are covered in this catalog. Questions and issues not addressed here default to other University-wide policy statements.

Course Repeat Policy

With the written permission of the Dean's Office, graduate business students may repeat graduate courses for which they received grades of "C+" or lower. Both grades will appear on the student's transcript, but only the second grade will count in the GPA.

Academic Integrity

Students are expected to conduct themselves professionally and with the highest standards of academic integrity. See Rider's Code of Academic Integrity (p. 1596) in this catalog for further information.

Dismissal

Rider University reserves the right to dismiss any student when, in the judgment of the faculty or officers of Rider, such action seems advisable. A student in a graduate business program will be subject to dismissal based on academic standing for any of the following reasons:

- Receiving more than two grades of "C+" or below in graduate-level work;
- Completing graduate course work with a cumulative grade point average of less than 3.0; or,
- Failure to complete the MAcc, MBA, or MS-IS program in the required six years.

In all cases of dismissal, graduate business students have the right of appeal. Academic standing dismissal is a progressive process with student participation and advising designed to help students regain good academic standing. Students approaching the six-year time limit to complete a graduate business program may request a time limit extension prior to actual dismissal. The request should be based on unique work requirements, personal, or other reasons. Time limit appeals will be reviewed and acted on by the Dean's Office.

Honors Graduates

Students who graduate with an overall grade point average of 3.85 or better are designated as graduating with distinction. This term appears on the student's official transcript, below the student's name in the commencement program and on the diploma.

Graduation Requirements and Application

To graduate from the a graduate business degree or certificate program, students must have completed all of the course requirements as described above, within the six-year time frame, and have a cumulative Grade Point Average (GPA) of 3.0 or above. In addition, a candidate for graduation:

- Cannot have any grades below a "C ", and cannot have received more than two grades of "C+" or "C" in graduate-level courses.

A student who expects to graduate with a graduate degree must complete and file a degree application form no later than the date indicated on the calendar for each semester, found at the front of this publication.

Undergraduate Students Taking Graduate Business Courses

Seniors enrolled in any business major can take one or two graduate business courses (PMBA or MAcc) in the last semester of their senior year if the following conditions are met:

For taking an PMBA course:

- Students must have at least a 3.5 GPA;
- Students may take an elective or PMBA breadth course if all prerequisites have been met.

For taking a MAcc course:

- Students must have at least a 3.3 GPA or higher overall and in accounting courses;
- Students may take any MAcc course, if all prerequisites have been met.

A graduate business course taken as an undergraduate can fulfill the requirements of only one program, either graduate or undergraduate. There is no "double dipping" of coursework between graduate and undergraduate programs. Permission to take such courses will be granted by the Dean's Office based on a review of a student's academic record.

College of Education and Human Services

<http://www.rider.edu/cehs> (<http://www.rider.edu/cehs/>)

The College of Education and Human Services prepares students to be effective educators. Rider was the first private New Jersey institution to hold the highest accreditation possible in teaching from the National Council for the Accreditation of Teacher Education (NCATE) (<http://www.ncate.org/>), now known as the Council for the Accreditation of Educator Preparation (<http://catalog.rider.edu/graduate/colleges-schools/education/caepnet.org/accreditation/about-accreditation/what-is-accreditation/>)CAEP (<http://caepnet.org/>). This in turn offers graduates added value and recognition nationwide when seeking employment or admission to graduate study. The College has created partnerships with local schools, businesses, and government and community agencies so that students work collaboratively to develop high-quality programs. Professors value excellence in teaching, scholarship and service and serve as devoted advisors and mentors who relate well to each and every student.

Graduate Education, Leadership, and Counseling

The **Department of Graduate Education, Leadership, and Counseling** strives to provide quality programs with personal attention. Our full-time faculty, all of whom have doctoral degrees, teach the majority of our

courses. The College of Education and Human Services is accredited by the Council for the Accreditation of Educator Preparation (CAEP (<http://caepnet.org/>)) and our Master's degrees in Counseling Services and Clinical Mental Health Counseling are accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP (<https://www.cacrep.org/>)). Other programs that have received national accreditation include School Psychology and Educational Leadership.

Classes are scheduled to enable those who work full-time to complete their programs. Class sizes are moderate to small, and many degree programs have internships.

The department offers educational specialist degrees, master's degrees, a doctoral degree, and certifications and endorsements in a variety of areas. These degree programs of study, their descriptions, and the certifications associated with them appear under programs and certificates (p. 1385). Course descriptions for each program can be found in this catalog and on the Registrar's Office website. All programs require an application available from the Office of Graduate Admission (<https://www.rider.edu/admissions/graduate/>).

You may also apply as a special student in some programs. Students enrolled in graduate programs elsewhere or students seeking course work for professional development not leading to a degree, certification or endorsement from Rider University may take courses as a special student. Apply to the Office of Graduate Admission (<https://www.rider.edu/admissions/graduate/>).

Mission Statement

The College of Education of Education and Human Services develops committed, reflective practitioners who create an environment where knowledge and diversity are valued. We foster the growth of actively engaged students who take responsibility for learning the foundations of their future practice. We perceive 21st century challenges – Globalization, Technology, Diversity, Environmental Awareness, Exponential Knowledge Growth, and prepare students who are aware of social and individual complexity and are able to thrive in an evolving, shifting and interactive society.

College of Education and Human Services Conceptual Framework

Commitment

Commitment is a value highly prized by the College of Education and Human Services, serving as an essential cornerstone for teaching and learning. Commitment is a set of connected attitudes, values, and beliefs that result in professional behaviors expected of dedicated educators.

Expanding Knowledge

In the College of Education and Human Services, we emphasize both content and pedagogical knowledge as we prepare our students. We design classroom and field experiences to help students learn this knowledge and apply it in practice. Students are expected to use their technological expertise as a tool in learning and to reference relevant standards when either planning for or reflecting on their own classroom work, as well as that with their own students or clients.

Reflection

The College of Education and Human Services defines reflection as the process of thinking clearly and deliberately to promote understanding and to actively foster the exercise of in depth thinking about professional practice. We believe that reflection, grounded in active experience, has value for developing educators, when practiced consistently and systematically through such activities as classroom observation, continuous self-assessment, and journal writing.

Professionalism

Novice and experienced educators enrolled in the College of Education and Human Services are on a career-long path toward professionalism and are not viewed as totally developed and experienced professionals upon graduation. Our goal is to encourage students to become thoughtful, creative problem-solvers as they begin and refine the acquisition of craft and knowledge in their ongoing journey toward higher levels of professional success.

Admission Status

Upon completion of the steps in the application procedures described below, the applicant will be assigned to one of the following classifications once admitted:

Graduate Standing

The student is qualified to undertake graduate study and is recognized as a degree or certification candidate upon admission;

Conditional Standing

Students who do not satisfy all of the admission requirements or have not completed all of the undergraduate preparatory requirements or both may be permitted to enroll in studies during a probationary period not exceeding twelve (12) graduate credits (six credits for the Master of Science in Nursing [M.S.N.]) with a minimum grade point average of 3.0. Students who fail to attain a 3.0 grade point average upon completion of up to twelve (12) credits (six for the M.S.N.) will be subject to dismissal.

Special Standing

This category of admissions applies to those students who may need only several courses, often for the purpose of obtaining certification. If special standing students apply for admission to a master's, educational specialist, or doctoral degree program and are accepted, they may apply for transfer of course credits toward that program according to policy guidelines of the Department.

Transfer of Credit

Upon application to and before admission to any graduate degree program in education, leadership, and counseling, students may request transfer of up to 12 semester hours of graduate credits completed at an accredited institution, or up to 30 graduate credits for the Clinical Mental Health Counseling program. These credits must have been earned within six years of the date of credit transfer approval. All transfer credits must be approved by the program director and the department chair. Courses accepted for transfer must be similar to required or elective courses that are approved for the respective programs, and a grade of at least "B" must have been earned in each of these courses.

Students who are eligible to transfer graduate credits from other institutions must submit official transcripts of these credits. The

Department of Graduate Education, Leadership, and Counseling will consider specific written requests for appropriate transfer credits. Official transcripts covering courses submitted for transfer must accompany the written request for such transfer if the transcripts have not already been filed.

Transfer of Credit for Educational Specialist (Ed.S.) Students

The Department of Graduate Education, Leadership, and Counseling recognizes that students enrolled in an educational specialist program may enter after completing an appropriate master's program. Consideration is typically given to their prior graduate training and its application to the current degree. The program director/designee and the department chairperson will determine the number of credits to be transferred given the following guidelines.

Guidelines for Transfer of Credits for Ed.S. Students

- All transfer credits must carry a letter grade of at least "B."
- Transfer credits must be taken within six years from the date of acceptance into the program. Exceptions may also be granted by the program director/designee for courses where content remains consistent over time and supports current program objectives.
- For students in the School Psychology Program up to 36 credits may be transferred so long as course equivalency can be thoroughly documented. Students in the Counseling Services Program may transfer up to 48 credits from a CACREP approved program. Students admitted from a non-CACREP approved program may transfer up to 36 credits.
- Official transcripts must accompany the request for transfer of credit. The program director/designee must approve the credits to be transferred upon admission.
- Credits approved for transfer will be added to the student's transcript at the time of admission to the program.
- Course descriptions and/or syllabi of the courses being requested for transfer may be required.

Course Repeat Policy

Students may not repeat any graduate course for credit that they have already taken, except a course in which they have received a grade lower than "B" or one from which they withdrew. Any exceptions must be approved by the program director and department chair.

Comprehensive Examination

Students who are pursuing a graduate program leading to the Master of Arts in counseling services, clinical mental health counseling, or to an Educational Specialist degree in school psychology must successfully pass a comprehensive examination covering knowledge of a specialized field; major concepts, theories and ideas; techniques for applying to a problem area knowledge of the specialized field and/or the related areas of foundations and research; adequate communication of ideas in light of the question(s) posed.

The date, location, and time of the Comprehensive Examination is determined by the appropriate program director. Only those students who have achieved the following requirements for the Master's or EdS degree are eligible to sit for this exam:

- A cumulative average of 3.0 or better by the time of application for the comprehensive exam.
- In the last semester of the program; or, may take the examination in the spring if only one course remains and will be taken in the summer. Permission of program director/designee is required.

Application for Comprehensive Examination and Graduation

A student who plans to take the comprehensive examination and graduate must fill out and file an Application for Comprehensive Examination and Graduation form on or before their final semester. This form must be filed with the chair of the Department of Graduate Education, Leadership, and Counseling.

Dismissal

Any one of the following situations will result in the automatic dismissal of a student working toward a graduate degree or certification program in the Department of Graduate Education, Leadership, and Counseling:

- Receiving two grades of "F" in graduate course work in either the same graduate course or in two different graduate courses;
- Receiving any grade of C (C+, C, or C-) or lower in more than two graduate courses (with the exception of the graduate nursing program where receiving more than two grades of C or lower in nonclinical courses or B- or lower in concentration and practicum courses, or any combination thereof will result in dismissal);
- Not attaining a grade point average of 3.0 for the Master's degree and certificate programs or a grade point average of 3.3 for the Educational Specialist degree or the Ed.D. after taking twelve or more graduate credits at Rider University;
- Failing the comprehensive examination for the second time (pertains only to students enrolled in degree programs that require the examination);
- Failure to complete degree or certification requirements in six years (with the exception of the Master's in Counseling Services program, which is eight years from the date of acceptance into the program; the Master's in Clinical Mental Health Counseling, which is 10 years from the date of acceptance into the program; and the Ed.S. in School Psychology, which is 10 years from the date of acceptance into the program; and 4 years after the completion of APRN 5007 in the Graduate Nursing program).

The Department of Graduate Education, Leadership, and Counseling reserves the right to dismiss any student when, in the judgment of the faculty or the officers of Rider, such action seems advisable.

Honors Graduates

Students who graduate with an overall grade point average of 3.85 or better are designated as graduating with distinction. This term appears on the student's official transcript, below the student's name in the commencement program, and on the diploma.

Programs of Study Degrees Offered

The Educational Specialist (Ed.S.) degree is offered in:

- School Psychology (p. 1446)

The Master of Arts (M.A.) degree is offered in the following areas:

- Athletic Leadership (p. 1385) (online)
- Clinical Mental Health Counseling (including Clinical Mental Health Counseling with a Dance/Movement Therapy concentration) (p. 1391)
- Counseling Services (p. 1398)
- Educational Leadership (p. 1410)
- Organizational Leadership (p. 1438) (online)
- Special Education (p. 1453) (online)
- Teaching (p. 1475)
- Teacher Leadership (p. 1460)

The Master of Science (M.S.) degree is offered in the following areas:

- Nursing (p. 1424) (online)
- Higher Education Assessment, Analytics, and Change Management (p. 1419) (online)

The Education Doctorate (Ed.D) is offered in the following area:

- Educational Leadership (p. 1404)

The Bachelor of Science (BS) is offered in the following area:

- Nursing (p. 429)

In addition, the department provides opportunities for study leading to teacher certification and other types of educational and human services certification.

Certificates Offered

The Department of Graduate Education, Leadership, and Counseling provides an opportunity for study leading to teacher certification and other types of certification and credentialing in the following areas:

- Comprehensive Business (K-12) (p. 1396)
- Dance (K-12) (p. 1402)
- Early Childhood (P-3) (p. 1409)
- Elementary (K-6) (p. 1414)
- English as a Second Language/ESL (K-12) (p. 1416)
- English as a Second Language/ESL Endorsement Certificate (P-12) (p. 1418)
- English (K-12) (p. 1415)
- Life and Career Coaching Certificate (p. 1423)
- Mathematics (K-12) (p. 1431)
- Music (K-12) (p. 1432)
- Post-Baccalaureate Teacher Certificate (p. 1443)
- Reading Specialist Endorsement (p. 1445)
- Principal Certificate (p. 1443)
- School Counselor (p. 1398)
- School Psychologist (p. 1446)
- Science Certificate in Biological Science, Chemistry, Earth Science, Physical Science, and/or Physics (K-12) (p. 1450)
- Social Studies (K-12) (p. 1452)
- Student Assistance Coordinator Certificate (p. 1456)
- Supervisor of Instruction Certificate (p. 1458)
- Talent and Organizational Development Certificate (p. 1459)
- Teacher Leadership Professional Development Certificate (p. 1472)

- Theater (K-12) (p. 1476)
- World Languages Certificate in French or Spanish (K-12) (p. 1477)

Endorsement to Existing Teaching Certificates

- Bilingual Education Endorsement Certificate (p. 1390)
- English as a Second Language/ESL Endorsement Certificate (P-12) (p. 1418)
- Early Childhood (P-3) (p. 1409)
- Cooperative Education Coordinator Certificate (p. 1397)
- Teacher of Students with Disabilities Certificate (p. 1470) (online)

General Master's Degree Application Requirements

All programs require an application available from the Office of Graduate Admission. A decision is made about an application for admission only when all required credentials have been submitted. Application deadlines and requirements are specified by graduate admissions (<https://www.rider.edu/admissions/graduate/how-apply/graduate-education-counseling-leadership-students/>) for specific programs. Completed applications received after the official deadline may be given consideration pending program capacity.

The faculty encourages prospective students from diverse ethnic and cultural backgrounds to apply.

General Master's Degree Requirements

To qualify for the Master's degree, the candidate must:

- Comply with the general requirements concerning graduate study;
- Enroll in graduate study at Rider for no fewer than two academic semesters or the equivalent thereof;
- Complete the number of semester hours of graduate credit required by the degree or certification program;
- Complete an internship/practicum as required by individual programs;
- Successfully pass a written comprehensive examination or other approved exit requirement;
- Attain and maintain an average grade of "B" (3.0) or better for work submitted for the Master's degree, a certification program or a 3.3 grade-point average for the Educational Specialist degree and the Ed.D;
- Complete the program within six years of the enrollment date of the first course (with the exception of the Master's in Counseling Services program, which is eight years from the date of acceptance into the program; the Master's in Clinical Mental Health Counseling, which is 10 years from the date of acceptance into the program; and the Ed.S. in School Psychology, which is 10 years from the date of acceptance into the program; and four years after completion of APRN 5007 in the Graduate Nursing program).

Athletic Leadership M.A. and Online M.A.

The Master of Arts in Athletic Leadership and Master of Arts in Athletic Leadership Online provide current and aspiring coaches and administrators, at all levels, the opportunity to obtain a graduate education focused on leadership, ethics, and coaching development within the current landscape of athletics. This graduate program is designed to promote personal and professional growth in leadership, coaching integrity, and community influence using most of the standards of the National Association for Sport and Physical Education (N.A.S.P.E.) (<http://pgpedia.com/n/national-association-sport-and-physical-education/>) and the university's commitment to preparing caring, competent, and connected graduates. This program will promote the university mission of educating students to meet the challenges of our times. Intercollegiate athletics is a core component of the college experience and developing leaders within context this promotes multiple aspects of the Rider mission that include good decision-making, ethical lifestyles, and tolerance and respect for others.

Curriculum Overview

There are two models for the degree program, both requiring 36 credit hours. The first model is a "4+1" program for undergraduates in which two (2) courses (ATHL 501 (<http://catalog.rider.edu/search/?P=ATHL%20501>) and ATHL 502 (<http://catalog.rider.edu/search/?P=ATHL%20502>)) are completed by rising seniors; the remaining 30 hours will be completed post-graduation. The second model is a traditional master's program consisting of 36 credits. The program allows the possibility of receiving credit for up to six (6) hours of the coaching/athletic administrative work depending upon prior professional experience (e.g., 2 years of full-time coaching or athletic administrative experience).

Athletic Leadership M.A. Program Requirements

(36 credits)

All students must complete the Core Requirements below and select one of the following Tracks:

- Athletic Administration Track
- Career Exploration Track
- Coaching Track
- Sports Psychology Track

Athletic Leadership Core Requirements (15 credits)

Code	Title	Credits
The following courses are required for each track:		
ATHL 501	Sport Psychology	3
ATHL 502	Evidence-Based Research and Athletics	3
ATHL 515	Athletic Leadership	3
ATHL 650	Internship of Athletic Leadership ¹	3
ATHL 651	Internship of Athletic Administration ¹	3
Total Credits		15

¹ Students may complete both ATHL 650 and ATHL 651 for 3 credits each or complete a total of 6 credits in either course.

Elective Course Options for All Tracks

See each track to determine the number of elective courses to select.

Code	Title	Credits
ATHL 507	Athletic Governance and Policy	3
ATHL 508	Athletic Risk Management & Wellness	3
ATHL 509	Seminar in Legal and Ethical Issues in Athletics	3
ATHL 514	Women and Sports	3
ATHL 516	Sport Analytics	3
ATHL 517	Athletic Finances	3
ATHL 518	Athlete Development	3
ATHL 519	Ethics in Sport	3
ATHL 550	Current Issues in Athletics	3

Athletic Administration Track

(15 credits plus core and elective credits)

Code	Title	Credits
Core Courses (see above)		15
Required Courses for Track:		12
ATHL 505	Athletic Communication and Marketing	
ATHL 506	Athletic Facilities Management	
ATHL 621	Concepts and Principles of Athletic Administration	
ATHL 622	Administrative Decision-Making	
Elective Course Credits		9
Select 9 credits from the list of elective courses or from the courses available under any Track option.		
Total Credits		36

Career Exploration Track

(15 credits plus core and elective credits)

Code	Title	Credits
Core Courses (see above)		15
Elective Course Credits		21
Select 21 credits from the list of elective courses and/or those offered for a different Track.		
Total Credits		36

Coaching Track

(15 credits plus core and elective credits)

Code	Title	Credits
Core Courses (see above)		15
Required Courses for Track:		12
ATHL 504	Seminar in Athletic Training	
ATHL 508	Athletic Risk Management & Wellness	
ATHL 601	Concepts and Principles of Coaching	
ATHL 602	Developing a Philosophy of Coaching	
Elective Course Credits		9
Select 9 credits from the list of elective courses or from courses under any Track option.		
Total Credits		36

Sport Psychology Track

(9 credits plus core and elective credits)

Code	Title	Credits
Core Courses (see above)		15
Required Courses for Track:		9
ATHL 520	Psychological Skills Training	
ATHL 521	Clinical Sport Psychology	
ATHL 522	Assessment in Sport Psychology	
Elective Course Credits		12
Select 12 credits from the list of elective courses or from courses under any Track option.		
Total Credits		36

Athletic Leadership M.A. 4 + 1

Overview

The Athletic Leadership M.A. 4+1 option is designed for undergraduate students who wish to combine undergraduate study in a major leading to a Bachelor's degree with graduate study leading to a Master of Arts in Athletic Leadership. Eligible students may complete six credits as an undergraduate, then 30 credits to complete the graduate requirement. Undergraduate students accepted into the program will take the following two (2) courses during their Senior year:

- ATHL 501 (<http://catalog.rider.edu/search/?P=ATHL%20501>)
- ATHL 502 (<http://catalog.rider.edu/search/?P=ATHL%20502>)

The remaining 30 credits will be completed upon acceptance into the M.A. in Athletic Leadership program.

The admission process for this program ensures that only capable students are enrolled. For more information please visit the Master of Arts in Athletic Leadership (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/graduate/athletic-leadership/>) page on the Rider website.

brosvic@rider.edu

Courses and Descriptions

ATHL 501 Sport Psychology 3 Credits

This course covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics. Emphasis is placed on applications for maximizing effectiveness while serving in the position of coach or administrator.

Prerequisite(s): Permission of Program Director.

ATHL 502 Evidence-Based Research and Athletics 3 Credits

This course in research methods prepares the student to understand materials and issues associated with but not limited to the logic of the scientific method, research design, and qualitative and statistical analysis of data. Students will be afforded the opportunity to conduct research in the course on topics.

Prerequisite(s): Permission of Program Director.

ATHL 503 Strength, Speed, and Conditioning 3 Credits

Emphasis will be placed upon assessment, description, and analysis of sport movement and designing training programs to enhance performance variables. While this course will assist those who desire to sit for the National Strength and Conditioning Association's (NSCA) Certified Exam, it is NOT a preparation course for the NSCA-CSCS exam.

Prerequisite(s): Permission of Program Director.

ATHL 504 Seminar in Athletic Training 3 Credits

Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

Prerequisite(s): Permission of Program Director.

ATHL 505 Athletic Communication and Marketing 3 Credits

Seminar in Sports Media and Communication is a critical examination of the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): Permission of Program Director.

ATHL 506 Athletic Facilities Management 3 Credits

Seminar in Facilities Management and Event Planning provides an examination of principles and techniques of planning and operating sport facilities. Emphasizes the principles and concepts of organization and administration including communication, personnel management, management of physical resources, and risk management. Examines a variety of sport operations such as indoor stadiums, athletic field complexes, and managing recreation and intramural activities.

Prerequisite(s): Permission of Program Director.

ATHL 507 Athletic Governance and Policy 3 Credits

Students in this course will explore principles, techniques, and processes related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. Studying collegiate athletic administration involves interpreting NCAA By-laws, including a comparison between Division I, II, and III compliance regulations. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level. At the end of the course, students will understand the primary duties of the athletic director and the intricacies of managing an intercollegiate athletic program.

Prerequisite(s): Permission of Program Director.

ATHL 508 Athletic Risk Management & Wellness 3 Credits

Students in this course will explore proactive approaches to managing risks associated with conducting health, physical education, recreation and outdoor education programs. This course will emphasize safety as a foundation of quality program planning. Students will study governing associations and leadership/management skills required to be successful in the world of college athletics.

Prerequisite(s): Permission of Program Director.

ATHL 509 Seminar in Legal and Ethical Issues in Athletics 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues that will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

Prerequisite(s): Permission of Program Director.

ATHL 514 Women and Sports 3 Credits

Women and Sport focuses on women winning access to the playing field as well as the front office in sport. Using research-based materials, course members will gain an understanding of how women have been involved in sport and physical activity, how women have struggled for widespread recognition and legitimacy, how women continue to carve out their role in shaping sport as it is known today, in the future, and society's ongoing conversation about what it means to be a female athlete or a woman working in sport.

ATHL 515 Athletic Leadership 3 Credits

In any profession or endeavor, the attitude and overall culture of a team is a direct reflection of its leadership. In the sports realm, there are many different leadership approaches that have been considered effective. This course will provide an overview of these approaches based on a comprehensive review of the literature related to sport leadership. The primary goals of this course are to help current and aspiring sport leaders gain a better understanding of effective leadership, to provide the necessary tools in developing effective leaders, and to provide networking opportunities for individuals who share similar goals and aspirations across various domains. The leadership principles may be beneficial to individuals in a variety of settings. This course offers coaches, administrators, players, and scholars the opportunity to learn and apply leadership principles within various contexts.

ATHL 516 Sport Analytics 3 Credits

This course will discuss the theory, development, and application of analytics in sports and the application of analytics in sports for purposes of in-game strategy, player performance, team management, sports operations, and fantasy competitions. Students will be introduced to topics in the applied analysis of sports, with a focus on supporting team decision-makers and applying modern, practical analytic techniques to sports data in search of actionable insight and a competitive edge. The four major team sports of North America (football, baseball, basketball, and hockey) will be the primary subjects of study, but the course's learning objectives are universally applicable to all sports. Emphasis will be placed upon becoming familiar with the full analytic life-cycle: asking productive and relevant research questions, finding the correct data, applying the appropriate tools, discovering insights, and clearly communicating results.

ATHL 517 Athletic Finances 3 Credits

Athletic Finances examines the financial tools that sports managers use to run their sport businesses. Course members will explore traditional and innovative methods of revenue acquisition and financial management in sports organizations, the financial business structure of sports organizations, and the financial planning and forecasting processes that make organizations effective. Various other aspects of finance are discussed as they relate to sports organizations, including the time value of money, capital structuring, stocks and bonds, inventory management, and higher education.

ATHL 518 Athlete Development 3 Credits

Athlete Development focuses on sports-specific learning to prepare athletes with the necessary critical elements leading to an improvement in their chosen sport, emphasizing technical development, physical preparation and sports specific knowledge. The course follows the Long-Term Athlete Development (LTAD) model, an approach to athlete-centered sport that combines skill instruction with long-term planning and an understanding of human development. The LTAD model integrates current research on talent development and assessment into practice to help sport leaders plan athletic development across the life span or design detailed programs for a particular group, including those with physical and cognitive disabilities.

ATHL 519 Ethics in Sport 3 Credits

Ethics in Sport focuses on focus on how people should treat one another in sport settings and, therefore, on a critical examination of ethical issues central to contemporary sport. As a class we will thus consider these questions: 1) What place, if any, does sport have in a good life? 2) What counts as cheating in sport, and why is it morally wrong? 3) Is it morally permissible to use performance-enhancing drugs or genetic forms of enhancement to boost athletic performance? 4) How is it possible to achieve equality for women in sports in a culture where dominant sports tend to privilege such traditionally male features as strength, power, and speed?.

ATHL 520 Psychological Skills Training 3 Credits

Psychological Skills Training (PST) teaches techniques grounded in mental training principles used by elite athletes, business professionals, and special operations personnel to achieve and maintain the highest levels of resilience, readiness, and performance. Classic PST techniques that define the canon of mental toughness will be presented with history and theory and extensive embedded self-exercises teaching self-awareness training, goal setting, imagery and visualization, attentional and concentration techniques, arousal and intensity regulation, and stress management. A complete mindfulness sports performance enhancement (MSPE) protocol using the latest research from the sport sciences, psychology, and neuroscience will be presented including guidance for building mindfulness skills essential to consistent, optimal performance.

ATHL 521 Clinical Sport Psychology 3 Credits

Clinical Sport Psychology presents a new way of thinking about the psychological processes that are involved in attaining and maintaining sport expertise. The course, based on clinical and sport research, bridges the gap between clinical and sport psychologists by presenting a model that connects athletic performance, basic psychological processes, and relevant empirical findings. Successful completion of course materials provides the practitioner with greater understanding of the varying dimensions of clinical phenomena and how nonclinical, subclinical, and clinical issues affect athletic performance and the overall well-being of athletes.

ATHL 522 Assessment in Sport Psychology 3 Credits

Assessment in Sport Psychology integrates and synthesizes the theoretical concepts of sport and performance psychology into meaningful application. Emphasis is placed on creating and then assessing performance-enhancement programs for clients through the exploration and application of theory, research, and intervention strategies to assist clients pursuing excellence. The construct of excellence is thoroughly explored, including common roadblocks and the type of contexts in which the skills and knowledge are used in the field of clinical mental health counseling, sport and performance, intrapersonal relationships, and career.

ATHL 550 Current Issues in Athletics 3 Credits

This course will provide students the opportunity to survey the various sub-disciplines related to coaching and athletic administration, and their methods of inquiry. The course will place emphases on critically appraising research literature, and data collection, data organization and analyses for various research questions.

ATHL 601 Concepts and Principles of Coaching 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director.

ATHL 602 Developing a Philosophy of Coaching 3 Credits

Athletic Coaching – Developing a Philosophy provides the opportunity to learn and reflect upon the necessary skills for a successful coach. The course will cover numerous topics to allow course members the opportunity to learn, evaluate and self-reflect on their abilities and skills as a coach, and to develop a personal philosophy of coaching. The course addresses the differences in levels of competitive sports, the personal roles that coaches should exhibit, the professional roles expected and the organizational influences on the world of a coach in order to maximize the development of athletes and team while progressing from one season to the next in the annual coaching cycle.

Prerequisite(s): Current enrollment in ATHL 601 or satisfactory completion of ATHL 601.

ATHL 621 Concepts and Principles of Athletic Administration 3 Credits

Concepts and Principles of Athletic Administration explores the complexities of intercollegiate athletics while explaining the organizational structures, key players, terms, and important issues most relevant to the growing but often misunderstood fields of recreational studies, sports management, and athletic administration. Intercollegiate athletics create unique challenges to higher education—for while they are closely integrated into their institutions—athletic programs often operate outside of traditional university governance structures while contributing significantly to a school's culture, identity, and financial outlook. Course members in this course will explore principles, techniques, and process related to the management of college athletics, characterize the critical steps to getting hired in collegiate athletics, and prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level.

ATHL 622 Administrative Decision-Making 3 Credits

Students in this course will explore principles, techniques, and process related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level.

Prerequisite(s): Current enrollment in ATHL 621 or satisfactory completion of ATHL 621.

ATHL 650 Internship of Athletic Leadership 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director.

ATHL 651 Internship of Athletic Administration 3 Credits

The internship affords students professional experience with an organization where the course theory can be applied to best practices. The internship is developed in consultation with the student, the student's academic advisor and the Internship. A learning/work plan is prepared by the student for approval by the site supervisor, both of whom share responsibility for the internship.

Prerequisite(s): Permission of Program Director or approval by CLAS Dean's Office.

Bilingual Education Endorsement Certificate

Program Overview

This Bilingual Endorsement program is for those educators already certified in another specialization. Rider's Bilingual Endorsement Program trains future educators to be sensitive to the cultural, sociological, linguistic, and psychological diversities that English Language Learner students bring with them to school. The mission of the Bilingual program at Rider University is to provide the skills, attitudes and understandings necessary to teach non-native speakers of English in order for them to achieve their greatest potential through education for life. Furthermore, Rider's Bilingual program introduces future educators to the different laws, programs, and approaches in the classroom that use the ELL's native language as a resource for instruction.

Curriculum Overview

This endorsement provides bilingual teaching credentials for those already certified in another specialization. It is a 15-credit program requiring five teacher preparation courses offered in the late afternoon/evening.

Courses and Descriptions

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

Clinical Mental Health Counseling (M.A.)

Program Overview

The Master of Arts in Clinical Mental Health Counseling (MA CMHC) program prepares students for counseling positions in community agencies, mental health agencies, hospitals, government facilities, institutions of higher education, corporate settings, and private practice.

Within this MA CMHC degree, students have the option to enroll in and complete a Dance/Movement Therapy (DMT) concentration. In this concentration, students are trained in clinical mental health counseling with a specialization in dance/movement therapy.

This program meets the academic requirements for the Licensed Professional Counselor (LPC) (<http://www.njconsumeraffairs.gov/pc/Pages/default.aspx>) in New Jersey, Pennsylvania, and most other states. It also meets all educational requirements for certification as a National Certified Counselor (NCC) (<https://www.nbcc.org/certification/ncc/>) and Board Certified Coach (BCC) (<http://www.cce-global.org/bcc/>).

MA CMHC students who are enrolled in the DMT concentration complete 65 credits and are in a concentration that is in candidacy with good standing with the American Dance Therapy Association. Students meet requirements for the Registered Dance Movement Therapist (R-DMT).

MA CMHC students who are enrolled in the DMT concentration complete 65 credits and are in a concentration that is in candidacy for the national Registered Dance Movement Therapist (R-DMT) (<https://www.adta.org/r-dmt/>) through the American Dance Therapy Association (<https://www.adta.org/>).

MA CMHC students in their final year are provided with preparation for the National Counselor Exam (NCE) (<https://www.nbcc.org/Exams/NCE/>) which is taken during their last semester at Rider.

In keeping with the University's core mission, all degree and certification programs are student-centered, created to be flexible to meet the needs of professionals and students with busy lives, provide cutting-

edge instruction, offer hands-on practice in mental health organizations and agencies, and are taught by supportive faculty who are dedicated to mentoring students. The faculty and training are focused on clinical mental health counseling. Students may also attain specialized training and/or take coursework in areas such as play therapy, addictions, dance/movement therapy, trauma, advanced psychopathology, creativity in counseling, and body image.

Curriculum Overview

All students in the MA CMHC program are required to complete 60-65 credits of coursework. Students in the CMHC program (without a DMT concentration) complete 60 credits of coursework. Students in the CMHC program (with a DMT concentration) complete 65 credits of coursework. All CMHC students complete at least 700 hours of counseling fieldwork in a clinical mental health setting. Students enrolled in the CMHC program (with a DMT concentration) complete additional hours of fieldwork. An appropriate fieldwork site is one that provides a program of services designed to help individuals function to their optimal capacity. Such programs exist in a wide variety of settings, such as mental health clinics, correctional facilities, hospital settings, family service centers, comprehensive rehabilitation centers, social service organizations, vocational counseling programs, private counseling programs, substance abuse treatment programs, employee assistance programs, college counseling centers, and other appropriate sites.

All degree candidates must purchase student professional liability insurance.

Degree Offered

- M.A. in Clinical Mental Health Counseling
- Dance/Movement Therapy concentration: a concentration within this M.A. CMHC degree and requires 65 credits

¹ For SAC students, this course or COUN 516 must be taken prior to Practicum.

² Some electives have prerequisites and/or may need permission of the program advisor.

Clinical Mental Health Counseling with a Dance/Movement Therapy Concentration

(65 credits)

Code	Title	Credits
Required Core and Fieldwork Courses (see above)		45
Required Dance/Movement Therapy Concentration Courses:		
CNDT 584	Counseling and Dance/Movement Therapy Practicum I	3
CNDT 600	Body Mind Integration through Movement I	0
CNDT 610	Dance/Movement Therapy Theory and Practice I	3
CNDT 612	Movement Observation, Analysis, and Assessment	3
CNDT 620	Clinical Applications of Dance/Movement Therapy	3
CNDT 700	Body Mind Integration through Movement II	0
CNDT 710	Dance/Movement Therapy Theory and Practice II	3
Students beginning in the MA CMHC program (with a DMT concentration) in Fall 2022 or after must also complete the following courses:		5
CNDT 790	Clinical Consultation in Dance/Movement Therapy I (2 credits)	
CNDT 791	Clinical Consultation in Dance/Movement Therapy II (3 credits)	
Total Credits		65

Accelerated BA to MA Program

(15 credits)

Highly qualified undergraduate psychology majors who are interested in the MA Clinical Mental Health Counseling program are eligible to apply in their junior year for the accelerated BA-MA program. This program enables students to take graduate courses during their senior year that count toward both the bachelor's and master's degrees.

Highly qualified undergraduate dance majors are also eligible to apply to the accelerated DMT concentration within the MA CMHC program.

Applicants for this accelerated program must have a GPA of at least 3.0 and must meet the same admission requirements as all other applicants. Students must apply by February 10 of their junior year. Those admitted must maintain a 3.0 GPA throughout the bachelor's part of the program. In addition, performance in graduate-level courses is subject to all academic policies and requirements of the Department of Graduate Education, Leadership, & Counseling.

Students accepted into the CMHC accelerated program who would like to complete the BA/MA will take the following 15 credits¹ of graduate courses² during their senior year, in addition to the necessary undergraduate courses:

Code	Title	Credits
CNPY 502	Theories of Counseling and Helping Professions	3
COUN 500	Introduction to Counseling and Helping Professions	3
COUN 503	Group Counseling	3
COUN 550	Counseling and Helping Techniques Laboratory	3

CNPY 514

Psychopathology

3

Total Credits

15

¹ Undergraduate students who would like to take fewer than 15 graduate credits during their senior year are also eligible to apply for the accelerated program. Taking fewer than 15 courses as an undergraduate student may mean that it will take longer to complete the BA/MA program.

² Graduate program directors may suggest different graduate courses than the 5 listed above for accelerated students. Students should also consult with their undergraduate advisor on the choice of graduate courses.

Following successful completion of the undergraduate program, students will automatically be matriculated into the Clinical Mental Health Counseling MA-degree program, where they will complete the remaining MA-level coursework.

Courses and Descriptions

Required Core Courses for All CMHC Students (p. 1393)

Required Fieldwork Courses for All CMHC Students (p. 1394)

Additional Required Courses for CMHC Students In the DMT Concentration (p. 1395)

Additional Required Courses for CMHC Students Not In the DMT Concentration (p. 1396)

Required Core Courses for All CMHC Students

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This is a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

Required Fieldwork Courses for all CMHC Students

COUN 585 Clinical Mental Health Counseling Practicum 3 Credits

A supervised experience in counseling and consulting techniques in mental health facility, community counseling agency, or college setting. Includes seminar discussions, interview analyses or audiotape/videotape observations, and individual supervision with the instructor. For the experienced counselor or the advanced counselor in training who desires to review and/or strengthen individual counseling and consulting techniques. A field placement of 100 hours is required with a minimum of 40 direct contact hours with clients. Students registering for this course should contact the instructor the semester prior to the course being offered.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 590 Internship in Counseling I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

Prerequisite(s): COUN 580 or COUN 581 or COUN 585 or CNSC 580 or CNSC 581. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

COUN 591 Internship in Counseling II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 or concurrent enrollment. All other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

CNDT 585 Counseling and Dance/Movement Therapy Practicum II 3 Credits

A supervised field experience in counseling and dance/movement therapy techniques. In this second semester of practicum, students will continue to advance their clinical skills by co-leading dance/movement therapy sessions with field supervision. The goal is for students to facilitate entire sessions by the end of the semester. The course will include seminar discussions, observations and analysis of the therapeutic process of dance/movement therapy sessions and individual supervision with the instructor. A total of 100 field hours is required with a minimum of 40 direct contact hours with clients. The approval and cooperation of the fieldwork agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): CNDT 584.

CNDT 590 Counseling and Dance/Movement Therapy Internship I 3 Credits

This course is one of two internship courses required in the student's final year. It fulfills 350 internship hours. Students will be at a clinical site approved by faculty, with a supervisor who meets all CACREP standards and will receive supervision by a board certified dance/movement therapist. Supervision class will support students in the clinical setting and in effectively utilizing counseling and dance/movement therapy knowledge and skills, including clinical appraisal, treatment planning, and documentation for dance/movement therapy. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): CNDT 585. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

CNDT 591 Counseling and Dance/Movement Therapy Internship II 3 Credits

The second semester of the internship fulfills 350 internship hours. Students will be at a clinical site approved by faculty and will engage in all activities that a regularly employed staff member would be expected to perform. A regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring. Students will be under the field supervision of a supervisor who meets all CACREP requirements and will be supervised by a board certified dance/movement therapist. Supervision class will provide opportunities for students to analyze their practice, reflect on their progress as clinicians, and develop skills to internally self-evaluate their effectiveness as counselors and dance/movement therapists. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement. **Prerequisite(s):** CNDT 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the instructor.

Additional Required Courses for CMHC Students in the DMT Concentration**CNDT 584 Counseling and Dance/Movement Therapy Practicum I 3 Credits**

Students are at a clinical site for a total of 100 hours for the semester to practice skills in movement observation and analysis, group leadership, session analysis, treatment planning, and documentation. Supervision class will focus on understanding the professional, legal, and ethical responsibilities of being a dance/movement therapist in clinical settings from a multicultural perspective. Issues pertaining to professional identity development will be addressed.

CNDT 600 Body Mind Integration through Movement I 0 Credits

This is a movement laboratory class to explore how dance and movement reflect and affect physical, cognitive, mental, emotional, and spiritual states. Students learn to attune to their bodies in movement and develop awareness of the bidirectional interactions between body and mind.

CNDT 610 Dance/Movement Therapy Theory and Practice I 3 Credits

This course covers the foundational principles, theories, and techniques of dance/movement therapy and will examine the social and cultural foundations of dance as art and medium for growth, change, and healing. Works of dance/movement therapy pioneers and the evolution of dance/movement therapy practices will be explored didactically and experientially.

CNDT 612 Movement Observation, Analysis, and Assessment 3 Credits

This course will provide students with the language and skills to observe, describe, analyze, and assess human movement patterns and behaviors using Laban Movement Analysis and Kestenberg Movement Profile. Other frameworks for movement observation and analysis will also be introduced to explore the applicability of various frameworks for clients with diverse cultural backgrounds. The didactic and experiential format of this class will enable students to embody various movement qualities and develop skills used in conducting and documenting dance/movement therapy sessions.

CNDT 620 Clinical Applications of Dance/Movement Therapy 3 Credits

Group and individual dance/movement therapy practices in various clinical settings are addressed: psychiatric hospitals, addiction recovery programs, therapeutic schools for children with emotional and behavioral problems, developmental disabilities, and special needs; hospices; and hospitals. Students develop their own working theoretical model of dance/movement therapy to guide their work as emerging dance/movement therapists.

CNDT 700 Body Mind Integration through Movement II 0 Credits

The second semester of the movement laboratory class focuses on the use of mindfulness practices and Authentic Movement methods for further develop body-mind awareness, to experience and observe movements simultaneously as internal and external experience, and to decipher the nature of knowledge and meaning inherent in dance and movement.

Prerequisite(s): CNDT 600.

CNDT 710 Dance/Movement Therapy Theory and Practice II 3 Credits

In this didactic and experiential course, select theories from psychology, counseling, psychotherapy, and neuroscience are studied in order to identify the healing and transformative factors of the creative arts therapies. Some of the topics covered in this course are: psychodynamics and object relations theories; intersubjectivity; symbolism and metaphor; psychology of creativity; and neuroscience in dance/movement therapy.

Prerequisite(s): CNDT 610.

Additional Required Courses for CMHC Students Not In the DMT Concentration

Note: 6 credits in elective courses are required.

COUN 515 Substance Abuse Counseling 3 Credits

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

COUN 516 Strategies in Addiction Counseling 3 Credits

This is an experiential and laboratory-based experience in which students will learn to implement evidence based counseling techniques that are utilized in the field of substance abuse counseling. Students will be able to expand their basic counseling skills and techniques learned in COUN 550, as well as become exposed to techniques that are unique to addiction counseling. In addition to learning assessment skills, students will learn interventions that include motivational interviewing, relapse prevention, alternative therapies, group counseling, family counseling, and others. This course will also focus on issues of ethics and prevention in counseling.

Prerequisite(s): COUN 550.

CNPY 516 Advanced Psychopathology 3 Credits

An in-depth study of psychopathology with emphasis on developmental and personality disorders, and physiological disturbances. Includes assessment, classification, and treatment with emphasis on utilization in a variety of counseling and school settings. Biological, pathological, pharmacological bases of mental disorders are introduced and discussed in relationship to specific disorder classifications.

Prerequisite(s): CNPY 514 or permission of instructor.

Comprehensive Business (K-12) Certificate

Program Overview

This Post-Baccalaureate Teacher Certification Program in Comprehensive Business (K-12) is designed for college graduates seeking initial teacher certification in the subject area of Comprehensive Business. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 1475)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Comprehensive Business is a 21-credit graduate program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Certificates Offered

- Comprehensive Business Certificate (K-12)

- Completion of CURR 770 or CURR 771 with a “C+” grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 708 Inclusive Methods for Teaching Business 3 Credits

Emphasis is placed on the enhancement of teaching inclusive business education. Special attention is devoted to the new technology and its use in business education. Current instructional materials are presented and utilized. Master practicing business education teachers will augment the instructor’s presentations.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students’ career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

Cooperative Education Coordinator Certificate

Program Overview

Rider University offers the two required graduate courses for this certificate. The applicant should refer to the certification requirements on the NJDOE website (<http://www.state.nj.us/cgi-bin/education/license/endorsement.pl?string=999&maxhits=1000&field=2>).

Courses and Descriptions

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

Counseling Services (M.A.)

Program Overview

The Master of Arts in Counseling Services (school counseling concentration) is a 48-credit program that prepares students for school counseling positions in elementary and secondary public and private schools. This program meets the educational requirements for state certification as a K-12 school counselor in New Jersey (<https://www.schoolcounselor.org/About-School-Counseling/State-Requirements-Programs/State-Licensure-Requirements/>), (<https://www.schoolcounselor.org/About-School-Counseling/State-Requirements-Programs/State-Licensure-Requirements/>) and meets the certification requirements of most other states. In addition, the program prepares students for the eight core content areas of the National Counselor Exam

(NCE) (<https://www.nbcc.org/exams/nce/>), required by the National Board of Certified Counselors (NBCC) in order to become a National Certified Counselor. Students completing this program will also have met the educational requirements for Board Certified Coach (BCC) (<https://www.cce-global.org/BCC/>) and, with two additional courses, for the Student Assistance Coordinator (SAC) (<https://nj.gov/education/license/endorsements/3461CEAS.pdf>) certificate.

In keeping with the University's core mission, this program is student-centered. Courses are offered in the evenings with full-time and part-time enrollment options available to meet the needs of returning and professional students with busy lives. Cutting-edge instruction, hands-on practice in schools, and supportive faculty who are dedicated to mentoring students are core program components. The faculty and training are focused on wellness counseling and positive psychology, with an emphasis on the strengths of the individuals served, rather than on deficits.

Accreditation Information: The Counseling Services program (school counseling concentration) has been accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP) (<https://www.cacrep.org/>) since 1999. The program is accredited until October 31, 2022.

Curriculum Overview

All students in this area of study are required to complete 48 credits of coursework and to take classes that cover the theories of counseling and psychotherapy, ethical and legal issues, counseling children, adolescents and their families, along with an elementary school counseling or secondary school counseling practicum and two internships. The practicum and internships require 700 hours of fieldwork in preparation for professional practice. Fieldwork placement occurs through close collaboration with Rider's clinical coordinator and is supervised by both practitioners in the field and professors in the classroom.

All degree candidates must purchase student professional liability insurance once they enter the field.

Accelerated BA / MA

(15 credits)

Highly qualified undergraduate psychology majors are eligible to apply in their junior year for the accelerated BA-MA program in School Counseling. This program enables students to take graduate courses during their senior year that count toward both the bachelor's and master's degrees.

Applicants for this accelerated program must have a GPA of at least 3.0 and must meet the same admission requirements as all other applicants. Students must apply by February 10 of their junior year. Those admitted must maintain a 3.0 GPA throughout the bachelor's part of the program. In addition, performance in graduate-level courses is subject to all academic policies and requirements of the Department of Graduate Education, Leadership, & Counseling.

Students accepted into the School Counseling accelerated program who would like to complete the BA/MA in 5 years will take the following 15 credits* of graduate courses during their senior year, in addition to the necessary undergraduate courses:

Code	Title	Credits
COUN 500	Introduction to Counseling and Helping Professions	3
CNPY 502	Theories of Counseling and Helping Professions	3
COUN 503	Group Counseling	3
COUN 550	Counseling and Helping Techniques Laboratory	3
EDSO 501	Foundations of Counseling in Edu Settings: Referral Sources for Stdnts and Stdnts With Special Needs	3

* Undergraduate students who would like to take fewer than 15 graduate credits during their senior year are also eligible to apply for the accelerated program. Taking fewer than 15 courses as an undergraduate student may mean that it will take longer than 5 years to complete the BA/MA.

Following successful completion of the undergraduate program, students will automatically be matriculated into the School Counseling MA-degree program, where they will complete the remaining MA-level coursework.

Courses and Descriptions

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 590 Counseling Internship I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School counselors, student assistance coordinators (SACs) and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled. Students must be supervised by an SAC.

Prerequisite(s): COUN 585 OR COUN 580 OR COUN 581 OR CNSC 580 OR CNSC 581. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

CNSC 591 Counseling Internship II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School counselors, Student Assistance Coordinators (SACs), and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. Students must be supervised by a SAC. The approval and cooperation of the intern's field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

COUN 580 Elementary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 581 Secondary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 590 Internship in Counseling I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

Prerequisite(s): COUN 580 or COUN 581 or COUN 585 or CNSC 580 or CNSC 581. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

COUN 591 Internship in Counseling II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 or concurrent enrollment.

All other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Stdnts and Stdnts With Special Needs 3 Credits

The course provides an overview of the foundations of counseling in educational settings, including the historical roots, current and future trends, roles, and functions in multicultural schools and higher education settings. Students examine the roles and responsibilities of professional school counselors to facilitate student success through the development of a comprehensive school counseling program as an integral component of the total education system.

EDSO 510 Sociological and Cultural Foundations of Education 3 Credits

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

Dance Education (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in Dance Education (K-12) is designed for college graduates seeking initial teacher certification in the subject area of Dance. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 1475)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Dance Education is a 21-credit graduate program requiring courses taken in late afternoons/evenings followed by a full semester of full-time student teaching.

Additional Requirements for Completion of the Certificate:

- Completion of all courses before final clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade of better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 711 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. The existing methods course in Dance for beginning teachers is cross-listed with DAN 450.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

Director of School Counseling Services Certificate

Program Overview

The program is designed for school counselors who wish to be certified as director of school counseling services. The Director of School Counseling Services certificate authorizes the holder to serve as a director, administrator or supervisor of school counseling services, including the supervision of educational activities in areas related to and within the counseling program in grades preschool through 12. Admission requirements for this program include holding a master's degree in counseling, New Jersey school counselor certification, and at least three years of professional school counseling experience.

Curriculum Overview

The applicant's academic and professional background are assessed in terms of state certification requirements (<http://www.state.nj.us/education/educators/license/endorsements/0602S.pdf>) in order to determine an appropriate plan of study, however, three courses are typically required.

Courses and Descriptions

COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

Prerequisites: COUN 590.

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

Doctor of Educational Leadership

Program Overview

Rider's Doctor of Educational Leadership brings together passionate and experienced educators to collaboratively study the complex and pressing issues facing students and teachers today — and to develop practical, evidence-based solutions to respond to those issues through action research.

The **36-month, 51-credit program** involves two years of coursework and a year of dissertation research and analysis. Hybrid (online and on-campus) studies and summer residencies enable education professionals to pursue the degree without career interruption.

The goal of Rider's Ed.D. program is to prepare skilled professionals who use research and scholarship to inform their leadership and decision making. Through the required coursework, you will develop a greater understanding and sense of context for today's major educational challenges, including:

- Educational reform
- Instructional leadership
- Educational accountability and assessment
- Research methods and data analysis
- Social context of education
- Politics and governance
- Teachers and teaching
- Resource allocation and deployment

Curriculum Overview

Much of the program's coursework will relate to issues facing your own school, district or college, giving you practical knowledge and insights that you can apply every day to your work. Early in the program, you will learn how action research can be used to determine needs and options, and begin working with members of the doctoral faculty to identify a potential problem, issue or opportunity of interest to you. You will then implement and evaluate your own dissertation change project.

As an added feature of our program we are currently offering our candidates the option to take a concentration of four courses focused on higher education. See the Concentration tab for the coursework related to this option.

Carnegie Project on the Education Doctorate Rider has been invited to become a member of the prestigious Carnegie Project on the Education Doctorate

The Carnegie Project on the Education Doctorate (<https://www.cpedinitiative.org/>) (CPED) includes over 100 colleges and schools of education, which have committed resources to work together to undertake a critical examination of the doctorate in education (EdD) through dialog, experimentation, critical feedback and evaluation.

Vision

The Vision of the Carnegie Project on the Education Doctorate (CPED) is to inspire all schools of education to apply the CPED framework to the preparation of educational leaders to become well-equipped scholarly

practitioners who provide stewardship of the profession and meet the educational challenges of the 21st century.

Mission

The Mission of the Carnegie Project on the Education Doctorate (CPED) is to strengthen, improve, support and promote the CPED framework through continued collaboration and investigation.

The Framework

Through a collaborative, authentic process, members of CPED developed a Framework for EdD program design/redesign that supports creating quality, rigorous practitioner preparation while honoring the local context of each member institution. The CPED Framework consists of three components—a new definition of the EdD, a set of guiding principles for program development and a set of design-concepts that serve as program building blocks.

Members enter the Consortium at points of considering a new EdD. As they engage in the Consortium, they utilize this Framework to design/redesign, evaluate and improve their programs. As such CPED members are often at different levels in the design/redesign process.

Guiding Principles for Program Design

With this understanding, we have identified the following statements that will focus a research and development agenda to test, refine, and validate principles for the professional doctorate in education. The professional doctorate in education:

1. Is framed around questions of equity, ethics, and social justice to bring about solutions to complex problems of practice.
2. Prepares leaders who can construct and apply knowledge to make a positive difference in the lives of individuals, families, organizations, and communities.
3. Provides opportunities for candidates to develop and demonstrate collaboration and communication skills to work with diverse communities and to build partnerships.
4. Provides field-based opportunities to analyze problems of practice and use multiple frames to develop meaningful solutions.
5. Is grounded in and develops a professional knowledge base that integrates both practical and research knowledge, that links theory with systemic and systematic inquiry.
6. Emphasizes the generation, transformation, and use of professional knowledge and practice.

Standards-Based Studies

The curriculum is built around the National Policy Board for Educational Administration's student-centric 2015 Professional Standards for Educational Leaders (http://npbea.org/wp-content/uploads/2017/06/Professional-Standards-for-Educational-Leaders_2015.pdf) (formerly known as the ISLLC Standards).

Prepared for and by educational leaders, the standards focus on 10 high-impact areas that drive and measure excellence in professional practice:

1. Mission, Vision and Core Values
2. Ethics and Professional Norms
3. Equity and Cultural Responsiveness
4. Curriculum, Instruction and Assessment

5. Community of Care and Support for Students
6. Professional Capacity of School Personnel
7. Professional Community for Teachers and Staff
8. Meaningful Engagement of Families and Community
9. Operations and Management
10. School Improvement

Program Format

A defining element of this innovative doctoral program is its cohort model of 10 to 12 students. This design creates a highly supportive and interactive learning environment that promotes peer-to-peer learning and networking, as well as close mentoring relationships between faculty and students. The coursework is progressive, with each class building the knowledge base.

Program Features

- **Flexibly designed** around the schedules of working professional educators
- **Asynchronous online classes** throughout each semester
- **Three on-campus Saturday sessions** (9 a.m. – 3 p.m.) each fall and spring semester
- **8-day summer residencies in July** (2 consecutive weeks, Monday through Thursday)

The Online Experience

Your online courses will be asynchronous, enabling you to complete most of your course assignments and activities at the time and place that's best for you. For example, discussion board question responses can be posted and assignments submitted at a time that is convenient (as long as the activity is completed by the stated due date).

Real-time, interactive e-sessions will be scheduled periodically. Over the course of your studies, peer-to-peer and faculty interactions will include such activities as team projects and special presentations. (*Note: Web cam access will be needed for these sessions.*)

One-to-one access to our doctoral faculty is a critical part of the program. Your professors will be available for meetings on-campus, as well as by phone or streaming video. Each semester, your professors will interact with you by phone and email, participate actively in discussion boards and webinars, and provide feedback on assignments.

You will be assisted in all your scheduling and registration needs, as well as planning your coursework and maintaining academic progress based on your goals (a minimum 3.0 GPA is required for the doctoral program). You also will have full access to services and resources of the University.

Doctor of Educational Leadership Program Requirements

(51 credits)

The following educational plan is provided as a sample only. Students may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Code	Title	Credits
Suggested Sequence for Program Completion		
Complete the following courses in the order suggested below:		
Year 1 Summer		6
EDLD 800	Strategic Management, Organizational and Moral Leadership Behavior in a Culture of Learning	
EDLD 803	Instructional Leadership and Educational Reform	
Year 1 Fall		6
EDLD 801	Action Research: Principles and Methods	
EDLD 802	Educational Change, Systemic Reform, Exercising the Politics of Change	
Year 1 Spring		6
EDLD 804	Community Building and Sustaining Community Partnerships	
EDLD 810	Curriculum Leadership: Transforming Teachers/Developing Teacher Talent	
Year 2 Summer		6
EDLD 806	Research Proposal Development	
EDLD 808	Generating, Using, and Assessing Data Accountability and Student Assessment	
Year 2 Fall		6
EDLD 805	Valuing Diversity/Equity: Developing and Fostering a Community of Learners	
EDLD 809	Finance, Fundraising and Fiscal Management	
Year 2 Winter		3
EDLD 817	Qualitative Research Methods	
Year 2 Spring		6
EDLD 811	Innovation and the Use of Educational Technology	
EDLD 813	Dissertation of Practice I	
Year 3 Summer		6
EDLD 807	Law and Policy	
EDLD 812	Leading Programs for Diverse Learners and At Risk Students	
Year 3 Fall		3
EDLD 814	Dissertation of Practice II	
Year 3 Spring		3

EDLD 816 Dissertation of Practice IV

Courses

EDLD 800 Strategic Management, Organizational and Moral Leadership Behavior in a Culture of Learning 3 Credits

This course will challenge students to embrace a system view of leadership and organizational change at the organizational level. Students will compare, contrast and critique theories and models of organizational learning, knowledge creation, and organizational capacity building and apply them to their own organizational settings. The course will focus on three leadership standards: instructional leadership, operational and managerial leadership, and professional culture. While the course will focus on conceptual frameworks and theory, it is a practice-based course. The course will enhance student ability to think systematically and develop comprehensive understanding of core competencies required to lead, initiate and sustain change in organizations. It investigates process and content issues of team building, interpersonal and group relations, and effective problem solving and decision making skills in collaborative environments. The course emphasizes the moral, ethical and social responsibilities of organizational leaders, as well as the application of principles to organizational leadership behavior and decision-making. Students will also investigate current research trends regarding ethical issues in education and other organizational contexts.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 801 Action Research: Principles and Methods 3 Credits

This course provides an introduction to action research, with emphasis on its application in educational settings. The course covers definitions and purposes of action research. Students will explore theoretical, methodological, and ethical issues pertinent to action research. During the course, students will engage in an action research project in an educational setting.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 802 Educational Change, Systemic Reform, Exercising the Politics of Change 3 Credits

This course will provide students with the skills necessary to achieve educational reform and improvement while navigating the political environment within educational institutions. Through this course, students will analyze various theories and how these ideas apply to education, organizations, change, and leadership.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 803 Instructional Leadership and Educational Reform 3 Credits

Through this course, students will examine contemporary educational practices and their relationship to leadership theories, models, and strategies. Participants will investigate research based instructional practices and develop the skills necessary to identify issues within organizations in suburban and urban settings. The course will provide students with a deep knowledge of the educational challenges faced by educational leaders in today's society. The focus will be on learning a successful organization through the implementation of research based strategies.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 804 Community Building and Sustaining Community Partnerships 3 Credits

Drawing on philosophies/theories, processes, and practices that build and sustain effective school-community partnerships, this course addresses the identification and utilization of community resources and the development of effective intra- and inter-organizational strategies, community linkages, and collaborative efforts necessary to provide for the holistic needs of students and families. Special attention is focused on the role of school leaders in planning and implementing community-wide and building level communications and involvement networks, through the development of practical action learning sets and tools. Building Commitment: How do leaders build and use public awareness and commitment to support their schools?

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 805 Valuing Diversity/Equity: Developing and Fostering a Community of Learners 3 Credits

The focus of the course is academic excellence with equity. The value orientation of the course is toward high-quality developmental outcomes for youth of all racial, ethnic, and social class backgrounds. With an emphasis on students of color and youth from less-advantaged families, the course explores several policy and strategic responses to achievement disparity: identify and work to remove key structural barriers to educational equity; excellence with equity goals; design more effective policies and practices to improve the quality of teaching; support families with ideas and practices for parenting children more effectively; engage youth to reshape their culture of achievement to align with their most positive values. The course explores theories, evidence, designs, methods, and mechanisms associated raising achievement and closing gaps.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 806 Research Proposal Development 3 Credits

This course builds on the action research course to more clearly define the rationale and procedures of educational and social science research. The course is designed for our first-year doctoral students. Topics will include the nature and purpose of research, planning and conducting research, critiquing and evaluation research, sampling, survey and experimental design, evaluation research, naturalistic observation and inquiry, measurement and methods of data collection, ethics, and the use of computers in data analysis. Methods are considered for collecting both quantitative and qualitative data. Students will build on prior project ideas, concepts, and research practice to more fully develop into their Dissertation of Practice topic. This course has two objectives: to increase participants' knowledge of methods for making causal inferences in quantitative research, and to provide participants with a forum for presenting and receiving feedback on their research topic for the Dissertation of Practice.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 807 Law and Policy 3 Credits

This course explores legal, ethical and political issues governing PreK-12 education in America and the legal responsibilities and powers of state and local governing bodies and individuals that arise in elementary and secondary schools. Emphasis is given to federal and state statutes and case law affecting due process, liability, equal protection, and the rights of teachers and students in order to better understand the risks in education management and possible strategies to reduce those risks. The course will explore evolving legal standards on a variety of issues. The course will draw on real cases and legal/policy dilemmas that practitioners face, and focus on preventive law - providing current and future school learners with knowledge and skills they will need to make sound decisions, advance important educational objectives, and minimize legal problems.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 808 Generating, Using, and Assessing Data Accountability and Student Assessment 3 Credits

This course will develop the skills necessary for educational leaders to identify and define problems, implement data collection methods, and analyze, interpret, and report data across multiple levels from the individual student to the larger system. Students will gain the knowledge and skills to use data in decision making within a problem solving framework that enables evaluation of instructional programs and practices. Within this course, students will engage in activities designed to enhance skills in data-based decision making, including: large and small group discussion; review of the extant literature base; review and use of different technologies and statistical methods for data collection and analyses; case studies and simulated data analyses; and application of skills in real world settings. Attainment of these skills will prepare the student for the dissertation process to serve as an instructional leader in the field. The course references and aligns with state adopted core curriculum content standards and professional development standards, the Standards for Schools Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 809 Finance, Fundraising and Fiscal Management 3 Credits

Financial and managerial leadership of a school building or district is a primary factor in the success or failure of school instructional programs. This course provides an opportunity for public and private school practicing and prospective administrators to gain an understanding of their role in these critical areas. Providing the resources to fund academics/instruction/athletics, facilities and capital projects is a focus of this course. A comprehensive understanding of the financial implications of systemic reform, centralized goal setting, accountability standards, and decentralized forms of site-based management, school choice, and charter schools will be a focus of study. This course will also provide a comprehensive overview of fund raising. Students are provided with an ethical foundation and are introduced to basic terminology and concepts in the field. Various fund raising vehicles are surveyed and participants learn to apply fund raising strategies that are appropriate to their organizational setting.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 810 Curriculum Leadership: Transforming Teachers/Developing Teacher Talent 3 Credits

This course will focus on the complex nature of teaching and learning and provide participants with the skills necessary to guide instructional practice. Adult learning theory will be examined as will curriculum theories, instructional practices, professional development, and human capital.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 811 Innovation and the Use of Educational Technology 3 Credits

This course addresses the intersection of organizational change and educational technology. Students will develop a philosophy of educational technology and explore related issues in policy, diversity, ethics, and evaluation. The course also covers research and theory on organizational change and processes for developing a culture of innovation. Students will apply theories of organizational change to the implementation and use of technology in educational contexts.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 812 Leading Programs for Diverse Learners and At Risk Students 3 Credits

This course examines some of the best practices for supporting diverse learners and at-risk students and some of the reasons behind the intrinsic and bureaucratic/policy barriers that may hinder their success. Schools are faced with an increasing number of diverse learners and at-risk students who require additional academic, social and/or medical supports for them to achieve success. This course will examine the root causes that may hinder student success and some of the programs and approaches that have proved successful in meeting their needs.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 813 Dissertation of Practice I 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 814 Dissertation of Practice II 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice I.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 815 Dissertation of Practice III 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice II.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 816 Dissertation of Practice IV 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice III.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

Early Childhood (P-3)

Program Overview

This Post-Baccalaureate Teacher Certification Program in Early Childhood Education (P-3) is designed for college graduates seeking initial teacher certification in Early Childhood, Preschool through Grade 3. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 1475)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Early Childhood Education (P-3) is a 24-credit graduate program requiring five teacher preparation courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Certificate Offered

Additional requirements for completion

- Completion of all courses before the clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 702 Early Literacy Development for Diverse Learners 3 Credits

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

Prerequisite(s): CURR 700.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

ECED 532 Families, Community, and Diversity in Early Childhood Education 3 Credits

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ECED 550 Development Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

Educational Leadership (M.A.)

Program Overview

The program in Educational Leadership at Rider University prepares candidates for leadership positions at different administrative levels in elementary and secondary schools, colleges and related educational organizations. All programs are accredited. The program has been designed to be developmental and experiential in nature, fostering ethical behavior and the improvement of self and one's profession. Candidates are prepared for leadership opportunities in a collegial and collaborative academic environment that promotes inquiry and discovery, personal growth and initiative, and professional development. The Option Sequences build upon and reference the appropriate professional standards.

Preparing Principals for New Emerging Needs

Rider's Educational Leadership program recognizes that it is principals who are best positioned to lead the effort in their schools to ensure that teaching and learning are as excellent as possible. Principals who have a school-wide focus on better teaching and learning, who know how to create a vision and share authority, and who are prepared to be accountable for achieving the school's educational goals, are vital to ensuring the quality of our children's education. The professionals in the College of Education and Human Services work with the program's participants to develop and evaluate curricula, use data to diagnose student needs, coach teachers, plan professional development in their schools, and establish school-wide norms that support high quality teaching and learning.

Curriculum Overview

Leading to a Master of Arts in Educational Leadership, the Principal Leadership program's executive-style format brings educational peers together to study, network and learn as a unit throughout the program. Participants engage in online classes during the school year and attend scheduled face to face class meetings. The program's flexible, blended learning format recognizes the demands of the teaching profession while maintaining the rigors of a quality leadership training program. Participants pursue their graduate studies without interrupting their professional and personal responsibilities. Candidates complete their graduate studies in two years, and are eligible to apply for both the principal and supervisor certificates.

Educational Leadership Highlights

The 36-credit program of study consists of 12 courses that focus on three areas of leadership:

- personal leadership
- instructional leadership
- school culture leadership

An accomplished and distinguished faculty whose members bring deep practical and theoretical knowledge to their disciplines lead the program. There is close integration of coursework and fieldwork, using techniques such as case studies, problem-based learning and journaling to encourage continuous reflection about the connections between theory and practice. The curriculum heavily emphasizes teaching and learning, school redesign and collaborative decision-making. Relevant field-based experiences (Leadership Growth Projects) are also integrated throughout the program of study, beginning with the very first course.

Planned Internship Experiences

This year-long aspect of the program emphasizes both the management and instructional facets of leadership for increased student performance. Coordinated by the program director at Rider and a school-based mentor, participants develop the skills needed to strategically transform public schools that prepare students for college and career success.

¹ This course should be taken in the fall semester.

² This course should be taken in the spring semester.

Notes:

1. Meet general master's degree requirements.
2. Candidates will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted curriculum content standards, professional development standards, and National/State school leadership standards.
3. Develop and refine the personal leadership platform statement throughout the program.
4. Complete a 9–12 hour standards and outcome-based growth project in each class and a 300 hour “capstone internship” in the Seminar/Practicum courses in Educational Leadership (EDAD 591/EDAD 592). Teacher Leadership candidates need only complete a 150 hour “capstone internship” in the Seminar/Practicum course EDAD 510.
5. Submit an electronic Leadership Growth Project Portfolio.
6. Complete a comprehensive standards-based self-assessment.
7. Complete a “Capstone School Improvement/Change Project.”

Courses and Descriptions

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, and national school leadership standards.

Prerequisite(s): CURR 531.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/ research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 505.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

EDUC 515 Issues in American Schools and Society 3 Credits

This course is designed to examine contemporary educational issues impacting on schools and to re-examine the purposes of schooling in a democratic society. Students will explore current and emerging policy issues and the demands for reform in schools and districts. Emphasis will be placed on identifying and developing politically feasible responses to policy issues and procedural problems facing educational leaders today. The role of the leader in promoting the development of a collaborative institutional culture and climate and the identification of best-practice strategies to involve community stakeholders in the development of policies and programs will be emphasized. Effective communication models for use within the school, district and greater community and the use of different media and technology formats will be examined and evaluated. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Elementary (K-6)

Program Overview

This Post-Baccalaureate Elementary Education Teacher Certification Program is designed for college graduates seeking initial teacher certification in Elementary (K-6), Kindergarten through Grade 6. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 1475)

Curriculum Overview

The Post-Baccalaureate Elementary K-6 Teacher Certification Program is a 21-graduate credit program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Certificate Offered

- Completion of all courses before final clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 702 Early Literacy Development for Diverse Learners 3 Credits

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

Prerequisite(s): CURR 700.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 715 Inclusive Elementary Science, Arts, & Social Studies Teaching 3 Credits

This course provides aspiring elementary school teachers with a variety of developmentally appropriate options for designing, implementing, and evaluating curriculum and instruction in science, social studies, and the arts. Using NJ Student Learning Standards, emphasis is placed on inclusive practices and differentiation of instruction (e.g., modifying curriculum planning, learning environments, and instructional materials, content, processes, and products), curriculum integration, thematic unit and lesson planning, various teaching strategies, hands-on learning experiences, inquiry learning, career readiness skills, higher-order thinking, reflective practice, and various assessment strategies. Other facets of teaching also are addressed or reviewed in the course. These include the characteristics and needs of students with disabilities motivation, classroom management, and becoming a team member of a school faculty. Candidates also refine their pedagogical knowledge and skills by participating in the modification of instruction to meet the needs of diverse learners in nearby school settings.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

English (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in English (K-12) is designed for college graduates seeking initial teacher certification in the subject area of English/Language Arts. The

streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 1475)

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

English as a Second Language/ESL (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in English as a Second Language/ESL (K-12) is designed for college graduates seeking initial teacher certification in the subject area of English as a Second Language. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical

experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

Rider's ESL Program trains future and current educators to develop students' level of English and to be sensitive to the complex backgrounds of culturally and linguistically diverse students. The mission of the ESL Program is to provide the skills, understandings and the development of attitudes necessary to teach culturally and linguistically diverse students for them to achieve their highest potential through education for life.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 1475)

Curriculum Overview

This Post-Baccalaureate Teacher Certification Program in English as a Second Language is a 24-credit graduate program requiring five teacher preparation courses to be taken in late afternoons/evenings followed by a semester of full-time student teaching.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

English as a Second Language/ESL Endorsement Certificate (K-12)

Program Overview

This English as a Second Language/ESL Endorsement (K-12) Certificate program is for those educators already certified in another specialization who want to add the endorsement as an ESL teacher to help English

Language Learners become fluent in the English language. This is a streamlined, rigorous, and sequential program of professional studies and teacher preparation that combines theory, research, fieldwork, and practice.

Curriculum Overview

This endorsement certificate provides ESL teaching credentials for those already certified in another specialization. It is a 15-credit program requiring five teacher preparation courses offered in the late afternoon/evening.

Certificate Offered

Courses and Descriptions

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

Higher Education Assessment, Analytics, and Change Management M.S.

Overview

The M.S. in Higher Education Assessment, Analytics, and Change Management is an applied interdisciplinary online degree program that fuses education and business practices to improve institutional function and influence. The 30-credit accelerated and fully online curriculum helps students use data, research, theory, and analytics to understand how higher education institutions identify and improve performance outcomes. Students will become change leaders as they develop expertise in higher education administration, organizational performance, data mining, analytics, and change leadership.

The program is intended to advance the careers of educational professionals interested in institutional research, outcomes assessment, enrollment management, data analytics, and organizational effectiveness. The primary target audience will be professionals working in institutions of higher education who have experience or responsibilities in the aforementioned areas. Secondary audiences may be those working in the aforementioned areas but at the K-12 level or in educational services organizations. Both rising education disruptors and seasoned professionals will find new tools, practices, and credentials to create stronger, more effective higher education organizations.

Curriculum Overview

The 30-credit program serves those who work in a range of higher education functions and provides coursework to promote and support strategic thinking and leadership of organizational change through data analytics and collaborative decision making. Courses are offered fully online over seven weeks in the fall, spring, and summer semesters providing students with flexibility in developing their own program plan.

For those professionals who are not seeking a degree, an opportunity for professional development is provided via a noncredit option, the Higher Education Assessment Certificate (<https://www.rider.edu/academics/colleges-schools/college-education-human-services/certificates-endorsements/higher-education-assessment/>).

Students in this program will:

- Comply with the general requirements concerning graduate study at the master's degree level.
- Enroll in graduate study at Rider for no fewer than two academic semesters or the equivalent thereof.
- Complete at least 30 credits of graduate study.
- Successfully pass a culminating experience and related written requirements.
- Maintain a GPA of "B" (3.0) or better for work submitted for the master's degree.
- Complete the program within six years of the date the student enrolled in his/her first course unless an extension is approved by the Department of Graduate Education, Leadership, and Counseling.

Courses and Descriptions

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. A focus on determining what should be assessed in academic and administrative units and strategies for initiating performance assessment programs is reviewed.

EDUC 542 Assessment of Student Learning in Higher Education 3 Credits

This course examines institutional effectiveness matters focusing on assessment processes in higher education. It explores topics such as the evaluation of academic programs, assessment of student learning outcomes, and involvement in accreditation and accountability demands in higher education. Here, the focus is on how colleges and universities are doing assessment, at the classroom, program, and institutional levels. The course covers the pragmatic planning skills and decision-support tools relevant to assessing student learning. Just as businesses are expected to adhere to compliance and ethics standards, this course provides an in-depth look at how universities' adherence to standards pertaining to academic success can and will lead to an assurance that accredited universities are achieving their institutional goals, meeting the public's expectations, and realizing their greater societal mission.

EDUC 543 Communicating Educational Data 3 Credits

Through this course, students will develop skills in statistical communication, incorporating data into delivery methods such as writing, public speaking, teaching, informal conversation and collaboration, programming, and graphic visualizations. Students will understand the importance of creating a data-informed culture and how it contributes to an organization's success. They will also learn methods and strategies of how to communicate to a non-technical audience.

EDUC 545 Capstone Seminar in Institutional Effectiveness 3 Credits

This course will offer students an opportunity to reflect on their own work, considering their development as scholars, practitioners, and leaders in the field of higher education. Students will demonstrate mastery of content through a significant project adapted to the professional requirements of a practicum site or their current employer, which will require students to access, analyze, manage, and present data to an organization's decision makers. The goal is to provide an opportunity to apply what students have learned about how to make data-driven decisions to a real business or operational challenge faced by a higher education organization.

Prerequisite(s): Requires approval from Program Director. Must have completed all other program requirements.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

Higher Education Assessment Certificate

Program Overview

This certificate program provides an opportunity for educational professionals to earn a credential in organizational and learning outcome assessment. The program is intended to advance the careers of educational professionals interested in institutional research, outcomes assessment, enrollment management, and organizational effectiveness. The primary target audience will be professionals working in institutions of higher education who have experience or responsibilities in the aforementioned areas. Secondary audiences may be those working in the aforementioned areas but at the K-12 level or in educational services organizations.

Curriculum Overview

Students must have completed an undergraduate degree with a minimum 2.7 GPA before applying to the program. This 15-credit program of study consists of five courses offered online in an accelerated, seven-week format.

Students will understand the importance of creating a data-informed culture and how it contributes to an organization's success. They will also learn methods and strategies of how to communicate to a non-technical audience.

Higher Education Leadership Certificate

Higher education is continually changing. The Higher Education Leadership Certificate will help professionals stay abreast of those changes. The coursework in this Graduate Certificate covers four critical areas that together describe how institutions of higher learning operate. Major content areas are: how colleges and universities organize themselves; how they affect students in terms of learning and development; how they are shaped by the larger environment and legal mandates; and how they change and adapt to the changing landscape of education.

The coursework is aimed at working professionals who want to deepen their knowledge of functions such as student affairs, to gain an understanding of how schools assess, plan and change, and also who want to develop insight into the complex and changing "big picture" of higher education.

Students will earn a Graduate Certificate upon completion of the four required courses. Students who wish to earn the MA in Organizational Leadership (p. 1438) or the MS in Higher Education Assessment, Analytics, and Change Management (p. 1419) programs may use the Higher Education Leadership Certificate course credits towards those programs.

EDUC 530	Student Affairs & Experiences in Higher Education	
EDUC 541	Assessing Organizational Performance in Higher Education	
EDUC 542	Assessment of Student Learning in Higher Education	

Total Credits **12**

Courses and Descriptions

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. A focus on determining what should be assessed in academic and administrative units and strategies for initiating performance assessment programs is reviewed.

EDUC 542 Assessment of Student Learning in Higher Education 3 Credits

This course examines institutional effectiveness matters focusing on assessment processes in higher education. It explores topics such as the evaluation of academic programs, assessment of student learning outcomes, and involvement in accreditation and accountability demands in higher education. Here, the focus is on how colleges and universities are doing assessment, at the classroom, program, and institutional levels. The course covers the pragmatic planning skills and decision-support tools relevant to assessing student learning. Just as businesses are expected to adhere to compliance and ethics standards, this course provides an in-depth look at how universities' adherence to standards pertaining to academic success can and will lead to an assurance that accredited universities are achieving their institutional goals, meeting the public's' expectations, and realizing their greater societal mission.

Life and Career Coaching Certificate

Program Overview

The Life and Career Coaching certificate program at Rider University is designed to meet the educational requirements for certification as a Board Certified Coach through the Center for Credentialing and Education, Inc. (<http://www.cce-global.org/bcc/>) Coaches are helping professionals who assist clients in achieving goals in areas such as life transitions, significant relationships, physical health, emotional well-being, career choices, and spirituality. Some coaches carve out a niche by working with business leaders as executive coaches. Coaches differ from other mental health professionals in that they do not work with clients with mental disorders.

Curriculum Overview

There are three pathways to completion of required coursework, depending on a student's educational and professional background. These pathways range from one to three courses.

Certificate Offered

- Board Certified Coach

Life and Career Coaching Certificate Requirements

There are three pathways to the Life and Career Coaching certificate in order to meet the educational requirements for certification, depending on a student's educational and professional background.

For students who hold a *bachelor's degree or a graduate degree in a field outside of social or behavioral science* (e.g. mathematics, biology), three courses are required.

(9 credits)

Code	Title	Credits
COUN 500	Introduction to Counseling and Helping Professions	3
CNPY 502	Theories of Counseling and Helping Professions	3
COUN 505 or COUN 504	Vocational/Career Development Vocational/Career Development in Educational Settings	3

For students who hold a *master's degree in counseling or a doctoral degree in a social or behavioral science* (e.g. social work, education, health, or business), one course is required.

(3 credits)

Code	Title	Credits
COUN 501	Coaching Principles and Practices	3

For students who hold a *master's degree in a social or behavioral science other than counseling* (e.g. social work, education, health, or business), two courses are required.

(6 credits)

Code	Title	Credits
COUN 501 or CURR 501	Coaching Principles and Practices	3
Choose one of the following electives:		3
COUN 504 or CURR 504	Vocational/Career Development in Educational Settings	
COUN 505	Vocational/Career Development	
COUN 550	Counseling and Helping Techniques Laboratory	

Courses and Descriptions

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 501 Coaching Principles and Practices 3 Credits

The course covers core coaching competencies, including coaching screening and orientation, fundamental skills, assessment, approaches for organizations, and coaching ethics. The course meets all 30-hour educational requirements for certification as a Board Certified Coach (BCC) through the Center for Credentialing and Education and is required course for the 60-hour BCC educational requirements.

COUN 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

CURR 501 Coaching Principles and Practices 3 Credits

This course is an introduction to the profession of coaching for educators. It is designed to fulfill the educational requirements for certification as a Board Certified Coach through the Center for Credentialing and Education (CCE). The CCE competencies for certification provide the basis for course material.

CURR 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design for educators who work in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

Master of Science in Nursing and Post-Master's Certificate

Program Overview

The Master of Science in Nursing (MSN) program prepares baccalaureate level, registered nurses seeking a graduate degree which provides eligibility for nurse practitioner (NP) certification. The MSN program offers three NP concentrations: Adult gerontology primary care, psychiatric-mental health, and family. Admission is on a rolling basis and enrollment is available for the fall, spring, and summer semesters. Academic plans vary depending on the student's semester of enrollment and progression in the courses. Please review the sample academic plans of study for the Family (p. 1427), Adult-Gerontology Primary Care (p. 1427), and Psychiatric-Mental Health (p. 1427) nurse practitioner concentrations.

The Post-Master's Certificate in Nursing (PMC) program provides registered nurses and advanced practice registered nurses (APRN) with a MSN degree, an alternate pathway to gain eligibility for NP certification.

For practicing NPs, the PMC gives students an opportunity to expand their scope of practice with the addition of a certification in a population focus or specialty. The PMC program offers three NP concentrations: Adult gerontology primary care, psychiatric-mental health, and family.

This program offers fall semester admission and enrollment will be determined using a gap analysis of previous graduate nursing courses, NP certification, and licensure.

This online, asynchronous program offers diverse approaches to teaching and engaged faculty that encourage self-directed learning and critical reasoning. Regular student participation is expected in all courses as the

graduate nursing program follows the university's academic calendar. Courses are offered in the fall, spring, and summer semesters. Advanced Pathophysiology and all concentration and clinical courses are taught over a full academic semester while the core courses are delivered as 7-week, intensive courses.

Upon completion of the program, graduates will be eligible to sit for the following certification examinations:

- The Rider University family nurse practitioner (FNP) and adult-gerontology primary care nurse practitioner (AGPCNP) concentrations prepare students to sit for the American Nurses Credentialing Center (ANCC) and American Academy of Nurse Practitioners Certification Board (AANPCB) exams.
- The Rider University psychiatric-mental health nurse practitioner (PMHNP) concentration prepares students to sit for the American Nurses Credentialing Center (ANCC) exam.

Nursing Program Mission Statement

The nursing faculty uphold Rider University's Mission and the Rider Promise to prepare graduates to thrive professionally and be lifelong independent learners and responsible citizens who embrace diversity, support the common good, and contribute meaningfully to the changing world they live and work in. The RN to BSN program adheres to the principles of adult learning, which acknowledges previous learning and experiences within courses and provides content relevant to the nursing profession. The MSN program provides knowledge and skills for nurses to excel as nurse practitioners in various health care environments. Principles of advanced practice registered nurse (APRN) clinical practice and nursing scholarship improve health outcomes for patients, families, and diverse communities.

Rider's Nursing Program adheres to the beliefs of the American Nurses Association Code of Ethics. It requires students to practice within the following tenets of respect for a patient's dignity, worth, autonomy, and advocacy for their rights, health, and safety. The mission of the Nursing Program aligns with that of Rider University to challenge nurses to grow and further develop skills needed to acquire, interpret, communicate, and become transformational leaders within nursing and across disciplines. The RN to BSN completion program allows the registered nurse to build upon the knowledge and skills learned in the pre-licensure undergraduate program. The MSN program builds on baccalaureate-level nursing education to expand the scope of practice of learners, from registered nurse to an APRN. Both programs allow for expanded opportunities for nurses to function as change agents and leaders within the nursing profession and across health disciplines.

Graduate Nursing Program Goals

1. Develop advanced practice registered nurses that demonstrate professional, ethical, skilled, and evidence-based practice competencies in their roles.
2. Develop graduates with a sustained commitment to lifelong learning, respect for individual differences, and the advancement of the nursing profession.
3. Prepare advanced practice registered nurses as leaders and role models that promote quality, equitable patient care and health promotion at the local, state, national, and global levels.
4. Prepare innovators to collaborate with health care teams and community stakeholders in order to improve health outcomes, eliminate health disparities, and advocate for patients.

Student Learning Outcomes

Students completing the Rider University's Graduate Nursing program will be able to:

1. Synthesize theoretical and empirical knowledge from the physical and behavioral sciences and humanities with nursing theory and advanced nursing practice.
2. Collaborate on the interdisciplinary health team to identify and effect needed change which will improve delivery within specific health care systems.
3. Utilize evidence-based practice recommendations, professional standards of care and research to promote health, prevent disease and improve the health status of individuals, families, groups, communities, and populations.
4. Demonstrate communication skills, including health information management to enhance the quality of care and improve patient outcomes provided at individual and aggregate levels.
5. Utilize leadership skills through interaction with consumers and providers in meeting health needs and advancing nursing goals.
6. Provide culturally competent care to improve health outcomes to all persons regardless of race, sex, sexual orientation, age, socioeconomic status, culture, health care beliefs, and religion.
7. Demonstrate individual responsibility and accountability in defining and advocating for quality care, patient safety and the nursing profession at the local, state, national and global level.
8. Practice in the APRN role independently and collaboratively with an interprofessional team while delivering direct and indirect care services to patients, families, and communities.

Admission Requirements

Admission to the MSN program is open to registered nurses with a baccalaureate degree in nursing. Admission to the PMC program is open to registered nurses or advanced practice registered nurses with a master's degree in nursing. Prospective applicants must meet the following criteria, though meeting the minimum criteria does not guarantee admission:

1. Provide official transcripts. Nursing degrees must be from NLN-CCNE-accredited schools.
 - a. MSN - Minimum nursing degree must be a BSN.
 - b. PMC - Minimum nursing degree must be an MSN.
2. Meet *one of the two* requirements for MSN. admission only.
 - a. Cumulative GPA of 3.0 or higher in the BSN degree program (on a scale of 4.0) with a minimum, cumulative GPA in all nursing courses of a 3.0
 - b. Cumulative GPA of 3.0 in at least two graduate nursing courses when the BSN. cumulative GPA is less than or equal to 2.99
3. Completion of undergraduate level, prerequisite courses: Health assessment, nursing or health-discipline research, statistics.
4. All current nursing and APRN licenses in good standing and unencumbered.
5. Students must meet the "Technical Standards" that are defined in the application for admission.

Applicants to the PMC program from NP programs must present a valid certification and NP licensure in their practice specialty. A gap analysis of previous clinical courses including syllabi and confirmation of clinical hours will be completed to ensure all graduates complete the required number of clinical hours in the population foci at the time the degree

is awarded. All documents will be considered upon admission for academic planning.

Applicants to the PMC program from a non-NP MSN will submit syllabi from previous courses. A gap analysis of previous coursework will be completed to ensure all graduates fulfilled the appropriate APRN coursework in advanced pathophysiology, advanced physical assessment, and advanced pharmacology. All documents will be considered upon admission for academic planning.

Degree Offered

- Master of Science in Nursing (MSN)
- Post-master's Certificate in Nursing (PMC)

Accreditation Statement

The baccalaureate degree program in nursing, master's degree program in nursing, and the post-graduate APRN certificate program at Rider University are accredited by the Commission on Collegiate Nursing Education, 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791.

Master of Science in Nursing Academic Plan of Study

The following educational plan is provided as a sample only. Students may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Adult-Gerontology Primary Care Nurse Practitioner (p. 1427)

Family Nurse Practitioner (p. 1427)

Psychiatric-Mental Health Nurse Practitioner (p. 1427)

Adult-Gerontology Primary Care Nurse Practitioner

(42 credits)

Due to prerequisites and corequisites required for some courses, it is highly recommended that the following sequence be followed. Courses will be offered in the semesters as shown below.

Course	Title	Credits
Year 1		
Fall Semester		
APRN 5002	Applied Theory for the APRN Role	3

Post-Master's Certificate Requirements

Individual plans of study are finalized upon admission after a gap analysis of prior graduate course work, clinical hours, licensure with prescriptive authority, and NP certification. The Post-master's certificate minimum requirements below are based on the eligibility requirements for the nurse practitioner certification exams in the adult-gerontology primary care, psychiatric-mental health, and family population foci.

Post-Master's Certificate - Adult Gerontology Primary Care Nurse Practitioner (p. 1428)
 Post-Master's Certificate - Family Nurse Practitioner (p. 1428)
 Post-Master's Certificate - Psychiatric Mental Health Nurse Practitioner (p. 1428)

Post-Master's Certificate - Adult Gerontology Primary Care Nurse Practitioner

(24 credits)

Code	Title	Credits
The following courses are required for the certification:		
APRN 5007	Advanced Physical Assessment ¹	3
APRN 5008	Advanced Pharmacology ²	3
APRN 5009	Primary Care of Young Adult	3
APRN 5010	Young Adult Practicum	3
APRN 5011	Primary Care of the Middle-Aged Adult	3
APRN 5012	Middle-Aged Adult Practicum	3
APRN 5013	Primary Care of the Older Adult	3
APRN 5014	Older Adult Practicum	3
Total Credits		24

¹ APRN 5003 is a prerequisite and should be completed in advance of APRN 5007.

² Students may need to complete APRN 5008 if they do not currently hold prescriptive authority in their nursing practice.

Post-Master's Certificate - Family Nurse Practitioner

(30 credits)

Code	Title	Credits
The following courses are required for the certificate:		
APRN 5007	Advanced Physical Assessment ¹	3
APRN 5008	Advanced Pharmacology ²	3

² APRN 5007 is a prerequisite and should be completed in advance of APRN 5024.

Courses and Descriptions

APRN 5001 Socialization to the APRN Role 3 Credits

The course will examine the critical issues that define the APRN's scope of practice and nurse practitioner competencies. Issues related to health policy, interprofessional collaborative practice, team building, conflict resolution, and leadership will be discussed. Guidelines for resolving professional legal and ethical issues that are often confronted in APRN practice will be analyzed.

APRN 5002 Applied Theory for the APRN Role 3 Credits

This course will demonstrate the use of science-based theories to analyze healthcare delivery at the patient, family, community and organizational levels in order to improve health outcomes. Theories addressing nursing practice, teaching and learning, health behaviors, and families within the context of cultural influences will be explored. Issues related to ethical decision making and advocacy in APRN practice will be analyzed.

APRN 5003 Advanced Pathophysiology 3 Credits

This course analyzes alterations in various physiological systems. General physiological and pathophysiological principles that regulate inflammation, cellular/tissue repair, genetics, immunity, and cancer will be discussed. Pathophysiology of disease processes in primary care conditions across the lifespan will be examined.

APRN 5004 Clinical Prevention and Population Health 3 Credits

This course will enable students to analyze epidemiological and biostatistical data in the development, implementation, and evaluation of clinical prevention and population health initiatives. Concepts of public health, health promotion, morbidity and mortality, determinants of health, and cultural diversity and sensitivity will be incorporated into the advanced practice nursing role.

APRN 5005 Research and Quality Improvement 3 Credits

This course builds a foundation for advanced clinical scholarship and healthcare improvement while developing skills in analytical methods for evidence-based practice. Concepts of quality process, regulatory practices, root cause analysis, and problem identification will be explored.

APRN 5006 Health Delivery and Information Systems 3 Credits

This course focuses on trends, issues, and policies related to the transformation of the U.S. health care system. Emphasis will be placed on the economics of care and equity, access, and quality of the health care system. The role of the APRN in the utilization of information systems to reduce health disparities and promote quality initiatives will be presented.

APRN 5007 Advanced Physical Assessment 3 Credits

This course builds upon scientific underpinnings to enable the learner to develop a holistic approach to culturally sensitive health assessment including health related behaviors across the life span. The student begins to synthesize data in diagnostic reasoning to determine appropriate and effective healthcare strategies, including disease prevention, health promotion and health restoration. Prerequisite(s): APRN 5003.

Corequisite(s): APRN 5008.

APRN 5008 Advanced Pharmacology 3 Credits

This course is designed to meet the needs of APRNs that are eligible for prescriptive privileges. Content will focus on the pharmacological management of self-limited, episodic complaints and stable chronic disease states across the life span. Emphasis is placed on the decision-making process utilized to safely and effectively prescribe and monitor pharmacotherapeutics appropriate to the client situation. Prerequisite(s): APRN 5003.

Corequisite(s): APRN 5007.

APRN 5009 Primary Care of Young Adult 3 Credits

This course focuses on the care of young adults and women. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions as well as application of U.S. health promotion guidelines and screening for young adults and women. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for young adults and women. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5010.

APRN 5010 Young Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5009 - Primary Care of the Young Adult. The focus is on primary care of the young adult client and women. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5009.

APRN 5011 Primary Care of the Middle-Aged Adult 3 Credits

This course focuses on the health state of middle-aged adults. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions, as well as application of U.S. health promotion guidelines and screening for middle-aged adults. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of adults. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5012.

APRN 5012 Middle-Aged Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5011 - Primary Care of the Middle-Aged Adult. The focus is on primary care of common acute and chronic disease processes of the middle-aged population. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5011.

APRN 5013 Primary Care of the Older Adult 3 Credits

This course focuses on the health state of older adults. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions, as well as application of U.S. health promotion guidelines and screening for older adults. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of older adults. Prerequisite(s): APRN 5011, APRN 5012.

Corequisite(s): APRN 5014.

APRN 5014 Older Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5013 - Primary Care of the Older Adult. The focus is on primary care of common acute and chronic disease processes of the older adult population. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5011, APRN 5012.

Corequisite (s): APRN 5013.

APRN 5015 Primary Care of the Pediatric and Perinatal Patient 3 Credits

This course focuses on the health state of pediatric and perinatal patient populations. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions as well as application of U.S. health promotion guidelines and screening for pediatric and perinatal patients. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of adults. Prerequisite(s): APRN 5013, APRN 5014.

Corequisite(s): APRN 5016.

APRN 5016 Pediatric Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in Primary Care of the Pediatric and Perinatal Patient. The focus is on primary care of common acute and chronic disease process of the pediatric and perinatal populations. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 120 clinical hours. Prerequisite(s): APRN 5013, APRN 5014.

Corequisite(s): APRN 5015.

APRN 5023 Advanced Psychopharmacology 2 Credits

The course builds on the knowledge from advanced pharmacology and provides an in-depth examination of drug classifications related to the treatment of psychiatric disorders across the lifespan. The pharmacokinetics and pharmacodynamics of psychopharmacologic agents and therapeutic treatment plans will be emphasized. Special topics on issues related to polypharmacology, drug abuse, and psychiatric-mental health nurse practitioner prescribing issues are discussed. Prerequisite(s): APRN 5008

Corequisite(s): APRN 5024, APRN 5025.

APRN 5024 Psychiatric Assessment and Diagnosis 3 Credits

This course will examine the advanced concepts of assessment and differential diagnosis in advanced practice, psychiatric-mental health nursing. The Diagnostic and Statistical Manual of Mental Disorders (DSM-5) will be used in clinical decision making to determine screening, assessment, diagnostic studies, and differential diagnoses for psychiatric disorders across the lifespan. A holistic approach to assessment will be incorporated by examining social, genetic, cultural, ethnic, and gender elements in psychiatric illnesses. Prerequisite(s): APRN 5007

Corequisite(s): APRN 5023, APRN 5025.

APRN 5025 Foundations in Therapy 2 Credits

This course provides a foundation in the application of psychotherapeutic interventions to the management of psychiatric disorders for individuals, families, and groups across the lifespan. The practice of psychotherapy and crisis intervention in the psychiatric-mental health nurse practitioner role will be examined in relation to cultural, ethical, moral, and legal issues.

Corequisite(s): APRN 5023, 5024.

APRN 5026 Psychiatric-Mental Health I 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse adult populations. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for adults with psychiatric disorders. Prerequisite(s): APRN 5023, APRN 5024, APRN 5025

Corequisite(s): APRN 5027.

APRN 5027 Psychiatric-Mental Health Practicum I 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health I. The focus is on psychiatric health care of adults. Students will utilize the necessary resources in health care to optimize health in this population. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5026.

APRN 5028 Psychiatric-Mental Health II 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse older adult populations. Complex disorders will be examined. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for older adults with psychiatric disorders. Prerequisite(s): APRN 5026, APRN 5027

Corequisite(s): APRN 5029.

APRN 5029 Psychiatric-Mental Health Practicum II 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health II. The focus is on psychiatric health care of older adults. Students will utilize the necessary resources in health care to optimize health in this population. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5028.

APRN 5030 Psychiatric-Mental Health III 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse pediatric populations and families. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for children with psychiatric disorders. Prerequisite(s): APRN 5028, APRN 5029

Corequisite(s): APRN 5031.

APRN 5031 Psychiatric-Mental Health Practicum III 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health III. The focus is on psychiatric health care of pediatric patients and families. Students will utilize the necessary resources in health care to optimize health in these populations. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5030.

Mathematics (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in Mathematics (K-12) is designed for college graduates seeking initial teacher certification in the subject area of Mathematics. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 1475)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Mathematics is a 21-credit graduate program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Certificate Offered

- Mathematics (K-12)

- Completion of all courses before the clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 707 Inclusive Methods for Teaching Mathematics 3 Credits

This course critically analyzes the aims of teaching mathematics in secondary schools. Research pertaining to mathematics teaching and learning is analyzed. Demonstration lessons including reflective teaching and individual and group processing are created and carried out to clarify teaching, mathematics curriculum planning using NJ Student Learning Standards in Mathematics, the organization of materials and subject matter, assessment processes classroom management strategies, and awareness of career requirements in STEM fields. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying mathematics curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

Music (K-12)

Additional requirements:

- Completion of all courses before the clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 712 Inclusive Methods for Teaching Music 3 Credits

This course provides experience with various methods of teaching and learning music K-12. Course readings and field observations focus on inclusive teaching practices in music and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Music/Visual and Performing Arts.

Prerequisite(s): CURR 700, CURR 703, CURR 720.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

NJ Alternate Route Teacher Certification

Overview

The NJ Alternate Route Teaching Certificate Program (also known as Provisional Teacher Process or PTP) provides rigorous teacher preparation and individualized guidance to help candidates develop knowledge, skills, and confidence as a teacher while teaching with a Certificate of Eligibility (CE) under provisional agreement with a school district. This 2-year program comprises 27 graduate-level credit hours to meet certification requirements. With the addition of just one 3-credit graduate course, candidates in the program can earn their 30-credit Master of Arts in Teaching (MAT) degree.

Certificates Offered

- Art
- Business Education
- Dance
- ESL
- Health and Physical Education
- Science
- Elementary K-6
- English Language Arts
- Mathematics
- Early Childhood P-3
- Social Studies
- Theater
- Music
- World Languages

Courses and Descriptions

CURR 510 Reflection and Mentoring in Professional Teaching Practice 3 Credits

This course serves as an introduction to professional teaching work in classrooms. The hands-on work in the course complements required classroom observations and reflections. The course uses participants' classroom observations and reflections as the bases for targeted, practical discussions and study on topics such as classroom management, teacher identity and diversity, teaching and content, asking for feedback, and working with mentors.

Prerequisite(s): Permission of Program Director.

CURR 708 Inclusive Methods for Teaching Business 3 Credits

Emphasis is placed on the enhancement of teaching inclusive business education. Special attention is devoted to the new technology and its use in business education. Current instructional materials are presented and utilized. Master practicing business education teachers will augment the instructor's presentations.

CURR 532 Strategies for Curriculum Change 3 Credits

This course will examine organizational skills and knowledge necessary to effect curriculum development and change, K-12. The course will address the socio-political context of curriculum change along with alternative strategies for initiating, implementing and sustaining standards-based curriculum improvements. Topics of study include strategic planning, problem-solving strategies, needs assessments, curriculum alignment, program evaluation, staff development and the organization of staff members for collaborative deliberation and decision making as essential means for promoting successful curriculum change at all levels of schooling. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531.

CURR 541 Assessment and Student Learning 3 Credits

This course provides hands-on opportunities to create and design varied classroom assessments that help teachers align their teaching goals with student learning goals. With a focus on NJ Student Learning Standards across the curriculum content areas and grade levels, assessments will be designed for use in individual teaching practice and with a variety of diverse learners. Topics include designing assignment rubrics and effective essay prompts as well as developing evaluation criteria.

Prerequisite(s): CURR 510, CURR 700.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

CURR 652 Differentiating Instruction for the Gifted and Talented 3 Credits

This course provides the rationale and practical strategies for effective instructional differentiation for the gifted and talented within and beyond the regular classroom. Participants will learn how to differentiate within subject areas by adjusting content, process, product, and learning environment to meet the needs of learners. They also will explore the nature and nuances of differentiation by ability, readiness, and interest, as well as the implications of instructional differentiation for formative and summative assessment. Throughout the course they will design and share examples of differentiation including tiered assignments, complex instruction, independent studies, graphic organizers, and learning contracts.

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 702 Early Literacy Development for Diverse Learners 3 Credits

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

Prerequisite(s): CURR 700.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

CURR 705 Inclusive Methods for Teaching Social Studies 3 Credits

This course addresses the practical and theoretical aspects of teaching social studies to diverse adolescents in secondary schools. Using the NJ Student Learning Standards in Social Studies, candidates will prepare and design curriculum and assessment for students in various learning environments and with diverse learning needs. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying social studies curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 706 Inclusive Methods for Teaching Science 3 Credits

Classroom interaction analysis systems are used in the study of the instructional processes that support inquiry-based science learning. Candidates develop their own repertoires of teaching strategies, classroom management strategies, and awareness of career requirements in STEM fields. Emphases are on the investigation and interpretation of recent curriculum developments in NGSS and NJ Student Learning Standards in Science as well as the use of lab-based processes in science learning. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying science curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 707 Inclusive Methods for Teaching Mathematics 3 Credits

This course critically analyzes the aims of teaching mathematics in secondary schools. Research pertaining to mathematics teaching and learning is analyzed. Demonstration lessons including reflective teaching and individual and group processing are created and carried out to clarify teaching, mathematics curriculum planning using NJ Student Learning Standards in Mathematics, the organization of materials and subject matter, assessment processes classroom management strategies, and awareness of career requirements in STEM fields. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying mathematics curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 711 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. The existing methods course in Dance for beginning teachers is cross-listed with DAN 450.

CURR 712 Inclusive Methods for Teaching Music 3 Credits

This course provides experience with various methods of teaching and learning music K-12. Course readings and field observations focus on inclusive teaching practices in music and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Music/Visual and Performing Arts.

Prerequisite(s): CURR 700, CURR 703, CURR 720.

CURR 713 Inclusive Methods for Teaching Art 3 Credits

This course provides experience with various methods of teaching and learning Art K-12. Course work and fieldwork focus on inclusive teaching practices in art and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Visual and Performing Arts.

Prerequisite(s): CURR 510, CURR 700, CURR 703.

CURR 714 Inclusive Methods for Teaching Health and Physical Education 3 Credits

This course provides experience with various methods of teaching and learning Health and Physical Education K-12. Course work and fieldwork focus on inclusive teaching practices in health and physical education and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Comprehensive Health and Physical Education.

Prerequisite(s): CURR 510, CURR 700, CURR 703.

CURR 715 Inclusive Elementary Science, Arts, & Social Studies Teaching 3 Credits

This course provides aspiring elementary school teachers with a variety of developmentally appropriate options for designing, implementing, and evaluating curriculum and instruction in science, social studies, and the arts. Using NJ Student Learning Standards, emphasis is placed on inclusive practices and differentiation of instruction (e.g., modifying curriculum planning, learning environments, and instructional materials, content, processes, and products), curriculum integration, thematic unit and lesson planning, various teaching strategies, hands-on learning experiences, inquiry learning, career readiness skills, higher-order thinking, reflective practice, and various assessment strategies. Other facets of teaching also are addressed or reviewed in the course. These include the characteristics and needs of students with disabilities motivation, classroom management, and becoming a team member of a school faculty. Candidates also refine their pedagogical knowledge and skills by participating in the modification of instruction to meet the needs of diverse learners in nearby school settings.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 772 Clinical Experience in Teaching Seminar 3 Credits

The Clinical Experience in Teaching Seminar is available only to candidates completing teacher certification through the Alternate Route program and who currently work full-time teaching. Candidates may apply to the program for the Clinical Experience in Teaching Seminar by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area, attend and participate in on-campus seminar, and complete and submit the edTPA required for NJ certification.

Prerequisite(s): CURR 510, CURR 700, CURR 541 and Permission of Program Director.

ECED 550 Development Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

Organizational Leadership M.A.

Program Overview

The Master of Arts (M.A.) in Organizational Leadership

program is an applied program that will enhance your leadership, supervisory and administrative skills. You will learn how to be more effective, strategic and creative in complex organizational settings — and graduate with a vision of leadership, values to guide your decisions, and the knowledge to transform vision into a reality. The program recognizes the value of people-oriented leaders who understand individual strengths and leadership styles, group behaviors and motivation. We offer a relevant, real-world education you can apply immediately to your life's work.

While cultivating the ability to ethically lead organizations is the focus of the program, students will also develop and refine their critical thinking and problem-solving skills, approaches to change management, ability to motivate and empower others, and aptitude to communicate effectively and persuasively. Through a concentration of courses, students will apply the concepts of leadership as they pertain to the advanced study of another academic discipline.

By successfully completing the program, students will develop a core set of leadership competencies that will enable them to:

- develop a personal leadership philosophy and approach to ethical leadership practice;
- understand approaches to leadership practice;
- communicate, interact, and engage effectively with a diverse workforce;
- facilitate major leadership processes;
- lead organizations in a changing landscape; and
- be proficient in enhancing human and organizational performance.

In addition to developing a core set of leadership skills and knowledge, the program (depending on the selected area of concentration) will provide students with skills and knowledge requisite to:

- Higher Education Leadership
- Talent and Organizational Development
- Leadership in Counseling-Related Services
- Life and Career Coaching

Curriculum Overview

The 30-credit M.A. in Organizational Leadership can be earned in just two years of study, although most students complete the program in 30 months or longer. Each student completes a capstone course (LEAD 598: Capstone in Organizational Leadership), featuring an action research experience in an organization or an independent research project. Students' broad understanding of leadership and organizations is accomplished through the program's core courses. Developing an effective leadership practice takes self-knowledge, knowledge of others, financial and strategic acumen, a grasp of contextual forces and organizational dynamics, and a rigorous approach to making decisions and solving problems creatively.

Students may pursue a concentration in the following areas:

- The **Counseling-Related Services concentration** prepares graduates with knowledge of mental health and related issues in order to increase their effectiveness as leaders and change agents in organizations that serve individuals with mental health or wellness needs. Coursework studies include focuses on foundations of counseling, legal and ethical issues of concern to those in the counseling arena, and psychopathology. Students also learn from among courses in vocational and career development, multicultural counseling, or substance abuse counseling.
- The Organizational Leadership Program concentration in **Talent and Organizational Development** prepares students to be successful, strategic and impactful professionals who are able to work effectively through others. This program concentration offers insight into human and organizational relationships; creates the capacity for sound analytical judgment; and the ability to see the "big picture" as it relates to an organization and its environment.
- The program concentration in **Higher Education Leadership** prepares graduates for a variety of institutional roles in higher education, with an emphasis on developing leadership skills for organizational change. A unique graduate program for emerging higher education professionals, our program provides you with the leadership capacity to face organizational challenges in today's colleges and universities.
- The **Life and Career Coaching** concentration prepares graduates to form mentoring and coaching relationships to aid others in achieving goals in areas such as life transitions, career choices and work/life balance

Forms of Study

Students take their core courses in an online or hybrid format. Depending on their chosen concentration, they will complete their 30 credit degree in one of two ways. They will complete their studies entirely online, or with a set of classroom, online or hybrid courses. The fully online MA in Organizational Leadership is offered for the Talent and Organizational Development and Higher Education Leadership concentration in a traditional or accelerated (7-week) course format and the Life and Career Coaching concentration is offered online with a combination of 7- and 14-week courses.

Organizational Leadership Program Requirements

(30 credits)

Group I - Core Courses (p.) (15-18 credits)

Group II - Concentration Courses (p. 1440) (12 credits)

Organizational Leadership (M.A.)

- Comply with the general requirements concerning graduate study at the master's degree level.
- Enroll in graduate study at Rider for no fewer than two academic semesters or the equivalent thereof.
- Complete at least 30 credits of graduate study.
- Successfully pass a culminating research experience and related written requirements.
- Maintain a GPA of "B" (3.0) or better for work submitted for the master's degree.
- Complete the program within six years of the date the student enrolled in his/her first course unless an extension is approved by the Department of Graduate Education, Leadership, and Counseling.

Group I - Core Courses - Required

Code	Title	Credits
LEAD 500	The Practice of Leadership	3
LEAD 510	Organizations: Design and Dynamics	3
LEAD 531	Developing The Human Side of Organizations	3
LEAD 540	Strategic and Financial Decision-Making in Organizations ¹	0-3
LEAD 550	Organizational Research	3
LEAD 598	Capstone in Organizational Leadership	3

Total Credits

15-18

¹ LEAD 540 is not a requirement for the concentration in Higher Education Leadership.

Group II - Concentration Courses

Students will be expected to meet the requirements for any one of the four concentrations outlined below.

Talent and Organizational Development

Program Goal: Prepare graduates to be strategic professionals who work effectively through others, particularly in the area of organization and human development. This concentration helps students to understand broad organizational concepts that apply to private and non-profit sectors. Students build conceptual understanding and explore connections to applied settings.

Courses and Descriptions

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 515 Substance Abuse Counseling 3 Credits

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. A focus on determining what should be assessed in academic and administrative units and strategies for initiating performance assessment programs is reviewed.

EDUC 542 Assessment of Student Learning in Higher Education 3 Credits

This course examines institutional effectiveness matters focusing on assessment processes in higher education. It explores topics such as the evaluation of academic programs, assessment of student learning outcomes, and involvement in accreditation and accountability demands in higher education. Here, the focus is on how colleges and universities are doing assessment, at the classroom, program, and institutional levels. The course covers the pragmatic planning skills and decision-support tools relevant to assessing student learning. Just as businesses are expected to adhere to compliance and ethics standards, this course provides an in-depth look at how universities' adherence to standards pertaining to academic success can and will lead to an assurance that accredited universities are achieving their institutional goals, meeting the public's expectations, and realizing their greater societal mission.

EDUC 543 Communicating Educational Data 3 Credits

Through this course, students will develop skills in statistical communication, incorporating data into delivery methods such as writing, public speaking, teaching, informal conversation and collaboration, programming, and graphic visualizations. Students will understand the importance of creating a data-informed culture and how it contributes to an organization's success. They will also learn methods and strategies of how to communicate to a non-technical audience.

LEAD 500 The Practice of Leadership 3 Credits

This course allows students to gain an understanding of the practice of leadership and how they can develop as leaders. Students will explore leadership models, creativity in organizations, and approaches to decision making as they begin to form their own leadership philosophy.

LEAD 510 Organizations: Design and Dynamics 3 Credits

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 512 Forms of Diversity in Organizations 3 Credits

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different "worldviews" which organizational members bring into the organization, and how that affects their ability to work together. The course develops students' knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 531 Developing The Human Side of Organizations 3 Credits

This course examines Strategic Human Resources Management (SHRM) within today's organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 532 Program Design for Training and Development in Organizations 3 Credits

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore "real world" applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 533 Conflict and Crisis Resolution in Organizations 3 Credits

Leaders face conflict and crisis in their organizations. Being effective in their resolution is an important leadership attribute. Skills that support positive and integrative outcomes include mediation, negotiation and crisis resolution skills. This course will use multiple case studies and role-playing assignments to engage students in understanding how individuals and teams handle mediation and negotiation scenarios. The course will also use multiple case studies to enhance students' understanding of the components of effective and ineffective leadership for crisis.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 534 Facilitation and Team Leadership 3 Credits

This course examines the characteristics and behaviors of teams that produce good results and/or generate new ideas. The focus of the course is on how to lead high functioning teams and the development of facilitation capabilities, so that students can effectively lead teams and organizations.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 540 Strategic and Financial Decision-Making in Organizations 3 Credits

This course explores the importance of information and financial resources within the culture of organizations, and the necessary relationship that exists between the two. The course draws on current literature and student experience to explore resource management and focuses on the effective use of information resources within the boundaries defined by financial realities. The relationship between data analyses and effective decision-making will be explored.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

LEAD 550 Organizational Research 3 Credits

The purpose of this course is to prepare future organizational leaders to read professional journal articles, plan research, and critique research.

The course covers basic research methods, such as experimental, ex post facto, correlational, case study, time series, interviews, surveys, and basic statistics in terms of understanding and selecting statistics. These concepts are taught within the framework of organizational leadership. This course should be taken at the end of your program.

Prerequisite(s): LEAD 500, LEAD 51. Permission of Program Director required.

LEAD 598 Capstone in Organizational Leadership 3 Credits

All MA candidates complete a capstone research project to demonstrate the application of core program competencies to a specific organizational or leadership problem. Reflecting upon their own leadership philosophy developed throughout the program, students will formulate, research, and write a leadership capstone paper that integrates the skills and concepts from the core courses as students use quantitative and qualitative methods to analyze a problem. Core and concentration courses should be completed before taking this course.

Prerequisite(s): Must be taken in last semester of study. Permission of Instructor required.

Post-Baccalaureate Teacher Certification**Program Overview**

The Post-Baccalaureate Teacher Certification Program (PBTC) is designed for college graduates seeking initial teacher certification. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

Depending on the initial certificate pursued, the program consists of 21 or 24 graduate credits and is designed as a part-time program that may be completed over three semesters. The program is also available in a full-time accelerated format that may be completed within nine months.

Graduate credits earned in the initial teacher certificate program may be combined with courses offered through the Master of Arts in Teaching (MAT) Program to earn a 30-credit MAT degree. In addition to earning the MAT degree, candidates may apply coursework and credits to other Master's programs, endorsements, and/or professional development certificates offered through the Department of Graduate Education, Leadership, and Counseling.

Program Information for Certificates Offered:

Comprehensive Business (K-12) (p. 1396)
 Dance Certificate (K-12) (p. 1402)
 Elementary Certificate (K-6) (p. 1414)
 English as a Second Language/ESL Certificate (P-12) (p. 1418)
 English Certificate (K-12) (p. 1415)
 Mathematics Certificate (K-12) (p. 1431)
 Music Certificate (K-12) (p. 1432)
 Science Certificate in Biological Science, Chemistry, Earth Sciences, Physical Science, and/or Physics (K-12) (p. 1450)
 Social Studies Certificate (K-12) (p. 1452)
 Theater Certificate (K-12) (p. 1476)
 World Languages Certificate in French or Spanish (K-12) (p. 1477)

Principal Certificate**Program Overview**

The Principal certificate in Educational Leadership is a sequence option designed for candidates who aspire to obtain school leadership positions as a director, assistant principal or principal.

Curriculum Overview

Candidates have completed a master's degree and hold New Jersey certification as a supervisor. A second course in leadership (EDAD 592) is required of candidates who have previously taken only one course in a state-approved supervisory certification sequence. Candidates will complete a year-long (300 hours) internship EDAD 591 and EDAD 592 along with a "Capstone School Improvement/Change Project."

The frameworks for the program have been established to meet preparatory requirements as established in the New Jersey Administrative Code (6A:9-12.5) as well as the challenges, responsibilities, and opportunities inherent in educational leadership.

Courses and Descriptions

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 505.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

Reading Specialist Endorsement

Program Overview

The New Jersey Reading Specialist endorsement is designed for educators who have an earned master's degree in education or a related field and are interested in becoming a reading or literacy specialist in a pre-K-12 school.

Curriculum Overview

In order for candidates to be eligible for the New Jersey Reading Specialist endorsement they must complete four graduate level literacy courses at Rider University. These include:

LITR 501 Psychology and Pedagogy of Literacy Processes

LITR 502 Curriculum, Instruction and Supervision in Literacy

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum

One Graduate Level Literacy Elective

Candidates must also show evidence of at least 18 credits of graduate study across three areas selected from the list below. These areas of study will come from the state approved graduate courses offered in the College of Education and Human Services at Rider University or a candidate's master's degree program at other institutions. These include:

- Children's or Adolescent Literature
- Measurement
- Organization of Reading Programs
- Psychology
- Staff Supervision
- Linguistics
- Special Education
- Research
- Foundations of Education

Certificate Offered

- Reading Specialist

LITR 600	Independent Research and Study in Literacy Education

Total Credits **12**

Note:

- Candidates must have completed at least two years of teaching by program completion.

¹ Additional graduate courses with a literacy focus may be counted towards the elective requirement for the endorsement with prior approval from the coordinator.

Courses and Descriptions

Note: Additional graduate courses with a literacy focus may be counted towards the elective requirement for the endorsement with prior approval from the coordinator.

LITR 500 Multimodal Teaching and Learning 3 Credits

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and challenges and assessment measures. Observational techniques and diagnostic teaching for assessment are stressed. Students will apply concepts learned in seminar to their associated practicum/field experience.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

LITR 510 Research and Survey of Texts for Children and Adolescents 3 Credits

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-print texts into the school curricula in ways that support youth and adolescent literacy development.

LITR 560 Writing Project at Rider 3 Credits

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas.

LITR 600 Independent Research and Study in Literacy Education 1-3 Credits

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education.

School Psychology (Ed.S.)

Program Overview

Rider University offers one of the country's finest school psychology programs. It is one of only seven specialist-level programs in New Jersey to hold full accreditation from the National Association of School Psychologists (NASP) (<http://www.nasponline.org/>). This program is designed for students seeking national certification as a school psychologist.

Making a Difference in the Lives of Children

Across the country, there is a growing need for specially trained school psychologists who can work with students, teachers, families and other professionals to promote safe and supportive learning environments. They play an increasingly important role in helping children succeed — and thrive — academically, socially and behaviorally.

Highlights

- Rider's 64-credit Educational Specialist degree is a graduate-level program that typically takes three years of full-time study to complete.
- This program follows a cohort model in which students take classes together in a group, or team. Each cohort begins in the fall.
- Students develop and apply skills through fieldwork that complements coursework, starting with their first semester. Each student is expected to complete a 100-hour practicum each semester during the first two years.
- During the third year, students complete a one-year professional internship (1,200 hours) in a school setting where they perform the role and function of a professional school psychologist. Students

have the option of completing this internship at an approved site setting anywhere in the country.

- In addition to New Jersey, the program meets requirements for certification in most U.S. states, including Pennsylvania and New York.
- Graduates of the program are eligible for national certification as a school psychologist after earning a passing score on the School Psychology Praxis.

Curriculum Overview

Rider University's School Psychology program will prepare students to become a productive and vital member of the school team through a highly-structured, developmental curriculum that builds on coursework and hands-on experience.

Students will learn to:

- effectively assess children's skills and abilities, including diverse learning needs;
- assess emotional and behavioral needs;
- apply effective social-emotional and academic interventions;
- plan appropriate Individualized Education Programs for students with disabilities;
- evaluate the effectiveness of prevention and intervention programs;
- consult with parents, administrators and teachers.

The program emphasizes problem solving and data-based decision making aimed at improving the educational and mental health of children and adolescents. Rider's innovative program provides a blend of traditional and contemporary school psychology training, including psychological assessment, cognitive assessment, response to intervention, consultation, positive behavior support, counseling and curriculum-based measurement. And, students learn to work sensitively with people from diverse cultural and individual backgrounds.

School Psychology Educational Specialist Program Requirements

- Satisfactory annual ratings for retention and progression in the School Psychology program. Program faculty will evaluate the academic, professional competencies, and professional work characteristics of each student based upon their portfolio and personal statement. A recommendation for continuation, continuation with remediation, or dismissal will be made by August 31st of each year.
- Based upon the National Association of School Psychologists (<https://www.nasponline.org/>) (NASP) standards, all students must fulfill a residency requirement by enrolling as a full-time student (minimum of nine graduate credits for one semester) so as to develop an affiliation with colleagues, faculty, and the profession.
- Completion of 64 graduate credits with a minimum GPA of 3.3.
- Take and attain a passing score established by NASP on the Praxis Submitted Assessment test in school psychology during the first semester of internship, EDPS 590. Furnish a copy of the score to the Director of the School Psychology program.

Total Credits		43

Internship serves as the culminating experience consisting of 1,200 hours. The internship occurs on a full-time basis over the period of one year OR on a part-time basis over two consecutive years.

Courses and Descriptions

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This is a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDPS 500 Cognitive Assessment 3 Credits

This course addresses contemporary intellectual theories and the process and procedure of cognitive assessment. It presents the relevant issues related to intelligence testing and interpretation. Through a variety of pedagogical approaches, students acquire needed skills in administering, scoring, and interpreting results from contemporary tests of cognitive ability.

Prerequisite(s): EDPS 513.

EDPS 502 Psychological Development of the Child and Adolescent 3 Credits

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 506 Testing and Measurement Techniques in Reading/Literacy Education 3 Credits

Studies basic characteristics of test scores, including: reliability and validity, selection, administration, and scoring of tests; measurement of achievement, intelligence, aptitude, and interests; and the writing and editing of items of teacher-made tests, school marking procedures, interpreting of test scores. Covers basic statistical tools needed by reading specialists.

EDPS 507 Advanced Educational Psychology 3 Credits

A critical examination of contemporary learning theory as applied to educational thought and practice. The psychological, physiological, and sociological foundations of education and training; personality problems encountered by classroom teachers.

EDPS 508 Cognitive Processes and Learning 3 Credits

This course deals with what is known relative to the principles of cognitive psychology and their application to learning. The flow of information is followed from where it begins through the processes of integration and storage. Cognitive principles will be studied relative to concept formation, reasoning, and problem solving. Their relationship to specific educational tasks such as the teaching of reading, writing, mathematics, and other content will be explored and confirmed through empirical evidence.

EDPS 509 Psychoeducational Assessment and Report Writing 3 Credits

This course furnishes students with the clinical, practical, and theoretical sophistication to understand the assessment and report writing process for academic, behavioral, adaptive, and social-emotional concerns. Students are expected to master a wide range of concepts and skills to successfully complete this course including integrating multiple pieces of assessment data for case conceptualization, classification, and treatment recommendation. Students are required to synthesize data from multiple methods of assessment and sources to produce written psychoeducational reports that inform intervention practice.

Prerequisite(s): EDPS 513.

EDPS 510 Assessment of Behavioral and Social-Emotional Functioning 3 Credits

The assessment of behavioral and social-emotional functioning is studied from an empirically based, problem-solving model that links directly to intervention. Students learn to select appropriate assessment tools to match individual referral questions so as to evaluate the behavioral and social/emotional problems of children and adolescents.

Prerequisite(s): EDPS 513.

EDPS 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with specific educational exceptionalities, including learning disabilities, mental retardation, behavior disorders, physical handicaps, and giftedness. The characteristics, identification procedures, and current intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

EDPS 513 Professional Practice of School Psychology: Issues and Historical, Ethical, and Legal Considerations 3 Credits

This course is designed to provide an introduction to school psychology through an analysis of the contemporary roles and functions of school psychologists. Professional issues are explored in the context of the history and evolution of school psychology as a specialty area of professional psychology. In addition, the study of professional ethics, best practices, and standards for delivery of school psychological services that have been adopted by national organizations representing the profession of school psychology will be reviewed.

EDPS 514 Standardized Measures of Academics and Behavior 3 Credits

This course will increase students' understanding of the standardized assessment process, measurement issues, psychometric properties of assessment instruments, and the role of these instruments in informing academic, behavioral, and social-emotional interventions.

EDPS 515 Curriculum-Based Assessment and Measurement 3 Credits

This course will build upon students' knowledge and skills in individual-referenced assessment based upon the standards and general curriculum. Students will be able to design, administer, score, and interpret curriculum-based assessment and link these data to intervention.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDPS 521 Statistics and Quantitative Analysis 3 Credits

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

Prerequisite(s): EDPS 520, EDUC 500.

EDPS 535 Biological Basis of Behavior 3 Credits

This course will emphasize a biological approach to the study of psychology and behavior. Topics studied will include the following: 1) the genetics of human psychological differences; 2) the anatomy of the nervous system; 3) psychopharmacology; 4) neuropsychological diseases (e.g., epilepsy, autism, multiple sclerosis); 5) memory and amnesia; 6) sleeping, dreaming, and circadian rhythms; and 7) the biopsychology of mental health difficulties.

EDPS 538 Developmental Child Psychopathology 3 Credits

The course will furnish students with a comprehensive account of the characteristics, correlates, causes, contexts, and outcomes of psychopathology in children. It serves to augment students' understanding of specific conditions in childhood and adolescence including autism spectrum disorders, attention-deficit/hyperactivity disorder, mental retardation, childhood anxiety/depression, enuresis/encopresis, learning disabilities, communication disorders including selective mutism, and emotional/behavioral disorders. The diagnostic nosologies of the DSM and IDEA will be referenced and thoroughly discussed. A special emphasis upon a developmental-systems framework for understanding child psychopathology will be presented wherein the importance of context and the influence of multiple, interacting events and processes in shaping adaptive and maladaptive development will be investigated.

EDPS 570 Advanced Interventions for Children, Adolescents and Families 3 Credits

This course provides opportunity to expand each student's knowledge and skills in the development of effective interventions to meet academic, behavioral, and social-emotional needs. Currently accepted practices based upon the individual's referral problem will be explored. Intervention will be approached from a problem-solving model and based on current assessment data. Case studies will be used to link theory and application.

Prerequisite(s): EDPS 513.

EDPS 581 Practicum in Psychoeducational Assessment and Report Writing 1 Credits

This practicum experience provides supervised practice in administering, scoring, and interpreting an array of individually administered assessment instruments for the purpose of producing a written psychological report that is linked to intervention.

Prerequisite(s): EDPS 513.

EDPS 582 Practicum in the Assessment of Behavioral and Social-Emotional Needs 1 Credits

This practicum experience provides supervised practice using the techniques and methods taught in EDPS 510 Assessment of Behavioral and Social-Emotional Needs. Students will be expected to complete a Functional Behavioral Assessment including recommendations for a behavior intervention plan and a means to monitor and evaluate the target student's progress.

Prerequisite(s): EDPS 513.

EDPS 583 Practicum in Consultation in School and Agency Settings 1 Credits

This practicum experience provides supervised practice in the study, implementation, and evaluation of a problem-solving model to provide consultation across school and agency settings. Students will be expected to successfully initiate and lead the 4-step consultation process resulting in a databased intervention. The consultation will be documented in a formal report.

Prerequisite(s): EDPS 513.

EDPS 584 Practicum in Curriculum-Based Measures 1 Credits

This practicum provides supervised experience in identifying academic needs of students utilizing curriculum-based assessment (CBA) methods within a problem-solving framework. Students will practice the selection and administration of appropriate CBA tools to match referral question(s) at the individual, class-wide and school-wide levels. Students will also practice assessment of the academic environment by conducting structured direct observation of the classroom. Students will summarize and analyze assessment data, develop goals and objectives and make recommendations for intervention.

Prerequisite(s): EDPS 513.

EDPS 590 Internship in School Psychology I 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 581, EDPS 582, and EDPS 583.

EDPS 591 Internship in School Psych II 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 590.

EDPS 600 Independent Research and Study in School Psychology 1-3 Credits

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of school psychology.

EDSO 510 Sociological and Cultural Foundations of Education 3 Credits

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

SPED 514 Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals through Applied Behavior Analysis for students with Autism Spectrum Disorder and other behavioral issues. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multi-component interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

Science Certificate in Biological Science, Chemistry, Earth Science, Physical Science, &/or Physics

Program Overview

This Post-Baccalaureate Teacher Certification Program in Science (K-12) is designed for college graduates seeking initial teacher certification in the subject areas of one or more of the scientific disciplines (Biological Science, Chemistry, Earth Science, Physical Science, and/or Physics). The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 1475)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Science is a 21-credit graduate program requiring four teacher preparation courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Certificate Offered

- Science Certificate in Biological Sciences, Chemistry, Earth Science, Physical Science, and/or Physics (K-12)

- Completion of CURR 770 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 706 Inclusive Methods for Teaching Science 3 Credits

Classroom interaction analysis systems are used in the study of the instructional processes that support inquiry-based science learning. Candidates develop their own repertoires of teaching strategies, classroom management strategies, and awareness of career requirements in STEM fields. Emphases are on the investigation and interpretation of recent curriculum developments in NGSS and NJ Student Learning Standards in Science as well as the use of lab-based processes in science learning. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying science curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

Social Studies (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in Social Studies (K-12) is designed for college graduates seeking initial teacher certification in the subject area of Social Studies. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching

and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 1475)

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 705 Inclusive Methods for Teaching Social Studies 3 Credits

This course addresses the practical and theoretical aspects of teaching social studies to diverse adolescents in secondary schools. Using the NJ Student Learning Standards in Social Studies, candidates will prepare and design curriculum and assessment for students in various learning environments and with diverse learning needs. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying social studies curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

Special Education (M.A.) Online

Program Overview

The Master of Arts in Special Education online program is designed to prepare certified teachers to teach students with special needs in a variety of settings.

The program provides opportunities for students to understand the nature and causes of disabilities, become familiar with agencies and resources for persons with disabilities, and learn the best practices and materials for teaching students with disabilities. This knowledge base,

combined with a variety of shared and individual field-based experiences, provides opportunities for teachers to develop their expertise and become confident in their ability to work with students with special needs and become leaders in meeting the challenges of diverse classrooms. This program is offered completely online.

Curriculum Overview

The M.A. in Special Education program comprises a sequence of coursework that includes courses required for a New Jersey Teacher of Students with Disabilities Endorsement. Candidates who are successful in the Teacher of Students with Disabilities Certification Program may apply their credits toward the M.A. in Special Education.

For individuals who are currently prepared to teach in general education settings, a 30-credit course sequence is designed to strengthen their preparation to meet the needs of all children, particularly those with disabilities. Students who currently hold a regular New Jersey instructional certificate in another field and successfully complete the program will be eligible for the New Jersey Teacher of Students with Disabilities Endorsement.

Those who already hold New Jersey Teacher of the Handicapped or Teacher of Students with Disabilities (TOSD) certification, may be eligible for up to nine credits waived depending on prior course work and transcript review. A total of 30 credits in graduate work is still required to receive the M.A. degree.

- Teacher of Students with Disabilities Certification (p. 1470)

The **Special Education Master of Arts** is a complete on-line remote course of study.

(30 total credits)

Teacher of Students with Disabilities Coursework

(21 credits)

Candidates entering with an undergraduate degree in education and teacher certification will be required to take the following courses. SPED 512 is the prerequisite for all other courses.

Code	Title	Credits
SPED 504	Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities	3
SPED 512	Psychology of Exceptionality	3
SPED 514	Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs	3
SPED 524	Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities	3
SPED 531	Assessment for Instruction in Special Education	3
SPED 536	Instruction and Transition for Autism and Severe Disabilities	3
SPED 539	Instructional Practices for Students with Disabilities	3
Total Credits		21

Additional Courses for Special Education (M.A.)

(9 credits)

Code	Title	Credits
EDUC 500	Introduction To Research	3
SPED 542	Literacy and Students With Special Needs	3
SPED 590	Professional Seminar in Special Education	3
Total Credits		9

Additional Courses for Special Education M.A. with Reading Specialist Certification

(9 credits)

All additional courses for this certification can be completed online.

Code	Title	Credits
LITR 501	Psychology and Pedagogy of Literacy Processes	3
LITR 502	Curriculum, Instruction and Supervision in Literacy	3
LITR 504	Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum	3
Total Credits		9

Graduation Requirements

- Meet the general master's degree requirements.
- Successful completion of all academic and field requirements.
- Completion of 30 graduate credits with a minimum GPA of 3.00 on a 4.00 scale.
- Successful completion of a required sequence of field experiences.
- Candidates must successfully pass a comprehensive examination covering knowledge and skills related to the field of special education.
- Successful demonstration of professional dispositions and behavior.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and challenges and assessment measures. Observational techniques and diagnostic teaching for assessment are stressed. Students will apply concepts learned in seminar to their associated practicum/field experience.

SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals through Applied Behavior Analysis for students with Autism Spectrum Disorder and other behavioral issues. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multi-component interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 531 Assessment for Instruction in Special Education 3 Credits

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

Prerequisite(s): SPED 512.

SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 542 Literacy and Students With Special Needs 3 Credits

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 590 Professional Seminar in Special Education 3 Credits

This course addresses the current issues in the field of special education. Students will synthesize research and literature from the field of special education to address current issues and practice. Collaboratively, students will examine one area of special education through research and presentation. A reflective comprehensive view of special education including assessment, instruction, inclusive practice, assistive technology, Autism Spectrum Disorder, behavior, literacy etc. will be shared. Students are expected to complete a comprehensive exam in these related special education topics and submit 100 hours of supervised field hours. This course should be taken in the final semester of the MA program as it is the culminating reflective course of study.

Prerequisite(s): Permission of instructor.

Student Assistance Coordinator Certificate

Program Overview

This Rider Student Assistance Coordinator (SAC) Certificate qualifies students to apply for the Student Assistance Coordinator Certificate of Eligibility with Advanced Standing (SAC CEAS (<https://www.state.nj.us/education/license/sac/>)) in New Jersey, which is supplied by the NJ Department of Education (<https://www.state.nj.us/education/>). For students interested in the school counseling profession, the SAC plays a specialized counseling role in the schools. SACs help students who are coping with social, emotional, and behavioral issues related to substance abuse and typically provide drug and alcohol prevention and intervention counseling services.

Students should consult the NJ Department of Education (<https://www.state.nj.us/education/>) for the most updated and detailed explanations of the requirements to ultimately qualify for a standard New Jersey SAC certificate.

Curriculum Overview

This certificate is comprised of seven courses or 21 credits.

Current M.A. students seeking either the Master of Arts in Counseling Services (school counseling concentration) or the Master of Arts in Clinical Mental Health Counseling, may fulfill requirements for the SAC certificate as they complete their M.A. degree.

For those who are pursuing a 60-credit Master of Arts in Counseling Services, (school counseling concentration) at Rider, they may use elective courses to fulfill SAC requirements. Students should consult with their faculty advisor on elective choices to select courses that meet student career and licensure or certification goals.

For those who are pursuing a Master of Arts in Clinical Mental Health Counseling without a Dance/Movement Therapy concentration, extra courses will be required beyond their M.A. degree requirements. For students enrolled in the Master of Arts in Clinical Mental Health Counseling without a Dance/Movement Therapy concentration, three extra courses are required (two courses may be able to count as electives for the M.A. CMHC program). Students should consult with their faculty advisor on elective choices to select courses that meet student career and licensure or certification goals.

For students enrolled in the Master of Arts in Clinical Mental Health Counseling with a Dance/Movement Therapy concentration, five additional courses will be required (note that students do not have electives in this concentration).

For those who are not enrolled in one of the M.A. programs listed above and who are interested in obtaining the SAC certificate (such as practicing counselors), please reach out to the program contact listed below for more information. The 21 credits are standard for the SAC CEAS in N.J.; however, a review of student transcripts by Rider faculty and/or by the N.J. Department of Education will likely be required to develop a plan of study. Please note that enrollment is limited for students seeking this option.

Student Assistance Coordinator Certificate Requirements

For Current Master of Arts in Counseling Services (School Counseling Concentration) Students:

(9 credits)

Current Master of Arts in Counseling Services students with a School Counseling Concentration may fulfill requirements for the SAC as they complete their M.A. degree. One course (CNSC 580, CNSC 581, CNSC 590 or CNSC 591) may be taken as part of the M.A. degree requirements and two extra courses will be required beyond the M.A. degree requirements. At least one of the extra courses must be taken before CNSC 580, CNSC 581, CNSC 590, or CNSC 591. Currently enrolled students should consult with their program advisors for more information about course selection and this certificate option.

Code	Title	Credits

Courses and Descriptions

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

COUN 515 Substance Abuse Counseling 3 Credits

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

COUN 516 Strategies in Addiction Counseling 3 Credits

This is an experiential and laboratory-based experience in which students will learn to implement evidence based counseling techniques that are utilized in the field of substance abuse counseling. Students will be able to expand their basic counseling skills and techniques learned in COUN 550, as well as become exposed to techniques that are unique to addiction counseling. In addition to learning assessment skills, students will learn interventions that include motivational interviewing, relapse prevention, alternative therapies, group counseling, family counseling, and others. This course will also focus on issues of ethics and prevention in counseling.

Prerequisite(s): COUN 550.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Stdnts and Stdnts With Special Needs 3 Credits

The course provides an overview of the foundations of counseling in educational settings, including the historical roots, current and future trends, roles, and functions in multicultural schools and higher education settings. Students examine the roles and responsibilities of professional school counselors to facilitate student success through the development of a comprehensive school counseling program as an integral component of the total education system.

Supervisor of Instruction Certificate

Program Overview

This program is designed for experienced and fully-certified teachers and other related instructional personnel to gain the necessary skills and professional knowledge to become supervisors in a school system.

It is a coherent program that develops the reflective capacities of students to perform a wide range of supervisory functions in accord with recognized professional standards, best practices and values.

Students should note that the recommended course sequence set by Rider University has been approved by the New Jersey Department of Education for the New Jersey supervisor's certificate and meets the four course requirements established by the Department: a course in the general principles of staff supervision (N-12); two courses in general principles of curriculum development (N-12); and a practicum in supervision where students will be expected to complete a mentored internship in a school or appropriate work setting as a requirement of the culminating course in the sequence.

Courses and Descriptions

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, and national school leadership standards.

Prerequisite(s): CURR 531.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

Talent and Organizational Development Certificate

Program Overview

This track is aimed at preparing students to be successful, strategic and impactful professionals who are able to work effectively through others. The program will:

- offer insight into human and organizational relationships;
- enhance the capacity for sound analytical judgment; and
- encourage the ability to see the "big picture" as it relates to an organization and its environment.

Curriculum Overview

Coursework focuses on applied action grounded in theory, and embraces principles applicable to administrative issues in the private, public,

and nonprofit sectors. The courses enable students to enhance their knowledge and skills in:

- employee recruitment
- leadership development
- group dynamics
- organizational change
- conflict management
- succession planning
- training and development
- adult learning theory

LEAD 532	Program Design for Training and Development in Organizations	3
Total Credits		12

Courses and Descriptions

LEAD 510 Organizations: Design and Dynamics 3 Credits

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 512 Forms of Diversity in Organizations 3 Credits

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different “worldviews” which organizational members bring into the organization, and how that affects their ability to work together. The course develops students’ knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 532 Program Design for Training and Development in Organizations 3 Credits

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore “real world” applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

Teacher Leadership (M.A.)

Program Overview

The Master of Arts in Teacher Leadership program seeks students who wish to enhance their knowledge and ability to deliver content instruction and further develop their leadership skills in educational settings. This program is designed to be developmental and experiential in nature, fostering ethical behavior and the improvement of self and one’s profession. The program is based upon current leadership standards. These standards emphasize performance-based learning opportunities in the areas of articulating and implementing a vision for learning, promoting effective instruction, effectively utilizing and managing resources in the learning environment, collaborating with families and community members, promoting the success of all students in an ethical manner, and recognizing the influence of the larger political, social, economic, legal, and cultural context.

The teacher leadership degree program serves those students who seek a graduate program that will develop their professional capacities as teachers and leaders. Increasingly, teachers are called upon to play a leadership role in the following areas: design, coordinate, and evaluate standards-based curricular programs; assess the outcomes of instruction; support the work of other teachers through mentoring,

peer-coaching, and collaborative problem-solving; contribute to the professional development of the staff by providing and facilitating teacher in-service programs; and to promote a positive climate and culture for learning both inside and outside of the classroom. This program also prepares students for formal instruction/supervisory roles by emphasizing the knowledge, skills, and dispositions needed to assume leadership responsibilities for school and district-wide improvement initiatives.

Leadership Growth Projects are a requirement of every teacher leadership core course within the program. They provide students with an opportunity to develop and practice their teacher/supervisory leadership skills throughout the program so that they are well-prepared for the requirements of their internship experience (Capstone Project). An electronic portfolio showcasing how Standards have been addressed will be submitted during the internship course to document continuous and sustained accomplishments of all candidates in their educational settings. Upon the completion of the Master of Arts Degree in Teacher Leadership, graduates will qualify for the New Jersey Instructional Supervisor Certificate.

Curriculum Overview

Developed by Rider University's respected and CAEP (<https://caepnet.org/>)-accredited College of Education and Human Services, the Master of Arts is designed to prepare experienced teachers to assume a greater leadership role in their schools, and share their skills and knowledge while remaining active in the classroom.

Teachers who complete the full master's degree will acquire both content knowledge and the skills needed to be effective teacher leaders in their schools and school districts. The full master's degree program includes both the 21-credit teacher leadership core and the 15-credit core content disciplines. Students who complete the master's degree track are eligible to apply for New Jersey Supervisor Certification.

The teacher leadership core is designed to prepare experienced teachers to assume a greater leadership role in their schools and share their skills and knowledge while remaining active in the classroom. This is a low-residency program that combines the best of face-to-face learning with the convenience of online learning. Its innovative design gives participants the flexibility they need to balance work and family demands while advancing their skill as teacher leaders. In the core content disciplines, teachers select content courses designed to build content knowledge and pedagogy in specialized fields. Teachers may select courses in only one concentration or a combination of courses in more than one concentration.

Teacher Leadership Concentration Options

The concentrations provide teachers with face-to-face and/or online courses that require the application of what is being learned in class to how content is being taught in their classrooms. The primary goal is to enhance content knowledge and ability to deliver instruction in a common core curriculum area of specialization. The completion of five courses in the concentrations will result in a Rider University Professional Development Certificate in that specific concentration and in some instances a New Jersey Department of Education endorsement/certification.

Courses and Descriptions

CURR 517 Teaching and Learning Number and Operations 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Content and Mathematical Practices.

CURR 520 Teaching and Learning Geometric Understanding 3 Credits

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 522 Teaching and Learning Measurement and Data 3 Credits

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, and national school leadership standards.

Prerequisite(s): CURR 531.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

CURR 552 Creative, Ethical Teacher Leadership 3 Credits

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

CURR 640 Teaching and Learning Physical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected physical science (physics and chemistry) topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 641 Teaching and Learning Life Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 642 Teaching and Learning Earth and Space Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 643 Engineering Solutions to the Challenges of Contemporary Science Issues 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 644 Teaching and Learning Chemical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be placed on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

CURR 650 Understanding Gifted Learners 3 Credits

The course explores the ways in which the gifted and talented can differ from more typical learners in terms of their cognition, social-emotional dimensions, behavior, and long-term development. It focuses on theories of intelligence, differing conceptions of giftedness and talent development, and learning processes. Some specific topics include underachievement, perfectionism, dual exceptionality, gender issues, and underserved populations. The course also addresses the ways in which gifted education can evolve to fit the demands and opportunities embedded in complex, 21st-century socioeconomic, cultural, and technological contexts.

CURR 652 Differentiating Instruction for the Gifted and Talented 3 Credits

This course provides the rationale and practical strategies for effective instructional differentiation for the gifted and talented within and beyond the regular classroom. Participants will learn how to differentiate within subject areas by adjusting content, process, product, and learning environment to meet the needs of learners. They also will explore the nature and nuances of differentiation by ability, readiness, and interest, as well as the implications of instructional differentiation for formative and summative assessment. Throughout the course they will design and share examples of differentiation including tiered assignments, complex instruction, independent studies, graphic organizers, and learning contracts.

CURR 654 Innovative Instructional Strategies for Gifted Education 3 Credits

This hands-on, experiential course immerses participants in simulations and analyses of new and revised student-centered teaching models and strategies that are conducive to creative and critical thinking, advanced content mastery, and the invigoration of students' interests. Participants analyze the potential of each model/strategy while considering the ways in which it can apply to content learning in various subject areas/domains. The course also engages participants in studying the fundamental principles of program design in gifted education so they can make the best possible use of the instructional models and strategies.

CURR 656 Creative, Interdisciplinary Thinking 3 Credits

This course facilitates creative thinking through the exploration of important insights from a wide variety of disciplines in the social sciences, humanities, natural sciences, and education. The process of creative association enables participants to combine diverse, remotely associated constructs to create new products and processes. Applications of interdisciplinary thinking to curriculum and instruction are explored. These applications include novel methods for curriculum integration, discovery and development of children's interests, and instructional modifications for the gifted and talented. Exploration of concepts and processes in multiple academic domains and professional fields also provide appreciation for the domain-specific natures of giftedness and creativity.

CURR 660 Authentic Data in the Elementary STEM Classroom. 3 Credits

Young learners can think deeply about content and make meaningful connections between their experiences, natural phenomena, and authentic data when teachers integrate data in purposeful ways. In this course, teachers construct student-centered STEM investigations integrating real-world scientific and mathematical data and build their understanding of the theoretical basis for this work. Participants gain knowledge of STEM resources, learn to access entry points for STEM in elementary classrooms and foster engaging contexts, like engineering, coding, and NASA mission exploration. Teachers explore the synergies between Common Core State Standards and Next Generation Science Standards for a productive and exciting learning environment that prepares students for ongoing interest in STEM. This course is recommended as a foundation for the STEM certificate program.

CURR 661 Authentic Data in the Secondary STEM Classroom 3 Credits

Middle and High School students are capable of deep sense making when teachers utilize engaging STEM classroom practices to teach content with authentic data connections. In this course, teachers learn to apply research-based best practices central to today's classrooms. In a collaborative professional learning environment, they build knowledge of resources for accessing, analyzing, and making use of authentic data in meaningful activities. Coursework includes planning student-centered lessons that integrate data, building cultural relevance with engaging phenomena, and developing meaningful assessments for STEM activities. Participants identify how to integrate engineering design into the STEM classroom and learn how to represent the Nature of Science as students develop conceptual understanding and apply critical thinking to real-world decisions. A library of content rich lessons becomes available to all participants through a shared online community. This course is recommended as a foundation for the STEM certificate program.

CURR 662 Eyes on Earth: Teaching Earth Science from Space (PK-8) 3 Credits

This course will take participants through a journey about space exploration and specific NASA missions that examine components of earth. Participants will learn science content grounded in Earth's Lithosphere, Hydrosphere, Atmosphere, and Biosphere. By learning to use authentic data from NASA and other sources participants will experience an exploratory approach to learning about the Earth, and then bring these experiences to their own classrooms. Teachers will utilize several web-based tools and real-time data along with the three-dimensional learning in the Next Generation Science Standards to create lessons that can be used directly in the classroom.

CURR 663 Lessons from the Ocean: Science on the Water Planet (Grades 2-12) 3 Credits

Bring the ocean into your classroom by using Earth's waters as a context for standards-based STEM content. The ocean is critical to the functioning of the Earth system, and is an authentically integrated context for learning about topics such as density, weather and climate, heat transport, environmental issues, biogeochemical cycles, mathematics, and much more. Access a myriad of data sets to apply science concepts and make connections between the ocean and atmosphere, living and nonliving parameters, and life on land, as well as in the deep sea. Use the context of the ocean to teach Next Generation Science Standards topics with deep understanding and meaning for learners.

CURR 664 The Arts in STEM: Advancing Meaningful Integration (K-12) 3 Credits

Apply art in the context of exciting STEM concepts and learn to integrate art, science, math, technology, and engineering in more meaningful ways in your classroom. At the core of the STEM Education movement are critical thinking, creativity, problem solving, and authentic learning environments that engage diverse students in meaningful ways with content. The many mediums for art and artistic expression are a valuable component of communication and expression. Scientists and researchers at NASA and across the globe use myriad forms of art in their work. This course invites students to take a close look at the incorporation of art in the STEM classroom and provides resources, exemplars, and access to collaborative support for arts integration.

CURR 665 Climate Change with NSF SPRINTT 3 Credits

Award-winning curriculum and eloquent, online student investigations help students study science concepts emphasized in the Next Generation Science Standards, in the context of Earth's Polar Regions to better understand the complexity of Earth's climate and how it is changing. View the Earth using real scientific data from satellites and western researchers. Then, consider the lens of indigenous peoples of the Arctic. Examine tons of data and changes in ice, permafrost, weather patterns, biological change, and more as you conduct research with simple-to-use, web-based instructional tools, using authentic data sets and models to study our planet's past, present, and future climate. Interdisciplinary investigations address many Common Core State Standards in reading, writing, science, and technical subjects as well as mathematics in the context of climate science.

CURR 666 Exploring Mars: A New Twist on Science (or Math) 3 Credits

Use a wealth of data sets and technological tools to explore and understand features of Earth's neighbor, the Red Planet. Look for and study the physical and chemical evidence of water and ice; compare erosion patterns on Mars and Earth; and make inferences about the planet's history as you study both its geologic features, including volcanoes and craters, and the physics of the atmosphere. Teach Next Generation Science Standards topics in Earth, physical, and chemical science integrating mathematics, in the context of Mars using recent data from Curiosity Rover and other missions.

CURR 667 Physical Science in Motion: Classroom Applications 3 Credits

Physical science, when applied, makes tough-to-understand concepts easy and fun. Participants learn to solve problems relating to one-dimensional motion; become acquainted with and apply Newton's Laws of Motion and equilibrium of forces; learn about constant acceleration and gravitational acceleration; investigate concepts in aerodynamics; and learn about two-dimensional motion. Participants will use free, simple-to-use, software simulations from NASA Glenn Research Center, which help to present these concepts for you, and, then, your students, in the context of aeronautics, including airplane design, rocketry, sports, and more. A carefully developed resource page provides access to excellent resources and engaging activities for implementing course content in your classroom with important connections to Next Generation Science Standards and Common Core mathematics.

CURR 668 Coding, Robotics, and 1:1 Devices 3 Credits

Learn applications of Coding as a mathematics pedagogy, explore opportunities for Robotics, and learn cutting-edge implementation of One-to-One Devices (1:1) in K-12 classrooms. Participants learn about and explore best practices in the newest learning pedagogies and technologies. Whether you are already involved, or looking to integrate these cutting-edge tools and strategies for the classroom, you will begin to expand your reach for enhancing student learning. Scaffolded to allow success at all grade levels, Coding, Robotics, and 1:1 Devices offers resources for application into elementary, middle, and high school. Participants will interact with no-fee computer programming, robotics opportunities, and the latest uses of devices. All participants have the opportunity to work with innovative technologies and interact with talented educators, practitioners and special guests who are already making a difference in K-12 classrooms.

CURR 669 Culturally Relevant Pedagogy in the STEM Classroom 3 Credits

Classrooms comprise individual learners, each bringing their own culture and experiences to the learning environment. The value and strength of diversity has become increasingly described in educational literature. This course introduces teachers to the curriculum and pedagogical issues relevant to race, language, gender, and socio-economic differences. Participants apply content and pedagogy involving science and mathematics contexts for effective learning. STEM activities will integrate meaningful, engaging practices for teaching diverse learners. The course is differentiated for elementary and secondary school educators to provide relevant connections, to be directly applied, in each participant's classroom.

CURR 670 Life and Marine Science: Tracking Live Marine Animals 3 Credits

Follow marine animals (e.g., polar bears, sea turtles, sharks, and whales) in real-time, and apply life and Earth science topics to the ocean. Study topics such as ecosystems, biodiversity, cell structures, food webs, and conservation, as you make connections to ocean currents, seafloor features, density and more. Discover the importance of the ocean to humans, as well as our impacts, both positive and negative, on marine environments. The in-depth use of data lends itself to Next Generation Science Standards by integrating instructional technology with life, Earth and physical science.

CURR 671 Life in Space: NASA ISS and Astrobiology 3 Credits

The International Space Station (ISS) is an amazing undertaking comprising technology, engineering, science and math—the perfect context for exciting students for learning. NASA research leads to technological advances on Earth and in human space exploration. As NASA plans for manned missions to Mars, scientists explore our solar system and beyond for determining if and where life could exist. Extremophiles are fascinating for teaching Earth science in a context for astrobiology research. The course explores how space travel impacts the human body; growing food in space; engineering protection from radiation, and searching for habitable environments. With its application of subject matter, it offers excellent resources and interactions with NASA scientists, and data for educators to bring the exciting context of space travel to the classroom.

CURR 672 Math Connections to STEM Education 3 Credits

The course introduces a wealth of applied mathematics exercises and activities relevant to integrated STEM assets and science activities. Some are in the realm of topics seen in Earth and Space science and physics. Live presenters break down authentic examples and projects, and demonstrate to educators how problems incorporate Common Core State Standards-based mathematics with applications that meet Next Generation Science Standards performance expectations. Educators survey math and science examples and tools as the course promotes the use of applied mathematics in science, or science in mathematics, to meet content goals in the classroom.

CURR 673 NASA Astronomy and Space Science 3 Credits

Harness your students' enthusiasm for space and astronomy by using astronomical images to enrich your physical, Earth, and life science courses. Measure the speed of an asteroid, learn about erosion on Mars, and see the tracers of life that are visible from space. In this course, we explore the many ways in which real data from NASA's space science and astronomy missions can be used to teach math and science content in your classroom, meeting science and math standards in Next Generation Science Standards and Common Core State Standards. Through the use of cutting-edge technology tools, and with a NASA scientist visiting our class, you will not only learn more about the universe, you will learn how to bring the universe into your education context.

CURR 674 NASA Physics for Real Beginners: Earth, Moon, and Space 3 Credits

Gain an introduction to physics in this conceptual course that uses NASA's space initiatives as the context for content. Learn about gravitation between celestial bodies, how to get a satellite into orbit, what it takes to blast off into space, and more. This course will discuss these and related topics while exploring NASA content related to space and the Hubble Space Telescope and Kepler Missions. Bring cutting-edge examples to your classroom while addressing Next Generation Science Standards performance expectations.

CURR 675 Reading and Writing in the Science Classroom 3 Credits

Discuss and analyze the ways that literacy and science connect in the science classroom, and highlight how reading and writing can be used to increase students' understanding of science content. Focus on how to integrate important literacy skills from Common Core State Standards in your science and STEM classroom to address content standards from Next Generation Science Standards. Cutting-edge strategies and well-founded principles pave the way to success with non-fiction reading material. The manner in which information and scientific content is presented shapes student success, not just for reading, but student writing, organization, and presentation.

CURR 676 The E in STEM: Meaningful Content for Engineering 3 Credits

Learn how to use engineering to make your classroom come alive. Bridge and teach math and science concepts through exciting applications in the Engineering Design Process where you and your students design, test, and evaluate models and real-life applications. Activities are hands-on and emphasize the reciprocities between science, technology, engineering, and mathematics in formal design challenges. Educators enrich classroom curriculum with elements of design in science, mathematics, or technology activities, addressing important Next Generation Science Standards' engineering design practices.

CURR 677 WDLC - Weather Data Learning Center 3 Credits

Use weather data to teach and learn math. This course teaches content in a math curriculum that uses weather data. Weather Data Learning Center demonstrates increases in student performance in grade 4 mathematics. Collect, access, and interpret current real-time imagery, maps and data. Make connections from weather to learn Common Core-based mathematics using various STEM pedagogical strategies. Learn the basics of clouds, air masses, humidity, fronts, pressure, jet stream, and climatic patterns as you apply these ideas to math concepts such as measurement, fractions, number sense, data collection, and analysis.

CURR 678 Action Research in the STEM Classroom 3 Credits

A Capstone Course requirement "option", this course may be part of joint Master's Degree programs, or Endeavor's "5-course" certificate program earning Research Distinction and an award.

CURR 679 Practicum in STEM Leadership 3 Credits

Share your knowledge of STEM teaching and learning with colleagues in your building, district, or region.

CURR 680 STEM Leadership Seminar 3 Credits

The course contains STEM pedagogical content knowledge, incorporating authentic data and using technology as a tool for learning. The course provides a springboard for cultivating problem solving skills, inspiring student research projects, and integrating STEM methods and essential principles addressed in new standards.

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): CURR 531, CURR 532 or CURR 538, EDAD 505, and Permission of Program Director.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 505.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501 and EDAD 514.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification.

LITR 500 Multimodal Teaching and Learning 3 Credits

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and challenges and assessment measures. Observational techniques and diagnostic teaching for assessment are stressed. Students will apply concepts learned in seminar to their associated practicum/field experience.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

LITR 510 Research and Survey of Texts for Children and Adolescents 3 Credits

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-print texts into the school curricula in ways that support youth and adolescent literacy development.

LITR 560 Writing Project at Rider 3 Credits

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas.

LITR 600 Independent Research and Study in Literacy Education 1-3 Credits

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education.

SPED 500 The Inclusive Classroom: Effective Practices for General Education Teachers 3 Credits

This course is designed to introduce general education teachers to special education and the inclusive classroom. Students will explore current research, issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals through Applied Behavior Analysis for students with Autism Spectrum Disorder and other behavioral issues. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multi-component interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 531 Assessment for Instruction in Special Education 3 Credits

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

Prerequisite(s): SPED 512.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 542 Literacy and Students With Special Needs 3 Credits

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

Special Education Teaching Certification: Teacher of Students with Disabilities (TOSD)

Program Overview

The Teacher of Students with Disabilities (TOSD) certification program is a complete on-line remote course of study. Some courses may have remote asynchronous meeting schedules. Students are reminded to check specific course schedules during registration.

The graduate education certification program for Teacher of Students with Disabilities (TOSD) includes the 21 credits required by the State of New Jersey for endorsement as a TOSD. This certification program is for candidates that possess a current New Jersey instructional elementary, secondary, or P-3 certification. The course sequence is designed to provide a knowledge base in the current research and practice in special education. Each course in the program will make connections from theory to practice with specific field assignments embedded in coursework.

Curriculum Overview

Courses include Psychology of Exceptionality, Applied Behavior Analysis for students with Autism Spectrum Disorder and other Behavior Needs, Instruction and Transition for Autism and Severe Disabilities, Collaboration and Inclusive Practice for students with Mild and Severe Disabilities, Assessment for Instruction in Special Education, Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities, and Instructional Practices for Students with Disabilities.

The M.A. in Special Education program comprises a sequence of coursework that includes courses required for a New Jersey Teacher of Students with Disabilities Endorsement. Candidates who are successful in the Teacher of Students with Disabilities Certification Program may apply their credits toward the M.A. in Special Education.

Teacher of Students with Disabilities Certificate Requirements

The graduate education certification program for teacher of students with disabilities will require a minimum of 21 credits required by the

State of New Jersey for endorsement as a teacher of students with disabilities. Candidates must possess an existing instructional certificate or certificate of eligibility in elementary education, secondary education, or P-3 education. Completion of a sequence of field-based activities is required. SPED 512 is a prerequisite for all other SPED courses.

Courses and Descriptions

SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals through Applied Behavior Analysis for students with Autism Spectrum Disorder and other behavioral issues. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multi-component interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 531 Assessment for Instruction in Special Education 3 Credits

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

Prerequisite(s): SPED 512.

SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

Teacher Leadership Professional Development Certificate

Program Overview

This 36-credit teacher leadership certificate provides mediated field placements, mentored internships, face-to-face and online courses and experiences, and on-the-job training that build necessary skills in teacher leadership. Those teachers who complete the teacher leadership core, which consists of seven core courses, will receive the Rider University Professional Development Certificate in Teacher Leadership.

CURR 552 Creative, Ethical Teacher Leadership 3 Credits

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, and national school leadership standards.

Prerequisite(s): CURR 531.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 505.

EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): CURR 531, CURR 532 or CURR 538, EDAD 505, and Permission of Program Director.

Teaching English to Speakers of Other Languages (TESOL) at the Graduate Level

Program Overview

At the graduate level, the Teaching English to Speakers of Other Languages (TESOL) Program is offered to post-baccalaureate students looking to teach English to adult learners. The TESOL program consists

of 9 credits that include courses in culture, linguistics, and teaching methods with 20 hours of field experience.

Certificate Offered

Courses and Descriptions

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

Teaching (M.A.T.)

Program Overview

The Master of Arts in Teaching (MAT) is a 30-credit degree program that incorporates work completed during the initial teacher preparation phase of candidates' development while adding broad professional knowledge about innovative curriculum design, inclusive practices, and data-based decision making in teaching and learning. The program is open to candidates from Rider's Post-Baccalaureate Teacher Certification Program.

In addition to earning the MAT degree, candidates may apply coursework and credits to other Master's programs, endorsements, and/or professional development certificates offered through the Department of Graduate Education, Leadership, and Counseling.

Students can take much of the initial coursework for the MAT degree by completing one of the teacher certification programs through the Post-Baccalaureate Teacher Certification Program:

- Comprehensive Business (K-12) (p. 1396)
- Dance (K-12) (p. 1402)
- Early Childhood (P-3) (p. 1409)
- Elementary (K-6) (p. 1414)
- English as a Second Language/ESL (K-12) (p. 1418)
- English (K-12) (p. 1415)
- Mathematics (K-12) (p. 1431)
- Music (K-12) (p. 1432)

- Meet general master's degree requirements;
- Successful completion of all academic requirements;
- Completion of 30 graduate credits with a minimum GPA of 3.00; and,
- Successful demonstration of professional dispositions and behavior.

Courses and Descriptions

CURR 541 Assessment and Student Learning 3 Credits

This course provides hands-on opportunities to create and design varied classroom assessments that help teachers align their teaching goals with student learning goals. With a focus on NJ Student Learning Standards across the curriculum content areas and grade levels, assessments will be designed for use in individual teaching practice and with a variety of diverse learners. Topics include designing assignment rubrics and effective essay prompts as well as developing evaluation criteria.

Prerequisite(s): CURR 510, CURR 700.

CURR 650 Understanding Gifted Learners 3 Credits

The course explores the ways in which the gifted and talented can differ from more typical learners in terms of their cognition, social-emotional dimensions, behavior, and long-term development. It focuses on theories of intelligence, differing conceptions of giftedness and talent development, and learning processes. Some specific topics include underachievement, perfectionism, dual exceptionalism, gender issues, and underserved populations. The course also addresses the ways in which gifted education can evolve to fit the demands and opportunities embedded in complex, 21st-century socioeconomic, cultural, and technological contexts.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

Theater (K-12)

Program Overview

The Post-Baccalaureate Teacher Certification Program in Theater Education (K-12) is designed for college graduates seeking initial teacher certification in the subject area of Theater. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per

semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 1475)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Theater Education is a 21-graduate credit program requiring teacher preparation courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

World Languages Certificate in French or Spanish (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in World Languages (K-12) is designed for college graduates seeking initial teacher certification in French or Spanish. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical

experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 1475).

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in World Languages (French or Spanish) is a 21 credit graduate program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. College of Arts and Sciences

The College of Arts and Sciences (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/>) (CAS) offers advanced degrees designed to build professional success in a variety of organizational settings. With programs in Applied Psychology, Business Communication, Cybersecurity, Homeland Security and more, graduate programs in CAS focus on refining essential skillsets for data analysis and its critical application, for career advancement and personal growth. A Master's degree from Rider will connect cutting-edge curricula with real-world learning opportunities resulting in a unique and enriching educational experience.

Graduate Programs in the School of Humanities and Social Sciences

Graduate Programs in the School of Science, Technology and Mathematics (p. 1480)

Graduate Programs in Westminster Choir College (p. 1480)

General Policies (p. 1481)

Graduate Programs in the School of Humanities and Social Sciences

Adult Services and Behavioral Gerontology (p. 1481)

This certificate focuses on important issues that individuals with Autism Spectrum Disorder—as well as their families and the clinicians who work with them—face across the individual's lifespan from the transition to adulthood through retirement.

Masters in Applied Psychology (<http://catalog.rider.edu/graduate/colleges-schools/liberal-arts-sciences/programs-certificates/ma-applied-psychology-applied-behavior-analysis/>)

The M.A. in Applied Psychology: Applied Behavior Analysis (ABA) prepares students to excel in professional careers as scientist-

practitioners. By challenging students to use a scientific lens when creating and evaluating clinical interventions, and to use an applied lens when designing research, this program will ensure that students are prepared to achieve success in behavior analytic employment, or to pursue further education upon completion of the program.

Graduate Programs in the School of Science, Technology and Mathematics

Masters in Cybersecurity (p. 1493)

The M.S. in Cybersecurity will provide students with the expert knowledge and technologies needed to detect, investigate, and prevent computer-related crimes, and to examine the theory, best practices, and methodologies to conduct computer forensics investigations. Students pursuing this degree will bring to the job a powerful combination of a traditional liberal arts education with foundational knowledge and technical training needed to excel in the cybersecurity field.

Graduate Programs in Westminster Choir College

Choral Conducting (p. 1490)

The graduate choral conducting program, generally a two-year program, trains conductors to be marketable and effective musicians. Westminster offers a balance of academic and performance opportunities. Graduate conducting majors take a core of research, literature, conducting, pedagogy and ensemble. Applied study and ensemble conducting offer each candidate the opportunity to work with the conducting faculty. Candidates must successfully complete a comprehensive oral exam before a degree is conferred. Graduate Conducting majors are admitted by audition in order to assure quality conducting experiences and contact with the graduate faculty.

Choral Pedagogy (p. 1488)

The Master of Choral Pedagogy curriculum includes courses in voice science, choral rehearsal pedagogy, choral literature, and music education. It emphasizes the process of rehearsing, the psychology of learning, and educational philosophy.

Music Education (p. 1495)

The Master of Music Education program is for music teachers who wish to complete graduate study in three to four summers or in two academic years. Students may also combine summer and academic terms to accelerate completion. The degree is for those who hold an undergraduate degree in music education and a teaching certificate. Students do not earn teacher certification through this degree program.

Sacred Music (p. 1497)

The graduate sacred music program provides advanced training for church musicians from a wide variety of educational, professional, and denominational backgrounds. It is expected that applicants for this program will bring a thorough grounding of musical knowledge and significant experience in full- or part-time music ministry. The curriculum includes general as well as specialized courses in sacred music studies, theology, history, musicology, and applied skills. A fully online option, Sacred Music Practical Pedagogy (p. 1500), is also available.

Voice Pedagogy and Performance (Pedagogy Emphasis (p. 1501) or Performance Emphasis (p. 1504))

This program has two emphases or tracks. The pedagogy emphasis entails private lessons, voice literature, opera, vocal pedagogy, supervised student teaching and a full recital. The performance emphasis entails private lessons, voice literature, opera, vocal coaching, vocal pedagogy, and a full recital supported by carefully researched program notes. For students whose undergraduate work has not included a public recital, presentation of a 30-minute recital is required before work on the

graduate recital may begin. Weekly coaching classes as well as studio and performance classes offer frequent performance opportunities.

Graduate students majoring in Music Education may study voice as a primary instrument. The program culminates in a graduate recital of 30 to 50 minutes of singing. Weekly studio and performance classes offer frequent performance opportunities.

Undergraduate and graduate students may elect to study voice for credit toward their degrees if it is not otherwise a specific requirement. Instruction is in the form of private lessons and an extra tuition fee is assessed. There are no specific entrance or jury requirements. Elective lessons are provided on a space-available basis to qualified students.

Voice Pedagogy: Classical Track Online (p. 1508) or Musical Theater Track Online (p. 1511)

Westminster's Master of Voice Pedagogy program is offered entirely online and is specifically designed to serve the needs of professional singers, voice teachers, school music teachers, and voice coaches who want advanced training in the art and science of voice teaching.

General Policies

Undergraduate Students Taking Graduate Courses

Students who are eligible to take CAS graduate courses during their senior year must have a minimum cumulative GPA of 3.0. Under most circumstances, up to six credits of graduate courses may be taken as an undergraduate and would be included in the regular, full-time tuition fee. These credits may be applied to the undergraduate degree requirements, including in the calculation of undergraduate GPA. Should the student matriculate into the CAS graduate program, these credits, but not the grades, would be subsequently transferred to the graduate transcript.

Adult Services and Behavioral Gerontology Certificate

Overview

Individuals aged 22+ represent the fastest growing segment of the population within the Autism spectrum disorder (ASD) community, and although funding is limited, the need for services related to employment, secondary education, recreation, leisure, community integration, daily living, retirement planning, etc. is not diminished. Furthermore, there is a paucity of information about the emerging applications for ABA as individuals with ASD—a neurodevelopmental disorder—start to encounter the effects of aging and neurodegeneration, such as dementia, ataxia, and Parkinson's Disease.

This 12-13 credit certificate explores the wide variety of important issues that individuals with ASD—as well as their families and the clinicians and other service providers who work with them—face across the lifespan, from the transition to adulthood through retirement.

Requirements for the Adult Services and Behavioral Gerontology Certificate

(12-13 credits)

Admission Requirements

To be admitted into the certificate program, students must meet one of the following conditions:

1. You are a current master's program student and have completed PSY 510; or
2. You are a professional returning for continuing education and are a BCaBA, BCBA, BCBA-D in good standing.

Code	Title	Credits
Required Courses:		
PSY 540	Aging, Health, and Behavioral Gerontology in Autism	3
PSY 541	Employment and Vocational Skills for Adults with Autism	3
PSY 542	Support Services, Habilitation, and Independent Living for Adults with Autism	3
PSY 543	Practicum in Applied Behavior Analysis for Adults with Autism	3-4
Total Credits		12-13

Courses and Descriptions

PSY 540 Aging, Health, and Behavioral Gerontology in Autism 3 Credits

The course provides an overview of adult lifespan development, aging in the autism population, physical and mental health issues for adults with autism, and recent research in behavioral gerontology. Students will have the opportunity to practice reviewing, discussing, and interpreting research methodology, results, and potential areas for future research. This course is part of the Adult Services and Behavioral Gerontology sequence designed to prepare graduate students and behavior analysts for careers focused on serving adults with autism spectrum disorders (ASD).

Prerequisite(s): PSY 510 or BCaBA or BCBA certified professionals in good standing.

PSY 541 Employment and Vocational Skills for Adults with Autism 3 Credits

This course will provide an overview of the skills and competencies that influence the acquisition and maintenance of competitive employment for adults with developmental disabilities. Topics will include vocational planning, the importance of choice when selecting employment opportunities, social competence on the job, the development and implementation of support strategies, programming for the generalization and maintenance of work behavior, fading supervision and support, and collaborating with parents, family members, co-workers, and employers. Students will use information obtained from lectures and reading assignments to design and write individualized programs addressing employment and life-skills for adults with disabilities. This course is part of the Adult Services and Behavioral Gerontology sequence designed to prepare graduate students and behavior analysts for careers focused on serving adults with autism spectrum disorders (ASD).

Prerequisite(s): PSY540.

PSY 542 Support Services, Habilitation, and Independent Living for Adults with Autism 3 Credits

This course covers 1) extant services and resources for adolescents and adults with ASD, 2) supervision, management, and training of support staff who work with adults with ASD, and 3) assessment and teaching of skills adults with ASD need to live independent, self-sufficient, and fulfilling lives. Throughout the course we pay special attention to issues surrounding personal liberties, choice making, and self determination. Students will have the opportunity to navigate support services, propose empirical research focused on training staff using Behavioral Skills Training, and construct individualized skill acquisition programs. This course is part of the Adult Services and Behavioral Gerontology sequence designed to prepare graduate students and behavior analysts for careers focused on serving adults with autism spectrum disorders (ASD).

Prerequisite(s): PSY 540.

PSY 543 Practicum in Applied Behavior Analysis for Adults with Autism 3-4 Credits

This course is part of the Adult Services and Behavioral Gerontology sequence designed to prepare graduate students and behavior analysts for careers focused on serving adults with autism spectrum disorders (ASD). Students will have frequent, direct, onsite supervision of behavior analytic activities in settings for adults with autism. Students will have the opportunity to apply the skills acquired in coursework.

Prerequisite(s): PSY 540, PSY 541, PSY 542.

Applied Psychology (M.A.)

Program Overview

The Master of Arts in Applied Psychology: Applied Behavior Analysis (ABA) is intended to provide students with theoretical and practical knowledge in applied behavioral psychology while also providing general understanding of how psychology relates to ABA practice.

Applied behavior analysis is the application of the science of motivation and learning to describe, explain, predict, and change individual behavior.

ABA is used in educational settings, organizational settings (e.g., job training, performance assessment, task analysis and training), behavior change related to health outcomes (e.g., compliance with medication, addictions, feeding problems, exercise, etc.) and most often in interventions with individuals with autism spectrum disorders or other developmental disabilities.

Mission Statement

The Master of Arts in Applied Psychology: Applied Behavior Analysis (ABA) prepares students to excel in professional careers as scientist-practitioners. By challenging students to use a scientific lens when creating and evaluating clinical interventions, and to use an applied lens when designing research, this program will ensure that students are prepared to achieve success in behavior analytic employment, or to pursue further education upon completion of the program.

National Certification in Behavior Analysis

The Association for Behavior Analysis International (ABAI) has verified Rider University's ABA core course sequence as providing the content hours under the Behavior Analyst Certification Board, Inc. (<http://www.bacb.com/>)® (BCBA) 5th Edition Task List and meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst Examination®. Applicants will have to meet additional requirements to qualify.

Admission Status

Upon completion of the steps in the application procedure, the applicant will be assigned to one of the following classifications once admitted:

Graduate Standing

- The student is qualified to undertake graduate study and must apply for matriculated status when eligible;

Conditional Standing

- The student either has not satisfied all of the admission requirements or has not completed all of the undergraduate preparatory requirements or both and may be permitted to engage in studies during a probationary period;

Special Standing

- The student does not plan to matriculate in a Rider graduate degree.

Transfer of Credits

Upon acceptance to the Master of Arts in Applied Psychology: Applied Behavior Analysis program, students may request transfer of up to nine semester hours of graduate credits completed at an accredited institution. These credits must have been earned within six years of the date of credit transfer approval. All transfer credits must be approved by the Applied Psychology Steering Committee. Courses accepted for transfer must be similar to required or elective courses that are approved for the respective program, and a grade of at least "B" must have been earned in each of these courses.

Academic Standing

A minimum grade of "B" is required to obtain credit toward graduation. A grade of "B-" or lower will not count toward graduation credits. A GPA of 3.0 must be maintained to remain in good academic standing. Students whose GPA falls below 3.0 will be placed on Conditional Standing.

Course Repeat Policy

Students may not repeat any graduate course for credit that they have already taken, except a course in which they have received a grade lower than "B" or one from which they withdrew. Any exceptions must be approved by the department chair.

Dismissal

Rider University reserves the right to dismiss any student when, in the judgment of the faculty or the officers of Rider, such action seems advisable. Any of the following situations will result in the automatic dismissal of a student working toward a graduate degree or certification program in Applied Psychology:

- Receiving two grades of "B-" or lower in two graduate courses;
- Not attaining a grade point average of 3.0 after taking 12 or more graduate credits at Rider University;
- Failure to complete the program within the required 6 years.

Graduation Requirements

To graduate, students must have completed all the requirements for the degree within 6 years of enrolling in the program, have a GPA of 3.00 or higher, and have submitted the degree application for graduation form to the Dean's office.

Graduation with Distinction

Students who graduate with an overall grade point average of 3.85 or higher are designated as graduating with distinction. This term appears on the student's official transcript, below the student's name in the commencement program, and on the diploma.

Electives		
Select four of the following courses:		12

PSY 501	Introduction to Applied Psychology Skills
PSY 518	Organizational Behavior Management
PSY 522	Recent Research in ABA
PSY 530	Interventions for Individuals with Developmental Disabilities
PSY 533	Interventions for Autism
PSY 535	Language Assessment and Intervention
PSY 536	Social Skills Assessment & Intervention
PSY 550	Behavior Analytic Approaches to Health and Physical Activity
PSY 551	Behavioral Appro to Addiction
PSY 577	Developmental Psychopathology
PSY 595	Selected Topics in Applied Psychology ¹
PSY 690	Independent Research and Study
Thesis (optional - replaces 2 electives) ²	
PSY 700	ABA Thesis I
PSY 701	ABA Thesis II
PSY 702	ABA Thesis III
Optional Course (3 additional credits) ³	
PSY 720	Practicum in ABA
Total Credits	36

¹ Topics change each semester. Students may take up to 12 credits in Special Topics courses.

² Students opting to complete a thesis will take a minimum of 37 credits.

³ Students opting to complete a practicum will take an additional 3 to 6 credits.

Accelerated Masters Overview

The Accelerated option for the Masters in Applied Psychology, Applied Behavior Analysis concentration is designed for students who wish to combine undergraduate study in psychology leading to a Bachelor's of Arts degree with graduate study leading to a Masters of Arts in Applied Psychology.

The admission process for this program ensures that only capable students are enrolled. Freshman students are encouraged to seek advice about the program from their advisor and the program coordinator. The following courses must be completed if the student intends to apply to the program:

- PSY 212 Intro to Applied Behavior Analysis
- PSY 299 Field Placement in Applied Behavior Analysis. This course is intended to assist the student in determining if the program is a good match for them.

During the first semester of the junior year, the student will formally apply to the Applied Psychology program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Applied Psychology program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- Two letters of reference from professors or supervisors of relevant work or internship experience;

- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the Applied Psychology program;
- An interview with faculty from the Applied Psychology program; and
- Completion of required 200 level courses.

Students accepted into the Applied Psychology program at the end of their junior year will complete one graduate level elective course during each semester of their senior year.

Additional Applied Behavior Analysis courses are offered at the undergraduate level. While not required, it is recommended that students accepted into the Applied Psychology program as an accelerated student take the following:

- PSY 339 Research Methods in Applied Behavior Analysis
- PSY 388 Learning and the Experimental Analysis of Behavior
- PSY 389 Professional Issues in ABA

Students will be awarded the BA degree when they complete the requirements for that degree in psychology. The MA will be awarded upon completion of the Applied Psychology graduate program requirements.

Academic Plans of Study

The following educational plan is provided as a sample only. Students may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

PSY 510 Introduction to Applied Behavior Analysis 3 Credits

This course will provide an introduction to applied behavior analysis. Students will learn the history and defining features of the field. Due to the scientific nature of applied behavior analysis, students will also learn characteristics and processes associated with the scientific method. Furthermore, foundational concepts will be defined, along with relevant behavior change procedures.

PSY 511 Principles of Learning 3 Credits

This course will provide students with more in depth understanding of the philosophical assumptions, characteristics and basic principles of behavior analysis. Students will have the opportunity to review concepts learned during Introduction to Applied Behavior Analysis. This course will also provide an introduction to the basic research in behavior analysis. Students will become more fluent in definitions, characteristics, principles, processes, and concepts of behavior analysis.

Prerequisite(s): PSY 510.

PSY 513 Functional Assessment 3 Credits

This course is designed to provide knowledge and skills of methodologies to conduct a thorough behavioral assessment, interpret the assessment data, and identify goals for treatment. Topics will include direct observation/data collection methods, data analysis, functional assessment, stimulus preference and reinforcer assessments, and ethical and professional issues. The second half of the course will deal specifically with functional analysis including the history of and variations to the methodology. The relationship between assessment techniques and the development of the least-restrictive but most effective behavioral intervention will also be discussed.

Prerequisite(s): PSY 510, PSY 511.

PSY 514 Single Subject Research Design and Analysis 3 Credits

Students will be introduced to the basic evaluative methods used in behavior analysis including various models of single subject design such as multiple baselines, reversal designs, and alternating treatment models. Students will design analyses, collect data, graphically display their data, and provide an analysis of findings. Students will read original behavior analytic research articles and practice analysis of findings.

PSY 516 Ethics for Behavior Analysts 3 Credits

This course will familiarize the student with ethical issues and responsibilities of behavior analysts working in applied settings. Informed consent, due process, protection of confidentiality, and selection of least intrusive, least restrictive behavior change procedures will be presented and discussed within the context of case method. Ethical decision making processes will be emphasized, and the relationship between ethics and law will be explored.

PSY 518 Organizational Behavior Management 3 Credits

This course will provide an overview of research and practice in the field of Organizational Behavior Management (OBM), also referred to as Performance Management in organizational settings. Performance Management is a behaviorally-based area of specialization within the broad field of Industrial-Organizational Psychology. The concepts and techniques used in Performance Management originated from the field of behavior analysis.

PSY 519 Models of ABA Instruction 3 Credits

This course provides students with a general knowledge of the different procedures used to teach new skills and new behaviors in the field of applied behavior analysis. Areas covered will include the assessment of relative strengths and deficits, use of discrete-trial and naturalistic teaching procedures, use of reinforcement procedures to strengthen behaviors, use of motivating operations and discriminative stimuli, use of prompting and prompt-fading procedures to transfer stimulus control, use of shaping procedures to teach new behavior, use of task analysis and chaining procedures to teach new behaviors, use of precision teaching and fluency-based instruction, and use of personalized systems of instruction. Additionally, various components of the aforementioned areas will be integrated and culminate in two modules: one designed to teach communicative behavior and the other to perform discrimination training.

Prerequisite(s): PSY 510.

PSY 520 Interventions for Challenging Behavior 3 Credits

Students will review principles of behavior in the context of application to functional assessment and treatment of socially significant problem behavior. Topics including extinction, functional communication training, differential reinforcement, choice, environmental manipulations, and punishment will be covered. Students will move through the process of developing function-based interventions and writing behavior plans.

Prerequisite(s): PSY 510 and PSY 513 (or co-req).

PSY 521 Supervision and Management in ABA 3 Credits

This course provides students with skills needed to provide supervision and management in the field of applied behavior analysis. Students will apply the basic principles of behavior analysis to supervision and management of their staff and trainees. Areas covered include establishing performance expectations, selecting supervision goals based on assessment of current skills, how to train personnel to competence, performance monitoring and feedback, functional assessment and function-based strategies of personnel behavior, and how to evaluate the effects of supervision. Additional areas of discussion will include professional behavior, leadership, ethics, and professional development.

Prerequisite(s): PSY 510, PSY 511, PSY 513 and PSY 514.

PSY 522 Recent Research in ABA 3 Credits

This course provides an overview of recent behavior analytic research. Topics will vary semester to semester to capture changes in the field as they occur. Students will have the opportunity to practice reviewing, discussing, and interpreting research methodology, results, and potential areas for future research.

Prerequisite(s): PSY 510.

PSY 550 Behavior Analytic Approaches to Health and Physical Activity 3 Credits

The application of behavior analytic methods, practices, and principles has been demonstrated through research and clinical applications to be effective at changing health and fitness behavior. This course will provide an overview of research and practice in applying behavior analytic principles to changing health behavior and physical activity. Behavior change across various populations will be covered including both adults and children with and without disabilities. Discussion will focus on both functional assessment as well as interventions effective at changing health and physical activity including self-management, self-monitoring, goal setting, contingency management, etc. Students will spend the semester implementing self-management projects for their own health and/or fitness behavior.

PSY 551 Behavioral Appro to Addiction 3 Credits

Evidence from laboratory and clinical settings suggests that addiction can be conceptualized and effectively treated through the application of principles of conditioning. This course provides an overview of behavior analytic research in understanding and intervening on addictive behavior. Behavioral technologies for change regarding substance-related and behavioral addiction will be covered.

Prerequisite(s): Graduate students in Applied Psychology.

PSY 595 Selected Topics in Applied Psychology 3 Credits

Students will actively engage in an in-depth inquiry into a special topic area concerning applied psychology. Though the topics will change, students will be required to read and discuss current literature as well as considering the application of tools of the discipline to research questions of their own.

PSY 690 Independent Research and Study 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of Instructor.

PSY 700 ABA Thesis I 1 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 701 ABA Thesis II 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 702 ABA Thesis III 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 720 Practicum in ABA 3 Credits

The Master in Applied Psychology - Applied Behavior Analysis (MAP-ABA) program's practicum offers students supervision from Rider's MAP-ABA faculty and a variety of high quality in-vivo experiences, under the direct supervision of a Rider-Approved Board Certified Behavior Analyst (BCBA), during which students apply the skills acquired in coursework.

Prerequisite(s): PSY 510, PSY 511.

Arts Management and Executive Leadership

Overview

Arts Management and Executive Leadership (AMEX) marries your passion for arts, culture and entertainment with vision-centric, mission-driven executive skills and leadership capacity development to help you become a dynamic leader, advancing & ensuring the future of arts as vital and integral to the future of communities, our nation and the world. Opportunities abound for satisfying and rewarding careers in managing & leading arts, culture and entertainment - whether in the growing nonprofit or for-profit/commercial sectors. There are over 4.8M jobs in the management sector of arts & entertainment (U.S. Labor Statistics), and the industry has consistently demonstrated slow but steady upward momentum, even as economic and other challenges hit. Rider's Master of Arts in Arts Management and Executive Leadership affords graduates critical executive-level knowledge and skillsets to succeed in leading departments, divisions and institutions from deeply-rooted vision, high-impact mission, and sound strategic planning & application perspectives vital to the success of the field and of yourself as a dynamic arts leader. Established, experienced executives working at significant institutions around the nation are unique to our balanced delivery of practical and theoretical coursework which prepares you for a creative sector in need of pragmatic visionaries.

Arts Management and Executive Leadership M.A. Program Requirements

(33 credits)

Code	Title	Credits
The following courses are prerequisites and must be completed (or waived ¹ or tested out of ²) before taking any other courses in the program:		
AMEX 500	Managing Arts & Institutions - Principles & Practice	3
The following courses are intended to be completed in the sequence below:		
AMEX 509	Intersecting Arts and Law	3
AMEX 512	Advancing Arts & Institutions	3
AMEX 515	Advocating Arts & Institutions	3
AMEX 518	Engaging Arts & Institutions	3
AMEX 521	Surveying Arts Institutions	1.5

AMEX 524	Leading & Governing Arts Institutions	3
AMEX 590	Synthesizing Arts Management	1.5
AMEX 593	Applying Arts Management	3
The following non-AMEX courses may be taken at any time throughout the program:		
LEAD 500	The Practice of Leadership	3
PMBA 8020 or LEAD 540	Fundamentals of Accounting Strategic and Financial Decision-Making in Organizations	3
PMBA 8270	Adv. Organizational Behavior	3
Total Credits		33

¹ Candidates who have successfully completed AAD 121, AAD 202 and AAD 203 may be waived from completing one or more of these prerequisite courses by the program director and dean. Inquire about this option with Graduate Admissions.

² Candidates who demonstrate considerable professional work or training in one or more of the prerequisite areas may be able to test out of one or more prerequisite courses by approval of the program director and dean. Inquire about this option with Graduate Admissions.

Courses and Descriptions

AMEX 500 Managing Arts & Institutions - Principles & Practice 3 Credits

Provides survey of key challenges and opportunities in institutional planning and development, strategy, organization, marketing, fund development, budgeting, leadership and governance in arts institutions, with a particular focus on nonprofit arts. Vision-centric, mission-driven, integrated management perspectives are applied to case-based research, analysis and reporting, supported by multiple assigned readings and required online discussion posts. This course is a pre-program requirement for the MA in Arts Management and Executive Leadership degree. Students who have successfully completed AAD 121 (or similar, at another undergraduate program) as an undergraduate may be waived from completing this course by the program director and dean.

AMEX 509 Intersecting Arts and Law 3 Credits

Intersecting Arts & Law explores multiple, diverse cases and conclusions which have impacted and continue to shape the arts. Masters candidates compare and contrast past and present legal cases, statutes and mandates on a host of issues ranging from artistic expression as hate or sex speech to the rights and responsibilities of artists and institutions pursuant to ownership and rights of dissemination. Current legal standing and its evolution, essential tools, trends and best practices will be assessed via case-based research and reporting grounded in comparative analysis of historical, contemporary and prescient topics relating to the intersections of law and artistic rights and freedoms.

Prerequisite(s): AMEX 500.

AMEX 512 Advancing Arts & Institutions 3 Credits

This course will provide integrated strategies for long-term fund development, sustainability, and legacy building in the arts. Funding and other stakeholder-driven advancement follows vision and, in an industry that relies heavily on stakeholder investment to propel artistic and programmatic success, the need for strong vision-driven leadership is critical. Building upon foundational information delivered in AMEX 500, the course explores and assesses multiple, diverse approaches to vision-centered, mission-driven institutional advancement and fund-development from all philanthropic sectors impacting the nonprofit arts. Students will read about and discuss executive and managerial strategies and application of current tools, trends and best practices employed in fund development planning and program implementation, assess and address institutional readiness as part of an integrated systems approach to management, understand how to develop an effective case for giving, and how to build and maintain invaluable donor relationships across multiple sectors. Learning what inspires and guides donor processes and giving practices further informs discussion. Readings, strategic prompt posts and responses and regularly-scheduled online discussion will proactively engage candidates in essential topics relating to course goals/outcomes and advance vision-centered, mission-driven, strategically-oriented best practices for Arts leaders/executives.

Prerequisite(s): AMEX 500 or permission of program director and dean.

AMEX 515 Advocating Arts & Institutions 3 Credits

This course will discuss the legal, societal and ethical perspectives on arts policy, practice, and procedures in the workplace. Arts often reflect, challenge and at times define social, political and ethical constructs and push the envelope on what is acceptable – aesthetically, morally and otherwise – in contemporary society. Explore the ever-evolving relationship of arts and society through the lens of institutional responsibility as interpreted by the artist, the law, and by contemporary civic and social considerations. Masters candidates will research and discuss key historical moments and movements which have impacted the arts and institutional governance and administration; current legal, social and ethical issues impacting artistic expression and institutional leadership today; and key policy decisions past, present and under consideration which impact the ways by which institutions make and disseminate art, govern themselves, and carry out key administrative functions. Case-based comparative research and analysis of effective leadership initiatives, policies and best practices around key legal, social and ethical issues impacting institutions further informs discussion and the development of a comprehensive institutional responsibility proposal for an arts institution with which each student will align him or herself.

Prerequisite(s): AMEX 500.

AMEX 518 Engaging Arts & Institutions 3 Credits

This course provides an integrated approach to vision-centric, mission-driven community building, audience development, and engagement in the arts. In a time when active participation in live arts is challenged with multiple and ever-advancing competing arts and entertainment options, platforms and pricing structures, the ability and wherewithal for arts institutions to effectively get their message through is more essential than ever. Building upon foundational information delivered in AMEX 500, this course explores challenges and opportunities in winning the hearts and minds of a diverse, often fickle and ever-changing demographic, psychographic and socio-economic public, engaging them in new and meaningful ways. Masters candidates research and discuss the importance of vision, mission and integrated management approaches to branding and messaging; trends in audience participation; efficacy of traditional and contemporary approaches to institutional branding, audience development and community-building around the arts; evolving modes and tools for effectively identifying, programming for, marketing to and engaging diverse audiences; efforts to integrate live arts and new technologies to market, and expand access to and engage audiences in the arts in new ways. Case-based comparative research and analysis of effective branding and marketing campaigns further informs discussion and the development of a comprehensive market analysis and brand expansion proposal for an arts institution with which each student will align him or herself.

Prerequisite(s): AMEX 500.

AMEX 521 Surveying Arts Institutions 1.5 Credits

Comprehensive, case-based assessment of significant institutions, institutional governance & leadership as a means of guiding final synthesis and capstone development.

Prerequisite(s): AMEX 500.

AMEX 524 Leading & Governing Arts Institutions 3 Credits

This course will discuss strategic methods, analytical approaches, and best practices for arts executives, board members, and stakeholders. Strategic, adaptive, entrepreneurial governance and management of arts institutions is essential for long-term survival and success, particularly in ever-shifting social, political, economic and technological landscapes. Building upon foundational information delivered through all prior coursework, this course explores the roles, relationships and responsibilities of institutional leaders and how strategic approaches to defining roles, finding and keeping the right people to fill them, strengthening the relationships and identifying and fulfilling responsibilities at all levels drives success. Graduate candidates research, compare and contrast leadership styles, tools and best practices in ethically and responsibly governing and managing institutions, with particular consideration given to the specific needs of the nonprofit arts. Topics of discussion and debate will include ethics and aesthetics, diversity and equity, arts and civic responsibility, and freedom and constraint in strategically planning, governing and managing the production and dissemination of art. Multiple case-based analytical studies resulting from in-depth, thesis-oriented governance and/or leadership focus surveys developed throughout the program further inform discussion and the development of a comprehensive leadership strategy for an arts institution with which each student will align him or herself. Requires participation in a full-day Board and Executive Management Leadership Seminar/Workshop intensive on the Rider campus at end of the session.

AMEX 590 Synthesizing Arts Management 1.5 Credits

Capstone (Thesis or Leadership Project) research, analysis, orientation & preparation in context of all prior coursework. This course involves thesis research and analysis, thesis development and writing application OR* project research and analysis, project development, management and reporting. *Capstone option (thesis or leadership project) is chosen in coordination with graduate capstone advisor and upon approval by WCA Dean.

Prerequisite(s): AMEX 521.

AMEX 593 Applying Arts Management 3 Credits

This course represents the graduate capstone requirement and is taken subsequent to the preparatory "Synthesizing Arts Management" (AMEX 590) course wherein the graduate candidate will identify, design, prepare for and subsequently complete either a traditional, written graduate thesis path of completion or an in-depth, comprehensive leadership project - either option upon approval, and under advisement of, program director and designated faculty member.

Prerequisite(s): AMEX 524.

Master of Choral Pedagogy

Program Overview

The Master of Choral Pedagogy curriculum includes courses in voice science, choral rehearsal pedagogy, choral literature, and music education. It emphasizes the process of rehearsing, the psychology of learning, and educational philosophy. At least one course required to fulfill this degree is offered online each semester. Coursework is also offered during Westminster's six-week Summer Session, allowing degree candidates to maintain performance schedules and teaching jobs during the year. Students may also take part in the numerous summer workshops offered through Westminster Continuing Education, including the Choral Institute at Oxford.

Curriculum Overview

The Master of Choral Pedagogy curriculum includes courses in voice science, choral rehearsal pedagogy, choral literature, and music education. Unlike traditional conducting degrees, the curriculum emphasizes the process of rehearsing, the psychology of learning, and educational philosophy.

Music History (MH) or Theory (TH) elective course		3
Core Elective		3

The core elective selected must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis, and/or area of applied study.

Free elective	3
Total Credits	31

¹ CR 627 and CR 628 may not be taken more than once for credit.

Courses and Descriptions

CR 524 Vocal Techniques for Choirs 3 Credits

Study of vocal techniques appropriate for use in choral rehearsals and for teaching class voice. Techniques for effecting change in group vocal productions are discussed, including such topics as the identification of group vocal problems and mental and physical preparation of a group for good vocal production. Techniques to be developed include (1) how to communicate information about vocal technique to amateur singers, (2) exercises used to develop choral sound by improving diction, dynamics, legato, staccato, martellato, high and low registers, resonance, vowel modification, etc., (3) how to train singers to use a vocal production specifically appropriate to the repertoire of various style periods and the demands of individual composers, and (4) conducting methods for good choral and vocal training. Recommended both for conducting majors and for students in other major programs, including those for whom the voice is not the primary performance medium.

CR 621 Choral Conducting I 3 Credits

A study of conducting to develop technique through facial expression, breathing, alignment and gesture. Emphasis is placed on developing and refining a process of score study. This course will assist conductors in evaluating their conducting and preparing them to make conducting decisions based upon score study.

CR 625 Choral Pedagogy 3 Credits

This online course reorganizes the components of choral rehearsal technique to reflect a harmonic approach to rehearsing, teaching, and learning. It is designed to emphasize the importance of teaching audition and rehearsing choirs within a harmonic context.

CR 627 Choral Literature I 3 Credits

A broad survey of choral repertoire from Gregorian chant to present-day compositions. Emphasis is placed upon knowing the availability and sources of music of major composers and of music appropriate for performance in today's churches and schools.

CR 628 Choral Literature II 3 Credits

A study of selected major choral works, involving analytical and stylistic study. Oral reports by class members on assigned topics.

CR 750 Choral Pedagogy Capstone 3 Credits

Independent research leading to a completed capstone project such as pedagogical publication or presentation, development of an original or unique method of instruction, instructional materials, or case study, or musical performance. The project must be approved by the department.

ME 682 Choral Music Education 3 Credits

This course is designed to assist choral music educators to improve their pedagogical effectiveness. This course will provide students with the knowledge, skills and dispositions necessary for developing comprehensive musicianship in the choral ensemble setting through the study of creating original music, responding to music, connecting to students and performing vocal/choral music with a primary focus on choral pedagogy, curriculum development, unit and rehearsal planning, programming, vocal development, program management, music literacy pedagogy, music technology and assessment.

ME 692 Social Justice in Music Education: History, Philosophy, and Practice 3 Credits

The purpose of this course is two-fold. First, the course will explore the historical perspectives that have significantly shaped and informed music teaching and learning within American public education during the last century. Second, students will encounter, engage with, and interrogate philosophies and theories of practice from social justice perspectives in order to critically consider the place and purpose of music and music education within educational and societal contexts.

ME 721 Curriculum Development & Evaluation 3 Credits

This course examines the relationship between curriculum theory and philosophy of music education. Through the study of traditional and contemporary models of curriculum development and evaluation, students broaden their understanding of curriculum as it impacts the learning process. Post modern theory consistent with the Department's commitment to Critical Pedagogy for Music Education provide the focal point for the development of curricula that enhance and support quality music education. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

ME 723 Social, Emotional, and Musical Learning 3 Credits

This course examines topics in psychology of music from the lens of social emotional learning. This theoretical lens will allow students to find the relationships between music-making as social and cultural practices and the development of individual and collective psychological process in music teaching and learning. Major topics include affective and physiological responses to music, musical enculturation, learning theory, well-being and wellness, musical aptitude, developmental processes, and motivation. Students will discuss literature in the psychology of music with applications to K-12 music classes and rehearsals and conduct a pilot study in an area of interest based upon knowledge from the literature.

ME 771 Critical Pedagogy for Music Ed 3 Credits

This course presents the fundamental concepts, contexts and constructs that define Critical Pedagogy for Music Education. It focuses on the application of critical theory as a philosophical perspective to inform decisions teachers make when planning instruction for their students.

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

SM 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity. Offered in rotation with other Sacred Music electives. 3 Credit hours.

SM 710 Panorama of Sacred Music 3 Credits

This graduate-level course is a one-semester survey of those masterworks and significant musical movements that have shaped the evolution of Western Sacred Music. Beginning with the Old Testament, this course will move through all eras, highlighting important composers and liturgical trends, placing them in their appropriate cultural and theological contexts.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 724 Voice Pedagogy II: Methods 3 Credits

A comparative study of various pedagogical methods and ideals. A wide range of important historical and contemporary pedagogy treatises is reviewed. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student.

Master of Music: Choral Conducting

Program Overview

The graduate conducting program trains conductors to be creative, thoughtful, and technically proficient musicians. Students are admitted by audition. Opportunities for choral performance on a professional level are unparalleled.

Curriculum Overview

Graduate conductors take a core curriculum of research, literature, conducting, pedagogy, and ensemble. One year of choral literature is followed by elective courses in performance practice, seminars in choral literature, analysis, vocal pedagogy and related topics. The conducting sequence includes two semesters of choral conducting courses followed by two semesters of applied study. Students conduct a series of four to five recitals culminating in a major recital project with one of Westminster Choir College's core ensembles.

Ensemble singing is a key element of the curriculum. Students sing in a range of large and small ensembles. Learning repertoire through performance is a key tenet of Westminster Choir College. Please see the graduate programs webpage (<https://www.rider.edu/academics/colleges-schools/westminster-college-arts/wcc/graduate/>) for additional information.

² The core elective must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis, and/or area of applied study.

³ Suggested electives include CR 524, CR 710, CR 681, CR 624, ME 540, ME 591, SM 621.

Academic Plan of Study

Last Edited: Nov 17, 2021 10:17am

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

CR 505 Advanced Conducting 3 Credits

A continuation of the conducting studies begun in CR 215 and CR 315, this course aims to be more student-centered, following the process from repertoire planning to the final performance. Intensive score preparation, advanced rehearsal techniques, performance practice and baton technique.

Prerequisite(s): CR 315.

CR 509 Symphonic Choir 1 Credits

A large mixed chorus comprised of students above the lower division, including graduate students from all disciplines. The ensemble regularly performs in the region and focuses on the major choral/orchestral repertoire along with a wide variety of repertoire for large mixed chorus. Placement hearing required.

CR 511 Westminster Choir 1 Credits

A highly select ensemble that performs and records a wide variety of choral repertoire, the Westminster Choir regularly tours nationally and internationally, and aspires to the highest professional standards. Members are selected by audition from all Westminster students above the freshman level. The requirements for selection include good academic standing, strong musicianship, and superior vocal talent. Auditions are held in the fall semester and students participate for the academic year.

CR 513 Williamson Voices 1 Credits

A chamber choir with a unique mission that combines performance and outreach education. Repertoire is chosen from a broad spectrum of literature, including world music and contemporary choral works. Auditions are held in the fall semester and students participate for the academic year.

CR 515 Westminster Kantorei 1 Credits

An early music vocal chamber ensemble specializing in music before 1750, with occasional forays into more contemporary repertoire. [Although the ensemble will generally consist of around 16 singers, the exact make-up of the ensemble will vary from semester to semester, depending on the works to be studied and performed.] Repertoire will include works for vocal ensemble and works featuring significant solo work. The entire ensemble will rehearse three hours per week. Keyboardists may audition for the ensemble. Auditions are held in the fall semester and students participate for the academic year.

CR 517 Master Singers 1 Credits

A mixed ensemble serving as the choir for Graduate Conducting, Sacred Music and Music Education majors. Repertoire consists of a wide variety of choral works drawn from all style periods, works appropriate for use in churches and in schools at the secondary and post-secondary levels. Four semesters are required for all graduate Choral Conducting majors. Two semesters are required for Sacred Music majors, and those Music Education majors who have selected conducting as their performance field. This ensemble is non-auditioned and open to all students.

SM 519 Concert Handbell Choir I 1 Credits

A choir selected by audition from the most experienced and capable bell ringers among the student body at large. This ensemble utilizes advanced repertoire and techniques, aiming primarily at presenting concerts both on and off campus, including a two-week annual tour.

CR 524 Vocal Techniques for Choirs 3 Credits

Study of vocal techniques appropriate for use in choral rehearsals and for teaching class voice. Techniques for effecting change in group vocal productions are discussed, including such topics as the identification of group vocal problems and mental and physical preparation of a group for good vocal production. Techniques to be developed include (1) how to communicate information about vocal technique to amateur singers, (2) exercises used to develop choral sound by improving diction, dynamics, legato, staccato, martellato, high and low registers, resonance, vowel modification, etc., (3) how to train singers to use a vocal production specifically appropriate to the repertoire of various style periods and the demands of individual composers, and (4) conducting methods for good choral and vocal training. Recommended both for conducting majors and for students in other major programs, including those for whom the voice is not the primary performance medium.

CR 607 Conducting Performance 1 Credits

Graduate Conducting, Sacred Music and Music Education students (with a conducting concentration) enroll for Conducting Performance in the semester of their recital or major conducting project.

CR 621 Choral Conducting I 3 Credits

A study of conducting to develop technique through facial expression, breathing, alignment and gesture. Emphasis is placed on developing and refining a process of score study. This course will assist conductors in evaluating their conducting and preparing them to make conducting decisions based upon score study.

CR 622 Choral Conducting II 3 Credits

In addition to building on the conducting skills taught in Conducting I, this course will focus upon acquisition of a broad range of rehearsal methods and techniques and gaining a comprehensive knowledge of choral ensemble warm-up philosophies, methods and techniques. Conductors will continue to study various approaches to score analysis that aid in preparation for rehearsal. Participants in the course will be required to submit a comprehensive case study which focuses on rehearsal technique and rehearsal procedures.

Prerequisite(s): CR 621.

CR 624 Conducting Skills 3 Credits**CR 628 Choral Literature II 3 Credits**

A study of selected major choral works, involving analytical and stylistic study. Oral reports by class members on assigned topics.

CR 641B Conducting Primary 1 Credits**CR 641D Conducting Primary (Elective) 1 Credits****CR 641F Conducting Primary 1 Credits****CR 681 Baroque Performance Practice 3 Credits**

A practical and theoretical study of issues of Baroque performance practice, including tempo, phrasing and articulation, ornamentation, rhythmic alternation, qualities of sound, continuo practice, influence of dance, affect and national idioms. Primary source materials will serve as the basic core of readings for the course, supplemented and supported by recordings and contemporary resources. In the later half of the semester, students will perform in a series of master classes.

Prerequisite(s): for undergraduates MH 248, TH 241.

CR 690 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

CR 710 Seminar in Choral Literature 3 Credits

An intensive study of a specific area of choral history and literature. The content of this course will vary from semester to semester with the special interests and qualifications of the professor teaching it. Emphasis is placed upon in-depth study of the selected repertoire. May be repeated for credit.

Prerequisite(s): undergraduate must have Permission of Instructor.

CR 720 Graduate Conducting Forum 1 Credits

A conducting seminar that focuses on the synthesis of gesture, score study and pedagogy. Select repertoire and research materials will be conducted, analyzed and discussed. Focus will be given to orals preparation and current choral conducting issues. This course may be repeated for credit.

ME 540 Choir Train for Young Singers 3 Credits

This course focuses on children's choirs in school, church and community. Students learn strategies to teach children good vocal technique and to build musical literacy through the study of appropriate repertoire. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

Prerequisite(s): Junior status.

ME 591 Choral Music Grades 5-12 3 Credits

This course is designed to acquaint the music educator with repertoire suitable for use with middle and senior high school choral ensembles. Representative repertoire from all periods of music will be discussed, analyzed and performed in class. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

Prerequisite(s): Junior status.

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

SM 509 Jubilee Singers 1 Credits

This auditioned ensemble is devoted to the performance of sacred music from the African-American tradition.

SM 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity. Offered in rotation with other Sacred Music electives. 3 Credit hours.

Cybersecurity (M.S.)

Program Overview

Cybersecurity is one of the most difficult and pressing challenges facing our nation, and industry, the government, and higher education are underprepared to address this threat. The M.S. in Cybersecurity will provide students with the expert knowledge and technologies needed to detect, investigate, and prevent computer-related crimes, and to examine the theory, best practices, and methodologies to conduct computer forensics investigations. There is a tremendous workforce shortage projected for well-prepared cyber professionals in New Jersey and the surrounding metro areas. Students pursuing this degree will bring to the job a powerful combination of a traditional liberal arts education with foundational knowledge and technical training needed to excel in the cybersecurity field.

Curriculum Overview

The online program allows students the flexibility to design a plan of study that meets their personal and professional needs. Online classes are delivered in a combination of synchronous and asynchronous modalities. The curriculum teaches and reinforces skills in the foundational topics of data and software security, component

and connection security, system and human security, as well as organizational and societal security. Students successfully completing this program will:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of cybersecurity.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Apply security principles and practices to maintain operations in the presence of risks and threats.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

Degree Offered:

- M.S. in Cybersecurity
- Graduate Certificate in Cybersecurity

Courses and Descriptions

CYBR 500 Beyond Code: Cybersecurity in Context 3 Credits

At its core, cybersecurity is a technical, computing-based discipline. This course explores the most important non-technical elements that shape the landscape upon which cybersecurity problems emerge and are managed. Students will assume different lenses – legal, economic, political, societal, and ethical – to better understand how different forces enable and constrain security technologies and policies. Specific topics include ethical and societal issues, policy-making, business models, legal frameworks, national security considerations, and the roles of users, industry, and government which includes the military.

CYBR 510 Cryptography for Cybersecurity 3 Credits

This course focuses on both mathematical foundations and practical applications of cryptography. The course discusses asymmetric and symmetric cryptography, Kerckhoff's Principle, chosen and known plaintext attacks, public key infrastructure, authentication protocols. The course includes a close examination of various cryptosystems including the RSA, DES, AES, Elliptic Curve, and SHA family cryptosystems. Topics include a brief history of cryptography, ciphers, digital signatures, hash functions, message authentication codes, secure e-commerce, and digital cash.

CYBR 520 Managing Cyber Risks 3 Credits

In the context of risk management, this course examines the motivating reasons behind cyber attacks and data breaches. Various risk management frameworks to measure organizational cybersecurity threats and vulnerabilities are presented. Further, students will model cybersecurity risks, using both qualitative and quantitative risk assessment methods. Students also will articulate the organizational consequences of the assessed risks along with mitigating strategies to reduce or eliminate the cyber risks.

CYBR 530 Mobile Computing and Wireless Security 3 Credits

This course examines the cybersecurity of mobile computing and wireless networking, especially the vulnerabilities, threats, and mitigation techniques. Topics include: mobile malware, wireless communications infrastructure vulnerabilities and associated mitigation techniques, mobile platform vulnerabilities and associated mitigation techniques, mobile app vulnerabilities and associated mitigation techniques, mobile device vulnerabilities and associated mitigation techniques, and organizational policies for mobile computing and wireless networking.

Prerequisite(s): CYBR 510.

CYBR 540 Secure Coding for Cyber Defense 3 Credits

This combined course of lecture and hands-on labs follows the philosophy and principles of secure and robust programming, using the Java language. The eight design principles that govern secure and robust coding will be emphasized with follow-on coding labs to apply these design methods to real-world problems. Design choices, good or bad, drive implementation in coding, so designing software security from the beginning will be practiced. Common software vulnerabilities and static analysis of code will be examined, as well as informal, formal, and ad hoc coding methods will be differentiated. Prior experience with the Java programming language is highly recommended.

CYBR 550 Cybercrime and Digital Forensics Analysis 3 Credits

Digital forensics is a hybrid science that offers a systematic approach for conducting comprehensive investigations to solve cybercrimes. In this course, students will learn the principles and techniques of digital forensics investigations to ensure court admissibility of electronic evidence, including the legal and ethical implications. Students also will also gain hands-on experience with performing proper forensic investigations with different file systems (e.g., Unix/Linux, Mac, Windows, Android) and writing appropriate forensics analysis reports.

CYBR 560 Usable Privacy and Security 3 Credits

There is growing recognition that technology alone cannot provide all of the solutions to security and privacy problems. Human factors play an important role, and it is important for security and privacy experts to have an understanding of how people might interact with the systems they develop. This course explores a variety of usability and user interface pitfalls related to privacy and security and provides experiences in designing studies aimed at helping to evaluate usability issues in security and privacy systems.

Prerequisite(s): CYBR 500.

CYBR 570 Special Topics in Cybersecurity 3 Credits

This course is used as a general placeholder for one time offerings and new courses that have not been assigned a permanent designation. The course will cover advanced and emerging topics of current interest in cybersecurity. This course code may be taken more than once as long as the topic offered is different each time.

Prerequisite(s): Permission of instructor.

CYBR 590 Independent Research and Study 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of instructor.

CYBR 591 M.S. in Cybersecurity Internship 3 Credits

The course is part of the capstone requirement for the M.S. in Cybersecurity. The course will have students complete an internship, self-evaluation, and a project related to their experience working in a cybersecurity related position. Permission of instructor.

CYBR 600 Software Vulnerability and Malware Analysis 3 Credits

This combined course of lecture and hands-on labs covers both the art and science of discovering software vulnerabilities and malware. Beginning with the foundational techniques used to analyze both source and binary code, this course will examine current threats and evaluate the actions needed to prevent attackers from taking advantage of both known and unknown vulnerabilities. The course will cover passive and active reverse engineering techniques in order to discover and categorize software vulnerabilities and malware, create workarounds to better secure the system, and demonstrate security solutions that provide protection from an adversary attempting to exploit the vulnerabilities. Techniques covered include the use of static analysis, dynamic reverse engineering tools, and fault injection to better understand and improve the security of software. Prior exposure to Intel assembly is helpful, though not required.

Prerequisite(s): CYBR 540.

CYBR 610 Cloud Computing Security and Privacy 3 Credits

This course focuses on the security and privacy issues in Cloud Computing. While the Cloud Computing paradigm gains in popularity, there are many unresolved cybersecurity issues related to confidentiality, integrity, and availability of data and computations involving the Cloud. This course examines Cloud Computing models and the associated risks, threats and vulnerabilities; focuses on sound architectural design for secure and private computing; and explores practical applications of cloud computing and the Internet of Things (IoT).

Prerequisite(s): CYBR 530.

CYBR 620 Blockchains and Cryptocurrencies 3 Credits

This combined Lecture-Lab course covers the mathematical, computational, and economic foundations of Blockchain technology, and exposes students to the societal and legal implications of a decentralized monetary system based on consensus. Students learn what cryptocurrencies are, why it is possible to make money using cryptocurrencies such as bitcoins, and why it is so volatile. Through hands-on practice with the bitcoin and Ethereum-based software platforms, students will program secure decentralized applications (Dapps), develop an understanding of cryptographic principles, and reexamine critical economic questions.

Prerequisite(s): CYBR 510.

Master of Music Education (M.M.E.)

Program Overview

Designated for music educators who want to enhance their impact, the MME program helps students to improve as educators and make positive change in their classrooms and school communities. Students design their own 12-credit "focus-area" of courses tailored to their particular interests and goals and learn skills and techniques that can be immediately applied to their current teaching or used as preparation for doctoral work. Example areas of focus include choral pedagogy, choral conducting, voice pedagogy, Kodály (with certification) and music technology.

The degree is for individuals with significant music teaching experience. Students do not earn teacher certification through this degree program.

The MME program may be completed part-time through online classes and summer study or over two academic years.

Music Education Courses Online

The following music education courses are offered in rotation during the summer in an online format. Students in the MME or BM-MME programs may take either the traditional or online format to complete their degree. Students in other degree programs may take these courses as free electives:

Code	Title	Credits
ME 685	Improving Musical Practice: Research in Music Education	3
ME 692	Social Justice in Music Education: History, Philosophy, and Practice	3
ME 721	Curriculum Development & Evaluation	3
ME 723	Social, Emotional, and Musical Learning	3
ME 693	Seminar in Music Educ	3

CP 640 Creative Practices in Choral Pedagogy is offered online during the summer and may be used as an elective in graduate music education.

Degree Offered:

- Master of Music Education (M.M.E.)

Music Education Elective. Select one of the following courses:		3
ME 693	Seminar in Music Educ	
or ME 682	Choral Music Education	
or ME 721	Curriculum Development & Evaluation	
or ME 730	Pedagogy and Practice	
or ME 771	Critical Pedagogy for Music Ed	
Complete 1 credit in one of the following courses:		1
ME 650	Thesis	
or ME 775	MME Capstone	
Core Elective ³		3

Music History/Music Theory Elective	3
Choral Experience ²	1-2
Free Elective	3
Area of Emphasis ⁴	9
Total Credits	32-33

¹ ME 685 prepares students to write the thesis for the course ME 650. However, with permission of the Music Education Department students may substitute MH 731, Introduction to Musicology. Students should plan on at least one full year to complete the thesis after taking a research course.

² Students may take any approved WCC Ensemble, including CR 509 Symphonic Choir; CR 513 Williamson Voices; CR 515 Westminster Kantorei; CR 517 Master Singers; SM 509 Jubilee Singers; SM 519 Concert Handbell Choir I; Choral Institute at Oxford; Conducting Institute; Summer Choral Festival, or another WCC ensemble by approval of the department chair.

³ The core elective must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis, and/or area of applied study.

⁴ Emphasis must be formally presented to the department chair or advisor for approval. Suggested courses include Seminar in Music Education, Curriculum Development, Pedagogy and Practicum, Conducting, Conducting Institute, Oxford, Choral Pedagogy Institute, Kodaly I, II, III, ATM4, VC/OR/PI study, Theory/Comp., Music Theatre, Popular Music, CP, MVP courses, School of Ed. courses, etc.

Notes:

1. Students may elect to complete New Jersey approved teacher certification courses at the undergraduate level in conjunction with this degree program. Courses taken at the undergraduate degree level do not count towards the completion of the MME degree. Candidates who wish to complete teacher certification must plan on three semesters of study during the academic year.
2. Students complete a thesis as the capstone experience in the degree. Information about the thesis is contained in the Music Education Thesis and Capstone Handbook (http://www.rider.edu/sites/default/files/docs/wcc_musiced_grad_thesis-2016.pdf) found on the Music Education website. Students should plan at least one year to complete the thesis.

Courses and Descriptions

ME 650 Thesis 1 Credits

Independent research under faculty supervision leading to the writing of a master's thesis. Students register for this course in every semester or summer term in which assistance is provided by the thesis advisor.

Prerequisite(s): ME 685 (preferred) or MH 731; Permission of the Chair for Music Education is required to register for this course.

ME 682 Choral Music Education 3 Credits

This course is designed to assist choral music educators to improve their pedagogical effectiveness. This course will provide students with the knowledge, skills and dispositions necessary for developing comprehensive musicianship in the choral ensemble setting through the study of creating original music, responding to music, connecting to students and performing vocal/choral music with a primary focus on choral pedagogy, curriculum development, unit and rehearsal planning, programming, vocal development, program management, music literacy pedagogy, music technology and assessment.

ME 685 Improving Musical Practice: Research in Music Education 3 Credits

Intended for students in the MME and BM-MME degree programs, this course focuses on research as a tool for improving practice. Course members will read qualitative and quantitative research studies and consider the impact of research on their teaching. Course members will also plan and conduct original research that will help them to analyze their specific teaching contexts, identify and conduct inquiry into problems, and refine their practice as educators.

ME 692 Social Justice in Music Education: History, Philosophy, and Practice 3 Credits

The purpose of this course is two-fold. First, the course will explore the historical perspectives that have significantly shaped and informed music teaching and learning within American public education during the last century. Second, students will encounter, engage with, and interrogate philosophies and theories of practice from social justice perspectives in order to critically consider the place and purpose of music and music education within educational and societal contexts.

ME 693 Seminar in Music Educ 3 Credits

While the topics vary from year to year, international perspectives in music education form the foundation for this seminar.

ME 721 Curriculum Development & Evaluation 3 Credits

This course examines the relationship between curriculum theory and philosophy of music education. Through the study of traditional and contemporary models of curriculum development and evaluation, students broaden their understanding of curriculum as it impacts the learning process. Post modern theory consistent with the Department's commitment to Critical Pedagogy for Music Education provide the focal point for the development of curricula that enhance and support quality music education. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

ME 723 Social, Emotional, and Musical Learning 3 Credits

This course examines topics in psychology of music from the lens of social emotional learning. This theoretical lens will allow students to find the relationships between music-making as social and cultural practices and the development of individual and collective psychological process in music teaching and learning. Major topics include affective and physiological responses to music, musical enculturation, learning theory, well-being and wellness, musical aptitude, developmental processes, and motivation. Students will discuss literature in the psychology of music with applications to K-12 music classes and rehearsals and conduct a pilot study in an area of interest based upon knowledge from the literature.

ME 730 Pedagogy and Practice 3 Credits

This course explores the intersection of philosophy, psychology, pedagogy and practice by providing students with guided teaching experiences connected to their current teaching situation. Throughout the course, students will be challenged to evaluate their own teaching against philosophical, psychological, pedagogical, and research-based models of music instruction. In addition to guided teaching experiences, students will participate in a weekly seminar class during which they will share and reflect on their experiences in the field and discuss topics pertinent to teaching and learning music.

ME 771 Critical Pedagogy for Music Ed 3 Credits

This course presents the fundamental concepts, contexts and constructs that define Critical Pedagogy for Music Education. It focuses on the application of critical theory as a philosophical perspective to inform decisions teachers make when planning instruction for their students.

ME 775 MME Capstone 1 Credits

Independent research leading to a completed capstone project, such as curriculum and assessment development, pedagogical publication or presentation, instructional materials, etc. The project must be approved by the department.

Prerequisite(s): ME 685 and permission of the Music Education Chair.

Master of Music: Sacred Music

Program Overview

The sacred music program offers education of the highest quality and broadest scope to sacred music majors who aspire to be leaders of the future.

The program is interdenominational and seeks to explore the excellence of various traditions of sacred music. Faculty members have wide experience and expertise in such traditions as Anglican, Lutheran, Methodist, Presbyterian, Reformed, Roman Catholic, the Synagogue and Temple tradition, and others.

Curriculum Overview

The graduate curriculum aims, on the one hand, to explore how familiar tradition can be blended with unfamiliar contemporary creativity in choral, congregational, and instrumental music for worship and, on the other hand, to provide a balanced study of theoretical matters and practical concerns. Technique, repertoire, and performance practice are therefore considered with theology, Biblical and post-Biblical religious history, and the development and practice of liturgy and worship.

Graduate courses include oratorio solo literature, conducting coaching, worship planning for the 21st century, liturgies, Bach cantatas, history of sacred music and more.

A reciprocal partnership with Princeton Theological Seminary allows Westminster Choir College graduate students to take certain courses offered by the seminary. The seminary's Speer Library is another invaluable resource for Westminster students.

¹ Students selecting Option A must present a half-recital in the applied area. Departmental approval is required for all recitals. For composition primary students, the recital consists of original works composed while the student was enrolled as a graduate student at Westminster Choir

College. For composition primary students, TH 625 Composition class, may be required if it is felt that class work in composition is needed prior to private study. Composition primary students must complete TH 726 as the core theory/music history elective.

² The core elective must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis, and/or area of applied study.

Academic Plan of Study

Last Edited: Nov 17, 2021 10:17am

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

SM 509 Jubilee Singers 1 Credits

This auditioned ensemble is devoted to the performance of sacred music from the African-American tradition.

SM 511 Sacred Music Lab 0 Credits

Series of classes that addresses a variety of experiences in Sacred Music while rotating principal themes and ideas. Student preparation of monthly worship settings will put studied concepts into practice.

SM 517 Concert Handbell Choir II 1 Credits

Open to students who have had previous handbell experience. Intermediate to advanced repertoire, with opportunities for concert performance.

SM 519 Concert Handbell Choir I 1 Credits

A choir selected by audition from the most experienced and capable bell ringers among the student body at large. This ensemble utilizes advanced repertoire and techniques, aiming primarily at presenting concerts both on and off campus, including a two-week annual tour.

SM 525 Conductors' Repertoire Ensemble 1 Credits

An auditioned chamber ensemble, offered every semester, which provides conducting podium time and coaching to all interested members. It additionally serves the conducting needs of graduate Sacred Music majors.

Prerequisite(s): CR 215 or permission of instructor.

SM 531 Colloquium in Sacred Music 2 Credits

A lecture series/colloquium intended to address a wide variety of concerns in the field of Sacred Music while rotating principal themes and ideas.

SM 540 Choir Training/Young Singers 3 Credits

A practicum combined with study designed to teach students how to organize and direct a children's choir program that emphasizes musical training as a basic requirement. The course focuses on teaching children good vocal techniques and sight-reading skills and includes practice teaching in a local school under instructor supervision. Other areas covered include musical readiness skills, voice-change problems, and repertoire.

SM 541 Conducting Church Choirs: Ped & Mgt 3 Credits

A practical course devoted to the building and maintenance of church music programs serving persons of all ages.

SM 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity. Offered in rotation with other Sacred Music electives. 3 Credit hours.

SM 630 Conducting Coaching 1-2 Credits

Structured preparation and faculty coaching of the culminating choral recital in the graduate Sacred Music curriculum.

SM 631 Worship Planning/21st Cent. 3 Credits

Designed to facilitate the planning of worship, this practical course will be an immersion in the musical and theological materials available to those who create worship.

SM 640 Liturgies 3 Credits

A study of the origins of liturgy, its development in the main Christian traditions, and its relation to ecclesiastical history, with particular attention given to the differing styles and traditions of liturgical music. Contemporary liturgies are viewed against this historical background.

SM 641 Hymnology 3 Credits

A study of the origins and development of Christian hymnody, with reference to the theological emphases of various periods from the beginnings to the present, aiming to arouse interest in the textual and musical content of hymns and in their effective use in worship.

SM 654 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 655. Offered in rotation with other Sacred Music electives.

SM 655 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas.

SM 712 Hist of Sacred Music I 3 Credits

Study and research into the history of Western Christian music and its most important genres beginning with the Old Testament and continuing until the death of J.S. Bach in 1750.

SM 713 Hist of Sacred Music II 3 Credits

Continuation of SM 712, beginning with the Classical Viennese Mass and continuing until today. Emphasis on the development of the American church and its worship music.

SM 722 Theology, Liturgy & Worship 3 Credits

A detailed study of the Bible. Principal thematic and narrative elements are correlated to the development of the church's historic liturgies and the theological principles behind them.

Master of Music in Sacred Music: Practical Pedagogy Track Online

Program Overview

This online Sacred Music program offers an education of the highest quality and broadest scope to those musicians who aspire to be leaders of their time and place. An interdenominational program, it seeks to train church musicians to a high level of competency in the traditional ways of making sacred music while also striving to engage students in new ways of achieving liturgical excellence and spiritual depth in practices that respond to the various cultural forces that continue to transform the ways in which worship is accomplished in the 21st-century.

In order to meet the needs of those musicians who may not find it feasible or expeditious to matriculate in the on-campus program offered during the academic year, this pedagogy-based track is delivered entirely online with the exception of one 3-week period during the summer of the student's own choosing. While still broad and comprehensive in its curricular design, it offers students a chance to focus on the practical side of making music for those who wish to concentrate on either working with children and youth or adults.

Courses and Descriptions

SM 509 Jubilee Singers 1 Credits

This auditioned ensemble is devoted to the performance of sacred music from the African-American tradition.

SM 510 Conducting Adult Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving adults.

SM 511 Sacred Music Lab 0 Credits

Series of classes that addresses a variety of experiences in Sacred Music while rotating principal themes and ideas. Student preparation of monthly worship settings will put studied concepts into practice.

SM 512 Conducting Children and Youth Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving children and youth.

SM 517 Concert Handbell Choir II 1 Credits

Open to students who have had previous handbell experience. Intermediate to advanced repertoire, with opportunities for concert performance.

SM 519 Concert Handbell Choir I 1 Credits

A choir selected by audition from the most experienced and capable bell ringers among the student body at large. This ensemble utilizes advanced repertoire and techniques, aiming primarily at presenting concerts both on and off campus, including a two-week annual tour.

SM 523 Choral Music for Adults 1 Credits

This course is designed to acquaint the church choral director with repertoire suitable for use with adult choirs and adult ensembles. Representative repertoire from all periods of music will be discussed and analyzed. Rehearsal techniques will be incorporated regarding introducing the repertoire, skill-building development, and warm-ups. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 524 Choral Music for Children 1 Credits

This course is designed to acquaint the church Choral director with repertoire suitable for use with children's and youth choirs. Representative repertoire from all periods of music will be discussed and analyzed. Rehearsal techniques will be incorporated regarding introducing the repertoire, skill-building development, and warm-ups. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 525 Conductors' Repertoire Ensemble 1 Credits

An auditioned chamber ensemble, offered every semester, which provides conducting podium time and coaching to all interested members. It additionally serves the conducting needs of graduate Sacred Music majors.

Prerequisite(s): CR 215 or permission of instructor.

SM 531 Colloquium in Sacred Music 2 Credits

A lecture series/colloquium intended to address a wide variety of concerns in the field of Sacred Music while rotating principal themes and ideas.

SM 541 Conducting Church Choirs: Ped & Mgt 3 Credits

A practical course devoted to the building and maintenance of church music programs serving persons of all ages.

SM 610 Foundations of Music Ministry 2 Credits

This graduate level course surveys the vocational needs, professional relationships, administrative styles, and teaching roles of the practicing church musician. In addition to an overview of professional standards, emphasis will also be placed on music engraving skills (music notation software), budgeting, recruitment, endowments and fundraising.

Master of Music: Voice Pedagogy and Performance (Pedagogy Emphasis)

Program Overview

The voice program seeks to develop the musician by establishing a sound vocal technique and a thorough understanding of the singing voice, its literature and pedagogy. These tools are essential for the study and performance of vocal and choral literature and for training students as solo performers, professional teachers or choral conductors.

Capitalizing upon undergraduate work, students continue to build and demonstrate healthy vocal technique while deepening their knowledge of voice literature and pedagogy. Students develop a strong understanding of the complex relationships between music and poetry.

Curriculum Overview

This voice pedagogy and performance program has two emphases. The pedagogy emphasis entails private lessons, voice literature, opera, vocal pedagogy, supervised student teaching and a full recital. For students whose undergraduate work has not included a public recital, presentation of a 30-minute recital is required before work on the graduate recital may begin. Weekly coaching classes as well as studio and performance classes offer frequent performance opportunities. Two fully-staged operas, one with orchestra, are presented each year. Private vocal coaching is available (fee is charged).

Each Pedagogy Emphasis student completes a multi-course sequence in Voice Pedagogy, including voice science, methods and teaching, research, and literature. Four semesters of applied voice study culminate in a graduate recital.

Please see the Voice Handbook for language requirements.

¹ Students are strongly encouraged to take VC 730 as an elective if they have not already selected this as a "Performance" course.

² The core elective must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis and/or area of applied study.

³ Prior to graduation, students must complete at least one year of undergraduate-level study in two of the three major European singing

languages (Italian, German and French). Students must earn a minimum grade of "C" in these courses. Grades of "C-" or below are not accepted.

⁴ Students are required to present a public recital following approval by the department.

Courses and Descriptions

VC 591 Performing in Lyric Theater 2 Credits

Performing in Lyric Theater offers techniques for the preparation of lyric roles in a theatrical setting. It will develop elements of stagecraft, systematize a process for preparations and exploration, and introduce the working relationship with director and conductor.

Prerequisite(s): Undergraduates, VC 291 and the successful completion of Level II jury, or permission of the Chair.

VC 592 Opera Workshop 2 Credits

Introduction to opera performance. Acting exercises, character development, dramatic exploration and musical coaching culminating in a workshop-format presentation. It is recommended that VC 491 or 691 be taken before this course. This course may be repeated for credit.

Prerequisite(s): Undergraduates, successful completion of the level II voice test or permission of the chair.

VC 593 Opera Theater 2 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions, and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity.

VC 627 Opera Literature I 3 Credits

Study of the development of opera from 1600 through the Napoleonic era (ca. 1815), with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 628 Opera Literature II 3 Credits

Study of the development of opera from the early 19th century to the present, with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 633 Seminar in Opera Literature 3 Credits

An intensive study of an area of opera literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the works of a selected composer or of a specific genre of opera.

VC 635 Seminar in Song Literature 3 Credits

An intensive study of some area of art song history and literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the selected repertoire.

VC 641A Voice Primary 2 Credits**VC 661 German Lieder 3 Credits**

This survey of the German Lieder begins with its roots in the 17th and 18th centuries and continues into the 20th century. Classes will involve study of Romanticism, including philosophers and poets of the 18th and 19th centuries who were important for German Lieder. The bulk of the class involves in-depth study of the Lieder of the important composers of the genre: Haydn, Mozart, Schubert, Robert and Clara Schumann, Mendelssohn, Liszt, Brahms, Wolf, Strauss, Mahler, Schoenberg, Berg, and Webern. Class sessions will involve a balance of lecture, discussion, and student performance.

VC 662 French Melodie 3 Credits

This course is designed as a survey of the song literature of France. Students examine works for voice and piano/instruments by Berlioz, Gounod, Saint-Saëns, Bizet, Faure, Duparc, Chausson, Debussy, Ravel, Messaien, Milhaud, Poulenc, and others, analyzing their relationship to larger stylistic, social, and musicological trends. Investigation will include matters of prosody, scansion, and compositional organization, with particular attention given to matters of text setting and poetic treatment. Special emphasis will be placed on important French language poets whose literary works serve as the basis for this material. Poets will include Baudelaire, Verlaine, Hugo, Rimbaud, Mallarmé, LaForgue, Maeterlinck, and others. Poetic history and form will be covered as well as important composer/poet partnerships. Class sessions will involve a balance of lecture and discussion. Works by both well-known and lesser-known composers will be included.

VC 705 Grad Voice Rep:Italian/French 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 706 Grad Voice Rep:German/English 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 722 Literature for Teaching 3 Credits

A survey of graduated teaching literature for beginning, intermediate and advanced voice students. Literature will be explored that is particularly well-suited to specific vocal issues (e.g. legato, coloratura, staccato, etc.)
Prerequisite(s): VC 723, VC 724.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 724 Voice Pedagogy II: Methods 3 Credits

A comparative study of various pedagogical methods and ideals. A wide range of important historical and contemporary pedagogy treatises is reviewed. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student.

VC 726 Voice Research 3 Credits

Peer reviewed research in voice is evaluated and research methodologies are explored. Class projects include research in historical, qualitative, quantitative, and mixed methods approaches.

VC 730 The Singing Actor: Opera 3 Credits

This course entails coaching of selected songs, arias or repertoire from music theater, and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

VC 731 Opera Auditions: Prep & Tech 2 Credits

This class will explore the many facets of preparing an audition for an opera role, apprentice program, or competition. At least three to four arias in contrasting styles and languages should be prepared for work in class. Areas to be addressed include vocal and dramatic presentation, networking, resume building, make-up, and photo advice. In coordination with the Office of Career Services, panel discussions with invited guests that will explore specific career-related topics will be scheduled.

Prerequisite(s): permission of the applied instructor.

Master of Music: Voice Pedagogy and Performance (Performance Emphasis)

Program Overview

More students pursue voice study at the graduate level at Westminster Choir College than any other major on campus. A strong and unique double emphasis in voice pedagogy and performance prepares our graduates to find success on the operatic and concert stages of the world, in studio and classroom teaching positions at prominent schools, universities, and churches, and in thriving private voice studios. The process-oriented approach focuses on *how*, rather than *what* to sing, enabling students to become the best possible vocal artists and independent musicians.

Curriculum Overview

This voice pedagogy and performance program has two emphases. The performance emphasis entails private lessons, voice literature, opera, vocal coaching, vocal pedagogy, and a full recital. Studio and performance classes, as well as a number of performance-oriented class options, Opera Workshop, and Opera Theatre, offer frequent performance opportunities. Two fully-staged operas, one with orchestra, are presented each year. Private vocal coaching is available (fee is charged).

Each performance emphasis student completes courses in applied study, voice science and pedagogy, and literature. Four semesters of applied voice study culminate in a graduate recital. For students whose undergraduate work has not included a public recital, presentation of a 30-minute recital is required before work on the graduate recital may begin.

Please see the Voice Handbook for language requirements.

Courses and Descriptions

VC 553 Special Topics in Voice Performance Practice 3 Credits

Intensive performance coaching and lectures in the form of master classes where performance practice in selected topics will be taught by current faculty or distinguished alumni and specialists in their fields.

Prerequisite(s): Open to students at sophomore level and above with permission of the instructor.

VC 591 Performing in Lyric Theater 2 Credits

Performing in Lyric Theater offers techniques for the preparation of lyric roles in a theatrical setting. It will develop elements of stagecraft, systematize a process for preparations and exploration, and introduce the working relationship with director and conductor.

Prerequisite(s): Undergraduates, VC 291 and the successful completion of Level II jury, or permission of the Chair.

VC 592 Opera Workshop 2 Credits

Introduction to opera performance. Acting exercises, character development, dramatic exploration and musical coaching culminating in a workshop-format presentation. It is recommended that VC 491 or 691 be taken before this course. This course may be repeated for credit.

Prerequisite(s): Undergraduates, successful completion of the level II voice test or permission of the chair.

VC 593 Opera Theater 2 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593E Opera Theater (Ensemble) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593R Opera Theater (Role) 2 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593T Opera Theater (Tech) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions, and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity.

VC 627 Opera Literature I 3 Credits

Study of the development of opera from 1600 through the Napoleonic era (ca. 1815), with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 628 Opera Literature II 3 Credits

Study of the development of opera from the early 19th century to the present, with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 633 Seminar in Opera Literature 3 Credits

An intensive study of an area of opera literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the works of a selected composer or of a specific genre of opera.

VC 635 Seminar in Song Literature 3 Credits

An intensive study of some area of art song history and literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the selected repertoire.

Voice Primary.

VC 650 Pedagogy Capstone 1 Credits

Independent research leading to a completed capstone project, such as a pedagogical publication or presentation, development of an original or unique method of instruction, instructional materials, etc. The project must be approved by the department.

VC 655A Voice Primary 2 Credits**VC 655B Voice Primary 1 Credits****VC 655E Voice Primary 2 Credits****VC 655F Voice Primary 1 Credits****VC 657 Private Coaching 2 Credits**

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 657 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 658 involves weekly half-hour lessons and a fee of \$600. Open to graduate Voice Pedagogy and Performance majors.

VC 658 Private Coaching 1 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 657 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 658 involves weekly half-hour lessons and a fee of \$600. Open to graduate Voice Pedagogy and Performance majors.

VC 661 German Lieder 3 Credits

This survey of the German Lieder begins with its roots in the 17th and 18th centuries and continues into the 20th century. Classes will involve study of Romanticism, including philosophers and poets of the 18th and 19th centuries who were important for German Lieder. The bulk of the class involves in-depth study of the Lieder of the important composers of the genre: Haydn, Mozart, Schubert, Robert and Clara Schumann, Mendelssohn, Liszt, Brahms, Wolf, Strauss, Mahler, Schoenberg, Berg, and Webern. Class sessions will involve a balance of lecture, discussion, and student performance.

VC 662 French Melodie 3 Credits

This course is designed as a survey of the song literature of France. Students examine works for voice and piano/instruments by Berlioz, Gounod, Saint-Saëns, Bizet, Faure, Duparc, Chausson, Debussy, Ravel, Messaien, Milhaud, Poulenc, and others, analyzing their relationship to larger stylistic, social, and musicological trends. Investigation will include matters of prosody, scansion, and compositional organization, with particular attention given to matters of text setting and poetic treatment. Special emphasis will be placed on important French language poets whose literary works serve as the basis for this material. Poets will include Baudelaire, Verlaine, Hugo, Rimbaud, Mallarmé, LaForgue, Maeterlinck, and others. Poetic history and form will be covered as well as important composer/poet partnerships. Class sessions will involve a balance of lecture and discussion. Works by both well-known and lesser-known composers will be included.

VC 667 Private Dramatic/Role Coaching 2 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 667 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 668 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

VC 668 Private Dramatic/Role Coaching 1 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 667 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 668 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

VC 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

VC 705 Grad Voice Rep:Italian/French 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 706 Grad Voice Rep:German/English 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 722 Literature for Teaching 3 Credits

A survey of graduated teaching literature for beginning, intermediate and advanced voice students. Literature will be explored that is particularly well-suited to specific vocal issues (e.g. legato, coloratura, staccato, etc.)

Prerequisite(s): VC 723, VC 724.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 724 Voice Pedagogy II: Methods 3 Credits

A comparative study of various pedagogical methods and ideals. A wide range of important historical and contemporary pedagogy treatises is reviewed. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student.

VC 725 Voice Ped III: Tchng Practicum 3 Credits

Communication skills are explored and students develop a systematic approach to studio voice instruction. Each student is assigned at least two voice students (one adult and one teenager) to be taught both inside and outside of class. Emphasis is placed on becoming familiar with all voice classifications and basic vocal literature.

Prerequisite(s): VC 723.

VC 726 Voice Research 3 Credits

Peer reviewed research in voice is evaluated and research methodologies are explored. Class projects include research in historical, qualitative, quantitative, and mixed methods approaches.

VC 730 The Singing Actor: Opera 3 Credits

This course entails coaching of selected songs, arias or repertoire from music theater, and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

VC 731 Opera Auditions: Prep & Tech 2 Credits

This class will explore the many facets of preparing an audition for an opera role, apprentice program, or competition. At least three to four arias in contrasting styles and languages should be prepared for work in class. Areas to be addressed include vocal and dramatic presentation, networking, resume building, make-up, and photo advice. In coordination with the Office of Career Services, panel discussions with invited guests that will explore specific career-related topics will be scheduled.

Prerequisite(s): permission of the applied instructor.

VC 740 Seminar in Music Theater Pedagogy 3 Credits

Comprehensive study of various pedagogical approaches to teaching Music Theater singing techniques. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments, and other written assignments.

VC 741 Music Theater Literature I 3 Credits

Survey and analysis of Music Theater literature from its roots in Tin Pan Alley through Kander and Ebb. Students will explore the synergistic relationships among text, music, and style and discuss the influence of society and politics on the genre. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments and other written assignments.

VC 742 Music Theater Literature II 3 Credits

Survey and analysis of Music Theater Literature from Sondheim to the present. Students will explore the synergistic relationships among text, music, and style and discuss the influence of society and politics on the genre. The class will also discuss the integration of pop/rock and other contemporary substyles within the genre. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments and other written assignments.

VC 791 Teaching Internship 2 Credits

Teaching internship with a master teacher(s). The student will teach under faculty observation and supervision, including follow-up private discussion with the observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. May be offered on an intensive basis in conjunction with Westminster Summer Session events, such as The High School Solo Vocal Artist and/or Vocal Institute.

Master of Voice: Voice Pedagogy Classical Track Online

Program Overview

Westminster's Master of Voice Pedagogy program is offered entirely online and is specifically designed to serve the needs of professional singers, voice teachers, school music teachers, and voice coaches who want advanced training in the art and science of voice teaching. For those interested, there is also the option of extensive voice research. Supported by the latest developments in voice science, and thoroughly grounded in practical application, the program offers the most comprehensive training for singing teachers available anywhere. Because of the high standard required for admission to this program, applications will be considered only from candidates who can document

their professional experience, and who have worked in their chosen field for at least five years since their undergraduate degree was completed.

Curriculum Overview

At least one course required to fulfill this degree is offered online each semester. Coursework is also offered during Westminster's six-week Summer Session, allowing degree candidates to maintain performance schedules and teaching jobs during the year.

The M.V.P. program includes courses in vocal pedagogy and literature, culminating in a substantial vocal pedagogy project completed under the guidance of a Westminster voice faculty member.

For students who elect applied voice study (fee is charged), weekly studio and performance classes offer frequent performance opportunities. Two fully-staged operas, one with orchestra, are presented each year. Private vocal coaching is available (a fee is charged).

Please see the Voice Handbook for language requirements.

Elizabeth Sutton • Adjunct Assistant Professor, Voice, 2005. B.A., Bowling Green State University; M.M., College-Conservatory of Music, University of Cincinnati.

Sally Wolf • Adjunct Assistant Professor, Voice, 2001. B.M., Kent State University; Artist Diploma, Curtis Institute of Music.

Amy Zorn • Adjunct Assistant Professor, Voice, 1996. B.M., University of Wisconsin, Madison; M.M., Boston University.

Master of Voice Pedagogy: Classical Track Program Requirements

(32 credits)

Learn more about General Graduate Requirements. (<http://catalog.rider.edu/westminster-choir-college/graduate-programs/general-requirements/>)

Code	Title	Credits
Major Area		
VC 650	Pedagogy Capstone	1
VC 722	Literature for Teaching	3
VC 723 & VC 724	Voice Ped I: Voice Science and Voice Pedagogy II: Methods	6
VC 791	Teaching Internship ¹	2
Literature Courses		
VC 661	German Lieder	3
VC 662	French Melodie	3
Core		
MH 731	Intro to Musicology	3
Theory or Music History elective (1 course)		3
Core elective ²		3
Electives		
Free electives ³		5
Total Credits		32

¹ Students who have had significant teaching experience in American schools may petition to substitute another graduate course for VC 791. The department, if granting, will specify acceptable course alternatives.

² The core elective must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis and/or area of applied study.

³ Students may fulfill free elective requirements through completion of summer workshops and/or Saturday Seminars with prior approval of the Voice Department.

Notes

- Students with limited prior singing experience, as determined through departmental evaluation of past vocal study, performance career and/or performing skill as demonstrated through live or recorded performance, may be required to complete up to four credits of applied voice instruction in addition to the major area course requirements. Such required developmental lessons will result in additional charges.
- In addition to the above requirements, all students must demonstrate competency in at least two of the three major European singing languages (Italian, German, French). This may occur through completion of at least one year of college-level study in each language, intensive work through language institutes or practical experience living and/or working in a foreign country, as verified by diagnostic testing at Westminster.

Academic Plan of Study

The following educational plan is provided as a sample only. Students may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Code	Title	Credits
Pedagogy Courses		
It is preferable that the pedagogy courses be taken in the following order:		
VC 723	Voice Ped I: Voice Science	3
VC 724	Voice Pedagogy II: Methods	3
VC 722	Literature for Teaching	3
VC 791	Teaching Internship ¹	2

² The core elective must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis and/or area of applied study.

³ Students may fulfill free elective requirements through completion of summer workshops and/or Saturday Seminars with prior approval of the Voice Department.

Notes

1. Students with limited prior singing experience, as determined through departmental evaluation of past vocal study, performance career and/or performing skill as demonstrated through live or recorded performance, may be required to complete up to four (4) credits of applied voice instruction in addition to the major area course requirements. Such required developmental lessons will result in additional charges.
2. In addition to the above requirements, all students must demonstrate competency in at least two of the three major European singing languages (Italian, German, French). This may occur through completion of at least one year of college-level study in each language, intensive work through language institutes, or practical experience living and/or working in a foreign country, as verified by diagnostic testing at Westminster.

Courses and Descriptions

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

VC 650 Pedagogy Capstone 1 Credits

Independent research leading to a completed capstone project, such as a pedagogical publication or presentation, development of an original or unique method of instruction, instructional materials, etc. The project must be approved by the department.

VC 661 German Lieder 3 Credits

This survey of the German Lieder begins with its roots in the 17th and 18th centuries and continues into the 20th century. Classes will involve study of Romanticism, including philosophers and poets of the 18th and 19th centuries who were important for German Lieder. The bulk of the class involves in-depth study of the Lieder of the important composers of the genre: Haydn, Mozart, Schubert, Robert and Clara Schumann, Mendelssohn, Liszt, Brahms, Wolf, Strauss, Mahler, Schoenberg, Berg, and Webern. Class sessions will involve a balance of lecture, discussion, and student performance.

VC 662 French Melodie 3 Credits

This course is designed as a survey of the song literature of France. Students examine works for voice and piano/instruments by Berlioz, Gounod, Saint-Saëns, Bizet, Faure, Duparc, Chausson, Debussy, Ravel, Messaien, Milhaud, Poulenc, and others, analyzing their relationship to larger stylistic, social, and musicological trends. Investigation will include matters of prosody, scansion, and compositional organization, with particular attention given to matters of text setting and poetic treatment. Special emphasis will be placed on important French language poets whose literary works serve as the basis for this material. Poets will include Baudelaire, Verlaine, Hugo, Rimbaud, Mallarmé, LaForgue, Maeterlinck, and others. Poetic history and form will be covered as well as important composer/poet partnerships. Class sessions will involve a balance of lecture and discussion. Works by both well-known and lesser-known composers will be included.

VC 722 Literature for Teaching 3 Credits

A survey of graduated teaching literature for beginning, intermediate and advanced voice students. Literature will be explored that is particularly well-suited to specific vocal issues (e.g. legato, coloratura, staccato, etc.)

Prerequisite(s): VC 723, VC 724.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 724 Voice Pedagogy II: Methods 3 Credits

A comparative study of various pedagogical methods and ideals. A wide range of important historical and contemporary pedagogy treatises is reviewed. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student.

VC 791 Teaching Internship 2 Credits

Teaching internship with a master teacher(s). The student will teach under faculty observation and supervision, including follow-up private discussion with the observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. May be offered on an intensive basis in conjunction with Westminster Summer Session events, such as The High School Solo Vocal Artist and/or Vocal Institute.

Master of Voice: Voice Pedagogy Music Theater Track Online

Program Overview

Westminster's Master of Voice Pedagogy program is offered entirely online and is specifically designed to serve the needs of professional singers, voice teachers, school music teachers, and voice coaches who want advanced training in the art and science of voice teaching. This particular track focuses on the pedagogy and science associated with music theater genres. Supported by the latest developments in voice science, and thoroughly grounded in practical application, the program offers the most comprehensive training for singing teachers available anywhere in an entirely online format. Preference is given to candidates who can document their professional experience and who have worked

in their chosen field for at least three years since their undergraduate degree was completed.

Curriculum Overview

At least one course required to fulfill this degree is offered online each semester. Coursework is also offered during Westminster's six-week Summer Session, allowing degree candidates to maintain performance schedules and teaching jobs during the year.

The M.V.P: MT Track includes courses in music theater pedagogy and literature, culminating in a substantial vocal pedagogy project completed under the guidance of a Westminster voice faculty member.

Heather A. Dalal

Associate Professor-Librarian, University Libraries
B.A. Northwestern University; M.L.I.S. Rutgers, The State University of New Jersey; M.Ed. University of Massachusetts

Melissa M. DeWees

Priority Adjunct Assistant Professor, Department of Psychology
B.A. Towson State University; M.A. Alliant International University; Psy.D. Alliant International University

Todd Dellinger

Associate Professor, Department of Theatre and Dance
B.A. The American University; M.A. The American University

David R. Dewberry

Professor, Department of Communication and Journalism
B.A. University of Arkansas; M.A. University of Arkansas; Ph.D. University of Denver

Matthew DiMatteo

Assistant Professor, Department of Fine Arts

Cara J. DiYanni

Associate Professor, Department of Psychology
B.A. Georgetown University; M.A. Boston University; Ph.D. Boston University

Chrystina A. Dolyniuk

Associate Professor, Department of Psychology
B.A. University of California, Los Angeles; M.A. California State University, Northridge; Ph.D. University of Calgary

Julie Drawbridge

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. The University of Maine; Ph.D. The University of Texas at Austin

Daniel L. Druckenbrod

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.S. University of Notre Dame; Ph.D. University of Virginia

Kathleen Ebling Shaw

Priority Adjunct Instructor, Department of Choral Studies, Music Education, and Sacred Music
B.M. Westminster Choir College, Rider University

Bosah L. Ebo

Professor, Department of Communication and Journalism
B.S. University of Wisconsin-Stevens Point; B.S. University of Wisconsin-Stevens Point; M.A. University of Wisconsin-Stevens Point; Ph.D. The University of Iowa

Jeff Edelstein

Priority Adjunct Instructor, Department of Communication and Journalism
B.A. Rider University

Rochelle K. Ellis

Priority Adjunct Associate Professor, Department of Piano and Voice
B.M.Ed. Conservatory of Music and Dance, University of Missouri, Kansas City; M.M.E. Westminster Choir College, Rider University

Faith Esham

Priority Adjunct Assistant Professor, Department of Piano and Voice
B.A. Columbia Union College; B.M. The Juilliard School; M.M. The Juilliard School

Alice Faroh

Priority Adjunct Assistant Professor, Department of Languages, Literatures and Cultures
B.A. Universidad Pedagógica Experimental de Barquisimeto; M.A. Maryville University

Joel Feldman

Associate Professor, Department of History and Philosophy
B.A. Hampshire College; Ph.D. The University of Texas at Austin

Roberta Fiske-Rusciano

Priority Adjunct Assistant Professor, Department of Political Science
B.A. Simmons College; M.A. University of Chicago; Ph.D. Rutgers, The State University of New Jersey

William F. Fobare

Priority Adjunct Assistant Professor, Department of Chemistry and Biochemistry
A.B. Hope College; Ph.D. University of South Carolina

Hernán Fontanet

Professor, Department of Languages, Literatures and Cultures
B.A. The University of Buenos Aires; A.M. Universidad Complutense de Madrid; Ph.D. Universidad Autónoma de Madrid

Barbara Franz

Professor, Department of Political Science
M.A. University of Vienna; M.A. Syracuse University; M.A. Syracuse University; Ph.D. Syracuse University

Lucien J. Frary

Professor, Department of History and Philosophy
B.A. University of St. Thomas; M.A. University of Minnesota, Twin Cities; Ph.D. University of Minnesota, Twin Cities

Ivan Fuller

Professor, Department of Theatre and Dance
B.A. Butler University; M.A. Bowling Green State University; Ph.D. Bowling Green State University

Daniel C. Garro

Priority Adjunct Instructor, Department of History and Philosophy
B.A. Washington College; M.A. Texas Tech University

Louis F. Goldberg

Priority Adjunct Assistant Professor, Department of Theatre and Dance
B.A. Colgate University; M.M. Syracuse University; M.F.A. Syracuse University

Matthew B. Goldie

Professor, Department of English
B.A. Victoria University; M.F.A. Brooklyn College; Ph.D. The Graduate Center, City University of New York

Selma C. Goldstein

Priority Adjunct Instructor, Department of English
B.S. Cornell University; MBA Fairleigh Dickinson University

James Goldsworthy

Professor, Department of Piano and Voice
B.M., M.M. Southern Methodist University; D.M.A. Stanford University

Stephanie Golski

Associate Professor, Department of Psychology
B.A. McDaniel College; Ph.D. The Johns Hopkins University

Stephen Gonzalez

Assistant Professor, Department of Fine Arts
B.A. Bloomfield College; M.F.A. New York University

Alexander Grushow

Professor, Department of Chemistry and Biochemistry
B.A. Franklin & Marshall College; Ph.D. University of Minnesota

John Guers

Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
M.S. East Stroudsburg University; M.S. East Stroudsburg University; Ph.D. University of Delaware

Jeffrey Halpern

Associate Professor, Department of Sociology and Criminology
B.A. The City College of New York; Ph.D. University of Pittsburgh

Laurel Harris

Associate Professor, Department of English
B.A. Oberlin College; M.A. University of Chicago; Ph.D. The Graduate Center, City University of New York

Catrinel Haught Tromp

Associate Professor, Department of Psychology
B.A. Queens University of Charlotte; Ph.D. Princeton University

Elizabeth Hawthorne

Online Lecturer, Department of Computer Science and Physics
B.S. Rider University; M.S. Kean University; Ph.D. Nova Southeastern University; Postdoctoral Fellowships, University of Maryland

Wendy P. Heath

Professor, Department of Psychology
B.A. Boston University; M.S. The University of Texas at Arlington; Ph.D. The University of Texas at Arlington

Ronald Hemmel

Professor, Department of Music Composition, History and Theory
B.M. Westminster Choir College; M.M. James Madison University; M.Phil., Ph.D. Rutgers, The State University of New Jersey

Mickey Hess

Professor, Department of English
B.A., M.A.T., Ph.D. University of Louisville

Melissa A. Hofmann

Associate Professor-Librarian, University Libraries
B.A. The College of New Jersey; M.L.I.S. Rutgers, The State University of New Jersey; M.A. The College of New Jersey

Al D. Holcomb

Associate Professor, Department of Choral Studies, Music Education, and Sacred Music
B.M.E. Texas Christian University; M.M.E. University of Hartford; Ph.D. University of Hartford

Sheena C. Howard

Professor, Department of Communication and Journalism
B.B.A. Iona College; M.A. New York Institute of Technology; Ph.D. Howard University

Brooke B. Hunter

Associate Professor, Department of History and Philosophy
B.A. University of California, Irvine; M.A. University of Delaware; Ph.D. University of Delaware

Nathan Hurwitz

Associate Professor, Department of Theatre and Dance
B.F.A. New York University; M.A. Northwestern University; Ph.D. University of Pittsburgh

Robert Isenhower

Assistant Professor, Department of Psychology
B.S. Clemson University; Ph.D. University of Connecticut

Danielle L. Jacobs

Associate Professor, Department of Chemistry and Biochemistry
B.S. Haverford College; Ph.D. The University of North Carolina at Chapel Hill

Jeannette Jacobson

Adjunct Assistant Professor, University Libraries
B.S. University of Wisconsin, Stevens Point; M.S. in L.S. University of Wisconsin

Barry T. Janes

Professor, Department of Film and Television
B.A. Rutgers, The State University of New Jersey; M.A. Rutgers, The State University of New Jersey; Ph.D. New York University

Paul R. Jivoff

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Hartwick College; M.S. The Ohio State University; Ph.D. University of Maryland

Howard H. Joffe

Priority Adjunct Associate Professor, Department of Communication and Journalism
B.A. Rutgers, The State University of New Jersey; J.D. Benjamin N. Cardozo School of Law, Yeshiva University

Katherine L. Johnson

Priority Adjunct Assistant Professor, Department of Piano and Voice
B.M. University of Calgary; M.M. Manhattan School of Music

Julia Johnson Thick

Priority Adjunct Assistant Professor, Department of Theatre and Dance
B.A. Rutgers, The State University of New Jersey

Rachelle Jonck

Priority Adjunct Associate Professor, Department of Piano and Voice
B.Mus. University of Stellenbosch, South Africa

James Jordan

Professor, Department of Choral Studies, Music Education, and Sacred Music
B.M. Susquehanna University; M.M., Ph.D. Temple University; D.Mus. University of Aberdeen, Scotland

Terra Walston Joseph

Associate Professor, Department of English
B.A. Indiana University; M.A. University of Illinois; Ph.D. University of Illinois

Jonathan Karp

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Colgate University; Ph.D. Vanderbilt University

Jay A. Kawarsky

Professor, Department of Music Composition, History and Theory
B.M.E. Iowa State University; M.M., D.M. Northwestern University

Mamadou Keita

Lecturer, Department of Computer Science and Physics
B.A. Ecole Normale Supérieure Bamako; M.S. Ohio University; Ph.D. University of Miami; M.S. University of Miami

Toufik Khyat

Acting Assistant Professor, Department of Mathematics
B.Sc. Mohammed V University; M.A. Rhode Island College; Ph.D. University of Rhode Island

Shawn P. Kildea

Associate Professor, Department of Film and Television
B.A. Rider University; M.A. Rider University; Ph.D. Rutgers, The State University of New Jersey

Jennifer King

Lecturer, Department of Psychology
B.A. The College of New Jersey; M.S. Villanova University; M.S. University of Maryland; Ph.D. University of Maryland

Anthony Kosar

Professor, Department of Music Composition, History and Theory
B.M. West Liberty State College; M.M. Southern Illinois University; Ph.D. The Ohio State University

Joanna Kubik

Assistant Professor, Department of Sociology and Criminology
B.A. Boston University; M.A. Jagiellonian University; Ph.D. Rutgers School of Criminal Justice

Robert J. Lackie

Professor-Librarian, University Libraries
B.S. The University of the State of New York; M.L.I.S. University of South Carolina; M.A. Rider University

Lois Laverty

Online Lecturer, Department of Piano and Voice
B.M. Westminster Choir College; M.M. Westminster Choir College; Artist's Diploma Vienna Academy of Music, Austria

Anne Law

Professor, Department of Psychology
B.A. University of New Hampshire; M.A. University of New Hampshire; Ph.D. University of New Hampshire

Robin W. Lewis

Associate Professor, Department of Theatre and Dance
B.S. The University of Alabama at Birmingham

Wil Lindsay

Associate Professor, Department of Fine Arts
B.F.A. The University of Arizona; M.F.A. Rensselaer

Ruowen Liu

Lecturer, Department of Mathematics
B.S. Beijing Normal University; Ph.D. Arizona State University

Linda Lorence-Critelli

Assistant Professor, Department of Fine Arts
A.A. Ferrum College; B.A. Berklee College of Music

Phillip L. Lowrey

Associate Professor, Department of Biology, Behavioral Neuroscience,
and Health Sciences
B.S. Vanderbilt University; Ph.D. Northwestern University

Duo Lu

Assistant Professor, Department of Computer Science and Physics
B.E. Shanghai Jiao Tong University; M.S., Ph.D. Arizona State University

Cynthia Lucia

Professor, Department of Film and Television
B.S. Indiana University of Pennsylvania; M.A. New York University; M.A.
New York University; Ph.D. New York University

Zhengping Luo

Assistant Professor, Department of Computer Science and Physics
B.S. Hebei University of Science and Technology; M.S. Jinan University;
Ph.D. University of South Florida

Katherine G. Magrino

Priority Adjunct Instructor, Department of Communication and
Journalism
B.A. The College of New Jersey; M.A. Thomas Edison State College

Cynthia Martinez

Assistant Professor, Department of Languages, Literatures and Cultures
B.A. Murray State University; M.A. University of Louisville; Ph.D. Indiana
University

Sarah Mason

Instructor - Librarian, University Libraries
B.A. Tarleton State University; M.L.S. Indiana University

Robin Massie

Priority Adjunct Assistant Professor, Department of Piano and Voice
B.M. Westminster Choir College of Rider University; M.M. Yale University

Sean McCarther

Associate Professor, Department of Piano and Voice
B.M. Baylor University; M.M., D.M. Indiana University

Adam McMahan

Assistant Professor, Department of Political Science
B.A. Bowling Green State University; M.S. Portland State University; Ph.D.
City University of New York

Jonathan Mendilow

Professor, Department of Political Science
B.A. The Hebrew University of Jerusalem; M.A. The Hebrew University of
Jerusalem; Ph.D. The Hebrew University of Jerusalem

Eri Millrod

Assistant Professor, Department of Theatre and Dance
A.B. Columbia University; M.A. New York University; Ph.D. Drexel
University

Miriam N. Mills

Associate Professor, Department of Theatre and Dance
B.A. Rutgers, The State University of New Jersey; M.F.A. Mason Gross
School of the Arts, Rutgers, The State University of New Jersey

Sharon Mirchandani

Professor, Department of Music Composition, History and Theory
B.M. Bowling Green State University; M.M. Temple University; Ph.D.
Rutgers University

Ahmad Mojiri

Associate Professor, Department of Mathematics
B.S. Isfahan University of Technology; M.S. Isfahan University of
Technology; Ph.D. University of Ottawa

Aaron J. Moore

Associate Professor, Department of Communication and Journalism
B.A. La Salle University; M.A. Temple University; Ph.D. Temple University

Mourya Reddy Narasareddygar

Assistant Professor, Department of Computer Science and Physics
B.A. Sri Krishnadevaraya University; M.S. North Dakota State University;
Ph.D. North Dakota State University

Stéphane Natan

Professor, Department of Languages, Literatures and Cultures
B.A. Université Jean Moulin Lyon 3, France; M.A. Université Lumière Lyon
2, France; Ph.D. Université Jean Moulin Lyon 3, France

Vanita Neelakanta

Professor, Department of English
B.A. Jadavpur University, India; M.A. Jadavpur University, India; Ph.D.
Brandeis University

Olivia Newman

Associate Professor, Department of Political Science
B.A. The Evergreen State College; M.A. The New School; Ph.D. The New
School

Carol J. Nicholson

Professor, Department of History and Philosophy
B.A. Earlham College; Ph.D. Bryn Mawr College

Seiwoong Oh

Professor, Department of English
B.A. Chung-Ang University, Seoul; M.A. West Texas A&M University; Ph.D.
University of North Texas

Jessica Oliano

Lecturer, Department of Communication and Journalism
B.A. Rider University; M.B.A. Rider University

Susan Onofrio

Priority Adjunct Assistant Professor, Department of Fine Arts
B.A. Muskingum University; M.A. Marshall University

Philip Orr

Priority Adjunct Professor, Department of Fine Arts
B.M. Rider University; M.M. Rider University

Anne R. Osborne

Professor, Department of History and Philosophy
B.A. New York University; M.A. Columbia University; Ph.D. Columbia University

Carolann Page

Priority Adjunct Assistant Professor, Department of Piano and Voice
B.M. The Curtis Institute of Music; Artist Diploma in Voice The Curtis Institute of Music

J.J. Penna

Associate Professor, Department of Piano and Voice
B.M. Binghamton University, State University of New York; D.M.A. UNIVERSITY OF MICHIGAN; M.F.A. Warren Wilson College

Francis A. Perrin

Priority Adjunct Assistant Professor, Department of Psychology
B.S. Stockton University; M.S. Temple University; Ph.D. Temple University

Sarah Perry

Assistant Professor, Department of Choral Studies, Music Education, and Sacred Music
B.S. Elizabethtown College; M.A., M.E., Ed.D. Teachers College, Columbia University

Pearlie Peters

Professor, Department of English
B.S. Grambling State University; Ph.D. State University of New York at Buffalo

Steven Pilkington

Associate Professor, Department of Choral Studies, Music Education, and Sacred Music
B.A. St. Olaf College; M.M. University of Illinois; Ph.D. Drew University

Mary Poteau-Tralie

Professor, Department of Languages, Literatures and Cultures
B.A. Temple University; M.A. Princeton University; Ph.D. Princeton University

Susan Power

Priority Adjunct Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Trinity College; Ph.D. University College Dublin

Kathy Kessler Price

Professor, Department of Piano and Voice
B.A. University of Richmond; M.M. University of Maryland; Ph.D. The University of Kansas, Lawrence

Jonathan Price

Priority Adjunct Assistant Professor, Department of Fine Arts
B.M. The University of Cincinnati, College-Conservatory of Music; M.M., Professional Studies Certificate Boston Conservatory

Magnolia Pérez-Garrido

Priority Adjunct Assistant Professor, Department of Languages, Literatures and Cultures
B.A. The College of New Jersey; M.A. Villanova University

William Quirk

Priority Adjunct Instructor, Department of English
B.A. University of Colorado; M.A. University of Washington

T. Oliver Reid

Assistant Professor, Department of Theatre and Dance
B.M. University of North Carolina School of the Arts

James E. Riggs

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Delaware Valley College; M.S. University of Massachusetts Amherst; Ph.D. University of Massachusetts Amherst

Jane E. Rosenbaum

Priority Adjunct Assistant Professor, Department of English
B.A. The City College of New York; M.A. University of Pittsburgh; Ph.D. University of Pittsburgh

Kelly Ross

Assistant Professor, Department of English
B.A. The College of William & Mary; M.A. The University of North Carolina at Chapel Hill; Ph.D. The University of North Carolina at Chapel Hill

Frank L. Rusciano

Professor, Department of Political Science
B.A. Cornell University; M.A. University of Chicago; Ph.D. University of Chicago

Erica J. Ryan

Associate Professor, Department of History and Philosophy
B.A. Sarah Lawrence College; A.M. Brown University; Ph.D. Brown University

Elizabeth S. Scheiber

Professor, Department of Languages, Literatures and Cultures
B.A. Western Kentucky University; M.A. Indiana University; Ph.D. Indiana University

Charles Schneider

Priority Adjunct Assistant Professor, Department of Fine Arts
B.M. Rutgers, The State University of New Jersey; M.M. The University of North Carolina-Greensboro; D.M.A. Rutgers, The State University of New Jersey

Reed A. Schwimmer

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.S. Rider University; M.A. Bryn Mawr College; Ph.D. University of Delaware

Elaine A. Scorpio

Associate Professor, Department of Psychology
B.A. Rhode Island College; M.A. Rhode Island College; Ph.D. Syracuse University

Kerrie Sendall

Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. California State University; M.S. California State University; Ph.D. University of Minnesota and Macquarie University

Raymond Setters, II

Priority Adjunct Assistant Professor, Department of English
B.A. Rider University; M.F.A. Rosemont College

Robin Shane

Assistant Professor, Department of Theatre and Dance
B.A. Wesleyan University; M.F.A. NYU, Tisch School of the Arts

Tom T. Shelton, Jr.

Associate Professor, Department of Choral Studies, Music Education, and Sacred Music
B.M., M.M. The University of North Carolina at Greensboro

Nikki Shepardson

Associate Professor, Department of History and Philosophy
B.A. University of Rochester; M.A. Rutgers, The State University of New Jersey; Ph.D. Rutgers, The State University of New Jersey

Gabriela W. Smalley

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.S. University of Maryland; Ph.D. University of Maryland

Bryan D. Spiegelberg

Associate Professor, Department of Chemistry and Biochemistry
B.S. Denison University; Ph.D. Duke University

Drue Stapleton

Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
A.A. Hudson Valley Community College; B.S. State University of New York at Cortland; M.Ed. Salisbury University; Ph.D. West Virginia University

Jay Stern

Assistant Professor, Department of Film and Television
B.A. Columbia University; M.A. European Graduate School

Joshua Stratton

Assistant Professor, Department of Chemistry and Biochemistry
B.A. Wartburg College; Ph.D. Colorado State University

Helen T. Sullivan

Priority Adjunct Assistant Professor, Department of Psychology
B.F.A. Saint Mary's College; M.S. Saint Louis University; Ph.D. Saint Louis University

Jack Sullivan

Professor, Department of English
B.A. Furman University; M.A. Columbia University; M.Phil. Columbia University; Ph.D. Columbia University

Hongbing Sun

Professor, Department of Geological, Environmental, and Marine Sciences
B.A. Nanjing University, China; M.S. Chinese Academy of Geological Sciences, Beijing; Ph.D. Florida State University

Stephanie Sussmeier

Assistant Professor-Librarian, University Libraries

Elizabeth Sutton

Priority Adjunct Assistant Professor, Department of Piano and Voice
MusEd Bowling Green State University; M.M. Cincinnati Conservatory of Music

Yoshi Tanokura

Assistant Professor, Department of Theatre and Dance
B.F.A. The Indiana University of Pennsylvania; M.F.A. The University of Connecticut; M.A. Central Saint Martins College of Art and Design

Robert D. Terrio

Associate Professor-Librarian, University Libraries
B.M. Berklee College of Music; M.M. University of Massachusetts Amherst; M.L.I.S. Rutgers, The State University of New Jersey

Alison D. Thomas-Cottingham

Associate Professor, Department of Psychology
B.S. University of Maryland; M.A. Binghamton University, State University of New York; Ph.D. Binghamton University, State University of New York

Victor R. Thompson

Associate Professor, Department of Sociology and Criminology
B.A. University of Illinois at Urbana-Champaign; M.A. Stanford University; Ph.D. Stanford University

Megan L. Titus

Associate Professor, Department of English
B.A. Muhlenberg College; M.A. Montclair State University; Ph.D. Ohio University

Sarah Trocchio

Assistant Professor, Department of Sociology and Criminology
B.A. Clark University; M.S.W. Boston University School of Social Work; M.A. Rutgers University; Ph.D. Rutgers University of Criminal Justice

Barry E. Truchil

Associate Professor, Department of Sociology and Criminology
B.A. American University; M.A. American University; Ph.D. Binghamton University, State University of New York

Kim Chandler Vaccaro

Associate Professor, Department of Theatre and Dance
B.A. University of California, Santa Barbara; M.A. University of California, Los Angeles; Ed.D. Temple University

Cynthia Vieth

Lecturer, Department of Communication and Journalism
B.A. Rutgers, The State University of New Jersey; M.C.I.S. Rutgers, The State University of New Jersey; Ed.D. Rowan University

Maria F. Villalobos-Buehner

Professor, Department of Languages, Literatures and Cultures
B.A. Universidad del Valle, Cali-Colombia; M.A. University of Portsmouth, Portsmouth-England; Ph.D. Michigan State University

Jason Vodicka

Associate Professor, Department of Choral Studies, Music Education, and Sacred Music
B.M., M.M. Westminster Choir College of Rider University; D.M.A. The University of Georgia

Shunzhu Wang

Professor, Department of Languages, Literatures and Cultures
B.A. Soochow University, Suzhou, China; M.A. Wayne State College; Ph.D. Purdue University

Lisa Warden

Lecturer, Department of Biology, Behavioral Neuroscience, and Health Sciences

Nancy C. Weber

Priority Adjunct Instructor, Department of Chemistry and Biochemistry
B.S. Alderson Broaddus University; M.S. The Pennsylvania State University

E. Todd Weber

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Slippery Rock University; M.S. The University of Illinois at Urbana-Champaign; Ph.D. The University of Illinois at Urbana-Champaign

Allison D. Weidhaas

Associate Professor, Department of Communication and Journalism
B.A. Rowan University; M.A. Rowan University; M.S. University of South Florida; Ph.D. University of South Florida

Sharon Whitfield

Assistant Professor-Librarian, University Libraries
B.A. University of Pittsburgh; M.L.I.S. University of Pittsburgh; Ed.D. Rowan University

Nancy A. Wiencek

Associate Professor, Department of Communication and Journalism
B.A. Douglass College, Rutgers, The State University of New Jersey; M.S. University of Louisiana at Lafayette; Ph.D. Rutgers, The State University of New Jersey

George Preston Wilson, Jr.

Assistant Professor, Department of Choral Studies, Music Education, and Sacred Music
B.S. Fisk University; M.M. Bowling Green State University; Ph.D. University of Missouri - Columbia

James Wojtowicz

Lecturer, Department of Sociology and Criminology
B.A. Rutgers University; M.S. Rutgers University

Sally Wolf

Priority Adjunct Assistant Professor, Department of Piano and Voice
B.M. Kent State University; Opera Diploma Curtis Institute Of Music

Yun Xia

Professor, Department of Communication and Journalism
B.A. Sichuan University, China; M.A. Sichuan University, China; Ph.D. Southern Illinois University

Sharon Q. Yang

Professor-Librarian, University Libraries
B.A. Beijing Foreign Studies University; M.S. Columbia University; D.L.S. Columbia University

Stefan Young

Professor, Department of Music Composition, History and Theory
B.M. Rollins College; Certificates American School of the Arts, Fontainebleau, France; M.M. The Juilliard School; Ph.D. Rutgers, The State University of New Jersey

Richard A. Zdan

Lecturer, Department of Sociology and Criminology
B.Sc. Carnegie Mellon University; M.A. The University of Chicago

Amy Zorn

Priority Adjunct Assistant Professor, Department of Piano and Voice
B.M. University of Wisconsin–Madison; M.M Boston University

Ava Baron

Professor Emerita, Department of Sociology and Criminology
B.A. Brooklyn College, C.U.N.Y.; M.A. New York University; Ph.D. New York University

Gary Barricklow

Professor Emeritus, Department of English
B.A. California State University, Sacramento; M.A. California State University, Sacramento; Ph.D. University of New Mexico

Barton Bartle

Professor Emeritus, Department of Music Composition, History and Theory
B.M. University of Michigan; M.M. University of Michigan; Ph.D. University of Illinois

Ciprian S. Borcea

Professor Emeritus, Department of Mathematics
B.S. University of Bucharest, Romania; Diploma in Mathematics University of Bucharest, Romania; Ph.D. University of Bucharest, Romania

Pamela Brown

Professor Emerita, Department of Communication and Journalism
B.A. Rider University; M.A. The Ohio State University; Ph.D. The University of Iowa

Richard Burgh

Professor Emeritus, Department of History and Philosophy
B.A. Rider University; M.A. University of Wisconsin; Ph.D. University of Wisconsin

Richard Butsch

Professor Emeritus, Department of Sociology and Criminology
B.S. University of Cincinnati; M.S. University of Cincinnati; Ph.D. Rutgers University

Inez Calcerano

Professor Emerita, Department of Arts and Sciences
A.B. Kalamazoo College; M.A. Miami University of Ohio

Thomas Callahan

Professor Emeritus, Department of History and Philosophy
B.A. State University of New York at Albany; M.A. University of Connecticut; Ph.D. University of Connecticut

James Carlson

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Fenn College; M.S. Ohio State University; Ph.D. Ohio State University

Harriet Chase

Professor Emerita, Department of Music Composition, History and Theory
B.M. University of Wisconsin; M.M. Eastman School of Music, University of Rochester; Ph.D. Indiana University

Patrick Chmel

Professor Emeritus, Department of Theatre and Dance
B.S. Bemidji State University; M.A. University of Missouri at Columbia; Ph.D. University of Missouri at Columbia

Mi-Hye K. Chyun

Professor-Librarian Emerita, University Libraries
B.A. Sungkyunkwan University, Seoul, Korea; M.L.S. University of Maryland

James M. Dickinson

Professor Emeritus, Department of Sociology and Criminology
B.A. University of Kent, Canterbury, UK; M.A. American University; Ph.D. University of Toronto

Mervin Dissinger

Professor Emeritus, Department of Psychology
B.S. Millersville State College; M.A. Temple University; Ph.D. Temple University

Michael Epstein

Professor Emeritus, Department of Psychology
B.S. University of Washington; B.A. University of Washington; Ph.D. University of Washington

Robert Evans

Professor Emeritus, Department of Arts and Sciences
B.A. Standord University; B.D. Princeton Theological Seminary; D.Theol. University of Basel, Switzerland

Thomas Faracco

Professor Emeritus, Department of Piano and Voice
B.M. Westminster Choir College; M.M. Westminster Choir College

Kenneth Fields

Professor Emeritus, Department of Mathematics
S.B. Massachusetts Institute of Technology; Ph.D. University of California at Berkeley

Joseph Flummerfelt

Professor Emeritus, Department of Choral Studies, Music Education, and Sacred Music
B.S.M. DePauw University; M.M. Philadelphia Conservatory of Music; D.M. (hon.) DePauw University; D.M.A. University of Illinois

Phyllis Frakt

Professor Emerita, Department of Political Science
B.A. Douglass College; M.A. Rutgers University; Ph.D. Rutgers University

Charles Frischmann

Professor Emeritus, Department of Music Composition, History and Theory
B.M. Westminster Choir College; M.M. Westminster Choir College

Marvin Goldstein

Professor Emeritus, Department of Psychology
B.A. Hofstra University; M.A. Hofstra University; Ph.D. New School for Social Research

Robert Good

Professor Emeritus, Department of History and Philosophy
A.B. Princeton University; M.A. University of Wisconsin–Madison; Ph.D. University of Wisconsin–Madison

Joseph Gowaskie

Professor Emeritus, Department of History and Philosophy
B.A. St. Norbert College; M.A. Catholic University of America; Ph.D. Catholic University of America

Anne Gray

Professor Emerita, Department of Piano and Voice
B.A. Sarah Lawrence College; M.M. New England Conservatory

James Guimond

Professor Emeritus, Department of English
B.A. Kalamazoo College; M.A. Ohio Wesleyan University; Ph.D. University of Illinois

Myra G. Gutin

Professor Emerita, Department of Communication and Journalism
B.A. Emerson College; M.A. Emerson College; Ph.D. University of Michigan

Mary Jo Hall

Professor Emeritus, Department of Geological, Environmental, and Marine Sciences
B.S. Pennsylvania State University; M.Ed. West Chester State College; Ph.D. Lehigh University

Henry Halpern

Professor-Librarian Emeritus, University Libraries
B.A. City College of New York; M.A. New York University; M.L.S. Pratt Institute

Jane Hettrick

Professor Emeritus, Department of Fine Arts
B.A. Queens College; M.M. University of Michigan; D.M.A. University of Michigan

John Hillje

Professor Emeritus, Department of History and Philosophy
B.J. University of Texas; M.A. University of Texas; Ph.D. University of Texas

Katharine Hoff

Professor Emerita, Department of English
A.B. Oberlin College; M.A. Yale University; Ph.D. Yale University

Kathryn Holden

Professor-Librarian Emeritus, University Libraries
B.A. William Smith College; M.A. Pennsylvania State University; M.S.L.S. University of Kentucky

Richard Homan

Professor Emeritus, Department of Fine Arts
B.A. University of Notre Dame; M.A. University of Minnesota; Ph.D. University of Minnesota

John Hulsman

Professor Emeritus, Department of English
B.A. St. Vincent College; Ph.D. Ohio University

Jonathan M. Husch

Professor Emeritus, Department of Geological, Environmental, and Marine Sciences
B.A. Colgate University; M.A. Princeton University; Ph.D. Princeton University

Judith Johnston

Professor Emerita, Department of English
B.A. Rice University; Ph.D. Stanford University

Marvin Keenze

Professor Emeritus, Department of Piano and Voice
B.M. Westminster Choir College; M.M. Westminster Choir College

Helen Kemp

Professor Emerita, Department of Choral Studies, Music Education, and Sacred Music
B.M. Westminster Choir College; D.M. (hon.) Westminster Choir College

Harvey R. Kornberg

Professor Emeritus, Department of Political Science
B.B.A. The City College of New York; M.A. Brown University; Ph.D. Brown University

Robin Leaver

Professor Emeritus, Department of Choral Studies, Music Education, and Sacred Music
Dipl. in Theol. Trinity College, Bristol, England; D.Theol. State University of Groningen, Netherlands

Mary Leck

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences

Phyllis A. Lehrer

Professor Emerita, Department of Piano and Voice
B.A. University of Rochester; M.S. The Juilliard School of Music

Marilyn Levitt

Professor Emerita, Department of Fine Arts
A.B. Syracuse University; M.A. Syracuse University

Joan Hult Lippincott

Professor Emerita, Department of Choral Studies, Music Education, and Sacred Music
B.M. Westminster Choir College; M.M. Westminster Choir College; , ,

Linda Materna

Professor Emerita, Department of Languages, Literatures and Cultures
B.A. Beloit College; M.A. University of Wisconsin-Madison; Ph.D. University of Wisconsin-Madison

Thomas Mayer

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. University of Tennessee; M.A. Johns Hopkins University; Ph.D. Louisiana State University

Katherine K. Maynard

Professor Emerita, Department of English
B.S. The College at Brockport: State University of New York; Ph.D. University of Rochester

Roderick A. McDonald

Professor Emeritus, Department of History and Philosophy
M.A. University of Aberdeen; M.A. The University of Kansas; Ph.D. The University of Kansas

E. Graham McKinley

Professor Emeritus, Department of Communication and Journalism
B.A. Yale University; M.M. Westminster Choir College, Rider University; Ph.D. Rutgers, The State University of New Jersey

Mary Morse

Professor Emerita, Department of English
B.A. St. Olaf College; M.A. University of Minnesota; Ph.D. Marquette University

Harry I. Naar

Professor Emeritus, Department of Fine Arts
B.F.A. The University of the Arts; M.F.A. Indiana University Bloomington

Jane Nowakowski

Professor-Librarian Emerita, University Libraries
B.M. Westminster Choir College; M.L.S. Rutgers, The State University of New Jersey

Thomas J. Parente

Professor Emeritus, Department of Piano and Voice
B.A. New Jersey City University; B.M. Manhattan School of Music; M.A. Rutgers, The State University of New Jersey; Ed.D. Teachers College, Columbia University

Chau Phan

Professor Emeritus, Department of Political Science
B.A. Marian College; M.A. University of Detroit; Ph.D. University of Denver

Marilyn Quinn

Professor-Librarian Emerita, University Libraries
B.A. Clark University; M.A. Brown University; M.L.S. Drexel University

Laura Brooks Rice

Professor Emerita, Department of Piano and Voice
B.M. Georgia Southern College; M.M. Indiana University

Jerry Rife

Professor Emeritus, Department of Fine Arts
B.S. Kansas State University; M.M. Kansas State University; Ph.D. Michigan State University

George Ritchie

Professor Emeritus, Department of Computer Science and Physics
B.S. Hampden-Sydney College; Ph.D. University of Pennsylvania

Deborah Rosenthal

Professor Emerita, Department of Fine Arts
A.B. Barnard College; M.F.A. Pratt Institute

Anne T. Salvatore

Professor Emerita, Department of English
A.B. Chestnut Hill College; M.A. The College of New Jersey; Ph.D. Temple University

Margaret R. Schleissner

Professor Emerita, Department of Languages, Literatures and Cultures
B.A. Kirkland College; M.A. Princeton University; Ph.D. Princeton University

Charles F. Schwartz

Professor Emeritus, Department of Mathematics
A.B. University of Pennsylvania; Ph.D. Rutgers, the State University of New Jersey

Harriett Schwartz

Professor Emerita, Department of Communication and Journalism
B.A. University of Maryland; M.S. Purdue University

Barry Seldes

Professor Emeritus, Department of Political Science
B.A. City College of New York; M.A. City College of New York; Ph.D. Rutgers University

Prakash Sharma

Professor Emeritus, Department of Sociology and Criminology
B.S. Agra University; M.S. Agra University; M.S. University of Guelph;
Ph.D. University of Georgia

John Sheats

Professor Emeritus, Department of Chemistry and Biochemistry
B.S. Duke University; Ph.D. Massachusetts Institute of Technology

Thomas Simonet

Professor Emeritus, Department of Communication and Journalism
B.A. Georgetown University; M.S. Columbia University; Ph.D. Temple
University

Ruth Simpkins

Professor Emerita, Department of Psychology
A.B. Roberts Wesleyan College; A.M. Temple University; Ph.D. Temple
University

Marcia Steinberg

Professor Emerita, Department of Sociology and Criminology
B.A. Hunter College; M.A. Columbia University; Ph.D. City University of
New York

John R. Suler

Professor Emeritus, Department of Psychology
B.A. State University of New York at Stony Brook; Ph.D. State University
of New York at Buffalo

Richard Swain

Professor Emeritus, Department of Fine Arts
B.A. Oberlin College; Ph.D. University of Michigan

Sharon Sweet

Professor Emerita, Department of Piano and Voice
B.S. Roberts Wesleyan College; M.A. Ithaca College

Frederick Turner

Professor Emeritus, Department of Communication and Journalism
B.S. Millersville State College; M.A. Temple University; Ph.D. Temple
University

Lise Vogel

Professor Emerita, Department of Sociology and Criminology
A.B. Radcliffe College; A.M. Harvard University; M.A. Brandeis University;
Ph.D. Brandeis University

Minmin Wang

Professor Emerita, Department of Communication and Journalism
B.A. Xian Foreign Languages University; M.A. Bowling Green State
University; Ph.D. Bowling Green State University

Samuel Weigh

Professor-Librarian Emeritus, University Libraries
B.A. Hong Kong Baptist College; M.S. Columbia University; M.A. Rider
University

Peter Wright

Professor Emeritus, Department of Music Composition, History and
Theory
B.S. Juniata College; M.A. Eastman School of Music, University of
Rochester; Ph.D. Eastman School of Music, University of Rochester

David Stanley York

Professor Emeritus, Department of Music Composition, History and
Theory
B.M. Yale University; M.M. Westminster Choir College

Robert Carwithen

Adjunct Professor Emeritus, Department of Choral Studies, Music
Education, and Sacred Music
B.M. Curtis Institute of Music; M.M. Westminster Choir College

Advanced Practice Registered Nurse (APRN)

Courses and Descriptions

APRN 5001 Socialization to the APRN Role 3 Credits

The course will examine the critical issues that define the APRN's scope of practice and nurse practitioner competencies. Issues related to health policy, interprofessional collaborative practice, team building, conflict resolution, and leadership will be discussed. Guidelines for resolving professional legal and ethical issues that are often confronted in APRN practice will be analyzed.

APRN 5002 Applied Theory for the APRN Role 3 Credits

This course will demonstrate the use of science-based theories to analyze healthcare delivery at the patient, family, community and organizational levels in order to improve health outcomes. Theories addressing nursing practice, teaching and learning, health behaviors, and families within the context of cultural influences will be explored. Issues related to ethical decision making and advocacy in APRN practice will be analyzed.

APRN 5003 Advanced Pathophysiology 3 Credits

This course analyzes alterations in various physiological systems. General physiological and pathophysiological principles that regulate inflammation, cellular/tissue repair, genetics, immunity, and cancer will be discussed. Pathophysiology of disease processes in primary care conditions across the lifespan will be examined.

APRN 5004 Clinical Prevention and Population Health 3 Credits

This course will enable students to analyze epidemiological and biostatistical data in the development, implementation, and evaluation of clinical prevention and population health initiatives. Concepts of public health, health promotion, morbidity and mortality, determinants of health, and cultural diversity and sensitivity will be incorporated into the advanced practice nursing role.

APRN 5005 Research and Quality Improvement 3 Credits

This course builds a foundation for advanced clinical scholarship and healthcare improvement while developing skills in analytical methods for evidence-based practice. Concepts of quality process, regulatory practices, root cause analysis, and problem identification will be explored.

APRN 5006 Health Delivery and Information Systems 3 Credits

This course focuses on trends, issues, and policies related to the transformation of the U.S. health care system. Emphasis will be placed on the economics of care and equity, access, and quality of the health care system. The role of the APRN in the utilization of information systems to reduce health disparities and promote quality initiatives will be presented.

APRN 5007 Advanced Physical Assessment 3 Credits

This course builds upon scientific underpinnings to enable the learner to develop a holistic approach to culturally sensitive health assessment including health related behaviors across the life span. The student begins to synthesize data in diagnostic reasoning to determine appropriate and effective healthcare strategies, including disease prevention, health promotion and health restoration. Prerequisite(s): APRN 5003.

Corequisite(s): APRN 5008.

APRN 5008 Advanced Pharmacology 3 Credits

This course is designed to meet the needs of APRNs that are eligible for prescriptive privileges. Content will focus on the pharmacological management of self-limited, episodic complaints and stable chronic disease states across the life span. Emphasis is placed on the decision-making process utilized to safely and effectively prescribe and monitor pharmacotherapeutics appropriate to the client situation. Prerequisite(s): APRN 5003.

Corequisite(s): APRN 5007.

APRN 5009 Primary Care of Young Adult 3 Credits

This course focuses on the care of young adults and women. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions as well as application of U.S. health promotion guidelines and screening for young adults and women. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for young adults and women. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5010.

APRN 5010 Young Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5009 - Primary Care of the Young Adult. The focus is on primary care of the young adult client and women. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5009.

APRN 5011 Primary Care of the Middle-Aged Adult 3 Credits

This course focuses on the health state of middle-aged adults. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions, as well as application of U.S. health promotion guidelines and screening for middle-aged adults. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of adults. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5012.

APRN 5012 Middle-Aged Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5011 - Primary Care of the Middle-Aged Adult. The focus is on primary care of common acute and chronic disease processes of the middle-aged population. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5011.

APRN 5013 Primary Care of the Older Adult 3 Credits

This course focuses on the health state of older adults. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions, as well as application of U.S. health promotion guidelines and screening for older adults. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of older adults. Prerequisite(s): APRN 5011, APRN 5012.

Corequisite(s): APRN 5014.

APRN 5014 Older Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5013 - Primary Care of the Older Adult. The focus is on primary care of common acute and chronic disease processes of the older adult population. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5011, APRN 5012.

Corequisite (s): APRN 5013.

APRN 5015 Primary Care of the Pediatric and Perinatal Patient 3 Credits

This course focuses on the health state of pediatric and perinatal patient populations. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions as well as application of U.S. health promotion guidelines and screening for pediatric and perinatal patients. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of adults. Prerequisite(s): APRN 5013, APRN 5014.

Corequisite(s): APRN 5016.

APRN 5016 Pediatric Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in Primary Care of the Pediatric and Perinatal Patient. The focus is on primary care of common acute and chronic disease process of the pediatric and perinatal populations. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 120 clinical hours. Prerequisite(s): APRN 5013, APRN 5014.

Corequisite(s): APRN 5015.

APRN 5017 Acute Care I 3 Credits

This course examines advanced practice nursing and healthcare management of adolescents and young adults in acute care settings. This course provides a foundation for the advanced practice nurse working in acute care practice settings to have entry level competencies for the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) to build on the core competencies for all nurse practitioners. Emphasis on the nurse practitioner role as a collaborative healthcare team member and advocate for adolescents and young adults in the acute care setting. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5018.

APRN 5018 Acute Care I Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in Acute Care I. This course focuses primarily on transitioning from an expert registered nurse role to the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) student role that is working in a variety of acute care settings. Students will utilize the necessary resources in health care to optimize health in these populations. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5017.

APRN 5019 Acute Care II 3 Credits

This course is designed to foster development of clinical competency in acute care settings for middle-aged adult patients. This course provides a foundation for the advanced practice nurse working in acute care practice settings to have entry level competencies for the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) to build on the core competencies for all nurse practitioners. Emphasis on the nurse practitioner role as a collaborative healthcare team member and advocate for adolescents and young adults in the acute care setting. Prerequisite(s): APRN 5017, APRN 5018.

Corequisite(s): APRN 5020.

APRN 5020 Acute Care II Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in Acute Care II. This course focuses primarily on transitioning from an expert registered nurse role to the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) student role that is working in a variety of acute care settings. Students will utilize the necessary resources in health care to optimize health in these populations. Prerequisite(s): APRN 5017, APRN 5018.

Corequisite(s): APRN 5019.

APRN 5021 Acute Care III 3 Credits

This course is designed to foster development of clinical competency in acute care settings for the older adult and frail elderly patient population (ages 65-74 and 75+). This course provides a foundation for the advanced practice nurse working in acute care practice settings to have entry level competencies for the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) to build on the core competencies for all nurse practitioners. Emphasis on the nurse practitioner role as a collaborative healthcare team member and advocate for adolescents and young adults in the acute care setting. Prerequisite(s): APRN 5019, APRN 5020.

Corequisite(s): APRN 5022.

APRN 5022 Acute Care III Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in Acute Care III. This course focuses primarily on transitioning from an expert registered nurse role to the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) student role that is working in a variety of acute care settings. Students will utilize the necessary resources in health care to optimize health in these populations. Prerequisite(s): APRN 5019, APRN 5020.

Corequisite(s): APRN 5021.

APRN 5023 Advanced Psychopharmacology 2 Credits

The course builds on the knowledge from advanced pharmacology and provides an in-depth examination of drug classifications related to the treatment of psychiatric disorders across the lifespan. The pharmacokinetics and pharmacodynamics of psychopharmacologic agents and therapeutic treatment plans will be emphasized. Special topics on issues related to polypharmacology, drug abuse, and psychiatric-mental health nurse practitioner prescribing issues are discussed. Prerequisite(s): APRN 5008

Corequisite(s): APRN 5024, APRN 5025.

APRN 5024 Psychiatric Assessment and Diagnosis 3 Credits

This course will examine the advanced concepts of assessment and differential diagnosis in advanced practice, psychiatric-mental health nursing. The Diagnostic and Statistical Manual of Mental Disorders (DSM-5) will be used in clinical decision making to determine screening, assessment, diagnostic studies, and differential diagnoses for psychiatric disorders across the lifespan. A holistic approach to assessment will be incorporated by examining social, genetic, cultural, ethnic, and gender elements in psychiatric illnesses. Prerequisite(s): APRN 5007

Corequisite(s): APRN 5023, APRN 5025.

APRN 5025 Foundations in Therapy 2 Credits

This course provides a foundation in the application of psychotherapeutic interventions to the management of psychiatric disorders for individuals, families, and groups across the lifespan. The practice of psychotherapy and crisis intervention in the psychiatric-mental health nurse practitioner role will be examined in relation to cultural, ethical, moral, and legal issues.

Corequisite(s): APRN 5023, 5024.

APRN 5026 Psychiatric-Mental Health I 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse adult populations. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for adults with psychiatric disorders. Prerequisite(s): APRN 5023, APRN 5024, APRN 5025

Corequisite(s): APRN 5027.

APRN 5027 Psychiatric-Mental Health Practicum I 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health I. The focus is on psychiatric health care of adults. Students will utilize the necessary resources in health care to optimize health in this population. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5026.

APRN 5028 Psychiatric-Mental Health II 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse older adult populations. Complex disorders will be examined. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for older adults with psychiatric disorders. Prerequisite(s): APRN 5026, APRN 5027

Corequisite(s): APRN 5029.

APRN 5029 Psychiatric-Mental Health Practicum II 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health II. The focus is on psychiatric health care of older adults. Students will utilize the necessary resources in health care to optimize health in this population. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5028.

APRN 5030 Psychiatric-Mental Health III 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse pediatric populations and families. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for children with psychiatric disorders. Prerequisite(s): APRN 5028, APRN 5029

Corequisite(s): APRN 5031.

APRN 5031 Psychiatric-Mental Health Practicum III 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health III. The focus is on psychiatric health care of pediatric patients and families. Students will utilize the necessary resources in health care to optimize health in these populations. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5030.

Arts & Sciences (AS)

AS 691 Arts & Science Internship 1-3 Credits

This course requires 15 hours for each credit for which the student enrolls. The internship requires on-site participation at a pre-approved site. Students may enroll for a maximum of 3 credits.

Prerequisite(s): graduate standing.

Arts Management and Executive Leadership (AMEX)

Courses and Descriptions

AMEX 500 Managing Arts & Institutions - Principles & Practice 3 Credits

Provides survey of key challenges and opportunities in institutional planning and development, strategy, organization, marketing, fund development, budgeting, leadership and governance in arts institutions, with a particular focus on nonprofit arts. Vision-centric, mission-driven, integrated management perspectives are applied to case-based research, analysis and reporting, supported by multiple assigned readings and required online discussion posts. This course is a pre-program requirement for the MA in Arts Management and Executive Leadership degree. Students who have successfully completed AAD 121 (or similar, at another undergraduate program) as an undergraduate may be waived from completing this course by the program director and dean.

AMEX 509 Intersecting Arts and Law 3 Credits

Intersecting Arts & Law explores multiple, diverse cases and conclusions which have impacted and continue to shape the arts. Masters candidates compare and contrast past and present legal cases, statutes and mandates on a host of issues ranging from artistic expression as hate or sex speech to the rights and responsibilities of artists and institutions pursuant to ownership and rights of dissemination. Current legal standing and its evolution, essential tools, trends and best practices will be assessed via case-based research and reporting grounded in comparative analysis of historical, contemporary and prescient topics relating to the intersections of law and artistic rights and freedoms.

Prerequisite(s): AMEX 500.

AMEX 512 Advancing Arts & Institutions 3 Credits

This course will provide integrated strategies for long-term fund development, sustainability, and legacy building in the arts. Funding and other stakeholder-driven advancement follows vision and, in an industry that relies heavily on stakeholder investment to propel artistic and programmatic success, the need for strong vision-driven leadership is critical. Building upon foundational information delivered in AMEX 500, the course explores and assesses multiple, diverse approaches to vision-centered, mission-driven institutional advancement and fund-development from all philanthropic sectors impacting the nonprofit arts. Students will read about and discuss executive and managerial strategies and application of current tools, trends and best practices employed in fund development planning and program implementation, assess and address institutional readiness as part of an integrated systems approach to management, understand how to develop an effective case for giving, and how to build and maintain invaluable donor relationships across multiple sectors. Learning what inspires and guides donor processes and giving practices further informs discussion. Readings, strategic prompt posts and responses and regularly-scheduled online discussion will proactively engage candidates in essential topics relating to course goals/outcomes and advance vision-centered, mission-driven, strategically-oriented best practices for Arts leaders/executives.

Prerequisite(s): AMEX 500 or permission of program director and dean.

AMEX 515 Advocating Arts & Institutions 3 Credits

This course will discuss the legal, societal and ethical perspectives on arts policy, practice, and procedures in the workplace. Arts often reflect, challenge and at times define social, political and ethical constructs and push the envelope on what is acceptable – aesthetically, morally and otherwise – in contemporary society. Explore the ever-evolving relationship of arts and society through the lens of institutional responsibility as interpreted by the artist, the law, and by contemporary civic and social considerations. Masters candidates will research and discuss key historical moments and movements which have impacted the arts and institutional governance and administration; current legal, social and ethical issues impacting artistic expression and institutional leadership today; and key policy decisions past, present and under consideration which impact the ways by which institutions make and disseminate art, govern themselves, and carry out key administrative functions. Case-based comparative research and analysis of effective leadership initiatives, policies and best practices around key legal, social and ethical issues impacting institutions further informs discussion and the development of a comprehensive institutional responsibility proposal for an arts institution with which each student will align him or herself.

Prerequisite(s): AMEX 500.

AMEX 518 Engaging Arts & Institutions 3 Credits

This course provides an integrated approach to vision-centric, mission-driven community building, audience development, and engagement in the arts. In a time when active participation in live arts is challenged with multiple and ever-advancing competing arts and entertainment options, platforms and pricing structures, the ability and wherewithal for arts institutions to effectively get their message through is more essential than ever. Building upon foundational information delivered in AMEX 500, this course explores challenges and opportunities in winning the hearts and minds of a diverse, often fickle and ever-changing demographic, psychographic and socio-economic public, engaging them in new and meaningful ways. Masters candidates research and discuss the importance of vision, mission and integrated management approaches to branding and messaging; trends in audience participation; efficacy of traditional and contemporary approaches to institutional branding, audience development and community-building around the arts; evolving modes and tools for effectively identifying, programming for, marketing to and engaging diverse audiences; efforts to integrate live arts and new technologies to market, and expand access to and engage audiences in the arts in new ways. Case-based comparative research and analysis of effective branding and marketing campaigns further informs discussion and the development of a comprehensive market analysis and brand expansion proposal for an arts institution with which each student will align him or herself.

Prerequisite(s): AMEX 500.

AMEX 521 Surveying Arts Institutions 1.5 Credits

Comprehensive, case-based assessment of significant institutions, institutional governance & leadership as a means of guiding final synthesis and capstone development.

Prerequisite(s): AMEX 500.

AMEX 524 Leading & Governing Arts Institutions 3 Credits

This course will discuss strategic methods, analytical approaches, and best practices for arts executives, board members, and stakeholders. Strategic, adaptive, entrepreneurial governance and management of arts institutions is essential for long-term survival and success, particularly in ever-shifting social, political, economic and technological landscapes. Building upon foundational information delivered through all prior coursework, this course explores the roles, relationships and responsibilities of institutional leaders and how strategic approaches to defining roles, finding and keeping the right people to fill them, strengthening the relationships and identifying and fulfilling responsibilities at all levels drives success. Graduate candidates research, compare and contrast leadership styles, tools and best practices in ethically and responsibly governing and managing institutions, with particular consideration given to the specific needs of the nonprofit arts. Topics of discussion and debate will include ethics and aesthetics, diversity and equity, arts and civic responsibility, and freedom and constraint in strategically planning, governing and managing the production and dissemination of art. Multiple case-based analytical studies resulting from in-depth, thesis-oriented governance and/or leadership focus surveys developed throughout the program further inform discussion and the development of a comprehensive leadership strategy for an arts institution with which each student will align him or herself. Requires participation in a full-day Board and Executive Management Leadership Seminar/Workshop intensive on the Rider campus at end of the session.

AMEX 590 Synthesizing Arts Management 1.5 Credits

Capstone (Thesis or Leadership Project) research, analysis, orientation & preparation in context of all prior coursework. This course involves thesis research and analysis, thesis development and writing application OR* project research and analysis, project development, management and reporting. *Capstone option (thesis or leadership project) is chosen in coordination with graduate capstone advisor and upon approval by WCA Dean.

Prerequisite(s): AMEX 521.

AMEX 593 Applying Arts Management 3 Credits

This course represents the graduate capstone requirement and is taken subsequent to the preparatory "Synthesizing Arts Management" (AMEX 590) course wherein the graduate candidate will identify, design, prepare for and subsequently complete either a traditional, written graduate thesis path of completion or an in-depth, comprehensive leadership project - either option upon approval, and under advisement of, program director and designated faculty member.

Prerequisite(s): AMEX 524.

Athletic Leadership (ATHL)

Courses and Descriptions

ATHL 501 Sport Psychology 3 Credits

This course covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics. Emphasis is placed on applications for maximizing effectiveness while serving in the position of coach or administrator.

Prerequisite(s): Permission of Program Director.

ATHL 502 Evidence-Based Research and Athletics 3 Credits

This course in research methods prepares the student to understand materials and issues associated with but not limited to the logic of the scientific method, research design, and qualitative and statistical analysis of data. Students will be afforded the opportunity to conduct research in the course on topics.

Prerequisite(s): Permission of Program Director.

ATHL 503 Strength, Speed, and Conditioning 3 Credits

Emphasis will be placed upon assessment, description, and analysis of sport movement and designing training programs to enhance performance variables. While this course will assist those who desire to sit for the National Strength and Conditioning Association's (NSCA) Certified Exam, it is NOT a preparation course for the NSCA-CSCS exam.

Prerequisite(s): Permission of Program Director.

ATHL 504 Seminar in Athletic Training 3 Credits

Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

Prerequisite(s): Permission of Program Director.

ATHL 505 Athletic Communication and Marketing 3 Credits

Seminar in Sports Media and Communication is a critical examination of the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): Permission of Program Director.

ATHL 506 Athletic Facilities Management 3 Credits

Seminar in Facilities Management and Event Planning provides an examination of principles and techniques of planning and operating sport facilities. Emphasizes the principles and concepts of organization and administration including communication, personnel management, management of physical resources, and risk management. Examines a variety of sport operations such as indoor stadiums, athletic field complexes, and managing recreation and intramural activities.

Prerequisite(s): Permission of Program Director.

ATHL 507 Athletic Governance and Policy 3 Credits

Students in this course will explore principles, techniques, and processes related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. Studying collegiate athletic administration involves interpreting NCAA By-laws, including a comparison between Division I, II, and III compliance regulations. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level. At the end of the course, students will understand the primary duties of the athletic director and the intricacies of managing an intercollegiate athletic program.

Prerequisite(s): Permission of Program Director.

ATHL 508 Athletic Risk Management & Wellness 3 Credits

Students in this course will explore proactive approaches to managing risks associated with conducting health, physical education, recreation and outdoor education programs. This course will emphasize safety as a foundation of quality program planning. Students will study governing associations and leadership/management skills required to be successful in the world of college athletics.

Prerequisite(s): Permission of Program Director.

ATHL 509 Seminar in Legal and Ethical Issues in Athletics 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues that will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

Prerequisite(s): Permission of Program Director.

ATHL 514 Women and Sports 3 Credits

Women and Sport focuses on women winning access to the playing field as well as the front office in sport. Using research-based materials, course members will gain an understanding of how women have been involved in sport and physical activity, how women have struggled for widespread recognition and legitimacy, how women continue to carve out their role in shaping sport as it is known today, in the future, and society's ongoing conversation about what it means to be a female athlete or a woman working in sport.

ATHL 515 Athletic Leadership 3 Credits

In any profession or endeavor, the attitude and overall culture of a team is a direct reflection of its leadership. In the sports realm, there are many different leadership approaches that have been considered effective. This course will provide an overview of these approaches based on a comprehensive review of the literature related to sport leadership. The primary goals of this course are to help current and aspiring sport leaders gain a better understanding of effective leadership, to provide the necessary tools in developing effective leaders, and to provide networking opportunities for individuals who share similar goals and aspirations across various domains. The leadership principles may be beneficial to individuals in a variety of settings. This course offers coaches, administrators, players, and scholars the opportunity to learn and apply leadership principles within various contexts.

ATHL 516 Sport Analytics 3 Credits

This course will discuss the theory, development, and application of analytics in sports and the application of analytics in sports for purposes of in-game strategy, player performance, team management, sports operations, and fantasy competitions. Students will be introduced to topics in the applied analysis of sports, with a focus on supporting team decision-makers and applying modern, practical analytic techniques to sports data in search of actionable insight and a competitive edge. The four major team sports of North America (football, baseball, basketball, and hockey) will be the primary subjects of study, but the course's learning objectives are universally applicable to all sports. Emphasis will be placed upon becoming familiar with the full analytic life-cycle: asking productive and relevant research questions, finding the correct data, applying the appropriate tools, discovering insights, and clearly communicating results.

ATHL 517 Athletic Finances 3 Credits

Athletic Finances examines the financial tools that sports managers use to run their sport businesses. Course members will explore traditional and innovative methods of revenue acquisition and financial management in sports organizations, the financial business structure of sports organizations, and the financial planning and forecasting processes that make organizations effective. Various other aspects of finance are discussed as they relate to sports organizations, including the time value of money, capital structuring, stocks and bonds, inventory management, and higher education.

ATHL 518 Athlete Development 3 Credits

Athlete Development focuses on sports-specific learning to prepare athletes with the necessary critical elements leading to an improvement in their chosen sport, emphasizing technical development, physical preparation and sports specific knowledge. The course follows the Long-Term Athlete Development (LTAD) model, an approach to athlete-centered sport that combines skill instruction with long-term planning and an understanding of human development. The LTAD model integrates current research on talent development and assessment into practice to help sport leaders plan athletic development across the life span or design detailed programs for a particular group, including those with physical and cognitive disabilities.

ATHL 519 Ethics in Sport 3 Credits

Ethics in Sport focuses on how people should treat one another in sport settings and, therefore, on a critical examination of ethical issues central to contemporary sport. As a class we will thus consider these questions: 1) What place, if any, does sport have in a good life? 2) What counts as cheating in sport, and why is it morally wrong? 3) Is it morally permissible to use performance-enhancing drugs or genetic forms of enhancement to boost athletic performance? 4) How is it possible to achieve equality for women in sports in a culture where dominant sports tend to privilege such traditionally male features as strength, power, and speed?

ATHL 520 Psychological Skills Training 3 Credits

Psychological Skills Training (PST) teaches techniques grounded in mental training principles used by elite athletes, business professionals, and special operations personnel to achieve and maintain the highest levels of resilience, readiness, and performance. Classic PST techniques that define the canon of mental toughness will be presented with history and theory and extensive embedded self-exercises teaching self-awareness training, goal setting, imagery and visualization, attentional and concentration techniques, arousal and intensity regulation, and stress management. A complete mindfulness sports performance enhancement (MSPE) protocol using the latest research from the sport sciences, psychology, and neuroscience will be presented including guidance for building mindfulness skills essential to consistent, optimal performance.

ATHL 521 Clinical Sport Psychology 3 Credits

Clinical Sport Psychology presents a new way of thinking about the psychological processes that are involved in attaining and maintaining sport expertise. The course, based on clinical and sport research, bridges the gap between clinical and sport psychologists by presenting a model that connects athletic performance, basic psychological processes, and relevant empirical findings. Successful completion of course materials provides the practitioner with greater understanding of the varying dimensions of clinical phenomena and how nonclinical, subclinical, and clinical issues affect athletic performance and the overall well-being of athletes.

ATHL 522 Assessment in Sport Psychology 3 Credits

Assessment in Sport Psychology integrates and synthesizes the theoretical concepts of sport and performance psychology into meaningful application. Emphasis is placed on creating and then assessing performance-enhancement programs for clients through the exploration and application of theory, research, and intervention strategies to assist clients pursuing excellence. The construct of excellence is thoroughly explored, including common roadblocks and the type of contexts in which the skills and knowledge are used in the field of clinical mental health counseling, sport and performance, intrapersonal relationships, and career.

ATHL 550 Current Issues in Athletics 3 Credits

This course will provide students the opportunity to survey the various sub-disciplines related to coaching and athletic administration, and their methods of inquiry. The course will place emphases on critically appraising research literature, and data collection, data organization and analyses for various research questions.

ATHL 601 Concepts and Principles of Coaching 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director.

ATHL 602 Developing a Philosophy of Coaching 3 Credits

Athletic Coaching – Developing a Philosophy provides the opportunity to learn and reflect upon the necessary skills for a successful coach. The course will cover numerous topics to allow course members the opportunity to learn, evaluate and self-reflect on their abilities and skills as a coach, and to develop a personal philosophy of coaching. The course addresses the differences in levels of competitive sports, the personal roles that coaches should exhibit, the professional roles expected and the organizational influences on the world of a coach in order to maximize the development of athletes and team while progressing from one season to the next in the annual coaching cycle.

Prerequisite(s): Current enrollment in ATHL 601 or satisfactory completion of ATHL 601.

ATHL 621 Concepts and Principles of Athletic Administration 3 Credits

Concepts and Principles of Athletic Administration explores the complexities of intercollegiate athletics while explaining the organizational structures, key players, terms, and important issues most relevant to the growing but often misunderstood fields of recreational studies, sports management, and athletic administration. Intercollegiate athletics create unique challenges to higher education—for while they are closely integrated into their institutions—athletic programs often operate outside of traditional university governance structures while contributing significantly to a school's culture, identity, and financial outlook. Course members in this course will explore principles, techniques, and process related to the management of college athletics, characterize the critical steps to getting hired in collegiate athletics, and prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level.

ATHL 622 Administrative Decision-Making 3 Credits

Students in this course will explore principles, techniques, and process related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level.

Prerequisite(s): Current enrollment in ATHL 621 or satisfactory completion of ATHL 621.

ATHL 650 Internship of Athletic Leadership 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director.

ATHL 651 Internship of Athletic Administration 3 Credits

The internship affords students professional experience with an organization where the course theory can be applied to best practices. The internship is developed in consultation with the student, the student's academic advisor and the Internship. A learning/work plan is prepared by the student for approval by the site supervisor, both of whom share responsibility for the internship.

Prerequisite(s): Permission of Program Director or approval by CLAS Dean's Office.

Business Education-GR (BSED)**Courses and Descriptions****BSED 504 Curriculum Strategies and Evaluative Concepts in Business Education 3 Credits**

Designed to provide the student with effective curriculum strategies and evaluative concepts relative to business and office education programs in elementary, secondary, and post-secondary public and private schools. Students are acquainted with appropriate curriculum and evaluation models designed to plan, organize, implement, revise and assess instruction and programs. Improvement of curriculum and evaluation is the primary goal.

BSED 506 Administration and Supervision of Business and Vocational Education 3 Credits

A study of the administrative and supervisory problems associated with business and vocational education at the local, county, state, and federal levels. Administrative and supervisory improvement strategies are explored. Major topics include: educational administrative structures; role of the supervisor of instruction; state and federal legislation; certification; personnel policies; ethical conduct; funding procedures; and public relations. Improvement of administration and supervision of business and vocational education is the primary goal.

BSED 509 Principles and Strategies of Vocational and Cooperative Education 3 Credits

Designed as one of the specialized courses in the preparation of business and marketing education teachers and teacher-coordinators of cooperative work experience programs. The philosophy and history of education for and about work, including technology, are studied along with the principles and strategies for organizing and administering vocational cooperative education programs. Developmental/reflective evaluative techniques will be applied for the assessment of self, students, instruction and selected case studies. Current instructional concepts, organizational and administrative strategies, legislative enactments, and regulations pertaining to the employment of youth are included. Special attention is given to the role of vocational student organizations and advisory committees.

BSED 519 Directed Study and Research in Business Education 1-3 Credits

Provides the student with an opportunity to complete a project, resolve a problem, or pursue a major activity that will make a contribution to the teaching profession in business or marketing education. Each participant, under the supervision of a senior faculty member, follows a planned sequence of professional activity that culminates in a completed written project. Professional teacher development is the primary goal.

Communication-GR (COMM)**Courses and Descriptions****COMM 500 Communication Processes in Health 3 Credits**

Interpersonal and nonverbal communication are the two areas of general communication studies that health communication draws from most heavily. These concepts affect relationships in healthcare, the ability to understand and process medical information, the efficacy of messages in relation to nonverbal indicators, and how bad news, another major concept in health communication, is received. This class will provide a comprehensive understanding of these concepts, how they are utilized in the field of health communication, and the ways in which the two areas intersect, all in the broader context of understanding health communication as a discipline.

COMM 501 Medical Concepts and Health Writing 3 Credits

Improving the way that health is communicated requires the ability to understand health information at the initial – and often complex – level. In particular, health communication aims to provide information to underserved populations, who may suffer from lack of education and poor health literacy. This class will provide students with a basic understanding of medical terminology and the ability to comprehend and explain scientific literature. Students will develop the skills needed to translate medical information for a wide range of audiences. Students will also be required to apply these concepts through the creation of multiple types of health writing assignments.

COMM 503 Crisis Communication 3 Credits

Crises can bring harm to an organization's brand and threaten its reputation. Knowing how to anticipate and plan for problems and challenges, and knowing how to manage a crisis if it does strike, are key factors in effective crisis communication. Students will develop theoretical knowledge of issues management and crisis communication and, through case studies and hands-on assignments, will learn to think strategically about importance of public opinion, the role of the media and social media in a crisis, how to develop effective crisis-related messages, and learn how to evaluate crisis responses.

COMM 504 Strategic Writing 3 Credits

This course will provide students with the tools to think and write strategically in today's dynamic, hyper-competitive, and ever-changing global marketplace. Students will gain competency in a number of areas including: creating a clear, concise, and compelling strategic outline, understanding the need to customize strategies and tactics for different stakeholders, and focusing on actionable intelligence and outcomes-based writing. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 505 Health Communication Theory 3 Credits

Health communication is driven by a set of principles that guide the conceptualization, design, and implementation of new health guidelines and interventions. The ultimate goal of health communication is to increase health and satisfaction by encouraging healthier behaviors, medical compliance, and more efficient communication of medical information. This class is designed to give an overview of the major fields of study in health communication through examination of the major theoretical perspectives therein. Topics include the different areas of study in which health communication theories are based, how theory is used to support the initial design of research studies and interventions, and the situations in which the use of more than one theoretical approach is warranted.

COMM 507 Presentation Strategies 1.5 Credits

This course develops the ability to create presentations for targeted audiences. Students will gain competency in preparing purposeful messaging and incorporating visual presentation tools, with a goal of delivering impactful professional presentations that achieve results. The course will focus on developing the knowledge and skills to influence and inspire internal and external constituencies, which is a key part of communication practitioners' jobs.

COMM 510 Theory and Practice of Negotiations 3 Credits

This course provides students with the theory and skills required to be effective negotiators. Students will learn how to prepare for and participate in negotiations by applying various strategies and tactics. This course will be evenly split between theoretical lecture/discussion and practical application / skill development, including in-class simulations.

COMM 520 Social Media Planning 3 Credits

Social media has changed the way that organizations communicate with their various audiences blurring the lines of public relations, marketing and customer service. Communication professionals must be able to think strategically across all social media platforms to effectively define their brand, speak in an authentic voice and build relationships. Through case study analyses, best-practices research and hands-on assignments, students will learn how to strategically plan a social media campaign through research, content development and curation, and evaluation using meaningful metric analysis.

COMM 525 Visual Communication 1.5 Credits

This course introduces students to the theory and practice of visual communication design. Students will learn how to critique, evaluate, and edit visual communications with specific audiences in mind. Possible topics include the elements and principles of design, color theory, visual perception theories, typography, symbols, brand identity, logos, propaganda, and information design in both current and historical contexts. Readings and viewings of relevant films may be required components of the course. Assignments will afford students opportunities to analyze and critique visual communications for various professional environments.

COMM 531 Legal/Ethical Issues for Professional Communication 3 Credits

Provides students with the knowledge to understand and apply ethical guidelines and current laws and regulations relative to workplace communication, as well as the legal limits impacting professional communications. This knowledge is particularly important for those in or aspiring to managerial/senior staff roles.

COMM 545 Applied Research Methods in Communication 3 Credits

Develops the knowledge and skills to use various research methods and analysis techniques to provide critical information for, and assist with, business decisions. It will cover developing research tools, gathering and verifying information, analyzing, and reporting results. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 551 Cultural Conceptions of Health and Illness 3 Credits

Culture affects every relationship dynamic, the way nonverbal communication is interpreted, how audiences are selected for health campaigns, the ability and willingness to use technology, and the way bad news is broken to individuals and families. In health communication, culture comprises both the general conceptions of what culture is – the characteristics of a particular social, ethnic, or age group – as well as other factors. This class will examine the specific variables of culture in this setting, how the variables are both unique and interconnected, and the wide-reaching impact culture has in health. The first half of the course explores the variables that culture includes. The latter part of the course takes these variables and demonstrates the roles they play in real-world health communication settings.

COMM 552 Communication in a Multicultural Workplace 1.5 Credits

Instructs in the use of diversity and cultural communication principles and strategies to effectively manage a culturally diverse workforce. This course will help organizational leaders understand how gender, ethnic, religious, and other differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relations, and ultimately, good productivity for the organization.

COMM 553 Communication in a Global Market 1.5 Credits

Examines communication between and among businesses in a global context. The course presents communication as an essential pivot around which revolve the social and institutional relationships within and among nations. Hence, exploring global communication structures and tendencies is an important means to understanding social, cultural, economic and political impositions on global business. The emerging role of technologies of communication, such as social media, will be a particular focus of this course.

COMM 554 Effective Group Communication 1.5 Credits

Encompasses the study of individual and group behavior in the workplace. Emphasis is placed on individual behavior and group dynamics, application of current group theories, effective group communication, and effective leadership/followership skills. A comprehensive review of these processes, as well as others, will allow students to examine their role in groups as well as teams.

COMM 555 Organizational Culture & Storytelling 1.5 Credits

Organizational culture matters and, according to the research, it is the secret to the most successful organizations in the world. This course will define organizational culture, explore how culture is communicated through organizational mission and value statements, and provide insight into leveraging culture for organizational performance. Students will explore a variety of topics related to organizational culture including the role of the leader, its importance to recruiting and hiring, how to share culture through organizational practices and storytelling, and how to leverage culture to inspire change and innovation.

COMM 556 Special Topics in Communicatio 3 Credits**COMM 557 Special Topics in Communicatio 3 Credits****COMM 558 Health Communication Campaigns 3 Credits**

Campaigns are the primary tool used in health communication to disseminate messages and effect change. Campaigns can provide information on a specific issue or to a specific community, encourage preventative health behaviors, demonstrate behaviors (such as performing self-skin exams for skin cancer or the proper way to follow medication instructions), put forward suggestions for a healthy lifestyle, raise awareness, or offer support. At times, multiple messages may be present in one campaign. This class will examine the different types of health campaigns and the impact a health communication campaign can have. Students will learn how to analyze a health campaign through its full cycle. The class will also serve as a foundation for the capstone class of the Master's in Health Communication program.

COMM 559 Communicating Crises in Health 3 Credits

In the health setting, multiple events can be considered a crisis: the outbreak of a disease, contamination of food, a natural disaster, and more. The response to a crisis can have a significant, long-lasting impact on the organization's reputation. The development of a crisis plan, which sets forth guidelines for an organization's response to a crisis and involves multiple steps, can be completed before any events occur and can significantly affect the way an organization handles a crisis. This class explores the types of crises that occur in health communication, the factors involved in a crisis, the development of a crisis plan, and the effects of a crisis on an organization.

COMM 560 Communication Issues for Leaders 3 Credits

Focuses on analysis of contemporary issues that highlight the necessity of effective communication for those in a leadership position. Through analysis and discussion of historical and current challenges faced by organizations, students will learn to recognize how effective leaders apply successful communication strategies. Case studies will also explore the effect that poor communication choices have had on organizations. Emphasis will be placed on discussion, research, and presentation.

COMM 561 Business of Media 3 Credits

This course will take you behind the scenes in the media industry to investigate how its economic structure affects the content we see and the composition of audiences. We will explore tensions between traditional and emerging media as they compete to retain existing customers and acquire new ones. You'll learn to critically analyze how concepts such as profits, politics, ownership, data-gathering and agenda setting relate to media. Students will learn some fundamental business concepts, which will enable them to communicate about business decisions and engage in important debates about the future of media. Students completing this course will understand the economics (and economies) of media and thus be better prepared to become leaders in media organizations whether by way of a career in media sales, marketing, advertising, public relations, journalism, creative design, production, broadcasting, etc.

COMM 563 Digital Media Communication 3 Credits

Looks at the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COMM 564 Communication and Diversity in the Workplace 3 Credits

The culture of work, like society, is multicultural. More than ever, today's organizational leaders, including CEOs, managers and supervisors, must understand how to use diversity and cultural communication principles and strategies to effectively nurture and promote a culturally diverse workforce. This course helps organizational leaders understand how gender, ethnic, religious, and other social and cultural differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relationship, and ultimately, good productivity for the organization.

COMM 565 Rel Comm: Interpersl, Group, Intercultur 3 Credits

Introduces students to seminal and contemporary research in the area of relational communication. Broken down into three modules, the curriculum will be divided among the topics of Interpersonal Communication, Group Communication, and Intercultural Communication. In the first, emphasis will be placed upon theories of human communication, verbal and nonverbal communication, gender, and conflict. The second module will explore various elements of group communication, including leadership and followership, roles, status, power and problem solving and decision making. The third module will introduce students to the study of intercultural communication, with its focus on the relationship between culture and communication.

COMM 590 Independent Research and Study 3 Credits

Independent Research and Study allows students in good academic standing to investigate topics of interest under faculty supervision.

COMM 599 Capstone Seminar 3 Credits

As the final course in the curriculum, students will use concepts, theories and practices from previous courses as they contemplate complex issues. As a comprehensive assessment of student learning, a committee will ask students to respond to questions related to course material. This course will culminate with several research-based position papers on topics related to individual student interests. This course should be taken in a student's final semester. Minimum required GPA of 3.0; permission of instructor required.

COMM 600 Capstone: Implementing a Health Communication Campaign 3 Credits

The ability to implement, evaluate, revise and successfully launch a campaign is a critical skill for all individuals who work in health communication. Campaigns are the primary tool used by health communicators to initiate change in a community, although their implementation will not always be a fluid, one-step process. This class will require students to select a local health campaign and evaluate the campaign from start to finish. Students will complete the Master's program in Health Communication with a complete proposal for a health communication campaign and the skills needed to analyze an existing campaign from beginning to end.

COMM 690 Research and Creative Expressi 1-4 Credits

Conducting (CR)

CR 501 University Chorale 1 Credits

The University Chorale provides the fundamentals of artistic choral singing. Open to all students by audition, this ensemble maintains a high level of performance and pedagogy. May be repeated for credit.

Prerequisite(s): Permission of instructor.

CR 505 Advanced Conducting 3 Credits

A continuation of the conducting studies begun in CR 215 and CR 315, this course aims to be more student-centered, following the process from repertoire planning to the final performance. Intensive score preparation, advanced rehearsal techniques, performance practice and baton technique.

Prerequisite(s): CR 315.

CR 509 Symphonic Choir 1 Credits

A large mixed chorus comprised of students above the lower division, including graduate students from all disciplines. The ensemble regularly performs in the region and focuses on the major choral/orchestral repertoire along with a wide variety of repertoire for large mixed chorus. Placement hearing required.

CR 511 Westminster Choir 1 Credits

A highly select ensemble that performs and records a wide variety of choral repertoire, the Westminster Choir regularly tours nationally and internationally, and aspires to the highest professional standards. Members are selected by audition from all Westminster students above the freshman level. The requirements for selection include good academic standing, strong musicianship, and superior vocal talent. Auditions are held in the fall semester and students participate for the academic year.

CR 513 Williamson Voices 1 Credits

A chamber choir with a unique mission that combines performance and outreach education. Repertoire is chosen from a broad spectrum of literature, including world music and contemporary choral works. Auditions are held in the fall semester and students participate for the academic year.

CR 515 Westminster Kantorei 1 Credits

An early music vocal chamber ensemble specializing in music before 1750, with occasional forays into more contemporary repertoire. [Although the ensemble will generally consist of around 16 singers, the exact make-up of the ensemble will vary from semester to semester, depending on the works to be studied and performed.] Repertoire will include works for vocal ensemble and works featuring significant solo work. The entire ensemble will rehearse three hours per week. Keyboardists may audition for the ensemble. Auditions are held in the fall semester and students participate for the academic year.

CR 517 Master Singers 1 Credits

A mixed ensemble serving as the choir for Graduate Conducting, Sacred Music and Music Education majors. Repertoire consists of a wide variety of choral works drawn from all style periods, works appropriate for use in churches and in schools at the secondary and post-secondary levels. Four semesters are required for all graduate Choral Conducting majors. Two semesters are required for Sacred Music majors, and those Music Education majors who have selected conducting as their performance field. This ensemble is non-auditioned and open to all students.

CR 524 Vocal Techniques for Choirs 3 Credits

Study of vocal techniques appropriate for use in choral rehearsals and for teaching class voice. Techniques for effecting change in group vocal productions are discussed, including such topics as the identification of group vocal problems and mental and physical preparation of a group for good vocal production. Techniques to be developed include (1) how to communicate information about vocal technique to amateur singers, (2) exercises used to develop choral sound by improving diction, dynamics, legato, staccato, martellato, high and low registers, resonance, vowel modification, etc., (3) how to train singers to use a vocal production specifically appropriate to the repertoire of various style periods and the demands of individual composers, and (4) conducting methods for good choral and vocal training. Recommended both for conducting majors and for students in other major programs, including those for whom the voice is not the primary performance medium.

CR 607 Conducting Performance 1 Credits

Graduate Conducting, Sacred Music and Music Education students (with a conducting concentration) enroll for Conducting Performance in the semester of their recital or major conducting project.

CR 621 Choral Conducting I 3 Credits

A study of conducting to develop technique through facial expression, breathing, alignment and gesture. Emphasis is placed on developing and refining a process of score study. This course will assist conductors in evaluating their conducting and preparing them to make conducting decisions based upon score study.

CR 622 Choral Conducting II 3 Credits

In addition to building on the conducting skills taught in Conducting I, this course will focus upon acquisition of a broad range of rehearsal methods and techniques and gaining a comprehensive knowledge of choral ensemble warm-up philosophies, methods and techniques. Conductors will continue to study various approaches to score analysis that aid in preparation for rehearsal. Participants in the course will be required to submit a comprehensive case study which focuses on rehearsal technique and rehearsal procedures.

Prerequisite(s): CR 621.

CR 624 Conducting Skills 3 Credits

CR 625 Choral Pedagogy 3 Credits

This online course reorganizes the components of choral rehearsal technique to reflect a harmonic approach to rehearsing, teaching, and learning. It is designed to emphasize the importance of teaching audition and rehearsing choirs within a harmonic context.

CR 627 Choral Literature I 3 Credits

A broad survey of choral repertoire from Gregorian chant to present-day compositions. Emphasis is placed upon knowing the availability and sources of music of major composers and of music appropriate for performance in today's churches and schools.

CR 628 Choral Literature II 3 Credits

A study of selected major choral works, involving analytical and stylistic study. Oral reports by class members on assigned topics.

CR 641B Conducting Primary 1 Credits**CR 641D Conducting Primary (Elective) 1 Credits****CR 641F Conducting Primary 1 Credits****CR 681 Baroque Performance Practice 3 Credits**

A practical and theoretical study of issues of Baroque performance practice, including tempo, phrasing and articulation, ornamentation, rhythmic alternation, qualities of sound, continuo practice, influence of dance, affect and national idioms. Primary source materials will serve as the basic core of readings for the course, supplemented and supported by recordings and contemporary resources. In the later half of the semester, students will perform in a series of master classes.

Prerequisite(s): for undergraduates MH 248, TH 241.

CR 690 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

CR 710 Seminar in Choral Literature 3 Credits

An intensive study of a specific area of choral history and literature. The content of this course will vary from semester to semester with the special interests and qualifications of the professor teaching it. Emphasis is placed upon in-depth study of the selected repertoire. May be repeated for credit.

Prerequisite(s): undergraduate must have Permission of Instructor.

CR 720 Graduate Conducting Forum 1 Credits

A conducting seminar that focuses on the synthesis of gesture, score study and pedagogy. Select repertoire and research materials will be conducted, analyzed and discussed. Focus will be given to orals preparation and current choral conducting issues. This course may be repeated for credit.

CR 750 Choral Pedagogy Capstone 3 Credits

Independent research leading to a completed capstone project such as pedagogical publication or presentation, development of an original or unique method of instruction, instructional materials, or case study, or musical performance. The project must be approved by the department.

Counseling Substance Aware (CNSC)

Courses and Descriptions

CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 590 Counseling Internship I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School counselors, student assistance coordinators (SACs) and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled. Students must be supervised by an SAC.

Prerequisite(s): COUN 585 OR COUN 580 OR COUN 581 OR CNSC 580 OR CNSC 581. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

CNSC 591 Counseling Internship II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School counselors, Student Assistance Coordinators (SACs), and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. Students must be supervised by a SAC. The approval and cooperation of the intern's field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

Counseling (COUN)

Courses and Descriptions

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 501 Coaching Principles and Practices 3 Credits

The course covers core coaching competencies, including coaching screening and orientation, fundamental skills, assessment, approaches for organizations, and coaching ethics. The course meets all 30-hour educational requirements for certification as a Board Certified Coach (BCC) through the Center for Credentialing and Education and is required course for the 60-hour BCC educational requirements.

COUN 502 Prevention and Intervention for Body Image and Disordered Eating 3 Credits

In this course, students will gain an understanding of strategies relevant to the prevention and treatment of body image and disordered eating concerns. Prevention strategies applicable to individual client care, small group work, and large group programming will be discussed. Students will also learn how to communicate and teach prevention strategies to parents, teachers, partners, and others who may be key influences in body image and/or disordered eating issues. In addition, various treatment and intervention approaches for individuals already exhibiting problematic body image and/or disordered eating attitudes and behaviors will be reviewed.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 510 Approaches to Family Counseling 3 Credits

Presents a basic understanding of major approaches of family counseling. Family counseling approaches covered include structural, systems, Ackerman, Satir, and analytical. These approaches are presented as related to major problem centered family concerns--child-rearing concerns, alcohol, drugs, child abuse, dysfunctional marriage, divorce, etc. Emphasizes self-awareness as related to family development.

Prerequisite(s): COUN 500, CNPY 502, or permission of instructor or advisor.

COUN 512 Disaster Response, Trauma, Crisis, and Grief Counseling 3 Credits

This course is an introduction to the research and practice of disaster response, trauma, crisis, and grief and loss counseling in clinical and educational settings. Course will include an overview of the impact of disasters, crisis, and trauma-causing events on individuals, communities, and educational settings and of the impact of working with traumatized clients on practitioners. Emphasis will be placed on prevention, intervention, and postvention practices in working effectively with individuals, families, and groups of people in the midst of traumatic situations and who have experienced loss, crisis, disasters and trauma-causing events.

Prerequisite(s): COUN 550.

COUN 515 Substance Abuse Counseling 3 Credits

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

COUN 516 Strategies in Addiction Counseling 3 Credits

This is an experiential and laboratory-based experience in which students will learn to implement evidence based counseling techniques that are utilized in the field of substance abuse counseling. Students will be able to expand their basic counseling skills and techniques learned in COUN 550, as well as become exposed to techniques that are unique to addiction counseling. In addition to learning assessment skills, students will learn interventions that include motivational interviewing, relapse prevention, alternative therapies, group counseling, family counseling, and others. This course will also focus on issues of ethics and prevention in counseling.

Prerequisite(s): COUN 550.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 521 Cultivation and Implementation of Trauma-Informed Counseling in Community & Educational Settings 3 Credits

This course takes the knowledge of trauma-informed practice in the counseling profession to the cultivation and implementation of trauma-informed practices in various counseling settings. The course will provide an introduction and more in depth understanding of various trauma-informed models such as the Sanctuary Model, and how to work with various systems to implement trauma-informed practices. Specifically, leadership will be a major component of the course, as discussion and assignments will focus on how to implement and educate others in agencies or educational settings on how to adapt a trauma-informed culture in the setting. Specific steps to implement trauma-informed practices and trauma-informed advocacy will be covered throughout the course. Furthermore, there will be an emphasis on how to collaborate with the community, teachers, administrators, and staff to promote trauma-informed practice, trauma-informed treatment, enhancing resiliency, and how to lead the implementation of trauma-informed care in schools and community settings with concrete steps.

COUN 525 Gender Issues in Counseling 3 Credits

Examines the psychological, physiological, historical, and socio-cultural factors that affect the development of women and men across the life span and discusses implications for counseling. Focuses on relevant gender issues including gender bias and equity, misdiagnosis, self-esteem, depression, violence and sexual abuse, the feminization of poverty, and the importance of relationship for women. Presents an overview of feminist psychotherapy and explores the context of the behavioral, emotional and biological problems that impact on mental health. Also discusses the emerging men's movement and trends in counseling men; introduces gay and lesbian issues, the issues of minority women, and factors in counseling the HIV/AIDS client.

COUN 528 Introduction to Creative Arts and Specializations in Counseling 3 Credits

This course provides an introduction to the basic concepts and practices of the uses of creative arts in clinical and educational counseling settings, including the history, current and future trends, rational, and benefits of using artistic methods in counseling. The class is designed for mental health and school practitioners interested in gaining a deeper understanding of the neuroscience, theory and practice of the use of mediating properties found in the creative arts such as visual arts, imagery, dance/movement, music, humor, and drama and other modalities such as animal-assistance, horticulture, and wilderness/nature therapy. Emphasis will be placed on experiential learning activities and exercises to introduce these modalities as they are used independently or in conjunction with the therapeutic process. The function and range of professional practices and specialization/credentialing processes will also be introduced in this course.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 535 Holistic Wellness Counseling 3 Credits

Based on current methods and research, students will explore holistic wellness (e.g., spirituality, self-direction, work and leisure, friendship, and love) positive psychology (e.g., hope, forgiveness, etc.), and human change from personal and interpersonal perspectives.

Prerequisite(s): CNPY 502.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

COUN 555 Introduction to Play Therapy 3 Credits

Introduction to Play Therapy provides an overview of the fundamental principles of play therapy, including history, theories, skills, and applications. The course emphasizes developing the therapeutic relationship with children and utilizing play to facilitate children's self-expression, self-understanding, and personal growth. Observation of and supervised experiential activities in play therapy with children are an integral part of the course.

Prerequisite(s): CNPY 502, can take concurrently with COUN 550.

COUN 556 Parent-Child Play Therapy 3 Credits

Parent-child play therapy builds upon the introduction to play therapy course and focuses on helping parents/caregivers enhance their relationship with children through play therapy modalities. Students will learn the history, principles, and skills of filial therapy, with an emphasis on Child-Parent Relationship Therapy (CPRT). Students will have opportunities to strengthen their play therapy skills, develop the ability to conduct CPRT, and learn how to facilitate systemic changes in children's lives through working with parents/caregivers. This course contains an experiential component including in-class role-playing and supervised parent-child play therapy experiences with parents/caregivers.

Prerequisite(s): CNPY 502, COUN 550, EDPS 503, COUN 555.

COUN 580 Elementary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 581 Secondary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 582 Coaching Practicum 3 Credits

A 30-hour supervised experience in coaching with individuals, groups, or organizations. Includes seminar discussions, observations of recorded sessions, session analyses, and group supervision with the faculty supervisor. Provides the coach in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of coaching services. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on coaching services as they address the needs of clients. This course is designed to fulfill the practice requirements for certification as a Board Certified Coach through the Center for Credentialing and Education.

Prerequisite(s): COUN 500 or COUN 501, CNPY 502, COUN 505, and permission of instructor.

COUN 585 Clinical Mental Health Counseling Practicum 3 Credits

A supervised experience in counseling and consulting techniques in mental health facility, community counseling agency, or college setting. Includes seminar discussions, interview analyses or audiotape/videotape observations, and individual supervision with the instructor. For the experienced counselor or the advanced counselor in training who desires to review and/or strengthen individual counseling and consulting techniques. A field placement of 100 hours is required with a minimum of 40 direct contact hours with clients. Students registering for this course should contact the instructor the semester prior to the course being offered.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 586 Practicum II 1 Credits

The continuation of Practicum, this 1-credit course is required for those students who were unable to complete the 100-fieldwork hours of Practicum in the fall or spring semester. Students will continue at their Practicum fieldwork site and will be responsible for completing the remainder of their 100-hours. A grade will not be granted in Practicum until the successful completion of Practicum II. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor, director, and professor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator.

Prerequisite(s): COUN 580 or CNSC 580 or COUN 581 or CNSC 581 or COUN 585 and all other required course work must be completed or in progress. Program director approval with professor of record approval is required.

COUN 590 Internship in Counseling I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

Prerequisite(s): COUN 580 or COUN 581 or COUN 585 or CNSC 580 or CNSC 581. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

COUN 591 Internship in Counseling II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 or concurrent enrollment. All other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

COUN 592 Internship III 1-3 Credits

The continuation of Internship I, this 1 to 3-credit course is required for those students who were unable to complete the 300-fieldwork hours of Internship I in the fall or spring semester. Students will continue at their Internship I fieldwork site and will be responsible for completing the remainder of their 300-hours. A grade will not be granted in Internship I until the successful completion of Internship III. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator. Clinical coordinator approval is required. **Prerequisite(s):** COUN 590 and all other required course work must be completed or in progress and permission of the clinical coordinator is required.

Prerequisite(s): COUN 590.

COUN 593 Internship IV 1-3 Credits

The continuation of Internship II, this 1-credit course is required for those students who were unable to complete the 300-fieldwork hours of Internship II in the fall or spring semester. Students will continue at their Internship II fieldwork site and will be responsible for completing the remainder of their 300-hours. A grade will not be granted in Internship II until the successful completion of Internship IV. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator. Clinical coordinator approval is required.

Prerequisite(s): COUN 590, COUN 591 and all other required course work must be completed or in progress and permission of the clinical coordinator is required.

COUN 600 Independent Study and Research in Counseling Services 1-3 Credits

Students may take two independent studies. However, under special circumstances, such as students seeking certifications (e.g., Student Assistance Coordinator), students may be approved by their advisor to take up to six COUN 600 3-credit courses for a total of 18 credits.

COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

Prerequisites: COUN 590.

COUN 690 Internship in Counseling Speciality I 3-6 Credits

This internship provides on-the-job clinical experience in approved settings. Placement is selected based on students' specialty area goals and must be approved by the faculty advisor the semester prior to actual placement. Students must also submit in writing a description of clinical activities available in the field site before the placement is approved. Students will be required to attend a weekly seminar during which time each student will present and/or discuss legal, ethical, multicultural, contemporary, and clinical issues in her/his specialty area.

Counseling Psychology (CNPY)

Courses and Descriptions

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 503 Psychological Development of the Adult and Aging 3 Credits

Surveys psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human adult development and transitions throughout the adult life span. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the adult and aging will be examined.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

CNPY 515 Consultation in School and Agency Settings 3 Credits

This course provides an introduction to school and agency based consultation theories and practices. Contemporary models of consultation are presented with students' emphasis on mental health, behavioral, and systems approach. In addition to the study of conceptual models, the development of skills in the consultation process in school and/or agency settings is emphasized. Students engage in behavioral consultations with consultees in approved placements.

CNPY 516 Advanced Psychopathology 3 Credits

An in-depth study of psychopathology with emphasis on developmental and personality disorders, and physiological disturbances. Includes assessment, classification, and treatment with emphasis on utilization in a variety of counseling and school settings. Biological, pathological, pharmacological bases of mental disorders are introduced and discussed in relationship to specific disorder classifications.

Prerequisite(s): CNPY 514 or permission of instructor.

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

Curriculum & Instruction (CURR)

Courses and Descriptions

CURR 501 Coaching Principles and Practices 3 Credits

This course is an introduction to the profession of coaching for educators. It is designed to fulfill the educational requirements for certification as a Board Certified Coach through the Center for Credentialing and Education (CCE). The CCE competencies for certification provide the basis for course material.

CURR 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design for educators who work in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

CURR 508 Organizing and Administering Cooperative Work Experience Programs 3 Credits

An overview of the current administrative and instructional strategies used in organizing and administering cooperative work experience programs at the secondary and post-secondary levels. Up-to-date concepts are reviewed relative to program approval, teacher coordinator certification, work agreements, labor laws, funding, reporting supervision of student learners, related instruction, student wages, and vocational student organizations. Evaluation of and improvement in the organization and administration of cooperative work experience programs are the goals of the course.

CURR 510 Reflection and Mentoring in Professional Teaching Practice 3 Credits

This course serves as an introduction to professional teaching work in classrooms. The hands-on work in the course complements required classroom observations and reflections. The course uses participants' classroom observations and reflections as the bases for targeted, practical discussions and study on topics such as classroom management, teacher identity and diversity, teaching and content, asking for feedback, and working with mentors.

Prerequisite(s): Permission of Program Director.

CURR 517 Teaching and Learning Number and Operations 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Content and Mathematical Practices.

CURR 520 Teaching and Learning Geometric Understanding 3 Credits

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 522 Teaching and Learning Measurement and Data 3 Credits

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

CURR 523 Teaching and Learning Mathematics in the High School 3 Credits

This course addresses issues central to teaching and learning mathematics in the high school; building learning communities, how students learn mathematics, use of worthwhile mathematical tasks, instructional modes, technology options, and assessment to inform instruction. Mathematical topics examined are number and quantity, algebra, trigonometry, geometry, and statistics and probability, and modeling. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 524 Teaching Mathematics in the Middle School 3 Credits

This course has been designed to guide both in-service and pre-service teachers towards growth in teaching mathematics in middle school classrooms, according to the best of current practices. It is accepted that teaching and learning is an ongoing process throughout our careers. Teaching math well requires: a) Deep understanding of the mathematics content, b) Understanding of how students develop mathematical ideas, and c) The ability to shape appropriate learning environments and tasks. Realistically, the process of teaching mathematics, how student learn it, and how to build appropriate learning environments in courses like this one is only the first step towards developing the content and pedagogical skills needed to teach in the 21st century. The objective is to help students construct ideas that take them in the right direction, providing models for the continued long-term learning they will develop with their own classrooms clearly in mind. According to the best of current practice, this involves learning through exploration, inquiry and discovery. As students communicate and then reflect on teaching situations, they will form what has been described as a community of practice, a prototype for how groups of educators join forces, over months and years, to strengthen both their understanding and school practice.

CURR 526 Place Value Instruction: Navigating the Decimal 3 Credits

K-8 teachers examine the theory and practice of K-8 place value instruction during a weeklong course. Incorporating the ideas of the successful CONNECT-ED project, this seminar will examine place value theory and model instructional design that traces children's developmental levels and aligns with national and state standards. Participants will work with peers and experienced University faculty to design longitudinal instructional modules on other math topics. By engaging in this multi-grade design process, teachers will examine new ideas about mathematics, children's mathematical thinking, and mathematics instruction. Participants can earn professional development hours or college credit.

CURR 527 Curricular and Instructional Design for Fraction Understanding 3 Credits

K-8 teachers examine the theory and practice of K-8 fraction instruction during a weeklong course. Based on the successful CONNECT-ED project, this seminar will model how to design fraction instruction that traces children's developmental levels, and aligns with national and state standards. Participants will work with peers and experienced University faculty to design similar instructional activities. By engaging in this multi-grade design process, teachers will examine new ideas about mathematics, children's mathematical thinking, and mathematics instruction. Participants can earn professional development hours or college credit.

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

CURR 532 Strategies for Curriculum Change 3 Credits

This course will examine organizational skills and knowledge necessary to effect curriculum development and change, K-12. The course will address the socio-political context of curriculum change along with alternative strategies for initiating, implementing and sustaining standards-based curriculum improvements. Topics of study include strategic planning, problem-solving strategies, needs assessments, curriculum alignment, program evaluation, staff development and the organization of staff members for collaborative deliberation and decision making as essential means for promoting successful curriculum change at all levels of schooling. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531.

CURR 533 Elementary School Curriculum 3 Credits

A review of principles, curriculum, and methodology in elementary education, examined in the framework of social, cultural, and psychological developments. Recent developments in theory and empirical knowledge are analyzed. Emphasizes developing the content and organization of an integrated curriculum with a concern for individual differences with provision for social environments best adapted to fulfill basic needs and interests.

Prerequisite(s): CURR 531.

CURR 534 Secondary School Curriculum 3 Credits

A survey of the changing aims and programs of the secondary school. General, specialized, vocational, and activity programs are discussed with an analysis and evaluation of recent curriculum developments and projects. Current issues and controversies, in addition to research findings affecting secondary curriculum, are studied.

Prerequisite(s): CURR 531.

CURR 535 Theory and Practices of Bilingual Education 3 Credits

Introduces the rationale and research as a basis for bilingual education as well as the varied and current approaches to implementing programs. Implications drawn from the social, psychological, and linguistic problems of bilingual learners are considered as they apply to the needs, goals, and issues of bilingual/bicultural programs.

CURR 536 Special Studies in Curriculum, Instruction, and Supervision 3 Credits

The content of this course varies for each offering. In-depth treatment of issues, problems, concerns, or developments in curriculum, instruction and/or supervision will be provided. Topics such as global education, teaching and learning styles, classroom management, etc., are announced in advance and serve as the focus of course content.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, and national school leadership standards.

Prerequisite(s): CURR 531.

CURR 541 Assessment and Student Learning 3 Credits

This course provides hands-on opportunities to create and design varied classroom assessments that help teachers align their teaching goals with student learning goals. With a focus on NJ Student Learning Standards across the curriculum content areas and grade levels, assessments will be designed for use in individual teaching practice and with a variety of diverse learners. Topics include designing assignment rubrics and effective essay prompts as well as developing evaluation criteria.

Prerequisite(s): CURR 510, CURR 700.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

CURR 552 Creative, Ethical Teacher Leadership 3 Credits

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

CURR 580 Action Research Tchg & Learn 3 Credits**CURR 585 Practicum Conducting Action Rsch 3 Credits****CURR 590 Seminar and Practicum in Curriculum, Instruction and Supervision 3 Credits**

Taken at the completion of all course work in the program. Students study in seminar fashion the current literature and research in the general areas of curriculum, instruction and supervision. Each student is involved in an individualized field experience. Typically the experience involves work with supervisory assistance in a selected segment of the student's school district, or in an approved location. The cooperation of the administrative staff of the student's school district is essential for the effective completion of this project. The instructor is free to observe the project in progress, and to evaluate the completed research project and the finished project paper.

Prerequisite(s): all course work including EDUC 500, permission of instructor.

CURR 592 Internship III 1-3 Credits

The continuation of Internship I, this 1 to 3-credit course is required for those students who were unable to complete the 300-fieldwork hours of Internship I in the fall or spring semester. Students will continue at their Internship I fieldwork site and will be responsible for completing the remainder of their 300-hours. A grade will not be granted in Internship I until the successful completion of Internship III. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator. Clinical coordinator approval is required.

Prerequisite(s): COUN 590 and all other required course work must be completed or in progress and permission of the clinical coordinator is required.

CURR 600 Independent Study and Research 1-3 Credits

Course content varies with academic research interests of students who wish to engage in independent study related to the overall content of curriculum, instruction and/or supervision.

CURR 640 Teaching and Learning Physical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected physical science (physics and chemistry) topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 641 Teaching and Learning Life Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 642 Teaching and Learning Earth and Space Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 643 Engineering Solutions to the Challenges of Contemporary Science Issues 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 644 Teaching and Learning Chemical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be placed on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

CURR 650 Understanding Gifted Learners 3 Credits

The course explores the ways in which the gifted and talented can differ from more typical learners in terms of their cognition, social-emotional dimensions, behavior, and long-term development. It focuses on theories of intelligence, differing conceptions of giftedness and talent development, and learning processes. Some specific topics include underachievement, perfectionism, dual exceptionalism, gender issues, and underserved populations. The course also addresses the ways in which gifted education can evolve to fit the demands and opportunities embedded in complex, 21st-century socioeconomic, cultural, and technological contexts.

CURR 652 Differentiating Instruction for the Gifted and Talented 3 Credits

This course provides the rationale and practical strategies for effective instructional differentiation for the gifted and talented within and beyond the regular classroom. Participants will learn how to differentiate within subject areas by adjusting content, process, product, and learning environment to meet the needs of learners. They also will explore the nature and nuances of differentiation by ability, readiness, and interest, as well as the implications of instructional differentiation for formative and summative assessment. Throughout the course they will design and share examples of differentiation including tiered assignments, complex instruction, independent studies, graphic organizers, and learning contracts.

CURR 654 Innovative Instructional Strategies for Gifted Education 3 Credits

This hands-on, experiential course immerses participants in simulations and analyses of new and revised student-centered teaching models and strategies that are conducive to creative and critical thinking, advanced content mastery, and the invigoration of students' interests. Participants analyze the potential of each model/strategy while considering the ways in which it can apply to content learning in various subject areas/domains. The course also engages participants in studying the fundamental principles of program design in gifted education so they can make the best possible use of the instructional models and strategies.

CURR 656 Creative, Interdisciplinary Thinking 3 Credits

This course facilitates creative thinking through the exploration of important insights from a wide variety of disciplines in the social sciences, humanities, natural sciences, and education. The process of creative association enables participants to combine diverse, remotely associated constructs to create new products and processes. Applications of interdisciplinary thinking to curriculum and instruction are explored. These applications include novel methods for curriculum integration, discovery and development of children's interests, and instructional modifications for the gifted and talented. Exploration of concepts and processes in multiple academic domains and professional fields also provide appreciation for the domain-specific natures of giftedness and creativity.

CURR 660 Authentic Data in the Elementary STEM Classroom. 3 Credits

Young learners can think deeply about content and make meaningful connections between their experiences, natural phenomena, and authentic data when teachers integrate data in purposeful ways. In this course, teachers construct student-centered STEM investigations integrating real-world scientific and mathematical data and build their understanding of the theoretical basis for this work. Participants gain knowledge of STEM resources, learn to access entry points for STEM in elementary classrooms and foster engaging contexts, like engineering, coding, and NASA mission exploration. Teachers explore the synergies between Common Core State Standards and Next Generation Science Standards for a productive and exciting learning environment that prepares students for ongoing interest in STEM. This course is recommended as a foundation for the STEM certificate program.

CURR 661 Authentic Data in the Secondary STEM Classroom 3 Credits

Middle and High School students are capable of deep sense making when teachers utilize engaging STEM classroom practices to teach content with authentic data connections. In this course, teachers learn to apply research-based best practices central to today's classrooms. In a collaborative professional learning environment, they build knowledge of resources for accessing, analyzing, and making use of authentic data in meaningful activities. Coursework includes planning student-centered lessons that integrate data, building cultural relevance with engaging phenomena, and developing meaningful assessments for STEM activities. Participants identify how to integrate engineering design into the STEM classroom and learn how to represent the Nature of Science as students develop conceptual understanding and apply critical thinking to real-world decisions. A library of content rich lessons becomes available to all participants through a shared online community. This course is recommended as a foundation for the STEM certificate program.

CURR 662 Eyes on Earth: Teaching Earth Science from Space (PK-8) 3 Credits

This course will take participants through a journey about space exploration and specific NASA missions that examine components of earth. Participants will learn science content grounded in Earth's Lithosphere, Hydrosphere, Atmosphere, and Biosphere. By learning to use authentic data from NASA and other sources participants will experience an exploratory approach to learning about the Earth, and then bring these experiences to their own classrooms. Teachers will utilize several web-based tools and real-time data along with the three-dimensional learning in the Next Generation Science Standards to create lessons that can be used directly in the classroom.

CURR 663 Lessons from the Ocean: Science on the Water Planet (Grades 2-12) 3 Credits

Bring the ocean into your classroom by using Earth's waters as a context for standards-based STEM content. The ocean is critical to the functioning of the Earth system, and is an authentically integrated context for learning about topics such as density, weather and climate, heat transport, environmental issues, biogeochemical cycles, mathematics, and much more. Access a myriad of data sets to apply science concepts and make connections between the ocean and atmosphere, living and nonliving parameters, and life on land, as well as in the deep sea. Use the context of the ocean to teach Next Generation Science Standards topics with deep understanding and meaning for learners.

CURR 664 The Arts in STEM: Advancing Meaningful Integration (K-12) 3 Credits

Apply art in the context of exciting STEM concepts and learn to integrate art, science, math, technology, and engineering in more meaningful ways in your classroom. At the core of the STEM Education movement are critical thinking, creativity, problem solving, and authentic learning environments that engage diverse students in meaningful ways with content. The many mediums for art and artistic expression are a valuable component of communication and expression. Scientists and researchers at NASA and across the globe use myriad forms of art in their work. This course invites students to take a close look at the incorporation of art in the STEM classroom and provides resources, exemplars, and access to collaborative support for arts integration.

CURR 665 Climate Change with NSF SPRINTT 3 Credits

Award-winning curriculum and eloquent, online student investigations help students study science concepts emphasized in the Next Generation Science Standards, in the context of Earth's Polar Regions to better understand the complexity of Earth's climate and how it is changing. View the Earth using real scientific data from satellites and western researchers. Then, consider the lens of indigenous peoples of the Arctic. Examine tons of data and changes in ice, permafrost, weather patterns, biological change, and more as you conduct research with simple-to-use, web-based instructional tools, using authentic data sets and models to study our planet's past, present, and future climate. Interdisciplinary investigations address many Common Core State Standards in reading, writing, science, and technical subjects as well as mathematics in the context of climate science.

CURR 666 Exploring Mars: A New Twist on Science (or Math) 3 Credits

Use a wealth of data sets and technological tools to explore and understand features of Earth's neighbor, the Red Planet. Look for and study the physical and chemical evidence of water and ice; compare erosion patterns on Mars and Earth; and make inferences about the planet's history as you study both its geologic features, including volcanoes and craters, and the physics of the atmosphere. Teach Next Generation Science Standards topics in Earth, physical, and chemical science integrating mathematics, in the context of Mars using recent data from Curiosity Rover and other missions.

CURR 667 Physical Science in Motion: Classroom Applications 3 Credits

Physical science, when applied, makes tough-to-understand concepts easy and fun. Participants learn to solve problems relating to one-dimensional motion; become acquainted with and apply Newton's Laws of Motion and equilibrium of forces; learn about constant acceleration and gravitational acceleration; investigate concepts in aerodynamics; and learn about two-dimensional motion. Participants will use free, simple-to-use, software simulations from NASA Glenn Research Center, which help to present these concepts for you, and, then, your students, in the context of aeronautics, including airplane design, rocketry, sports, and more. A carefully developed resource page provides access to excellent resources and engaging activities for implementing course content in your classroom with important connections to Next Generation Science Standards and Common Core mathematics.

CURR 668 Coding, Robotics, and 1:1 Devices 3 Credits

Learn applications of Coding as a mathematics pedagogy, explore opportunities for Robotics, and learn cutting-edge implementation of One-to-One Devices (1:1) in K-12 classrooms. Participants learn about and explore best practices in the newest learning pedagogies and technologies. Whether you are already involved, or looking to integrate these cutting-edge tools and strategies for the classroom, you will begin to expand your reach for enhancing student learning. Scaffolded to allow success at all grade levels, Coding, Robotics, and 1:1 Devices offers resources for application into elementary, middle, and high school. Participants will interact with no-fee computer programming, robotics opportunities, and the latest uses of devices. All participants have the opportunity to work with innovative technologies and interact with talented educators, practitioners and special guests who are already making a difference in K-12 classrooms.

CURR 669 Culturally Relevant Pedagogy in the STEM Classroom 3 Credits

Classrooms comprise individual learners, each bringing their own culture and experiences to the learning environment. The value and strength of diversity has become increasingly described in educational literature. This course introduces teachers to the curriculum and pedagogical issues relevant to race, language, gender, and socio-economic differences. Participants apply content and pedagogy involving science and mathematics contexts for effective learning. STEM activities will integrate meaningful, engaging practices for teaching diverse learners. The course is differentiated for elementary and secondary school educators to provide relevant connections, to be directly applied, in each participant's classroom.

CURR 670 Life and Marine Science: Tracking Live Marine Animals 3 Credits

Follow marine animals (e.g., polar bears, sea turtles, sharks, and whales) in real-time, and apply life and Earth science topics to the ocean. Study topics such as ecosystems, biodiversity, cell structures, food webs, and conservation, as you make connections to ocean currents, seafloor features, density and more. Discover the importance of the ocean to humans, as well as our impacts, both positive and negative, on marine environments. The in-depth use of data lends itself to Next Generation Science Standards by integrating instructional technology with life, Earth and physical science.

CURR 671 Life in Space: NASA ISS and Astrobiology 3 Credits

The International Space Station (ISS) is an amazing undertaking comprising technology, engineering, science and math—the perfect context for exciting students for learning. NASA research leads to technological advances on Earth and in human space exploration. As NASA plans for manned missions to Mars, scientists explore our solar system and beyond for determining if and where life could exist. Extremophiles are fascinating for teaching Earth science in a context for astrobiology research. The course explores how space travel impacts the human body; growing food in space; engineering protection from radiation, and searching for habitable environments. With its application of subject matter, it offers excellent resources and interactions with NASA scientists, and data for educators to bring the exciting context of space travel to the classroom.

CURR 672 Math Connections to STEM Education 3 Credits

The course introduces a wealth of applied mathematics exercises and activities relevant to integrated STEM assets and science activities. Some are in the realm of topics seen in Earth and Space science and physics. Live presenters break down authentic examples and projects, and demonstrate to educators how problems incorporate Common Core State Standards-based mathematics with applications that meet Next Generation Science Standards performance expectations. Educators survey math and science examples and tools as the course promotes the use of applied mathematics in science, or science in mathematics, to meet content goals in the classroom.

CURR 673 NASA Astronomy and Space Science 3 Credits

Harness your students' enthusiasm for space and astronomy by using astronomical images to enrich your physical, Earth, and life science courses. Measure the speed of an asteroid, learn about erosion on Mars, and see the tracers of life that are visible from space. In this course, we explore the many ways in which real data from NASA's space science and astronomy missions can be used to teach math and science content in your classroom, meeting science and math standards in Next Generation Science Standards and Common Core State Standards. Through the use of cutting-edge technology tools, and with a NASA scientist visiting our class, you will not only learn more about the universe, you will learn how to bring the universe into your education context.

CURR 674 NASA Physics for Real Beginners: Earth, Moon, and Space 3 Credits

Gain an introduction to physics in this conceptual course that uses NASA's space initiatives as the context for content. Learn about gravitation between celestial bodies, how to get a satellite into orbit, what it takes to blast off into space, and more. This course will discuss these and related topics while exploring NASA content related to space and the Hubble Space Telescope and Kepler Missions. Bring cutting-edge examples to your classroom while addressing Next Generation Science Standards performance expectations.

CURR 675 Reading and Writing in the Science Classroom 3 Credits

Discuss and analyze the ways that literacy and science connect in the science classroom, and highlight how reading and writing can be used to increase students' understanding of science content. Focus on how to integrate important literacy skills from Common Core State Standards in your science and STEM classroom to address content standards from Next Generation Science Standards. Cutting-edge strategies and well-founded principles pave the way to success with non-fiction reading material. The manner in which information and scientific content is presented shapes student success, not just for reading, but student writing, organization, and presentation.

CURR 676 The E in STEM: Meaningful Content for Engineering 3 Credits

Learn how to use engineering to make your classroom come alive. Bridge and teach math and science concepts through exciting applications in the Engineering Design Process where you and your students design, test, and evaluate models and real-life applications. Activities are hands-on and emphasize the reciprocities between science, technology, engineering, and mathematics in formal design challenges. Educators enrich classroom curriculum with elements of design in science, mathematics, or technology activities, addressing important Next Generation Science Standards' engineering design practices.

CURR 677 WDLC - Weather Data Learning Center 3 Credits

Use weather data to teach and learn math. This course teaches content in a math curriculum that uses weather data. Weather Data Learning Center demonstrates increases in student performance in grade 4 mathematics. Collect, access, and interpret current real-time imagery, maps and data. Make connections from weather to learn Common Core-based mathematics using various STEM pedagogical strategies. Learn the basics of clouds, air masses, humidity, fronts, pressure, jet stream, and climatic patterns as you apply these ideas to math concepts such as measurement, fractions, number sense, data collection, and analysis.

CURR 678 Action Research in the STEM Classroom 3 Credits

A Capstone Course requirement "option", this course may be part of joint Master's Degree programs, or Endeavor's "5-course" certificate program earning Research Distinction and an award.

CURR 679 Practicum in STEM Leadership 3 Credits

Share your knowledge of STEM teaching and learning with colleagues in your building, district, or region.

CURR 680 STEM Leadership Seminar 3 Credits

The course contains STEM pedagogical content knowledge, incorporating authentic data and using technology as a tool for learning. The course provides a springboard for cultivating problem solving skills, inspiring student research projects, and integrating STEM methods and essential principles addressed in new standards.

CURR 681 Chemistry in the STEM Classroom 3 Credits

In this course, the many facets by which even the layman can come to appreciate chemistry in the world will be explored; be it in the materials that make up your clothes, the technology that created the age of plastics, or the chemicals in your brain that tell you how to feel as you read these words. A wide array of topics based on 'grocery-store' science will be introduced, allowing you to get your hands in the chemistry without the need of expensive materials or lab equipment.

CURR 682 Climate Science: Socioscientific Issues in the STEM Classroom 3 Credits

Socioscientific issues are important avenues through which to teach scientific literacy and to create the next generation of critical thinkers and sustainable solution engineers. Anthropogenic climate change is one of the most complex and critical issues the global community faces today. Understanding climate change and the scientific, social, and economic ramifications is crucial for science pedagogues. This course examines the ideas of socioscientific issues and critical thinking in science education and how they can be taught through NGSS-aligned global change pedagogies that highlight climate and energy literacy. Pedagogues will learn to utilize authentic data resources that elucidate the story of our changing climate and think critically about how to implement data into their teaching. The philosophical, ethical, and scientific basis of these problems and their solutions will be discussed.

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 702 Early Literacy Development for Diverse Learners 3 Credits

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

Prerequisite(s): CURR 700.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

CURR 705 Inclusive Methods for Teaching Social Studies 3 Credits

This course addresses the practical and theoretical aspects of teaching social studies to diverse adolescents in secondary schools. Using the NJ Student Learning Standards in Social Studies, candidates will prepare and design curriculum and assessment for students in various learning environments and with diverse learning needs. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying social studies curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 706 Inclusive Methods for Teaching Science 3 Credits

Classroom interaction analysis systems are used in the study of the instructional processes that support inquiry-based science learning. Candidates develop their own repertoires of teaching strategies, classroom management strategies, and awareness of career requirements in STEM fields. Emphases are on the investigation and interpretation of recent curriculum developments in NGSS and NJ Student Learning Standards in Science as well as the use of lab-based processes in science learning. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying science curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 707 Inclusive Methods for Teaching Mathematics 3 Credits

This course critically analyzes the aims of teaching mathematics in secondary schools. Research pertaining to mathematics teaching and learning is analyzed. Demonstration lessons including reflective teaching and individual and group processing are created and carried out to clarify teaching, mathematics curriculum planning using NJ Student Learning Standards in Mathematics, the organization of materials and subject matter, assessment processes classroom management strategies, and awareness of career requirements in STEM fields. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying mathematics curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 708 Inclusive Methods for Teaching Business 3 Credits

Emphasis is placed on the enhancement of teaching inclusive business education. Special attention is devoted to the new technology and its use in business education. Current instructional materials are presented and utilized. Master practicing business education teachers will augment the instructor's presentations.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 711 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. The existing methods course in Dance for beginning teachers is cross-listed with DAN 450.

CURR 712 Inclusive Methods for Teaching Music 3 Credits

This course provides experience with various methods of teaching and learning music K-12. Course readings and field observations focus on inclusive teaching practices in music and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Music/Visual and Performing Arts.

Prerequisite(s): CURR 700, CURR 703, CURR 720.

CURR 713 Inclusive Methods for Teaching Art 3 Credits

This course provides experience with various methods of teaching and learning Art K-12. Course work and fieldwork focus on inclusive teaching practices in art and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Visual and Performing Arts.

Prerequisite(s): CURR 510, CURR 700, CURR 703.

CURR 714 Inclusive Methods for Teaching Health and Physical Education 3 Credits

This course provides experience with various methods of teaching and learning Health and Physical Education K-12. Course work and fieldwork focus on inclusive teaching practices in health and physical education and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Comprehensive Health and Physical Education.

Prerequisite(s): CURR 510, CURR 700, CURR 703.

CURR 715 Inclusive Elementary Science, Arts, & Social Studies Teaching 3 Credits

This course provides aspiring elementary school teachers with a variety of developmentally appropriate options for designing, implementing, and evaluating curriculum and instruction in science, social studies, and the arts. Using NJ Student Learning Standards, emphasis is placed on inclusive practices and differentiation of instruction (e.g., modifying curriculum planning, learning environments, and instructional materials, content, processes, and products), curriculum integration, thematic unit and lesson planning, various teaching strategies, hands-on learning experiences, inquiry learning, career readiness skills, higher-order thinking, reflective practice, and various assessment strategies. Other facets of teaching also are addressed or reviewed in the course. These include the characteristics and needs of students with disabilities motivation, classroom management, and becoming a team member of a school faculty. Candidates also refine their pedagogical knowledge and skills by participating in the modification of instruction to meet the needs of diverse learners in nearby school settings.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 772 Clinical Experience in Teaching Seminar 3 Credits

The Clinical Experience in Teaching Seminar is available only to candidates completing teacher certification through the Alternate Route program and who currently work full-time teaching. Candidates may apply to the program for the Clinical Experience in Teaching Seminar by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area, attend and participate in on-campus seminar, and complete and submit the edTPA required for NJ certification.

Prerequisite(s): CURR 510, CURR 700, CURR 541 and Permission of Program Director.

Cybersecurity (CYBR)

Courses and Descriptions

CYBR 500 Beyond Code: Cybersecurity in Context 3 Credits

At its core, cybersecurity is a technical, computing-based discipline. This course explores the most important non-technical elements that shape the landscape upon which cybersecurity problems emerge and are managed. Students will assume different lenses – legal, economic, political, societal, and ethical – to better understand how different forces enable and constrain security technologies and policies. Specific topics include ethical and societal issues, policy-making, business models, legal frameworks, national security considerations, and the roles of users, industry, and government which includes the military.

CYBR 510 Cryptography for Cybersecurity 3 Credits

This course focuses on both mathematical foundations and practical applications of cryptography. The course discusses asymmetric and symmetric cryptography, Kerckhoff's Principle, chosen and known plaintext attacks, public key infrastructure, authentication protocols. The course includes a close examination of various cryptosystems including the RSA, DES, AES, Elliptic Curve, and SHA family cryptosystems. Topics include a brief history of cryptography, ciphers, digital signatures, hash functions, message authentication codes, secure e-commerce, and digital cash.

CYBR 520 Managing Cyber Risks 3 Credits

In the context of risk management, this course examines the motivating reasons behind cyber attacks and data breaches. Various risk management frameworks to measure organizational cybersecurity threats and vulnerabilities are presented. Further, students will model cybersecurity risks, using both qualitative and quantitative risk assessment methods. Students also will articulate the organizational consequences of the assessed risks along with mitigating strategies to reduce or eliminate the cyber risks.

CYBR 530 Mobile Computing and Wireless Security 3 Credits

This course examines the cybersecurity of mobile computing and wireless networking, especially the vulnerabilities, threats, and mitigation techniques. Topics include: mobile malware, wireless communications infrastructure vulnerabilities and associated mitigation techniques, mobile platform vulnerabilities and associated mitigation techniques, mobile app vulnerabilities and associated mitigation techniques, mobile device vulnerabilities and associated mitigation techniques, and organizational policies for mobile computing and wireless networking.

Prerequisite(s): CYBR 510.

CYBR 540 Secure Coding for Cyber Defense 3 Credits

This combined course of lecture and hands-on labs follows the philosophy and principles of secure and robust programming, using the Java language. The eight design principles that govern secure and robust coding will be emphasized with follow-on coding labs to apply these design methods to real-world problems. Design choices, good or bad, drive implementation in coding, so designing software security from the beginning will be practiced. Common software vulnerabilities and static analysis of code will be examined, as well as informal, formal, and ad hoc coding methods will be differentiated. Prior experience with the Java programming language is highly recommended.

CYBR 550 Cybercrime and Digital Forensics Analysis 3 Credits

Digital forensics is a hybrid science that offers a systematic approach for conducting comprehensive investigations to solve cybercrimes. In this course, students will learn the principles and techniques of digital forensics investigations to ensure court admissibility of electronic evidence, including the legal and ethical implications. Students also will also gain hands-on experience with performing proper forensic investigations with different file systems (e.g., Unix/Linux, Mac, Windows, Android) and writing appropriate forensics analysis reports.

CYBR 560 Usable Privacy and Security 3 Credits

There is growing recognition that technology alone cannot provide all of the solutions to security and privacy problems. Human factors play an important role, and it is important for security and privacy experts to have an understanding of how people might interact with the systems they develop. This course explores a variety of usability and user interface pitfalls related to privacy and security and provides experiences in designing studies aimed at helping to evaluate usability issues in security and privacy systems.

Prerequisite(s): CYBR 500.

CYBR 570 Special Topics in Cybersecurity 3 Credits

This course is used as a general placeholder for one time offerings and new courses that have not been assigned a permanent designation. The course will cover advanced and emerging topics of current interest in cybersecurity. This course code may be taken more than once as long as the topic offered is different each time.

Prerequisite(s): Permission of instructor.

CYBR 590 Independent Research and Study 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of instructor.

CYBR 591 M.S. in Cybersecurity Internship 3 Credits

The course is part of the capstone requirement for the M.S. in Cybersecurity. The course will have students complete an internship, self-evaluation, and a project related to their experience working in a cybersecurity related position. Permission of instructor.

CYBR 600 Software Vulnerability and Malware Analysis 3 Credits

This combined course of lecture and hands-on labs covers both the art and science of discovering software vulnerabilities and malware. Beginning with the foundational techniques used to analyze both source and binary code, this course will examine current threats and evaluate the actions needed to prevent attackers from taking advantage of both known and unknown vulnerabilities. The course will cover passive and active reverse engineering techniques in order to discover and categorize software vulnerabilities and malware, create workarounds to better secure the system, and demonstrate security solutions that provide protection from an adversary attempting to exploit the vulnerabilities. Techniques covered include the use of static analysis, dynamic reverse engineering tools, and fault injection to better understand and improve the security of software. Prior exposure to Intel assembly is helpful, though not required.

Prerequisite(s): CYBR 540.

CYBR 610 Cloud Computing Security and Privacy 3 Credits

This course focuses on the security and privacy issues in Cloud Computing. While the Cloud Computing paradigm gains in popularity, there are many unresolved cybersecurity issues related to confidentiality, integrity, and availability of data and computations involving the Cloud. This course examines Cloud Computing models and the associated risks, threats and vulnerabilities; focuses on sound architectural design for secure and private computing; and explores practical applications of cloud computing and the Internet of Things (IoT).

Prerequisite(s): CYBR 530.

CYBR 620 Blockchains and Cryptocurrencies 3 Credits

This combined Lecture-Lab course covers the mathematical, computational, and economic foundations of Blockchain technology, and exposes students to the societal and legal implications of a decentralized monetary system based on consensus. Students learn what cryptocurrencies are, why it is possible to make money using cryptocurrencies such as bitcoins, and why it is so volatile. Through hands-on practice with the bitcoin and Ethereum-based software platforms, students will program secure decentralized applications (Dapps), develop an understanding of cryptographic principles, and reexamine critical economic questions.

Prerequisite(s): CYBR 510.

Dance and Movement Therapy (CNDT)

Courses and Descriptions

CNDT 584 Counseling and Dance/Movement Therapy Practicum I 3 Credits

Students are at a clinical site for a total of 100 hours for the semester to practice skills in movement observation and analysis, group leadership, session analysis, treatment planning, and documentation. Supervision class will focus on understanding the professional, legal, and ethical responsibilities of being a dance/movement therapist in clinical settings from a multicultural perspective. Issues pertaining to professional identity development will be addressed.

CNDT 585 Counseling and Dance/Movement Therapy Practicum II 3 Credits

A supervised field experience in counseling and dance/movement therapy techniques. In this second semester of practicum, students will continue to advance their clinical skills by co-leading dance/movement therapy sessions with field supervision. The goal is for students to facilitate entire sessions by the end of the semester. The course will include seminar discussions, observations and analysis of the therapeutic process of dance/movement therapy sessions and individual supervision with the instructor. A total of 100 field hours is required with a minimum of 40 direct contact hours with clients. The approval and cooperation of the fieldwork agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): CNDT 584.

CNDT 590 Counseling and Dance/Movement Therapy Internship I 3 Credits

This course is one of two internship courses required in the student's final year. It fulfills 350 internship hours. Students will be at a clinical site approved by faculty, with a supervisor who meets all CACREP standards and will receive supervision by a board certified dance/movement therapist. Supervision class will support students in the clinical setting and in effectively utilizing counseling and dance/movement therapy knowledge and skills, including clinical appraisal, treatment planning, and documentation for dance/movement therapy. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): CNDT 585. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

CNDT 591 Counseling and Dance/Movement Therapy Internship II 3 Credits

The second semester of the internship fulfills 350 internship hours. Students will be at a clinical site approved by faculty and will engage in all activities that a regularly employed staff member would be expected to perform. A regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring. Students will be under the field supervision of a supervisor who meets all CACREP requirements and will be supervised by a board certified dance/movement therapist. Supervision class will provide opportunities for students to analyze their practice, reflect on their progress as clinicians, and develop skills to internally self-evaluate their effectiveness as counselors and dance/movement therapists. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement. **Prerequisite(s):** CNDT 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the instructor.

CNDT 600 Body Mind Integration through Movement I 0 Credits

This is a movement laboratory class to explore how dance and movement reflect and affect physical, cognitive, mental, emotional, and spiritual states. Students learn to attune to their bodies in movement and develop awareness of the bidirectional interactions between body and mind.

CNDT 610 Dance/Movement Therapy Theory and Practice I 3 Credits

This course covers the foundational principles, theories, and techniques of dance/movement therapy and will examine the social and cultural foundations of dance as art and medium for growth, change, and healing. Works of dance/movement therapy pioneers and the evolution of dance/movement therapy practices will be explored didactically and experientially.

CNDT 612 Movement Observation, Analysis, and Assessment 3 Credits

This course will provide students with the language and skills to observe, describe, analyze, and assess human movement patterns and behaviors using Laban Movement Analysis and Kestenberg Movement Profile. Other frameworks for movement observation and analysis will also be introduced to explore the applicability of various frameworks for clients with diverse cultural backgrounds. The didactic and experiential format of this class will enable students to embody various movement qualities and develop skills used in conducting and documenting dance/movement therapy sessions.

CNDT 620 Clinical Applications of Dance/Movement Therapy 3 Credits

Group and individual dance/movement therapy practices in various clinical settings are addressed: psychiatric hospitals, addiction recovery programs, therapeutic schools for children with emotional and behavioral problems, developmental disabilities, and special needs; hospices; and hospitals. Students develop their own working theoretical model of dance/movement therapy to guide their work as emerging dance/movement therapists.

CNDT 700 Body Mind Integration through Movement II 0 Credits

The second semester of the movement laboratory class focuses on the use of mindfulness practices and Authentic Movement methods for further develop body-mind awareness, to experience and observe movements simultaneously as internal and external experience, and to decipher the nature of knowledge and meaning inherent in dance and movement.

Prerequisite(s): CNDT 600.

CNDT 710 Dance/Movement Therapy Theory and Practice II 3 Credits

In this didactic and experiential course, select theories from psychology, counseling, psychotherapy, and neuroscience are studied in order to identify the healing and transformative factors of the creative arts therapies. Some of the topics covered in this course are: psychodynamics and object relations theories; intersubjectivity; symbolism and metaphor; psychology of creativity; and neuroscience in dance/movement therapy.

Prerequisite(s): CNDT 610.

CNDT 790 Clinical Consultation in Dance/Movement Therapy I 2 Credits

For students in their first semester of internship, this course provides 24 hours of supervision with Board-Certified dance/movement therapists. Students identify theoretical frameworks and DMT interventions that best suit their clinical placement and present clinical cases for consultation.

CNDT 791 Clinical Consultation in Dance/Movement Therapy II 3 Credits

Students in their second semester of internship will be in supervision with Board Certified Dance/Movement Therapists for 48 hours. Students continue to advance their DMT skills as well as their ability for self-reflection and self-assessment towards greater autonomy and in preparation for professional practice.

Early Childhood Ed-GR (ECED)

Courses and Descriptions

ECED 532 Families, Community, and Diversity in Early Childhood Education 3 Credits

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ECED 550 Development Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

Education Administration (EDAD)**Courses and Descriptions****EDAD 501 Educational Leadership and Organizational Theory 3 Credits**

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

EDAD 508 Leadership in School Business Administration 3 Credits

The educational leadership required to establish an effective relationship between school business services and the success of the total educational program is the primary focus. The professional and legal responsibilities of the school business administrator to manage the organization and resources, identifying and solving problems and issues related to the effective and efficient operation of school district, will be reviewed. Specific legal and code requirements and best-practice organizational and management procedures critical to the administration of a public school district will be examined. Topics studied include: organization and management of the district business office; development of strategic planning models; traditional and program oriented budgets; and, application of technology to instruction and management of school and district fiscal operations. Importance of "generally accepted accounting procedures" in district operations is emphasized. Other topics include: personnel, enrollment, and resource forecasting; debt service and insurance expenses; food services, transportation, and facility operations; supply management and facility maintenance; and temporary financial investments. Students demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 509 School Financial Management and Accounting 3 Credits

This course examines the historical precedents and current procedures that regulate and control the funding and financial operations of school districts. The leadership role of the school business administrator, ensuring the operation of the district in compliance with policy, procedure, and code, is a central theme. Judicial decisions, federal and state legislation, the planned curriculum, and generally accepted business practices that impact on the operation of the total educational program in school districts will be reviewed. Some specific topics of study will include: the leadership role of the school business administrator in monitoring, assessing and reporting on fiscal operations; determining taxation rates; and, developing non-public sources of revenue. The impact of state imposed "cap" regulations and negotiated bargaining unit benefit packages and agreements will be assessed with regard to possible budget growth and development. Enrollment, revenue, and cash flow projections; the fiscal controls used to approve, manage and track expenditures; regulations and restrictions on the use of school funds; school district surplus and debt regulations; current and emerging fiscal concerns in school budget planning and development; and, the role of the school fiscal structure in relation to the local, state, and federal governments are other important topics to be developed. Advanced study in double entry accounting procedures will be a major component in the course. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): CURR 531, CURR 532 or CURR 538, EDAD 505, and Permission of Program Director.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 505.

EDAD 512 School Facility Planning and Development 3 Credits

This course will examine the leadership role of the school business administrator in facility planning, renovation, and expansion. The essential linkage between guiding principles, existing and proposed facilities, and the implementation of the total educational program is considered from both theoretical constructs and practical applications. Major topics of study will include: the development and revision of long-range facility plans; the role of the state Economic Development Authority; the critical review of state proposed "model" school buildings; and, the process of drafting educational specifications. In addition, required site plan reviews by state and local officials; the referendum approval process; and, the integral role of professional services (public opinion consultants, attorneys, demographers, architects, financial consultants, public information agencies, etc.) will be discussed. Students will evaluate geographic, socio-political, financial, and ecological considerations in proposed school construction. Planning for new and emerging technology, addressing health, safety, and security considerations, ensuring barrier-free access, incorporating energy conservation measures, and the utilization of school buildings by the greater community will be overarching themes developed. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 513 Human Resources in Education 3 Credits

This course will develop the practical and theoretical knowledge of the human resources function in the educational setting. Emphasis will be placed on understanding and utilizing human resources functions and processes to identify needs and address issues in both instructional and non-instructional positions. The student will gain an understanding of the inter-relationship that exists between organizational climate, strategic planning, and the established policies and regulations of the human resources function. Students will develop a comprehensive understanding of the importance of recruitment, selection, mentoring and evaluation of faculty and support staff. Emphasis will be to continuously identify issues that are legal requirements in human resources administration or required by federal or state regulations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 505 and EDAD 511.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501.

EDAD 515 Mentoring Beginning Teachers 3 Credits

This field-based practicum requires that each student work with a novice teacher (student teacher or beginning teacher) while enrolled in the course. Through reading, observation, biography and interview, students will explore how novice teachers acquire teaching knowledge and skill. By researching their own practice as mentors, reading relevant literature and participating in critical dialogue in seminars, students will explore and evaluate methods of facilitating and supporting novice teachers' professional growth.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

EDAD 600 Independent Study and Research in Educational Administration 1-3 Credits

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of educational administration.

Education Psychology (EDPS)

Courses and Descriptions

EDPS 500 Cognitive Assessment 3 Credits

This course addresses contemporary intellectual theories and the process and procedure of cognitive assessment. It presents the relevant issues related to intelligence testing and interpretation. Through a variety of pedagogical approaches, students acquire needed skills in administering, scoring, and interpreting results from contemporary tests of cognitive ability.

Prerequisite(s): EDPS 513.

EDPS 502 Psychological Development of the Child and Adolescent 3 Credits

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 506 Testing and Measurement Techniques in Reading/Literacy Education 3 Credits

Studies basic characteristics of test scores, including: reliability and validity, selection, administration, and scoring of tests; measurement of achievement, intelligence, aptitude, and interests; and the writing and editing of items of teacher-made tests, school marking procedures, interpreting of test scores. Covers basic statistical tools needed by reading specialists.

EDPS 507 Advanced Educational Psychology 3 Credits

A critical examination of contemporary learning theory as applied to educational thought and practice. The psychological, physiological, and sociological foundations of education and training; personality problems encountered by classroom teachers.

EDPS 508 Cognitive Processes and Learning 3 Credits

This course deals with what is known relative to the principles of cognitive psychology and their application to learning. The flow of information is followed from where it begins through the processes of integration and storage. Cognitive principles will be studied relative to concept formation, reasoning, and problem solving. Their relationship to specific educational tasks such as the teaching of reading, writing, mathematics, and other content will be explored and confirmed through empirical evidence.

EDPS 509 Psychoeducational Assessment and Report Writing 3 Credits

This course furnishes students with the clinical, practical, and theoretical sophistication to understand the assessment and report writing process for academic, behavioral, adaptive, and social-emotional concerns. Students are expected to master a wide range of concepts and skills to successfully complete this course including integrating multiple pieces of assessment data for case conceptualization, classification, and treatment recommendation. Students are required to synthesize data from multiple methods of assessment and sources to produce written psychoeducational reports that inform intervention practice.

Prerequisite(s): EDPS 513.

EDPS 510 Assessment of Behavioral and Social-Emotional Functioning 3 Credits

The assessment of behavioral and social-emotional functioning is studied from an empirically based, problem-solving model that links directly to intervention. Students learn to select appropriate assessment tools to match individual referral questions so as to evaluate the behavioral and social/emotional problems of children and adolescents.

Prerequisite(s): EDPS 513.

EDPS 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with specific educational exceptionalities, including learning disabilities, mental retardation, behavior disorders, physical handicaps, and giftedness. The characteristics, identification procedures, and current intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

EDPS 513 Professional Practice of School Psychology: Issues and Historical, Ethical, and Legal Considerations 3 Credits

This course is designed to provide an introduction to school psychology through an analysis of the contemporary roles and functions of school psychologists. Professional issues are explored in the context of the history and evolution of school psychology as a specialty area of professional psychology. In addition, the study of professional ethics, best practices, and standards for delivery of school psychological services that have been adopted by national organizations representing the profession of school psychology will be reviewed.

EDPS 514 Standardized Measures of Academics and Behavior 3 Credits

This course will increase students' understanding of the standardized assessment process, measurement issues, psychometric properties of assessment instruments, and the role of these instruments in informing academic, behavioral, and social-emotional interventions.

EDPS 515 Curriculum-Based Assessment and Measurement 3 Credits

This course will build upon students' knowledge and skills in individual-referenced assessment based upon the standards and general curriculum. Students will be able to design, administer, score, and interpret curriculum-based assessment and link these data to intervention.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDPS 521 Statistics and Quantitative Analysis 3 Credits

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

Prerequisite(s): EDPS 520, EDUC 500.

EDPS 535 Biological Basis of Behavior 3 Credits

This course will emphasize a biological approach to the study of psychology and behavior. Topics studied will include the following: 1) the genetics of human psychological differences; 2) the anatomy of the nervous system; 3) psychopharmacology; 4) neuropsychological diseases (e.g., epilepsy, autism, multiple sclerosis); 5) memory and amnesia; 6) sleeping, dreaming, and circadian rhythms; and 7) the biopsychology of mental health difficulties.

EDPS 538 Developmental Child Psychopathology 3 Credits

The course will furnish students with a comprehensive account of the characteristics, correlates, causes, contexts, and outcomes of psychopathology in children. It serves to augment students' understanding of specific conditions in childhood and adolescence including autism spectrum disorders, attention-deficit/hyperactivity disorder, mental retardation, childhood anxiety/depression, enuresis/encopresis, learning disabilities, communication disorders including selective mutism, and emotional/behavioral disorders. The diagnostic nosologies of the DSM and IDEA will be referenced and thoroughly discussed. A special emphasis upon a developmental-systems framework for understanding child psychopathology will be presented wherein the importance of context and the influence of multiple, interacting events and processes in shaping adaptive and maladaptive development will be investigated.

EDPS 570 Advanced Interventions for Children, Adolescents and Families 3 Credits

This course provides opportunity to expand each student's knowledge and skills in the development of effective interventions to meet academic, behavioral, and social-emotional needs. Currently accepted practices based upon the individual's referral problem will be explored. Intervention will be approached from a problem-solving model and based on current assessment data. Case studies will be used to link theory and application.

Prerequisite(s): EDPS 513.

EDPS 581 Practicum in Psychoeducational Assessment and Report Writing 1 Credits

This practicum experience provides supervised practice in administering, scoring, and interpreting an array of individually administered assessment instruments for the purpose of producing a written psychological report that is linked to intervention.

Prerequisite(s): EDPS 513.

EDPS 582 Practicum in the Assessment of Behavioral and Social-Emotional Needs 1 Credits

This practicum experience provides supervised practice using the techniques and methods taught in EDPS 510 Assessment of Behavioral and Social-Emotional Needs. Students will be expected to complete a Functional Behavioral Assessment including recommendations for a behavior intervention plan and a means to monitor and evaluate the target student's progress.

Prerequisite(s): EDPS 513.

EDPS 583 Practicum in Consultation in School and Agency Settings 1 Credits

This practicum experience provides supervised practice in the study, implementation, and evaluation of a problem-solving model to provide consultation across school and agency settings. Students will be expected to successfully initiate and lead the 4-step consultation process resulting in a databased intervention. The consultation will be documented in a formal report.

Prerequisite(s): EDPS 513.

EDPS 584 Practicum in Curriculum-Based Measures 1 Credits

This practicum provides supervised experience in identifying academic needs of students utilizing curriculum-based assessment (CBA) methods within a problem-solving framework. Students will practice the selection and administration of appropriate CBA tools to match referral question(s) at the individual, class-wide and school-wide levels. Students will also practice assessment of the academic environment by conducting structured direct observation of the classroom. Students will summarize and analyze assessment data, develop goals and objectives and make recommendations for intervention.

Prerequisite(s): EDPS 513.

EDPS 590 Internship in School Psychology I 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 581, EDPS 582, and EDPS 583.

EDPS 591 Internship in School Psych II 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 590.

EDPS 600 Independent Research and Study in School Psychology 1-3 Credits

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of school psychology.

Education Sociology (EDSO)

Courses and Descriptions

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Stdnts and Stdnts With Special Needs 3 Credits

The course provides an overview of the foundations of counseling in educational settings, including the historical roots, current and future trends, roles, and functions in multicultural schools and higher education settings. Students examine the roles and responsibilities of professional school counselors to facilitate student success through the development of a comprehensive school counseling program as an integral component of the total education system.

EDSO 502 Advanced School Counseling & Consultation Models in Educational Settings 3 Credits

This course provides a critical exploration of the role of professional counselor as an advocate, leader, and change agent in educational settings. Students investigate evidence-based prevention, intervention strategies, and evaluations to promote academic success and to eliminate the achievement gap, including individual and group counseling and consultation strategies, and evidence-based preventions, interventions and evaluations. In addition, the course will address community social services and school-based programs (including special education and disability laws and accommodations) available to students with special needs, individuals and groups experiencing learning disabilities and other temporary or chronic maladjustments. Reviews of principles and methods utilized by social agencies, schools and higher education settings are included.

Prerequisite(s): EDSO 501.

EDSO 510 Sociological and Cultural Foundations of Education 3 Credits

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

Education-GR (EDUC)**EDUC 500 Introduction To Research 3 Credits**

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

EDUC 501 Methods and Instruments of Research 3 Credits

Acquaints students with insights, information, methods, procedures, and techniques for planning, conducting, and evaluating research. Includes the nature and types of research, methods, and procedures used in educational and psychological research, and the use of research data and other appropriate tools. The completion of a research proposal is required. Students who wish to complete the research project may do so on an individual basis in consultation with their respective advisors.

Prerequisite(s): EDPS 506 and READ 501.

EDUC 502 History of Education 3 Credits

The necessary knowledge of modern education's heritage so that students understand and appreciate current educational practices in proper perspective. Concentration on education's evolution in the U.S. from colonial times to the present, with a major emphasis on a study of topical issues in education treated within the framework of their historical background. A term paper and intermittent reports are required.

EDUC 503 Philosophy of Education 3 Credits

Considers the nature, aims, and objectives of education in a democratic society. Critical evaluations of various educational theorists and the philosophies of pragmatism, idealism, realism, existentialism, etc., are made. Students are encouraged to develop their own philosophy of education by preparing intermittent reports and term papers.

EDUC 511 Educational Foundations: Philosophical/Historical Perspectives 3 Credits

Major thoughts and significant actions in American educational history from colonial times to the present. Synthesis and integration of philosophical and historical contributions to the evolution of America's educational heritage for the purpose of understanding and appreciating current educational practices in proper perspective. Major emphasis on topical issues within the framework of their philosophical/historical backgrounds. Critical evaluations made of educational practices based on pragmatism, idealism, realism, existentialism. Students are encouraged to develop their own philosophy of education by preparing intermittent reports and term papers.

EDUC 515 Issues in American Schools and Society 3 Credits

This course is designed to examine contemporary educational issues impacting on schools and to re-examine the purposes of schooling in a democratic society. Students will explore current and emerging policy issues and the demands for reform in schools and districts. Emphasis will be placed on identifying and developing politically feasible responses to policy issues and procedural problems facing educational leaders today. The role of the leader in promoting the development of a collaborative institutional culture and climate and the identification of best-practice strategies to involve community stakeholders in the development of policies and programs will be emphasized. Effective communication models for use within the school, district and greater community and the use of different media and technology formats will be examined and evaluated. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification.

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

EDUC 531 Introduction to Collective Bargaining and Labor Relations 3 Credits

This course assumes that students do not have prior knowledge of legal terminology or concepts. It will provide students with a foundation in the fundamentals of collective bargaining and union-management relationships within the unique environment of the college campus. American labor law is the prevailing system of laws that govern universities and colleges, however, students will explore how these general "rules of the game" apply to higher education institutions. The course will challenge participants to consider how general rules and principles of collective bargaining and labor relations shape, and are shaped by fundamental aspects of the higher-education "workplace" including academic freedom, faculty workloads, tenure and shared governance. These unique factors have the potential to influence expectations concerning productivity, termination and the traditionally sharp distinction between labor and management found in other industries.

EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. A focus on determining what should be assessed in academic and administrative units and strategies for initiating performance assessment programs is reviewed.

EDUC 542 Assessment of Student Learning in Higher Education 3 Credits

This course examines institutional effectiveness matters focusing on assessment processes in higher education. It explores topics such as the evaluation of academic programs, assessment of student learning outcomes, and involvement in accreditation and accountability demands in higher education. Here, the focus is on how colleges and universities are doing assessment, at the classroom, program, and institutional levels. The course covers the pragmatic planning skills and decision-support tools relevant to assessing student learning. Just as businesses are expected to adhere to compliance and ethics standards, this course provides an in-depth look at how universities' adherence to standards pertaining to academic success can and will lead to an assurance that accredited universities are achieving their institutional goals, meeting the public's' expectations, and realizing their greater societal mission.

EDUC 543 Communicating Educational Data 3 Credits

Through this course, students will develop skills in statistical communication, incorporating data into delivery methods such as writing, public speaking, teaching, informal conversation and collaboration, programming, and graphic visualizations. Students will understand the importance of creating a data-informed culture and how it contributes to an organization's success. They will also learn methods and strategies of how to communicate to a non-technical audience.

EDUC 545 Capstone Seminar in Institutional Effectiveness 3 Credits

This course will offer students an opportunity to reflect on their own work, considering their development as scholars, practitioners, and leaders in the field of higher education. Students will demonstrate mastery of content through a significant project adapted to the professional requirements of a practicum site or their current employer, which will require students to access, analyze, manage, and present data to an organization's decision makers. The goal is to provide an opportunity to apply what students have learned about how to make data-driven decisions to a real business or operational challenge faced by a higher education organization.

Prerequisite(s): Requires approval from Program Director. Must have completed all other program requirements.

EDUC 550 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.)

EDUC 559 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.)

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

Educational Leadership (EDLD)

Courses and Descriptions

EDLD 800 Strategic Management, Organizational and Moral Leadership Behavior in a Culture of Learning 3 Credits

This course will challenge students to embrace a system view of leadership and organizational change at the organizational level. Students will compare, contrast and critique theories and models of organizational learning, knowledge creation, and organizational capacity building and apply them to their own organizational settings. The course will focus on three leadership standards: instructional leadership, operational and managerial leadership, and professional culture. While the course will focus on conceptual frameworks and theory, it is a practice-based course. The course will enhance student ability to think systematically and develop comprehensive understanding of core competencies required to lead, initiate and sustain change in organizations. It investigates process and content issues of team building, interpersonal and group relations, and effective problem solving and decision making skills in collaborative environments. The course emphasizes the moral, ethical and social responsibilities of organizational leaders, as well as the application of principles to organizational leadership behavior and decision-making. Students will also investigate current research trends regarding ethical issues in education and other organizational contexts.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 801 Action Research: Principles and Methods 3 Credits

This course provides an introduction to action research, with emphasis on its application in educational settings. The course covers definitions and purposes of action research. Students will explore theoretical, methodological, and ethical issues pertinent to action research. During the course, students will engage in an action research project in an educational setting.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 802 Educational Change, Systemic Reform, Exercising the Politics of Change 3 Credits

This course will provide students with the skills necessary to achieve educational reform and improvement while navigating the political environment within educational institutions. Through this course, students will analyze various theories and how these ideas apply to education, organizations, change, and leadership.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 803 Instructional Leadership and Educational Reform 3 Credits

Through this course, students will examine contemporary educational practices and their relationship to leadership theories, models, and strategies. Participants will investigate research based instructional practices and develop the skills necessary to identify issues within organizations in suburban and urban settings. The course will provide students with a deep knowledge of the educational challenges faced by educational leaders in today's society. The focus will be on learning a successful organization through the implementation of research based strategies.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 804 Community Building and Sustaining Community Partnerships 3 Credits

Drawing on philosophies/theories, processes, and practices that build and sustain effective school-community partnerships, this course addresses the identification and utilization of community resources and the development of effective intra- and inter-organizational strategies, community linkages, and collaborative efforts necessary to provide for the holistic needs of students and families. Special attention is focused on the role of school leaders in planning and implementing community-wide and building level communications and involvement networks, through the development of practical action learning sets and tools. Building Commitment: How do leaders build and use public awareness and commitment to support their schools?

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 805 Valuing Diversity/Equity: Developing and Fostering a Community of Learners 3 Credits

The focus of the course is academic excellence with equity. The value orientation of the course is toward high-quality developmental outcomes for youth of all racial, ethnic, and social class backgrounds. With an emphasis on students of color and youth from less-advantaged families, the course explores several policy and strategic responses to achievement disparity: identify and work to remove key structural barriers to educational equity; excellence with equity goals; design more effective policies and practices to improve the quality of teaching; support families with ideas and practices for parenting children more effectively; engage youth to reshape their culture of achievement to align with their most positive values. The course explores theories, evidence, designs, methods, and mechanisms associated raising achievement and closing gaps.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 806 Research Proposal Development 3 Credits

This course builds on the action research course to more clearly define the rationale and procedures of educational and social science research. The course is designed for our first-year doctoral students. Topics will include the nature and purpose of research, planning and conducting research, critiquing and evaluation research, sampling, survey and experimental design, evaluation research, naturalistic observation and inquiry, measurement and methods of data collection, ethics, and the use of computers in data analysis. Methods are considered for collecting both quantitative and qualitative data. Students will build on prior project ideas, concepts, and research practice to more fully develop into their Dissertation of Practice topic. This course has two objectives: to increase participants' knowledge of methods for making causal inferences in quantitative research, and to provide participants with a forum for presenting and receiving feedback on their research topic for the Dissertation of Practice.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 807 Law and Policy 3 Credits

This course explores legal, ethical and political issues governing PreK-12 education in America and the legal responsibilities and powers of state and local governing bodies and individuals that arise in elementary and secondary schools. Emphasis is given to federal and state statutes and case law affecting due process, liability, equal protection, and the rights of teachers and students in order to better understand the risks in education management and possible strategies to reduce those risks. The course will explore evolving legal standards on a variety of issues. The course will draw on real cases and legal/policy dilemmas that practitioners face, and focus on preventive law - providing current and future school learners with knowledge and skills they will need to make sound decisions, advance important educational objectives, and minimize legal problems.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 808 Generating, Using, and Assessing Data Accountability and Student Assessment 3 Credits

This course will develop the skills necessary for educational leaders to identify and define problems, implement data collection methods, and analyze, interpret, and report data across multiple levels from the individual student to the larger system. Students will gain the knowledge and skills to use data in decision making within a problem solving framework that enables evaluation of instructional programs and practices. Within this course, students will engage in activities designed to enhance skills in data-based decision making, including: large and small group discussion; review of the extant literature base; review and use of different technologies and statistical methods for data collection and analyses; case studies and simulated data analyses; and application of skills in real world settings. Attainment of these skills will prepare the student for the dissertation process to serve as an instructional leader in the field. The course references and aligns with state adopted core curriculum content standards and professional development standards, the Standards for Schools Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 809 Finance, Fundraising and Fiscal Management 3 Credits

Financial and managerial leadership of a school building or district is a primary factor in the success or failure of school instructional programs. This course provides an opportunity for public and private school practicing and prospective administrators to gain an understanding of their role in these critical areas. Providing the resources to fund academics/instruction/athletics, facilities and capital projects is a focus of this course. A comprehensive understanding of the financial implications of systemic reform, centralized goal setting, accountability standards, and decentralized forms of site-based management, school choice, and charter schools will be a focus of study. This course will also provide a comprehensive overview of fund raising. Students are provided with an ethical foundation and are introduced to basic terminology and concepts in the field. Various fund raising vehicles are surveyed and participants learn to apply fund raising strategies that are appropriate to their organizational setting.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 810 Curriculum Leadership: Transforming Teachers/Developing Teacher Talent 3 Credits

This course will focus on the complex nature of teaching and learning and provide participants with the skills necessary to guide instructional practice. Adult learning theory will be examined as will curriculum theories, instructional practices, professional development, and human capital.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 811 Innovation and the Use of Educational Technology 3 Credits

This course addresses the intersection of organizational change and educational technology. Students will develop a philosophy of educational technology and explore related issues in policy, diversity, ethics, and evaluation. The course also covers research and theory on organizational change and processes for developing a culture of innovation. Students will apply theories of organizational change to the implementation and use of technology in educational contexts.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 812 Leading Programs for Diverse Learners and At Risk Students 3 Credits

This course examines some of the best practices for supporting diverse learners and at-risk students and some of the reasons behind the intrinsic and bureaucratic/policy barriers that may hinder their success. Schools are faced with an increasing number of diverse learners and at-risk students who require additional academic, social and/or medical supports for them to achieve success. This course will examine the root causes that may hinder student success and some of the programs and approaches that have proved successful in meeting their needs.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 813 Dissertation of Practice I 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 814 Dissertation of Practice II 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice I.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 815 Dissertation of Practice III 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice II.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 816 Dissertation of Practice IV 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice III.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 817 Qualitative Research Methods 3 Credits

This course gives particular focus to the use of qualitative research methods in action research studies. Students in this course will gain knowledge about the theoretical foundations, conceptualization, and design of qualitative research. Building on prerequisite coursework, students will learn and practice advanced skills for collecting qualitative data. Students will also engage in hands-on application of specific analytic methods and generate a formal written report of results, paralleling required components of the dissertation of practice. Students will review several dissertation of practice studies that exemplify qualitative research methods in the context of action research. Attention will be given to issues of bias and positionality in qualitative research.

Prerequisite(s): EDLD 801.

EDLD 900 Dissertation In Progress 1 Credits

This course is a continuation of the sequence of dissertation seminar courses to complete the Action Research Dissertation in the Doctorate Program for Educational Leadership. Candidates will register for this course each semester until the defense of the dissertation is completed.

Prerequisite(s): EDLD 813, EDLD 814, EDLD 815, EDLD 816.

Executive MBA (EMBA)

Courses and Descriptions

EMBA 9001 Top Management Perspective 3 Credits

This team-taught course will serve as the initial course of the EMBA program. The course will take place over three weekends. Top managers will also attend and provide their perspectives to students and faculty in attendance. This course will explore the "art" of case study analysis. Students will focus on identifying, analyzing, and resolving issues from a top management perspective. This course will consider various issues confronted by top managers and heavily emphasizes contemporary cases that illustrate a wide range of management issues. By having the course team-taught by a faculty member and an Executive-in-Residence, both the academic and applied aspects of business will be represented in the classroom. This sets the tone for the approach and philosophy of the entire program - a blending of business theory with real world application. Another of the course's purposes is to allow the students to get to know one another, become acquainted with the faculty who will be teaching in the program, and receive an overview of the material that will be covered.

EMBA 9220 Financial Accounting 3 Credits

This course provides a managerially-oriented focus on the aspects of financial accounting most relevant to business decision makers. Students will develop the ability to read, analyze, and interpret financial information for decisions regarding operating, investing, and financing activities as well as serving as a foundation for more advanced analysis in areas such as credit and equity decisions.

EMBA 9231 Economic Analysis and Decision Making 3 Credits

This course focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

EMBA 9240 Corporate Finance 3 Credits

This course introduces modern corporate finance principles that today's managers should know. Its purpose is to give students a thorough introduction to the theory and practice of financial management. The course reviews the principles executives need to acquire to manage for value creation. Topics covered include valuation of securities, capital budgeting, cost of capital, capital structure, and value-creating decisions in a global environment.

EMBA 9250 Statistical Analysis for Bus 3 Credits

This course introduces students to basic concepts and methodologies in probability theory and statistics. Emphasis is on real-world application of reasoning techniques used for interpreting data for decision criteria of managerial decision making. Topics include probability, variables, estimation, hypothesis, regression, and sampling. Concepts of learning are facilitated through real-world practices.

EMBA 9251 Supply Chain and Operations Management 3 Credits

This course focuses on the issues, concepts, skills, and techniques related to the management of operations of organizations. Students are introduced to various techniques of operations research and management science as they are applied to decision making in the management of operations. Topics include productivity, supply chain management, manufacturing strategies, and competitiveness.

EMBA 9260 Strategic Marketing 3 Credits

The focus of this course is to provide students with the analytical skills required to understand and assess complex marketing situations in order to develop and implement appropriate marketing strategies. Identifying individual case factors and understanding the relationship between developments of strategies is emphasized. Students will apply the material using real-world cases faced by organizations.

EMBA 9270 Management/Team Skills 3 Credits

This course is based on the assumption that management and team skills can be learned. To learn skills requires active involvement in the classroom exercises and many learning opportunities come from group activities. To develop these skills, students will need to set personal goals and experiment with new behavior. This course will involve a variety of in-class exercises including self-assessments, interpersonal activities, and a team project.

EMBA 9271 Leadership 3 Credits

This course has been designed to provide students with an understanding of leadership from both a scholarly and a practitioner perspective. The purpose is to help students understand what it means to be a leader in general and in the current business environment specifically. Students will be encouraged to consider their own leadership aspirations, to observe others in leadership roles, and to test their own leadership acumen.

EMBA 9301 Corporate Governance Legal Ethical Issues 3 Credits

This course provides an overview of corporate governance. The governance structure specifies the distribution of rights and responsibilities among different participants in the corporation, such as the board of directors, managers, shareholders, and other stakeholders. In this course, students will discuss the importance of corporate governance and the roles of various stakeholders in the governance structure. Conflicts of interest that arise between the stakeholders and approaches to mitigate those conflicts will be a central focus of the course. Because corporate governance plays an integral role in creating a culture in which ethical behavior is the norm, this course will also focus on identifying, analyzing, and resolving ethical dilemmas in business. The course will consider ethical issues confronted by managers and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues.

EMBA 9302 Corporate Performance Evaluation 3 Credits

This course emphasizes to executives that shareholder value creation should be an enduring focus of concern because value is the foundation of survival and prosperity for the enterprise. The course introduces multiple perspectives in evaluating the performance of the firm. Among them are management control systems, financial statement analysis, cash flow analysis, and the balanced score card (BSC) including Economic Value Added. The nature of these approaches to evaluation draws from the disciplines of accounting and finance. Structuring the course as a team-taught course in which instructors from both of these disciplines will be present helps to ensure that students will receive a comprehensive and integrated understanding of the course topics. Students will experience using real-world cases in evaluation.

EMBA 9303 Intl Bus Seminar W/ Travel Exp 3 Credits

The purpose of this course is to examine the intricacies of conducting business internationally. With each offering, the course will focus on parts of the world where emerging economies are becoming influential players in international business. Examples of these emerging economies include China, South America, Argentina and Chile in particular, and Eastern Europe or Southeast Asia. The influence of external forces resulting from the socio-cultural, economic, technological and political aspects of the macro-environment will be examined. The competitive environment will be examined from the perspective of both multinational and domestic corporations. Finally, consideration will be given to the corporate level strategies and the functional operation of these corporations as they compete for market share, financial investment and human resources.

EMBA 9309 Special Topics 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9310 Information Technology and Management 3 Credits

This course enables current and future senior executives to gain a strategic perspective of information technology resources within the organization. The focus is on opportunities and challenges associated with managing technological resources as well as how the effective management of information technology can improve competitive positioning and operational performance. Course format will be a combination of lectures, guest speakers, case studies, and hands-on exercises. Experiential learning opportunities will allow students to work with real-world case studies using relevant technologies.

EMBA 9362 Product Development and Commercialization 3 Credits

The purpose of this course is to provide an in-depth overview of the Product Development and Commercialization (PD&C) process. This will be done through the analysis of cases that describe actual PD&C as well as innovation problems faced by a variety of organizations (e.g. consumer, health care service). Topics covered include innovation funding, opportunity analysis, common PD&C challenges and issues, and the interface among various disciplines to achieve best-in-class PD&C strategies.

EMBA 9880 Strategic Management: a Capstone Course 3 Credits

The capstone course focuses on the elements required to make effective strategic decisions in organizations with reference to the impact these decisions have on all stakeholders. The purpose of this course is to provide students with an understanding of the strategy process through an analysis of how a firm develops a mission, vision, and establishes a sense of purpose while simultaneously monitoring the external environment for emerging opportunities and threats. Topics focus on real-world cases, the evolution of strategic management processes, and strategies for a global world.

EMBA 9900 Leadership Edge 0 Credits

This course is structured as pass/fail. It provides students at, or aspiring to, executive positions within their organization's career, leadership and management development with a real-time, practical approach to leadership. This differentiator and developmental component is referred to as "The Leadership Edge." Students will reflect on self-assessments completed as part of the program. They are then able to leverage the Leadership Edge experience by pursuing different methods of developing career, leadership, and management competencies to fill identified gaps. Opportunities for development are met through group sessions and student participation in individual (private) coaching or group seminars to discuss personal career and organizational situations. The choice of which avenue is taken (individual or group) is made on an integrated group basis.

EMBA 9906 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9907 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9908 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9909 Special Topics in Bus Admi 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Homeland Security Policy (HLSP)

Courses and Descriptions

HLSP 501 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

HLSP 502 Development and Structure of the US Intelligence Community 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

HLSP 504 Political Behavior of Security and Conflict 3 Credits

The course focuses on various analytical approaches in behavioral political science in order to better understand how individuals interact with the political system. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior during periods of crisis and uncertainty. The course empowers students to conduct advanced research in order to test some of the leading theories of the subfield.

HLSP 505 Civil Liberties and National Security 3 Credits

During times of crisis, can our government maintain individual liberty? This course provides an in-depth exploration of the tension between the role of the state in balancing civil liberties with national security. In this context, the course provides a specific focus on freedom of speech, press and assembly, freedom of religion, the right to privacy and the courts' role, or lack thereof, in the War on Terror.

HLSP 506 US Constitutional Law and National Security 3 Credits

This graduate seminar examines the origin and development of the American constitutional system and constitutional law. It further examines this system within the context of national security. Primary emphasis is on the US Supreme Court, which includes its developmental as an institution, the origins of judicial review and the court's establishment of this process, as well as the decision-making process by Justices of the court. The course will then examine the interplay between the court and its political environment and the impact the court has had upon the functioning of the political system by considering the Marshall Court (1801-1835), the Hughes Court (1930-1941) and the Warren Court (1953-1969). We will conclude with a consideration of the role of the court in balancing the rights and freedoms of a democratic society within the demands of the national security state.

HLSP 508 Political Communication, Terrorism, and Security 3 Credits

This course explores how political communication affects terrorism and security. It is well known that media plays an important role in creating the narrative for understanding terrorism and national security issues. The question is whether that narrative tends to help protect that nation, or whether it actually interferes with that goal. In addition, social media has become a means by which terrorist groups recruit outside volunteers, while blogs and websites are often used to incite incidents in various countries. This course deals with the various ways in which political communication can support, or interfere with, the protection of national security.

HLSP 510 Terrorism 3 Credits

Politics is the study of power and its application, and hence the study of violence has always played a central role in the discipline. In the era of mass politics, violent political participation has been accentuated as evidenced by the prevalence of both domestic and international terrorism. The practice of terrorism itself has undergone changes in the new era and the appearance of groups and "lone wolves" bent on sowing death and destruction for its own sake is more common place. Moreover, the statelessness of today's terrorists removes crucial restraints that once held even extreme terrorists in check. Perhaps more than any other organization, ISIS embodies these trends. It is therefore incumbent upon us to take a step away from the spectacular nature of the news, and ask fundamental questions concerning the motivations, modes of operation, and circumstances contributing to the appearance of terrorist movements, and the roles of the leaders as against the "foot soldiers" in such organizations. Special attention is laid on the emotional fervor of those engaged in the activity, the ideology that mobilizes them and rationalizes their behavior, within each case's historical settings.

HLSP 511 Borders and National Security 3 Credits

This course focuses on borders, boundary-making, securitization, and other theories surrounding the territorialization of the nation-state, including the rise of the national-security and homeland security industries. The analysis of the changing complexities of borders and borderlands is driven by a meta-narrative about national security and current developments in the immigration/security nexus, including policies of border control and the surveillance of immigrants, denizen, and citizens with new security technologies. A key piece of the course is the comparative analysis of US and EU border agencies and the militarization and weaponization of borders, including the construction of new border walls, with the objective to protect the global North from the onslaught of desperate, impoverished and persecuted hordes from the global South. Transnational questions focusing, for example, on the dynamics of human trafficking and drug cartels is an essential parts of this comparison. Throughout the course, a special analytical emphasis is given to the meta-narrative and political opportunism that have driven these developments and led to the fortification of the global North.

HLSP 514 Congress and National Security 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. In addition to an in-depth analysis of the US Congress, we also look comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror?.

HLSP 515 Counterterrorism 3 Credits

One of the aims of analyzing the nature of terrorism, its goals, and the underlying deeper motives of those who partake in it, is to thwart as many terrorist efforts as possible and to bring terrorist campaigns to an end. Thus, the questions of how terrorism begins and how terrorism ends are intimately related. Because of the prevalence of terrorism in the national and international arenas and the spectacular nature of terrorist undertakings, the analysis of these questions is the subject of much media attention and public discussion that tends to obscure and politicize what should be a focus of attention of citizens, policy makers, and students of the social sciences alike. This course seeks to point out concrete measures for counterterrorism –of the type that sometimes is under public discussion –but in a more systematic manner that brings together methods of heuristic thinking in political science and adjacent disciplines, historical and comparative experience, and the literature on counter terrorism to analyze the range of possible strategies that could be adopted and the possible manner in which terror campaigns may be brought.

HLSP 516 The Presidency and National Security 3 Credits

This course is designed as an upper level graduate combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School, English School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

HLSP 520 Defense Policy and Analysis 3 Credits

The course begins with an overview of the structure of US defense policy and administration and explores issues associated with national defense. Throughout the course students become familiar with basic data, institutions, actors, trends, issues and options in the strategic implementation of defense and force. The primary focus of the course is on the Department of Defense (DoD) as well as on key committees and actors within the White House, State Department, Central Intelligence Administration and Congress.

HLSP 522 Countering Domestic Extremism 3 Credits

Domestic extremism is an issue the United States government has had to contend with since its inception, from Shay's and the Whiskey Rebellion in the 18th century, the Klu Klux Klan throughout the 19th and 20th century, to the threat of terrorism today. Broadly defined, extremism has profound and specific impacts on our government and everyday life. Given the limited, enumerated powers the Constitution grants the federal government, cooperation between local, state, and national government agencies is essential to counter domestic threats arising from extremists across the political spectrum. This course will examine threats to U.S. domestic security both before and after the September 11th attacks with a focus on critiquing the ability of our federal system of government to prevent and respond to the evolving threats posed by individuals and groups within the United States.

HLSP 525 Special Topics in Homeland Security 3 Credits

This course is an advanced level seminar examining research on current areas of importance relevant to the interdisciplinary field of Homeland Security.

HLSP 527 Policy Analysis and Evaluation 3 Credits

This course will provide students with an in-depth study of public policy by linking theory with practice to helping students think about problems systematically. The course addresses the policy process through leading theoretical models within the subfield as well as an evaluation of government's response, or lack thereof, of contemporary policy problems. Our focus will be on three areas of policy analysis: description, evaluation, and prescription. As part of our focus, we will address policy design, implementation, evaluation, and failure. Overall, students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options.

HLSP 529 Energy Security 3 Credits

Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

HLSP 530 Data Analysis and Methods for Political Science 3 Credits

This course introduces students to quantitative and qualitative methods used by political scientists and security specialists in the study of social and political phenomena. Students will learn the logical structure of political analysis, and the quantitative measures used to supplement and support these logical structures. Overall the course draws on the fundamentals of statistics: Namely the ability to describe data samples and draw inferences about the populations from which they were drawn. It should also improve one's ability to read data, interpret data, and judge others' claims about data. After students learn these skills, they will apply them to a prepared data set. The emphasis of this course is on "hands-on" experience. Students approaching this subject for the first time will "learn by doing" this type of analysis.

HLSP 531 Critical Infrastructure Security 3 Credits

Overall the course draws on the fundamentals of risk management strategies and policies related to manmade and natural threats to critical infrastructure. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation's infrastructure. The emphasis of this course is on "hands-on" experience whereby students will "learn by doing" analysis.

Prerequisite(s): For MA students and can be offered to undergraduate students who are in the 4+1 program.

HLSP 532 Disaster Management and Preparedness 3 Credits

This course provides an overview of the following: 1) various types of natural and manmade disasters that communities are vulnerable to, and 2) how to develop corresponding preparedness, response, recovery, and mitigation strategies. Upon completing this course, students will be able to assess and develop the following: 1) preparedness plans for disaster response, 2) monitoring and evaluation plans for disaster response, 3) early warning systems plans for risk reductions, and 4) response, recovery, and mitigation strategies. Students will also learn about existing and developing domestic and international Disaster Risk Reduction models. This includes, but is not limited to: 1) strategies that prevent and minimize casualties during disasters, and 2) logistic and operational challenges. Special consideration will also be given to the impact of the social and political processes associated with disaster policy and planning.

Prerequisite(s): For MA students and can be offered to undergraduate students who are in the 4+1 program.

HLSP 533 International Law and Armed Conflict 3 Credits

By literalizing the "war on terror," governments have broken down the distinction between what is permissible in times of peace and what can be condoned during a war. In peacetime, governments are bound by strict rules of law enforcement. For example, lethal force can be employed in law enforcement only if necessary to meet an imminent threat of death or serious bodily injury. Those detained by police must be charged and tried. However, in wartime, law enforcement rules are supplemented by a more permissive set of rules embodied in international humanitarian law, otherwise known as the law of armed conflict. Under such wartime rules, unlike during peacetime, an enemy combatant can be shot without warning (unless he or she is incapacitated, in custody, or trying to surrender), regardless of any imminent threat. If a combatant is captured, he or she can be held in custody until the end of the conflict, without any trial. This course explores how these two sets of rules have developed, both by customary international law and by international conventions, analyzes under what sorts of circumstances one set of rules should apply instead of the other, and examines the legal consequences of governments fighting the "war on terror" by expanding the boundaries of the law of armed conflict beyond the traditional battlefield to wherever terrorists hide, run, or plan. Students will receive a solid foundation in the law of armed conflict and will analyze complex legal problems occurring at the intersections of international humanitarian law, international human rights law and national security law.

Prerequisite(s): For MA students and can be offered to undergraduate students who are in the 4+1 program.

HLSP 534 Cyber Strategy and National Security 3 Credits

The course examines issues and challenges related to national security concerns and cybersecurity. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation's cyber infrastructure. The emphasis of this course is on "hands-on" experience whereby students will "learn by doing" analysis.

HLSP 541 Hacktivism and Cyberviolence 3 Credits

Hactivism is a process designed to be "the creative use of computer technology for the purposes of facilitating online protests, performing civil disobedience in cyberspace and disrupting the flow of information by deliberately intervening in the networks of global capital" (Gunkel 2005). This course addresses the challenges of hacktivism for policymakers involved in domestic and international information conflict and cybersecurity related to this process. It does so by critically examining the processes of digital vandalism, cyberprotest, advocacy and persuasion used to elicit political, social and economic change. The primary focus of the course is on non-state actors and organizations who engage in the process of hactivism and cyberprotest movements.

HLSP 545 Ethics in Emergencies 3 Credits

When the Supreme Court found Lincoln's decision to suspend habeas corpus during the Civil War to be unconstitutional, he retorted: "Is it possible to lose the nation and yet preserve the Constitution?" Leaders often justify extreme measures by insisting that they be held to different standards during emergencies: the regular rules don't apply, they tell us. Indeed, it is not just the constitution but morality itself that is portrayed as overly restrictive during critical emergencies and "states of exception." But ethics and moral philosophy are not simply an armchair pursuit: they are important tools to help citizens, soldiers and leaders make tough decisions in times of crisis. This course is designed to introduce students to the main variants of ethical thought and critical theory and to apply these modes of thinking to various kinds of emergencies which confront the state (and the United States in particular) today, including the threat of terrorism (domestic and international) and pandemics. Students will become conversant in consequentialist and deontological ethics, while also investigating the constraining values of liberalism, democracy, cosmopolitanism, human rights, feminism, and just war theory. Policies and dilemmas to be examined include torture and enhanced interrogation techniques, citizen surveillance and the suspension of civil liberties, drone warfare, whistleblowing, and indefinite detention.

HLSP 550 American National Security 3 Credits

The course is part of the foundational sequence of the M.A. in Homeland Security Policy. The course trains students to think strategically and critically about major issues facing American National Security.

HLSP 551 Global Security 3 Credits

This seminar critically addresses the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

HLSP 552 U.S. Foreign and Security Policy 3 Credits

This course emphasizes the main theories of and themes in American foreign policy since the end of the Second World War. We will examine the patterns that have permeated American Foreign Policy since 1945, and discuss the roles that various actors play in the foreign policy process. We will use theoretical concepts to discuss the major events in American foreign policy over the last half of a century. The course will focus on both the conduct and formulation of American foreign policy. Detailed knowledge of the policy-making process, including legal and institutional restraints and standard operating procedures, is clearly essential for all students of foreign policy. Yet, only by exploring America's past actions in the global arena and only by searching for historical precedents and patterns can students fully grasp the dilemmas facing the United States today.

HLSP 553 Cyber War 3 Credits

Cyber attacks are a growing concern for international community. When does a cyber attack constitute an act of war or is merely an inconvenience? Is cyber power military power? How prevalent are such attacks, and to what extent can cyber at-tacks lead to conventional conflicts? Will cyber attacks by non-state actors render more power to such players in destabilizing states? This course explores the different types of issues in cyber wars, including mechanisms through which targeting of communication technology could escalate tensions and lead to an armed conflict, and ways through which states and international organizations could limit the de-structive potential of cyber technology.

HLSP 554 Asymmetric Conflict: When The Weak Attack The Strong and Succeed 3 Credits

Why is it that the weak challenge the strong and sometimes manage to succeed? In fact, between 1800-2003, nearly 30 percent of all international conflicts waged against more powerful adversaries, the weaker party came out victorious. And the weaker actors have achieved more victories over time. Asymmetric conflict or competition between a weak and a strong adversary is all around us. From North Korea to Iran defying the Unites States and risking military confrontation through nuclear tests and drone shootings, the weak it seems defy the basic expectation that possession of material power is an all-time guarantee of security. This course examines why the weak rise against the strong, how they manage to succeed, and in what capacity. We focus on unconventional, conventional, and hybrid tactics of the weak and the implications for U.S. strategy development. We rely on cases of international conflicts and insurgencies to derive insights about the theory of asymmetric conflict onset and termination and to predict future trends in the struggle between the weak and the strong.

HLSP 555 Insurgency and Counterinsurgency: U.S. Wars in Iraq & Afghanistan 3 Credits

Intrastate rather than interstate conflicts account for majority of armed conflicts today. The outbreak of the Syrian insurgency, the challenges experienced by U.S. forces in Afghanistan and Iraq, and humanitarian crisis in Yemen illustrate that stickiness of the problem. Today's civil wars are mostly insurgencies, conflicts with the use of guerrilla tactics. Increasingly, they involve multiple non-state actors challenging the government. What explains the onset of such conflicts? What role do ethnic and religious differences play in conflict initiation? How do guerrilla fighters acquire the means to wage their war? Is democracy a solution to conflicts? Are insurgencies a threat to U.S. security and economic interests? Why has the United States struggled with its counterinsurgency operations in Iraq and Afghanistan? And what lessons have been learned for future management of such threats? The course explores the onset, management, and termination of insurgencies, with special focus on current debates on counterinsurgency approaches. We will focus on the role of resources, state capacity, ethnic/religious differences and power in setting the stage for the conflict to start. We will then explain why insurgencies are difficult to end, and why the United States has struggled to stabilize the situation in Iraq and Afghanistan. Lastly, the course will focus on conflict management by emphasizing specific counterinsurgency approaches, including population and state-centric strategies. We will explore in what ways the United States, in particular, has been successful in these areas and why it has failed in others. This course relies on classroom discussions, peer collaboration, creative thinking exercises/projects, simulation, game exercise, and case study analysis to facilitate learning and student engagement.

HLSP 562 Thinking about Collective Threats 3 Credits

The difference between the professional and the novice in Homeland Security is not measured by the number of "items" one knows but by the ability to sift through the mounds of information, identify what is important, and form causal links between what was selected. The aim of this course is to familiarize students with the main methods by which the important relevant data in Homeland Security are identified and linked to produce a coherent understanding of and reaction to collective threats. Students will focus on how to conceptualize and respond to collective dangers, including contemporary events that may arise throughout the semester.

HLSP 567 Global Immigration Trends and Security Issues 3 Credits

Amidst the broader trends of international politics that address the growing flow of goods, capital, and information across state borders, the movement of people is a permanent and expanding feature. However, central to the notion of the political identity of the nation-state is the ability to control the entry of non-citizens. The regulatory power of the nation-state to control its borders is at least threatened by the migratory movements of people. People are driven from their homes by conditions of war, economic difficulty, or environmental disaster. Millions of people migrate permanently each year, and about 20 million are refugees and seek political asylum worldwide. The vast majority of refugees are women and children--this is the hidden truth of the post-Cold War order, huge numbers of displaced women and children. These numbers are significant, particularly since the general movement heads in one direction, toward advanced industrial states, mainly Western Europe and the United States. About 35 million legal and illegal immigrants live in the United States. Immigrants account for 11.5 percent of the total population, the highest percentage in 70 years. Critics warn that if current trends continue, by the end of this decade the immigrant share of the total population will surpass the all time high of 14.8 percent reached in 1890. Understanding immigration and refugee issues in this interdependent world will help us to gain insights into the workings of political, economic, and social forces both within receiving and sending states as well as the international regime which regulates these movements. The topics addressed in this course go beyond simple models of utility and efficiency since the questions of immigration and political asylum are often deeply emotional issues for societies; the issue also has a significant moral dimension.

HLSP 590 Master's Thesis 3 Credits

Students will complete an original substantive research paper that will build on prior research in Security Studies or related discipline.

HLSP 591 M.A. in Homeland Security Internship 3 Credits

The course is part of the capstone requirements of the M.A. in Homeland Security Policy. The course will have students complete an internship, self-evaluation and write a reflection paper outlining their experience working in a security related position.

HLSP 690 Research & Creative Expression 1-4 Credits**Interdisciplinary Studies (IND)****Courses and Descriptions****IND 600 Supervised Study 1-4 Credits****Language & Literature (LL)****LL 640 German Reading 3 Credits**

Designed for graduate students who have little or no previous experience with the German language. A functional course concentrating solely upon preparing students to translate German language sources pertinent to their fields of study. Completion of the course with a grade of "Y" satisfies the graduate language translation requirement. Recommended for Sacred Music, Organ Performance and Choral Conducting majors; not recommended for Voice Pedagogy and Performance or Piano Accompanying and Coaching majors.

LL 641 French Reading 3 Credits

Designed for graduate students who have little or no previous experience with the French language. A functional course concentrating solely upon preparing students to translate French language sources pertinent to their fields of study. Completion of the course with a grade of "Y" satisfies the graduate language translation requirement. Recommended for Sacred Music, Organ Performance and Choral Conducting majors; not recommended for Voice Pedagogy and Performance or Piano Accompanying and Coaching majors. This course is offered in the fall semester only. Offered in the Fall. 3 Credit hours.

Literacy (LITR)**Courses and Descriptions****LITR 500 Multimodal Teaching and Learning 3 Credits**

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and challenges and assessment measures. Observational techniques and diagnostic teaching for assessment are stressed. Students will apply concepts learned in seminar to their associated practicum/field experience.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

LITR 510 Research and Survey of Texts for Children and Adolescents 3 Credits

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-print texts into the school curricula in ways that support youth and adolescent literacy development.

LITR 560 Writing Project at Rider 3 Credits

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas.

LITR 600 Independent Research and Study in Literacy Education 1-3 Credits

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education.

Marine Sciences (MAR)**Courses and Descriptions****MAR 580 Independent Marine Science Field Study 4 Credits**

This field-based course provides a practical experience in integrating marine science with pedagogical concepts. Students will use scientific methodology to explain marine ecosystems through specially designed, inquiry-based exercises. During these activities, students will address the process of applying college-level content to their own classroom settings, considering national and state standards. Hands-on, field-based exercises will provide experience with a diversity of marine habitats and the biological, geological, hydrological, and physical processes that influence them. Visited habitats can include rocky intertidal, salt marsh, tidal flat, beach and channel sand bars. As a result, students will develop field and laboratory skills in marine science and use them in designing materials for their own classroom use.

Master of Accountancy (MACC)**Courses and Descriptions****MACC 611 Professional Research and Communication 3 Credits**

Effective communication and interpersonal skills are key for success in the accounting profession. This course is an interactive seminar designed to provide a strong foundation in professional research and to develop communication and interpersonal skills with an emphasis on the communication and interpersonal challenges that accountants commonly face. Course work is primarily base based and includes a wide variety of video and written assignments that require research to develop accounting services and present to guest professionals and the "client".
Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 650 Seminar in Federal Taxes 3 Credits

The course examines tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts. Topics include tax issues involved in the decision to select a particular form of business organization, fundamental concepts of interstate, international, and New Jersey taxation, and to expose the student to a variety of common tax returns, applicable to the above topics.

Prerequisite(s): completion of ACC 410 or ACC 410P.

MACC 652 Analysis of Accounting Data 3 Credits

This course uses information technology and data analytical techniques to conduct analysis needs commonly faced by accounting professionals. The course uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 654 Issues in Financial Reporting 3 Credits

This course uses the conceptual framework to examine standards for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 656 International Dimensions of Accounting 3 Credits

This course examines the global applications of accounting principles and practices, including the relationship between international accounting issues and company strategy. Topics include theoretical and societal considerations of international accounting issues, the identification of transnational accounting practices, and attempts at harmonization.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 658 Governmental and Not-for-Profit Accounting 3 Credits

This course provides an in-depth study of the concepts, objectives and techniques of the evolving field of accounting for nonprofit institutions and organizations. Areas emphasized include municipal and state governmental units, hospitals, colleges and universities and service organizations. Problems, cases and selected readings are employed.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 662 Auditing Practice & Problems 3 Credits

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

Prerequisite(s): ACC 400 or ACC 400P.

MACC 663 Fraud and Forensic Accounting 3 Credits

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 664 Issues in Managerial Accounting 3 Credits

This course examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

Prerequisite(s): completion of ACC 302, ACC 302P or PMBA 8220.

MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8040 and PMBA 8020 or the Preliminary Accounting Requirements.

Prerequisites: PMBA 8040 or VL12 with a score of WV AND PMBA 8020 or VL10 with a score of WV OR VL25 with a score of WV OR VL26 with a score of WV.

MACC 668 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisites: ACC 302, ACC 302P or PMBA 8220.

MACC 670 Accounting Internship 3 Credits

This course provides on-site experiential learning through supervised employment with a participating company. Students will be reviewed periodically by senior staff. Academic assignments, including a formal report, will be developed in conjunction with a faculty member. Permission of the instructor is required.

MACC 690 Special Topics 3 Credits

This course provides study of a timely topic that represents a dimension of business administration or accounting that not covered in a regular course. Such a topic may be offered by the Accounting Department. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Music Education (ME)**ME 540 Choir Train for Young Singers 3 Credits**

This course focuses on children's choirs in school, church and community. Students learn strategies to teach children good vocal technique and to build musical literacy through the study of appropriate repertoire. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

Prerequisite(s): Junior status.

ME 563 Art of Teaching Music III 4 Credits

Through course assignments, discussion, and clinical practice in varied school and community choral settings, course participants learn how to create meaningful elementary music experiences that foster individual success, accountability, a sense of accountability, critical thinking, independence, and life-long engagement with choral music.

Prerequisite(s): Minimum grade of C- in ME 262, successful completion of Sophomore Review, and must obtain substitute teaching credentials.

ME 564 Art of Teaching Music IV 4 Credits

Through course assignments, discussion, and clinical practice in varied school and community choral settings, course participants learn how to create meaningful school singing experiences that foster individual success, accountability, a sense of community, critical thinking, independence, and life-long engagement with choral music.

Prerequisite(s): Minimum grade of C- in ME 262, successful completion of Sophomore Review, and must obtain NJ substitute teaching credentials.

ME 587 Music in Special Educ 1 Credits

This course is designed to acquaint the pre-service teacher with the special needs of exceptional children in music classes. Students learn to adapt instruction to accommodate a variety of exceptionalities that are both physical and emotional. Content includes categories of special students, characteristic behaviors, mainstreaming, and classroom methodology. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. It is recommended that student take this course before the student teaching semester.

Prerequisite(s): Senior status.

ME 588 Dalcroze Studies 2 Credits

The purpose of this elective course is to provide students with an intensive experience in eurhythmics and eurhythmics pedagogy leading to an understanding of Dalcroze's principles regarding movement, solfège, improvisation and their uses in the classroom. An important focus of the class will be to provide an insight into kinesthetic-based learning as a conduit to inform and deepen the musical experience. Opportunities for lesson planning and curriculum development in the Dalcroze model will be offered. Students will write and present practice lessons. In addition, students will develop improvisation skills necessary to integrate eurhythmics into private applied instruction.

ME 591 Choral Music Grades 5-12 3 Credits

This course is designed to acquaint the music educator with repertoire suitable for use with middle and senior high school choral ensembles. Representative repertoire from all periods of music will be discussed, analyzed and performed in class. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

Prerequisite(s): Junior status.

ME 592 Creativity & Music Technology 2 Credits

Creativity and Technology in the Music Classroom is designed to prepare students to foster musical creativity using a variety of approaches and tools. In particular, students will use equipment such as digital audio workstations, MIDI controllers, microphones, and SmartBoards to facilitate rich and engaging creative experiences. Students will explore ways to structure learning experiences in response to the needs and interests of students, and will examine current thinking and trends related to the uses of creativity and technology in the music classroom.

Prerequisite(s): Junior status or permission of instructor.

ME 595 Assessing Music Learning 1 Credits

This course provides pre-service music teachers with the strategies to assess music learning. Students study various testing models and learn to write and grade traditional tests such as true/false, multiple choice and essay. In addition, students examine authentic assessment, performance assessment and portfolio assessment models. Topics such as validity, reliability, standardized tests and testing bias will be included. In addition, students will learn how to read and interpret quantitative test data and examine the literature on grading. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. The content of this course conforms to the recommendations of the Professional Teaching Standards adopted by the State of New Jersey in 2002. In some semesters, this course may be offered in an on-line format.

Prerequisite(s): Senior status.

ME 650 Thesis 1 Credits

Independent research under faculty supervision leading to the writing of a master's thesis. Students register for this course in every semester or summer term in which assistance is provided by the thesis advisor.

Prerequisite(s): ME 685 (preferred) or MH 731; Permission of the Chair for Music Education is required to register for this course.

ME 671 Music and Hip Hop Culture 3 Credits

Hip Hop in the United States is arguably the most lucrative, popular, and culturally challenging contemporary musical force. The narratives of Hip Hop go beyond the boundaries of race and class as well as those of music, poetry and dance. As such, Hip Hop is a phenomenon that presents problems as well as great possibilities. This course explores them from the standpoint of educational sociology, looking at their implications for music in schools as well as in daily life.

ME 672 Teaching/Learning in Urban Schools 3 Credits

This course offers students theoretical and practical insight into teaching in urban schools. The class will present an analysis and practical implications for what is needed in order to successfully engage in teaching in urban centers in the United States. Students will balance field experiences with critical analyses of issues such as multicultural teaching, race, class, and economics in urban schools as well as their curricular and pedagogical implications.

ME 682 Choral Music Education 3 Credits

This course is designed to assist choral music educators to improve their pedagogical effectiveness. This course will provide students with the knowledge, skills and dispositions necessary for developing comprehensive musicianship in the choral ensemble setting through the study of creating original music, responding to music, connecting to students and performing vocal/choral music with a primary focus on choral pedagogy, curriculum development, unit and rehearsal planning, programming, vocal development, program management, music literacy pedagogy, music technology and assessment.

ME 685 Improving Musical Practice: Research in Music Education 3 Credits

Intended for students in the MME and BM-MME degree programs, this course focuses on research as a tool for improving practice. Course members will read qualitative and quantitative research studies and consider the impact of research on their teaching. Course members will also plan and conduct original research that will help them to analyze their specific teaching contexts, identify and conduct inquiry into problems, and refine their practice as educators.

ME 686 Teaching Music in the 21st Century 3 Credits

Critical theory and critical pedagogy provide the framework for advanced study in post-modern teaching philosophies and teaching strategies as applied to music education. Techniques to engage students in diverse ways of thinking about music teaching and learning that transform both student and teacher will be presented. Always in the context of the social and political structures of schooling and the place schooling has in society, students will be empowered to create a dialoguing and problem-solving pedagogy for teaching music to children at all grade levels.

ME 690 Independent Research and Study 3 Credits

An elective course providing an opportunity to pursue a topic of special interest under the guidance of a music education faculty member. The proposal must be approved prior to registration for the course.

ME 692 Social Justice in Music Education: History, Philosophy, and Practice 3 Credits

The purpose of this course is two-fold. First, the course will explore the historical perspectives that have significantly shaped and informed music teaching and learning within American public education during the last century. Second, students will encounter, engage with, and interrogate philosophies and theories of practice from social justice perspectives in order to critically consider the place and purpose of music and music education within educational and societal contexts.

ME 693 Seminar in Music Educ 3 Credits

While the topics vary from year to year, international perspectives in music education form the foundation for this seminar.

ME 721 Curriculum Development & Evaluation 3 Credits

This course examines the relationship between curriculum theory and philosophy of music education. Through the study of traditional and contemporary models of curriculum development and evaluation, students broaden their understanding of curriculum as it impacts the learning process. Post modern theory consistent with the Department's commitment to Critical Pedagogy for Music Education provide the focal point for the development of curricula that enhance and support quality music education. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

ME 723 Social, Emotional, and Musical Learning 3 Credits

This course examines topics in psychology of music from the lens of social emotional learning. This theoretical lens will allow students to find the relationships between music-making as social and cultural practices and the development of individual and collective psychological process in music teaching and learning. Major topics include affective and physiological responses to music, musical enculturation, learning theory, well-being and wellness, musical aptitude, developmental processes, and motivation. Students will discuss literature in the psychology of music with applications to K-12 music classes and rehearsals and conduct a pilot study in an area of interest based upon knowledge from the literature.

ME 725 Teaching Instrumental Music 3 Credits

A graduate level survey of the pedagogy necessary to teach instrumental music (woodwinds, brass, string and percussion instruments) and to develop and maintain beginning string and wind ensembles. While the class will include some playing and performance, it is not designed to develop proficiency on the individual instruments. Students must demonstrate sufficient competencies to provide beginning instruction. Instruments will be available for rental. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. Rental fee, per instrument: \$20.

ME 727 Teaching College 3 Credits

This course is designed for the graduate student who will be teaching at the college level. The content combines the theory of college teaching with praxis. Topics covered include: the psychology of the undergraduate, teaching graduate students, designing a syllabus, presenting course content, strategies for student-centered learning and assessment. Whenever possible, students will have the opportunity to intern with college faculty and will observe, present demonstration lessons, be coached and mentored. Open to all graduate students.

ME 730 Pedagogy and Practice 3 Credits

This course explores the intersection of philosophy, psychology, pedagogy and practice by providing students with guided teaching experiences connected to their current teaching situation. Throughout the course, students will be challenged to evaluate their own teaching against philosophical, psychological, pedagogical, and research-based models of music instruction. In addition to guided teaching experiences, students will participate in a weekly seminar class during which they will share and reflect on their experiences in the field and discuss topics pertinent to teaching and learning music.

ME 771 Critical Pedagogy for Music Ed 3 Credits

This course presents the fundamental concepts, contexts and constructs that define Critical Pedagogy for Music Education. It focuses on the application of critical theory as a philosophical perspective to inform decisions teachers make when planning instruction for their students.

ME 775 MME Capstone 1 Credits

Independent research leading to a completed capstone project, such as curriculum and assessment development, pedagogical publication or presentation, instructional materials, etc. The project must be approved by the department.

Prerequisite(s): ME 685 and permission of the Music Education Chair.

ME 791 Internship in Music Teaching 3 Credits

A field-based experience consisting of three hours per week of internship teaching at a public or private school. Students will work with a cooperating teacher and be supervised by the instructor of the internship. Students will meet with the instructor periodically through the semester. In addition, they will prepare and teach lessons and submit documentation to chronicle the internship experience. International students in music education are strongly encouraged to take this course. ME 685, 692 and 791 are offered in rotation.

Music History (MH)

MH 608 Graduate Music History Review 3 Credits

Required for graduate students who are admitted with deficiencies in music history, as determined by the graduate placement test in music history. It is strongly recommended that this course be taken at the outset of graduate study.

MH 635 Public Musicology 3 Credits

A graduate-level introduction to the many ways musicology can engage with communities and events outside the academy. Topics include music criticism, oral history, museum education, archives, and cultural tourism.

Prerequisite(s): Graduate Standing; removal of all Music History deficiencies.

MH 690 Independent Research & Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

MH 733 Seminar in Music History 3 Credits

The content of the course will vary with the special interests and qualifications of the professor teaching it.

Prerequisite(s): Removal of all music history deficiencies, it is strongly recommended that MH 731 be taken prior to this course.

MH 734 Proseminar in Music USA 3 Credits

A graduate-level introduction to the scholarly study of music in the U.S. Readings will cover music in Colonial/Early America, Western art music, popular music, and music of various ethnic communities.

Prerequisite(s): Graduate standing; removal of all Music History deficiencies.

MH 750 Thesis I 3 Credits

Independent research under faculty supervision leading to a master's thesis. Students register for this course in their first term of thesis research.

Prerequisite(s): Graduate standing, removal of all Music History deficiencies.

MH 751 Thesis II 3 Credits

Independent research under faculty supervision leading to a master's thesis. Students register for this course beginning in their second term of thesis research.

Prerequisite(s): Graduate Standing, removal of all Music History deficiencies, MH 750.

Music Theory (MT)

TH 511 New Music Ensemble 1 Credits

This course provides an opportunity to perform new music, primarily works of fellow students. It will also provide instrumentalists an opportunity to develop their performance skills more fully.

TH 512 Chinese Music Ensemble 1 Credits

This course provides an opportunity to learn a Chinese instrument and to perform on it in an ensemble setting. Students will learn musical styles from different parts of China and the Chinese Diaspora.

TH 550 Keyboard Harmony 3 Credits

An intense exploration of and drill in musicianship-keyboard skills, including score reading, transposition, modulation, clef reading, figured bass realization, harmonizing melodies, improvising and lead sheet accompanying. Projects may include transposition of a number of songs (perhaps a complete set) into all keys, figured bass realization for a Bach cantata, improvisation of service music (prelude, offertory, interludes, chorale preludes, postlude), multiple re-harmonizations of hymns/chorales for a service and score reduction and performance of a movement of an orchestral work. May be taken as an undergraduate level II theory elective.

Prerequisite(s): Undergraduate, minimum "C-" grade in TH 241; Graduate, Removal of all theory deficiencies.

TH 608 Graduate Musicianship Review 4 Credits

Required for graduate students admitted with deficiencies in musicianship as determined by the graduate placement test in musicianship. This course assists students in learning and integrating aural, performance, analytical and composition skills. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade. It is strongly recommended that this course be taken at the outset of graduate study.

TH 622 Electroacoustic Music 3 Credits

Advanced opportunities for creative activities utilizing the resources of Westminster's Music Computing Center. Previous experience with sequencers and/or digital audio is expected.

Prerequisite(s): Removal of all music theory deficiencies.

TH 623 Seminar in Music Theory 3 Credits

The content of the course bearing this number will vary with the special interests and qualifications of the professor teaching it.

Prerequisite(s): Undergraduate, minimum "C-" grade in TH 241 and permission of instructor, or graduate student standing and removal of all music theory deficiencies.

TH 625 Composition 3 Credits

Class instruction in original composition. Projects and presentations.

Prerequisite(s): Graduate student standing and removal of all music theory deficiencies.

TH 645A Composition Primary 3 Credits**TH 645C Composition Elective 2 Credits****TH 645D Composition Elective 1 Credits****TH 645E Composition Primary 3 Credits****TH 645F Composition Primary 1 Credits****TH 655 Composition Project 3 Credits**

Graduate-level private study in composition culminating in a major composition in one of the larger forms.

Prerequisite(s): three semesters of TH 645.

TH 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

TH 726 Analysis 3 Credits

A study of the compositional process as observed in selected tonal works, using the analytical approach of Heinrich Schenker.

Prerequisite(s): Removal of all music theory deficiencies.

Musical Theatre (MTR)**Courses and Descriptions****MTR 511 Music Theater Ensemble 1 Credits**

The performance-based, auditioned music theater ensemble engages multiple singers/actors/dancers in performance, utilizing scenes from music theater literature as the primary material. Emphasis is placed upon group interaction and building an ensemble. This ensemble often is asked to perform for University sponsored events.

Organ (OR)**OR 587 Organ Improvisation 2 Credits**

A laboratory in the keyboard disciplines of modulation, transposition, improvisation and vocal score reading. Required for undergraduate Organ Performance majors; others may elect the course by permission of the instructor.

OR 588 Organ Pedagogy 2 Credits

Pedagogical approaches to organ playing. Required for undergraduate Organ Performance majors; others may elect the course by permission of the instructor.

OR 589 Organ Improvisation II 2 Credits

Continuation of OR 587.

OR 590 Accompanying at the Organ 2 Credits

Development of accompanying techniques essential to the professional organist. Arranging and transcription from piano reductions and orchestral scores; standard choral/organ literature. Leading congregational song; appropriate methods of instrumental registration.

OR 623 Organ Music of J.S. Bach 3 Credits

A study by genre of Bach's organ compositions will include background, overview of the influences of Buxtehude, Pachelbel and Böhm, and performance practice issues. The question of the "Bach organ" will be explored. **Prerequisite(s):** MH 731, OR 433.

Corequisite(s): MH 731, OR 433.

OR 629 Seminar in Organ Literature 2 Credits

An intensive study of an area of organ literature or its performance practice. Specific content will change with each semester. Emphasis upon in-depth study of the works of a selected composer or genre.

OR 641A Organ Primary 2 Credits**OR 641B Organ Primary 1 Credits****OR 641C Organ Elective 2 Credits****OR 641D Organ Elective 1 Credits****OR 641E Organ Primary 2 Credits****OR 641F Organ Primary 1 Credits****OR 690 Independent Research and Study 1-4 Credits**

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

OR 723 Organ Literature Before 1800 3 Credits

Historical study of the organ literature coordinated with a study of the development of the organ as a musical instrument.

OR 724 Organ Literature since 1800 3 Credits

Study and research into the style, form, and interpretation of representative organ works composed after 1800. Study and research into national styles of organ composition and construction in France, Germany, England and North America.

Organizational Leadership (LEAD)**Courses and Descriptions****LEAD 500 The Practice of Leadership 3 Credits**

This course allows students to gain an understanding of the practice of leadership and how they can develop as leaders. Students will explore leadership models, creativity in organizations, and approaches to decision making as they begin to form their own leadership philosophy.

LEAD 510 Organizations: Design and Dynamics 3 Credits

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 512 Forms of Diversity in Organizations 3 Credits

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different "worldviews" which organizational members bring into the organization, and how that affects their ability to work together. The course develops students' knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 531 Developing The Human Side of Organizations 3 Credits

This course examines Strategic Human Resources Management (SHRM) within today's organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 532 Program Design for Training and Development in Organizations 3 Credits

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore "real world" applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 533 Conflict and Crisis Resolution in Organizations 3 Credits

Leaders face conflict and crisis in their organizations. Being effective in their resolution is an important leadership attribute. Skills that support positive and integrative outcomes include mediation, negotiation and crisis resolution skills. This course will use multiple case studies and role-playing assignments to engage students in understanding how individuals and teams handle mediation and negotiation scenarios. The course will also use multiple case studies to enhance students' understanding of the components of effective and ineffective leadership for crisis.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 534 Facilitation and Team Leadership 3 Credits

This course examines the characteristics and behaviors of teams that produce good results and/or generate new ideas. The focus of the course is on how to lead high functioning teams and the development of facilitation capabilities, so that students can effectively lead teams and organizations.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 540 Strategic and Financial Decision-Making in Organizations 3 Credits

This course explores the importance of information and financial resources within the culture of organizations, and the necessary relationship that exists between the two. The course draws on current literature and student experience to explore resource management and focuses on the effective use of information resources within the boundaries defined by financial realities. The relationship between data analyses and effective decision-making will be explored.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

LEAD 550 Organizational Research 3 Credits

The purpose of this course is to prepare future organizational leaders to read professional journal articles, plan research, and critique research. The course covers basic research methods, such as experimental, ex post facto, correlational, case study, time series, interviews, surveys, and basic statistics in terms of understanding and selecting statistics. These concepts are taught within the framework of organizational leadership.

This course should be taken at the end of your program.

Prerequisite(s): LEAD 500, LEAD 51. Permission of Program Director required.

LEAD 551 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 552 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 553 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 554 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 555 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 556 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 557 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 558 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 559 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 598 Capstone in Organizational Leadership 3 Credits

All MA candidates complete a capstone research project to demonstrate the application of core program competencies to a specific organizational or leadership problem. Reflecting upon their own leadership philosophy developed throughout the program, students will formulate, research, and write a leadership capstone paper that integrates the skills and concepts from the core courses as students use quantitative and qualitative methods to analyze a problem. Core and concentration courses should be completed before taking this course.

Prerequisite(s): Must be taken in last semester of study. Permission of Instructor required.

LEAD 600 Independent Study and Research in Organizational Leadership 3 Credits

The content of the course varies with the academic research interests of students who wish to engage in independent study related to the core content of organizational leadership and/or one of the concentrations in higher education administration, communication, information technology, and counseling-related services.

Piano (PI)

PI 512 Chamber Music 2 Credits

Emphasis is placed upon rehearsal and performances of representative collaborative literature for strings and piano, and woodwinds and piano. Students will be assigned movements from major chamber works selected from different style periods. Professional instrumentalists will join them for rehearsals and performances in class. An overview of the development of this repertoire will be presented and listening assignments will augment the study of specific works. A project involving the study and presentation of a piano quartet or piano quintet will be included. Attendance at three concerts of instrumental chamber music is required. Permission of applied teacher and instructor is required.

PI 513 Jazz Keyboard/Improv 3 Credits

This course will enable pianists and organists to become familiar with the theory, harmony, and improvisational techniques of jazz piano. Emphasis will be placed upon getting each student to create spontaneous improvisations. The fundamental goal will be that of enabling students accustomed to following a score to move beyond it. Extensive exposure to material from the "Great American Songbook" as well as to jazz standards will provide a structural basis for the course.

Prerequisite(s): TH 142 and PI 201, or equivalent knowledge and technical proficiency.

PI 516 Physical/Psych Aspects Piano 2 Credits

The two major emphases of this course are: (1) the pianist as athlete and 2) the pianist as performer. The first includes a study of appropriate exercise, nutrition, anatomy and physiology as they relate to piano technique, implications for injury prevention, and how to deal with injuries should they occur. The second includes the reading process, strategies for practicing, memorizing techniques, and ways of coping with the behavioral, physical and cognitive manifestations of performance anxiety.

PI 540 Keyboard Skills 3 Credits

The course includes in-depth study of numerous aspects of musicianship skills essential for all pianists within the broader categories of technique and practice strategies; memorization and sight reading; improvisation and lead sheet realization. All aspects of piano musicianship skills will be addressed from practical, pedagogical, and collaborative points of view. Assignments will include examples of studies from a wide range of levels all within the current and developing skill level of each student enrolled in the class.

Prerequisite(s): UG - Eight credits of applied keyboard study or permission of keyboard instructor or course instructor. GR - Permission of course instructor.

PI 585 Piano Ensemble 1 Credits

Study and performance of piano duets, two-piano works, and works for combinations of three or more pianists. The emphasis is on ensemble techniques for rehearsal and performance.

PI 609 Graduate Piano Review 1 Credits

A functional course concentrating upon sight reading of simple piano accompaniments and open score reading. Required for graduate students with deficiencies in these skills.

PI 611 Piano Pedagogy Lab 0 Credits

Discussions will include problem-solving related to piano teaching, discussion of observations, supervised and independent teaching, questions relating to repertoire, materials and technique. Comparative philosophies and psychologies and their applications, group and private teaching, business issues, professional organizations and publications, technology, career planning, recital and audition planning will be included. There will also be guidance in the preparation for the graduate oral examination.

PI 622 Eval Piano Teaching Lit 3 Credits

This course provides a critical survey of piano teaching materials, including standard teaching literature, approaches to piano technique in writings and music exercises, and repertoire for the elementary, intermediate, and early advanced student. All music is analyzed from the perspectives of performance, technical demands, strategies for teacher presentation, and student practice. Applications and demonstrations of technology are included. Graduate students demonstrate teaching and performance strategies in class and carry an assigned teaching load at the Westminster Conservatory.

PI 633 Piano Literature Seminar 3 Credits

A major area of piano repertoire is selected for intensive study. The emphasis of the seminar changes from semester to semester. Possible topics include the development of the Mozart concerto, keyboard works of J.S. Bach, piano writing of Debussy, and 20th Century piano music.

PI 641A Piano Primary 2 Credits

Piano Primary.

PI 641B Piano Primary 1 Credits**PI 641C Piano Elective 2 Credits****PI 641D Piano Elective 1 Credits****PI 641E Piano Primary 2 Credits****PI 641F Piano Primary 1 Credits****PI 661 Graduate Piano Pedagogy 3 Credits**

This course serves as an intensive study of theoretical and practical aspects of piano study, through examination of instruction materials and developing a well-defined philosophy and approach to piano teaching. Students are challenged to increase their ability in connecting advanced and intermediate music study to the foundation of what should take place in the first weeks of piano lessons. The focus of the course lies in developing one's own curriculum, on its own terms, or associated with instruction materials already in publication. Various methodologies and significant areas of thought in the field of piano pedagogy are explored and compared. The course involves private and group lesson observations at all levels of teaching. Practical application of education theory to music lessons at the piano is done through demonstration and practice teaching at the Westminster Conservatory or the College. Practical application of educational theory to music lessons at the piano is done through demonstration and practice teaching through the Westminster Conservatory or the College.

PI 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

PI 691A Piano Pedagogy Internship I 3 Credits

The two-semester internship includes weekly teaching each semester, faculty observation of this teaching, and private discussion with the faculty observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. Internships may include intensive study of private and/or group instruction, reading for children, working with college, adults, piano minor, gifted students or traditional studio of all ages and levels.

PI 691B Piano Pedagogy Internship II 3 Credits

The two-semester internship includes weekly teaching each semester, faculty observation of this teaching, and private discussion with the faculty observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. Internships may include intensive study of private and/or group instruction, reading for children, working with college, adults, piano minor, gifted students or traditional studio of all ages and levels.

PI 713 Accompanying Class 3 Credits

Students will investigate aspects of ensemble in vocal accompanying. Discussion topics will include rubato and its connection to language, stylistic concerns, musical preparation as well as practical issues such as recital programming and balance. Students will be expected to absorb extensive repertoire through attendance and performance. Class format will include both student presentations and lecture sessions.

PI 714 Techniques of Coaching I 2 Credits

A practical course designed to furnish information and experience in all aspects of vocal coaching, including diction coaching, ornamentation and realization, issues of drama and presentation, stylistic considerations, stage deportment and specialized accompanying skills. Students are observed in the process of coaching singers. Semantics and pedagogical techniques are stressed and polished. Factors involved in translations of Italian, French, German and other non-English texts are studied.

PI 715 Techniques of Coaching II 2 Credits

A practical course designed to furnish information and experience in all aspects of vocal coaching, including diction coaching, ornamentation and realization, issues of drama and presentation, stylistic considerations, stage deportment and specialized accompanying skills. Students are observed in the process of coaching singers. Semantics and pedagogical techniques are stressed and polished. Factors involved in translations of Italian, French, German and other non-English texts are studied.

Prerequisite(s): PI 714.

Professional MBA (PMBA)

Courses and Descriptions

PMBA 8000 Executive Communications 3 Credits

Professionals spend about seventy percent (70%) of their work-time communicating with other people. It is therefore no surprise that, without good communication skills, it is impossible to succeed in one's workplace. Yet, effective communication skills do not come naturally for most people. This course aims to prepare you to speak compellingly, write clearly and concisely, listen actively and critically, and persuade others by constructing sound arguments. To that end, we will learn the key aspects of communication: audience analysis, communicator credibility, message construction, and delivery. Deliverables will include written documents and oral presentations, as well as both individual and team presentations. Importantly, in doing so, you will enhance your leadership potential in your workplace by motivating your colleagues, team, and organization to work toward important goals.

PMBA 8010 Information Technology Proficiency 1.5 Credits

Computing proficiency requires understanding implications of advanced information technologies and the ability to successfully apply these technologies in an increasingly global society. This course will enable students to effectively use specific information systems tools (spreadsheet and database management) to begin to design applications for effective decision making.

PMBA 8020 Fundamentals of Accounting 3 Credits

For those students having no previous knowledge of accounting. Subject is approached from the point of view of the user of accounting information rather than that of the accountant who supplies the information. Surveys mechanics of accounting as a means to an end, emphasizing accounting as a tool of management and the language of business. Problems and cases bring out the managerial implications of accounting.

PMBA 8030 Economic Analysis 3 Credits

An intensive exposition of the essentials of price theory and income and employment theory. For students with less than a year of introductory economics at the undergraduate level. Topics include an analysis of markets, the nature and characteristics of producer behavior, the theory of pricing in competitive and non competitive markets, and their welfare effects. At the macro level, coverage of the economy in the short run deals with economic fluxuations, fiscal policy, and monetary policy. An examination of the economy in the long run covers factors effecting economic growth.

PMBA 8040 Basic Financial Principles 1.5 Credits

The central unifying theme of this course is valuation. Valuation is the basis for decisions in all major areas of finance. This course begins with a discussion of basic concepts including time value of money and its application for valuation of stocks and bonds and analysis of risk and return. Further application of valuation for capital investment projects made by a firm is explored by introducing the techniques of capital budgeting.

PMBA 8051 Fundamentals of Statistical Analysis 3 Credits

Covers basic statistical techniques useful in business decision making. Includes descriptive statistics, event probability, random variables, sampling distributions, regression analysis and topics in statistical inference.

PMBA 8052 Models and Methods of Operations Management 1.5 Credits

This course provides students with some of the most frequently used quantitative tools necessary in analyzing and resolving issues and problems in managing service and/or manufacturing operations. These tools are required in PMBA 8250 Operations and Supply Chain Management

Prerequisite(s): PMBA 8051.

PMBA 8060 Basic Marketing Principles 1.5 Credits

The purpose of this course is to provide students with an operational understanding of basic marketing principles and concepts. This will be done through interactive exercises and discussions based both on primary source and textbook readings as well as discussions and critical examinations of current marketing practices in companies and industries of interest to the students. Topics covered include environmental analysis, target marketing, product and service strategy, integrated marketing communications, channels of distribution, pricing practices, and the interface between marketing and corporate strategic planning.

PMBA 8070 Management: Theory & Application 1.5 Credits

A foundation course that provides an introduction to the theory and practice of management. The management functions of planning, organizing, leading, and controlling provide an organizing framework for examining current management challenges (e.g. globalization, ethics, diversity, and multidimensional organizational structures).

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): PMBA 8020.

PMBA 8230 Managerial Economics 3 Credits

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8020.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of PMBA 8051 and 8052.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): PMBA 8060.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): PMBA 8070.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8303 International Business Study Tour 3 Credits

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8311 Information Security for the Enterprise 3 Credits

This course will teach students how businesses can implement security policies which will protect their significant investment in computer systems. The course topics include but are not limited to security attacks, attack prevention and mediation and security audits. Security devices, firewalls, PC and server security, authentication methods and procedures, and network security will all be discussed. The course will be delivered through a combination of hands-on labs where students will evaluate and implement computer security on computers, and class lectures.

Prerequisite(s): PMBA 8210.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8315 Globalization and Technology 3 Credits

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8316 Application Development for the Web 3 Credits

This class will examine application development for the Web platform in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications and the skills needed to develop applications using that architecture. Specific skills learned include programming with the JavaScript programming language, creating Web pages using the HyperText Markup Language (HTML) and Cascading Style Sheets (CSS). Other skills learned in this course include how to create user-friendly user interfaces, and how to retrieve and update information stored on computer servers.

Prerequisite(s): PMBA 8210.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8318 Business Analysis and Design 3 Credits

This course will integrate the skills of business analysis with those of system design. Students will learn a dynamic visioning/planning process which will guide the development of a technology architecture model for the business enterprise. Students will learn requirements elicitation techniques and use cases. Design methods such as object modeling and prototyping and data modeling with enterprise relationship diagrams will also be covered.

Prerequisite(s): PMBA 8210.

PMBA 8319 Selected Topics in CIS 3 Credits

The study of a topic (or combination of topics) that represents some dimensions of computer information systems or has important and direct implications for CIS management. Topics recently covered include project management, data mining and data privacy. Theoretical foundations as well as applications may be explored. Readings, research, lectures, projects, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8321 Managerial Taxation and Strategy 3 Credits

This course is designed for students who are embarking on (or already in) careers in investment banking, corporate finance, strategy consulting, money management, or venture capital. The focus of the course comes from integrating the tax law with the fundamentals of corporate finance and microeconomics.

Prerequisite(s): PMBA 8020.

PMBA 8324 Financial Accounting & Report 3 Credits

Focus is on analysis and evaluation of alternative accounting methods and the relationship to company policy. Insight is gained through the reading of articles in leading accounting and financial periodicals and Internet research. Cases demonstrating financial reporting methods are assigned and discussed in class. Term project required. Topics include financial instruments, earnings per share, deferred taxes, post-retirement benefits and the accounting rule-making process.

Prerequisite(s): PMBA 8020 and PMBA 8040.

PMBA 8325 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisites: ACC 302 or ACC 302P or PMBA 8220.

PMBA 8335 International Trade & Investment 3 Credits

A study of the international economy in which business firms operate, and public policies that influence their activities. Includes international trade theory, balance of payments analysis, the international monetary system, barriers to trade, and the role of multinational corporations. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8341 Corporate Treasury Management 3 Credits

This course is designed to provide an understanding of modern principles and techniques for corporate treasury management. The course materials are useful for finance, banking, accounting and information system professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multinational cash management, and other related topics. Success in this course will help students preparing for the Certified Cash Manager (CCM) exam.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8344 Financial Market Operations 3 Credits

Flow of funds analysis is used to study financial intermediation and interest rate determination in money and capital markets. Includes the flow of funds accounts, funds flow through financial institutions, the demands for and supply of credit by economic sectors, and the impact of public policies on financial market behavior.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8346 Financial Modeling 3 Credits

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8347 Portfolio Management 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8348 Fixed Income Securities and Alternative Investments 3 Credits

This is an introductory course in fixed income securities and alternative investments. The first part of the course covers the markets for fixed income securities and their derivatives. Valuation of these securities and determination of the risk inherent in these securities are discussed. Methods for managing that risk, such as hedging and credit derivatives, are also discussed. The second part of the course covers a variety of alternative investments, including real estate funds, venture capital, hedge funds, and commodities. Valuation of these investments and determination of their risk are discussed.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8349 Personal Financial Planning 3 Credits

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8351 Business Analytics Fundamentals 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis. Students who have earned credits for CIS 350 or equivalent cannot take PMBA 8351 for credit.

Prerequisite(s): PMBA 8051.

PMBA 8352 Design Thinking and Innovation 3 Credits

This graduate course on Design Thinking and Innovation provides students with a framework for dealing with unstructured problems, and for managing the innovation process. This course introduces students to design thinking as a systematic approach to innovation, but also guide students through the process to identify and translate broadly defined opportunities into actionable innovation possibilities. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

Prerequisite(s): PMBA 8210.

PMBA 8353 Digital Futures 3 Credits

This course is a holistic course drawing on all areas of Information Technology. It leverages the in-depth understanding of Technology that MSIS students possess and transforms such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. It will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future. Case studies and readings will familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology/innovation. Students will be engaged in a discussion of multi-firm cases of strategic innovation and will examine policy decisions by the firm and various ethical dilemmas engendered by technological changes of the last four decades.

Prerequisites: PMBA 8210.

PMBA 8354 Quality Assurance and Total Quality Mgt 3 Credits

This course integrates the concepts of statistical quality control and the practices of today's leading companies in creating systems of total quality management (TQM). Considers how various business functions (e.g., production, engineering and design of products and services, purchasing raw materials, providing technical assistance to customers, and statistical quality control) and their interrelationships can be used to create high-quality products, and, thus, high levels of customer satisfaction. Includes traditional statistical methods for process control, acceptance sampling, reliability and quality improvement, as well as numerous examples of U.S. and foreign firms at the cutting edge of TQM. Introduces current thinking of leading figures in TQM.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8355 Visual Analytics 3 Credits

This graduate course will equip the students with the fundamental skills to perform visual analytics with Tableau. Specifically, students will learn how to prepare a dataset for visual analysis, and how to “tell a good story” using basic and advanced visualizations. At the completion of this course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience. Students who have earned credits for BDA 205 or equivalent cannot take PMBA 8355 for credit.

Prerequisite(s): PMBA 8351.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

PMBA 8361 Business to Business Marketing 3 Credits

The practices and policies used in the marketing of goods and services to business and industrial buyers are analyzed, focusing on the market and demand for products, marketing research, product planning, channels of distribution, pricing policies and practices and the development of sales program and service policies.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8362 Marketing Communications 3 Credits

This course dynamically blends the concepts and issues of integrated marketing communications with real world experiences. It is highly interactive, with students spending time in teams creating solutions, presenting, and feeling the experience of being in real life marketing communications situations. Students also will be exposed to current and classic literature pertaining to the course content.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8363 Consumer Behavior 3 Credits

The purpose of this course is to provide the analytical skills required to understand the nature of consumer decision making and internal and external factors that influence buying decisions in order to develop and implement appropriate marketing strategies. A case study approach is utilized in this course. This will be done through the analysis of actual marketing problems faced by a variety of organizations. The readings and class discussions will also include internal and external influences on consumer behavior, marketing research tools, marketing strategies to reach consumers and shape consumers' opinions, the role of marketing communications and marketing mix elements in creating a unique value proposition, and managing consumer relationships.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8364 Marketing Research 3 Credits

An overview of the subject matter which will assist students in developing an appreciation for the use by marketing management of marketing research and marketing information systems in making marketing decisions. Topics include specific research procedures for gathering, processing, analyzing and presenting information relevant to marketing problems in such areas as: advertising effectiveness, product development, distribution channels, sales techniques, consumer behavior, and forecasting study of research planning, implementation, and interpretation of findings is facilitated by the use of cases or projects.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8365 International Marketing Management 3 Credits

Examination of the nature and scope of global marketing activities, including the theoretical framework of international marketing, foreign marketing environments, multinational markets, MNC information systems, strategic marketing decisions, and organization for transnational marketing. This course applies to the Global Business concentration.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8369 Selected Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision-making may be explored. Readings, research, lectures, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8371 Human Resource Management 3 Credits

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

Prerequisite(s): PMBA 8070.

PMBA 8372 Management Skills 3 Credits

This is a practicum in interpersonal skills that are useful for practicing managers. Topics include motivating oneself and others, persuasive communication, creative problem-solving, managing conflict, using power constructively, managing change, and team management. Students are given opportunities to practice these skills in class and are asked to apply them to their current lives and report on the results of their applications. The course will provide students with a better understanding of the art of managing and of themselves as current or future managers.

Prerequisite(s): PMBA 8070.

PMBA 8375 International Management 3 Credits

This course focuses on the complexities of working and managing in a global business environment. Emphasis is placed on cross-cultural awareness, international communication, and negotiations. Students will explore the effect of culture on organizational behavior, managerial decision making, and global leadership.

Prerequisite: PMBA 8070.

PMBA 8376 Org Development & Effectiveness 3 Credits

This course focuses on Organization Development (OD), a discipline concerned with improving organizational effectiveness by means of planned, systematic interventions. The course will acquaint students with OD concepts, techniques, and skills. The course provides opportunities for students to explore and enhance their personal skills as change agents and consultants. The teaching/learning process emphasizes experiential activities and case analysis.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8377 Managing Workforce Diversity 3 Credits

This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the U.S. today. It will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious - gender, race, age, and physical characteristics. Other differences are not as easily observed such as family structure, educational level, social class, and sexual orientation. Understanding and valuing diversity requires attitudinal self-assessment and change. Values, stereotypes, and prejudices will be explored through readings, reflective writing, and active involvement in discussions, projects, and activities.

Prerequisite(s): PMBA 8070.

PMBA 8380 Business Analytics Optimization 3 Credits

This course has been designed to provide professional MBA students with the current knowledge and practice of optimization business analysts use. Optimization aims at selecting the best alternative from among available alternatives according to a predetermined objective. In general it involves building a mathematical model and finding the best alternative through a mathematical procedure. Optimization techniques help decision-makers make fact (i.e. data) based decisions and offer the potential of making significant profits or cost savings. The main focus of this course will be on developing modeling skills to gain insight into a wide variety of business decision problems. In other words, the emphasis in this course will be on modeling practical business decision problems, use of relevant software for optimal solution, interpretation of results, and sensitivity analysis rather than the theory of mathematical solution techniques. Coverage of course material will follow the typical sequence of (1) identification and discussion of a business decision problem; (2) developing a graphical model (e.g. influence diagram); (3) developing a mathematical model; (4) computer solution; (5) interpretation of results and sensitivity analysis; (6) discussion of insights gained from the experience; (7) discussion of implementation issues. In addition, heuristics will be discussed when optimization techniques are not available or too costly.

Prerequisites: PMBA 8010 and PMBA 8051.

PMBA 8383 Entrepreneurship 3 Credits

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8384 Consulting for New and Small Ventures 3 Credits

This course provides experience-based learning to students through the use of student teams to assist area small businesses/organizations. These small firms could have a variety of needs ranging from market research, improving financial reporting and bookkeeping, business planning, streamlining operational procedures, etc. This course will provide students the opportunity to experience in-depth analysis of an individual organization. The emphasis is on student consultants generating immediate, actionable recommendations for the client. Thus, this course is useful not only for those considering small business ownership, but provides an opportunity to students to learn entrepreneurial thinking.

Prerequisite(s): Completion of MBA pre-program courses and permission of instructor.

PMBA 8385 New Venture Launch 3 Credits

Students will start and run a new venture while under the supervision and guidance of faculty. Students will take a business plan they have developed and execute it. This is an opportunity to experience the launch process and learn hands-on how to adapt to the marketplace. Some businesses started in this class may also be eligible to receive venture funding from Rider.

PMBA 8386 Green Entrepreneurship 3 Credits

This course is both a traditionally academic graduate course and a practical, case study based, business development course. Lectures will present the scientific, technical, financial, and business underpinnings required to understand the rationale for and the range of solutions possible that businesses can utilize when initiating or developing sustainable practices or new entrepreneurs can consider as they develop new businesses. Students will be learning about real business examples and discussing how the technical aspects of sustainability interact with the more practical and immediate demands of running a business – making a profit and maintaining positive cash flow while acting ethically.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8389 Tax Planning for Entrepreneurs 3 Credits

The business and personal finances of an entrepreneur are integrally related. Often personal resources fund business operations and business resources fund individual necessities and obligations. This course is designed to familiarize the entrepreneur with wealth maximization and tax minimization strategies for business and personal activities. This course covers basic tax compliance concepts and includes personal financial planning and estate planning issues. Not open to MAcc students.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8397 Evidence Management and Presentation 3 Credits

This course addresses legal issues and practical considerations involved in the collection, acquisition, analysis and storage of digital evidence and presentation of digital and technical evidence to judges, juries and other decision makers. The law of evidence and its implications for the manner and method technical evidence is acquired and presented for consideration in court or in other proceedings (i.e. criminal, civil, or administrative). Requirements and preparation for the presentation of technical evidence as an expert or fact witness.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8402 The Business of Sports 3 Credits

This course examines diverse managerial issues involving the sports industry. The course covers topics at the league level, the team level, the athlete-agent level, and the college level. The constituencies with interests in sports issues such as athletes, fans, media, companies, advertisers, and legislators are discussed along with global aspects of sports enterprises. Valuation issues related to sports teams are also covered. The course is designed to integrate all aspects of businesses as they apply to sports with an emphasis on strategy, management, marketing, and finance.

PMBA 8403 Sport Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of hands-on labs, a data project, a research project, quizzes, and online discussions. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports. This course assumes a basic level of skill working with Microsoft Excel.

Prerequisite(s): PMBA 8051 or waiver.

PMBA 8404 Sports Marketing 3 Credits

This course explores the complex and diverse nature of sports marketing. It applies fundamental marketing concepts to the sports industry, including the marketing mix, consumer behavior, marketing research, segmentation analysis, and assessment of marketing programs specific to sports. Guidelines for the formulation of marketing plans and strategies will be included. Trends, issues, and problems influencing the industry will also be examined. Discussions cover professional, collegiate, non-profit, and other areas of the sport industry.

PMBA 8405 Legal and Ethical Issues in Sports 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues which will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

PMBA 8491 Business Law 3 Credits

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement.

Prerequisite(s): BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

PMBA 8492 Ethical Issues in International Business 3 Credits

This course is an introduction to identifying, analyzing and resolving ethical dilemmas in both U.S. and international business, including reference to legal and regulatory issues. The course begins with a general introduction to ethics, considers ethical issues connected with the economic, legal and regulatory systems within which modern business takes place and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues, including cases resulting in civil and criminal litigation. The primary focus of this course will be ethics in the international business environment. Most of the readings and discussion board topics, the group case studies and the individual research paper will have an international focus.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8880 Strategic Management 3 Credits

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

Prerequisite(s): All other MBA breadth courses.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

PMBA 8904 Micro-Internship 1 Credits

In order to supplement in-class learning with practical training, this micro- internship may be taken for 1 elective credit. The internship may not be performed with a student's current employer. The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined following the internship guidelines available from the Dean's office.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be performed at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and, during the semester he/she receives credit for the internship, is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Dean.

PMBA 8906 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8907 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8908 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8909 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8989 Spec Topics Entrepreneurship 3 Credits

Special Topics in Entrepreneurship.

Psychology (PSY)

Courses and Descriptions

PSY 501 Introduction to Applied Psychology Skills 3 Credits

This course will provide students with an examination of several facets of applied psychology with a focus on consuming research, understanding differences in methods and perspectives, writing according to APA style, and demonstrating understanding of several methods and perspectives in applied psychology. These are necessary skills to function meaningfully in the field. We will review and evaluate scholarly literature from across several psychology application areas. This course is available to MA Applied Psychology students only and should be taken near the beginning of entering the MA program.

PSY 510 Introduction to Applied Behavior Analysis 3 Credits

This course will provide an introduction to applied behavior analysis. Students will learn the history and defining features of the field. Due to the scientific nature of applied behavior analysis, students will also learn characteristics and processes associated with the scientific method. Furthermore, foundational concepts will be defined, along with relevant behavior change procedures.

PSY 511 Principles of Learning 3 Credits

This course will provide students with more in depth understanding of the philosophical assumptions, characteristics and basic principles of behavior analysis. Students will have the opportunity to review concepts learned during Introduction to Applied Behavior Analysis. This course will also provide an introduction to the basic research in behavior analysis. Students will become more fluent in definitions, characteristics, principles, processes, and concepts of behavior analysis.

Prerequisite(s): PSY 510.

PSY 513 Functional Assessment 3 Credits

This course is designed to provide knowledge and skills of methodologies to conduct a thorough behavioral assessment, interpret the assessment data, and identify goals for treatment. Topics will include direct observation/data collection methods, data analysis, functional assessment, stimulus preference and reinforcer assessments, and ethical and professional issues. The second half of the course will deal specifically with functional analysis including the history of and variations to the methodology. The relationship between assessment techniques and the development of the least-restrictive but most effective behavioral intervention will also be discussed.

Prerequisite(s): PSY 510, PSY 511.

PSY 514 Single Subject Research Design and Analysis 3 Credits

Students will be introduced to the basic evaluative methods used in behavior analysis including various models of single subject design such as multiple baselines, reversal designs, and alternating treatment models. Students will design analyses, collect data, graphically display their data, and provide an analysis of findings. Students will read original behavior analytic research articles and practice analysis of findings.

PSY 515 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 516 Ethics for Behavior Analysts 3 Credits

This course will familiarize the student with ethical issues and responsibilities of behavior analysts working in applied settings. Informed consent, due process, protection of confidentiality, and selection of least intrusive, least restrictive behavior change procedures will be presented and discussed within the context of case method. Ethical decision making processes will be emphasized, and the relationship between ethics and law will be explored.

PSY 518 Organizational Behavior Management 3 Credits

This course will provide an overview of research and practice in the field of Organizational Behavior Management (OBM), also referred to as Performance Management in organizational settings. Performance Management is a behaviorally-based area of specialization within the broad field of Industrial-Organizational Psychology. The concepts and techniques used in Performance Management originated from the field of behavior analysis.

PSY 519 Models of ABA Instruction 3 Credits

This course provides students with a general knowledge of the different procedures used to teach new skills and new behaviors in the field of applied behavior analysis. Areas covered will include the assessment of relative strengths and deficits, use of discrete-trial and naturalistic teaching procedures, use of reinforcement procedures to strengthen behaviors, use of motivating operations and discriminative stimuli, use of prompting and prompt-fading procedures to transfer stimulus control, use of shaping procedures to teach new behavior, use of task analysis and chaining procedures to teach new behaviors, use of precision teaching and fluency-based instruction, and use of personalized systems of instruction. Additionally, various components of the aforementioned areas will be integrated and culminate in two modules: one designed to teach communicative behavior and the other to perform discrimination training.

Prerequisite(s): PSY 510.

PSY 520 Interventions for Challenging Behavior 3 Credits

Students will review principles of behavior in the context of application to functional assessment and treatment of socially significant problem behavior. Topics including extinction, functional communication training, differential reinforcement, choice, environmental manipulations, and punishment will be covered. Students will move through the process of developing function-based interventions and writing behavior plans.

Prerequisite(s): PSY 510 and PSY 513 (or co-req).

PSY 521 Supervision and Management in ABA 3 Credits

This course provides students with skills needed to provide supervision and management in the field of applied behavior analysis. Students will apply the basic principles of behavior analysis to supervision and management of their staff and trainees. Areas covered include establishing performance expectations, selecting supervision goals based on assessment of current skills, how to train personnel to competence, performance monitoring and feedback, functional assessment and function-based strategies of personnel behavior, and how to evaluate the effects of supervision. Additional areas of discussion will include professional behavior, leadership, ethics, and professional development.

Prerequisite(s): PSY 510, PSY 511, PSY 513 and PSY 514.

PSY 522 Recent Research in ABA 3 Credits

This course provides an overview of recent behavior analytic research. Topics will vary semester to semester to capture changes in the field as they occur. Students will have the opportunity to practice reviewing, discussing, and interpreting research methodology, results, and potential areas for future research.

Prerequisite(s): PSY 510.

PSY 525 Cognitive Development 3 Credits

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

PSY 530 Interventions for Individuals with Developmental Disabilities 3 Credits

The purpose of this course is to prepare students to work with individuals with a broad spectrum of developmental disabilities. The course will begin with a discussion of typical child development and milestones, address how development might differ from the norm, introduce subsequent assessment and diagnosis and ultimately, introduce appropriate interventions. The main focus of this course is applied behavior analysis [ABA] and common ABA strategies for intervention.

PSY 533 Interventions for Autism 3 Credits

The purpose of this course is to provide students with a general understanding of the clinical characteristics of autism spectrum disorders. The course will briefly address etiology and neurocognitive underpinnings of these disorders but will focus on psycho-educational interventions. The course will be taught from an applied behavior analytic perspective.

PSY 535 Language Assessment and Intervention 3 Credits

Students will be introduced to the classification of verbal responses, both vocal and non-vocal. Using videotaped examples, students will categorize observed verbal behavior. Students will be provided with practical tools for the assessment of verbal behavior, as well as an array of intervention strategies. A focus will include the design of teaching strategies to enhance language acquisition, as well as ongoing evaluation of intervention efficacy will be employed.

Prerequisite(s): PSY 510, PSY 511.

PSY 536 Social Skills Assessment & Intervention 3 Credits

Students will be introduced to the development of social skills and the identification social skills deficits. Using videotaped examples, students will categorize observed social behavior. Next, students will be provided with practical tools for the assessment of social and emotional behavior, as well as an array of intervention strategies. Tools for the collection of data and the evaluation of the success of target interventions will be stressed.

Prerequisite(s): PSY 510, PSY 511.

PSY 540 Aging, Health, and Behavioral Gerontology in Autism 3 Credits

The course provides an overview of adult lifespan development, aging in the autism population, physical and mental health issues for adults with autism, and recent research in behavioral gerontology. Students will have the opportunity to practice reviewing, discussing, and interpreting research methodology, results, and potential areas for future research. This course is part of the Adult Services and Behavioral Gerontology sequence designed to prepare graduate students and behavior analysts for careers focused on serving adults with autism spectrum disorders (ASD).

Prerequisite(s): PSY 510 or BCaBA or BCBA certified professionals in good standing.

PSY 541 Employment and Vocational Skills for Adults with Autism 3 Credits

This course will provide an overview of the skills and competencies that influence the acquisition and maintenance of competitive employment for adults with developmental disabilities. Topics will include vocational planning, the importance of choice when selecting employment opportunities, social competence on the job, the development and implementation of support strategies, programming for the generalization and maintenance of work behavior, fading supervision and support, and collaborating with parents, family members, co-workers, and employers. Students will use information obtained from lectures and reading assignments to design and write individualized programs addressing employment and life-skills for adults with disabilities. This course is part of the Adult Services and Behavioral Gerontology sequence designed to prepare graduate students and behavior analysts for careers focused on serving adults with autism spectrum disorders (ASD).

Prerequisite(s): PSY540.

PSY 542 Support Services, Habilitation, and Independent Living for Adults with Autism 3 Credits

This course covers 1) extant services and resources for adolescents and adults with ASD, 2) supervision, management, and training of support staff who work with adults with ASD, and 3) assessment and teaching of skills adults with ASD need to live independent, self-sufficient, and fulfilling lives. Throughout the course we pay special attention to issues surrounding personal liberties, choice making, and self determination. Students will have the opportunity to navigate support services, propose empirical research focused on training staff using Behavioral Skills Training, and construct individualized skill acquisition programs. This course is part of the Adult Services and Behavioral Gerontology sequence designed to prepare graduate students and behavior analysts for careers focused on serving adults with autism spectrum disorders (ASD).

Prerequisite(s): PSY 540.

PSY 543 Practicum in Applied Behavior Analysis for Adults with Autism 3-4 Credits

This course is part of the Adult Services and Behavioral Gerontology sequence designed to prepare graduate students and behavior analysts for careers focused on serving adults with autism spectrum disorders (ASD). Students will have frequent, direct, onsite supervision of behavior analytic activities in settings for adults with autism. Students will have the opportunity to apply the skills acquired in coursework.

Prerequisite(s): PSY 540, PSY 541, PSY 542.

PSY 545 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

PSY 550 Behavior Analytic Approaches to Health and Physical Activity 3 Credits

The application of behavior analytic methods, practices, and principles has been demonstrated through research and clinical applications to be effective at changing health and fitness behavior. This course will provide an overview of research and practice in applying behavior analytic principles to changing health behavior and physical activity. Behavior change across various populations will be covered including both adults and children with and without disabilities. Discussion will focus on both functional assessment as well as interventions effective at changing health and physical activity including self-management, self-monitoring, goal setting, contingency management, etc. Students will spend the semester implementing self-management projects for their own health and/or fitness behavior.

PSY 551 Behavioral Approaches to Addiction 3 Credits

Evidence from laboratory and clinical settings suggests that addiction can be conceptualized and effectively treated through the application of principles of conditioning. This course provides an overview of behavior analytic research in understanding and intervening on addictive behavior. Behavioral technologies for change regarding substance-related and behavioral addiction will be covered.

Prerequisite(s): Graduate students in Applied Psychology.

PSY 565 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

PSY 567 Multicultural Perspectives in Applied Psychology 3 Credits

In this graduate level course, students will examine in-depth, culture and identity formation, social relationships, the perception and manifestation of mental illness, and treatment seeking among other areas. Additionally, given the increasing diversity of communities in the US, the course will also focus on immigration, acculturation, discrimination, and the psychological correlates of each. Implications of these factors for emerging practitioners will also be covered.

PSY 572 States of Consciousness 3 Credits

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

PSY 574 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

PSY 577 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

PSY 582 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

PSY 584 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 584 is crosslisted with PSY 384.

PSY 590 Field Placement in Applied Behavior Analysis 3 Credits

The applied behavior analysis practicum includes a required field placement of 15 hours per week and periodic on campus meetings. The practicum experience will allow students to experience the professional life of a behavior analyst in one of several preapproved sites. Sites approved include those for children, adolescents or adults with disabilities. Placements will be selected in consultation with the Practicum Coordinator and will require a written practicum plan from the cooperating field supervisor.

Prerequisite(s): PSY 510, PSY 511, PSY 513, PSY 514.

PSY 595 Selected Topics in Applied Psychology 3 Credits

Students will actively engage in an in-depth inquiry into a special topic area concerning applied psychology. Though the topics will change, students will be required to read and discuss current literature as well as considering the application of tools of the discipline to research questions of their own.

PSY 600 ABA Thesis I 1 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 601 ABA Thesis II 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 602 ABA Thesis III 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 690 Independent Research and Study 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of Instructor.

PSY 700 ABA Thesis I 1 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 701 ABA Thesis II 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 702 ABA Thesis III 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 720 Practicum in ABA 3 Credits

The Master in Applied Psychology - Applied Behavior Analysis (MAP-ABA) program's practicum offers students supervision from Rider's MAP-ABA faculty and a variety of high quality in-vivo experiences, under the direct supervision of a Rider-Approved Board Certified Behavior Analyst (BCBA), during which students apply the skills acquired in coursework.

Prerequisite(s): PSY 510, PSY 511.

Sacred Music (SM)**SM 509 Jubilee Singers 1 Credits**

This auditioned ensemble is devoted to the performance of sacred music from the African-American tradition.

SM 510 Conducting Adult Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving adults.

SM 511 Sacred Music Lab 0 Credits

Series of classes that addresses a variety of experiences in Sacred Music while rotating principal themes and ideas. Student preparation of monthly worship settings will put studied concepts into practice.

SM 512 Conducting Children and Youth Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving children and youth.

SM 517 Concert Handbell Choir II 1 Credits

Open to students who have had previous handbell experience. Intermediate to advanced repertoire, with opportunities for concert performance.

SM 519 Concert Handbell Choir I 1 Credits

A choir selected by audition from the most experienced and capable bell ringers among the student body at large. This ensemble utilizes advanced repertoire and techniques, aiming primarily at presenting concerts both on and off campus, including a two-week annual tour.

SM 523 Choral Music for Adults 1 Credits

This course is designed to acquaint the church choral director with repertoire suitable for use with adult choirs and adult ensembles. Representative repertoire from all periods of music will be discussed and analyzed. Rehearsal techniques will be incorporated regarding introducing the repertoire, skill-building development, and warm-ups. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 524 Choral Music for Children 1 Credits

This course is designed to acquaint the church Choral director with repertoire suitable for use with children's and youth choirs. Representative repertoire from all periods of music will be discussed and analyzed. Rehearsal techniques will be incorporated regarding introducing the repertoire, skill-building development, and warm-ups. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 525 Conductors' Repertoire Ensemble 1 Credits

An auditioned chamber ensemble, offered every semester, which provides conducting podium time and coaching to all interested members. It additionally serves the conducting needs of graduate Sacred Music majors.

Prerequisite(s): CR 215 or permission of instructor.

SM 531 Colloquium in Sacred Music 2 Credits

A lecture series/colloquium intended to address a wide variety of concerns in the field of Sacred Music while rotating principal themes and ideas.

SM 540 Choir Training/Young Singers 3 Credits

A practicum combined with study designed to teach students how to organize and direct a children's choir program that emphasizes musical training as a basic requirement. The course focuses on teaching children good vocal techniques and sight-reading skills and includes practice teaching in a local school under instructor supervision. Other areas covered include musical readiness skills, voice-change problems, and repertoire.

SM 541 Conducting Church Choirs: Ped & Mgt 3 Credits

A practical course devoted to the building and maintenance of church music programs serving persons of all ages.

SM 610 Foundations of Music Ministry 2 Credits

This graduate level course surveys the vocational needs, professional relationships, administrative styles, and teaching roles of the practicing church musician. In addition to an overview of professional standards, emphasis will also be placed on music engraving skills (music notation software), budgeting, recruitment, endowments and fundraising.

SM 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity. Offered in rotation with other Sacred Music electives. 3 Credit hours.

SM 630 Conducting Coaching 1-2 Credits

Structured preparation and faculty coaching of the culminating choral recital in the graduate Sacred Music curriculum.

SM 631 Worship Planning/21st Cent. 3 Credits

Designed to facilitate the planning of worship, this practical course will be an immersion in the musical and theological materials available to those who create worship.

SM 632 Collaborative Prep for Worship 1 Credits

Through seminars, readings and common participation in chapel services, Westminster Choir College and Princeton Theological Seminary students will explore models for pastors and church musicians to prepare collaboratively for worship.

SM 635 Choir Training For Children/Youth 3 Credits

A practical course designed to teach students how to organize and direct a comprehensive music program from preschool through high school in the church setting. The course focuses on teaching excellent vocal techniques for each level as well as appropriate music skill development. Other areas of focus include: musical readiness skills; working with preschool singers; understanding the child's voice; the changing voice; and appropriate repertoire for all ages.

SM 640 Liturgies 3 Credits

A study of the origins of liturgy, its development in the main Christian traditions, and its relation to ecclesiastical history, with particular attention given to the differing styles and traditions of liturgical music. Contemporary liturgies are viewed against this historical background.

SM 641 Hymnology 3 Credits

A study of the origins and development of Christian hymnody, with reference to the theological emphases of various periods from the beginnings to the present, aiming to arouse interest in the textual and musical content of hymns and in their effective use in worship.

SM 654 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 655. Offered in rotation with other Sacred Music electives.

SM 655 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas.

SM 690 Independent Study and Research 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

SM 710 Panorama of Sacred Music 3 Credits

This graduate-level course is a one-semester survey of those masterworks and significant musical movements that have shaped the evolution of Western Sacred Music. Beginning with the Old Testament, this course will move through all eras, highlighting important composers and liturgical trends, placing them in their appropriate cultural and theological contexts.

SM 712 Hist of Sacred Music I 3 Credits

Study and research into the history of Western Christian music and its most important genres beginning with the Old Testament and continuing until the death of J.S. Bach in 1750.

SM 713 Hist of Sacred Music II 3 Credits

Continuation of SM 712, beginning with the Classical Viennese Mass and continuing until today. Emphasis on the development of the American church and its worship music.

SM 722 Theology, Liturgy & Worship 3 Credits

A detailed study of the Bible. Principal thematic and narrative elements are correlated to the development of the church's historic liturgies and the theological principles behind them.

Spanish (SPA)

Courses and Descriptions

SPA 500 The Poetry of Resistance in the Time of the Generals in Latin America 3 Credits

This course offers a broad overview of important historical literature about dictatorships in Latin America. The weekly readings and writing assignments have been selected in order to: 1) introduce major concepts, arguments, and figures in the field of Latin American literature and culture; 2) appreciate the evolution of the role of artists and intellectuals during the years of the "dirty war" in Latin America; 3) sharpen analytical writing; and, 4) demonstrate the connection (and the limits of the connection) between literature, culture, and society. This course is predominantly a study of Latin American governments in the twentieth century and of the role of artists, primarily writers of fiction and poetry, as a corps of truth-tellers and resisters in the face of government propaganda, censorship, and cultural/political repression.

SPA 510 Marks of Identity: The Journey of the Self in Spanish Theater 3 Credits

What markers of class, race, ethnicity, gender and even species shape individual and group identity? How does identity change over time? How do I know who I am, and how does my identity further my interests and those of society? Offered in translation, this course explores the staging of identity in Spanish theater from the seventeenth to the twenty-first century. Topics may include the 17th-century honor code and gender, the myth of Don Juan, imperialist imaginings of New World subjects, the romantic hero and the angel of love, identity and the grotesque, identity and erotic desire, identity and media technologies, and non-human animal subjects. Film, art, music and live-theater attendance.

Special Education-GR (SPED)

Courses and Descriptions

SPED 500 The Inclusive Classroom: Effective Practices for General Education Teachers 3 Credits

This course is designed to introduce general education teachers to special education and the inclusive classroom. Students will explore current research, issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed.

SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 505 A Comprehensive Approach to Supporting Students with Autism Spectrum Disorder 3 Credits

Through this course, students will learn theories related to instructing and assessing individuals with Autism Spectrum Disorder (ASD), as well as evidence-based practices related to academic instruction. Effective interventions related to supporting the emotional, behavioral, and communicative needs of students with ASD across grade levels will also be addressed. The course begins by examining the characteristics of the disability, causes, early warning signs, diagnostic procedures, and early intervention practices. Specific practices related to instruction and intervention as well as how to best structure a classroom for students will be examined. Teachers will receive instruction in a variety of strategies and practices, as well as their theoretical underpinnings. Strategies for communicating effectively and efficiently with parents, as well as the most current and/or special issues in the field will also be discussed. Issues related to post-secondary transition and the specific needs of this population and their families will also be examined. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals through Applied Behavior Analysis for students with Autism Spectrum Disorder and other behavioral issues. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multi-component interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 531 Assessment for Instruction in Special Education 3 Credits

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

Prerequisite(s): SPED 512.

SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 542 Literacy and Students With Special Needs 3 Credits

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 580 Supervised Internship in Special Education 3 Credits

This supervised internship experience will provide students with an opportunity to connect theory and practice in special education during the summer. Students will work full-time in a setting with individuals with disabilities. After a brief period of orientation to the setting, the intern will assume a full load of teaching and/or supervisory responsibilities appropriate to the context of the experience. Seminar meetings will be required. Permission of the program advisor is required.

Prerequisite(s): SPED 512, SPED 514, SPED 523, SPED 525, SPED 531, SPED 535, SPED 539.

SPED 590 Professional Seminar in Special Education 3 Credits

This course addresses the current issues in the field of special education. Students will synthesize research and literature from the field of special education to address current issues and practice. Collaboratively, students will examine one area of special education through research and presentation. A reflective comprehensive view of special education including assessment, instruction, inclusive practice, assistive technology, Autism Spectrum Disorder, behavior, literacy etc. will be shared. Students are expected to complete a comprehensive exam in these related special education topics and submit 100 hours of supervised field hours. This course should be taken in the final semester of the MA program as it is the culminating reflective course of study.

Prerequisite(s): Permission of instructor.

SPED 600 Independent Study and Research in Special Education 1-3 Credits

The content of the course varies with the academic research interests of students who wish to engage in independent study related to topics in special education.

Voice (VC)**VC 553 Special Topics in Voice Performance Practice 3 Credits**

Intensive performance coaching and lectures in the form of master classes where performance practice in selected topics will be taught by current faculty or distinguished alumni and specialists in their fields.

Prerequisite(s): Open to students at sophomore level and above with permission of the instructor.

VC 591 Performing in Lyric Theater 2 Credits

Performing in Lyric Theater offers techniques for the preparation of lyric roles in a theatrical setting. It will develop elements of stagecraft, systematize a process for preparations and exploration, and introduce the working relationship with director and conductor.

Prerequisite(s): Undergraduates, VC 291 and the successful completion of Level II jury, or permission of the Chair.

VC 592 Opera Workshop 2 Credits

Introduction to opera performance. Acting exercises, character development, dramatic exploration and musical coaching culminating in a workshop-format presentation. It is recommended that VC 491 or 691 be taken before this course. This course may be repeated for credit.

Prerequisite(s): Undergraduates, successful completion of the level II voice test or permission of the chair.

VC 593 Opera Theater 2 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593E Opera Theater (Ensemble) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593R Opera Theater (Role) 2 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593T Opera Theater (Tech) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions, and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity.

VC 627 Opera Literature I 3 Credits

Study of the development of opera from 1600 through the Napoleonic era (ca. 1815), with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 628 Opera Literature II 3 Credits

Study of the development of opera from the early 19th century to the present, with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 633 Seminar in Opera Literature 3 Credits

An intensive study of an area of opera literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the works of a selected composer or of a specific genre of opera.

VC 635 Seminar in Song Literature 3 Credits

An intensive study of some area of art song history and literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the selected repertoire.

VC 641A Voice Primary 2 Credits**VC 641B Voice Primary 1 Credits****VC 641C Voice Elective 2 Credits****VC 641D Voice Elective 1 Credits****VC 641E Voice Primary 2 Credits****VC 641F Voice Primary 1 Credits****VC 641G Voice Primary 2 Credits**

Voice Primary.

VC 650 Pedagogy Capstone 1 Credits

Independent research leading to a completed capstone project, such as a pedagogical publication or presentation, development of an original or unique method of instruction, instructional materials, etc. The project must be approved by the department.

VC 655A Voice Primary 2 Credits**VC 655B Voice Primary 1 Credits****VC 655E Voice Primary 2 Credits****VC 655F Voice Primary 1 Credits****VC 657 Private Coaching 2 Credits**

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 657 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 658 involves weekly half-hour lessons and a fee of \$600. Open to graduate Voice Pedagogy and Performance majors.

VC 658 Private Coaching 1 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 657 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 658 involves weekly half-hour lessons and a fee of \$600. Open to graduate Voice Pedagogy and Performance majors.

VC 661 German Lieder 3 Credits

This survey of the German Lieder begins with its roots in the 17th and 18th centuries and continues into the 20th century. Classes will involve study of Romanticism, including philosophers and poets of the 18th and 19th centuries who were important for German Lieder. The bulk of the class involves in-depth study of the Lieder of the important composers of the genre: Haydn, Mozart, Schubert, Robert and Clara Schumann, Mendelssohn, Liszt, Brahms, Wolf, Strauss, Mahler, Schoenberg, Berg, and Webern. Class sessions will involve a balance of lecture, discussion, and student performance.

VC 662 French Melodie 3 Credits

This course is designed as a survey of the song literature of France. Students examine works for voice and piano/instruments by Berlioz, Gounod, Saint-Saëns, Bizet, Faure, Duparc, Chausson, Debussy, Ravel, Messaien, Milhaud, Poulenc, and others, analyzing their relationship to larger stylistic, social, and musicological trends. Investigation will include matters of prosody, scansion, and compositional organization, with particular attention given to matters of text setting and poetic treatment. Special emphasis will be placed on important French language poets whose literary works serve as the basis for this material. Poets will include Baudelaire, Verlaine, Hugo, Rimbaud, Mallarmé, LaForgue, Maeterlinck, and others. Poetic history and form will be covered as well as important composer/poet partnerships. Class sessions will involve a balance of lecture and discussion. Works by both well-known and lesser-known composers will be included.

VC 667 Private Dramatic/Role Coaching 2 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 667 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 668 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

VC 668 Private Dramatic/Role Coaching 1 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 667 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 668 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

VC 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

VC 705 Grad Voice Rep:Italian/French 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 706 Grad Voice Rep:German/English 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 722 Literature for Teaching 3 Credits

A survey of graduated teaching literature for beginning, intermediate and advanced voice students. Literature will be explored that is particularly well-suited to specific vocal issues (e.g. legato, coloratura, staccato, etc.)
Prerequisite(s): VC 723, VC 724.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 724 Voice Pedagogy II: Methods 3 Credits

A comparative study of various pedagogical methods and ideals. A wide range of important historical and contemporary pedagogy treatises is reviewed. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student.

VC 725 Voice Ped III: Tchng Practicum 3 Credits

Communication skills are explored and students develop a systematic approach to studio voice instruction. Each student is assigned at least two voice students (one adult and one teenager) to be taught both inside and outside of class. Emphasis is placed on becoming familiar with all voice classifications and basic vocal literature.

Prerequisite(s): VC 723.

VC 726 Voice Research 3 Credits

Peer reviewed research in voice is evaluated and research methodologies are explored. Class projects include research in historical, qualitative, quantitative, and mixed methods approaches.

VC 730 The Singing Actor: Opera 3 Credits

This course entails coaching of selected songs, arias or repertoire from music theater, and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

VC 731 Opera Auditions: Prep & Tech 2 Credits

This class will explore the many facets of preparing an audition for an opera role, apprentice program, or competition. At least three to four arias in contrasting styles and languages should be prepared for work in class. Areas to be addressed include vocal and dramatic presentation, networking, resume building, make-up, and photo advice. In coordination with the Office of Career Services, panel discussions with invited guests that will explore specific career-related topics will be scheduled.

Prerequisite(s): permission of the applied instructor.

VC 740 Seminar in Music Theater Pedagogy 3 Credits

Comprehensive study of various pedagogical approaches to teaching Music Theater singing techniques. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments, and other written assignments.

VC 741 Music Theater Literature I 3 Credits

Survey and analysis of Music Theater literature from its roots in Tin Pan Alley through Kander and Ebb. Students will explore the synergistic relationships among text, music, and style and discuss the influence of society and politics on the genre. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments and other written assignments.

VC 742 Music Theater Literature II 3 Credits

Survey and analysis of Music Theater Literature from Sondheim to the present. Students will explore the synergistic relationships among text, music, and style and discuss the influence of society and politics on the genre. The class will also discuss the integration of pop/rock and other contemporary substyles within the genre. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments and other written assignments.

VC 791 Teaching Internship 2 Credits

Teaching internship with a master teacher(s). The student will teach under faculty observation and supervision, including follow-up private discussion with the observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. May be offered on an intensive basis in conjunction with Westminster Summer Session events, such as The High School Solo Vocal Artist and/or Vocal Institute.

Graduate Faculty

C. Emmanuel Ahia

Professor, Department of Graduate Education, Leadership, and Counseling
B.A. Wheaton College; M.A. Wheaton College Graduate School; Ph.D. Southern Illinois University; J.D. University of Arkansas

Christopher Arneson

Professor, Department of Piano and Voice
B.A., M.M. Binghamton University; D.M. Rutgers University

Code of Academic Integrity

Introduction

All information given here applies to all undergraduate and graduate students of Rider University.

Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to those standards and policies set forth in this catalog. **Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student;**
2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirement), creations, and activities engaged in by the student while at the University, including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, Internet/web-based productions and sales, and athletic events and all proceeds therefrom. He/she has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

Rider University's Right to Change Catalog Contents

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student. While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes

affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and reasonable treatment of interested parties requires in the University's best judgment.

Academic Rights and Freedoms

It is the responsibility of Rider University to protect the academic freedoms of the students in accordance with the Joint Statement on Rights and Freedoms of Students. Of critical importance is section two, which deals with the relationship between the professor and the student. "The professor in the classroom and in conference should encourage free discussion, inquiry and expression. Student performance should be evaluated solely on an academic basis, not on opinions or conduct in matters unrelated to academic standards."

Protection of Freedom of Expression

Students should be free to take reasoned exception to the data or views offered in any course of study and to reserve judgment about matters of opinion, but they are responsible for learning the content of any course of study for which they are enrolled.

Protection Against Improper Academic Evaluation

Students should have protection through orderly procedure against prejudiced or capricious academic evaluation. At the same time, they are responsible for maintaining standards of academic performance established for each course in which they are enrolled.

Protection Against Improper Disclosure

Information about student views, beliefs and political associations which professors acquire in the course of their work as instructors, advisors and counselors should be considered confidential. Protection against improper disclosure is a serious professional obligation. Judgments of ability and character may be provided under appropriate circumstances, normally with the knowledge or consent of the student.

When students feel that their academic rights and freedoms have been violated, they must have a defined avenue of appeal that is consistent with the principles outlined in the Joint Statement on Rights and Freedoms of Students, the AAUP 1940 Statement on Academic Freedom, and the AAUP 1956 Statement on Professional Ethics.

Code of Academic Integrity

Preamble

Academic honesty constitutes the cornerstone of the academic community. Learning, teaching and scholarship cannot be conducted in an atmosphere of dishonesty. Therefore, Rider University insists on strict adherence to the concept of academic honesty as indispensable to the continued existence and future development of the campus community. Every student has a direct personal interest in maintaining academic honesty since each evaluation of academic progress involves a judgment by the faculty member concerning each individual's intellectual performance. The evaluation process is predicated on the assumption that an individual's achievement reflects his/her own ability, effort and perceptions.

Academic dishonesty includes any unauthorized collaboration, misrepresentation or fabrication in the submission of academic work. In all written work, whether in class or out of class, the student's name on the work is considered to be a statement that the work is his or

hers alone, except as otherwise indicated. Students are expected to provide proper citations for the statements and ideas of others whether submitted word for word or paraphrased. Failure to provide proper citations will be considered plagiarism and offenders will be subject to the charge of plagiarism specified in the statement of regulations.

Similarly, students are expected to adhere to all regulations pertaining to examination conduct including placement tests. These regulations are designed to insure that the work submitted by the student on examinations is an honest representation of that student's effort and that it does not involve unauthorized collaboration, unauthorized use of notes during the exam, or unauthorized access to prior information about the examination.

In oral or written submissions presented as scientific or non-fiction, fabrication or alteration of facts, data, images, or audio or video recordings, or misrepresentation of procedures or of participation in an academic activity, for the purpose of misleading, also constitutes academic dishonesty.

Jurisdiction of the Code of Academic Integrity

Each student is responsible for his or her academic conduct from the time of acceptance for admission through the actual awarding of a degree.

Statement of Regulations

Section 1. Out-of-Class Assignments.

Students are expected to provide proper citations for the ideas and statements of others. When the ideas are paraphrased, the sources of those ideas need only to be properly cited. When the ideas are quoted (copied word for word), the copied words must be set in quotation marks and cited. When students collaborate on papers or out-of-class examinations, the names of all collaborators must be acknowledged on all papers submitted. It is expected that research and writing assigned to an individual student will be done by that student.

1.1 Ghostwriting. Written work submitted by an individual student (or group of students working together as approved in advance by the instructor) is expected to be the work of that student (or approved group). A false claim of authorship is an act of academic dishonesty.

1.2 Word for Word Plagiarism. Copying, word for word, from any source (book, magazine, newspaper, Internet source, unpublished paper or thesis) without proper acknowledgment by quotation and citation within the text of the paper, or the submission of any part of another's work, word for word, without proper quotation and citation is an act of academic dishonesty.

1.3 Patchwork Plagiarism. The submission of work which has been constructed by piecing together phrases and/or sentences quoted verbatim (word for word) or paraphrased from a variety of unacknowledged sources is an act of academic dishonesty.

1.4 Unacknowledged Paraphrases. Submission of another author's facts or ideas in one's own words without acknowledgment by proper citation is an act of academic dishonesty. (If the ideas or information are neither originally the student's nor cannot be found in a variety of sources, the source must be acknowledged by footnotes or by proper citation within the text of the paper. Failure to acknowledge

this indebtedness is referred to as "unacknowledged paraphrase.")

Section 2. Examination Conduct

Students are expected to adhere to the following regulations pertaining to their personal and academic conduct before, during, and after examinations. These regulations are designed to insure that the work submitted by a student on examinations is an honest representation of that student's effort and that it does not involve unauthorized collaboration, unauthorized use of notes during an examination, or unauthorized access to prior information about the examination.

2.1 Prior Access to Examinations. No student may have direct or indirect access to an examination or an examination question without the express approval of the faculty member who has prepared the examination. Unauthorized entry into offices, duplicating centers, computers, voice mail, fax, other electronic media, or personal possessions of faculty is prohibited. Prior access to examination information, attempts to gain access to examination material, unauthorized possession of examination material, and the derivation of benefit from or aiding access to examination materials are all acts of academic dishonesty.

2.2 Unauthorized Assistance During Examinations. The receiving or giving of any written, oral or visible help on an examination is an act of academic dishonesty.

2.3 Proxy Representation. Students are expected to sit for examinations required for the courses in which they are enrolled. Proxies/ghosts are strictly prohibited. Serving as a proxy, or being served by proxy, during an examination is an act of academic dishonesty. (Students must carry ID cards at all times, including the times they present themselves for examinations. Students must present their ID cards during an examination if requested to do so by the proctor or instructor.)

2.4 Unauthorized Use of Written or Electronic Material During Examinations. No student may use any book, notebook or other written or electronic materials during an examination unless such examination has been designated as an "open book" type, in which case the examining faculty member must have so informed the class prior to the examination. Materials which are not permitted to be used on the examination, if brought to the examination room, must be deposited at a location specified by the faculty member. Unauthorized possession of any written materials during an examination is an act of academic dishonesty.

Section 3. Fabrication

Students are expected to accurately report facts and data obtained in their research activities; present documentary photographs and audio and video recordings honestly; and, report on their attendance at events and engagement in activities honestly and accurately. Fabrication includes the making up or falsification of facts, data, sources or procedures; misleading doctoring or manipulation of photographs or video; or falsely claiming to have attended an event or visited a site, or engaged in an activity, or misrepresenting the time devoted to such attendance, visitation, or engagement, for the purpose of misleading.

3.1 Fictional devices in nonfiction material. Names, dates, places and other verifiable facts should not be altered in any paper or story that purports to be factual and non-fiction. Facts that must be disguised or withheld to protect the privacy or safety of a source should be acknowledged with an appropriate explanation to the reader/viewer. Composites, which present the characteristics or experiences of more than one person or

event blended into one, should not be used without a clear explanation to the reader/viewer.

3.2 Documentary photos and audio or video recordings. While manipulating images and recordings for purposes of satiric or similar effect is permissible for artistic purposes, such manipulations should not be presented in a way that can be confused with reality. It is not permissible to doctor or manipulate photographs or recordings if the result is counterfactual. Cropping and enhancement of clarity are permissible, provided it does not distort reality so as to deceive the audience.

3.3 Scientific misconduct. Fabrication, manipulation, or “fudging” of the processes or results of experiments or observations, and similar practices which seriously deviate from those commonly accepted by the scientific community, as represented by your faculty, for proposing, conducting or reporting research, are also violations of this policy. Honest errors and honest differences of opinion in interpretations and judgments of data are not included in this definition.

3.4 Procedural dishonesty. This category includes falsely claiming to have attended an event or to have remained at the event longer than one did; claiming to have visited a site; or to have engaged in an activity, whether for purposes of extra-credit in a course, or for inclusion in a graded assignment.

Procedures to be Followed in Cases of Academic Dishonesty

Step One

When a faculty member has reason to believe that an act of academic dishonesty has been committed by a student enrolled either in a current course or in one completed within the previous four months, the faculty member shall notify the student in writing of the alleged violation and require that the student meet with the faculty member at a mutually satisfactory time within five (5) working days after the faculty member’s notification. The faculty member shall have the authority to extend the time within which the meeting takes place to ten (10) working days at his or her discretion. If the meeting does not occur within this time, the faculty member may proceed with the imposition of any of the sanctions described below.

At this meeting with the student, the faculty member and the student shall discuss the alleged act of dishonesty. The faculty member and the student shall seek to resolve the matter during this meeting. If the faculty member concludes that an act of academic dishonesty has not occurred, no further action shall be taken and the student shall be permitted to complete the course, if it is still in session, as if the faculty member’s allegation had not been made.

If, as a result of information obtained in this meeting and/or shortly thereafter, the faculty member concludes that an act of academic dishonesty has occurred, he/she must notify the student of this determination in writing within seven (7) working days of the meeting and must indicate which one of the following sanctions will be invoked. The existence of a prior finding of academic dishonesty may impact the choice of sanction. The options are listed below in ascending order of seriousness. The faculty member may:

1. Direct the student to resubmit any work necessary to complete the course requirements;
2. Direct the Registrar to change the grade given to the student to the notation “Incomplete” and direct the student to resubmit any work necessary to complete the course requirements;

3. Lower the grade appropriately on the assignment in which the academic dishonesty took place in light of the gravity and implications of the act of dishonesty, recalculate the final course grade, and direct the registrar to change the final course grade accordingly;
4. Direct the Registrar to enter the grade of “F” for the course on the student’s permanent academic record (this “F” supersedes all other grades, including the “W” notation);
5. Initiate charges against the student with the Academic Integrity Committee for the purpose of causing the student to be suspended or dismissed from the University

The sanction will be effective immediately upon notification, except for sanction #5.

When the faculty member invokes sanction #5, he/she must submit a letter detailing the act of alleged academic dishonesty to the Academic Integrity Committee and, simultaneously, to the student involved, to the faculty member’s department chairperson, to the student’s academic dean and, in the case of an undergraduate student, to the Dean of Students.

When the faculty member invokes any of the sanctions #1 through #4 and the student does not challenge the decision within seven (7) working days of receiving notice from the faculty member, the faculty member shall place copies of the decision in the student’s academic file in the student’s academic dean’s office. If the student challenges the sanction (#1-#4) recommended by the faculty member (based solely on disputing the charge of academic dishonesty), he/she shall have the right to pursue a written appeal beyond the faculty member, first to the chairperson of the department where the faculty member (or if an adjunct based solely in a program, where his/her program director) is based and then, if necessary, to the appropriate academic dean. If the faculty member of the course is the department chairperson, the appeal shall go directly to the appropriate academic dean.

Step Two

The written appeal to the department chairperson or academic dean must be made within seven (7) working days of the receipt of the faculty member’s decision, with a copy of the appeal to the faculty member. The department chairperson or academic dean will have seven (7) working days to reach his/her decision. The department chairperson or academic dean shall send the decision to the student by registered mail or hand delivery, with a copy to the faculty member. If the department chairperson upholds the faculty member’s decision regarding academic dishonesty and the student does not appeal this decision in writing to the appropriate academic dean within seven (7) working days from the receipt of the decision, the department chairperson shall place copies of the decision in the student’s academic file in the student’s academic dean’s office.

Step Three

If either the student or faculty member is dissatisfied with the chairperson’s or dean’s decision, the student or faculty member will have seven (7) working days from receipt of that decision to submit a written appeal to the dean of the college in which the course is taught, with copies to the faculty member, student, and department chairperson. (If the dean has already ruled on the case, he/she shall appoint another department chair, or an associate or assistant dean to handle this appeal.) The appropriate dean shall schedule a meeting with the student and faculty member to hear the appeal as soon as it can reasonably be set, and, following his/her assessment of the situation, will have seven (7) working days to render a decision. The dean shall convey his/her decision

in writing by registered mail or hand delivery to the student, with a copy to the faculty member and the department chairperson. If the dean upholds the faculty member's decision regarding academic dishonesty and the student does not appeal this decision to the Academic Integrity Committee within seven (7) working days from receipt of the decision, the dean shall place copies of the decision in the student's academic file in the student's academic dean's office. If after appealing to the dean, the student or faculty member is still dissatisfied, a final appeal may be made in writing to the Academic Integrity Committee within seven (7) working days of receipt of the dean's decision.

Step Four

The Academic Integrity Committee shall consist of six (6) members:

Three (3) faculty members appointed by the bargaining unit members of the University Academic Policy Committee; two (2) administrators with faculty rank appointed by the Provost and Vice President for Academic Affairs; and one (1) full-time undergraduate student selected by the Student Government Association who, at the time of his/her service, must be a senior with a grade point average no lower than 3.25.

The bargaining unit members of the University Academic Policy Committee, the Provost and Vice President for Academic Affairs, and the Student Government Association shall each designate one alternate who shall serve in the event an applicable appointee is unable to serve. The bargaining unit faculty members and the administrators shall serve two-year terms, beginning with the date of appointment, and may be reappointed. The student member shall serve a one-year term.

The committee shall select from among its members with faculty rank a chairperson and a vice chairperson, and immediately notify the President, the Provost and Vice President for Academic Affairs and the chairperson of the University Academic Policy Committee, the president of the Student Government Association, and the Dean of Students of the names of the designees. The chairperson or vice-chairperson shall serve as the hearing coordinator. Any three (3) members of the committee with faculty rank (including the hearing coordinator) shall constitute a quorum.

The failure or inability of any appointing body to fulfill its responsibility to appoint any member(s) to the Academic Integrity Committee shall not prevent the committee from organizing and exercising its prescribed duties. Whenever there is no chairperson or vice-chairperson of the committee, the Provost and Vice President for Academic Affairs shall appoint a convener. Ordinarily, the chairperson (or vice-chairperson, in his/her absence) shall preside over the meetings of the committee.

The hearing coordinator shall have the following duties and responsibilities:

1. To assure that all procedures have been followed;
2. To inform the members of the committee that a charge of alleged academic misconduct against a student has been brought by a faculty member or that a student or faculty member has appealed a decision;
3. To see that all members of the committee receive the appropriate materials necessary for the hearing of the charge and appeal;
4. To keep a permanent record of the committee's proceedings; and
5. To see that all decisions made by the committee are prepared and distributed to the relevant parties.

Within ten (10) working days after receipt of a charge brought by a faculty member, or an appeal brought by either party, a date for a hearing shall be set and the faculty member and the student shall be notified

of that date. If the hearing has not occurred within those ten (10) days, it shall be scheduled to take place as soon as possible thereafter. The committee chairperson shall have authority to extend any deadlines when it is evident that both parties have made good faith, though unsuccessful, efforts to meet the stated deadlines. Parties at the hearing shall be limited to members of the Rider University community with information pertinent to the given case. The student may choose to have a University advisor present with him/her. This advisor may be a university administrator, faculty member, or current student.

If the requested sanction is dismissal from the University, the student shall have the right to be accompanied by an attorney. If the committee indicates in advance that dismissal will not be considered by the committee no attorney shall attend. In cases where dismissal will be considered, if the student wishes to be accompanied by an attorney, the hearing coordinator must be so notified at least seven (7) days before the scheduled hearing so that the University may also have counsel present.

The committee shall establish the operating procedures by which it reviews cases. Standard operating steps include:

1. An uninterrupted presentation of his/her position by whichever person brought the matter to the committee (faculty member or student);
2. An uninterrupted presentation of his/her position by the other party (faculty member or student);
3. Committee questioning of either and/or both parties;
4. Committee review of any documents or affidavits proffered by the parties;
5. Committee deliberations in executive session.

The role of any University advisor or attorney present shall be that of observer of the proceedings and advisor to his/her client and shall not include the right to question either party for the record. An audio recording shall be made of all proceedings conducted by the Academic Integrity Committee.

After both the faculty member's and the student's assertions and responses have been heard (including questioning of either party by the committee), the committee will decide whether the faculty member's charge and sanction shall be upheld.

If the faculty member's charge is upheld, the committee will normally uphold the sanction originally imposed, if it is consistent with the faculty member's pre-stated written guidelines (if any) given to the student at the outset of the course about the consequences of an act of academic dishonesty. However, the committee will have recourse to any one of the four (4) other sanctions which the faculty member could have chosen, or may decide to suspend or dismiss the student, depending upon the specific circumstances connected with each case.

When a student's graduation is affected by the outcome of an academic conduct case in a semester, term or session immediately before such graduation, all parties in the case shall make reasonable efforts to expedite the entire process.

As a result of its deliberation, the committee may find the student innocent of academic dishonesty, thereby levying no sanctions against the student. Under this condition, no punitive action shall be taken against the student, either by the committee or by the faculty member.

If the committee finds the student guilty of academic dishonesty, it may direct that one of the following sanctions be taken against the student in ascending order of seriousness:

1. That the student resubmit any work necessary to complete the course requirements;
2. That the registrar change the grade given to the student to the notation "Incomplete" and direct the student to resubmit any work necessary to complete the course requirements;
3. That the grade be lowered appropriately on the assignment in which the academic dishonesty took place in light of the gravity and implications of the act of dishonesty, and recalculate the final course grade and direct the registrar to change the final course grade accordingly;
4. That the registrar enter the grade of "F" for the course on the student's permanent academic record (this "F" supersedes all other grades, including the "W" notation);
5. That in addition to, or in place of, any of the sanctions imposed above, the student be suspended for a definite period of time or be dismissed from the University, whenever the committee deems it in the best interests of the University to do so, with the notation, "Dismissed for Academic Dishonesty" entered on the student's permanent academic record.

The sanction invoked will become effective immediately upon notification.

The committee shall notify, by registered mail or hand delivery, the faculty member and the student of its decision within five (5) working days after the hearing, and copies of the decision shall be forwarded to the student's chairperson and dean for inclusion in the student's academic file. The committee's decision shall be final, with no other right of appeal.

Any letters placed in a student's academic file according to any of the provisions in this policy will be available to individual members of the faculty and the committee when determining sanctions in subsequent incidents of academic dishonesty for that student. These letters will also be made available to the members of Academic Standing Committees for making subsequent decisions regarding conditional academic standing and academic dismissal for that student.

Veterans and Military Service Information

Rider's degree programs are approved under the Veterans Readjustment Benefits Act of 1966, as amended. An application for VA Education and Training benefits is available online at www.vets.gov (<https://www.vets.gov/>) or www.benefits.va.gov/gibill/ (<https://www.benefits.va.gov/gibill/>).

Veterans who receive Chapter 33 Post 9/11 G.I. Bill¹ benefits may be eligible for Rider's Yellow Ribbon program.

Students filing for benefits at Rider will be responsible for filing a copy of their separation papers (DD214) and/or their Certificate of Eligibility (COE) with the appropriate school certifying official. Contact the Registrar's Office certifying official at 609-896-5066 or the Veterans and Military Affairs Office at 609-896-5000 ext. 7382 if you have any questions.

Rider University strives to settle all grievances internally in order for the issue to be resolved as quickly as possible but any student who submits a complaint to the DoD and/or VA concerning any type of Federal or

veteran educational benefit must also inform Rider University in writing within 7 (seven) days of when the complaint is made.

Enrolled students may contact the Veterans and Military Affairs Office at 609-896-5000 ext. 7382 with any questions or concerns.

¹ GI Bill[®] is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

Reserve Officer's Training Corps (ROTC)

Army Reserve Officer's Training Corps (ROTC)

Mission

Rider University students are eligible to participate in the Princeton Army ROTC program through a formal cross-town enrollment agreement with the U.S. Army Cadet Command. Princeton Army ROTC will recruit, educate, develop, and inspire ROTC Cadets at off-campus locations in order to commission officers of character for the Total Army; and develop citizens of character for a lifetime of commitment and service to the nation.

The Army ROTC course is designed as a four-year leadership program divided into two phases: the basic course and the advanced course. The basic course is open to all students (100 series only. 200 series and above upon approval by the Princeton Army ROTC Professor of Military Science). The advanced course is available to cadets who complete the basic course and wish to be commissioned as either active or reserve component officers.

The Basic Course

This course is primarily designed for full-time freshmen and sophomores who desire to pursue a commission in the United States Army. However, students in good academic standing are encouraged to take MSC1 100-series and 200-series courses to broaden their knowledge and develop leadership skills. Students enrolled in the Basic Course attend a weekly classroom session, as well as three morning sessions of physical training and a Leadership Lab. The Basic Course curriculum consists of introductory lessons in beginning soldier and leadership skills such as Army customs and courtesies, Army values, time management, effective communications, decision making, and physical fitness.

There is no military obligation associated with enrollment in the Basic Course. Students are free to withdraw from the program as they would from any other academic course. Students who desire to earn possible elective credit on their Rider transcript, upon successful completion of the course(s), should request a letter from the Director, Army Officer Education Program Princeton, to their college Deans Office, declaring the student (full-time) has satisfactorily completed the listed course(s) with nomenclature, grade(s), grade point(s) and credit hours for evaluation by the Dean.

Completion of the Basic Course is a prerequisite for enrollment in any of the advanced course classes; however, interested students with prior military service are encouraged to speak with a member of the ROTC cadre to discuss additional options that may be available.

The Advanced Course

This Course provides full-time juniors and seniors (and select graduate students) the opportunity to complete their professional development in preparation for commissioning into the United States Army upon graduation. Approval by the Princeton Army ROTC Professor of Military Science is required for any student to enroll in the Advanced Course.

Once enrolled in the Advanced Course, students are obligated to complete the program and accept a commission, if offered, as a Second Lieutenant in the United States Army.

Students enrolled in the Advanced Course attend a weekly three-hour classroom session, in addition to three morning sessions of physical training and a Leadership Lab. Advanced Course cadets will lead the morning physical training sessions. The Advanced Course curriculum focuses on organizational leadership, small-unit tactics, military history, war and morality, the profession of arms, and continuing self-development. Advanced Course students plan, coordinate, and supervise the execution of ROTC activities outside the military science academic curriculum.

Cadets who desire possible elective credit on their Rider transcript must request a letter from the Director, Army Officer Education Program Princeton, to their college Dean's Office, declaring the student (full-time) has satisfactorily completed the listed course(s) with nomenclature, grade(s), grade point(s) and credit hours for evaluation by the Dean.

Advanced Placement

Sophomores have opportunities to enter the ROTC program at the beginning and end of the academic year. Advanced placement does not result in the award of academic credits.

1. Through the first semester ROTC Add/Drop deadline, sophomores who have not previously enrolled in ROTC may enroll in MSCI 201. A student who successfully completes MSCI 201 and MSCI 202, as well as additional requirements assigned by the instructor, will meet the basic course prerequisites for entry into the advanced course.
2. Sophomores who missed attending ROTC courses during their first three semesters at Rider may have the option to attend the Army ROTC Cadet Basic Camp, a summer training opportunity at Fort Knox, KY, conducted during the summer before junior year. This opportunity is subject to available slating. This camp provides compressed instruction for all MSCI 100- and 200-series academic year courses. Student expenses are paid for by the Army and students are also paid a nominal salary for their attendance. Students must indicate an interest to attend Basic Camp no later than February 15th of their sophomore year.
3. Students with prior military service may receive ROTC placement credit for the basic course upon approval by the Princeton Army ROTC Professor of Military Science. This credit is given on a case-by-case basis, taking into account the branch of service, length of service, type of discharge, and rank attained.

For further details on any of these programs, call the Army ROTC office at (609) 258-4225 or email to armyrotc@princeton.edu.

Activities

Army ROTC students participate in extracurricular activities as a student organization sponsored by the Princeton Army ROTC Department of Military Science. These activities are designed to build camaraderie, develop leadership skills, and produce competent military leaders.

Activities include a weekly four-hour Leadership Lab where Cadets in all Military Science Courses perform practical exercises on subjects learned in class. Once per semester, ROTC cadets attend a field-training exercise at Fort Dix in order to practice Soldier skills in a military field environment. Other activities include color guard ceremonies, the Ranger Challenge military skills competition, tours of local battlefields (such as Princeton, Monmouth, or Gettysburg), trips to military conferences, annual holiday ball and awards ceremonies, and leadership seminars. Each spring, cadets compete for the opportunity to attend military schools, such as

Airborne (military parachutist) and Air Assault during the summer (slots for these schools are very limited and highly competitive).

Military Science Course Description

MSCI 100-series courses are open to all students. For all other courses, enrollment requires the approval of the Princeton Army ROTC Professor of Military Science. Students complete courses as an extracurricular activity through the Princeton Army ROTC Department of Military Science. All grades are counted in the student's ROTC cumulative grade point average. Advanced placement does not result in the award of academic credits. These courses and activities take place at off-campus locations such as The College of New Jersey (MSCI 101-202) and Princeton University (MSCI 301-402).

MSCI 101/Introduction to Military Leadership I (3 course unit)

(annually—fall)

Prerequisite: Freshman standing or permission of instructor

An introduction to the ROTC program and the Army. Classes focus on Army leadership and management principles as well as basic soldier skills such as first aid and map reading, and familiarization with the U.S. Army's customs, courtesies, standards, and rank structure. Students also receive an introduction to basic leadership principles expected of military officers.

MSCI 102/Introduction to Military Leadership II (3 course unit)

(annually—spring)

Prerequisites: Freshman standing and completion of MSCI 101 or permission of the instructor

This course builds on the lessons learned in MSCI 101 in basic soldier skills and leadership. Students learn how to use basic leadership and management techniques, improve their competence in basic soldier skills and tactics, and receive further professional development in leadership skills. Students are introduced to the career field opportunities available to Army officers.

MSCI 201/Small-Unit Leadership I (3 course unit)

annually—fall)

Prerequisites: Sophomore standing and completion of MSCI 100-series courses, or permission of the Professor of Military Science

This course provides students with the opportunity to attain the next level of proficiency in physical fitness, basic soldier skills, problem solving, and leadership. This course introduces the operations order, a format for developing and communicating military operations, as well as further leadership development in effective communications, performance assessment, and counseling. Officer career field opportunities and responsibilities are also addressed in the course.

MSCI 202/Small-Unit Leadership II (3 course unit)

(annually—spring)

Prerequisites: Sophomore standing and completion of MSCI 201 or permission of the Professor of Military Science

Students participate in learning activities designed to provide practical experience in the use of the military decision-making processes. Oral presentation techniques and historical analysis of military decision making are also critical components of the course. Students prepare to assume cadet, non-commissioned officer leadership roles within the cadet command structure.

MSCI 301/Applied Military Leadership I (0 course unit)

(annually—fall)

Prerequisites: Junior standing and completion of the basic course (MSCI 100 and 200 series, or advanced placement)

Enrollment in this course marks a commitment to completing the ROTC program and receiving a commission as a second lieutenant in the United States Army. To this end, cadets study and practice the leadership aspects of planning and executing small-unit tactical operations. Further emphasis is given to development of leadership skills as measured by the Cadet Leadership Development Program, an evaluation system designed to improve an individual's competence as a military leader. Cadets get hands-on practice on these skills through assigned leadership positions within the cadet command structure. Cadets continue to refine their individual physical fitness and assist seniors in leading unit fitness sessions.

MSCI 302/Applied Military Leadership II (0 course unit)
(annually—spring)

Prerequisites: Junior standing and completion of MSCI 301

This course provides the cadets their final preparation for the Cadet Leadership Course (CLC) normally attended in the summer between junior and senior years. Cadets refine their individual and military leadership, with practical exercise opportunities and feedback from senior cadets and instructors. The course emphasizes leadership in small units, use of the military operations order, land navigation, and physical fitness.

MSCI 401/Leadership Development and the Profession of Arms (0 course unit)
(annually—fall)

Prerequisites: Senior standing and completion of MSCI 300-series courses

Cadets assume leadership roles within the cadet command structure. Cadets study the nature of military professionalism with respect to their future duties as officers. Students learn how to assess performance and to plan and supervise training using the Army's training management system. The course strives to develop habits of independent study with historical readings and oral presentations. Cadets gain practical leadership experience as they lead the Army ROTC program.

MSCI 402/Leadership Development and the Profession of Arms (0 course unit)
(annually—spring)

Prerequisites: Senior standing and completion of MSCI 401

This course provides the final preparation for an officer's commissioning. Learning activities include the Army Command Policy, Administrative Law, the Uniform Code of Military Justice, officer and enlisted evaluation and promotion systems, senior-subordinate relationships, performance counseling, and a tour of a historical battlefield. Cadets gain practical leadership experience as they lead the Army ROTC program.

Summer Offerings

MSCI 222/ Cadet Basic Camp (Introduction to Military Skills and Leadership) (0 course unit)

Sophomores (and select students headed to graduate school) who missed attending courses during freshman and/or sophomore year have the option to attend Army ROTC Cadet Basic Camp, a summer training opportunity at Fort Knox, KY, conducted during the summer before junior year. This camp provides compressed instruction for all MSCI 100- and 200-series academic year courses. All student expenses are paid for by the Army, plus students are paid a nominal salary of about \$800 for their attendance. Meals and housing are provided at no expense. This

opportunity requires the student's advanced commitment to pursue a commission as an Army officer.

MSCI 333/Cadet Advanced Camp (Advanced Military Leadership Practicum) (0 course unit)

All cadets who successfully complete their junior academic year and the MSCI 300-series courses must attend this five-week leadership development camp at Fort Knox, KY, where they are evaluated by commissioned Army officers on individual military skills and demonstrated leadership potential.

MSCI 334/Cadet Troop Leader Training (Junior Officer Leadership Internship) (0 course unit)

Cadets who successfully complete MSCI 300-series courses in their junior year and Cadet Advance Camp may request this opportunity. Cadets serve in tactical, active-duty Army units for three or four weeks, at military posts either overseas (Germany, Korea, Hawaii, or Alaska) or in any one of numerous locations throughout the continental United States. During this time, cadets get hands-on, practical experience in the platoon leader responsibilities they will assume as a second lieutenant. Cadets often use this opportunity to "try out" the branch of the Army they are most interested in pursuing during their career.

MSCI 335/Army Nurse Summer Training Program (Clinical) (0 course unit)

Nursing students who successfully complete MSCI 300-series courses in their junior year and the Cadet Leadership Course may request this opportunity to serve for three or four weeks in an Army hospital either overseas (Germany, Korea, and Hawaii) or in any one of the major military hospitals in the continental United States. Cadets get clinical experience working with commissioned officer Army nurses in an actual hospital environment.

Undergraduate Academic Policies

Introduction

Students should refer below for important information regarding Rider's undergraduate academic policies. College/school-specific academic policies are also listed within each of the colleges/schools in the Academic Catalog. Students in Continuing Education Programs should refer to the Continuing Education Programs link below for specific policies that pertain to them.

Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to, those standards and policies set forth in this catalog and in The Student Code of Social Conduct. (<https://www.rider.edu/about/offices-services/community-standards/student-code-social-conduct/>) **Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student.**
2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirements), creations,

and activities engaged in by the student while at the University, including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, internet/web-based productions and sales, and athletic events and all proceeds therefrom. The student has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

Rider University's Right to Change Catalog Content

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student.

While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and reasonable treatment of interested parties requires in the University's best judgment.

- Placement Testing Information (p. 1618)
- Recital Scheduling - School of Westminster Choir College (p. 1618)
- Transfer Appeals (p. 1619)
- Transfer Credit While Currently Enrolled at Rider (p. 1619)
- Withdrawal from the University (p. 1620)

Academic Classification

Students must carry twelve (12) credit hours or more (or their equivalent) in a fall or spring semester to be considered a full-time student. Normal progress toward a degree and academic classification consists of the following credit advancement:

Academic Classification	Credit Advancement
Freshman	0 - 23 hours
Sophomore	24 - 53 hours

Junior	54 - 89 hours
Senior	90 or more hours

Students should consult the section of the catalog for their college or school regarding degree requirements for each program.

Students receiving financial aid from any source need to be particularly concerned with their full-time status and making normal progress toward a degree.

Academic Concern, Conditional Standing/Dismissal and Readmission

- Academic Concern
- Conditional Academic Standing (p. 1604)
- Academic Dismissal from the University (p. 1604)
- Dismissal from a Major within Westminster College of the Arts (p. 1605)
- Undergraduate Education Minimum Standards (p. 1605)
- Readmission after Academic Dismissal (p. 1605)

All students permitted to enroll at Rider University are in good standing and are qualified to be bona fide students. Decisions regarding academic progress, conditional standing, and dismissal for poor scholarship are the responsibility of the Committee on Academic Standing within each college or school. These committees may establish and apply criteria in addition to the minimum university cumulative grade point average (GPA).

Using approved academic criteria, the Committee on Academic Standing within each college or school may review the academic record of any student.

Because a minimum 2.0 cumulative grade point average (GPA) is required for graduation, students are expected to maintain a minimum 2.0 cumulative GPA while enrolled at Rider. Students who fail to meet this minimum will be reviewed by the appropriate Committee on Academic Standing and may receive a letter of academic concern, be placed on conditional standing, or be dismissed from the University. Students who meet the minimum cumulative GPA but who are dismissed from a specific college or school for other reasons are eligible to apply to another college or school of Rider University.

Undergraduate education students are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University and must receive a grade of 'C+' or higher in all education courses. It is the individual student's responsibility to re-take any education course in which a grade lower than 'C+' has been earned. Undergraduate education students will be permitted to undertake student teaching only if they have received 'C+' or higher in all education courses and have a minimum 3.0 cumulative GPA. See the Undergraduate Education section below for further information.

Undergraduate music education students are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University and must pass the sophomore portfolio to remain in good standing in the major. See the Undergraduate Education section below for further information.

Academic Concern

Upon review of a student's academic record, a Committee on Academic Standing may issue a letter of concern, which responds to academic progress that does not meet college, school or university expectations,

and describes an academic plan of study that must be met in the subsequent semester. Students who fail to pursue a course of study prescribed by an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be placed on Conditional Academic Standing or dismissed.

Conditional Academic Standing

Upon review of a student's academic record, a Committee on Academic Standing may place a student on Conditional Academic Standing. In reaching this decision, the committee may require a student who does unsatisfactory work to pursue a specific course of study during a particular academic session. Students who fail to pursue a course of study prescribed by an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be continued on Conditional Academic Standing or may be dismissed without further right of appeal. There must be substantial evidence of proper motivation and a capacity for doing college level work to warrant maintaining a student in school with a record of continued conditional status as opposed to dismissal.

Students on conditional academic standing may not register for an academic overload. Additionally, students must be removed from conditional status in order to be approved for graduation.

Academic Dismissal from the University

Students who have not done satisfactory work may be dismissed from the University for poor scholarship at the end of any semester after an appropriate review of their scholastic records by the Committee on Academic Standing within their college or school. Students may also be subject to academic dismissal if their cumulative GPA falls below the required minimum for two or more consecutive semesters, or the GPA falls below the required averages established at the freshman, sophomore, junior and senior levels. Academic dismissal at the end of the fall semester is effective prior to the beginning of the spring semester. Academic dismissal at the end of the spring semester is effective prior to the beginning of summer session II.

Students who wish to appeal a dismissal must submit a written statement of appeal to the academic dean of their college or school within 10 days from the date on their letter of dismissal. All appeals submitted by the deadline will receive consideration by the appropriate academic standing committee.

Dismissal for academic reasons terminates a student's relationship with Rider. Dismissed students may not enroll for courses nor participate in university-sponsored activities or ensembles at either campus for a period of one year following their dismissal. Students dismissed for academic reasons normally will not be eligible for readmission within one calendar year of the dismissal date. Although some students will apply for readmission, there is no real or implied right to such readmission.

Students dismissed by the School of Fine and Performing Arts (SFPA) or Westminster Choir College (WCC) but not Rider University may apply for enrollment in other colleges of the University. Students dismissed by WCC but not Rider University may not enroll in WCC courses, ensembles or activities until they have been readmitted to WCC with the exception of courses, ensembles or activities that are delivered by or at WCC and are required in music degrees housed within the School of Fine and Performing Arts (SFPA). Students dismissed by SFPA but not Rider

University may not enroll in SFPA courses, ensembles or activities until they have been readmitted to SFPA.

Dismissal from a Major within Westminster College of the Arts

Academic departments within Westminster College of the Arts reserve the right to dismiss a student from a major following notification that their standing in the major is in jeopardy and the passage of a suitable amount of time permitted to address stated issues, typically one semester. Such dismissal may be based upon any of the following conditions: failure to maintain a satisfactory or minimum GPA; failure to sustain academic progress in the courses of the major; conduct in violation of the standards of the department or profession; failure to meet conditions or requirements as stated in university catalogs, The Student Code of Social Conduct, or the departmental handbook; or the student's general standing at Rider University. Such dismissal will become effective at the end of the semester in which the decision is reached. Students dismissed from Music Education are not permitted to enroll in Music Education courses until readmitted into the Music Education major.

Undergraduate Education Minimum Standards

Undergraduate education students are required to have a minimum 3.0 cumulative GPA by the time they register for student teaching and must receive a grade of 'C+' or higher in any Education course (a) that is specifically required for a major or minor in Education and (b) in which enrollment is limited to Education majors. It is the individual student's responsibility to re-take any required education course in which a grade lower than 'C+' has been earned. Undergraduate education students will be permitted to undertake student teaching only if they have received 'C+' or higher in all required education courses and have a minimum 3.0 cumulative GPA. See the Undergraduate Education section below for further information.

The undergraduate education department also reviews the professional development of all students to ensure that they meet departmental standards for professional conduct and that they show promise of success in teaching. This review is in addition to the grade requirements listed above. Students must earn a passing score on all sections (reading, writing, math) of the Core Academic Skills for Educators Test before registering for any methods courses. This is a N.J. Department of Education rule that applies to all elementary, secondary and business education students.

Undergraduate music education majors are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University, must pass the sophomore portfolio to remain in good standing in the major, and must earn a passing score on all sections (reading, writing, math) of the Core Academic Skills for Educators Test.

All undergraduate education and music education students must present evidence of a passing score on the Praxis Content Area (Secondary) or Multi-Subject (Elementary) Assessment (formerly Praxis II) in their specialization area prior to the full time student teaching semester (by March 1 for those applying for full time student teaching in the fall semester and July 1 for those students applying for full time student teaching in the spring for Secondary Education and before registering for ELD 308/376 for Elementary Education). This is the same Praxis Content Area or Multi-subject Assessment (formerly Praxis II) students will need for certification.

As appropriate, students who fail to meet the undergraduate education department's standards will be counseled on ways to improve their performance or will be asked to leave the program.

Readmission after Academic Dismissal

Dismissed students seeking readmission must first contact the Registrar's Office (<https://www.rider.edu/academics/academic-support-services/registrar/>), Bart Luedeke Center, or the Associate Dean of Students Office, Bart Luedeke Center, to obtain appropriate forms. Once the Registrar or Associate Dean of Students or his/her designee approves the readmission application, the application is forwarded to the dean of the college to which the student seeks reentry. Students dismissed for academic reasons must submit with their readmission application a personal letter to the Academic Standing Committee which will make decisions concerning their readmission. They should also provide evidence, usually in the form of a transcript from another institution, of formal study and/or accomplishment. If possible, such work should have been done in specific areas of deficiency in the student's academic record.

Academically dismissed students must meet all academic requirements in place at the time of their readmission. Readmission will be dependent upon various criteria including GPA, current academic progress, and the student's general standing. Students in the Westminster College of the Arts may be required to reapply or readmission.

If readmission is granted, the student is placed on conditional academic standing until the cumulative GPA reaches a satisfactory level of at least 2.0. A readmitted student is responsible for curriculum requirements in effect at the time of readmission.

Academic Disability Policy

Rider University supports the protections available to students with disabilities under Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended, and the New Jersey Law Against Discrimination.

Student Accessibility and Support Services (<https://www.rider.edu/academics/academic-support-services/student-accessibility-support-services/>) (SASS) facilitates equal access to the programs and activities at Rider University for students with disabilities, as defined by the Americans with Disabilities Act (ADA).

Students must initiate contact with SASS in order to receive services and to arrange reasonable accommodations, such as course adjustments, course substitutions and auxiliary aids. Any Rider student who supplies SASS with appropriate documentation of a disability is eligible on a case-by-case basis for reasonable accommodations. Students with disabilities should contact SASS (Bart Luedeke Center, Suite 201, accessibility@rider.edu, 609-895-5492) to discuss available services and reasonable accommodations, including academic adjustments.

Only students with documented disabilities that prevent equal access to an academic course or program are entitled to reasonable accommodations, which may include course adjustments, course substitutions and auxiliary aids. A reasonable accommodation is an accommodation that provides the student with equal access to the academic course or program, including all course or program materials, but does not impose an undue burden on the University or constitute a fundamental alteration to the course or program in question. Knowledge

of the essential course and program standards resides primarily with the individual faculty member and/or the academic department.

SASS evaluates the disability documentation provided by the student, collects additional information from the student, and gathers information from relevant educational support personnel (e.g., high school guidance counselors), medical and psychological professionals, and other pertinent sources outside of Rider University. When the student's disability has been sufficiently documented and potential reasonable accommodations have been identified, the student is provided a Notice of Academic Adjustments specific to each course and encouraged to present that Notice of Academic Adjustments to the relevant faculty member and to discuss, in a private setting, how the reasonable accommodations will be implemented.

If any such faculty member has concerns that the accommodations constitute a fundamental alteration to the course or program in question, that faculty member shall promptly contact SASS to initiate discussion and resolution of those concerns.

If the faculty member does not demonstrate to SASS that the accommodation constitutes a fundamental alteration of the course or program in question, the accommodation shall be put in place. If the faculty member demonstrates to SASS that the accommodation constitutes a fundamental alteration of the course or program in question, alternate accommodations, to the extent available, shall be made. If SASS and the faculty member are unable to mutually agree on this issue, they shall appeal it to the Provost or his/her designee, who shall hear both positions, review any necessary documents, and render a final decision.

If such an appeal is taken to the Provost or his/her designee, and the semester has already begun, the Provost or his/her designee shall determine at the outset of the appeal process whether or not the student will suffer an immediate negative impact, if the proposed accommodation is not yet in place. If the determination is that the student will suffer such an immediate negative impact, then the proposed accommodation will be put into place pending resolution of the appeal. If no such immediate negative impact is apparent, the proposed accommodation will be withheld, pending resolution of the appeal. In either case, the Provost or his/her designee will make every reasonable effort to render his/her decision within four working days of the initiation of the appeal.

This policy is designed to ensure the University's compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended and the New Jersey Law Against Discrimination, and to enable every Rider student with a disability to enjoy an equal opportunity to achieve his/her full potential while attending this University.

Academic Load/Overload

The normal maximum academic load for Lawrenceville students shall not exceed 17 semester credit hours per semester. The normal maximum academic load for Westminster Choir College students shall not exceed 18 semester credit hours per semester. Permission to exceed these loads must be obtained from the student's academic dean's office.

Westminster Choir College students may exceed the normal maximum academic load after passing 24 semester credit hours and attaining a cumulative grade point average of 3.0 or higher. All other students may exceed the normal maximum academic load after passing 45 semester credit hours and attaining a cumulative grade point average of 3.0 or higher.

Students who exceed the normal load are required to pay an overload per credit fee for each credit over 18, except in the case of non-billable hours.

Students on Conditional Academic Standing may not register for an academic overload.

Students may enroll for a maximum of 14 credits during Summer I and II combined with no more than 7 credits in any combination of I sessions or II sessions. These maximums may be exceeded only with the permission of the student's academic dean.

Students should understand that for every hour spent in class, they are expected to spend two to three hours studying outside of class time, and should therefore plan their academic load accordingly. Study time may vary based on the student's background knowledge and class difficulty.

Academic Programs

The Academic Programs A to Z Chart (<http://catalog.rider.edu/archives/2022-2023/undergraduate/majors-minors-certificates/>) lists Rider University's majors, minors and certificates alphabetically, along with the college or school (<http://catalog.rider.edu/archives/2022-2023/undergraduate/majors-minors-certificates/#programsbycollegetext>) that grants each degree, major, minor and certificate. The following definitions explain the difference between majors, minors, tracks, concentrations, and emphases:

Major	An organized group of courses ranging from introductory through advanced levels. Typically most if not all courses are in a single primary area of study, although some majors include study in multiple disciplines. Undergraduate majors require between 18 and 90 credits, depending upon the liberal arts or professional focus. Graduate majors require between 30 and 45 credits. Entrance into some majors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the major is listed on the official transcript.
Minor	An organized group of courses, typically involving introductory through intermediate levels. While most minors are in a single discipline, Rider University offers several interdisciplinary minors, such as Law and Justice, and Sustainability Studies. Minors are offered at only the undergraduate level, and require between 15-33 credits. Some departments have restrictions on the connection between major and minor options. Entrance into some minors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the minor is listed on the official transcript.

Track A choice of specialty within a degree, tracks comprise an organized group of courses serving a particular focus within a major. In undergraduate and graduate majors that represent multiple disciplines, tracks indicate a particular disciplinary focus. In a single discipline major with tracks, each track represents a singular focus, often representing a liberal arts or professional path. In some cases, a track represents a sub-specialization within the major field. Entrance into some tracks, particularly those that represent a particular disciplinary focus, may require prerequisites, portfolios, auditions, or other forms of assessment. Tracks require between 21 and 52 credits. Upon completion of all requirements, the track is listed on the official transcript along with the major field of study.

Concentration Concentrations, such as for the Finance Major or Supply Chain Analytics, represent a specialty or focus within an undergraduate or graduate major field of study. Typically, a concentration unites courses around content or a particular theme. Concentration requirements are a portion of a major, not the entire major itself. In some cases, concentrations refer to an interdisciplinary combination. Entrance into some concentrations may require prerequisites, portfolios, auditions, or other forms of assessment. Undergraduate concentrations require between 12 and 36 credits; graduate concentrations range from 9 to 18 credits. Upon completion of all requirements, the concentration is listed on the official transcript along with the major field of study.

Emphasis Typically an organized group of courses in a single discipline, the emphasis represents a subset of credits within an undergraduate or graduate major. The emphasis provides a coherent focus of study within a discipline, which may or not be in the major field. Typically an emphasis represents less than a third of the total major credits, mostly ranging from 15 to 19 credits. Entrance into some areas of emphasis may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the emphasis is listed on the official transcript along with the major field of study.

Academic Records

Academic Records are retained for varying periods of time depending on record type pursuant to University policy. Records may be kept longer at the sole discretion of the University.

Access to student academic and other records may be accorded to Rider personnel with a legitimate educational interest in the records. Information may be released to other agencies and individuals according to these policies in compliance with the Family Educational Rights and Privacy Act (FERPA) of 1974 (as amended):

- Rider may release the following information without written permission from the student: fact of enrollment, dates of enrollment, degree candidacy, degree awarded, and major field.
- Rider may release the following information unless the student has requested in writing by the end of the second week of classes each semester that the information not be released: name, email, home and local address, and home and local telephone number, participation on athletic teams and organizations, dates of attendance and honors and awards received.

No other information concerning a student will be released without that student's written permission.

Students having a complaint or question regarding FERPA may write to: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-8520.

Students may request to view their academic record by making an appointment with the appropriate dean's office.

Accompanying Costs for Voice Students

Any student studying individual voice at Rider University should expect, in most cases, to hire an accompanist. Students may choose to hire a college-approved accompanist. The per-semester fee is not refundable in any part if a student discontinues voice study or decides to seek out another accompanist. For additional information, see Tuition and Fees on Rider's website: <https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees> (<https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees/>).

Advanced Placement (AP) Credit

Students who have taken an AP exam may submit official scores to obtain credit. For a complete listing of courses, credits and other information, see AP Credits at <https://www.rider.edu/admissions/first-year/how-to-apply/college-credit/ap> (<https://www.rider.edu/admissions/first-year/how-to-apply/college-credit/ap/>).

Applied Music - School of Westminster Choir College

Individual applied music lessons for academic credit are available to all Rider University students with prior experience, regardless of major. Lessons are available in brass, composition, conducting, guitar/bass, harpsichord, organ, percussion, piano, strings, woodwinds, and voice. For all students whose major or minor program does not require applied music lessons, and for those students who have completed the applied music requirements for their degree program, fees for this elective (non-required) study will apply. Elective lessons are provided on a space-available basis. All part-time students are charged an applied music fee.

Students may earn 1 or 2 credits per semester, with the exception of graduate applied composition courses, which carry 3 credits per semester. Each fall, spring or summer applied course consists of twelve private lessons, or the equivalent instructional time, and may require participation in studio classes, performance classes, and/or an end-of-semester jury or performance review. Applied lessons completed during the January term follow specific departmental requirements regarding instructional time.

All applied music students must observe departmental applied requirements listed in the catalog and in department handbooks.

Applied lesson fees are described in the Tuition and Fees section of Rider's website (<https://www.rider.edu/tuition-aid/tuition-fees/undergraduate/>).

All applied music students must observe departmental applied requirements listed elsewhere in this catalog and in department handbooks. Students for whom applied music lessons are not required

may register for lessons on a space-available basis. Interested students should consult the Associate Dean.

Applied lesson fees are described on the Undergraduate Tuition and Fees (<http://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees/>) section of Rider's website (<https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees/>).

Effective as of the fall 2009 semester for all new or readmitted Rider University students, for all students whose major or minor program does not require applied music study, or for those students who have completed applied music requirements, elective fees will apply. All part-time students are charged an applied music fee.

Registration for applied music study follows this table of suffixes. Students will register for the appropriate course number and suffix, as indicated in the curriculum pages found elsewhere in this catalog.

Full-time Students

A – One-hour, 2-credit required lesson. Included in tuition – no extra charge.

- Theatre, Dance and Performing Arts example: Musical Theatre major
- Westminster Choir College example: All undergraduate majors

B – Half-hour, 1-credit required lesson. Included in tuition – no extra charge.

- Theatre, Dance and Performing Arts example: Popular Music Culture, up to 3 semesters
- Westminster Choir College example: Theory/Composition major (half-hour voice or keyboard lesson)

C – One-hour, 2-credit elective lesson. Not included in tuition – fee charged per semester.

- For students who have completed all required lessons in their major, or students whose major does not require lessons.

D – Half-hour, 1-credit elective lesson. Not included in tuition – fee charged per semester.

- For students who have completed all required lessons in their major or students whose major does not require lessons.

G – One-hour, 2-credit required/elective lesson. Half-hour is required and is included in tuition. The second half-hour is elective and is not included in tuition – fee charged per semester.

- Theatre, Dance and Performing Arts example: Popular Music Culture, up to 3 semesters
- Westminster Choir College example: Theory/Composition major (full-hour voice or keyboard lesson)

Part-time Students

(all part-time students regardless of major or requirements)

- Suffix E – One-hour, 2-credit required or elective lesson – fee charged per semester

- Suffix F – Half-hour, 1-credit required or elective lesson – fee charged per semester

Change of Applied Teacher

Students wishing to change their applied lesson teacher must make a request to the chair of the appropriate department. Any change requested after the beginning of a semester will require the permission of both applied lesson teachers and the department chair. If either applied lesson teacher is the department chair, permission of the Associate Dean also is required.

Change of Major or Applied Primary Area

Students wishing to change their major or the applied primary instrument they play must complete the appropriate form. Permission of the old and new major department is required.

Class Attendance/Absence

It is the prerogative as well as the responsibility of each faculty member to establish a clear policy for each course of instruction in regard to the nature and extent of student participation that will be expected and required.

The effect of absences upon the student's standing in a particular class will be left to the determination of the instructor of the course. However, it is expected that faculty members will be fair and reasonable concerning validated absences due to field trips, practicum, religious observance, participation in varsity athletics, placement interviews for graduating seniors, Westminster College of the Arts rehearsals or performances, and illnesses sufficiently serious to be certified by either the University Health Center or the student's physician. The faculty member should consult with the Dean of Students in instances where doubts arise regarding the course to follow in evaluating student absences.

It is the student's responsibility to inform instructors of the nature and extent of an actual or anticipated absence. If that is impossible, or if the absence is or will be more than three (3) consecutive class sessions or longer than seven [7] calendar days, the student should contact the Office of the Dean of Students at 609-896-5101. Then, the dean's office will notify the appropriate faculty member.

Class Cancellation Policy and Excused Absences for Westminster Choir College Students Only

During run-outs involving Westminster ensembles, private lessons for those students not involved in the run-out continue to meet. When a college-sponsored performance necessitates that 30% or more of the students in a class be absent, the class may be canceled at the discretion of the faculty member.

The dean will excuse individuals or groups of students who are participating in college-sponsored events. Only students registered for the class or ensemble participating in an activity will be excused from class. Students excused from class(es) under these circumstances remain responsible for all class work.

Class Cancellation

In most cases, Rider will remain open and fully operational during inclement weather and other emergency situations. Under extreme

circumstances, however, it may become necessary to cancel classes and other functions, close certain buildings or take other emergency actions.

If such circumstances should arise, notification will be made by phone call, text and/or email via RiderAlert, Rider's mass electronic messaging system. Students can update their information via the link: RiderAlert (<http://www.rider.edu/rideralert/>) (<https://www.rider.edu/rideralert> (<https://www.rider.edu/rideralert/>)).

Cancellations will also be announced online at www.rider.edu (<https://www.rider.edu/>) and on the Rider University information hotline at 609-219-2000, option 1.

College Level Examination Program (CLEP)

In certain cases, Rider University accepts credits earned through the College Level Examination Program (<https://clep.collegeboard.org/>) (CLEP). Students should consult with their academic dean to determine if credit may be awarded by CLEP. Typically, a minimum score of 50 is required on an individual examination. Generally, students may obtain CLEP credits prior to reaching Junior standing.

Commencement Requirements – School of Westminster Choir College

Academic year requirements of students in the School of Westminster Choir College extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Schola Cantorum, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness. In particular, credit for spring semester choir participation is lost if a student does not attend and is not excused from Commencement. All other students are encouraged to participate in Commencement.

Students singing in one of the choirs for the Commencement ceremony will be provided with a red choir robe for the ceremony. Students participating in the ceremony as part of the graduating class can order academic regalia free of charge from the Rider University Bookstore (<https://www.rider.edu/about/offices-services/bookstore/>).

Continuing Education Programs Policies

Changing to Degree Candidacy (Matriculation) (<http://catalog.rider.edu/undergraduate/colleges-schools/liberal-arts-sciences/continuing-education-programs/policies/#matric>)

Audit and Alumni Audit (<http://catalog.rider.edu/undergraduate/colleges-schools/liberal-arts-sciences/continuing-education-programs/policies/#audit>)

Credit by Nontraditional Means (<http://catalog.rider.edu/undergraduate/colleges-schools/liberal-arts-sciences/continuing-education-programs/policies/#nontraditional>)

Old Credits Policy (<http://catalog.rider.edu/undergraduate/colleges-schools/liberal-arts-sciences/continuing-education-programs/policies/#old>)

Changing to Degree Candidacy (Matriculation)

Non-matriculated students interested in degree candidacy should consult an academic advisor before applying for admission to a degree program. An applicant for matriculation must have at least a 2.0 average at Rider and meet the admissions requirements as described for degree candidates. (Specific majors may require a higher grade point average.)

When students qualify for matriculation, they will receive credit toward their degrees for all applicable courses previously completed satisfactorily. Students are bound by the degree requirements and transfer credit policy in effect at the time of matriculation.

Students who have earned more than 21 credits at Rider as non-degree candidates may be asked to explain their educational goals and, if appropriate, to matriculate.

Audit and Alumni Audit

Students who want to attend classes without taking examinations or receiving grades may audit courses when class space allows. Audited classes will be indicated with the notation of "X" on the transcript.

The extent to which an auditor may take part in a course's activities is determined by the student and the instructor. In addition to the audit fee, students auditing a course carrying separate fees must pay all such required fees.

Students who want to enroll as auditors should apply and register with the CEP admissions counselor (<https://www.rider.edu/admissions/continuing-studies/contact/>) during the scheduled evenings of the first week of class. Students who register on an audit basis may not change from audit to credit during a semester. However, a student who has audited a course may take that same course for credit in a later semester at full tuition.

Students who register on an audit basis may not change from audit to credit during a semester, except during the add period. Students originally registered for credit may change to audit status during the add/drop period. Students should refer to the academic calendar (<http://www.rider.edu/academics/academic-support-services/registrar/academic-calendars/>) of each term [Spring, Summer, Fall, JTerm] for specific add and drop/add dates.

Rider alumni (<http://www.rider.edu/alumni/>) who want to audit courses receive a special discount and should contact a CEP admissions counselor (<https://www.rider.edu/admissions/continuing-studies/contact/>).

Credit by Nontraditional Means

Credit earned for college-level knowledge obtained through means other than traditional classroom work at an accredited college may be considered for transfer. Students should consult with a CEP admissions counselor (<https://www.rider.edu/admissions/continuing-studies/contact/>) to discuss the transferability of nontraditional credit.

Nontraditional transfer credits include:

- College Level Examination Program (CLEP) credits;
- Advanced Placement credits;
- Formal military credits which meet Rider standards and procedures;
- DANTES Subject Standardized Test that meets credit recommendations established by the American Council on Education;
- Validation or assessment of specific courses approved by a Rider faculty member;
- Prior learning assessment (PLA) based on demonstrated learning acquired through life and work experience approved by Rider faculty.

Old Credits Policy

The academic record of a student returning to Rider after an absence of 10 years or more will be re-evaluated to determine the applicability of old courses to present requirements. Grades earned in courses taken 10 years or more before returning will not be counted in the student's present grade point average. Old courses that are judged applicable to current degree programs will be used to meet degree requirements.

Course Credits

Rider University maintains a 13-week semester, followed by five days of examinations.

Rider uses the true number of minutes per hour-long session; i.e., a one-hour meeting is actually 60 minutes. Three-credit classes meet for 60, 90, or 180 minutes, corresponding to, respectively and typically, 3, 2, or 1 meetings per week.

In Westminster College of the Arts, all performance courses receive credit:

- All ensembles receive 1 credit
- Other performance-based courses receive 1-3 credits
- A full-semester Student Teaching experience receives 12 credits
- Westminster Choir College students enrolled in CRC 100, PI 045, or TH 045 receive credit toward their semester course load, but such credits do not count toward graduation.

Applied music instruction receives 1-3 credits.

Course Level Numbering

Courses numbered below 100 are taught at pre-college level and carry no credit. Courses numbered at the 100- to 400-level carry only undergraduate credit. The course number indicates the anticipated audience for a course; 100 level courses are designed for freshmen, 200 level for sophomores, etc.

In Westminster Choir College:

1. Courses at the 500-level are open to undergraduate and graduate students. Undergraduate students who have earned at least 60 credits and a minimum cumulative GPA of 3.0 may enroll in a 600-level course upon permission of the instructor and the Associate Dean. Undergraduate students who have earned at least 90 credits and a minimum cumulative GPA of 3.8 may enroll in a 700-level course upon permission of the instructor, the Director of Graduate Studies and the Associate Dean.
2. Students with undergraduate status in the five-year B.M./M.A.T. program may take graduate courses required in that curriculum at the 500- or 600-level. Students in the B.M./M.A.T. program may take required 700-level courses in the senior year or upon successfully completing 124 credits and the student teaching semester. Students in the B.M./M.A.T. program who have not attained graduate status may enroll in non-required 700-level courses according to the restrictions stated in the previous paragraph.
3. Special students who have completed a baccalaureate degree may apply for permission to take 600- or 700-level courses. Undergraduate students in the Baccalaureate Honors Program (BHP) should see the Assistant Registrar regarding enrollment in graduate courses.

Course Repeats - School of Westminster Choir College

All undergraduate and graduate students who are enrolled in a major or minor offered by the School of Westminster Choir College may enroll for a second or subsequent time in any *non-repeatable* WCC course from which they have withdrawn, in which they have earned an "F;" or in which they have failed to earn the required minimum grade ¹ according to the following rules:

- 1) Students who have withdrawn from, failed, or failed to achieve the required minimum grade in a required course ¹ in their first attempt at the course may enroll for a second time without permission. All other students must have the permission of the associate dean.
- 2) Permission of the dean or associate dean of the School of Westminster Choir College or in the School of Communication, Media, and Performing Arts is required in order to enroll in a course for the third time.
- 3) Permission of the Academic Standing Committee of the school offering the course in question is required in order to enroll in a course for the fourth time. Permission for a fourth enrollment will be granted only in rare, extenuating, and documented circumstances.

In all instances, the most recent grade is calculated into the grade point average, and all listings and grades will remain on the transcript.

¹ Examples include: a minimum grade of "B-" is required in Piano Secondary, a minimum grade of "C" is required in foreign language study in order to progress to the next level in that language.

Courses – Adding, Dropping, Withdrawing, Repeating, Auditing

Timetables and deadlines given below pertain to fall and spring semesters. Students should consult the Registrar's web page (<http://www.rider.edu/academics/academic-support-resources/registrar/>) for summer session and J-term winter session deadlines.

Adding Courses

Students may add courses through the first week of the regular semester at their own discretion provided the course is still open for registration.

Dropping Courses

Students may drop courses through the second week of the regular semester at their own discretion. In such cases, the courses are deleted from the student's record. After the second week of the semester, a withdrawal from the course is necessary and a 'W' is recorded on the transcript.

Course Withdrawals

Students may withdraw from courses and receive a grade of 'W' during the third through tenth weeks of the semester. The student's academic advisor and financial aid counselor will be notified of class withdrawals by email.

After the end of the tenth week of the semester, students may withdraw from courses and receive a grade of 'W' only for validated reasons of physical or psychological incapacity. Validated reasons of physical or psychological incapacity serve as justification for a student to withdraw from courses with a grade of 'W' at any time beyond the add/drop period.

Reasons must be validated by the Dean of Students and approved by the academic dean of the college in which the student is enrolled.

Students are required to notify Student Financial Services when withdrawing from courses as these circumstances may impact financial aid eligibility.

Student-athletes are required to notify the Associate Director of Athletics for Compliance and Academic Support or the Director of Athletics prior to withdrawing from courses.

Students receiving veteran's benefits must report such changes to the Registrar's Office immediately.

Course withdrawal forms are available on the Registrar's Office (<https://www.rider.edu/academics/academic-support/registrar/>) website.

Withdrawal policies during special sessions (summer session, J-term) observe time limits proportional to the time limits of a regular semester.

Repeating Courses

Students may request permission from the academic dean to repeat a course to earn a better grade provided that the course is one that cannot be repeated for additional credit (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). The grade first earned will remain on the transcript but only the latest grade will be used in computing grade point average and determining whether or not degree requirements have been met.

Students who fail a required course must repeat the course until a passing grade is received. Students do not have to repeat a failed elective, but must pass another acceptable elective of comparable credit in order to meet graduation requirements.

Students receiving financial aid should consult with Student Financial Services before repeating a course already passed to determine the possible impact upon the student's continuing eligibility for financial aid.

Auditing Courses

Students who want to attend classes without taking examinations or receiving grades may audit courses subject to space availability and the permission of the instructor. No credit is earned for audited courses. Transcripts will record an audit with the notation of 'AU.'

Performance based courses cannot be audited (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). For a complete list of performance-based classes, please see the WCA Assistant Registrar.

The extent to which an auditor may take part in a course's activities is determined by the student and the instructor. In addition to the audit fee, students auditing a course carrying separate fees must pay all such required fees.

Students should apply and register through their dean's office and the Registrar. Westminster Choir College students who wish to audit courses should apply and register in the office of the Registrar during the first week of class.

Students who register on an audit basis may not change from audit to credit during a semester, except during the add period. Students originally registered for credit may change to audit status during the add/drop period. Students should refer to the academic calendar

(<http://www.rider.edu/academics/academic-support-services/registrar/academic-calendars/>) of each term (Spring, Summer, Fall, or JTerm) for specific add and drop / add dates. Students who have audited a course may take that same course for credit in a later semester at full tuition.

Credit by Examination

Credit for certain undergraduate courses may be earned by examination.

Please see the chairperson of the department offering the course to determine if a course is available for credit by examination.

Dean's List

The **Dean's list** is prepared at the end of the fall and spring semesters to recognize students who have earned academic honors.

Eligibility for the Dean's list is as follows:

In the Norm Brodsky College of Business, College of Arts and Sciences, College of Education and Human Services, and School of Fine and Performing Arts, a student must be enrolled full-time, have no grade lower than "C" and must achieve a minimum semester grade point average of 3.50.

In Westminster Choir College, a student must be enrolled full-time, have no grade lower than "C," have no "Z" grades, and must achieve a minimum semester grade point average of 3.70.

Degree Completion

Students who have not completed all requirements within 10 years of initial enrollment may be required to repeat courses and/or meet further requirements. Students for whom more than one year has elapsed since the date of last enrollment may be required to re-apply and/or re-audition for the program, and must meet all requirements in place at the time of their readmission.

Credits earned at another institution or through Westminster Continuing Education outside the 10 year period that commenced with initial enrollment in a degree program must be approved for transfer into that program by the department offering the degree.

Diploma Conferral

Diplomas are conferred four times each year: January, May, August, and December.

Students must submit a degree application form, available online via myRider (<http://myrider.rider.edu>) or in their academic dean's office, in order to be eligible to receive a diploma on any date. Students must apply for graduation by the deadlines established each year by the Registrar's Office. More information is available on the Commencement Candidates (<https://www.rider.edu/academics/academic-support/registrar/commencement-candidates/>) web page.

Diplomas are conferred only upon those who have met 100% of all degree requirements. Students in the combined B.M./M.A.T. program receive both diplomas upon the completion of all requirements.

Double Major

Students wishing to pursue two majors within a college or school (or majors in different colleges or schools), each of which leads to the same baccalaureate degree (e.g., B.A. or B.M.) may do so provided they receive requisite approvals, satisfy the general education or core requirements

for the degree they designate as primary, satisfy all of the major area requirements for each program, and satisfy all other requirements for each major. Upon completion of all requirements, the student will be awarded one degree but the transcript will indicate two majors.

Dual Degrees

Students wishing to pursue two majors within a college or school (or majors in different colleges or schools), each of which leads to a separate and distinct baccalaureate degree may do so provided they receive requisite approvals, satisfy all of the requirements for each major, and satisfy all other requirements for each degree. Upon completion of all requirements, the student will be awarded a second baccalaureate degree.

Employment Opportunities – School of Westminster Choir College

The University provides work opportunities both on and off campus.

Students who demonstrate financial need as determined by the FAFSA are offered Federal Work Study in their award. Students who have no need are paid through a student employment budget. It is the responsibility of students to find their own jobs. All students are encouraged to apply for available employment opportunities. Bi-weekly paychecks are provided directly to students rather than to student accounts.

Weekend church positions: Many Westminster students are employed in area churches on a part-time basis as organists, directors, and singers.

Lawrenceville and the surrounding area provides many opportunities for part-time employment in local businesses.

Engaged Learning Program

Definition

“Engaged Learning” refers to activities in which students apply knowledge gained in educational settings beyond the classroom; delve further with independent scholarship and creative expression; broaden their horizons with study abroad or cross-cultural encounters; become problem solvers, leaders and team members in their communities; and prepare for professional and civic lives that make a difference. Rider’s students are required to complete at least two high-impact Engaged Learning Experiences that reflect the University’s strategic themes of leadership, ethics and social responsibility, and global and multicultural perspectives. Students are required to reflect upon how the experience impacted themselves and others in either a written short essay or in a structured group setting. These experiences will help students build bridges between their course of study and the world in which they live.

Requirements

All Rider University undergraduate students^{1,2} are required to earn a minimum of six points, spread across at least two Engaged Learning categories. The six categories of Engaged Learning are:

1. Leadership and Mentoring
2. Study Abroad and Cultural Exploration
3. Guided Research and Scholarship
4. Civic and Community Engagement

5. Internship, Co-Op, and Field Work

6. Arts, Media and Creativity

- ¹ Transfer students who bring fewer than 31 accepted credits to Rider are required to earn six (6) Engaged Learning points which must be spread across two or more Engaged Learning categories. Transfer students who bring 31 or more accepted credits to Rider are required to earn three (3) Engaged Learning points in any one or more categories.
- ² All NCAA Division I athletes will receive 3 Engaged Learning points each semester when the Director of Athletics submits the roster to the Registrar. Their remaining points will be completed from the approved list of Engaged Learning experiences or courses. Points must be spread across at least two Engaged Learning categories.

Earning Points

Academic courses

Credit bearing courses approved as Engaged Learning Experiences need not be submitted by students to earn points. Once a student completes a course that has been designated as Engaged Learning, points equal to the number of credits (up to a maximum of 3 points), will be automatically assigned by the Registrar’s Office. The Registrar’s Office will insert the course on the Engaged Learning Transcript. A full list of the eligible courses is available on the Engaged Learning Program (<https://www.rider.edu/academics/engaged-learning/approved-courses/>) webpage.

Experiences

When students engage in experiences that are not connected to academic courses, they must initiate the review and approval process themselves. Forms for student submissions of eligible experiences are available in BroncNation (<https://broncnation.rider.edu/>), the student engagement platform. Instructions for completing the forms, submission guidelines, and a list of many eligible experiences are available on the Engaged Learning Program (<https://www.rider.edu/academics/engaged-learning/co-curricular-experiences/>) website.

Submitted experiences will be reviewed by designated approvers and, upon approval, will be reported to the Registrar by the end of each semester to be listed on the student’s Engaged Learning Transcript. For experiences not approved, students may appeal to their academic dean.

Ensembles/Productions - Attire and Registration

Attire

Students must purchase official ensemble attire for choirs in which they are enrolled. Freshman/transfer students in Westminster Choir College must be fitted during orientation and purchase a red robe which will be charged to their student account by the Bursar’s Office.

Registration

Students participating in music ensembles or artistic productions must be registered for the course that accompanies that activity. It

is the responsibility of the student to ensure proper registration in the appropriate course. Excused absences are granted only to registered students.

Each semester, the official personnel roster for each ensemble will be finalized for that semester at the end of the schedule adjustment period, typically two weeks after the first day of classes.

Freshman class eligibility for non-required ensembles or productions is determined by the appropriate department/program/applied area, with the approval of the appropriate Academic Policy Committee.

Full-Time Tuition Inclusion

Department of Performing Arts Students

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred when full-time students exceed maximum load levels, excluding recital credits or participation in auditioned choirs or productions for School of Fine and Performing Arts majors.

For Department of Performing Arts students, full undergraduate tuition includes:

1. A minimum of 12 and maximum of 18 credits per semester or the equivalent including non-credit courses.
2. Primary applied music study (p. 1607) to the maximum required credits/semesters.
3. Applied dance study to the maximum required credits/semesters. (see below)
4. Once all applied music or dance requirements have been completed, all additional lessons or courses will be billed at the elective rate.
5. Music students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate.

Please see the table of applied lesson suffixes in the "Applied Music (p. 1607)" section in the Undergraduate Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

Westminster Choir College Students

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred when full-time students exceed maximum load levels, excluding VC 593 or participation in auditioned choirs.

Please see the Tuition and Fees Table (<https://www.rider.edu/tuition-aid/tuition-fees/undergraduate/>) for elective and part-time charges for elective music and dance study.

Full undergraduate tuition includes:

A minimum of 12 and maximum of 18 credits per semester or the equivalent including non-credit courses. Exception: during the senior student teaching semester for Music Education majors, full-time tuition covers only the course ME 492. For primary applied music study, one hour per week of applied music instruction each semester, except during the student teaching semester for Music Education majors or a full-time (12 cr) internship semester for Bachelor of Arts in Music majors. Composition majors receive one hour per week of private composition instruction

and one half-hour per week of either private voice or private keyboard instruction. Once all applied requirements have been completed, all additional applied lessons will be billed at the elective rate. Students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate. Any non-required private lesson will be billed at the elective rate.

Please see the table of applied lesson suffixes in the Applied Music (p. 1607) section in the Undergraduate Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

Grades: Grade Reports, Grade Point Average, Incomplete Grades, Grade Appeals

- Grade Reports (p. 1613)
- Grade Point Average (GPA) (p. 1614)
- Incomplete Grades (p. 1614)
- Grade Appeals (p. 1614)

Grade Reports

Members of the faculty are officers of instruction at Rider University.

Among their responsibilities as such is the evaluation of students' academic accomplishments in courses of instruction. These evaluations ultimately are expressed in grades that are recorded in the students' academic record. Members of the faculty, judging the competencies and performances of students, assign grades based on their professional experience and training. Grades assigned by the faculty follow practices and procedures within the standards established by Rider and within the standards established by individual course requirements.

Letter grades are used at Rider University for recording faculty evaluations of final student achievement in individual courses and are entered on the permanent academic record of a student's academic performance.

The academic grades used by faculty for recording evaluations of student achievement are as follows. For determining grade point averages (GPAs), grades have weighted values called variously honor points, quality points, or grade points as follows:

Letter Grade	Grade Point Value
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
D*	1.0
F	0.0

* Failing academic work; fail to abide by standards of academic honesty and integrity; unauthorized withdrawal, and fail to complete work in prescribed time.)

Each instructor of a course will inform the student of the course objectives, procedures, and applicable grading standards. Upon a

student's written request, members of the faculty will provide a review of the student's course standing at least once each term by the mid-point of that term. Each student may also review material submitted to the instructor for evaluation such as papers, examinations, and the like. In these ways, students will be able to assess their own progress in a course before final grades are assigned.

NOTE: Faculty members are not required to maintain student course materials more than four months after the end of an academic term.

A student grade report may also show the following transcript notations, which carry no grade point value:

Transcript Notation	Explanation
I	Incomplete
L	Late grade
N *	Registered; did not attend
AU	Audit
P	Pass
S	Satisfactory progress
U	Failure in pass/fail course
W *	Withdrawal
Y	Satisfactory completion of supplemental education course
Z	Insufficient progress in supplemental education course
NCR	No credit

* "N" and "W" notations are included in the total semester hours attempted, as far as tuition payment is concerned.

Grade Point Average (GPA)

Grade point averages (GPA) are used to establish academic standing. In order to compute the grade point average, students must first determine the number of quality points earned for each course. The total number of quality points for a course is derived by multiplying the number of credits for the course by the number of quality points for each letter grade. The grade point average (GPA) is determined by dividing the number of quality points by the number of GPA hours.

Incomplete Grades

Students who, as a result of extenuating circumstances, are unable to complete the required work of a course within the term, may request an extension of time from a faculty member. Such extensions of time can be granted only in cases in which illness or another serious emergency has prevented the student from completing the course requirements or from taking a final examination. The request for extension of time must be made prior to the last scheduled class meeting, except in those unusual situations in which prior notification is impossible.

The faculty member shall determine whether to grant the request for a time extension and the type of verification (if any) required to support the request. The faculty member shall specify the time, up to four weeks from the last day of the term, as specified in the academic calendar, by which work must be completed by the student. If the faculty member does agree to the request, the notation "I" (Incomplete) shall be submitted on the grade roll. In those situations where the faculty member has not received a request for an extension of time, the notation "I" (Incomplete)

may be submitted on the grade roll by the faculty member when, in his or her judgment, such a determination appears justified. Upon submission of completed required work the faculty member shall submit a Change of Grade form to the Registrar.

Students who, as a result of extenuating circumstances, are unable to submit the completed required work at the end of the four-week period may request an extension of the incomplete grade. The request for an extension of the incomplete must be made prior to the expiration of the four-week period. If the faculty member agrees to the request for an extension of the incomplete, the faculty member shall specify the time, up to a maximum of two weeks from the date of expiration of the four-week period (i.e., six weeks from the last day of the term) by which work must be completed by the student and shall submit an Extension of Incomplete form to the Registrar.

Upon submission of completed required work, the faculty member shall submit a Change of Grade form to the Registrar and assign the course grade. Failure of the Registrar to receive from the faculty member a Change of Grade form or an Extension of Incomplete form at the end of the four-week period, or a Change of Grade form at the end of the six-week period shall result in the automatic assignment of the grade "F," "Z," or "U" by the Registrar.

Students who receive an incomplete in a course that is part of a course sequence must obtain permission from the department chairperson to remain enrolled in the next course in the sequence or they will be removed from that next course.

Grade Appeals

Basis for Grade Appeal

A final course grade may be changed only at the initiative of the faculty member who originally assigned the grade or as the result of a decision made in the hearing of a grade appeal by the Faculty Grade Review Panel. It is assumed that the final course grade is assigned in good faith and based on the professional expertise of the faculty member.

A student may appeal a final course grade only on the grounds that it represents an arbitrary, capricious, and/or unreasonable evaluation of his or her performance.

A grade appeal may not be based on a disagreement with the faculty member's professional academic evaluation of the student's work. The burden of proof rests with the student. A grade appeal shall be supported only when a student convincingly demonstrates that an arbitrary, capricious, and/or unreasonable evaluation occurred. Changes and appeals for grades on written comprehensive graduate examinations are subject to the same requirements and procedures as course grades.

The Faculty Grade Review Panel may return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process; may decline to hear an appeal when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading; and shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

Faculty Grade Review Panel

The Faculty Grade Review Panel has final authority concerning all grade appeal questions. **The panel consists of the following nine members:**

1. Six tenured faculty members including one tenured faculty member elected by the bargaining unit members of each of the five college/

school academic policy committees and one selected by the bargaining unit members of the University Academic Policy Committee, who shall serve as chairperson of the panel;

2. A seventh faculty member selected jointly by the Provost and Vice President for Academic Affairs and the academic deans;
3. Two full-time students selected by the Student Government Association who, at the time of their service, must be seniors who have attained a grade point average of at least 3.25.

Each of the above appointing groups shall also designate an alternate for each member they appoint to the panel. Faculty members of the panel shall serve two-year terms and may be reappointed.

A quorum of the Faculty Grade Review Panel shall consist of any five members. The failure or inability of any appointing body to fulfill its responsibility to appoint any member or members to the panel shall not prevent the panel from organizing itself and exercising its duties.

The chairperson of the panel will serve as the hearing coordinator and has the following duties and responsibilities:

1. Inform the members of the panel that a grade appeal has been received and set a date for the hearing,
2. Distribute documentary materials pertaining to the appeal to members of the panel,
3. Maintain a permanent record of the panel's proceedings,
4. Prepare and distribute any decision made by the panel to the appropriate parties.

Prior to Initiating a Grade Appeal

A student who believes that his or her final course grade represents an arbitrary, capricious, and/or unreasonable evaluation of his or her work is strongly encouraged to talk with the faculty member in an effort to resolve the issue before filing a formal grade appeal. However, it must be emphasized that this informal discussion does not constitute the initiation of a grade appeal and does not extend the time limits specified in the next paragraph.

Initiating a Grade Appeal

To initiate a grade appeal, the student must forward a letter to the faculty member which clearly and precisely describes the student's reasons for believing that the final course grade constitutes an arbitrary, capricious, and/or unreasonable evaluation of his or her performance. A copy of this letter shall also be sent to the faculty member's department chairperson. (If the faculty member taught the relevant course in another department, the letter shall be sent to the chair of that other department. If the relevant course is in a program and is not cross-listed, the letter shall be sent to the chair of the program director's home department.)

For appeal of fall semester grades, the letter must be postmarked or hand-delivered within seven (7) days of the start of the upcoming spring semester. For appeal of spring semester grades, it must be postmarked or hand-delivered within thirty (30) days of the last regularly scheduled spring semester examination. For appeal of summer grades, it must be postmarked or hand-delivered within seven (7) days of the start of the upcoming fall semester. For appeal of grades on written comprehensive graduate examinations, it must be postmarked or hand-delivered within thirty (30) days of the date that grades were issued for the examination.

If a change of grade occurs after the aforementioned deadlines, the grade appeal must be filed within thirty (30) days of the submission of the changed grade to the registrar.

If the faculty member who assigned the grade in question is no longer at Rider or is away from Rider on an extended basis and not available for consultation, the initial review shall be conducted by the appropriate department chairperson, and the schedule may be extended at the appropriate dean's discretion.

If the faculty member who assigned the grade in question is the department chairperson, the chairperson's dean or that dean's designee shall replace the chairperson in all the procedures that follow.

Failure to submit a written statement of the appeal within the time guidelines established above shall constitute grounds for denying a student access to the grade appeal process. Failure to provide a clear and precise statement shall constitute grounds for denying the appeal at any step in the process. Once a grade appeal is initiated, the basis of all subsequent proceedings must be limited to the allegations appearing in the initial written statement. This limitation does not exclude the introduction of new evidence directly related to the initial allegations.

The chairperson of the Faculty Grade Review Panel, upon written request of any party, may extend any deadline contained in this policy if he or she believes that circumstances beyond the control of a party to the appeal have prevented compliance with stated deadlines. The decision of the panel chairperson to extend or not to extend a deadline shall not be subject to appeal.

The Grade Appeal Process

Step One

In the letter of appeal, the student may request a formal meeting with the faculty member. If the faculty member agrees to such a meeting, the meeting shall be held no later than fourteen (14) days after the beginning of the fall or spring semester following the semester or session in which the grade was given. However, the parties are encouraged to schedule such a meeting at an earlier date if mutually convenient.

The faculty member shall render a decision on the appeal within seven (7) days of such a meeting and shall notify the student and the department chairperson in writing of the decision. If the faculty member agrees to change the final course grade of the student, he or she shall submit a Change of Grade form to the Registrar.

If the faculty member believes that a meeting with the student would not be productive, he or she shall make a decision on the appeal based on the student's letter and shall communicate the decision in writing to the student and the department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given.

If the student accepts the decision of the faculty member at Step One, no further action is required. If the student does not accept the faculty member's decision at Step One, he or she may appeal the decision to Step Two in writing to the department chairperson with a copy to the faculty member's dean. This letter must be postmarked or hand-delivered within seven (7) days of the postmark date of the faculty member's Step One decision.

If the student does not receive a written response from the faculty member or department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given, the student may, within twenty-one (21)

days of the beginning of that semester, proceed to Step Two as indicated below. All such written responses shall be mailed to the student's campus address, if the student resides on campus, or otherwise to the student's home address on record.

Step Two

Within fourteen (14) days of the receipt of a student's letter of appeal to Step Two, the department chairperson shall schedule a meeting with the student and the faculty member. At such meeting, the student and the faculty member will have the opportunity to explain their positions with respect to the grade in question, but they shall be limited to the allegations raised in the student's initial written statement.

The department chairperson shall render an opinion on the matter within seven (7) days of the Step Two meeting and shall provide explanatory language for this opinion in writing to the student, the faculty member and the faculty member's dean.

If the department chairperson's opinion supports the position of the faculty member, the student shall have seven (7) days from the postmark date of the letter from the department chairperson to continue his or her appeal to the Faculty Grade Review Panel as described in Step Three.

If the department chairperson's opinion supports the student's position in the appeal, the faculty member shall have seven (7) days from the postmark date of the department chairperson's letter opinion either to accept that opinion and submit a Change of Grade form to the registrar, or to reject the opinion and notify the student, department chairperson, and faculty member's dean that the faculty member is making an appeal pursuant to the Step Three process.

If the student does not receive notification of a change of grade within twenty-one (21) days of the date of the department chairperson's written decision, the student may carry the appeal to Step Three.

Step Three

To carry the appeal to Step Three, the student must submit a letter expressing that intent to the chairperson of the Faculty Grade Review Panel with copies to the faculty member, the department chairperson, the dean, and the Provost and Vice President for Academic Affairs.

Within seven (7) days (excluding vacation and examination periods) of the receipt of this letter, or the letter from the faculty member who has appealed, whichever the case may be, the chairperson of the Faculty Grade Review Panel shall schedule a meeting of the panel to consider the appeal.

The student and the faculty member shall have the right to appear before the panel to present information pertaining to the allegations made in the student's initial written statement.

The Faculty Grade Review Panel may, if it deems it desirable, request attendance by the chairperson, the dean, and/or any other representatives of the University. Attorneys or advisors to the participants may attend but not participate in the meeting of the panel.

The unwillingness of the faculty member or student to appear before the panel shall not prevent the panel from proceeding with its deliberations. In those deliberations, the panel shall have access to written documents pertaining to the appeal, pertinent records of student performance, and such verbal presentations as may be made during panel deliberations.

On the basis of careful consideration of the available information, the Faculty Grade Review Panel will determine if an arbitrary, capricious, and/or unreasonable evaluation of the student's performance has occurred.

This determination will be made in writing and provided to all affected parties.

If the panel determines that no such action occurred, the case will be closed with no further right of appeal. If the panel determines that an arbitrary, capricious, and/or unreasonable evaluation has occurred, it will direct the faculty member's department (or will establish an evaluation committee of faculty members in the field of the course offered) to re-evaluate the student's performance based upon the panel's decision, the records and documentary materials.

Within fourteen (14) days of the receipt of the panel's directive, the department or evaluation committee shall recommend to the panel a grade that it deems appropriate, whether higher than, lower than, or the same as the original grade. Normally, the panel will accept the revised evaluation by the department or committee and will subsequently notify the Registrar of any change of grade. Should the panel feel that the department or committee has not conducted its review in an appropriate manner and that, as a result, the suggested substitute grade is not appropriate, it shall have the authority to direct the Registrar to enter the grade that the panel judges appropriate.

Decisions of the panel are not subject to further appeal. The panel may also return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process, or when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading. The panel shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

Expediting a Grade Appeal

When a student's graduation is affected by the outcome of a grade appeal in a semester, term, or session immediately preceding such graduation, faculty members shall make reasonable efforts to expedite the process.

Grade Changes Made at Initiative of Faculty Member

The individual faculty member may determine that it is appropriate to change a recorded academic grade. Such changes must be made within four (4) months of the date that the original grade was assigned. Any change of grade initiated by a faculty member more than four (4) months after the date the original grade was assigned must be approved by the faculty member's dean. Faculty members, using forms supplied by the Office of the Registrar, will prepare a written change of grade stating the reasons for the grade change with a copy to the student, the department chairperson and the faculty member's dean. Upon receipt of this form by the Office of the Registrar, the grade will be changed on the official records of the University.

Graduation with Honors

Graduation with distinction (sometimes referred to as Latin honors) depends upon the achievement of exceptionally high scholastic averages and completion of all requirements. This distinction is reflected by the awarding of degrees cum laude, magna cum laude, and summa cum laude. All grade point averages are computed on work completed at Rider University only.

For all college degrees except those in Westminster Choir College, graduation with distinction is awarded on the following basis:

Summa Cum Laude – averages between 3.75 and 4.00

Magna Cum Laude – averages between 3.50 and 3.74

Cum Laude – averages between 3.25 and 3.49

For Westminster Choir College degrees, graduation with distinction is awarded on the following basis:

Summa Cum Laude - averages between 3.80 and 4.00

Magna Cum Laude - averages between 3.60 and 3.79

Cum Laude - averages between 3.40 and 3.59

Health and Safety – Westminster College of the Arts

The School of Westminster Choir College and School of Communication, Media and Performing Arts, as required by the National Association of Schools of Music, is obligated to inform students and faculty of health and safety issues, hazards, and procedures inherent in practice, performance, teaching, and listening, both in general and as applicable to their specific specializations. This includes but is not limited to information regarding hearing, vocal and musculoskeletal health, injury prevention, and the use, proper handling, and operation of potentially dangerous materials, equipment, and technology.

It is important to note that health and safety depend largely on personal decisions made by informed individuals. Rider University has health and safety responsibilities, but the fulfillment of these responsibilities cannot and will not ensure any individual's health and safety. Too many factors beyond the University's control are involved.

Each individual is personally responsible for avoiding risk and preventing injuries to themselves before, during, and after study or employment at Rider University. The policies, protocols, and operational procedures developed do not alter or cancel any individual's personal responsibility, or in any way shift personal responsibility for the results of any individual's personal decisions or actions in any instance or over time, to the University.

All members of the School of Westminster Choir College and School of Communication, Media and Performing Arts community are encouraged to visit Health and Safety Recommendations (<https://www.rider.edu/student-life/health-wellness/student-health-services/health-education-updates/recommendations-sfps-wcc-students/>) on Rider's website for a series of recommendations and resources designed to help each individual to become aware of and attend to various issues.

Independent Study

In order to challenge students with exceptional talents and interests and to provide opportunities for individual study and research, independent study is available for credit to qualified students under the terms stated below. Each project must be directed by a Rider University faculty member.

The advisor-student relationship is one of mutual agreement between the faculty member and the student. The choice of project is limited primarily by the availability of an advisor who has some knowledge and interest in the field. Application forms are available in the office of the dean of the student's college or school.

The following policies apply to independent study courses:

1. Students must be a junior or senior in good academic standing with a cumulative grade point average of 3.00 or better.
2. Approval for an independent study course must be secured in writing, normally during the term prior to that in which the study will be carried out, but in any case in advance of the first day of classes of the applicable term. All proposals must be approved by the faculty/advisor, department chair, and by the office of the instructor's dean and the office of the student's dean. Upon approval, the student must enroll by the end of the third week of class.
3. A student may not enroll for more than one independent study course per term. Courses usually carry one to four credits, with a maximum of six allowable in special cases involving a full year of work.
4. A maximum of 18 credits may be earned in all independent study courses.
5. A student is expected to earn a minimum grade of "B" in any independent study course, as assigned by the faculty advisor for the project. A grade of "B-" or lower may result in ineligibility for future independent study courses.

International Baccalaureate (IB) Credits

Incoming students may be granted up to 20 credits on the basis of their International Baccalaureate coursework. Credits are awarded for Higher Level IB courses based on the student receiving a score at or above the level approved by the department that evaluated the course (in no case less than a score of five).

In order to grant credit, Rider's Office of Undergraduate Admission must be sent an official IB transcript. For further information, please see International Baccalaureate (IB) Course Equivalency (<https://www.rider.edu/admissions/first-year/requirements-deadlines/college-credit/ib-course-equivalency/>) on Rider's website.

International Student Status

Federal regulations require that all F-1 and J-1 undergraduate and graduate international students maintain full-time status. International students may engage in one online course per mandatory term (fall and spring term) as long as they are enrolled in a full course load. Students may request part-time status under specified, limited circumstances, including during their final semester. Prior approval of the Office for International Education (<https://www.rider.edu/academics/centers-institutes/office-of-international-education/>) is required.

All international students do not need to comply with the above restrictions for summer course work.

Outside Activities – School of Westminster Choir College

School of Westminster Choir College students are expected to give priority to all officially scheduled classes, lessons, rehearsals, on- and off-campus performances (including tours), and other official functions involving music students. Outside activities, such as employment, church or volunteer work, or other professional engagements should not conflict with college requirements or those listed on course syllabi.

Students employed outside of the college should inform employers of their commitment to their education and their obligation to college classes and ensembles.

Placement Testing Information

Mathematics (p. 1618)

Reading (p. 1618)

Math Placement Test

Placement in some Mathematics classes and all Management Sciences classes is based upon the Mathematics score on the SAT and/or a math placement test.

Norm Brodsky College of Business Students

Business students not majoring in Actuarial Science:

- Students with a Math SAT score of 570 or ACT score of 23 or higher are placed in Quantitative Methods for Business (MSD 105). No placement test is required.
- Students with a Math SAT score of 560 or lower or ACT score of 22 or lower are required to take an online Math Placement Test prior to attending Orientation. Details on this placement test will be included in the Norm Brodsky College of Business Dean's Welcome Letter.

Business students majoring in Actuarial Science:

- Students with a Math SAT score of 650 or higher or ACT score of 28 or higher are placed in Calculus I (MTH 210). No placement test is required.
- Students with a Math SAT score of 640 or lower or ACT score of 27 or lower are required to take an online Math Placement Test prior to attending Orientation. Details on this placement test will be included in the Norm Brodsky College of Business Dean's Welcome Letter.

College of Arts and Science

Science and mathematics majors who were admitted test optional are required to take the math placement test. Students with test scores will be placed as follows.

- Students with an SAT Math score of 560 (of ACT Math score of 23) or below will be placed in MTH 100 and students with an SAT Math score of between 570 and 640 (ACT Math score between 24 and 27) will be placed into MTH 105.
- Students with an SAT Math score of 650 (ACT Math score of 28) and above will be placed into MTH 210 (<http://catalog.rider.edu/search/?P=MTH%20210>).

Students wishing to challenge these placements may take the math placement test.

Reading Placement

Students will be placed based in a reading course based upon the following criteria:

- Students who were admitted **test optional** will be placed according to High School GPA:
 - Students with a high school GPA below 3.11 will be placed into CRC 100: College Reading.
- Students using their **SAT EBRW score and High School GPA** will be placed as follows:
 - Students with an SAT EBRW score below 470 and who have a High School GPA below 3.4 will be placed into CRC 100.

Recital Scheduling Information – School of Westminster Choir College

Recital Scheduling – School of Westminster Choir College only

Recital scheduling occurs in two rounds:

1. Lottery: Two-week period in which students may request scheduling of required recitals. Requests are processed in random order. All students will receive an email with a link to the request form. Students will receive an email from Performance Management with their assigned recital date, time, and location within one to two weeks after the lottery closes.
2. Open request period during the semester: Please email Performance Management requests to schedule recitals. These requests are processed in the order received. All recital requests are subject to approval by the student's applied instructor.

Recital Spaces

Students may request Gill Chapel, Bristol Chapel, Hillman Hall, or the Playhouse for recitals. Each recital hall has a standard recital configuration that will be set up prior to a recital. If the setup of the room is changed during a recital, it is the student's responsibility to return the room back to the standard configuration before leaving the space.

Recital Dates and Times Recitals are scheduled at 1:00 p.m., 3:00 p.m., 5:00 p.m., and 7:00 p.m. Recital reservations allow for 60 minutes of performance time plus 30 minutes before and 30 minutes after the recital.

Canceled Recitals

Contact Performance Management to cancel or postpone a recital. Students can only reschedule a recital after canceling the previous reservation. A request to reschedule a recital will be considered a cancellation of an existing reservation.

Recital Programs, Recording, and Documentation

Printed programs and recording arrangements for the recital performance are the responsibility of the performer.

Five archive copies of the recital program, formatted according to the Archive Program Guideline (sent with your recital confirmation email and available online), must be submitted to the Academic Coordinator no later than ten (10) days after the recital. Follow this link to view the program guidelines (https://www.rider.edu/sites/default/files/files/wcc_recital_program_guidelines.pdf).

Scheduling Dress Rehearsals Students may request up to 2 hours for a dress rehearsal in the recital space. Dress rehearsals will only be scheduled for confirmed recitals. Due to space limitations, the availability of space for dress rehearsals is not guaranteed.

After checking the availability of space on 25Live (login to myRider first, then click <https://25live.collegenet.com/pro/rider#!/home/search/event/list> (<https://25live.collegenet.com/pro/rider#!/home/search/event/list>)), please submit requests for dress rehearsals directly to Performance Management. You will be notified with your confirmation when it is scheduled.

Receptions

It is the responsibility of the performer to make these arrangements.

Publicity

All recital publicity is the responsibility of the performer. On-campus posters must be stamped by the Office of Campus Life in the BLC and posted only on approved bulletin boards. Please contact the Office of Campus Life if you have questions about the posting policies.

Performance Management Contacts

Kristen Rodgers - Assistant Director of Performance Management
- rodgersk@rider.edu

Leandra Acosta - Box Office Manager and WCA Events Scheduler
- acostal@rider.edu

Transfer Appeals

An appeal process for transfer course equivalency is open to students who have attended an accredited community college or four-year institution and have been admitted to a Rider degree program. *Course appeals will only be considered prior to the completion of the last 30 credits in the bachelor's degree.*

All communication regarding appeal[s] will be communicated to the student through Rider email.

The appeal process is as follows:

1. For each course being appealed the student should submit the following information/documentation:
 - a. Program the student is pursuing
 - b. Course[s] the student wishes to appeal (include course number, title and the name of the transfer institution)
 - c. Supporting documentation [course syllabus, course work] to justify appeal[s]
 - d. Desired outcome of appeal[s] [please check one]:
 - Substitution for a required course in the major, list course[s]: _____
 - Substitution for a required course in the minor, list course[s]: _____
 - Substitution for a core course, list course[s]: _____
 - Transfer as a general or free elective
 - Transfer as a business elective [CBA only], list discipline or course prefix (e.g. MKT, ECO) _____
 - Other: _____
2. All appeals must be submitted electronically through the student's Rider email address to the Office of the Registrar at transferappeal@rider.edu.
3. Appeals will be reviewed by the Transfer Appeals Committee. A member of the Transfer Appeals Committee will respond to the student's petition fifteen [15] days after receipt of the appeal.

The Transfer Appeals Committee is composed of the relevant department chair(s) or program director(s), as well as the dean or associate/assistant dean of the college/school in which the program resides.

Transfer Credit While Currently Enrolled at Rider

Policy for students except for Westminster Choir College (p. 1619)
Policy for Westminster Choir College students (p. 1619)

**All students except Westminster Choir College:
Students seeking permission to transfer credit from another accredited college after matriculating at Rider University:**

1. must complete an off-campus approval form at least 30 days in advance of the start of the proposed off-campus course, to be approved by the student's academic dean's office. If prior approval is not obtained, there is no guarantee that transfer credit will be granted;
2. must have a cumulative grade point average of at least 2.00;
3. may not be within the final 30 credits of the Rider baccalaureate degree program.

Baccalaureate degree-seeking students with less than 60 credits may enroll in courses in either two-year or four-year accredited postsecondary institutions for transfer to a program of study at Rider as long as prior approval is obtained as described above.

Baccalaureate degree-seeking students with more than 60 credits may only enroll in courses in four-year accredited postsecondary institutions for transfer to a program of study at Rider as long as prior approval is obtained as described above.

Upon the completion of 21 credits, students pursuing a two-year (A.A.) program will not be permitted to enroll in courses at other institutions for transfer to that program of study at Rider University.

Credit by transfer from other institutions may be applied toward baccalaureate degrees under these conditions:

1. An official transcript must be forwarded directly from the sending institution to the Registrar's Office.
2. A minimum grade of "C" or its equivalent is required for transfer of courses. Grades such as "pass" or "credit" are also acceptable. **Grades of "C-" or below are not acceptable.**
3. Courses taken 10 or more years prior to entering Rider University are subject to individual evaluation for contemporary transfer applicability.
4. Transfer credits are not associated with grades and are not included in grade point average calculation, except for courses taken at other colleges of Rider University or under the cooperative program between Westminster Choir College and Princeton University.

Westminster Choir College Students:

1. Transfer credit is equivalent to the credit earned at the sending institution, except that credit by transfer may not exceed three credits per course.
2. Many non-music courses may be transferred to satisfy Arts and Science requirements; excluded are courses dealing with highly technical or scientific subjects, specialized professional school courses, physical education courses and others determined by the college. The Arts and Science Program has the final authority in determining whether or not a specific course may transfer.

3. Music courses are not transferable. Credit will be awarded, however, for all college-level music courses exempted by examinations, which are given only after a student has enrolled at Westminster.

Withdrawal from the University

Students should refer to the University website, <https://www.rider.edu/academics/academic-support-services/registrar/withdrawals-and-readmission> (<https://www.rider.edu/academics/academic-support-services/registrar/withdrawals-and-readmission/>) for information regarding the circumstances and procedures related to withdrawing from the University.

In addition, students should refer to Rider's website at <http://www.rider.edu/offices-services/financial/payments-billing-deposits/refunds> (<http://www.rider.edu/offices-services/financial/payments-billing-deposits/refunds/>) for refund and other related information as it concerns withdrawal from the University.

Graduate Academic Policies

Introduction

Graduate students must comply with the general requirements of Rider University concerning graduate study. Graduate students must demonstrate the ability to express their thoughts in writing and in speaking in clear, correct English for class reports, research papers, theses and examinations.

Graduate students should refer below for important information regarding Rider's graduate academic policies. In addition, academic policies specific to degree programs or certificates housed within each of the colleges/schools can be found in the Academic Catalog as per the list below.

Norm Brodsky College of Business (p. 1375)

College of Arts and Sciences (p. 1480)

School of Westminster Choir College (p. 1633)

College of Education and Human Services (<http://catalog.rider.edu/graduate/colleges-schools/education/education-leadership-counseling/>)

Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to, those standards and policies set forth in this catalog and in The Student Code of Social Conduct. (<https://www.rider.edu/about/offices-services/community-standards/student-code-social-conduct/>) **Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student.**
2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirements), creations, and activities engaged in by the student while at the University, including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, internet/web-based productions and sales, and athletic events and all proceeds therefrom. The student has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

Rider University's Right to Change Catalog Content

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student.

While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and reasonable treatment of interested parties requires in the University's best judgment.

- Outside Activities (p. 1632)
- Thesis/Capstone - Westminster Choir College (p. 1632)
- Transfer Credit While Currently Enrolled at Rider (p. 1632)

- For all graduate programs, students graduating with a cumulative GPA of 3.85 or above graduate with distinction.

Master's and graduate students who fail to maintain at least a 3.0 cumulative GPA, and Ed.S., Ed.D. or EMBA students who fail to maintain at least a 3.3 cumulative GPA, will be reviewed by the appropriate program faculty or Committee on Academic Standing and may receive a letter of academic concern, be placed on conditional standing, or be dismissed from the University.

Academic Concern

Upon review of a student's academic record and professionalism, a Committee on Academic Standing or Department Chair may issue a letter of concern, which responds to academic progress that does not meet college, school or university expectations, and describes an academic plan of study or professional remediation plan that must be met in the subsequent semester. Students who fail to pursue the plan prescribed by the department faculty or an academic standing committee, who do unsatisfactory work in the prescribed plan, or who fail to meet other academic standards may be placed on Conditional Academic Standing or dismissed.

Conditional Academic Standing

Upon review of a student's academic record and professionalism, the department faculty or a Committee on Academic Standing may place a student on Conditional Academic Standing. In reaching this decision, the faculty or committee may require a student who does unsatisfactory work to pursue a specific course of study or professional remediation plan during a particular academic session. Students who fail to pursue the plan prescribed by the faculty or an academic standing committee, who do unsatisfactory work in the prescribed plan, or who fail to meet other academic standards may be continued on Conditional Academic Standing or may be dismissed without further right of appeal. There must be substantial evidence of proper motivation and a capacity for doing graduate level work to warrant maintaining a student in school with a record of continued conditional status as opposed to dismissal.

Students on conditional academic standing may not register for an academic overload. Westminster Choir College graduate students on conditional standing are ineligible for assistantships and may become ineligible for other scholarship awards. Additionally, students must be removed from conditional status in order to be approved for graduation.

Academic Dismissal from the University

Students who have not done satisfactory work may be dismissed from the University for poor scholarship or poor professional conduct at the end of any semester after an appropriate review of their scholastic performance by the department faculty or Committee on Academic Standing within their college or school. Academic dismissal at the end of the fall semester is effective prior to the beginning of the spring semester.

Academic dismissal at the end of the spring semester is effective prior to the beginning of summer session.

Students who wish to appeal a dismissal must submit a written statement of appeal to the department chair or academic dean of their college or school within 10 days from the date on their letter of dismissal.

All appeals submitted by the deadline will receive consideration by the appropriate academic standing committee.

Dismissal for academic or professional conduct reasons terminates a student's relationship with Rider. Dismissed students may not enroll for courses nor participate in university-sponsored activities or ensembles at

Academic Concern, Conditional Standing/Dismissal and Readmission

Students permitted to enroll at Rider University are either in:

- Graduate Standing, in which case they are qualified to undertake graduate study and are recognized as degree or certification candidates upon admission;
- Conditional Standing, in which case they are permitted to enroll for a probationary period before a final decision of Graduate Standing is made; or
- Special Standing, in which case they are not enrolled in a Rider degree program but are permitted to enroll in some courses.

Decisions regarding academic progress, conditional standing, and dismissal for poor scholarship or poor professional performance are the responsibility of the faculty of the relevant program or the Committee on Academic Standing within each college or school. These committees may establish and apply criteria in addition to the minimum university cumulative grade point average (GPA). Using approved academic criteria, the Committee on Academic Standing within each college or school may review the academic record of any student. The following applies to all graduate students.

- Master's and graduate students with a cumulative GPA below 3.0, and Ed.S., Ed.D., or EMBA students with a cumulative GPA below 3.3, will be placed on probationary academic standing and may be dismissed.
- The minimum GPA to graduate from a Master's and graduate certificate program is 3.0 and from an Ed.S., Ed.D., or EMBA program is 3.3.

either campus for a period of one year following their dismissal. Students dismissed for academic or professional conduct reasons normally will not be eligible for readmission within one calendar year of the dismissal date. Although some students will apply for readmission, there is no real or implied right to such readmission.

Students dismissed by Westminster Choir College (WCC) but not Rider University may apply for enrollment in graduate programs in other colleges of the University. Students dismissed by WCC but not Rider University may not enroll in WCC courses, ensembles or activities until they have been readmitted to WCC with the exception of courses, ensembles or activities that are delivered by or at WCC and are required in music degrees housed within the School of Fine and Performing Arts.

Dismissal from a Major within Westminster College of the Arts

Academic departments within Westminster College of the Arts reserve the right to dismiss a student from a major following notification that their standing in the major is in jeopardy and the passage of a suitable amount of time permitted to address stated issues, typically one semester. Such dismissal may be based upon any of the following conditions: failure to maintain a satisfactory or minimum GPA; failure to sustain academic progress in the courses of the major; conduct in violation of the standards of the department or profession; failure to meet conditions or requirements as stated in university catalogs, The Student Code of Social Conduct (<https://www.rider.edu/about/offices-services/community-standards/student-code-social-conduct/>), or the departmental handbook; or the student's general standing at Rider University. Such dismissal will become effective at the end of the semester in which the decision is reached. Students dismissed from Music Education are not permitted to enroll in Music Education courses until readmitted into the Music Education major.

Readmission after Academic Dismissal

Dismissed students seeking readmission must first contact the Registrar's Office (<https://www.rider.edu/academics/academic-support-services/registrar/>), Bart Luedeke Center, or the Associate Dean of Students Office, Bart Luedeke Center to obtain appropriate forms. Once the Registrar or Associate Dean of Students or his/her designee approves the readmission application, the application is forwarded to the dean of the college or chair of the department to which the student seeks reentry. Students dismissed for academic reasons must submit with their readmission application a personal letter to the Academic Standing Committee which will make decisions concerning their readmission. They should also provide evidence, usually in the form of a transcript from another institution, of formal study and/or accomplishment. If possible, such work should have been done in specific areas of deficiency in the student's academic record.

Academically dismissed students must meet all academic requirements in place at the time of their readmission. Readmission will be dependent upon various criteria including GPA, current academic progress, evidence of professional growth, and the student's general standing. Students may be required to reapply or reaudition.

If readmission is granted, the student is placed on conditional academic standing until the cumulative GPA reaches a satisfactory level of at least 3.0. A readmitted student is responsible for curriculum requirements in effect at the time of readmission.

Students should refer to The Student Code of Social Conduct at <https://www.rider.edu/about/offices-services/community-standards/student->

[code-social-conduct \(https://www.rider.edu/about/offices-services/community-standards/student-code-social-conduct/\)](https://www.rider.edu/about/offices-services/community-standards/student-code-social-conduct/) for information regarding readmission following a voluntary or judicial dismissal.

Academic Disability Policy

Rider University supports the protections available to students with disabilities under Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended, and the New Jersey Law Against Discrimination.

Student Accessibility and Support Services (<https://www.rider.edu/academics/academic-support-services/student-accessibility-support-services/>) (SASS) facilitates equal access to the programs and activities at Rider University for students with disabilities, as defined by the Americans with Disabilities Act (ADA).

Students must initiate contact with SASS in order to receive services and to arrange reasonable accommodations, such as course adjustments, course substitutions and auxiliary aids. Any Rider student who supplies SASS with appropriate documentation of a disability is eligible on a case-by-case basis for reasonable accommodations. Students with disabilities should contact SASS Bart Luedeke Center, Suite 201, accessibility@rider.edu, 609-895-5492) to discuss available services and reasonable accommodations, including academic adjustments.

Only students with documented disabilities that prevent equal access to an academic course or program are entitled to reasonable accommodations, which may include course adjustments, course substitutions and auxiliary aids. A reasonable accommodation is an accommodation that provides the student with equal access to the academic course or program, including all course or program materials, but does not impose an undue burden on the University or constitute a fundamental alteration to the course or program in question. Knowledge of the essential course and program standards resides primarily with the individual faculty member and/or the academic department.

SASS evaluates the disability documentation provided by the student, collects additional information from the student, and gathers information from relevant educational support personnel (e.g., high school guidance counselors), medical and psychological professionals, and other pertinent sources outside of Rider University. When the student's disability has been sufficiently documented and potential reasonable accommodations have been identified, the student is provided a Notice of Academic Adjustments specific to each course and encouraged to present that Notice of Academic Adjustments to the relevant faculty member and to discuss, in a private setting, how the reasonable accommodations will be implemented.

If any such faculty member has concerns that the accommodations constitute a fundamental alteration to the course or program in question, that faculty member shall promptly contact SASS to initiate discussion and resolution of those concerns.

If the faculty member does not demonstrate to SASS that the accommodation constitutes a fundamental alteration of the course or program in question, the accommodation shall be put in place. If the faculty member demonstrates to SASS that the accommodation constitutes a fundamental alteration of the course or program in question, alternate accommodations, to the extent available, shall be made. If SASS and the faculty member are unable to mutually agree on this issue, they shall appeal it to the Provost or his/her designee, who

shall hear both positions, review any necessary documents, and render a final decision.

If such an appeal is taken to the Provost or his/her designee, and the semester has already begun, the Provost or his/her designee shall determine at the outset of the appeal process whether or not the student will suffer an immediate negative impact, if the proposed accommodation is not yet in place. If the determination is that the student will suffer such an immediate negative impact, then the proposed accommodation will be put into place pending resolution of the appeal. If no such immediate negative impact is apparent, the proposed accommodation will be withheld, pending resolution of the appeal. In either case, the Provost or his/her designee will make every reasonable effort to render his/her decision within four working days of the initiation of the appeal.

This policy is designed to ensure the University's compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended and the New Jersey Law Against Discrimination, and to enable every Rider student with a disability to enjoy an equal opportunity to achieve his/her full potential while attending this University.

Academic Load/Overload

Students should understand that for every hour spent in class, they are expected to spend two to three hours studying outside of class time, and should therefore plan their academic load accordingly. Study time may vary based on the student's background knowledge and class difficulty.

Graduate Business

A full-time program consists of nine (9) or more semester hours of graduate course work. Part-time students who are employed full-time will generally be limited to six semester hours of graduate work in a given semester. During the evening summer session or during an accelerated term in a fall or spring semester, the recommended course load is one-half that of a regular semester.

Graduate Education

A full-time program during the fall and spring semesters consists of nine (9) or more semester hours of graduate course work. A full-time program during the Summer Sessions consists of six (6) or more semester hours of graduate course work. Students enrolled in the Post-Baccalaureate Teacher Certification program are restricted to two courses (6 semester hours) per semester until the point of student teaching.

Graduate Arts and Sciences

A full-time program consists of nine (9) or more semester hours of graduate course work. Part-time students who are employed full-time will generally be limited to six semester hours of graduate work in a given semester. During the summer sessions, the recommended course load is one-half that of a regular semester.

Westminster Choir College

In the Westminster Choir College, a full-time graduate program consists of between nine (9) and fifteen (15) semester hours. Enrollment for more than 15 semester hours constitutes an academic overload, and requires the permission of the WCA Associate Dean.

Westminster Choir College graduate students may exceed the normal maximum academic load after completing one (1) full-time semester at Rider University (minimum of 9 credit hours) **and** attaining a cumulative grade point average of 3.00 or higher. Students on Conditional Academic Standing are not eligible for an academic overload.

Students who exceed the normal load are required to pay an overload per credit fee for each credit over 15, except in the case of non-billable hours.

Students may enroll for a maximum of 12-14 combined credits during Summer I and II, with no more than 7 credits in any one session. These maximums may be exceeded only with the permission of the student's academic dean.

Academic Records

Academic Records are retained for varying periods of time depending on record type pursuant to University policy. Records may be kept longer at the sole discretion of the University.

Access to student academic and other records may be accorded to Rider personnel with a legitimate educational interest in the records. Information may be released to other agencies and individuals according to these policies in compliance with the Family Educational Rights and Privacy Act (FERPA) of 1974 (as amended):

- Rider may release the following information without written permission from the student: fact of enrollment, dates of enrollment, degree candidacy, degree awarded, and major field.
- Rider may release the following information unless the student has requested in writing by the end of the second week of classes each semester that the information not be released: name, email, home and local address, and home and local telephone number, participation on athletic teams and organizations, dates of attendance and honors and awards received.

No other information concerning a student will be released without that student's written permission.

Students having a complaint or question regarding FERPA may write to: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-8520.

Students may request to view their academic record by making an appointment with the appropriate dean's office.

Accompanying Costs for Voice Students

Any student studying individual voice at Rider University should expect, in most cases, to hire an accompanist. Students may choose to hire a college-approved accompanist. The per-semester fee is not refundable in any part if a student discontinues voice study or decides to seek out another accompanist. For additional information, see Tuition and Fees on Rider's website: <https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees> (<https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees/>).

Applied Music - Westminster Choir College

Individual applied music lessons for academic credit are available to all Rider University students with prior experience, regardless of major.

Lessons are available in brass, composition, conducting, guitar/bass, harpsichord, organ, percussion, piano, strings, woodwinds, and voice. For all students whose major or minor program does not require applied music lessons, and for those students who have completed the applied music requirements for their degree program, fees for this elective (non-required) study will apply. Elective lessons are provided on a space-available basis. All part-time students are charged an applied music fee.

Students may earn 1 or 2 credits per semester, with the exception of graduate applied composition courses, which carry 3 credits per semester. Each fall, spring or summer applied course consists of twelve private lessons, or the equivalent instructional time, and may require participation in studio classes, performance classes, and/or an end-of-semester jury or performance review. Applied lessons completed during the January term follow specific departmental requirements regarding instructional time.

All applied music students must observe departmental applied requirements listed in the catalog and in department handbooks.

Applied lesson fees are described in the Tuition and Fees section of Rider's website (<https://www.rider.edu/tuition-aid/tuition-fees/undergraduate/>).

All applied music students must observe departmental applied requirements listed elsewhere in this catalog and in department handbooks. Students for whom applied music lessons are not required may register for lessons on a space-available basis. Interested students should consult the Associate Dean.

Applied lesson fees are described on the Undergraduate Tuition and Fees (<http://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees/>) section of Rider's website (<https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees/>).

Effective as of the fall 2009 semester for all new or readmitted Rider University students, for all students whose major or minor program does not require applied music study, or for those students who have completed applied music requirements, elective fees will apply. All part-time students are charged an applied music fee.

Registration for applied music study follows this table of suffixes. Students will register for the appropriate course number and suffix, as indicated in the curriculum pages found elsewhere in this catalog.

Full-time Students

A – One-hour, 2-credit required lesson. Included in tuition – no extra charge.

- Theatre, Dance or Performing Arts example: Musical Theatre major
- Westminster Choir College example: All undergraduate majors

B – Half-hour, 1-credit required lesson. Included in tuition – no extra charge.

- Theatre, Dance or Performing Arts example: Popular Music Culture, up to 3 semesters

- Westminster Choir College example: Theory/Composition major (half-hour voice or keyboard lesson)

C – One-hour, 2-credit elective lesson. Not included in tuition – fee charged per semester.

- For students who have completed all required lessons in their major, or students whose major does not require lessons.

D – Half-hour, 1-credit elective lesson. Not included in tuition – fee charged per semester.

- For students who have completed all required lessons in their major or students whose major does not require lessons.

G – One-hour, 2-credit required/elective lesson. Half-hour is required and is included in tuition. The second half-hour is elective and is not included in tuition – fee charged per semester.

- Theatre, Dance or Performing Arts example: Popular Music Culture, up to 3 semesters
- Westminster Choir College example: Theory/Composition major (full-hour voice or keyboard lesson)

Part-time Students

(all part-time students regardless of major or requirements)

- Suffix E – One-hour, 2-credit required or elective lesson – fee charged per semester
- Suffix F – Half-hour, 1-credit required or elective lesson – fee charged per semester

Change of Applied Teacher

Students wishing to change their applied lesson teacher must make a request to the chair of the appropriate department. Any change requested after the beginning of a semester will require the permission of both applied lesson teachers and the department chair. If either applied lesson teacher is the department chair, permission of the Associate Dean also is required.

Change of Major or Applied Primary Area

Students wishing to change their major or the applied primary instrument they play must complete the appropriate form. Permission of the old and new major department is required.

Class Attendance/Absence

It is the prerogative as well as the responsibility of each faculty member to establish a clear policy for each course of instruction in regard to the nature and extent of student participation that will be expected and required.

The effect of absences upon the student's standing in a particular class will be left to the determination of the instructor of the course. However, it is expected that faculty members will be fair and reasonable concerning validated absences due to field trips, practicum, religious observance, participation in varsity athletics, placement interviews for graduating seniors, Westminster College of the Arts rehearsals or performances, and illnesses sufficiently serious to be certified by either the University Health Center or the student's physician. The faculty member should consult with the Dean of Students in instances where doubts arise regarding the course to follow in evaluating student absences.

It is the student's responsibility to inform instructors of the nature and extent of an actual or anticipated absence. If that is impossible, or if the absence is or will be more than three (3) consecutive class sessions or longer than seven [7] calendar days, the student should contact the Office of the Dean of Students at 609-896-5101. Then, the dean's office will notify the appropriate faculty member.

Class Cancellation Policy and Excused Absences for Westminster Choir College Students Only

During run-outs involving Westminster ensembles, private lessons for those students not involved in the run-out continue to meet. When a college-sponsored performance necessitates that 30% or more of the students in a class be absent, the class may be canceled at the discretion of the faculty member.

The dean will excuse individuals or groups of students who are participating in college-sponsored events. Only students registered for the class or ensemble participating in an activity will be excused from class. Students excused from class(es) under these circumstances remain responsible for all class work.

Class Cancellation

In most cases, Rider will remain open and fully operational during inclement weather and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, close certain buildings or take other emergency actions.

If such circumstances should arise, notification will be made by phone call, text and/or email via RiderAlert, Rider's mass electronic messaging system. Students can update their information via the link: RiderAlert (<http://www.rider.edu/rideralert/>) (<https://www.rider.edu/rideralert> (<https://www.rider.edu/rideralert/>)).

Cancellations will also be announced online at www.rider.edu (<https://www.rider.edu/>) and on the Rider University information hotline at 609-219-2000, option 1.

Commencement Requirements – Westminster Choir College

Academic year requirements of students in the School of Westminster Choir College extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Schola Cantorum, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness. In particular, credit for spring semester choir participation is lost if a student does not attend and is not excused from Commencement. All other students are encouraged to participate in Commencement.

Students singing in one of the choirs for the Commencement ceremony will be provided with a red choir robe for the ceremony. Students participating in the ceremony as part of the graduating class can order academic regalia free of charge from the Rider University Bookstore (<https://www.rider.edu/about/offices-services/bookstore/>).

Course Credits

Graduate classes at Rider University may follow a 14-week semester or an accelerated 7-week schedule. Rider uses the true number of minutes per hour-long session; i.e., a one-hour meeting is actually 60 minutes. Three-credit classes meet for 60, 90, or 180 minutes, corresponding to, respectively and typically, 3, 2, or 1 meeting per week.

In the College of Arts and Sciences all performance courses receive credit as follows:

- All ensembles receive 1 credit;
- other performance-based courses receive 1-3 credits;
- a full-semester Student Teaching experience receives 12 credits;
- applied music instruction receives 1-3 credits.

Westminster Choir College students enrolled in CRC 100, PI 045, or TH 045 receive credit toward their semester course load, but such credits do not count toward graduation.

Course Level Numbering

Courses numbered below 100 are taught at pre-college level and carry no credit. Courses numbered at the 100- to 400-level carry only undergraduate credit. The course number indicates the anticipated audience for a course; 100 level courses are designed for freshmen, 200 level for sophomores, etc.

For Westminster Choir College:

1. Courses at the 500-level are open to undergraduate and graduate students. Undergraduate students who have earned at least 60 credits and a minimum cumulative GPA of 3.0 may enroll in a 600-level course upon permission of the instructor and the Associate Dean. Undergraduate students who have earned at least 90 credits and a minimum cumulative GPA of 3.8 may enroll in a 700-level course upon permission of the instructor, the Director of Graduate Studies and the Associate Dean.
2. Students with undergraduate status in the five-year B.M./M.A.T. program may take graduate courses required in that curriculum at the 500- or 600-level. Students in the B.M./M.A.T. program may take required 700-level courses in the senior year or upon successfully completing 124 credits and the student teaching semester. Students in the B.M./M.A.T. program who have not attained graduate status may enroll in non-required 700-level courses according to the restrictions stated in the previous paragraph.
3. Certain students who have completed a baccalaureate degree may apply for permission to take 600- or 700-level courses. Undergraduate students in the Baccalaureate Honors Program (BHP) should see the Assistant Registrar regarding enrollment in graduate courses.

Course Repeats - Westminster College of the Arts

All undergraduate and graduate students who are enrolled in a major or minor offered by the Westminster College of the Arts may enroll for a second or subsequent time in any *non-repeatable* WCA course from which they have withdrawn, in which they have earned an "F," or in which they have failed to earn the required minimum grade ¹ according to the following rules:

- 1) Students who have withdrawn from, failed, or failed to achieve the required minimum grade in a required course ¹ in their first attempt at the course may enroll for a second time without permission. All other students must have the permission of the Associate Dean.
- 2) Permission of the dean or associate dean of the college or school (WCC or FPA) offering the course in question is required in order to enroll in a course for the third time.
- 3) Permission of the Academic Standing Committee of the college or school (WCC or FPA) offering the course in question is required in order to enroll in a course for the fourth time. Permission for a fourth enrollment will be granted only in rare, extenuating, and documented circumstances.

In all instances, the most recent grade is calculated into the grade point average, and all listings and grades will remain on the transcript.

¹ Examples include: a minimum grade of "B-" is required in Piano Secondary, a minimum grade of "C" is required in foreign language study in order to progress to the next level in that language.

Courses - Adding, Dropping, Repeating and Withdrawing

Timetables and deadlines given below pertain to fall and spring semesters. Students should consult the Registrar's web page for summer session and J-term winter session deadlines.

Adding Courses

Graduate students may add a course through the first week of the semester provided the course is still open for registration, for full term courses. See the Registrar's website for timelines for accelerated courses.

Graduate students in the College of Education and Human Services, Norm Brodsky College of Business, and College of Arts and Sciences who are enrolled in a 7-week course have the first three days of the 7-week term to add a course.

Dropping Courses

Students may drop courses through the second week of the regular semester at their own discretion. In such cases, the courses are deleted from the student's record. After the second week of the semester, a withdrawal from the course is necessary and a 'W' is recorded on the transcript. See the Registrar's website for the timeline for accelerated classes.

Graduate students in the College of Education and Human Services, Norm Brodsky College of Business, and College of Arts and Sciences who are enrolled in a 7-week course have the first full week of the 7-week term to drop a class with a full refund. After the first week, a withdrawal from the course is necessary.

Repeating Courses

Students may request permission from the academic dean to repeat a course to earn a better grade provided that the course is one that cannot be repeated for additional credit (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). The grade first earned will remain on the transcript but only the latest grade will be used in computing grade point

average and determining whether or not degree requirements have been met.

Students who fail a required course must repeat the course until a passing grade is received. Students do not have to repeat a failed elective, but must pass another acceptable elective of comparable credit in order to meet graduation requirements.

Students receiving financial aid should consult with Student Financial Services before repeating a course already passed to determine the possible impact upon the student's continuing eligibility for financial aid.

Withdrawing from Courses

Students may withdraw from courses and receive a grade of 'W' during the third through tenth weeks of the semester. The student's academic advisor and financial aid counselor will be notified of class withdrawals by email.

After the end of the tenth week of the semester, students may withdraw from courses and receive a grade of 'W' only for validated reasons of physical or psychological incapacity. Validated reasons of physical or psychological incapacity serve as justification for a student to withdraw from courses with a grade of 'W' at any time beyond the add/drop period.

Reasons must be validated by the Dean of Students and approved by the academic dean of the college in which the student is enrolled.

Students are required to notify Student Financial Services when withdrawing from courses as these circumstances may impact financial aid eligibility.

Student-athletes are required to notify the Associate Director of Athletics for Compliance and Academic Support or the Director of Athletics prior to withdrawing from courses.

Students receiving veteran's benefits must report such changes to the Registrar's Office immediately.

Course withdrawal forms are available on the Registrar's Office (<https://www.rider.edu/academics/academic-support/registrar/>) website.

Withdrawal policies during special sessions (summer session, J-term) observe time limits proportional to the time limits of a regular semester.

Degree Completion

In all colleges, students who have not satisfied requirements by the end of the specified time may be required to repeat courses and/or meet further requirements. Students for whom more than two years has elapsed since the date of last enrollment may be required to re-apply and/or re-audition for the program, and must meet all requirements in place at the time of their readmission.

For all colleges except Westminster Choir College and the College of Education and Human Services, students must complete all requirements for the master's degree within six (6) years of the date of first registration for graduate course work. College of Education and Human Services students must complete all requirements for their program within six years of the enrollment date of the first course (with the exception of the M.A. in Counseling Services program, which is eight years from the date of acceptance into the program; the M.A. in Clinical Mental Health Counseling which is ten years from the date of acceptance into the program; and the Ed.S. in School Psychology, which is ten years from the

date of acceptance into the program; and four years after completion of APRN 5007 in the Graduate Nursing Program.)

Westminster Choir College students must complete all requirements for the master's degree within seven (7) years of the date of first registration for graduate course work. For Westminster Choir College students, credits earned at another institution or through Westminster Continuing Education outside the seven-year period that commenced with initial enrollment in a degree program must be approved for transfer into that program by the department offering the degree.

Diploma Conferral

Diplomas are conferred four times each year: January, May, August, and December. Students must submit a degree application form, available online via myRider or in their academic dean's or department's office, in order to be eligible to receive a diploma on any date. Students must apply for graduation by the deadlines established each year by the Registrar's Office. See Commencement Candidates (<https://www.rider.edu/academics/academic-support/registrar/commencement-candidates/>) on the Registrar's Office website for more information.

Diplomas are conferred only upon those who have met 100% of all degree requirements. Students in the combined B.M./M.A.T. program receive both diplomas upon the completion of all requirements.

Employment Opportunities – Westminster Choir College

The University provides work opportunities both on and off campus.

Students who demonstrate financial need as determined by the FAFSA are offered Federal Work Study in their award. Students who have no need are paid through a student employment budget. It is the responsibility of students to find their own jobs. All students are encouraged to apply for available employment opportunities. Bi-weekly paychecks are provided directly to students rather than to student accounts.

Weekend church positions: Many Westminster students are employed in area churches on a part-time basis as organists, directors, and singers.

Lawrenceville and the surrounding area provides many opportunities for part-time employment in local businesses.

Ensembles/Productions – Attire and Registration

Attire

Students must purchase official ensemble attire for choirs in which they are enrolled. Freshman/transfer students attending Westminster Choir College must be fitted during orientation and purchase a red robe which will be charged to their student account by the Bursar's Office.

Registration

Students participating in music ensembles or artistic productions must be registered for the course that accompanies that activity. It is the responsibility of the student to ensure proper registration in the appropriate course. Excused absences are granted only to registered students.

Each semester, the official personnel roster for each ensemble will be finalized for that semester at the end of the schedule adjustment period, typically two weeks after the first day of classes.

Full-Time Graduate Tuition Inclusion – Westminster Choir College

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred when full-time students exceed maximum load levels, excluding VC 593 or participation in auditioned choirs.

Please see Rider's Financial Aid website (<https://www.rider.edu/tuition-aid/tuition-fees/>) for elective and part-time charges for elective music and dance study.

Full graduate tuition includes:

1. A minimum of 9 and maximum of 15 credits per semester, or the equivalent including undergraduate and non-credit courses.
2. For required graduate primary applied music study, one hour per week of private instruction, except for Choral Conducting majors, who receive one half-hour per week of private instruction.
3. Once all required primary, secondary or private composition applied requirements have been completed, all additional applied lessons will be billed at the elective rate given below.
4. Students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate.
5. Any non-required private lesson will be billed at the elective rate given below. Graduate students in majors without applied requirements will be billed for applied lessons at the elective rate.
6. Please see the table of applied lesson suffixes under "Applied Music (<http://catalog.rider.edu/policies/graduate/applied-music-wca/>)" in the Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

Grades: Grade Reports, Grade Point Average, Incomplete Grades, Grade Appeals

Grade Reports

Members of the faculty are officers of instruction at Rider University.

Among their responsibilities as such is the evaluation of students' academic accomplishments in courses of instruction. These evaluations ultimately are expressed in grades that are recorded in the students' academic record. Members of the faculty, judging the competencies and performances of students, assign grades based on their professional experience and training. Grades assigned by the faculty follow practices and procedures within the standards established by Rider and within the standards established by individual course requirements.

Letter grades are used at Rider University for recording faculty evaluations of final student achievement in individual courses and are entered on the permanent academic record of a student's academic performance.

The academic grades used by faculty for recording evaluations of student achievement are as follows. For determining grade point averages

(GPAs), grades have weighted values called variously honor points, quality points, or grade points:

Letter Grade	Grade Point Value
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
D (see footnote 1)	1.0
F (see footnote 2)	0.0

¹ Failing academic work; fail to abide by standards of academic honesty and integrity; unauthorized withdrawal, and fail to complete work in prescribed time. Work that is minimally acceptable but below the standards of the course. The “D” grade is not given at the graduate level in The College of Education and Human Services, the Norm Brodsky College of Business, or Westminster Choir College.

² In the College of Education and Human Services: Failing academic work; fail to abide by standards of academic honesty and integrity; unauthorized withdrawal, and fail to complete work in prescribed time.

Each instructor of a course will inform the student of the course objectives, procedures, and applicable grading standards. Upon a student’s written request, members of the faculty will provide a review of the student’s course standing at least once each term by the mid-point of that term. Each student may also review material submitted to the instructor for evaluation such as papers, examinations, and the like. In these ways, students will be able to assess their own progress in a course before final grades are assigned.

NOTE: Faculty members are not required to maintain student course materials more than four months after the end of an academic term.

A student grade report may also show the following transcript notations, which carry no grade point value:

Transcript Notation	Explanation
I	Incomplete
L	Late grade
N (see footnote 1)	Registered; did not attend
AU	Audit
P	Pass
S	Satisfactory progress
U	Failure in pass/fail course
W (see footnote 1)	Withdrawal
Y	Satisfactory completion of supplemental education course
Z	Insufficient progress in supplemental education course

¹ “N” and “W” notations are included in the total semester hours attempted, as far as tuition payment is concerned.

Grade Point Average (GPA)

Grade point averages (GPA) are used to establish academic standing. In order to compute the grade point average, students must first determine the number of quality points earned for each course. The total number of quality points for a course is derived by multiplying the number of credits for the course by the number of quality points for each letter grade. The grade point average (GPA) is determined by dividing the number of quality points by the number of GPA hours.

Incomplete Grades

Students who, as a result of extenuating circumstances, are unable to complete the required work of a course within the term, may request an extension of time from a faculty member. Such extensions of time can be granted only in cases in which illness or another serious emergency has prevented the student from completing the course requirements or from taking a final examination. The request for extension of time must be made prior to the last scheduled class meeting, except in those unusual situations in which prior notification is impossible.

The faculty member shall determine whether to grant the request for a time extension and the type of verification (if any) required to support the request. The faculty member shall specify the time, up to four weeks from the last day of the term as specified in the academic calendar, by which work must be completed by the student. If the faculty member does agree to the request, the notation “I” (Incomplete) shall be submitted on the grade roll. In those situations where the faculty member has not received a request for an extension of time, the notation “I” (Incomplete) may be submitted on the grade roll by the faculty member when, in his or her judgment, such a determination appears justified. Upon submission of completed required work the faculty member shall submit a Change of Grade form to the Registrar.

Students who, as a result of extenuating circumstances, are unable to submit the completed required work at the end of the four-week period may request an extension of the incomplete grade. The request for an extension of the incomplete grade must be made prior to the expiration of the four-week period. If the faculty member agrees to the request for an extension of the incomplete, the faculty member shall specify the time, up to a maximum of two weeks from the date of expiration of the four-week period (i.e., six weeks from the last day of the term) by which work must be completed by the student and shall submit an Extension of Incomplete form to the Registrar.

Upon submission of completed required work, the faculty member shall submit a Change of Grade form to the Registrar and assign the course grade. Failure of the Registrar to receive from the faculty member a Change of Grade form or an Extension of Incomplete form at the end of the four-week period, or a Change of Grade form at the end of the six-week period, shall result in the automatic assignment of the grade “F,” “Z,” or “U” by the Registrar.

Students who receive an incomplete in a course that is part of a course sequence must obtain permission from the department chairperson to remain enrolled in the next course in the sequence or they will be removed from that next course.

Grade Appeals

Basis for Grade Appeal

A final course grade may be changed only at the initiative of the faculty member who originally assigned the grade or as the result of a decision made in the hearing of a grade appeal by the Faculty Grade Review Panel.

It is assumed that the final course grade is assigned in good faith and based on the professional expertise of the faculty member.

A student may appeal a final course grade only on the grounds that it represents an arbitrary, capricious, and/or unreasonable evaluation of his or her performance.

A grade appeal may not be based on a disagreement with the faculty member's professional academic evaluation of the student's work.

The burden of proof rests with the student. A grade appeal shall be supported only when a student convincingly demonstrates that an arbitrary, capricious, and/or unreasonable evaluation occurred. Changes and appeals for grades on written comprehensive graduate examinations are subject to the same requirements and procedures as course grades.

The Faculty Grade Review Panel may return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process; may decline to hear an appeal when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading; and shall decline an appeal if it is based on failure to accommodate a disability covered by the Academic Disability Policy (<http://catalog.rider.edu/archives/2022-2023/policies/undergraduate/disabilities/>).

Faculty Grade Review Panel

The Faculty Grade Review Panel has final authority concerning all grade appeal questions. **The panel consists of the following nine members:**

1. Six tenured faculty members including one tenured faculty member elected by the bargaining unit members of each of the five college/school academic policy committees and one selected by the bargaining unit members of the University Academic Policy Committee, who shall serve as chairperson of the panel;
2. A seventh faculty member selected jointly by the Provost and Vice President for Academic Affairs and the academic deans;
3. Two full-time students selected by the Student Government Association who, at the time of their service, must be seniors who have attained a grade point average of at least 3.25.

Each of the above appointing groups shall also designate an alternate for each member they appoint to the panel. Faculty members of the panel shall serve two-year terms and may be reappointed.

A quorum of the Faculty Grade Review Panel shall consist of any five members. The failure or inability of any appointing body to fulfill its responsibility to appoint any member or members to the panel shall not prevent the panel from organizing itself and exercising its duties.

The chairperson of the panel will serve as the hearing coordinator and has the following duties and responsibilities:

1. Inform the members of the panel that a grade appeal has been received and set a date for the hearing;
2. Distribute documentary materials pertaining to the appeal to members of the panel;
3. Maintain a permanent record of the panel's proceedings;
4. Prepare and distribute any decision made by the panel to the appropriate parties.

Prior to Initiating a Grade Appeal

A student who believes that his or her final course grade represents an arbitrary, capricious, and/or unreasonable evaluation of his or her work is strongly encouraged to talk with the faculty member in an effort to

resolve the issue before filing a formal grade appeal. However, it must be emphasized that this informal discussion does not constitute the initiation of a grade appeal and does not extend the time limits specified in the next section, Initiating a Grade Appeal.

Initiating a Grade Appeal

To initiate a grade appeal, the student must forward a letter to the faculty member which clearly and precisely describes the student's reasons for believing that the final course grade constitutes an arbitrary, capricious, and/or unreasonable evaluation of his or her performance. A copy of this letter shall also be sent to the faculty member's department chairperson. (If the faculty member taught the relevant course in another department, the letter shall be sent to the chair of that other department. If the relevant course is in a program and is not cross-listed, the letter shall be sent to the chair of the program director's home department.)

For appeal of fall semester grades, the letter must be postmarked or hand-delivered within seven (7) days of the start of the upcoming spring semester. For appeal of spring semester grades, it must be postmarked or hand-delivered within thirty (30) days of the last regularly scheduled spring semester examination. For appeal of summer grades, it must be postmarked or hand-delivered within seven (7) days of the start of the upcoming fall semester. For appeal of grades on written comprehensive graduate examinations, it must be postmarked or hand-delivered within thirty (30) days of the date that grades were issued for the examination.

If a change of grade occurs after the aforementioned deadlines, the grade appeal must be filed within thirty (30) days of the submission of the changed grade to the registrar.

If the faculty member who assigned the grade in question is no longer at Rider or is away from Rider on an extended basis and not available for consultation, the initial review shall be conducted by the appropriate department chairperson, and the schedule may be extended at the appropriate dean's discretion.

If the faculty member who assigned the grade in question is the department chairperson, the chairperson's dean or that dean's designee shall replace the chairperson in all the procedures that follow.

Failure to submit a written statement of the appeal within the time guidelines established above shall constitute grounds for denying a student access to the grade appeal process. Failure to provide a clear and precise statement shall constitute grounds for denying the appeal at any step in the process. Once a grade appeal is initiated, the basis of all subsequent proceedings must be limited to the allegations appearing in the initial written statement. This limitation does not exclude the introduction of new evidence directly related to the initial allegations.

The chairperson of the Faculty Grade Review Panel, upon written request of any party, may extend any deadline contained in this policy if he or she believes that circumstances beyond the control of a party to the appeal have prevented compliance with stated deadlines. The decision of the panel chairperson to extend or not to extend a deadline shall not be subject to appeal.

The Grade Appeal Process

Step One

In the letter of appeal, the student may request a formal meeting with the faculty member. If the faculty member agrees to such a meeting, the meeting shall be held no later than fourteen (14) days after the beginning of the fall or spring semester following the semester or session in which

the grade was given. However, the parties are encouraged to schedule such a meeting at an earlier date if mutually convenient.

The faculty member shall render a decision on the appeal within seven (7) days of such a meeting and shall notify the student and the department chairperson in writing of the decision. If the faculty member agrees to change the final course grade of the student, he or she shall submit a Change of Grade form to the Registrar.

If the faculty member believes that a meeting with the student would not be productive, he or she shall make a decision on the appeal based on the student's letter and shall communicate the decision in writing to the student and the department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given.

If the student accepts the decision of the faculty member at Step One, no further action is required. If the student does not accept the faculty member's decision at Step One, he or she may appeal the decision to Step Two in writing to the department chairperson with a copy to the faculty member's dean. This letter must be postmarked or hand-delivered within seven (7) days of the postmark date of the faculty member's Step One decision.

If the student does not receive a written response from the faculty member or department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given, the student may, within twenty-one (21) days of the beginning of that semester, proceed to Step Two as indicated below. All such written responses shall be mailed to the student's campus address, if the student resides on campus, or otherwise to the student's home address on record.

Step Two

Within fourteen (14) days of the receipt of a student's letter of appeal to Step Two, the department chairperson shall schedule a meeting with the student and the faculty member. At such meeting, the student and the faculty member will have the opportunity to explain their positions with respect to the grade in question, but they shall be limited to the allegations raised in the student's initial written statement.

The department chairperson shall render an opinion on the matter within seven (7) days of the Step Two meeting and shall provide explanatory language for this opinion in writing to the student, the faculty member and the faculty member's dean.

If the department chairperson's opinion supports the position of the faculty member, the student shall have seven (7) days from the postmark date of the letter from the department chairperson to continue his or her appeal to the Faculty Grade Review Panel as described in Step Three.

If the department chairperson's opinion supports the student's position in the appeal, the faculty member shall have seven (7) days from the postmark date of the department chairperson's letter opinion either to accept that opinion and submit a Change of Grade form to the registrar, or to reject the opinion and notify the student, department chairperson, and faculty member's dean that the faculty member is making an appeal pursuant to the Step Three process.

If the student does not receive notification of a change of grade within twenty-one (21) days of the date of the department chairperson's written decision, the student may carry the appeal to Step Three.

Step Three

To carry the appeal to Step Three, the student must submit a letter expressing that intent to the chairperson of the Faculty Grade Review Panel with copies to the faculty member, the department chairperson, the dean, and the Provost and Vice President for Academic Affairs.

Within seven (7) days (excluding vacation and examination periods) of the receipt of this letter, or the letter from the faculty member who has appealed, whichever the case may be, the chairperson of the Faculty Grade Review Panel shall schedule a meeting of the panel to consider the appeal.

The student and the faculty member shall have the right to appear before the panel to present information pertaining to the allegations made in the student's initial written statement.

The Faculty Grade Review Panel may, if it deems it desirable, request attendance by the chairperson, the dean, and/or any other representatives of the University. Attorneys or advisors to the participants may attend but not participate in the meeting of the panel.

The unwillingness of the faculty member or student to appear before the panel shall not prevent the panel from proceeding with its deliberations. In those deliberations, the panel shall have access to written documents pertaining to the appeal, pertinent records of student performance, and such verbal presentations as may be made during panel deliberations.

On the basis of careful consideration of the available information, the Faculty Grade Review Panel will determine if an arbitrary, capricious, and/or unreasonable evaluation of the student's performance has occurred. This determination will be made in writing and provided to all affected parties.

If the panel determines that no such action occurred, the case will be closed with no further right of appeal. If the panel determines that an arbitrary, capricious, and/or unreasonable evaluation has occurred, it will direct the faculty member's department (or will establish an evaluation committee of faculty members in the field of the course offered) to re-evaluate the student's performance based upon the panel's decision, the records and documentary materials.

Within fourteen (14) days of the receipt of the panel's directive, the department or evaluation committee shall recommend to the panel a grade that it deems appropriate, whether higher than, lower than, or the same as the original grade. Normally, the panel will accept the revised evaluation by the department or committee and will subsequently notify the Registrar of any change of grade. Should the panel feel that the department or committee has not conducted its review in an appropriate manner and that, as a result, the suggested substitute grade is not appropriate, it shall have the authority to direct the Registrar to enter the grade that the panel judges appropriate.

Decisions of the panel are not subject to further appeal. The panel may also return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process, or when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading. The panel shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

Expediting a Grade Appeal

When a student's graduation is affected by the outcome of a grade appeal in a semester, term, or session immediately preceding such

graduation, faculty members shall make reasonable efforts to expedite the process.

Grade Changes Made at Initiative of Faculty Member

The individual faculty member may determine that it is appropriate to change a recorded academic grade. Such changes must be made within four (4) months of the date that the original grade was assigned. Any change of grade initiated by a faculty member more than four (4) months after the date the original grade was assigned must be approved by the faculty member's dean. Faculty members, using forms supplied by the Office of the Registrar, will prepare a written change of grade stating the reasons for the grade change with a copy to the student, the department chairperson and the faculty member's dean. Upon receipt of this form by the Office of the Registrar, the grade will be changed on the official records of the University.

Graduate Assistantships

A limited number of assistantship positions and graduate scholarships are available to full-time graduate students. Further information can be found under Scholarships for Graduate Students (<http://www.rider.edu/offices-services/finaid/scholarships-grants/graduate-scholarships/>) on Rider's website.

Graduate Oral Examinations - Westminster Choir College

General information

1. All students pursuing the M.M., M.M.E., or M.V.P. degree at Westminster Choir College must pass a final oral examination.
2. The oral examination normally occurs during the last semester in which a student is enrolled prior to graduation.
3. **All courses required to remediate academic deficiencies must be completed successfully by the end of the semester prior to the oral examination.**
4. The oral examination must be completed by the deadline published in the Academic Calendar (<http://catalog.rider.edu/westminster-choir-college/calendar/>) in this catalog.
5. Students who elect to pursue multiple graduate programs must pass a separate final oral examination in each major area.
6. Students who have not passed all portions of the oral exam must be re-examined within one year from the date of the original or previous exam. Students failing to meet this deadline or those who have not passed the oral examination after three attempts are no longer considered degree candidates and become ineligible to graduate.
7. Students must apply to schedule the oral examination by November 1 for a fall examination, by April 1 for a spring examination, or by June 1 for a summer examination.

Examining Committee

1. The examining committee consists of no fewer than three Westminster **music** faculty members, full-time or adjunct, including two from the student's major program area, and one member of the student's choice from outside the major area.
2. Departments may establish their own policies for membership on the major area portion of the examining committee.

Structure and Content of Examination

1. The structure and content of the examination should support the general philosophy of graduate education, as previously endorsed by the Westminster Academic Policy Committee, which states:

"Critical thinking is to be encouraged throughout the curriculum. Students should acquire a musicological sensibility and the ability to engage in a logical discourse about varied aspects of the art. In addition to overall musical competency, true expertise is required in a particular area. At the conclusion of their studies, students should have an understanding of what remains to be learned and the tools to continue their education throughout their lives. They should be fully prepared to embark upon—or continue in—their professional lives as performers, composers, teachers, ministers of music, conductors, doctoral students, and as vigorous advocates for music."

While specific content is left to the discretion of the department, the examination should be designed to demonstrate the student's ability to engage in a logical discourse in the major area and its relationship to various aspects of the art, and should transcend the mere recitation of factual information.

2. Departments will create written guidelines to assist students in preparing for the examinations, which will be distributed to students at the onset of their graduate studies.
3. The Director of Graduate Studies will periodically attend examinations as a fourth, non-voting member to ensure a degree of interdepartmental consistency in content and the standard to which students are held. The DGS will report his/her findings to the Graduate Committee and the WAPC for future review.

Health and Safety - Westminster College of the Arts

The School of Westminster Choir College and School of Communication, Media and Performing Arts, as required by the National Association of Schools of Music, is obligated to inform students and faculty of health and safety issues, hazards, and procedures inherent in practice, performance, teaching, and listening, both in general and as applicable to their specific specializations. This includes but is not limited to information regarding hearing, vocal and musculoskeletal health, injury prevention, and the use, proper handling, and operation of potentially dangerous materials, equipment, and technology.

It is important to note that health and safety depend largely on personal decisions made by informed individuals. Rider University has health and safety responsibilities, but the fulfillment of these responsibilities cannot and will not ensure any individual's health and safety. Too many factors beyond the University's control are involved.

Each individual is personally responsible for avoiding risk and preventing injuries to themselves before, during, and after study or employment at Rider University. The policies, protocols, and operational procedures developed do not alter or cancel any individual's personal responsibility, or in any way shift personal responsibility for the results of any individual's personal decisions or actions in any instance or over time, to the University.

All members of the School of Westminster Choir College and School of Communication, Media and Performing Arts community are encouraged to visit Health and Safety Recommendations (<https://www.rider.edu/student-life/health-wellness/student-health-services/health-education->

updates/recommendations-sfps-wcc-students/) on Rider's website for a series of recommendations and resources designed to help each individual to become aware of and attend to various issues.

International Student Status

Federal regulations require that all F-1 and J-1 undergraduate and graduate international students maintain full-time status. International students may engage in one online course per mandatory term (fall and spring term) as long as they are enrolled in a full course load. Students may request part-time status under specified, limited circumstances, including during their final semester. Prior approval of the Office for International Education (<https://www.rider.edu/academics/centers-institutes/office-of-international-education/>) is required.

All international students do not need to comply with the above restrictions for summer course work.

Interruption of Studies

Lawrenceville

Students who interrupt their studies must notify the appropriate graduate program office. If studies are interrupted for up to one year, students may return with the approval of the advisor. However, if two calendar years elapse between the last date of attendance and the next registration, students must submit an application for readmission together with a nonrefundable readmission fee. Students will be responsible for the application and degree requirements in force at the time of readmission.

For students to remain in good standing with the division, they must file a notification of non-attendance form announcing their intention to not attend any semester prior to the beginning of that semester. The form may be procured from the approved graduate office.

Westminster Choir College

A student who wishes to discontinue study for any reason should withdraw officially from Rider University. Withdrawal from the university is accomplished by submission of the proper form, signed by the student, and given to the Registrar's Office. If it is not feasible to complete and submit the official form, a letter stating intention to withdraw may suffice.

Failure to observe the proper withdrawal procedure results in the recording of failing grades for all courses if a student leaves during a term. If a student leaves and returns within the same semester, consultation with course instructors may be necessary to ensure that coursework can be completed. Official withdrawal from the college is effective on the date that the Registrar's Office signs a withdrawal form or receives a letter stating the intention to discontinue enrollment. A withdrawal date must fall within a term if grades of "W" are to be recorded.

The Graduate Committee may require a student who has withdrawn from the college and who seeks readmission to present evidence demonstrating that the conditions leading to the withdrawal are no longer operative. If it is felt that it is not in the best interests of the student or the college, permission to return may be denied. An audition and/or interview may be required for readmission.

Students withdrawing for medical reasons or to fulfill a military obligation may apply to the Registrar's Office. Written documentation is required, and the maximum length for such leave is one year. If a leave of absence has been granted for medical reasons, the student may be required to submit evidence documenting full recovery. If a leave is granted, the

student may return at any time within one year, so long as a letter stating intent to return is submitted to the Registrar's Office at least one month in advance of the start of a new term.

Outside Activities – Westminster Choir College

School of Westminster Choir College students are expected to give priority to all officially scheduled classes, lessons, rehearsals, on- and off-campus performances (including tours), and other official functions involving music students. Outside activities, such as employment, church or volunteer work, or other professional engagements should not conflict with college requirements or those listed on course syllabi.

Students employed outside of the college should inform employers of their commitment to their education and their obligation to college classes and ensembles.

Thesis/Capstone - Westminster Choir College

Students in the M.M.E. (<http://catalog.rider.edu/graduate/colleges-schools/westminster-college-arts/westminster-choir-college/graduate-programs/mme-music-education/>) and M.V.P. (<http://catalog.rider.edu/graduate/colleges-schools/westminster-college-arts/westminster-choir-college/graduate-programs/mm-voice-pedagogy-classical-track/>) programs must register for one hour of thesis credit in the semester or summer term in which thesis work begins, in the semester or summer term in which work is completed, and in any other semester or summer term in which assistance is provided by the thesis advisor. A grade of "S" will be recorded on the student's transcript in any/all semesters while thesis work is ongoing but incomplete. Students in the M.A.T. (p. 1475) program must complete a capstone as part of the degree requirements.

Upon final approval of the thesis, a letter grade will be assigned by the thesis advisor for the final semester of registration. Final approval and deposit of the thesis must occur a minimum of one month prior to the end of the semester in which graduation is anticipated for Music Education students; a minimum of two weeks prior to the end of the semester in which graduation is anticipated for Voice students.

Transfer Credit While Currently Enrolled at Rider

Currently enrolled students are strongly encouraged to obtain permission to transfer a course before enrolling in a course at another institution, using the form available on the Registrar's Office website or from their academic dean's office. If prior approval is not obtained, there is no guarantee that transfer credit will be granted.

College of Education and Human Services Credit Transfer Policy

It is the policy of the Department to accept up to twelve (12) graduate transfer credits into its programs, or up to 30 graduate credits for the Clinical Mental Health Counseling (CMHC) Program, subject to Program and Department Chair approval who will make each credit-transfer decision in the light of meeting best the program needs of individual students. Credits approved for transfer will be added to students' transcripts after approval from the program director or the person designated by the program director.

For all degree and certificate students other than Ed.S. Students, transfer credits must meet the following guidelines:

1. All transfer credits must carry a graduate letter grade of at least "B," and requests for such credits must be made in writing on the appropriate form.
2. All transfer credits must be for graduate course work taken within six (6) years from the date of acceptance into the program (with the exception of the Counseling Services program, which is eight years from the date of acceptance into the program; and with the exception of some courses in the Graduate Nursing Program). Courses not meeting this criterion are subject to Program Director review and approval.
3. All transfer credits must be approved by the program director or the person designated by the program director at the time of initial enrollment in the Rider University program.
4. Official transcripts covering courses submitted for transfer must accompany the written request for such transfer, if the transcripts have not already been filed.
5. Course descriptions and/or syllabi of the courses being requested for transfer may be required.

For Ed.S. students, the program director or the person designated by the program director and the Department Chair will determine the number of credits to be transferred given the following guidelines:

1. All transfer credits must carry a letter grade of at least "B."
2. Transfer credits must be taken within six years from the date of acceptance into the program. Exceptions may also be granted by the program director or the person designated by the program director for courses where content remains consistent over time and supports current program objectives.
3. For students in the School Psychology Program, up to 36-credits may be transferred. Students in the Counseling Services Program may transfer up to 48-credits from a CACREP approved program. Students admitted from a non-CACREP approved program may transfer up to 36-credits.
4. Official transcripts must accompany the request for transfer of credit. The advisor must approve the credits to be transferred upon admission.
5. Credits approved for transfer will be added to students' transcripts at the time of admission to the program.
6. Course descriptions and/or syllabi of the courses being requested for transfer may be required.

Westminster Choir College

Approval of transfer credits is given by the appropriate academic department, following receipt of a written petition and an official transcript. Graduate students may request transfer of a maximum of six (6) credits from other graduate schools. A maximum of six (6) additional credits earned through the Westminster Continuing Education program may be applied toward graduation requirements in the M.M. and M.V.P. programs. A maximum of twelve (12) additional credits earned through the Westminster Continuing Education program may be applied toward graduation requirements in the M.M.E. program. Official transcripts must be submitted before any transfer or continuing education credits can be accepted.

Norm Brodsky College of Business

For specific information about transfer credit policies in the Norm Brodsky College of Business (p. 1375) graduate program, visit their webpage.

College of Arts and Sciences

Approval of transfer credits is given by the appropriate graduate program, following receipt of a written petition and an official transcript. Graduate students may request transfer of between six (6) and nine (9) credits depending on the program from other graduate schools.

Graduate Exams

For 14-week semester courses, when required, an exam will be held during the final week of class.

For accelerated 7-week courses, when required, the exam will be held during the last class meeting.

M.M., M.M.E. and M.V.P General Policies

General Policies and Program Requirements for the Master of Music (M.M.), Master of Music Education (M.M.E.) and Master of Voice Pedagogy (M.V.P.)

General Policies and Requirements (p. 1633)

Graduation with Distinction (p. 1635)

Graduate Assistantships (p. 1635)

Graduate Oral Exams (p. 1635)

General Policies and Requirements

- An applicant for admission as a graduate student must, at the time of initial enrollment, provide documentation of having earned a baccalaureate degree, normally but not necessarily with a major in music.
- International students also should review International Student Admission (<https://www.rider.edu/admissions/international/>) for additional information and requirements.
- All entering students in the M.M. degree take placement tests in order to determine the level of their skills in a variety of areas. Please refer to Graduate Placement Testing Information (<https://www.rider.edu/about/offices-services/first-year-programs/new-student-orientation/westminster-welcome/graduate-placement-tests/>) and Diction Hearings (<https://www.rider.edu/about/offices-services/first-year-programs/new-student-orientation/westminster-welcome/graduate-placement-tests/diction-hearings/>) on the University website for more information.
- Graduate students must earn minimum grades of "Y" or "B-" in all courses mandated to remove deficiencies in musical preparation, as determined by placement examinations at the time of initial enrollment. If a grade of "Z" or "C+" or lower is earned, the course must be repeated.
- A final course grade of "D" is not given at the graduate level in Westminster Choir College.
- All degree requirements must be completed within seven years of initial enrollment. Students who have not completed a degree within this time may be required to repeat courses and/or to meet further requirements. If more than one year has elapsed since the date of last enrollment, students may be required to re-apply and re-audition for the program and must meet all requirements in place at the time of their readmission.

- A minimum cumulative or semester grade point average of 3.00 must be maintained at all times. Students who fall below this level may become ineligible to receive graduate awards and are placed on conditional academic standing. Students in this situation place themselves at risk of academic dismissal. Grades earned in courses offered through Continuing Education are recorded but are not factored into the grade point average. A 3.0 cumulative grade point average is required for graduation, and students must be removed from Conditional Academic Standing to be eligible for graduation.
- Only courses carrying graduate credit may be counted toward master's degree requirements.
- Choral Conducting students must demonstrate, by means of examination or of transcript grades, a reading knowledge of either French or German equivalent to two years of study at the college level. Voice Pedagogy and Performance majors must present one year each of college-level study in two of the following languages: French, German, or Italian. Grades of C- or below are not accepted as a demonstration of these skills. Graduate credit is not awarded for foreign language study. A score of 3 on the AP (Advanced Placement) test or a score of at least 65 on CLEP tests is sufficient for language deficiency removal for graduate students providing that these tests were taken within the previous 5 years.
- Undergraduate foreign language study is sequential, each course being a prerequisite to the next. A minimum grade of C is required for advancement to the next level. Grades of C- or below will not be accepted. Placement tests are offered for students who have a background in French, German or Italian. Advanced standing may be approved, but credit is not awarded except by transfer of credits earned in foreign language study at the college level. Most graduate students must demonstrate proficiency in foreign languages or show transcript evidence of completion of college level study as indicated below. Native speakers may be exempted from taking a course in their native language by the Dean or by recommendation from the appropriate language instructor. This exemption does not receive credit, but fulfills graduate language requirements in that language.
- All graduate Voice and Choral Conducting students must take a proficiency examination in English, Italian, French and German Diction and the International Phonetic Alphabet. For students who do not pass all or part of the proficiency exam, the Voice Department will recommend courses or other options to prepare students to re-take the exam. Students who do not pass the proficiency exam must re-take and pass the examination as a graduation requirement.
- Graduate students in Choral Conducting must demonstrate reading proficiency in either French or German in order to pass out of LL 640 and LL 641 by taking a translation proficiency test for graduate students offered during the week of orientation; or must provide transcript evidence of successful completion (minimum grade of 'C') of two years of college study in one of those languages; or may take either LL 640 or LL 641 to satisfy this requirement.
- Graduate students in Voice Pedagogy and Performance must pass a university administered proficiency examination, both written and oral, in two foreign languages chosen from French, German or Italian; or must provide transcript evidence of successful completion of one year of college study in two of those languages; or may take FRE 100 and FRE 101, ITA 100 and ITA 101, and/ or GER 100 and GER 101, to satisfy these requirements. A grade of 'C' is the minimum accepted for all foreign language proficiency purposes. Grades of 'C-' or below will not be accepted.
- Graduate students pursuing the M.M. or M.M.E. degrees must earn credit for at least two terms of choral ensemble experience.
- All graduate students must pass a final oral examination in each major field. The oral examination may be scheduled only after completion of any and all non-credit-bearing courses being taken to remove deficiencies in musical preparation, and upon approval by the student's academic advisor. This stipulation does not apply to foreign language courses being taken to establish proficiency levels. The oral examination must be completed by the deadline published in the calendar section of this catalog. Please see Graduate Oral Examinations (<http://catalog.rider.edu/policies/graduate/oral-examinations-wcc/>) on the University website. Further information is available at Graduate Programs - Music Education. (<http://www.rider.edu/wcc/academics/graduate-programs/music-education/>)
- A maximum of six graduate credits may be earned by transfer from other institutions with departmental approval. Credit by examination is not awarded at the graduate level except in the case of applied music. In the case of course waivers, the credits involved must be replaced with other elective course credits, unless stated otherwise by the department offering the course.
- Apart from workshops taken to satisfy choral ensemble requirements, students pursuing the M.M. or M.V.P. degree may present toward "electives" a maximum of six Continuing Education credits. Students pursuing the M.M. or M.V.P. degree may present toward "electives" a maximum of two credits of choral ensemble participation beyond "core" requirements. Students pursuing the M.M.E. degree may present toward "electives" a maximum of twelve summer workshop credits. After the completion of primary applied lesson requirements, students may enroll in elective applied lessons and count those credits towards "free electives." Elective applied lessons carry a fee. In some degree programs, "electives" must be chosen from discrete lists of courses unless otherwise approved by the major field department.
- Students must register for applied study during the term when they plan to give a voice, organ, piano, or composition recital, unless this requirement is specifically waived by the applied department.
- Students in the M.M.E and M.V.P. programs must register for 1 hour of thesis credit or one hour of capstone credit in the semester or summer term in which work begins, in the semester or summer term in which work is completed, and in any other semester or summer term in which assistance is provided by the thesis or capstone advisor.
- Commencement: Academic year requirements extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Schola Cantorum, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness. All other students are encouraged to participate in Commencement. In particular, credit for spring semester choir participation is lost if a student does not attend and is not excused from Commencement. Students participating with the members of the graduating classes are required to purchase or rent appropriate academic regalia, available through the college store.
- In addition to the information given here and on the following pages, students are referred to individual department handbooks for additional information and requirements.

Graduation with Distinction

Graduate students are graduated *with distinction* upon earning a cumulative grade point average of 3.85 or better in all 500-, 600-, and 700-level courses.

Graduate Assistantships

A limited number of assistantship positions and graduate scholarships are available to full-time graduate students. Interested students should visit the graduate assistantship website (<https://www.rider.edu/careers/events-resources/graduate-assistantships/>).

Graduate Oral Exams

General information

1. All students pursuing the M.M., M.M.E. or M.V.P. degree in the School of Westminster Choir College must pass a final oral examination.
2. The oral examination normally occurs during the last semester in which a student is enrolled prior to graduation.
3. **All courses required to remediate academic deficiencies in Musicianship and Music History must be completed successfully by the end of the semester prior to the oral examination.**
4. The oral examination must be completed by the deadline published in the Academic Calendar (p. 10) in this catalog.
5. Students who elect to pursue multiple graduate programs must pass a separate final oral examination in each major area.
6. Students who have not passed all portions of the oral exam must be re-examined within one year from the date of the original or previous exam. Students failing to meet this deadline or who have not passed the oral examination after three attempts are no longer considered degree candidates and become ineligible to graduate.
7. Students must apply to schedule the oral examination by November 1 for a fall examination, by April 1 for a spring examination, or by June 1 for a summer examination.

Examining Committee

1. The examining committee consists of no fewer than three Westminster **music** faculty members, full-time or adjunct, including two from the student's major area, and one member of the student's choice from outside the major area.
2. Departments may establish their own policies for membership on the major area portion of the examining committee.

Structure and Content of Examination

1. The structure and content of the examination should support the general philosophy of graduate education, as previously endorsed by the Westminster Academic Policy Committee, which states:

Critical thinking is to be encouraged throughout the curriculum. Students should acquire a musicological sensibility and the ability to engage in a logical discourse about varied aspects of the art. In addition to overall musical competency, true expertise is required in a particular area. At the conclusion of their studies, students should have an understanding of what remains to be learned and the tools to continue their education throughout their lives. They should be fully prepared to embark upon—or continue in—their professional lives as performers, composers, teachers, ministers of music, conductors, doctoral students, and vigorous advocates for music.

While specific content is left to the discretion of the department, the examination should be designed to demonstrate the student's ability to engage in a logical discourse in the major area and its relationship to various aspects of the art, and should transcend the mere recitation of factual information.

Departments will create written guidelines to assist students in preparing for the examination, which will be distributed to students at the onset of their graduate studies.

2. The Director of Graduate Studies will periodically attend examinations as a fourth, non-voting, member to ensure a degree of interdepartmental consistency in content and the standards to which students are held. The DGS will report his/her findings to the Graduate Committee and the WAPC for future review.
