SOC 316 Feminist Social Thought 3 Credits

An introduction to feminist social theory, with emphasis on its breadth and variety. Special attention paid to the ways feminist theorists have analyzed the relationship of gender to other kinds of group differences. **Prerequisite(s):** SOC 101.

General Business for Non-business Majors

Program Overview

Available to all non-business majors, the General Business minor at Rider University provides students an understanding of the language and basic concepts of business. A minor in business administration can complement any major and may expand career opportunities. Students outside of the CBA can augment their understanding of business by joining business clubs, such as DAARSTOC (<http://www.rider.edu/academics/colleges-schools/college-business-administration/clubs-organizations/daarstoc/>), and participate in club events like the Accounting Society's guest speakers' nights.

Curriculum Overview

Students will learn foundational knowledge in business, including the fundamentals of economics and core concepts in financial accounting, management, finance and marketing. In addition, students will understand the legal environment in which business operates.

Degree Awarded:

- Minor in General Business

General Business Minor Requirements

Available to all non-business majors

(24 credits)

Code	Title	Credits
MSD 105 or MTH 210	Quantitative Methods for Business Calculus I	3
Select one of the following:		3
MSD 205	Business Statistics	
MTH 120	Introduction to Applied Statistics	
ENV 200	Statistical and Computer Applications in the Natural Sciences	
PSY 201	Statistics and Research Design	
ACC 210	Introduction to Accounting	3
ECO 201	Principles of Microeconomics	3
MGT 201	Fund Management & Org Behavior	3
MKT 200	Marketing Principles	3
BUS 300	The Legal and Ethical Environment of Business	3
FIN 220	Introduction to Finance	3
Total Credits		24

A minimum of six courses must be taken in business administration and students must achieve a minimum GPA of 2.0 in the minor.

Courses and Descriptions

ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

BUS 300 The Legal and Ethical Environment of Business 3 Credits

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

Prerequisite(s): 54 credits.

ECO 201 Principles of Microeconomics 3 Credits

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are explored in the light of price theory. The role of the United States in the world economy is explored.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits

This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.

Corequisite(s): ENV 200L.

FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

Prerequisite(s): ACC 210 and ECO 201.

MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

Prerequisite(s): minimum 30 credits completed.

MKT 200 Marketing Principles 3 Credits

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

Prerequisite(s): 15 credits.

MSD 105 Quantitative Methods for Business 3 Credits

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 205 Business Statistics 3 Credits

This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.

Prerequisite(s): MSD 105.

MTH 120 Introduction to Applied Statistics 3 Credits

Collection and presentation of data. Measures of location and variation, sampling theory, hypothesis testing, confidence intervals, t-tests, chi-square tests, regression, and correlation. Emphasizes practical applications. Not open to business administration, chemistry, environmental, geosciences, marine sciences, math or liberal studies: marine ecological or environmental emphasis majors.

Prerequisite(s): MTH 102 or MTH 105.

MTH 210 Calculus I 4 Credits

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 with a grade of C or higher.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

Geosciences

Program Overview

The Geosciences major prepares students for meaningful and productive post-baccalaureate employment and/or admission to high-quality graduate programs. The Geosciences program incorporates a broad and challenging curriculum, which emphasizes and investigates many of the important geologic sub-disciplines including rock-forming mechanisms and controls, deformational and tectonic processes, the weathering and erosion of geologic materials, the transport and deposition of derived sediments and the physical and biological history of the Earth.

Curriculum Overview

The curriculum for this major focuses on the interdisciplinary nature of the Geosciences by offering a broad and challenging selection of

courses including geosciences, chemistry, and physics. Upper level courses address the essential sub-disciplines of geosciences to prepare students for graduate study as well as employment opportunities. All Geosciences students will participate in extensive laboratory and fieldwork in their courses, allowing students to apply their conceptual and technical skills learning. In the third or fourth year of study, all students attend an approved, senior-level geology field camp where they learn additional fundamental field, technical, and mapping skills, and how to professionally apply and integrate what they learn in their individual courses to complex, real-world geologic problems. Geosciences students are encouraged to take advantage of the many opportunities to engage in independent research in collaboration with the GEMS faculty.

Honors Program in Geosciences

Graduation with honors in Geosciences is awarded in recognition of majors who have demonstrated outstanding academic ability. Enrollment in the program is by invitation from the faculty of the Department of Geological, Environmental, and Marine Sciences (GEMS). Eligibility requirements include a minimum GPA of 3.5 in courses required for the major and the satisfactory completion of a senior thesis. In addition, an honors candidate must maintain an overall minimum GPA of 3.0.

Degree Offered

Notes:

1. Majors will also take either MTH 105 or MTH 210 to fulfill their math core requirement.
2. A minor in chemistry, physics, or marine sciences is strongly recommended.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

COURSES AND DESCRIPTION

CHE 120 Principles of Chemistry 3 Credits

For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.

Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits

For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits

A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.

Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits

Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.

Corequisite(s): CHE 122.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits

This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.

Corequisite(s): ENV 200L.

ENV 200L Statistical and Computer Applications in the Natural Sciences Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): ENV 200.

ENV 205 Introduction to Geographic Information Systems 3 Credits

This course introduces the computer-based concepts and skills of Geographic Information Systems (GIS). It covers the basic GIS concepts, such as map characteristics and projections, spatial data models and analysis, and relational databases. It explores data sources, data quality, and metadata, as well as implementation and management of specific GIS projects. Hands-on experience with ArcGIS software is provided through a series of student exercises completed throughout the semester. Students will also be taught how to process both vector and raster data using ArcGIS software. The course is relevant for students from numerous disciplines in the natural sciences, social sciences, and business, which require the analysis and graphical representation of spatial data. Three hours of lecture per week. Note: This course is cross-listed as GLS 205. Students may not receive credit for both ENV 205 and GLS 205.

ENV 220 Weather and Climate Change 3 Credits

This course introduces students to the concepts of weather and climate change. These concepts frame a continuum from short-term or daily changes in the atmosphere (meteorology) to those changes averaged over much longer periods of time (climatology). Students will learn the fundamentals of weather forecasting, the causes of natural variation in the Earth's climate, and the impact of human actions on the Earth's climate. Connections will be drawn to other current issues in the Earth system, including land use change, biodiversity, and pollution. Three hours of lecture per week.

Prerequisite(s): GEO 100 or permission of instructor.

ENV 375 Environmental Biogeochemistry 3 Credits

This course examines the biogeochemical interactions among various environmental components, including water, rock, soil, organisms, and atmosphere. Covered topics focus on the relation between the biosphere and changes in the Earth's environment and atmosphere. The transfer of energy and nutrients within terrestrial ecosystems also is explored. Case studies from various examples will be used to understand ecosystem dynamics. Long-term environmental change and present-day ecosystem restoration activities are examined in the context of biotic offsets and land-use planning. The biogeochemical cycles of some environmentally sensitive compounds and elements in natural systems, such pesticides, mercury, and lead, also may be examined. Three hours of lecture per week.

Prerequisite(s): GEO 100 or GEO 113, CHE 120, CHE 121, CHE 122, CHE 123.

GEO 100 Earth Systems Science 3 Credits

Investigates the major global processes that occur on Earth. These processes can be grouped into four major systems: atmosphere, hydrosphere, lithosphere, and cosmosphere. Each system interacts with and affects the other systems creating, in a sense, a single Earth process. With this approach, the student will view the Earth as a whole, and understand that the many seemingly separate components that make up this planet are, in fact, a set of interacting processes, that operate in cycles through time, within a single global system. Three hours of lecture per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 102 Earth Materials and Processes Lab 1 Credits

This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week.

Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 168 Mesozoic Ruling Reptiles 3 Credits

This course provides an introduction to the vertebrate groups that dominated the land (Dinosaurs), the seas (Mosasaurs, Plesiosaurs, Pliosaurus, Tylosaurus, and Ichthyosaurs) and the skies (Pterosaurs, Pterodactyls) during the Mesozoic Era (65-250 million years ago). Students study the diversity of skeletal architectures and their reconstructed function and the often controversial, inferred anatomy, physiology, reproductive strategy, habit, and social behaviors of these animals that are different from mainstream reptiles, birds, and mammals. They also learn about the paleogeographical, and paleoclimatological conditions that facilitated the evolutionary rise to dominance and diversification of these vertebrate groups and the debated causes of their eventual extinction. These topics also serve to illustrate how the scientific approach works and how competing hypotheses are evaluated. Three hours of lecture per week. Weekend field trips may be required. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 304 Elements of Mineralogy 4 Credits

This course examines the physical properties, chemistry, atomic structure, crystallography, uses, and environmental impacts of important minerals found in the Earth's lithosphere and biosphere. In addition, lab assignments and exercises emphasize crystal symmetry and chemistry; polarizing microscope, ICP, SEM, and x-ray analytical techniques; the graphical display and interpretation of compositional data; optical properties of isotropic and uniaxial minerals; and the identification of mineral hand specimens. Three hours of lecture and one three-hour lab per week. At least one weekend field trip required. **Prerequisite(s):** GEO 100 or GEO 113, and GEO 102, and CHE 120, CHE 121 taken prior or concurrently; or permission of instructor.

Corequisite(s): GEO 304L.

GEO 304L Mineralogy Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 304.

GEO 305 Petrology and Petrography 4 Credits

The origin, evolution, and terrestrial distribution of igneous and metamorphic rocks are presented and detailed. Classroom lectures and discussions emphasize rock geochemistry, mineralogic variability, the constraints placed on petrogenetic models by physio-chemical studies of natural and synthetic systems, and the relation of the various rock types to current plate tectonic theory and other whole-earth processes. The laboratory emphasizes the continuing development of optical microscopy skills, the identification of rock texture and mineralogy in thin section and hand specimen, the optical determination of mineral composition, and the recognition of possible petrogenetic processes as recorded in the rocks themselves. Three hours of lecture and one three-hour lab per week. Two weekend field trips required. **Prerequisite(s):** GEO 304, and CHE 122 and CHE 123 or taken prior or concurrently; or permission of instructor.

Corequisite(s): GEO 305L.

GEO 305L Petrology and Petrography Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 305.

GEO 306 Sedimentology and Stratigraphy 4 Credits

The principles of weathering, erosion, transportation, and deposition of sediment are the focus of this course. Sediment characteristics are examined to identify the processes involved in transporting grains and the specific environment in which the grains were deposited. Students will learn how to collect, analyze, and interpret sedimentary data and how to interpret surface and subsurface stratigraphic data using various techniques, such as lithostratigraphic, biostratigraphic, and geophysical, correlations. Field trips will expose students to different sedimentary environments and provide opportunities for students to learn how to conduct fieldwork. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required. **Prerequisite(s):** GEO 100.

Corequisite(s): GEO 306L.

GEO 306L Sedimentology and Stratigraphy Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 306.

GEO 310 Structural Geology 4 Credits

The origin, distinguishing characteristics, and geographic distribution of deformational structures of the Earth's crust. In the laboratory, GPS, GIS, geologic maps, and three-dimensional problems are used in the study of typical surface and subsurface geologic problems. Three hours of lecture and one three-hour lab per week. Weekday and/or weekend field trips may be required. Prerequisite(s): GEO 100 or GEO 113, GEO 102.

Corequisite(s): GEO 310L.

GEO 310L Structural Geology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 310.

GEO 350 Soil and Surficial Processes 4 Credits

This course examines the physical, chemical, hydrological, and biological aspects of soil and their relation to geomorphologic development.

Specific topics include descriptions of soil texture and structures, soil classification, soil colloids, soil redox and pH, and their effect on vadose zone water chemistry. Soil genesis and erosion controls, microbiology/ecology, nutrient cycles, and modern soil pollution from sludge and pesticide applications, as well as domestic and industrial chemical spills, also are discussed. The lab portion of the course introduces the basic techniques of soil analysis, both physical and chemical, and field survey methods. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, and GEO 102.

Corequisite(s): GEO 350L.

GEO 350L Soil and Surficial Processes Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 350.

GEO 407 Hydrology and Water Resources 4 Credits

This course introduces the principles that govern both surface water and groundwater flows that have applications to societal water needs. Surface water topics cover the basics of the hydrologic cycle, the processes of precipitation, evapotranspiration, runoff, and infiltration, and various factors affecting water supply and water quality issues in a modern watershed. Groundwater topics examine the principles that govern flow through a porous medium and the basics of well hydraulics under different pumping conditions that community development requires. Laboratory exercises will give students hands-on experience with the delineation of watersheds, analysis of precipitation data, and flow contaminant transport modeling. The field portion of the laboratory includes runoff and stream discharge measurements, as well as hydraulic conductivity estimations from both slug and pumping tests. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, GEO 102, and MTH 105.

Corequisite(s): GEO 407L.

GEO 407L Hydrology and Water Resources Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 407.

MAR 120 Oceanography 3 Credits

In this course, students will investigate the geological, chemical, physical, and biological processes that shape the ocean. Emphasis will be placed on how these processes interact with each other and with human populations. These interactions influence important global phenomena that impact all our lives, including weather and climate, the distribution of marine organisms and other natural resources, and coastal processes. Understanding these phenomena will enable students to make more informed decisions and contribute to serious global marine issues. Students will learn through a combination of hands-on exercises designed to foster a deeper understanding of the scientific content as well as the scientific process, practical experiences with real data, readings, and some lectures. CLAS general education areas addressed: DP & GP.

MAR 121 Introductory Oceanography Lab 1 Credits

This lab course introduces students to the fundamental aspects of geological, chemical, physical and biological oceanography. Students learn through inquiry-based, hands-on exercises and activities using actual data collected in the lab and in the field. Independent projects and local field trips during lab and on weekends may be required. One three-hour lab per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): MAR 120 or GLS 120 or as prerequisite(s).

MAR 210 Marine Life through Time 4 Credits

Survey of the important developments in marine life over the last three billion years from the Pre-Cambrian evolution of one-celled organisms, through the Cambrian explosion of complex marine invertebrate life and subsequent diversification of backboned organisms in the Ordovician time, to the colonization of marginal marine and freshwater habitats in the Silurian-Devonian geological periods, and ultimately to extinctions during global crises of the late Devonian, Permian, Triassic, Cretaceous, and Pleistocene time intervals. The emphasis is on evolutionary adaptive breakthroughs within each phylum, particularly the significant morphological and anatomical innovations, and the subsequent radiation of these higher taxa into new habitats and niches through geologic time. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): GEO 100 & GEO 102; or GEO 113 & GEO 102 (can be signed in to take 102 with 113); or BIO 115; or BIO 116; or permission of instructor.

MAR 210L Marine Life through Time Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): MAR 210.

Prerequisite(s): GEO 100 & GEO 102; or GEO 113 & GEO 102 (can be signed in to take 102 with 113); or BIO 115; or BIO 116; or permission of instructor.

MAR 340 Marine Processes and Environments: Seminar 3 Credits

This course is designed as a seminar course. Therefore, students will learn to lead class discussions, to analyze and critique peer-reviewed journal articles, and to enhance their presentation skills. Students will interpret graphical, spatial, and numerical data to support their positions. Content will emphasize the interactions among marine processes, biological features, and geologic landforms.

Prerequisite(s): MAR 120 or GEO 100; GEO 306.

PHY 100 Principles of Physics I 3 Credits

Introductory noncalculus physics with applications for pre-professional, biology, and geological, environmental and marine sciences majors.

Classical mechanics, energy, mechanical waves, fluid statics and dynamics, thermodynamics. Elements of modern physics are interwoven with those of classical physics from the beginning. Not open to chemistry, physics, or mathematics majors. Three hours of lecture per week. Prerequisite(s): MTH 105, MTH 210, MTH 211 or MTH 212.

Corequisite(s): PHY 100L.

PHY 100L Principles of Physics I Lab 1 Credits

For students concurrently taking PHY 100. One three-hour lab per week.

Corequisite(s): PHY 100.

Global Studies

Program Overview

The global studies major is a rigorous program aimed at providing students a firm foundation and understanding of globalization, global community, international relations, and the politics of the global economy.

Employers in all areas – from education to business to law – seek out employees with global literacy. According to a recent survey asking what they looked for in college graduates, employers answered that they wanted candidates with the ability to understand the global context of situations and decisions; the ability to comprehend global issues; an understanding of the United States' role in the world; a knowledge of the cultural diversity in the U.S. and in other countries and the ability to analyze and solve complex problems, among other related topics.

Rider's global studies majors gain the tools and skills needed to thrive in this increasingly global society – along with a new way of viewing the world. Students also have crucial access to internships in the United States and around the world.

Curriculum Overview

The rigorous but flexible global studies program offers students the freedom to create their own course of study by combining courses from business to political science, from anthropology to economics, from communications to foreign languages – based on their professional interests and needs. Coursework offers insight into international events through open discussions with faculty and fellow students.

Students also have the opportunities to study abroad in a variety of countries while earning credits and/or to take part in international and domestic internship opportunities.

In addition, students have the chance to participate in global videoconferencing with students in the Middle East and other international areas to share knowledge of educational systems, lives, hopes and dreams, and to promote understanding across cultures.

Courses and Descriptions

GLS 113 Environmental Geology 3 Credits

Examines the premise that “our society exists by geologic consent subject to change without notice” by studying a number of important geologic processes and the hazards and/or resources they present to individuals, society, and the natural environment. Topics discussed include earthquakes, volcanism, stream flooding, coastal erosion, climate change, and water, soil, mineral, and energy resources. Cost/benefit considerations, hazard mitigation concepts, economic and political ramifications, and the interactions between the lithosphere, hydrosphere, atmosphere, and biosphere also are presented. The course is designed to give non-science majors a deeper appreciation of their connection to the surrounding geologic environment, leading to better, more informed business, political, and personal decisions. Three hours of lecture per week. Note: This course is cross-listed as GEO 113. Students may not get credit for both GLS 113 and GEO 113.

GLS 120 Oceanography 3 Credits

Investigates the interrelationships among the geological, chemical, physical, and biological aspects of oceanography. Topics include origin and evolution of ocean basins; physical characteristics of modern oceans; seawater chemistry; ocean and atmosphere interactions; ocean currents; waves and tides; coastal processes; biological productivity; and diversity, distribution and adaptations of marine organisms. Throughout the course, emphasis is placed on the processes that connect the seemingly separate topics to each other and to human life. Weekend field trips may be required. Three hours of lecture per week. Note: This course is cross-listed as MAR 120. Students may not get credit for both MAR 120 and GLS 120.

GLS 180 Understanding Global Relations 3 Credits

Offers an introduction to Global and Multinational Studies by exposing the student to basic concepts necessary to understand the dynamics underlying the emerging worldwide society of diverse nations. The student will become acquainted with the mechanisms by which contacts are built across nations, and the factors that shape the conception of and relations with “the other.”

GLS 200 The Social Construction of Global Society 3 Credits

This course discusses the emergence of an “imagined global community” in the final years of the 20th century, and the beginning of the 21st. The course will examine the forces that contribute to these changes, including the global dissemination of values, the changes in communication technologies, the globalization of the economy, and the spread of international non-governmental institutions and lobbying forces.

GLS 201 Politics of the Global Economy 3 Credits

An examination of global political-economic institutions and governmental policies in a period of global structural change and economic crisis. Emphasis will be placed upon the attempts by advanced and newly industrializing governments to attract and to regulate transnational industrial and financial enterprise.

GLS 205 Introduction to Geographic Information Systems 3 Credits

This course introduces the computer-based concepts and skills of Geographic Information Systems (GIS). It covers the basic GIS concepts, such as map characteristics and projections, spatial data models and analysis, and relational databases. It explores data sources, data quality, and metadata, as well as implementation and management of specific GIS projects. Hands-on experience with ArcGIS software is provided through a series of student exercises completed throughout the semester. Students will also be taught how to process both vector and raster data using ArcGIS 9 software. The course is relevant for students from numerous disciplines in the natural sciences, social sciences, and business, which require the analysis and graphical representation of spatial data. Three hours of lecture per week. Note: This course is cross-listed as ENV 205. Students may not credit for both GLS 205 and ENV 205.

GLS 210 Public Opinion 3 Credits

Public opinion as a social force and as expression of public sentiment on political and social issues. Topics include: development and dissemination of opinions, the measurement of public opinion, public opinion and governmental processes, and the reciprocal relationship between mass media and public opinion. Note: This course is cross-listed as POL 210. Students may not get credit for both GLS 210 and POL 210.

GLS 215 Global Politics 3 Credits

The struggle for power, wealth, and order at the global level involving nation-states, intergovernmental organizations (such as the United Nations, the European Union, etc.), non-governmental organizations, transnational enterprises and other non-state entities, using military, economic, diplomatic, legal, and communication instruments. Overview of global problems such as the proliferation of weapons of destruction, ethnic and religious conflicts, human rights, and the global environment in the 21st century. Note: This course is cross-listed as GLS 215. Students may not get credit for both POL 215 and GLS 215.

GLS 225 Nationalism in World Politics 3 Credits

Nations and nationalism. An overview of nationalistic manifestations in the world today. Nations, states, nation-states. Multinational states, stateless nations. Imperialism, anti-imperialism; nativism vs. internationalism and globalism. Topics include nationalisms in the Holy Land; in the former Yugoslavia; in the former Soviet Union and its successor states; and economic Nationalism vs. Globalization. Note: This course is cross-listed as POL 225. Students may not get credit for both GLS 225 and POL 225.

GLS 252 Intercultural Communication 1.5-3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. This course will be different from the international communication course, which focuses on communication between nations. This course will focus on the more personal aspects of communication--what happens when people from different cultures interact face-to-face. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application. Note: This course is cross-listed as COM 252. Students may not get credit for both GLS 252 and COM 252.

GLS 285 The Student Global Village 3 Credits

This course involves deliberative discussions carried out internationally among college students using videoconferencing technology. The project involves a series of 12 weekly videoconferences between students at Rider University and students at the American University of Cairo, or another international university. Students will be provided with materials to supplement their knowledge of the other country, and to allow them to discuss chosen themes in depth. The students will be required to write papers that describe their attitudes and impressions of the other country at the beginning and the end of the project, and to summarize what they have learned based upon the conferences and readings. Short papers will be required each week to prepare the students for the videoconference theme of the week.

GLS 306 American Political Film 3 Credits

This course analyzes the structure, history, and impact of the genre of political film. It begins with a discussion of how one distinguishes a political film from other forms of cinema. It then proposes insights into the manner in which these films evoke a particular time and place in politics, affect the viewer's interpretation of a political event or figure, and have an effect upon a viewer's political perceptions or behavior. The student will also learn to review films critically, both as political statements and as effective (or ineffective) conveyors of political messages. Note: This course is cross-listed as POL 306. Students may not get credit for both GLS 306 and POL 306.

GLS 307 Political Communication 3 Credits

The meaning and uses of political communication are examined, the manner and forms such communication takes, and the history of political discourse. Major topics include the role of communication in elections and the development of public policy, how political communication strategies have changed with the rise of mass media, and the development of national and international publics for discourse. Note: This course is cross-listed as POL 307. Students may not get credit for both GLS 307 and POL 307.

GLS 308 World Music 3 Credits

The student is introduced to selected world cultures by listening to and analyzing specific music that is indigenous to each culture. The position and importance of the music within each society will be the main focus of the investigation. Comparing this music to the music of our American culture will provide a basis for judging and interacting with unfamiliar world cultures. This course is cross-listed as MUS 308. Students may not get credit for both GLS 308 and MUS 308.

GLS 310 Ethnographic Film 3 Credits

Explores the manner in which different civilizations are depicted through the medium of documentary film. Discusses the manner in which film may contribute to ethnographic understanding of a given people, and the limitations of the genre that may misrepresent the subject matter. Special attention is given to the role of the filmmaker and his/her position as participant, observer, and recorder of the events shown on the film. The films will be analyzed in terms of how they reflect, and potentially affect, a civilization's international image and global standing. These factors will then be considered in terms of their effects upon the place and actions of the civilization in global politics.

GLS 315 Global Issues 3 Credits

Military, economic, demographic, and environmental threats to global security in the post-Cold War era. Forces of transnational integration vs. forces of intrastate fragmentation. Inadequacy of international law and organization to deal with these problems within the confines of the sovereign nation-state system. Note: This course is cross-listed as POL 315. Students may not get credit for both GLS 315 and POL 315.

GLS 325 Global Perspectives on Health and Illness 3 Credits

Explores the different international perspectives on health and illness. Themes include how men, women, and children in respective civilizations are treated and viewed within their communities or nations, as they become ill. Particular attention is given to the contrast between various types of traditional healing and Western medical practices, and their interactions. Discussions will also compare the usefulness of national versus international health agencies in dealing with global health problems.

GLS 340 Modern Democracy and Its Critics 3 Credits

The course examines the fundamental assumptions underlying modern democratic theories and the main theoretical attacks launched against them. Among the contending theories to be discussed are right and left-wing anarchism, the old and the new left, fascism, intellectual elitism, and techno-conservatism. Note: This course is cross-listed as POL 340. Students may not get credit for both GLS 340 and POL 340.

GLS 342 Freedom and Authority 3 Credits

Concepts of freedom and authority in 19th and 20th-century political theory. Emphasis on such important thinkers as Nietzsche, Freud, Sartre, Camus, and Marcuse. This course is cross-listed as POL 342. Students may not get credit for both GLS 342 and POL 342.

GLS 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator. Note: This course is cross-listed as COM352. Students may not get credit for both GLS 352 and COM 352.

GLS 365 Third World Politics 3 Credits

Studies the major political issues of the Third World. Particular reference to political systems of Africa, Asia, Latin America, and the Middle East according to the relevance of the examples to large conceptual issues, and according to the major interests of the instructor. Typical issues include neocolonial dependency, the role of the state in newly developed countries, military rule and democratization. Note: This course is cross-listed as POL 365. Students may not get credit for both GLS 365 and POL 365.

GLS 367 Politics of Exile, Asylum and Diaspora 3 Credits

This course analyzes mass migrations and refugee movements and what they mean for the stability of nations, the increasing potential of severe culture clashes within societies, and the root causes of (forced) migration movements, such as problems of violence, terror and genocide, as recently seen in Darfur, Rwanda and Bosnia. In certain European countries the frequently failed integration and assimilation policies resulted in an Islamic alienation; terrorist attacks and race riots are some of the consequences. Particular attention will be given to the conflict between the refugees' and migrants' needs that result from violent, socio-economic or ecological catastrophes in the countries of origin and the various forms of reception within the host countries. Students will explore theoretical, political, legal, and socio-economic dimensions of the refugee and immigration phenomena in a global world. Other themes will include international human rights and refugee laws, theories of immigration, for example, the feminization of migration, as well as problems of acculturation, assimilation and integration in different host societies. Note: This course is cross-listed as POL 367. Students may not get credit for both GLS 367 and POL 367.

GLS 368 International Organizations 3 Credits

This course introduces students to the study of international organizations. The course examines mostly formal and governmental institutions as well as informal institutions or regimes. Topics to be covered include and are not limited to: the establishment of international organizations, evolution of international organizations, structure of international organizations, decision-making of international organizations and influence of international organizations. This course employs both theoretical and practical approaches in its examination on international organizations. Note: This course is cross-listed as POL 368. Students may not get credit for both GLS 368 and POL 368.

GLS 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media. Note: This course is cross-listed as COM 393. Students may not get credit for both GLS 393 and COM 393.

HIS 343 Ottoman Empire and the Balkans 3 Credits

This course is divided into two parts. Part one examines the rise, zenith, and gradual disintegration of the Ottoman Empire, one of the greatest, most extensive, and long lasting empires in history, with special focus on the southeastern projection of Europe, known as the Balkan Peninsula. The second half of the course concentrates on Balkan history proper, from the First World War until the demise of communist regimes in the late 1980s. Lastly, we will consider contemporary developments, especially the breakup of Yugoslavia and its aftermath. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 352 History of Socialism 3 Credits

Considers the historical development of socialist ideas and their adaptations from ancient times to the present, including ancient and Judaeo-Christian antecedents, Utopian Socialism, Marxism, Anarchism, Communism, and Democratic Socialism, emphasizing the historical comparisons among these schools. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

IND 210 Global Encounters 3 Credits

This course provides students with an exposure to foreign cultures consisting of both travel and study components. Destinations may include countries in Europe, Latin America, or Asia. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political, and aesthetic cultural components appropriate to the location(s) visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. A travel fee is required. No foreign language skills are required unless otherwise indicated.

POL 295 Special Topics in Political Science 3 Credits

For non-seniors who engage in serious research in political science. Topic to be approved by instructor and department chairperson.

POL 319 Terrorism, Revolutions and Political Violence 3 Credits

Revolutions are the mad inspiration of history. Trotsky's characterization calls attention to three important dimensions of violent political participation: the historical settings, ideology, and emotional fervor of the practitioners. The course focuses on these dimensions by analyzing revolutionary and terrorist movements in the 20th century. Special attention is given to the use of violence in the post-Cold War new world disorder. Note: this course is cross-listed as HLS 319 and GLS 319. Students may only get credit for one course: HLS 319, GLS 319 or POL 319.

Graphic Design

Program Overview

Graphic design majors at Rider gain experience and develop skills in the field of visual communication. Through a blend of coursework and hands-on experience in digital studios and labs, students learn to become critical thinkers and creative designers. The program prepares them to successfully design graphics for branding, such as logos, and for professional publications such as brochures, magazines and newsletters.

Students often work one-on-one with distinguished faculty who have extensive scholarly knowledge and experience in their fields of expertise. Student media organizations, from the award-winning The Rider News (<http://www.theridernews.com/>) and the Public Relations Student Society of America (<https://www.instagram.com/prssarider/>) to The Rider University Network (<http://www.rideruniversitynetwork.com/>) and the radio station, 107.7 The Bronc (<http://www.1077thebronc.com/>), give students a chance to practice their profession right on campus.

A thriving internship and co-op program (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-science/liberal-arts-programs/communicat-20/>) routinely offers students academic credit and professional experience in a number of prestigious locations.

Curriculum Overview

Classes in the graphic design major include color design, publication design, typography, graphic imaging for multimedia, photography, history and principles of graphic design, advanced publication design, writing for communication professions, advanced graphic design and portfolio.

Recommended courses include art and society, drawing, fundamentals of painting, printmaking, web design, 3D graphic animation, and others.

Total Credits		48

Notes:

1. Students may not carry a double major within the department. Communication, Journalism and Media majors may declare only one minor in the department. No more than two courses may be used to meet the requirements for both a major and a minor in the department.
2. If a student receives a grade lower than "C" in a course required in a major or minor within the department, the student must repeat the course. Credit will only be awarded once for a course that is repeatable. The student must also repeat the course before enrolling in any course for which it is a prerequisite.

Graphic Design Minor Requirements

(18 credits)

Code	Title	Credits
COM 212	Digital Publication Design	3
COM 262	Graphic Imaging for Digital Media	3
or COM 361	Photography	
COM 263	History and Principles of Graphic Design	3
COM 360	Advanced Publication Design and Presentation	3
COM 366	Project Management in Graphic Design	3
COM 462	Advanced Graphic Design and Portfolio	3
Total Credits		18

Notes:

1. Communication and Journalism majors may declare only one minor in the department. No more than two courses may be used to meet the requirements for both a major and a minor in the department.

Exception: If a student elects the Event Planning and Production minor, then three courses may be used to meet the requirements for both the major and that minor within the department.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits

Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits

As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits

Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits

This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment – and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits

In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits

Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits

Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits

Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits

Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.

Prerequisite(s): COM 104 or COM 290.

COM 205 Theories of Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits

Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.

Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits

Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.

Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits

Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits

Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits

Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits

Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements.

Prerequisite(s): COM 104 or COM 290.

COM 232 Podcasting I 3 Credits

Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits

Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits

Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits

Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/ reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits

The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 251 Interpersonal Communication 3 Credits

Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application. Note: This course is crosslisted as GLS 252. Students may not get credit for both COM 252 and GLS 252.

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits

Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

Prerequisite(s): COM 261 or permission of instructor.

COM 263 History and Principles of Graphic Design 3 Credits

Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits

Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits

Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.

Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 292 Content for Social Media 3 Credits

Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 312 Special Topics in Journalistic Writing 3 Credits

Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.

Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits

Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.

Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits

Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.

Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GND 318. Students may not get credit for both COM 318 and GND 318.

COM 321 Stand Up Comedy 3 Credits

Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.

Prerequisite(s): COM 104: Speech Communication or COM 290: Professional and Strategic Speech.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits

Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits

Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.

Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits

This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits

Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.

Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. Prereq(s): COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits

In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.

Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits

Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): COM 232, COM 233, COM 234.

COM 337 Music Production for Mass Media 3 Credits

Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.

Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits

Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits

Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.

Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 348 Communication Research Methods 3 Credits

Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.

Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator. Note: This course is crosslisted as GLS 352. Students may not get credit for both COM 352 and GLS 352.

COM 353 Nonverbal Communication 3 Credits

Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 360 Advanced Publication Design and Presentation 3 Credits

Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.

Prerequisite(s): COM 212.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits

Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits

Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.

Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits

Offers students education in graphic animation theories, animation development techniques, and animation preparation for various multimedia applications. Emphasis is placed on the design principles in animated communication and animation techniques. The course covers the integration of static images in animation, graphic animation techniques, animation compression, animation rendering, input/output file formats, and animation delivery. The primary software for this course is Adobe Photoshop and MacMedia Flash. Students will be expected to participate in critiques of professional animation designs in order to learn to evaluate critically their own work and their fellow students' work.

Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits

Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.

Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits

Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.

Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits

Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media. Note: This course is crosslisted as GLS 393. Students may not get credit for both COM 393 and GLS 393.

COM 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits

Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.

Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits

A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.

Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits

This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits

Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits

Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.

Prerequisite(s): COM 234.

COM 440 Cases & Campaigns in Public Relations 3 Credits

Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.

Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits

Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

Prerequisite(s): COM 348, COM 350, or permission of instructor.

COM 460 Web Design III 3 Credits

Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.

Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits

Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation. Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.

Prerequisite(s): ART 103, ART 105, COM 262, and COM 360.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Health Care Policy

Program Overview

Health Care Policy is a growing field, as has been demonstrated during the Covid-19 crisis. This will undoubtedly be true long after the pandemic has passed. Health Care Policy is hotly contested in the US, resulting in millions of un- and under-insured Americans who do not receive adequate health care. The B.A. in Health Care Policy is an innovative, multidisciplinary program that examines both the science and politics of health care at the local, national and global levels. Offered through Rider's College of Liberal Arts and Sciences, it offers students broad training in the theoretical and applied nature of health policy.

Health Care Policy majors will develop an in-depth and critical understanding of the health care sector and learn the skills needed to successfully develop and implement care policy.

Health Care Policy minors will be prepared to engage in policy analysis and policy-making, implementation, and compliance.

Curriculum Overview

Faculty from multiple Rider University programs — including political science, global studies, sociology, psychology, and environmental and health sciences — collaborated to develop unique courses designed to help students study and critically evaluate the central cultural, political, legislative, environmental, economic, global, social and ethical considerations involved in health care policy.

Health Care Policy students will gain real-world experience through learning co-ops, **internships** and **independent field research**. Opportunities will be available to engage and network with policymakers and leaders in the field.

An undergraduate degree in health care policy will prepare students for continued graduate study in health care policy, administration and other related fields. It also is the foundation for a career as a health administrator, policy analyst, project or program manager, lobbyist, a not-for-profit administrator, or legislative aide and/or researcher. Upon completion of the program graduates will be prepared for a career in health care policy positions in government, or private and non-profit sectors.

Honors Program in Political Science (Health Care Policy)

Health Care Policy majors interested in participating in the Honors Program must write an Honor's thesis with a faculty member in the Political Science Department.

Degree Offered

- B.A. in Health Care Policy
- Minor in Health Care Policy

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

HCP 301 Global Health Care Systems 3 Credits

Global Health Care Systems is an introduction to visions of global health care, drawing upon the fields of medical anthropology, global public health, and public policy. The course focuses upon different understandings of health care, reflected in the actual health systems in place around the world. Because responsible health-giving health systems respond to societies' changing needs and situations, students will learn about the skills needed for this kind of problem-solving, but also come to understand that there is an urgent and vital global need for the exchange of ideas in global health care systems.

HCP 302 Environmental Epidemiology, Pandemics and Globalization 3 Credits

This course is intended to provide basic knowledge of principles and methods of environmental epidemiology for students whose career interests in a health-related field may include using epidemiologic information. The course presents a holistic view of global health by crossing several disciplines, including medical anthropology and disease history, focusing upon the social processes by which groups are stigmatized during disease outbreaks, and public health policies for confronting outbreaks of epidemics and pandemics. The course emphasizes the conceptual aspects of epidemiologic investigation and application of these concepts in global health policy and related professions. Topics include: disease surveillance; population screening; interpreting epidemiologic associations, and the health risks and benefits of globalization. Salient foci will be: the evaluation of the role of health diplomacy in addressing shared global health problems among countries, and the evaluation of cultural, ethical, social, systemic, and anthropological determinants of global health problems.

HCP 303 Global Health and Human Rights 3 Credits

This course introduces students to the basic concepts of human rights and their links to national/global health, as well as to issues where human rights and health collide. Students will become familiar with global efforts for developing practical and effective responses to global health challenges with a human rights framework.

HCP 304 Health Policy, Administration, and Compliance 3 Credits

Health Policy, Administration, and Compliance explores the politics of health care policy at the local level. The course identifies and evaluates various measures of the health and function of populations, organizations, partnerships, systems, and communities. The course provides students with an overview of the realities, challenges, and requirements of practicing community oriented primary health care.

HCP 450 Seminar in Health Care Policy 3 Credits

Rider University is uniquely positioned through Global Studies to have access to the nongovernmental organization United Front against River Blindness (UFAR). It is an African-inspired, U.S.-based nonprofit and tax exempt organization. Its primary mission has been to participate in partnerships with other global health organizations in the elimination of onchocerciasis (river blindness), as a major public health problem in the Democratic Republic of the Congo (DRC). UFAR was founded and registered in the U.S. in 2004 by Dr. Daniel Shungu, a former Merck & Co. Inc. employee, who is a Congolese by birth and a naturalized U.S. citizen. The U.S. office is in Lawrenceville, N.J. and the Congo office is in Kinshasa, DRC. Dr. Roberta Fiske-Rusciano of Rider University's Global Studies faculty is a founding UFAR board member and has hosted Dr. Shungu several times in her course Global Perspectives on Health and Illness. For the past eleven years UFAR in partnership with several organizations (World Health Organization, Sightsavers Intl., Merck, DRC coalition group for onchocerciasis, and the DRC Health Minister, have successfully treated three million (as of 2015) Congolese with Ivermectin (Mectizan), donated by Merck and Co., Inc. Taken once a year for approximately ten years prevents infection of river blindness, by interrupting the cycle of the parasite. Because of UFAR's continued success in its mission, it has been asked to expand its work to include more neglected tropical diseases, using the same method of health delivery system: community directed treatment with the appropriate medication, e.g. Ivermectin. Now that treatments of other diseases have been added to UFAR's mission (trachoma, lymphatic filariasis, schistosomiasis, guinea worm and helminthes infestations), additional medical treatments are scheduled to be added once these conditions are thoroughly mapped in the population.

HCP 491 Health Care Policy Internship 1-3 Credits

Students will complete an internship that will build on prior work in the HCP major.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

ECO 335 Economics of the Public Sector 3 Credits

Analyzes the economic roles of government: allocation; distribution; and stabilization. The course examines the tools used by governments, especially the federal government, such as taxation, expenditures, regulations and laws in order to achieve economic goals. The course will give special attention to social regulation.

Prerequisite(s): ECO 200 and ECO 201.

ENV 100 Introduction to Environmental Sciences 4 Credits

Examines how ecosystems function, with emphasis on the interactions between biological organisms and their physical environment, and the chemical processes that govern these interactions. The impact of human populations on natural ecosystems is investigated in detail using case studies from history and current events. The laboratory provides for hands-on experiences and/or short field trips to local sites for a better understanding of many of the concepts discussed. Weekday and weekend field trips may be required. Three hours of lecture and one three-hour lab per week. CLAS general education areas addressed: DP, SP, GP.

Corequisite(s): ENV 100L.

ENV 205 Introduction to Geographic Information Systems 3 Credits

This course introduces the computer-based concepts and skills of Geographic Information Systems (GIS). It covers the basic GIS concepts, such as map characteristics and projections, spatial data models and analysis, and relational databases. It explores data sources, data quality, and metadata, as well as implementation and management of specific GIS projects. Hands-on experience with ArcGIS software is provided through a series of student exercises completed throughout the semester. Students will also be taught how to process both vector and raster data using ArcGIS software. The course is relevant for students from numerous disciplines in the natural sciences, social sciences, and business, which require the analysis and graphical representation of spatial data. Three hours of lecture per week. Note: This course is cross-listed as GLS 205. Students may not receive credit for both ENV 205 and GLS 205.

ENV 220 Weather and Climate Change 3 Credits

This course introduces students to the concepts of weather and climate change. These concepts frame a continuum from short-term or daily changes in the atmosphere (meteorology) to those changes averaged over much longer periods of time (climatology). Students will learn the fundamentals of weather forecasting, the causes of natural variation in the Earth's climate, and the impact of human actions on the Earth's climate. Connections will be drawn to other current issues in the Earth system, including land use change, biodiversity, and pollution. Three hours of lecture per week.

Prerequisite(s): GEO 100 or permission of instructor.

GLS 325 Global Perspectives on Health and Illness 3 Credits

Explores the different international perspectives on health and illness. Themes include how men, women, and children in respective civilizations are treated and viewed within their communities or nations, as they become ill. Particular attention is given to the contrast between various types of traditional healing and Western medical practices, and their interactions. Discussions will also compare the usefulness of national versus international health agencies in dealing with global health problems.

HTH 205 Introduction to Health Care 3 Credits

This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits

In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.

Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 336 Economics of Health Care System 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

HSC 200 Environmental Health & Human Health 3 Credits

The health of any individual is a function of both our genetics and environmental factors. Environmental factors most broadly defined include the air we breathe, the water we drink and the food we eat. This course will focus on numerous examples of how bacteria, viruses, and exposure to environmental chemicals result in human diseases. Examples range from failures in public health infrastructure (cholera, diphtheria, river blindness, etc), failures to vaccinate (polio, measles, hepatitis, etc) and chemical exposures (birth defects, cancer, etc). There is also much known about how diet and nutrition can prevent diseases.

Prerequisite(s): BIO 10X Life Science course or any biology laboratory course (BIO 115, 116 or 117).

POL 100 Introduction to American Politics 3 Credits

An examination of basic principles of the U.S. constitutional system; the operation of the democratic process; the organization, powers and procedures of Congress, the presidency and the federal judiciary; and the functions, services, and financing of the national government. Emphasis is on public issues, national priorities, and civil liberties. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Note: This course is cross-listed as HLS 100. Students may not get credit for both POL 100 and HLS 100.

POL 201 Policy Issues, Advocacy, and Budgeting 3 Credits

Surveys various domestic economic and social policy issues, the government budgeting process, and how citizens and groups advocate their interest through organizing, coalition-building and lobbying. Emphasis on developing practical skills in issue analysis, lobbying, legislative tracking, and public budgeting.

POL 205 Introduction to Public Policy 3 Credits

The course provides students with an introduction to the study of public policy by linking the theoretical with the practical. The course focuses on three areas of analysis: 1) descriptive 2) evaluative and 3) prescriptive. Students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options. Last the course provides examples of public policy problems through the substantive policy areas of health, environment and education.

POL 206 Healthcare Regulation and Governance 3 Credits

Health Regulation and Governance explores the institutions, processes and actors involved in governing and regulating the healthcare system in the US. The course engages the topic through the lens of federalism by examining the role of the Executive, Legislative and Judicial branches of government in regulating and governing healthcare at the national level as well as the role of the states in this policy area. Students will not only be introduced to the structure of regulation and governance of healthcare in the US, but will also be able to contextualize contemporary issues in healthcare in order to not simply addresses problems in the sector, but to also begin to identify solutions to issues that impact the population.

POL 216 Comparative Political Systems 3 Credits

A general introduction to types of government and political regimes of the world as they try to cope with the dual challenge of ethnic micropolitics and transnational globalization. Major prototypes of democracy: the British parliamentary system, the American separation of powers system, and various combinations of these two. Traditional autocracy, totalitarian dictatorships, and late 20th-century authoritarian regimes. Students are expected to acquire in-depth knowledge of comparative political systems, and to develop a basic understanding and appreciation of the major concepts and themes in comparative political systems studies.

POL 230 Methods of Political Analysis 3 Credits

An overview of the various qualitative and quantitative methods that political scientists use to study their discipline. Themes include analyses of political participation and support, methods of studying elections, measures of political tolerance and liberalism.

POL 270 Interest Groups and Lobbying 3 Credits

The course will introduce students to the area of interest groups and lobbying. Topics to be covered include theoretical developments, methodological approaches of group formation, organizational maintenance, and strategies used to influence public policy in the executive, legislative, and judicial branches of government.

POL 325 Public Administration 3 Credits

Public administration in modern society, emphasizing the administrative formulation of public policy and its implementation. Attention on who gets what, when, and how from the decisions of administrative units; the role administrators have in policy-making compared to elected legislators, chief executives and judges; the effect administrators have on the benefits citizens receive from government; and the effect administrators have on citizens' behavior. Note: This course is cross-listed as HLS 325. Students may not get credit for both HLS 325 and POL 325.

POL 328 Environmental Politics 3 Credits

Environmental Politics examines how policymakers deal with the political challenges of unsustainable resource consumption, which is a primary determinant of environmental problems such as climate change, adverse health effects, and biodiversity loss. The course introduces students to environmental politics and policies at the local, state, national, and international levels. The course is designed to provide students with a framework for understanding how varied interests compete within political institutions in order to transform contending ideas into public policy. With that in mind, students will not only become more informed consumers of political information, but will also become more effective at analyzing and advocating for policies as it relates to the environment.

POL 329 Comparative Environmental Policy 3 Credits

Comparative Environmental Policy analyzes cross-national approaches in developing, implementing, and evaluating policy responses to environmental problems. The course analyzes the political factors, actors, and tools that help and explain why some societies have been more likely to develop effective responses to environmental threats. Note: This course is cross-listed as GLS 329. Students may not get credit for both GLS 329 and POL 329.

POL 312 Congressional Politics 3 Credits

An intensive analysis of the legislative process in the United States, considering both the internal organization and operation of Congress, and Congress' role in the broader American political system. Fundamental issues include the theory and practice of representation; the committee system, seniority and expertise; executive and legislative interaction; and the politics of congressional reform.

POL 327 Contemporary Issues in American Public Policy 3 Credits

An in-depth examination of current issues in American politics. Drunk driving, political corruption, drug policy, education, and poverty are among the issues to be considered. Emphasis on analyzing policy problems and on developing and evaluating proposed solutions.

POL 361 Courts, Judges and Politics 3 Credits

In-depth examination of the nature of judicial decision-making and the impact that judicial decisions have on society. Considers the sources of judicial authority, judicial fact-finding, statutory and constitutional interpretation, individual and collective processes of judicial decision-making, relations between judges and other government officials, and the political consequences of judicial decisions with particular emphasis on federal courts and judges. Note: This course is cross-listed as HLS 361. Students may not get credit for both POL 361 and HLS 361.

PHL 304 Medical Ethics 3 Credits

Introduces the student to ethical problems associated with the practice of medicine, the pursuit of biomedical research, and health care social policy. The course will explore such issues as: Is a physician morally obligated to tell a terminally ill patient that he or she is dying? Is society ever justified in enacting laws that would commit an individual, against his or her will, to a mental institution? Does society have a moral obligation to ensure that all its members have access to health care? To what extent, if at all, is it ethically acceptable to clone a human being? Under what conditions is human experimentation ethically acceptable?

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

SOC 225 Population Study 3 Credits

Demography; its definition, historical emergence, and growth; population as a social problem in developing and developed nations; population theories, sources and methods of demographic data, population composition, and distribution; demographic processes including fertility, mortality, and migration.

Prerequisite(s): SOC 101.

SOC 346 Health Care and Society 3 Credits

Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.

Prerequisite(s): SOC 101.

SUS 100 Introduction to Sustainability Studies 4 Credits

Sustainability is an idea that will shape the lives of all in the 21st century. Students will explore how we arrived at our current precarious environmental situation and investigate cutting-edge methods that support human development and protect the natural ecosystems on which we will depend. By exploring principles of sustainability (whole-systems approaches, resource limitations, stewardship) through many different lenses, students will appreciate the interdisciplinarity of the sustainability enterprise. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): SUS 100L.

Health Communication

Program Overview

There is an increasing need for greater awareness and knowledge of health communication. Health care reform, end-of-life care, and pharmaceutical marketing are just a few of the issues facing the nation that are dependent upon the ability to engage in productive, meaningful health communication. Effective health communication can directly impact local communities and personal lives. The individuals who participate in health care delivery, such as nurses, patient advocates, family members, health administrators, and physicians, are increasingly being asked to communicate and collaborate more efficiently with colleagues, exchange information with patients, and address multiple audiences about health care.

A minor in health communication allows students to analyze different health contexts and accommodate increasingly diverse populations. Students can also learn about a symbiotic patient-provider relationship and the impact of technology in health care.

The health communication minor includes a curriculum of theory, research and application, focusing on health issues in the interpersonal, organizational, public, and mass-mediated contexts. The study of health communication can contribute to health promotion in areas such as patient-family communication, public health messages and campaigns, health in mass media, public health, and technology and health. This minor is designed to be a program for students from a wide variety of majors who may seek careers within health fields.

Degree Offered

BIO 491	Internship in Biology	
Total Credits		25

Courses and Descriptions

BIO 206 The Pharmaceutical Industry 3 Credits

An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.

Prerequisite(s): BIO 100 or BIO 101 or BIO 106 or BIO 108 or BNS 107 or CHE 115.

BIO 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BIO 491 Internship in Biology 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and should include keeping a journal of activities, a term paper or project report and a poster presentation. 2.5 GPA required.

Prerequisite(s): Permission of the instructor.

COM 251 Interpersonal Communication 3 Credits

Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 312 Special Topics in Journalistic Writing 3 Credits

Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.

Prerequisite(s): COM 102 or COM 107.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

GLS 325 Global Perspectives on Health and Illness 3 Credits

Explores the different international perspectives on health and illness. Themes include how men, women, and children in respective civilizations are treated and viewed within their communities or nations, as they become ill. Particular attention is given to the contrast between various types of traditional healing and Western medical practices, and their interactions. Discussions will also compare the usefulness of national versus international health agencies in dealing with global health problems.

HTH 205 Introduction to Health Care 3 Credits

This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits

In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.

Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 315 Health Care Law, Ethics and Policy 3 Credits

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

HTH 336 Economics of Health Care System 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

MKT 380 Health Care Marketing 3 Credits

The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.

Prerequisite(s): MKT 200; junior & senior standing.

Health Sciences

Program Overview

The Health Sciences major educates the next generation of health professionals by providing students with a foundation in the life sciences and other coursework, preparing them to join the workforce or to attend professional or graduate schools in health-related fields. Rider achieves this through small class sizes, inquiry-based laboratory experiences, and faculty dedicated to the teacher-scholar model of science education.

The program is designed to provide a strong foundation in its curriculum while allowing flexibility for subsequent studies in allied health programs such as physical therapy, athletic training, occupational therapy, nursing, radiological science, optometry, podiatry, epidemiology and public health.

It prepares students for graduate studies leading to advanced degrees in the life sciences; and for entry-level positions in hospitals, health insurance, pharmaceutical sales, community health agencies and other related areas.

Curriculum Overview

The curriculum for Health Sciences majors is structured to prepare students for a life of learning in the sciences. Students are expected to master content, develop technical skills, analytical skills and competency in oral and written communication. Foundational courses in biology, chemistry, mathematics and psychology prepare students for the rigor of upper-level science and math courses, complemented by a broad base of health-related coursework in other disciplines. Capstone experiences allow students to explore one area of the life sciences in depth through internships and seminars, in addition to opportunities to engage in independent research with Rider's science faculty. Students also have the opportunity to take part in a three-week internship course through the Capital Health System Hospitals.

Student Learning Outcomes

Graduates of the Health Sciences major will be able to:

1. Explain foundational concepts in biological sciences.
2. Apply scientific methods of inquiry through testing of newly formed hypotheses with observation and experimentation.
3. Apply concepts from other disciplines in the analysis and interpretation of biological information.
4. Demonstrate the ability to locate, critically analyze, and communicate relevant scientific information.
5. Explain the ethical practice of scientific research and its societal applications.

Honors Programs

Honors in Health Sciences

The objective of the honors program in health sciences is to introduce talented undergraduate majors to the methods of basic research in

the biological sciences. For consideration a student must have a 3.25 average at the end of their junior year. In the senior year, participating students must complete an independent research project and present a written honors thesis. At graduation a student who has a 3.25 cumulative average, a 3.5 average in health sciences coursework, and who has completed an acceptable honors thesis will be awarded Honors in Health Sciences.

Beta Beta Beta Biological Honor Society

"Tri-Beta" is a national honor society affiliated with the American Association for Advancement of Science and the American Institute of Biological Sciences. Invitations for membership are extended to majors in the life sciences who have demonstrated superior academic achievement. Students are usually invited to join in their sophomore year when they have accumulated 12 credits in the sciences. Active membership is available to those with an overall grade point average of at least 2.8, and at least 3.0 in their science courses. The benefits of membership include academic recognition; a subscription to the journal *Bios*, to which members may submit research articles; opportunities to present papers at conventions; and research awards. Biology and behavioral neuroscience majors should make membership in *Tri-Beta* one of their goals.

- ¹ Students must earn a grade of "C" or better in these courses in order to meet the major requirement and before enrolling in upper-level courses for which these courses are prerequisites.
- ² Students must place into MTH 105 or higher level mathematics in order to register for BIO 115 and BIO 116.

Department of Biology, Behavioral Neuroscience, and Health Sciences Course Repeat Policy

The following guidelines apply to courses offered by the Department of Biology, Behavioral Neuroscience, and Health Sciences. Students may not repeat any biology (BIO), behavioral neuroscience (BNS) or health sciences (HSC) course without special permission. A course will be considered repeated if the student has previously earned a letter grade in the course, or if the student has previously withdrawn from the course during Withdrawal II or Withdrawal III. If a student wishes to retake a biology, behavioral neuroscience or health science course, written permission must be obtained from the departmental chair before the registrar will allow the student to enroll in that course.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different

plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

² Scientific Perspectives general education requirements are included in major.

³ Elective credits may be used to complete requirements in a second major or minor.

HSC 100 Intro to Human Nutrition 3 Credits

This course is designed to offer the student understanding of fundamental human nutrition concepts including, but not limited to, digestion, absorption, metabolism, functions and sources of macronutrients and micronutrients. The theme of the course will align with human health and disease states and the important conceptions about the food industry and its relation to healthy dietetic choices.

HSC 102 Medical Terminology 1 Credits

Medical terminology is the study of the principles of medical word building to help the student develop extensive medical vocabulary used in health care occupations. Students will gain an understanding of basic elements, rules of building and analyzing medical words, and medical terms associated with the body as a whole.

Prerequisite(s): Permission of instructor.

HSC 105 Introduction to Health Professions 1 Credits

Course Description: This course will provide a basic overview of the health science professions including but not limited to: athletic training, clinical exercise physiology & cardiac rehabilitation, chiropractic, physician assistant, occupational therapy, nursing, community health education specialist, and physical therapy. The course will also cover the professional activities (i.e. professional organizations, certifications, professional issues, and professional liabilities) that are related to these professional applications.

HSC 150 Introduction to Public Health 3 Credits

Public Health is the science of protecting, promoting, and improving the health of people and the communities where they live, learn, work, and play. Students will gain an understanding of the history and functions of public health, strategies and methods used in public health research, and the determinants of health.

HSC 200 Environmental Health & Human Health 3 Credits

The health of any individual is a function of both our genetics and environmental factors. Environmental factors most broadly defined include the air we breathe, the water we drink and the food we eat. This course will focus on numerous examples of how bacteria, viruses, and exposure to environmental chemicals result in human diseases. Examples range from failures in public health infrastructure (cholera, diphtheria, river blindness, etc), failures to vaccinate (polio, measles, hepatitis, etc) and chemical exposures (birth defects, cancer, etc). There is also much known about how diet and nutrition can prevent diseases. **Prerequisite(s):** BIO 10X Life Science course or any biology laboratory course (BIO 115, 116 or 117).

HSC 201 Nutrition for Exercise and Physical Activity 3 Credits

An introductory exploration of evidence based nutritional theory and applications in sport and exercise.

HSC 250 Introduction to Epidemiology 3 Credits

Epidemiology is the study of distribution and determinants of defects, disease, and injury in human populations and the application of that study to assess the magnitude of health problems and the result of interventions designed to control them. This course is designed to introduce students to the basic principles, methods, and uses of epidemiology to better understand and characterize health and disease at a population level. The role of epidemiological evidence in planning and evaluation will be also be explored.

Prerequisite(s): MTH 102 or higher OR MSD 105 or higher OR POI.

HSC 302 Kinesiology 3 Credits

The purpose of this course is to explore human movement during performance of activities. This course will explore the relationship between anatomical structures and function in the production of movement. The application and relationships between the fundamental principles of mechanics and musculoskeletal system function will be addressed within the framework of clinical and research perspectives. Both qualitative and quantitative approaches will be applied towards a better understanding of human movement, the analysis of physical activity. **Prerequisite(s):** BIO 221 & MTH 105 (or equivalent) or POI.

Corequisite: HSC 302L.

HSC 302L Kinesiology Lab 1 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): HSC 302.

HSC 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in health science-related research. The student learns to organize material, use relevant medical/scientific literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

HSC 491 Internship in Health Sciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty member and should include keeping a journal of activities, a term paper or project report and an oral or poster presentation.

Prerequisite(s): 2.5 GPA required.

History

Program Overview

History allows us to understand ourselves and others and our shared world by exploring and analyzing the entire range of human experience. The study of history encompasses both the study of the record of the past and the discipline of investigating and interpreting the past. It develops critical habits of mind, provides training in the analysis and synthesis of evidence, and hones skills in effective communication both orally and in writing. The history major is an excellent preparation for careers in law, government, journalism, business, and the non-profit sector, as well as in public history and education at all levels. For more on jobs for history majors, consult the American Historical Association at: <https://www.historians.org/jobs-and-professional-development/career-resources/careers-for-history-majors> (<https://www.historians.org/jobs-and-professional-development/career-resources/careers-for-history-majors/>)

Curriculum Overview

Rider University history students complete an innovative program that exposes them to the history of major world cultures as well as the United States. Students take seminars in their first semester, in their fourth or fifth semester, and in their senior year. Each seminar is capped at 16 students in order to foster deep personal engagement of students and faculty and to allow for individual development of analytical, research, and writing skills. For the senior capstone, students produce a substantial work of original research in the senior seminar or in an Independent Study with a faculty mentor. Students also select from a range of topical courses drawing on faculty expertise in the history of Africa and the African diaspora, Latin America and the Caribbean, East Asia, South Asia and the Middle East, classical, medieval, early modern and modern Europe, as well as colonial America and the history of the United States in all periods. In addition, the department offers clusters of courses on women's history and the history of gender and sexuality, and on environmental history. Students can also explore history outside of the classroom through our internship program, which allows them to earn course credit while working in archives, museums, and historic sites.

History Major Requirements

(36-39 credits)

Code	Title	Credits
CLAS General Education Curriculum		
See CLAS General Education Curriculum Page (p. 577)		
Category I: History Seminars		
Select 6-9 credits from the following:		
HIS 160	Seminar in History ¹	
HIS 260	Craft of History (may be repeated for Category III credit with different topics)	
HIS 460	Research Seminar	
Category II: U.S. and European Surveys		
Select at least one course in U.S. history and one course in European history. Education students are strongly encouraged to take both U.S. surveys as well as one European survey.		
Note: Students who select only 2 courses (6 credits) in Category II must take 8 courses (24 credits) in Category III.		
HIS 180	U.S. History I	
or HIS 181	U.S. History II	
HIS 190	Europe to 1715	
or HIS 191	Europe Since 1715	
Category III: History Electives		
Students who select two courses (6 credits) in Category II must select eight courses (24 credits) in Category III. Students who select three courses (9 credits) in Category II must select seven courses (21 credits) in Category III.		
At least two Category III courses (6 credits) must be at the 200 level and two courses (6 credits) at the 300 level. At least two courses for Category III must be selected from the following Diversity courses:		
HIS 200	Native American History	
HIS 201	African American History	
HIS 230	History on Screen	
HIS 249	Women in Europe from Antiquity to the French Revolution	
HIS 273	Imperial Russia	
HIS 274	Modern Russia	
HIS 280	Vietnam in Peace and War	
HIS 281	Modern Middle East	
HIS 282	Colonial Latin America	
HIS 283	Modern Latin America	
HIS 284	Caribbean History	
HIS 286	Modern East Asia	
HIS 288	African History	
HIS 289	History of Modern Japan	
HIS 309	Women in American History	
HIS 319	Gender and Sexuality in American History	
HIS 341	China in Revolution	
HIS 342	Women in East Asia	
HIS 343	Ottoman Empire and the Balkans	
Total Credits		36-39

Total Credits:

36-39

¹ Students who declare the history major after the freshman year should consult their advisor on the suitability of this course for their program.

History Minor Requirements

(21 credits)

Code	Title	Credits
Select seven courses from the list below, including three at the introductory level (150-199) and four at the intermediate to advanced level (200-491).		
HIS 150	World History to 1500	
HIS 151	World History Since 1500	
HIS 160	Seminar in History	
HIS 180	U.S. History I	
HIS 181	U.S. History II	
HIS 190	Europe to 1715	
HIS 191	Europe Since 1715	
HIS 200	Native American History	
HIS 201	African American History	
HIS 224	American Environmental History	
HIS 225	A History of American Business	
HIS 226	History of New Jersey	
HIS 227	U.S. Cultural History I	
HIS 230	History on Screen

HIS 490	Independent Study: Research and Creative Expression	
HIS 491	Internship in History	
Total Credits		21

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

³ Please note that elective credits may be used to complete requirements in a second major or minor.

Courses and Descriptions

HIS 150 World History to 1500 3 Credits

This course traces both regional histories and global interactions, and covers the development of societies and states in Africa, the Americas, Asia and Europe from prehistoric times until about 1500. Certain major topics will be pursued, including agriculture, great empires, the major world religions, long-distance trade, and early modern exploration. While learning about these topics, students will also gain an understanding of the practice of history, especially of the kinds of sources historians use and how they reconstruct and interpret the past.

HIS 151 World History Since 1500 3 Credits

Learn what college students should know about history as a discipline and why history matters by tracing the development and interactions of the cultures of Europe, Africa, Asia and the Americas from 1500 to the present. Students will gain an appreciation for the value of historical thinking and a greater understanding of the relationships among modern nations so necessary for global citizenship.

Prerequisite(s): HIS 150.

HIS 160 Seminar in History 3 Credits

This course introduces students to the discipline of history and to the skills needed for its pursuit. Students will learn to analyze and evaluate primary sources and to identify the thesis and argument of secondary sources, as well as to locate sources using library databases. They will complete a short research paper in which they put these skills into practice. The seminar is intended for History majors and minors and Social Studies majors in their freshman year. Transfer students with fewer than 45 credits should consult their advisor on the suitability of the course for their program. Enrollment limited to 16.

HIS 180 U.S. History I 3 Credits

A survey of American history from the early 17th century through 1877. Among the topics covered will be settlement and regional differences, the American Revolution and the formation of a national government by 1787. The beginning stages of industrialization, the rise of democratic and reform politics, westward expansion, the debate over slavery and growing sectional tensions through the Civil War and Reconstruction will be major themes in the 19th century. Included will be discussions of African Americans, Native Americans, and women.

HIS 181 U.S. History II 3 Credits

A survey of United States history from the end of the Civil War through the present. Included will be discussions of the maturing of an industrial economy, and expansion in the west and overseas. The role of the United States as a world power and the growth of presidential power will be shaped and sometimes challenged by movements designed to expand democratic institutions and human rights. Included will be discussions of African Americans, Native Americans, and women.

HIS 190 Europe to 1715 3 Credits

Examines the development of European civilization from late Roman times until 1715, stressing the Classical heritage, the main currents of European thought and letters, the Renaissance and Reformation, the Age of Discoveries, and the development of the Old Regime.

HIS 191 Europe Since 1715 3 Credits

Examines major political, economic, social, and cultural developments in Europe and the West from 1715 to the present.

HIS 200 Native American History 3 Credits

Traces the experiences of North American Indians from early colonial times to the present day, demonstrating how Indian life has varied and changed throughout our nation's history. Topics include strategies of resistance and accommodation to colonial powers, 19th-century impacts of U.S. government removal and cultural assimilation policies, and 20th-century cultural and political developments among the nation's surviving tribes. Rather than "vanishing," American Indians are a vital and expanding force in modern America.

HIS 201 African American History 3 Credits

Examines the actions and thought of peoples of African ancestry in the United States. Briefly considers Africa before the Atlantic slave trade, then concentrates on major themes in African-American history—the slave trade, slavery, and the genesis of African American society, emancipation and its consequences, urbanization and industrialization, Black Nationalism, the Civil Rights Movement, and African Americans today. Emphasizes African Americans' dynamic and creative role both in shaping their society and establishing their place in United States society. The on-going struggle for freedom and equality provides thematic continuity for analyzing nearly 400 years of African-American history.

HIS 220 America's Culture Wars 3 Credits

For much of the recent past Americans have lived in a state of "culture war." This course will examine the history of modern culture and the conflict that sprang up around it, focusing on the rise of cities, race and racism, shifting sex and gender norms, religion, pleasure, education, immigration, and politics. Students will assess cultural and political developments over the course of the twentieth century with an eye toward understanding the twenty-first.

HIS 224 American Environmental History 3 Credits

Surveys the history of the North American environment from pre-Columbian times through the 20th century. Topics include Native American uses of the environment; the reshaping of ecosystems under European colonization; U.S. frontier expansion; the ecological impact of industrialization and urbanization; and the rise of the environmental movement.

HIS 225 A History of American Business 3 Credits

Examines the history of business in the United States from the Colonial Era to the present. Emphasizes such themes as the changing capitalist system, the function of business institutions, the roles of the entrepreneur, the relationship between government and business, and the emergence of the corporation.

HIS 226 History of New Jersey 3 Credits

Explores the history of New Jersey from the colonial period to the present including the role of New Jersey in the American Revolution, the establishment of the Constitution, and the course of industrialization. Examines the impact of national and international developments on New Jersey and emphasizes the distinctive characteristics of the Garden State.

HIS 227 U.S. Cultural History I 3 Credits

Examines cultural developments in the United States through the Civil War. Topics include popular culture, the history of the body, reading and print culture, public celebrations and holidays, religion, race and ethnicity, and material culture. Some of the larger trends explored include the creation of American nationalism, the development of a consumer society, and the rise and decline of 19th-century family life and culture.

HIS 230 History on Screen 3 Credits

This course explores the ways in which feature films and documentaries construct the historical past and shape, reflect, or revise popular understandings and national or cultural myths about the past. We will consider films as products of particular moments in history (potential primary sources), as well as arguments about the moments they portray (potential secondary sources). We will explore how audiences take an active role in shaping the meaning of a film, and thus how that meaning may shift as audiences change over time. We will trace how and why filmed representations of our understanding and interpretation of the past have changed over time. The topics of the films analyzed in this course may vary.

HIS 240 History of Ancient Greece 3 Credits

Surveys the intellectual and cultural life of ancient Greek civilization against the background of its political, economic, and social history.

HIS 241 History of Ancient Rome 3 Credits

Studies the history and culture of Rome, emphasizing such topics as Roman law, government, literature, religion, art, and philosophy.

HIS 243 Italy Middle Ages to Present 3 Credits

Traces the history of Italy from the Middle Ages to the present, stressing the connection between culture, religion, politics, and wealth in successive historical periods. Students participating in the two-week travel component at the end of the course may receive four credits.

HIS 245 Britain to 1688 3 Credits

British history from pre-Roman times to the Glorious Revolution is examined, emphasizing the growth of royal government, parliament, and the origins of the British colonial empire.

HIS 246 Modern Britain 3 Credits

Examines British history from the Glorious Revolution to the present, stressing the reform movements of the 18th and 19th centuries, the Pax Britannica, the Industrial Revolution, imperialism, and the impact of the two world wars.

HIS 248 History of Ireland 3 Credits

Beginning with an overview of the Irish past, focuses upon the past century of the island's history—the problems, challenges, and accommodations that led to the present situation as one of the most protracted unresolved partitions in the modern nation-state system.

HIS 249 Women in Europe from Antiquity to the French Revolution 3 Credits

Traces the history of women in Europe from Rome to the French Revolution, covering the religious, social, political, and economic context in which women participated. Also offers a brief overview of theories and issues in women's history and gender history.

HIS 255 History Abroad 3 Credits

Two-week travel course to a destination chosen by the professor. Exposes students to historic and cultural sites and works of art that have been studied in class. Students must attend orientation sessions, read assigned writings, complete a travel journal, write a final paper on a topic relevant to the course, and attend all scheduled course activities abroad. Travel will take place in January or at the end of the spring semester.

HIS 260 Craft of History 3 Credits

This seminar focuses on historiography and research skills to further students' progress toward the major capstone experience of conducting independent historical research. Students will explore how historians approach, interpret, and write about a particular topic selected by the instructor, and discover how and why interpretations and methods have changed over time. Topics will vary by instructor. Course may be taken a second time on a different topic for 200-level credit. The course is required for History majors who are Sophomores or Juniors. Enrollment limited to 16.

HIS 273 Imperial Russia 3 Credits

Discusses the political, economic, social and cultural developments in Russia and its borderlands during the Imperial period, that is to say the 18th and 19th centuries from Peter the Great to the Revolutions of 1917. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 274 Modern Russia 3 Credits

Covers the background to the Russian revolutions of 1917, the revolutions themselves, and the evolution and dissolution of the Soviet regime. Cultural, social and economic aspects of this period receive as much attention as political aspects. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 280 Vietnam in Peace and War 3 Credits

Examines the history of modern Vietnam, with a focus on the struggle for independence from the late 18th century to the present. Discusses the traditional culture, French colonialism and the development of Vietnamese nationalism, the Japanese occupation in WWII, and the struggle against France and the U.S. in the First and Second Indochinese Wars, as well as the postwar period. Explores the American experience in Vietnam and the impact of the war in the United States.

HIS 281 Modern Middle East 3 Credits

Examines political, economic, social, and cultural developments in the Near East, from the rise of the Ottoman Empire to the present, stressing the impact of contacts with the West in the 19th and 20th centuries, and the emergence of the contemporary Arab World, Israel, Turkey, and Iran.

HIS 282 Colonial Latin America 3 Credits

Examines the pre-Columbian and colonial periods of Latin-American history. Discusses the Indian, African, and European peoples and pays particular attention to the colonial Spanish and Portuguese societies from their establishment up to the revolutions that brought about political independence.

HIS 283 Modern Latin America 3 Credits

Considers the post-independence history of Latin America, emphasizing the rise of export economies and external economic domination, modernization, and pan-Americanism. Examines the changes undergone by Latin-American nations in the 20th century through an analysis of Mexico, Argentina, Chile, Brazil, Peru, Cuba, and Central America.

HIS 284 Caribbean History 3 Credits

Analyzes the history of the West Indian islands and the lands bordering the Caribbean Sea from pre-Columbian times to the present.

HIS 286 Modern East Asia 3 Credits

Examines the disintegration of the Ch'ing dynasty in China and the Tokugawa Shogunate in Japan under internal stresses and foreign incursions, and the varied experience of those states in coming to terms with the challenges of modernization and westernization. Covers political, economic, social, and cultural factors in China, Japan, and East Asia.

HIS 288 African History 3 Credits

Traces the history of Africa, analyzing the unique problems of African historical evidence and the complexity of the continent's past. Examines the genesis of African culture, early African societies, and the character of African civilizations and empires, then considers external influences such as religion (especially Islam and Christianity), contacts with Europe, the slave trade, the colonial scramble for Africa, colonial rule, modernization and dependency, and concludes by assessing the rise of independent Africa after World War II, its present status and future prospects.

HIS 289 History of Modern Japan 3 Credits

Examines the history of modern Japan from the age of the samurai in the Tokugawa Shogunate to today's high-tech mass consumer society. It traces the interaction of elements of Japan's traditional culture with impacts from the outside to create a uniquely-Japanese modernity. It stresses social, economic, and cultural trends, as well as political history, and includes an examination of modern Japanese culture through fiction and film.

HIS 298 Special Topics in History 3 Credits

Exploration of special topics, themes or methodologies in history. This course may be repeated for credit on different topics.

Prerequisite(s): permission of instructor.

HIS 300 Economic History of the U.S. 3 Credits

Studies the main currents in the economic growth of America from colonial times to the present. Stresses the process of economic development from an agrarian to an industrial society, and examines the challenges and dislocations resulting from economic change.

HIS 301 Constitutional History of U.S. 3 Credits

Surveys the English, Colonial, and Confederation backgrounds of American law and constitutionalism; the framing, adoption, and implementation of the Federal Constitution and its later development; the role of law in the nation's history; the changing interpretations of federalism; the growth of judicial review; and the increasing role of the Supreme Court.

HIS 302 American Worker: Social History 3 Credits

Investigates the American workers' varied social, cultural, religious, and ethnic environment from post-Civil War to the present. Emphasizes worker response to industrialization, urbanization, the technical revolution, and automation.

HIS 303 American Urban History 3 Credits

Traces the growth of urbanism in America from colonial times to the present. Focuses on the interaction between the city dweller and the urban environment and explores the problems confronting urban America today.

HIS 304 Civil War and Reconstruction 3 Credits

Considers the Civil War as a watershed in the development of the American republic. Analyzes antebellum sectional conflict, the war years, and the era of Reconstruction.

HIS 306 U.S. Cultural History II 3 Credits

Examines cultural developments in the United States from the late 19th century to the present. Topics include popular culture, intellectual history, gender history, literary history, film, institutions like museums and department stores, subcultures and counter-cultures, popular commemorations like World's Fairs, and political culture. Some of the larger trends explored include the development of the modern culture of consumption, the urban landscape, and the polarization of cultural values.

HIS 307 The Immigrant in American Life 3 Credits

Examines the experiences of immigrants in the United States, their assimilation, the reactions to them, and their contributions.

HIS 309 Women in American History 3 Credits

Examines the roles, status, and influence of women from the colonial era to the present. Studies the origins and development of feminism, including legal, political, educational, economic, and sexual rights; and studies social feminism, including reform movements in such fields as abolition, prohibition, pacifism, child labor, and social welfare.

HIS 318 The American Revolution 3 Credits

Examines the growing rift between the American colonies and the British Empire, the War for Independence, and the creation of a new American republic. Explores the political, economic, social and cultural history of the Revolutionary era, and includes the experiences of various groups such as Native Americans, slaves, and women.

HIS 319 Gender and Sexuality in American History 3 Credits

What makes a man, exactly, and what makes a woman? What kinds of sex are normal, and what kinds are abnormal? Who decides, and why? The answers to these questions are not fixed. Throughout American history, popular understandings of gender and sexual norms evolved in close relationship with the political, economic, racial, and social dictates of the time. This course will trace the evolution of ideas on sex and gender from the 18th century to the present using various historical sources including fiction and film, particular attention will be given to analyzing dominant models of proper behavior and the complex relationships of power enmeshed within them.

HIS 320 The History of Christianity 3 Credits

Examines Christianity's role in world history from the life and times of Jesus to the present. Emphasizes the quest for the historical Jesus, the emergence of Christianity after his death and triumph during the later Roman Empire, and Christian relations with pagans, Jews, heretics, witches and Muslims. Traces the various branches of Christianity, its spread throughout the world, church-state relations and responses to secularism, capitalism and communism.

HIS 325 Church & Society in Med Europe 3 Credits

Studies the role of the church in the shaping of early medieval society. Emphasizes the emergence of Christianity as a world force, its challenge from Islam, and the church's impact on the politics, thought, and economy of early medieval Europe.

HIS 326 Renaissance and Reformation 3 Credits

Studies the Renaissance, including the development of humanism and art as well as the political and economic changes of the period. Discusses the Renaissance church and movements for religious reform, leading to a consideration of the origins, development, and consequences of the Reformation. Examines the influence of the Renaissance and Reformation on the development of capitalism and the dynamic, secular nation-state.

HIS 333 20th-Century Europe 3 Credits

This course covers the history of twentieth-century Europe, a time when major wars brought Europe from the heights of prosperity and power to the brink of ruin. Europe's experience in war, social upheaval, and ideological conflict shaped the twentieth century not just in Europe but globally. We begin with a look at the condition of Europe at the turn of the century and assess why the European states plunged into what was a disastrous series of conflicts. We will consider the First World War and its impact, including the Russian Revolution and the peace settlement, and then focus on attempts to find stability and the emergence of radically new political movements that challenged the postwar order. Next we will examine the ways in which Europe embarked on the path of near self-destruction during World War Two. A discussion of the origins and consequences of the Cold War and the fate of the socialist and capitalist systems follows. Throughout the course we will touch upon European art and culture. We will conclude with a look at the events of 1989 and attempt to understand the meaning of the twentieth century. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 334 The Era of World War II 3 Credits

Investigates selected topics relating to the origins, events, and outcome of World War II, emphasizing the war's impact on 20th-century civilization. Traces the roots of the conflict back to the World War I peace settlements, and examines the rise of totalitarianism, pre-war aggression and appeasement, the immediate causes of the war's outbreak, the course of military actions, the diplomacy of the belligerents, the War's impact on civilian life, and factors that shaped the post-war world. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 335 Nazi Germany & Hitler's Europe 3 Credits

Examines the Nazi dictatorship in all its complex dimensions, from the early life of Adolf Hitler to total war and genocide. Students will explore how the Nazi movement arose in the context of modern German and European history, and how the Nazis were able to win the support of significant segments of the German population. We will study the Nazis' massive project of social and biological engineering – pronationalism, forced sterilization, extermination of "social and biological deviants," and, ultimately, the genocide of the Jews. Through memoirs, state documents, and historical accounts, the class will examine life from the vantage point of perpetrators, accommodators, victims, and resisters. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 336 Modern European Intellectual History 3 Credits

Examines the 17th-century revolution in scientific, philosophical, and political thought; the Enlightenment; Romanticism; the ideologies of Conservatism, Liberalism, and Socialism; Positivism; Darwinism; the crisis of European thought (1880-1914); and the major intellectual trends of the 20th century.

HIS 337 Post-1945 United States History 3 Credits

This course will magnify American society, politics, culture, and foreign policy from 1945 to the present, tracing the rise and fall of the "American Century". We will focus on topics such as the Red Scare, suburbanization, mass culture, the power of the presidency, the Civil Rights movement, Vietnam, disco, and the war on terror, offering students a unique opportunity to delve deeply into our recent past.

HIS 341 China in Revolution 3 Credits

Treats the Chinese Revolution in terms of political, economic, and social transformation.

HIS 342 Women in East Asia 3 Credits

Treats the history of the relationship between women and society in traditional East Asia and the modern transformation of their relationship.

HIS 343 Ottoman Empire and the Balkans 3 Credits

This course is divided into two parts. Part one examines the rise, zenith, and gradual disintegration of the Ottoman Empire, one of the greatest, most extensive, and long lasting empires in history, with special focus on the southeastern projection of Europe, known as the Balkan Peninsula. The second half of the course concentrates on Balkan history proper, from the First World War until the demise of communist regimes in the late 1980s. Lastly, we will consider contemporary developments, especially the breakup of Yugoslavia and its aftermath. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 351 Warfare in History 3 Credits

Studies the evolution of international and intergroup conflict through the ages; principles, theories, and kinds of war; the great military practitioners and thinkers of world history. Briefly touches upon the American experience as a recent segment in world military and cultural history.

HIS 352 History of Socialism 3 Credits

Considers the historical development of socialist ideas and their adaptations from ancient times to the present, including ancient and Judaeo-Christian antecedents, Utopian Socialism, Marxism, Anarchism, Communism, and Democratic Socialism, emphasizing the historical comparisons among these schools. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 353 Oral History 3 Credits

A study of the theory and practice of oral history. Involves an examination of the methodology and functions of oral history, the nature and character of oral evidence, and the place of oral testimony within the historical discipline.

HIS 398 Special Topics in History 3 Credits

Advanced exploration of special topics, themes or methodologies in history. This course may be repeated for credit on different topics.

Prerequisite(s): Permission of Instructor.

HIS 460 Research Seminar 3 Credits

Students produce a major research paper in this topical capstone seminar. Topics and themes vary by instructor. The seminar has a maximum enrollment of 16 students, so professors and students have an opportunity to work together closely over the course of a semester.

Prerequisite(s): HIS 260, and permission of instructor.

HIS 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Proposals must be approved by the Dean's Office no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours.

Prerequisite: Permission of instructor. When taken to substitute for HIS 460, HIS 260 and permission of instructor.

HIS 491 Internship in History 1-4 Credits

Internships to be offered each semester with such institutions as the New Jersey State Archives and the David Library of the American Revolution. Four credits may be taken for Category III History credit. Additional credits may be taken for Liberal Arts elective credit.

Prerequisite: Permission of internship coordinator.

Homeland Security Policy

Program Overview

Events of the past 30 years – including the first World Trade Center bombing in 1993, the terrorist attacks of September 11, 2001, and the Boston Marathon bombing in 2013 – have heightened America's awareness of terrorism and made homeland security a national focus. It is a subject, though, that has long been of concern to other countries around the world.

Open to all majors, this minor offers students the opportunity to add a focus in homeland security to their professional or academic plans. Homeland security is a rapidly growing field with a high demand for skilled professionals in both government and private industry.

This minor also is a valuable option for students whose careers would benefit from an understanding of such issues as risk assessment, world politics and civil liberties.

The M.A. in Homeland Security provides students with a multidisciplinary program that goes beyond conventional studies of the subject. The degree is designed to give students broad training in the theoretical and applied nature of security studies and then to offer students the ability to specialize in Global or Domestic Security. The M.A. explores the causes and consequences of political violence and how the U.S.'s internal and global environment impact issues of security within the nation and globally. Students would also learn about the institutions, actors and processes that support the security community. It explores the tools and actions the US and other governments can utilize in maintaining security and the consequences of doing so. Finally, the graduate program in Homeland Security Policy provides students with the foundation for pursuing careers in the security sector.

HLS 420	Enterprise Security
HCP 302	Environmental Epidemiology, Pandemics and Globalization
POL 330	Geopolitics of Energy

Total Credits 24

¹ Depending upon eligibility and availability

Courses and Descriptions

HLS 100 Intro to American Politics 3 Credits

An examination of basic principles of the U.S. constitutional system; the operation of the democratic process; the organization, powers and procedures of Congress, the presidency and the federal judiciary; and the functions, services, and financing of the national government. Emphasis is on public issues, national priorities, and civil liberties. Note: This course is cross-listed as POL 100. Students may not get credit for both HLS 100 and POL 100.

HLS 202 The Political System - Theories/Theme 3 Credits

This course serves as a gateway to the subfields of comparative politics and international relations. The concept of the political system helps political scientists to organize political interrelations into patterns that allow systematic selection and interpretation of information and the study of processes and outcomes of politics in a variety of settings. The course introduces students to the main brands of normative theory prescribing the principles directing the operation of the political system, to some of the most important methods used to compare political systems and/or their components, and to the foremost approaches utilized in the study of the relations between political systems and their environments. Note: This course is cross-listed as POL 202. Students may not get credit for both HLS 202 and POL 202.

HLS 203 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective. Note: This course is cross-listed as POL 203. Students may not get credit for both HLS 203 and POL 203.

HLS 204 Development and Structure of the US Intelligence Community 3 Credits

This course provides a historical review of intelligence following World War II. It will examine the major functions of intelligence, as well as intelligence as a part of the foreign policy process: collection, analysis, counterintelligence, and covert action. Students will be introduced to a range of collection procedures: human, open source, electronic, photographic, and signal, with emphasis placed on interpreting and writing intelligence summaries. Note: This course is cross-listed as POL 204. Students may not get credit for both POL 204 and HLS 204.

HLS 205 Spies, Double Agents, and Moles: The World of Counterintelligence 3 Credits

This course provides in-depth exposure to historical, open-source investigations and concepts that illustrate the defensive, offensive, investigative, and collection efforts of counterintelligence (CI) activities. This course looks through the ideological and political prisms of how and why the Western and Eastern blocs fought the Cold War with agents, double agents, sleepers, and moles, and how MICE (money, ideology, compromise, and ego) and RASCALS (reciprocation, authority, scarcity, commitment, liking, and social proof) caused thousands to betray their countries and become the 'enemy within'. Counterintelligence (CI) is a critical element of US national security policy and interests both in the United States and abroad, and the course will focus on activities that comprise counterintelligence functional activities, including the detection of espionage and elicitation; counterintelligence interviews/debriefings; and the collection of counterintelligence information.

Prerequisite(s): POL 100 or POL 102.

HLS 220 Terrorism & Counter Terrorism 3 Credits

This course introduces students to the arguments about the definition of terrorism, the historical use of terrorism and the roles of ideology, religion, and psychological factors that help explain and predict it. The course seeks to identify the components of national security policy aimed at countering such elements and their cost, both in financial and civil right terms. Finally, to illuminate both the definition and the policies discussed, the course will offer brief comparisons with other states, especially Israel, the UK, and Russia.

HLS 270 Networking/Telecommunications 3 Credits

This course provides an introduction to business data communications and networking. The Internet and OSI models are discussed. Network technologies include local area networks, backbone, wide area networks, and the Internet. Introduction to network design, security, and network management are also provided.

Prerequisite(s): CIS 185.

HLS 300 U.S. Constitutional Law 3 Credits

The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as POL 300. Students may not get credit for both HLS 300 and POL 300.

HLS 301 Civil Liberties in the US 3 Credits

The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as POL 301. Students may not get credit for both HLS 301 and POL 301.

HLS 304 Political Behavior: Fear, Risk and Crisis 3 Credits

The course focuses on various analytical approaches in behavioral political science. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior-e.g., voting/non-voting, the formation of political partisanship and ideology, issue perceptions, responding to risk and uncertainty in the political environment, and engaging in civic political participation. Note: This course is cross-listed as POL 304. Students may not get credit for both HLS 304 and POL 304.

HLS 311 Sovereignty, the State and Borders 3 Credits

Borders have a prominent place in politics and human history. In the twentieth century, the best known barriers were the militarized Maginot Line and the Iron Curtain. Today, the political popularity of borders persists but the nature and quality of these borders and the threats they are created to repel have changed. Modern borders are designed not to keep militaries out, but to deter a perceived invasion of "undesirables"—with terrorists and unwanted immigrants leading the list of state concerns. Nowhere is this more evident than along the geographic fault lines dividing rich and poor regions, e.g. the Mediterranean Sea and the U.S.-Mexican border region. This course will examine the dynamic interactions between the question of how to govern ones borders and the twenty-first century liberal state with its diluted sovereignty — due to immigration, trade and international laws and regimes. In the first post-Cold War decades it was intellectually fashionable to dismiss borders as increasingly irrelevant to the human experience in the age of globalization. Scholars saw the significance of national borders for the Western world as having been vastly reduced by the three forces of military change, economic development and modern communication technologies (Horsman and Marshall 1994). Some free market liberals have even popularized the notion of an emergent "borderless world" (Ohmae 1990). These cheerful views stressing the benign, pacifying effects of economic integration and interdependence that must lead to a rollback of the state and the erosion of borders, came crashing down on September 11, 2001. After two decades of debordering, the new rules of the game focus on rebordering, and the importance of state with its reassertion of border controls and an ideological redefinition of border functions (Andreas and Snyder 2000). To be sure, borders, with all their practical and formal features, are increasingly just one element in a larger emergent operational sp.

HLS 314 Congressional Power and National Security Policy 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. Particular attention is paid to the role of the US government being able to balance individual rights and liberties within the national security state. Last, the course also takes an in-depth analysis of the U.S. Congress, looking comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror? Note: This course is cross-listed as POL 314. Students may not get credit for both HLS 314 and POL 314.

HLS 316 Presidential Power and National Security Policy 3 Credits

This course examines the development of the National Security State since the Second World War, and the ways in which it has affected, and been affected by, the Federal Executive. Topics to be covered will include the post-World War II redefinition of "national security", the Cold War (with a special focus upon war powers during Korea and Vietnam) and the changes that have occurred with the "War on Terror." Note: This course is cross-listed as POL 316. Students may not get credit for both POL 316 and HLS 316.

HLS 319 Terrorism, Revolutions and Political Violence 3 Credits

Revolutions are the mad inspiration of history. Trotsky's characterization calls attention to three important dimensions of violent political participation: the historical settings, ideology, and emotional fervor of the practitioners. The course focuses on these dimensions by analyzing revolutionary and terrorist movements in the 20th century. Special attention is given to the use of violence in the post-Cold War new world disorder. Note: this course is cross-listed as POL 319 and GLS 319. Students may only get credit for one course: HLS 319, GLS 319 or POL 319.

HLS 325 Public Administration 3 Credits

Public administration in modern society, emphasizing the administrative formulation of public policy and its implementation. Attention on who gets what, when, and how from the decisions of administrative units; the role administrators have in policy-making compared to elected legislators, chief executives and judges; the effect administrators have on the benefits citizens receive from government; and the effect administrators have on citizens' behavior. Note: This course is cross-listed as POL 325. Students may not get credit for both HLS 325 and POL 325.

HLS 334 Cyber Strategy 3 Credits

The course examines issues and challenges related to national security concerns and cybersecurity. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation's cyber infrastructure. The emphasis of this course is on "hands-on" experience whereby students will "learn by doing" analysis.

Prerequisite(s): Completion or transfer of HLS 203 or HLS 204 or POL 100 or POL 102 or permission of instructor.

HLS 341 Cybersecurity Policy: Hacktivism and Cyberviolence 3 Credits

Hactivism is a process designed to be "the creative use of computer technology for the purposes of facilitating online protests, performing civil disobedience in cyberspace.

Prerequisite(s): Completion or transfer of HLS 203 or HLS 204 or POL 100 or POL 102 or permission of instructor.

HLS 346 The Politics and Ethics of Emergencies 3 Credits

This course explores historic and present day cases, ranging across Europe and the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, take on emergency powers to become so-called "states of exception." While in some cases such states have imposed mild and limited emergency measures, others have employed more draconian measures, suspending, if not dissolving, constitutionally guaranteed civil liberties, often for indeterminate and protracted periods. How various states have behaved in emergency situations will be the major content of this course. Note: This course is cross-listed as POL 346. Students may not get credit for both HLS 346 and POL 346.

HLS 350 U.S. Foreign Policy and Security Policy 3 Credits

Principles, institutions, and processes involved in the formulation and implementation of policies regarding the nation's military, economic, and environmental security within the global framework. Strands, trends, and problem areas in U.S. foreign policy, with focus on the changing global environment of the post-Cold War world. Note: This course is cross-listed as POL 350, GLS 350. Students may get credit only once.

HLS 351 Critical Views of Global Security 3 Credits

This course will examine the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspective on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security. Note: This course is cross-listed as HLS 351. Students may not get credit for both HLS 351 and POL 351.

HLS 353 Cyber War 3 Credits

Cyber-attacks are a growing concern for the international community. When does a cyber-attack constitute an act of war, or is it merely an inconvenience? Is cyber power military power? How prevalent are such attacks, and to what extent can cyber-attacks lead to conventional conflicts? Will cyber-attacks by non-state actors render more power to such players in destabilizing states? This course explores the different types of issues experienced in cyber wars, including mechanisms through which targeting of communication technology could escalate tensions and lead to an armed conflict, and ways through which states and international organizations could limit the destructive potential of cyber technology.

HLS 361 Courts, Judges and Politics 3 Credits

In-depth examination of the nature of judicial decision-making and the impact that judicial decisions have on society. Considers the sources of judicial authority, judicial fact-finding, statutory and constitutional interpretation, individual and collective processes of judicial decision-making, relations between judges and other government officials, and the political consequences of judicial decisions with particular emphasis on federal courts and judges. Note: This course is cross-listed as POL 361. Students may not get credit for both POL 361 and HLS 361.

HLS 363 Human Rights in Global Context 3 Credits

Examines human rights – droits de l'homme, derechos humanos, Menschenrechte, “the rights of man” – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breath and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as POL 363. Students may not get credit for both HLS 363 and POL 363.

HLS 420 Enterprise Security 3 Credits

Students will be provided with complete coverage of computer security in all forms including hardware, network, and software program security. Through hands-on labs, students will learn firsthand how enterprise systems can be comprised and how computer professionals can prevent and provide counterattacks for security intrusions.

Prerequisite(s): CIS 310 or permission of instructor.

HLS 491 Internship in NJ Homeland Security 1-4 Credits

Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of field work per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.

Prerequisite(s): permission of instructor.

Integrated Sciences and Math

Program Overview

The Integrated Sciences and Math major (ISM) is designed primarily as a second major for students in the College of Education and Human Services (p. 185) interested in teaching science or math at the middle school level. The program is tailored to meet the New Jersey certification requirements for middle school science or math teachers and to facilitate the timely completion of the dual graduation requirements for education majors in the College of Education and Human Services and the College of Liberal Arts and Sciences. This major is not designed to prepare students for further study in science or math disciplines at the graduate or professional level, or to teach science or math at the high school level. Students who may wish to teach science or math at the high school level should discuss the additional certification requirements needed with their College of Education and Human Services academic advisor.

Curriculum Overview

The Integrated Sciences and Math major is truly interdisciplinary in nature, both in its curriculum and in the faculty who teach it, including teacher education, biology, chemistry, physics, earth sciences and mathematics faculty.

Students may choose from four different program concentrations depending on their particular interest: Life Sciences, Physical Sciences, Earth Sciences, or Mathematics. Coursework will vary depending on which concentration the student decides to take.

Students should plan their courses through consultations with both their ISM and Education academic advisors.

Honors Program in Integrated Sciences and Math

Graduation with honors in Integrated Sciences and Math is awarded in recognition of majors who have demonstrated outstanding academic ability. Enrollment in the program is by invitation of the faculty of the Department of Geological, Environmental, and Marine Sciences (GEMS). Eligibility requirements include a minimum GPA of 3.50 in courses required for the major and the satisfactory completion of a three- or four-credit Independent Research and Study. In addition, an honors candidate must maintain an overall minimum GPA of 3.00.

Integrated Sciences and Math Major Requirements

(47 - 51 credits)

Code	Title	Credits
CLAS General Education Curriculum		
See CLAS General Education Curriculum Page (p. 577)		
Required ISM Courses		
ISM 100	Introduction to the Integrated Sciences and Math	4
ISM 410	Seminar in the Integrated Sciences and Math	3
Inquiry-based Science Courses		
Select two courses from two different categories below but not from your area of declared concentration (see Areas of Concentration below):		
Life Sciences		
BIO 110	Life Science: Inquiry Approach	
Earth Sciences		
GEO 100 & GEO 102	Earth Systems Science and Earth Materials and Processes Lab	

MAR 120 & MAR 121	Oceanography and Introductory Oceanography Lab
-------------------	--

Physical Sciences

CHE 118	Exploration of Chemical Principles
PHY 105	Matter, Forces, and Energy: A Exploration of Physics Concepts
or PHY 100 & 100L	Principles of Physics I and Principles of Physics I Lab

Mathematics Requirement for All ISM Majors:

MTH 105	Algebra and Trigonometry	4
MTH 210	Calculus I	4
BNS 250 or ENV 200	Biostatistics Statistical and Computer Applications in the Natural Sciences	4

Select one of the following: 3-4

MTH 102	Finite Mathematics
MTH 151	Mathematics for Education Majors II
MTH 152	Mathematics for Education Majors III
CSC 140	Discrete Structures
CSC 110	Computer Science I

OR

Select any other math class above MTH 210 (except students planning to take PHY 200 for the physical science concentration must take MTH 211 Calculus II)

Areas of Concentration

Students must select one area of concentration: Earth Sciences, Life Sciences, Physical Sciences or Mathematics.

A. Earth Sciences (18-20 credits)

Required:

GEO 100 & GEO 102	Earth Systems Science and Earth Materials and Processes Lab
MAR 120 & MAR 121	Oceanography and Introductory Oceanography Lab
PHY 180	Astronomy
ENV 220	Weather and Climate Change

Electives: Select 4-6 credits at the 200 level or above from GEO/ENV/MAR courses

B. Life Sciences (20 credits)

Required:

BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab

Electives: select 12 credits of 200 level or higher lab courses; one must be at the 300 level or higher

C. Physical Sciences (20 credits)

Required:

CHE 120 & CHE 121	Principles of Chemistry and Principles of Chemistry Lab
CHE 122 & CHE 123	Intro to Chemical Systems and Quantitative Methods Lab
PHY 200	General Physics I

Students taking PHY 200 for the physical science concentration must take MTH 211 Calculus II for math elective; see Math Courses above

AND

One of the following pairs:

CHE 211 & 211L	Organic Chemistry I and Organic Chemistry I Lab
or BCH 225 & 225L	Introduction to Organic and Biochemistry and Introduction to Organic & Biochemistry Lab

AND

PHY 105	Matter, Forces, and Energy: A Exploration of Physics Concepts
---------	---

OR

CHE 118 & PHY 201	Exploration of Chemical Principles and General Physics II
-------------------	---

D. Mathematics (18-20 credits; six courses total)

Important note: Courses taken as part of the Mathematics Requirement for all ISM majors above may not be used to fulfill this requirement.

Required:

MTH 211	Calculus II
MTH 240	Linear Algebra
MTH 315	Modern Geometry

An additional 9-10 credits in upper level MTH courses are required to complete the Mathematics Concentration.

Total Credits	47-51
---------------	-------

Concentration Requirements

Select one of the following concentrations:

- Life Sciences
- Earth Sciences
- Physical Sciences
- Mathematics

Life Sciences Concentration Requirements

(20 credits)

Code	Title	Credits
BIO 115 & 115L	Principles of Biology I and Principles of Biology I Lab	4
BIO 116 & 116L	Principles of Biology II and Principles of Biology II Lab	4
Twelve credits of 200 or higher level lab courses; one must be 300 or greater level		12
Total Credits		20

Earth Sciences Concentration Requirements

(18-20 credits)

Code	Title	Credits
GEO 100	Earth Systems Science	3
GEO 102	Earth Materials and Processes Lab	1
MAR 120	Oceanography	3
MAR 121	Introductory Oceanography Lab	1

Three or more upper level Math classes		9
Total Credits		20

¹ MTH 211 and MTH 212 may be used to satisfy the concentration requirement only if not used to satisfy the Mathematics requirements above.

Academic Plans of Study

The following educational plans are provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider will follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

- Earth Science Concentration (p. 456)
- Life Science Concentration (p. 455)
- Mathematics Concentration (p. 455)
- Physical Science Concentration (p. 454)

Physical Science Concentration

Note: Science and Mathematics core requirements are included in the Major.

Courses and Descriptions

ISM 100 Introduction to the Integrated Sciences and Math 4 Credits

Traditional lectures and laboratory experiences are blended to encourage students to begin asking questions and designing experiments to learn about the physical, life, and Earth sciences. This is the entry-level course for the integrated sciences and math major, though it is open to all students who want to actively explore the nature of science. Two three-hour combined lab/lecture sessions per week.

ISM 410 Seminar in the Integrated Sciences and Math 3 Credits

As a senior seminar course, class discussion, presentation, and participation will be emphasized. Science topics covered will extend beyond the range of a single science discipline. Students will evaluate articles (from popular science magazines, newspapers, etc.) to discern the connections among various scientific disciplines. Students will present written critiques of the articles focusing on the proper use of the scientific method, data analysis techniques (e.g., statistics, mathematics, etc.), and on the plausibility of the interpretations. Students will also present a semester-long project (both written and oral) that focuses on the connections among disciplines of a scientific issue.

Prerequisite(s): ISM 100, senior standing, or permission of instructor.

BIO 110 Life Science: Inquiry Approach 4 Credits

An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 110.

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits

An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 116.

BIO 215 Medical Microbiology 4 Credits

Biology of prokaryotes of medical interest with emphasis placed on diversity and host-pathogen interaction. Current research literature will be covered and presented by students. Methods of microbial identification are introduced in the laboratory and applied in the identification of mock clinical isolates. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course,

Corequisite(s): BIO 215L.

BIO 215L Microbiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 215.

BIO 260 Principles of Biology: Evolution, Diversity, and Biology of Cells 4 Credits

Lectures and labs focus on basic cell biology. Cell diversity and function, genetics and biotechnology are emphasized. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115/115L and BIO 116/116L or BIO 115, BIO 117, (BNS 118 or BNS 275).

Corequisite(s): BIO 260L.

BIO 260L Principle of Biology: Cells Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 260.

BIO 265 Genetics 4 Credits

A comprehensive course focusing on molecular, Mendelian, and population genetics. Topics covered will include molecular advances in the study of genetics, including genomics and bioinformatics; evolution and the effects of genetic mutations; the application of population genetics to forensic science; genetic problem solving, including genetic crosses and statistical analysis; and regulation of gene expression. The laboratory for this course will introduce students to commonly used genetic model organisms and basic molecular biology techniques. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 265L.

BIO 265L Genetics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 265.

BIO 272 Intro to Marine Biology 4 Credits

Introduces students to the study of marine environments, emphasizing the diversity, ecology, and physiology of marine animals, algae, and plants. Aspects of the human impact on marine environments are also discussed. Prerequisite(s): BIO 115 or BIO 116 or BNS 118 and grade of "C" or better.

Corequisite(s): BIO 272L.

BIO 272L Marine Biology Laboratory 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 272.

BIO 305 Vertebrate Physiology 4 Credits

Study of the principles and mechanisms of mammalian physiology. Topics include the nervous system, muscle physiology, cardiovascular physiology, respiration, gastrointestinal activity, renal function, and endocrine physiology. Lectures and laboratory exercises emphasize homeostatic mechanisms and organ-system interactions. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 305L.

BIO 305L Vertebrate Physiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 305.

BIO 321 Microbiology 4 Credits

An introduction to the discipline of microbiology, with an emphasis on the biology of prokaryotes found in all the natural realms of our environment, including the oceans, soil, atmosphere, and extreme habitats. Emphasis will be placed on microbial diversity, fundamental microbial processes, and the continual interaction between microbes and the natural environment. Classical and modern methods of identification are introduced in the laboratory. Three hours of lecture and one three-hour lab per week. Some field trips are required. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 321L.

BIO 321L Microbiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 321.

BIO 340 Evolutionary Biology 4 Credits

Where did we come from? This course will explore the generation of biological diversity on earth. Course topics will include: the history of evolutionary thought; the different lines of evidence and fields of inquiry that bear on our understanding of evolution; selection vs. random changes in populations over time; speciation; extinction; the molecular basis of evolution; and evolutionary developmental biology. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116, BIO260 with a grade of C or better in each course Co-requisite(s): BIO 340L.

BIO 340L Evolutionary Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): BIO 340.

BIO 350 General Ecology 4 Credits

An investigation of the processes that regulate the distribution of plants and animals throughout the biosphere. Relationships among species and their interactions with the environment are stressed. Quantitative analyses of experimental results and current research in basic and applied ecology are discussed. Laboratory activities explore conceptual models using both field activities and computer simulations. Three hours of lecture and one three-hour lab per week. One Saturday field trip (laboratory time will be adjusted accordingly). Prerequisite(s): BIO 115, BIO 116, with a grade of "C" or better in each course.

Corequisite(s): BIO 350L.

BIO 350L General Ecology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 350.

BIO 370 Immunology 4 Credits

An introduction to the cells and molecules of the immune system with emphasis on recent advances. Topics include AIDS, autoimmunity, transplantation, and cancer. Readings from current journals will be discussed and presented by students. The laboratory will introduce current research techniques and then apply these to a research problem with critical analyses of the data generated. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 370L.

BIO 370L Immunology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 370.

BIO 372 Behavior of Marine Organisms: Evolutionary Approach 4 Credits

An examination of the underlying mechanisms and evolutionary causes of behavior, including habitat use, feeding, and mate choice, particularly in marine organisms. The laboratory will involve collecting, analyzing and interpreting field data and performing experiments in the lab using a variety of marine organisms including fish and crabs. Three hours of lecture and one three-hour lab per week. Some full-day field trips (usually on a weekend) are required. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 372L.

BIO 372L Behavior of Marine Organisms: Evolutionary Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 372.

BNS 310 Neurobiology 4 Credits

A lecture-laboratory course investigating the structure and function of the nervous system. Lecture topics include organization of the nervous system, neuroanatomy, neurophysiology, neurochemistry, physiology of sensory systems, biological aspects of nervous system diseases, and behavior. Laboratory exercises include study of anatomy of the nervous system, nerve cell recording, modern neuroanatomical techniques, and the neural basis of animal behavior. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course. Corequisite(s): BNS 310L.

BNS 310L Neurobiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 310.

BNS 375 Neuroethology: Circuits of Behavior 4 Credits

Neuroethology is the study of the neural and physiological basis of animal behavior. This course focuses on the specific behavioral problems faced by animals in their natural habitats, and the ways in which their nervous systems solve these problems. The mechanisms that underlie complex behaviors such as spatial orientation and navigation, escape mechanisms, and animal communication will be examined, as well as the extraordinary sensory adaptation of organisms to their environments (e.g., echolocation, electroreception, and magnetic reception). The neural control of motor programs and temporally-patterned behaviors will be studied in simpler neuronal systems. Finally, recent cellular and molecular approaches to the study of behavior will be addressed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BNS 375L.

BNS 375L Neuroethology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 375.

MAR 325 Marine Vertebrates 4 Credits

A survey of the biology of marine vertebrate animals, including fish (jawless fish, sharks, rays, and bony fish), reptiles (sea turtles and sea snakes), sea birds, and mammals (manatees, seals, and whales). The evolution, physiology, natural history, ecological relationships, and human interactions of these groups are emphasized. Three hours of lecture and one three-hour lab per week. Field trips may be required. Prerequisite(s): BIO 272 and BIO 272L.

Corequisite(s): MAR 325L.

MAR 325L Marine Vertebrates Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 325.

CHE 118 Exploration of Chemical Principles 4 Credits

A one-semester introduction to the principles of chemical sciences. Students will utilize inquiry-based learning methods to examine contextual problems as a means to explore introductory models and concepts of chemistry. Students will also gain an understanding of how scientific models are used to explain experimental observations. The laboratory component of this course is designed to provide students with an experimental context within which to develop some of the models described in the classroom. Three hours of lecture and one three-hour lab per week.

CHE 118L Exploration of Chemical Principles Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 118.

CHE 120 Principles of Chemistry 3 Credits

For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.

Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits

For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits

A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.

Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits

Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.

Corequisite(s): CHE 122.

CHE 211 Organic Chemistry I 4 Credits

The structure, chemical properties, and methods of preparation of the more important classes of carbon compounds are studied, with an emphasis on the relationship of structure, stereochemistry, and conformation to chemical reactivity. The preparation and reactivity of organic functional groups is introduced. The use of infrared and nuclear magnetic resonance spectroscopy, and mass spectrometry for elucidating structures of organic molecules is discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 120, CHE 121.

Corequisite(s): CHE 211L.

CHE 211L Organic Chemistry I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 211.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits

This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.

Corequisite(s): ENV 200L.

ENV 200L Statistical and Computer Applications in the Natural Sciences Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): ENV 200.

ENV 220 Weather and Climate Change 3 Credits

This course introduces students to the concepts of weather and climate change. These concepts frame a continuum from short-term or daily changes in the atmosphere (meteorology) to those changes averaged over much longer periods of time (climatology). Students will learn the fundamentals of weather forecasting, the causes of natural variation in the Earth's climate, and the impact of human actions on the Earth's climate. Connections will be drawn to other current issues in the Earth system, including land use change, biodiversity, and pollution. Three hours of lecture per week.

Prerequisite(s): GEO 100 or permission of instructor.

GEO 100 Earth Systems Science 3 Credits

Investigates the major global processes that occur on Earth. These processes can be grouped into four major systems: atmosphere, hydrosphere, lithosphere, and cosmosphere. Each system interacts with and affects the other systems creating, in a sense, a single Earth process. With this approach, the student will view the Earth as a whole, and understand that the many seemingly separate components that make up this planet are, in fact, a set of interacting processes, that operate in cycles through time, within a single global system. Three hours of lecture per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 102 Earth Materials and Processes Lab 1 Credits

This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week.

Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 407 Hydrology and Water Resources 4 Credits

This course introduces the principles that govern both surface water and groundwater flows that have applications to societal water needs. Surface water topics cover the basics of the hydrologic cycle, the processes of precipitation, evapotranspiration, runoff, and infiltration, and various factors affecting water supply and water quality issues in a modern watershed. Groundwater topics examine the principles that govern flow through a porous medium and the basics of well hydraulics under different pumping conditions that community development requires. Laboratory exercises will give students hands-on experience with the delineation of watersheds, analysis of precipitation data, and flow contaminant transport modeling. The field portion of the laboratory includes runoff and stream discharge measurements, as well as hydraulic conductivity estimations from both slug and pumping tests. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, GEO 102, and MTH 105.

Corequisite(s): GEO 407L.

GEO 407L Hydrology and Water Resources Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 407.

MAR 120 Oceanography 3 Credits

In this course, students will investigate the geological, chemical, physical, and biological processes that shape the ocean. Emphasis will be placed on how these processes interact with each other and with human populations. These interactions influence important global phenomena that impact all our lives, including weather and climate, the distribution of marine organisms and other natural resources, and coastal processes. Understanding these phenomena will enable students to make more informed decisions and contribute to serious global marine issues. Students will learn through a combination of hands-on exercises designed to foster a deeper understanding of the scientific content as well as the scientific process, practical experiences with real data, readings, and some lectures. CLAS general education areas addressed: DP & GP.

MAR 121 Introductory Oceanography Lab 1 Credits

This lab course introduces students to the fundamental aspects of geological, chemical, physical and biological oceanography. Students learn through inquiry-based, hands-on exercises and activities using actual data collected in the lab and in the field. Independent projects and local field trips during lab and on weekends may be required. One three-hour lab per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): MAR 120 or GLS 120 or as prerequisite(s).

MAR 210 Marine Life through Time 4 Credits

Survey of the important developments in marine life over the last three billion years from the Pre-Cambrian evolution of one-celled organisms, through the Cambrian explosion of complex marine invertebrate life and subsequent diversification of backboned organisms in the Ordovician time, to the colonization of marginal marine and freshwater habitats in the Silurian-Devonian geological periods, and ultimately to extinctions during global crises of the late Devonian, Permian, Triassic, Cretaceous, and Pleistocene time intervals. The emphasis is on evolutionary adaptive breakthroughs within each phylum, particularly the significant morphological and anatomical innovations, and the subsequent radiation of these higher taxa into new habitats and niches through geologic time. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): GEO 100 & GEO 102; or GEO 113 & GEO 102 (can be signed in to take 102 with 113); or BIO 115; or BIO 116; or permission of instructor.

MAR 210L Marine Life through Time Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): MAR 210.

Prerequisite(s): GEO 100 & GEO 102; or GEO 113 & GEO 102 (can be signed in to take 102 with 113); or BIO 115; or BIO 116; or permission of instructor.

MTH 102 Finite Mathematics 3 Credits

This mathematically rigorous course begins with a review of the rational numbers, repeating decimals, irrational numbers and non-repeating decimals. The elementary theory of sets is discussed with applications to surveys and data mining. This is followed by a discussion of the cardinality of infinite sets. An introduction to elementary number theory includes various applications. The Cartesian plane and the idea of a function and its graph are introduced with applications. Counting theory then precedes an elementary discussion of probability.

MTH 105 Algebra and Trigonometry 4 Credits

The course is an in depth and rigorous study of functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses, trigonometric identities.

Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

MTH 210 Calculus I 4 Credits

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 with a grade of C or higher.

MTH 211 Calculus II 4 Credits

The definite integral, differentiation of transcendental functions, methods of integration and approximate integration, determination of area, volume, and surface area.

Prerequisite(s): MTH 210 with a grade of C or higher.

MTH 212 Calculus III 4 Credits

Infinite series; functions of two and three variables, vectors and tangent planes, partial derivatives, multiple integrals, determination of volume and density.

Prerequisite(s): MTH 211 with a grade of C or higher.

MTH 230 Discrete Mathematics 4 Credits

An introduction to topics in Discrete Mathematics. This course covers methods of proof, induction and recursion, and other topics in discrete mathematics. Topics may include graph theory, trees, and symmetry groups.

Prerequisite(s): MTH 102, MTH 105 or MTH 210.

MTH 240 Linear Algebra 3 Credits

Systems of linear equations; vector spaces; linear independence; determinants; orthogonality; linear maps; eigenvectors.

Prerequisite(s): MTH 210 or as corequisite; sophomore standing; or permission of instructor.

MTH 250 Differential Equations 3 Credits

First order differential equations, separable and exact; integrating factors; second order linear differential equations; series solutions of second order linear differential equations; higher order equations; existence and uniqueness theorems; systems of linear differential equations.

Prerequisite(s): MTH 240, MTH 211.

Corequisite(s): MTH 212 or as prerequisite.

MTH 308 Advanced Calculus 3 Credits

Vectors, gradients, and directional derivatives, Lagrange multipliers, Taylor's theorem, multiple integrals, change of variables, line and surface integrals, Stokes' theorem.

Prerequisite(s): "B" average in MTH 210 and MTH 211; MTH 212, MTH 240.

MTH 315 Modern Geometry 3 Credits

Covers geometry from a modern point of view, with emphasis on non-Euclidean geometry, particularly projective geometry.

Prerequisite(s): MTH 211, MTH 240.

MTH 340 Probability & Statistical Analysis I 3 Credits

Theory of sets and probability; discrete and continuous random variables and probability distributions. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite(s): MTH 212 or MSD 111.

MTH 341 Probability & Statistical Analysis II 3 Credits

Continuation of MTH 340. Foundations of mathematical statistics: normal distributions, estimation, confidence intervals and hypothesis testing; topics chosen from student's t-test, chi-square tests, analysis of variance and regression analysis. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite: MTH 340. Spring.

MTH 401 Modern Algebra 3 Credits

Provides an introduction to modern abstract algebra. It emphasizes the axiomatic method to analyze the major algebraic systems. The instructor will choose the topics to be studied from among the following algebraic structures: integral domains, fields, complete ordered fields, groups, polynomials, rings, ideals and modules.

Prerequisite(s): MTH 240.

MTH 410 Complex Analysis 3 Credits

Analytic functions, conformal mapping, power series, Cauchy's theorem, calculus of residues.

Prerequisite(s): MTH 308.

MTH 420 Number Theory 3 Credits

Covers topics including divisibility theory, the prime numbers, the theories of congruences and of quadratic reciprocity, and Fermat's Last Theorem. Other topics may also include applications to cryptography, Pell's equations, continued fractions, and the theory of partitions.

Prerequisite(s): MTH 240 or permission of instructor.

MTH 430 Introduction to Topology 3 Credits

A comprehensive introduction to elementary topology. The concepts of topological spaces and metric spaces will be introduced. Connectedness, compactness and properties of subsets of the real numbers rooted in topology will also be considered. The quotient topology will be used to construct surfaces as identification spaces, and tools will be developed to distinguish one surface from another.

Prerequisite(s): MTH 212.

MTH 440 Real Analysis 3 Credits

Covers the theory of sets, the real number system and its properties, convergence of sequences and series of numbers and functions, and the theory of integration, including: measure theory, the Riemann integral, and introduction to the Lebesgue theory of integration.

Prerequisite(s): MTH 308 or as corequisite.

PHY 105 Matter, Forces, and Energy: A Exploration of Physics Concepts 4 Credits

An introduction to the basic principles of physics focusing on the concepts of matter, force, and energy. The course will study, in depth, simple physical systems chosen to emphasize the interconnection of these three basic concepts. It will explore the behavior of these simple physical systems using directed group exercises coordinated with hands-on laboratory activities. One three-hour lecture and one three-hour lab per week.

PHY 105L Matter, Forces and Energy Lab 0 Credits**PHY 200 General Physics I 4 Credits**

Introductory classical physics; Newtonian mechanics, including the conservation laws, wave motion, gravity, thermodynamics. Three hours of lecture and one three-hour lab per week. **Prerequisite(s):** MTH 210 or concurrent enrollment

Corequisite(s): PHY 200L.

PHY 200L General Physics I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 200.

PHY 201 General Physics II 4 Credits

A continuation of the concepts developed in Physics 200. Electricity, electrical circuits, magnetism, Maxwell's equations. Light and optics, including lenses, interference, and diffraction. Three hours of lecture and one three-hour lab per week. **Prerequisite(s):** PHY 200, MTH 211 or concurrent enrollment.

Corequisite(s): PHY 201L.

PHY 201L General Physics II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 201.

Journalism

Program Overview

Rider University journalism students learn news writing and reporting, editing, photography and publication design skills. These fundamentals are paired with video production tools and industry software, social media strategies and attention to computer-assisted reporting – the well-rounded basis to successfully enter careers in news, sports, features and investigative journalism. Within this major, students choose either a Broadcast Journalism or Multiplatform Journalism concentration.

Students also learn how to pitch stories to editors, how to find sources and conduct interviews, how to access key state and federal public records, and how to effectively present news content in today's multimedia world. In our state-of-the-art Mac journalism labs, students learn the Adobe design package including Photoshop, InDesign, Illustrator, and Dreamweaver; they build audio-slideshows and video packages using FinalCutProX; and ultimately help build a journalism website using content management systems.

Many of our students participate in extracurricular activities at the university's fleet of award-winning media: The Rider News (<http://www.theridernews.com>) consistently wins state and regional journalism prizes from the Collegiate Press Association; The Rider University Network (<http://runetwork.weebly.com>) (R.U.N.) TV station has won numerous awards for audio management, video music entertainment, sports play-by-plays, and video documentaries; and in 2015, The Bronc 107.7 (<http://www.1077thebronc.com>) was named the 15th best college radio station in the nation.

Curriculum Overview

Core classes in the journalism program include news reporting and writing, copy editing, publication design, feature writing, in-depth reporting, computer assisted reporting and advanced speech. Other classes include communication theory, writing for broadcast, public relations, organizational communication, photography, internal communication and more.

Degree Offered

- B.A. in Journalism

Journalism Major and Concentration Requirements

(48 credits)

Journalism students must complete the requirements for the major (21 credits) and select either the Broadcast concentration or Multiplatform Journalism concentration (27 credits) to complete the program.

- Journalism Major (p. 463)
- Broadcast Journalism Concentration (p. 463)
- Multiplatform Journalism Concentration (p. 463)

Journalism Major (48 credits)

COM 301	Communication Law	
COM 302	Communication Ethics	
Total Credits		21

- Students may not carry a double major within the department. Communication and journalism majors may declare only one minor in the department. No more than two courses may be used to meet the requirements for both a major and a minor in the department.
- If a student receives a grade lower than "C" in a course required in a major or minor course in the department, the student must repeat the course. Credit will only be awarded once for a course that is repeated. The student must also repeat the course before enrolling in any course for which it is a prerequisite.

Multiplatform Journalism Concentration (27 credits)

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits

Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits

As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits

Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits

This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment – and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits

In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits

Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits

Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits

Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits

Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.

Prerequisite(s): COM 104 or COM 290.

COM 205 Theories of Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits

Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.

Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits

Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.

Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits

Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits

Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits

Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits

Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements.

Prerequisite(s): COM 104 or COM 290.

COM 232 Podcasting I 3 Credits

Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits

Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits

Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits

Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/ reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits

The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 251 Interpersonal Communication 3 Credits

Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application. Note: This course is crosslisted as GLS 252. Students may not get credit for both COM 252 and GLS 252.

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits

Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

Prerequisite(s): COM 261 or permission of instructor.

COM 263 History and Principles of Graphic Design 3 Credits

Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits

Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits

Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.

Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 292 Content for Social Media 3 Credits

Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 312 Special Topics in Journalistic Writing 3 Credits

Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.

Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits

Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.

Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits

Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.

Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GND 318. Students may not get credit for both COM 318 and GND 318.

COM 321 Stand Up Comedy 3 Credits

Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.

Prerequisite(s): COM 104: Speech Communication or COM 290: Professional and Strategic Speech.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits

Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits

Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.

Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits

This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits

Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.

Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. Prereq(s): COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits

In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.

Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits

Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): COM 232, COM 233, COM 234.

COM 337 Music Production for Mass Media 3 Credits

Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.

Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits

Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits

Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.

Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 348 Communication Research Methods 3 Credits

Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.

Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator. Note: This course is crosslisted as GLS 352. Students may not get credit for both COM 352 and GLS 352.

COM 353 Nonverbal Communication 3 Credits

Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 360 Advanced Publication Design and Presentation 3 Credits

Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.

Prerequisite(s): COM 212.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits

Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits

Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.

Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits

Offers students education in graphic animation theories, animation development techniques, and animation preparation for various multimedia applications. Emphasis is placed on the design principles in animated communication and animation techniques. The course covers the integration of static images in animation, graphic animation techniques, animation compression, animation rendering, input/output file formats, and animation delivery. The primary software for this course is Adobe Photoshop and MacMedia Flash. Students will be expected to participate in critiques of professional animation designs in order to learn to evaluate critically their own work and their fellow students' work.

Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits

Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.

Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits

Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.

Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits

Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media. Note: This course is crosslisted as GLS 393. Students may not get credit for both COM 393 and GLS 393.

COM 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits

Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.

Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits

A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.

Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits

This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits

Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits

Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.

Prerequisite(s): COM 234.

COM 440 Cases & Campaigns in Public Relations 3 Credits

Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.

Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits

Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

Prerequisite(s): COM 348, COM 350, or permission of instructor.

COM 460 Web Design III 3 Credits

Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.

Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits

Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation. Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.

Prerequisite(s): ART 103, ART 105, COM 262, and COM 360.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Latin American and Caribbean Area Studies

Program Overview

The minor assists students to immerse themselves in diverse and rich Latin American or Caribbean cultures. Students will gain an advantage as they pursue their career path by demonstrating a higher fluency in the Spanish language and in having achieved a heightened sense of global and cultural awareness.

Degree Offered

- Minor in Latin American and Caribbean Area Studies

Related Programs

- Chinese Area Studies (p. 316)
- Spanish (p. 556)

Requirements for the Minor

(21 credits)

Code	Title	Credits
Spanish Language ¹		
SPA 200 & SPA 201	Spanish III and Spanish IV	6
Gateway Course		
SPA 311	Latin American Latino Culture	3
Area-specific Courses ²		
Select four or five courses from at least three disciplines but no more than two courses from any one discipline.		
GSS 310	Special Topics	
HIS 282	Colonial Latin America	
HIS 283	Modern Latin America	
HIS 284	Caribbean History	
IND 210	Global Encounters	
IND 316	Nature's Business	
LIT 340	Hispanic Literature & Film in English Translations	
MUS 308	World Music	
POL 272		
SOC 341	Developing Societies	
SPA 301	Spanish for Business	
SPA 325	Introduction to Latin-American/Latino Literature	
SPA 412	Hispanic Theater and Film	
SPA 413	The Hispanic Short Story: Transatlantic Connections	
SPA 420/LAC 420	From Colonies to Nations	
SPA 426	Latin American/Latino Film and Fiction	
SPA 496	Special Studies	
Total Credits		21

¹ Students who place out of SPA 200 must take SPA 201 and one additional Spanish course at the 300 or 400 level. Students who place out of SPA 200 and SPA 201 must complete one Spanish course at the 300 or 400 level.

² Spanish majors and minors may only take one area-specific course from their major or minor program.

Notes:

Study Abroad or a domestic experience within a Spanish linguistic context or business environment – study, service-learning or internships – may meet some of the minor requirements upon consultation with the student's advisor. Students must take at least one course in the Latin American and Caribbean Area Studies minor upon completion of Study Abroad or a domestic experience as described above.

Independent Research and Study courses and Baccalaureate Honors courses may be substituted in consultation with the Area Studies Program director.

Courses and Descriptions

GSS 310 Special Topics 3 Credits

Studies in specialized areas of feminist scholarship. Topics change according to instructor and are listed in the course roster.

Prerequisite: one previous course in gender and sexuality studies or permission of instructor.

HIS 282 Colonial Latin America 3 Credits

Examines the pre-Columbian and colonial periods of Latin-American history. Discusses the Indian, African, and European peoples and pays particular attention to the colonial Spanish and Portuguese societies from their establishment up to the revolutions that brought about political independence.

HIS 283 Modern Latin America 3 Credits

Considers the post-independence history of Latin America, emphasizing the rise of export economies and external economic domination, modernization, and pan-Americanism. Examines the changes undergone by Latin-American nations in the 20th century through an analysis of Mexico, Argentina, Chile, Brazil, Peru, Cuba, and Central America.

HIS 284 Caribbean History 3 Credits

Analyzes the history of the West Indian islands and the lands bordering the Caribbean Sea from pre-Columbian times to the present.

IND 210 Global Encounters 3 Credits

This course provides students with an exposure to foreign cultures consisting of both travel and study components. Destinations may include countries in Europe, Latin America, or Asia. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political, and aesthetic cultural components appropriate to the location(s) visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. A travel fee is required. No foreign language skills are required unless otherwise indicated.

IND 316 Nature's Business 3 Credits

This interdisciplinary, team-taught, experiential learning course brings together various science, liberal arts, and business perspectives in examining the relationships among biological, social, environmental, economic, geological, and political issues. Topics to be discussed and researched by students can include, but are not limited to, ecotourism, sustainable development, biodiversity, local and regional environmental and historical geology, cultural norms, and the legal and political systems of the country being visited. The study tour component of the course provides students with a first-hand opportunity to observe and record field data from settings outside of the United States and in their discipline of interest. Typically, there are approximately 12 hours of pre-trip lectures, seminars, and/or faculty/student presentations during the fall semester, an international study tour, 9-14 days in length, during January (exact dates and length depend on the international location), and approximately three hours of post-trip meetings, seminars, and student presentations during the spring semester. Students enroll in the course during the spring semester. Note: This course is cross-listed as CBA 316; Students may not get credit for both CBA 316 and IND 316. For Business students who take the course as CBA 316, the course will count as a business course. If taken as IND 316, the Business student will receive credit as a liberal arts and science course.

Prerequisite(s): Permission of Instructor.

LAC 420 From Colonies to Nations 3 Credits

This course consists of a panoramic survey of Colonial and Post-Colonial Latin American literature in light of the unique social, cultural and political history from the pre-Columbian to the Independence period (1825). The approach brings together vivid accounts of places and events, speeches, profiles, oral histories, excerpts from a wide range of literature, policy papers, and other readings. The analysis and discussion of selected literary works and representative films will show how Latin American and Caribbean artistic and creative endeavors express the social, cultural and political context of the Americas. Videos and films will provide the sights and sounds of this vast and vital region. Note: This course is cross-listed as LAC 420. Students may not get credit for both SPA 420 and LAC 420.

Prerequisite(s): SPA 201, or placement test at 300-level or above or SPA 300 or above.

LIT 340 Hispanic Literature & Film in English Translations 3 Credits

This course explores literary and cinematic masterpieces in English translation. Attention is focused on their relationship to the intellectual, artistic, and historical background of Spain, Latin America, and/or United States Latino cultures. No knowledge of Spanish is required. Open to Spanish majors, but no credit given toward the specific requirements of the major.

MUS 308 World Music 3 Credits

To understand world music as a means of appreciating and respecting our common inheritance as humans. To better understand in what ways music is a 'language' and how this functions within 'community' including aspect of ritual, celebration, religion and spirituality. The student will be expected to be able to discern between various genres of world music understanding the wider cultural context including, but not limited to, popular music within that same culture.

SOC 341 Developing Societies 3 Credits

Examines theories explaining patterns of development; indicators and measures of social well-being; and problems such as population, hunger and environmental crises in developing countries. Focuses especially on patterns of development in Latin America or China.

Prerequisite(s): SOC 101.

SPA 200 Spanish III 3 Credits

A focus on key communicative structures in Spanish with emphasis on aural-oral (listening and speaking skills) and composition writing. Cultural and literary readings and films will be used to develop these skills. A special section may be offered to address the needs of native speakers. Students may be required to work with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): SPA 101, 102, 103 or placement test.

SPA 201 Spanish IV 3 Credits

A continuation of communicative Spanish review with emphasis on aural-oral and written skills to prepare students for further study. The discussion of distinctive cultural aspects of the Hispanic world is an integral part of this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisites: SPA 200 or placement test.

SPA 301 Spanish for Business 3 Credits

A solid foundation in business vocabulary and cultural concepts; situational practice in geographic and cultural contexts necessary to be successful in today's Spanish-speaking world. Practice in writing business letters and other documents. Oral and written assignments to help students improve their critical thinking and become better communicators.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 311 Latin American Cultures 3 Credits

A panoramic survey of Latin American cultural achievements in light of the unique social and political history from the pre-Columbian period to the present. Classes are in English. No knowledge of Spanish is required.

SPA 325 Introduction to Latin-American/Latino Literature 3 Credits

A study of the development of Latin-American and Latino literature from its origins to the present through the reading, analysis and discussion of representative works by major authors. This course increases the understanding of how social, historical, and political events, together with native as well as foreign literary movements, create a unique literature, conveying the Hispanic-American reality. Required for majors. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 412 Theater and Film of the Hispanic World 3 Credits

This course explores through theater and cinema the compelling issues that have shaped Hispanic cultures and consciousness throughout the centuries. Sample topics include war and remembrance; myth and history; freedom and authority; immigration; globalization; and race, class, and gender. The course may focus on specific authors or historical periods. Representative playwrights include Lope de Vega, Zayas, Zorrilla, Avellaneda, Lorca, Buero Vallejo, Sastre, Solorzano, Carballido, Lopez Mozo, and Pedrero. Directors include Buñuel, Saura, Gutiérrez Alea, Almodovar, Rocha, Salles, Erice, Zambrano, and Bollain.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 413 The Hispanic Short Story: Transatlantic Connections 3 Credits

This course will introduce students to the most representative writers of the short story in Spain and Latin America from Romanticism to the present. Students will be prepared to perform close readings of the literary genre under study, to analyze the form and content of the texts read, paying due attention to all internal and external aspects that impact the narrative process and the evolution of the short story. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 420 From Colonies to Nations 3 Credits

This course consists of a panoramic survey of Colonial Latin American literature in light of the unique social, cultural and political history from the pre-Columbian to the Independence period (1825). Course taught in Spanish. Note: This course is cross-listed as LAC 420. Students may not get credit for both SPA 420 and LAC 420.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 426 Latin American/Latino Film and Fiction 3 Credits

A study of the main trends in contemporary Hispanic fiction written in Latin America and the United States. Analysis and discussion of selected novels and short stories, and their cinematic representation on film. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 496 Special Studies 3 Credits

A seminar open to a variety of topics treating a particular author, period, genre, theme, or issue.

Prerequisite(s): permission of instructor.

Marine Sciences

Program Overview

The Marine Sciences major prepares students for meaningful and productive post-baccalaureate employment and/or admission to high-quality graduate programs. The program is interdisciplinary in nature, both in its curriculum and faculty, and encompasses the biological, physiochemical, and geological aspects of marine science. Small class size, inquiry-based laboratory experiences, extensive field work, and opportunities for research experiences provide students with a strong foundation and the skills required for a wide range of potential careers.

Curriculum Overview

The curriculum for this major focuses on the interdisciplinary nature of the Marine Sciences by offering a broad and challenging selection of courses, with emphasis on the biological, physical, chemical, and geological sub-disciplines of the marine sciences and the connections between them. Upper-level courses in these sub-disciplines follow a series of foundational courses in the earth and ocean sciences, biology, chemistry, physics, and mathematics. All marine sciences majors will participate in extensive laboratory and fieldwork in their courses, exploring a rich diversity of marine environments and processes while learning the technical and analytical skills necessary for such work. Students also will complete a Marine Sciences field course offered by GEMS and taught most recently at the Roatan Institute of Marine Sciences (RIMS), Roatan, Honduras. In addition, students are encouraged to take advantage of the many opportunities to engage in independent research in collaboration with the GEMS faculty.

Honors Program in Marine Sciences

Honors in Marine Sciences are awarded in recognition of majors who have demonstrated outstanding academic ability. Enrollment in the Honors Program is by invitation of the department faculty. Eligibility requirements include maintenance of at least a minimum GPA of 3.5 in courses required for the major and satisfactory completion of an independent research and study project or a senior thesis. In addition, an honors candidate must maintain an overall GPA of 3.0.

Degree Offered

- B.S. in Marine Sciences

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

¹ For course placement information see <http://www.rider.edu/offices-services/orientation/course-placement> (<http://www.rider.edu/offices-services/orientation/course-placement/>)

² Please note that elective credits may be used to complete requirements in a second major or minor.

Courses and Descriptions

MAR 120 Oceanography 3 Credits

In this course, students will investigate the geological, chemical, physical, and biological processes that shape the ocean. Emphasis will be placed on how these processes interact with each other and with human populations. These interactions influence important global phenomena that impact all our lives, including weather and climate, the distribution of marine organisms and other natural resources, and coastal processes. Understanding these phenomena will enable students to make more informed decisions and contribute to serious global marine issues. Students will learn through a combination of hands-on exercises designed to foster a deeper understanding of the scientific content as well as the scientific process, practical experiences with real data, readings, and some lectures. CLAS general education areas addressed: DP & GP.

MAR 121 Introductory Oceanography Lab 1 Credits

This lab course introduces students to the fundamental aspects of geological, chemical, physical and biological oceanography. Students learn through inquiry-based, hands-on exercises and activities using actual data collected in the lab and in the field. Independent projects and local field trips during lab and on weekends may be required. One three-hour lab per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): MAR 120 or GLS 120 or as prerequisite(s).

MAR 210 Marine Life through Time 4 Credits

Survey of the important developments in marine life over the last three billion years from the Pre-Cambrian evolution of one-celled organisms, through the Cambrian explosion of complex marine invertebrate life and subsequent diversification of backboned organisms in the Ordovician time, to the colonization of marginal marine and freshwater habitats in the Silurian-Devonian geological periods, and ultimately to extinctions during global crises of the late Devonian, Permian, Triassic, Cretaceous, and Pleistocene time intervals. The emphasis is on evolutionary adaptive breakthroughs within each phylum, particularly the significant morphological and anatomical innovations, and the subsequent radiation of these higher taxa into new habitats and niches through geologic time. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): GEO 100 & GEO 102; or GEO 113 & GEO 102 (can be signed in to take 102 with 113); or BIO 115; or BIO 116; or permission of instructor.

MAR 210L Marine Life through Time Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): MAR 210.

Prerequisite(s): GEO 100 & GEO 102; or GEO 113 & GEO 102 (can be signed in to take 102 with 113); or BIO 115; or BIO 116; or permission of instructor.

MAR 290 Directed Research and Study in Marine Sciences 1-4 Credits

Provides an opportunity for freshman and sophomore students to gain hands-on research experience in the marine sciences. This is an individual program of study and each student will work with a selected faculty member on a topic of mutual interest. The course consists of a combination of project meetings, supervised research, and guided readings. The focus will be on formulating research questions, designing and conducting experiments, collecting the necessary data, reviewing the scientific literature as it relates to each student's research topic in a weekly meetings with the instructor, and communicating the findings by writing a final project report.

MAR 300 Introduction to Field Marine Science 4 Credits

In this two-week field course, students will explore various topics in marine science through practical, hands-on, inquiry-based exercises and activities. The course will focus on the biological, geological, chemical, and physical processes that influence diverse marine flora and fauna found in selected marine environments, emphasizing shallow subtidal and intertidal environments such as coral reefs, sandy beaches, turtle grass beds, rocky intertidal pools, coastal wetlands, mangrove swamps, etc. Topics will be examined using field team exercises, a group mapping project, and individual research projects. Activities will help students develop their skills in research, use of field and laboratory equipment, computer analysis of data, and scientific writing, along with gaining content knowledge about the components and processes of environments studied. The course is taught at an appropriate marine field station at a U.S. or international location. Field portion of course is completed during the summer. Additional travel costs vary, depending on location.

Prerequisite(s): BIO 115 or 116 or any 200 or higher level lab science class; and MAR 120; and permission of instructor.

MAR 325 Marine Vertebrates 4 Credits

A survey of the biology of marine vertebrate animals, including fish (jawless fish, sharks, rays, and bony fish), reptiles (sea turtles and sea snakes), sea birds, and mammals (manatees, seals, and whales). The evolution, physiology, natural history, ecological relationships, and human interactions of these groups are emphasized. Three hours of lecture and one three-hour lab per week. Field trips may be required. Prerequisite(s): BIO 272 and BIO 272L.

Corequisite(s): MAR 325L.

MAR 325L Marine Vertebrates Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 325.

MAR 330 Chemical Oceanography 4 Credits

Introduction to the chemical aspects of the oceans and their influence on marine ecosystems and Earth processes. Emphasis is placed on chemical and physical properties of seawater, atmosphere-ocean interactions, biogeochemical cycles with marine components, production and destruction of marine organic matter, chemical ecology, and marine pollution. During the lab portion of this course, students gain hands-on experience in analyzing ocean water samples, experimental design, and interpreting marine chemical data. Three hours of lecture and one three-hour lab per week. Weekend field trips and independent projects may be required. Prerequisite(s): CHE 120, CHE 121, MAR 120, and MAR 121; or permission of instructor.

Corequisite(s): MAR 330L.

MAR 330L Chemical Oceanography Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 330.

MAR 340 Marine Processes and Environments: Seminar 3 Credits

This course is designed as a seminar course. Therefore, students will learn to lead class discussions, to analyze and critique peer-reviewed journal articles, and to enhance their presentation skills. Students will interpret graphical, spatial, and numerical data to support their positions. Content will emphasize the interactions among marine processes, biological features, and geologic landforms.

Prerequisite(s): MAR 120 or GEO 100; GEO 306.

MAR 360 Plankton Ecology 4 Credits

Examines the diversity, physiology, and ecology of marine phytoplankton and zooplankton. Students will survey the dominant plankton groups, their distribution, nutritional requirements, growth kinetics, and behavior. Planktonic predator/prey interactions and food web dynamics will be discussed. Students will also examine the interdisciplinary nature and role of plankton in biogeochemical cycles. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required. Prerequisite(s): MAR 120 and MAR 121; or BIO 116.

Corequisite(s): MAR 360L.

MAR 360L Plankton Ecology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 360.

MAR 380 The Learning and Teaching of Marine Science 4 Credits

This field-based course provides a practical experience in integrating marine science with pedagogical concepts. Students will use scientific methodology to explain marine ecosystems through specially designed, inquiry-based exercises. During these activities, students will address the process of applying college-level content to their own classroom settings, considering national and state standards. Hands-on, field-based exercises will provide experience with a diversity of marine habitats and the biological, geological, hydrological, and physical processes that influence them. Visited habitats can include rocky intertidal, salt marsh, tidal flat, beach and channel sand bars. As a result, students will develop field and laboratory skills in marine science and use them in designing materials for their own classroom use.

MAR 401 Marine Ecology 4 Credits

The purpose of this course is to introduce students to fundamental principles in ecology, as it relates to marine systems. Topics include the marine environment and its influence on the organisms living there; biodiversity and speciation; factors regulating population dynamics in marine systems; larval and fisheries ecology; species interactions such as predation, competition, and symbiosis; factors regulating productivity and energy flow in marine systems; and marine conservation. Hands-on laboratory exercises will provide students with the opportunity to design and conduct experiments related to marine ecology, and to collect, analyze, and interpret data from those experiments. Ecosystem modeling will also be introduced. Three hours of lecture and one three-hour lab per week. Weekend field trips may be introduced. Prerequisite(s): BIO 272, BIO 272L.

Corequisite(s): MAR 401L.

MAR 401L Marine Ecology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 401.

MAR 410 Physical Oceanography 3 Credits

Introduction to the physical aspects and processes of the oceans and their influence on marine ecosystems and Earth processes. Topics include distribution of salinity and water temperature and their effect on water movement, the oceanic heat budget, atmospheric and oceanic interactions, ocean currents including surface and deep water circulation, waves, tides, and medium- to small-scale circulation features. Throughout the course, emphasis is placed on how these physical processes affect the biology and chemistry of the ocean. Three hours of lecture per week. Weekend field trips may be required.

Prerequisite(s): MAR 120.

MAR 480 Senior Thesis 3 Credits

A senior thesis is optional for marine sciences majors. However, a senior thesis is required for eligibility to graduate with honors in marine sciences. The topic for investigation will be chosen by the student in consultation with the faculty of the Department of Geological, Environmental, and Marine Sciences. The student must initiate consideration of a proposal to the Department. The proposal must contain a discussion of the proposed project and a timetable to be followed in the study. A departmental committee consisting of a major and minor advisor will evaluate the written paper submitted at the conclusion of the study or other approved venue. An oral presentation before the department at the conclusion of the semester in which the study is completed is required. Proposals must be submitted in final form no later than the end of the ninth week of the semester prior to the semester in which the study is undertaken.

Prerequisite(s): senior standing in the marine sciences major and permission of department chair.

MAR 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

MAR 491 Internship in Marine Sciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placements may be in private, public, non-profit, or governmental organizations. These can include consulting firms, regulatory agencies, advocacy groups, and educational or research institutions. Normally, 50 hours of internship per credit is required. A mutually agreed upon method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and could include a term paper or project report and a poster presentation.

Prerequisite(s): 2.5 GPA and permission of instructor.

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits

An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 116.

BIO 272 Intro to Marine Biology 4 Credits

Introduces students to the study of marine environments, emphasizing the diversity, ecology, and physiology of marine animals, algae, and plants. Aspects of the human impact on marine environments are also discussed. Prerequisite(s): BIO 115 or BIO 116 or BNS 118 and grade of "C" or better.

Corequisite(s): BIO 272L.

BIO 272L Marine Biology Laboratory 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 272.

BIO 372 Behavior of Marine Organisms: Evolutionary Approach 4 Credits

An examination of the underlying mechanisms and evolutionary causes of behavior, including habitat use, feeding, and mate choice, particularly in marine organisms. The laboratory will involve collecting, analyzing and interpreting field data and performing experiments in the lab using a variety of marine organisms including fish and crabs. Three hours of lecture and one three-hour lab per week. Some full-day field trips (usually on a weekend) are required. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 372L.

BIO 372L Behavior of Marine Organisms: Evolutionary Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 372.

GEO 100 Earth Systems Science 3 Credits

Investigates the major global processes that occur on Earth. These processes can be grouped into four major systems: atmosphere, hydrosphere, lithosphere, and cosmosphere. Each system interacts with and affects the other systems creating, in a sense, a single Earth process. With this approach, the student will view the Earth as a whole, and understand that the many seemingly separate components that make up this planet are, in fact, a set of interacting processes, that operate in cycles through time, within a single global system. Three hours of lecture per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 102 Earth Materials and Processes Lab 1 Credits

This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week.

Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 306 Sedimentology and Stratigraphy 4 Credits

The principles of weathering, erosion, transportation, and deposition of sediment are the focus of this course. Sediment characteristics are examined to identify the processes involved in transporting grains and the specific environment in which the grains were deposited. Students will learn how to collect, analyze, and interpret sedimentary data and how to interpret surface and subsurface stratigraphic data using various techniques, such as lithostratigraphic, biostratigraphic, and geophysical, correlations. Field trips will expose students to different sedimentary environments and provide opportunities for students to learn how to conduct fieldwork. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required. Prerequisite(s): GEO 100.

Corequisite(s): GEO 306L.

GEO 306L Sedimentology and Stratigraphy Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 306.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits

This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.

Corequisite(s): ENV 200L.

ENV 200L Statistical and Computer Applications in the Natural Sciences Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): ENV 200.

ENV 205 Introduction to Geographic Information Systems 3 Credits

This course introduces the computer-based concepts and skills of Geographic Information Systems (GIS). It covers the basic GIS concepts, such as map characteristics and projections, spatial data models and analysis, and relational databases. It explores data sources, data quality, and metadata, as well as implementation and management of specific GIS projects. Hands-on experience with ArcGIS software is provided through a series of student exercises completed throughout the semester. Students will also be taught how to process both vector and raster data using ArcGIS software. The course is relevant for students from numerous disciplines in the natural sciences, social sciences, and business, which require the analysis and graphical representation of spatial data. Three hours of lecture per week. Note: This course is cross-listed as GLS 205. Students may not receive credit for both ENV 205 and GLS 205.

CHE 120 Principles of Chemistry 3 Credits

For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.

Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits

For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits

A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.

Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits

Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.

Corequisite(s): CHE 122.

PHY 100 Principles of Physics I 3 Credits

Introductory noncalculus physics with applications for pre-professional, biology, and geological, environmental and marine sciences majors. Classical mechanics, energy, mechanical waves, fluid statics and dynamics, thermodynamics. Elements of modern physics are interwoven with those of classical physics from the beginning. Not open to chemistry, physics, or mathematics majors. Three hours of lecture per week. Prerequisite(s): MTH 105, MTH 210, MTH 211 or MTH 212.

Corequisite(s): PHY 100L.

PHY 100L Principles of Physics I Lab 1 Credits

For students concurrently taking PHY 100. One three-hour lab per week.

Corequisite(s): PHY 100.

PHY 101 Principles of Physics II 3 Credits

Continuation of Physics 100. Electrostatics, electricity, and magnetism; DC and AC circuits, physical and geometrical optics, introduction to elementary particle and quantum physics. Three hours of lecture per week. Prerequisite(s): PHY 100.

Corequisite(s): PHY 101L.

PHY 101L Principles of Physics II Lab 1 Credits

For students concurrently taking Physics 101. One three-hour lab per week.

Corequisite(s): PHY 101.

Mathematics

Program Overview

Students majoring in mathematics at Rider are met with rigorous and insightful instruction. Courses progress from foundational topics to advanced theories and techniques. Faculty members are active in

research and will invite, stimulate and support students' curiosity and understanding.

Graduates of Rider's mathematics program go on to careers in such fields as education, scientific and medical research, engineering, computer science, architecture, pharmaceutical research, actuarial science, and urban planning and development.

Curriculum Overview

Requirements for the math major total 50 semester hours and include calculus I, II and III, linear algebra, differential equations, advanced calculus, modern geometry, probability and statistical analysis I, modern algebra, complex analysis and mathematics electives. Also required are general physics I and II.

Honors Program in Mathematics

Superior students majoring in mathematics may participate in a program leading to graduation with honors in mathematics. A candidate must submit a written application by March 1 of the junior year to the departmental honors committee. Admission to the program will be based on a 3.25 cumulative average in mathematics courses taken in the first five semesters and sponsorship by a member of the departmental faculty. During the senior year, the student will be enrolled in MTH 490 Independent Study: Research and Creative Expression. Honors in mathematics is based on earning a 3.4 average in seven mathematics courses at the 300 and 400 levels (excluding MTH 490) and an acceptable senior thesis. Further information on the program can be obtained from the department.

Courses and Descriptions

MTH 100 Intermediate Algebra 3 Credits

This course prepares science and mathematics majors for college level mathematics courses. Topics include linear and absolute value equations and inequalities, quadratic and polynomial functions and their graphs, rational and radical equations, and systems of linear equations. This course does not fulfill the mathematical reasoning requirement of the CLAS general education curriculum.

MTH 100S Math Skills Lab 1 Credits

The Math Skills Lab helps science majors master arithmetic and elementary algebra necessary for college level mathematics courses. Students are required to attend regular class sessions. Students have access to tutors, computer-assisted instruction, and structured workshops. The one supplemental education unit does not count toward graduation; grading is done on a Y/Z (pass/not pass) basis.

MTH 102 Finite Mathematics 3 Credits

This mathematically rigorous course begins with a review of the rational numbers, repeating decimals, irrational numbers and non-repeating decimals. The elementary theory of sets is discussed with applications to surveys and data mining. This is followed by a discussion of the cardinality of infinite sets. An introduction to elementary number theory includes various applications. The Cartesian plane and the idea of a function and its graph are introduced with applications. Counting theory then precedes an elementary discussion of probability.

MTH 105 Algebra and Trigonometry 4 Credits

The course is an in depth and rigorous study of functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses, trigonometric identities.

Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

MTH 120 Introduction to Applied Statistics 3 Credits

Collection and presentation of data. Measures of location and variation, sampling theory, hypothesis testing, confidence intervals, t-tests, chi-square tests, regression, and correlation. Emphasizes practical applications. Not open to business administration, chemistry, environmental, geosciences, marine sciences, math or liberal studies: marine ecological or environmental emphasis majors.

Prerequisite(s): MTH 102 or MTH 105.

MTH 150 Mathematics for Education Majors I 3 Credits

This is the first course in a three-course sequence for education majors. This course covers the concept of Numbers, starting with counting numbers, decimals, negative numbers, fractions, and real numbers; different ways of representing numbers, and the relations between them are explored; different meanings and applications of the arithmetic operations are studied; standard and non-standard algorithms for arithmetic are considered in light of the representation of numbers. May not be used by CLAS students to satisfy the mathematics component of the core.

MTH 151 Mathematics for Education Majors II 3 Credits

This is the second course in a three-course sequence for elementary education majors. In this course, students will study proportional reasoning, Number Theory, Algebra, Geometry, and measurement. May not be used by SLAS students to satisfy the mathematics component of the core.

Prerequisite(s): MTH 150.

MTH 152 Mathematics for Education Majors III 3 Credits

This is the third course in a three-course sequence for elementary education majors. In this course, students will study area and volume, transformational geometry, statistics and probability.

Prerequisite(s): MTH 151.

MTH 210 Calculus I 4 Credits

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 with a grade of C or higher.

MTH 211 Calculus II 4 Credits

The definite integral, differentiation of transcendental functions, methods of integration and approximate integration, determination of area, volume, and surface area.

Prerequisite(s): MTH 210 with a grade of C or higher.

MTH 212 Calculus III 4 Credits

Infinite series; functions of two and three variables, vectors and tangent planes, partial derivatives, multiple integrals, determination of volume and density.

Prerequisite(s): MTH 211 with a grade of C or higher.

MTH 230 Discrete Mathematics 4 Credits

An introduction to topics in Discrete Mathematics. This course covers methods of proof, induction and recursion, and other topics in discrete mathematics. Topics may include graph theory, trees, and symmetry groups.

Prerequisite(s): MTH 102, MTH 105 or MTH 210.

MTH 240 Linear Algebra 3 Credits

Systems of linear equations; vector spaces; linear independence; determinants; orthogonality; linear maps; eigenvectors.

Prerequisite(s): MTH 210 or as corequisite; sophomore standing; or permission of instructor.

MTH 250 Differential Equations 3 Credits

First order differential equations, separable and exact; integrating factors; second order linear differential equations; series solutions of second order linear differential equations; higher order equations; existence and uniqueness theorems; systems of linear differential equations.

Prerequisite(s): MTH 240, MTH 211.

Corequisite(s): MTH 212 or as prerequisite.

MTH 308 Advanced Calculus 3 Credits

Vectors, gradients, and directional derivatives, Lagrange multipliers, Taylor's theorem, multiple integrals, change of variables, line and surface integrals, Stokes' theorem.

Prerequisite(s): "B" average in MTH 210 and MTH 211; MTH 212, MTH 240.

MTH 315 Modern Geometry 3 Credits

Covers geometry from a modern point of view, with emphasis on non-Euclidean geometry, particularly projective geometry.

Prerequisite(s): MTH 211, MTH 240.

MTH 340 Probability & Statistical Analysis I 3 Credits

Theory of sets and probability; discrete and continuous random variables and probability distributions. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite(s): MTH 212 or MSD 111.

MTH 341 Probability & Statistical Analysis II 3 Credits

Continuation of MTH 340. Foundations of mathematical statistics: normal distributions, estimation, confidence intervals and hypothesis testing; topics chosen from student's t-test, chi-square tests, analysis of variance and regression analysis. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite: MTH 340. Spring.

MTH 401 Modern Algebra 3 Credits

Provides an introduction to modern abstract algebra. It emphasizes the axiomatic method to analyze the major algebraic systems. The instructor will choose the topics to be studied from among the following algebraic structures: integral domains, fields, complete ordered fields, groups, polynomials, rings, ideals and modules.

Prerequisite(s): MTH 240.

MTH 402 Topics in Advanced Mathematics 3 Credits

Chosen from advanced pure or applied mathematics. Topics vary, depending on instructor.

Prerequisite(s): MTH 308.

MTH 410 Complex Analysis 3 Credits

Analytic functions, conformal mapping, power series, Cauchy's theorem, calculus of residues.

Prerequisite(s): MTH 308.

MTH 420 Number Theory 3 Credits

Covers topics including divisibility theory, the prime numbers, the theories of congruences and of quadratic reciprocity, and Fermat's Last Theorem. Other topics may also include applications to cryptography, Pell's equations, continued fractions, and the theory of partitions.

Prerequisite(s): MTH 240 or permission of instructor.

MTH 430 Introduction to Topology 3 Credits

A comprehensive introduction to elementary topology. The concepts of topological spaces and metric spaces will be introduced. Connectedness, compactness and properties of subsets of the real numbers rooted in topology will also be considered. The quotient topology will be used to construct surfaces as identification spaces, and tools will be developed to distinguish one surface from another.

Prerequisite(s): MTH 212.

MTH 440 Real Analysis 3 Credits

Covers the theory of sets, the real number system and its properties, convergence of sequences and series of numbers and functions, and the theory of integration, including: measure theory, the Riemann integral, and introduction to the Lebesgue theory of integration.

Prerequisite(s): MTH 308 or as corequisite.

MTH 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in research and mathematical literature. If possible, the student will publish the results or present them at a scientific meeting.

Movement Science Minor

Program Overview

The Movement Science Minor is designed to foster a deeper knowledge and understanding of the fundamental aspects of human performance. Upon completion of the program, the student will be able to:

- Demonstrate knowledge of theoretical and practical scientific concepts of movement and movement science (i.e., anatomy, physiology, nutrition, biomechanics/kinesiology, and biopsychosocial and behavioral health.)
- Identify and explain disease which may result from and affect biological and behavioral health.
- Articulate a philosophy that demonstrates the role of movement in the development and maintenance of overall health and the prevention of disease.

BIO 221 & 221L	Human Anatomy & Physiology I and Human Anatomy & Physiology I Lab	4
BIO 222 & 222L	Human Anatomy & Physiology II and Human Anatomy & Phys II Lab	4
DAN 180	History of Movement Theory ¹	3
HSC 100	Intro to Human Nutrition ²	3
HSC 302 & 302L	Kinesiology and Kinesiology Lab ²	4
Total Credits		21-22

¹ DAN 180 is offered every other year. Work with your advisor to plan accordingly.

² Health Science majors who declare a Movement Science Minor may not count HSC 100 or HSC 302 / HSC 302L toward their major requirements.

Courses

BIO 100 Life Science 3 Credits

An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits

An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 116.

BIO 221 Human Anatomy & Physiology I 4 Credits

A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.

Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 221.

BIO 222 Human Anatomy & Physiology II 4 Credits

A comprehensive survey of the organ systems of the body including special senses, cardiovascular, respiratory, digestive, excretory, reproduction and development. Physiological components include electrolytes, metabolism, nutrition, and the mechanisms of homeostasis and cell reception. Lab studies support lecture material through dissections, wet labs, computer-assisted learning, microscopy, and models. Assessment includes lab practicums, exams, and reports. Course emphasis supports allied health and pre-professional training. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): BIO 221.

Corequisite(s): BIO 222L.

BIO 222L Human Anatomy & Phys II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 221L.

Corequisite(s): BIO 222.

BNS 107 Life Science: Brain and Behavior 3 Credits

An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

DAN 180 History of Movement Theory 3 Credits

Investigation of the mind-body connection, somatic experience, body therapies, movement and theories. The essential questions are: How is it that we move with awareness, fluidity, efficiency and precision?.

HSC 100 Intro to Human Nutrition 3 Credits

This course is designed to offer the student understanding of fundamental human nutrition concepts including, but not limited to, digestion, absorption, metabolism, functions and sources of macronutrients and micronutrients. The theme of the course will align with human health and disease states and the important conceptions about the food industry and its relation to healthy dietetic choices.

HSC 302 Kinesiology 3 Credits

The purpose of this course is to explore human movement during performance of activities. This course will explore the relationship between anatomical structures and function in the production of movement. The application and relationships between the fundamental principles of mechanics and musculoskeletal system function will be addressed within the framework of clinical and research perspectives. Both qualitative and quantitative approaches will be applied towards a better understanding of human movement, the analysis of physical activity. Prerequisite(s): BIO 221 & MTH 105 (or equivalent) or POI.

Corequisite: HSC 302L.

HSC 302L Kinesiology Lab 1 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): HSC 302.

Multicultural Studies

Program Overview

In this minor, students will learn how different cultures interact to shape individual identities and to structure U.S. society. Because organizations today need employees who can perform effectively in a diverse workplace environment, the minor can also enhance employment options.

For coursework, each student chooses a theme or thread within multicultural studies that suits his or her special interests. The minor also provides students with career-relevant knowledge and experience.

In these various ways, the multicultural studies minor plays an important role in preparing Rider students, whatever their ethnic heritage, for an increasingly multicultural world.

Courses and Descriptions

MCS 109 Intro to Race, Class & Gender 3 Credits

This course introduces students to the concepts of race, class and gender as essential components in understanding how social identities are socially constructed in the United States. Using historical and contemporary references, the course explores the ways in which race, class, gender and ethnic relationships shape the experiences of people in the United States, and the implications of those experiences for social relationships. Part of this exploration is to expose students to inter-relatedness of race, class and gender, as identity markers, both historically and in contemporary society.

MCS 110 Race, Class and Gender in Contemporary American Society 3 Credits

This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with GSS 110. Students may only get credit for one course: MCS 110 or GSS 110.

MCS 110S Introduction to Race, Class and Gender in Contemporary Society 1 Credits

This course introduces students to the concepts of race, class and gender as essential components in understanding how social identities are socially constructed in the United States. Using historical and contemporary references, the course explores the ways in which race, class, gender and ethnic relationships shape the experiences of people in the United States, and the implications of those experiences for social relationships. Part of this exploration is to expose students to inter-relatedness of race, class and gender, as identity markers, both historically and in contemporary society.

MCS 210 Power and Privilege in a Multicultural Society 3 Credits

This course will examine how the intersection of power and privilege shapes race, gender and class relationships in the United States. Analyses will show how the legal, economic, political and social manifestations of power influence the assignments and distribution of privilege in the United States, both in historical and contemporary contexts. The impositions of power on identity in the social assignment of privilege will be an important component of the course. The two "big questions" to be examined in this course are: How do issues of race, ethnicity, class, age, religion, gender, and sexual orientation interact with privilege? How do the tensions between power, privilege, oppression and inequality lead to movements for social justice? Various interlocking systems of privileges—justice system, educational system, medical system, political system, economic system, etc.—will be examined, using the theoretical frameworks of inequality, oppression and dependency. Prominent public policies and social movements that have challenged the notions of power and privilege, both historically and contemporarily, will be examined: civil rights, women's suffrage, affirmative action, Occupy Wall Street, LGBT rights, Metoo movement, Equal Rights Amendment, Title IX, Lilly Ledbetter Fair Pay Act, etc.

MCS 220 Issues in Multicultural Studies 3 Credits

An examination of issues and questions posed by the existence of diversity in social life. Students build on what they have learned in MCS 110 by focusing in greater depth on selected aspects of multicultural interaction. Topics change each semester and are listed in the course roster. Recent topics include "Understanding Privilege," "The Meaning of Difference," and "Narratives of Human Difference: Science, Politics, Literature."

Prerequisite(s): MCS 110 or permission of instructor.

MCS 280 Directed Study in Multicultural Studies 1-4 Credits

An intensive study experience in multicultural studies. The student designs and carries out a course of focused study under the supervision of a multicultural studies faculty member. The student's proposed plan of work must be reviewed and approved by the faculty sponsor and by the multicultural studies advisory committee. May be repeated once for credit.

MCS 490 Independent Study: Research and Creative Expression 1-4 Credits

Individual program of study under close supervision by the instructor, with weekly meetings and reports. Topics to be approved by the department. Available to seniors who have a minimum of a 3.0 GPA. No more than six credits allowed toward graduation.

MCS 491 Internship in Multicultural Studies 1-4 Credits

A supervised community service of work experience at an approved site. Placements are made in accordance with each student's particular theme within multicultural studies. A minimum of three hours per week on site per credit (39 hours per semester); in addition, students complete readings and reports and meet weekly with the instructor. Primarily for multicultural studies minors in their junior or senior year.

Organizational Psychology

Program Overview

Are you interested in knowing what motivates a person to perform well at a job, or what qualities a company needs to look for to make a great hire? Today's businesses and organizations need professionals who understand human behavior, group dynamics and how to make the workplace function better. A major in Organizational Psychology from Rider University will help prepare you for a career in one of America's fastest-growing professions.

Curriculum Overview

Rider University's program is one of just a handful in the nation offering a unique interdisciplinary major that combines business and psychology. This versatile degree can have a real impact on an organization's bottom line by helping to improve employee satisfaction and job performance.

Majors in this program will gain a comprehensive understanding of the important contributions that organizational psychology plays in today's workplace.

The Organizational Psychology program focuses on the behavioral aspects of managing and supervising the human resources of an organization or business. You will learn the key concepts of management and psychology, including perception and attitudes, employee motivation and engagement, and organizational leadership and power — and gain an in-depth understanding of what makes employees and organizations function at their best.

As an Organizational Psychology major, you will:

- Develop a comprehensive understanding of human behavior in work settings;
- Learn how to enhance performance within an organization or business;
- Benefit from networking and gain real-world experience through internships and other professional opportunities.

The U.S. Bureau of Labor Statistics ranks Industrial-Organizational Psychology at the top of its list of 20-fastest growing occupations, with a projected growth rate of 53 percent between now and 2022. Organizational psychologists are in demand because their expertise results in better hires, increased productivity, reduced turnover and lower labor costs. They can work as consultants to organizations, or serve in-house in a variety of jobs, including:

- Human resource officer
- Employee development manager
- Organizational development director
- Quality performance manager
- Organizational psychologist
- Testing specialist
- Compensation and benefits specialist

Honors Program in Psychology

A student may receive honors in psychology by fulfilling the following conditions beyond the basic requirements for the psychology major: complete one Independent Research and Study project (490); earn a cumulative average of 3.25 and an average of 3.5 in psychology at the time of graduation.

Degree Offered

- B.A. in Organizational Psychology

Courses and Descriptions**COM 253 Organizational Communication 3 Credits**

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

HRM 315 Employee Selection & Training 3 Credits

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.

Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

Prerequisite(s): MGT 310.

HRM 333 Employee Engagement 3 Credits

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

Prerequisite(s): MGT 310.

MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

Prerequisite(s): minimum 30 credits completed.

MGT 310 Intro to Human Resource Mgmt 3 Credits

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

Prerequisite(s): MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves.

Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.

Prerequisite(s): MGT 201 or PSY 210.

MGT 355 Team Management 3 Credits

This course prepares students to work in organizations that use teams as an integral part of their functioning-an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

Prerequisite(s): MGT 201 or PSY 210.

MGT 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

Prerequisite(s): MGT 201 or permission of instructor.

MSD 105 Quantitative Methods for Business 3 Credits

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 205 Business Statistics 3 Credits

This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.

Prerequisite(s): MSD 105.

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 210 Organizational Psychology 3 Credits

Focuses on issues related to human behavior in work settings. Topics include personnel issues such as hiring and promotion decisions, performance appraisals, and methods of on-the-job training. Issues of job satisfaction, motivation, productivity, and effective leadership styles are also examined. Finally, organizational structure as it relates to communication within organizations will be examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): PSY 105 and PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional quality writing, oral or multimedia presentations.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): PSY 201.

Philosophy

Program Overview

The study of philosophy explores fundamental questions about persons and the universe. What is knowledge? What is the meaning of life? What is reality? How do psychology, religion, art, history, and science contribute to an understanding of the world and our place in it?

At Rider, philosophy students are encouraged to apply these questions toward pragmatic ends, with emphasis on both the academic discourse community and developing specific skills useful beyond the classroom. Specifically, the program teaches students how to formulate and defend

positions, speak articulately and listen objectively, write clearly and persuasively, read complex material with comprehension, summarize and organize challenging materials and reason analytically and inferentially.

Curriculum Overview

Students begin with introductory courses in the teachings of Plato and Aristotle, the basics of logic and language and an historical and systematic analysis of ethics. Later coursework can focus on particular movements of philosophy including Modern Philosophy, Asian philosophy, Existentialism, Nietzsche's concept of nihilism, the philosophies of Wittgenstein and Hume, as well as a wide range of other courses related to the field. Most major classes are taught as small weekly meetings in which students discuss the material in an intimate, supportive setting.

Introductory philosophy courses also hold small weekly discussion groups. In both upper and lower division courses students are also given the opportunity to develop their ability to verbally express their opinions and argue their basic points persuasively. During their senior year, students hone their writing and rhetorical skills by completing a thesis on a philosophic topic of their choice in consultation with a faculty advisor.

Honors Program

Honors in philosophy may be achieved, upon the recommendation of the department, by earning a 3.5 cumulative average in the discipline and completing the senior thesis with distinction.

Courses and Descriptions**PHL 100 Plato and Aristotle 3 Credits**

The beginnings of Western scientific and humanistic thought among the early Greeks and their progress into the two great systems of Plato and Aristotle. Selections from Plato and Aristotle are read and discussed to determine the meaning and significance of philosophical ideas that have subsequently influenced the whole history of Western civilization. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 102 Philosophical Thinking 3 Credits

An introduction to philosophical thought with an emphasis on the enduring questions and problems of philosophy. We will explore such questions as: how do I know I am not dreaming? Is there an external world? What is truth? Is there a self? Is there a God? What is the relationship between the mind and the body? How can I tell right from wrong? What makes government legitimate? What is justice? What is the meaning of life? We will consider answers to these questions from diverse philosophical traditions, reading such philosophers as Plato, Descartes, Zhuangzi, Hume, Vasubandhu, Berkeley, Aquinas, Avicenna, Udayana, Kant, Mill, Russell, Camus, and Nishitani. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 110 Logic and Language 3 Credits

A study of the logical structure of argumentation in ordinary language, with an emphasis on the relation of logic to the uses of language in practical affairs. Traditional informal fallacies are studied as well. Discussions explore the nature of validity, truth, meaning, and evidence in relation to the evaluation of arguments. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 115 Ethics 3 Credits

A combined historical and systematic analysis of the problems of ethics. Such problems as the nature and meaning of moral values and judgments, moral responsibility and freedom, conscience and happiness, the good life, and the relativity of value, are explored through the writings of such philosophers as Plato, Aristotle, Aquinas, Kant, Mill, and Nietzsche. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 120 American Philosophy 3 Credits

The development of philosophical thought in the United States from the colonial era to the 20th century. Studies such thinkers as Edwards, Jefferson, Emerson, Thoreau, Peirce, James, Dewey, and King, and their ideas on human nature, free will, religion, morality, and politics. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 125 Philosophies of Education 3 Credits

Studies classical and contemporary theories of the nature, structure, and aims of education, including major works of such philosophers as Plato, Rousseau, and Dewey. The course will also introduce students to methods of critical philosophical analysis. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 130 Political Philosophy 3 Credits

An introduction to the problems of political philosophy with an emphasis on recent and contemporary issues, such as the conflict between liberal and conservative ideologies, fascism, revolution, civil disobedience, and the concept of legitimate political authority. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 202 Social Philosophy 3 Credits

Emphasizes social ethics through critical studies of such contemporary problems as abortion, euthanasia, the death penalty, pornography and censorship, animal rights, drug use, sexual morality, environmental ethics, and world hunger. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 203 Business Ethics 3 Credits

Surveys and examines ethical problems concerning the institutions and practices of contemporary business. Problems considered include: the conflicts of economic freedom and social responsibility; the relation of profits to work and alienation; the responsibilities of business to employees, minorities, consumers and the environment; the role of truthfulness in business practices; and the ethics of self-fulfillment and career ambitions. Readings selected from works of contemporary and historical philosophers, social theorists, and business people.

PHL 207 Asian Philosophy 3 Credits

A survey of the principal philosophical perspectives of Asia. Emphasis on the traditional Indian schools of Hinduism, Jainism, and Buddhism, Chinese Confucianism and Taoism, and the development of Zen Buddhism in China and Japan. Philosophical topics include: mystical experience, the ultimate nature of reality, the existence of a soul, the causes of human suffering, and the possibility of release, the nature of virtue and its development, and the nature of society and government. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 210 Symbolic Logic 3 Credits

An introduction to logic from the standpoint of modern symbolic methods, including techniques of formal deductive proof, quantification, the logic of relations, and properties of formal deductive systems. Discussions focus on philosophical issues in recent and contemporary logical theory. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 215 Environmental Ethics 3 Credits

A comprehensive introduction to environmental ethics that examines the major theoretical approaches, including anthropocentric (human-centered), zoocentric or sentientist (animal-centered), and biocentric or ecocentric (nature-centered) value systems, as well as the most important critiques of these ethical approaches. We will examine and analyze several classical ethical theories that are particularly relevant to a study of contemporary environmental controversies. We will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption. Students will analyze and discuss the ethical dimensions of several contemporary environmental controversies. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 225 Modern Philosophy 3 Credits

Examines one of the most exciting periods in the history of philosophy during which philosophers from Descartes to Kant tried to come to terms with the following questions: What is knowledge? Can we know the physical world exists? Can we have scientific knowledge? Can we know God exists? Can we even know whether we exist? The works of Descartes, Leibniz, Spinoza, Locke, Berkeley, Hume and Kant are read and discussed. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 230 Philosophy of the Sexes 3 Credits

Studies philosophical views of the differences between the sexes, sexual equality, love, marriage, and the family from ancient Greece to the 20th century. Texts from the contemporary women's and men's movements will also be examined. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 303 Philosophy of Law 3 Credits

An examination and analysis of selected topics including classical and contemporary theories in the philosophy of law and moral philosophy. Such topics as the nature of the law and legal reasoning, the legal enforcement of morality, protection of personal liberty, and the moral justification of punishment are considered. Such philosophers as Aquinas, Austin, Holmes, Bentham, Hart, and Dworkin are read and discussed.

PHL 304 Medical Ethics 3 Credits

Introduces the student to ethical problems associated with the practice of medicine, the pursuit of biomedical research, and health care social policy. The course will explore such issues as: Is a physician morally obligated to tell a terminally ill patient that he or she is dying? Is society ever justified in enacting laws that would commit an individual, against his or her will, to a mental institution? Does society have a moral obligation to ensure that all its members have access to health care? To what extent, if at all, is it ethically acceptable to clone a human being? Under what conditions is human experimentation ethically acceptable? **Prerequisite(s):** CMP 125 or CMP 203 or BHP 150.

PHL 310 Problems in 20th-Century Philosophy 3 Credits

Consideration of major philosophical movements in the 20th century such as phenomenology, existentialism, pragmatism, and analytic philosophy. Within these movements such topics as the function of analysis, language and meaning, the nature of values, the nature of persons, the synthetic-analytic distinction, the mind-body problem, and the possibility of metaphysics are considered. The work of such figures as Wittgenstein, Russell, Heidegger, Husserl, Sartre, Whitehead, and Dewey are read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 315 Existentialism 3 Credits

Historical development and contemporary problems of existentialism with emphasis on the nature of man, his ability to know his situation, the relation between existence and essence, and the meaning of human life and activity. The works of such figures as Kierkegaard, Sartre, Heidegger, Camus, Kafka, Beckett, Buber, Laing, and Frankl are read and discussed.

PHL 320 Philosophy of Science 3 Credits

The logic of fundamental concepts of science and scientific methods are studied. Patterns of explanation are examined to understand the functions of laws, theories, and predictions in science. Inquiry is made into the relation between mathematics and empirical science; similarities and distinctions between the natural and social sciences. The role of science in human affairs and the value of scientific knowledge.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 334 Theories of Knowledge 3 Credits

An investigation of selected, representative theories of knowledge from classical and contemporary sources. Considers the analytic-synthetic distinctions, necessary truth, and the foundations of empirical knowledge. Such philosophers as Leibniz, Hume, Kant, Russell, and Quine are read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 336 Philosophy of Mind 3 Credits

An investigation of the nature, existence, and capacities of the mind and self in the light of recent philosophical and psychological theories, including psychoanalysis and behaviorism. Considers such topics as the interaction of mind and body, the unconscious, minds and machines, freedom of thought and action.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 343 Theories of Reality 3 Credits

An examination of metaphysical problems with an emphasis on philosophical views of human nature from ancient Greece to contemporary evolutionary theories. The writings of such classical, modern, and contemporary figures as Plato, Aristotle, Descartes, Kant, Hegel, and Darwin are read and discussed. Issues studied include the relation between mind and matter, freedom and determinism, and the existence of God.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 348 Indian Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of India. Emphasis on the disputes between the traditional Hindu and Buddhist schools of the classical period over logic, knowledge, and reality. Philosophical topics include: skepticism, the problem of universals, realism and idealism, the nature of perception, the problem of induction, the nature of causality, and the problem of identity over time. Philosophers such as Nagarjuna, Vasubandhu, Vatsyayana, Dharmakirti, and Udayana will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 358 Chinese Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of China. Emphasis on the political philosophies of ancient China. Topics include: human nature and the development of virtue, the nature and purpose of government, and the cognitive value of mystical experience. Philosophers such as Confucius, Laozi, Xunzi, Mencius, Mozi, and Zhuangzi will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 360 Contemporary Ethics 3 Credits

An examination of recent and contemporary challenges to traditional ethical theory including such movements as logical positivism, cultural relativism, feminism, environmentalism, multiculturalism, and postmodernism. Such problems as the meaning and cognitive status of value judgments, the relation between fact and value, the relativity of values, and how value judgments can be justified are considered.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 368 Japanese Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of Japan, with an emphasis on Zen Buddhism in Medieval Japan and the Kyoto school in the 20th century. Topics include: the use of meditation and koans in Zen practice, the relationship between practice and enlightenment, the nature of time, meaning and nihility, and the relationship between science and religion. Philosophers such as Kukai, Mumon, Dogen, and Nishitani will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 402 Nietzsche and Nihilism 3 Credits

A seminar dealing with Nietzsche's provocative ideas on Nihilism and the possibility of creating meaning, value, and truth for human existence. Many of his important works are read, analyzed, and critically discussed. Recent scholarly interpretations of Nietzsche's philosophy are considered.

Prerequisite(s): any previous philosophy course or permission of instructor.

PHL 408 The Philosophy of William James 3 Credits

Seminar involving a concentrated study of William James' contributions to philosophy with special attention to his pragmatism, pluralism, and radical empiricism. Many of James' philosophical works are read, analyzed, and critically discussed. Recent scholarly interpretations of James' philosophy are considered.

PHL 418 Great Buddhist Thinkers 3 Credits

Concentrated study of a single Buddhist philosopher, emphasizing the systematic views of that philosopher across a range of philosophical issues. Through an examination of primary sources in translation and recent scholarship, students will investigate the views and arguments of one important figure from the Buddhist philosophical tradition on a variety of philosophical problems regarding knowledge, existence, consciousness, religion, and ethics.

PHL 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

PHL 494 Preparation and Research for Senior Philosophy Thesis 1 Credits

Supervised by a faculty member, the Philosophy major chooses a topic, composes an outline and a bibliography. Must be completed prior to enrolling in PHL 495.

PHL 495 Senior Philosophy Thesis 3 Credits

In a tutorial setting, the Philosophy major will write a thesis which serves as the Capstone Experience in the Department.

Prerequisite(s): PHL 494.

Physics

Program Overview

Physics students at Rider develop a rigorous understanding of the natural world and the forces that govern it through a combination of traditional classes and hands-on laboratory experience. The small classes focus on a variety of topics including classical and modern physics, as well as scientific computing techniques and astrophysics. Physics students are presented with multiple research opportunities with our faculty, who actively attend national meetings and publish in international peer-reviewed journals.

The physics minor helps students seeking entrance to graduate or medical school as well as careers in physics, law, education, and business. This minor helps students develop laboratory skills, written and oral skills, as well as understanding how the laws of physics apply and can be manipulated or utilized in the real world.

Physics Minor Requirements

(20 credits)

Code	Title	Credits
PHY 200 & 200L	General Physics I and General Physics I Lab	4
PHY 201 & 201L	General Physics II and General Physics II Lab	4
PHY 203	Introduction to Modern Physics	3
PHY 300	Mechanics	3
PHY 305	Electricity and Magnetism	3
One additional 300- or 400-level physics (PHY) course		3
Total Credits		20

Courses and Descriptions

PHY 200 General Physics I 4 Credits

Introductory classical physics; Newtonian mechanics, including the conservation laws, wave motion, gravity, thermodynamics. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 210 or concurrent enrollment

Corequisite(s): PHY 200L.

PHY 200L General Physics I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 200.

PHY 201 General Physics II 4 Credits

A continuation of the concepts developed in Physics 200. Electricity, electrical circuits, magnetism, Maxwell's equations. Light and optics, including lenses, interference, and diffraction. Three hours of lecture and one three-hour lab per week. Prerequisite(s): PHY 200, MTH 211 or concurrent enrollment.

Corequisite(s): PHY 201L.

PHY 201L General Physics II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 201.

PHY 203 Introduction to Modern Physics 3 Credits

Covers space-time relativity, elementary particles, and basic quantum mechanics, including solutions of the Schrodinger wave equation. Applications of quantum theory in atomic, nuclear, and solid-state physics.

Prerequisite(s): PHY 201 or permission of instructor.

PHY 300 Mechanics 3 Credits

Kinematics and dynamics of particles and systems, analysis of harmonic oscillator systems, normal modes, Lagrangian and Hamiltonian dynamics and classical waves are studied.

Prerequisite(s): PHY 201, MTH 250.

PHY 305 Electricity and Magnetism 3 Credits

Electro- and magnetostatics, fields and potentials, and boundary value problems are covered.

Prerequisite(s): PHY 201, MTH 250.

PHY 310 Advanced Electricity and Magnetism 3 Credits

Maxwell's equations; electromagnetic waves in vacuum and in material media; radiation, propagation, reflection, and refraction.

Prerequisite(s): PHY 305, MTH 308.

PHY 315 Thermodynamics and Statistical Mechanics 3 Credits

Thermodynamic systems; the first and second laws of thermodynamics; entropy and thermodynamic potentials; distribution of molecular speeds; Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac distributions.

Prerequisite(s): PHY 201.

PHY 320 Quantum Mechanics 3 Credits

Historical background; the Bohr Theory; the Schrodinger equation, its interpretation and applications; the uncertainty and exclusion principles; development of the formalism.

Prerequisite(s): PHY 300.

PHY 330 Basic Electronics 3 Credits

An experimental study of devices and circuits in analog and digital electronics. No previous experience with electronic circuits is assumed; introductory topics including signal acquisition, computer interfaces, and analog/digital signal processing will be covered. One hour of lecture plus two three-hour labs per week.

Prerequisite(s): PHY 201 or permission of instructor.

PHY 350 Advanced Laboratory 2 Credits

Experiments in atomic and nuclear physics, electricity and magnetism, and physical optics. Students have the opportunity to work intensively on a particular experiment. Minimum of five to six hours per week.

PHY 400 Atomic Physics 3 Credits

Quantum mechanics and the one-electron atom; atomic structure and optical spectra of multi-electron atoms. Quantum statistics, band theory of solids.

Prerequisite(s): PHY 320.

PHY 405 Fundamentals of Nuclear Physics 3 Credits

Nuclear mass and size; nuclear forces and some models of the nucleus; radioactivity and detection; subnuclear particles and resonances.

Prerequisite(s): PHY 320.

PHY 415 Physical Optics 3 Credits

Waves and the superposition principle; interference, Fraunhofer and Fresnel diffraction; electromagnetic nature of light; absorption and scattering; dispersion; polarization.

Prerequisite(s): PHY 201, MTH 250.

PHY 416 Modern Experimental Optics Lab 1 Credits

A laboratory course in geometrical and physical (wave) optics, designed to supplement the material presented in PHY 415. Serves as an introduction to the optical equipment and techniques that are employed in laboratory research. A series of experiments cover the topics of polarization, interference, image formation, Fourier optics and lasers, and optical spectroscopy.

Prerequisite(s): PHY 201.

PHY 450 Topics in Modern Physics 3 Credits

A selected topic of contemporary interest in physics, e.g., general relativity and gravity waves, is studied. Emphasis on current journal literature and research. May be taken more than once with departmental approval. An excellent introduction to independent research in one area of physics.

Prerequisite(s): PHY 201.

PHY 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

PHY 491 Internship in Physics 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the student's overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Political Communication

Program Overview

Political communication is an interdisciplinary minor that is designed to investigate the manner in which new technologies and strategies of communication change the emerging political order, and the manner in which the emerging political order structures the dissemination of information among citizens of the United States and other nations.

The minor in political communications provides preparation for those students planning further study in graduate or law school, careers in governments, international affairs, political campaigns, political journalism, or private business concerned with government activity. Moreover, students should further their abilities to construct arguments based upon ethical and relevant data, think clearly and critically, and develop the facility to express themselves persuasively.

² Only one special project may be counted toward the minor.

Courses and Descriptions

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 205 Theories of Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media. Note: This course is crosslisted as GLS 393. Students may not get credit for both COM 393 and GLS 393.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

GLS 180 Understanding Global Relations 3 Credits

Offers an introduction to Global and Multinational Studies by exposing the student to basic concepts necessary to understand the dynamics underlying the emerging worldwide society of diverse nations. The student will become acquainted with the mechanisms by which contacts are built across nations, and the factors that shape the conception of and relations with "the other."

POL 210 Public Opinion 3 Credits

Public opinion as a social force and as expression of public sentiment on political and social issues. Topics include: development and dissemination of opinions, the measurement of public opinion, public opinion and governmental processes, and the reciprocal relationship between mass media and public opinion. Note: This course is cross-listed as GLS 210. Students may not get credit for both POL 210 and GLS 210.

POL 230 Methods of Political Analysis 3 Credits

An overview of the various qualitative and quantitative methods that political scientists use to study their discipline. Themes include analyses of political participation and support, methods of studying elections, measures of political tolerance and liberalism.

POL 247 Political Campaigning 3 Credits

This course entails the study of campaigning for political office at the federal, state and local levels in the United States. While attention will be given to how the broader political environment and specific factors, e.g., partisanship, hot button issues, local interests, and money, affect the nature of campaigns, the course's primary focus will be on how to organize and conduct a successful and ethical campaign, including how to collect and analyze pertinent data, manage a staff, develop a communications plan, including social media, and get out the vote.

POL 295 Special Topics in Political Science 3 Credits

For non-seniors who engage in serious research in political science. Topic to be approved by instructor and department chairperson.

POL 301 Civil Liberties in the U.S. 3 Credits

The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as HLS 301. Students may not get credit for both HLS 301 and POL 301.

POL 305 Political Parties and Electoral Behavior 3 Credits

The structure, character, and functions of U.S. political parties and pressure groups, and their impact on public policy. Parties are analyzed within the broader scope of organizational theory and comparative party systems. Major emphases on their historical origins, their role in contemporary political life, and particular aspects of party politics—local organization, membership, campaigning and elections, policy-making roles, and leadership.

POL 306 American Political Film 3 Credits

This course analyzes the structure, history, and impact of the genre of political film. It begins with a discussion of how one distinguishes a political film from other forms of cinema. It then proposes insights into the manner in which these films evoke a particular time and place in politics, affect the viewer's interpretation of a political event or figure, and have an effect upon a viewer's political perceptions or behavior. The student will also learn to review films critically, both as political statements and as effective (or ineffective) conveyors of political messages. Note: This course is cross-listed as GLS 306. Students may not get credit for both POL 306 and GLS 306.

POL 307 Political Communication 3 Credits

The meaning and uses of political communication are examined, the manner and forms such communication takes, and the history of political discourse. Major topics include the role of communication in elections and the development of public policy, how political communication strategies have changed with the rise of mass media, and the development of national and international publics for discourse. Note: This course is cross-listed as GLS 307. Students may not get credit for both POL 307 and GLS 307.

POL 313 American Presidency 3 Credits

A description and analysis of the American presidency: its historical development, the internal organization, and ecological context. Basic issues include the intent of the framers of the Constitution, the historical accumulation of presidential powers, and institutional limits on presidential power (e.g., Congress and the bureaucracy).

POL 315 Global Issues 3 Credits

Military, economic, demographic, and environmental threats to global security in the post-Cold War era. Forces of transnational integration vs. forces of intrastate fragmentation. Inadequacy of international law and organization to deal with these problems within the confines of the sovereign nation-state system. Note: This course is cross-listed as GLS 315. Students may not get credit for both POL 315 and GLS 315.

POL 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

POL 491 Internship in Political Science 1-4 Credits

Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of fieldwork per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.

Prerequisite(s): permission of instructor.

Political Science

Program Overview

How did American politics become so polarized? How can we understand the global shift to the right in electoral politics? What is freedom and how is it best protected? What causes politics to turn violent, and what can be done about it? How can citizens affect change in their own communities and beyond?

These are just some of the big questions students will confront in political science courses at Rider University. Through these courses, students will examine politics at every level: local, state, national, international and global. They will acquire a variety of methodological skills and theoretical perspectives in order to develop a broad understanding of political institutions and processes, political cultures, and political actors. Students enjoy experiential learning in many of their courses, including Congressional simulations, mock trials, and creative problem solving in foreign policy.

Curriculum Overview

Students take courses in many subfields of political science:

- American politics
- comparative politics
- constitutional law
- political theory
- international relations

Beyond the Political Science major, the department also offers majors in Health Care Policy (p. 431) and Global Studies (p. 417); as well as minors in Homeland Security Policy (p. 448), Global Studies (p. 417), and Political Communication (p. 497).

We also offer a Master's degree in Homeland Security (p. 448), which Rider undergraduates can complete in one additional (fifth) year of study.

Rider's Political Science students have many opportunities for hands-on Engaged Learning:

- The Rebovich Institute for New Jersey Politics (<http://www.rider.edu/offices/services/rebovich-institute-new-jersey-politics/>) places students in internships in NJ, PA, NY, DC and beyond, offering fellowships to support students during unpaid summer internships. The Institute also brings many noteworthy speakers to campus, including former Speaker of the House Newt Gingrich (R) and Rep. Bonnie Watson Coleman (NJ-D).
- Rider's award winning Model United Nations (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-science/liberal-arts-programs/political-science/model-united-nations/>) (MUN) team has received Outstanding Delegation (the highest award) nine out of the last ten years. Students in MUN earn course credit while preparing to represent their delegation in an annual week-long conference at the United Nations in New York City.

- Washington Semester Program (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-science/liberal-arts-programs/political-science/washington-semester-program/>) gives students the opportunity to intern in Washington, D.C. while taking courses at American University.
- Student Global Village® course GLS 285 allow students to take a semester long course virtually alongside students in Iraq, Northern Ireland, or another international university.
- Political Science faculty offer multiple teach-ins every semester, where they offer expert analysis of current events in politics. Students also lead teach-ins about their experiences outside the classroom, including Model UN.
- In addition to joining the Political Science Club, students are encouraged to join the College Democrats or College Republicans.

Our political science faculty members are active researchers and practitioners who bring their expertise into the classroom. Rider students find many opportunities to collaborate with faculty on research and present their work at disciplinary conferences. Recent research areas include:

- the politics of gas and oil pipelines
- campaign finance and political corruption
- the role of Hip Hop for under-privileged migrant youth
- world opinion and the Northern Ireland Peace Process
- the role of private military companies in African conflicts
- the role of ignorance in American politics and political thought

The study of politics and government is an important part of a well-rounded liberal arts education. Studying political science and the liberal arts will enhance a student's skills in critical thinking, written and oral communication, and problem solving, which will serve them well in any career. More and more business leaders, including Rider alumni, report that they seek precisely these skills in potential employees.

Graduates in Political Science pursue a wide range of careers and public service opportunities, as well as advanced study, including:

- local and national politics and government
- international politics and IGOs (international governmental organizations)
- non-governmental organizations (NGOs)
- Peace Corps and Teach for America
- community and political organizing
- think tanks and policy analysis
- business
- journalism
- education
- graduate and law school

Honors Program in Political Science

Political Science majors who have completed eight courses in political science with a cumulative average of 3.5 may request candidacy for graduation with honors in political science. Students should submit to the chairperson of the department early in their sixth semester (March 15 or October 15), an Independent Research and Study project signed by a faculty sponsor and approved by the department. Applicants typically enroll in POL 490 in their seventh semester to develop a thesis proposal. Upon approval, the honors candidate will enroll in POL 499.

Students also take a Senior Honors Thesis, for six credits, in the last semester. A substantive research work should be presented no later than April 1 or November 1 before a committee made up of the thesis advisor and two faculty members approved by the department. Honors in political science is awarded upon the successful completion and defense of the thesis.

Degree Offered

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

POL 100 Introduction to American Politics 3 Credits

An examination of basic principles of the U.S. constitutional system; the operation of the democratic process; the organization, powers and procedures of Congress, the presidency and the federal judiciary; and the functions, services, and financing of the national government. Emphasis is on public issues, national priorities, and civil liberties. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Note: This course is cross-listed as HLS 100. Students may not get credit for both POL 100 and HLS 100.

POL 102 Understanding Politics 3 Credits

Introduction to the study of politics and government, including major political theories and ideologies, systems of government (i.e., presidential, parliamentary, authoritarian, totalitarian), public opinion and behavior, international relations and war, and contemporary policy issues. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

POL 200 NJ Government and Politics 3 Credits

Political institutions, processes, and problems of state and local governments of New Jersey. Analysis of legislative, executive, judicial, regulatory bodies, special districts, and autonomous agencies. Aspects of personnel, finance, and services, as well as political parties and elections.

POL 201 Policy Issues, Advocacy, and Budgeting 3 Credits

Surveys various domestic economic and social policy issues, the government budgeting process, and how citizens and groups advocate their interest through organizing, coalition-building and lobbying. Emphasis on developing practical skills in issue analysis, lobbying, legislative tracking, and public budgeting.

POL 202 The Political System - Theories and Themes 3 Credits

This course serves as a gateway to the subfields of comparative politics and international relations. The concept of the political system helps political scientists to organize political interrelations into patterns that allow systematic selection and interpretation of information and the study of processes and outcomes of politics in a variety of settings. The course introduces students to the main brands of normative theory prescribing the principles directing the operation of the political system, to some of the most important methods used to compare political systems and/or their components, and to the foremost approaches utilized in the study of the relations between political systems and their environments. Note: This course is cross-listed as HLS 202. Students may not get credit for both POL 202 and HLS 202.

POL 203 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective. Note: This course is cross-listed as HLS 203. Students may not get credit for both HLS 203 and POL 203.

POL 204 Development and Structure of the US Intelligence Community 3 Credits

This course provides a historical review of intelligence following World War II. It will examine the major functions of intelligence, as well as intelligence as a part of the foreign policy process: collection, analysis, counterintelligence, and covert action. Students will be introduced to a range of collection procedures: human, open source, electronic, photographic, and signal, with emphasis placed on interpreting and writing intelligence summaries. Note: This course is cross-listed as HLS 204. Students may not get credit for both POL 204 and HLS 204.

POL 205 Introduction to Public Policy 3 Credits

The course provides students with an introduction to the study of public policy by linking the theoretical with the practical. The course focuses on three areas of analysis: 1) descriptive 2) evaluative and 3) prescriptive. Students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options. Last the course provides examples of public policy problems through the substantive policy areas of health, environment and education.

POL 206 Healthcare Regulation and Governance 3 Credits

Health Regulation and Governance explores the institutions, processes and actors involved in governing and regulating the healthcare system in the US. The course engages the topic through the lens of federalism by examining the role of the Executive, Legislative and Judicial branches of government in regulating and governing healthcare at the national level as well as the role of the states in this policy area. Students will not only be introduced to the structure of regulation and governance of healthcare in the US, but will also be able to contextualize contemporary issues in healthcare in order to not simply address problems in the sector, but to also begin to identify solutions to issues that impact the population.

POL 210 Public Opinion 3 Credits

Public opinion as a social force and as expression of public sentiment on political and social issues. Topics include: development and dissemination of opinions, the measurement of public opinion, public opinion and governmental processes, and the reciprocal relationship between mass media and public opinion. Note: This course is cross-listed as GLS 210. Students may not get credit for both POL 210 and GLS 210.

POL 215 Global Politics 3 Credits

The struggle for power, wealth, and order at the global level involving nation-states, intergovernmental organizations (such as the United Nations, the European Union, etc.), non-governmental organizations, transnational enterprises and other non-state entities, using military, economic, diplomatic, legal, and communication instruments. Overview of global problems such as the proliferation of weapons of destruction, ethnic and religious conflicts, human rights, and the global environment in the 21st century. Note: This course is cross-listed as GLS 215. Students may not get credit for both POL 215 and GLS 215.

POL 216 Comparative Political Systems 3 Credits

A general introduction to types of government and political regimes of the world as they try to cope with the dual challenge of ethnic micropolitics and transnational globalization. Major prototypes of democracy: the British parliamentary system, the American separation of powers system, and various combinations of these two. Traditional autocracy, totalitarian dictatorships, and late 20th-century authoritarian regimes. Students are expected to acquire in-depth knowledge of comparative political systems, and to develop a basic understanding and appreciation of the major concepts and themes in comparative political systems studies.

POL 220 Terrorism & Counter Terrorism 3 Credits

This course introduces students to the arguments about the definition of terrorism, the historical use of terrorism and the roles of ideology, religion, and psychological factors that help explain and predict it. The course seeks to identify the components of national security policy aimed at countering such elements and their cost, both in financial and civil right terms. Finally, to illuminate both the definition and the policies discussed, the course will offer brief comparisons with other states, especially Israel, the UK, and Russia.

POL 225 Nationalism in World Politics 3 Credits

Nations and nationalism. An overview of nationalistic manifestations in the world today. Nations, states, nation-states. Multinational states, stateless nations. Imperialism, anti-imperialism; nativism vs. internationalism and globalism. Topics include nationalisms in the Holy Land; in the former Yugoslavia; in the former Soviet Union and its successor states; and economic Nationalism vs. Globalization. Note: This course is cross-listed as GLS 225. Students may not get credit for both POL 225 and GLS 225.

POL 230 Methods of Political Analysis 3 Credits

An overview of the various qualitative and quantitative methods that political scientists use to study their discipline. Themes include analyses of political participation and support, methods of studying elections, measures of political tolerance and liberalism.

POL 235 Race and Ethnicity in American Politics 3 Credits

Examines the changing political, economic, and social situation of racial and ethnic groups in American politics since the 1950s. Topics include the relationship between race/ethnicity and voting behavior, political parties, and election results. Includes an analysis of specific areas of contemporary racial and ethnic conflict, such as voting rights, immigration, and affirmative action.

POL 239 Political Thinkers & Thought 3 Credits

A survey of the most significant political thought from ancient times into the modern era. Subject matter includes discussion of such questions as the nature of freedom, natural law and right, constitutionalism, political obligation, justice, form of regime.

POL 247 Political Campaigning 3 Credits

This course entails the study of campaigning for political office at the federal, state and local levels in the United States. While attention will be given to how the broader political environment and specific factors, e.g., partisanship, hot button issues, local interests, and money, affect the nature of campaigns, the course's primary focus will be on how to organize and conduct a successful and ethical campaign, including how to collect and analyze pertinent data, manage a staff, develop a communications plan, including social media, and get out the vote.

POL 255 European Politics 3 Credits

A comparative analysis of the social and political systems of Britain, France, Germany and other Western countries within the European framework. Emphasis will be on the identification of ways in which countries similar in social characteristics are also similar in their political systems and on the extent and circumstances under which they differ. Similarities and contrasts will also be drawn with political structures and processes in the United States. This course, on occasion, may contain an optional travel component during January.

POL 260 Politics of Law and Order 3 Credits

The constitutional, legal, political, and administrative aspects of the criminal justice system in the United States are studied, including the court system at all levels of government, law enforcement agencies, correctional programs and institutions, probation, parole, and the relationship of our legal institutions to the broader political system.

POL 270 Interest Groups and Lobbying 3 Credits

The course will introduce students to the area of interest groups and lobbying. Topics to be covered include theoretical developments, methodological approaches of group formation, organizational maintenance, and strategies used to influence public policy in the executive, legislative, and judicial branches of government.

POL 280 Sex & Gender in International Politics 3 Credits

What's a student of political science, International Relations (IR), or another social science field to do about feminism? This is a question that has troubled IR for decades. While feminist debates engaged people in spaces outside the disciplines of political science and particularly IR, IR scholars did their best not to see the relevance of feminism for their own debates. That did not stop some feminists from rethinking key IR concepts like power, race and the state, but such contributions were largely ignored by IR scholars until very recently. It was only in the last decades, when feminist questions pushed their way onto the IR agenda through books, journals, and conferences, that feminism suddenly seemed attractive to IR scholars. Designed as an interdisciplinary course with a strong reference to Global and International Politics, this course will provide a basic introduction to some of the major global questions as seen through a feminist lens. This course is cross-listed as GLS 280. Students may not get credit for completing both GLS 280 and POL 280.

POL 281 Sex & Gender in U.S. Politics 3 Credits

Legal traditions have long maintained that a "man's home is his castle," beyond the reach of the state (thereby ignoring "private" injustices like domestic violence). But the state has always found ways to justify some interventions in citizens' private lives, including legislation of abortion and homosexuality. The personal has always been political, as second-wave feminists rightly insisted in the 1960s. This course examines the intersection of private and public, looking at the ways in which sex, identity and sexuality are implicated in and shaped by politics and policy-making: including the gendered division of labor inside and outside the home; the politics of gender identity; the legislation and policing of sex, sexuality, marriage and families; and the challenges facing women who enter politics. We will ask provocative and pressing questions like: How do sex and sexuality intersect with race, class, disability, and more? Can women (or anyone) really "have it all"? What is the future of transgender rights in the U.S.? Why do women still make up only 20% of Congress? Do women lead differently? To answer these questions, we will turn to political theory, political science, public policy, legal studies, and more.

POL 295 Special Topics in Political Science 3 Credits

For non-seniors who engage in serious research in political science. Topic to be approved by instructor and department chairperson.

POL 300 U.S. Constitutional Law 3 Credits

The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as HLS 300. Students may not get credit for both HLS 300 and POL 300.

POL 301 Civil Liberties in the U.S. 3 Credits

The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as HLS 301. Students may not get credit for both HLS 301 and POL 301.

POL 302 Insurgency 3 Credits

The course explores the occurrence of insurgencies and civil wars. It examines the causes of such conflicts by focusing on the role of resources, state capacity, ethnic/religious differences and power in the initiation of violence. Students will learn how recruitment tactics and access to funding sustain guerrilla warfare. Lastly, the course will focus on conflict management by emphasizing specific tools for terminating and preventing intrastate conflicts including the impact of international interventions, counterinsurgency strategy of winning the hearts and minds, institutional design, and reconciliation.

POL 303 Global Justice 3 Credits

This course examines some of the most vexing problems in today's world of global interconnectedness. How can we harness the potential of global cooperation to solve problems that cross national borders? We will critically analyze the potential for human rights to protect vulnerable individuals, including victims of human trafficking. We will also evaluate the distribution of global resources and costs, including natural resources, extreme poverty and environmental degradation. What do we owe those who live in distant lands? Throughout we will ask how reality matches up to our best hopes for the present and future.

POL 304 Political Behavior: Fear, Risk and Crisis 3 Credits

The course focuses on various analytical approaches in behavioral political science. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior-e.g., voting/non-voting, the formation of political partisanship and ideology, issue perceptions, responding to risk and uncertainty in the political environment, and engaging in civic political participation. Note: This course is cross-listed as HLS 304. Students may not get credit for both POL 304 and HLS 304.

POL 305 Political Parties and Electoral Behavior 3 Credits

The structure, character, and functions of U.S. political parties and pressure groups, and their impact on public policy. Parties are analyzed within the broader scope of organizational theory and comparative party systems. Major emphases on their historical origins, their role in contemporary political life, and particular aspects of party politics—local organization, membership, campaigning and elections, policy-making roles, and leadership.

POL 306 American Political Film 3 Credits

This course analyzes the structure, history, and impact of the genre of political film. It begins with a discussion of how one distinguishes a political film from other forms of cinema. It then proposes insights into the manner in which these films evoke a particular time and place in politics, affect the viewer's interpretation of a political event or figure, and have an effect upon a viewer's political perceptions or behavior. The student will also learn to review films critically, both as political statements and as effective (or ineffective) conveyors of political messages. Note: This course is cross-listed as GLS 306. Students may not get credit for both POL 306 and GLS 306.

POL 307 Political Communication 3 Credits

The meaning and uses of political communication are examined, the manner and forms such communication takes, and the history of political discourse. Major topics include the role of communication in elections and the development of public policy, how political communication strategies have changed with the rise of mass media, and the development of national and international publics for discourse. Note: This course is cross-listed as GLS 307. Students may not get credit for both POL 307 and GLS 307.

POL 308 Capitalism and Inequality 3 Credits

This class is about market economies: how they are theorized, how they operate, and how they affect the humans who live and work within them. The first part of this course offers an overview of major modern theorists of capitalism (with selections chosen for a political science audience), including Smith, Veblen, Schumpeter and Keynes. These thinkers have made influential contributions to debates about the proper role of government in regulating and shaping economic relations and conditions. We then turn to contemporary theories of distributive justice, including libertarianism and egalitarianism. The second half of the course explores realities of socioeconomic inequality, the experience of poverty in the U.S., as well as the kinds of policies which might alleviate or resolve various dimensions of inequality and poverty. This course prepares students to evaluate public policies and articulate policy positions while attending to their economic and human costs.

POL 310 Political Psychology and Human Nature 3 Credits

The 2016 presidential campaign season saw a marked increase in partisanship, polarization, animosity and resentment among Americans, mirroring a worldwide trend toward “tribalistic” group identification at the expense of outsiders. Why can't we all just get along? What makes it so hard to sympathize with those who seem different or unfamiliar, and so easy to assume the worst about them? This course will bring together classic political theory, psychology and the social sciences, in order to help explain political beliefs and behaviors. We will begin by considering how classic political theory has conceptualized human nature, and the various implications for political life. We will then consider scientific perspectives: evolutionary anthropology, social psychology and cognitive neuroscience. We will examine the role of bias in cognition and politics and we will critically interrogate assumptions about rationality. We will also see that different psychological dispositions underlay conservatism and liberalism. Ultimately, this course will consider how these features of human cognition shed light on partisanship and polarization, racial bias, and policy preferences, including popular reception of science concerning vital issues such as climate change and the safety of GMOs. We will conclude with considerations of how a better understanding of psychology might propel us toward a more productive political discourse.

POL 311 Sovereignty, the State and Borders 3 Credits

Borders have a prominent place in politics and human history. In the twentieth century, the best-known barriers were the militarized Maginot Line and the Iron Curtain. Today, the political popularity of borders persists but the nature and quality of these borders and the threats they were created to repel have changed. Modern borders are designed not to keep militaries out, but to deter a perceived invasion of “undesirables”—with terrorists and unwanted immigrants leading the list of state concerns. Nowhere is this more evident than along the geographic fault lines dividing rich and poor regions, e.g. the Mediterranean Sea and the U.S.-Mexican border region. This course will examine the dynamic interactions between the question of how to govern borders and the twenty-first century liberal state with its diluted sovereignty—due to immigration, trade and international laws and regimes.

POL 312 Congressional Politics 3 Credits

An intensive analysis of the legislative process in the United States, considering both the internal organization and operation of Congress, and Congress' role in the broader American political system. Fundamental issues include the theory and practice of representation; the committee system, seniority and expertise; executive and legislative interaction; and the politics of congressional reform.

POL 313 American Presidency 3 Credits

A description and analysis of the American presidency: its historical development, the internal organization, and ecological context. Basic issues include the intent of the framers of the Constitution, the historical accumulation of presidential powers, and institutional limits on presidential power (e.g., Congress and the bureaucracy).

POL 314 Congressional Power and National Security Policy 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. Particular attention is paid to the role of the US government being able to balance individual rights and liberties within the national security state. Last, the course also takes an in-depth analysis of the U.S. Congress, looking comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror? Note: This course is cross-listed as HLS 314. Students may not get credit for both HLS 314 and POL 314.

POL 315 Global Issues 3 Credits

Military, economic, demographic, and environmental threats to global security in the post-Cold War era. Forces of transnational integration vs. forces of intrastate fragmentation. Inadequacy of international law and organization to deal with these problems within the confines of the sovereign nation-state system. Note: This course is cross-listed as GLS 315. Students may not get credit for both POL 315 and GLS 315.

POL 316 Presidential Power and National Security Policy 3 Credits

This course examines the development of the National Security State since the Second World War, and the ways in which it has affected, and been affected by, the Federal Executive. Topics to be covered will include the post-World War II redefinition of “national security”, the Cold War (with a special focus upon war powers during Korea and Vietnam) and the changes that have occurred with the “War on Terror.” Note: This course is cross-listed as HLS 316. Students may not get credit for both POL 316 and HLS 316.

POL 317 Model United Nations 3 Credits

Model United Nations (POL 317) is the course that prepares Rider University's award-winning Model United Nations (MUN) team for the annual National MUN competition in New York City. The team has brought home top awards for the past decade and continuously strives for excellence. POL 317 is a student-led course that hones writing, public-speaking and researching skills of student-delegates and it represents student engagement at the highest level. Chosen through a rigorous selection process in the fall semester, the student-delegates write position papers during the winter break, and develop caucusing, team-working, and presentation skills in class during the spring semester. During the past five decades, Rider University's MUN team has represented more than 50 countries, and competed with thousands of delegates from national and international universities. It is one of the premier engaged learning and cohort-building institutions on campus.

POL 318 Conflict Resolution 3 Credits

How do you craft a peace deal in a war-ravaged environment? Can negotiations with rogue regimes succeed and prevent the onset of conflict? With massive casualties, and unspeakable human rights abuses, conflicts continue to present a challenge to people around the globe. In this course, we will explore the dynamics of conflict management designed to keep countries from waging violence against each other. Our focus is both on ending existing violent conflicts and on preventing escalation of tensions. We will explore the impact of mediators and external interventions by international organizations or individual countries on conflict management. We will also examine the role of the International Court of Justice in resolving disputes when direct negotiations fail to succeed. Finally, we will study existing peacebuilding efforts designed to improve relations among victims and killers in post-conflict environment. Insights from theory on commitment problems will help us understand why peace is more vulnerable in domestic than in international conflicts. Throughout the semester, we will rely on various case illustrations from international and domestic conflicts, and participate in a simulation activity that will allow us to assume the roles of negotiators in disputes.

POL 319 Terrorism, Revolutions and Political Violence 3 Credits

Revolutions are the mad inspiration of history. Trotsky's characterization calls attention to three important dimensions of violent political participation: the historical settings, ideology, and emotional fervor of the practitioners. The course focuses on these dimensions by analyzing revolutionary and terrorist movements in the 20th century. Special attention is given to the use of violence in the post-Cold War new world disorder. Note: this course is cross-listed as HLS 319 and GLS 319. Students may only get credit for one course: HLS 319, GLS 319 or POL 319.

POL 320 Politics of the Middle East 3 Credits

The course emphasizes the relationships between social and political structures, the role of religion, and the problems of modernization in the Middle East. Similarities and contrasts will be drawn between the Arab and non-Arab countries of the Middle East. The political systems of Egypt, Syria, Israel and Saudi Arabia are examined in terms of political culture, structure, and political processes.

POL 321 International Law 3 Credits

This course covers the basic doctrines of international law and their relationship to the contemporary international community. These include the jurisprudence of international law; the history of the international legal system; customary international law; Treaty law; sovereignty, statehood and recognition; jurisdiction and immunities; the role of international organizations; international criminal responsibility; and the relationship of the international legal system to the U.S. domestic legal system. The objectives of international law are to foster the peaceful settlement of disputes; facilitate transnational communication and commerce; encourage respect for human rights; as well as to preserve the environment. This course is cross-listed as GLS 321. Students may not get credit for both POL 321 and GLS 321.

POL 322 African Politics 3 Credits

Africa is in a process of transition, a continent of growing strategic importance to the U.S. and a land with considerable variation in political and economic success. The course is an introduction to the politics of sub-Saharan Africa. To understand the continent's current challenges, the course examines the legacies of colonial rule, including colonial mark on the politics of ethnicity; focuses on the rise of authoritarianism in Africa in the 1970s and 1980s; examines the success and failure of democratization that is transforming the continent today; embarks on the quest to understand the continent's struggle with poverty and debt. Lastly, the course explores some of the biggest obstacle to Africa's stability, including state collapse, wars, corruption, while contemplating the future that lies ahead.

POL 325 Public Administration 3 Credits

Public administration in modern society, emphasizing the administrative formulation of public policy and its implementation. Attention on who gets what, when, and how from the decisions of administrative units; the role administrators have in policy-making compared to elected legislators, chief executives and judges; the effect administrators have on the benefits citizens receive from government; and the effect administrators have on citizens' behavior. Note: This course is cross-listed as HLS 325. Students may not get credit for both HLS 325 and POL 325.

POL 326 Power in American Politics 3 Credits

Examines various explanations of who has power in American politics. Explores the roles of appointed and elected officials, business and interest groups, the media, and the general public in shaping public policy. Special attention to political change, including the impact of broad social movements on the responsiveness of the political system.

POL 327 Contemporary Issues in American Public Policy 3 Credits

An in-depth examination of current issues in American politics. Drunk driving, political corruption, drug policy, education, and poverty are among the issues to be considered. Emphasis on analyzing policy problems and on developing and evaluating proposed solutions.

POL 328 Environmental Politics 3 Credits

Environmental Politics examines how policymakers deal with the political challenges of unsustainable resource consumption, which is a primary determinant of environmental problems such as climate change, adverse health effects, and biodiversity loss. The course introduces students to environmental politics and policies at the local, state, national, and international levels. The course is designed to provide students with a framework for understanding how varied interests compete within political institutions in order to transform contending ideas into public policy. With that in mind, students will not only become more informed consumers of political information, but will also become more effective at analyzing and advocating for policies as it relates to the environment.

POL 329 Comparative Environmental Policy 3 Credits

Comparative Environmental Policy analyzes cross-national approaches in developing, implementing, and evaluating policy responses to environmental problems. The course analyzes the political factors, actors, and tools that help and explain why some societies have been more likely to develop effective responses to environmental threats. Note: This course is cross-listed as GLS 329. Students may not get credit for both GLS 329 and POL 329.

POL 330 Geopolitics of Energy 3 Credits

Geopolitics of Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

POL 331 Political Corruptions 3 Credits

This course will introduce students to one of the central political issues in the USA as well as abroad: corruption. Whereas this was considered in earlier days as 'temporary malady' of third world systems, today it is considered a pervasive phenomenon in democratic systems as well. As such it acquired widespread scholarly as well as public attention in established democracies such as the USA (at least since the elections of 2016). The course will utilize a range of approaches to examine the meaning of corruption, the link between what the law defines as corruption and what is understood by the term by broad publics, the interaction between both conceptions and system legitimacy, and the methods by which corruption may be contained.

POL 335 Urban Politics 3 Credits

Political structure and administration of municipalities in the United States. Emphasis on challenges posed by suburbanization, global and regional shifts in business, economic dislocation, housing, mass transportation, race relations, and policing.

POL 340 Modern Democracy and Its Critics 3 Credits

The course examines the fundamental assumptions underlying modern democratic theories and the main theoretical attacks launched against them. Among the contending theories to be discussed are right and left-wing anarchism, the old and the new left, fascism, intellectual elitism, and techno-conservatism. Note: This course is cross-listed as GLS 340. Students may not get credit for both POL 340 and GLS 340.

POL 342 Contemporary Political Theory: Freedom and Authority 3 Credits

Concepts of freedom and authority in 19th and 20th-century political theory. Emphasis on such important thinkers as Nietzsche, Freud, Sartre, Camus, and Marcuse. Note: This course is cross-listed as GLS 342. Students may not get credit for both POL 342 and GLS 342.

POL 343 American Political Thought 3 Credits

The philosophical background and moral principles of American political society: liberty, equality, natural law and natural right; constitutionalism and nation-building. The development of the ideologies of liberalism, conservatism, and libertinism are also covered.

POL 345 Ancient Political Theory: Justice 3 Credits

The existence of society over time requires high degree of predictability and hence laws, whether explicit or implicit. These derive their capacity to regulate life from the widespread notion that they are proper and that they should be obeyed. In a word, they accord to our notions of justice. These, however, are not stable. Resting on the understandings of man, society, nature and the relations between them, they develop under the impact of human thought and changing realities. The result is what can be compared to a layered cake. This course treats some of the main contributions made by philosophers from Plato to Rawls to our concept of justice and the manner by which they have shaped our concepts of justice in the US and West in general. Cases in which courts (mainly the US Supreme Court) made use and applied the thinking of earlier philosophies of justice will illustrate the process by which we adjust the boundaries between legality and criminality and determine how we should behave towards each other.

POL 346 The Politics and Ethics of Emergencies 3 Credits

This course examines historic and present day cases, ranging across Europe and the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, take on emergency powers to become so-called "states of exception." While in some cases such states have imposed mild and limited emergency measures, others have employed more draconian measures, suspending, if not dissolving, constitutionally guaranteed civil liberties, often for indeterminate and protracted periods. How various states have behaved in emergency situations will be the major content of this course. Note: This course is cross-listed as HLS 346. Students may not get credit for both HLS 346 and POL 346.

POL 350 U.S. Foreign Policy and Security Policy 3 Credits

Principles, institutions, and processes involved in the formulation and implementation of policies regarding the nation's military, economic, and environmental security within the global framework. Strands, trends, and problem areas in U.S. foreign policy, with focus on the changing global environment of the post-Cold World War. Note: This course is cross-listed as HLS 350, GLS 350. Students may get credit for only one.

POL 351 Critical Views of Global Security 3 Credits

This course will examine the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspective on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security. Note: This course is cross-listed as HLS 351. Students may not get credit for both HLS 351 and POL 351.

POL 361 Courts, Judges and Politics 3 Credits

In-depth examination of the nature of judicial decision-making and the impact that judicial decisions have on society. Considers the sources of judicial authority, judicial fact-finding, statutory and constitutional interpretation, individual and collective processes of judicial decision-making, relations between judges and other government officials, and the political consequences of judicial decisions with particular emphasis on federal courts and judges. Note: This course is cross-listed as HLS 361. Students may not get credit for both POL 361 and HLS 361.

POL 363 Human Rights in Global Context 3 Credits

Examines human rights – droits de l'homme, derechos humanos, Menschenrechte, "the rights of man" – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breath and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as HLS 363. Students may not get credit for both HLS 363 and POL 363.

POL 365 Third World Politics 3 Credits

Studies the major political issues of the Third World. Particular reference to political systems of Africa, Asia, Latin America, and the Middle East according to the relevance of the examples to large conceptual issues, and according to the major interests of the instructor. Typical issues include neocolonial dependency, the role of the state in newly developed countries, military rule and democratization. Note: This course is cross-listed as GLS 365. Students may not get credit for both POL 365 and GLS 365.

POL 367 Global Immigration 3 Credits

This course analyzes mass migrations and refugee movements and what they mean for the stability of nations, the increasing potential of severe culture clashes within societies, and the root causes of (forced) migration movements, such as problems of violence, terror and genocide, as recently seen in Darfur, Rwanda and Bosnia. In certain European countries the frequently failed integration and assimilation policies resulted in an Islamic alienation; terrorist attacks and race riots are some of the consequences. Particular attention will be given to the conflict between the refugees' and migrants' needs that result from violent, socio-economic or ecological catastrophes in the countries of origin and the various forms of reception within the host countries. Students will explore theoretical, political, legal, and socio-economic dimensions of the refugee and immigration phenomena in a global world. Other themes will include international human rights and refugee laws, theories of immigration, for example, the feminization of migration, as well as problems of acculturation, assimilation and integration in different host societies. Note: This course is cross-listed as GLS 367. Students may not get credit for both POL 367 and GLS 367.

POL 368 International Organizations 3 Credits

This course introduces students to the study of international organizations. The course examines mostly formal and governmental institutions as well as informal institutions or regimes. Topics to be covered include and are not limited to: the establishment of international organizations, evolution of international organizations, structure of international organizations, decision-making of international organizations and influence of international organizations. This course employs both theoretical and practical approaches in its examination on international organizations. Note: This course is cross-listed as GLS 368. Students may not get credit for GLS 368 and POL 368.

POL 371 The Arab-Israeli Conflict 3 Credits

The course will begin by introducing the main players: the neo-patrimonial Arab regimes on the one hand, and the democratic, economically modern Jewish sector in Palestine on the other. The analysis will focus on the impact of the social, economic, political and religious differences between the sides on their conception of the conflict among the participants and powers outside the region. The course will concurrently examine the impacts of the dynamics of the conflict itself, relations within Islam on the one hand and between Islam and the West on the other. The latter part of the course will consider the sources of perceptual shift that led simultaneously to the narrowing of the conflict with the withdrawal of some of its participants (most Arab states) and its widening with the addition of Al Qaeda and Iran (via Hezbollah). Note: This course is cross-listed as GLS 371. Students may not get credit for both GLS 371 and POL 371.

POL 399 The Co-operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. IND 398 and (dept.) 399 combined cannot exceed 15 credits. Pass/fail. Prerequisite(s): junior standing and 2.75 GPA at the time of registration.

Corequisite(s): IND 398 The Co-operative Experience Seminar.

POL 415 Political Internship 3-6 Credits**POL 450 Seminar in Political Science 3 Credits**

A multidimensional framework within which to integrate the variety of perspectives and methodologies extant in the field of political science. Topics for discussion and analysis may range from broad concepts of political discourse such as power and interdependence to specific political issues such as executive-legislative relations and judicial policymaking.

POL 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

POL 491 Internship in Political Science 1-4 Credits

Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of fieldwork per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.

Prerequisite(s): permission of instructor.

POL 499 Senior Honors Thesis 3-6 Credits

Majors having completed the department's core requirements and having a minimum GPA of 3.5 in political science courses may apply for honors in their sixth semester. Applicants enroll in POL 490 Independent Research and Study in their seventh semester to develop and submit a thesis proposal to the department. With departmental approval, applicants prepare an honors thesis in their last semester. Upon acceptance of the thesis by the department, the student will be graduated with honors in political science.

Psychology

Program Overview

The psychology major is designed to meet the needs of various types of students and to develop a broad understanding of the many topic areas within the field of psychology.

The program is committed to helping students understand and appreciate both the scientific foundations and human service aspects of the field of psychology; develop and apply oral, written, analytical and critical-thinking skills applied to psychological issues, questions and problems; understand issues in contemporary psychology and recognize and apply psychological knowledge in order to provide solutions to real world problems and develop both interpersonal and intrapersonal knowledge through academic experiences and extra-curricular activities.

The program is designed to foster self-awareness and personal growth, the development of leadership skills and a respect and understanding for human development and human diversity.

More information is available on the Department's website: Department of Psychology (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-sciences/liberal-arts-programs/psychology/>)

Curriculum Overview

The curriculum develops the fundamental skills that predict success in the profession of psychology, human services, corporate jobs, education and graduate school. Classes stress the development of writing skills, both technical report writing and literature research papers and provide a range of instruction on the statistical data analysis, online control of laboratory experiments, text processing and presentation software. In fieldwork placements, students gain work experience in a variety of human services programs within the community.

Members of the psychology faculty encourage students to become involved in research projects. Many Rider psychology seniors bound for graduate school receive offers of substantial financial aid in the form of assistantships and tuition waivers. These offers are made because our majors carry out research of high quality. Students have coauthored journal publications with the faculty and presented papers at regional and national conferences. Laboratories are always open for students and faculty supervision is always available.

Honors Program in Psychology

A student may receive honors in psychology by fulfilling the following conditions beyond the basic requirements for the psychology major: complete one Independent Research and Study project (490); earn a cumulative average of 3.25 and an average of 3.5 in psychology at the time of graduation.

Requirements for the Major (beginning Fall 2019)

(49 credits)

Note: A grade of "C" or better is required in each Psychology course in order for the course to be counted toward the major.

Code	Title	Credits
CLAS General Education Curriculum		
See CLAS General Education Curriculum Page (p. 577)		
Required Psychology Courses		
The following four courses must be completed in the sequence they are listed:		
PSY 100	Introduction to Psychology	3
PSY 105	Introduction to Research in Psychology	3
PSY 201	Statistics and Research Design	3
PSY 292	Professional Development in Psychology	3
Research Methods Course:		4
Select one of the following:		
PSY 302/PSY 302L	Research Methods: Cognition	
PSY 303/PSY 303L	Research Methods: Social Psychology	
PSY 306/PSY306L	Research Methods: Sensation & Perception	
PSY 329/PSY 329L	Research Methods in Organizational Psychology	
PSY 335/PSY 335L	Research Methods: Human Cognitive Neuroscience	
PSY 336/PSY 336L	Research Methods: Animal Learning & Behavior	
PSY 339/PSY 339L	Research Methods in Applied Behavior Analysis	
PSY 340/PSY 340L	Research Methods: Group Dynamics	
PSY 350/PSY 350L	Research Methods: Developmental Psychology	
Pillars of Psychology - Lower-Level		
Select one course from each area:		
Biological Foundations of Psychology		3
PSY 238	Sensation and Perception	
PSY 255	Biopsychology	
Developmental Psychology		3
PSY 230	Child Development	
PSY 231	Youth and Adolescent Development	
Cognitive and Behavioral Psychology		3

PSY 225	Learning Theory	
PSY 226	Cognitive Psychology	
Social and Personality		3
PSY 215	Personality	
PSY 240	Social Psychology	
Mental and Behavioral Health		3
PSY 220	Abnormal Psychology	
Electives		
Lower-level courses not included in the pillars:		
PSY 118	Psychology of Women	
PSY 210	Organizational Psychology	
PSY 212	Introduction to Applied Behavior Analysis	
PSY 237	Cognitive Disabilities	
PSY 250	Psychology of Aging	
PSY 283	Sport Psychology	
PSY 295	Directed Study in Psychology	
Pillars of Psychology - Departmental Requirements		12
Students must complete all Lower-Level Pillar Requirements above before moving to the Depth requirements below.		
Select four courses from at least three different pillars: ¹		
Biological Pillar of Psychology		
PSY 330	Developmental Disabilities	
PSY 345	Health Psychology	
PSY 365	Drugs and Human Behavior	
PSY 381	Psychology of Gender	
PSY 382	Aging, Brain, and Cognition	
Developmental Pillar of Psychology		
PSY 315	Psychological Tests	
PSY 324	Play and Imagination	
PSY 325	Cognitive Development	
PSY 330	Developmental Disabilities	
PSY 333	Autism Spectrum Disorder	
PSY 334	Disabilities Across Cultures	
PSY 374	Psychology of the Family	
PSY 377	Developmental Psychopathology	
PSY 382	Aging, Brain, and Cognition	
PSY 386	Introduction to Child Life: Working with Children and Families in Healthcare Settings	
Cognitive and Behavioral Pillar of Psychology		
PSY 325	Cognitive Development	
PSY 333	Autism Spectrum Disorder	
PSY 334	Disabilities Across Cultures	
PSY 367	Creativity and Innovation	
PSY 372	States of Consciousness	
PSY 382	Aging, Brain, and Cognition	
PSY 384	Positive Psychology	
PSY 388	Learning and the Experimental Analysis of Behavior	
Social and Personality Pillar of Psychology		
PSY 315	Psychological Tests	
PSY 324	Play and Imagination	
PSY 330	Developmental Disabilities	
PSY 333	Autism Spectrum Disorder	

PSY 345	Health Psychology	
PSY 360	Psychology of Peace & Conflict	
PSY 374	Psychology of the Family	
PSY 375	Psychology and Film	
PSY 379	Psychology and Law

4 + 1 Master's in Applied Psychology

The 4+1 Masters in Applied Psychology, Applied Behavior Analysis concentration, is designed for students who wish to combine

undergraduate study in psychology leading to a Bachelor's of Arts degree with graduate study leading to a Masters of Arts in Applied Psychology.

The admission process for this program ensures that only capable students are enrolled. Freshman students are encouraged to seek advice about the program from their advisor and the program coordinator.

The following courses must be completed if the student intends to apply to the program: PSY 212 Introduction to Applied Behavior Analysis and PSY 299 Field Placement in Applied Behavior Analysis. PSY 299 is intended to assist the student in determining if the program is a good match for them. The additional undergraduate courses in Applied Behavior Analysis (PSY 339 Research Methods in Applied Behavior Analysis & Lab, PSY 388 Learning & The Experimental Analysis of Behavior, and PSY 389 Professional Issues in Applied Behavior Analysis) may be taken following application to the graduate program but must be completed prior to completion of the undergraduate program requirements. During the first semester of the junior year, the student will formally apply to the Applied Psychology program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Applied Psychology program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the Applied Psychology program;
- An interview with faculty from the Applied Psychology program; and
- Completion of PSY 212 and PSY 299 (prior to application).
- Completion of PSY 339 & PSY 339L, PSY 388, and PSY 389 (prior to completion of the requirements for the degree in psychology)

Students accepted into the Applied Psychology program at the end of their junior year will complete one graduate-level elective course during each semester of their senior year.

Students will be awarded the BA degree when they complete the requirements for that degree in psychology. The MA will be awarded upon completion of the Applied Psychology requirements.

Courses and Descriptions

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 102 Explorations in Psychology Honors 3 Credits

The course introduces the history of psychology, and demonstrates how the discipline is a science. It provides students with experience exploring the mind, behavior, and the relationship between the two, from multiple perspectives, including biological, behavioral, cognitive, developmental, humanistic, social, and abnormal. It tackles questions including (but not limited to) how different areas of the brain are involved in behavior and are affected by injury, how humans sense and perceive the world, how states of consciousness differ from one another, how humans learn, remember, communicate, and develop, what motivates humans to behave in particular ways, how social groups affect behavior and decision-making, and what happens when behavior and emotions deviate from what is typical.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 110 Psychology: The Science of Well-being 3 Credits

This course is an overview of the science of psychology applied to the question of how to build well-being. The framework for PSY 110 mirrors Introduction to Psychology in its presentation of the major perspectives in psychology – Research Methods, Behaviorism, Cognition, Development, Social Behavior, Motivation and Mental Health. Topics in PSY 110 include: Perspectives in Psychology, Research Methods, Relationships, Social Behavior, Developmental Psychology, Behavior and Cognition, Motivation, Self & Identity, Positive Psychology, Optimism.

PSY 117 Psychology of Creativity 3 Credits

Is creativity reserved only for geniuses, or can ordinary individuals also be creative? Is it domain-specific or domain-general? How do we measure it? What is the connection between creativity and innovation? Can you and I become more creative, and if so, what factors influence creative thinking? This course surveys the modern theories of creativity and problem solving from a psychological perspective, and their applications to real-world challenges. Specific topics will focus on convergent and divergent thinking, the role of constraints, change, and motivation in creativity, social and personality factors, techniques such as brainstorming, design thinking, and creative problem solving, and innovation in organizations. You will apply what you have learned in hands-on activities that challenge you to propose creative solutions to real-world problems.

PSY 118 Psychology of Women 3 Credits

Examines the psychological development of women in our culture from birth to maturity, with an emphasis on the interaction of biological and social influences on personality, social behavior, and achievement of women. Investigates psychological sex differences in terms of current measurement approaches. Readings and text are drawn from psychological theory and research.

PSY 131 The Science of Mental Illness 3 Credits

This course introduces students to the separate and interactive effects of the person and the nervous system in the etiology and treatment of mental illness. Effectively, students receive in-depth exposure to research methods, the process of making and evaluating evidence based claims, classic and clinical applications of learning theory, the development of personality and the role of personality theories in the major systems of psychotherapy, the role of the central and peripheral nervous systems in behavior and mental illness, selected major DSM-5 categories of mental illness (stress, anxiety, depression, schizophrenia, and neurocognitive disorders), the major systems of psychotherapy, and the classifications and neural bases of pharmacological treatments for mental illness.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 210 Organizational Psychology 3 Credits

Focuses on issues related to human behavior in work settings. Topics include personnel issues such as hiring and promotion decisions, performance appraisals, and methods of on-the-job training. Issues of job satisfaction, motivation, productivity, and effective leadership styles are also examined. Finally, organizational structure as it relates to communication within organizations will be examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 212 Introduction to Applied Behavior Analysis 3 Credits

Presents a review of classical and operant conditioning, data collection and research design, data analysis and interpretation. In addition, assessment and treatment strategies in a variety of settings, contingency management in institution, classroom and home, systematic self-desensitization, and ethical consideration are discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 226 Cognitive Psychology 3 Credits

The study of the mind has been the focus of psychology since its inception in the 19th century. Today, the majority of psychological research focuses on the cognitive system and its biological basis. This course will provide an overview of knowledge regarding the components of the human cognitive system (e.g., attention, memory, executive processes) and how they form the basis for higher-order cognitive skills (e.g., language and decision making). The course will provide a history of the field and the methodologies that have been and are currently being used to study the human mind. Each section of the course will include an overview of basic and applied research to demonstrate how knowledge of the cognitive system can be used to enhance human functioning in applied settings and better understand human limitations and tendencies to commit certain types of errors.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 230 Child Development 3 Credits

Presents theory and research on the social, emotional and cognitive development of children birth to age 12.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 231 Youth and Adolescent Development 3 Credits

Presents theories, research and problems concerning development in youth and adolescence.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 237 Cognitive Disabilities 3 Credits

Investigates various types of intellectual differences, focusing on etiology, methods of diagnosis, programs and services available to individuals and families. Considers problems relating to adjustment in academic, social, and vocational areas.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 238 Sensation and Perception 3 Credits

The facts and theories of sensation and perception, their role in the total psychology of the individual, and current application are examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 250 Psychology of Aging 3 Credits

This survey course focuses on basic psychological issues in the aging process and in the elderly. It examines myths and stereotypes about aging and the elderly by way of research evidence pertaining to physical, psychological, and social changes accompanying aging.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 255 Biopsychology 3 Credits

Basic biological structures and processes underlying behavior, including general neuroanatomy and neurophysiology; sensory physiology; structure and function of the motor systems; physiology of emotions, motivation, learning, memory; brain dysfunction; psychoactive drugs.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 283 Sport Psychology 3 Credits

This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 292 Professional Development in Psychology 3 Credits

This course is designed to help students understand the connections between the required curriculum in psychology and their professional and post-graduation goals. Through this required course all psychology majors will have the opportunity to recognize and use the many applications of psychology to their plans for career development and employment. Students will articulate individual goals beyond graduation, understand the individual characteristics that predict success in the work environment, recognize and apply selected research in psychology to their goals and the world of employment. The course will better prepare students to articulate post-graduation goals early in their education, and apply those goals to the following years of their education. PSY major/minor students only.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131.

PSY 295 Directed Study in Psychology 1-4 Credits

Provides an opportunity for students to obtain research experiences in psychology. Consists of a combination of project meetings, assigned readings and supervised research. Each student will work with a selected faculty member on a topic of mutual interest. Projects may include learning some components of research methods and applying these techniques to the collection and analysis of data. Provides focused reading and discussion as it relates to each student's research topic.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 or permission of instructor and chair.

PSY 299 Field Placement in Applied Behavior Analysis 1 Credits

The practicum provides hands-on experience using the tools of applied behavior analysis in a field setting. Provides supervised field placement experience in an approved institution or agency in order for students to gain knowledge in applications of applied behavior analysis. Placement is made in various community institutions and agencies that offer services to diverse populations.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131, and PSY 212.

PSY 302 Research Methods: Cognition 4 Credits

Provides students with an in-depth coverage of the expanding field of cognition and memory. Addresses issues and research within the field. Emphasis is on current views of human memory. Students learn how to design and conduct their own experiments from the topic areas of information processing, psycholinguistics, problem solving, learning and memory, social cognition, and cognitive neuroscience. Laboratory skills include programming computers, developing multimedia stimuli, recording psycho-physiological data, and composing an APA-format research report in a network-based writing lab. Prerequisite(s): a grade of "C" in PSY 201; PSY 225, PSY 237 or PSY 325 or permission of instructor.

Corequisite(s): PSY 302L.

PSY 302L Research Methods: Cognition Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 302.

PSY 303 Research Methods: Social Psychology 4 Credits

Covers research methodology within the context of social psychology (i.e., topics include altruism, aggression, attraction and social perception). Both experimental and descriptive methodologies will be covered. Students learn about various aspects of the research process (e.g., design and execution of a social psychological study, analyzing and interpreting the results). Students also learn to integrate their research findings to produce an APA-style paper. Students use computer-based word processing and statistical analysis packages to achieve these goals. Prerequisite(s): a grade of "C" in PSY 201; PSY 240 or PSY 279 or permission of instructor.

Corequisite(s): PSY 303L.

PSY 303L Research Methods: Social Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 303.

PSY 305 Theories of Psychotherapy 3 Credits

An exploration of the history and theory of the psychoanalytic, behavioral, and humanistic approaches to psychotherapy. Comparisons and contrasts between these therapeutic modalities are discussed, as well as the theory underlying specific therapeutic techniques such as dynamic interpretations, dream analysis, the analysis of resistance and transference, counter-conditioning, modeling, and cognitive restructuring. Class exercises in addition to transcripts and tape recordings from therapy sessions are used to illustrate the various therapeutic approaches.

Prerequisite(s): PSY 215 or PSY 220 or permission of instructor.

PSY 306 Research Methods: Sensation & Perception 4 Credits

Provides instruction in research design, research methods, and integration of data analysis and methodology within the content framework of sensation and perception. All the general psychology research methods are taught. Special emphasis is given to the study of human vision and audition. Students design, conduct, and report laboratory research in the areas of sensation and perception. The computer-based components of the laboratory include lessons on interactive software instrumentation for research, and network-based technical writing using APA format. Projects are conducted during the term. Each student uses a dedicated networked Macintosh computer to: a) develop and generate research stimuli and procedures, b) analyze and report research data, and c) write formal research reports. Prerequisite(s): a grade of "C" in PSY 201 or permission of instructor.

Corequisite(s): PSY 306L.

PSY 306L Sensation & Perception Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 306.

PSY 310 Introductory Counseling Skills 3 Credits

This course examines theory and research related to the therapy process and outcome. Students will practice foundational counseling skills with one another within a culturally-sensitive framework, including active listening, reflections of feelings, open questions, interpretations, self-disclosures, and challenges. Through experiential learning activities, students will develop a working knowledge of when and how to implement counseling skills. Students should be willing to talk about personal issues in this class.

Prerequisite(s): PSY 100, PSY 102, PSY 110, PSY 131.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 324 Play and Imagination 3 Credits

This course surveys two of the most important manifestations of children's imagination: pretend play and imaginary companions. It will discuss the evolution of play, the purpose of play, the role of play in the development of creativity, and individual differences in play (e.g., among children of different gender, cultures, and ability levels). Finally, it will discuss the application of play to therapeutic methods for children.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 230 or PSY 231 or PSY 237.

PSY 325 Cognitive Development 3 Credits

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): PSY 105 and PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

PSY 330 Developmental Disabilities 3 Credits

Introduces students to the genetic, biological, sensory-motor, cognitive, and social-emotional foundations of developmental disabilities. Selected syndromes will be reviewed in depth, as will treatments and intervention at the individual and family levels.

Prerequisite(s): PSY 230, PSY 231 or PSY 237.

PSY 333 Autism Spectrum Disorder 3 Credits

Provides students with a general understanding of the etiology, neurocognitive underpinnings, and general characteristics of the autism spectrum disorders. The course will examine the history of the study of these disorders, the main problems associated with these conditions, and will explore psycho-educational treatment alternatives.

Prerequisite(s): PSY 100 or PSY 102 or PSY110 or PSY 131.

PSY 334 Disabilities Across Cultures 3 Credits

The course is designed around the question of how a culture defines the concept of "Disabilities", how societies perceive individuals with disabilities, and how historical, social and political circumstances might shape an individual's understanding of diversity. The course encourages critical thinking and a comparative analysis of cultural differences and psychological practices. Key challenges associated with diagnosis, intervention and integration of individuals with disabilities across the globe will be discussed. This course fulfills the College of Liberal Arts and Sciences Essential Competencies Requirement: Global Perspectives.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131.

PSY 335 Research Methods: Human Cognitive Neuroscience 4 Credits

Covers the interdisciplinary study of the nervous system integrating neurobiology, physiology, pharmacology, and psychology as explanations for both normal and pathological human behavior. Topics integrate molecular levels of analysis, such as neuron structure and function, neurotransmitters, action potentials, and receptors, with molar levels, such as sensory and hormonal processes, learning and memory, emotions, drug use, and biological rhythms. Introduces research techniques used to study the function of the nervous system and the neural bases of behavior in humans. Neuroanatomical, electrophysiological, pharmacological, and neuropsychological assessment techniques may be explored as part of laboratory or field research projects designed in collaboration with the instructor.

Prerequisite(s): grade of "C" or better in PSY 201 and PSY 255 or permission of instructor.

Corequisite(s): PSY 335L.

PSY 335L Research Methods: Human Cognitive Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 335.

PSY 336 Research Methods: Animal Learning & Behavior 4 Credits

Provides a comprehensive overview of the acquisition and modification of the behavior of animals, especially on laboratory strains of rodents and pigeons. Core topics include respondent and operant conditioning, animal cognition, observational learning, animal safety and welfare, single-subject and between-groups approaches to methodology, and the statistical analysis of the results of studies of behavior. The laboratory component of the course provides a comprehensive overview of animal handling and maintenance, animal welfare, and the recording of experimental results. Two substantial projects are undertaken; demonstration of a conditioned taste aversion and its effect upon the acquisition and extinction of an operant (bar press) response and subsequent discrimination and reversal learning. Results of both projects are written into APA-formatted reports. **Prerequisite(s):** a grade of "C" in PSY 201, PSY 225 or permission of instructor.

Corequisite(s): PSY 336L.

PSY 336L Animal Learning and Behavior Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 336.

PSY 339 Research Methods in Applied Behavior Analysis 4 Credits

This upper-level laboratory course will provide students with in-depth study of the principles and applications of Applied Behavior Analysis. Students will examine behavioral principles, ethical considerations and real-life applications of ABA. Each student will design and implement a self-management plan to alter a behavior of their choosing.

Prerequisite(s): PSY 105 and PSY 201, PSY 212.

Corequisite(s): PSY 339L.

PSY 339L Research Methods in ABA Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 339.

PSY 340 Research Methods: Group Dynamics 4 Credits

Focuses on selected issues pertaining to group dynamics. Emphasizes an understanding of the personality and social factors that influence the functioning of unstructured and task-oriented groups. Students participate in a task group for the purpose of conducting a comprehensive research project on selected issues in group dynamics and the psychology of groups. The task group prepares an APA-style paper describing their research as well as an in-class presentation. Each student also submits a midterm and final written analysis of the interactional processes and development of the task group.

Prerequisite(s): a grade of "C" in PSY 201 or permission of instructor.

Corequisite(s): PSY 340L.

PSY 340L Group Dynamics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 340.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 350 Research Methods: Developmental Psychology 4 Credits

Focuses on one or more research areas in cognitive, personality, or social development. Includes an overview of major theoretical approaches to age-related change. Students review original research on selected aspects of behavioral change. The laboratory component of the course presents an overview of developmental research designs and methods focusing on the measurement of age-related change in psychological functioning. Students conduct field research projects designed in collaboration with the instructor and prepare an APA-style research report. **Prerequisite(s):** a grade of "C" in PSY 201 and PSY 230 or permission of instructor.

Corequisite(s): PSY 350L.

PSY 350L Developmental Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 350.

PSY 360 Psychology of Peace & Conflict 3 Credits

This course examines issues related to peace, conflict, violence, and conflict resolution. Theories and strategies that suggest ways of reducing and eliminating conflict are discussed. Psychological and social causes and consequences of violence and nonviolence are considered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 367 Creativity and Innovation 3 Credits

What is creativity, and how do we measure, study, and enhance it? This course will survey the modern theories of creativity from a psychological perspective, with an emphasis on the processes that underlie creative thinking and the variables that influence creative idea generation. Specific topics will include: convergent and divergent thinking, the role of the unconscious in creative ideation, flow and mindfulness, individual and group creativity, techniques such as brainstorming and creative problem solving, the neuroscience of creativity, the role of motivation, and creativity and innovation in organizations. Discussions of theoretical findings will be complemented by in-class activities and assignments that highlight applications to day-to-day living and to larger-scale challenges that require creativity and innovation.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 372 States of Consciousness 3 Credits

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 373 Cyberpsychology 3 Credits

Cyberpsychology is the study of how emerging computer technologies, especially social media, affect the way people think, feel, and behave both online and in the face-to-face world. This course explores a wide range of topics concerning this rapidly developing field of psychology, including how individuals, interpersonal relationships, and groups function in cyberspace with both positive and negative consequences for mental health. It emphasizes an understanding of the basic concepts of cyberpsychology along with the implications of this knowledge for improving wellbeing in the digital age.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 230 or permission of instructor.

PSY 375 Psychology and Film 3 Credits

Attitudes, perceptions and memories are shaped by motion pictures. Filmmakers create enduring images by using cinematic techniques to portray social and interpersonal themes. This course will examine various cinematic techniques as well as how film portrays interpersonal relations, gender roles, race relations, mental illness, The Holocaust, and other genocides.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 377 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

Prerequisite(s): PSY 230 or PSY 231.

PSY 379 Psychology and Law 3 Credits

Introduces students to a study of selected topics in psychology and law. Topics include eyewitness testimony, jury selection, and decision making.

Prerequisite(s): PSY 240, PSY 215.

PSY 381 Psychology of Gender 3 Credits

This course examines the meaning of sex and gender in modern society. The course readings and discussion will review and analyze the influence of gender on human behavior and emotions. The course will examine the significance of gender in shaping experience. Topics will include: gender differences in behavior, gender role development, gender and sexual identity, gender and social roles, cross-cultural perspectives on gender and transcending gender.

Prerequisite(s): PSY 100, PSY 218 or permission of instructor.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 383 Psychology and Culture 3 Credits

Students enrolled in this course will critically examine the intersection of culture and psychology. Topics covered include cultural influences on: identity, the perceptions and manifestations of mental illness, and treatment seeking.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 384 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 384 is crosslisted with PSY 584.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 385 Death, Dying and Suicide 3 Credits

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 386 Introduction to Child Life: Working with Children and Families in Healthcare Settings 3 Credits

The course provides the student with an introduction to the practice of Child Life in healthcare settings, serving as an educational foundation for those interested in pursuing a Child Life internship or other career working with children and families in a healthcare setting. Child Life programs seek to promote optimum development of children, adolescents, and families within a healthcare setting by helping to maintain normal living patterns and minimizing psychological trauma. Various theoretical positions related to the field (including but not limited to child development, play, stress, illness, trauma, and bereavement) will be described and their implications discussed. Classroom activities and assignments will help to develop relevant clinical skills including therapeutic play techniques, procedural preparation and support, coping strategies, child assessment, promoting advocacy/family-centered care, and health education. Official documents created by the Child Life Council, the certifying body for the field, will be reviewed, in addition to other seminal Child Life publications. The necessity for evidence-based practice will be discussed and relevant empirical studies will be presented (including those conducted in analogous academic fields such as developmental pediatrics and behavioral medicine).

Prerequisite: PSY 230.

PSY 388 Learning and the Experimental Analysis of Behavior 3 Credits

Students will review principles of behavior covered in PSY 212 Intro to ABA (or PSY 225 Learning Theory) and move into more complex concepts and principles of behavior analysis including respondent behavior, respondent conditioning, motivating operations, schedules of reinforcement, and verbal operants. Students will also learn elements of behavior change and specific behavior-change procedures including: verbal behavior training, discrete trial training, interventions based on motivating operations and discriminative stimuli, and stimulus equivalence procedures.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 212 or PSY 225.

PSY 389 Professional Issues in ABA 3 Credits

This course will provide students interested in working in the field of applied behavior analysis at the bachelor's level content based on the task list of the Behavior Analyst Certification Board (BACB) The course covers ethical and professional considerations relevant to the profession of applied behavior analysis as well as ethical and disciplinary standards of the profession. In addition, the course covers behavioral assessment and intervention, competency-based training, and evaluating the effectiveness of behavioral programs. Students will also have the opportunity to read seminal and current research literature on the topics.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 395 Special Topics in Psychology 3 Credits

This course examines contemporary issues in psychology, with the particular topic varying each time it is offered. New directions in the field and/or current controversies will be the focus. Past offerings include Positive Psychology, Creativity, and Brain Games.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional quality writing, oral or multimedia presentations.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 420 History of Psychology 3 Credits

Provides a coverage of systems and schools of psychology; great psychologists, their contributions, and later influence in psychology. Current psychological problems are also discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): PSY 201.

PSY 491 Internship in Psychology 1-4 Credits

Provides supervised work experience in an approved institution or agency in order for students to gain knowledge in applications of psychology. Placement is made in various community institutions and agencies that offer services to both exceptional and normal individuals. Prerequisite(s): senior psychology majors or minors.

Prerequisite(s): PSY 100.

Public Health Certificate

Overview

The COVID-19 epidemic has increased interest and focus on public health and the practices of public health professionals. The Public Health Certificate addresses different approaches to solving complex health concerns. Students in existing health-related programs (i.e., health sciences, health care management, health care policy, etc) will have the opportunity to explore these concepts in classroom education while experiencing the concepts in practice through field-based, experiential learning.

This certificate will provide a new lens for students to explore health and health-related concerns from a public/population level, affording them an opportunity to apply their knowledge and experiences (i.e. science, management, policy, psychology, etc).

This certificate program will allow students to explore the foundations of public health through both didactic and experiential/field based learning experiences. This program will provide additional perspective into solving the complex issues around human health, while providing students the opportunity to gain valuable experience toward a career path (with additional graduate training). This program will serve both current and prospective undergraduate students and prospective part-time students (adult learners, community members) seeking to increase their understanding and knowledge of public health practices.

Public Health Certificate Requirements

(12-13 credits)

Code	Title	Credits
Required Courses:		
HSC 150	Introduction to Public Health	3
HSC 250	Introduction to Epidemiology	3
HCP 303	Global Health and Human Rights	3
HSC 491	Internship in Health Sciences	1-4
or HTH 491	Health Management Internship	
Total Credits		10-13

Courses and Descriptors

HSC 150 Introduction to Public Health 3 Credits

Public Health is the science of protecting, promoting, and improving the health of people and the communities where they live, learn, work, and play. Students will gain an understanding of the history and functions of public health, strategies and methods used in public health research, and the determinants of health.

HSC 250 Introduction to Epidemiology 3 Credits

Epidemiology is the study of distribution and determinants of defects, disease, and injury in human populations and the application of that study to assess the magnitude of health problems and the result of interventions designed to control them. This course is designed to introduce students to the basic principles, methods, and uses of epidemiology to better understand and characterize health and disease at a population level. The role of epidemiological evidence in planning and evaluation will be also be explored.

Prerequisite(s): MTH 102 or higher OR MSD 105 or higher OR POI.

HCP 303 Global Health and Human Rights 3 Credits

This course introduces students to the basic concepts of human rights and their links to national/global health, as well as to issues where human rights and health collide. Students will become familiar with global efforts for developing practical and effective responses to global health challenges with a human rights framework.

HSC 491 Internship in Health Sciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty member and should include keeping a journal of activities, a term paper or project report and an oral or poster presentation.

Prerequisite(s): 2.5 GPA required.

HTH 491 Health Management Internship 3 Credits

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.

Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

Public Relations

Program Overview

The field of public relations is one of the fastest-growing and most rewarding professions in today's information-based global economy.

As Public Relations majors at Rider University, students learn how organizations and individuals proactively manage communication challenges and opportunities in real world contexts. Expert professors, as well as professionals in the field, help students sharpen their skills through hands-on assignments and class lead discussions using case studies and current trends. Throughout the program, students explore the importance of cultivating and maintaining productive relationships with clients, the media and opinion leaders. In the capstone course, students work with local corporate or nonprofit clients to learn all facets of planning and executing a public relations campaign.

Outside the classroom, Rider's Public Relations majors are encouraged to gain experience by working as interns in a variety of fields including fashion, sports, healthcare, government or a number of other exciting industries. In addition, students have the opportunity to join the nationally recognized Rider chapter of the Public Relations Student Society of America (<http://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-sciences/liberal-arts-programs/communication-journalism/club-activities/>).

The Public Relations Student Society of America (PRSSA) is the foremost organization for students interested in public relations and communication. The organization seeks to advance the public relations profession by nurturing generations of future professionals. As a chartered chapter of the national organization, Rider University's Public Relations Major meets rigorous academic standards for public relations education, and subscribes to the highest ethical principles and diversity in the profession.

At the local level, the Rider University Chapter offers opportunities to meet leaders in the field through agency tours, guest speakers, workshops, professional mentoring, and trips to regional and national conferences. The Rider Chapter also provides opportunities to build your public relations portfolio through the chapter's activities including social media, event planning, and public relations consulting activities. Dr. Nancy Wiencek (<http://www.rider.edu/faculty/nancy-wiencek/>) is the advisor.

For more information, please visit the Rider University Chapter of PRSSA on Instagram (<https://www.instagram.com/prssarider/>).

Curriculum Overview

Core classes in the Public Relations major include public relations, publication design, feature writing, advanced speech, public relations writing and strategy, communication research methods, and cases and campaigns in public relations.

To round out the major, students also choose at least one other class to build their skills in areas such as social media, podcasting, intercultural communication, event planning, web design, photography, marketing, advertising, or grant writing and fundraising. In addition, students also choose at least one class to explore a career focus through classes focused on organizational communication, health communication, politics and law, sports communication, international communication, arts marketing or an internship.

COM 347	Sports Communication	
COM 393	International Communication	
AAD 202	Commun/Marketing in Arts	

COM 491	Internship in Communication	
Total Credits		48

- ¹ Students may not carry a double major within the department. Communication, Journalism and Media majors may declare only one minor in the department. No more than two courses may be used to meet the requirements for both a major and a minor in the department.
- ² If a student receives a grade lower than "C" in a course required in a major or minor in the department, the student must repeat the course. Credit will only be awarded once for a course that is repeatable. The student must also repeat the course before enrolling in any course which it is a prerequisite.
- ³ Students in the 4+1 MABC program may take COMM 503 to count towards the Skills-Based part of the curriculum.

Public Relations Minor

(18 credits)

Code	Title	Credits
COM 107	Writing for the Media	3
COM 203	Introduction to Social Media	3

COM 341	Public Relations Writing and Strategy	3
COM 348	Communication Research Methods	3
COM 440	Cases & Campaigns in Public Relations	3
Total Credits		18

¹ Note: Communication, Journalism and Media majors may declare only one minor in the department. No more than two courses may be used to meet the requirements for both a major and a minor in the department. (Exception: If a student elects the Event Planning and Production minor, then three courses may be used to meet the requirements for both the major and that minor in the department.)

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits

Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits

As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits

Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits

This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment – and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits

In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits

Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits

Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits

Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits

Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.

Prerequisite(s): COM 104 or COM 290.

COM 205 Theories of Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits

Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.

Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits

Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.

Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits

Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits

Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits

Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits

Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements. **Prerequisite(s):** COM 104 or COM 290.

COM 232 Podcasting I 3 Credits

Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits

Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits

Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits

Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/ reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits

The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 251 Interpersonal Communication 3 Credits

Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application. Note: This course is crosslisted as GLS 252. Students may not get credit for both COM 252 and GLS 252.

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits

Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

Prerequisite(s): COM 261 or permission of instructor.

COM 263 History and Principles of Graphic Design 3 Credits

Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits

Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits

Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.

Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 292 Content for Social Media 3 Credits

Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 312 Special Topics in Journalistic Writing 3 Credits

Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.

Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits

Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.

Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits

Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.

Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GND 318. Students may not get credit for both COM 318 and GND 318.

COM 321 Stand Up Comedy 3 Credits

Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.

Prerequisite(s): COM 104: Speech Communication or COM 290: Professional and Strategic Speech.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits

Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits

Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.

Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits

This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits

Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.

Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. Prereq(s): COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits

In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.

Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits

Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): COM 232, COM 233, COM 234.

COM 337 Music Production for Mass Media 3 Credits

Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.

Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits

Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits

Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.

Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 348 Communication Research Methods 3 Credits

Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.

Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator. Note: This course is crosslisted as GLS 352. Students may not get credit for both COM 352 and GLS 352.

COM 353 Nonverbal Communication 3 Credits

Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 360 Advanced Publication Design and Presentation 3 Credits

Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.

Prerequisite(s): COM 212.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits

Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits

Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.

Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits

Offers students education in graphic animation theories, animation development techniques, and animation preparation for various multimedia applications. Emphasis is placed on the design principles in animated communication and animation techniques. The course covers the integration of static images in animation, graphic animation techniques, animation compression, animation rendering, input/output file formats, and animation delivery. The primary software for this course is Adobe Photoshop and MacMedia Flash. Students will be expected to participate in critiques of professional animation designs in order to learn to evaluate critically their own work and their fellow students' work.

Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits

Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.

Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits

Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.

Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits

Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media. Note: This course is crosslisted as GLS 393. Students may not get credit for both COM 393 and GLS 393.

COM 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits

Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.

Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits

A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.

Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits

This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits

Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits

Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.

Prerequisite(s): COM 234.

COM 440 Cases & Campaigns in Public Relations 3 Credits

Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.

Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits

Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

Prerequisite(s): COM 348, COM 350, or permission of instructor.

COM 460 Web Design III 3 Credits

Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.

Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits

Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation.

Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.

Prerequisite(s): ART 103, ART 105, COM 262, and COM 360.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Publishing and Professional Writing

Overview

The Certificate in Publishing and Professional Writing enables students in any major to earn a separate career-focused credential. This 12-credit program is designed to fortify qualifications for employment in many fields and enhance preparation for success in the workplace. Students may choose from a range of applied-writing courses regularly offered by the Department of English.

Admission Requirements

Admission to the program requires completion of CMP 125 with a final grade of C+ or better. English majors are eligible to apply.

Degree Offered

- Certificate in Publishing and Professional Writing

Publishing and Professional Writing Certificate Requirements

(12 credits)

Code	Title	Credits
Select four courses from the following:		12
ENG 236	Applied Grammar & Syntax	
ENG 318	Food Writing	

ENG 320	Editing for Literary Publishing
ENG 321	Business & Professional Contexts
ENG 322	Grant Proposals, Fundraising and Development
ENG 323	Reviewing and Publishing
ENG 324	Workplace Writing: Online Contexts
ENG 325	Jobs in Book Publishing
ENG 336	Grammar and Style
ENG 405	Advanced Prose Style
ENG 407	Advanced Workplace Writing
ENG 490	Independent Study: Research and Creative Expression

Total Credits 12

Program Completion and Certification

To earn the Certificate in Publishing and Professional Writing, students must complete the selected courses with an average grade of B or better. In addition, students must submit a final e-portfolio representing their best work from each of the courses taken, including a short commentary on each piece. The portfolio must meet Department of English standards for competency and completeness.

ENG 236 Applied Grammar & Syntax 3 Credits

This course offers a review of the essential elements of English grammar and syntax and fosters understanding of how these elements work in notable argumentative and expository writing as well as in the student's own compositions. Focus is on both expert reading and effective writing. Changing attitudes toward usage, including influence of digital media on language use, are discussed. May be taken as preparation for, or independently of ENG 336, which addresses grammar, syntax, and style at a more advanced level.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 318 Food Writing 3 Credits

Food Writing is a thematically based course in essay writing. It develops students' ability to write effective informal prose while also extending their knowledge about food sources, preparation, and consumption. They learn through readings and exercises, however, that food writing is about more than food. It encompasses the pleasures of the table, history, culture, science, and politics.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 320 Editing for Literary Publishing 3 Credits

This course introduces students to the process of publishing literary magazines and books. Student will learn all aspects of publishing from solicitation of manuscripts to the production of copy. Specific skills will include copyediting, proofreading, and layout.

ENG 321 Business and Professional Contexts 3 Credits

Students practice writing effectively to achieve specific purposes in typical business and professional workplace environments. Genres include various kinds of internal and external communication, including print and social media, for a range of audiences.

Prerequisite(s): CMP 125 or COM 203 or BHP 150 or permission of instructor.

ENG 322 Grant Proposals, Fundraising and Development 3 Credits

Students employ their analytical and writing skills to research and write grants for non-profit organizations in their local or regional communities. Fundraising and development activities on behalf of area organizations introduce them to career opportunities in this growing field.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150 or permission of instructor.

ENG 323 Reviewing and Publishing 3 Credits

Students learn to write arts and literary criticism through studying the work of prominent critics in literature, theatre, film, dance, visual arts, and music. Students learn how to market themselves as potential reviewers for print and online publications.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150 or permission of instructor.

ENG 324 Workplace Writing: Online Contexts 3 Credits

This course will help students adapt their writing to online environments. A writing-intensive course grounded in rhetorical principles, it focuses upon planning, writing and producing online texts distributed entirely through virtual portals. Genres include E-mail, instant messages, text messages, blogs, wikis, workplace social-media, and online team collaborations.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 325 Jobs in Book Publishing 3 Credits

Students will practice the forms of writing used by literary agents and publishing professionals working in acquisitions, editorial, and production at trade, academic, and small literary presses. These forms may include the query letter, book proposal, reader's report, and marketing plan.

Prerequisite(s): Completion of composition requirements or permission of instructor.

ENG 336 Grammar and Style 3 Credits

By building a comprehensive knowledge of the conventions of English grammar, punctuation and syntax, students will learn how to analyze the way words, phrases, sentences, and paragraphs work in expert writing, and they will apply this knowledge to their own writing. Emphasis is on argument, exposition, and analysis.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 405 Advanced Prose Style 3 Credits

Students analyze prose styles in English from the Renaissance to the present, focusing on the development of syntax, diction, and content. Students will be encouraged to imitate stylistic models and to develop their own prose style.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 407 Advanced Workplace Writing 3 Credits

Students will learn to adapt their writing skills to match specialized writing needs in publishing; corporate and personal finance; health, medicine, science, and technology. This course helps students build a portfolio and introduces them to corporate and freelance writing opportunities in our NJ/PA/NY area.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. To count toward the Certificate in Workplace Writing, an ENG 490 project must focus on workplace-related writing and be structured to include substantial formative feedback and revision. No more than one ENG 490 may be counted toward the certificate.

Prerequisite(s): completion of composition requirements or permission of instructor.

Radio and Podcasting

Program Overview

Students majoring in Radio and Podcasting have the opportunity to participate in classes tailored especially to their interests. They learn the secrets behind creating successful studio productions in small, hands-on classes in the Department of Communication, Journalism and Media's state-of-the-art radio studio and media labs. In addition to class projects, internships and co-ops, students gain valuable experience in producing radio programs, even as freshmen, on 107.7, The Bronc (<http://www.1077thebronc.com>) - Rider's own radio station, or by creating their own unique podcasts. Students may also expand their interests to include participating in R.U.N., The Rider University Network (<http://runetwork.weebly.com>), Rider's student produced and hosted television network, as well as participate in the *Semester in LA* program where students spend an entire semester studying and working in Los Angeles for major media companies.

Curriculum Overview

Core classes in the Radio and Podcasting major include writing for broadcast, audio production, advanced topics in podcasting and radio, and music production for mass media, among others. Students also choose a capstone experience that fits their interest from radio station operations, a hands-on internship, or a creative project.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits

Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits

As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits

Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits

This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment – and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits

In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits

Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits

Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits

Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits

Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.

Prerequisite(s): COM 104 or COM 290.

COM 205 Theories of Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits

Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.

Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits

Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.

Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits

Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits

Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits

Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits

Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements. **Prerequisite(s):** COM 104 or COM 290.

COM 232 Podcasting I 3 Credits

Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits

Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits

Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits

Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits

The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 251 Interpersonal Communication 3 Credits

Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application. Note: This course is crosslisted as GLS 252. Students may not get credit for both COM 252 and GLS 252.

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits

Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

Prerequisite(s): COM 261 or permission of instructor.

COM 263 History and Principles of Graphic Design 3 Credits

Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits

Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits

Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.

Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 292 Content for Social Media 3 Credits

Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 312 Special Topics in Journalistic Writing 3 Credits

Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.

Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits

Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.

Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits

Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.

Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GND 318. Students may not get credit for both COM 318 and GND 318.

COM 321 Stand Up Comedy 3 Credits

Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.

Prerequisite(s): COM 104: Speech Communication or COM 290: Professional and Strategic Speech.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits

Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits

Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.

Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits

This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits

Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.

Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. **Prereq(s):** COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits

In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.

Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits

Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): COM 232, COM 233, COM 234.

COM 337 Music Production for Mass Media 3 Credits

Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.

Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits

Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits

Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.

Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 348 Communication Research Methods 3 Credits

Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.

Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator. Note: This course is crosslisted as GLS 352. Students may not get credit for both COM 352 and GLS 352.

COM 353 Nonverbal Communication 3 Credits

Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 360 Advanced Publication Design and Presentation 3 Credits

Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.

Prerequisite(s): COM 212.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits

Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits

Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.

Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits

Offers students education in graphic animation theories, animation development techniques, and animation preparation for various multimedia applications. Emphasis is placed on the design principles in animated communication and animation techniques. The course covers the integration of static images in animation, graphic animation techniques, animation compression, animation rendering, input/output file formats, and animation delivery. The primary software for this course is Adobe Photoshop and MacMedia Flash. Students will be expected to participate in critiques of professional animation designs in order to learn to evaluate critically their own work and their fellow students' work.

Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits

Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.

Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits

Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.

Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits

Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media.

Note: This course is crosslisted as GLS 393. Students may not get credit for both COM 393 and GLS 393.

COM 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits

Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.

Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits

A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.

Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits

This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits

Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits

Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.

Prerequisite(s): COM 234.

COM 440 Cases & Campaigns in Public Relations 3 Credits

Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.

Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits

Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

Prerequisite(s): COM 348, COM 350, or permission of instructor.

COM 460 Web Design III 3 Credits

Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.

Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits

Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation.

Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.

Prerequisite(s): ART 103, ART 105, COM 262, and COM 360.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Research Methods in Psychology Certificate

Overview

The Certificate in Research Methods will prepare students for graduate study in many social and behavioral science areas. In addition, it will provide a background in research that will enable students to find employment as research assistants, engaged in data collection, coding, and analysis, after completing their undergraduate degrees. Finally, it will equip students with an informal credential that may be appealing in areas of employment where production, manipulation, and interpretation of data is an important function. Courses in the Certificate in Research Methods include an introductory level research methods course, upper-level research methods courses, a statistics course, and an opportunity to conduct independent research under the supervision of a faculty member

Research Methods in Psychology Certificate Requirements

(18-21 credits)

Code	Title	Credits
Required Courses:		
PSY 105	Introduction to Research in Psychology	3
PSY 201	Statistics and Research Design	3
PSY 315	Psychological Tests	3
PSY 490	Independent Study: Research and Creative Expression	1-4
Select two of the following:		8
PSY 302 & 302L	Research Methods: Cognition and Research Methods: Cognition Lab	
PSY 303 & 303L	Research Methods: Social Psychology and Research Methods: Social Psychology Lab	
PSY 306 & 306L	Research Methods: Sensation & Perception and Sensation & Perception Lab	
PSY 329 & 329L	Research Methods in Organizational Psychology and Research Methods in Organizational Psychology	
PSY 335 & 335L	Research Methods: Human Cognitive Neuroscience and Research Methods: Human Cognitive Neuroscience Lab	
PSY 336 & 336L	Research Methods: Animal Learning & Behavior and Animal Learning and Behavior Lab	
PSY 339 & 339L	Research Methods in Applied Behavior Analysis and Research Methods in ABA Lab	
PSY 340 & 340L	Research Methods: Group Dynamics and Group Dynamics Lab	
PSY 350 & 350L	Research Methods: Developmental Psychology and Developmental Psychology Lab	
Total Credits		18-21

Courses and Descriptions

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): PSY 201.

PSY 302 Research Methods: Cognition 4 Credits

Provides students with an in-depth coverage of the expanding field of cognition and memory. Addresses issues and research within the field. Emphasis is on current views of human memory. Students learn how to design and conduct their own experiments from the topic areas of information processing, psycholinguistics, problem solving, learning and memory, social cognition, and cognitive neuroscience. Laboratory skills include programming computers, developing multimedia stimuli, recording psycho-physiological data, and composing an APA-format research report in a network-based writing lab. **Prerequisite(s):** a grade of "C" in PSY 201; PSY 225, PSY 237 or PSY 325 or permission of instructor.

Corequisite(s): PSY 302L.

PSY 302L Research Methods: Cognition Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 302.

PSY 303 Research Methods: Social Psychology 4 Credits

Covers research methodology within the context of social psychology (i.e., topics include altruism, aggression, attraction and social perception). Both experimental and descriptive methodologies will be covered. Students learn about various aspects of the research process (e.g., design and execution of a social psychological study, analyzing and interpreting the results). Students also learn to integrate their research findings to produce an APA-style paper. Students use computer-based word processing and statistical analysis packages to achieve these goals. **Prerequisite(s):** a grade of "C" in PSY 201; PSY 240 or PSY 279 or permission of instructor.

Corequisite(s): PSY 303L.

PSY 303L Research Methods: Social Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 303.

PSY 306 Research Methods: Sensation & Perception 4 Credits

Provides instruction in research design, research methods, and integration of data analysis and methodology within the content framework of sensation and perception. All the general psychology research methods are taught. Special emphasis is given to the study of human vision and audition. Students design, conduct, and report laboratory research in the areas of sensation and perception. The computer-based components of the laboratory include lessons on interactive software instrumentation for research, and network-based technical writing using APA format. Projects are conducted during the term. Each student uses a dedicated networked Macintosh computer to: a) develop and generate research stimuli and procedures, b) analyze and report research data, and c) write formal research reports. **Prerequisite(s):** a grade of "C" in PSY 201 or permission of instructor.

Corequisite(s): PSY 306L.

PSY 306L Sensation & Perception Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 306.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): PSY 105 and PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

PSY 335 Research Methods: Human Cognitive Neuroscience 4 Credits

Covers the interdisciplinary study of the nervous system integrating neurobiology, physiology, pharmacology, and psychology as explanations for both normal and pathological human behavior. Topics integrate molecular levels of analysis, such as neuron structure and function, neurotransmitters, action potentials, and receptors, with molar levels, such as sensory and hormonal processes, learning and memory, emotions, drug use, and biological rhythms. Introduces research techniques used to study the function of the nervous system and the neural bases of behavior in humans. Neuroanatomical, electrophysiological, pharmacological, and neuropsychological assessment techniques may be explored as part of laboratory or field research projects designed in collaboration with the instructor. **Prerequisite(s):** grade of "C" or better in PSY 201 and PSY 255 or permission of instructor.

Corequisite(s): PSY 335L.

PSY 335L Research Methods: Human Cognitive Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 335.

PSY 336 Research Methods: Animal Learning & Behavior 4 Credits

Provides a comprehensive overview of the acquisition and modification of the behavior of animals, especially on laboratory strains of rodents and pigeons. Core topics include respondent and operant conditioning, animal cognition, observational learning, animal safety and welfare, single-subject and between-groups approaches to methodology, and the statistical analysis of the results of studies of behavior. The laboratory component of the course provides a comprehensive overview of animal handling and maintenance, animal welfare, and the recording of experimental results. Two substantial projects are undertaken; demonstration of a conditioned taste aversion and its effect upon the acquisition and extinction of an operant (bar press) response and subsequent discrimination and reversal learning. Results of both projects are written into APA-formatted reports. Prerequisite(s): a grade of "C" in PSY 201, PSY 225 or permission of instructor.

Corequisite(s): PSY 336L.

PSY 336L Animal Learning and Behavior Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 336.

PSY 339 Research Methods in Applied Behavior Analysis 4 Credits

This upper-level laboratory course will provide students with in-depth study of the principles and applications of Applied Behavior Analysis. Students will examine behavioral principles, ethical considerations and real-life applications of ABA. Each student will design and implement a self-management plan to alter a behavior of their choosing. Prerequisite(s): PSY 105 and PSY 201, PSY 212.

Corequisite(s): PSY 339L.

PSY 339L Research Methods in ABA Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 339.

PSY 340 Research Methods: Group Dynamics 4 Credits

Focuses on selected issues pertaining to group dynamics. Emphasizes an understanding of the personality and social factors that influence the functioning of unstructured and task-oriented groups. Students participate in a task group for the purpose of conducting a comprehensive research project on selected issues in group dynamics and the psychology of groups. The task group prepares an APA-style paper describing their research as well as an in-class presentation. Each student also submits a midterm and final written analysis of the interactional processes and development of the task group. Prerequisite(s): a grade of "C" in PSY 201 or permission of instructor.

Corequisite(s): PSY 340L.

PSY 340L Group Dynamics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 340.

PSY 350 Research Methods: Developmental Psychology 4 Credits

Focuses on one or more research areas in cognitive, personality, or social development. Includes an overview of major theoretical approaches to age-related change. Students review original research on selected aspects of behavioral change. The laboratory component of the course presents an overview of developmental research designs and methods focusing on the measurement of age-related change in psychological functioning. Students conduct field research projects designed in collaboration with the instructor and prepare an APA-style research report. Prerequisite(s): a grade of "C" in PSY 201 and PSY 230 or permission of instructor.

Corequisite(s): PSY 350L.

PSY 350L Developmental Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 350.

Social Justice Through Civic Engagement

Program Overview

A morally and civically responsible individual recognizes himself or herself as a member of a larger social fabric and therefore considers social problems to be at least partly his or her own. Such an individual is willing to see the moral and civic dimensions of issues, to make and justify informed moral and civic judgments, and to take action when appropriate. The Social Justice through Civic Engagement minor focuses on those populations that are "non-hegemonic" in society, adding to a students' diversity of ideas regarding these groups.

Curriculum Overview

The minor is available to students from all colleges/schools, allowing them to combine rigorous coursework with experiential learning. The coursework provides students with an academically meaningful foundation from which they can put their experiences in a larger social context. The broad range of courses available address social topics such as economics, politics, ethnicity, culture, or gender, fostering discussions that allow a student to reflect on their own experiences and consider new solutions to social problems.

Courses and Descriptions

AMS 212 Multicultural America 3 Credits

Focusing primarily on the new century, this course explores the experiences of the remarkably diverse range of ethnic groups who have come to the U.S. in recent years, including Hispanics, Europeans, Asians and Africans. How these groups have impacted the communities where they have settled, how they have interacted with other ethnic groups, and how they have assimilated (or not) and prospered (or not) are among the issues examined and discussed.

AMS 227 Martin Luther King Jr's America 3 Credits

This course studies Martin Luther King Jr's writings, speeches, and sermons, the context of the America he saw in his lifetime, and the implications of his message for today's America and its place in the world. King envisioned a wholly democratic America free of racism, poverty, and military aggression. Students will critically assess the political economic, and religious thought at the root of his call for change.

AMS 309 Hip Hop and American Culture 3 Credits

Examines and critiques hip hop as a part of American culture. Students will engage with scholarship from several fields in studying the social conditions that fostered the creation of hip hop music, and discuss how these conditions have and/or have not changed in America since the 1970s, when hip hop was born. Students will delve into such issues as how women relate to hip hop, hip hop poetics and rhyme structures, race relations in hip hop, censorship, and the ethics and legalities of digital sampling.

ECO 336 Economics of Health Care Sys 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomic tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

Prerequisite(s): ECO 201 or HTH 205.

ENG 228 Black American Lit 3 Credits

A survey of writings by black Americans, presented historically from early slave narratives through emancipation, reconstruction, the Harlem Renaissance, and literature from the 1930s to the present. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 229 Multi-Ethnic Literature in America 3 Credits

Surveys the literature of various ethnic groups including African Americans, American Indians, Asian Americans, Hispanic Americans, Jewish Americans and European Americans. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 230 Women In Literature 3 Credits

A range of literary presentations of the female experience and of the conditions of women's lives is explored. These works are placed in historical and social contexts in order to see behind and beyond traditional literary conventions. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

HIS 200 Native American History 3 Credits

Traces the experiences of North American Indians from early colonial times to the present day, demonstrating how Indian life has varied and changed throughout our nation's history. Topics include strategies of resistance and accommodation to colonial powers, 19th-century impacts of U.S. government removal and cultural assimilation policies, and 20th-century cultural and political developments among the nation's surviving tribes. Rather than "vanishing," American Indians are a vital and expanding force in modern America.

HIS 201 African American History 3 Credits

Examines the actions and thought of peoples of African ancestry in the United States. Briefly considers Africa before the Atlantic slave trade, then concentrates on major themes in African-American history—the slave trade, slavery, and the genesis of African American society, emancipation and its consequences, urbanization and industrialization, Black Nationalism, the Civil Rights Movement, and African Americans today. Emphasizes African Americans' dynamic and creative role both in shaping their society and establishing their place in United States society. The on-going struggle for freedom and equality provides thematic continuity for analyzing nearly 400 years of African-American history.

HIS 307 The Immigrant in American Life 3 Credits

Examines the experiences of immigrants in the United States, their assimilation, the reactions to them, and their contributions.

HIS 309 Women in American History 3 Credits

Examines the roles, status, and influence of women from the colonial era to the present. Studies the origins and development of feminism, including legal, political, educational, economic, and sexual rights; and studies social feminism, including reform movements in such fields as abolition, prohibition, pacifism, child labor, and social welfare.

HIS 319 Gender and Sexuality in American History 3 Credits

What makes a man, exactly, and what makes a woman? What kinds of sex are normal, and what kinds are abnormal? Who decides, and why? The answers to these questions are not fixed. Throughout American history, popular understandings of gender and sexual norms evolved in close relationship with the political, economic, racial, and social dictates of the time. This course will trace the evolution of ideas on sex and gender from the 18th century to the present using various historical sources including fiction and film, particular attention will be given to analyzing dominant models of proper behavior and the complex relationships of power enmeshed within them.

PHL 230 Philosophy of the Sexes 3 Credits

Studies philosophical views of the differences between the sexes, sexual equality, love, marriage, and the family from ancient Greece to the 20th century. Texts from the contemporary women's and men's movements will also be examined. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

POL 205 Introduction to Public Policy 3 Credits

The course provides students with an introduction to the study of public policy by linking the theoretical with the practical. The course focuses on three areas of analysis: 1) descriptive 2) evaluative and 3) prescriptive. Students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options. Last the course provides examples of public policy problems through the substantive policy areas of health, environment and education.

POL 235 Race and Ethnicity in American Politics 3 Credits

Examines the changing political, economic, and social situation of racial and ethnic groups in American politics since the 1950s. Topics include the relationship between race/ethnicity and voting behavior, political parties, and election results. Includes an analysis of specific areas of contemporary racial and ethnic conflict, such as voting rights, immigration, and affirmative action.

POL 280 Sex & Gender in International Politics 3 Credits

What's a student of political science, International Relations (IR), or another social science field to do about feminism? This is a question that has troubled IR for decades. While feminist debates engaged people in spaces outside the disciplines of political science and particularly IR, IR scholars did their best not to see the relevance of feminism for their own debates. That did not stop some feminists from rethinking key IR concepts like power, race and the state, but such contributions were largely ignored by IR scholars until very recently. It was only in the last decades, when feminist questions pushed their way onto the IR agenda through books, journals, and conferences, that feminism suddenly seemed attractive to IR scholars. Designed as an interdisciplinary course with a strong reference to Global and International Politics, this course will provide a basic introduction to some of the major global questions as seen through a feminist lens. This course is cross-listed as GLS 280. Students may not get credit for completing both GLS 280 and POL 280.

POL 327 Contemporary Issues in American Public Policy 3 Credits

An in-depth examination of current issues in American politics. Drunk driving, political corruption, drug policy, education, and poverty are among the issues to be considered. Emphasis on analyzing policy problems and on developing and evaluating proposed solutions.

POL 328 Environmental Politics 3 Credits

Environmental Politics examines how policymakers deal with the political challenges of unsustainable resource consumption, which is a primary determinant of environmental problems such as climate change, adverse health effects, and biodiversity loss. The course introduces students to environmental politics and policies at the local, state, national, and international levels. The course is designed to provide students with a framework for understanding how varied interests compete within political institutions in order to transform contending ideas into public policy. With that in mind, students will not only become more informed consumers of political information, but will also become more effective at analyzing and advocating for policies as it relates to the environment.

POL 363 Human Rights in Global Context 3 Credits

Examines human rights – droits de l'homme, derechos humanos, Menschenrechte, "the rights of man" – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breath and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as HLS 363. Students may not get credit for both HLS 363 and POL 363.

SOC 207 Racial and Ethnic Relations 3 Credits

Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

Prerequisite(s): SOC 101.

SOC 230 Foundations of Civic Engagement 3 Credits

This course is an introduction to civic engagement: its meanings, opportunities and limitations. Students will learn about the different opportunities for civic engagement in the community as well as the theories and skills associated with it. Students will learn the role of formal and informal institutions in community engagement and will identify a specific organization for in depth investigation.

Prerequisite(s): SOC 101.

SOC 245 Social Problems 3 Credits

American social, economic, and political institutions and their interrelationships are analyzed, with an emphasis on the causes, directions, and consequences of social change in American society.

Prerequisite(s): SOC 101.

SOC 312 Women in Society 3 Credits

Examines changes in women's roles and in male-female relationships. Focuses on impact of law, economy and social movements in shaping women's positions as wives and as workers. Explores theories and evidence concerning the nature and extent of sex differences. Attention to women's socialization through language, schools and media.

Prerequisite(s): SOC 101.

SOC 313 Gender and Criminal Justice 3 Credits

This course will examine women's experiences with the criminal justice system as offenders, victims, prisoners, and practitioners. It will consider how gender has shaped theories of crime and criminological research. It will explore how cultural constructions of gender have influenced substantive and procedural criminal law, the ways criminal justice agencies respond to crime, and how these have changed historically. Attention will be given to the development of new approaches, reforms, and challenges.

Prerequisite(s): SOC 101.

SOC 340 Power and Politics 3 Credits

Examines the nature and distribution of power in contemporary societies; analyzes the relationships between power and politics.

Prerequisite(s): SOC 101.

SOC 345 Race and Crime 3 Credits

Examines the impact of crime policy on minority communities in the United States, with particular attention to the impact of "The War on Drugs", three-strike laws, and mandatory sentencing on minorities and minority communities. Drawing on sociological research, the course explores myths and realities concerning the relationship between race and crime. The relationship between racial attitudes, historical race relations, and mass incarceration are discussed.

Prerequisite(s): SOC 101.

SOC 346 Health Care and Society 3 Credits

Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.

Prerequisite(s): SOC 101.

SOC 350 Social Policy 3 Credits

Investigates the relationship between economic development and social policy in comparative and historical context. The main features of preindustrial, early industrial, and advanced industrial social welfare systems are described. Social, economic and political factors that shape social policy are investigated.

Prerequisite(s): SOC 101.

SOC 490 Independent Study: Research and Creative Expression 1-4 Credits

Juniors or seniors who have completed at least 12 credit hours in sociology may propose an independent research project with the aid and advice of any full-time faculty member of the department. Proposals must be reviewed and approved by the sponsoring faculty member and submitted to the department's Independent Study Committee at least four weeks prior to the last day of classes for the semester preceding Independent Study.

Prerequisite(s): SOC 101.

SOC 491 Internship in Sociology 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of applications of sociology in work settings and to analyze work settings using sociological knowledge and research methods. Placements are made in business, government, and community offices that utilize sociological knowledge or research skills.

Prerequisite(s): 2.75 GPA.

Social Media Strategies

Overview

Social media has forever changed the communication and journalism professions. For today's students, being able to effectively plan, manage, and evaluate social media as an integrated communication tool has become a requirement for success in the communication discipline. This minor will provide students with a foundation to employ social media as an effective communication tool in a variety of professional settings by providing practical and applied learning.

The program combines theory and best professional practices with hands-on application, development of critical media skills (including writing and multimedia content creation), and necessary management and strategy in a variety of organizational settings that will culminate in a capstone experience. The Social Media Strategies minor will provide students with the background needed and qualifications required in a wide variety of communication positions.

Total Credits 21

Courses and Descriptions

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

Social Work

Program Overview

In a sequence of three social work courses, students learn about the development of welfare and social service programs; they acquire skills in interviewing, case management, and group dynamics; and they gain work experience in a social service agency.

Courses and Descriptions

SOW 200 Social Services & Social Work 3 Credits

An overview of the historical development of social work. Emphasis on current issues in social welfare and social service programs in the United States. Among the programs explored are those in public welfare, mental health, medical services, child abuse/neglect, school social work, and care for the elderly.

SOW 300 Methods Social Work Practice 3 Credits

Interviewing techniques are taught and practiced. Skills in forming and running small groups, working with community organizations, and administering social programs are emphasized. Students study how to gather pertinent psycho-social facts about clients, make an assessment, plan an intervention, and successfully complete service to the client. Students who next will take SOW 301 Field Work Experience will be placed in a social service agency by the end of the semester.

Prerequisite(s): SOW 200.

SOW 301 Field Work Experience 3 Credits

Students observe and work in a social service agency. They study the structure of the agency and the people and roles within it, and develop helping skills with clients. Approximately six to eight hours of field work a week for each three credits are required, plus class sessions during the semester.

Prerequisite(s): SOW 200, SOW 300. May be taken twice in two separate semesters for a maximum of six credits toward the total credits required for graduation.

SOC 205 Families 3 Credits

Examines families in the United States, past and present, emphasizing the variety of family experiences in different social contexts and the relationship between family life and social change. Includes comparative material on families in other countries and considers possible alternatives to current family forms.

Prerequisite(s): SOC 101.

SOC 248 Social Service Organizations 3 Credits

Examines the growth and variety of social service organizations. The training of providers, such as teachers and physicians, and relationships between professionals and clients in settings such as schools and hospitals are studied as well as organizational decision-making, finances, and community relations.

Prerequisite(s): SOC 101.

SOC 350 Social Policy 3 Credits

Investigates the relationship between economic development and social policy in comparative and historical context. The main features of preindustrial, early industrial, and advanced industrial social welfare systems are described. Social, economic and political factors that shape social policy are investigated.

Prerequisite(s): SOC 101.

PSY 230 Child Development 3 Credits

Presents theory and research on the social, emotional and cognitive development of children birth to age 12.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 231 Youth and Adolescent Development 3 Credits

Presents theories, research and problems concerning development in youth and adolescence.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

Sociology

Program Overview

Sociology helps people understand how social groups, organizations, social institutions and societies function, how they change over time, how they impact our lives — and how they are created and sustained, as well as how they can be changed.

Sociology is the root of many other areas of study of human endeavor, and remains a source of their new developments. Sociological research and scholarship provided the foundation for management studies, communication and media studies, legal studies, and criminology and criminal justice studies, to name a few. That is why training in sociology can provide excellent background and skills for such a wide range of careers such as test marketing, public opinion polls, census data gathering and analysis. Some sociology majors decide to pursue further education and to obtain graduate degrees, for example, in law, urban planning, social work.

Curriculum Overview

The curriculum includes introductory courses in sociology and anthropology, a sequence of skills courses for majors and minors, and a variety of substantive courses on specific topics. Sociology majors with a grade point average above 3.00 may complete a senior thesis for the sociology honors program.

Sociology students take a total of 15 three-credit courses to complete the major, including a sequence of required courses designed specifically for majors including those double majoring in sociology and education.

Seminars at the freshman and senior levels provide extensive class participation, personalized instruction, and carefully supervised individual research. Courses in research methods and statistics instruct students in diverse techniques of information gathering and analysis. In addition to these courses, sociology students select a set of courses in substantive areas. Through consultation with their faculty advisers, students are able to focus on such areas of special career or academic interest to them as criminal justice, law, education, social services, management, or marketing.

Honors Program in Sociology

Honors in sociology may be achieved by earning a 3.5 cumulative average in the discipline and completing, through honors in sociology (SOC 496), a senior honors thesis with distinction.

SOC 401	Sex and the Body in Society
SOC 490	Independent Study: Research and Creative Expression
SOC 491	Internship in Sociology
SOC 496	Honors in Sociology
or SOC 497	Honors in Sociology

Total Credits 42

Seniors planning to attend graduate school should take the Graduate Record Examination, including the Advanced Test in Sociology.

¹ Course sequence recommendations: The Sociological Imagination preferably should be taken in the freshman year, the Introductory Seminar in the sophomore year, Methods and Social Theory in the junior year. Your particular sequence of courses will be arranged in consultation with your advisor.

² Additional courses from the above list may be taken beyond the minimum to satisfy the Sociology electives component of sociology major requirements

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year, who change their major, or those who transfer to Rider will follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

SOC 101 Sociological Imagination 3 Credits

Introduction to principles and concepts for the sociological analysis of human societies. Social relations, social structure, and institutions characteristic of societies past and present are examined, and causes and directions of social change are considered. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

SOC 110 Cultural Anthropology 3 Credits

The anthropological perspective is introduced, placing human behavior and institutions within their evolutionary, ecological, structural, and ideological contexts. Examples are drawn from the full range of human societies, with an emphasis on nonindustrial forms.

SOC 119 Introduction to Criminal Justice: Police, Courts, Corrections 3 Credits

This course introduces students to the sociological study of the criminal justice system. It examines the cultural and social foundations of this system, and review debates about problems with the criminal justice system and proposals to change it. Topics covered include nature of the crime problem, requirements of criminal law, policing, the role of the courts and legal professionals, sentencing, incarceration and alternatives to it.

Prerequisite(s): SOC 101.

SOC 150 Introduction to Forensics 3 Credits

Introduces students to principles of forensic science. Whether the issue is establishing paternity or cause of death, determining arson or liability, or deciding criminal guilt or innocence, collecting and evaluating forensic material is typically involved. Students will learn the meaning and significance of scientific evidence and its role in criminal investigations and civil and criminal trials. Students will learn how forensic scientists work, define a problem, collect data, and analyze results. Case studies, crime simulations and examination of criminal evidence will highlight the application of scientific principles.

SOC 201 Intro Seminar in Sociology 3 Credits

Designed for students considering a major or minor in sociology. The seminar locates sociology in relation to other disciplines; reviews the basic perspectives used by sociologists to study human behavior; and considers the methods and applications of sociological inquiry.

Prerequisite(s): SOC 101.

SOC 204 Law, Literature, and Film in America 3 Credits

Focuses in an interdisciplinary manner on law and justice as represented in American literature and films. It analyzes novels, short stories, and selected non-fiction texts from the perspectives of literary criticism, social history, and cultural and American studies.

SOC 205 Families 3 Credits

Examines families in the United States, past and present, emphasizing the variety of family experiences in different social contexts and the relationship between family life and social change. Includes comparative material on families in other countries and considers possible alternatives to current family forms.

Prerequisite(s): SOC 101.

¹ For course placement information please visit this website (<http://www.rider.edu/offices-services/orientation/course-placement/>).

² Please note that elective credits may be used to complete requirements in a second major or minor.

³ Select from the following: SOC 311, SOC 315, SOC 317, SOC 330, SOC 340, SOC 355

SOC 206 Deviance and Crime 3 Credits

Considers deviant behavior as violation of social norms. Examines the concepts of deviance and crime in socio-historical context. Evaluates major theories advanced to explain deviance. Surveys different types of deviance, including conventional crime, non-criminal deviant behavior, and white-collar corporate, and government crime.

Prerequisite(s): SOC 101.

SOC 207 Racial and Ethnic Relations 3 Credits

Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

Prerequisite(s): SOC 101.

SOC 210 Criminal Investigation 3 Credits

Approaches criminal investigation conceptually. Students consider the social issues involved in criminal investigation, as well as ethical and legal aspects of it. The course covers such topics such as the principles of criminal investigations, the rules and procedures of preliminary and follow-up investigations, the art of interrogation, recording of statements, confessions, and the collection and preservation of physical evidence at the crime scene. Emphasis is placed on the need for meticulous adherence to rules of law and ethical practices, as an investigation proceeds from initial actions to arrest, and eventual prosecution. The course also examines the methods used in scientific interpretation of evidence and the preparation of criminal cases for trials, as well as its role in today's criminal justice system.

Prerequisite(s): SOC 150.

SOC 211 Social Movements 3 Credits

This course examines social movements that seek change in the social, cultural and political structures of society. The social, economic and political contexts of these movements are treated as well as their origins, tactics, organization, recruitment, and successes and failures. Case studies focus on movements in the areas of labor, civil rights, feminism, the environment, "right wing politics", and neighborhood activism.

Prerequisite(s): SOC 101.

SOC 216 Youth and Crime 3 Credits

In-depth examination of the nature and extent of youth criminality in the U.S. Explores changes in youth culture and theories of delinquency. Social policies are related to youth criminality and the youth justice system is considered.

Prerequisite(s): SOC 101.

SOC 225 Population Study 3 Credits

Demography; its definition, historical emergence, and growth; population as a social problem in developing and developed nations; population theories, sources and methods of demographic data, population composition, and distribution; demographic processes including fertility, mortality, and migration.

Prerequisite(s): SOC 101.

SOC 230 Foundations of Civic Engagement 3 Credits

This course is an introduction to civic engagement: its meanings, opportunities and limitations. Students will learn about the different opportunities for civic engagement in the community as well as the theories and skills associated with it. Students will learn the role of formal and informal institutions in community engagement and will identify a specific organization for in depth investigation.

Prerequisite(s): SOC 101.

SOC 245 Social Problems 3 Credits

American social, economic, and political institutions and their interrelationships are analyzed, with an emphasis on the causes, directions, and consequences of social change in American society.

Prerequisite(s): SOC 101.

SOC 246 Drugs, Crime & American Society 3 Credits

Explores the nature and extent of drug use in the U.S., how drugs are legally defined and socially constructed, and considers how and why drug policies have developed and changed historically. Considers how the criminalization of drugs has impacted policing strategies, courts, probation programs, sentencing and corrections, as well as other social institutions. Examines the role of local and federal agencies in enforcing drug laws, and considers debates about directions for legal reforms.

Prerequisite(s): SOC 101.

SOC 247 Aging 3 Credits

The emergence of social gerontology, demographic foundation of aging, the aging process, comparative study of aging and aged, effect of aging on the individual, social institutions and aging, and problems of aging and some solutions.

Prerequisite(s): SOC 101.

SOC 248 Social Service Organizations 3 Credits

Examines the growth and variety of social service organizations. The training of providers, such as teachers and physicians, and relationships between professionals and clients in settings such as schools and hospitals are studied as well as organizational decision-making, finances, and community relations.

Prerequisite(s): SOC 101.

SOC 252 Media, Culture and Society 3 Credits

Examines mass-produced commercial culture, how it has developed, and the role it plays in modern society. Analyzes the content of these cultural forms, how its production is organized, and how audiences perceive it.

Prerequisite(s): SOC 101.

SOC 261 Schools and Schooling 3 Credits

Schools and the process of schooling are analyzed within a broad historical perspective as well as within the structural and cultural context of American society. Education within a global perspective is also considered. Issues discussed include school funding, integration, tracking, technology, bureaucratization, and the "cultural wars" fought within the schools.

Prerequisite(s): SOC 101.

SOC 269 Physical Anthropology 3 Credits

An analysis of the biological development of the human capacity for culture. Topics include: modern theories of evolution and their application to human evolution; the relationship of human beings to other primates, the human fossil record, and variation among modern human populations. A background in biological studies is not necessary.

Prerequisite(s): SOC 101.

SOC 270 Area Studies: Africa 3 Credits

An intensive investigation of problems arising from historical and contemporary studies of tribal, peasant, and transitional societies in Africa south of the Sahara.

Prerequisite(s): SOC 101.

SOC 271 Area Studies 3 Credits

Studies problems arising from historical and contemporary studies of peasant populations of Europe.

Prerequisite(s): SOC 101.

SOC 272 Area Studies: Indians of North America 3 Credits

Societies and cultures of the Indians of North America from the Arctic to Mesoamerica. Emphasis on evidence of these tribal groups prior to extensive acculturation and their contemporary situation.

Prerequisite(s): SOC 101.

SOC 300 Work and Occupations 3 Credits

Analyzes the nature and organization of work in modern society. Focuses on such issues as division of labor, specialization, alienation, professionalization, and the role of technological change. Includes an examination of the historical development of work in the 20th century, and a consideration of contemporary and future patterns of work organization.

Prerequisite(s): SOC 101.

SOC 301 Methods of Sociological Research 3 Credits

One of the required courses in both the Sociology and Criminal Justice majors, Methods of Sociological Research introduces students to basic research processes in the social sciences. The course introduces students to both quantitative and qualitative approaches and data analysis using both original and secondary sources. Students will also complete an original research paper in this course.

Prerequisite(s): SOC 101.

SOC 302 Crime & Justice in the Media 3 Credits

This course focuses on the impact of media on Americans' perceptions and understanding of the extent and causes of crime, and the effectiveness and purposes of crime policy. It examines how criminals, types of crime, crime policies and the criminal justice system are portrayed in various media outlets, including film, tv, newspaper, and electronic/internet. It explores the historical and contemporary relationships between media representations of criminal behavior, crime as a social problem, and the nature of the criminal justice system and contrasts these to their social realities.

SOC 304 Women and Law 3 Credits

Explores the social, economic, political and cultural context of laws relating to women and gender, such as workplace discrimination, divorce and child custody and reproductive rights. It examines how such laws have changed historically and the impact such laws have had on women as well as on men and on American social institutions, such as the family, politics, and the workplace. The course also examines women in the legal profession and their impact on the practice of law and legal reasoning.

SOC 307 Criminal Justice Practice 3 Credits

This course will consider the ways criminal justice agencies and occupations are shaped by social, economic, political, technological and legal changes. Through case studies and projects students will examine the work, culture, and work settings of various criminal justice practitioners, assess the impact of social policies on criminal justice careers, and identify new directions in the field. Students will develop the reading and writing skills needed by an array of criminal justice practitioners.

SOC 308 Cities And Suburbs 3 Credits

Examines the growth of an urban way of life under the influence of industrialism. Study of community, political, and economic institutions in cities. Comparisons between urban and suburban areas.

Prerequisite(s): SOC 101.

SOC 309 Peasant Society 3 Credits

A comparative view of peasants and their significance in agrarian, colonial, and industrial societies. Peasant economic, political, and social institutions are analyzed with an eye to both their internal operation and the way they relate to non-peasant groups who hold power in these societies. The changes that have occurred in the peasant world are viewed both as a consequence and a cause of wide reaching political and economic upheaval.

Prerequisite(s): SOC 101.

SOC 310 Pre-Industrial Economies 3 Credits

The anthropological study of technology, production, and exchange in nonmarket cultures, as related to the social, ideological, and ecological systems in which they are embedded. The question of whether the concepts that derive from market economies can be applied to all economic systems is considered in detail.

Prerequisite(s): SOC 101.

SOC 311 Social and Cultural Change 3 Credits

Investigates the process of change in both industrial and nonindustrial settings. Particular attention paid to the role of the individual in change as well as the roles played by the mode of production, social organization, and ideological constructs. Case studies are drawn from non-Western as well as Western sources.

Prerequisite(s): SOC 101.

SOC 312 Women in Society 3 Credits

Examines changes in women's roles and in male-female relationships. Focuses on impact of law, economy and social movements in shaping women's positions as wives and as workers. Explores theories and evidence concerning the nature and extent of sex differences. Attention to women's socialization through language, schools and media.

Prerequisite(s): SOC 101.

SOC 313 Gender and Criminal Justice 3 Credits

This course will examine women's experiences with the criminal justice system as offenders, victims, prisoners, and practitioners. It will consider how gender has shaped theories of crime and criminological research. It will explore how cultural constructions of gender have influenced substantive and procedural criminal law, the ways criminal justice agencies respond to crime, and how these have changed historically. Attention will be given to the development of new approaches, reforms, and challenges.

Prerequisite(s): SOC 101.

SOC 314 Social Theory 3 Credits

Introduces the major thinkers and conceptual problems characterizing the development of sociological thought. Required of sociology majors.

Prerequisite(s): SOC 201.

SOC 315 Issues in Modern Social Theory 3 Credits

Examines current trends and issues in sociological thought.

Prerequisite(s): SOC 314 or permission of instructor.

SOC 316 Feminist Social Thought 3 Credits

An introduction to feminist social theory, with emphasis on its breadth and variety. Special attention paid to the ways feminist theorists have analyzed the relationship of gender to other kinds of group differences.

Prerequisite(s): SOC 101.

SOC 317 Law and Lawyers 3 Credits

Relationships between law, the economy, and the state are explored. Discussion of laws, legal systems and legal reasoning using cross-cultural comparisons and historical analysis of these in the United States. Particular attention given to impact of law on corporations, workers, women, and minorities. Changes in legal profession and legal education are examined.

Prerequisite(s): SOC 101.

SOC 318 Hate Crimes in the United States 3 Credits

Provides an interdisciplinary exploration of hate crimes in the United States, its causes and consequences. It will examine the social, political, and legal issues that have shaped policies and laws designed to respond to hate crimes and assess their effectiveness. Debates about the nature of hate crimes and the special laws and sentencing provisions developed to deal with them will be discussed. Topics include hate crimes on college campuses, hate on the Internet, legal and constitutional issues, and criminal justice enforcement.

SOC 320 Religion and Belief Systems 3 Credits

The relation of religious phenomena to social structures and processes; religion in cross-cultural perspective.

Prerequisite(s): SOC 101.

SOC 321 White Collar & Corporate Crime 3 Credits**SOC 322 Punishment and Corrections 3 Credits**

This course explores the nature, forms, rationales, and effectiveness of punishment as a form of crime control. It traces the development of corrections in the U.S., identifies cultural trends and developments in penology, including mass incarceration and supermax prisons, considers the ways race and class have shaped these, and the reverberating effects penal policies have had on American culture and society beyond the criminal justice system. It examines the role of laws, politics, crime control agencies, as well as of media, and corporations in shaping penal policies. Topics also include: prison subcultures, inmate rights, correctional practices, privatization of prisons, and alternatives to punitive policies of incarceration and capital punishment.

Prerequisite(s): SOC 101.

SOC 325 Population Study 3 Credits**SOC 330 Class and Economic Inequality 3 Credits**

Social, economic, and political aspects of the division of society into classes are considered. Theories of stratification and the distribution of wealth, power, and prestige in societies past and present are examined.

Prerequisite(s): SOC 101.

SOC 340 Power and Politics 3 Credits

Examines the nature and distribution of power in contemporary societies; analyzes the relationships between power and politics.

Prerequisite(s): SOC 101.

SOC 341 Developing Societies 3 Credits

Examines theories explaining patterns of development; indicators and measures of social well-being; and problems such as population, hunger and environmental crises in developing countries. Focuses especially on patterns of development in Latin America or China.

Prerequisite(s): SOC 101.

SOC 342 Police and American Society 3 Credits

This course examines important issues regarding police in American society, such as the paradoxes inherent in police work, police organization and strategies and their effectiveness, the dilemmas of supervising police work, police unionism, the nature and implications of police occupational subculture, the use of police discretion, forms of police misconduct and accountability, professionalization of police and the trend toward police privatization. It also considers the diversity of the police force, trends in the delivery of policing services, the impact of new technologies on policing, and the challenges of policing in a multicultural society.

Prerequisite(s): SOC 101.

SOC 343 Policing and Counter Terrorism 3 Credits

This course is designed as an upper level (undergraduate/graduate) combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

Prerequisite(s): SOC 101.

SOC 345 Race and Crime 3 Credits

Examines the impact of crime policy on minority communities in the United States, with particular attention to the impact of "The War on Drugs", three-strike laws, and mandatory sentencing on minorities and minority communities. Drawing on sociological research, the course explores myths and realities concerning the relationship between race and crime. The relationship between racial attitudes, historical race relations, and mass incarceration are discussed.

Prerequisite(s): SOC 101.

SOC 346 Health Care and Society 3 Credits

Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.

Prerequisite(s): SOC 101.

SOC 347 Aging and the Elderly 3 Credits**SOC 348 Human Service Organizations 3 Credits****SOC 349 Retirement and Leisure 3 Credits**

Examines the social phenomena of retirement as an event, process, social role, and life stage. Explores the meaning of leisure, time utilization, and creativity among the elderly. Defines related problems and issues, i.e., financial, physical, psychosocial, and environ-mental. Positive as well as negative implications are presented and evaluated.

Prerequisite(s): SOC 247 recommended.

SOC 350 Social Policy 3 Credits

Investigates the relationship between economic development and social policy in comparative and historical context. The main features of preindustrial, early industrial, and advanced industrial social welfare systems are described. Social, economic and political factors that shape social policy are investigated.

Prerequisite(s): SOC 101.

SOC 351 The Rights of the Accused 3 Credits

Analyzes the major substantive and procedural rights accorded to the criminally accused by the United States Constitution. Particular attention will be given to the right to counsel, confessions and self-incrimination, arrest, search and seizure. Students will learn to argue and write hypothetical case opinions.

SOC 355 Social Interaction 3 Credits

Examines the interpersonal relation between and among people in private life, public places, and at work. Explains how such relations affect and are affected by changes in the larger social structure.

Prerequisite(s): SOC 101.

SOC 360 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 361 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 362 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 363 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 364 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 365 Selected Top: Social Movements 3 Credits

FALL 2012 - This course examines movements that seek change in the social, cultural and political structures of society. The social, economic and political contexts of these movements are treated as well as their origins, tactics, organization, recruitment, and successes and failures. Case studies focus on movements in the areas of labor, civil rights, feminism, the environment, "right wing politics", and neighborhood activism. In today's world, social movements abound. Movements such as the Tea Party and the Occupy movements demonstrate that they can take place across the political spectrum of society. Moreover, the interconnectedness of the world economy creates social movements throughout the world, whether in Asia, the Mid-East or Europe that have direct affects on the United States. Because the coverage of these movements are given considerable media exposure, students (and the public) tend to accept the interpretations of these movements as presented in the narratives of the media coverage. This class will provide a systematic academic treatment of social movements. Because social movements target structural and cultural institutions in society, the study of these movements will not only provide an understanding of these movements, but of larger social problems in society as well.

Prerequisite(s): SOC 101.

SOC 367 Selected Topics: Environment 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 368 Selected Topics in Sociology 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 369 Selected Topics in Sociology 3 Credits**SOC 396 Applied Sociology 3 Credits**

Shows how sociology can be applied in work settings. As participant observers in organizations related to their career objectives, students learn to apply sociological knowledge, perspectives, and skills. In class meetings and individual consultations with the instructor, students examine the applied dimensions of sociology, the uses of sociology in various occupations, the ethical issues involved in applied sociology, and the culture and structure of their work organization.

Prerequisite(s): SOC 101.

SOC 400 Senior Seminar 3 Credits

For sociology majors only. This seminar involves in-depth examination and research of a specific issue of current importance in the discipline. Learning to do sociology is emphasized.

Prerequisite(s): SOC 201, SOC 301, SOC 314.

SOC 401 Sex and the Body in Society 3 Credits

Examines cultural meanings and social practices associated with sex and the body. Contemporary cultural norms and practices in the U.S. will be compared to other societies, historically and cross-culturally. Variations in sexual practices, ideals of sexual attractiveness according to age, gender, race, ethnicity, class and sexual orientation also will be discussed. Topics may include beauty industries (e.g. cosmetics, diet, fashion, surgery, drugs), sex and the workplace, the impact of media, social policy, and technology on ideals of sexual attractiveness, birth control, and sexual violence.

Prerequisite(s): SOC 101.

SOC 460 Criminal Justice Senior Seminar 3 Credits

Draws on and develops students' knowledge and understanding of crime, criminal law and criminal justice institutions, and applies these to a specific topic, method, institution, or controversy. Topics vary. Students will be expected to contribute to seminar discussions and to complete research projects related to the seminar theme. Required for senior criminal justice majors; open to others only by permission of the chair.

SOC 490 Independent Study: Research and Creative Expression 1-4 Credits

Juniors or seniors who have completed at least 12 credit hours in sociology may propose an independent research project with the aid and advice of any full-time faculty member of the department. Proposals must be reviewed and approved by the sponsoring faculty member and submitted to the department's Independent Study Committee at least four weeks prior to the last day of classes for the semester preceding Independent Study.

Prerequisite(s): SOC 101.

SOC 491 Internship in Sociology 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of applications of sociology in work settings and to analyze work settings using sociological knowledge and research methods. Placements are made in business, government, and community offices that utilize sociological knowledge or research skills.

Prerequisite(s): 2.75 GPA.

SOC 496 Honors in Sociology 3-6 Credits

Training in the efficient collection of data that has a bearing on the problem being investigated. Stresses the technique of proper summarization of the collected material as well as the integration of that material into a comprehensive report. A research design is prepared and hypotheses tested in the field. The original library research is then combined with the findings to produce a mini-thesis. Approval of student's program by a sponsoring faculty member and the department Independent Study Committee is required.

Prerequisite(s): SOC 201, SOC 301.

SOC 497 Honors in Sociology 3-6 Credits

Training in the efficient collection of data that has a bearing on the problem being investigated. Stresses the technique of proper summarization of the collected material as well as the integration of that material into a comprehensive report. A research design is prepared and hypotheses tested in the field. The original library research is then combined with the findings to produce a mini-thesis. Approval of student's program by a sponsoring faculty member and the department Independent Study Committee is required.

Prerequisite(s): SOC 201, SOC 301.

Spanish

Program Overview

Majoring in a foreign language such as Spanish allows students to pursue careers in business, management, law, government, teaching, translation, publishing, communications, and travel.

At Rider, Spanish majors acquire an international perspective and a unique intercultural sensitivity. Advanced foreign language skills combined with intercultural expertise increase the employment prospects of students in the global marketplace of today.

A major or minor in Spanish offers students the opportunity to receive a practical grounding in language and culture through a challenging curriculum which may include study abroad. In addition, our language, literature, film, and culture courses prepare students to understand cultural diversity abroad and at home, to appreciate their own language and culture, and to gain global awareness. An individual fluent in another language acquires insight into the world in which we live. Advanced foreign language skills, combined with an international perspective and intercultural expertise, position our students for productive careers in the global and multicultural marketplaces of the 21st century. Faculty engagement in research and teaching excellence combines with our unique "accent on the individual" through advisement and co-curricular opportunities to create a challenging yet supportive atmosphere in which students can realize their potential.

A major or minor in Spanish will complement many degree programs in business, education, music, and the liberal arts.

Students have access to a Foreign Language Media Center with 25 computer workstations with Internet access for self-paced work and classroom instruction including interactive audio, video, and text-based materials.

Curriculum Overview

Classes in the Spanish major include Spanish for business, advanced communication in Spanish, Spanish culture and civilization, Latinx Cultures, Latin American/Latino culture, Introduction to Spanish literature,

Cervantes, the Spanish golden age, and modern Hispanic literature and cinema.

Some requirements may be met by studying abroad. Students may also minor in French or Chinese.

Honors Programs in Languages, Literatures and Cultures

The department faculty will identify prospective honors students at the earliest possible moment and offer them challenges and encouragement to develop to their highest potential. A student who has a 3.25 cumulative average and a 3.5 in the major may be invited by the department, upon recommendation of a faculty member, to become a candidate for the 3-credit honors thesis or capstone project. Details of the thesis or capstone project will be arranged to accommodate the interests of the individual student.

The thesis/capstone project is completed during the senior year. It represents the culmination of a student's academic experience and is an irreplaceable learning experience for the development of research, writing, and critical thinking skills for graduate school admissions and success, as well as work in numerous careers. Students who successfully complete the thesis or capstone project and retain the required cumulative and major grade point average will graduate with honors.

Liberal Arts Options

Select one of the options below: 12

Option I

Four courses of language:

- a. two of two different languages OR
- b. four of one language

Option II

Three classes of one language and ONE class from among the following options:

- a. Masterworks 250 or 251 OR
- b. one course in Latin American Studies OR
- c. one course in European Area Studies

Option III

Two classes from one language and TWO classes from among the following options:

- a. Masterworks 250 and/or 251 OR
- b. 1-2 courses in Latin American Studies OR
- c. 1-2 courses in European Area Studies

Total Credits 39

Note:

- 1. Students who complete SPA 490 during their senior year may substitute with one of the collateral requirements.

- 2. Some of the requirements for the major may be met by Study Abroad. Students are strongly encouraged to spend at least one semester abroad.
- 3. All majors must take at least one Spanish course per semester in the senior year.
- 4. Students must receive a grade of "C" or better in courses required for the major or minor in the department. If a student receives a grade lower than "C" in a required course, the student must meet with his/her academic advisor to discuss the appropriate action that must be taken to remedy the situation.

Courses and Descriptions

SPA 100 Spanish I 3 Credits

Introduction to the fundamentals of Spanish grammar, with emphasis on communicative skills, in culturally authentic contexts. Students are required to work extensively with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): placement test if Spanish has been studied elsewhere.

SPA 101 Spanish II 3 Credits

Continuation of Spanish 100. Emphasizes the use of language for communicative and cultural competency while developing a solid grammar foundation in Spanish. Students are required to work extensively with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): SPA 100 or placement test.

SPA 102 Elementary Spanish II Abroad 3 Credits

This course is the second part of the first-year experience in Spanish and is designed for students who have taken Spanish for Beginners I and who are interested in experiences abroad in a Spanish speaking culture. The aim is to develop the four basic skills (listening comprehension, speaking, reading, and writing) in and beyond the classroom. The discussion of distinctive cultural aspects of the Hispanic world is an integral part of this course as well as to encourage students to experience the world through the eyes of the other culture by exposing them to the literature and arts of the local culture. This course takes 8 weeks in total, 7 weeks at Rider online and 1 week abroad. During the seven weeks, students practice linguistic skills and gain cultural knowledge related to the country of destination. These skills and knowledge will prepare the students for the one week abroad experience.

Prerequisite(s): SPA 100 with a minimum grade of D.

SPA 103 Introductory Medical Spanish 3 Credits

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive, and presentational communication skills as well as growth in cultural, literary, and interdisciplinary knowledge as they move through a sequence of study. This course is the second part of the first-year experience in Spanish during which the development of communicative and cultural competencies is at the center of this experience. At the end of the course, successful students will be able to handle a variety of uncomplicated communicative tasks in straightforward social situations. They will also develop a sense of the cultural aspects of peoples who speak the target language. This course offers an additional focus on the use of Spanish across a variety of medical professions. Students interested in careers in medicine, nursing, counseling, physical therapy, chiropractic education, healthcare communication, public policy or other related fields will benefit from the linguistic (i.e., vocabulary and grammar) and sociocultural topics examined in this course. In addition to learning grammar and vocabulary that will translate into real-world skills in medical and healthcare professions (e.g., talking to patients, navigating a hospital setting, diagnosing illnesses), students will also explore sociocultural topics on how Latinx communities in the United States relate to medical and healthcare services and industries. In order to take this course, students must have taken Spanish I (SPA 100) at Rider or placed into Spanish II or Introductory Medical Spanish (SPA 101 or SPA 103) on the Foreign Language Placement Test.

SPA 200 Spanish III 3 Credits

A focus on key communicative structures in Spanish with emphasis on aural-oral (listening and speaking skills) and composition writing. Cultural and literary readings and films will be used to develop these skills. A special section may be offered to address the needs of native speakers. Students may be required to work with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): SPA 101, 102, 103 or placement test.

SPA 201 Spanish IV 3 Credits

A continuation of communicative Spanish review with emphasis on aural-oral and written skills to prepare students for further study. The discussion of distinctive cultural aspects of the Hispanic world is an integral part of this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisites: SPA 200 or placement test.

SPA 300 Advanced Grammar & Composition 3 Credits

A systematic review of grammatical structure. The development of writing skills, in preparation for upper level courses in literature, culture and professional language.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 301 Spanish for Business 3 Credits

A solid foundation in business vocabulary and cultural concepts; situational practice in geographic and cultural contexts necessary to be successful in today's Spanish-speaking world. Practice in writing business letters and other documents. Oral and written assignments to help students improve their critical thinking and become better communicators.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 302 Writing and Translating 3 Credits

Practice in writing and an introduction to translation for students who will use Spanish in their professional lives. Using literary, cultural and journalistic sources, students learn various writing discourses including narration, description, exposition, argumentation, and journalistic and letter writing. Translation involves preliminary study of translation theory and techniques, and practice with texts from students' chosen careers. Additional study of Spanish grammar as necessary.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 303 Advanced Communication and Popular Cultures 3 Credits

The focus of the course is to strengthen the student's aural comprehension and speaking skills by providing a framework for regular guided practice of fundamental grammar structures and vocabulary enhancement in the context of Hispanic cultures. Listening activities will include live speech, video recordings, film shorts and one full-length movie. Speaking tasks will be reinforced with written exercises.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 305 Cervantes 3 Credits

A detailed study of Cervantes' masterpiece, *El ingenioso hidalgo Don Quijote de la Mancha*. Lectures, discussions, and supplementary readings.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 310 Spanish Culture & Civilization 3 Credits

Spain's cultural achievements are studied in light of the country's unique historical and social reality through the use of historical, artistic, architectural, cinematic and literary sources. Cross-cultural awareness is enhanced through exercises that compare Spanish and American society. Classes are in English. No knowledge of Spanish required. This course may contain an optional travel component offered before or after the semester or during spring break.

SPA 311 Latin American Cultures 3 Credits

A panoramic survey of Latin American cultural achievements in light of the unique social and political history from the pre-Columbian period to the present. Classes are in English. No knowledge of Spanish is required.

SPA 312 Latinx Cultures 3 Credits

This course focuses on the cultural formation of Latinos/as/x in the United States, as well as the social and political motivations for Latin American migration to this country. Our class will analyze and question how various Latinx communities are grouped into a single U.S.-Latino Diaspora. This course takes a transdisciplinary approach, thus we will consider literary texts (short stories, poems, films, novels), historical and anthropological studies, and sociological works in our examination of Latinx cultures. The main goals of the course are for students to begin to conceptualize: 1) how the United States has been shaped by the presence of Latino/a/x communities, and 2) how Latino/a/x experiences are reflected in literature and art. Classes are in English. No knowledge of Spanish is required.

SPA 320 Introduction to Spanish Literature 3 Credits

Examines through lectures, readings and class discussions selected texts and their relationship to the main currents of European literary history. Introduction to the practice of literary analysis through written composition. Required for majors. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 325 Introduction to Latin-American/Latino Literature 3 Credits

A study of the development of Latin-American and Latino literature from its origins to the present through the reading, analysis and discussion of representative works by major authors. This course increases the understanding of how social, historical, and political events, together with native as well as foreign literary movements, create a unique literature, conveying the Hispanic-American reality. Required for majors. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 395 Phonetics for Communication 3 Credits

A systematic study of the production of Spanish sounds with practice in phonetic transcription and a preliminary investigation of dialects.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 403 Medieval Literature 3 Credits

Surveys the literature of Spain during the Middle Ages, with special emphasis on major writers such as Gonzalo de Berceo and Don Juan Manuel, and attention to the epic and the medieval ballad. Modern versions of medieval Spanish are used.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 410 Modern Hispanic Poetry 3 Credits

Surveys the poetic genre, emphasizing how to read, analyze, and appreciate poetry. Major poets from Spain and Spanish America of the 19th and 20th centuries representing the main currents of modern lyricism are studied. Focuses on such major writers as Rosalía de Castro, Darío, Jiménez, Machado, Vallejo, Mistral, Neruda, Lorca, Paz, Ana Rossetti, Nicolas Guillen, and Nancy Morejon.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 411 Modern Spanish Novel 3 Credits

Traces the development of the Spanish novel, paying particular attention to the masters of the 19th-century Realism (Galdos and Clarín), the innovations and experimentation of the Generation of '98 (Unamuno, Baroja, Valle-Inclán, and Pérez de Ayala), and the novelists of the post-Civil War and contemporary periods (Cela, Delibes, Goytisolo, Martín Gaité, Matute, Fernández Cubas, and Javier Marías). Emphasis on the aesthetics of the novel as a literary form.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 412 Theater and Film of the Hispanic World 3 Credits

This course explores through theater and cinema the compelling issues that have shaped Hispanic cultures and consciousness throughout the centuries. Sample topics include war and remembrance; myth and history; freedom and authority; immigration; globalization; and race, class, and gender. The course may focus on specific authors or historical periods. Representative playwrights include Lope de Vega, Zayas, Zorrilla, Avellaneda, Lorca, Buero Vallejo, Sastre, Solorzano, Carballido, López Mozo, and Pedrero. Directors include Buñuel, Saura, Gutiérrez Alea, Almodovar, Rocha, Salles, Erice, Zambrano, and Bollain.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 413 The Hispanic Short Story: Transatlantic Connections 3 Credits

This course will introduce students to the most representative writers of the short story in Spain and Latin America from Romanticism to the present. Students will be prepared to perform close readings of the literary genre under study, to analyze the form and content of the texts read, paying due attention to all internal and external aspects that impact the narrative process and the evolution of the short story. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 415 Spanish Renaissance 3 Credits

The origins and evolution of the Renaissance in Spain and of the literary expression of Renaissance culture as reflected in the development and perfection of prose and lyrical styles through the 16th century. Topics include the medieval heritage, Spanish Humanism, the Celestina, the Renaissance ideal in amatory prose and poetry, mysticism, the ballad, and the picaresque novel.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 416 The Spanish Golden Age 3 Credits

The literature of Spain during a period of political decline and outstanding aesthetic achievement: Lope de Vega and the rise of a national theatre; Calderón's drama of ideas; the development of the novella and the picaresque novel; the poetry and prose of Gongora, Quevedo, and Gracian. Also includes an introduction to literary theory.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 420 From Colonies to Nations 3 Credits

This course consists of a panoramic survey of Colonial Latin American literature in light of the unique social, cultural and political history from the pre-Columbian to the Independence period (1825). Course taught in Spanish. Note: This course is cross-listed as LAC 420. Students may not get credit for both SPA 420 and LAC 420.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 426 Latin American/Latino Film and Fiction 3 Credits

A study of the main trends in contemporary Hispanic fiction written in Latin America and the United States. Analysis and discussion of selected novels and short stories, and their cinematic representation on film. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 430 Latinx Community Engagement 3 Credits

This course explores the experiences of Latinx individuals and communities across the United States through a) class meetings and discussions, and b) community engagement with pre-established partner organizations in and around Lawrenceville, NJ. Broadly, our course will examine questions related to identity, race, ethnicity, language, transnationalism, (im)migration, the border, (im)migrant detention, and solidarity movements.

Prerequisite(s): SPA 201 or above.

SPA 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

SPA 491 Internship in Foreign Languages 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of the importance and interrelationship of foreign languages and cultures in the workplace. Placements can be made in international governmental agencies, international trade associations, multinational corporations, social service agencies and other appropriate workplace environments both in the United States and abroad. With permission of the supervisor and faculty advisor, a three-credit internship may be substituted for a collateral requirement as credit toward the major.

Prerequisite(s): students should have completed at least one 300-level course in the foreign language.

SPA 496 Special Studies 3 Credits

A seminar open to a variety of topics treating a particular author, period, genre, theme, or issue.

Prerequisite(s): permission of instructor.

SPA 500 The Poetry of Resistance in the Time of the Generals in Latin America 3 Credits

This course offers a broad overview of important historical literature about dictatorships in Latin America. The weekly readings and writing assignments have been selected in order to: 1) introduce major concepts, arguments, and figures in the field of Latin American literature and culture; 2) appreciate the evolution of the role of artists and intellectuals during the years of the “dirty war” in Latin America; 3) sharpen analytical writing; and, 4) demonstrate the connection (and the limits of the connection) between literature, culture, and society. This course is predominantly a study of Latin American governments in the twentieth century and of the role of artists, primarily writers of fiction and poetry, as a corps of truth-tellers and resisters in the face of government propaganda, censorship, and cultural/political repression.

SPA 510 Marks of Identity: The Journey of the Self in Spanish Theater 3 Credits

What markers of class, race, ethnicity, gender and even species shape individual and group identity? How does identity change over time? How do I know who I am, and how does my identity further my interests and those of society? Offered in translation, this course explores the staging of identity in Spanish theater from the seventeenth to the twenty-first century. Topics may include the 17th-century honor code and gender, the myth of Don Juan, imperialist imaginings of New World subjects, the romantic hero and the angel of love, identity and the grotesque, identity and erotic desire, identity and media technologies, and non-human animal subjects. Film, art, music and live-theater attendance.

Sports Media

Program Overview

Sports Media students at Rider focus their interest and communication skills to prepare themselves to be professionals in the growing area of sports media.

Curriculum Overview

Students will learn the fundamental and advanced procedures involved with journalism, television and public relations. All of these academic areas are focused on sports content in order to make a student well versed in both communication skills and the inner workings of the sports media industry.

Classes will utilize the Communication, Journalism and Media Department’s three state-of-the-art journalism labs, television studio, radio studio and have access to college and professional sports organizations.

Because of Rider’s commitment to personalized learning, students will be able to produce content for The Rider News, The Rider University Network, Bronc Vision, and intern with the many college and professional teams located within minutes from campus.

The capstone experience for Sports Media students is a live sports reporting class in which students attend multiple live sporting events and create content from the press box and have access to post-game interviews.

BRONCast Sports Media Academy

Rider University’s BRONCast Sports Media Academy introduces high school students to a comprehensive, behind-the-scenes experience in the sports broadcasting and journalism arena. Students are immersed into learning all facets of sports media for their professional goals, from

interviewing skills, traits of sports journalism to fast-action motion photography and much more!

4 Year Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. Prereq(s): COM 270, COM 347, and MKT 280.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

SPT 250 Introduction to the Business of Sports 3 Credits

This course is designed to introduce the student to the business of sports. Business principles, such as management, marketing, law, finance and economics will be applied to the business of sports. The course will also explore the various career opportunities in the world of sports.

Sustainability Studies

Program Overview

Environmental sustainability is clearly a defining issue of the 21st century. Alarming patterns of environmental degradation have emerged since the beginning of the industrial revolution. Creating social, systematic, and commercial structures that reverse this trend by explicitly acknowledging and nurturing the interconnectedness of the natural and human environment is the main challenge facing Rider's graduates. Educators, entrepreneurs, chemists, journalists, psychologists and analysts will all need to understand the ways that our economic, natural and social systems work together to sustain the collective human enterprise.

Concentrating on the interdependence of natural, economic and human systems, the **sustainability studies minor program** helps students explore the complex task of protecting the earth while generating economic welfare and ensuring social justice. Because the program draws on a network of approaches (social, scientific, practical), students completing the minor will be equipped to take on increasingly pressing challenges in

areas ranging from education and energy, communications and design to ecosystems management, business and government.

The program also provides students with opportunities to get under the hood, exploring what "going green" really means. Coursework is application-intensive. The introductory course will expose students to a wide range of issues, from food to packaging, from natural lands preservation to building sustainable communities. Other coursework complements students exploration of these issues. A broad range of internship and independent study opportunities are available for interested students. The capstone course brings together a team of students to address a real problem on the Rider campus, hopefully making significant changes along the way.

Students in the sustainability studies minor will take seven courses (23-24 credits) in environmental and social sciences, ethics and business. Sustainability-related courses that contribute to the minor are offered within many majors. The introductory course is deeply interdisciplinary, drawing on expertise from across the University in the social sciences, business, history, philosophy, ecology, physics and marketing. After this introduction, students are expected to complete an independent study or internship project on or off campus that provides hands-on experience with the complex tasks required to make systems more sustainable. The capstone course draws on the interests and expertise of the enrolled students who together will identify a specific sustainability challenge on the Rider campus and devise, implement, and measure the effects of a plan to address it.

¹ PHL 202 or PHL 360 may be substituted with permission of the director.

² ECO 335 has a pre-requisite of ECO 201 and may only be appropriate for business majors.

³ Students must earn 3 credits total from SUS 490, SUS 491, or a combination of these two courses. SUS 491 may only be taken twice.

Courses and Descriptions

SUS 100 Introduction to Sustainability Studies 4 Credits

Sustainability is an idea that will shape the lives of all in the 21st century. Students will explore how we arrived at our current precarious environmental situation and investigate cutting-edge methods that support human development and protect the natural ecosystems on which we will depend. By exploring principles of sustainability (whole-systems approaches, resource limitations, stewardship) through many different lenses, students will appreciate the interdisciplinarity of the sustainability enterprise. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): SUS 100L.

SUS 100L Intro to Sustainability Lab 0 Credits

For students concurrently taking SUS 100. Field trips, visiting speakers, and films to complement topics covered in the introductory course. One three-hour laboratory per week.

Corequisite(s): SUS 100.

SUS 400 Sustainability Studies Seminar 3 Credits

To synthesize sustainability studies coursework and internship experiences, students will collaboratively develop and implement a sustainability project on the Rider campus, aiming to simultaneously reduce both depletable resource use and environmental impact. Seminar sessions will explore the historical development of current systems and innovative thinking related to sustainability planning related to the focal issue. Specific topic at discretion of the instructor. Prerequisite(s): SUS 100, SUS 100L.

Corequisite(s): SUS 400 or as prerequisite or permission of instructor.

SUS 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in applying sustainability principles in a field setting. Students are expected to assess the outcomes of their projects and communicate their results verbally and in writing to interested audiences.

SUS 491 Internship in Sustainability 1-4 Credits

A supervised work/service experience in an approved organization where students gain understanding and experience with applying sustainability principles. Placements may be in private, public, educational, non-profit or governmental organizations. Students are expected to include measurement and documentation of the environmental, social, and economic impact of their work. A minimum of 50 hours of work is required for one credit. At least 150 hours are required to earn 3 credits.

Teaching English to Speakers of Other Languages (TESOL)

Overview

The Certificate in TESOL is for non-education students and it is geared to those interested in teaching English or other content areas such as mathematics, biology, philosophy, or history among others, in bilingual settings abroad or in adult education programs after graduation. This 9-credit program links current research to best practices in the field of language teaching. It offers an introduction to language learning theories, teaching methodology, and classroom management, with opportunities to work with actual students and receive feedback from professors.

Admission Requirements

Advanced low in the ACTFL English proficiency scale or B2 in the Common European Framework of Reference for Languages for those who are not native speakers of English.

Courses and Descriptions

CHI 310 Chinese Culture and Civilization 3 Credits

This course introduces students to Chinese Civilization and Culture. Through reading, viewing, discussion, and presentation, students will have a chance to “experience” Chinese cultural riches and “interact with” its long history, religions, philosophies, literature and art, politics, as well as its different peoples and diverse customs. We will learn about China’s ancient dynasties and its cultural and aesthetic achievements in the past, and its modern revolutions, nationalism, communism, and post-Mao economic and political reforms today. We will also explore Chinese customs, particularly festivals, and try to gain an appreciation of different social relationships and diverse cultural practices. No knowledge of Chinese required. This course offers an optional TRIP TO CHINA during Spring Break or in May WHICH WILL EARN 3 ENGAGED LEARNING POINTS. Interested students must register for the travel course separately from taking CHI 310.

CHI 311 Calligraphy As a Window to Chinese Language and Culture 3 Credits

This course provides students with a chance to gain an intimate knowledge of Chinese language and culture through calligraphy. Students will learn the basic principles and techniques of writing Chinese characters with the writing brush. They will be introduced to the pronunciation, the composition and evolution of Chinese characters so that they will be able to read and understand what they write. Students will also learn how calligraphy is immersed in various aspects of Chinese culture. The main content of the course derives from examining applications of calligraphy to poetry, painting, and core concepts of Confucianism, Daoism and Buddhism. They will have a chance to cross time and space, having dialogues with Confucius, experiencing Buddhist bliss of final “awakening” or “enlightenment” and abandoning themselves to the Daoist spontaneous flow with the movement of Nature and the cosmos. No knowledge of Chinese language is required.

ENG 236 Applied Grammar & Syntax 3 Credits

This course offers a review of the essential elements of English grammar and syntax and fosters understanding of how these elements work in notable argumentative and expository writing as well as in the student’s own compositions. Focus is on both expert reading and effective writing. Changing attitudes toward usage, including influence of digital media on language use, are discussed. May be taken as preparation for, or independently of ENG 336, which addresses grammar, syntax, and style at a more advanced level.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 336 Grammar and Style 3 Credits

By building a comprehensive knowledge of the conventions of English grammar, punctuation and syntax, students will learn how to analyze the way words, phrases, sentences, and paragraphs work in expert writing, and they will apply this knowledge to their own writing. Emphasis is on argument, exposition, and analysis.

Prerequisite(s): completion of composition requirements or permission of instructor.

FLE 320 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to general linguistics and basic contrastive study of English, French, German, and Spanish sounds, forms, and syntax. Students visit schools where they interview language learners and sample their speech for analysis. Applications of these studies are made to creating instructional materials and to teaching. Theories of language acquisition as well as factors affecting second language learning, including learning styles and personality, are studied. A rationale for communicative language teaching and learning is constructed. Note: This course is cross-listed as EDU 320. Students may not get credit for both FLE 320 and EDU 320.

FLE 420 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolios and philosophy of second language teaching, prepare a thematic unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. Note: This course is cross-listed as SED 420. Students may not get credit for both FLE 420 and SED 420. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

FRE 311 French Culture 3 Credits

A study of modern France and French value orientations as they are rooted in tradition and history and continue to shape everyday life as well as institutions, social organizations, artistic expression, education, attitudes and human interaction. A comparative approach will examine the underlying differences between France and the United States. Classes are in English.

GLS 180 Understanding Global Relations 3 Credits

Offers an introduction to Global and Multinational Studies by exposing the student to basic concepts necessary to understand the dynamics underlying the emerging worldwide society of diverse nations. The student will become acquainted with the mechanisms by which contacts are built across nations, and the factors that shape the conception of and relations with "the other."

GLS 252 Intercultural Communication 1.5-3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. This course will be different from the international communication course, which focuses on communication between nations. This course will focus on the more personal aspects of communication—what happens when people from different cultures interact face-to-face. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application. Note: This course is cross-listed as COM 252. Students may not get credit for both GLS 252 and COM 252.

IND 210 Global Encounters 3 Credits

This course provides students with an exposure to foreign cultures consisting of both travel and study components. Destinations may include countries in Europe, Latin America, or Asia. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political, and aesthetic cultural components appropriate to the location(s) visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. A travel fee is required. No foreign language skills are required unless otherwise indicated.

MCS 110 Race, Class and Gender in Contemporary American Society 3 Credits

This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with GSS 110. Students may only get credit for one course: MCS 110 or GSS 110.

MCS 220 Issues in Multicultural Studies 3 Credits

An examination of issues and questions posed by the existence of diversity in social life. Students build on what they have learned in MCS 110 by focusing in greater depth on selected aspects of multicultural interaction. Topics change each semester and are listed in the course roster. Recent topics include "Understanding Privilege," "The Meaning of Difference," and "Narratives of Human Difference: Science, Politics, Literature."

Prerequisite(s): MCS 110 or permission of instructor.

SOC 207 Racial and Ethnic Relations 3 Credits

Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

Prerequisite(s): SOC 101.

SPA 102 Elementary Spanish II Abroad 3 Credits

This course is the second part of the first-year experience in Spanish and is designed for students who have taken Spanish for Beginners I and who are interested in experiences abroad in a Spanish speaking culture. The aim is to develop the four basic skills (listening comprehension, speaking, reading, and writing) in and beyond the classroom. The discussion of distinctive cultural aspects of the Hispanic world is an integral part of this course as well as to encourage students to experience the world through the eyes of the other culture by exposing them to the literature and arts of the local culture. This course takes 8 weeks in total, 7 weeks at Rider online and 1 week abroad. During the seven weeks, students practice linguistic skills and gain cultural knowledge related to the country of destination. These skills and knowledge will prepare the students for the one week abroad experience.

Prerequisite(s): SPA 100 with a minimum grade of D.

SPA 310 Spanish Culture & Civilization 3 Credits

Spain's cultural achievements are studied in light of the country's unique historical and social reality through the use of historical, artistic, architectural, cinematic and literary sources. Cross-cultural awareness is enhanced through exercises that compare Spanish and American society. Classes are in English. No knowledge of Spanish required. This course may contain an optional travel component offered before or after the semester or during spring break.

SPA 311 Latin American Cultures 3 Credits

A panoramic survey of Latin American cultural achievements in light of the unique social and political history from the pre-Columbian period to the present. Classes are in English. No knowledge of Spanish is required.

Web Design

Program Overview

Designing and implementing web pages and interactive media, as well as learning the secrets of effective print design and production, are the focuses of Rider's Web Design minor. Students learn about design and visual-communication theory while creating portfolios and web-based interactive resumes. In the capstone course, students work with real clients to create a web presence.

Curriculum Overview

Core classes in the minor include writing for the communication professions, publication design, multimedia production I: interactive design, advanced publication design, multimedia production II: web design and multimedia production II: advanced interactive design.

Other classes include communication theory, advanced speech, theories of persuasion, audio production, graphic imaging for multimedia and photography, 3D graphic animation, covering digital media and more.

¹ Note: Communication and Journalism majors may declare only one minor in the department. No more than two courses may be used to meet the requirements for both a major and a minor in the department. (Exception: If a student elects the Event Planning and Production minor, then three courses may be used to meet the requirements for both the major and that minor in the department.)

Courses and Descriptions

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits

Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits

As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits

Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits

This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment – and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits

In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits

Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits

Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits

Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits

Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.

Prerequisite(s): COM 104 or COM 290.

COM 205 Theories of Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits

Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.

Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits

Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.

Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits

Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits

Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits

Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits

Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements.

Prerequisite(s): COM 104 or COM 290.

COM 232 Podcasting I 3 Credits

Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits

Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits

Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits

Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/ reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits

The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 251 Interpersonal Communication 3 Credits

Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application. Note: This course is crosslisted as GLS 252. Students may not get credit for both COM 252 and GLS 252.

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits

Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

Prerequisite(s): COM 261 or permission of instructor.

COM 263 History and Principles of Graphic Design 3 Credits

Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits

Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits

Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.

Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 292 Content for Social Media 3 Credits

Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 312 Special Topics in Journalistic Writing 3 Credits

Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.

Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits

Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.

Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits

Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.

Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GND 318. Students may not get credit for both COM 318 and GND 318.

COM 321 Stand Up Comedy 3 Credits

Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.

Prerequisite(s): COM 104: Speech Communication or COM 290: Professional and Strategic Speech.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits

Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits

Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.

Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits

This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits

Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.

Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. **Prereq(s):** COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits

In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.

Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits

Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): COM 232, COM 233, COM 234.

COM 337 Music Production for Mass Media 3 Credits

Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.

Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits

Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits

Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.

Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 348 Communication Research Methods 3 Credits

Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.

Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator. Note: This course is crosslisted as GLS 352. Students may not get credit for both COM 352 and GLS 352.

COM 353 Nonverbal Communication 3 Credits

Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 360 Advanced Publication Design and Presentation 3 Credits

Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.

Prerequisite(s): COM 212.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits

Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits

Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.

Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits

Offers students education in graphic animation theories, animation development techniques, and animation preparation for various multimedia applications. Emphasis is placed on the design principles in animated communication and animation techniques. The course covers the integration of static images in animation, graphic animation techniques, animation compression, animation rendering, input/output file formats, and animation delivery. The primary software for this course is Adobe Photoshop and MacMedia Flash. Students will be expected to participate in critiques of professional animation designs in order to learn to evaluate critically their own work and their fellow students' work.

Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits

Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.

Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits

Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.

Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits

Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media.

Note: This course is crosslisted as GLS 393. Students may not get credit for both COM 393 and GLS 393.

COM 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits

Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.

Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits

A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.

Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits

This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits

Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits

Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.

Prerequisite(s): COM 234.

COM 440 Cases & Campaigns in Public Relations 3 Credits

Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.

Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits

Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

Prerequisite(s): COM 348, COM 350, or permission of instructor.

COM 460 Web Design III 3 Credits

Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.

Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits

Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation. Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.

Prerequisite(s): ART 103, ART 105, COM 262, and COM 360.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

CLAS General Education Curriculum

The College of Liberal Arts and Sciences General Education Curriculum (CLAS GEC) provides the opportunity for exploration across a broad array of disciplinary offerings. Balancing structure with choice, students will examine the complex worlds in which they live from a variety of perspectives.

Courses may satisfy both general education requirements as well as major or minor requirements when expressly permitted.

For students entering CLAS in **Fall 2018 through Fall 2021**, [click here \(p. 577\)](#).

For students who entered CLAS in **Fall 2017**, [click here \(p. 581\)](#).

General Education Curriculum for students entering in Fall 2018 through Fall 2021:

Code	Title	Credits
I. ESSENTIAL COMPETENCIES:		
Reading and Writing:		6
CMP 120 or BHP 100	Seminar in Writing and Rhetoric Honors Seminar: Great Ideas I	
Select one of the following:		
CMP 125 or BHP 150	Seminar in Writing and Research Honors Seminar: Great Ideas II	
CMP 203	Literature and Composition	
Mathematical Reasoning: ¹		3-4
Select one of the following:		
MTH 102	Finite Mathematics ⁶	
MTH 105	Algebra and Trigonometry	
Foreign Language Proficiency: ²		3-6
Select one or two Chinese courses depending on placement test:		

CHI 100	Chinese I
CHI 101	Chinese II
CHI 200	Chinese III
CHI 201	Chinese IV
Or CHI 3-400 level course taught in Chinese	
OR select one or two French courses depending on placement test:	
FRE 100	French I
FRE 101	French II
FRE 200	French III
FRE 201	French IV
Or FRE 3-400 level course taught in French	
OR select one or two German courses depending on placement test:	
GER 100	German I
GER 101	German II
GER 200	German III
GER 201	German IV
OR select one or two Italian courses depending on placement test:	
ITA 100	Italian I
ITA 101	Italian II
ITA 200	Italian III
ITA 201	Italian IV
OR select one or two Spanish courses depending on placement test:	
SPA 100	Spanish I
SPA 101	Spanish II
or SPA 102 Elementary Spanish II Abroad	
or SPA 103 Introductory Medical Spanish	
SPA 200	Spanish III
SPA 201	Spanish IV
Or SPA 3-400 level course taught in Spanish	

Oral Communication: 3

COM 104 Speech Communication

II. DISCIPLINARY PERSPECTIVES

Scientific Perspectives: 3 4-6

To fulfill the Scientific Perspectives requirement, students may take either a lecture/lab combination (4 credits) or two 3-credit non-lab courses (6 credits). Students who have taken a PSY course to fulfill the Social Perspectives requirement may not take a PSY course to fulfill the Scientific Perspective requirement.

A. Lecture/Lab Combination Courses

CHE 114 & 114L	Chemistry in the Kitchen and Chemistry in the Kitchen Lab
ENV 100 & 100L	Introduction to Environmental Sciences and Introduction to Environmental Sciences Lab
GEO 100 & GEO 102	Earth Systems Science and Earth Materials and Processes Lab
MAR 120 & MAR 121	Oceanography and Introductory Oceanography Lab
SUS 100 & 100L	Introduction to Sustainability Studies and Intro to Sustainability Lab

B. 3-Credit Non-Lab Courses

BHP 240	Chemistry and Conflict
BHP 251	Idea to Innovation
BHP 259	Honors Seminar: The Environment: a Conflict of Interest 4

BHP 281	The Rhetoric of Science 4
BHP 340	Nature and Nurture 4
BIO 100	Life Science
BNS 107	Life Science: Brain and Behavior
CHE 115	Chemistry & Society
ENV 110	Future of Natural Resources
ENV 120	Introduction to Climate Change
GEO 100	Earth Systems Science
GEO 110	Geology of National Parks
GEO 113	Environmental Geology
GEO 168	Mesozoic Ruling Reptiles
MAR 120	Oceanography
PHY 180	Astronomy
PSY 131	The Science of Mental Illness 3

Social Perspectives: 6

Select two of the following. The two courses selected in this category cannot be from the same academic department. Students who have taken a PSY course to fulfill the Scientific Perspectives requirement may not take a PSY course to fulfill the Social Perspectives requirement.

BHP 203	Nineteen Eighty-Four in Context: George Orwell's Enduring Legacy 4
BHP 206	Honors Seminar: Politics/Literacy 4
BHP 212	Children and the Media
BHP 252	Creativity and Design Thinking
BHP 253	A Cross-Cultural Comparison of Play
BHP 259	Honors Seminar: The Environment: a Conflict of Interest 4
BHP 261	The Online Explosion: Radical Changes in Business and Communication
BHP 281	The Rhetoric of Science 4
BHP 301	The Law and Racial Progress
BHP 302	Mirrors of the Mind: The Interplay of Literature and Psychology 4
BHP 315	Honors Seminar: 20th Century European Ideologies 4
BHP 340	Nature and Nurture 4
BHP 360	Moral Psychology 4
COM 105	Communication, Culture and Media
FTV 202	Global Film & Media Industries
GSS 100	Introduction to Gender Studies
MCS 110/GSS 110	Race, Class and Gender in Contemporary American Society
MCS 210	Power and Privilege in a Multicultural Society
POL 100	Introduction to American Politics
POL 102	Understanding Politics
PSY 102	Explorations in Psychology Honors 3
PSY 110	Psychology: The Science of Well-being 3
PSY 117	Psychology of Creativity 3
PSY 118	Psychology of Women 3
SOC 101	Sociological Imagination

Historical Perspectives: 6

HIS 150	World History to 1500
HIS 151	World History Since 1500

Aesthetic Perspectives: 6

Select two of the following, one course in Fine Arts and one course in Literature.

A. Fine Arts

AMS 307	Depictions of Racism in American Literature, Music, and Film
AMS 309	Hip Hop and American Culture
AMS 310	American Identity in the Arts
ART 104	Survey of Art History I
ART 106	Survey of Art History II
BHP 290	Shakespeare: Page, Stage & Screen ⁴
DAN 105	Survey of Dance History
MUS 105	Survey of Music History I
MUS 106	Survey of Music History II
MUS 120	Music and Society
MUS 205	History of Pop and Rock Part I
MUS 206	History of Pop and Rock Part 2
THE 105	Theatre History to 1700
THE 106	Theater History Since 1700
THE 120	Theater Appreciation
THE 206	American Theatre History
B. Literature	
AMS 210	American Memoir and Autobiography
AMS 306	Poetry and Poetics in American Culture
AMS 308	Kurt Vonnegut's America
BHP 203	Nineteen Eighty-Four in Context: George Orwell's Enduring Legacy
BHP 206	Honors Seminar: Politics/Literacy ⁴
BHP 222	Honors Seminar: Existentialism in Literature ⁴
BHP 227	Race, Gender, and Sexuality in the Age of Empire
BHP 268	Honors Seminar: Love and Chivalry in the Arthurian Tradition
BHP 290	Shakespeare: Page, Stage & Screen ⁴
BHP 302	Mirrors of the Mind: The Interplay of Literature and Psychology ⁴
BHP 315	Honors Seminar: 20th Century European Ideologies ⁴
CHI 307	Images of Women in Chinese Literature and Film
ENG 205	Understanding Literature
ENG 208	Arthurian Legends in Literature
ENG 210	Major American Authors
ENG 211	Major British Authors
ENG 213	Literature and Mythology
ENG 214	Monsters in Literature
ENG 215	Satire and Comedy
ENG 217	Introduction To Shakespeare
ENG 218	Literature and the Environment
ENG 219	Literature and Violence
ENG 220	Literature & Society
ENG 221	Literature and Psychology
ENG 222	Crime and Literature
ENG 224	Science Fiction
ENG 228	Black American Lit

ENG 229	Multi-Ethnic Literature in America
ENG 230	Women In Literature
ENG 270	Major Poets
ENG 290	The Short Story
ENG 295	Human Relationships in Literature (HONORS)
ENG 337	Global Literature
FRE 305	An Introduction to French Literature
FRE 422	Cultural Expression in French Film and Television
FRE 425	Portrait of the Hero in French Fiction
FRE 430	Mask & Reality in French Theater
FRE 435	Self in French Prose & Poetry
FRE 440	A Quest for Identity: Francophone Literature and Culture
LIT 250	Masterworks of Western Literature I
LIT 251	Masterworks of Western Literature II
SPA 320	Introduction to Spanish Literature
SPA 325	Introduction to Latin-American/Latino Literature
SPA 413	The Hispanic Short Story: Transatlantic Connections
SPA 416	The Spanish Golden Age
SPA 426	Latin American/Latino Film and Fiction

Philosophical Perspectives: 3

BHP 222	Honors Seminar: Existentialism in Literature ⁴
BHP 360	Moral Psychology ⁴
PHL 100	Plato and Aristotle
PHL 102	Philosophical Thinking
PHL 110	Logic and Language
PHL 115	Ethics
PHL 120	American Philosophy
PHL 125	Philosophies of Education
PHL 130	Political Philosophy
PHL 202	Social Philosophy
PHL 207	Asian Philosophy
PHL 210	Symbolic Logic
PHL 215	Environmental Ethics
PHL 225	Modern Philosophy
PHL 230	Philosophy of the Sexes
PHL 304	Medical Ethics
PHL 310	Problems in 20th-Century Philosophy
PHL 320	Philosophy of Science
PHL 334	Theories of Knowledge
PHL 336	Philosophy of Mind
PHL 343	Theories of Reality
PHL 348	Indian Philosophy
PHL 358	Chinese Philosophy
PHL 360	Contemporary Ethics
PHL 368	Japanese Philosophy

III. GLOBAL PERSPECTIVES 3-4

Select one course that emphasizes an international, global, and/or non-U.S. cultural perspective and follows the Global Perspective (GP) designation.

BHP 227	Race, Gender, and Sexuality in the Age of Empire
BHP 253	A Cross-Cultural Comparison of Play

2. Students who place at the 101-level or above are required to take a minimum of 3 credits at the level of placement. Students who are native speakers of languages not offered at Rider University may have their requirement waived upon documentation of proficiency. This documentation could be in the form of a transcript on letterhead sent by the accredited institution abroad, or fee-based proficiency tests. To initiate a request for a waiver, students should see the chairperson of the Department of Languages, Literatures, and Cultures (<https://www.rider.edu/academics/colleges-schools/claes/liberal-arts-programs/foreign-language-literatures/>).
3. Students who choose a Psychology course to fulfill a requirement for Scientific Perspectives may not choose a Psychology course to fulfill a requirement for Social Perspectives, and vice versa.
4. Due to the interdisciplinary nature of BHP classes, upper-level seminars may satisfy two different categories from the Disciplinary Perspectives. For courses that satisfy more than one DP category, BHP students must choose which general education requirement they would like the course to fulfill.
5. SPA 102 runs for 8 weeks in total, 7 weeks at Rider online and 1 week abroad. During 7 weeks, students will gain linguistic skills and cultural knowledge related to the country-destination. These skills and knowledge will prepare the students for a 1 week abroad experience.
6. Students enrolled into MTH 102 will be given a brief test, prepared by the Department of Mathematics, during the first five business days of the semester. Those placing below a minimum score set by the Department of Mathematics on the test will be required to participate in one hour of structured tutoring 1 per week concurrent with taking MTH 102. All others enrolled in the class are strongly encouraged to participate in available tutoring. Mandated structured tutoring will include: an embedded tutor in each class section, a one-hour per week group study session, and impact the student's grade as determined by individual faculty.

General Education Curriculum for students who entered in Fall 2017:

Code	Title	Credits
Fall 2017 General Education Requirements		
Essential Competencies:		
Reading and Writing:		6
CMP 120	Seminar in Writing and Rhetoric	
or BHP 100	Honors Seminar: Great Ideas I

Total Credits 48-49

² Appropriate mathematics and science courses may be substituted if required by the major.

³ Students who place at the 101-level or above are required to take a minimum of 3 credits at the level of placement. Students who are native speakers of languages not offered at Rider University may have their requirement waived upon documentation of proficiency. This documentation could be in the form of a transcript on letterhead sent by the accredited institution abroad, or fee-based proficiency tests. To initiate a request for a waiver, students should see the chairperson of the Department of Languages, Literatures, and Cultures (<https://www.rider.edu/academics/colleges-schools/claes/liberal-arts-programs/foreign-language-literatures/>).

Continuing Education Programs

Rider's Continuing Education Program (CEP) recognizes that learning is a lifelong process and that part-time students need flexible learning

opportunities. Students enroll in continuing education for a variety of reasons: to earn a degree, to develop their professional skills, learn more about our complex society, expand their personal lives, earn a certification, prepare for graduate study or prepare for a career change.

Students participating in CEP programs have diverse backgrounds and educational goals. Many enroll with high school backgrounds, while others bring college credits, undergraduate degrees, or even graduate degrees. CEP students may take courses during the day, evening, and online.

Students pursuing a degree program may also have the opportunity to earn credits by nontraditional means, such as Advanced Placement, College Level Examination [CLEP (<https://clep.collegeboard.org/exams/>)], NYU (<https://www.sps.nyu.edu/professional-pathways/proficiency-testing.html>) foreign language proficiency testing, the American Council on Education [ACE (<https://www.acenet.edu/Programs-Services/Pages/Credit-Transcripts/Students.aspx>)], DSST (<https://www.getcollegetcredit.com/>) exams, and formal military credits.

Prospective students are welcome to make an appointment with a CEP academic advisor to discuss program goals and have a transcript credit evaluation. Enrolled students may contact Terri Marriott, Director, Undergraduate and Graduate Academic Success, 609-895-5454 or marriott@rider.edu with any questions.

Majors, Minors and Certificates

Students enrolled in Continuing Education Programs may attend day, evening or online courses where available.

Rider University's Continuing Education Program (CEP) recognizes that learning is a lifelong process and that part-time students need flexible learning opportunities. Students enroll in the CEP for a variety of reasons: to earn a degree, to develop their professional skills, learn more about our complex society, expand their life-long learning, earn a certification, prepare for graduate study or prepare for a career change. Students participating in the CEP have diverse backgrounds and educational goals.

Many enroll with high school backgrounds, while others bring college credits, undergraduate degrees or even graduate degrees. Our flexible curricula allows for courses to be taken during the day, evening, and online.

Students pursuing a degree program may also have the opportunity to earn college credits by nontraditional means, such as Advanced Placement, College Level Examination [CLEP (<https://clep.collegeboard.org/exams/>)], NYU (<https://www.sps.nyu.edu/professional-pathways/proficiency-testing.html>) foreign language proficiency testing, the American Council on Education [ACE (<https://www.acenet.edu/Programs-Services/Pages/Credit-Transcripts/Students.aspx>)], DSST (<https://www.getcollegetcredit.com/>) exams, formal military credits, validation or assessment of a specific course or Prior Learning Assessment [PLA] based on demonstrated learning acquired through life and work experience.

Prospective students are welcome to make an appointment with a CEP admissions counselor (<https://www.rider.edu/admissions/continuing-studies/>) to discuss program goals and have a transcript credit evaluation.

Majors, Minors and Certificates

Allied Health Studies

Program Overview

Designed for working professionals in allied health fields, Rider's B.S. in Allied Health Studies program lets students gain the skills and credentials to advance — while balancing both their career and family life.

The experience, skills and compassion an individual brings to his or her job transforms the lives of the patients in one's care every day. But rapid changes in today's health care environment now present allied health professionals with new challenges — and exciting opportunities. The B.S. in Allied Health Studies program prepares students for these challenges while still training them to be compassionate caregivers and partners.

Curriculum Overview

The curriculum is designed to provide a seamless transition from an Associate degree or a diploma program, building on the students' experiences in allied health professions. Separate clinicals are not required.

Admissions Requirement

- Official transcripts from all institutions attended with a minimum 2.5 cumulative GPA
- Copies of a current/unrestricted license (in any allied health field)

Degree Offered

- B.S. in Allied Health Studies

Courses and Descriptions

BIO 100 Life Science 3 Credits

An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BIO 110 Life Science: Inquiry Approach 4 Credits

An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 110.

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 206 The Pharmaceutical Industry 3 Credits

An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.

Prerequisite(s): BIO 100 or BIO 101 or BIO 106 or BIO 108 or BNS 107 or CHE 115.

BIO 221 Human Anatomy & Physiology I 4 Credits

A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training.

Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.

Corequisite(s): BIO 221L.

BNS 107 Life Science: Brain and Behavior 3 Credits

An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BNS 275 Behavioral Neuroscience 4 Credits

An introductory behavioral neuroscience course including basic neuroanatomy and neurophysiology of movement, ingestive, reproductive, emotional, and learning behaviors. Emphasis is on the structure/function relationships that allow animals to make appropriate physiological and behavioral responses to the environment. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115 & BIO 116.

Corequisite(s): BNS 275L.

BNS 275L Behavioral Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 275.

CHE 115 Chemistry & Society 3 Credits

Designed to give the nonscientist an appreciation of the role of chemistry in today's world. The approach is conceptual rather than mathematical. Topics include basic principles of chemical theory, energy sources, elementary organic chemistry, drugs, food additives, polymers, chemistry of living systems, inorganic solids in modern technology, and problems involving pollution of the environment. Three hours of lecture per week. This course satisfies the core requirements for education and business majors.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

GLS 325 Global Perspectives on Health and Illness 3 Credits

Explores the different international perspectives on health and illness. Themes include how men, women, and children in respective civilizations are treated and viewed within their communities or nations, as they become ill. Particular attention is given to the contrast between various types of traditional healing and Western medical practices, and their interactions. Discussions will also compare the usefulness of national versus international health agencies in dealing with global health problems.

HTH 205 Introduction to Health Care 3 Credits

This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits

In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.

Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 315 Health Care Law, Ethics and Policy 3 Credits

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

HTH 336 Economics of Health Care System 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

HTH 491 Health Management Internship 3 Credits

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.

Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

MKT 380 Health Care Marketing 3 Credits

The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.

Prerequisite(s): MKT 200; junior & senior standing.

NUR 404 Healthcare Policy, Finance, and Regulatory Environments 3 Credits

This course provides a foundation of U.S. healthcare policy, including financial and regulatory policies, as well as the nature and functioning of the U.S. healthcare delivery system. There is emphasis on policy processes at the organizational, local, state, national, and global levels. Learning activities and assignments focus on strategies for learning how to assess the role of the baccalaureate-prepared nurse in policy formation and reformation at all levels, demonstrating understanding of the political process at all levels, developing effective advocacy strategies for vulnerable populations, how to identify and influence key stakeholders in the policy process, the importance of effective communication of key healthcare issues, and how to influence change in the political process at all levels when there is social injustice.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 230 or permission of instructor.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 385 Death, Dying and Suicide 3 Credits

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

SOC 247 Aging 3 Credits

The emergence of social gerontology, demographic foundation of aging, the aging process, comparative study of aging and aged, effect of aging on the individual, social institutions and aging, and problems of aging and some solutions.

Prerequisite(s): SOC 101.

SOC 346 Health Care and Society 3 Credits

Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.

Prerequisite(s): SOC 101.

SOC 347 Aging and the Elderly 3 Credits

Allied Health Studies Online

Program Overview

Designed for working professionals in allied health fields, Rider's B.S. in Allied Health Studies program lets students gain the skills and credentials to advance — while balancing both their career and family life. This online degree program provides flexibility and convenience to students.

The experience, skills and compassion an individual brings to his or her job transforms the lives of the patients in one's care every day. But rapid changes in today's health care environment now present allied health professionals with new challenges — and exciting opportunities. The B.S. in Allied Health Studies program prepares students for these challenges while still training them to be compassionate caregivers and partners.

Curriculum Overview

The curriculum is designed to provide a seamless transition from an Associate degree or a diploma program, building on the students' experiences in allied health professions. Separate clinicals are not required.

BNS 275L Behavioral Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 275.

CHE 115 Chemistry & Society 3 Credits

Designed to give the nonscientist an appreciation of the role of chemistry in today's world. The approach is conceptual rather than mathematical. Topics include basic principles of chemical theory, energy sources, elementary organic chemistry, drugs, food additives, polymers, chemistry of living systems, inorganic solids in modern technology, and problems involving pollution of the environment. Three hours of lecture per week. This course satisfies the core requirements for education and business majors.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

GLS 325 Global Perspectives on Health and Illness 3 Credits

Explores the different international perspectives on health and illness. Themes include how men, women, and children in respective civilizations are treated and viewed within their communities or nations, as they become ill. Particular attention is given to the contrast between various types of traditional healing and Western medical practices, and their interactions. Discussions will also compare the usefulness of national versus international health agencies in dealing with global health problems.

HTH 205 Introduction to Health Care 3 Credits

This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits

In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.

Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 315 Health Care Law, Ethics and Policy 3 Credits

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

HTH 336 Economics of Health Care System 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

HTH 491 Health Management Internship 3 Credits

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.

Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

MKT 380 Health Care Marketing 3 Credits

The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.

Prerequisite(s): MKT 200; junior & senior standing.

NUR 404 Healthcare Policy, Finance, and Regulatory Environments 3 Credits

This course provides a foundation of U.S. healthcare policy, including financial and regulatory policies, as well as the nature and functioning of the U.S. healthcare delivery system. There is emphasis on policy processes at the organizational, local, state, national, and global levels. Learning activities and assignments focus on strategies for learning how to assess the role of the baccalaureate-prepared nurse in policy formation and reformation at all levels, demonstrating understanding of the political process at all levels, developing effective advocacy strategies for vulnerable populations, how to identify and influence key stakeholders in the policy process, the importance of effective communication of key healthcare issues, and how to influence change in the political process at all levels when there is social injustice.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 230 or permission of instructor.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 385 Death, Dying and Suicide 3 Credits

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

SOC 247 Aging 3 Credits

The emergence of social gerontology, demographic foundation of aging, the aging process, comparative study of aging and aged, effect of aging on the individual, social institutions and aging, and problems of aging and some solutions.

Prerequisite(s): SOC 101.

SOC 346 Health Care and Society 3 Credits

Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.

Prerequisite(s): SOC 101.

Criminal Justice

Program Overview

Rider University's Department of Sociology and Criminology houses a major in criminal justice (p. 333), as well as a minor in criminal justice studies (p. 334).

Law and justice courses provide students, regardless of specific career goals, with tools for reasoned appraisal of how the law works and its social consequences and makes students better citizens by demystifying legal institutions and policies, addressing and evaluating these in terms of evidence, rather than myths and assumptions.

Experienced faculty members of the Law and Justice Program Committee are available to advise students interested in pursuing a career in criminal justice, law or law-related fields. Faculty advisors may assist students in course selection as well as law school and graduate school applications. The Law and Justice Program often sponsors workshops on various aspects of career preparation, law school selection, and the law school application process.

Curriculum Overview

The major is designed to provide students with a multidisciplinary understanding of law, its development and violation. Courses in the program include a wide spectrum of academic departments and programs, including business policy, baccalaureate honors, communication, economics, philosophy, political science, psychology and sociology, as well as courses developed specifically for the Law and Justice Program.

The law and justice program's criminal justice major and law and justice minor are designed to provide students with in-depth knowledge and understanding of laws, legal institutions and processes and their relationships to social, moral, political, and economic issues. Students will benefit from learning to approach law (both civil and criminal), and law enforcement from diverse perspectives.

Students can focus their course of study around their specific career goals by selecting from a wide range of courses within the program. In addition, the criminal justice major and law and justice minors can often be combined with other major and minor programs.

LAW 490 Independent Study: Research and Creative Expression

LAW 496 Honors Thesis in Law & Justice

LAW 491 Internship in Law and Justice

SOC 491 Internship in Sociology

PHL 491 Internship in Philosophy

POL 491 Internship in Political Science

PSY 491 Internship in Psychology

Total Credits 42

¹ SOC 101 is waived as a pre-requisite for criminal justice majors ONLY for SOC 206 and SOC 119. SOC 101 is strongly recommended for criminal justice majors.

² Advance research related to criminal justice taken as an Independent Studies course or as an Honors Thesis if approved by the Law and Justice Director.

³ Internships related to Criminal Justice must be approved by the Sociology and Criminology Department chairperson.

Notes:

1. No course may be used to satisfy more than one requirement in the Criminal Justice major.
2. Students are required to complete a minimum of six courses at the 300 or 400 level in Categories II - V.

HIS 301 Constitutional History of U.S. 3 Credits

Surveys the English, Colonial, and Confederation backgrounds of American law and constitutionalism; the framing, adoption, and implementation of the Federal Constitution and its later development; the role of law in the nation's history; the changing interpretations of federalism; the growth of judicial review; and the increasing role of the Supreme Court.

LAW 140 Intro Seminar in Law & Justice 3 Credits

Introduces students to the interdisciplinary study of law and justice. The seminar is designed to enable students to think critically about legal issues, address legal problems from various viewpoints, and apply different types of theories of justice to analyze laws and legal institutions. Students will learn to examine law and legal issues from a variety of perspectives and approaches: anthropological, historical, literary, philosophical, political, psychological, and sociological. Open to freshmen and sophomores only.

LAW 305 Trial Advocacy 3 Credits

Students will apply fundamental legal concepts and rules of evidence to specific cases. By engaging in trial simulations, students will evaluate various forms of evidence, identify legal principles and evidentiary rules that impact a criminal trial, learn about trial procedures, pursuit of case theories, and witness, exhibit and jury selection.

LAW 310 Cyberspace Law and Policy 3 Credits

Explores the legal and policy concerns raised by the Internet, nationally and globally. The course considers issues of legal regulation of the Internet, and consider the debate about whether cyberspace can or should be regulated. Attention will be given to the applicability of principles of law and models of regulation. Topics addressed will include jurisdiction, freedom of expression, intellectual property, privacy protection, safety concerns, equal access, electronic commerce, and computer crime.

LAW 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

LAW 491 Internship in Law and Justice 1-4 Credits

Provides supervised work experience in an institution, office, or agency related to law or law enforcement, such as courts, prosecutor/defense attorney offices, private law offices, state agencies, and local police departments. Students are expected to apply and broaden the knowledge obtained from law and justice minor courses to their fieldwork experience.

Prerequisite(s): 2.75 GPA and permission of the Director of the Law and Justice program.

LAW 496 Honors Thesis in Law & Justice 3-6 Credits

Entails substantial research and writing on a topic selected by the student. Proposals must be reviewed and approved by the law and justice program committee. Proposals must be submitted at least four weeks prior to course registration.

Prerequisite(s): Seniors in the minor with a minimum cumulative GPA of 3.25 and a 3.25 GPA in law and justice minor courses.

PHL 115 Ethics 3 Credits

A combined historical and systematic analysis of the problems of ethics. Such problems as the nature and meaning of moral values and judgments, moral responsibility and freedom, conscience and happiness, the good life, and the relativity of value, are explored through the writings of such philosophers as Plato, Aristotle, Aquinas, Kant, Mill, and Nietzsche. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 130 Political Philosophy 3 Credits

An introduction to the problems of political philosophy with an emphasis on recent and contemporary issues, such as the conflict between liberal and conservative ideologies, fascism, revolution, civil disobedience, and the concept of legitimate political authority. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 202 Social Philosophy 3 Credits

Emphasizes social ethics through critical studies of such contemporary problems as abortion, euthanasia, the death penalty, pornography and censorship, animal rights, drug use, sexual morality, environmental ethics, and world hunger. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 303 Philosophy of Law 3 Credits

An examination and analysis of selected topics including classical and contemporary theories in the philosophy of law and moral philosophy. Such topics as the nature of the law and legal reasoning, the legal enforcement of morality, protection of personal liberty, and the moral justification of punishment are considered. Such philosophers as Aquinas, Austin, Holmes, Bentham, Hart, and Dworkin are read and discussed.

PHL 360 Contemporary Ethics 3 Credits

An examination of recent and contemporary challenges to traditional ethical theory including such movements as logical positivism, cultural relativism, feminism, environmentalism, multiculturalism, and postmodernism. Such problems as the meaning and cognitive status of value judgments, the relation between fact and value, the relativity of values, and how value judgments can be justified are considered.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 491 Internship in Philosophy 1-4 Credits

Students will work under supervision within an area hospital, corporation, or legal agency. The specific duties and tasks will be developed jointly by the intern, intern agency, and faculty supervisor. Within the hospital setting, students will work with the Hospital Medical Ethics Committee. Within the corporate setting, there will be two types of internships: students will work in the corporate office responsible for addressing the ethical issues that arise in the business environment; or students will work in a department that allows them to explore the potential business applications of their philosophic intellectual training. Within the legal setting, students will work with the federal magistrate, prosecutor, or public defender, exploring issues in the philosophy of law that arise in the practice of law. Students must have completed four philosophy courses, one at the 300 level, before applying for the internship. No more than six credits will be allowed toward graduation. A member of the department of philosophy will supervise the internship.

Prerequisite(s): juniors and seniors with a minimum of 2.7 cumulative GPA and 3.0 GPA in philosophy, or permission of the department of philosophy.

POL 230 Methods of Political Analysis 3 Credits

An overview of the various qualitative and quantitative methods that political scientists use to study their discipline. Themes include analyses of political participation and support, methods of studying elections, measures of political tolerance and liberalism.

POL 235 Race and Ethnicity in American Politics 3 Credits

Examines the changing political, economic, and social situation of racial and ethnic groups in American politics since the 1950s. Topics include the relationship between race/ethnicity and voting behavior, political parties, and election results. Includes an analysis of specific areas of contemporary racial and ethnic conflict, such as voting rights, immigration, and affirmative action.

POL 260 Politics of Law and Order 3 Credits

The constitutional, legal, political, and administrative aspects of the criminal justice system in the United States are studied, including the court system at all levels of government, law enforcement agencies, correctional programs and institutions, probation, parole, and the relationship of our legal institutions to the broader political system.

POL 300 U.S. Constitutional Law 3 Credits

The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as HLS 300. Students may not get credit for both HLS 300 and POL 300.

POL 301 Civil Liberties in the U.S. 3 Credits

The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as HLS 301. Students may not get credit for both HLS 301 and POL 301.

POL 325 Public Administration 3 Credits

Public administration in modern society, emphasizing the administrative formulation of public policy and its implementation. Attention on who gets what, when, and how from the decisions of administrative units; the role administrators have in policy-making compared to elected legislators, chief executives and judges; the effect administrators have on the benefits citizens receive from government; and the effect administrators have on citizens' behavior. Note: This course is cross-listed as HLS 325. Students may not get credit for both HLS 325 and POL 325.

POL 327 Contemporary Issues in American Public Policy 3 Credits

An in-depth examination of current issues in American politics. Drunk driving, political corruption, drug policy, education, and poverty are among the issues to be considered. Emphasis on analyzing policy problems and on developing and evaluating proposed solutions.

POL 335 Urban Politics 3 Credits

Political structure and administration of municipalities in the United States. Emphasis on challenges posed by suburbanization, global and regional shifts in business, economic dislocation, housing, mass transportation, race relations, and policing.

POL 345 Ancient Political Theory: Justice 3 Credits

The existence of society over time requires high degree of predictability and hence laws, whether explicit or implicit. These derive their capacity to regulate life from the widespread notion that they are proper and that they should be obeyed. In a word, they accord to our notions of justice. These, however, are not stable. Resting on the understandings of man, society, nature and the relations between them, they develop under the impact of human thought and changing realities. The result is what can be compared to a layered cake. This course treats some of the main contributions made by philosophers from Plato to Rawls to our concept of justice and the manner by which they have shaped our concepts of justice in the US and West in general. Cases in which courts (mainly the US Supreme Court) made use and applied the thinking of earlier philosophies of justice will illustrate the process by which we adjust the boundaries between legality and criminality and determine how we should behave towards each other.

POL 350 U.S. Foreign Policy and Security Policy 3 Credits

Principles, institutions, and processes involved in the formulation and implementation of policies regarding the nation's military, economic, and environmental security within the global framework. Strands, trends, and problem areas in U.S. foreign policy, with focus on the changing global environment of the post-Cold World War. Note: This course is cross-listed as HLS 350, GLS 350. Students may get credit for only one.

POL 351 Critical Views of Global Security 3 Credits

This course will examine the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspective on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security. Note: This course is cross-listed as HLS 351. Students may not get credit for both HLS 351 and POL 351.

POL 361 Courts, Judges and Politics 3 Credits

In-depth examination of the nature of judicial decision-making and the impact that judicial decisions have on society. Considers the sources of judicial authority, judicial fact-finding, statutory and constitutional interpretation, individual and collective processes of judicial decision-making, relations between judges and other government officials, and the political consequences of judicial decisions with particular emphasis on federal courts and judges. Note: This course is cross-listed as HLS 361. Students may not get credit for both POL 361 and HLS 361.

POL 363 Human Rights in Global Context 3 Credits

Examines human rights – droits de l'homme, derechos humanos, Menschenrechte, "the rights of man" – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breath and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as HLS 363. Students may not get credit for both HLS 363 and POL 363.

POL 491 Internship in Political Science 1-4 Credits

Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of fieldwork per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.

Prerequisite(s): permission of instructor.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 491 Internship in Psychology 1-4 Credits

Provides supervised work experience in an approved institution or agency in order for students to gain knowledge in applications of psychology. Placement is made in various community institutions and agencies that offer services to both exceptional and normal individuals. **Prerequisite(s):** senior psychology majors or minors.

Prerequisite(s): PSY 100.

SOC 119 Introduction to Criminal Justice: Police, Courts, Corrections 3 Credits

This course introduces students to the sociological study of the criminal justice system. It examines the cultural and social foundations of this system, and review debates about problems with the criminal justice system and proposals to change it. Topics covered include nature of the crime problem, requirements of criminal law, policing, the role of the courts and legal professionals, sentencing, incarceration and alternatives to it.

Prerequisite(s): SOC 101.

SOC 205 Families 3 Credits

Examines families in the United States, past and present, emphasizing the variety of family experiences in different social contexts and the relationship between family life and social change. Includes comparative material on families in other countries and considers possible alternatives to current family forms.

Prerequisite(s): SOC 101.

SOC 206 Deviance and Crime 3 Credits

Considers deviant behavior as violation of social norms. Examines the concepts of deviance and crime in socio-historical context. Evaluates major theories advanced to explain deviance. Surveys different types of deviance, including conventional crime, non-criminal deviant behavior, and white-collar corporate, and government crime.

Prerequisite(s): SOC 101.

SOC 207 Racial and Ethnic Relations 3 Credits

Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

Prerequisite(s): SOC 101.

SOC 216 Youth and Crime 3 Credits

In-depth examination of the nature and extent of youth criminality in the U.S. Explores changes in youth culture and theories of delinquency. Social policies are related to youth criminality and the youth justice system is considered.

Prerequisite(s): SOC 101.

SOC 246 Drugs, Crime & American Society 3 Credits

Explores the nature and extent of drug use in the U.S., how drugs are legally defined and socially constructed, and considers how and why drug policies have developed and changed historically. Considers how the criminalization of drugs has impacted policing strategies, courts, probation programs, sentencing and corrections, as well as other social institutions. Examines the role of local and federal agencies in enforcing drug laws, and considers debates about directions for legal reforms.

Prerequisite(s): SOC 101.

SOC 301 Methods of Sociological Research 3 Credits

One of the required courses in both the Sociology and Criminal Justice majors, Methods of Sociological Research introduces students to basic research processes in the social sciences. The course introduces students to both quantitative and qualitative approaches and data analysis using both original and secondary sources. Students will also complete an original research paper in this course.

Prerequisite(s): SOC 101.

SOC 308 Cities And Suburbs 3 Credits

Examines the growth of an urban way of life under the influence of industrialism. Study of community, political, and economic institutions in cities. Comparisons between urban and suburban areas.

Prerequisite(s): SOC 101.

SOC 312 Women in Society 3 Credits

Examines changes in women's roles and in male-female relationships. Focuses on impact of law, economy and social movements in shaping women's positions as wives and as workers. Explores theories and evidence concerning the nature and extent of sex differences. Attention to women's socialization through language, schools and media.

Prerequisite(s): SOC 101.

SOC 313 Gender and Criminal Justice 3 Credits

This course will examine women's experiences with the criminal justice system as offenders, victims, prisoners, and practitioners. It will consider how gender has shaped theories of crime and criminological research. It will explore how cultural constructions of gender have influenced substantive and procedural criminal law, the ways criminal justice agencies respond to crime, and how these have changed historically. Attention will be given to the development of new approaches, reforms, and challenges.

Prerequisite(s): SOC 101.

SOC 317 Law and Lawyers 3 Credits

Relationships between law, the economy, and the state are explored. Discussion of laws, legal systems and legal reasoning using cross-cultural comparisons and historical analysis of these in the United States. Particular attention given to impact of law on corporations, workers, women, and minorities. Changes in legal profession and legal education are examined.

Prerequisite(s): SOC 101.

SOC 321 White Collar & Corporate Crime 3 Credits**SOC 322 Punishment and Corrections 3 Credits**

This course explores the nature, forms, rationales, and effectiveness of punishment as a form of crime control. It traces the development of corrections in the U.S., identifies cultural trends and developments in penology, including mass incarceration and supermax prisons, considers the ways race and class have shaped these, and the reverberating effects penal policies have had on American culture and society beyond the criminal justice system. It examines the role of laws, politics, crime control agencies, as well as of media, and corporations in shaping penal policies. Topics also include: prison subcultures, inmate rights, correctional practices, privatization of prisons, and alternatives to punitive policies of incarceration and capital punishment.

Prerequisite(s): SOC 101.

SOC 330 Class and Economic Inequality 3 Credits

Social, economic, and political aspects of the division of society into classes are considered. Theories of stratification and the distribution of wealth, power, and prestige in societies past and present are examined.

Prerequisite(s): SOC 101.

SOC 340 Power and Politics 3 Credits

Examines the nature and distribution of power in contemporary societies; analyzes the relationships between power and politics.

Prerequisite(s): SOC 101.

SOC 342 Police and American Society 3 Credits

This course examines important issues regarding police in American society, such as the paradoxes inherent in police work, police organization and strategies and their effectiveness, the dilemmas of supervising police work, police unionism, the nature and implications of police occupational subculture, the use of police discretion, forms of police misconduct and accountability, professionalization of police and the trend toward police privatization. It also considers the diversity of the police force, trends in the delivery of policing services, the impact of new technologies on policing, and the challenges of policing in a multicultural society.

Prerequisite(s): SOC 101.

SOC 343 Policing and Counter Terrorism 3 Credits

This course is designed as an upper level (undergraduate/graduate) combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

Prerequisite(s): SOC 101.

SOC 345 Race and Crime 3 Credits

Examines the impact of crime policy on minority communities in the United States, with particular attention to the impact of "The War on Drugs", three-strike laws, and mandatory sentencing on minorities and minority communities. Drawing on sociological research, the course explores myths and realities concerning the relationship between race and crime. The relationship between racial attitudes, historical race relations, and mass incarceration are discussed.

Prerequisite(s): SOC 101.

SOC 350 Social Policy 3 Credits

Investigates the relationship between economic development and social policy in comparative and historical context. The main features of preindustrial, early industrial, and advanced industrial social welfare systems are described. Social, economic and political factors that shape social policy are investigated.

Prerequisite(s): SOC 101.

SOC 396 Applied Sociology 3 Credits

Shows how sociology can be applied in work settings. As participant observers in organizations related to their career objectives, students learn to apply sociological knowledge, perspectives, and skills. In class meetings and individual consultations with the instructor, students examine the applied dimensions of sociology, the uses of sociology in various occupations, the ethical issues involved in applied sociology, and the culture and structure of their work organization.

Prerequisite(s): SOC 101.

General Studies A.A.

Program Overview

This 60 credit program has been designed to provide both breadth and sufficient depth in the liberal arts at the associate degree (A.A.) level. Only 12 semester hours are allowed to be taken outside of Liberal Arts and Sciences.

Students whose long-range goal is a bachelor's degree should consult with an advisor in the College of Continuing Studies to determine the transferability of this program to one of the baccalaureate degrees offered by Rider.

Curriculum Overview

The flexible curriculum is designed to enable students to choose from a myriad of academic disciplines. Choosing an emphasis or concentrated area of study allows students to explore a specific discipline in depth.

Admissions Requirement

- Official transcripts from all institutions attended with a minimum 2.5 cumulative GPA

Degree Offered

- A.A. in General Studies

General Studies A.A. Program Requirements

(60 credits)

Code	Title	Credits
Liberal Studies Core		
LIB 200	Intro to Liberal Studies ¹	3
Basic Core		
CMP 120	Seminar in Writing and Rhetoric	3
CMP 125	Seminar in Writing and Research	3
COM 104	Speech Communication	3
Quantitative Course Elective ²		3-4
Information technology ³		3
Areas of Knowledge		
Historical Perspective (p. 633)		6
Artistic and Intellectual Perspective (p. 634)		6
Contemporary Perspective (p. 635)		6
Natural World (p. 637)		3-4
Emphasis		
Students select a concentrated area of study from a liberal arts department. An appropriate introductory course from a department may be included. Students are encouraged to consult a CCS advisor to select an emphasis		15
Free Electives		
Free elective hours may be taken in any department, provided the student meets the requirements imposed by the department offering the course.		6
Total Credits		60-62

¹ LIB 200 is waived for students who transfer 30 or more credits in Liberal Arts. A free elective will be added.

² The quantitative skills requirement can be met by successfully completing one course in college-level mathematics or statistics. For students who don't transfer such a course to Rider, popular offerings include MTH 102 Finite Mathematics, MSD 104 Intro to Quantitative Methods, MSD 105 Quantitative Methods for Business, MSD 205 Business Statistics, BDA 201 Introduction to Business Analytics, POL 230 Methods of Political Analysis, PSY 105 Introduction to Research in Psychology, PSY 201 Statistics and Research Design, or another mathematics course approved by an advisor.

³ The information technology requirement may be fulfilled by completing CIS 185 Information Systems Essentials. Students who possess sufficient computer experience can gain credit for CIS 185 through assessment (http://www.rider.edu/sites/default/files/docs/Credit_for_CIS_185.pdf).

Courses and Descriptions**CMP 120 Seminar in Writing and Rhetoric 3 Credits**

Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. The second of the department's three-course composition sequence, This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

CMP 125 Seminar in Writing and Research 3 Credits

Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CMP 120 or BHP 100.

LIB 200 Intro to Liberal Studies 3 Credits

Introduces students to the various perspectives and methods of the disciplines in liberal studies: natural and social sciences, humanities, and the arts. Students learn the multifaceted questions and answers offered by each discipline. They study the historical development of the university and the rise and transformation of liberal studies disciplines.

Liberal Studies**Program Overview**

This degree program enables students, through a variety of learning experiences, to consider life in the contemporary world. The curriculum provides for development of writing, speaking, quantitative, and critical thinking skills and exposure to bodies of knowledge shared by educated persons. The program is offered for adult students enrolled in the Continuing Education Program as an on-campus or online program. Students have the opportunity to share common learning experiences and to develop personal plans of study for career advancement, personal growth and graduate study.

Curriculum Overview

The Liberal Studies major provides a flexible curriculum, with on-campus or online coursework, for students whose goal is to further their personal interests and professional objectives. In addition to the Concentrations offered (p. 596), students may propose concentrations of individual design (which must be approved by the faculty committee on individual study and a CEP advisor).

Degrees Offered

- B.A. in Liberal Studies

- History (p. 442)
- Political Science (p. 499)
- Sociology (p. 548)

Liberal Studies Program Requirements

(42 credits)

A candidate for graduation must complete a minimum of 120 credits. Of the required 120 credits, 36 must be in upper-level courses as determined by the respective department, including three credits from the liberal studies core and 18 from the concentration. A maximum of 30 credits from outside the arts and sciences may be presented for graduation.

Code	Title	Credits
Core Requirements		48
See Continuing Education Programs Core Requirements (p. 633) ^{1, 2}		
Liberal Studies Core		6
LIB 200	Intro to Liberal Studies ³	
LIB 400	Seminar in Liberal Studies	
Liberal Studies Concentration		36
Select from Humanities, Social Science, Applied Social Science, Applied Social Science with Business Studies Emphasis, Applied Social Science with Health Administration Emphasis, Global Studies, Law and Justice, Natural Science (p. 596)		
Free Electives		30
Total Credits		120

¹ The quantitative skills requirement can be met by successfully completing one course in college-level mathematics or statistics. For students who don't transfer such a course to Rider, popular offerings include MTH 102, MSD 104, MSD 105, MSD 205, POL 201, PSY 201, or other mathematics courses approved by an advisor.

² The information technology requirement may be fulfilled by completing CIS 185. Students who possess sufficient computer experience can gain credit for CIS 185 through assessment.

³ LIB 200 is waived for students who transfer 30 or more credits in liberal arts and sciences courses to Rider. Those students must complete an additional elective course.

Courses and Descriptions

LIB 200 Intro to Liberal Studies 3 Credits

Introduces students to the various perspectives and methods of the disciplines in liberal studies: natural and social sciences, humanities, and the arts. Students learn the multifaceted questions and answers offered by each discipline. They study the historical development of the university and the rise and transformation of liberal studies disciplines.

LIB 400 Seminar in Liberal Studies 3 Credits

A critical examination of the tradition of Western humanism and the way it has been transmitted through liberal arts education. Deals with a variable set of permanent problems in humanistic debate and learning e.g., specialization, the need for unifying theories of knowledge, the purpose of history, the place of intellectual life in mass society, the meaning of freedom, the modern problem of alienation, the responsibilities of the university, etc. Emphasis on why and how such problems have been addressed rather than any presumptive solutions.

LIB 490 Independent & Supervised Study 1-4 Credits

Independent and Supervised Study is available to CCS students for special study projects. Students must have completed a minimum of 45 credits applicable to a Rider degree and a minimum of 12 credit hours at Rider with a GPA of 2.5 or better. Each project may be taken for one-four credits and a maximum of six credits may be applied to the associate degree, 12 credits to the bachelor degree.

Areas of Concentration

For the Bachelor of Science in Liberal Studies, select one of the following concentration areas:

- Applied Social Science (p. 596)
- Applied Social Science Concentration with Business Studies Emphasis (p. 597)
- Applied Social Science Concentration with Health Administration Emphasis (p. 597)
- Global Studies (p. 597)
- Humanities (p. 598)
- Law and Justice (p. 599)
- Natural Science (p. 600)
- Natural Science Concentration with Health Administration Emphasis (p. 600)
- Social Science (p. 601)

For the Bachelor of Science in Liberal Studies Online, students may choose one of the following concentration areas:

- Applied Social Science (p. 596) (p.)
- Applied Social Science Concentration with Business Studies Emphasis (p. 597)
- Social Science (p. 601)

Liberal Studies Online

Program Overview

This degree program enables students, through a variety of learning experiences, to consider life in the contemporary world. The curriculum provides for development of writing, speaking, quantitative, and critical thinking skills and exposure to bodies of knowledge shared by educated persons. The program is offered for adult students enrolled in the Continuing Education Programs as an on-campus or online program. Students have the opportunity to share common learning experiences and to develop personal plans of study for career advancement, personal growth and graduate study.

Curriculum Overview

The Liberal Studies major provides a flexible curriculum through online coursework, for students whose goal is to further their personal interests and professional objectives. In addition to the Concentrations (p. 596) offered, students may propose concentrations of individual design (which must be approved by the faculty committee on individual study and a CEP advisor).

Degrees Offered

- B.A. in Liberal Studies (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/continuing-education/liberal-studies/>)

Courses and Descriptions

LIB 200 Intro to Liberal Studies 3 Credits

Introduces students to the various perspectives and methods of the disciplines in liberal studies: natural and social sciences, humanities, and the arts. Students learn the multifaceted questions and answers offered by each discipline. They study the historical development of the university and the rise and transformation of liberal studies disciplines.

LIB 400 Seminar in Liberal Studies 3 Credits

A critical examination of the tradition of Western humanism and the way it has been transmitted through liberal arts education. Deals with a variable set of permanent problems in humanistic debate and learning e.g., specialization, the need for unifying theories of knowledge, the purpose of history, the place of intellectual life in mass society, the meaning of freedom, the modern problem of alienation, the responsibilities of the university, etc. Emphasis on why and how such problems have been addressed rather than any presumptive solutions.

LIB 490 Independent & Supervised Study 1-4 Credits

Independent and Supervised Study is available to CCS students for special study projects. Students must have completed a minimum of 45 credits applicable to a Rider degree and a minimum of 12 credit hours at Rider with a GPA of 2.5 or better. Each project may be taken for one-four credits and a maximum of six credits may be applied to the associate degree, 12 credits to the bachelor degree.

Organizational Psychology B.A.

Overview

Are you interested in knowing what motivates a person to perform well at a job, or what qualities a company needs to look for to make a great hire? Today's businesses and organizations need professionals who understand human behavior, group dynamics and how to make the workplace function better. A major in Organizational Psychology from Rider University will help prepare you for a career in one of America's fastest-growing professions.

Curriculum Overview

Rider University's program is one of just a handful in the nation offering a unique interdisciplinary major that combines business and psychology. This versatile degree can have a real impact on an organization's bottom line by helping to improve employee satisfaction and job performance.

Majors in this program will gain a comprehensive understanding of the important contributions that organizational psychology plays in today's workplace.

The Organizational Psychology program focuses on the behavioral aspects of managing and supervising the human resources of an organization or business. You will learn the key concepts of management and psychology, including perception and attitudes, employee motivation and engagement, and organizational leadership and power – and gain an in-depth understanding of what makes employees and organizations function at their best.

As an Organizational Psychology major, you will:

- Develop a comprehensive understanding of human behavior in work settings
- Learn how to enhance performance within an organization or business
- Benefit from networking and gain real-world experience through internships and other professional opportunities

The U.S. Bureau of Labor Statistics ranks Industrial-Organizational Psychology at the top of its list of 20-fastest growing occupations, with a projected growth rate of 53 percent between now and 2022. Organizational psychologists are in demand because their expertise results in better hires, increased productivity, reduced turnover and lower labor costs. They can work as consultants to organizations, or serve in-house in a variety of jobs, including:

- Human resource officer
- Employee development manager
- Organizational development director
- Quality performance manager
- Organizational psychologist
- Testing specialist
- Compensation and benefits specialist

Honors Program in Psychology

A student may receive honors in psychology by fulfilling the following conditions beyond the basic requirements for the psychology major: complete one Independent Research and Study project (PSY 490); earn a cumulative average of 3.25 and an average of 3.5 in psychology at the time of graduation.

Degree Offered

PSY 400	Senior Seminar	

PSY 490 Independent Study: Research and Creative Expression ¹

Total Credits 120

- ¹ MSD 105 is a prerequisite for course MSD 205 and must be completed first.
- ² Students may take either PSY 490 or MGT 490 to satisfy major requirements, but may not count both courses towards the major requirements.

Courses and Descriptions

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

HRM 315 Employee Selection & Training 3 Credits

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.
Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

Prerequisite(s): MGT 310.

HRM 333 Employee Engagement 3 Credits

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

Prerequisite(s): MGT 310.

MGT 201 Fund Management & Org Behavior 3 Credits

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

Prerequisite(s): minimum 30 credits completed.

MGT 310 Intro to Human Resource Mgmt 3 Credits

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

Prerequisite(s): MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.

Prerequisite(s): MGT 201 or PSY 210.

MGT 355 Team Management 3 Credits

This course prepares students to work in organizations that use teams as an integral part of their functioning-an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

Prerequisite(s): MGT 201 or PSY 210.

MGT 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

Prerequisite(s): MGT 201 or permission of instructor.

MSD 105 Quantitative Methods for Business 3 Credits

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 205 Business Statistics 3 Credits

This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.

Prerequisite(s): MSD 105.

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 210 Organizational Psychology 3 Credits

Focuses on issues related to human behavior in work settings. Topics include personnel issues such as hiring and promotion decisions, performance appraisals, and methods of on-the-job training. Issues of job satisfaction, motivation, productivity, and effective leadership styles are also examined. Finally, organizational structure as it relates to communication within organizations will be examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): PSY 105 and PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional quality writing, oral or multimedia presentations.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): PSY 201.

Organizational Psychology B.A. Online

Overview

Are you interested in knowing what motivates a person to perform well at a job, or what qualities a company needs to look for to make a great hire? Today's businesses and organizations need professionals who understand human behavior, group dynamics and how to make the workplace function better. A major in Organizational Psychology from Rider University will help prepare you for a career in one of America's fastest-growing professions.

Curriculum Overview

Rider University's program is one of just a handful in the nation offering a unique interdisciplinary major that combines business and psychology. This versatile degree can have a real impact on an organization's bottom line by helping to improve employee satisfaction and job performance.

Majors in this program will gain a comprehensive understanding of the important contributions that organizational psychology plays in today's workplace.

The Organizational Psychology program focuses on the behavioral aspects of managing and supervising the human resources of an organization or business. You will learn the key concepts of management and psychology, including perception and attitudes, employee motivation and engagement, and organizational leadership and power — and gain an in-depth understanding of what makes employees and organizations function at their best.

As an Organizational Psychology major, you will:

- Develop a comprehensive understanding of human behavior in work settings
- Learn how to enhance performance within an organization or business
- Benefit from networking and gain real-world experience through internships and other professional opportunities

The U.S. Bureau of Labor Statistics ranks Industrial-Organizational Psychology at the top of its list of 20-fastest growing occupations, with a projected growth rate of 53 percent between now and 2022. Organizational psychologists are in demand because their expertise results in better hires, increased productivity, reduced turnover

and lower labor costs. They can work as consultants to organizations, or serve in-house in a variety of jobs, including:

- Human resource officer
- Employee development manager
- Organizational development director
- Quality performance manager
- Organizational psychologist
- Testing specialist
- Compensation and benefits specialist

Honors Program in Psychology

A student may receive honors in psychology by fulfilling the following conditions beyond the basic requirements for the psychology major: complete one Independent Research and Study project (490); earn a cumulative average of 3.25 and an average of 3.5 in psychology at the time of graduation.

Courses and Descriptions

HRM 315 Employee Selection & Training 3 Credits

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.

Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

Prerequisite(s): MGT 310.

HRM 333 Employee Engagement 3 Credits

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

Prerequisite(s): MGT 310.

MGT 310 Intro to Human Resource Mgmt 3 Credits

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

Prerequisite(s): MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 329L Research Methods: Org Psy Lab 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 355 Team Management 3 Credits

This course prepares students to work in organizations that use teams as an integral part of their functioning-an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

Prerequisite(s): MGT 201 or PSY 210.

MGT 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

Prerequisite(s): MGT 201 or permission of instructor.

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): PSY 105 and PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional quality writing, oral or multimedia presentations.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): PSY 201.

Premedical, Predental, and Preveterinary Studies

Program Overview

Rider University offers students with baccalaureate degrees the opportunity to take the undergraduate science course prerequisites for medical, dental, veterinary or graduate school. Students may apply through Continuing Education Programs Admissions (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/continuing-education/pre-medical-vet-dental/>).

Curriculum Overview

This program is highly individualized. Students work closely with the Premedical Studies advisor to develop a plan of study that will meet their educational goals. In addition to basic core prerequisites, the program offers the opportunity to take courses in advanced biology, biochemistry, chemistry, and behavioral neurosciences to enhance students' academic profiles and to help them prepare to succeed in rigorous professional or graduate school curricula.

Program Requirements

Applicants must complete a Post-baccalaureate Premedical Studies application form, submit official transcripts from all higher education institutions attended, and complete an application (<https://www.rider.edu/admissions/apply/continuing-education/>) to the Continuing Education Program Admissions.

Applicants must meet the following criteria to gain admission to the Post-baccalaureate Premedical Studies Program:

- a baccalaureate degree from an accredited college or university;
- a 3.25 cumulative undergraduate GPA.

Applications are reviewed and approved by the Continuing Education Program Admissions and the chair of the Premedical Studies Committee.

PHY 100 & 100L	Principles of Physics I and Principles of Physics I Lab ¹	4
PHY 101 & 101L	Principles of Physics II and Principles of Physics II Lab	4

¹ MTH 105 is a prerequisite for PHY 100/PHY 100L.

Courses and Descriptions

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three- hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 260 Principles of Biology: Evolution, Diversity, and Biology of Cells 4 Credits

Lectures and labs focus on basic cell biology. Cell diversity and function, genetics and biotechnology are emphasized. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115/115L and BIO 116/116L or BIO 115, BIO 117, (BNS 118 or BNS 275).

Corequisite(s): BIO 260L.

BIO 260L Principle of Biology: Cells Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 260.

BCH 325 Biochemistry 3 Credits

Outlines the chemistry and biological function of carbohydrates, proteins, lipids, nucleic acids, vitamins, and enzymes, and introduces enzyme kinetics and biological energetics. Degradative metabolic pathways of carbohydrates and lipids, and their controlled interrelationships are discussed in detail.

Prerequisite(s): CHE 122, CHE 214 with a minimum grade of D.

CHE 120 Principles of Chemistry 3 Credits

For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.

Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits

For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits

A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.

Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits

Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.

Corequisite(s): CHE 122.

CHE 211 Organic Chemistry I 4 Credits

The structure, chemical properties, and methods of preparation of the more important classes of carbon compounds are studied, with an emphasis on the relationship of structure, stereochemistry, and conformation to chemical reactivity. The preparation and reactivity of organic functional groups is introduced. The use of infrared and nuclear magnetic resonance spectroscopy, and mass spectrometry for elucidating structures of organic molecules is discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 120, CHE 121.

Corequisite(s): CHE 211L.

CHE 211L Organic Chemistry I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 211.

CHE 214 Organic Chemistry II 4 Credits

A continuation of Chemistry 211, emphasizing the mechanism of organic reactions, structural interpretations of properties, preparations, reactivity and identification of organic compounds. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 211.

Corequisite(s): CHE 214L.

CHE 214L Organic Chemistry II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 214.

MTH 105 Algebra and Trigonometry 4 Credits

The course is an in depth and rigorous study of functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses, trigonometric identities.

Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

PHY 100 Principles of Physics I 3 Credits

Introductory noncalculus physics with applications for pre-professional, biology, and geological, environmental and marine sciences majors. Classical mechanics, energy, mechanical waves, fluid statics and dynamics, thermodynamics. Elements of modern physics are interwoven with those of classical physics from the beginning. Not open to chemistry, physics, or mathematics majors. Three hours of lecture per week. Prerequisite(s): MTH 105, MTH 210, MTH 211 or MTH 212.

Corequisite(s): PHY 100L.

PHY 100L Principles of Physics I Lab 1 Credits

For students concurrently taking PHY 100. One three-hour lab per week.

Corequisite(s): PHY 100.

PHY 101 Principles of Physics II 3 Credits

Continuation of Physics 100. Electrostatics, electricity, and magnetism; DC and AC circuits, physical and geometrical optics, introduction to elementary particle and quantum physics. Three hours of lecture per week. Prerequisite(s): PHY 100.

Corequisite(s): PHY 101L.

PHY 101L Principles of Physics II Lab 1 Credits

For students concurrently taking Physics 101. One three-hour lab per week.

Corequisite(s): PHY 101.

Psychology B.A.

Program Overview

The psychology major is designed to meet the needs of various types of students and to develop a broad understanding of the many topic areas within the field of psychology. The program is committed to helping students understand and appreciate both the scientific foundations and human service aspects of the field of psychology; develop and apply oral, written, analytical and critical-thinking skills applied to psychological issues, questions and problems; understand issues in contemporary psychology and recognize and apply psychological knowledge in order to provide solutions to real world problems and develop both interpersonal and intrapersonal knowledge through academic experiences and extra-curricular activities. The program is designed to foster self-awareness and personal growth, the development of leadership skills and a respect and understanding for human development and human diversity.

Curriculum Overview

The curriculum develops the fundamental skills that predict success in the profession of psychology, human services, corporate jobs, education and graduate school. Classes stress the development of writing skills, both technical report writing and literature research papers and provide a range of instruction on the statistical data analysis, online control of laboratory experiments, text processing and presentation software. In fieldwork placements, students gain work experience in a variety of human services programs within the community.

Members of the psychology faculty encourage students to become involved in research projects. Many Rider psychology seniors bound for graduate school receive offers of substantial financial aid in the form of assistantships and tuition waivers. These offers are made because our majors carry out research of high quality. Students have coauthored journal publications with the faculty and presented papers at regional and national conferences. Laboratories are always open for students and faculty supervision is always available.

Honors Program in Psychology

A student may receive honors in psychology by fulfilling the following conditions beyond the basic requirements for the psychology major: complete one Independent Research and Study project (PSY 490); earn a cumulative average of 3.25 and an average of 3.5 in psychology at the time of graduation.

Degrees Offered

- B.A. in Psychology

Total Credits 40

4 + 1 Master's in Applied Psychology

The 4+1 Masters in Applied Psychology, Applied Behavior Analysis concentration is designed for students who wish to combine undergraduate study in psychology leading to a Bachelor's of Arts degree with graduate study leading to a Masters of Arts in Applied Psychology.

The admission process for this program ensures that only capable students are enrolled. Freshman students are encouraged to seek advice about the program from their advisor and the program coordinator. The following courses must be completed if the student intends to apply to the program:

- PSY 212 Introduction to Applied Behavior Analysis
- PSY 299 Field Placement in Applied Behavior Analysis. This course is intended to assist the student in determining if the program is a good match for them.

The additional undergraduate courses in Applied Behavior Analysis (PSY 339 Research Methods in Applied Behavior Analysis & Lab, PSY 388 Learning & The Experimental Analysis of Behavior, and PSY 389 Professional Issues in Applied Behavior Analysis) may be taken following application to the graduate program but must be completed prior to completion of the undergraduate program requirements. During the first semester of the junior year, the student will formally apply to the Applied Psychology program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Applied Psychology program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the Applied Psychology program;
- An interview with faculty from the Applied Psychology program; and
- Completion of PSY 212 and PSY 299 (prior to application).
- Completion of PSY 339 & PSY 339L, PSY 388, and PSY 389 (prior to completion of the requirements for the degree in psychology)

Students accepted into the Applied Psychology program at the end of their junior year will complete one graduate-level elective course during each semester of their senior year.

Students will be awarded the BA degree when they complete the requirements for that degree in psychology. The MA will be awarded upon completion of the Applied Psychology graduate program requirements.

Requirements for the Minor

(18 credits)

Total Credits 18

Courses and Descriptions

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 102 Explorations in Psychology Honors 3 Credits

The course introduces the history of psychology, and demonstrates how the discipline is a science. It provides students with experience exploring the mind, behavior, and the relationship between the two, from multiple perspectives, including biological, behavioral, cognitive, developmental, humanistic, social, and abnormal. It tackles questions including (but not limited to) how different areas of the brain are involved in behavior and are affected by injury, how humans sense and perceive the world, how states of consciousness differ from one another, how humans learn, remember, communicate, and develop, what motivates humans to behave in particular ways, how social groups affect behavior and decision-making, and what happens when behavior and emotions deviate from what is typical.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 110 Psychology: The Science of Well-being 3 Credits

This course is an overview of the science of psychology applied to the question of how to build well-being. The framework for PSY 110 mirrors Introduction to Psychology in its presentation of the major perspectives in psychology – Research Methods, Behaviorism, Cognition, Development, Social Behavior, Motivation and Mental Health. Topics in PSY 110 include: Perspectives in Psychology, Research Methods, Relationships, Social Behavior, Developmental Psychology, Behavior and Cognition, Motivation, Self & Identity, Positive Psychology, Optimism.

PSY 117 Psychology of Creativity 3 Credits

Is creativity reserved only for geniuses, or can ordinary individuals also be creative? Is it domain-specific or domain-general? How do we measure it? What is the connection between creativity and innovation? Can you and I become more creative, and if so, what factors influence creative thinking? This course surveys the modern theories of creativity and problem solving from a psychological perspective, and their applications to real-world challenges. Specific topics will focus on convergent and divergent thinking, the role of constraints, change, and motivation in creativity, social and personality factors, techniques such as brainstorming, design thinking, and creative problem solving, and innovation in organizations. You will apply what you have learned in hands-on activities that challenge you to propose creative solutions to real-world problems.

PSY 118 Psychology of Women 3 Credits

Examines the psychological development of women in our culture from birth to maturity, with an emphasis on the interaction of biological and social influences on personality, social behavior, and achievement of women. Investigates psychological sex differences in terms of current measurement approaches. Readings and text are drawn from psychological theory and research.

PSY 131 The Science of Mental Illness 3 Credits

This course introduces students to the separate and interactive effects of the person and the nervous system in the etiology and treatment of mental illness. Effectively, students receive in-depth exposure to research methods, the process of making and evaluating evidence based claims, classic and clinical applications of learning theory, the development of personality and the role of personality theories in the major systems of psychotherapy, the role of the central and peripheral nervous systems in behavior and mental illness, selected major DSM-5 categories of mental illness (stress, anxiety, depression, schizophrenia, and neurocognitive disorders), the major systems of psychotherapy, and the classifications and neural bases of pharmacological treatments for mental illness.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 210 Organizational Psychology 3 Credits

Focuses on issues related to human behavior in work settings. Topics include personnel issues such as hiring and promotion decisions, performance appraisals, and methods of on-the-job training. Issues of job satisfaction, motivation, productivity, and effective leadership styles are also examined. Finally, organizational structure as it relates to communication within organizations will be examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 212 Introduction to Applied Behavior Analysis 3 Credits

Presents a review of classical and operant conditioning, data collection and research design, data analysis and interpretation. In addition, assessment and treatment strategies in a variety of settings, contingency management in institution, classroom and home, systematic self-desensitization, and ethical consideration are discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 226 Cognitive Psychology 3 Credits

The study of the mind has been the focus of psychology since its inception in the 19th century. Today, the majority of psychological research focuses on the cognitive system and its biological basis. This course will provide an overview of knowledge regarding the components of the human cognitive system (e.g., attention, memory, executive processes) and how they form the basis for higher-order cognitive skills (e.g., language and decision making). The course will provide a history of the field and the methodologies that have been and are currently being used to study the human mind. Each section of the course will include an overview of basic and applied research to demonstrate how knowledge of the cognitive system can be used to enhance human functioning in applied settings and better understand human limitations and tendencies to commit certain types of errors.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 230 Child Development 3 Credits

Presents theory and research on the social, emotional and cognitive development of children birth to age 12.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 231 Youth and Adolescent Development 3 Credits

Presents theories, research and problems concerning development in youth and adolescence.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 237 Cognitive Disabilities 3 Credits

Investigates various types of intellectual differences, focusing on etiology, methods of diagnosis, programs and services available to individuals and families. Considers problems relating to adjustment in academic, social, and vocational areas.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 238 Sensation and Perception 3 Credits

The facts and theories of sensation and perception, their role in the total psychology of the individual, and current application are examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 250 Psychology of Aging 3 Credits

This survey course focuses on basic psychological issues in the aging process and in the elderly. It examines myths and stereotypes about aging and the elderly by way of research evidence pertaining to physical, psychological, and social changes accompanying aging.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 255 Biopsychology 3 Credits

Basic biological structures and processes underlying behavior, including general neuroanatomy and neurophysiology; sensory physiology; structure and function of the motor systems; physiology of emotions, motivation, learning, memory; brain dysfunction; psychoactive drugs.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 283 Sport Psychology 3 Credits

This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 292 Professional Development in Psychology 3 Credits

This course is designed to help students understand the connections between the required curriculum in psychology and their professional and post-graduation goals. Through this required course all psychology majors will have the opportunity to recognize and use the many applications of psychology to their plans for career development and employment. Students will articulate individual goals beyond graduation, understand the individual characteristics that predict success in the work environment, recognize and apply selected research in psychology to their goals and the world of employment. The course will better prepare students to articulate post-graduation goals early in their education, and apply those goals to the following years of their education. PSY major/minor students only.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131.

PSY 295 Directed Study in Psychology 1-4 Credits

Provides an opportunity for students to obtain research experiences in psychology. Consists of a combination of project meetings, assigned readings and supervised research. Each student will work with a selected faculty member on a topic of mutual interest. Projects may include learning some components of research methods and applying these techniques to the collection and analysis of data. Provides focused reading and discussion as it relates to each student's research topic.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 or permission of instructor and chair.

PSY 299 Field Placement in Applied Behavior Analysis 1 Credits

The practicum provides hands-on experience using the tools of applied behavior analysis in a field setting. Provides supervised field placement experience in an approved institution or agency in order for students to gain knowledge in applications of applied behavior analysis. Placement is made in various community institutions and agencies that offer services to diverse populations.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131, and PSY 212.

PSY 302 Research Methods: Cognition 4 Credits

Provides students with an in-depth coverage of the expanding field of cognition and memory. Addresses issues and research within the field. Emphasis is on current views of human memory. Students learn how to design and conduct their own experiments from the topic areas of information processing, psycholinguistics, problem solving, learning and memory, social cognition, and cognitive neuroscience. Laboratory skills include programming computers, developing multimedia stimuli, recording psycho-physiological data, and composing an APA-format research report in a network-based writing lab. Prerequisite(s): a grade of "C" in PSY 201; PSY 225, PSY 237 or PSY 325 or permission of instructor.

Corequisite(s): PSY 302L.

PSY 302L Research Methods: Cognition Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 302.

PSY 303 Research Methods: Social Psychology 4 Credits

Covers research methodology within the context of social psychology (i.e., topics include altruism, aggression, attraction and social perception). Both experimental and descriptive methodologies will be covered. Students learn about various aspects of the research process (e.g., design and execution of a social psychological study, analyzing and interpreting the results). Students also learn to integrate their research findings to produce an APA-style paper. Students use computer-based word processing and statistical analysis packages to achieve these goals. Prerequisite(s): a grade of "C" in PSY 201; PSY 240 or PSY 279 or permission of instructor.

Corequisite(s): PSY 303L.

PSY 303L Research Methods: Social Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 303.

PSY 305 Theories of Psychotherapy 3 Credits

An exploration of the history and theory of the psychoanalytic, behavioral, and humanistic approaches to psychotherapy. Comparisons and contrasts between these therapeutic modalities are discussed, as well as the theory underlying specific therapeutic techniques such as dynamic interpretations, dream analysis, the analysis of resistance and transference, counter-conditioning, modeling, and cognitive restructuring. Class exercises in addition to transcripts and tape recordings from therapy sessions are used to illustrate the various therapeutic approaches.

Prerequisite(s): PSY 215 or PSY 220 or permission of instructor.

PSY 306 Research Methods: Sensation & Perception 4 Credits

Provides instruction in research design, research methods, and integration of data analysis and methodology within the content framework of sensation and perception. All the general psychology research methods are taught. Special emphasis is given to the study of human vision and audition. Students design, conduct, and report laboratory research in the areas of sensation and perception. The computer-based components of the laboratory include lessons on interactive software instrumentation for research, and network-based technical writing using APA format. Projects are conducted during the term. Each student uses a dedicated networked Macintosh computer to: a) develop and generate research stimuli and procedures, b) analyze and report research data, and c) write formal research reports. Prerequisite(s): a grade of "C" in PSY 201 or permission of instructor.

Corequisite(s): PSY 306L.

PSY 306L Sensation & Perception Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 306.

PSY 310 Introductory Counseling Skills 3 Credits

This course examines theory and research related to the therapy process and outcome. Students will practice foundational counseling skills with one another within a culturally-sensitive framework, including active listening, reflections of feelings, open questions, interpretations, self-disclosures, and challenges. Through experiential learning activities, students will develop a working knowledge of when and how to implement counseling skills. Students should be willing to talk about personal issues in this class.

Prerequisite(s): PSY 100, PSY 102, PSY 110, PSY 131.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 324 Play and Imagination 3 Credits

This course surveys two of the most important manifestations of children's imagination: pretend play and imaginary companions. It will discuss the evolution of play, the purpose of play, the role of play in the development of creativity, and individual differences in play (e.g., among children of different gender, cultures, and ability levels). Finally, it will discuss the application of play to therapeutic methods for children.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 230 or PSY 231 or PSY 237.

PSY 325 Cognitive Development 3 Credits

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): PSY 105 and PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

PSY 330 Developmental Disabilities 3 Credits

Introduces students to the genetic, biological, sensory-motor, cognitive, and social-emotional foundations of developmental disabilities. Selected syndromes will be reviewed in depth, as will treatments and intervention at the individual and family levels.

Prerequisite(s): PSY 230, PSY 231 or PSY 237.

PSY 333 Autism Spectrum Disorder 3 Credits

Provides students with a general understanding of the etiology, neurocognitive underpinnings, and general characteristics of the autism spectrum disorders. The course will examine the history of the study of these disorders, the main problems associated with these conditions, and will explore psycho-educational treatment alternatives.

Prerequisite(s): PSY 100 or PSY 102 or PSY110 or PSY 131.

PSY 334 Disabilities Across Cultures 3 Credits

The course is designed around the question of how a culture defines the concept of "Disabilities", how societies perceive individuals with disabilities, and how historical, social and political circumstances might shape an individual's understanding of diversity. The course encourages critical thinking and a comparative analysis of cultural differences and psychological practices. Key challenges associated with diagnosis, intervention and integration of individuals with disabilities across the globe will be discussed. This course fulfills the College of Liberal Arts and Sciences Essential Competencies Requirement: Global Perspectives.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131.

PSY 335 Research Methods: Human Cognitive Neuroscience 4 Credits

Covers the interdisciplinary study of the nervous system integrating neurobiology, physiology, pharmacology, and psychology as explanations for both normal and pathological human behavior. Topics integrate molecular levels of analysis, such as neuron structure and function, neurotransmitters, action potentials, and receptors, with molar levels, such as sensory and hormonal processes, learning and memory, emotions, drug use, and biological rhythms. Introduces research techniques used to study the function of the nervous system and the neural bases of behavior in humans. Neuroanatomical, electrophysiological, pharmacological, and neuropsychological assessment techniques may be explored as part of laboratory or field research projects designed in collaboration with the instructor.

Prerequisite(s): grade of "C" or better in PSY 201 and PSY 255 or permission of instructor.

Corequisite(s): PSY 335L.

PSY 335L Research Methods: Human Cognitive Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 335.

PSY 336 Research Methods: Animal Learning & Behavior 4 Credits

Provides a comprehensive overview of the acquisition and modification of the behavior of animals, especially on laboratory strains of rodents and pigeons. Core topics include respondent and operant conditioning, animal cognition, observational learning, animal safety and welfare, single-subject and between-groups approaches to methodology, and the statistical analysis of the results of studies of behavior. The laboratory component of the course provides a comprehensive overview of animal handling and maintenance, animal welfare, and the recording of experimental results. Two substantial projects are undertaken; demonstration of a conditioned taste aversion and its effect upon the acquisition and extinction of an operant (bar press) response and subsequent discrimination and reversal learning. Results of both projects are written into APA-formatted reports. **Prerequisite(s):** a grade of "C" in PSY 201, PSY 225 or permission of instructor.

Corequisite(s): PSY 336L.

PSY 336L Animal Learning and Behavior Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 336.

PSY 339 Research Methods in Applied Behavior Analysis 4 Credits

This upper-level laboratory course will provide students with in-depth study of the principles and applications of Applied Behavior Analysis. Students will examine behavioral principles, ethical considerations and real-life applications of ABA. Each student will design and implement a self-management plan to alter a behavior of their choosing.

Prerequisite(s): PSY 105 and PSY 201, PSY 212.

Corequisite(s): PSY 339L.

PSY 339L Research Methods in ABA Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 339.

PSY 340 Research Methods: Group Dynamics 4 Credits

Focuses on selected issues pertaining to group dynamics. Emphasizes an understanding of the personality and social factors that influence the functioning of unstructured and task-oriented groups. Students participate in a task group for the purpose of conducting a comprehensive research project on selected issues in group dynamics and the psychology of groups. The task group prepares an APA-style paper describing their research as well as an in-class presentation. Each student also submits a midterm and final written analysis of the interactional processes and development of the task group.

Prerequisite(s): a grade of "C" in PSY 201 or permission of instructor.

Corequisite(s): PSY 340L.

PSY 340L Group Dynamics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 340.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 350 Research Methods: Developmental Psychology 4 Credits

Focuses on one or more research areas in cognitive, personality, or social development. Includes an overview of major theoretical approaches to age-related change. Students review original research on selected aspects of behavioral change. The laboratory component of the course presents an overview of developmental research designs and methods focusing on the measurement of age-related change in psychological functioning. Students conduct field research projects designed in collaboration with the instructor and prepare an APA-style research report. **Prerequisite(s):** a grade of "C" in PSY 201 and PSY 230 or permission of instructor.

Corequisite(s): PSY 350L.

PSY 350L Developmental Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 350.

PSY 360 Psychology of Peace & Conflict 3 Credits

This course examines issues related to peace, conflict, violence, and conflict resolution. Theories and strategies that suggest ways of reducing and eliminating conflict are discussed. Psychological and social causes and consequences of violence and nonviolence are considered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 367 Creativity and Innovation 3 Credits

What is creativity, and how do we measure, study, and enhance it? This course will survey the modern theories of creativity from a psychological perspective, with an emphasis on the processes that underlie creative thinking and the variables that influence creative idea generation. Specific topics will include: convergent and divergent thinking, the role of the unconscious in creative ideation, flow and mindfulness, individual and group creativity, techniques such as brainstorming and creative problem solving, the neuroscience of creativity, the role of motivation, and creativity and innovation in organizations. Discussions of theoretical findings will be complemented by in-class activities and assignments that highlight applications to day-to-day living and to larger-scale challenges that require creativity and innovation.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 372 States of Consciousness 3 Credits

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 373 Cyberpsychology 3 Credits

Cyberpsychology is the study of how emerging computer technologies, especially social media, affect the way people think, feel, and behave both online and in the face-to-face world. This course explores a wide range of topics concerning this rapidly developing field of psychology, including how individuals, interpersonal relationships, and groups function in cyberspace with both positive and negative consequences for mental health. It emphasizes an understanding of the basic concepts of cyberpsychology along with the implications of this knowledge for improving wellbeing in the digital age.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 230 or permission of instructor.

PSY 375 Psychology and Film 3 Credits

Attitudes, perceptions and memories are shaped by motion pictures. Filmmakers create enduring images by using cinematic techniques to portray social and interpersonal themes. This course will examine various cinematic techniques as well as how film portrays interpersonal relations, gender roles, race relations, mental illness, The Holocaust, and other genocides.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 377 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

Prerequisite(s): PSY 230 or PSY 231.

PSY 379 Psychology and Law 3 Credits

Introduces students to a study of selected topics in psychology and law. Topics include eyewitness testimony, jury selection, and decision making.

Prerequisite(s): PSY 240, PSY 215.

PSY 381 Psychology of Gender 3 Credits

This course examines the meaning of sex and gender in modern society. The course readings and discussion will review and analyze the influence of gender on human behavior and emotions. The course will examine the significance of gender in shaping experience. Topics will include: gender differences in behavior, gender role development, gender and sexual identity, gender and social roles, cross-cultural perspectives on gender and transcending gender.

Prerequisite(s): PSY 100, PSY 218 or permission of instructor.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 383 Psychology and Culture 3 Credits

Students enrolled in this course will critically examine the intersection of culture and psychology. Topics covered include cultural influences on: identity, the perceptions and manifestations of mental illness, and treatment seeking.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 384 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 384 is crosslisted with PSY 584.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 385 Death, Dying and Suicide 3 Credits

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 386 Introduction to Child Life: Working with Children and Families in Healthcare Settings 3 Credits

The course provides the student with an introduction to the practice of Child Life in healthcare settings, serving as an educational foundation for those interested in pursuing a Child Life internship or other career working with children and families in a healthcare setting. Child Life programs seek to promote optimum development of children, adolescents, and families within a healthcare setting by helping to maintain normal living patterns and minimizing psychological trauma. Various theoretical positions related to the field (including but not limited to child development, play, stress, illness, trauma, and bereavement) will be described and their implications discussed. Classroom activities and assignments will help to develop relevant clinical skills including therapeutic play techniques, procedural preparation and support, coping strategies, child assessment, promoting advocacy/family-centered care, and health education. Official documents created by the Child Life Council, the certifying body for the field, will be reviewed, in addition to other seminal Child Life publications. The necessity for evidence-based practice will be discussed and relevant empirical studies will be presented (including those conducted in analogous academic fields such as developmental pediatrics and behavioral medicine).

Prerequisite: PSY 230.

PSY 388 Learning and the Experimental Analysis of Behavior 3 Credits

Students will review principles of behavior covered in PSY 212 Intro to ABA (or PSY 225 Learning Theory) and move into more complex concepts and principles of behavior analysis including respondent behavior, respondent conditioning, motivating operations, schedules of reinforcement, and verbal operants. Students will also learn elements of behavior change and specific behavior-change procedures including: verbal behavior training, discrete trial training, interventions based on motivating operations and discriminative stimuli, and stimulus equivalence procedures.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 212 or PSY 225.

PSY 389 Professional Issues in ABA 3 Credits

This course will provide students interested in working in the field of applied behavior analysis at the bachelor's level content based on the task list of the Behavior Analyst Certification Board (BACB) The course covers ethical and professional considerations relevant to the profession of applied behavior analysis as well as ethical and disciplinary standards of the profession. In addition, the course covers behavioral assessment and intervention, competency-based training, and evaluating the effectiveness of behavioral programs. Students will also have the opportunity to read seminal and current research literature on the topics.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 395 Special Topics in Psychology 3 Credits

This course examines contemporary issues in psychology, with the particular topic varying each time it is offered. New directions in the field and/or current controversies will be the focus. Past offerings include Positive Psychology, Creativity, and Brain Games.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional quality writing, oral or multimedia presentations.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 420 History of Psychology 3 Credits

Provides a coverage of systems and schools of psychology; great psychologists, their contributions, and later influence in psychology. Current psychological problems are also discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): PSY 201.

PSY 491 Internship in Psychology 1-4 Credits

Provides supervised work experience in an approved institution or agency in order for students to gain knowledge in applications of psychology. Placement is made in various community institutions and agencies that offer services to both exceptional and normal individuals. Prerequisite(s): senior psychology majors or minors.

Prerequisite(s): PSY 100.

PSY 501 Introduction to Applied Psychology Skills 3 Credits

This course will provide students with an examination of several facets of applied psychology with a focus on consuming research, understanding differences in methods and perspectives, writing according to APA style, and demonstrating understanding of several methods and perspectives in applied psychology. These are necessary skills to function meaningfully in the field. We will review and evaluate scholarly literature from across several psychology application areas. This course is available to MA Applied Psychology students only and should be taken near the beginning of entering the MA program.

PSY 510 Introduction to Applied Behavior Analysis 3 Credits

This course will provide an introduction to applied behavior analysis. Students will learn the history and defining features of the field. Due to the scientific nature of applied behavior analysis, students will also learn characteristics and processes associated with the scientific method. Furthermore, foundational concepts will be defined, along with relevant behavior change procedures.

PSY 511 Principles of Learning 3 Credits

This course will provide students with more in depth understanding of the philosophical assumptions, characteristics and basic principles of behavior analysis. Students will have the opportunity to review concepts learned during Introduction to Applied Behavior Analysis. This course will also provide an introduction to the basic research in behavior analysis. Students will become more fluent in definitions, characteristics, principles, processes, and concepts of behavior analysis.

Prerequisite(s): PSY 510.

PSY 513 Functional Assessment 3 Credits

This course is designed to provide knowledge and skills of methodologies to conduct a thorough behavioral assessment, interpret the assessment data, and identify goals for treatment. Topics will include direct observation/data collection methods, data analysis, functional assessment, stimulus preference and reinforcer assessments, and ethical and professional issues. The second half of the course will deal specifically with functional analysis including the history of and variations to the methodology. The relationship between assessment techniques and the development of the least-restrictive but most effective behavioral intervention will also be discussed.

Prerequisite(s): PSY 510, PSY 511.

PSY 514 Single Subject Research Design and Analysis 3 Credits

Students will be introduced to the basic evaluative methods used in behavior analysis including various models of single subject design such as multiple baselines, reversal designs, and alternating treatment models. Students will design analyses, collect data, graphically display their data, and provide an analysis of findings. Students will read original behavior analytic research articles and practice analysis of findings.

PSY 515 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 516 Ethics for Behavior Analysts 3 Credits

This course will familiarize the student with ethical issues and responsibilities of behavior analysts working in applied settings. Informed consent, due process, protection of confidentiality, and selection of least intrusive, least restrictive behavior change procedures will be presented and discussed within the context of case method. Ethical decision making processes will be emphasized, and the relationship between ethics and law will be explored.

PSY 518 Organizational Behavior Management 3 Credits

This course will provide an overview of research and practice in the field of Organizational Behavior Management (OBM), also referred to as Performance Management in organizational settings. Performance Management is a behaviorally-based area of specialization within the broad field of Industrial-Organizational Psychology. The concepts and techniques used in Performance Management originated from the field of behavior analysis.

PSY 519 Models of ABA Instruction 3 Credits

This course provides students with a general knowledge of the different procedures used to teach new skills and new behaviors in the field of applied behavior analysis. Areas covered will include the assessment of relative strengths and deficits, use of discrete-trial and naturalistic teaching procedures, use of reinforcement procedures to strengthen behaviors, use of motivating operations and discriminative stimuli, use of prompting and prompt-fading procedures to transfer stimulus control, use of shaping procedures to teach new behavior, use of task analysis and chaining procedures to teach new behaviors, use of precision teaching and fluency-based instruction, and use of personalized systems of instruction. Additionally, various components of the aforementioned areas will be integrated and culminate in two modules: one designed to teach communicative behavior and the other to perform discrimination training.

Prerequisite(s): PSY 510.

PSY 520 Interventions for Challenging Behavior 3 Credits

Students will review principles of behavior in the context of application to functional assessment and treatment of socially significant problem behavior. Topics including extinction, functional communication training, differential reinforcement, choice, environmental manipulations, and punishment will be covered. Students will move through the process of developing function-based interventions and writing behavior plans.

Prerequisite(s): PSY 510 and PSY 513 (or co-req).

PSY 521 Supervision and Management in ABA 3 Credits

This course provides students with skills needed to provide supervision and management in the field of applied behavior analysis. Students will apply the basic principles of behavior analysis to supervision and management of their staff and trainees. Areas covered include establishing performance expectations, selecting supervision goals based on assessment of current skills, how to train personnel to competence, performance monitoring and feedback, functional assessment and function-based strategies of personnel behavior, and how to evaluate the effects of supervision. Additional areas of discussion will include professional behavior, leadership, ethics, and professional development.

Prerequisite(s): PSY 510, PSY 511, PSY 513 and PSY 514.

PSY 522 Recent Research in ABA 3 Credits

This course provides an overview of recent behavior analytic research. Topics will vary semester to semester to capture changes in the field as they occur. Students will have the opportunity to practice reviewing, discussing, and interpreting research methodology, results, and potential areas for future research.

Prerequisite(s): PSY 510, PSY 511, PSY 513, PSY 514.

PSY 525 Cognitive Development 3 Credits

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

PSY 530 Interventions for Individuals with Developmental Disabilities 3 Credits

The purpose of this course is to prepare students to work with individuals with a broad spectrum of developmental disabilities. The course will begin with a discussion of typical child development and milestones, address how development might differ from the norm, introduce subsequent assessment and diagnosis and ultimately, introduce appropriate interventions. The main focus of this course is applied behavior analysis [ABA] and common ABA strategies for intervention.

PSY 533 Interventions for Autism 3 Credits

The purpose of this course is to provide students with a general understanding of the clinical characteristics of autism spectrum disorders. The course will briefly address etiology and neurocognitive underpinnings of these disorders but will focus on psycho-educational interventions. The course will be taught from an applied behavior analytic perspective.

PSY 535 Language Assessment and Intervention 3 Credits

Students will be introduced to the classification of verbal responses, both vocal and non-vocal. Using videotaped examples, students will categorize observed verbal behavior. Students will be provided with practical tools for the assessment of verbal behavior, as well as an array of intervention strategies. A focus will include the design of teaching strategies to enhance language acquisition, as well as ongoing evaluation of intervention efficacy will be employed.

Prerequisite(s): PSY 510, PSY 511.

PSY 536 Social Skills Assessment & Intervention 3 Credits

Students will be introduced to the development of social skills and the identification social skills deficits. Using videotaped examples, students will categorize observed social behavior. Next, students will be provided with practical tools for the assessment of social and emotional behavior, as well as an array of intervention strategies. Tools for the collection of data and the evaluation of the success of target interventions will be stressed.

Prerequisite(s): PSY 510, PSY 511.

PSY 545 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

PSY 550 Behavior Analytic Approaches to Health and Physical Activity 3 Credits

The application of behavior analytic methods, practices, and principles has been demonstrated through research and clinical applications to be effective at changing health and fitness behavior. This course will provide an overview of research and practice in applying behavior analytic principles to changing health behavior and physical activity. Behavior change across various populations will be covered including both adults and children with and without disabilities. Discussion will focus on both functional assessment as well as interventions effective at changing health and physical activity including self-management, self-monitoring, goal setting, contingency management, etc. Students will spend the semester implementing self-management projects for their own health and/or fitness behavior.

PSY 551 Behavioral Appro to Addiction 3 Credits

Evidence from laboratory and clinical settings suggests that addiction can be conceptualized and effectively treated through the application of principles of conditioning. This course provides an overview of behavior analytic research in understanding and intervening on addictive behavior. Behavioral technologies for change regarding substance-related and behavioral addiction will be covered.

Prerequisite(s): Graduate students in Applied Psychology.

PSY 565 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

PSY 567 Multicultural Perspectives in Applied Psychology 3 Credits

In this graduate level course, students will examine in-depth, culture and identity formation, social relationships, the perception and manifestation of mental illness, and treatment seeking among other areas. Additionally, given the increasing diversity of communities in the US, the course will also focus on immigration, acculturation, discrimination, and the psychological correlates of each. Implications of these factors for emerging practitioners will also be covered.

PSY 572 States of Consciousness 3 Credits

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

PSY 574 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

PSY 577 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

PSY 582 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

PSY 584 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 584 is crosslisted with PSY 384.

PSY 590 Field Placement in Applied Behavior Analysis 3 Credits

The applied behavior analysis practicum includes a required field placement of 15 hours per week and periodic on campus meetings. The practicum experience will allow students to experience the professional life of a behavior analyst in one of several preapproved sites. Sites approved include those for children, adolescents or adults with disabilities. Placements will be selected in consultation with the Practicum Coordinator and will require a written practicum plan from the cooperating field supervisor.

Prerequisite(s): PSY 510, PSY 511, PSY 513, PSY 514.

PSY 595 Selected Topics in Applied Psychology 3 Credits

Students will actively engage in an in-depth inquiry into a special topic area concerning applied psychology. Though the topics will change, students will be required to read and discuss current literature as well as considering the application of tools of the discipline to research questions of their own.

PSY 600 ABA Thesis I 1 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 601 ABA Thesis II 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 602 ABA Thesis III 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 690 Independent Research and Study 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of Instructor.

PSY 700 ABA Thesis I 1 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 701 ABA Thesis II 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 702 ABA Thesis III 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 720 Practicum in ABA 3 Credits

The Master in Applied Psychology - Applied Behavior Analysis (MAP-ABA) program's practicum offers students supervision from Rider's MAP-ABA faculty and a variety of high quality in-vivo experiences, under the direct supervision of a Rider-Approved Board Certified Behavior Analyst (BCBA), during which students apply the skills acquired in coursework.

Prerequisite(s): PSY 510, PSY 511.

Psychology B.A. Online

Overview

The Online Psychology degree program allows students to develop a strong foundation in the theory and scientific methodology behind psychology, as well as its many practical applications. Students will strengthen their critical thinking and communication skills, and learn how to conduct and analyze basic research. The insights and knowledge acquired will prepare students for a financially and personally rewarding career in fields ranging from business to education, health care to social service. In addition to strong basic and psychology core courses, the Online B.A. in Psychology gives students the flexibility to explore their academic and career interests in the field. Students will select from a variety of classes designed to build their understanding of themselves and the world around them.

Psychology Core	13
PSY 100	Introduction to Psychology
PSY 105	Introduction to Research in Psychology
PSY 201	Statistics and Research Design
PSY 329 & 329L	Research Methods in Organizational Psychology and Research Methods in Organizational Psychology
Psychology Lower Level	12
Select four of the following:	
PSY 210	Organizational Psychology
PSY 215	Personality
PSY 220	Abnormal Psychology
PSY 230	Child Development
PSY 231	Youth and Adolescent Development
PSY 240	Social Psychology
PSY 283	Sport Psychology
Psychology Upper Level	12
Select four of the following:	
PSY 324	Play and Imagination
PSY 325	Cognitive Development
PSY 345	Health Psychology
PSY 360	Psychology of Peace & Conflict
PSY 365	Drugs and Human Behavior
PSY 367	Creativity and Innovation
PSY 373	Cyberpsychology
PSY 374	Psychology of the Family
PSY 375	Psychology and Film
PSY 377	Developmental Psychopathology
PSY 379	Psychology and Law
PSY 381	Psychology of Gender
PSY 382	Aging, Brain, and Cognition
PSY 383	Psychology and Culture
PSY 384	Positive Psychology
PSY 385	Death, Dying and Suicide
Capstone Course	3
Select one of the following:	
PSY 400	Senior Seminar
PSY 420	History of Psychology
PSY 490	Independent Study: Research and Creative Expression
Free Electives	
Total Credits	40

Courses and Descriptions

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 102 Explorations in Psychology Honors 3 Credits

The course introduces the history of psychology, and demonstrates how the discipline is a science. It provides students with experience exploring the mind, behavior, and the relationship between the two, from multiple perspectives, including biological, behavioral, cognitive, developmental, humanistic, social, and abnormal. It tackles questions including (but not limited to) how different areas of the brain are involved in behavior and are affected by injury, how humans sense and perceive the world, how states of consciousness differ from one another, how humans learn, remember, communicate, and develop, what motivates humans to behave in particular ways, how social groups affect behavior and decision-making, and what happens when behavior and emotions deviate from what is typical.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 110 Psychology: The Science of Well-being 3 Credits

This course is an overview of the science of psychology applied to the question of how to build well-being. The framework for PSY 110 mirrors Introduction to Psychology in its presentation of the major perspectives in psychology – Research Methods, Behaviorism, Cognition, Development, Social Behavior, Motivation and Mental Health. Topics in PSY 110 include: Perspectives in Psychology, Research Methods, Relationships, Social Behavior, Developmental Psychology, Behavior and Cognition, Motivation, Self & Identity, Positive Psychology, Optimism.

PSY 117 Psychology of Creativity 3 Credits

Is creativity reserved only for geniuses, or can ordinary individuals also be creative? Is it domain-specific or domain-general? How do we measure it? What is the connection between creativity and innovation? Can you and I become more creative, and if so, what factors influence creative thinking? This course surveys the modern theories of creativity and problem solving from a psychological perspective, and their applications to real-world challenges. Specific topics will focus on convergent and divergent thinking, the role of constraints, change, and motivation in creativity, social and personality factors, techniques such as brainstorming, design thinking, and creative problem solving, and innovation in organizations. You will apply what you have learned in hands-on activities that challenge you to propose creative solutions to real-world problems.

PSY 118 Psychology of Women 3 Credits

Examines the psychological development of women in our culture from birth to maturity, with an emphasis on the interaction of biological and social influences on personality, social behavior, and achievement of women. Investigates psychological sex differences in terms of current measurement approaches. Readings and text are drawn from psychological theory and research.

PSY 131 The Science of Mental Illness 3 Credits

This course introduces students to the separate and interactive effects of the person and the nervous system in the etiology and treatment of mental illness. Effectively, students receive in-depth exposure to research methods, the process of making and evaluating evidence based claims, classic and clinical applications of learning theory, the development of personality and the role of personality theories in the major systems of psychotherapy, the role of the central and peripheral nervous systems in behavior and mental illness, selected major DSM-5 categories of mental illness (stress, anxiety, depression, schizophrenia, and neurocognitive disorders), the major systems of psychotherapy, and the classifications and neural bases of pharmacological treatments for mental illness.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 210 Organizational Psychology 3 Credits

Focuses on issues related to human behavior in work settings. Topics include personnel issues such as hiring and promotion decisions, performance appraisals, and methods of on-the-job training. Issues of job satisfaction, motivation, productivity, and effective leadership styles are also examined. Finally, organizational structure as it relates to communication within organizations will be examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 212 Introduction to Applied Behavior Analysis 3 Credits

Presents a review of classical and operant conditioning, data collection and research design, data analysis and interpretation. In addition, assessment and treatment strategies in a variety of settings, contingency management in institution, classroom and home, systematic self-desensitization, and ethical consideration are discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 226 Cognitive Psychology 3 Credits

The study of the mind has been the focus of psychology since its inception in the 19th century. Today, the majority of psychological research focuses on the cognitive system and its biological basis. This course will provide an overview of knowledge regarding the components of the human cognitive system (e.g., attention, memory, executive processes) and how they form the basis for higher-order cognitive skills (e.g., language and decision making). The course will provide a history of the field and the methodologies that have been and are currently being used to study the human mind. Each section of the course will include an overview of basic and applied research to demonstrate how knowledge of the cognitive system can be used to enhance human functioning in applied settings and better understand human limitations and tendencies to commit certain types of errors.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 230 Child Development 3 Credits

Presents theory and research on the social, emotional and cognitive development of children birth to age 12.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 231 Youth and Adolescent Development 3 Credits

Presents theories, research and problems concerning development in youth and adolescence.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 237 Cognitive Disabilities 3 Credits

Investigates various types of intellectual differences, focusing on etiology, methods of diagnosis, programs and services available to individuals and families. Considers problems relating to adjustment in academic, social, and vocational areas.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 238 Sensation and Perception 3 Credits

The facts and theories of sensation and perception, their role in the total psychology of the individual, and current application are examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 250 Psychology of Aging 3 Credits

This survey course focuses on basic psychological issues in the aging process and in the elderly. It examines myths and stereotypes about aging and the elderly by way of research evidence pertaining to physical, psychological, and social changes accompanying aging.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 255 Biopsychology 3 Credits

Basic biological structures and processes underlying behavior, including general neuroanatomy and neurophysiology; sensory physiology; structure and function of the motor systems; physiology of emotions, motivation, learning, memory; brain dysfunction; psychoactive drugs.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 283 Sport Psychology 3 Credits

This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 292 Professional Development in Psychology 3 Credits

This course is designed to help students understand the connections between the required curriculum in psychology and their professional and post-graduation goals. Through this required course all psychology majors will have the opportunity to recognize and use the many applications of psychology to their plans for career development and employment. Students will articulate individual goals beyond graduation, understand the individual characteristics that predict success in the work environment, recognize and apply selected research in psychology to their goals and the world of employment. The course will better prepare students to articulate post-graduation goals early in their education, and apply those goals to the following years of their education. PSY major/minor students only.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131.

PSY 295 Directed Study in Psychology 1-4 Credits

Provides an opportunity for students to obtain research experiences in psychology. Consists of a combination of project meetings, assigned readings and supervised research. Each student will work with a selected faculty member on a topic of mutual interest. Projects may include learning some components of research methods and applying these techniques to the collection and analysis of data. Provides focused reading and discussion as it relates to each student's research topic.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 or permission of instructor and chair.

PSY 299 Field Placement in Applied Behavior Analysis 1 Credits

The practicum provides hands-on experience using the tools of applied behavior analysis in a field setting. Provides supervised field placement experience in an approved institution or agency in order for students to gain knowledge in applications of applied behavior analysis. Placement is made in various community institutions and agencies that offer services to diverse populations.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131, and PSY 212.

PSY 302 Research Methods: Cognition 4 Credits

Provides students with an in-depth coverage of the expanding field of cognition and memory. Addresses issues and research within the field. Emphasis is on current views of human memory. Students learn how to design and conduct their own experiments from the topic areas of information processing, psycholinguistics, problem solving, learning and memory, social cognition, and cognitive neuroscience. Laboratory skills include programming computers, developing multimedia stimuli, recording psycho-physiological data, and composing an APA-format research report in a network-based writing lab. **Prerequisite(s):** a grade of "C" in PSY 201; PSY 225, PSY 237 or PSY 325 or permission of instructor.

Corequisite(s): PSY 302L.

PSY 302L Research Methods: Cognition Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 302.

PSY 303 Research Methods: Social Psychology 4 Credits

Covers research methodology within the context of social psychology (i.e., topics include altruism, aggression, attraction and social perception). Both experimental and descriptive methodologies will be covered. Students learn about various aspects of the research process (e.g., design and execution of a social psychological study, analyzing and interpreting the results). Students also learn to integrate their research findings to produce an APA-style paper. Students use computer-based word processing and statistical analysis packages to achieve these goals. **Prerequisite(s):** a grade of "C" in PSY 201; PSY 240 or PSY 279 or permission of instructor.

Corequisite(s): PSY 303L.

PSY 303L Research Methods: Social Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 303.

PSY 305 Theories of Psychotherapy 3 Credits

An exploration of the history and theory of the psychoanalytic, behavioral, and humanistic approaches to psychotherapy. Comparisons and contrasts between these therapeutic modalities are discussed, as well as the theory underlying specific therapeutic techniques such as dynamic interpretations, dream analysis, the analysis of resistance and transference, counter-conditioning, modeling, and cognitive restructuring. Class exercises in addition to transcripts and tape recordings from therapy sessions are used to illustrate the various therapeutic approaches.

Prerequisite(s): PSY 215 or PSY 220 or permission of instructor.

PSY 306 Research Methods: Sensation & Perception 4 Credits

Provides instruction in research design, research methods, and integration of data analysis and methodology within the content framework of sensation and perception. All the general psychology research methods are taught. Special emphasis is given to the study of human vision and audition. Students design, conduct, and report laboratory research in the areas of sensation and perception. The computer-based components of the laboratory include lessons on interactive software instrumentation for research, and network-based technical writing using APA format. Projects are conducted during the term. Each student uses a dedicated networked Macintosh computer to: a) develop and generate research stimuli and procedures, b) analyze and report research data, and c) write formal research reports. **Prerequisite(s):** a grade of "C" in PSY 201 or permission of instructor.

Corequisite(s): PSY 306L.

PSY 306L Sensation & Perception Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 306.

PSY 310 Introductory Counseling Skills 3 Credits

This course examines theory and research related to the therapy process and outcome. Students will practice foundational counseling skills with one another within a culturally-sensitive framework, including active listening, reflections of feelings, open questions, interpretations, self-disclosures, and challenges. Through experiential learning activities, students will develop a working knowledge of when and how to implement counseling skills. Students should be willing to talk about personal issues in this class.

Prerequisite(s): PSY 100, PSY 102, PSY 110, PSY 131.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 324 Play and Imagination 3 Credits

This course surveys two of the most important manifestations of children's imagination: pretend play and imaginary companions. It will discuss the evolution of play, the purpose of play, the role of play in the development of creativity, and individual differences in play (e.g., among children of different gender, cultures, and ability levels). Finally, it will discuss the application of play to therapeutic methods for children.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 230 or PSY 231 or PSY 237.

PSY 325 Cognitive Development 3 Credits

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): PSY 105 and PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

PSY 330 Developmental Disabilities 3 Credits

Introduces students to the genetic, biological, sensory-motor, cognitive, and social-emotional foundations of developmental disabilities. Selected syndromes will be reviewed in depth, as will treatments and intervention at the individual and family levels.

Prerequisite(s): PSY 230, PSY 231 or PSY 237.

PSY 333 Autism Spectrum Disorder 3 Credits

Provides students with a general understanding of the etiology, neurocognitive underpinnings, and general characteristics of the autism spectrum disorders. The course will examine the history of the study of these disorders, the main problems associated with these conditions, and will explore psycho-educational treatment alternatives.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 334 Disabilities Across Cultures 3 Credits

The course is designed around the question of how a culture defines the concept of "Disabilities", how societies perceive individuals with disabilities, and how historical, social and political circumstances might shape an individual's understanding of diversity. The course encourages critical thinking and a comparative analysis of cultural differences and psychological practices. Key challenges associated with diagnosis, intervention and integration of individuals with disabilities across the globe will be discussed. This course fulfills the College of Liberal Arts and Sciences Essential Competencies Requirement: Global Perspectives.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131.

PSY 335 Research Methods: Human Cognitive Neuroscience 4 Credits

Covers the interdisciplinary study of the nervous system integrating neurobiology, physiology, pharmacology, and psychology as explanations for both normal and pathological human behavior. Topics integrate molecular levels of analysis, such as neuron structure and function, neurotransmitters, action potentials, and receptors, with molar levels, such as sensory and hormonal processes, learning and memory, emotions, drug use, and biological rhythms. Introduces research techniques used to study the function of the nervous system and the neural bases of behavior in humans. Neuroanatomical, electrophysiological, pharmacological, and neuropsychological assessment techniques may be explored as part of laboratory or field research projects designed in collaboration with the instructor. Prerequisite(s): grade of "C" or better in PSY 201 and PSY 255 or permission of instructor.

Corequisite(s): PSY 335L.

PSY 335L Research Methods: Human Cognitive Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 335.

PSY 336 Research Methods: Animal Learning & Behavior 4 Credits

Provides a comprehensive overview of the acquisition and modification of the behavior of animals, especially on laboratory strains of rodents and pigeons. Core topics include respondent and operant conditioning, animal cognition, observational learning, animal safety and welfare, single-subject and between-groups approaches to methodology, and the statistical analysis of the results of studies of behavior. The laboratory component of the course provides a comprehensive overview of animal handling and maintenance, animal welfare, and the recording of experimental results. Two substantial projects are undertaken; demonstration of a conditioned taste aversion and its effect upon the acquisition and extinction of an operant (bar press) response and subsequent discrimination and reversal learning. Results of both projects are written into APA-formatted reports. Prerequisite(s): a grade of "C" in PSY 201, PSY 225 or permission of instructor.

Corequisite(s): PSY 336L.

PSY 336L Animal Learning and Behavior Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 336.

PSY 339 Research Methods in Applied Behavior Analysis 4 Credits

This upper-level laboratory course will provide students with in-depth study of the principles and applications of Applied Behavior Analysis. Students will examine behavioral principles, ethical considerations and real-life applications of ABA. Each student will design and implement a self-management plan to alter a behavior of their choosing. Prerequisite(s): PSY 105 and PSY 201, PSY 212.

Corequisite(s): PSY 339L.

PSY 339L Research Methods in ABA Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 339.

PSY 340 Research Methods: Group Dynamics 4 Credits

Focuses on selected issues pertaining to group dynamics. Emphasizes an understanding of the personality and social factors that influence the functioning of unstructured and task-oriented groups. Students participate in a task group for the purpose of conducting a comprehensive research project on selected issues in group dynamics and the psychology of groups. The task group prepares an APA-style paper describing their research as well as an in-class presentation. Each student also submits a midterm and final written analysis of the interactional processes and development of the task group. Prerequisite(s): a grade of "C" in PSY 201 or permission of instructor.

Corequisite(s): PSY 340L.

PSY 340L Group Dynamics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 340.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 350 Research Methods: Developmental Psychology 4 Credits

Focuses on one or more research areas in cognitive, personality, or social development. Includes an overview of major theoretical approaches to age-related change. Students review original research on selected aspects of behavioral change. The laboratory component of the course presents an overview of developmental research designs and methods focusing on the measurement of age-related change in psychological functioning. Students conduct field research projects designed in collaboration with the instructor and prepare an APA-style research report. Prerequisite(s): a grade of "C" in PSY 201 and PSY 230 or permission of instructor.

Corequisite(s): PSY 350L.

PSY 350L Developmental Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 350.

PSY 360 Psychology of Peace & Conflict 3 Credits

This course examines issues related to peace, conflict, violence, and conflict resolution. Theories and strategies that suggest ways of reducing and eliminating conflict are discussed. Psychological and social causes and consequences of violence and nonviolence are considered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 367 Creativity and Innovation 3 Credits

What is creativity, and how do we measure, study, and enhance it? This course will survey the modern theories of creativity from a psychological perspective, with an emphasis on the processes that underlie creative thinking and the variables that influence creative idea generation. Specific topics will include: convergent and divergent thinking, the role of the unconscious in creative ideation, flow and mindfulness, individual and group creativity, techniques such as brainstorming and creative problem solving, the neuroscience of creativity, the role of motivation, and creativity and innovation in organizations. Discussions of theoretical findings will be complemented by in-class activities and assignments that highlight applications to day-to-day living and to larger-scale challenges that require creativity and innovation.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 372 States of Consciousness 3 Credits

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 373 Cyberpsychology 3 Credits

Cyberpsychology is the study of how emerging computer technologies, especially social media, affect the way people think, feel, and behave both online and in the face-to-face world. This course explores a wide range of topics concerning this rapidly developing field of psychology, including how individuals, interpersonal relationships, and groups function in cyberspace with both positive and negative consequences for mental health. It emphasizes an understanding of the basic concepts of cyberpsychology along with the implications of this knowledge for improving wellbeing in the digital age.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 230 or permission of instructor.

PSY 375 Psychology and Film 3 Credits

Attitudes, perceptions and memories are shaped by motion pictures. Filmmakers create enduring images by using cinematic techniques to portray social and interpersonal themes. This course will examine various cinematic techniques as well as how film portrays interpersonal relations, gender roles, race relations, mental illness, The Holocaust, and other genocides.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 377 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

Prerequisite(s): PSY 230 or PSY 231.

PSY 379 Psychology and Law 3 Credits

Introduces students to a study of selected topics in psychology and law. Topics include eyewitness testimony, jury selection, and decision making.

Prerequisite(s): PSY 240, PSY 215.

PSY 381 Psychology of Gender 3 Credits

This course examines the meaning of sex and gender in modern society. The course readings and discussion will review and analyze the influence of gender on human behavior and emotions. The course will examine the significance of gender in shaping experience. Topics will include: gender differences in behavior, gender role development, gender and sexual identity, gender and social roles, cross-cultural perspectives on gender and transcending gender.

Prerequisite(s): PSY 100, PSY 218 or permission of instructor.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 383 Psychology and Culture 3 Credits

Students enrolled in this course will critically examine the intersection of culture and psychology. Topics covered include cultural influences on: identity, the perceptions and manifestations of mental illness, and treatment seeking.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 384 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 384 is crosslisted with PSY 584.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 385 Death, Dying and Suicide 3 Credits

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 386 Introduction to Child Life: Working with Children and Families in Healthcare Settings 3 Credits

The course provides the student with an introduction to the practice of Child Life in healthcare settings, serving as an educational foundation for those interested in pursuing a Child Life internship or other career working with children and families in a healthcare setting. Child Life programs seek to promote optimum development of children, adolescents, and families within a healthcare setting by helping to maintain normal living patterns and minimizing psychological trauma. Various theoretical positions related to the field (including but not limited to child development, play, stress, illness, trauma, and bereavement) will be described and their implications discussed. Classroom activities and assignments will help to develop relevant clinical skills including therapeutic play techniques, procedural preparation and support, coping strategies, child assessment, promoting advocacy/family-centered care, and health education. Official documents created by the Child Life Council, the certifying body for the field, will be reviewed, in addition to other seminal Child Life publications. The necessity for evidence-based practice will be discussed and relevant empirical studies will be presented (including those conducted in analogous academic fields such as developmental pediatrics and behavioral medicine).

Prerequisite: PSY 230.

PSY 388 Learning and the Experimental Analysis of Behavior 3 Credits

Students will review principles of behavior covered in PSY 212 Intro to ABA (or PSY 225 Learning Theory) and move into more complex concepts and principles of behavior analysis including respondent behavior, respondent conditioning, motivating operations, schedules of reinforcement, and verbal operants. Students will also learn elements of behavior change and specific behavior-change procedures including: verbal behavior training, discrete trial training, interventions based on motivating operations and discriminative stimuli, and stimulus equivalence procedures.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 212 or PSY 225.

PSY 389 Professional Issues in ABA 3 Credits

This course will provide students interested in working in the field of applied behavior analysis at the bachelor's level content based on the task list of the Behavior Analyst Certification Board (BACB). The course covers ethical and professional considerations relevant to the profession of applied behavior analysis as well as ethical and disciplinary standards of the profession. In addition, the course covers behavioral assessment and intervention, competency-based training, and evaluating the effectiveness of behavioral programs. Students will also have the opportunity to read seminal and current research literature on the topics.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 395 Special Topics in Psychology 3 Credits

This course examines contemporary issues in psychology, with the particular topic varying each time it is offered. New directions in the field and/or current controversies will be the focus. Past offerings include Positive Psychology, Creativity, and Brain Games.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional quality writing, oral or multimedia presentations.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 420 History of Psychology 3 Credits

Provides a coverage of systems and schools of psychology; great psychologists, their contributions, and later influence in psychology. Current psychological problems are also discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): PSY 201.

PSY 491 Internship in Psychology 1-4 Credits

Provides supervised work experience in an approved institution or agency in order for students to gain knowledge in applications of psychology. Placement is made in various community institutions and agencies that offer services to both exceptional and normal individuals. Prerequisite(s): senior psychology majors or minors.

Prerequisite(s): PSY 100.

Public Relations B.A.

Program Overview

The field of public relations is one of the fastest-growing and most rewarding professions in today's information-based global economy.

As Public Relations majors at Rider University, students learn how organizations and individuals proactively manage communication challenges and opportunities in real world contexts. Expert professors, as well as professionals in the field, help students sharpen their skills through hands-on assignments and class lead discussions using case studies and current trends. Throughout the program, students explore the importance of cultivating and maintaining productive relationships with clients, the media and opinion leaders. In the capstone course, students work with local corporate or nonprofit clients to learn all facets of planning and executing a public relations campaign.

Outside the classroom, Rider's Public Relations majors are encouraged to gain experience by working as interns in a variety of fields including fashion, sports, healthcare, government or a number of other exciting industries. In addition, students have the opportunity to join the nationally recognized Rider chapter of the Public Relations Student Society of America (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/departments/communication-journalism/club-activities/>).

The Public Relations Student Society of America (PRSSA) is the foremost organization for students interested in public relations and communication. The organization seeks to advance the public relations profession by nurturing generations of future professionals. As a chartered chapter of the national organization, Rider University's Public

Relations Major meets rigorous academic standards for public relations education, and subscribes to the highest ethical principles and diversity in the profession.

At the local level, the Rider University Chapter offers opportunities to meet leaders in the field through agency tours, guest speakers, workshops, professional mentoring, and trips to regional and national conferences. The Rider Chapter also provides opportunities to build your public relations portfolio through the chapter's activities including social media, event planning, and public relations consulting activities. Dr. Nancy Wiencek (<http://www.rider.edu/faculty/nancy-wiencek/>) is the advisor.

For more information, please visit the Rider University Chapter of PRSSA on Instagram (<https://www.instagram.com/prssarider/>).

Curriculum Overview

Core classes in the Public Relations major include public relations, publication design, feature writing, advanced speech, public relations writing and strategy, communication research methods, and cases and campaigns in public relations.

To round out the major, students also choose at least one other class to build their skills in areas such as social media, podcasting, intercultural communication, event planning, web design, photography, marketing, advertising, or grant writing and fundraising. In addition, students also choose at least one class to explore a career focus through classes focused on organizational communication, health communication, politics and law, sports communication, international communication, arts marketing or an internship.

Program Overview

The Public Relations Certificate is designed for students who have or are pursuing a baccalaureate degree and wish to specialize in the area of public relations. The program includes courses in writing for the media, publication design, speech communication, as well as other areas of public relations. Upon completion of the program, students with a baccalaureate degree receive an official Public Relations Certificate.

Admission Requirements

Minimum admissions requirements for the public relations certificate are:

- a baccalaureate degree or be a candidate for a baccalaureate degree (usually at Rider);
- junior standing or beyond (may take some courses before admission to the program);
- a 2.5 GPA in all undergraduate work or evidence of acceptable public relations experience.

This program is available only to students enrolled in Continuing Education Programs.

Program Completion and Certification

Students will receive their certificates after successfully completing the eight required courses. Students without a baccalaureate degree will receive their certificates after completing the eight required courses and the baccalaureate degree. The notation Public Relations Certificate will appear on the student's Rider transcript when the certificate is awarded. Students leaving CEP for any other Rider undergraduate program before earning the certificate will not be eligible for the certificate.

Courses and Descriptions

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 201 Communication Theory 3 Credits

Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 204 Advanced Speech Communication 3 Credits

Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.

Prerequisite(s): COM 104 or COM 290.

COM 205 Theories of Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 210 News Reporting and Writing 3 Credits

Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.

Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits

Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.

Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits

Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 233 Writing for Broadcast 3 Credits

Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 316 Feature Writing 3 Credits

Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.

Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 341 Public Relations Writing and Strategy 3 Credits

Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.

Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 348 Communication Research Methods 3 Credits

Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.

Prerequisite(s): COM 105; junior or senior standing.

COM 360 Advanced Publication Design and Presentation 3 Credits

Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.

Prerequisite(s): COM 212.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media. Note: This course is crosslisted as GLS 393. Students may not get credit for both COM 393 and GLS 393.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 440 Cases & Campaigns in Public Relations 3 Credits

Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.

Prerequisite(s): COM 341 or permission of instructor.

MKT 200 Marketing Principles 3 Credits

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

Prerequisite(s): 15 credits.

Social Work Minor

Program Overview

In a sequence of three social work courses, students learn about the development of welfare and social service programs; they acquire skills in interviewing, case management, and group dynamics; and they gain work experience in a social service agency.

Minor Offered

PSY 230	Child Development ¹	
PSY 231	Youth and Adolescent Development	
Select one course in an area of concentration relevant to social work.		3
		²
Total Credits		18

¹ PSY 100 is a prerequisite for all Psychology courses.

² Examples of such areas are: Aging, Human Service Organizations, Psychological Counseling, or Criminal Justice. This course should be selected in consultation with an academic advisor.

Courses and Descriptions

SOC 205 Families 3 Credits

Examines families in the United States, past and present, emphasizing the variety of family experiences in different social contexts and the relationship between family life and social change. Includes comparative material on families in other countries and considers possible alternatives to current family forms.

Prerequisite(s): SOC 101.

SOC 248 Social Service Organizations 3 Credits

Examines the growth and variety of social service organizations. The training of providers, such as teachers and physicians, and relationships between professionals and clients in settings such as schools and hospitals are studied as well as organizational decision-making, finances, and community relations.

Prerequisite(s): SOC 101.

SOC 350 Social Policy 3 Credits

Investigates the relationship between economic development and social policy in comparative and historical context. The main features of preindustrial, early industrial, and advanced industrial social welfare systems are described. Social, economic and political factors that shape social policy are investigated.

Prerequisite(s): SOC 101.

SOW 200 Social Services & Social Work 3 Credits

An overview of the historical development of social work. Emphasis on current issues in social welfare and social service programs in the United States. Among the programs explored are those in public welfare, mental health, medical services, child abuse/neglect, school social work, and care for the elderly.

SOW 300 Methods Social Work Practice 3 Credits

Interviewing techniques are taught and practiced. Skills in forming and running small groups, working with community organizations, and administering social programs are emphasized. Students study how to gather pertinent psycho-social facts about clients, make an assessment, plan an intervention, and successfully complete service to the client. Students who next will take SOW 301 Field Work Experience will be placed in a social service agency by the end of the semester.

Prerequisite(s): SOW 200.

SOW 301 Field Work Experience 3 Credits

Students observe and work in a social service agency. They study the structure of the agency and the people and roles within it, and develop helping skills with clients. Approximately six to eight hours of field work a week for each three credits are required, plus class sessions during the semester.

Prerequisite(s): SOW 200, SOW 300. May be taken twice in two separate semesters for a maximum of six credits toward the total credits required for graduation.

PSY 230 Child Development 3 Credits

Presents theory and research on the social, emotional and cognitive development of children birth to age 12.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 231 Youth and Adolescent Development 3 Credits

Presents theories, research and problems concerning development in youth and adolescence.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

Continuing Education Programs Core Requirements

The Continuing Education Program core requirements consist of two major areas: Basic Core (p. 633) and the Areas of Knowledge (p. 633). Continuing Education Program students pursuing the Bachelor of Science in Business Administration should refer to the College of Business Administration's core requirements (p. 127).

Basic Core Requirements

Code	Title	Credits
CMP 120	Seminar in Writing and Rhetoric	3
CMP 125	Seminar in Writing and Research	3
COM 104	Speech Communication ¹	3
Quantitative Skills ²		3

Information Technology ³	3
Total Credits	15

- ¹ COM 104 Speech Communication is not a core requirement in the Organizational Psychology (B.A.) (p. 487) degree program.
- ² The quantitative skills requirement can be met by successfully completing one course in college-level mathematics or statistics. For students who don't transfer such a course to Rider, popular offerings include MTH 102 Finite Mathematics, MSD 104 Intro to Quantitative Methods, MSD 105 Quantitative Methods for Business, MSD 205 Business Statistics, BDA 201 Introduction to Business Analytics, POL 230 Methods of Political Analysis PSY 105 Introduction to Research in Psychology, PSY 201 Statistics and Research Design, and other math courses approved by an advisor. Quantitative skills is not a core requirement in the Psychology (B.A.) (p. 509), Psychology Online (B.A.) (p. 621) or Organizational Psychology (B.A.) (p. 487) degree program.
- ³ The information technology requirement may be fulfilled by completing CIS 185 Information Systems Essentials. Students who possess sufficient computer experience can gain credit for CIS 185 Information Systems Essentials through assessment (http://www.rider.edu/sites/default/files/docs/Credit_for_CIS_185.pdf).

The Areas of Knowledge

There are four areas of knowledge. Students select two or three courses from each of the four areas. At least two disciplines must be represented in each area. No more than three courses from any one discipline may be used to meet the areas of knowledge requirement. Students are urged to consult with their advisors before selecting courses for the areas of knowledge to ensure that the courses chosen meet the requirements.

Code	Title	Credits
Historical Perspective		9

Artistic and Intellectual Perspective Area of Knowledge

This area of knowledge recognizes that intellectual creativity is an ability that is unique to humans. People, alone, have produced works of art and developed systematic bodies of thought. Thus, to understand people is to know them in this special role.

Code	Title	Credits
Area of Knowledge: Artistic and Intellectual Perspective		9
Select three of the following courses: ¹		
AMS 210	American Memoir and Autobiography	
AMS 211	Sports in American Life	
AMS 213	American Myth in Literature, Landscape, and Music

PSY 333	Autism Spectrum Disorder ¹	
PSY 345	Health Psychology ¹	
PSY 365	Drugs and Human Behavior ¹	
PSY 382	Aging, Brain, and Cognition ¹	
PSY 385	Death, Dying and Suicide ¹	
SOC 269	Physical Anthropology	
SUS 100	Introduction to Sustainability Studies	

¹ Students enrolled in Psychology (B.A.), Psychology - Online (B.A.) or Organizational Psychology (B.A.) degree programs may not use any PSY courses in the Natural World Perspective. to complete this requirement.

Policies

Changing to Degree Candidacy (Matriculation) (p. 637)
 Audit and Alumni Audit (p. 637)
 Credit by Nontraditional Means (p. 637)
 Old Credits Policy (p. 638)

Changing to Degree Candidacy (Matriculation)

Non-matriculated students interested in degree candidacy should consult an academic advisor before applying for admission to a degree program. An applicant for matriculation must have at least a 2.0 average at Rider and meet the admissions requirements as described for degree candidates. (Specific majors may require a higher grade point average.)

When students qualify for matriculation, they will receive credit toward their degrees for all applicable courses previously completed

satisfactorily. Students are bound by the degree requirements and transfer credit policy in effect at the time of matriculation.

Students who have earned more than 21 credits at Rider as non-degree candidates may be asked to explain their educational goals and, if appropriate, to matriculate.

Audit and Alumni Audit

Students who want to attend classes without taking examinations or receiving grades may audit courses when class space allows. Audited classes will be indicated with the notation of "X" on the transcript.

The extent to which an auditor may take part in a course's activities is determined by the student and the instructor. In addition to the audit fee, students auditing a course carrying separate fees must pay all such required fees.

Students who want to enroll as auditors should apply and register with the CEP admissions counselor (<https://www.rider.edu/admissions/continuing-studies/contact/>) during the scheduled evenings of the first week of class. Students who register on an audit basis may not change from audit to credit during a semester. However, a student who has audited a course may take that same course for credit in a later semester at full tuition.

Students who register on an audit basis may not change from audit to credit during a semester, except during the add period. Students originally registered for credit may change to audit status during the add/drop period. Students should refer to the academic calendar (<http://www.rider.edu/academics/academic-support-services/registrar/academic-calendars/>) of each term [Spring, Summer, Fall, JTerm] for specific add and drop/add dates.

Rider alumni (<http://www.rider.edu/alumni/>) who want to audit courses receive a special discount and should contact a CEP admissions counselor (<https://www.rider.edu/admissions/continuing-studies/contact/>).

Credit by Nontraditional Means

Credit earned for college-level knowledge obtained through means other than traditional classroom work at an accredited college may be considered for transfer. Students should consult with a CEP admissions counselor (<https://www.rider.edu/admissions/continuing-studies/contact/>) to discuss the transferability of nontraditional credit.

Nontraditional transfer credits include:

- College Level Examination Program (CLEP) credits;
- Advanced Placement credits;
- Formal military credits which meet Rider standards and procedures;
- DANTES Subject Standardized Test that meets credit recommendations established by the American Council on Education;
- Validation or assessment of specific courses approved by a Rider faculty member;
- Prior learning assessment (PLA) based on demonstrated learning acquired through life and work experience approved by Rider faculty.

Old Credits Policy

The academic record of a student returning to Rider after an absence of 10 years or more will be re-evaluated to determine the applicability of old courses to present requirements. Grades earned in courses taken 10 years or more before returning will not be counted in the student's present grade point average. Old courses that are judged applicable to current degree programs will be used to meet degree requirements.

College of Liberal Arts and Sciences Faculty

John A. Adamovics

Priority Adjunct Associate Professor, Department of Chemistry and Biochemistry
B.A. Portland State University; Ph.D. Colorado State University

Wendy Adlai-Gail

Priority Adjunct Assistant Professor, Department of Psychology
B.A. Brown University; M.A. University of Chicago; Ph.D. University of Chicago

Md Liakat Ali

Assistant Professor, Department of Computer Science and Physics
B.S. International Islamic University; M.S. Blekinge Institute of Technology; Ph.D. Pace University

Nadia S. Ansary

Professor, Department of Psychology
B.A. Rutgers, The State University of New Jersey; M.A. Teachers College, Columbia University; M.Phil. Teachers College, Columbia University; Ph.D. Teachers College, Columbia University

Anthony Bahri

Professor, Department of Mathematics
B.Sc. The University of Sydney; M.Sc. University of Oxford; D.Phil. University of Oxford

Kelly A. Bidle

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Rutgers, The State University of New Jersey; Ph.D. University of Maryland

Pauline Blaimont

Lecturer, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. California State University; M.S. University of California; Ph.D. University of California

John J. Bochanski

Associate Professor, Department of Computer Science and Physics
B.S. Villanova University; M.S. University of Washington; Ph.D. University of Washington

Ciprian S. Borcea

Professor, Department of Mathematics
B.S. University of Bucharest, Romania; Diploma in Mathematics University of Bucharest, Romania; Ph.D. University of Bucharest, Romania

Michael J. Brogan

Professor, Department of Political Science
B.A. University of Delaware; M.P.A. Rutgers, The State University of New Jersey - Camden; M.Phil. The Graduate Center, City University of New York; Ph.D. The Graduate Center, City University of New York

Gary M. Brosvic

Professor, Department of Psychology
B.S. John Carroll University; M.A. The American University; Ph.D. The American University

Kathleen M. Browne

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.A. Colgate University; M.A. Binghamton University, State University of New York; Ph.D. Rosenstiel School of Marine and Atmospheric Science, University of Miami

Robert Burger

Priority Adjunct Assistant Professor, Department of Communication and Journalism
B.F.A. Pratt Institute; M.F.A. Miami International University of Art & Design

Michael Carlin

Associate Professor, Department of Psychology
B.A. Wheeling Jesuit University; Ph.D. Vanderbilt University

Feng Chen

Associate Professor, Department of Chemistry and Biochemistry
B.S. Hunan University, P. R. China; Ph.D. Northeastern University

Lisa Chong

Priority Adjunct Instructor, Department of English
B.S. Cairn University; M.A. Arcadia University; M.Ed. University of Pennsylvania

Daria Cohen

Professor, Department of Languages, Literatures and Cultures
B.A. Douglass College, Rutgers, The State University of New Jersey; M.A. Rutgers, The State University of New Jersey; Ph.D. Rutgers, The State University of New Jersey

Deborah Cordonnier

Priority Adjunct Instructor, Department of English
B.S. University of Missouri; M.A. Texas A & M University; M.Div. Princeton Theological Seminary; Th.M. Princeton Theological Seminary; M.F.A. Goddard College

Mack Costello

Associate Professor, Department of Psychology
B.S. University of Florida; M.A. Western Michigan University

Michele D'Angelo

Priority Adjunct Assistant Professor, Department of English
B.A. The College of New Jersey; MAT The College of New Jersey; Ed.S. Rider University

Melissa M. DeWees

Priority Adjunct Assistant Professor, Department of Psychology
B.A. Towson State University; M.A. Alliant International University; Psy.D. Alliant International University

David R. Dewberry

Professor, Department of Communication and Journalism
B.A. University of Arkansas; M.A. University of Arkansas; Ph.D. University of Denver

Cara J. DiYanni

Associate Professor, Department of Psychology
B.A. Georgetown University; M.A. Boston University; Ph.D. Boston University

Chrystina A. Dolyniuk

Associate Professor, Department of Psychology
B.A. University of California, Los Angeles; M.A. California State University, Northridge; Ph.D. University of Calgary

Julie Drawbridge

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. The University of Maine; Ph.D. The University of Texas at Austin

Daniel L. Druckenbrod

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.S. University of Notre Dame; Ph.D. University of Virginia

Bosah L. Ebo

Professor, Department of Communication and Journalism
B.S. University of Wisconsin-Stevens Point; B.S. University of Wisconsin-Stevens Point; M.A. University of Wisconsin-Stevens Point; Ph.D. The University of Iowa

Jeff Edelstein

Priority Adjunct Instructor, Department of Communication and Journalism
B.A. Rider University

Alice Faroh

Priority Adjunct Assistant Professor, Department of Languages, Literatures and Cultures
B.A. Universidad Pedagógica Experimental de Barquisimeto; M.A. Maryville University

Joel Feldman

Associate Professor, Department of History and Philosophy
B.A. Hampshire College; Ph.D. The University of Texas at Austin

Roberta Fiske-Rusciano

Priority Adjunct Assistant Professor, Department of Political Science
B.A. Simmons College; M.A. University of Chicago; Ph.D. Rutgers, The State University of New Jersey

William F. Fobare

Priority Adjunct Assistant Professor, Department of Chemistry and Biochemistry
A.B. Hope College; Ph.D. University of South Carolina

Hernán Fontanet

Professor, Department of Languages, Literatures and Cultures
B.A. The University of Buenos Aires; A.M. Universidad Complutense de Madrid; Ph.D. Universidad Autónoma de Madrid

Jessica Franko-Oliano

Priority Adjunct Assistant Professor, Department of Communication and Journalism
B.A. Rider University; MBA Rider University

Barbara Franz

Professor, Department of Political Science
M.A. University of Vienna; M.A. Syracuse University; M.A. Syracuse University; Ph.D. Syracuse University

Lucien J. Frary

Professor, Department of History and Philosophy
B.A. University of St. Thomas; M.A. University of Minnesota, Twin Cities; Ph.D. University of Minnesota, Twin Cities

Daniel C. Garro

Priority Adjunct Instructor, Department of History and Philosophy
B.A. Washington College; M.A. Texas Tech University

Matthew B. Goldie

Professor, Department of English
B.A. Victoria University; M.F.A. Brooklyn College; Ph.D. The Graduate Center, City University of New York

Selma C. Goldstein

Priority Adjunct Instructor, Department of English
B.S. Cornell University; MBA Fairleigh Dickinson University

Stephanie Golski

Associate Professor, Department of Psychology
B.A. McDaniel College; Ph.D. The Johns Hopkins University

Alexander Grushow

Professor, Department of Chemistry and Biochemistry
B.A. Franklin & Marshall College; Ph.D. University of Minnesota

Sophie Guderian

Lecturer, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. University of North Carolina; M.S. University of North Carolina; Ph.D. University of Delaware

John Guers

Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
M.S. East Stroudsburg University; M.S. East Stroudsburg University; Ph.D. University of Delaware

Jeffrey Halpern

Associate Professor, Department of Sociology and Criminology
B.A. The City College of New York; Ph.D. University of Pittsburgh

Laurel Harris

Associate Professor, Department of English
B.A. Oberlin College; M.A. University of Chicago; Ph.D. The Graduate Center, City University of New York

Catrinel Haught Tromp

Associate Professor, Department of Psychology
B.A. Queens University of Charlotte; Ph.D. Princeton University

Elizabeth Hawthorne

Online Lecturer, Department of Computer Science and Physics
B.S. Rider University; M.S. Kean University; Ph.D. Nova Southeastern University; Postdoctoral Fellowships, University of Maryland

Wendy P. Heath

Professor, Department of Psychology
B.A. Boston University; M.S. The University of Texas at Arlington; Ph.D. The University of Texas at Arlington

Mickey Hess

Professor, Department of English
Ph.D. University of Louisville

Sheena C. Howard

Associate Professor, Department of Communication and Journalism
B.B.A. Iona College; M.A. New York Institute of Technology; Ph.D. Howard University

Brooke B. Hunter

Associate Professor, Department of History and Philosophy
B.A. University of California, Irvine; M.A. University of Delaware; Ph.D. University of Delaware

Jacqueline Soteropoulos Incollingo

Associate Professor, Department of Communication and Journalism
B.A. Connecticut College; M.A. Philip Merrill College of Journalism, University of Maryland; Ph.D. Philip Merrill College of Journalism, University of Maryland

Robert Isenhower

Assistant Professor, Department of Psychology
B.S. Clemson University; Ph.D. University of Connecticut

Danielle L. Jacobs

Associate Professor, Department of Chemistry and Biochemistry
B.S. Haverford College; Ph.D. The University of North Carolina at Chapel Hill

Barry T. Janes

Professor, Department of Film and Television
B.A. Rutgers, The State University of New Jersey; M.A. Rutgers, The State University of New Jersey; Ph.D. New York University

Paul R. Jivoff

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Hartwick College; M.S. The Ohio State University; Ph.D. University of Maryland

Howard H. Joffe

Priority Adjunct Associate Professor, Department of Communication and Journalism
B.A. Rutgers, The State University of New Jersey; J.D. Benjamin N. Cardozo School of Law, Yeshiva University

Terra Walston Joseph

Associate Professor, Department of English
B.A. Indiana University; M.A. University of Illinois; Ph.D. University of Illinois

Jonathan Karp

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Colgate University; Ph.D. Vanderbilt University

Mamadou Keita

Lecturer, Department of Computer Science and Physics
B.A. Ecole Normale Supérieure Bamako; M.S. Ohio University; Ph.D. University of Miami; M.S. University of Miami

B.A. New York University; M.A. Columbia University; Ph.D. Columbia University

Francis A. Perrin

Priority Adjunct Assistant Professor, Department of Psychology
B.S. Stockton University; M.S. Temple University; Ph.D. Temple University

Pearlie Peters

Professor, Department of English
B.S. Grambling State University; Ph.D. State University of New York at Buffalo

Mary Poteau-Tralie

Professor, Department of Languages, Literatures and Cultures
B.A. Temple University; M.A. Princeton University; Ph.D. Princeton University

Susan Power

Priority Adjunct Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Trinity College; Ph.D. University College Dublin

Magnolia Pérez-Garrido

Priority Adjunct Assistant Professor, Department of Languages, Literatures and Cultures
B.A. The College of New Jersey; M.A. Villanova University

William Quirk

Priority Adjunct Instructor, Department of English
B.A. University of Colorado; M.A. University of Washington

Elizabeth Radziszewski

Assistant Professor, Department of Political Science
B.A. Rutgers, The State University of New Jersey; M.A. University of Illinois at Urbana-Champaign; Ph.D. University of Illinois at Urbana-Champaign

Mohamed Rahouti

Assistant Professor, Department of Computer Science and Physics

Robert Reilly

Professor-Librarian, Department of English
B.A. St. Mary's Seminary and University; M.A. University of Washington; Ph.D. University of Washington

James E. Riggs

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Delaware Valley College; M.S. University of Massachusetts Amherst; Ph.D. University of Massachusetts Amherst

Jane E. Rosenbaum

Priority Adjunct Assistant Professor, Department of English
B.A. The City College of New York; M.A. University of Pittsburgh; Ph.D. University of Pittsburgh

Kelly Ross

Assistant Professor, Department of English
B.A. The College of William & Mary; M.A. The University of North Carolina at Chapel Hill; Ph.D. The University of North Carolina at Chapel Hill

Erica Rubine

Priority Adjunct Professor, Department of English
B.A. Scripps College; M.A. University of Pennsylvania; Ph.D. University of Pennsylvania

Frank L. Rusciano

Professor, Department of Political Science
B.A. Cornell University; M.A. University of Chicago; Ph.D. University of Chicago

Erica J. Ryan

Associate Professor, Department of History and Philosophy
B.A. Sarah Lawrence College; A.M. Brown University; Ph.D. Brown University

Elizabeth S. Scheiber

Professor, Department of Languages, Literatures and Cultures
B.A. Western Kentucky University; M.A. Indiana University; Ph.D. Indiana University

George Otto Schneller

Priority Adjunct Associate Professor, Department of Mathematics
B.S. Mount Union University; M.A. Lehigh University; Ph.D. Lehigh University

Reed A. Schwimmer

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.S. Rider University; M.A. Bryn Mawr College; Ph.D. University of Delaware

Elaine A. Scorpio

Associate Professor, Department of Psychology
B.A. Rhode Island College; M.A. Rhode Island College; Ph.D. Syracuse University

Kerrie Sendall

Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. California State University; M.S. California State University; Ph.D. University of Minnesota and Macquarie University

Raymond Setters, II

Priority Adjunct Assistant Professor, Department of English
B.A. Rider University; M.F.A. Rosemont College

Nikki Shepardson

Associate Professor, Department of History and Philosophy
B.A. University of Rochester; M.A. Rutgers, The State University of New Jersey; Ph.D. Rutgers, The State University of New Jersey

Gabriela W. Smalley

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.S. University of Maryland; Ph.D. University of Maryland

Bryan D. Spiegelberg

Associate Professor, Department of Chemistry and Biochemistry
B.S. Denison University; Ph.D. Duke University

Drue Stapleton

Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
A.A. Hudson Valley Community College; B.S. State University of New York at Cortland; M.Ed. Salisbury University; Ph.D. West Virginia University

Jay Stern

Assistant Professor, Department of Film and Television
B.A. Columbia University; M.A. European Graduate School

Joshua Stratton

Assistant Professor, Department of Chemistry and Biochemistry
B.A. Wartburg College; Ph.D. Colorado State University

Susan Strom

Priority Adjunct Instructor, Department of English
B.A. University of Toronto; M.A. University of Cincinnati; M.Ed. Temple University

Helen T. Sullivan

Priority Adjunct Assistant Professor, Department of Psychology
B.F.A. Saint Mary's College; M.S. Saint Louis University; Ph.D. Saint Louis University

Jack Sullivan

Professor, Department of English
B.A. Furman University; M.A. Columbia University; M.Phil. Columbia University; Ph.D. Columbia University

Hongbing Sun

Professor, Department of Geological, Environmental, and Marine Sciences
B.A. Nanjing University, China; M.S. Chinese Academy of Geological Sciences, Beijing; Ph.D. Florida State University

Alison D. Thomas-Cottingham

Associate Professor, Department of Psychology
B.S. University of Maryland; M.A. Binghamton University, State University of New York; Ph.D. Binghamton University, State University of New York

Victor R. Thompson

Associate Professor, Department of Sociology and Criminology
B.A. University of Illinois at Urbana-Champaign; M.A. Stanford University; Ph.D. Stanford University

Megan L. Titus

Associate Professor, Department of English
B.A. Muhlenberg College; M.A. Montclair State University; Ph.D. Ohio University

Sarah Trocchio

Assistant Professor, Department of Sociology and Criminology
B.A. Clark University; M.S.W. Boston University School of Social Work; M.A. Rutgers University; Ph.D. Rutgers University of Criminal Justice

Barry E. Truchil

Associate Professor, Department of Sociology and Criminology
B.A. American University; M.A. American University; Ph.D. Binghamton University, State University of New York

Cynthia Vieth

Lecturer, Department of Communication and Journalism
B.A. Rutgers, The State University of New Jersey; M.C.I.S. Rutgers, The State University of New Jersey; Ed.D. Rowan University

Maria F. Villalobos-Buehner

Professor, Department of Languages, Literatures and Cultures
B.A. Universidad del Valle, Cali-Colombia; M.A. University of Portsmouth, Portsmouth-England; Ph.D. Michigan State University

Shunzhu Wang

Professor, Department of Languages, Literatures and Cultures
B.A. Soochow University, Suzhou, China; M.A. Wayne State College; Ph.D. Purdue University

Nancy C. Weber

Priority Adjunct Instructor, Department of Chemistry and Biochemistry
B.S. Alderson Broaddus University; M.S. The Pennsylvania State University

E. Todd Weber

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Slippery Rock University; M.S. The University of Illinois at Urbana-Champaign; Ph.D. The University of Illinois at Urbana-Champaign

Allison D. Weidhaas

Associate Professor, Department of Communication and Journalism
B.A. Rowan University; M.A. Rowan University; M.S. University of South Florida; Ph.D. University of South Florida

Nancy A. Wienczek

Associate Professor, Department of Communication and Journalism
B.A. Douglass College, Rutgers, The State University of New Jersey; M.S. University of Louisiana at Lafayette; Ph.D. Rutgers, The State University of New Jersey

James Wojtowicz

Lecturer, Department of Sociology and Criminology
B.A. Rutgers University; M.S. Rutgers University

Yun Xia

Professor, Department of Communication and Journalism
B.A. Sichuan University, China; M.A. Sichuan University, China; Ph.D. Southern Illinois University

Richard A. Zdan

Lecturer, Department of Sociology and Criminology
B.Sc. Carnegie Mellon University; M.A. The University of Chicago

Ava Baron

Professor Emerita, Department of Sociology and Criminology
B.A. Brooklyn College, C.U.N.Y.; M.A. New York University; Ph.D. New York University

Gary Barricklow

Professor Emeritus, Department of English
B.A. California State University, Sacramento; M.A. California State University, Sacramento; Ph.D. University of New Mexico

Pamela Brown

Professor Emerita, Department of Communication and Journalism
B.A. Rider University; M.A. The Ohio State University; Ph.D. The University of Iowa

Richard Burgh

Professor Emeritus, Department of History and Philosophy
B.A. Rider University; M.A. University of Wisconsin; Ph.D. University of Wisconsin

Richard Butsch

Professor Emeritus, Department of Sociology and Criminology
B.S. University of Cincinnati; M.S. University of Cincinnati; Ph.D. Rutgers University

Thomas Callahan

Professor Emeritus, Department of History and Philosophy
B.A. State University of New York at Albany; M.A. University of Connecticut; Ph.D. University of Connecticut

James Carlson

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Fenn College; M.S. Ohio State University; Ph.D. Ohio State University

James M. Dickinson

Professor Emeritus, Department of Sociology and Criminology
B.A. University of Kent, Canterbury, UK; M.A. American University; Ph.D. University of Toronto

Mervin Dissinger

Professor Emeritus, Department of Psychology
B.S. Millersville State College; M.A. Temple University; Ph.D. Temple University

Benjamin Eichhorn

Professor Emeritus, Department of Psychology
B.S. Hebrew University; Ph.D. University of California at Berkeley

Michael Epstein

Professor Emeritus, Department of Psychology
B.S. University of Washington; B.A. University of Washington; Ph.D. University of Washington

Kenneth Fields

Professor Emeritus, Department of Mathematics
S.B. Massachusetts Institute of Technology; Ph.D. University of California at Berkeley

Phyllis Frakt

Professor Emerita, Department of Political Science
B.A. Douglass College; M.A. Rutgers University; Ph.D. Rutgers University

Marvin Goldstein

Professor Emeritus, Department of Psychology
B.A. Hofstra University; M.A. Hofstra University; Ph.D. New School for Social Research

Robert Good

Professor Emeritus, Department of History and Philosophy
A.B. Princeton University; M.A. University of Wisconsin–Madison; Ph.D. University of Wisconsin–Madison

Joseph Gowaskie

Professor Emeritus, Department of History and Philosophy
B.A. St. Norbert College; M.A. Catholic University of America; Ph.D. Catholic University of America

James Guimond

Professor Emeritus, Department of English
B.A. Kalamazoo College; M.A. Ohio Wesleyan University; Ph.D. University of Illinois

Myra G. Gutin

Professor Emerita, Department of Communication and Journalism
B.A. Emerson College; M.A. Emerson College; Ph.D. University of Michigan

Mary Jo Hall

Professor Emeritus, Department of Geological, Environmental, and Marine Sciences
B.S. Pennsylvania State University; M.Ed. West Chester State College; Ph.D. Lehigh University

John Hillje

Professor Emeritus, Department of History and Philosophy
B.J. University of Texas; M.A. University of Texas; Ph.D. University of Texas

Katharine Hoff

Professor Emerita, Department of English
A.B. Oberlin College; M.A. Yale University; Ph.D. Yale University

John Hulsman

Professor Emeritus, Department of English
B.A. St. Vincent College; Ph.D. Ohio University

Jonathan M. Husch

Professor Emeritus, Department of Geological, Environmental, and Marine Sciences
B.A. Colgate University; M.A. Princeton University; Ph.D. Princeton University

Judith Johnston

Professor Emerita, Department of English
B.A. Rice University; Ph.D. Stanford University

Harvey R. Kornberg

Professor Emeritus, Department of Political Science
B.B.A. The City College of New York; M.A. Brown University; Ph.D. Brown University

Mary Leck

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences

Linda Materna

Professor Emerita, Department of Languages, Literatures and Cultures
B.A. Beloit College; M.A. University of Wisconsin-Madison; Ph.D. University of Wisconsin-Madison

Thomas Mayer

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. University of Tennessee; M.A. Johns Hopkins University; Ph.D. Louisiana State University

Katherine K. Maynard

Professor Emerita, Department of English
B.S. The College at Brockport: State University of New York; Ph.D. University of Rochester

William McCarroll

Professor Emeritus, Department of Chemistry and Biochemistry
B.A. University of Connecticut; M.S. University of Connecticut; Ph.D. University of Connecticut

Roderick A. McDonald

Professor Emeritus, Department of History and Philosophy
M.A. University of Aberdeen; M.A. The University of Kansas; Ph.D. The University of Kansas

E. Graham McKinley

Professor Emeritus, Department of Communication and Journalism
B.A. Yale University; M.M. Westminster Choir College, Rider University; Ph.D. Rutgers, The State University of New Jersey

Alan McLeod

Professor Emeritus, Department of English
B.A. University of Sydney; M.A. University of Sydney; Dip.Ed. University of Sydney; B.Ed. University of Melbourne; Ph.D. Pennsylvania State University

Mary Morse

Professor Emerita, Department of English
B.A. St. Olaf College; M.A. University of Minnesota; Ph.D. Marquette University

Chau Phan

Professor Emeritus, Department of Political Science
B.A. Marian College; M.A. University of Detroit; Ph.D. University of Denver

George Ritchie

Professor Emeritus, Department of Computer Science and Physics
B.S. Hampden-Sydney College; Ph.D. University of Pennsylvania

Anne T. Salvatore

Professor Emerita, Department of English
A.B. Chestnut Hill College; M.A. The College of New Jersey; Ph.D. Temple University

Margaret R. Schleissner

Professor Emerita, Department of Languages, Literatures and Cultures
B.A. Kirkland College; M.A. Princeton University; Ph.D. Princeton University

Charles F. Schwartz

Professor Emeritus, Department of Mathematics
A.B. University of Pennsylvania; Ph.D. Rutgers, the State University of New Jersey

Harriett Schwartz

Professor Emerita, Department of Communication and Journalism
B.A. University of Maryland; M.S. Purdue University; ; ; ;

Barry Seldes

Professor Emeritus, Department of Political Science
B.A. City College of New York; M.A. City College of New York; Ph.D. Rutgers University

Prakash Sharma

Professor Emeritus, Department of Sociology and Criminology
B.S. Agra University; M.S. Agra University; M.S. University of Guelph; Ph.D. University of Georgia

John Sheats

Professor Emeritus, Department of Chemistry and Biochemistry
B.S. Duke University; Ph.D. Massachusetts Institute of Technology

Thomas Simonet

Professor Emeritus, Department of Communication and Journalism
B.A. Georgetown University; M.S. Columbia University; Ph.D. Temple University

Ruth Simpkins

Professor Emerita, Department of Psychology
A.B. Roberts Wesleyan College; A.M. Temple University; Ph.D. Temple University

Marcia Steinberg

Professor Emerita, Department of Sociology and Criminology
B.A. Hunter College; M.A. Columbia University; Ph.D. City University of New York

John R. Suler

Professor Emeritus, Department of Psychology
B.A. State University of New York at Stony Brook; Ph.D. State University of New York at Buffalo

Frederick Turner

Professor Emeritus, Department of Communication and Journalism
B.S. Millersville State College; M.A. Temple University; Ph.D. Temple
University

Lise Vogel

Professor Emerita, Department of Sociology and Criminology
A.B. Radcliffe College; A.M. Harvard University; M.A. Brandeis University;
Ph.D. Brandeis University

Minmin Wang

Professor Emerita, Department of Communication and Journalism
B.A. Xian Foreign Languages University; M.A. Bowling Green State
University; Ph.D. Bowling Green State University

COURSES AND DESCRIPTIONS

Accounting (ACC)

ACC 210 Introduction to Accounting 3 Credits

This course provides an introduction to basic principles and methods of accounting essential to preparation, understanding and interpretation of financial statements. Topics include accounting for merchandising concerns, current assets, long-term assets, liabilities and equity accounts. A brief overview of internal control is also covered.

ACC 220 Managerial Uses of Accounting 3 Credits

This course provides an introduction to the use of accounting information in managerial decision-making. Topics include cost behavior, cost classifications, and problem-solving functions of accounting as they pertain to planning, control, evaluation of performance, special decisions, and budgeting. The interpretation of published financial statements and the statement of cash flow are also covered.

Prerequisite(s): ACC 210.

ACC 302 Cost Management 3 Credits

This course focuses on firm strategy and the role managerial accounting information plays in the decision making process. Topics include the balanced scorecard, the value chain, product life cycles, target costing, theory of constraints, strategic pricing, management and control of quality cost systems, traditional and activity-based costing, cost control, standard costs and variances, and capital budgeting.

Prerequisite(s): ACC 220 and CIS 185.

ACC 302P Cost Management 3 Credits

This course focuses on firm strategy and the role managerial accounting information plays in the decision making process. Topics include the balanced scorecard, the value chain, product life cycles, target costing, theory of constraints, strategic pricing, management and control of quality cost systems, traditional and activity-based costing, cost control, standard costs and variances, and capital budgeting.

Prerequisite(s): PMBA 8020 or PMBA 8020 waiver. This course is restricted to students in the MAcc program.

ACC 310 Acct Theory & Concepts I 3 Credits

This is the first upper-level course in a sequence in financial accounting courses. Topics include the conceptual framework, and standard setting process followed by application and evaluation of generally accepted accounting principles including content, and structure of financial statements, present value concepts, current assets, current liabilities, property, plant, and equipment, intangible assets and non-current liabilities are studied. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): ACC 210 and ACC 220.

ACC 310P Acct Theory & Concepts I 3 Credits

This is the first upper-level course in a sequence in financial accounting courses. Topics include the conceptual framework, and standard setting process followed by application and evaluation of generally accepted accounting principles including content, and structure of financial statements, present value concepts, current assets, current liabilities, property, plant, and equipment, intangible assets and non-current liabilities are studied. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): PMBA 8020. This course is restricted to students in the MAcc program.

ACC 311 Acct Theory & Concepts II 3 Credits

This course is a continuation of ACC 310. Topics include long-term investments, stockholders' equity, earnings per share, interperiod income tax allocation, accounting changes, revenue recognition, pensions, leases and cash flow analysis. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): ACC 310.

ACC 311P Acct Theory & Concepts II 3 Credits

This course is a continuation of ACC 310. Topics include long-term investments, stockholders' equity, earnings per share, interperiod income tax allocation, accounting changes, revenue recognition, pensions, leases and cash flow analysis. An overview of comparable international financial reporting standards (IFRS) is also included.

Prerequisite(s): ACC 310 or ACC 310-P. Restricted to students in the MAcc program.

ACC 320 Accounting Info Systems 3 Credits

This course provides an introduction to accounting information systems and enterprise-wide, process-focused information systems. Topics include quality of data for decision usefulness, internal control concepts and documentation tools, and database theory and applications.

Prerequisite(s): ACC 220 and CIS 185.

ACC 321 Internal Auditing 3 Credits

This course provides an introduction to the internal audit profession, including understanding the nature and activities associated with the internal audit process. Topics include: international auditing standards, risk assessment including internal control system evaluation, business processes, and the relationship of management and employee fraud to the internal audit process.

Prerequisite(s): ACC 220.

ACC 325 Fraud Examination and Business Forensics 3 Credits

This course provides an introduction to the prevalence of fraud in all forms of business, including the many methods used by employees and managers to perpetrate fraud. Topics include: the motivation of individuals to commit fraud, various types of fraud schemes perpetrated in the workplace, as well as the various tools and techniques that are used to investigate, detect and prevent fraud.

Prerequisite(s): ACC 210.

ACC 335 Small Business Taxation 3 Credits

This course provides an understanding of the key tax issues faced by small businesses and their business implications. It also familiarizes prospective business owners with various tax filing requirements so that they can use the expertise of tax professionals more effectively.

Prerequisite(s): ACC 210.

ACC 399 The Co-Operative Experience 6 Credits

This course provides the student with a semester long supervised employment with participating companies. Students are evaluated periodically by senior staff members of the participating firms and required to complete a work journal, self-assessment and reflection paper. Eligible students include junior and senior accounting majors with a minimum GPA of 3.0 in accounting coursework. Co-op credits can be applied toward business or free elective requirements. Grading is on a pass/fail basis.

Prerequisite(s): ACC 210, ACC 220, and ACC 310 and permission of department chairperson.

ACC 400 Principles of Auditing 3 Credits

This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.

Prerequisite(s): ACC 302 and ACC 310.

ACC 400P Principles of Auditing 3 Credits

This course provides an introduction to financial statement audits performed by certified public accountants. Topics include corporate governance, the audit environment, professional standards, audit methodology, and audit report preparation. The course also provides an overview of other types of assurance and non-assurance services provided by CPA firms.

Prerequisite(s): ACC 302 or ACC 302P and ACC 310 or ACC 310P. Restricted to students in the MAcc.

ACC 405 Acct Problems & Practice 3 Credits

This course provides additional coverage of financial reporting issues and procedures. Topics include business combinations, consolidated financial statements, foreign currency translation, the effects of diversity across countries, disclosure and SEC reporting issues. Governmental and not-for-profit accounting standards are also covered.

Prerequisite(s): ACC 302 and ACC 311.

ACC 405P Accounting Problems & Practice - PM 3 Credits

This course provides additional coverage of financial reporting issues and procedures. Topics include business combinations, consolidated financial statements, foreign currency translation, the effects of diversity across countries, disclosure and SEC reporting issues. Governmental and not-for-profit accounting standards are also covered.

Prerequisite(s): ACC 302 or ACC 302P and ACC 311 or ACC 311P. Restricted to students in the MAcc program.

ACC 406 Integrative Professional Capstone 3 Credits

This course provides an integrative experience that applies financial statement and data analysis tools to a variety of accounting settings. Topics include issues of ethics and professionalism and linkages between accounting methods and company policy, equity valuation, bond ratings and other decision areas.

Prerequisite(s): ACC 405 or permission of department chairperson.

ACC 410 Fund of Federal Taxation 3 Credits

This course provides fundamental federal tax concepts applicable to individuals, partnerships, corporations, estates, and gifts. Topics are considered from a tax compliance and planning perspective. Preparation of individual and corporate tax returns is also included.

Prerequisite(s): ACC 311 with a minimum grade of D or ACC 311P with a minimum grade of D or VL02 with a score of WV.

ACC 410P Fund of Federal Taxation - PM 3 Credits

This course provides fundamental federal tax concepts applicable to individuals, partnerships, corporations, estates, and gifts. Topics are considered from a tax compliance and planning perspective. Preparation of individual and corporate tax returns is also included.

Prerequisite(s): ACC 311 or ACC 311P. Restricted to students in the MAcc program.

ACC 450 Business Forensic Application 3 Credits

This course provides an opportunity to perform complex investigative cases and analyses, thus demonstrating mastery of the knowledge and skills required to be effective forensic professionals. The course covers how to manage and present digital and technical evidence gathered for forensic litigation cases, including the ability to be an expert witness in court.

Prerequisite(s): ACC 325 and ACC 321.

ACC 490 Independent Research and Study 3-4 Credits

Topic to be approved by professor and department chairperson. Available to juniors and seniors.

ACC 491 Accounting Internship 3 Credits

This course provides the student with approximately two months of supervised employment with participating companies. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a term paper. Eligible students include junior and senior accounting majors with a minimum GPA of 3.0 in accounting coursework. Upon completion of course, a letter grade will be awarded.

Prerequisite(s): Permission of department chairperson.

Advertising (ADV)

ADV 315 Media Planning and Strategy 3 Credits

This course focuses on the essential principles, measurements, procedures and problems encountered in determining appropriate media in which to place specific kinds of advertising messages designed to reach closely defined target audiences. The advantages and disadvantages of all media will be discussed from an advertising perspective. Specific audience and cost calculations and analyses will be used to develop comprehensive media plans.

Prerequisite(s): either ADV 200 or MKT 205. Required for advertising majors.

ADV 490 Independent Research and Study 1-4 Credits

Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

ADV 491 Internship-Based Indep Study 3 Credits

Provides the student an opportunity to supplement and apply classroom work in supervised employment with participating marketing and advertising firms. Requirements include a journal with a log of daily activities, and a project or term paper presented to and evaluated by the internship sponsor. Evaluation will also include a report by the company on the intern's performance. Credits may be used to satisfy business or free elective requirements.

Prerequisite(s): Permission of instructor.

American Studies (AMS)

AMS 200 Introduction to American Studies 3 Credits

An introduction to various historical definitions of the American experience and national identity and the methods of research used by American Studies scholars. Students will explore multiple routes into American Studies (sociocultural, literary, anthropological, and historical) and practice methods that may include historical/archival research, public policy analysis, ethnography, literary analysis, cultural studies/media analysis, and other interdisciplinary approaches.

AMS 210 American Memoir and Autobiography 3 Credits

Studies American memoir and autobiography through analysis of literary and cultural tropes such as the self-made American, the immigrant who achieves the American Dream, bootstraps and rags-to-riches stories, etc. Texts represent the experiences of Americans of different genders, classes, races, ethnicities, and religions.

AMS 211 Sports in American Life 3 Credits

Literary, sociological, and psychological views of sports in 20th-century American life are examined, focusing on sports as a symbol and reflection of our ideals and tensions.

AMS 212 Multicultural America 3 Credits

Focusing primarily on the new century, this course explores the experiences of the remarkably diverse range of ethnic groups who have come to the U.S. in recent years, including Hispanics, Europeans, Asians and Africans. How these groups have impacted the communities where they have settled, how they have interacted with other ethnic groups, and how they have assimilated (or not) and prospered (or not) are among the issues examined and discussed.

AMS 213 American Myth in Literature, Landscape, and Music 3 Credits

A study of the New World and related myths from an interdisciplinary perspective. Students will read essays, fiction, and poetry by Poe, Melville, Emerson, Whitman, James, and others. Paintings and musical works embodying New World concepts will be examined in connection with the above authors.

AMS 214 Special Topics in American Studies 3 Credits

Studies in specialized areas of American culture, including travel courses to New Orleans and Spoleto USA. Topics change each semester and are listed in the course roster.

AMS 215 Alfred Hitchcock in America 3 Credits

Explores the influence of American culture on the films of Alfred Hitchcock following his immigration to the United States. Students will study one of the cinema's greatest auteurs through the lens of American culture and its impact on Hitchcock's European sensibility. Also explores the reverse dynamic: how Hitchcock transformed American cinema.

AMS 225 American Folklore 3 Credits

An introduction to folk language, custom, and material culture in the United States. Proverbs; myths, legends, and tales; superstitions; music; arts and crafts are treated from both aesthetic and social perspectives. Students will collect and examine folklore within their own cultural contexts.

AMS 226 The New South in Literature, Music and Film 3 Credits

An exploration of Southern culture since World War II and how it has influenced American society as a whole. In literature, music, and film, the Sun Belt has been a significant, innovative region. From the spread of New Orleans jazz through the plays of Tennessee Williams to the fiction of Flannery O'Connor, Southern art has helped shape the larger American culture; this course examines that influence from an interdisciplinary perspective.

AMS 227 Martin Luther King Jr's America 3 Credits

This course studies Martin Luther King Jr's writings, speeches, and sermons, the context of the America he saw in his lifetime, and the implications of his message for today's America and its place in the world. King envisioned a wholly democratic America free of racism, poverty, and military aggression. Students will critically assess the political economic, and religious thought at the root of his call for change.

AMS 228 Studies in American Jewish Culture 3 Credits

Focuses on important fiction, criticism, social/philosophical commentary, history, and films by 20th-century Jewish American intellectuals, including Michael Gold, Anzia Yezierska, Saul Bellow, Bernard Malamud, Philip Roth, Cynthia Ozick, Grace Paley, Rebecca Goldstein, Art Spiegelman, Arthur Hertzberg, Leslie Fiedler, Chaim Potok, Woody Allen, and David Mamet.

AMS 229 American Popular Culture 3 Credits

An exploration of American popular culture and its profound impact on both the United States and the rest of the world. Pop-culture theorists regard American culture as a dominant force; this course examines the development of this trend from historical, political, and artistic perspectives.

AMS 250 America and the Future 3 Credits

Examines the projections of the American future in terms of the past and present. Emphasizes American studies methodologies, drawing upon philosophical, literary, environmental, and other varieties of futuristic speculations.

AMS 304 Technology and Science in America 3 Credits

An overview of the development and impact of technology and science on American institutions. Topics include innovation, economic growth, science and its relation to technology, social theory, and the politics of science.

AMS 305 Religion in America 3 Credits

Introduces the changing patterns of American development from the sectarianism of colonial America to the pluralism and growing secularism of the 20th-century American religious scene.

AMS 306 Poetry and Poetics in American Culture 3 Credits

Examines American poetry and poetics in relation to American culture and history of the 18th through the 21st centuries. Students read poems and statements about poetry, view artworks, hear recordings, and examine hypertext versions of poems.

AMS 307 Depictions of Racism in American Literature, Music, and Film 3 Credits

Depictions of Racism in American Literature, Music, and Film will study representations of racism in the American arts in historical context. Students will examine artistic representations of practices that disadvantage and disfranchise non-white Americans, with an eye toward understanding the ways America's history of racist practices has prompted responses from American writers, musicians, and filmmakers.

AMS 308 Kurt Vonnegut's America 3 Credits

Kurt Vonnegut's America will introduce students to Kurt Vonnegut's novels, short stories, essays, and plays, as well as critical approaches to his work. Students will examine Vonnegut's career and life as they speak to larger themes in American Studies and examine several aspects of this author's unique view of America, which challenged the easy embracing of complicated values like freedom and equality as symbols that America has seen disconnected from their meanings and origins.

Prerequisites: CMP 125 or CMP 203 or BHP 150.

AMS 309 Hip Hop and American Culture 3 Credits

Examines and critiques hip hop as a part of American culture. Students will engage with scholarship from several fields in studying the social conditions that fostered the creation of hip hop music, and discuss how these conditions have and/or have not changed in America since the 1970s, when hip hop was born. Students will delve into such issues as how women relate to hip hop, hip hop poetics and rhyme structures, race relations in hip hop, censorship, and the ethics and legalities of digital sampling.

AMS 310 American Identity in the Arts 3 Credits

Studies the place of the arts and the position of the creative artist in contemporary American society, with particular emphasis on the problems of the artist's search for an American identity in the complex cultural milieu.

AMS 311 Radicalism in 20th-Century America 3 Credits

Discusses a number of radical intellectual, literary, and political movements, organizations, and parties from the points of view of their members and leaders, and their historical genesis and development within the context of 20th-century American political life.

AMS 312 American Photography 3 Credits

An intensive analysis of the documentary, aesthetic, and expressive significance of photography in American culture from 1850 to the present. Particular emphasis on the interrelationships between photography and developments in American history, painting, literature, and the social sciences. This course does not deal with the technical aspects of still photography.

AMS 313 Black American Thought 3 Credits

This course introduces students to the critical and constructive nature of Black social and political thought through a survey of Black American leaders, with a focus on ideology, society and politics. Through readings and discussions, students will assess the complexities of various Black leaders and their ideological positions, often comparing and contrasting the attitudes, values and beliefs of Black thought leaders. Through the study of Black American leaders, students will gain an appreciation for the impact of Black history on the past and present of American public life. As we focus our attention on Black leaders of the 19th and 20th century, we will be mindful of the complex ways in which these leaders have agreed and disagreed on themes such as, but not limited to: achievement of Black liberation, direct action versus armed protests, the role of historical memory in modern political life, the economic and political significance of Black culture, and the tensions between Black segregation versus integration, as well as the defining of such core political concepts as citizenship, freedom, equality, progress, power, and justice.

AMS 338 Social Impact of Rock and Roll 3 Credits

Explores rock and roll music as a communication medium of American popular culture. The focus is on both how rock and roll music has influenced, and is influenced by, society. It addresses the origins, development and impact of rock music in relation to some of the critical cultural dynamics that provided not only its context, but also much of its content.

AMS 350 American Gothic 3 Credits

An introduction to American Gothic literature as a genre, including its historical development, governing conventions, politics, and aesthetics, as well as its emotional and cultural impact.

AMS 400 Seminar in American Studies I 3 Credits

A study of arts and letters in America from the Puritan period through the Civil War. Should be taken junior year if possible.

Prerequisite(s): AMS 200.

AMS 401 Seminar in American Studies II 3 Credits

A study of arts and letters in America from Reconstruction to the present. Should be taken junior year if possible.

Prerequisite(s): AMS 200.

AMS 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

AMS 491 Internship in American Studies 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of various manifestations of American society in workplace settings. Placements can be made in business, government, and non-profit organizations and local grassroots movements that draw on the knowledge acquired in the American studies curriculum.

Arts and Entertainment Industries Management (AAD)

AAD 100 Arts Administration Laboratory 0 Credits

Arts Administration majors explore, expand and employ practical application skillsets relative to required Practicum work and sequentially in preparation for required Internship(s) and eventual employment over three sequential semesters: Sophomore Fall, Sophomore Spring and Junior Fall. Lab coincides with and supports work being done in satisfaction of three, 1-credit practicum credits that must be registered simultaneously.

AAD 121 Intro to Arts Administration 3 Credits

A survey course that covers topics relevant to administering the arts, and includes reviewing state and federal legislation to non-profit organizations, non-profit agency structure, long range planning, board development, marketing, fundraising, public relations, advocacy, budget, human resources and ongoing compliance issues. Students will have opportunities to interact with professionals in the field and explore career options.

AAD 202 Commun/Marketing in Arts 3 Credits

Intended for arts or business majors interested in arts management, this course immerses students in the fundamentals of promoting the arts, from grassroots public relations to basic marketing concepts and applications. Students will have opportunities to interact with professionals in the field and explore career options.

Prerequisite(s): AAD 121 and CMP 125, or permission of instructor.

AAD 203 Arts Fundraising 3 Credits

Provides students with an understanding of the ethics, strategies and practices of fundraising for non-profit arts agencies. Students gain an understanding of the role of the development office in a non-profit arts agency, prepare for careers in arts management by increasing the skills necessary to function, and learn to plan a multi-faceted fundraising campaign effectively.

Prerequisite(s): CMP 120 or CMP 125.

AAD 204 Arts Outreach & Education 3 Credits

This course examines essential educational components of arts institutions, how they evolve and are produced, and will assess the importance of educational programming to arts organizations and the communities they serve.

Prerequisite(s): AAD 121.

AAD 225 Arts Administration Practicum 1 Credits

Under faculty advisement and project site supervision, students complete a total of three, 1-credit (33-hour) "mini-internships" or practicum projects in service to the field, sequentially in the Sophomore Fall, Sophomore Spring, and Junior Fall semesters, simultaneous to Arts Administration Lab. The first practicum project is in connection with Box Office and Patron Service to Rider Performing Arts. The second is in connection with a project of the student's choosing in service to the arts on campus or beyond. The third is in connection with a project of the student's choosing in service to the field in an outside, professional setting.

Prerequisite(s): AAD 121.

AAD 295 Art & Business of Entertainment 3 Credits

Students explore traditional and emerging models in entertainment and the impacts which social media, online service and other emerging platforms continue to have on the evolution of the industry. Students will identify and define pivotal functions and functionaries across all sectors who apply innovation, effective leadership and essential skills to produce and distribute various forms of entertainment to the masses. Through the application of a "wheel of fortune" research & analysis approach to each commercial entertainment sector, students will come to understand the multiple aspects of each (film, television, media, commercial theatre and entertainment in sports), the people who drive them and the critical functions which they serve.

Prerequisite(s): AAD 121, AAD 202 and AAD 203.

AAD 306 Music Business 3 Credits

Survey of the recording industry. Responsibilities of the label and producer, copyrights, royalties, residuals, publishing, contracts and artist development, promotion, distribution, product management, domestic and international licensing, and related technology.

Prerequisite(s): AAD 121, CBA 110.

AAD 307 Touring and Production Management 3 Credits

Organizing, marketing and managing tours. Responsibilities of the booking agent, tour manager, and performers. Case studies, relationships, contracts with venues, transportation companies, housing, and unions, budgeting, press kits, and insurance.

Prerequisite(s): AAD 121, CBA 110.

AAD 308 Legal Aspects of Arts & Entertainment 3 Credits

A survey of legal issues in the arts and entertainment industries, examining the relationship between arts and the law – from cultural property rights to intellectual property, copyright and beyond.

Prerequisite(s): AAD 121.

AAD 309 Arts Events & Festivals Mgt 3 Credits

Students learn to develop, produce, and staff successful arts events while refining planning skills through practice with theoretical and real arts event venues and participating in the production and management of actual events.

Prerequisite(s): AAD 121.

AAD 310 Acquiring & Managing Talent in Arts & Entertainment Industries 3 Credits

This course teaches foundations of professional talent management and explores the many ways by which the role of today's artist manager has evolved and expanded, particularly in an era of "independent" artists seeking managers who can act as CEO's. The course explores the many facets which an artist manager oversees, from launching an artist's career to building a successful and enduring business and fan base. Topics of exploration include talent acquisition, the artist/manager partnership, contracts, strategic planning, branding and more relating to managing all key aspects of an artist's career. Students will gain deep understanding of the dynamic roles which managers and agents play in the entertainment business as the "backbone of our industry" and of the pathways to career success as artist managers & representatives. Aspiring artists will find guidance in self-management and choosing the right partners. Other aspiring entertainment professionals will learn how to effectively engage with artist managers & agents as essential components in the broader ecology of professional arts & entertainment.

Prerequisite: Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 312 Deal-Making in Arts & Entertainment 3 Credits

This course explores all practical aspects of deal-making in commercial entertainment and the art of negotiation as the catalyst for success. Through forensic analysis & discussion of multiple types and structures of short and long-form agreements and the wide variety of provisions to be found therein, students will gain knowledge of key legal, historical, discipline-specific and industry-wide contexts of deal-making. Readings and lectures will focus on the nuts and bolts of negotiation – from essential research processes to finding and exercising bargaining power to knowing when to compromise and when to withdraw. Skills gained will be exercised through role-play, writing and ongoing analysis of peer and professional contracts. Students will gain and exercise deep understanding of agreements across multiple disciplines and the common elements therein including agency, personal management, personal appearance, merchandising, endorsements, creative ownership and union influence will be explored, as well as the unique characteristics which apply to distinct disciplines. For Arts & Entertainment Industries Management majors or minors only except by permission of Dean.

Prerequisite(s): AAD 121, AAD 202.

AAD 314 Commerce and Merchandising in Arts & Entertainment 3 Credits

This course builds upon foundational knowledge gained in "Arts Marketing & Communications," exploring the far-reaching and highly lucrative aspects of commercializing and merchandizing creative output across the many disciplines which comprise the arts & entertainment industries. Creative output in the form of a commercial film, Broadway hit, top-selling album or live performance establishes a point of departure into a massive world of merchandising where brand is king, franchises flourish and sequels make (and break) futures. Students will gain deep understanding of how strategic marketing campaigns develop, run and catalyze broader merchandising, commerce and franchise potential. Readings, lectures and case-based analyses will investigate successful corporate models, strategies and tools for maximizing commercial potential and earnings in the global commercial arts & entertainment marketplace. From relationship and influencer-based approaches across traditional and digital platforms to the tools which maximize celebrity branding, tap global merchandising capacity and harness new technologies that drive innovation, this course introduces aspiring arts & entertainment leaders to the foundations of commercial success.

Prerequisite: Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 315 Arts & Entertainment Industries Professional Development 3 Credits

Arts & Entertainment Industries (AEIM) Professional Development is designed to prepare AEIM majors for successful internship and career placement, growth and development. Through this course, AEIM majors will engage in best possible selves vision mission goals and objectives-setting, transferrable skills identification and articulation, resume development, informational and formal interview skills practice and application as well as refine and package their individual portfolios comprised of final projects/portfolios from several prior courses. These and other assets, including personal web-page and social media profile work and editorial bio, will be developed in the creation of a comprehensive professional "toolkit" of assets to aid in their pre-professional and professional career pursuits. Over the course of a semester, students will work on professional communication skills including public speaking, writing, and corresponding etiquette, and interviewing techniques for both in-person and virtual meetings. Students will explore their own strengths and weaknesses through industry-leading personality and professional skills and traits analyses and how to apply them to maximal effect. Industry guests from all arts disciplines will afford "real-world" perspectives and build networking capacity. Restricted to AEIM Majors, Junior standing or above.

AAD 316 Data Analytics in Commercial Entertainment 3 Credits

Data analytics is a driving force of today's entertainment industry as companies face new business models for creating, marketing and distributing creative output to consumers who access content anywhere, at any time and on any device. It is transforming businesses, social interactions and how entertainment is marketed and consumed. With the explosion of social media, entertainment streaming platforms and online distribution, the amount of data available has reached unprecedented levels. Hiring skilled people who know how to collect and interpret big data is crucial. This course explores the many ways by which data is used to develop detailed understanding of consumer preferences and behaviors, inform production, advertising and distribution strategies, forecast performance and help increase efficiency. Students will learn how to retrieve, analyze and apply data for successful outcomes in today's entertainment industry, helping companies seize upon ever-expanding opportunities to utilize data to identify and understand new audiences, increase content exposure and identify new products and services.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 318 Music Publishing 3 Credits

This course teaches foundational concepts, context, tools, and function of music publishing as an essential force in today's ever-evolving music industry. Students examine the many roles which the music publisher plays in the acquisition, market development and administration of copyrighted musical works. Through case-based analysis of the inner workings of major, independent and self-owned music publishing companies, students will gain understanding of the depth, breadth and scope of this fascinating aspect of the business. Discussion will encompass the fundamentals of copyright, types of publishing deals, income streams, registrations and collection, foreign sub-publishing deals, and the rights and royalties applicable to copyrighted musical work. Students will also learn how music is licensed for use in film, television, advertising, theatrical performance, game and other forms of interactive media, as well as an overview of the administrative aspects of these uses and the ways by which legislative action impacts opportunities and earnings of copyright holders. Lastly, students will explore the creative and administrative responsibilities involved in establishing their own music publishing company.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 320 Licensing & Distributing Arts & Entertainment 3 Credits

Course Description: Licensing and/or distribution of creative output powers nearly every aspect of the arts and entertainment industries as significant brand builders and revenue-generators for intellectual property owners. This course delivers foundational knowledge of the many ways by which music, theater, dance film and other media are licensed for commercial use or otherwise distributed directly to vendors and consumers. Discussion encompasses the various types and purposes of license, key points of negotiation, parties, agreements and business constructs involved in licensing and distribution deals across multiple entertainment sectors. Through readings, lectures and case-based analysis students will study the means of directly and indirectly getting works out into the marketplace, as well as the risks and rewards that may result. Through comparative analysis of traditional and contemporary professional agreements, students will come to understand how licensing and distribution contracts, modalities, administration and payments have evolved, and what the future holds for this vital engine of the arts & entertainment industries.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 322 Policy Perspectives on Arts & Entertainment 3 Credits

This course delivers foundational knowledge of the historical evolution, current state, and anticipated future of legislative actions, general policies and protocols impacting the many diverse components of arts and entertainment. Students will gain understanding of the several stakeholders, advocates and allies involved in the process of shaping policy and effectuating legislation, from lobbyists and industry leaders to politicians and the constituents whom they represent. Discussion will also encompass the expanding role and reach of the internet and streaming services which have often driven, and too often outpaced legislative agendas, putting the rights and benefits of intellectual property owners at risk through inequitable compensation practices, usurping of rights and expanding of global piracy. Case-based analysis will afford insight into current and anticipated lobbying agendas, legislative action (or inaction) on Capitol Hill, resolutions in process and recent legislation in action. Students will create an advocacy campaign around a pertinent issue facing arts & entertainment today, and strategize an effective lobbying process in order to gain direct insight and inspiration to become lifelong agents for change.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 308.

AAD 350 Arts Venue and Patron Services Management 3 Credits

Integrating workplace with organizational mission: administration, staff, general public, artists. Internal control, artist/employee contracts, collective bargaining, health and safety issues, facilities operation, inventory, cultivation and maintenance of clientele and audience.

Prerequisite(s): AAD 121.

AAD 351 Crossing Cultural Borders 3 Credits

Course includes two weeks at an international arts organization, meeting and shadowing administrative staff, studying management styles, finance, and operational procedures, and attending all possible events during the visit. Travel fee required. May be repeated.

Prerequisite(s): Junior standing.

AAD 375 Special Topics: Arts Admin 3 Credits

Intensive study or activity in a specific area of Arts Administration. The content will vary with social/cultural events and/or interests and qualifications of the professor. May be repeated for credit. Fee may be required.

Prerequisite(s): AAD 121 or CBA 110 or permission of instructor.

AAD 401 New York Arts Network 3 Credits

Students learn how arts institutions of varying scope, size and function and how administrators keep them running by spending focused, intensive time with them on their own turf.

Prerequisite(s): AAD 121, AAD 202 and AAD 203.

AAD 490 Independent Research and Study 1-4 Credits

This self-motivated, self-directed course culminates in a complete project. The student and the faculty advisor will mutually develop the scope of each project. It will be designed to demonstrate the student's entrepreneurial skills and provide an opportunity for practical application of the curriculum.

Prerequisite(s): AAD 202, AAD 203, and either AAD 121 or CBA 110.

AAD 491 Arts Management Internship 3-12 Credits

Arts Administration majors are required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 6 credits of internships.

Prerequisite(s): Junior standing.

Baccalaureate Honors (BHP)**BHP 100 Honors Seminar: Great Ideas I 3 Credits**

Traces the impact of great ideas on society, politics, economics, science, and the arts. This writing-intensive course substitutes for CMP 120 Expository Writing. Freshmen only.

BHP 150 Honors Seminar: Great Ideas II 3 Credits

A continuation of Great Ideas I, the introductory Freshman Baccalaureate Honors Seminar. Great ideas are studied in their cultural and historical contexts and from an interdisciplinary perspective. Students are guided in writing an effective research paper. This writing-intensive course substitutes for CMP 125 Research Writing. Freshmen only.

BHP 201 Honor Seminar: Age of Shakespeare - A Study in Cultural History 3 Credits

Studies the cultural history of Elizabethan and Jacobean England and of its visual and literary arts. More specifically, the course will investigate the peculiarly English synthesis of the old and new, Medieval and Renaissance, Continental and English in the arts and ideas of the Age of Shakespeare.

BHP 203 Nineteen Eighty-Four in Context: George Orwell's Enduring Legacy 3 Credits

"Big Brother is watching you." "Some animals are more equal than others." Contemporary discussions of politics, journalism, and social issues regularly reflect the influence of George Orwell's classic novels, *Animal Farm* and *Nineteen Eighty-Four*. The term "Orwellian" routinely appears in modern speech and writings. Published in the aftermath of World War II, Orwell's dystopian projections, along with other provocative writing by this courageous thinker and writer, reflect the turbulent world experienced by Orwell from the waning of British colonialism to the rise of the Cold War. To contextualize the composition and importance of his most influential works, this course will explore a wide range of Orwell's writings; the historical and cultural contexts that shaped him; and the use of his work and ideas by his contemporaries and by subsequent artists, critics, and social analysts.

Prerequisite(s): BHP 150.

BHP 206 Honors Seminar: Politics/Literacy 3 Credits

Students will analyze literary texts in the context of selected political periods and ideologies, going beyond literary content to understand how language, genre, and structure mirror, otherwise represent, or criticize the political order within which the author writes.

BHP 209 Honor Seminars: Law and Arts 3 Credits

Fosters analysis of controversial art images from a range of genres (e.g., films, paintings, photographs, music, literature, and sculpture) and asks students to consider connections between the art and political/social/legal issues. Topics will include censorship, propaganda, and intellectual property.

BHP 212 Children and the Media 3 Credits

This course examines how children and adolescents use and understand media and analyzes the role of media in their social and cognitive development. After studying the socializing presence of the media, students will analyze how exposure to television programs, movies, magazines and the Internet shapes children's socio-emotional development and their understanding of cultural norms. This course will also explore the effects that media use has on children's health, aggressiveness, and academic performance. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BHP 213 Honors Seminar: Text and Context 3 Credits

Studies the major themes of a period of cultural change as they are expressed in important social, scientific, literary, and artistic works. Students will immerse themselves in a single major literary work and will interpret it in light of a number of coordinate texts and works from the social sciences, from contemporary comment, and from the arts.

BHP 215 Honors Seminar: Universe & Origin 3 Credits

This course examines both the historical and ongoing scientific research that contributes to our understanding of how life arose on Earth. The evolution of primitive life to the present-day diversity of living organisms will also be explored. Over the course of the class, we will trace the development of theories concerning the evolution of life, with particular emphasis on biologic, geologic, and cosmic time scales.

BHP 222 Honors Seminar: Existentialism in Literature 3 Credits

Introduces students to Existentialism as a 20th-century movement with roots going back to the 19th century and as a philosophy that has special relevance and importance for understanding today's world. Reading and discussion are based on topics of special concern to Existentialist philosophers: lying and the nature of reality, faith and reason, reevaluation of values, and the meaninglessness of life. Readings will comprise a variety of fiction and non-fiction genres. Authors may include Dostoevsky, Unamuno, Camus, Sartre, Kierkegaard, Nietzsche, Brecht, Kafka, Pirandello, Weil, and Beckett.

BHP 224 Worlds Apart: Global Perspectives on Development and Inequality 3 Credits

This course will examine the causes and patterns of uneven societal development in the world today, including consideration of historical and contemporary factors such as colonialism and globalization. Consequences of increasing inequality for the well-being of populations across the globe will also be discussed.

BHP 227 Race, Gender, and Sexuality in the Age of Empire 3 Credits

This course examines the history and literature of British and American imperialism from 1890 to the present, focusing on the intersections of race, gender, class, and sexuality. The course will cover themes of national identity, representations of colonized peoples, and imperialism as a cultural project. The history of imperialism as understood through literary and cultural analyses will focus on the functioning of gender, sexuality, and race in the ideologies and strategies of imperialism and anti-imperialism and in the psychological impact of colonial rule. Overall, we will consider how such analyses can inform a(re)defining of the colonial project.

BHP 231 Honors Seminar: Natural Adventures 3 Credits

Examines connections among environmental history, biology, and ecology. Human attitudes toward the natural environment are complex and have changed overtime, ranging from terror to exaltation from exploitation to preservation. Focus will be on the impact of changes in human land use and technology on natural ecosystems, exploring feedbacks between the two. Hands-on experiences will supplement readings from the primary literature both in science and history as well as literary explorations of nature.

BHP 232 Honors Seminar: Science and Politics of the Jersey Shoreline 3 Credits

Designed to acquaint the student with the scientific basis for evaluation of coastal problems and the political realities of funding and policy, focusing on the New Jersey Shoreline. Course topics will include consideration of waste disposal in ocean systems, depletion of ocean resources, physical and biological ramifications of human activities on the environment, and the political problems in dealing with mitigation of environmental stresses.

BHP 240 Chemistry and Conflict 3 Credits

Chemistry and other sciences have radically changed the conduct of war and mechanisms of human conflict. Using case studies from the Chemical Revolution to present day, this course examines how knowledge of matter altered warfare – in terms of its scale, its boundaries, and its meaning. To this end, we study Antoine Lavoisier's work with gunpowder in the 18th century alongside a more famous case of wartime chemistry: Fritz Haber's development of chemical weapons during World War I. We also study the Manhattan Project, which produced the world's first atomic bomb in the final days of World War II. Secondly, this course investigates the many legacies of these new weapons. We follow the development of the military-industrial complex, the use of war chemicals as pesticides, and the deployment of Agent Orange in Vietnam. Finally, we examine more recent uses of chemical weapons, including in Japan, Iraq, and Syria. Throughout the course, students will bring knowledge of chemistry to bear on these historical episodes. They will demonstrate how knowledge of key chemical principles – such as atomic structure, bonding, and reactivity – help to contextualize the development of modern war.

BHP 251 Idea to Innovation 3 Credits

The pharmaceutical industry comprises an incredibly diverse team of thinkers, including accountants and biochemists, who are all on a quest to improve human health. The development of medical treatments relies on pivotal insights from the scientific laboratory, but turning these ideas into practical medical innovations requires the solving of many problems outside of the scientific field. Through the examination of historical and contemporary case studies, this course will investigate the nature of science as it is practiced in the real world. How are problems identified and ideas generated and refined? What political and sociological challenges does the industry encounter? Who pays for all of this? By exploring growth in the pharmaceutical industry from the inside, students in this class will gain a deeper understanding of both science and business and how these disciplines interact in order to enhance and extend human life.

BHP 252 Creativity and Design Thinking 3 Credits

Creative, interdisciplinary, and collaborative work is being recognized as increasingly important for innovation and solving global problems of the 21st century. This course will introduce students to a much-needed framework for dealing with unstructured problems for creative problem solving, and a process for innovation. The course consists of two related parts: the psychology of creativity provides a foundational basis of knowledge and discussion, and the design thinking framework serves as an example of a powerful creative thinking strategy that an increasing number of individuals and organizations have used successfully over the past decade.

Prerequisite(s): BHP 100; non-BHP students POI only.

BHP 253 A Cross-Cultural Comparison of Play 3 Credits

This course examines how children from two different countries – the United States and Japan – play, and analyzes the influences of factors such as parents, environment, school, and culture. If travel is permitted, students will directly observe children at play in several different locations in each country – including (but not limited to) playgrounds, schools, play therapist’s offices, museums, indoor play places, zoos, and theme parks. Interviews with parents, teachers, therapists, and potentially children themselves will help to clarify how play is viewed and practiced in each culture. Readings on the evolution of play, the benefits of play, the practical applications of play (e.g., in education and in therapy), and cultural differences in play will be used to support and help to inform the data students will collect through the interviews and observations.

Prerequisite(s): BHP 100.

BHP 259 Honors Seminar: The Environment: a Conflict of Interest 3 Credits

Examines critical environmental issues such as global warming; food, water and energy resources; population trends; and global industrialization. Topics for context will include the origin of the elements, the origin of solar systems, and the origin of life as well as the basic principles of the current biotechnical revolution. Scientific understanding will be combined with knowledge about strategies for raising community awareness in order to (re)formulate public policy. In teams, students will be asked to define the problems; research available and prospective solutions; identify the technical, social, political, and economic constraints; and finally propose a workable strategy for making progress toward solutions.

BHP 260 Honors Seminar: Education and the Arts 3 Credits

Through the study of classic and contemporary artistic works as well as influential philosophies and theories of education, this course explores representations of education in fiction, nonfiction, poetry, film, and music and the relationship between theory and practice. Society’s shifting and ambivalent attitudes toward teachers and the educational process will be studied from multiple perspectives, including those of artists who are important educators themselves.

BHP 261 The Online Explosion: Radical Changes in Business and Communication 3 Credits

Compared to a world just one generation ago when business people composed memos on typewriters and communicated with fax machines, the online explosion has brought forward a flood of new communication tools and social media platforms. It has created new types of businesses that would have been unimaginable just a short time ago and has revolutionized the way people communicate, socialize, and shop. The explosion of the web has also led to work environments in which employees are always “connected,” and has raised concerns about personal privacy. We will guide students through a critical evaluation of these radical changes, with an eye on their benefits as well as potential negative consequences.

BHP 268 Honors Seminar: Love and Chivalry in the Arthurian Tradition 3 Credits

The legends attached to King Arthur of Britain and the Knights of the Roundtable have fascinated audiences for the past 1500 years. This course will examine the origins, development and meanings of love and chivalry, two essential themes in the Arthurian legends. Through study of the two major love triangles in the tradition—Arthur-Guinevere-Lancelot, and Tristan-Isolde-Mark—and the chivalrous quests of Lancelot, Tristan, Gawain, Parzival, and other Knights of the Roundtable, students will discover how Arthurian ideals regarding love, chivalry, kingship, and heroism were established and why they still resonate in popular culture. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BHP 270 Interdisciplinary Studies 3 Credits

Exploration of interdisciplinary topics and themes in honors courses team-taught by instructors representing different disciplinary specialties.

BHP 271 Special Topics in Interdisciplinary Studies 3 Credits

Exploration of interdisciplinary topics and themes in honors courses team-taught by instructors representing different disciplinary specialties.

BHP 281 The Rhetoric of Science 3 Credits

This course will examine the rhetoric of science in an effort to see how science has used language and various text types to answer questions, resolve disputes, and legitimize the knowledge contained within its disciplinary borders, and conversely how language and communication have guided scientific discovery throughout history. Reading texts from ancient and contemporary scientists, philosophers, historians, and literary authors, we will identify the key linguistic and rhetorical traits employed within the discourse communities of modern science, and consider consequences of—and the scientific developments enabled by—such language and textual practices. These concepts will be emphasized and elucidated vis-à-vis some of the most significant scientific and medical discoveries impacting the modern world.

BHP 290 Shakespeare: Page, Stage & Screen 3 Credits

This course aims to explore, in depth, the translation of Shakespeare’s texts into performance by combining theatre history, cinematic adaptation, and textual analysis with a strong emphasis on practical, creative, and collaborative work. We will study 5 plays over the course of the semester and consider each as a performance piece as well as a literary artifact. Each play will be examined from multiple perspectives that are theatrical/performance/cinematic (staging, costume, sets, dramaturgy, camera, editing) as well as literary (historicist, psychoanalytic, gender and sexuality focused, Marxist, eco-critical, post-colonial), thereby bridging the artificial divide between Shakespeare as literature and Shakespeare as performance.

BHP 301 The Law and Racial Progress 3 Credits

This course is designed to enhance knowledge of the ways in which racial progress intersects with the law. Different areas of the law are emphasized, as well as the criminal justice system, with an emphasis on understanding the role and behavior of different stakeholders and participants in these areas. Ethical issues are discussed throughout the semester in order to sensitize students to the ethical considerations integral to bringing legal disputes to closure. The course will focus on three primary fields to illustrate the complicated relationship between the law and racial progress: 1) The Workplace, 2) The Police, and 3) Higher Education.

Prerequisite(s): BHP 150.

BHP 302 Mirrors of the Mind: The Interplay of Literature and Psychology 3 Credits

In exploring the longstanding and evolving partnership between literature and psychology, this course addresses the following questions: How does understanding of psychological theory enhance our reading of literature? How does reading of literature affect our judgements and our responses to real-world situations? How can literary texts aid psychologists in refining theories explaining human behavior? Readings include classics, as well selections by recent writers and theorists representing both disciplines. Among the themes typically discussed are struggles in achieving stage-salient goals in life (separation from parents during adolescence and beginning the assumption of adult roles, etc.); complexities in social interactions (familial, romantic, etc.); the development of empathy; perceptions of self and other; loss and grief, morality; and the influence of culture on personality and behavior.

Prerequisite(s): Completion of BHP 150 and minimum GPA 3.3; or POI.

BHP 307 Honors Seminar: Presence of Mind - Artificial intelligence and Human Creativity 3 Credits

What is Artificial Intelligence (AI)? In what ways can computers “think”? How is their “thinking” similar to and different from that of humans? Through readings, lectures, discussions, and creative projects, students will investigate evidence of intelligence and creativity in various disciplines including music composition, art, and human and non-human systems. We will examine predictions for AI that date back to the 1930s and ponder likely developments in this area in the 21st century. No prior experience with computers or music is required.

BHP 309 Honors Seminar: Genetic Engineering and the Philosophy of Science 3 Credits

Highlights the different perspectives held by scientists and philosophers regarding current bioethical issues. Topics include classical ethical theory, applied ethics, and basic biology as it relates to topics such as stem cells, cloning, and assisted reproduction. Students will learn how to construct and present rational, objective arguments during class discussions and presentations. At the end of this course, students will have gained a strong perspective both the ethical and biological foundations behind modern “hot-button” topics in genetics.

BHP 312 Honors Seminar: Musical Expression 3 Credits

Examines the relationships between political culture (e.g., enlightened reform, revolution, or reaction) and musical discourse in periods selected from Viennese classicism, Biedermeier/romanticism, post-romanticism and expressionism. Major emphasis will be placed upon how composers such as Mozart, Beethoven, Schubert, Mahler, and Schoenberg exploited and developed musical forms, and chose and set texts to respond to the imperatives of their political and cultural environments.

BHP 315 Honors Seminar: 20th Century European Ideologies 3 Credits

Covers the origins and development of 20th-century European ideologies in a comparative perspective. Topics include the condition of European political culture at the turn of both centuries (i.e., 1900 and 2000), methods of spreading Nationalism and national culture, the First World War and the emergence of Fascism and Communism, the origins and consequences of the Cold War, the development and fate of the Socialist and Capitalist systems, and the ideology of Conservatism/Liberalism. We will also reflect upon the condition of European political culture in our day.

BHP 318 Honors Seminar: The Bible as Literature and Philosophy 3 Credits

Discusses selections from the three major divisions of The Bible: the Old Testament, the New Testament, and the Apocrypha. Stories such as Joseph and his brothers, Exodus, Samson and Delilah, Jonah and the Whale, Susannah and the Elders, the raising of Lazarus, and the trial and execution of Jesus will be read. Students will study many genres, including the short story (The Book of Ruth), poetry (Psalms), history (I and II Samuel), apocalypse (Revelations), letters (I and II Corinthians), and philosophical tales (The Book of Job).

BHP 321 Gender and Sexuality in Hip Hop and R & B 3 Credits

This course explores the formation of femininity, masculinity, and sexuality in Hip-Hop and R&B, focusing on the music, images, and politics of the genres. Because Hip-Hop and R&B also exist in dynamic relationship with a variety of other genres, including funk, soul, rock, disco, jazz, and electronic dance music (EDM), some of these other genres will be included in readings and discussions along the way. Related topics include racial identity theory, religion, and a variety of other social constructions as mediated through rhetoric and discourse conventions that shape who we are and how we understand ourselves.

BHP 340 Nature and Nurture 3 Credits

Nature and Nurture explores questions of innate and environmental influences on who we are. The history of the false Nature v Nurture debate as well as our current understanding of how innate and environmental factors influence human characteristics are explored via discussion of current scholarly articles from the social and life sciences.

BHP 350 Genocide and Human Rights 3 Credits

Explores one of the main paradoxes of the modern era: the development of human rights standards and, at the same time, the expansion and intensification of genocide, ethnic cleansing, systematic torture, and other crimes against humanity. A central question runs through the course: How are these two polar opposites, human rights and genocide, related? Concentrating on the period from the eighteenth century to the present, and encompassing virtually every area of the globe, we will discuss and debate the meaning of contested key terms, investigate particular historical cases of mass atrocities, and examine critically some of the recent efforts at redress, justice, and memory.

BHP 360 Moral Psychology 3 Credits

This course will cover moral philosophy and moral psychology and where they intersect. What are moral development and moral injury? What does our taste in aesthetics say about our morality? Topics covered will include character, responsibility, naturalism and psychological science, ethics, and aesthetics are covered.

BHP 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours.

BHP 499 Baccalaureate Honors Thesis 3 Credits

Students completing the Baccalaureate Honors Program undertake a capstone project, which may be research-based and/or creative. Minimum 3 credits in total, which may be completed in fall or spring of senior year or distributed across both semesters. For details, see BHP Web site: http://www.rider.edu/15478_6437.htm.

Behavioral Neuroscience (BNS)**BNS 107 Life Science: Brain and Behavior 3 Credits**

An introduction to the biology of the human brain and the rest of the human nervous system. Topics in neuroscience are covered in molecular, cellular, and systematic terms. Additional material is presented on the origins and effects of neurological and psychiatric diseases. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BNS 250 Biostatistics 4 Credits

This course will assist students with acquiring the skills necessary to design, conduct, and interpret research studies. Emphasis will be on learning how to develop experimental designs to translate theoretical concepts into testable hypotheses. Experiments conducted during laboratory sessions will use laboratory mice and will use equipment for measuring animal behavior. Students will gain experience collecting, analyzing, writing and orally presenting their research results. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 105 or higher or placement into MTH 210, grade of "C" or better in one lab science course.

Corequisite(s): BNS 250L.

BNS 250L Biostatistics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): BNS 250.

BNS 275 Behavioral Neuroscience 4 Credits

An introductory behavioral neuroscience course including basic neuroanatomy and neurophysiology of movement, ingestive, reproductive, emotional, and learning behaviors. Emphasis is on the structure/function relationships that allow animals to make appropriate physiological and behavioral responses to the environment. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115 & BIO 116.

Corequisite(s): BNS 275L.

BNS 275L Behavioral Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 275.

BNS 310 Neurobiology 4 Credits

A lecture-laboratory course investigating the structure and function of the nervous system. Lecture topics include organization of the nervous system, neuroanatomy, neurophysiology, neurochemistry, physiology of sensory systems, biological aspects of nervous system diseases, and behavior. Laboratory exercises include study of anatomy of the nervous system, nerve cell recording, modern neuroanatomical techniques, and the neural basis of animal behavior. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course. Corequisite(s): BNS 310L.

BNS 310L Neurobiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 310.

BNS 360 Neurochemistry 4 Credits

Examines the fundamentals of neurochemistry, including the neuroanatomical distribution, pharmacology, and functions of neurotransmitters; signal transduction pathways; behavioral and physiological effects of chemicals either used therapeutically to treat biopsychological disorders or that may be abused for their psychotropic effects; and mechanisms and models for the study of drug action. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116, CHE 122, CHE 123 with a grade of C or better in each course.

Corequisite(s): BNS 360L.

BNS 360L Neurochemistry Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): BNS 360.

BNS 375 Neuroethology: Circuits of Behavior 4 Credits

Neuroethology is the study of the neural and physiological basis of animal behavior. This course focuses on the specific behavioral problems faced by animals in their natural habitats, and the ways in which their nervous systems solve these problems. The mechanisms that underlie complex behaviors such as spatial orientation and navigation, escape mechanisms, and animal communication will be examined, as well as the extraordinary sensory adaptation of organisms to their environments (e.g., echolocation, electroreception, and magnetic reception). The neural control of motor programs and temporally-patterned behaviors will be studied in simpler neuronal systems. Finally, recent cellular and molecular approaches to the study of behavior will be addressed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BNS 375L.

BNS 375L Neuroethology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BNS 375.

BNS 415 Seminar in Behavioral Neuroscience 3 Credits

Critical analysis of the scientific literature pertaining to current topics in behavioral neuroscience. Topics include mechanisms through which the brain influences physiology and behavior and the integration of nervous and endocrine systems. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116 or BNS 118, BIO 117, junior standing and permission of instructor.

BNS 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BNS 491 Internship in Behavioral Neuroscience 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and should include keeping a journal of activities, a term paper or project report and a poster presentation.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Biochemistry (BCH)

BCH 225 Introduction to Organic and Biochemistry 4 Credits

An introductory course describing the basic principles of organic chemistry and biochemistry as they relate to human metabolism and disease. The nature of the chemical structure and reactivity of organic functional groups such as alcohols, aldehydes, ketones, carboxylic acids and amines will be presented with biological processes in mind. The biochemistry of the macromolecules DNA, RNA, proteins, carbohydrates and lipids will be discussed leading in to a discussion of some of the more important metabolic pathways. This course is intended for science majors who do not take the full two semester sequence of organic chemistry and two semesters of biochemistry and desire a background in biochemistry. Non-science major students who have had one semester of general chemistry and one semester of biology may also enroll in the course. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): CHE 110 or CHE 122, CHE 123; BIO 115.

Corequisite(s): BCH 225L.

BCH 225L Introduction to Organic & Biochemistry Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BCH 225.

BCH 325 Biochemistry 3 Credits

Outlines the chemistry and biological function of carbohydrates, proteins, lipids, nucleic acids, vitamins, and enzymes, and introduces enzyme kinetics and biological energetics. Degradative metabolic pathways of carbohydrates and lipids, and their controlled interrelationships are discussed in detail.

Prerequisite(s): CHE 122, CHE 214 with a minimum grade of D.

BCH 326 Biochem and Enzymology I Lab 1 Credits

The laboratory work illustrates techniques and methods essential to the biochemist. Methods for quantification of proteins, purification of enzymes and determination of their kinetic parameters, polarimetry, and structure proof of carbohydrates. The lab must be taken concurrently with BCH 325 by biochemistry and biology majors, but is optional for others.

Prerequisite(s): CHE 123, CHE 214.

BCH 330 Biochemistry II 3 Credits

Continuation of Biochemistry I. Includes molecular analysis of biological membrane structure and function and a molecular level analysis of information flow from DNA through RNA to proteins. Other topics include mechanisms of hormone action and an expansion on metabolic concepts.

Prerequisite(s): BCH 325.

BCH 331 Biochemistry II Lab 1 Credits

Methods of protein analysis, building on techniques and principles learned in BCH 326. Students will use bioinformatics and molecular biological techniques, including PCR, to harness and change protein sequence. They will implement modern protein purification techniques, develop enzyme assays, and perform equilibrium binding assays to investigate the relationships among protein sequence, structure, and function.

Prerequisite(s): BCH 326, BIO 117.

BCH 400 Advanced Biochemistry. 3 Credits

Continuation of Biochemistry I. Includes molecular analysis of biological membrane structure and function and a molecular level analysis of information flow from DNA through RNA to proteins. Other topics include mechanisms of hormone action and an expansion on metabolic concepts.

Prerequisite(s): BCH 325.

BCH 410 Metabolism and Bioenergetics 3 Credits

An examination of principles of energetics and chemical transformations as they pertain to metabolism. Students will explore general issues of bioenergetics and will delve into biochemical pathways of catabolism and anabolism of biological molecules, including key nutrients, and xenobiotic compounds, including drugs and toxins. Attention will be placed on the enzymes and cofactors that mediate critical metabolic transformations, and students will use the scientific literature to investigate mechanisms of regulation and integration of metabolic pathways as well as consequences of aberrant enzyme function to human disease.

Prerequisite(s): BCH 325.

BCH 415 Signal Transduction 3 Credits

Cells in multicellular organisms are in constant communication with each other. One way that cells communicate is through the sharing of chemical signals through a process called "signal transduction." In this course, we will study the basic biochemical principles of signal transduction to better understand life on a molecular level. Topics to be covered include a broad overview of signal transduction mechanisms, including basic receptor theory and the use of second messengers; investigations into specific signaling strategies, including signaling via receptor ion channels, G protein-coupled receptors, and nuclear hormone receptors; and examinations of cellular mechanisms used to coordinate signaling spatially and temporally. Special focus will be placed on roles of signal transduction pathways in health and disease.

Prerequisite(s): BCH 325.

BCH 425 Medicinal Chemistry 3 Credits

A comprehensive description of the important principles of medicinal chemistry including principles of rational drug design with synthetic strategies, mechanisms of drug actions, structure-activity relationships, the absorption, distribution, metabolism and elimination of drugs. Specific classes of drugs to be discussed include: anticancer agents, analgesics, anti-inflammatory drugs, steroids, drugs acting on the nervous system and antibiotics.

Prerequisite(s): BCH 325 or permission of instructor.

BCH 430 Advanced Lab Techniques in Biochemistry. 1 Credits

Methods of protein analysis, building on techniques and principles learned in BCH 326. Students will use bioinformatics and molecular biological techniques, including PCR, to harness and change protein sequence. They will implement modern protein purification techniques, develop enzyme assays, and perform equilibrium binding assays to investigate the relationships among protein sequence, structure, and function.

Prerequisite(s): BCH 326.

BCH 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurement, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BCH 491 Internship in Biochemistry 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the students' overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Biology (BIO)

BIO 100 Life Science 3 Credits

An introductory course for non-science majors in which students develop an understanding of the nature of science and are introduced to foundational topics in the biological life sciences and how they relate to human affairs. The course may emphasize human evolution, genetics, aging, disease, reproduction, bioethics or other topics in biology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

BIO 110 Life Science: Inquiry Approach 4 Credits

An introductory course for non-science majors in which students develop an understanding of biological evolution, the molecular basis of heredity, the cell, matter, energy and organization in living systems, and the interdependence of organisms. In addition, students will develop an understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives. Through investigative activities, students will develop an understanding about scientific inquiry and develop abilities necessary to do scientific inquiry. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 110L.

BIO 110L Life Science: Inquiry Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 110.

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 116 Principles of Biology II 4 Credits

An introductory biology course focusing on major themes of biology: Energy and matter to carry out life's essential functions; Interdependent relationships characterize biological systems (homeostasis, growth & development); Behavior of living things; Ecology and the environment. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 116L.

BIO 116L Principles of Biology II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 116.

BIO 206 The Pharmaceutical Industry 3 Credits

An introduction to drug discovery and development. Topics include how drugs are used to diagnose, cure, treat, and prevent disease and how drugs affect body function. The origins of diseases and the early attempts at treatment are also covered. Designed for business majors; does not satisfy requirements for the biology major.

Prerequisite(s): BIO 100 or BIO 101 or BIO 106 or BIO 108 or BNS 107 or CHE 115.

BIO 210 Hospital Intern Program 2 Credits

An internship that provides students with the experience in the practical aspects of medicine. Major departments in the hospital such as the emergency room, operating room, clinic, radiology, and the laboratory will be open for student rotations. Field trips to various medical schools in the area will provide information on professional school educational opportunities available in the health professions.

Prerequisite(s): sophomore standing or above and permission of instructor.

BIO 215 Medical Microbiology 4 Credits

Biology of prokaryotes of medical interest with emphasis placed on diversity and host-pathogen interaction. Current research literature will be covered and presented by students. Methods of microbial identification are introduced in the laboratory and applied in the identification of mock clinical isolates. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course,

Corequisite(s): BIO 215L.

BIO 215L Microbiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 215.

BIO 221 Human Anatomy & Physiology I 4 Credits

A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.

Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 221.

BIO 222 Human Anatomy & Physiology II 4 Credits

A comprehensive survey of the organ systems of the body including special senses, cardiovascular, respiratory, digestive, excretory, reproduction and development. Physiological components include electrolytes, metabolism, nutrition, and the mechanisms of homeostasis and cell reception. Lab studies support lecture material through dissections, wet labs, computer-assisted learning, microscopy, and models. Assessment includes lab practicums, exams, and reports. Course emphasis supports allied health and pre-professional training. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): BIO 221.

Corequisite(s): BIO 222L.

BIO 222L Human Anatomy & Phys II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 221L.

Corequisite(s): BIO 222.

BIO 250 Field Natural History 4 Credits

Identification, life history, and interrelationships of plants and animals in natural landscapes of New Jersey. Field, lab, discussion and lecture exercises will prepare students to lead informative and safe nature walks. Nature writing and natural resources management also covered. Three lectures and one three-hour laboratory per week; most labs take place outdoors. Two Saturday field trips (laboratory time will be adjusted accordingly). Designed for education majors; does not satisfy requirements for the biology major.

Corequisite(s): BIO 250L.

BIO 250L Field Natural History Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 250.

BIO 260 Principles of Biology: Evolution, Diversity, and Biology of Cells 4 Credits

Lectures and labs focus on basic cell biology. Cell diversity and function, genetics and biotechnology are emphasized. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115/115L and BIO 116/116L or BIO 115, BIO 117, (BNS 118 or BNS 275).

Corequisite(s): BIO 260L.

BIO 260L Principle of Biology: Cells Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 260.

BIO 265 Genetics 4 Credits

A comprehensive course focusing on molecular, Mendelian, and population genetics. Topics covered will include molecular advances in the study of genetics, including genomics and bioinformatics; evolution and the effects of genetic mutations; the application of population genetics to forensic science; genetic problem solving, including genetic crosses and statistical analysis; and regulation of gene expression. The laboratory for this course will introduce students to commonly used genetic model organisms and basic molecular biology techniques. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 265L.

BIO 265L Genetics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 265.

BIO 272 Intro to Marine Biology 4 Credits

Introduces students to the study of marine environments, emphasizing the diversity, ecology, and physiology of marine animals, algae, and plants. Aspects of the human impact on marine environments are also discussed. Prerequisite(s): BIO 115 or BIO 116 or BNS 118 and grade of "C" or better.

Corequisite(s): BIO 272L.

BIO 272L Marine Biology Laboratory 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 272.

BIO 290 Special Topics in Biology 3 Credits**BIO 300 Developmental Biology 4 Credits**

Lectures and laboratories explore molecular, cellular, and genetic mechanisms of animal development. Aspects of gametogenesis, fertilization, induction, cytoplasmic determinants, morphogenetic movements, differentiation and developmental evolution are discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 300L.

BIO 300L Developmental Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 300.

BIO 305 Vertebrate Physiology 4 Credits

Study of the principles and mechanisms of mammalian physiology. Topics include the nervous system, muscle physiology, cardiovascular physiology, respiration, gastrointestinal activity, renal function, and endocrine physiology. Lectures and laboratory exercises emphasize homeostatic mechanisms and organ-system interactions. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 305L.

BIO 305L Vertebrate Physiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 305.

BIO 321 Microbiology 4 Credits

An introduction to the discipline of microbiology, with an emphasis on the biology of prokaryotes found in all the natural realms of our environment, including the oceans, soil, atmosphere, and extreme habitats. Emphasis will be placed on microbial diversity, fundamental microbial processes, and the continual interaction between microbes and the natural environment. Classical and modern methods of identification are introduced in the laboratory. Three hours of lecture and one three-hour lab per week. Some field trips are required. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 321L.

BIO 321L Microbiology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 321.

BIO 335 Plant Biology 4 Credits

Biology of seed plants, including growth, development, and reproduction of flowering plants. Emphasis is placed on acclimation and adaptations demonstrating environmental influences on plant structure and function. Current literature involving molecular mechanisms of control will be discussed. Three hours of lecture and one three-hour lab per week. One Saturday field trip. Prerequisite(s): BIO 115, BIO 116, CHE 122.

Corequisite(s): BIO 335L.

BIO 335L Modern Plant Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 335.

BIO 340 Evolutionary Biology 4 Credits

Where did we come from? This course will explore the generation of biological diversity on earth. Course topics will include: the history of evolutionary thought; the different lines of evidence and fields of inquiry that bear on our understanding of evolution; selection vs. random changes in populations over time; speciation; extinction; the molecular basis of evolution; and evolutionary developmental biology. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116, BIO260 with a grade of C or better in each course Co-requisite(s): BIO 340L.

BIO 340L Evolutionary Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Corequisite(s): BIO 340.

BIO 350 General Ecology 4 Credits

An investigation of the processes that regulate the distribution of plants and animals throughout the biosphere. Relationships among species and their interactions with the environment are stressed. Quantitative analyses of experimental results and current research in basic and applied ecology are discussed. Laboratory activities explore conceptual models using both field activities and computer simulations. Three hours of lecture and one three-hour lab per week. One Saturday field trip (laboratory time will be adjusted accordingly). Prerequisite(s): BIO 115, BIO 116, with a grade of "C" or better in each course.

Corequisite(s): BIO 350L.

BIO 350L General Ecology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 350.

BIO 370 Immunology 4 Credits

An introduction to the cells and molecules of the immune system with emphasis on recent advances. Topics include AIDS, autoimmunity, transplantation, and cancer. Readings from current journals will be discussed and presented by students. The laboratory will introduce current research techniques and then apply these to a research problem with critical analyses of the data generated. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115, BIO 116 and (BIO 260 or BIO 117) with a grade of C or better in each course.

Corequisite(s): BIO 370L.

BIO 370L Immunology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 370.

BIO 372 Behavior of Marine Organisms: Evolutionary Approach 4 Credits

An examination of the underlying mechanisms and evolutionary causes of behavior, including habitat use, feeding, and mate choice, particularly in marine organisms. The laboratory will involve collecting, analyzing and interpreting field data and performing experiments in the lab using a variety of marine organisms including fish and crabs. Three hours of lecture and one three-hour lab per week. Some full-day field trips (usually on a weekend) are required. Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course.

Corequisite(s): BIO 372L.

BIO 372L Behavior of Marine Organisms: Evolutionary Approach Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 372.

BIO 390 Special Topics in Biology 4 Credits

This course will provide students the opportunity to deeply explore a specialized topic in the broad field of biological sciences. The course entails 3 hours of lecture and 3 hours of laboratory per week, and may satisfy upper-level biology course requirements for the Biology, Behavioral Neuroscience, and/or Health Sciences majors. Examples may include such topics as ornithology, ethnobotany, entomology, neuroelectrophysiology, or exercise physiology, among other possibilities. Prerequisite(s): BIO 115/BIO 115L and BIO 116/BIO 116L.

Corequisite(s): BIO 390L.

BIO 390L Special Topics in Biology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 390.

BIO 400 Seminar in Cellular and Molecular Biology 3 Credits

Critical analysis of the scientific literature pertaining to current topics in cell and molecular biology. Topics may include: genomics, regulation of gene expression, development, and molecular processes of disease. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116, (BIO 260 or BIO 117) with a grade of C or better in each course, junior standing, and permission of instructor.

BIO 416 Bioinformatics 3 Credits

A comprehensive overview of relevant computer-based technologies used in genome research, DNA sequence analysis, and evolutionary biology. Will focus extensively on Internet resources and predictive algorithm usage for determining evolutionary relationships of organisms based on molecular evidence. Lectures will focus on terms and concepts frequently used in genomic and bioinformatic research, while computer labs will allow students to perform hands-on projects with actual DNA sequence data.

Prerequisite(s): BIO 115, BIO 116, (BIO 260 or BIO 117) with a grade of C or better in each course, junior standing, permission of instructor and BIO 265 recommended.

BIO 420 Seminar in Organismal Biology 3 Credits

Critical analysis of the scientific literature pertaining to current topics in physiology and organismal biology. Topics may include hormonal control of behavior, immune pathogen interactions, and other aspects of whole animal and/or plant biology. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course; junior standing, and permission of instructor.

BIO 450 Seminar in Ecology & Evolution 3 Credits

Critical analysis of the scientific literature pertaining to current topics in ecology and evolutionary biology. Ecology and evolution of terrestrial and aquatic systems may include scales of adaptation, mechanisms, or human impacts. Three hours of lecture per week.

Prerequisite(s): BIO 115, BIO 116 with a grade of C or better in each course; junior standing, and permission of instructor.

BIO 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

BIO 491 Internship in Biology 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and should include keeping a journal of activities, a term paper or project report and a poster presentation. 2.5 GPA required.

Prerequisite(s): Permission of the instructor.

Business Administration (BUS)**BUS 210 Intro to Law: Contracts 3 Credits**

An introduction to the origin of current law, with emphasis on the development of business law, students are exposed to legal terminology and acquainted with the system of application of rules of law to actual situations. The laws of contracts, particularly common-law developments, are considered in great detail.

BUS 211 Commercial Law 3 Credits

The law as related to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code is considered in depth. Warranties, guarantees, remedies, and product liability are explored. The laws of bankruptcy and insurance are also considered.

Prerequisite(s): BUS 210.

BUS 214 Advanced Business Law 3 Credits

This course provides students with an introduction to the fundamentals of individual and organizational forms of doing business. The laws governing agency, partnerships, corporations, and the purchase and sale of securities will be explored. The legal consequences of the relationships, and the rights and duties of the parties and entities will be discussed, as will the rules of law governing real, personal, and intellectual property, including the transfer of title to real property, the various types of bailments, the landlord-tenant relationship, and the laws concerning wills, trusts, and estates. The concerns of businesses that compete in the global environment through the study of international law will also be discussed. This course replaces the property (BUS 213) and business associations (BUS 212) courses; you may not take this course if you have taken either of these courses.

Prerequisite(s): BUS 210.

BUS 300 The Legal and Ethical Environment of Business 3 Credits

The strategies by which organizations in the private as well as the public sectors interact with, adapt to, and attempt to influence their external environments are explored. The primary emphasis is on evaluating the effect of business and governmental decisions on the quality of life. The role of regulatory agencies and the impact of local and national legislation on organizational behavior are considered.

Prerequisite(s): 54 credits.

BUS 315 Health Care Law, Ethics & Policy 3 Credits

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

Prerequisite(s): 24 credits.

BUS 375 International Business Law 3 Credits

This course considers the impact of international organizations and treaties on global business and examines the various methods of international dispute resolution. Important legal and ethical issues related to conducting business overseas are discussed including the topics of labor and employment rights, environmental law, and intellectual property.

Prerequisite(s): 54 credits.

BUS 400 Strategic Mgmt and Policy 3 Credits

This capstone course for seniors in business administration provides a framework for problem identification, analysis, and decision making within the organization. Students are given the opportunity to integrate and apply previously acquired knowledge of accounting, decision sciences, economics, finance, marketing, management, and statistics. Case studies, critical incidents, and other appropriate techniques are utilized.

Prerequisite(s): 84 credits, CIS 185, ACC 210, ACC 220, MKT 200, MGT 201, FIN 220, MSD 340, BUS 300, CIS 385 or GSC 385.

BUS 410 New Venture Planning 3 Credits

This course will require students to select a business and prepare a complete new venture plan for it. This plan would identify the product and its target market, analyze its market potential, choose the location, scale of operation, layout, staffing, type of financing, estimate the revenues and profits, and present the income statement, balance sheet, and the cash flow projections.

Prerequisite(s): ENT 348 or permission of instructor.

BUS 444 Selected Topics Business Policy 3 Credits

The study of a selected topic of contemporary interest related to one or more of the following: strategic management, business law, business ethics, social responsibility, legal environment of business. Readings, research, lectures, discussions, and other methods will be used.

Prerequisite(s): to be determined by instructor.

BUS 490 Independent Research and Study 3 Credits**BUS 491 Business Admin Internship 1-4 Credits****BUS 492 Global Business Internship 3 Credits**

Business Data Analytics (BDA)

BDA 201 Introduction to Business Analytics 3 Credits

This course introduces students to the process of analyzing big data and discovering new information to support business decision making. The course covers descriptive, predictive, and prescriptive analytics. Some topics covered include data visualization, data forecasting, and data mining. This course provides students with the fundamental concepts and tools needed to understand the role of business analytics in organizations and shows students how to apply basic business analytics tools in a spreadsheet environment. It also includes how to communicate with analytics professionals to effectively use and interpret analytic models and results for making better business decisions. Emphasis is given on applications, concepts and interpretation of results. Students utilize Excel for data analysis.

Prerequisite(s): MSD 205 or MSD 200.

BDA 205 Introduction to Visual Data Analytics 3 Credits

This course will equip the students with the fundamental skills to perform visual data analytics. Students will learn how to prepare a dataset for visual analysis, create basic and advanced visualizations using Tableau, and “tell a story” using data visualization. At the completion of the course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience.

Prerequisite(s): CIS 185 and BDA 201.

BDA 355 Business Analytics with Python 3 Credits

Python has become essential for data analysis in recent years. Research shows that Python is the most popular and growing programming language for business analytics mainly because it is flexible, easy to learn, easily accessible due to its open-source nature, and well supported by plenty of useful analytics libraries since it is heavily used in industry and academy. This course provides students with the required knowledge of working with popular Python data analytics libraries such as Pandas, NumPy, Matplotlib, SciPy, and Scikit-Learn as well as basic programming with Python such as Python syntax, data structure, conditional statements, and functions. Some topics covered include data retrieval and manipulation with Pandas (Python's most popular library for data analytics) and SQL, data visualization with Matplotlib, statistical distributions with NumPy, hypothesis testing with SciPy, and multiple regression with Scikit-Learn.

Prerequisite(s): BDA 201.

BDA 360 Optimization and Simulation 3 Credits

This course is designed to provide undergraduate students with the current knowledge and practice of optimization and simulation in business analytics. Optimization is an area in business analytics that finds the optimal, or most efficient, way of using limited resources to achieve the objectives of an individual or a business. Simulation is a technique that measures and describes various characteristics of the bottom-line performance measure of a model when one or more values for the independent variables are uncertain. The main focus of this course will be on developing modeling skills by using Excel (and Analytic Solver add-on) to gain insights into a wide variety of business decision problems. First, they will learn how to analyze the problem and choose an appropriate optimization/simulation method. Next, they learn how to formulate the problem in a format that can be implemented in a spreadsheet. Then, they will be taught to use Excel with add-on to solve the problem. Once the results are obtained, the students will be trained to interpret them and conduct sensitivity analyses. Eventually, the students are required to make a recommendation to managers after considering some implementation issues.

Prerequisite(s): BDA 205.

BDA 398 Business Data Analytics Practicum 3 Credits

This course develops and sharpens the skills for a successful career in analytical business consulting, such as analysis, critical thinking, presentation, problem solving, and teamwork. This class will develop skills in each of these areas through discussion of the principles underlying best practices and feedbacks in a series of applied exercises and cases that will prepare students to obtain and succeed in analytical business consulting problems. The students will analyze the data provided by professionals from experts in the field, and they will present the project at the end of the semester.

Prerequisite(s): BDA 205; MSD 201 Statistical Methods II; Junior or Senior Standing; Completion of 12 credit hours in business analytics coursework or Permission of Instructor.

BDA 399 The Co-Operative Experience 6 Credits

This Co-Operative Experience will provide Business Analytics majors with supervised employment (approximately four months), where the students will have an opportunity to apply what they have learned in their business analytics and other business classes.

Prerequisite(s): Business Analytics major, Junior or Senior standing, GPA of 3.0 or above.

BDA 491 Business Data Analytics Internship 3 Credits

This Internship course will provide Business Analytics majors students with supervised employment (approximately two months), where the students will have an opportunity to apply what they have learned in their business analytics and other business classes.

Prerequisite(s): Business Analytics major, Junior or Senior standing, GPA of 2.75 or above.

Business Education - UG (BED)**BED 410 Prin/Strat Voc & Coop Ed 3 Credits**

Designed as one of the specialized courses in the preparation of business and marketing education teachers and teacher-coordinators of cooperative work experience programs. The philosophy and history of education for and about work, including technology, are studied along with the principles and strategies for organizing and administering vocational cooperative education programs. Developmental/reflective evaluative techniques will be applied for the assessment of self, students, instruction and selected case studies. Current instructional concepts, organizational and administrative strategies, legislative enactments, and regulations pertaining to the employment of youth are included. Special attention is given to the role of vocational student organizations and advisory committees. Open to all students. A cumulative GPA of 2.75 is required.

BED 415 Teaching Business Subjects 3 Credits

Instructional strategies in the teaching of business and marketing subjects are analyzed and demonstrated. Students are required to prepare lesson plans, teach demonstration lessons, develop a unit plan, and compile a resource file of teaching materials. Videotaping of demonstration lessons is integrated with the course work to encourage developing teaching competency through a series of instructional modules appropriate to the student's certification interests. A cumulative GPA of 2.75 is required.

BED 445 Work Exper Cooperative Program 3-6 Credits

A minimum of 300 hours of a supervised occupational experience or a supervised internship program in an approved work station or institution. The experience is coordinated and supervised by a qualified coordinator of occupational education. A series of activities are designed to relate job and intern experiences to the student's future role as an employee or a professional teacher. The student will be evaluated by the supervising employer and the Unveristy supervisor.

BED 490 Independent Research & Study 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hours credit to be assigned is determined by the department.

Chemistry (CHE)**CHE 100 Intro to College Chemistry 3 Credits**

Open to all students, but designed primarily for those who wish to major in a science which requires chemistry but whose chemistry background is not sufficient to allow entrance into Chemistry 120. It focuses on the nomenclature used in chemistry including the symbols used to designate the chemical elements, the construction of chemical formulas, and the writing and balancing of chemical equations. Other topics will include interpreting the Periodic Table, the valences of the elements, the mole concept, and simple stoichiometry. In addition, chemical calculations involving units, scientific notation, significant figures, and the algebraic manipulations of simple equations will be included. Three hours of lecture per week. This course does not satisfy the requirements for the biochemistry or chemistry degree, but does satisfy the core requirements for education and business majors.

CHE 110 Survey of General Chemistry 4 Credits

A one-semester survey of basic general chemical principles designed to be applied to questions in health-related fields. Students will explore the fundamental structures of atoms and simple compounds that comprise living beings; basic patterns in chemical reactivity, especially oxidation-reduction and acid-base reactions; quantitative analyses of biologically-relevant compounds and chemical reactions; properties of substances; and kinetic and thermodynamic principles underlying such chemicals and chemical processes. In the laboratory portion of this course, students will learn and apply principles of experimental safety and will apply knowledge gained in the class via application in basic experimental contexts. No prerequisites. Students who have completed CHE 120 and/or CHE 122 will not be permitted to enroll in CHE110/110L. Furthermore CHE 110 will not serve as a prerequisite for CHE 122.

CHE 110L Survey of Gen Chemistry Lab 0 Credits

In the laboratory portion of this course, students will learn and apply principles of experimental safety and will apply knowledge gained in the class via application in basic experimental contexts.

CHE 114 Chemistry in the Kitchen 4 Credits

Chemistry permeates aspects of our daily lives in which we are often unaware. In this course, students will learn the core tenets of chemistry including atomic and molecular structure, bonding, intermolecular and macromolecular interactions, and chemical reactivity, and will personally investigate these properties in the context of cooking, baking, metabolism, and other kitchen-related activities. This 4-credit course will include a weekly 3-hour lab in which students will perform experiments that allow them to prepare dishes that illustrate key chemical concepts. As part of the course, students will collaborate with the Trenton Area Soup Kitchen to prepare and serve food to the community, as well as share their understanding about the chemical properties that are involved in the development of various dishes. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): CHE 114L.

CHE 114L Chemistry in the Kitchen Lab 0 Credits

This is the laboratory portion of CHE 114.

Corequisite(s): CHE 114.

CHE 115 Chemistry & Society 3 Credits

Designed to give the nonscientist an appreciation of the role of chemistry in today's world. The approach is conceptual rather than mathematical. Topics include basic principles of chemical theory, energy sources, elementary organic chemistry, drugs, food additives, polymers, chemistry of living systems, inorganic solids in modern technology, and problems involving pollution of the environment. Three hours of lecture per week. This course satisfies the core requirements for education and business majors.

CHE 118 Exploration of Chemical Principles 4 Credits

A one-semester introduction to the principles of chemical sciences. Students will utilize inquiry-based learning methods to examine contextual problems as a means to explore introductory models and concepts of chemistry. Students will also gain an understanding of how scientific models are used to explain experimental observations. The laboratory component of this course is designed to provide students with an experimental context within which to develop some of the models described in the classroom. Three hours of lecture and one three-hour lab per week.

CHE 118L Exploration of Chemical Principles Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 118.

CHE 120 Principles of Chemistry 3 Credits

For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.

Corequisite(s): CHE 121.

CHE 121 Principles of Chemistry Lab 1 Credits

For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits

A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.

Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits

Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.

Corequisite(s): CHE 122.

CHE 211 Organic Chemistry I 4 Credits

The structure, chemical properties, and methods of preparation of the more important classes of carbon compounds are studied, with an emphasis on the relationship of structure, stereochemistry, and conformation to chemical reactivity. The preparation and reactivity of organic functional groups is introduced. The use of infrared and nuclear magnetic resonance spectroscopy, and mass spectrometry for elucidating structures of organic molecules is discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 120, CHE 121.

Corequisite(s): CHE 211L.

CHE 211L Organic Chemistry I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 211.

CHE 214 Organic Chemistry II 4 Credits

A continuation of Chemistry 211, emphasizing the mechanism of organic reactions, structural interpretations of properties, preparations, reactivity and identification of organic compounds. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 211.

Corequisite(s): CHE 214L.

CHE 214L Organic Chemistry II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 214.

CHE 225 Introduction to Organic and Biochemistry 4 Credits

An introductory course describing the basic principles of organic chemistry and biochemistry as they relate to human metabolism and disease. The nature of the chemical structure and reactivity of organic functional groups such as alcohols, aldehydes, ketones, carboxylic acids and amines will be presented with biological processes in mind. The biochemistry of the macromolecules DNA, RNA, proteins, carbohydrates and lipids will be discussed leading in to a discussion of some of the more important metabolic pathways. This course is intended for science majors who do not take the full two semester sequence of organic chemistry and two semesters of biochemistry and desire a background in biochemistry. Non-science major students who have had one semester of general chemistry and one semester of biology may also enroll in the course. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 110 or CHE 122, CHE 123; BIO 115.

Corequisite(s): CHE 225L.

CHE 225L Introduction to Organic and Biochemistry Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): CHE 110 or CHE 122, CHE 123; BIO 115

Corequisite(s): CHE 225.

CHE 250 Quantitative Analysis and Statistics Methods 4 Credits

This course will provide a deeper exploration of topics in chemistry that are steeped in numerical analysis. These topics include advanced analysis of equilibrium systems, acid-base systems and electrochemical systems. Additional detail will be given to methods of chemical measurement, statistical methods of data analysis and determination of data validity and reliability. Both lecture and laboratory will show an emphasis on using computer-based tools to analyze experimental data. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 122, CHE 123, MTH 210.

Corequisite(s): CHE 250L.

CHE 250L Quantitative Analysis and Statistical Methods Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 250.

CHE 305 Physical Chemistry I 3 Credits

The mathematic and conceptual foundations of physical chemistry will be introduced with an over-arching theme of determination of energy allocation within atomic and molecular systems. Topics will include determination and measurement of energy states in atoms and molecules, simple quantum mechanical systems, distribution of energies and the connection to thermodynamic quantities, the three laws of thermodynamics, spontaneity, equilibrium and experimental kinetics.

Prerequisite(s): CHE 122, CHE 214, MTH 211, PHY 201.

CHE 306 Physical Chemistry II 3 Credits

Physical chemistry concepts are explored in more detail with emphasis on examination of systems that require multiple models in physical chemistry to explain. Topics will include, kinetic theory and transition state theory, statistical mechanics and its connections to thermodynamic functions, temperature dependence of spontaneity and equilibrium, the thermodynamics of condensed phases and multi-component equilibria, electrochemistry, multi-electron quantum mechanical systems, approximations in quantum mechanics, symmetry and advanced molecular spectroscopy.

Prerequisite(s): CHE 305, MTH 212.

CHE 315 Inorganic Chemistry 3 Credits

The periodic table as a tool for predicting the physical and chemical properties of chemical systems is developed and examined in conjunction with various theories of bonding, including valence bond, molecular orbital, valence shell electron repulsion, and ligand field theory. Emphasizes structure of crystalline solids, coordination compounds, reaction mechanisms, and structure-property relationships. Three hours of lecture per week.

Prerequisite(s): CHE 122, CHE 214.

CHE 316 Inorganic Chemistry Laboratory 1 Credits

Students will explore a variety of synthetic methodologies for the growth of inorganic molecular systems, and solid-state materials. A transition metal or main group metal plays a central structural role in all systems that will be examined. Modern analytical methods will be applied to characterize synthesis products, such as FT-IR spectroscopy, polarimetry, NMR, and powder X-ray diffraction analysis. Prerequisite(s): CHE 123, CHE 214.

Corequisite: CHE 315.

CHE 320 Polymer Chemistry 3 Credits

Designed to acquaint students with the structure and properties of polymers, the contrast between small molecules and polymers, methods of measuring molecular weight, the mechanism of polymerization, and the methods of fabricating polymers.

Prerequisite(s): CHE 214, CHE 305 or CHE 306.

CHE 325 Physical Chemistry Laboratory 1 Credits

Measurements are made of physical properties of molecules and chemical dynamical processes. These measurements will be used to develop models which explain the physical chemical nature of the systems under examination. Experiments will utilize various instrumental techniques such as infrared spectrometry, nuclear magnetic resonance, fluorescence and UV/Vis spectrometry. One three-hour lab per week.

Prerequisite(s): CHE 250, CHE 305.

CHE 330 Instrumental Analysis Laboratory 2 Credits

This course is designed to give students practical experience using modern analytical instrumentation and to provide students with the background theory and principles of operation. The instrumental methods introduced in this course include: ultraviolet and visible spectroscopy, atomic emission spectroscopy, gas chromatography (GC), high performance liquid chromatography (HPLC), X-ray powder diffraction analysis and electrochemical analysis. This experimental laboratory course meets two times per week with three hours for each session. One session will be focused on instrumentation background theory and discussion and the other session will be experimental practice.

Prerequisite(s): CHE 214, CHE 250, PHY 201.

CHE 350 Advanced Organic Synthesis 2 Credits

The first of four experimental chemistry labs designed for chemistry majors. It presents the use of modern techniques, and instrumentation in organic chemistry, including distillation, chromatography, infrared, ultraviolet, nuclear magnetic spectroscopy, and mass spectrometry. Two three-hour labs per week.

Prerequisite(s): CHE 214.

CHE 375 Computational Chemistry Lab 2 Credits

This course will provide students with a means to explore various methods in computational chemistry. Basic computational methods will be developed from first principles and these methods will then be tested using various modeling and computational software packages. Methods will include, but are not limited to, molecular mechanics, semi-empirical molecular orbital calculations, ab initio methods, and density functional calculations. Students will be exposed to various computational software packages and the strengths and limitations of each methodology will be explored. The course will meet in a computer laboratory for two for three-hour lab periods a week.

Prerequisite(s): CHE 305.

CHE 400 Chemical Bonding 3 Credits

The effects of the chemical bond on the structure and properties of molecules are investigated. Molecular orbital theories of bonding are introduced. Emphasis is placed on group theoretical methods utilizing molecular symmetry to simplify the description of the electronic structure of molecules and to predict their geometric structures and reactivity. Three hours of lecture per week.

Prerequisite(s): CHE 305, MTH 212.

CHE 415 Special Topics in Chemistry 3 Credits

An advanced level of one or more areas of modern chemistry. Emphasis on research and the literature of an area of current importance. Three hours of lecture per week.

CHE 420 Physical Organic Chemistry 4 Credits

In-depth studies of the methods for elucidating mechanisms of organic reactions for students who have completed one year of organic chemistry and physical chemistry. Topics include conformational analysis, linear free energy relationships, frontier molecular orbital theory, transition state theory, and chemical reaction kinetics. Isotopic scrambling, kinetic isotope effects, NMR and IR spectroscopy, polarimetry, and ultraviolet-visible spectrophotometry will be employed to investigate these concepts. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): CHE 214, CHE 305.

Corequisite(s): CHE 214L.

CHE 420L Physical Organic Chemistry Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): CHE 420.

CHE 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

CHE 491 Internship in Chemistry 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in a private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the students' overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Chinese (CHI)

CHI 100 Chinese I 3 Credits

This course is designed to foster mastery of the basic skills of Mandarin Chinese: speaking, listening, reading, and writing. The focus of the course is on communicative competency and accuracy. Together with Chinese 101, the course provides a thorough foundation in basic Chinese grammar. Students will have opportunities to work extensively with audio and/or video resources/ materials and other technology, and above all, students from China. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): placement test if Chinese has been studied elsewhere.

CHI 101 Chinese II 3 Credits

A continuation of Chinese 100. This course continues to foster mastery of the basic skills of Mandarin Chinese: speaking, listening, reading and writing. The focus of the course is on communicative competency and accuracy. Together with Chinese 100, the course provides a thorough foundation in basic Chinese grammar. Students will have opportunities to work extensively with audio and/or video resources/ materials and other technology and above all, students from China. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): Chinese 100 or placement test.

CHI 150 Chinese Culture and Basic Language 3 Credits

This course integrates beginning-level functional Mandarin Chinese language skills acquisition with the knowledge of Chinese business practices and culture as well as hands-on information and strategies for successful inter-cultural encounters. Students gain practical basic language skills through classroom practice and the use of audio/video and computer materials. Readings, films, documentaries, and lectures in English by members of the business community enable students to integrate language acquisition with practical cultural knowledge and cross-cultural awareness. Examination of Chinese customs highlights social relationships and cultural practices. No knowledge of Chinese language is required. This course does not fulfill the CLAS foreign language requirement.

CHI 200 Chinese III 3 Credits

This course is designed to foster mastery of the intermediate skills of Mandarin Chinese: speaking, listening, reading, and writing. The focus of the course is on communicative competency and accuracy. Together with Chinese 201, the course provides intermediate-level Chinese grammar, vocabulary, and cultural knowledge through the use of film clips, simple newspaper articles, the Internet, and other multimedia resources. Students are required to work extensively with audio and/or video resources/ materials and other technology and they have a unique opportunity to work with students from China. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CHI 101 or placement test.

CHI 201 Chinese IV 3 Credits

This course is designed to foster mastery of the intermediate skills of Mandarin Chinese: speaking, listening, reading, and writing. The focus is on communicative competency and accuracy. Together with Chinese 200, the course provides intermediate-level Chinese grammar, vocabulary, and cultural knowledge through the use of film clips, simple newspaper articles, the Internet, and other multimedia resources. Students are required to work extensively with audio and/or video resources/ materials and other technology and they have a unique opportunity to work with students from China. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CHI 200 or placement test.

CHI 300 Advanced Chinese Reading and Composition 3 Credits

This course develops Chinese reading and writing skills within a cultural context and aided by a systematic review and expansion of grammar and vocabulary. Using literary, journalistic, business and other sources, students learn various writing discourses and their Chinese variants including narration, description, exposition, and journalistic, business documentation and letter writing. Some translation is used to encourage linguistic analysis. Interviews with native speakers, Chinese Americans, and working with students from China enhance the cultural understanding of students necessary for meaningful reading and writing.

Prerequisite(s): CHI 201 or placement test.

CHI 307 Images of Women in Chinese Literature and Film 3 Credits

This course will introduce students to the (change of) status of women in China through literature and film. Students will explore the rich Chinese literary traditions and examine how the images of women are represented by both male and female writers/directors in fiction and film of different historical periods. In the process of such exploration and examination, students will also examine how the literary movements and their historical, social, cultural and political contexts shape, and are shaped by, each other. They will learn to understand how diverse the experiences of Chinese women are. While students will be exposed to both classic and modern/contemporary literary traditions, the focus will be on the latter, such as May 4th New Culture Movement, Maoist revolutionary literature, (Post-Mao) Wound/Scar Literature, Root-Searching Literature, etc. Classes are in English.

CHI 310 Chinese Culture and Civilization 3 Credits

This course introduces students to Chinese Civilization and Culture. Through reading, viewing, discussion, and presentation, students will have a chance to “experience” Chinese cultural riches and “interact with” its long history, religions, philosophies, literature and art, politics, as well as its different peoples and diverse customs. We will learn about China’s ancient dynasties and its cultural and aesthetic achievements in the past, and its modern revolutions, nationalism, communism, and post-Mao economic and political reforms today. We will also explore Chinese customs, particularly festivals, and try to gain an appreciation of different social relationships and diverse cultural practices. No knowledge of Chinese required. This course offers an optional TRIP TO CHINA during Spring Break or in May WHICH WILL EARN 3 ENGAGED LEARNING POINTS. Interested students must register for the travel course separately from taking CHI 310.

CHI 311 Calligraphy As a Window to Chinese Language and Culture 3 Credits

This course provides students with a chance to gain an intimate knowledge of Chinese language and culture through calligraphy. Students will learn the basic principles and techniques of writing Chinese characters with the writing brush. They will be introduced to the pronunciation, the composition and evolution of Chinese characters so that they will be able to read and understand what they write. Students will also learn how calligraphy is immersed in various aspects of Chinese culture. The main content of the course derives from examining applications of calligraphy to poetry, painting, and core concepts of Confucianism, Daoism and Buddhism. They will have a chance to cross time and space, having dialogues with Confucius, experiencing Buddhist bliss of final “awakening” or “enlightenment” and abandoning themselves to the Daoist spontaneous flow with the movement of Nature and the cosmos. No knowledge of Chinese language is required.

CHI 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

College of Business Administration (CBA)**CBA 102 Career Plan & Perspective I 1 Credits**

In this course students will explore their own history, goals and values as input to their definition of success. The course will set the stage for the remainder of students' college career, and will encourage them to draw connections among their career goals, educational performance, extra-curricular experiences, and available resources.

CBA 110 Business in Action 3 Credits

This course will provide students with the opportunity to develop a foundational understanding of the business environment and various business functions. Students will be introduced to core concepts in accounting, e-business, finance, human resource management, information technology, macroeconomics, management, marketing, and production and operations management. In addition, the student will have ample opportunity to improve his/her communication and teamwork skills, as well as further develop problem-solving, analytical, and decision-making abilities through a Business in Action project.

CBA 202 Career Plan & Perspect II 1 Credits

In this course, students will build on their CBA 102 self assessments to identify specific occupations that match who they are and where they want to go. The course will provide students with the understanding of the changed nature of the current work and career environment they will be entering when they graduate from Rider. They will acquire career management skills and apply these skills to develop short and long term career goals and plans for achieving them while at Rider. The course will also touch on the intersection of work and family roles.

Prerequisite(s): CBA 102.

CBA 212 Business Communications 3 Credits

Good communication is a vital skill in any environment where interpersonal interaction occurs. Communication skills do not, however, come naturally to everyone. This course introduces students to skills, practices, and strategies that will help them effectively communicate in the workplace and highlights the value of carefully documenting interactions between client and vendor. Students will engage in developmental activities intended to help them learn key aspects of communication, including, but not limited to: different formats of business writing (e.g., executive summaries, client and corporate correspondence, email messages, memos, reports, etc.); visual aids and presentations; active listening; small group facilitation; professional presence; and establishing credibility. Deliverables will include written documents and oral presentations, both individually and in teams. These skills cut across all disciplines and are qualitative tools that enhance overall career development.

Prerequisite(s): CMP 120 or BHP 100, and CMP 125 or BHP 150, and CBA 110.

CBA 236 Career Planning 3 Credits

How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this course. The meaning of work and the development of careers are discussed, and careers are examined in the context of important changes occurring today in the world of work. Students undertake self-assessments, learn career search strategies and resources, and enhance resume and interviewing skills to maximize their career preparation.

CBA 302 Career Plan & Perspect III 1 Credits

This one credit course will be targeted to second semester sophomores and juniors. In this course, students will build on their CBA 102 and 202 self assessments to develop strategies for a successful job search. The course will provide students with an understanding of the changed nature of the current work and career environment they will be entering when they graduate from Rider. They will acquire career management and job search skills and apply these skills to developing, networks, identify job search resources and enhance resume and interview skills. Students will understand how to research potential employers and translate their experiences into a successful job search strategy.

Prerequisite(s): CBA 102 and CBA 202.

CBA 310 Global Business Studies-Paris 12-18 Credits

A regular course load in an approved program at the Institut de Gestion Sociale Universite/American Business School in Paris, France. Courses will be selected from a list pre-approved by the global business program at Rider. All business courses are taught in English. Two of the regular courses for all students in the program will be French language and civilization courses.

Prerequisite(s): 2.5 GPA; junior standing; permission of global business program director and CBA dean.

CBA 311 Global Business Studies-Paris 12-18 Credits

A regular course load in an approved program at the Institut de Gestion Sociale Universite/American Business School in Paris, France. Courses will be selected from a list pre-approved by the global business program at Rider. All business courses are taught in English. Two of the regular courses for all students in the program will be French language and civilization courses.

Prerequisite(s): 2.5 GPA; junior standing; permission of global business program director and CBA dean.

CBA 312 Global Business Studies-Paris 12-18 Credits

A regular course load in an approved program. See director of global business major for details of any programs being offered abroad.

Prerequisite(s): 2.5 GPA; junior standing; permission of global business program director and CBA dean.

CBA 313 Global Business Studies-Paris 12-18 Credits

A regular course load in an approved program. See director of global business major for details of any programs being offered abroad.

Prerequisite(s): 2.5 GPA; junior standing; permission of global business program director and CBA dean.

CBA 315 International Business Tour 3 Credits

Provides students with the opportunity to observe various international business environments outside of the United States. Students should gain a better appreciation of how culture, history, and politics influence organizational dynamics, business functions, and business customs.

Prerequisite(s): Junior or senior standing and permission of instructor.

CBA 316 Nature's Business 3 Credits

This interdisciplinary business-science course examines the relationship between economic, legal, biological, and environmental concerns and analyzes how a particular country attempts to preserve its biological diversity without sacrificing its economic development. Topics include ecotourism and the biodiversity, geology, cultural norms, and legal and political systems of the country. The study tour component of the course provides students with an opportunity to observe various international business and scientific environments outside of the United States.

Prerequisite(s): Permission of instructor.

CBA 317 Emerging Nations Study Tour 3 Credits

Through readings, lectures, student-led discussions, guest speakers, and a short-term study abroad experience, students become familiar with the culture, history, religion, and political structure of an emerging country or region. This includes an overview of economic conditions and business practices, insights on doing business with the country or region, and the importance of the country or region in the global economy.

Prerequisite(s): junior or senior standing and permission of instructor.

CBA 320 Case Analysis & Presentation 3 Credits

This case analysis and presentation course provides the student with an opportunity to analyze real-world business opportunities or problems, to develop the ability to analyze a company and to then develop and present a set of recommendations. Students work in teams and present their analysis and recommendations to a panel of executives.

Prerequisite(s): No Freshmen.

CBA 366 Selected Topics in Business 3 Credits

The study of a topic (or combination of topics) that represent some dimension of business or has important implications for business. This study may be theoretical and/or applied in nature.

Prerequisite(s): Permission of instructor.

CBA 367 Selected Topics in Business 3 Credits

The study of a topic (or combination of topics) that represent some dimension of business or has important implications for business. This study may be theoretical and/or applied in nature.

Prerequisite(s): Permission of instructor.

CBA 368 Selected Topics in Business 3 Credits

The study of a topic (or combination of topics) that represent some dimension of business or has important implications for business. This study may be theoretical and/or applied in nature.

Prerequisite(s): Permission of instructor.

CBA 369 Selected Topics in Business 3 Credits

The study of a topic (or combination of topics) that represent some dimension of business or has important implications for business. This study may be theoretical and/or applied in nature.

Prerequisite(s): Permission of instructor.

CBA 399 CBA Co-Op 6 Credits

The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Eligible students include junior and senior business students with a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in the major. Co-op credits can be applied toward business or free elective requirements. Grading is on a pass/fail basis.

Prerequisite(s): All 200 level business core and non business core courses, BUS 300, and FIN 300.

CBA 410 Intercultural Communic Sem I 2 Credits

The seminar provides non-U.S. native students with a supportive forum for discussing intercultural and communication challenges. The course seeks to make the Rider experience personal and academically fulfilling and successful. The specific course objectives include providing information about culture transitions and differences, providing cultural information and enhanced communication skills, reflecting upon and analyzing culture communication differences inside and outside of the classroom, and building study cases to help future international students with their transition and adaptation to U.S. life. Pass/fail.

Prerequisite(s): Permission of instructor.

CBA 411 Intercultural Communic Sem II 1 Credits

The seminar provides non-U.S. native students with a supportive forum for discussing intercultural and communication challenges. The course seeks to make the Rider experience personal and academically fulfilling and successful. The specific course objectives include providing information about culture transitions and differences, providing cultural information and enhanced communication skills, reflecting upon and analyzing culture communication differences inside and outside of the classroom, and building study cases to help future international students with their transition and adaptation to U.S. life. Pass/fail.

Prerequisite(s): Permission of instructor.

CBA 490 Independent Research and Study 1-4 Credits**CBA 491 College of Business Internship 1-4 Credits**

Provides students an opportunity to supplement and apply classroom work in supervised employment with participating businesses, government offices or not-for-profit organizations. Requirements are to be determined by the faculty sponsor prior to the period of the internship and must include an academic component, preferably a written paper of project. There must also be a final evaluation from the organization on the intern's performance.

Prerequisite(s): Permission of instructor.

College Reading (CRC)

CRC 100 College Reading 3 Credits

This elective course helps students develop greater skill and efficiency in meeting the demands of college reading. Primary emphasis is placed upon introducing, demonstrating, and practicing appropriate study strategies that will enhance overall academic performance. Instruction focuses on reading college textbooks more efficiently and effectively, improving comprehension and retention, and reading critically. Time management, note-taking skills, and other study strategies are introduced, demonstrated, and practiced. Reading and writing assignments complement and reinforce class instruction.

Prerequisite: Students with verbal SAT score ≤ 470 or ACT English score < 21 or (test optional) HS GPA < 3.11 or students recommended for or seeking academic reading support.

Communication-UG (COM)

COM 102 Introduction to News Writing 3 Credits

Introduces students to routines of journalism, including reporting, writing and preparing content for print and web. Incorporates contemporary practices in multimedia journalism, including digital audio, video and photos, into traditional skills, with an emphasis on accuracy, clarity and professional style and voice. Class exercises are completed in a laboratory newsroom.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits

Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 104 Speech Communication 3 Credits

Examines basic communication principles and strategies of public speaking. Various genres of oral communication are studied, with an emphasis on extemporaneous and impromptu forms of delivery. Students research, prepare, and deliver speeches that are then used as the focal point for the discussion of effective speaking and listening. A number of speeches are videotaped. Students who received credit for COM 104S may not take this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

COM 104S Intro to Speech Communication 1 Credits

As part of the EOP program, this course is designed to improve the speaking and language skills of new college students. Through directed practice, students have the opportunity to develop poise and confidence in oral communication, as well as competence in analyzing and synthesizing messages. Emphasis is placed on development, organization, and delivery of speeches. To receive credit, a grade of "C" or higher must be earned. Students who receive credit for COM 104S may not take COM 104.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 106 Writing for the Communication Professions 3 Credits

Provides students with written communication writing strategies and tools. Applies theory and practice in communication to targeted audiences. Emphasizes the critical role writing plays in the communication workplace and provides an opportunity to evaluate and respond to real-life writing samples and situations.

COM 107 Writing for the Media 3 Credits

Introduces students to interviewing and persuasive writing techniques for print and electronic public relations and advertising formats. Teaches techniques for creating effective digital audio-visual aids and working with digital audio and video.

COM 110 Digital Survival Skills: Media Literacy and Critical Thinking 3 Credits

This course is designed to help students critically engage with the digital media they encounter in their daily lives and build savvy skills to navigate this endless online world of information and proliferating disinformation. The course examines the digital communication, information, entertainment – and even surveillance – that surrounds us all. Critical engagement includes understanding theories used to study the power of these media and practical techniques to assess the accuracy of digital content.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 150 Introduction to Critical Media 3 Credits

In this course, media is understood as any communication outlet or tool used to deliver information or data to a large number of people. This includes various components of the mass media communications industry, such as print media, publishing, news media, photography, popular culture artifacts (such as movies and film), broadcasting, advertising, billboards, etc. As such, this course teaches students how to think critically about the power and influence of mass media in their daily lives and the lives of others. The course is designed to teach students how to analyze mass mediated messages through a variety of theoretical and analytical frameworks through the lens of hegemonic discourse and power dynamics. These perspectives and approaches include, but are not limited to: Marxist, queer, psychoanalytical, rhetorical and feminist perspectives. Emphasis will be placed on the ways the media produce and reproduce societal norms, expectations and taken-for-granted beliefs. This course will provide insights into our understanding of the relationship between media and one's attitudes, values and beliefs.

COM 201 Communication Theory 3 Credits

Explores selected theories, models, and research methods in human communication, the dynamics of the communication process in various settings, and the role of communication in human interaction.

COM 202 Color Theory 3 Credits

Introduces the fundamentals of Color Theory by studying the scientific principles of the color wheel, the logic of color structure, as well as the emotive principles of color, color harmony, qualities, and combinations. This course will help students sharpen and train to recognize, describe, define, replicate, and identify color in everyday experience, especially in visual communication design.

COM 203 Introduction to Social Media 3 Credits

Introduces the tools and techniques of social media as an effective means of communication in a variety of organizational settings. Students will practice with a variety of social media platforms, explore the roles and responsibilities of a social media manager, discuss the importance of establishing social media policies, and learn how to develop a social media strategy as well as how to measure its effectiveness through social media analytics. In addition, students will discuss important issues such as how to handle an online crisis, and the legal and ethical implications of digital communication.

COM 204 Advanced Speech Communication 3 Credits

Provides students with the opportunity to further their study and practice of various types of speech communication. Moving beyond an introductory perspective, this course focuses on the development of critical, analytical, and pragmatic aspects of speech. The focus is divided between the discussion of theoretical models and a demonstrated competence of that material.

Prerequisite(s): COM 104 or COM 290.

COM 205 Theories of Persuasion 3 Credits

Analyzes the motivations that lead individuals and audiences to beliefs and actions and the techniques of achieving objectives through persuasion. Attention, interest, empathy, ethos, fear, and techniques of speakers, and those who use persuasion professionally are studied.

COM 207 Social Media and Social Change 3 Credits

Introduces students to Web/ social media tools and information distribution networks that have enabled people to mobilize new types of collective action, inform publics and advocate positions. Community production and sharing of knowledge (Wikipedia), culture (YouTube, Flickr, the blogosphere), and political organizing (colorofchange.org) are current manifestations of social changes that are continuing to bloom in the 21st century. In this course, Rider University students will become literate in active Web and social media participation with a focus on engaging with current social, political and cultural issues.

COM 210 News Reporting and Writing 3 Credits

Develops skills in hard-news reporting. Employs off-campus reporting assignments to refine information-gathering techniques such as interviewing, observation, and use of government documents and other contextual materials. Includes reporting and writing about police news, state and local government, the criminal justice system, science, business, and sports.

Prerequisite(s): COM 102.

COM 211 Copy Editing 3 Credits

Teaches all phases of copy editing for news and public relations: marking of copy, online editing, fact checking, building and shaping news and feature stories, applying mechanical style, building an ear for graceful English, and safeguarding against legal and ethical problems. Provides comprehensive review of grammar, spelling and punctuation, along with intensive practice in writing headlines and captions and editing wire copy.

Prerequisite(s): COM 102.

COM 212 Digital Publication Design 3 Credits

Students will explore the relationships between theory and practice, tradition and innovation, history and ever changing technological and aesthetic trends in publication design. Students will learn to use graphic image and typography as design elements in print media, such as newspaper and newsletter, as well as online media, such as e-magazine and e-book. Students will also learn the interactivity design for online publications. The course directs students to apply these concepts and skills to the production of published materials with digital publishing systems.

COM 213 Typography 3 Credits

Introduces students to the basics of typographic techniques and design aesthetics and provides an overview of the basic fundamentals of type design as they apply to graphics, advertising, the arts, and other areas of visual communication. The course focuses on how typography can be used as a communicative device as well as a graphic, compositional, and expressive element.

COM 220 Voice and Articulation 3 Credits

Increases the student's knowledge of the vocal elements of oral communication and improves use of voice and articulation. Introduces anatomy and physiology for enhanced vocal production. Analyzes volume, rate, pitch, quality, phrasing, stress, and inflection. Presents the International Phonetic Alphabet as a means of developing correct articulation and pronunciation. Uses classroom exercises and tape recording for feedback and learning.

COM 221 Speaking for Broadcast and Digital Media 3 Credits

Introduces the principles and techniques of speaking in traditional and digital media through the preparation and presentation of copy for live television and radio as well as recorded video and audio for the web. Students will apply the principles and techniques to a number of contexts including television and radio news, music and sports announcing, interviewing and talk programs, as well as public service announcements. **Prerequisite(s):** COM 104 or COM 290.

COM 232 Podcasting I 3 Credits

Podcasting I will offer students an innovative reading, research, discussion and creative lab experience. Using fictional storytelling, broadcast journalism and talk show formats, students will learn the basics of producing an original, creative podcast. They will gain insight on how to communicate and successfully market a podcast towards a mass audience. Students would also receive a basic overview of podcasting, so they can continue work to podcast on their own after taking Podcasting I.

COM 233 Writing for Broadcast 3 Credits

Introduces diverse and highly structured writing styles and formats used in writing for broadcast. With focus on effective and creative writing using broadcast style, students will be exposed to the fundamentals of writing dramatic and non-dramatic material for radio and television including station IDs and liners, public service announcements and commercials, news and public affairs programs, and short dramatic and documentary scripts. Through lectures, case discussions, in-class assignments, and critiques, emphasis will be on the practical application of basic rules and conventions common to broadcast writing from copy preparation to on-air delivery.

COM 234 Audio Production 3 Credits

Provides a laboratory study of audio production techniques, and performance. Introduces the fundamental properties of sound as applied in modern audio production at radio and television stations, sound studios, and production houses. Students conduct lab exercises in editing, mixing, and digital recording using ProTools. Students perform a variety of genres including news, commercials, dramas, and promos.

COM 237 Rhetoric in the Digital Age 3 Credits

Focuses on the critical examination of the major public discourses in digital media. Students will learn classical and modern rhetorical theory such as Aristotle's Rhetoric, power, publics and counterpublics, and argumentation. Students will apply these theoretical aspects to critically engage digital texts such as memes, emojis, hashtags, trolls, blogs/reviews, and video game narratives.

COM 239 Script Writing for Comic Books 3 Credits

The medium of comics presents a fascinating vehicle to communicate through a sequence of text and images. Comic books, graphic novels and other forms of the genre (web comics, comic strips, etc.) hold a significant place in modern society, history and culture. This course is designed to orient students towards writing comic book scripts. Focus will be placed on students creating and writing their own stories. Students will learn basic concepts around scripting for sequential art, story research, the relationship between text and image, comic panel theory, working within page-length restrictions and various scripting formats. Beyond learning how to write a comic book, students will explore topics such as: the different types of script formats, plot points, writing sound effects, story structure and outlining. No artistic experience needed.

COM 240 Public Relations 3 Credits

Introduces current theories and practices of public relations, with emphasis on facilitating two-way communication with various publics. Explores approaches to public relations problems by critically analyzing case studies and applying theories and techniques to realistic situations.

COM 251 Interpersonal Communication 3 Credits

Focuses on the study of various communication concepts and theories and the development of interpersonal skills and sensitivities. More specifically, students will participate in lectures, exercises, and projects while exploring the role and function of relationships in their professional, social, and personal lives.

COM 252 Intercultural Communication 3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands-on application. Note: This course is crosslisted as GLS 252. Students may not get credit for both COM 252 and GLS 252.

COM 253 Organizational Communication 3 Credits

Focuses on the ongoing communication processes in organizations. This course examines how and why organizations develop policies and procedures that both encourage and yet constrain creativity and autonomy in employees. It also introduces various management skills to balance the dynamic in organizations. Finally, the course introduces students to various communication technologies that enable communication processes in organizations. Students will also have opportunities to participate in creating organizational dynamics through role-playing exercises, case studies, and other kinds of experiential learning.

COM 254 Intro to Health Communication 3 Credits

Health communication has been shown to have a positive impact on a number of facets of the medical visit, including patient outcomes, patient satisfaction, and job performance and satisfaction. This course will provide students with tools to implement health communication practices in a healthcare setting in order to improve these areas. In addition, health communication is particularly useful in cross-cultural situations, both in regard to the patient-provider relationship, when the ethnicities of the two parties may be different, and when cultural beliefs may impact a patient's medical wishes. Part of the tools for implementing health communication into the practice setting includes an understanding of the role that culture can play in healthcare and the development of strategies to provide optimal medical care while also respecting cultural intricacies.

COM 261 Introduction to Web Design 3 Credits

Introduces students to digital graphics, text, audio and video for Web design using Adobe Creative Suite. Students will learn the basics of audio, video, graphic, and interactive software along with theories of design and perception that underlie effective presentation of digital messages.

COM 262 Graphic Imaging for Digital Media 3 Credits

Teaches students techniques for image development, and image preparation for various multimedia applications. Emphasis is placed on color calibration and palette issues, image manipulation, advanced image selection techniques, transparency and masking, multimedia authoring file formats, and dynamic image design. Students will be expected to participate in critiques of professional designs in order to learn to critically evaluate their work and their fellow students' work.

Prerequisite(s): COM 261 or permission of instructor.

COM 263 History and Principles of Graphic Design 3 Credits

Covers the history and principles of graphic design from analog art through the digital revolution. The elements and principles of design will be used to study stylistic progressions, artistic techniques, design innovations, and mechanical inventions. Material will be presented through a combination of illustrated lectures and discussions.

COM 264 Digital Media: Theory and Practice 3 Credits

Introduces the ways that the merging of media industries and the intersection and integration of various media platforms and technologies impact our lives. While the primary focus will be on digital and mobile technologies and practices, the course will also cover the convergence of digital technologies in a wide range of media areas, including journalism, social media, television and entertainment. The course will offer students broad conceptual frameworks for thinking about how the emergence and evolution of digital as well as mobile communication technologies have changed the communication and journalism industries and how they are reshaping content. In addition, the course is intended to allow students to use different digital communication technologies.

COM 265 3D Graphic Animation 3 Credits

Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 270 Sports Multimedia Reporting 3 Credits

COM 270 Sports Multimedia Reporting. Develops skills in hard-news sports reporting, game coverage, and the production of introductory multimedia and social media sports content. Employs out-of-the-classroom reporting assignments to refine information gathering techniques such as interviewing, observation, and use of documents and other contextual materials. Includes reporting and writing on sports games, teams, players, coaches, athletic issues/controversies, and the business of sports.

Prerequisite(s): COM 102. Introduction to News Writing.

COM 280 Issues in Event Planning 3 Credits

Offers students education in event planning, production, and supervision for varied professional applications. Emphasis will be placed on planning, budgeting, and organizing small and large events for educational, institutional, non-profit, and professional groups. Students will participate in the entire process of event planning, with specific experiences in applying communication theory to actual projects.

Prerequisite(s): COM 240 or MKT 200.

COM 290 Professional/Strategic Speech 3 Credits

Provides students with practical information necessary for effective communication in various business and professional settings. Covers communication processes, principles, and models in the modern organization. Class assignments are given with emphasis on developing a knowledge and practical understanding of informative, persuasive, and impromptu presentations. Limited to students enrolled in the College of Business Administration.

COM 292 Content for Social Media 3 Credits

Focuses on creating social media content that will inform, entertain, and engage audiences within a variety of organizational and business contexts. Students will learn about message planning for specific platforms and creative ways to use digital content to support public relations, branding, customer, and media relations.

COM 301 Communication Law 3 Credits

Critically examines the legal limits and privileges affecting freedom of expression, especially in publishing, advertising, film, telecasting, and cyberspace. Places particular emphasis on the historical and philosophical foundations of the freedoms and limitations of communication in the United States.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 304 Rhetoric for Politics and Law 3 Credits

Introduces the theory and strategy of crafting persuasive messages and cultivating relationships with the media in the context of judicial, deliberative, and epideictic genres of rhetoric. In addition, students will learn how to plan and coordinate media briefings and how to prepare and participate in a media interview.

Prerequisite(s): COM 104 or COM 290.

COM 312 Special Topics in Journalistic Writing 3 Credits

Provides students with the opportunity to explore specialized topics in journalistic reporting and writing. Each course will focus on a specific area in the broad field of journalism. Examples include business reporting, health reporting, and sports reporting.

Prerequisite(s): COM 102 or COM 107.

COM 314 Development & Communication of Nonprofit Organizations in Sport 3 Credits

This course introduces students to developing a nonprofit organization in the sports industry. Emphasis will be placed on communicating goals to the public, budgeting, managing, and fundraising in order to build a successful nonprofit sport organization. Throughout the semester, students will learn necessary steps to create their own nonprofit 501(c)(3) while developing plans for their own organization. This work will culminate with a presentation of a detailed plan and report to a committee of sports/nonprofit professionals who will foster ways to actually help launch the entity.

Prerequisite(s): COM 347 and MKT 280.

COM 315 Computer Assisted Reporting 3 Credits

Develops advanced reporting techniques for researching and writing in-depth news stories and investigative articles. Uses state-of-the-art computer-assisted reporting methods including finding and mining data bases on the Internet, creating spreadsheets to analyze data, and employing data base manager software to sort and summarize information in government documents and other specialized resources. Focuses on conceptualizing of story ideas, planning major projects, gathering information by means of data bases, participant-observation, interviews, and analysis of public documents. Emphasizes organizing large quantities of material and presenting it in a meaningful context, including with information graphics.

Prerequisite(s): COM 210 or permission of instructor.

COM 316 Feature Writing 3 Credits

Focuses on problems and requirements of newspaper, magazine, public relations, and free-lance nonfiction writing. Students write features designed for acceptance in print, broadcast and digital media and learn marketing techniques.

Prerequisite(s): COM 102 or COM 107, English writing concentration, or permission of instructor.

COM 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GND 318. Students may not get credit for both COM 318 and GND 318.

COM 321 Stand Up Comedy 3 Credits

Explores the theory, history, and practice of stand up and comedy writing as a contemporary rhetorical practice. Students will learn the various mechanics of joke construction, the nature of comedic narratives, and how humor can be used to engage in personal, social, cultural, and political commentary through the analysis of comedic performances. The class will also feature workshops in which students create and refine their comedic performances and personae. The class will culminate with students performing their material in front of an audience.

Prerequisite(s): COM 104: Speech Communication or COM 290: Professional and Strategic Speech.

COM 322 Argumentation and Advocacy 3 Credits

Investigates the theory and practice of speech communication that seeks to persuade by inferential argumentation. Concentrates on theories, practices, and research in argumentation and debate, blended with speaking experience in analyzing and advocating controversial topics.

Prerequisite(s): COM 104 or COM 290.

COM 323 Oral Interpretation of Literature 3 Credits

Provides an orientation to the field of oral performance. Students select literary texts, adapt the material to the audience and prepare it for presentation. Emphasizes the development of voice, articulation, and kinesic behavior. Presentations to the class are critiqued.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 324 Political Rhetoric and Democratic Culture 3 Credits

Explores how political rhetoric has shaped the democratic culture of the United States. Students will focus on the role political rhetoric plays in the struggle to contest and redefine the meaning of the Declaration of Independence's promise of life, liberty and the pursuit of happiness. In so doing this course attempts to develop an appreciation for the ways in which the challenges to extant laws and traditions—and in particular the language choices and modes of argument used in those challenges—have expanded the meanings of democracy.

Prerequisite(s): COM 105 or POL 100 or POL 102.

COM 325 Rhetoric of American Labor 3 Credits

This course examines speeches, tracts, lyrics, newspapers, posters, poems, and films of the labor movement in America. The course also examines the historical context of the labor movement to better understand and appreciate the public discourse of labor. The course explores how rhetoric has been used to give force to ideas and lead to actions, how we develop a sense of how the values and norms of our society were reflected and shaped, and we understand how that history influences our collective perception in the present. Special attention is paid to the nature and locus of power, the interplay of conflict and confrontation, and the speaker's attempt to maintain or change the allocation of that power.

COM 326 Social Media Analytics 3 Credits

Examines how social media analytics are used to improve and inform an organization's decision-making process to develop, manage, and evaluate the success of an organization's social media strategy. Students will learn how to use analytics tools, and analyze and use data to plan and evaluate the effectiveness of social media campaigns.

Prerequisite(s): COM 203.

COM 327 Career Development in the Sports Marketplace 3 Credits

This course provides a survey and analysis of various professional opportunities for those looking to pursue a career in athletics and sports. The exploration and career development is a continuation of prior sports media and communication courses with an emphasis on developing techniques and strategies for entering a very competitive marketplace. Students will engage in detailed market analysis for changing trends while developing a network of contacts through assignments based on interviews with professionals. Beyond learning about these professions, student assignments will be centered on enhancing relevant skills needed to obtain employment in the areas of athletics and sports. **Prereq(s):** COM 270, COM 347, and MKT 280.

COM 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a foreign culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

COM 331 Television News Production 3 Credits

In this course, students will learn to write, shoot, edit and produce video news for television, the Internet and social media. Students will be introduced to the necessary video and digital production techniques, software and technologies for producing and reporting both individual news packages and entire news programs. Through this class, students will sharpen their news judgement and learn the roles and responsibilities of television news reporters and producers.

Prerequisite(s): COM 131 or COM 230.

COM 332 Topics in Advanced Podcasting and Radio 3 Credits

Develops advanced podcasting and radio techniques, allowing students to focus closely on researching, recording, script writing, producing and distributing podcast and/or radio content in specialized genres. Students produce complex, long-form audio features suitable either for terrestrial broadcast and online/mobile podcasts. Topics may include journalism and news; narrative storytelling; sports; politics; business; and the arts. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): COM 232, COM 233, COM 234.

COM 337 Music Production for Mass Media 3 Credits

Offers students education in audio production techniques for music and other advanced audio material. Building on theory and practice introduced in the prerequisite, the class will instruct students in the theory behind acoustics and electronics as well as the digital tools and media. Those theoretical studies will be put to practice through exercises in recording music, making selections from music libraries, multi-track recording, arranging, editing, mixing and mastering. Students will begin to develop both an engineer's attention to audio detail and a musician's sense of artistry. Putting these skills to use, the students will produce complete musical works of varying musical styles, working both individually and in teams.

Prerequisite(s): COM 234.

COM 338 Writing for Broadcast II 3 Credits

Building on COM 233 Writing for Broadcast, this course provides a hands-on approach to more sophisticated reporting and interviewing techniques and writing formats used in long-form radio and television programs. This course will expose students to the following broadcast script writing areas: features, documentaries and reality programs. It will also cover writing for interview/talk show programs, music, comedy and variety programs. Students will also be exposed to writing for corporate, educational and children's programming. Students will have hands-on experiences writing, producing and editing news pieces and webcasts for student and area media outlets and web sites.

COM 341 Public Relations Writing and Strategy 3 Credits

Applies communication theory to writing and editorial processes and production techniques to create public relations materials; includes press releases, industrial publications, social media, trade publications, brochures, newsletters, stockholder reports, and multimedia platforms.

Prerequisite(s): COM 107, COM 240, or permission of instructor.

COM 347 Sports Communication 3 Credits

Critically examines the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): COM 240 or permission of instructor.

COM 348 Communication Research Methods 3 Credits

Introduces students to the research methods used to study communication problems and processes. Students will learn how researchers plan and design research studies, explore the methodological considerations of both qualitative and quantitative methods, and have an opportunity to gain hands-on experience in conducting research on communication-related issues.

Prerequisite(s): COM 105; junior or senior standing.

COM 350 Team & Group Communication 3 Credits

Examines the communication process as it relates to the small group. Theoretical constructs including motivation, group climate, attraction, leadership, decision making, problem solving and roles are analyzed. Utilizes group experience to study and evaluate the dynamics and effectiveness of interpersonal systems.

COM 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator. Note: This course is crosslisted as GLS 352. Students may not get credit for both COM 352 and GLS 352.

COM 353 Nonverbal Communication 3 Credits

Investigates studies in and theories of nonverbal communication. Lectures and experiential activities explore the effect of status, culture, and gender upon kinesics, physical characteristics, proxemics, tactile communication, paralanguages, artifacts, and environmental factors.

Prerequisite(s): COM 104 or COM 290 or permission of instructor.

COM 360 Advanced Publication Design and Presentation 3 Credits

Builds on elementary knowledge of graphic design to teach the principles of advanced layout, and computer graphics. Introduces students to industry standard drawing software and builds on their knowledge of layout software gained in the prerequisite course. Provides an understanding of the use of logos, infographics and magazine layout, and of the theoretical bases of color for print production.

Prerequisite(s): COM 212.

COM 361 Photography 3 Credits

Using digital SLR cameras, introduces students to professional methods of shooting varied subjects while applying a range of compositions and styles. Using Photoshop, students edit images for publication in print and on the Internet. Hands-on coursework is grounded in theory, history, aesthetics, and ethics. Some cameras are available for loan from the University.

COM 363 Converging Digital Media 3 Credits

Examines the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COM 364 Web Design II 3 Credits

Equips students with the theories and practical techniques required to produce effective digital text, graphics, and animations for the Web. Discusses theories behind the use of these media in terms of effective communication and interaction. Introduces students to different computer platforms and requirements for cross-platform media.

Prerequisite(s): COM 261 or permission of instructor.

COM 365 Graphic Animation 3 Credits

Offers students education in graphic animation theories, animation development techniques, and animation preparation for various multimedia applications. Emphasis is placed on the design principles in animated communication and animation techniques. The course covers the integration of static images in animation, graphic animation techniques, animation compression, animation rendering, input/output file formats, and animation delivery. The primary software for this course is Adobe Photoshop and MacMedia Flash. Students will be expected to participate in critiques of professional animation designs in order to learn to evaluate critically their own work and their fellow students' work.

Prerequisite(s): COM 262 or permission of instructor.

COM 366 Project Management in Graphic Design 3 Credits

Explores the creative process of graphic design while developing an understanding of the methods employed in problem solving in the industry standard design software packages. Students learn how to create a hierarchy of information through the ordering of elements into a comprehensive visual unity. They consider the relationship between content and page size, proportion, grid and margins. Students learn about typography as a design element and how it works with other visual elements in design. In order to develop an understanding of the project-planning process for either printer or Web projects, students will develop and present a series of projects that will build on one another to develop their "visual voice." Students will be evaluated on their ability to apply course material to the projects to create professional-quality work; their ability to apply exchange ideas and accept and apply constructive criticism; and on their participation in class discussions, critiques and presentations.

Prerequisite(s): COM 262, COM 360.

COM 367 3D Graphic Animation II 3 Credits

Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.

Prerequisite(s): COM 265.

COM 370 Sports Television and Field Production 3 Credits

Provides an in-depth study of advanced techniques in sports field production for television. Individual and group field production assignments will involve planning and executing single camera production in a sports setting. Previously developed video production skills will be refined, and students will gain increased competency and sophistication in all areas of sports field production including: production planning, camera operations, lighting, sound, and digital non-linear editing. Designed to prepare students to effectively function in the industry as a member of a professional field production team. In field situations, students create, produce, shoot, and edit sports content.

Prerequisite(s): COM 131.

COM 371 Sports Feature Writing 3 Credits

Focuses on developing reporting and writing skills for newspaper, magazine, public relations, and free-lance nonfiction sports writing. Students will study published examples of outstanding sports feature writing, and write their own sports feature articles with social media and multimedia components. Instead of traditional game coverage, this course focuses on covering sports personalities, issues and themes.

Prerequisite(s): COM 102, COM 270.

COM 380 Broadcast News Practicum 3 Credits

Provides a workshop dedicated to the planning and creation of professional caliber broadcast news content for the campus television network and beyond. This course will provide an opportunity for students to develop writing, graphic, audio, video design and production skills in an experiential setting. Students will create materials to be used by the Rider University Network and for broadcast, cable and Internet distribution. Students can be involved in any and all phases of creating content from project conception through implementation. Students will gain valuable experience with, a greater appreciation for, and increased competency in creating professional media content. This class will also prepare students to more effectively function in the communication industry as an effective member of a professional production team. Since topics will vary by semester and instructor, this course may be repeated once.

Prerequisite(s): Permission of instructor.

COM 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

COM 391 Communication Criticism 3 Credits

Investigates and analyzes various methods of communication criticism and their applications to the understanding and evaluation of public and media discourses. Introduces theories and perspectives to assist in the analysis of those discourses. Methods include Aristotelean, Burkean, and ideological criticism.

COM 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media.

Note: This course is crosslisted as GLS 393. Students may not get credit for both COM 393 and GLS 393.

COM 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; Pass/fail.

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

COM 400 Senior Seminar Communication 3 Credits

Provides students with the opportunity to explore critical issues in communication and journalism in a dynamic and engaging context. Students conceptualize problems, develop hypotheses, review literature, design appropriate techniques of inquiry, conduct their research, and present their findings orally to the seminar and in writing to the instructor. Senior journalism and communication majors only.

COM 415 In-Depth Reporting 3 Credits

Utilizes advanced tools and techniques of contemporary in-depth reporting for print and multimedia. Covering multifaceted stories, students will learn how to do balanced multi-sourced field reporting and writing using primary and secondary sources including human sources, electronic documents and databases, both online and offline. Emphasis will be placed on writing stories that answer not only who, what, when and where questions but also the why, the how and the "so what?" questions. Students will also be exposed to some of the best investigative work of journalists past and present as models for analysis and discussion.

Prerequisite(s): COM 210.

COM 426 Social Media Capstone 3 Credits

A client-based social media campaign will be developed from conception to evaluation based on research and digital media strategies. Focus will be on engagement with audiences, managing social media, and evaluation using social media metrics. Permission of instructor required.

Prerequisite(s): COM 203, COM 292.

COM 431 Advanced Television News Production 3 Credits

This course will focus on writing, reporting and producing a video news magazine program. Students will research, write, shoot, edit and report feature stories that will be included in a bi-weekly news magazine program that students will produce. Emphasis will be placed on meeting deadlines and developing the professional skills required of reporters creating visual stories for television, the Internet and Social Media. During the course, students will learn to sharpen their video production, writing and leadership skills, as well as their news judgment in creating and reporting digital content.

COM 432 Radio Station Operations Capstone 3 Credits

Students will practice the advanced study of the internal workings of a radio station and the podcasting and radio industry through hands-on work at 107.7 FM The Bronc, participating in multiple facets of the operation, including: programming, on-air broadcast, podcasting, audio software editing, event planning, public relations, business of media and advertising. Seniors only. Permission of instructor required.

COM 434 Advanced Structure of Sound in Podcasting and Radio 3 Credits

Provides in-depth study of advanced techniques in audio recording and radio programming and production. Individual and group production of short and long-form radio projects including: promotional spots, features, music programming, and news. Students will be involved in all phases of programming and production for radio including: project conception, development, management, and implementation. Selected student projects will air on the student radio station, 107.7 The Bronc.

Prerequisite(s): COM 234.

COM 440 Cases & Campaigns in Public Relations 3 Credits

Critically analyzes public relations case problems in industry, labor, education, government, social welfare, and trade associations. Emphasizes problem solving through the use of communication theories, public relations techniques, creative thinking, and the development of professional goals and standards. Employs realistic simulation exercises and actual case studies to develop and critique students' ability to demonstrate this knowledge in professional situations.

Prerequisite(s): COM 341 or permission of instructor.

COM 452 Seminar in Communication Studies 3 Credits

Offers an in-depth investigation of relational communication. Students explore the many complexities involved in human interaction and interpersonal dynamics. Social and psychological implications of various communicative relationships ranging from cross-gender communication to dysfunctional family systems to intercultural interactions are included.

Prerequisite(s): COM 348, COM 350, or permission of instructor.

COM 460 Web Design III 3 Credits

Builds on previous courses to refine students' understanding of theories and procedures of digital media development. Further develops Web site creation and project management theories. Students develop advanced Web creation techniques, including responsible site production.

Prerequisite(s): COM 364.

COM 462 Advanced Graphic Design and Portfolio 3 Credits

Explores the processes of graphic design by creating independent and creative solutions to a series of design problems. Students expand their proficiency in all aspects of the design process, including creative brainstorming, conceptualizing, critical thinking and presentation.

Students take a design project to both print and digital formats using Photoshop, Illustrator, and InDesign. Students develop and present a balanced portfolio as the culmination of their experience in the course.

Prerequisite(s): ART 103, ART 105, COM 262, and COM 360.

COM 470 Live Sports Reporting Capstone 3 Credits

Focuses on student production of live, professional-level sports media content. Students will combine reporting, writing, social media and multimedia from live sporting events. Live-coverage will include Rider University teams and regional or professional sporting events. The course is open to senior Sports Media Majors, or with the permission of the instructor.

Prerequisite(s): COM 370, COM 371.

COM 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

COM 491 Internship in Communication 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Computer Information Systems (CIS)

CIS 185 Information Systems Essentials 3 Credits

This course will provide students with a conceptual understanding and hands-on practice developing spreadsheets, creating effective visualizations, and utilizing relational databases. Students will also be expected to complete a project related to a current technology-related topic. At the completion of this course students will be able to apply the appropriate information systems technology tools (specifically spreadsheets, visualization applications, and relational databases) to a variety of problem solving activities.

CIS 200 Application Development with JavaScript 3 Credits

In the early 1990s, Tim Berners-Lee created a set of technologies to allow information sharing at the CERN particle accelerator in Europe. These technologies dramatically changed the face of computing and became what we know today as the Web. Understanding how to develop and manage applications for the Web is a requirement for the information system professional. Because of the ease of development, deployment, maintenance and general scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using HTML and CCS, how to control user interaction with those pages using the JavaScript programming language. The programming basics of variable declaration and usage, program flow of control, function declaration and calling, and object usage and declaration will also be shown. The use of the JQuery Javascript library to ease the development of Web pages will also be shown.

CIS 220 Application Development with JavaScript and Python 3 Credits

In the early 1990s, a set of network technologies was combined to create a platform for application development. These technologies are now referred to as the Web. Because of the ease of development, deployment, maintenance, and scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. Understanding how to develop and manage applications for the Web is vital for information systems professionals. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using the Hypertext Markup Language (HTML) and Cascading Style Sheets (CSS), and managing user interaction in those pages using the JavaScript programming language. The process of creating dynamic web pages using the PHP programming language on the Web server will also be taught.

Prerequisite(s): CIS 200.

CIS 230 Introduction to Cybersecurity 3 Credits

This course introduces students to cybersecurity, the process of securing computers and the information they store. Coverage includes security attacks and attack prevention and mediation, security firewalls, PC and server security, authentication methods and procedures, and network security. Through lecture and hands-on labs students will learn how computer systems can be attacked and how computer professionals can manage the risks and potential damage from these attacks.

CIS 255 Intro to Game Design & Development 3 Credits

The basic concepts, logic, techniques, tools, and vocabulary associated with interactive, digital game and simulation development will be explored through a combination of lectures, discussions, and hands-on learning. Knowledge and skills derived can be applied to a wide variety of business and other organizational settings globally for interactive simulations, games, and education.

CIS 260 Business Graphics 3 Credits

Basic color theory, typography, and page/slide layout are presented. Students utilize presentation, word processing and photo editing applications to create and edit various documents through hands-on labs and projects.

Prerequisite(s): CIS 185 or permission of instructor.

CIS 270 Computer Networking 3 Credits

This course provides an introduction to business data communications and networking. The Internet and OSI models are discussed. Network technologies include local area networks, backbone, wide area networks, and the Internet. Introduction to network design, security, and network management are also provided.

Prerequisite(s): CIS 185.

CIS 300 Programming with Java 3 Credits

Students will learn the basic concepts of object-oriented programming as contrasted with traditionally structured programming and will develop applications using the Java programming language.

Prerequisite(s): CIS 200.

CIS 309 Data Structures & Cmptr Archit 3 Credits

An introduction to linked lists, stacks, queues, trees, pointers, and sorting and searching algorithms. Students will learn the technical details of data storage and manipulation along with the concepts of program execution, and will use tools such as hex-editors and debuggers.

Prerequisite(s): CIS 185 or permission of instructor.

CIS 315 Integrated Business with SAP 3 Credits

This course provides an introduction to enterprise resource planning (ERP) systems and addresses how integrated information systems improve business operations. Students will learn about functional business areas and business processes, and understand the problems inherent in un-integrated enterprise information systems. Using SAP software and case studies, students will learn how ERP systems are being used to facilitate integrated, real-time management decision making.

Prerequisite(s): CIS 185 and ACC 210.

CIS 319 Computer Forensics 3 Credits

Students will use computers to obtain and analyze evidence found on storage devices such as those confiscated under warrant, and learn how to trace digital activities. Criminal and investigative procedures will be explored in depth.

Prerequisite(s): CIS 185.

CIS 320 Cloud Computing Administration 3 Credits

Students will learn the process of creating or provisioning a cloud computing environment. Content will include the provisioning of operating system resources in a cloud environment, operating system installation, configuration and maintenance. Virtualization, the process of creating multiple operating system environments on a single piece of hardware will be covered in some detail. Troubleshooting problems in the virtualization environment and in the operating system environment will also be covered. Hands-on labs will be used throughout. Both Windows and Linux operating systems will be used.

Prerequisites: CIS 185.

CIS 325 User-Centered Design 3 Credits

This course introduces students to the design and evaluation of interactive and internet-based devices and systems, including methods to understand user needs and requirements, design and prototype alternative systems, and evaluate system usability. Topics include interaction design, human factors, requirement gathering techniques, protocol analysis, usability testing, and heuristics evaluation.

Prerequisite(s): Junior standing.

CIS 330 Database Systems 3 Credits

This course involves the study of computer databases. Major topics include relational databases, use of the structured query language (SQL) to query relational databases, and design and maintenance of relational databases.

Prerequisite(s): CIS 185.

CIS 340 Electronic Commerce 3 Credits

Students will learn about the most current e-commerce technologies and business models through readings, case studies, and hands-on projects. Students will gain experience using business data analytics tools to understand and evaluate the value of data that is generated and collected from various e-commerce platforms on the Internet.

CIS 350 Practical Business Analytics with Excel 3 Credits

This is a required course for the Business Analytics major/minor. This course will provide the student with an opportunity to gain proficiency in analyzing and visualizing data using Excel. The learning experience includes not only classic data tools, such as PivotTables, VLOOKUP, and data visualization, but also more advanced data tools such as descriptive statistics, inferential statistics, predictive analytics, and optimization using Excel Solver.

Prerequisite(s): BDA 201.

CIS 360 Data Mining 3 Credits

This course deals with modern technologies for data analysis. Hands-on exercises for data retrieval, data visualization and predictive analytics will be carried out using up-to-date methodologies and software tools. The full data mining life cycle will be covered from recognizing business problems and opportunities amenable to data mining analysis through deploying and monitoring solutions.

Prerequisite(s): CIS 185 with a minimum grade of D .

CIS 370 Systems Analysis and Design Project 3 Credits

Topics include modeling techniques and methodologies to address the planning, analysis, design, and implementation of high quality systems, delivered on time and within budget. Using rapid application development tools, students will also construct an operational system within the span of a single semester. Issues and tools related to the management of project teams are also discussed.

Prerequisite(s): CIS 330.

CIS 375 Business Process Design for a Global Economy 3 Credits

The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Various referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.

Prerequisite(s): junior standing.

CIS 377 Risk Management and Compliance for Information Security 3 Credits

This course will use a holistic approach to examine the management of information security risk in relation to the strategic goals of the business organization. Students taking this course will learn to identify threats, threat agents, potential exploits and the information assets which will be impacted by those exploits. The risk management process will specifically examine threat agents, and the amplifiers, catalysts, and inhibitors to those threats. Using a process which assigns a weight to various threats, and a comprehensive risk analysis model will be developed.

CIS 385 Management Information Systems 3 Credits

This course will enhance students' digital dexterity and familiarity with existing and emerging information technologies, emphasizing skills of abstraction in relation to digital strategy and organizational change, innovation, analytics, and ethics. This course will also provide hands-on experience with at least one essential business technology. At the completion of the course, students will have an understanding of the business-related, policy, societal, and ethical implications associated with modern information systems.

Prerequisite(s): CIS 185 and junior or senior standing.

CIS 388 Design Thinking 3 Credits

This undergraduate course on Design Thinking provides students with a framework for dealing with unstructured problems to create innovative business solutions. Students in this course will learn about the complex and iterative process of design thinking and its several phases, including problem finding, observation, visualization and sense making, ideation, prototyping and testing, and explore the value of design thinking for creating business solutions with lasting impact. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

Prerequisite(s): JR/SR, 54+ credits, or POI.

CIS 390 Project Management 3 Credits

This course introduces students to general project management, the process of organizing resources to achieve business goals. Topics include the identification, approval, analysis, and general management of complex business projects. Project management tools, reports, techniques, and approaches will be covered.

Prerequisite(s): CIS 185.

CIS 399 The Co-Operative Experience 6 Credits

The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their computer information systems and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Eligible students include junior computer information systems majors with a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in any computer information systems coursework completed prior to submission of the co-op application. Three of the co-op credits can be applied toward the computer information systems major, and three credits can be applied toward business or free elective requirements. Grading is on a pass/fail basis.

Prerequisite(s): Completion of two of the three courses: CIS 200, CIS 270, and CIS330.

CIS 410 Selected Topics in Information Systems 3 Credits

Information and communication technologies are evolving rapidly and continually. The Special Topics course facilitates the exploration of a selected topic (or combination of topics) that represents a recent technological advance with important and direct implications in the field of computer information systems. Current research, readings, lectures, discussions and/or hands-on computer experience or other appropriate measures will be employed to stimulate student learning.

Prerequisite(s): to be determined by instructor.

CIS 430 Enterprise Integration 3 Credits

The major focus of this course includes the forces driving enterprise integration as well as the management decisions associated with the design and implementation of enterprise systems. Students will use SAP ERP extensively to configure, build, test, and implement an enterprise system for a real business environment from the ground up.

Prerequisite(s): CIS 315.

CIS 490 Independent Study: Research and Creative Expression 1-4 Credits

Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

Prerequisite(s): permission of instructor.

CIS 491 Computer Information Systems Internship 3 Credits

This is an honors course that provides the student with approximately two months of supervised employment with participating companies. Students are given a variety of information technology experiences. They are required to complete a term paper and/or to make an oral presentation to the faculty. Grading is on a pass/fail basis.

Prerequisite(s): permission of instructor.

Computer Science (CSC)**CSC 105 Fundamentals of Computer Science 3 Credits**

This course offers an introduction to fundamental areas of study in computer science - their applications, capabilities, and boundaries. Topics include computer organization, algorithms design and analysis, programming paradigms, software development process, operating systems responsibilities, applications, and communications. Hands-on python programming is also introduced in this course from a non-mathematical problem-solving point of view. Basic programming constructs include statements, expressions, variables, control structures, functions, and file operation.

CSC 110 Computer Science I 3 Credits

This course is an introduction to computer science and modern computing fundamentals. Students will develop programs and algorithms to solve a variety of problems posed in the natural sciences. Students will learn to code in Python, a widely adopted language, and learn the basics of algorithms, data types, program structure and development,

Prerequisite(s): MTH 105 or concurrent enrollment or MTH 210 or concurrent enrollment.

CSC 120 Computer Science II 3 Credits

This course is an introduction to developing algorithms using abstract data types and the object-oriented methodology. Students will design and implement robust ADTs using Java, an object-oriented programming language. Students will learn how to develop their own algorithms and the best techniques for analyzing their performance. Students will be able to adapt the course knowledge to real world, practical challenges.

Prerequisite(s): CSC 110.

CSC 130 Data Structures and Algorithms 3 Credits

This course is a study of data structures and the algorithms used to process them. Topics include stacks, queues, lists, trees, graphs, sorting and searching techniques, recursive algorithms, and efficiency considerations. This course will give students a comprehensive study in data structures and algorithms which are the building blocks in programming.

Prerequisite(s): CSC 120.

CSC 140 Discrete Structures 3 Credits

This course is an introduction to the ideas and techniques from discrete mathematics as widely applied to Computer Science. Topics include sets, numbers, algorithms, logic, combinatorics, recursion principles, graph theory, trees, and discrete probability.

Prerequisite(s): MTH 105 or concurrent enrollment or MTH 210 or concurrent enrollment.

CSC 150 Cyber Ethics and Societal Impact 3 Credits

This course will investigate the ethical and social challenges stemming from computing and telecommunication technology, as well as from mobile information-enabling devices. Topics include: cyber ethics, global and societal impact of the Internet, ethical analysis tools, ethical dimensions of computer system reliability, professional ethics, ethical frontiers in emerging technologies, privacy, security, intellectual property, cybercrime, and civil liberties in cyberspace. CSC 150 is a required course for CSC majors and minors. This course will be open to other math and science majors.

Prerequisite(s): CMP 120 or CMP 125 or can be taken concurrently.

CSC 200 Introduction to Software Engineering 3 Credits

This course introduces software engineering ideas and concepts in the context of the software development life cycle. The course will discuss fundamental methodologies of software engineering, the Software Development Life Cycle (SDLC) and Unified Modeling Language (UML), which is a modeling language in the field of software engineering. It also concentrates on the five major phases of the SDLC: requirements engineering, requirements analysis, design, coding/implementation, and testing. Students will also learn about project management which is used for delivering high-quality software that satisfies customer needs and budgets. Prerequisite(s): Sophomore or Junior Standing

Prerequisite(s): CSC 120.

CSC 220 Computer Organization and Architecture 3 Credits

An introduction to the fundamental concepts of computer organization and architecture, this course explores how computer systems execute programs and manipulate data, working from the C programming language down to the microprocessor. Topics include: processor organization, Assembly and C programming languages, machine-level code, data representation, digital logic gates and Boolean algebra, computer arithmetic, code compilation, memory organization and management, interrupts, and performance evaluation and optimization. CS 220 is a required course for CS majors.

Prerequisite(s): CSC 130, CSC 140.

CSC 230 Probability for Computer Science 3 Credits

This course is an overview of probability theory and its application to computer science. Students will develop an understanding of combinatorics, variables, distributions, and parameter estimation. Applications to real world data and large datasets are also studied, with an introduction to machine learning.

Prerequisite(s): MTH 211 or concurrent enrollment.

CSC 240 Operating Systems 3 Credits

The course will study the basic concepts, design and implementation of operating systems. Topics to be covered include an overview of basic computing hardware components, operating system structures, process management, memory management, concurrency, resource allocation and scheduling, file systems, input/output systems, protection and security. CS 240 is a required course for CS majors.

Prerequisite(s): CSC 130.

CSC 250 Software Security Engineering 3 Credits

Secure software engineering focuses on both theoretical and practical perspectives in the development of software systems, exploring secure software design and development methods, software analysis, and reverse engineering. Emphasis is placed on security as part of the software engineering lifecycle, as well as on the correctness and robustness of code. CSC 250 is a required course for CS majors.

Prerequisite(s): CSC 200.

CSC 301 Software Requirements & Modeling 3 Credits

This course is intended to introduce students with the techniques for eliciting requirements. The course will consider the past, present and future standards and approaches in requirements engineering. This course will specifically focus on identifying and analyzing requirements for various types of systems: embedded systems, consumer systems, web-based systems, business systems, systems for scientists and other engineers. Prereq(s): CSC 200.

CSC 310 Theory of Computation 3 Credits

This course introduces a formal framework for investigating both the computability and complexity of problems. Theoretical foundations of computer science and formal models of computation are covered. Students study several models of computation including finite automata, regular expressions, formal languages, Chomsky language hierarchy, context-free grammars and Turing machines. Topics include undecidable problems, the halting problem and the P versus NP problem.

Prerequisite(s): CSC 130 and CSC 140.

CSC 320 Human-Computer Interaction 3 Credits

This course presents Human-Computer Interaction (HCI) as a discipline that is concerned with technical advance, and that must integrate different disciplinary perspectives. Foundational theoretical issues deal with principles of human perception, visual representation and purposeful action, discussed in the context of novel interactive technologies and computer-based systems. It examines issues in the design of system interfaces from a number of perspectives: user, programmer, and designer.

Prerequisite(s): CSC 130.

CSC 340 Cybersecurity Essentials 3 Credits

This course is an in-depth study of the theories and practices for prevention of cyber attacks. Countermeasures discussed include education, encryption, virtual private networks, policies, practices, access controls, secure systems development, software assurance, verification and validation, firewall architectures, anti-virus, patching practices, personnel security practices, and physical security practices. Topics also include incident response, forensic investigations, business continuity plans, disaster recovery plans, and critical infrastructure protection.

Prerequisite(s): CSC 150.

CSC 350 Analysis of Algorithms 3 Credits

This course investigates methods for analyzing and designing efficient and reliable algorithms, emphasizing methods useful in practice. It introduces several algorithm design strategies that build on data structures and programming techniques learned in the introductory computer science course sequence. Topic coverage includes induction, divide-and-conquer, dynamic programming, network flow, randomization, complexity theory, greedy algorithms, searching and sorting algorithms, cryptographic algorithms, graph theory, hashing, and advanced data structures. CSC 350 is a required course for CS majors.

Prerequisite(s): CSC 130 and CSC 140.

CSC 360 Concept of Artificial Intelligence 3 Credits

This course offers an introduction to the basic principles, techniques, and applications of Artificial Intelligence. Topics to be covered include agent design, advanced search algorithms and heuristics, knowledge representation, logic, inference, game theory, advanced planning, and learning. Prereq(s): CSC 130 and CSC 230.

CSC 380 Parallel and Distributed Systems 3 Credits

Widely deployed in scientific computing centers and commercial data centers, large-scale parallel and distributed systems (PDS) are crucial to scientific discovery, business success, national security, and technology innovation. This course examines the design and analysis of large scale computing systems for processor- and data-intensive applications with the focus on the technologies and factors that impact the performance, power, resilience, and scalability of modern parallel and distributed systems. Topics include the organization of multicore computers, parallel computer clusters, computing grids, supercomputers, client-server systems, and peer-to-peer systems; computer networks and network protocols; network security; multithreaded programming; and network programming.

Prerequisite(s): CSC 220 and (CSC 240 or CYB 200).

CSC 390 Software Design & Construction 3 Credits

This course introduces students to software design methodologies and also equips them with the knowledge and skills necessary to design large-scale software and to improve the quality of end products. Design techniques and methodologies for improving the productivity of software development and the quality of software are introduced. The course explores fundamental design concepts and notations with emphasis on Unified Modeling Languages (UML) and design patterns.

Prerequisite(s): CSC 200.

CSC 400 Introduction to Machine Learning 3 Credits

This course focuses on the fundamental concepts, theories, and algorithms for machine learning. The course briefly covers topics in supervised, unsupervised, reinforced, and deep learning including clustering, association, regression, neural network, support vector machines, Bayesian decision theory, decision trees, ensemble learning-the nearest neighbor algorithm and random forest.

Prerequisite(s): MTH 240 and CSC 360.

CSC 410 Data Science and Big Data Analytics 3 Credits

This course serves as an introduction to the interdisciplinary and emerging fields of data science and big data analytics. Students learn to combine tools and techniques from computer science, statistics, data visualization and the social sciences to solve problems using data. Central themes include: the data science and data analytics processes; advanced analytical theory and methods; tools for working with both big and small datasets, statistical modeling, and machine learning. Specific topics and tools include: data wrangling and munging, machine learning algorithms, statistical models, data visualization, NoSQL, Weka, RapidMiner, R, Python, Hadoop, and MapReduce.

Prerequisite(s): CSC 360.

CSC 420 Software Testing, Verification, and Validation 3 Credits

This course discusses the concept software quality assurance and source code review. This course will help students understand the testing concepts and how they can easily apply the concepts to any software testing situation. This course presents the concepts and techniques for testing software and assuring its quality. Concepts that are taught as part of this course are software testing at the unit, module, subsystem, and system levels, automatic and manual techniques for generating and validating test data, the testing process, static vs. dynamic analysis, functional testing, web application testing, and reliability assessments.

Prerequisite(s): CSC 200.

CSC 430 Software Quality Assurance 3 Credits

The course aims to teach the basics of quality management in software development projects. Students will learn the definitions of quality of software product and software process. Students will learn about software quality assurance, software metrics and models in quality management, internal quality and external quality.

Prerequisite(s): CSC 420.

CSC 470 Special Topics in Artificial Intelligence 3 Credits

This is an upper level undergraduate course that covers advanced topics in Artificial Intelligence. Topics vary from one offering to the other.

Topics that may be discussed include: Artificial Intelligence/ Machine Learning for Cybersecurity, Computer Vision, Robotics and Automation, Game Theory, Planning and Acting in the real World, Deep Learning, Reinforcement Learning, Decision-making under uncertainty, Image Processing, and Natural Language for Communication.

Prerequisite(s): CSC 360.

CSC 490 Independent Research and Study 3 Credits

Immerses the student in guided research. The student learns to organize material, use the literature, obtain reproducible data, and synthesize the results of the study. If possible, the student will publish the results or present them at a scientific meeting. Available to Junior or Senior students or Sophomores with permission of the department chair.

CSC 491 Internship in Computer Science 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the student's overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester. Available for juniors and seniors.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Cybersecurity (CYB)

CYB 105 Introduction to Cybersecurity 3 Credits

Introduction to Cybersecurity introduces students to this interdisciplinary field by exploring the technology, policies, and processes that enable assured computer operations. Students will be introduced to recent developments in cybercrime such as phishing, ransomware, viruses, and worms. Students will also learn about the policy and legislation regarding privacy, terrorism, hacktivism, and the dark web. Students will also be introduced to programming and networking concepts.

CYB 110 Cybercrime and Cyberterrorism 3 Credits

This course explores the world of cybercrime and cyber terrorism. Students will learn about the social and legal aspects of cybercrime and the technical tools that enable the investigation of these acts. They will discuss and review several definitions and types of cybercrime, and the roles of private sectors and law enforcement in detecting, investigating and preventing these acts.

CYB 130 IT Fundamentals 3 Credits

IT Fundamentals is designed to immerse students in the essentials of computer hardware and software. The IT Fundamentals course provides students with principles of data and technology that frame and define cybersecurity and insight into the importance of cybersecurity and the integral role of cybersecurity professionals. Students will explore foundational cybersecurity principles, security architecture, risk management, attacks, incidents, and emerging IT and IS technologies.

CYB 200 Operating Systems & Cybersecurity 3 Credits

This course focuses on the fundamental properties of three major operating systems (Linux, MacOS, and Windows). The course covers file systems, command line interfaces, and shell scripting. Students will learn how to manage user groups while focusing on security. They will also be introduced to SQL database architecture.

Prerequisite(s): CYB 130.

CYB 240 Ethical Hacking and Penetration Testing 3 Credits

This course introduces students to the methods of penetration testing and hacking as method of locating and successfully exploiting computer systems for the purpose of making computer systems more secure. This process includes probing for vulnerabilities as well as providing proof of concept attacks to demonstrate the vulnerabilities are real and generating specific and effective recommendations for addressing and fixing security issues discovered vulnerability assessments and penetration.

Prerequisite(s): (CYB 200 or CSC 240) and CIS 270.

CYB 260 Network Defenses and Countermeasures 3 Credits

This course in network defenses and countermeasures prepares students to defend networks against attacks by implementing proactive protection measures and by responding to active and potential threats. It covers multiple techniques for network defense, including firewalls, intrusion-detection systems, VPNs, encryption, and system hardening.

Prerequisite(s): CYB 240.

CYB 300 Developing & Deploying Cybersecurity Programs 3 Credits

In Developing and Deploying Cybersecurity Programs, students will learn how to create cybersecurity policies, standards, guidelines and plans, and the differences between them. Students will learn how threats develop, and how threat actors launch attacks on their targets. The material in this course conforms to the NIST Cybersecurity Framework and the ISO/IEC 27000-series standards.

Prerequisite(s): CIS 270.

CYB 320 Cyber Forensics 3 Credits

This course covers the technical and legal aspects of cyber forensics, including general forensic procedures, electronic discovery, imaging, hashing, file recovery, mismatched file types, and preserving the chain of evidence. Students will perform detailed cyber forensic analyses on compromised system images, using both open-source and court-approved digital forensic software tools to conduct forensic examinations, write analytical reports, and practice mock courtroom presentations.

Prerequisite(s): CYB 200.

CYB 490 Cybersecurity Independent Study and Research 3 Credits

Immerses the student in guided research. The student learns to organize material, use the literature, obtain reproducible data, and synthesize the results of the study. If possible, the student will publish the results or present them at a scientific meeting.

CYB 491 Internship in Cybersecurity 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 40 hours of internship per credit is required. The grade for the course will be determined by the student's overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester. Available for juniors and seniors.

Prerequisite(s): 2.5 GPA and Permission of Dept. Chair/Program Director.

Dance (DAN)**DAN 100 Fundamentals of Dance 1 Credits**

Designed to offer students concurrent participation and theoretical inquiry in specific dance forms. Students must register for two classes per week at the Princeton Ballet School. One additional hour per week is comprised of video observation, lecture, or readings, and is taught at Rider's Lawrenceville campus. **Prerequisite(s):** permission of dance advisor; Dance Studio Courses Ballet I.

DAN 100A Ballet I 0 Credits**DAN 100B Ballet II 0 Credits****DAN 100C Ballet III 0 Credits****DAN 100D Ballet IV 0 Credits****DAN 100E Ballet V 0 Credits****DAN 100F Ballet VI 0 Credits****DAN 100G Jazz I 0 Credits****DAN 100H Jazz II 0 Credits****DAN 100I Jazz III 0 Credits****DAN 100J Modern Dance I 0 Credits****DAN 100K Modern Dance II 0 Credits****DAN 100L Modern Dance III 0 Credits****DAN 100M Spanish Dance I 0 Credits****DAN 100N Spanish Dance II 0 Credits****DAN 100O Spanish Dance III 0 Credits****DAN 100P Pilates Mat Class 0 Credits****DAN 100Q Accelerated Adult Ballet I 0 Credits****DAN 100R Accelerated Adult Ballet II 0 Credits****DAN 100S Accelerated Adult Ballet III 0 Credits****DAN 100T Accelerated Adult Ballet IV 0 Credits****DAN 100U World Dance Forms 0 Credits****DAN 100V Yoga 0 Credits****DAN 100W Tap 0 Credits****DAN 100X Ballet VII 0 Credits****DAN 100Y Choreography 0 Credits****DAN 100Z Movement Fundamentals 0 Credits****DAN 105 Survey of Dance History 3 Credits**

An introductory course to familiarize students with the breadth and depth of dance in human society. It will chronologically examine dance through four lenses: Dance and Community, Dance and Religion, Dance and Politics, and Dance as Art. Students will be exposed to various dance forms from around the world with varying purposes, functions, and motivations from the beginning of recorded history to present.

DAN 111 Dance Lab 0 Credits**DAN 112 Ballet I: The Point of Departure 1 Credits**

This is an entry-level, mandatory ballet class that covers all of the safest fundamental practices, including proper use of alignment, feet, rotation, and use of the core in the classical vocabulary.

DAN 113 Ballet II: Next Steps 1 Credits

This is a continuation of the safest fundamental practices covered in Ballet I, including proper use of alignment, feet, rotation, and use of the core in the classical vocabulary. In addition this course extends the coverage of discourse, terminology and vocabulary of the classical technique. DAN 113 may be repeated two times for a total of three credits.

Prerequisite(s): Ballet I or equivalent.

DAN 121 Introduction to Dance Science 3 Credits

This orientation to dance science will consider important aspects of the study of human performance including anatomy, biology, kinesiology, and psychology of movement and performance. Covered are the foundations and research findings in Movement Theory, Motor Development, and Well-Being. Topics include the Care and Prevention of Injuries, Movement Analysis, Dance Movement Therapy, Mind-body Connection, Dance Fitness and Optimal Performance.

DAN 151 Pilates and Modern 1 Credits**DAN 152 World Dance & Improvisation 1 Credits****DAN 180 History of Movement Theory 3 Credits**

Investigation of the mind-body connection, somatic experience, body therapies, movement and theories. The essential questions are: How is it that we move with awareness, fluidity, efficiency and precision?

DAN 190 Dalcroze Eurythmics 3 Credits

This movement course familiarizes students with the basic elements of music theory (staff, clefs, time signatures, notations, chords, etc.) and the Dalcrozean principles regarding music, movement and improvisation.

DAN 201 Vaganova I 1 Credits

This studio course focuses on fundamental knowledge about the vocabulary, discourse, performance and style of the classical ballet, especially as it pertains to the Vaganova Technique.

DAN 202 Vaganova II 1 Credits

This studio course continues the development of knowledge concerning the vocabulary, discourse, performance and style of the classical ballet, especially as it pertains to the Vaganova Technique. Repeatable twice for total of three times taken. May only be repeated if there are open spots after those taking it for the first time have registered.

Prerequisite(s): DAN 201.

DAN 210 Rider Dances: Repertory & Productions 1 Credits

This course provides an in-depth experience with the art of dance production from creation to performance. Students will be chosen to learn and perform repertory; fulfill technical roles such as sound, lighting and costume design; and assume production and managerial responsibilities such as promotion, publicity, front of house management and stage management.

Prerequisite(s): permission of instructor.

DAN 210T Rider Dances Rep&Produc:Tech 1 Credits**DAN 220 History of Choreography 3 Credits**

This course prepares the dance student for the creating of dance through critical analysis, reading, writing and practical assignments. Students will examine creative process as applied to dance artists and various forms of dance.

DAN 300 Lecture & Studio in Dance 2 Credits

Dance 300 series is also designed to offer students concurrent participation and theoretical inquiry in specific dance forms. Students must register for four classes per week at the Princeton Ballet School. One additional hour is comprised of video observation, lecture, or readings and is held at Rider's Lawrenceville campus. **Prerequisite(s):** permission of instructor; Dance Studio Courses Ballet I.

DAN 300A Ballet I 0 Credits**DAN 300B Ballet II 0 Credits****DAN 300C Ballet III 0 Credits****DAN 300D Ballet IV 0 Credits****DAN 300E Ballet V 0 Credits****DAN 300F Ballet VI 0 Credits****DAN 300G Jazz I 0 Credits****DAN 300H Jazz II 0 Credits****DAN 300I Jazz III 0 Credits****DAN 300J Modern Dance I 0 Credits****DAN 300K Modern Dance II 0 Credits****DAN 300L Modern Dance III 0 Credits****DAN 300M Spanish Dance I 0 Credits****DAN 300N Spanish Dance II 0 Credits****DAN 300O Spanish Dance III 0 Credits****DAN 300P Pilates Mat Class 0 Credits****DAN 300Q Accelerated Adult Ballet I 0 Credits****DAN 300R Accelerated Adult Ballet II 0 Credits****DAN 300S Accelerated Adult Ballet III 0 Credits****DAN 300T Accelerated Adult Ballet IV 0 Credits****DAN 300U World Dance Forms 0 Credits****DAN 300V Yoga 0 Credits****DAN 300W Tap 0 Credits****DAN 300X Ballet VII 0 Credits****DAN 300Y Choreography 0 Credits****DAN 300Z Movement Fundamentals 0 Credits****DAN 350 History of Ballet, Modern & Jazz Dance 3 Credits**

Studies the major periods in the development of Western Theatrical Dance from the Renaissance to the present focusing on ballet, modern, jazz, tap and musical theater dance. The course will examine the ideas and individuals that caused the development of choreographers, producers, designers and productions.

DAN 450 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. Cross-listing existing entry-level teaching course with analogous graduate-level course (CURR 711).

DAN 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credit hours. Approval of the faculty sponsor, department chair, and dean required prior to enrollment. **Prerequisite(s):** junior or senior standing, good academic standing.

DAN 491 Internship in Dance 1-4 Credits

Provides junior or senior dance majors with the practical experience of working within an educational or professional dance environment. Students must be sponsored by a dance professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

DAN 493 Special Topics in Dance Studio 1 Credits

This class covers a discrete movement style, technique, or form such as the choreography of Balanchine, the technique of Cecchiti or dance theater fusion.

Prerequisite(s): DAN 100.

DAN 495 Selected Topics in Dance History 3 Credits

Intensive study of a particular topic in dance history or theory. This may include one era, movement or nation's dance history and practice. Students will become deeply involved in an area through research, class discussions and group projects.

DAN 498 Senior Capstone 3 Credits**DAN 499 Seniors Honor Program 3 Credits**

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, to be planned under the direction of a faculty advisor, will represent a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Early Childhood Education-UG (ECE)

ECE 200 Infant and Toddler Care and Education 3 Credits

Focuses on nutritional and psychological influences on infant and toddler growth and development, including current research in infant development; childbirth; breast feeding; infant stimulation; intellectual development; attachment behavior; and infants in group care. Recognizing that there is increased demand for infant/toddler care, it is increasingly important to assure that America's infants receive a safe, healthy, emotionally secure, and intellectually rich start in life. High quality care and education of very young children are based upon responsive and respectful relationships among all of the people in each child's life.

ECE 332 Families, Community, and Diversity in Early Childhood Education 3 Credits

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ECE 450 Developmental Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

Economics (ECO)**ECO 200 Principles of Macroeconomics 3 Credits**

A collective view of income receiving and spending sectors of the national economy, including households, businesses, and governments. Issues discussed: What determines the level of output, income, and employment achieved by the economy? What determines the growth of national output and employment? National income accounting, income and employment theory, monetary system, general price level, business cycle, government policies designed to provide for full employment, price stability, and economic growth are also covered.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ECO 201 Principles of Microeconomics 3 Credits

Market price systems are analyzed. The nature and characteristics of consumer and producer behavior, the theory of pricing in competitive and noncompetitive markets, and determination of the distribution of output are re evaluated. Welfare, social control, monopoly, and income inequality are re explored in the light of price theory. The role of the United States in the world economy is explored.

Prerequisite(s): Place into MSD 105 based on SAT or ACT Score, OR place into MSD 105/MTH 102 by passing College Placement, OR passing MTH 100S with a grade of 'Y', OR passing MSD 104, OR having transferred in any college level MSD or MTH class.

ECO 210 Intermediate Macroeconomics 3 Credits

An analytical study of modern aggregate economic theory. Emphasizes the measurement and determination of income, employment, and price levels, as well as economic policy in theory and practice.

Prerequisite(s): ECO 200 and ECO 201.

ECO 211 Intermediate Microeconomics 3 Credits

This course is designed to give the student a thorough understanding of microeconomic theory. As such, the course will analyze the behavior of both consumers and producers, and how this behavior determines the price and quantity observed in the market. The course objective is to provide students with the necessary theoretical background to enable them to solve meaningful and practical problems. Thus, the course is both theoretical and applied in its orientation. The course will emphasize that economic theory can be used not only to solve market oriented problems, but social and public policy problems as well.

Prerequisite(s): ECO 200 and ECO 201.

ECO 300 Business Conditions Analysis/Forecast 3 Credits

Business conditions change daily. Students study them as they change, learning to understand them in the light of economic theory, learning how each part of the economy is affected, and learning the advantages and limitations of the most reliable forecasting methods.

Prerequisite(s): ECO 200, MSD 201.

ECO 301 Managerial Economics 3 Credits

Intensively examines the theory of the firm with applications to the solution of such managerial problems as demand forecasting, the nature and behavior of costs, and product pricing. Introduces the use of simple mathematical and statistical tools that are employed with economic analysis for solving managerial problems.

Prerequisite(s): ECO 200 and ECO 201 and MSD 201 or permission of instructor.

ECO 305 International Trade and Investment 3 Credits

Studies the theory, institutions, and structures underlying the international flow of trade and investment. Topics are: the theory of international trade; balance of payment analysis; the international monetary system; adjustment to balance of payment disequilibrium; regional economic integration; the economic effects of trade restrictions; and trade and foreign investment problems of developing nations.

Prerequisite(s): ECO 200 and ECO 201.

ECO 315 Comparative Economic Systems 3 Credits

Provides a conceptual framework for classifying and comparing economic systems. Presents theory of the capitalist market economy and case studies of the U.S., Japanese, French, and Swedish economies. Examines theory of the centrally planned economy, its transition, and case studies of the Soviet and its successor states, Chinese, and East European economies. Case studies are necessarily limited, concentrating on selected topics, such as transition strategies, industrial policy, etc.

Prerequisite(s): ECO 200 and ECO 201.

ECO 325 Industrial Organization 3 Credits

Explores the relationship between market structure and performance. Topics include concentration in individual industries, product differentiation and entry barriers, pricing and marketing policies, and antitrust policies and their consequences.

Prerequisite(s): ECO 200 and ECO 201.

ECO 326 Economics of Sports 3 Credits

The overall objective of this course is to deepen student understanding of microeconomic principles by applying microeconomic concepts to the analysis of professional and amateur sports. This course will utilize concepts from many different microeconomic specialties, (primarily Industrial Organization, Labor Economics and Public Finance). The tools from these different microeconomic fields will be used to explain and analyze the operation of professional sports teams and leagues in the U.S. with an emphasis on baseball, football, basketball and hockey. International comparisons will be made between professional sports in the U.S. and the rest of the world. The course will also analyze the not-for-profit sports sector, focusing on college sports and the National Collegiate Athletic Association.

Prerequisite(s): ECO 201.

ECO 330 Labor Market Analysis 3 Credits

Intensive study of the economics of the labor market, which examines the determinants of labor supply and demand, and market equilibrium in the labor market. This enables the student to understand what determines wages, labor force participation, occupational choice, the extent of education and training, unemployment, poverty, union membership, and discrimination in the labor market.

Prerequisite(s): ECO 200 and ECO 201.

ECO 335 Economics of the Public Sector 3 Credits

Analyzes the economic roles of government: allocation; distribution; and stabilization. The course examines the tools used by governments, especially the federal government, such as taxation, expenditures, regulations and laws in order to achieve economic goals. The course will give special attention to social regulation.

Prerequisite(s): ECO 200 and ECO 201.

ECO 336 Economics of Health Care Sys 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomic tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

Prerequisite(s): ECO 201 or HTH 205.

ECO 450 Seminar in Economic Research 3 Credits

Students in the course learn to conduct economic research by engaging in an actual community-based research project. At the beginning of the semester, students are assigned to a community-based organization. As a team, students meet with the client, devise a plan of action, collect and analyze data and other information, and write a report to the client. At the end of the semester, students present their findings to the client. Students are permitted to take ECO 450 up to two times for credit.

Prerequisite(s): Permission of instructor.

ECO 490 Independent Research and Study 3 Credits

Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

ECO 491 Internship/Independent Study 3 Credits

This course is available to qualified economics majors and minors. Evaluation is based on a performance appraisal provided by the participating firm and a project/paper judged by the major's internship director. This course can be used as a business or free elective. Grading is done on a pass/fail basis.

Prerequisite(s): Permission of instructor.

Education-UG (EDU)**EDU 106 Contexts Of Schooling 3 Credits**

Students in this field-based course will begin to examine aims, practices, and contemporary issues of schooling in their historical, sociological, philosophical, and futuristic contexts and from the perspectives of various multicultural constituencies— students, parents, local community, wider economic community, government, and the profession. In doing so, they will begin to develop professional skills of observation, reflection, analysis, and argument. This course must be taken concurrently with EDU 206. A cumulative GPA of 2.75 is required.

EDU 206 Developmental Education Psychology 3 Credits

This field-based course focuses on: a) the cognitive, personality, social, creative, and moral development of children and adolescents; b) influential theories, concepts, and research findings of educational psychology; and c) the translation of psychological theory into classroom practices. This course must be taken concurrently with EDU 106. A cumulative GPA of 2.75 is required.

EDU 320 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester. A cumulative GPA of 2.75 is required. NOTE: This course is cross-listed with FLE 320. Students cannot get credit for both FLE 320 and EDU 320.

EDU 358 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDU 420 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. A cumulative GPA of 2.75 is required.

*NOTE: This course is cross-listed as FLE 420. Students cannot get credit for both FLE 420 and EDU 420.

Prerequisite(s): EDU 106 with a minimum grade of C+ or EDU 106 with a minimum grade of TR and EDU 206 with a minimum grade of C+ or EDU 206 with a minimum grade of TR.

EDU 451 Special Topics in Education 1-6 Credits

Student teachers, graduate interns, Rider faculty, cooperating teachers, and building-level administrators will engage in collaborative study of a topic through reading, writing, discussion, observation, and reflection on their work in classrooms. Work in these seminars will help student teachers synthesize knowledge from their professional courses and all participants extend their understanding of a particular topic pertaining to teaching. Teacher research methods will be employed as participants analyze their own teaching through perspectives of the seminar topic. Topics will vary each semester. This course is dual-listed for undergraduate and graduate credit. Enrollment is limited to students concurrently enrolled in student teaching and to cooperating teachers and principals working with them.

EDU 460 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal, and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing, and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study. A cumulative GPA of 2.75 is required.

EDU 465 Student Teaching and Seminar 12 Credits

A full-time program for seniors providing practical teaching experience in an accredited elementary or secondary school. Under the direct supervision of the cooperating teacher, student teachers are responsible for the planning of lessons and for teaching in their areas of specialization and for developing a high level of teaching competency. Supervisors from Rider observe the student teachers at work, confer with the cooperating teachers and student teachers, and evaluate the growth of the student teachers throughout the internship period. Special topics are considered in seminars held in conjunction with student teaching. These topics include school health and substance abuse, school law, teacher certification and placement, classroom management, mainstreaming, professionalism, and other topics deemed appropriate by the faculty and student teachers.

Prerequisite(s): 1. Satisfactory completion of junior-level professional courses; 2. Cumulative GPA of at least 3.0 prior to commencing the semester in which student teaching is to be completed; 3. All professional education courses, with the exception of those taken concurrently with student teaching, must be completed with a grade of "C+" or better; 4. A candidate for student teaching must be approved by the education division and the coordinator of student teaching. There is an additional fee for Student Teaching.

Education Foundation (EDE)**EDE 200 Effective Classroom Management 3 Credits**

Issues of classroom management often pose the biggest challenges for novice teachers. However, with the proper training many of these obstacles can be prevented, which results in more time spent on effective instruction. This course is based on two premises: (1) that most problems of classroom order can be prevented through the use of effective, research-based classroom management strategies, positive teacher-student relationships, and engaging instruction; and (2) that the goal of classroom management is the development of an environment conducive to both academic and social emotional learning. Given these premises, the course focuses not on disciplinary interventions designed to control students, but on ways of preventing disruptive behavior, creating a peaceful, caring community, resolving conflicts, and meeting the needs of diverse students through the use of effective motivational and instructional strategies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

EDE 225 Guided Field Experience in K-12 Classrooms 3 Credits

This is a field-based course in which students will spend an intensive three-week term in a designated school setting, mediated by University faculty. Students will participate in the daily routines of elementary, middle, or secondary schools. Field-site teachers will mentor students by articulating decisions that they make regarding classroom instruction and assessment. Students will meet regularly in seminar to analyze and discuss issues related to teaching and learning. This course will be offered J-Term, Summer I or other three week period.

EDE 226 Teaching and Managing in the Urban Classroom 3 Credits

This course focuses on teaching and managing K-12 classrooms in urban settings. Through four weeks of on-line instruction, students will learn key principles of classroom management and examine foundational issues that can underpin educational inequality, such as racial, ethnic and linguistic diversity, poverty, high student mobility and frequent teacher turnover. The course culminates with the Philadelphia Urban Seminar, a two-week residential experience (mediated by Rider University faculty) that includes ten days of intensive field experience in central Philadelphia classrooms, weekday seminars with faculty, and historical/cultural experiences and community service project activities on the weekend.

EDE 306 Thinking Critically with Data 1 Credits

This course will help students develop the kinds of data literacy skills needed for success in teaching. It will focus on five related that teachers need: (1) finding the relevant pieces of data in the data system or display available to them (data location); (2) understanding what the data signify (data comprehension); (3) figuring out what the data mean (data interpretation); (4) selecting an instructional approach that addresses the situation identified through the data (instructional decision making); (5).

EDE 307 Assessment in 21st Century Classrooms 1 Credits

This course offers an in-depth look at assessment to meet the need of 21st century teaching and learning. Students learn how to plan, develop, interpret, and manage valid assessments of student learning. Students will learn the following assessment-related skills and understandings: (1) the purpose of assessment in 21st century classrooms; (2), basics of assessments: reliability and validity; formative and summative assessment; alignment of assessments with objectives; and determining what can (what cannot) be reliably and validly assessed; (3) basics of rubric development; (4) holistic scoring; (5) assessment of critical thinking skills in diverse domains; (6) assessment of creativity in diverse domains. The course will be taught online.

EDE 375 Applications for Teaching Mathematics in Grades 4-5 1 Credits

This course will provide students the experience to share and learn about the practical applications of teaching mathematics to the 4th and 5th grade children as they are based on the field site classrooms of these grades. Students complete reflections about their work with mathematics and their observations of their cooperating teachers' lessons. The developmental aspect of math skills will be reviewed, looking at the Learning Progressions that are the basis for the new Common CORE State Standards. This course will provide an opportunity for students to have guidance in the teaching and learning of mathematics in the upper elementary grades. Upon completion of this course, students should have the knowledge, skills and confidence to meet the needs of all students, K-6. Prerequisite(s): ELD 375.

Corequisite(s): ELD 376 or ELD 308 or as prerequisite.

Educational Technology (TEC)

TEC 200 Google® Educator Level One Training 3 Credits

This course will provide the skills and knowledge for pre-service teachers in undergraduate education to successfully take the Google® Educator Level One Exam.

TEC 201 Internet Ethics 1 Credits

This course focuses on using the Internet to explore and reflect on current ethical issues involving technology. These include individual privacy, legal issues such as fair use and copyright laws, and social issues such as bullying and social networking. Students will explore these topics using a variety of search engines and will reflect on the information found in terms of its impact on society as well as its appropriate uses in personal life, education and business. Pass/fail.

TEC 202 Smartboard 1 Credits

This course is designed to provide an opportunity for students to become familiar with the features and applications of Smartboard, an interactive whiteboard that can be used in classrooms and professional presentations. Students will gain experience using the touch screen and in integrating the features of the program into learning and professional materials. Pass/fail.

TEC 203 Desktop Publishing and Web Page Design 1 Credits

This course provides students with the ability to use desktop publishing software to create materials suitable for use in classrooms, professional settings, and personal use, and with the ability to design web pages. The course is appropriate for anyone who will be involved in designing classroom and student publications and for those who will use web pages in their teaching or personal lives. Discussion will be held on how to use desktop publishing and web page design in elementary and secondary school settings. A project involving application of various desktop publishing and web page design techniques will be completed and demonstrated to the class. Pass/fail.

TEC 204 Electronic Spreadsheets and Classroom Management Software 1 Credits

Basic electronic spreadsheet concepts and applications are taught using a major spreadsheet program. Topics include writing basic formulas, copying formulas, playing "What If," customizing a worksheet, and printing a spreadsheet. Discussions will be held on how to integrate spreadsheets into elementary and secondary classes and activities. Pass/fail.

TEC 206 Teaching and Presenting with Technology 1 Credits

This course covers designing, planning, and using technology enhanced instruction and presentations. Group assignments will enable students to explore uses of technology to enhance instruction and presentations. Collaboration will be encouraged when discussing the efficient and effective use of technology. Three collaborative group reports will be submitted dealing with discussion questions and chapter topics. Appropriate web sites and programs will be visited. Students will design a final original application that could be used to create motivation and visual learning in a specific classroom or other professional setting related to their major areas of study. Emphasis will be given to technology integration strategies. A final oral presentation of individual projects will be given.

TEC 207 Social Media for Education 3 Credits

Social Media for Education will introduce students to the structure and culture of social media and how social networking applies to the educational environment. This three-credit course will foster a deep understanding of how social media in education can benefit students, teachers, administrators, staff, and stakeholders.

TEC 307 Concepts Instruct Media & Tech 3 Credits

Designed to provide the student with familiarity and appreciation of the role of educational technology in the workplace as it applies to students, teachers, administrators, and trainers. The student will explore the Internet, various educational multimedia, distance learning, virtual reality environments, learning theories, and integration models. Appropriate developmental/reflective strategies will be incorporated with instruction. Although multimedia microcomputers will be utilized throughout the course, prior microcomputer knowledge and experience is not a critical element. Multimedia expertise will be developed as the course progresses.

TEC 308 Directed Study in Instruct 3 Credits

Designed to enable the student to develop instructional presentations utilizing the advantages of multimedia technology. Each student will be required to create a multimedia portfolio that contains information presentations, cumulative records, presenter notes, work samples, photo library, video animation, and audio narration. Cooperative learning strategies will be utilized throughout the course. Developmental/reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail. Expertise will be developed as the course progresses.

TEC 309 Instruct Media/Technology Management 3 Credits

Designed to develop technology management skills that can be used for individual classrooms, training centers, subject area specializations, grade levels, school laboratories, curriculum integration, administrative functions, system networks, community services, communication systems and connecting linkages between educational/work environments and home. Various management strategies will be explored and each student will have an opportunity to design, via a multimedia microcomputer, an instructional technology system of their choice along with a management plan. Cooperative learning strategies will be utilized throughout the course. Developmental/reflective strategies will include self-reflection, peer feedback, and interaction with the instructor in class and via E-mail.

Prerequisite(s): At least six semester hours of technology courses or modules.

TEC 404 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners.

Prerequisite: SPE 201 or SPE 300.

TEC 490 Independent Research and Study 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hours credit to be assigned is determined by the department.

Elementary Education (ELD)

ELD 128 Developing Mathematical Ideas for Elementary School Teachers 1 Credits

Prospective teachers will examine the mathematics content and curriculum that is taught in grades K-6, focusing upon the multi-layered aspects of the topics that successful elementary teachers need to understand profoundly in order to provide appropriate instruction. There will be a series of topics selected from those that have historically been especially difficult for teachers to thoroughly understand at the depth needed to teach effectively. Some of the topics may vary each semester.

ELD 307 Emergent Literacy P-3 3 Credits

This course is needed to meet the requirements for the specialized endorsement in Early Childhood. The course establishes a solid foundation of knowledge about literacy in the early years and dispels myths regarding readiness to read and write. In addition, the course contains the foundational aspects of literacy, including the relationship between oral language and literacy, the linguistic foundation of literacy, and the social contexts of literacy learning. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 308 Fostering Language and Literacy Development 3 Credits

Explores current understanding of the fields of reading/language arts from the perspectives of theory and practice. Students write lesson plans, critique methods of instruction and assessment and develop a portfolio of an individual student from their field site. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206; ELD 307.

ELD 350 Early Adolescence 1 Credits

This course will focus on common dilemmas faced by young people as they move from childhood into adolescence. It will examine age-related differences between children and adolescents and consider ways to create stimulating environments that fit this developmental transition. Representations of adolescence in the media and in research will be compared, including common stereotypes.

ELD 355 Teaching in the Inclusive Middle School Classroom 1 Credits

This course will highlight the legal and ethical responsibilities of general education teachers in the middle school classroom. The special education process will be discussed and methods to address special needs in the classroom will be shared. Strategies to differentiate instruction and work collaboratively with school community members will help pre-service teachers develop and implement effective instruction that meets diverse needs in the middle school inclusive classroom.

Prerequisite(s): EDU 106 and EDU 206 and a cumulative GPA of 2.75 is required.

ELD 360 Structure and Culture of Middle School Classroom 1 Credits

This course focuses on the teaching of those concepts critical to the understanding of the structure and culture of middle school education. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 375 Methods of Teaching Mathematics in Elementary Classrooms 3 Credits

This course focuses on the teaching of mathematics that is developmentally appropriate for students from nursery to grade eight. In keeping with ACET, NAEYC, and NCTM Standards, emphasis is placed on planning for and implementing an integrated curriculum approach, discovery learning, hands-on experience, theme cycles, use of technology, and traditional and non-traditional assessment strategies. Field experiences will consist of classroom observations and teaching individuals and/or small groups of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206, MTH 102 or MTH 105 or MTH 150 or MTH 210.

ELD 376 Teaching Science, Social Studies and the Arts N-6 3 Credits

This course focuses on methods and materials of instruction in science, social studies, and the arts that are developmentally appropriate for students in preschool through grade six (based on NCSS, NSTA, and NAEA Standards). Emphasis is placed on an integrated approach to curriculum, with lesson and unit planning activities that incorporate hands-on-experiences, discovery learning and traditional and non-traditional assessment strategies. Field experience will consist of observation and analysis of classroom instruction and the teaching of lessons to individual and/or small groups of children. A cumulative GPA of 2.75 is required.

Prerequisite(s): ELD 307 and ELD 375.

ELD 380 Methods of Teaching Mathematics in the Middle School 3 Credits

This course focuses on the teaching of mathematics that is developmentally appropriate for students in grades six through eight. In keeping with the National Council of Teachers of Mathematics (NCTM) Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experience, use of technology, and traditional and non-traditional assessment. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 385 Teaching Science in the Middle School 3 Credits

This course focuses on the teaching of sciences that is developmentally appropriate for students in grades six through eight. In keeping with the National Science Education Standards, emphasis is placed on planning for and implementing an inquiry-based approach, hands-on experiences, use of technology and traditional and non-traditional assessment strategies. Field experiences will consist of observations and teaching to individuals, small groups and whole classes of students. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 390 Teaching Social Studies in the Middle School 3 Credits

This course focuses on the teaching of social studies that is developmentally appropriate for students in grades six through eight. Its focus will explore understanding of United States history, geography and civics from the perspective of the middle school. The course emphasizes the ten themes of social studies as developed by the National Council for the Social Studies. In addition to the facts, concepts and generalizations encompassed by the ten themes, the course works with academic, social, thinking and citizenship skills. The required, intensive field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 395 Literacy Learning in the Middle School 3 Credits

This course focuses on the teaching of literacy that is developmentally appropriate for students in grades six through eight. It explores processes in reading, writing, speaking, listening and viewing, relationships among the language arts and other subject areas, and the development of critical literacy and cognitive strategies. The intense field experience in a middle school promotes direct application of the concepts, skills and dispositions addressed in the course. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ELD 490 Independent Study: Research and Creative Expression 1-6 Credits

Provides the student with an opportunity to study an area of personal interest. The outline for the study must be accepted by a sponsoring professor and approved by the student's department and academic dean. The number of semester hour's credit to be assigned is determined by the department.

English (ENG)

ENG 205 Understanding Literature 3 Credits

The novel, the short story, drama, and poetry are studied, with a view to the insights to be gained from literature. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 206 Introduction to Creative Writing 3 Credits

A workshop that introduces students to basic conventions and techniques of creative writing. Students will read and study published writing in multiple genres, such as short fiction, drama, poetry, and creative nonfiction, and write and revise their own creative pieces.

ENG 208 Arthurian Legends in Literature 3 Credits

The legends attached to King Arthur and the Knights of the Round Table have become cultural touchstones in England and the United States. This survey of medieval to contemporary Arthurian literature examines the legends and their written versions within their respective cultural, historical, philosophical and aesthetic contexts. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 210 Major American Authors 3 Credits

An introductory course focusing on major American poets, novelists, essayists, and playwrights. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 211 Major British Authors 3 Credits

An introductory course focusing on major British poets, novelists, essayists, and playwrights. Students will learn to understand, interpret, and evaluate literary works. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 213 Literature and Mythology 3 Credits

The interrelationships that exist between literary works and folklore, ritual, and religious scriptures and beliefs are explored. The primary emphasis is on analyzing the presence of mythic patterns in specific literary works; the secondary emphasis is on theories of mythology. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 214 Monsters in Literature 3 Credits

This course examines various texts on the topic of monsters. Students read and watch films, and explore the answers to the following: Who are they? Undead, alien, satanic, outcast, hidden, hostile, tragic. Where are they? Crossroads, arctic wastes, moors, abandoned buildings, forests, outer reaches, inside. What do they want? Revenge, bodies, lives, escape, life, contact, humanity. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 215 Satire and Comedy 3 Credits

Explores these two related modes of literature with the primary emphasis on satire. Possible readings include works by Euripedes, Jonson, Shakespeare, Moliere, Voltaire, Pope, Swift, Dickens, Twain, Wilde, Waugh, Orwell, and Heller. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 217 Introduction To Shakespeare 3 Credits

Students in this course study Shakespearean drama on an introductory level through close reading, analysis, and discussion of selected plays. They learn the relevance and importance of Shakespeare's themes, characterizations, and imagery. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 218 Literature and the Environment 3 Credits

Students examine literature on important environmental issues, such as climate change, pollution, dams, oil pipelines, and nuclear energy. The class focuses on how literature, which may include fiction, poetry, drama, and essays, helps readers understand and grapple with these complex global challenges.

ENG 219 Literature and Violence 3 Credits

This course will examine and critique themes of violence that have become a pervasive and recurring artistic thread in classic literary texts. Through careful, close textual readings and critical analyses of thematically selected texts that contain multiple artistic representations of violence in varied literary genres, students will explore literary violence as a possible metaphor for understanding dimensions of power, control and dominance. In analytical studies of thematically selected texts, students will gain new insights and critical perspectives on modern American society and the social causes and ills of violence. Students will delve into the root, cause and meaning of violence and they will further grow to understand why and how violence still maintains a pervasive presence in their daily lives and in the very literature they read. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 220 Literature & Society 3 Credits

Literature is examined, emphasizing human behavior as it relates to such social phenomena as war, alienation, social disorganization, injustice, and poverty. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 221 Literature and Psychology 3 Credits

Students will study Freudian and other psychoanalytical concepts as they appear in literature, plus psychological patterns of behavior such as aggression, frustration, and submission, that have been utilized by creative literary artists to expand the reader's understanding of the human experience. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 222 Crime and Literature 3 Credits

This introductory course focuses on representations of crime in novels and short stories. The primary goal of this course is to equip you with the basic tools you need to interpret fiction. Examining how narrative elements such as plot, character, point of view, and setting function in literature will enable you to analyze, not just comprehend and summarize, fiction. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 224 Science Fiction 3 Credits

This course is designed to introduce students to science fiction, its major themes and preoccupations, as well as some of its significant authors and genres. It has been argued that science fiction or "speculative" fiction represents a viable way to make sense of our everyday world. Our primary focus, therefore, will be on how these texts—written and visual—help us understand our culture and ourselves through encounters with alien and unfamiliar worlds, species, and technology. By the end of the course, students are expected to be able to critically engage with science fiction, and to identify its broad cultural impact. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 226 Introduction to Film 3 Credits

Focuses on various cinematic techniques used to develop underlying thematic and symbolic concepts and to shape viewer response. Students will analyze classical and contemporary features for their masterful use of visual language.

ENG 228 Black American Lit 3 Credits

A survey of writings by black Americans, presented historically from early slave narratives through emancipation, reconstruction, the Harlem Renaissance, and literature from the 1930s to the present. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 229 Multi-Ethnic Literature in America 3 Credits

Surveys the literature of various ethnic groups including African Americans, American Indians, Asian Americans, Hispanic Americans, Jewish Americans and European Americans. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 230 Women In Literature 3 Credits

A range of literary presentations of the female experience and of the conditions of women's lives is explored. These works are placed in historical and social contexts in order to see behind and beyond traditional literary conventions. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 236 Applied Grammar & Syntax 3 Credits

This course offers a review of the essential elements of English grammar and syntax and fosters understanding of how these elements work in notable argumentative and expository writing as well as in the student's own compositions. Focus is on both expert reading and effective writing. Changing attitudes toward usage, including influence of digital media on language use, are discussed. May be taken as preparation for, or independently of ENG 336, which addresses grammar, syntax, and style at a more advanced level.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 240 Methods of Literary Analysis 3 Credits

The study and application of various modes of literary criticism practiced, including formal, structural, psychological, and sociocultural methods of analysis. Required of all English literature and writing majors.

ENG 245 Creativity 3 Credits

This course is an introduction to the history of literary creativity and the related topics of invention, genius, imagination, and originality. It examines theories of literary creativity throughout history from ancient ideas about the origins of inventiveness to recent theories. It looks at select works in English and other sources, and it looks at the subject of creativity in poetic, prose, and dramatic works.

Prerequisite(s): English Literature majors should take all Gateway Courses before they take 300- and 400- level courses.

ENG 250 Literary History I 3 Credits

Surveys British literature beginning with the old English epic of Beowulf and ending in 1785. Students analyze diverse works of literature from different genres, movements, and periods while taking into account historical context. Students learn to analyze literature using formal strategies and terms, and to develop arguments about literature. All English majors and writing concentration minors must take this course. Literature and cinema studies concentration minors must take either ENG 250 or 251. Students are advised to take this course prior to upper-level English courses.

ENG 251 Literary History II 3 Credits

Surveys literature in English since 1785. Students analyze diverse works of literature from different genres, movements, and periods while taking into account historical context. Students learn to analyze literature using formal strategies and terms, and to develop arguments about literature. All English majors and writing concentration minors must take this course. Literature and cinema studies concentration minors must take either ENG 250 or 251. Students are advised to take this course prior to upper-level English courses.

Prerequisite(s): ENG 250 or permission of the instructor or chairperson.

ENG 270 Major Poets 3 Credits

Studies major American and British poets. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 275 Posthumanism: Bodies and Technology in Literature 3 Credits

This course explores the concept of posthumanism in speculative and futuristic literature. Who counts as human? How do advances in science and technology change what it means to be human? How much can we change our bodies before we stop being human? Categories of posthumanism that may be explored include virtual reality, cybercultures, and bodily transcendence; cyborgs; body modification, duplication, and replacement; cloning; genetic engineering; and postapocalyptic/ecocritical narratives.

ENG 280 Special Topics in Literature 3 Credits

Uses literary works to achieve insights into different areas of human experience. Topics change annually as announced by the English department.

ENG 281 Global Film History: Origins to 1960 3 Credits

Examines major technological and aesthetic developments in both American and international cinema of the period, with an emphasis on global cinema. From silent comedy and melodrama to German Expressionism and Soviet activist cinema; from French poetic realism and Italian Neo-realism to Hollywood sound cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. ENG 281 is crosslisted with FMS 250 and this course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

ENG 282 Global Film History: 1961 to Present 3 Credits

Examines major technological, industrial and aesthetic developments in both American and international cinema of the period. From the decline of the studio system and the emergence of the 'New Hollywood' to the digital revolution; from the renaissance in Western and Eastern European cinemas to Latin American, Asian, and Middle Eastern cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. ENG 282 is crosslisted with FMS 251 and fulfills the general education global perspectives requirement.

ENG 284 Language of Film Analysis 3 Credits

Provides students with the fundamentals necessary for achieving beginning proficiency in methods of cinema studies scholarship. The course provides an in-depth introduction to concepts of film analysis, theory, and history, as well as to the field of cinema studies as an academic discipline. Through close analysis of selected films and readings, students will examine the various and complex ways in which formal elements shape meaning. Students also will study key concepts in film theory, applying these concepts as a further means of understanding the ways in which film positions viewers and mediates ideology. Required of all English majors and minors with a cinema studies concentration. ENG 284 is crosslisted with FMS 284.

ENG 285 American Film History: Origins to 1960 3 Credits

Examines major technological and aesthetic developments in American cinema as it grew from the days of one-reel silent shorts exhibited in storefront theaters through the days of studio productions exhibited in lavish picture palaces and featuring iconic stars the system manufactured and promoted. From the inception of sound and color, to the later development of lightweight equipment that freed filmmakers from the confines of the studio, from the "golden age" to the gradual decline of the Hollywood studio system in the 1950s, we will study the lasting genres that grew out of the system, the filmmakers who flourished and those who rebelled against the system, and the ground-breaking films that established the American film industry as a dominant force within the world. ENG 285 is crosslisted with FMS 252.

ENG 286 American Film History: 1961 to Present 3 Credits

Examines the transitions of Hollywood in the post-studio era— the rise of the 1960's-1970s New Hollywood and its ground-breaking films, the rise of the blockbuster as an industry standard; the responses of independent filmmakers and the avant-garde to blockbuster dominance; the transition from the Production Code to the ratings system, the move back to studio-owned theaters, and the emergence of digital cinema and CGI. We will look at how genres are being redefined, how major filmmakers are re-shaping their work to fit 21st century demands, how "gaming," YouTube, and other media sources are altering the very definition of cinema. ENG 286 is crosslisted with FMS 253. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

ENG 290 The Short Story 3 Credits

Presents the development of the short story from the 19th century to the present with an emphasis on the techniques of plot, setting, characterization, theme, and point of view. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENG 295 Human Relationships in Literature (HONORS) 3 Credits

Through in-depth analysis of significant pairs of literary works from a variety of time periods, students in this honors course will study the dynamics of human relationships as they are presented in literature. Emphasis will be on portrayal of interpersonal relationships as inflected by conventions, constraints, and taboos. Social and psychological theories will complement esthetic and formal analysis of fiction, drama, poetry, and film. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): 3.3 GPA.

ENG 303 Creative Writing: Poetry 3 Credits

A workshop analyzing the techniques of poetic expression, with a focus on the student's original experiments in traditional and contemporary verse forms.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 304 Creative Writing: Fiction 3 Credits

Students write original fiction and analyze the techniques of writing fiction in discussion of both their own drafts and published examples of the form.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 305 Creative Writing: Nonfiction 3 Credits

A workshop in Creative Nonfiction (aka Literary Nonfiction or Narrative Nonfiction, abbreviated CNF) in which students will write and read different forms of memoir and essay, including Personal Essay, Lyric Essay, Travel Writing, Oral History, and Personal Profiles. Creative Nonfiction (CNF) tells true stories using the literary techniques of fiction-writing, such as building dramatic scenes, establishing suspense, and developing a narrative sequence of events, or plot. CNF employs vivid sensory detail and builds characters and scenes to enhance the reader's experience of the story. Challenging the traditional journalist's stance of objectivity and emotional distance from her topics, CNF writers often put themselves into their stories to create a voice of reflection. We'll talk about what types of creative license CNF gives writers, and also about the ethics of storytelling, especially when your story's characters are real, living people.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 306 Creative Writing: Drama 3 Credits

Examines cultural developments in the United States from the late 19th century to the present. Topics include popular culture, intellectual history, gender history, literary history, film, institutions like museums and department stores, subcultures and countercultures, popular commemorations like World's Fairs, and political culture. Some of the largest trends explored include the development of the modern culture of consumption, the urban landscape, and the polarization of cultural values.

ENG 311 Creative Writing: Playwriting 3 Credits

A workshop teaching and analyzing how students write for the stage that pays particular attention to the demands of the genre. Through reading and writing assignments, students will discuss and analyze the development of their own dramatic scripts for theatrical performance. A portfolio of revisions will serve as a final for the course.

ENG 312 Creative Writing: Screenwriting 3 Credits

A workshop teaching and analyzing how students write for the screen, both television and film, that pays particular attention to the demands of the genre. Through reading and writing assignments, students will discuss and analyze the development of their own dramatic scripts for production. A portfolio of revisions will serve as a final for the course.

ENG 313 Creative Writing: Experimental Writing 3 Credits

A creative writing workshop dedicated to developing a wider range of literary techniques. For the purposes of this course, Experimental Writing is defined as writing that departs – in form, structure, or style – from the conventions of literary realism. Students will demonstrate proficiency in writing and reading experimental fiction, nonfiction, and poetry, with an emphasis on experimental narrative techniques such as metafiction, magic realism, the unreliable narrator, multi-genre and hybrid forms (works that blur the lines between poetry and prose, for example), nonlinear storytelling, fragmentation, and poetic techniques such as found text and readymades, self-imposed constraints, and the collage or mashup.

Prerequisite(s): ENG 206.

ENG 315 Topics in Specialized Writing 3 Credits

A workshop in which students will write on specialized topics chosen by the instructor.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 316 Theories of Writing & Tutoring 3 Credits

A workshop on writing and tutoring theory for students interested in becoming writing tutors or teachers.

Prerequisite(s): minimum GPA 3.0, sophomore standing, and permission of the instructor.

ENG 318 Food Writing 3 Credits

Food Writing is a thematically based course in essay writing. It develops students' ability to write effective informal prose while also extending their knowledge about food sources, preparation, and consumption. They learn through readings and exercises, however, that food writing is about more than food. It encompasses the pleasures of the table, history, culture, science, and politics.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 320 Editing for Literary Publishing 3 Credits

This course introduces students to the process of publishing literary magazines and books. Student will learn all aspects of publishing from solicitation of manuscripts to the production of copy. Specific skills will include copyediting, proofreading, and layout.

ENG 321 Business and Professional Contexts 3 Credits

Students practice writing effectively to achieve specific purposes in typical business and professional workplace environments. Genres include various kinds of internal and external communication, including print and social media, for a range of audiences.

Prerequisite(s): CMP 125 or COM 203 or BHP 150 or permission of instructor.

ENG 322 Grant Proposals, Fundraising and Development 3 Credits

Students employ their analytical and writing skills to research and write grants for non-profit organizations in their local or regional communities. Fundraising and development activities on behalf of area organizations introduce them to career opportunities in this growing field.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150 or permission of instructor.

ENG 323 Reviewing and Publishing 3 Credits

Students learn to write arts and literary criticism through studying the work of prominent critics in literature, theatre, film, dance, visual arts, and music. Students learn how to market themselves as potential reviewers for print and online publications.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150 or permission of instructor.

ENG 324 Workplace Writing: Online Contexts 3 Credits

This course will help students adapt their writing to online environments. A writing-intensive course grounded in rhetorical principles, it focuses upon planning, writing and producing online texts distributed entirely through virtual portals. Genres include E-mail, instant messages, text messages, blogs, wikis, workplace social-media, and online team collaborations.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 325 Jobs in Book Publishing 3 Credits

Students will practice the forms of writing used by literary agents and publishing professionals working in acquisitions, editorial, and production at trade, academic, and small literary presses. These forms may include the query letter, book proposal, reader's report, and marketing plan.

Prerequisite(s): Completion of composition requirements or permission of instructor.

ENG 331 Medieval Literature 3 Credits

A seminar in Old and Middle English authors, such as Bede, Chaucer, and Kempe, and texts, such as Beowulf, moralities, and mystery cycles. Students may be introduced to linguistic issues, historical and political concerns and critical topics such as literacy, canon formation, and gender.

ENG 332 British Literature, 20th-Century to Present 3 Credits

A seminar on literature in the United Kingdom from 1900 to the present, emphasizing formal experiments as well as historical contexts, and including such writers as Joyce, Woolf, Beckett, Rhys, Eliot, and Ishiguro.

ENG 333 16th-Century Literature 3 Credits

A seminar on Renaissance literature including such writers as More, Wyatt, Surrey, Spenser, Sidney, Shakespeare, and Marlowe.

ENG 335 17th-Century Literature 3 Credits

A seminar on literature in England from 1600 to 1660, including such writers as Donne, Jonson, Browne, Herbert, and Marvell.

ENG 336 Grammar and Style 3 Credits

By building a comprehensive knowledge of the conventions of English grammar, punctuation and syntax, students will learn how to analyze the way words, phrases, sentences, and paragraphs work in expert writing, and they will apply this knowledge to their own writing. Emphasis is on argument, exposition, and analysis.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 337 Global Literature 3 Credits

A study of the recent literature, in English, of one or more writers whose cultural identification is with one of the former colonies of the British Empire, as it was defined at the beginning of the 20th century. Literature in the English language, written by authors of African, Caribbean, Pacific Island, East Asian, or South Asian cultures may be included.

ENG 340 Restoration & 18th Century Literature 3 Credits

An exploration of literature in England from 1660 to 1800, including such writers as Astell, Pope, Finch, Swift, Defoe, Fielding, Johnson, and Wollstonecraft.

ENG 344 Biblical and Classical Influence in Literature 3 Credits

This course surveys biblical and classical influences on western literature from Shakespeare to Atwood. Its primary objective is to introduce selections from the Old and New Testaments, Homer, Aeschylus, Sophocles, Ovid, and Dante so that you may recognize and appreciate references and allusions to these stories - their enduring influence - in early modern literature and culture.

ENG 345 Romantic Literature 3 Credits

A seminar on literature in England from 1780-1830, emphasizing a close study of the poetry of Blake, Wordsworth, Coleridge, Shelley, Byron, and Keats, as well as important novelists and female poets of the period.

ENG 346 Victorian Literature, 1830-1900 3 Credits

A seminar on literature in England from 1830 to 1900, emphasizing close study of the literary culture, including such writers as Dickens, Browning, Mill, and Ruskin.

ENG 347 20th-Century British Literature 3 Credits

A seminar on literature in the United Kingdom from 1900 to 1960, emphasizing formal experiments as well as historical contexts, and including such writers as Joyce, Woolf, Beckett, Rhys, Delaney, and Eliot.

ENG 348 Contemporary British Literature 3 Credits

A study of contemporary literature written in English after 1945, in the U.K. and elsewhere, by writers of British, Irish, Scots, Welsh, and other cultural traditions. Poetry, fiction, literary essays, and drama will be included.

ENG 350 Sex and Sin in Early American Literature 3 Credits

A seminar on literature in the United States from its beginnings to 1800, emphasizing the changing and conflicted nature of religious beliefs and sexual identities in Early America. Students will read and analyze diverse literary genres including diaries, letters, essays, novels, short stories, poems, and sermons.

ENG 351 19th-Century American Literature 3 Credits

A seminar on literature in the United States from 1800 to 1900, emphasizing literary genres and the definition of an American literature as distinct from English literature.

ENG 353 Contemporary American Literature 3 Credits

A seminar on American literature from 1945 to the present.

ENG 354 Selected Topics in English 3 Credits

Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 355 Selected Topics in English 3 Credits

Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 356 Selected Topics in English 3 Credits

Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 357 American Literature, 20th century to Present 3 Credits

"A seminar on American literature from 1900 to the present, including such writers as O'Neill, Hemingway, Faulkner, Richard Wright, Stevens, Moore, and Williams, and Morrison."

ENG 361 Selected Topics in English 3 Credits

Exploration of special topics, themes or methodologies in English. This course may be repeated for credit on different topics.

ENG 362 The Novel 3 Credits

A close reading of novels from various historical periods and cultures.

ENG 363 The Drama 3 Credits

A close reading of drama, with attention to cultural contexts and the genres of tragedy and comedy.

ENG 364 The Poem 3 Credits

A close reading of poetry, with attention to historical periods and poetic genres.

ENG 365 Short Fiction 3 Credits

A close reading of short fiction from a variety of cultures, with attention to the various genres of short fiction: short-short, short story, long story, and novella.

ENG 366 Black and Multi-Ethnic Literature 3 Credits

A Survey of the literary writings of selected writers of Black and Multi-Ethnic America. Writers may include Zora Neale Hurston, Dorothy West, Maxine Hong Kingston, Anzia Yezierska, Louise Erdrich, Don Lee and Amy Tan.

ENG 371 Classics of Children's Literature 3 Credits

An analytic study of classic and contemporary literature for children. Students will be introduced to a variety of critical approaches, including psychoanalytic, social/historical and feminist. The course may be of particular interest, but is not restricted, to students majoring in education or psychology.

ENG 372 Children's Literature: The Adolescent Experience 3 Credits

A study of enduring literature examines how exemplary writers chronicle the challenges of growing up. Texts may include influential Young Adult fiction, classics such as *The Catcher in the Rye* and *To Kill a Mockingbird*, and contemporary fiction by important writers who focus on the relevant themes.

ENG 375 Literature and Sexuality 3 Credits

The study and application of theories of gender and sexuality in various periods of British and/or American literature. Possible course topics include the literature of AIDS, the literary history of sexuality, Gothic literature and sexuality, colonialism and desire, and sensibility and sexuality in the later 18th century.

ENG 381 Studies in Film Genre 3 Credits

Provides an in-depth examination of a variety of film genres (such as the gangster film, the western, the musical, the screwball comedy, the science fiction film, and the horror film, among others), to be examined through the perspective of film genre theory. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing specific genres, and will trace the development of those genres within the dual contexts of the film industry and cultural ideology. Note: This course is cross-listed as FMS 381.

ENG 382 Comparative Film Directors 3 Credits

Provides an in-depth comparative study of major American, international, independent and avant-garde filmmakers. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing the work of individual directors and will draw meaningful comparisons among directors sharing similar aesthetic and thematic approaches. Students will trace the artistic development of directors through their careers, assessing individual works in the context of film criticism and theory, and in the context of multi-layered intertextual influences. Note: This course is cross-listed as FMS 382.

ENG 383 Global Cinemas 3 Credits

Provides an in-depth study of the history and defining characteristics of national cinemas. Through close analysis of selected films and readings, students will examine the general movements within the history and development of various national cinemas, with attention to film historiography when considering how patterns are to be viewed in light of the culture, politics, and history of a particular producing nation. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as FMS 383.

ENG 384 Film Adaptation 3 Credits

Provides an in-depth study of intertextual influence, as film enters into "dialogue" with various literary forms. Through close analysis of selected films and various forms of literature-including novels, graphic novels, short stories, plays, poetry, and journalism- students will study the aesthetic specificity of both film and literary genres and will analyze the transformative qualities at play when a work is adapted from page or stage to screen. Note: This course is cross-listed as FMS 384.

ENG 400 Creative Writing: Advanced Creative Writing 3 Credits

An advanced workshop in creative writing.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 405 Advanced Prose Style 3 Credits

Students analyze prose styles in English from the Renaissance to the present, focusing on the development of syntax, diction, and content. Students will be encouraged to imitate stylistic models and to develop their own prose style.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 407 Advanced Workplace Writing 3 Credits

Students will learn to adapt their writing skills to match specialized writing needs in publishing; corporate and personal finance; health, medicine, science, and technology. This course helps students build a portfolio and introduces them to corporate and freelance writing opportunities in our NJ/PA/NY area.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 411 History of the English Language 3 Credits

A seminar on the historical development of the English language, including phonetics, diversity, and present-day usage.

ENG 425 Seminar in Shakespeare 3 Credits

A seminar on Shakespearean drama and poetry.

ENG 435 Seminar In Milton 3 Credits

A seminar on Milton's lyric poetry, *Samson Agonistes*, *Paradise Lost*, and prose.

ENG 440 Seminar in Selected Major Authors 3 Credits

Seminar focusing on literature by one or two authors.

ENG 441 Seminar in American Literature 3 Credits

A seminar focusing on literature by one writer or by a small group of writers.

ENG 443 Seminar in Literary Modernism 3 Credits

A seminar on literature from 1900 to 1940, by British, Irish, and American writers such as Hardy, Yeats, Woolf, Joyce, Eliot, Williams, Hurston, and Faulkner.

ENG 445 Seminar in Black/Multi-Ethnic Literature 3 Credits

A seminar focusing on literature by black, Native American, Hispanic, Asian American and first-generation immigrant writers.

ENG 455 Seminar in Chaucer 3 Credits

An examination of Geoffrey Chaucer's writings from a number of critical perspectives, including close reading of the texts in Middle English, context and history, gender and sexuality, linguistics, and paleography and codicology.

ENG 465 James Joyce 3 Credits

This course will offer advanced English majors an in-depth exploration of the fiction of James Joyce with a particular focus on Joyce's novel *Ulysses*, considered one of the most (if not the most) important novels written in the twentieth century. Through a carefully scaffolded reading of Joyce's challenging work, students will explore the technical, aesthetic, and social innovations of modernist fiction and its contemporary and continuing cultural impact; recognize and articulate classical, biographical, and cultural influences on Joyce's work; and understand how editors, publishers, critics, and readers contribute to the production of seminal works of literature.

ENG 484 Seminar in Cinema Studies 3 Credits

Provides an in-depth study of areas central to discussion and debate in the field of cinema studies (such as film violence, cinema censorship, feminism and film, post- colonial cinema, African- American cinema, blaxploitation, The French New Wave, and Italian Neorealism, among others). Through close analysis of selected films and readings, students will examine the impact of specialized influential movements in film history and in film theory and criticism. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as FMS 484.

ENG 485 Cinema Studies for Teachers 3 Credits

Designed for teachers and education students who (will) use film in their classrooms, ENG 485 provides approaches to teaching basic film analysis; approaches to helping students recognize the permeable boundaries between film, culture, and ideology; and approaches to understanding selected issues crucial in cinema studies as a field of scholarly study. The course provides teachers and prospective teachers with various methodological approaches and flexible uses of fiction and documentary films across the curriculum, whether to supplement or reinforce existing curricula or in stand-alone courses devoted to the study of film.

ENG 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. To count toward the Certificate in Workplace Writing, an ENG 490 project must focus on workplace-related writing and be structured to include substantial formative feedback and revision. No more than one ENG 490 may be counted toward the certificate.

Prerequisite(s): completion of composition requirements or permission of instructor.

ENG 491 Internship in Writing and Publishing 1-6 Credits

Students work under the supervision of English faculty and on-site supervisors to complete real- world assignments in writing, publishing, and cinema studies. Their performance is assessed by professional standards. A minimum of 48 hours of field work per credit is required. Students report to faculty and on-site supervisors regularly, submit all work required by on-site supervisors, maintain a log, and complete a final report. Three credits required to count toward English writing concentration. Restricted to juniors and seniors.

ENG 497 Advanced Study 3 Credits

Qualified majors may apply for honors in their senior year. Upon approval from the department of English, a candidate for honors enrolls in Advanced Study, writes a thesis, and submits it for departmental approval. The student must achieve a course grade of "B+" or better to be graduated with honors in English.

Prerequisite(s): senior standing; 3.5 GPA in English; 3.25 cumulative GPA.

English Composition (CMP)

CMP 100 Intro to College Writing 3 Credits

Students will develop their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. Pass or fail.

CMP 100S Intro to College Writing 1-3 Credits

Students will develop their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. Pass or fail.

CMP 115 Intro to Expository Writing 3 Credits

Students will develop college-level skills in critical reading of challenging texts and in writing expository essays responding to those texts. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): SAT EBRW score less than 550 or ACT English score less.

CMP 120 Seminar in Writing and Rhetoric 3 Credits

Students will increase their competence in the critical reading of challenging college-level texts that engage significant ideas and in writing effective essays that advance a clear and meaningful thesis while demonstrating understanding of those texts. The second of the department's three-course composition sequence, This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

CMP 125 Seminar in Writing and Research 3 Credits

Introduces students to the process of library research and documented writing. Emphasis will be on the refinement of critical reading, thinking, and writing strategies applied to multiple sources and documented papers. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CMP 120 or BHP 100.

CMP 203 Literature and Composition 3 Credits

Students will write research papers and do library research through the use of literary materials. The course emphasizes increasing the comprehension of ideas and experiences by means of selected readings. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): CMP 203 is open to students who receive a grade of "A" or "B" in CMP 120; it may be used as a substitute for CMP 125.

Entrepreneurial Studies (ENT)

ENT 100 Innovation and Entrepreneurship 3 Credits

This course provides students with an introduction to creativity, innovation, and the concept of an entrepreneurial mindset. Students explore the excitement and challenges faced by individuals and businesses as they create, develop, and evaluate innovative business opportunities. We also discuss the probable paths of career development for students pursuing entrepreneurship. In this course, students evaluate their own views of innovation and entrepreneurship within the framework of entrepreneurial thinking, and putting this mindset into action.

ENT 210 Sports Entrepreneurship 3 Credits

Sports Entrepreneurship will introduce students to entrepreneurship in the sports industries as they explore opportunities and challenges for new ventures in this sector. Using an industry's business model, students will identify competitive advantages and understand what is required for startup success.

ENT 220 Inside The Entrepreneurial Mind 3 Credits

Inside the Entrepreneurial Mind is not just for Entrepreneurship majors! Whether you're starting your own business or want to succeed in running a division for another firm, you will need to adopt an entrepreneurial mindset. This mindset takes a holistic approach to running a business, realizes that failure is part of the journey and that resilience in overcoming obstacles are necessary skills for success. In this course, students will hear from entrepreneurs and industry leaders as they share their personal experiences, the challenges they've overcome and the paths they've taken to arrive at success in their businesses and careers. Through these entrepreneurial stories, students will be introduced to the skills and strategies that will help them overcome challenges in both their careers and personal lives. Available to undergraduate Sophomores, Juniors, and Seniors.

ENT 260 Family Business Management 3 Credits

This course is directed at understanding the family-owned and managed firm. Topics included are the strengths and weaknesses of a family firm, the dynamics of the family and business interactions, conflict resolution, succession planning and ownership transfer. The course will help individuals involved with a family firm, regardless if they are a family member.

Prerequisite(s): MGT 201 and junior standing.

ENT 335 Small Business Tax Planning 3 Credits

This course provides an understanding of the key tax issues faced by small businesses and their business implications. It also familiarizes prospective business owners with various tax filing requirements so that they can use the expertise of tax professionals more effectively.

Prerequisite(s): ACC 210.

ENT 348 Small Business Management 3 Credits

This course provides students with an introduction to ownership/management in the world of small business as well as an understanding of what is needed to start/buy/sell a small business. In addition, the course endeavors to help students move from a consumer orientation to a producer orientation, and to learn project management and research skills through participation in a hands-on project. The project has students investigate the market potential of an innovative business concept, and then use this research to evaluate the business concept as an entrepreneurial opportunity.

ENT 350 Entrepreneurial Finance 3 Credits

This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.

Prerequisite(s): FIN 300.

ENT 375 International Entrepreneurship 3 Credits

Students will learn how new or small ventures enter international markets. Requirements include developing a case about starting or running a venture in a single country of the student's choice.

Prerequisite(s): MGT 201 and junior standing.

ENT 399 Entrepreneurship Co-Op 6 Credits

This course provides students with a semester-long supervised employment with an entrepreneurial firm/organization. Students are required to maintain a journal, complete a reflection paper and are evaluated by the participating firm/organization. Eligible students are entrepreneurial studies juniors or seniors with a 3.0 GPA or better. Co-op credits count as free electives. Grading is on a pass/fail basis.

Prerequisite(s): ENT 348 or permission of program director.

ENT 410 New Venture Planning 3 Credits

This course will require students to select a business and prepare a complete new venture plan for it. This plan would identify the product and its target market, analyze its market potential, choose the location, scale of operation, layout, staffing, type of financing, estimate the revenues and profits, and present the income statement, balance sheet, and the cash flow projections.

Prerequisite(s): ENT 348 or permission of instructor.

ENT 420 Student Venture Experience 3 Credits

Students will start and run a small business while under the supervision and guidance of faculty. Students will take a business plan developed through New Venture Planning (ENT 410) and execute it. Students will experience the launch process and learn, hands on, how to adapt to the marketplace. Some businesses started in this class may also be eligible for seed venture funding from Rider.

Prerequisite(s): ENT 348, ENT 410, and permission of instructor.

ENT 444 Special Topics 3 Credits**ENT 448 Small Business Consulting Sem 3 Credits**

This course utilizes student teams to assist existing small businesses in solving problems or researching opportunities. Students will spend the majority of time in the field utilizing an experiential learning approach. Weekly activity logs, proposal development, and project completion are required. Restricted to seniors.

Prerequisite(s): ENT 348 and permission of instructor.

ENT 490 Independent Research and Study 3-4 Credits

Topic to be approved by professor and program chairperson. Available to juniors and seniors.

ENT 491 Internship 3 Credits

Environmental Sciences (ENV)

ENV 100 Introduction to Environmental Sciences 4 Credits

Examines how ecosystems function, with emphasis on the interactions between biological organisms and their physical environment, and the chemical processes that govern these interactions. The impact of human populations on natural ecosystems is investigated in detail using case studies from history and current events. The laboratory provides for hands-on experiences and/or short field trips to local sites for a better understanding of many of the concepts discussed. Weekday and weekend field trips may be required. Three hours of lecture and one three-hour lab per week. CLAS general education areas addressed: DP, SP, GP.

Corequisite(s): ENV 100L.

ENV 100L Introduction to Environmental Sciences Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): ENV 100.

ENV 110 Future of Natural Resources 3 Credits

In this course, students are introduced to topics in the natural sciences through studies of human exploitation of selected natural resources (e.g. water, fisheries, mineral resources, energy, etc.). The course work includes a study of the scientific process and how it can contribute to solutions to contemporary issues. Topics covered will include factors that influence real-world decisions to manage natural resources more sustainably (e.g. political, economic, ethical factors). During the three hours of class meetings each week, lecture and exercises will be integrated. Field trips will be required. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

ENV 120 Introduction to Climate Change 3 Credits

This course offers students an overview of the human impacts on Earth's climate and emerging solutions to limit future climate change. Students will learn scientific insights into the interconnected components of Earth's climate as a system including the atmosphere, oceans, land, geology, and ice. Human effects on Earth's climate system will be contrasted with natural climate variation that preceded the industrial revolution. Students will also consider the personal, societal, and ethical implications of climate change through the lens of environmental justice.

ENV 200 Statistical and Computer Applications in the Natural Sciences 4 Credits

This course introduces important statistical concepts, their application, and the usage of computer technology relevant to biological, environmental, geological, and marine problems. Students will learn various graphical and statistical techniques and how to execute them on personal computers. The curriculum emphasizes the integrated nature of these techniques and their importance to meaningful data evaluation and representation. Laboratory exercises are designed to emphasize useful solutions to problems found in many scientific disciplines using computer-based methodologies. Three hours of lecture and one three-hour lab per week.

Corequisite(s): ENV 200L.

ENV 200L Statistical and Computer Applications in the Natural Sciences Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): ENV 200.

ENV 205 Introduction to Geographic Information Systems 3 Credits

This course introduces the computer-based concepts and skills of Geographic Information Systems (GIS). It covers the basic GIS concepts, such as map characteristics and projections, spatial data models and analysis, and relational databases. It explores data sources, data quality, and metadata, as well as implementation and management of specific GIS projects. Hands-on experience with ArcGIS software is provided through a series of student exercises completed throughout the semester. Students will also be taught how to process both vector and raster data using ArcGIS software. The course is relevant for students from numerous disciplines in the natural sciences, social sciences, and business, which require the analysis and graphical representation of spatial data. Three hours of lecture per week. Note: This course is cross-listed as GLS 205. Students may not receive credit for both ENV 205 and GLS 205.

ENV 220 Weather and Climate Change 3 Credits

This course introduces students to the concepts of weather and climate change. These concepts frame a continuum from short-term or daily changes in the atmosphere (meteorology) to those changes averaged over much longer periods of time (climatology). Students will learn the fundamentals of weather forecasting, the causes of natural variation in the Earth's climate, and the impact of human actions on the Earth's climate. Connections will be drawn to other current issues in the Earth system, including land use change, biodiversity, and pollution. Three hours of lecture per week.

Prerequisite(s): GEO 100 or permission of instructor.

ENV 290 Directed Research and Study in Environmental Sciences 1-4 Credits

Provides an opportunity for freshman and sophomore students to gain hands-on research experience in the environmental sciences. This is an individual program of study and each student will work with a selected faculty member on a topic of mutual interest. The course consists of a combination of project meetings, supervised research, and guided readings. The focus will be on formulating research questions, designing and conducting experiments, collecting the necessary data, reviewing the scientific literature as it relates to each student's research topic in weekly meetings with the instructor, and communicating the findings by writing a final project report.

ENV 340 Environmental Field Methods and Data Analysis 3 Credits

This course will provide students with practical experience in field methods and data analyses within the environmental sciences. The course will include advanced activities incorporating field-based exercises, GIS analyses, statistical analyses, and database management. Students will also complete an independent project focused on a relevant topic. Local field trips during lab and on weekends may be required.

Prerequisite(s): MTH 105, GEO 100, GEO 102, and ENV 100; or Permission of Instructor.

ENV 350 Principles of Environmental Toxicology 3 Credits

A comprehensive description of the important principles of toxicology, including the absorption, distribution, metabolism, and excretion of toxic substances. Target organs systems will be discussed as well as mechanisms of carcinogenesis and teratogenesis. Specific groups of toxins to be discussed include: pesticides, metals, radiation, solvents and vapors, and plant and animal toxins. Three hours of lecture per week.

Prerequisite(s): BCH 225 or CHE 211, BIO 115 or BIO 117.

ENV 375 Environmental Biogeochemistry 3 Credits

This course examines the biogeochemical interactions among various environmental components, including water, rock, soil, organisms, and atmosphere. Covered topics focus on the relation between the biosphere and changes in the Earth's environment and atmosphere. The transfer of energy and nutrients within terrestrial ecosystems also is explored. Case studies from various examples will be used to understand ecosystem dynamics. Long-term environmental change and present-day ecosystem restoration activities are examined in the context of biotic offsets and land-use planning. The biogeochemical cycles of some environmentally sensitive compounds and elements in natural systems, such as pesticides, mercury, and lead, also may be examined. Three hours of lecture per week.

Prerequisite(s): GEO 100 or GEO 113, CHE 120, CHE 121, CHE 122, CHE 123.

ENV 480 Senior Thesis 3 Credits

A senior thesis is optional for environmental science majors. However, a senior thesis is required for eligibility to graduate with honors in environmental science. The topic for investigation will be chosen by the student in consultation with the faculty of the Department of Geological, Environmental, and Marine Sciences. The student must initiate consideration of a proposal to the Department. The proposal must contain a discussion of the proposed project and a timetable to be followed in the study. A departmental committee consisting of a major and minor advisor will evaluate the written paper submitted at the conclusion of the study. An oral presentation before the department at the conclusion of the semester in which the study is completed is required. Proposals must be submitted in final form no later than the end of the ninth week of the semester prior to the semester in which the study is undertaken.

Prerequisite(s): senior standing in the geosciences major and permission of instructor.

ENV 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

ENV 491 Internship in Environmental Sciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placements may be in private, public, non-profit, or governmental organizations. These can include consulting firms, regulatory agencies, advocacy groups, and educational or research institutions. Normally, 50 hours of internship per credit is required. A mutually agreed upon method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and could include a term paper or project report and a poster presentation.

Prerequisite(s): 2.5 GPA and permission of instructor.

European Area Studies (EUR)**EUR 250 Intro to European Area Studies 3 Credits**

This multi-disciplinary course introduces students to European Area Studies, and focuses upon how Europe has been conceptualized as a social, cultural, economic and political entity. Subjects surveyed through materials drawn from multiple disciplines and media include geography, ecology and climate; principal language systems and their development; historical, political and economic developments from antiquity to the modern era; architecture, city development and design; contemporary cultural life; and the formation and organization of the European Union. Required foundation courses for the European Area Studies minor.

Exercise Science (EXS)**EXS 121 Exercise Injury Control and Management 3 Credits**

This course is designed to provide the participant with entry level knowledge, competence, and skill in the care and prevention of injuries sustained during physical activity, sport, and exercise. This course includes units dealing with basic anatomy of common injuries, evaluation techniques, preventive measures to reduce the incidences of injuries and a knowledge of basic treatment procedures to be used after injuries occur. Legal and ethical issues will also be discussed.

EXS 320 Exercise Physiology 3 Credits

An entry level exploration of the physiological processes, metabolic requirements, and consequences of exercise in humans. Emphasis is placed on bioenergetics, as well as circulatory, respiratory, and neuromuscular responses to the physical stress of exercise performed for health and disease prevention.

Prerequisite(s): BIO 221, BIO 222.

EXS 321 Exercise Physiology Laboratory 1 Credits

EXS 321 is the laboratory course that accompanies EXS 320. Topics will include entry-level practical skills and competencies related to exercise capacity evaluation, interpretation of exercise data, and application of exercise interventions in a clinical setting. **Prerequisite(s):** BIO 221, 222 **Co-requisite(s):** EXS 320.

EXS 340 Exercise Testing & Prescription 3 Credits

An advanced, competency based course in the evidence based evaluation and prescription of exercise interventions in healthy and clinical populations. **Prerequisite(s):** EXS 320 **Co-requisite(s):** EXS 341.

EXS 341 Exercise Testing & Prescription - Lab 1 Credits

An advance, competency based laboratory course in the evidence based evaluation and prescription of exercise interventions in healthy and clinical populations **Prerequisite(s):** EXS 320 **Co-requisite(s):** EXS 340.

EXS 360 Foundations of Strength and Conditioning 4 Credits

This course examines the advanced methods and techniques associated with the design of strength and conditioning programs to enhance human performance in sport and fitness. This course is designed to develop, enhance, and apply knowledge and skills to prepare the student for the profession of strength and conditioning. **Prerequisite(s):** EXS 320, EXS 321, HSC 302.

Corequisite(s): EXS 360L.

EXS 360L Foundations of Strength and Conditioning Lab 0 Credits

This course examines the advanced methods and techniques associated with the design of strength and conditioning programs to enhance human performance in sport and fitness. **Prerequisite(s):** EXS 320, EXS 321, HSC 302.

Corequisite(s): EXS 360.

EXS 401 Organization and Administration in Exercise Science 3 Credits

This course examines the various issues, policies, and procedures involved with administrative aspects of exercise science in traditional and non-traditional settings. Emphasis is on administrative concepts, facility design, budgeting and equipment purchasing, personnel management, record keeping, and legal liability.

Prerequisite(s): EXS 360.

EXS 405 Special Populations & Considerations 3 Credits

This course is an advanced course in exercise programming for a variety of unique populations. Pathophysiology and considerations relative to diseases of the musculoskeletal, neuromuscular, and immunologic systems will be discussed. Recommended modifications and evidence based techniques that support fitness programming for individuals with specific exercise needs will be explored.

Prerequisite(s): EXS 320.

EXS 490 Independent Study: Research and Creative Expression 1-3 Credits

Immerses the student in exercise science-related research. The student learns to organize material, use relevant medical/scientific literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

Prerequisite(s): Junior or senior standing; minimum GPA 2.5; EXS majors only; permission of instructor.

EXS 491 Internship in Exercise Science 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty member and should include keeping a journal of activities, a term paper or project report and an oral or poster presentation.

Prerequisite(s): Junior or senior standing; minimum GPA of 2.5; permission of instructor.

Film and Media Studies (FMS)

FMS 250 Global Film History: Origins to 1960 3 Credits

Examines major technological and aesthetic developments in both American and international cinema of the period, with an emphasis on global cinema. From silent comedy and melodrama to German Expressionism and Soviet activist cinema; from French poetic realism and Italian Neo-realism to Hollywood sound cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. FMS 250 is cross-listed with ENG 281 and fulfills the general education global perspectives requirement.

FMS 251 Global Film History: 1961 to Present 3 Credits

Examines major technological, industrial, and aesthetic developments in both American and international cinema of the period, with an emphasis on global cinema. From the decline of the studio system and the emergence of the "New Hollywood" to the digital revolution; from the renaissance in Western and Eastern European cinemas to Latin American, Asian, and Middle Eastern cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. FMS 251 is cross-listed with ENG 282 and fulfills the general education global perspectives requirement.

FMS 252 American Film History: Origins to 1960 3 Credits

Examines major technological and aesthetic developments in American cinema as it grew from the days of one-reel silent shorts exhibited in storefront theaters through the days of studio productions exhibited in lavish picture palaces and featuring iconic stars the system manufactured and promoted. From the inception of sound and color, to the later development of lightweight equipment that freed filmmakers from the confines of the studio, from the "golden age" to the gradual decline of the Hollywood studio system in the 1950s, we will study the lasting genres that grew out of the system, the filmmakers who flourished and those who rebelled against the system, and the ground-breaking films that established the American film industry as a dominant force within the world. FMS 252 is cross-listed with ENG 285.

FMS 253 American Film History: 1961 to Present 3 Credits

Examines the transitions of Hollywood in the post-studio era— the rise of the 1960s-1970s New Hollywood and its ground-breaking films, the rise of the blockbuster as an industry standard; the responses of independent filmmakers and the avant-garde to blockbuster dominance; the transition from the Production Code to the ratings system, the move back to studio-owned theaters, and the emergence of digital cinema and CGI. We will look at how genres are being redefined, how major filmmakers are re-shaping their work to fit 21st century demands, how "gaming," YouTube, and other media sources are altering the very definition of cinema. FMS 253 is cross-listed with ENG 286.

FMS 260 Great Performances in Film 3 Credits

Examines major accomplishments in film acting from the silent era to the present day. Students will acquire knowledge of the historical and critical contexts and the artistic vocabulary necessary to understanding, appreciating and assessing screen performances in a range of genres— from comedy and the musical, to the melodrama, psychological thriller, and "hard-boiled" film noir. Students will be asked to read, evaluate, and analyze film performance texts, as well as to research and write about performances in numerous films.

FMS 284 Language of Film Analysis 3 Credits

Provides students with the fundamentals necessary for achieving beginning proficiency in methods of cinema studies scholarship. The course provides an in-depth introduction to concepts of film analysis, theory, and history, as well as to the field of cinema studies as an academic discipline. Through close analysis of selected films and readings, students will examine the various and complex ways in which formal elements shape meaning. Students also will study key concepts in film theory, applying these concepts as a further means of understanding the ways in which film positions viewers and mediates ideology. Required of all Film and Media Studies minors. FMS 284 is cross-listed with ENG 284.

FMS 286 Writing Short Screenplays for Digital Cinema 3 Credits

Writing Short Screenplays for Digital Cinema will focus solely on the creation of a short screenplay for digital film. The course will ask that students conceive of and execute a viably producible screenplay, shooting script, and industry pitch for the modern market.

FMS 300 Special Topics in Film and Media Studies 3 Credits

Courses in specialized and interdisciplinary areas of Film and Media Studies explore all three phases of the media experience: the industry that produces, distributes and exhibits; the textual products themselves; and audience reception of these products. FMS 300 Special Topics in Film and Media Studies courses will focus on each of the phases individually and/or on intersections of all three phases. Special topics courses will devote attention to the relationship of film to both traditional as well as new media; the relationship of film to the other arts; the relationship of film to the ancillary products and industries it both creates and depends upon for financial profit; and the relationship of film as an industry and institution to the various cultural institutions film and media texts routinely represent.

FMS 340 Film and Media Audiences 3 Credits

Provides students with the fundamentals necessary for understanding media audiences and reception within the interdisciplinary framework of film and media studies. The course introduces students to the field of audience and reception studies, including theory, empirical scholarship and history. Students will learn about who composed audiences, how they behaved, how they responded to the medium and the texts it delivered, how they interpreted what it meant to be an audience, how audiences were defined and treated by others, both today and historically. This will include audiences of movies, radio, television and news media.

FMS 342 Artists of the Cinema 3 Credits

Provides the opportunity to delve into the work of an individual film artist (whether a director, producer, screenwriter, cinematographer, costume designer, art director, musical composer, actor) or to examine a creative team (various combinations of a director, actor, cinematographer, screenwriter) that has collaborated in producing a series of films together. The course will pose the daunting question: Who is the author of the film? Even when studying individual artists, we will explore the influences and the working relationships that have shaped their work, and we will look outward to the way in which they have influenced other artists of their own generation and beyond.

FMS 381 Studies in Film Genre 3 Credits

Provides an in-depth examination of a variety of film genres (such as the gangster film, the western, the musical, the screwball comedy, the science fiction film, and the horror film, among others), to be examined through the perspective of film genre theory. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing specific genres, and will trace the development of those genres within the dual contexts of the film industry and cultural ideology. Note: This course is cross-listed as ENG 381. Students may not get credit for both ENG 381 and FMS 381.

FMS 382 Comparative Film Directors 3 Credits

Provides an in-depth comparative study of major American, international, independent and avant-garde filmmakers. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing the work of individual directors and will draw meaningful comparisons among directors sharing similar aesthetic and thematic approaches. Students will trace the artistic development of directors through their careers, assessing individual works in the context of film criticism and theory, and in the context of multi-layered intertextual influences. Note: This course is cross-listed as ENG 382. Students may not get credit for both ENG 382 and FMS 382.

FMS 383 Global Cinemas 3 Credits

Provides an in-depth study of the history and defining characteristics of national cinemas. Through close analysis of selected films and readings, students will examine the general movements within the history and development of various national cinemas, with attention to film historiography when considering how patterns are to be viewed in light of the culture, politics, and history of a particular producing nation. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as ENG 383. Students may not get credit for both ENG 383 and FMS 383.

FMS 384 Film Adaptation 3 Credits

Provides an in-depth study of intertextual influence, as film enters into "dialogue" with various literary forms. Through close analysis of selected films and various forms of literature-including novels, graphic novels, short stories, plays, poetry, and journalism-students will study the aesthetic specificity of both film and literary genres and will analyze the transformative qualities at play when a work is adapted from page or stage to screen. Note: This course is cross-listed as ENG 384. Students may not get credit for both ENG 384 and FMS 384.

FMS 484 Seminar in Cinema Studies 3 Credits

Provides an in-depth study of areas central to discussion and debate in the field of cinema studies (such as film violence, cinema censorship, feminism and film, post-colonial cinema, African- American cinema, blaxploitation, The French New Wave, and Italian Neorealism, among others). Through close analysis of selected films and readings, students will examine the impact of specialized influential movements in film history and in film theory and criticism. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as ENG 484. Students may not get credit for both ENG 484 and FMS 484.

FMS 490 Independent Study: Research and Creative Expression 1-4 Credits

FMS 490 Independent Study will allow Film and Media Studies minors to pursue specialized areas of study, research and/or creative work relevant to the field of Film and Media Studies in consultation and close collaboration with a Film and Media Studies faculty member.

FMS 491 Internship in Film and Media Studies 1-4 Credits

FMS 491 Internship in Film and Media Studies will provide approved juniors and seniors minoring in Film and Media Studies with the opportunity to gain practical experience through work in various outside film and media-related publications, businesses, organizations, and production companies.

Film and Television (FTV)

FTV 135 Filmmaking I 3 Credits

Filmmaking I introduces students to basic film and television production theories, techniques, and applications. Students will gain competency in a number of production areas including composition, lighting, filmic storytelling, sound, production planning and editing. As well as gaining practical production experience, students will also be introduced to basic art theory in relation to composition and visual storytelling.

FTV 202 Global Film & Media Industries 3 Credits

An introductory survey of the international film and television industry that will provide students with a global perspective of this ever-evolving industry. First, providing a basic foundation of key historical, economic and cultural factors and initiatives impacting and shaping films and television programs, this course will provide students with the tools to better understand the influence that globalization has on the film and television industry and the impact the products of this industry may have throughout the world.

FTV 221 Animation: History, Art, Industry & Culture 3 Credits

An introduction to the history of animation in film and television, this course will explore animation as art, industry, and purveyor of culture. Through this course, students will gain a greater appreciation for aesthetics, technology, and the cultural and communication theories impacting and influencing the genre, and gain a greater understanding of the role played by key individuals and companies in the development of both iconic characters and in the shaping of an industry. Students will view a variety of important animated films and television programs and discuss the artistic, technical and narrative developments in animation from the early 20th century to the present. This course will provide students with a more nuanced understanding of the magic of animation and its impact and influence on culture and society throughout the globe.

FTV 230 Foundations of Film, Television and Radio 3 Credits

Examines film, television and radio industries, the programs they create and the powerful role they play in society. This course will examine the history, technology, structure, programming and regulation of these industries including issues, trends, and the impact of new and evolving technologies.

FTV 231 Film and Television Special Studies 1 Credits

Course descriptions will vary from topic to topic. This course will be offered Pass/Fail.

FTV 235 Filmmaking II 3 Credits

This course will build on the basic technical proficiency gained in COM 135 as applied to narrative filmmaking. Working as individuals and in groups, students will develop skills in narrative cinematic storytelling, and gain a basic proficiency in filmmaking theory, techniques and applications. Students will gain competency in a number of production areas including idea generation and scripting, production planning, cinematography, lighting, sound and editing.

Prerequisite(s): COM 131.

FTV 236 The Aesthetics of Filmmaking 3 Credits

Introduces students to basic terminology, techniques, theories and criticism commonly used in digital filmmaking. Through lecture, class discussion and screenings, students will learn how film theory, criticism and aesthetics impact the filmmaking process. Students will review and analyze films of different genres; the different approaches adopted by filmmakers; and the various elements and techniques that contribute to the creation of powerful and effective films. Aesthetic elements such as production design, mise en scene, cinematography, lighting, editing, sound design and script development will be introduced and practiced.

FTV 238 Screenplay Fundamentals 3 Credits

Screenplay Fundamentals will instruct students in how to write for the screen. Students will learn how to convey story and character through the medium of film and television, how to write effective dialogue, and understand the basics of dramatic writing and scene structure.

Prerequisite: COM 131.

FTV 239 YouTube: Content and Culture 3 Credits

YouTube, one of the most well-known and widely discussed examples of participatory media in the social media environment, is the first generally popular platform for user-created video. Blending theory and practice, this course examines the social, cultural, economic, and political implications of YouTube; the empowerment and pitfalls of the user-generated content it relies on; and the implication of the participatory media which has transformed passive viewers into active producers. Students will learn the historical roots of YouTube, become familiar with modes of media production, and study legal, ethical, and social justice issues related to the creation of channels and videos for YouTube. While the course has a significant theoretical component, students will engage directly in participatory practices by designing and creating course related content for YouTube. Through this course, students will gain a critical understanding of and a greater appreciation for the impacts of user generated video content on social and political participation locally and globally.

FTV 243 The Actor and Filmmaker 3 Credits

A practicum course that instructs the student on how actors and directors work together to build a performance. The course will provide on-hands experience in technical aspects of behind and in front of camera processes in capturing an actor's performance, exploring the demands and particularities of acting for the camera. This course will also serve as an introduction to basic acting theories and practices as they relate to how actors work to express a character onscreen. Elements of this course include monologue and scene rehearsal and performance (both multi-camera and single camera), audition techniques (for both actors and directors), and how film directors block and cover a scene. Students will gain experience both behind and in front of the camera, **Prerequisite(s):** COM 131 or FTV 135 for Film/TV majors or THE 110 for Theater majors.

FTV 250 Television Studio Production I 3 Credits

This introductory course is designed to expose students to the processes, equipment, production roles, techniques and goals of in-studio television production. Serving as directors, writers, on-camera hosts, etc., students will gain valuable, direct hands-on experience with the technical and creative challenges faced during the various phases of studio production from pre-production planning through actual remote and live studio work. Emphasis will be placed on studio operation and technology; the roles and responsibilities of the production crew; and the pressures faced during the direction of live, multi-camera productions.

Prerequisite(s): COM 131 or FTV 135.

FTV 291 Documentary Film and Video 3 Credits

Surveys the history of documentary film, including reportorial, exploratory, persuasive, symphonic, compilational, reflexive, and fictional traditions through screenings, lectures, and readings. Provides practice in film criticism. Explores philosophical questions about the relationship between non-fiction films and videos and the reality they purport to record. Analyzes ethical problems of filmmaking.

FTV 295 Cinematography I 3 Credits

This course introduces the art of cinematography from historical, aesthetic and practical perspectives. Students will learn the principles of cinematic composition, lenses, lighting, and camera operation while studying the work of great cinematographers in film history.

Prerequisite(s): COM 131.

FTV 328 Sitcoms and American Culture 3 Credits

Provides an overview to the unique and highly structured form of the American television situation comedy. The primary focus will be on history and development with in-depth study of situation comedy themes, characters, and settings. Through lectures, case discussions, in-class assignments, and class projects, students will examine the social and cultural meanings and implications of this incredibly popular and durable genre of programming.

FTV 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a different culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

FTV 333 Media Program Development and Distribution 3 Credits

Critically analyzes the theory, practice, structure, and function of media program development and distribution. Examines the structure of the field as it relates to programming, the industry and audiences. Studies program categories, formats, genres, trends, and audience measurement and analysis as well as the new and evolving technologies responsible for program development and distribution.

Prerequisite(s): FTV 230.

FTV 335 Documentary Production 3 Credits

This course serves as an introduction to documentary filmmaking. Students will be introduced to a wide variety of documentary styles and approaches and learn the basics of documentary production. Working in teams, students will gain firsthand experience with on-camera interviews, conducting documentary research, using practical and source lighting, scripting, and working with a variety of source material in constructing their own short documentary projects.

Prerequisite(s): COM 331.

FTV 339 Developing The Feature-Length Script 3 Credits

Developing the Feature Length Script will instruct students how to write a full-length film or television program. Students will learn the mechanics of 3-act and 7-act structure, and during the course they will develop a logline, synopsis, treatment, and sample scenes of a full-length project.

Prerequisite(s): FTV 238.

FTV 343 Actor and Filmmaker Practicum 1 Credits

A workshop class designed to give acting and filmmaking students an opportunity to collaborate on narrative film and television projects. During this class students will work closely with the directors on building compelling performances for the screen. Students will gain practical experience with auditioning, blocking of scenes, developing their characters and techniques for working effectively and efficiently with a director and crew.

Prerequisite(s): FTV 135 or THE 110.

FTV 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

FTV 392 Media History: Personalities and Trend 3 Credits

Presents in a topical manner the history of the media from various perspectives, seeking to place the material into a meaningful economic, cultural, political, and/or social context. Different issues and related individuals are examined, such as the golden age of radio, motion picture economics, and media empire builders, with a view toward understanding their significant impact on the development and functioning of the media today. This course may be taken more than once with a different emphasis.

FTV 395 Los Angeles Media Experience 3 Credits

This course is a practical exploration of the workings of the contemporary film and media industries in Los Angeles, California, and is designed as a required compliment for students enrolled in Rider's Semester in Los Angeles program. Focused on both major studios and independent production companies, this course explores how media are created, distributed and consumed in the U.S. and around the world. Students will examine the role of creativity, economics, an ever-evolving technology and the impact they have on how this industry operates today and where it may be heading into the future. The class will stay current by regularly reading trade publications and, through guest lectures, have many opportunities to hear directly from industry professionals about issues and challenges facing the field.

Prerequisite(s): POI (restricted to students enrolled in the Department of Film and Television Semester in Los Angeles program.

FTV 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; .

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

FTV 402 Directing for Film 3 Credits

This course approaches directing both creatively and critically, and examines the role and importance of the director to the filmmaking process. The transformation of the written script into a film is explored through readings, viewing and analyzing the films of accomplished directors. Lectures and exercises illustrated with film clips and readings emphasize plot development, script analysis, developing storyboards and shot lists, rehearsal, blocking, collaborating with talent and production crew, and using the camera to effectively capture action and performance. Students will gain an effective understanding of the role of the director through the various stages of film production, and be provided the opportunity to demonstrate and cultivate his/her effectiveness as a director through individual and group assignments.

Prerequisite(s): FTV 235 and COM 338.

FTV 435 Filmmaking III 3 Credits

This is an intensive hands-on course in advanced digital filmmaking. Students will gain proficiencies in a number of filmmaking areas including production planning, aesthetics, scripting, script breakdown, camera movement, selecting and directing talent, creating scenes and sequences, visualizing action, establishing mood and conflict, as well as advanced lighting, sound and digital editing techniques. The students' use of high definition digital imaging systems as a medium for narrative cinematography will be developed and refined. In addition, students will explore how filmmaking techniques and technology can impact the visual storytelling process. Students will work cooperatively in groups, modeling the interdependent structure of professional film crews. Throughout the class, there will be an important integration of theory and practice which will enable students to produce meaningful film projects that will not only be technically effective, but strong in content and context as well.

Prerequisite(s): FTV 235.

FTV 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

FTV 491 Internship in Film and TV 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Finance (FIN)

FIN 200 Managing Your Money 3 Credits

An introduction to the analysis of a wide range of financial decisions which individuals encounter over their careers and lifetime. Topics include financial goals, tax planning, home ownership versus renting, consumer credit, money management and investments, and managing risk with insurance. This course is open to all Rider students, and it counts as a free elective or a business elective. It cannot be used as finance elective.

FIN 220 Introduction to Finance 3 Credits

An introduction to the environment, concepts, and techniques of financial management. Topics include forms of business organization, taxes, analysis of financial performance, financial planning, financial markets and interest rates, time value of money, bond and stock valuation, risk and return, capital budgeting, cost of capital, and international financial management.

Prerequisite(s): ACC 210 and ECO 201.

FIN 305 Personal Financial Planning 3 Credits

This course focuses on practical issues and problems involving personal financial budgeting, use of credit, selection of banking services, insurance needs, real estate, investments, tax planning, and retirement planning. An important objective of the course is to provide the student with the tools that are utilized in making personal financial decisions and how to apply those tools for a variety of financial needs.

Prerequisite(s): FIN 220.

FIN 307 Financial Markets & Institut 3 Credits

This course provides an introduction to the organization and behavior of financial markets and institutions in the economy. The factors determining security prices and interest rates in the money and capital markets are analyzed. An overview of all major financial institutions is presented. In addition, market returns, the regulatory environment, and monetary policy are examined.

Prerequisite(s): FIN 220 or concurrent with FIN 220.

FIN 308 International Finance 3 Credits

Financial management in the international environment. Topics include balance of payments, foreign exchange markets, arbitrage, hedging of currency risk, country risk management, and the evaluation of foreign investment opportunities.

Prerequisite(s): FIN 220.

FIN 309 Intermediate Corporate Finance 3 Credits

This course builds on and extends the concepts of financial management learned in FIN 220. The course examines long-term corporate financing and investment decisions and how those decisions interface with each other. Topics covered include: cost of capital, financial planning and analysis, capital budgeting, capital structure and dividend policy.

Prerequisite(s): FIN 220.

FIN 312 Investments 3 Credits

The fundamentals of investing in stocks, bonds, and other negotiable instruments are covered. Major topics include trading on securities markets, mutual funds, international investing, margin accounts, short sales, determinants of securities prices, and investment risks. Stock options, financial futures, convertible securities, and implications of taxes on investment decisions are also discussed.

Prerequisite(s): FIN 220.

FIN 315 Financial Modeling 3 Credits

Provides instruction in computer use beyond what is available in other finance courses. Topics include more sophisticated applications of computers in financial management, investments, and other areas of finance and business. Students work on cases and projects which require more advanced usage of spreadsheets and other software and databases.

Prerequisite(s): CIS 185 and FIN 220.

FIN 330 Corporate Cash Management 3 Credits

This course is designed for business students seeking an understanding of modern principles and techniques for corporate treasury management. The course material is useful for finance, accounting, and banking professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multi-national cash management, and other related topics.

Prerequisite(s): FIN 220.

FIN 340 Risk Management 3 Credits

This course examines the risk management process as applied to the firm as a whole. It integrates the management of all risks facing the firm: strategic, financial, hazard, and operational. Techniques for identifying risk, measuring and analyzing it, and selecting an appropriate treatment will be explored.

Prerequisite(s): FIN 220.

FIN 350 Entrepreneurial Finance 3 Credits

This course covers the techniques for acquiring financial resources as a firm advances through successive business stages: seed, start-up, struggling, growing, and stable. In addition, it examines recent trends in credit markets and the latest financial innovations as they impact the process of financing the venture's growth.

Prerequisite(s): FIN 220.

FIN 360 Fixed Income and Derivatives 3 Credits

This course centers on the quantitative portion of the Chartered Financial Analyst (CFA) level 1 curriculum, which includes materials on fixed-income risk and return, fundamentals of risk analysis, derivative instruments and risk management applications of option strategies. The goal is to help students prepare for the exam, as well as introduce them to a variety of topics in finance.

Prerequisite(s): FIN 312.

FIN 370 Financial Analysis and Ethics 3 Credits

This course covers the topics of financial reporting and analysis and related ethical issues. The course would benefit students interested in augmenting their ability to understand, analyze and apply the information in financial statements. It provides essential knowledge for students seeking either the Certified Management Accountant (CMA) or Chartered Financial Analyst (CFA) certifications. Specifically, the course covers the Ethics and Professional Standards of the CFA curriculum, and materials on financial reporting quality and financial statement analysis. Course goals are to help students prepare for the certification exams, as well as introduce all interested students to a variety of topics in financial analysis and ethics.

Prerequisite(s): FIN 312 or POI.

FIN 380 Real Estate 3 Credits

Real estate finance and related subjects in real estate are examined. Topics include measuring cash flows and taxes, valuation methods for real estate investment decisions, location and value in real estate, home ownership, legal matters, and financing methods and techniques.

Prerequisite(s): FIN 220.

FIN 399 The Co-Operative Experience 6 Credits

The co-op program provides students with an opportunity to work full-time in a company and apply what they have learned in their finance and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first step before they hire full-time employees. Eligible students include finance majors with at least junior status, a minimum overall GPA of 3.0, and a minimum GPA of 3.0 in any finance coursework completed prior to the submission of the co-op application. Co-op credits can be applied toward business or free elective requirements but not toward finance elective requirements for majors. Grading is on a pass/fail basis.

Prerequisite(s): FIN 220.

FIN 405 Private Wealth Management 3 Credits

This course utilizes the Chartered Financial Analyst (CFA) curriculum and focuses on private asset management for high-net-worth investors. A wide range of topics including managing individual investor portfolios, taxes, estate planning, concentrated single-asset positions and individual risk management will be covered via lecture discussions. The main objective for the course is to help students develop the skills for a career in wealth management.

Prerequisite(s): FIN 305.

FIN 412 Investment Analysis 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory introduced in FIN 312. Students interact with and make recommendations to professional portfolio managers. Topics include analysis and forecasts of business conditions, market interest rates, international opportunities, and corporate profits. Emphasis is placed on the valuation of securities, stock selection, investment timing, technical analysis, and management of portfolio risk with options, futures, and other tools.

Prerequisite(s): FIN 312 or permission of instructor.

FIN 469 Special Topics in Finance 3 Credits

This course is occasionally offered, with the topics and prerequisites set by the finance program.

FIN 490 Independent Study: Research and Creative Expression 3 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation. This course can be used as a business or free elective, but with prior approval it can also be used as finance elective.

FIN 491 Finance Internship 1-3 Credits

The internship offers qualified junior and senior finance majors supervised employment with participating companies. The internship may be taken during the fall or spring semester or during the summer session. Students are evaluated periodically by senior staff members of the participating firms and are required to complete a term paper that will be reviewed by the major's internship director. Internship credits can be applied toward business or free elective requirements but not toward finance elective requirements for majors. Grading is on a pass/fail basis.

Prerequisite(s): permission of instructor.

Fine Arts (ART)**ART 103 Fundamentals of Drawing 3 Credits**

An intensive study of drawing techniques in charcoal, pencil, and pen and ink.

ART 104 Survey of Art History I 3 Credits

The history of Western art, architecture, sculpture, painting from prehistoric times through the Middle Ages, emphasizing the relation between the arts and ideas of each period.

ART 105 Design 3 Credits

Basic concepts of composition, form, texture, value, and color in two-dimensional design are explored.

ART 106 Survey of Art History II 3 Credits

The history of Western art, architecture, sculpture, painting from the Renaissance to the present, emphasizing the relation between the arts and ideas of each period.

ART 120 Art and Society 3 Credits

Masterpieces of architecture, painting, and sculpture are related to their historical periods, providing an appreciation for and understanding of the vital interaction of art and society.

ART 150 Digital Foundations 3 Credits

Industry standard digital tools are used to explore the basic concepts of composition, form, texture, value, and color in two-dimensional design. Further consideration of digital formats and technologies in the visual arts will be highlighted.

ART 199 Arts in Contemporary Civilization 3 Credits

An integral study of the arts and their place in contemporary American life. Includes attendance at several events in art, music, and drama. Spring.

ART 201 Art of the Ancient World 3 Credits

The arts of ancient man from prehistoric times to the fall of the Roman Empire.

ART 204 Fundamentals of Painting 3 Credits

Introduces students to the materials and techniques of oil or acrylic painting. Emphasis on experimentation and the development of individual expression in a variety of subject matters.

Prerequisite(s): ART 103 or concurrently.

ART 207 Medieval and Renaissance Art 3 Credits

A study of the major monuments of architecture, painting, and sculpture created in Western Europe between 300 and 1600. Particular emphasis on the history of Christian art, from its beginnings in the Roman catacombs, to the great monasteries and cathedrals of the High Middle Ages, to the revival of ancient Roman grandeur and forms in the Renaissance.

ART 209 Art of the Baroque 3 Credits

The art of the 17th century in southern and northern Europe.

ART 214 American Art 3 Credits

The development of the arts from colonial America to World War I. Discusses major economic, social, and political factors that influenced the course of American art history.

ART 227 Gallery Management 3 Credits

Designed to provide students with the experience of working in all aspects of art gallery management. It is intended for students regardless of their major who wish to add the dimension of art to their college experience through direct hands-on curatorship of the Rider Art Gallery.

ART 230 Three-Dimensional Design 3 Credits

Beginning problems in traditional sculptural materials (clay, wood, stone) and design-construction in mixed media.

ART 303 19th Century Art 3 Credits

An in-depth study of the major art movements in 19th-century Europe, from Neoclassicism to Postimpressionism.

ART 304 Drawing II 3 Credits

Studies the art of drawing beyond the introductory level with an emphasis on greater self-expression, advanced technical skills, and a variety of drawing media.

Prerequisite(s): ART 103.

ART 305 Intermediate Painting A-B-C 3 Credits

Studio courses designed to expand the student's creative experience in painting with emphasis of greater self-expression. Students will be presented with specific painting projects that originate from conceptual or perceptual responses to reality (still life, landscape, figure) and to imagination (dreams, fantasy, invention). Class trips to galleries and museums are included. May be taken three times.

Prerequisite(s): ART 204.

ART 306 Art of the 20th Century 3 Credits

The major artists and movements in the history of 20th-century painting and sculpture from Postimpressionism. Slide lectures, class discussion, field trips.

ART 310 Figure Drawing and Painting 3 Credits

Students will draw and paint from various sources, including the live model, clothed and nude, to understand the structures, gestures, and psychological aspects of the human body in art.

Prerequisite(s): ART 103 and ART 204.

ART 335 Printmaking 3 Credits

A studio introduction to various traditional and contemporary relief printmaking techniques.

ART 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1 to 4 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing, good academic standing.

ART 491 Internship in Art 1-12 Credits

Provides junior or senior fine arts majors with concentrations in art with the practical experience of working with a museum or professional art gallery. Students must be sponsored by an art professor. For each academic credit, interns must work 48 hours for the semester or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

ART 492 Advanced Studio Workshop 3 Credits

Intensive course in various media for students working at an advanced level in studio disciplines. A high level of achievement is expected. May be taken more than once for credit.

Prerequisite(s): two upper-level studio courses.

ART 493 Special Topics in Studio Art 3 Credits

Study in drawing and painting of a particular style, such as abstraction or subject, such as still life; or particular aspects on a museum collection, such as the Metropolitan.

Prerequisite(s): ART 103 and ART 105 or Permission of Instructor.

ART 495 Selected Topics in Art History 3 Credits

An intensive study of a particular art history topic, e.g., a single artist, artistic center, or artistic medium. Slide lectures, class discussion, field trips, class reports. Topics to be announced.

ART 496 Fine Arts Internship 6-12 Credits**ART 499 Senior Honors Program 3 Credits**

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, planned under the direction of a faculty advisor, represents a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Foreign Language and Literature Education (FLE)

FLE 320 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to general linguistics and basic contrastive study of English, French, German, and Spanish sounds, forms, and syntax. Students visit schools where they interview language learners and sample their speech for analysis. Applications of these studies are made to creating instructional materials and to teaching. Theories of language acquisition as well as factors affecting second language learning, including learning styles and personality, are studied. A rationale for communicative language teaching and learning is constructed. Note: This course is cross-listed as EDU 320. Students may not get credit for both FLE 320 and EDU 320.

FLE 420 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolios and philosophy of second language teaching, prepare a thematic unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. Note: This course is cross-listed as SED 420. Students may not get credit for both FLE 420 and SED 420. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

Foreign Literature (LIT)

LIT 250 Masterworks of Western Literature I 3 Credits

Introduces the classical heritage and the development of a connected Western literary tradition as reflected in the classics of Western literature from the Greeks to the Renaissance. This course focuses particularly on the qualities, which make each work great. Works by Homer, Aeschylus, Sophocles, Euripides, Virgil, St. Augustine, Dante, and Shakespeare are read and discussed in English. Required for all foreign language majors.

LIT 251 Masterworks of Western Literature II 3 Credits

Introduces modern world literature and the further development of the Western literary tradition from the Enlightenment, through Romanticism, to the contemporary period. Major writers such as Moliere, Racine, Voltaire, Rousseau, Goethe, Tolstoy, Baudelaire, Yeats, Rilke, Ibsen, Mann, Kafka, and Borges are read and discussed in English. Required for all foreign language majors.

LIT 310 Russian Literature 988-1850 3 Credits

A reading and discussion of some of the greatest Russian writers of the first half of the 19th century. Writers include Pushkin, Lermontov, Gogol, Turgenev, and Tolstoy. Classes are in English. No knowledge of Russian required. Required for majors.

LIT 311 Russian Literature 1850-1917 3 Credits

A reading and discussion of some of the greatest Russian writers of the second half of the 19th century and early 20th century. Writers include Dostoevsky, Leskov, Chekhov, Bunin, Gorky, Blok, Bely, and Sologub. Classes are in English. No knowledge of Russian required. Required for majors.

LIT 312 20th Century Russian Literature 3 Credits

A reading and discussion of some major Russian writers from 1917 to 1970. Writers include Akhmatova, Tsvetaeva, Babel, Bulgakov, Pasternak, Mayakovsky, and Evtushenko. Classes are in English. No knowledge of Russian required. Required for majors.

LIT 315 Tolstoy 3 Credits

Reading and discussion of selected works of Tolstoy including his fables; novellas, such as *Master and Man* and *The Kreutzer Sonata*; and either *Anna Karenina* or *War and Peace*. Classes are in English. No knowledge of Russian is required.

LIT 317 Dostoevsky 3 Credits

Reading and discussion of selected works of Dostoevsky, with special emphasis on *Crime and Punishment* and *The Brothers Karamazov*. Classes are in English. No knowledge of Russian required.

LIT 322 German Literature & Film in English Translation 3 Credits

Reading and discussion in English of German literary masterpieces and their film adaptations. The material varies from year to year, e.g., German-Jewish writers, German Romanticism, German literature to 1700, modern fiction, or 20th-century women's literature and film. No knowledge of German required.

LIT 325 The Folk Tale 3 Credits

Introduction to the study of folk tales from a literary point of view, to the place of folk tales in European culture, and to the contrast between folk tales and written fairy tales such as *Beauty and the Beast* and *Cupid and Psyche*.

LIT 330 Russian Culture 3 Credits

Readings highlighting both the uniqueness of Russian culture and the ways Russian culture has had the greatest impact on Western culture in general. The course is divided into topics such as folklore, religion, painting, music, ballet, and film. Readings from Russian literature will be used to illustrate significant aspects of Russian culture. Classes are in English. No knowledge of Russian is required.

LIT 340 Hispanic Literature & Film in English Translations 3 Credits

This course explores literary and cinematic masterpieces in English translation. Attention is focused on their relationship to the intellectual, artistic, and historical background of Spain, Latin America, and/or United States Latino cultures. No knowledge of Spanish is required. Open to Spanish majors, but no credit given toward the specific requirements of the major.

LIT 370 European Short Novel 3 Credits

Introduces students to the study of the novella as a distinct literary genre in Europe. Discusses various theories of the novella and the history of the novella in Europe. Will read and discuss such masterpieces of the novella as *O, The Queen of Spades*, *A Simple Heart*, and *Death in Venice*.

LIT 390 The Bible As Literature 3 Credits

This course takes a literary approach to the Bible: only one, of course, of the many possible approaches to this rich and fascinating text. Nevertheless this approach to the Bible is justified both because the Bible is a literary masterpiece and because such an approach provides a clear focus for students. Students will read and discuss selections from the three major divisions of the Bible: the Old Testament, the New Testament, and the Apocrypha. Students will also read famous stories such as Joseph and his Brothers, Moses and Exodus, Samson and Delilah, Jonah and the Whale, Susanne and the Elders, The Raising of Lazarus, and The Trial and Execution of Jesus.

French (FRE)**FRE 100 French I 3 Credits**

Conversational French is taught through basic vocabulary and grammar building. Students will enjoy an immersion-style method emphasizing real-life situations and vocabulary in authentic cultural context, through an interactive textbook, videos, on-line resources, and oral/aural skill building using the technology in the Foreign Language Media Center to enhance learning. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): Placement test if French has been studied elsewhere.

FRE 101 French II 3 Credits

Building on learning in French I, students will begin to converse using more complicated grammatical structures within immersion-style classroom interactions. While the focus is still on conversation and aural skill building, composition skills receive greater emphasis. Students will enjoy an interactive textbook, Internet usage, and authentic videos shot on location in France. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): FRE 100 or placement test.

FRE 200 French III 3 Credits

This course builds on linguistic skills previously acquired through an emphasis on conversation and oral comprehension, and through vocabulary building. Grammar study is continued at a more advanced level, and students begin to read short passages focusing mainly on francophone culture and civilization. Film clips, Internet resources, and other computer-aided learning tools are used to create a dynamic immersion-style learning experience. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): FRE 101 or placement test.

FRE 201 French IV 3 Credits

While continuing the emphasis on aural/oral production and grammar and vocabulary building, short passages of greater complexity taken from literary texts, newspapers, and magazines will become the focus of conversation/composition activities. Technological resources will continue to enhance the immersion-style learning experience consistent with a course in advanced French. Successful completion of this course, or its equivalent, serves as a prerequisite for French courses at the 300 and 400 level. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): FRE 200 or placement test.

FRE 300 French Composition/Translation 3 Credits

An in-depth study of style, shades of meaning, and correctness of expression. Translation of business/professional/scientific/political texts will receive emphasis, and students will continue to perfect their writing skills, and review and improve advanced grammatical structures.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 301 French for Business 3 Credits

The fundamentals needed to survive in the French professional and business world are taught. Students will continue to perfect oral/written/aural skills while learning about the cultural climate within which these skills will be used. Students will learn how to prepare effective business/professional correspondence and, through role-playing activities, will use their knowledge in such real-life situations as interviewing, telephone conversations, and business meetings.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 305 An Introduction to French Literature 3 Credits

A chronological overview of the evolution of French literature from the Middle Ages to the present. Study and interpretation of selected works, authors or literary movements through the Renaissance, the classical period, Enlightenment, romanticism, realism, naturalism to representative works by authors of our century from Proust to existentialism, the nouveau Roman, theatre absurde and beyond.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 311 French Culture 3 Credits

A study of modern France and French value orientations as they are rooted in tradition and history and continue to shape everyday life as well as institutions, social organizations, artistic expression, education, attitudes and human interaction. A comparative approach will examine the underlying differences between France and the United States. Classes are in English.

FRE 320 French Phonetics and Conversation 3 Credits

This course is an introduction to French phonetics and is designed to help students further develop their skills in speaking French accurately and fluently. The course requires students to learn basic linguistic symbols and the phonetic alphabet as a theoretical step toward improving articulation and pronunciation. Moreover, special emphasis will be placed on the development of vocabulary and of appropriate communication techniques to participate in discussions in French. The course will be a mix of lectures, class discussions, debates, face-to-face conversations, and role games requiring a strong active participation.

Counts toward major and minor requirements.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 422 Cultural Expression in French Film and Television 3 Credits

A systematic analysis of selected French films and television broadcasts will reveal cultural value orientations as they relate to love, family, community, leisure, work, social, and political organization. A comparative approach will stress the underlying cultural differences between France and the United States. Course taught in French.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 425 Portrait of the Hero in French Fiction 3 Credits

This course deals with modern French fiction and its depiction of the role of the hero as a figure who gradually loses control over his fate (Stendhal, Balzac) and is changed into someone who struggles against ever increasing odds, only to be finally vanquished (Flaubert). The main character may find fulfillment in recollections of the past (Proust), explore the moral parameters of existence (Gide, Camus) or become the incapacitated anti-hero of Beckett's novels. Course taught in French
Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 430 Mask & Reality in French Theater 3 Credits

A study of theater through the optic of a unifying theme: the mask and reality. The goal is to gain a greater appreciation of the art of dramatic illusion whereby actors, while wearing the masks of the characters they play, allow us to examine ourselves and reality in true, unmasked form. Playwrights to be studied will range from the classical theater of Racine and Corneille, through the modern avant-garde, existentialist and Theater of the Absurd works of such playwrights as Ionesco and Beckett. Course taught in French.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 435 Self in French Prose & Poetry 3 Credits

Are we determining or pre-determined creatures? What is our essential nature? Is the quest for salvation justified? A study of the historical, political, and social realities in which the texts were composed will shed light on the concept of the self. Representative authors from the Renaissance to modern times will include: Montaigne, Descartes, Pascal, Montesquieu, Rousseau, Hugo, Baudelaire, Apollinaire, Sartre, Camus, Duras, Sarraute, Colette, de Beauvoir. Course taught in French.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 440 A Quest for Identity: Francophone Literature and Culture 3 Credits

This course introduces the cultures of countries or regions where French is used either as the (or one of the) official language(s) or, in a less official capacity, by a segment of the population. In readings, discussions, songs, film viewings, and written assignments, students will experience the Francophone cultures of specific areas and the amazing diversity of the Francophone world. They will also explore the difficult relation of the Francophone countries with France. The course considers issues of social status, history, resistance, and identity. Counts toward major and minor requirements. Course taught in French.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

FRE 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

FRE 491 Internship in Foreign Languages 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of the importance and interrelationship of foreign languages and cultures in the workplace. Placements can be made in international governmental agencies, international trade associations, multinational corporations, social service agencies, and other appropriate workplace environments both in the United States and abroad. With permission of the supervisor and faculty advisor, a three-credit internship may be substituted for a collateral requirement as credit toward the major.

Prerequisite(s): students should have completed at least one 300-level course in the foreign language.

FRE 496 Special Studies 3 Credits

Offered as needed to complement the program in French. A seminar open to a variety of topics treating a particular author, period, genre or critical approach.

Prerequisite(s): FRE 201 or above, or placement test at 300-level or above.

Game and Interactive Media Design (GAM)

GAM 100 Game & Interactive Media Forum 0 Credits

Game & Interactive Media Forum is a once-per-month gathering of all Game majors from across the university's different Colleges. The forum will be an opportunity for students focusing on different backgrounds to engage together in industry-related topics and skills.

GAM 150 Intro to Game Studies 3 Credits

Intro to Game Studies surveys the history of video games and gaming culture against the social and political contexts that shape and are shaped by games.

GAM 200 Game Design 3 Credits

Game Design introduces students to the basic concepts of game design, covering game rules, iterations, and playtesting. Students will work with hands-on material to develop design techniques and instincts outside of digital work spaces.

GAM 201 Game Development I 3 Credits

Game Development I introduces students to industry-standard software and the basics of user experience and collaborative game design.

Prerequisite(s): ART 150, CIS 200 and GAM 200.

GAM 301 Game Development II 3 Credits

Game Development II extends students' knowledge of industry-standard software, building on GAM 201 and progressing toward advanced concepts of user experience and collaborative game design.

Prerequisite(s): GAM 201.

GAM 310 Special Topics in Game Design 3 Credits

Special Topics in Game Design applies students' knowledge of game design and the development software that helps them realize their design toward specific prototyping goals. The subject of GAM 310 will rotate each semester; GAM majors must complete two semesters of 310 without duplicating topics.

Prerequisite(s): GAM 200.

GAM 330 Soundtracks and Foley 3 Credits

Soundtracks and Foley covers dialog, music, and foley in filmic settings, with a specific focus on game environments.

Prerequisite(s): MUS 216.

GAM 401 Game Workshop I 3 Credits

Game Workshop I places students in multidisciplinary project teams. Each team will create a game prototype over the course of the semester that demonstrates each student's mastery of their area of specialization and the each group's ability to work together.

Prerequisite(s): GAM 310.

GAM 402 Game Workshop II 3 Credits

Game Workshop II places students in multidisciplinary project teams and builds on skills developed in Game Workshop I.

Prerequisite(s): GAM 310.

GAM 491 Internship in Game Design 3-6 Credits

Internship in Game Design places students in industry work environments, overseen by a site supervisor.

Prerequisite(s): GAM 310.

Gender and Sexuality Studies (GSS)

GSS 100 Introduction to Gender Studies 3 Credits

An introduction to the role of gender in human experience, examining the biological, historical, literary, artistic, and institutional manifestations of gender, and exploring the intersections of gender, sex, and sexuality.

GSS 110 Race, Class and Gender in Contemporary American Society 3 Credits

This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with MCS 110. Students may only get credit for one course: MCS 110 or GSS 110.

GSS 200 Introduction to Women's Studies 3 Credits

An interdisciplinary investigation of traditional and contemporary gender roles, and of women's status, identity, and potential. Required for minor.

GSS 230 Women In Literature 3 Credits

A range of literary presentations of the female experience and of the conditions of women's lives is explored. These works are placed in historical and social contexts in order to see behind and beyond traditional literary conventions. Cross-listed with ENG 230.

GSS 235 Current Feminist Issues 3 Credits

This course examines historical and contemporary debates about controversial issues involving women, gender, and equality. The course will highlight feminist concerns with race, class, sexuality, and gender norms, focusing broadly on society, culture, the economy, politics, and law. Students will learn to contextualize, analyze, and evaluate arguments on multiple sides of these controversies.

GSS 240 Sex and Human Nature 3 Credits

It is expected that students will gain a base of knowledge sufficient to understand science as a way of understanding the natural world and to evaluate scientific information provided in popular media for its validity as related to topics of biology and gender and/or sexuality.

GSS 245 Popular Constructions of Gender and Sexuality 3 Credits

This course takes an interdisciplinary approach to investigate the constructs that society creates and maintains with relation to sexuality and gender. As we are increasingly confronted with images of gender and sexuality, it becomes vital to interrogate the origins of these images from a variety of disciplinary perspectives in order to analyze and critique these constructs. Students will be introduced to theoretical approaches to analyzing popular constructs of gender and sexuality from a variety of areas, including (but not limited to) the humanities, the physical sciences, and the social sciences.

GSS 300 Feminist Literary Criticism 3 Credits

This seminar explores the diversity within feminist literary analysis. Various national, ethnic and cultural standpoints are represented and the different as well as the common assumptions within feminist thought will be discussed.

GSS 309 Women in American History 3 Credits

Examines the roles, status, and influence of women from the colonial era to the present. Studies the origins and development of feminism, including legal, political, educational, economic, and sexual rights; and studies social feminism, including reform movements in such fields as abolition, prohibition, pacifism, child labor, and social welfare.

GSS 310 Special Topics 3 Credits

Studies in specialized areas of feminist scholarship. Topics change according to instructor and are listed in the course roster.

Prerequisite: one previous course in gender and sexuality studies or permission of instructor.

GSS 312 Gender, War and Peace 3 Credits

Through readings in literature, history, political science, philosophy, and psychology, the course will explore critically the myths linking feminine gender with pacifism and masculine gender with aggression. Various perspectives on peace and war, the history of peace movements, and women's as well as men's participation in war will be considered.

GSS 313 Gender and Ethics 3 Credits

An interdisciplinary seminar involving a concentrated study of recent works in feminist theory, with special attention to issues such as: Do men and women have different ethical perspectives and different styles of moral reasoning? How do the "ethics of care" differ from the traditional "ethics of justice?" Can the models of justice and care be integrated into a more comprehensive theory?.

GSS 318 Gender and Communication 3 Credits

Focuses on interactive relationships between gender and communication in contemporary American society. It connects theory and research with practice to explore multiple ways communication in families, schools, media, and society in general creates and perpetuates gender roles. It is designed to heighten students' awareness of how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Note: This course is crosslisted as GSS 318. Students may not get credit for both COM 318 and GSS 318.

GSS 319 Gender and Sexuality in American History 3 Credits

What makes a man, exactly, and what makes a woman? What kinds of sex are normal, and what kinds are abnormal? Who decides, and why? The answers to these questions are not fixed. Throughout American history, popular understandings of gender and sexual norms evolved in close relationship with the political, economic, racial, and social dictates of the time. This course will trace the evolution of ideas on sex and gender from the 18th century to the present using various historical sources including fiction and film, particular attention will be given to analyzing dominant models of proper behavior and the complex relationships of power enmeshed within them.

GSS 320 Sex, Gender, and Fairy Tales 3 Credits

From the early literary fairy tale by Italian authors, to 17th-century French women writers who named and popularized the genre, to the 18th- and 19th-century stories geared toward children, to Disney and beyond, students will analyze fairy tales to see what they tell us about gender and sexuality historically and today. Students will read classic fairy tales from around the world and look at feminist and queer retellings, examining how fairy tale themes and motifs permeate our culture.

GSS 322 Witch Hunts: Femicide Through Centuries 3 Credits

We will look at the perceived definitions of “witch” and “witchcraft” in relation to establishing medieval to modern gender codes. Our detailed study of perceptions of witches and their practices will reveal the power dynamics, social constructions and definitions that aided in the demise of countless women labeled as “witches” throughout history. Considerable time will be spent in exploring the internal controversy within the field of witchcraft studies regarding the use of words such as “genocide,” “femicide,” and “gendercide.”

GSS 333 Gender and Sport 3 Credits

Typical thoughts of sport include ticket prices, player salaries, team rosters, and league standings; rarely is it viewed from a gender perspective. This course will go beyond the examination of Title IX to better understand the relationship between masculinity, femininity and sports. This course will examine various aspects of gender and sport, including media and gender representation, race and ethnicity, drugs and violence, men and masculinities, sexualities, policy and politics, the feminist critique of sport, the initiation rites and hazing in college sports, sports wagering, and the internationalization of sport, including but not limited to the Olympics and Paralympics.

GSS 350 Leadership and Community 3 Credits

Designed for all students whose future plans include community service, organizing, and leadership, this course will study organizing in response to domestic violence, discrimination on the basis of gender and sexuality, sexual harassment, and other issues that are significant for women and/or the LGBTQ community. Building coalitions, skills for leadership, and strategies for effective organization will be covered in readings and in class discussions and students will practice what they have learned by volunteering in a local nonprofit organization.

GSS 375 Transgender Narratives 3 Credits

An introduction for Gender and Sexuality Studies minors and other interested students to the interdisciplinary field of transgender studies. Students will learn to distinguish between transsexual, transgender, transvestite, and intersex identities; to explore cross-cultural gender diversity; to recognize diverse subcultural expressions of gender, such as cross-dressing, camp, and drag; to identify long-standing stereotypes about trans people; and to understand trans people’s narratives about hormonal or surgical gender transition through literary and multimedia genres.

GSS 400 Seminar in Transcultural Gender and Sexuality 3 Credits

This seminar offers an opportunity for upper-level students to engage in a multidisciplinary study of the constructions of gender and sexuality in a variety of cultural contexts across the globe. Topics change according to instructor. Required for minor. Prerequisites: Junior or senior standing.

GSS 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

GSS 491 Internship 1-4 Credits

Geosciences (GEO)

GEO 100 Earth Systems Science 3 Credits

Investigates the major global processes that occur on Earth. These processes can be grouped into four major systems: atmosphere, hydrosphere, lithosphere, and cosmosphere. Each system interacts with and affects the other systems creating, in a sense, a single Earth process. With this approach, the student will view the Earth as a whole, and understand that the many seemingly separate components that make up this planet are, in fact, a set of interacting processes, that operate in cycles through time, within a single global system. Three hours of lecture per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 102 Earth Materials and Processes Lab 1 Credits

This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week.

Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 102SP Earth Materials and Processes Lab 1 Credits

This lab course introduces students to the origin, identification, and significance of geologic materials, processes, and landforms. Hands-on experiences with mineral and rock specimens, topographic and geologic maps, and GPS and other data collection techniques are emphasized, along with field trip and in-lab observations, measurements, and interpretations. One three-hour lab per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): concurrent enrollment in, or prior completion of, GEO 100 or GEO 113 is required.

GEO 110 Geology of National Parks 3 Credits

U.S. national parks highlight the geologic wonders of our country and provide us with some of the best examples of the many processes that initially formed our planet and those that continue to shape it. This course is an introduction to the geological setting of selected U.S. national parks. It provides an overview of geological concepts and relates the geology of each park to the processes that initially formed, and subsequently shaped, their characteristic landforms. Such processes include: plate tectonics, volcanic and plutonic activity, glaciation, cave formation, stream and coastal processes, and erosional processes. Consequently, students not only will understand how the physical geography of the U.S. varies from coast to coast, but also will connect these varied landscapes with the geologic processes that formed them and relate them to unique wildlife or vegetation in the parks studied.

GEO 113 Environmental Geology 3 Credits

Examines the fundamental premise that "society exists by geologic consent subject to change without notice" by studying a number of important global geologic processes and cycles, and the hazards and/or resources they present to individuals, societies, and the natural environment. Topics discussed include earthquakes, volcanism, stream flooding, coastal erosion, global climate change, and global water, soil, mineral, and energy resources. Cost/benefit considerations, hazard mitigation concepts, economic and political ramifications, and interactions among the lithosphere, hydrosphere, atmosphere, and biosphere also are presented. The course is designed to give non-science majors a deeper appreciation and understanding of the basic scientific concepts involved, as well as individual and societal connections to the global geologic environment, leading to better, more informed business, political, policy, and personal decisions. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Note: This course is cross-listed as GLS 113. Students may not get credit for both GEO 113 and GLS 113.

GEO 168 Mesozoic Ruling Reptiles 3 Credits

This course provides an introduction to the vertebrate groups that dominated the land (Dinosaurs), the seas (Mosasaurs, Plesiosaurs, Pliosaurus, Tylosaurus, and Ichthyosaurs) and the skies (Pterosaurs, Pterodactyls) during the Mesozoic Era (65-250 million years ago). Students study the diversity of skeletal architectures and their reconstructed function and the often controversial, inferred anatomy, physiology, reproductive strategy, habit, and social behaviors of these animals that are different from mainstream reptiles, birds, and mammals. They also learn about the paleogeographical, and paleoclimatological conditions that facilitated the evolutionary rise to dominance and diversification of these vertebrate groups and the debated causes of their eventual extinction. These topics also serve to illustrate how the scientific approach works and how competing hypotheses are evaluated. Three hours of lecture per week. Weekend field trips may be required. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

GEO 290 Directed Research and Study in Geosciences 1-4 Credits

Directed Research and Study in Geosciences will provide an opportunity for freshman and sophomore students to gain hands-on research experience in the geosciences. This is an individual program of study and each student will work with a selected faculty member on a topic of mutual interest. The course consists of a combination of project meetings, supervised research, and guided readings. The focus will be on formulating research questions, designing and conducting experiments, collecting the necessary data, reviewing the scientific literature as it relates to each student's research topic in a weekly meetings with the instructor, and communicating the findings by writing a final project report.

GEO 304 Elements of Mineralogy 4 Credits

This course examines the physical properties, chemistry, atomic structure, crystallography, uses, and environmental impacts of important minerals found in the Earth's lithosphere and biosphere. In addition, lab assignments and exercises emphasize crystal symmetry and chemistry; polarizing microscope, ICP, SEM, and x-ray analytical techniques; the graphical display and interpretation of compositional data; optical properties of isotropic and uniaxial minerals; and the identification of mineral hand specimens. Three hours of lecture and one three-hour lab per week. At least one weekend field trip required. Prerequisite(s): GEO 100 or GEO 113, and GEO 102, and CHE 120, CHE 121 taken prior or concurrently; or permission of instructor.

Corequisite(s): GEO 304L.

GEO 304L Mineralogy Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 304.

GEO 305 Petrology and Petrography 4 Credits

The origin, evolution, and terrestrial distribution of igneous and metamorphic rocks are presented and detailed. Classroom lectures and discussions emphasize rock geochemistry, mineralogic variability, the constraints placed on petrogenetic models by physio-chemical studies of natural and synthetic systems, and the relation of the various rock types to current plate tectonic theory and other whole-earth processes. The laboratory emphasizes the continuing development of optical microscopy skills, the identification of rock texture and mineralogy in thin section and hand specimen, the optical determination of mineral composition, and the recognition of possible petrogenetic processes as recorded in the rocks themselves. Three hours of lecture and one three-hour lab per week. Two weekend field trips required. Prerequisite(s): GEO 304, and CHE 122 and CHE 123 or taken prior or concurrently; or permission of instructor.

Corequisite(s): GEO 305L.

GEO 305L Petrology and Petrography Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 305.

GEO 306 Sedimentology and Stratigraphy 4 Credits

The principles of weathering, erosion, transportation, and deposition of sediment are the focus of this course. Sediment characteristics are examined to identify the processes involved in transporting grains and the specific environment in which the grains were deposited. Students will learn how to collect, analyze, and interpret sedimentary data and how to interpret surface and subsurface stratigraphic data using various techniques, such as lithostratigraphic, biostratigraphic, and geophysical, correlations. Field trips will expose students to different sedimentary environments and provide opportunities for students to learn how to conduct fieldwork. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required. Prerequisite(s): GEO 100.

Corequisite(s): GEO 306L.

GEO 306L Sedimentology and Stratigraphy Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 306.

GEO 310 Structural Geology 4 Credits

The origin, distinguishing characteristics, and geographic distribution of deformational structures of the Earth's crust. In the laboratory, GPS, GIS, geologic maps, and three-dimensional problems are used in the study of typical surface and subsurface geologic problems. Three hours of lecture and one three-hour lab per week. Weekday and/or weekend field trips may be required. Prerequisite(s): GEO 100 or GEO 113, GEO 102.

Corequisite(s): GEO 310L.

GEO 310L Structural Geology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 310.

GEO 350 Soil and Surficial Processes 4 Credits

This course examines the physical, chemical, hydrological, and biological aspects of soil and their relation to geomorphologic development.

Specific topics include descriptions of soil texture and structures, soil classification, soil colloids, soil redox and pH, and their effect on vadose zone water chemistry. Soil genesis and erosion controls, microbiology/ecology, nutrient cycles, and modern soil pollution from sludge and pesticide applications, as well as domestic and industrial chemical spills, also are discussed. The lab portion of the course introduces the basic techniques of soil analysis, both physical and chemical, and field survey methods. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, and GEO 102.

Corequisite(s): GEO 350L.

GEO 350L Soil and Surficial Processes Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 350.

GEO 407 Hydrology and Water Resources 4 Credits

This course introduces the principles that govern both surface water and groundwater flows that have applications to societal water needs. Surface water topics cover the basics of the hydrologic cycle, the processes of precipitation, evapotranspiration, runoff, and infiltration, and various factors affecting water supply and water quality issues in a modern watershed. Groundwater topics examine the principles that govern flow through a porous medium and the basics of well hydraulics under different pumping conditions that community development requires. Laboratory exercises will give students hands-on experience with the delineation of watersheds, analysis of precipitation data, and flow contaminant transport modeling. The field portion of the laboratory includes runoff and stream discharge measurements, as well as hydraulic conductivity estimations from both slug and pumping tests. Three hours of lecture and one three-hour lab per week. Prerequisite(s): GEO 100 or GEO 113, GEO 102, and MTH 105.

Corequisite(s): GEO 407L.

GEO 407L Hydrology and Water Resources Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): GEO 407.

GEO 480 Senior Thesis 3 Credits

A senior thesis is optional for geosciences majors. However, a senior thesis is required for eligibility to graduate with honors in geosciences. The topic for investigation will be chosen by the student in consultation with the faculty of the Department of Geological, Environmental, and Marine Sciences. The student must initiate consideration of a proposal to the Department. The proposal must contain a discussion of the proposed project and a timetable to be followed in the study. A departmental committee consisting of a major and minor advisor will evaluate the written paper submitted at the conclusion of the study or other approved venue. An oral presentation before the department at the conclusion of the semester in which the study is completed is required. Proposals must be submitted in final form no later than the end of the ninth week of the semester prior to the semester in which the study is undertaken.

Prerequisite(s): senior standing in the geosciences major and permission of instructor.

GEO 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

GEO 491 Internship in Geosciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placements may be in private, public, non-profit, or governmental organizations. These can include consulting firms, regulatory agencies, advocacy groups, and educational or research institutions. Normally, 50 hours of internship per credit is required. A mutually agreed upon method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and could include a term paper or project report and a poster presentation.

Prerequisite(s): 2.5 GPA and permission of instructor.

German (GER)

GER 100 German I 3 Credits

An introduction to German stressing the spoken language and the fundamentals of grammar. Students are required to work extensively with audio CDs. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): placement test if German has been studied elsewhere.

GER 101 German II 3 Credits

A continuation of German 100. Communication skills are broadened, fundamental grammar is studied in more depth, and basic vocabulary is expanded. Students are required to work extensively with audio files. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): GER 100 with a minimum grade of D or LL 151 with a minimum grade of C or placement test.

GER 200 German III 3 Credits

Intensive review of German grammar and syntax with a systematic approach to oral expression and composition. Readings on contemporary German life and selections from modern literature. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): GER 101 or placement test.

GER 201 German IV 3 Credits

Continuation of grammar review and readings. Special emphasis on oral expression and composition of increasing sophistication, proceeding from concrete observations to theoretical and abstract discussion. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): GER 200 or placement test.

GER 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

Global Studies (GLS)

GLS 113 Environmental Geology 3 Credits

Examines the premise that "our society exists by geologic consent subject to change without notice" by studying a number of important geologic processes and the hazards and/or resources they present to individuals, society, and the natural environment. Topics discussed include earthquakes, volcanism, stream flooding, coastal erosion, climate change, and water, soil, mineral, and energy resources. Cost/benefit considerations, hazard mitigation concepts, economic and political ramifications, and the interactions between the lithosphere, hydrosphere, atmosphere, and biosphere also are presented. The course is designed to give non-science majors a deeper appreciation of their connection to the surrounding geologic environment, leading to better, more informed business, political, and personal decisions. Three hours of lecture per week. Note: This course is cross-listed as GEO 113. Students may not get credit for both GLS 113 and GEO 113.

GLS 120 Oceanography 3 Credits

Investigates the interrelationships among the geological, chemical, physical, and biological aspects of oceanography. Topics include origin and evolution of ocean basins; physical characteristics of modern oceans; seawater chemistry; ocean and atmosphere interactions; ocean currents; waves and tides; coastal processes; biological productivity; and diversity, distribution and adaptations of marine organisms. Throughout the course, emphasis is placed on the processes that connect the seemingly separate topics to each other and to human life. Weekend field trips may be required. Three hours of lecture per week. Note: This course is cross-listed as MAR 120. Students may not get credit for both MAR 120 and GLS 120.

GLS 121 Introductory Oceanography Lab 1 Credits

Introduction to the fundamental aspects of geological, chemical, physical, and biological oceanography. Students learn through inquiry-based, hands-on exercises and activities using actual data collected in the lab and in the field. Independent projects and local field trips during lab and on weekends may be required. One three-hour lab per week. Note: This course is cross-listed as MAR 121. Students may not credit for both GLS 121 and MAR 121.

Prerequisite(s): Concurrent enrollment in, or previous completion of, MAR 120 or GLS 120 is required.

GLS 180 Understanding Global Relations 3 Credits

Offers an introduction to Global and Multinational Studies by exposing the student to basic concepts necessary to understand the dynamics underlying the emerging worldwide society of diverse nations. The student will become acquainted with the mechanisms by which contacts are built across nations, and the factors that shape the conception of and relations with "the other."

GLS 200 The Social Construction of Global Society 3 Credits

This course discusses the emergence of an "imagined global community" in the final years of the 20th century, and the beginning of the 21st. The course will examine the forces that contribute to these changes, including the global dissemination of values, the changes in communication technologies, the globalization of the economy, and the spread of international non-governmental institutions and lobbying forces.

GLS 201 Politics of the Global Economy 3 Credits

An examination of global political-economic institutions and governmental policies in a period of global structural change and economic crisis. Emphasis will be placed upon the attempts by advanced and newly industrializing governments to attract and to regulate transnational industrial and financial enterprise.

GLS 205 Introduction to Geographic Information Systems 3 Credits

This course introduces the computer-based concepts and skills of Geographic Information Systems (GIS). It covers the basic GIS concepts, such as map characteristics and projections, spatial data models and analysis, and relational databases. It explores data sources, data quality, and metadata, as well as implementation and management of specific GIS projects. Hands-on experience with ArcGIS software is provided through a series of student exercises completed throughout the semester. Students will also be taught how to process both vector and raster data using ArcGIS 9 software. The course is relevant for students from numerous disciplines in the natural sciences, social sciences, and business, which require the analysis and graphical representation of spatial data. Three hours of lecture per week. Note: This course is cross-listed as ENV 205. Students may not credit for both GLS 205 and ENV 205.

GLS 210 Public Opinion 3 Credits

Public opinion as a social force and as expression of public sentiment on political and social issues. Topics include: development and dissemination of opinions, the measurement of public opinion, public opinion and governmental processes, and the reciprocal relationship between mass media and public opinion. Note: This course is cross-listed as POL 210. Students may not get credit for both GLS 210 and POL 210.

GLS 215 Global Politics 3 Credits

The struggle for power, wealth, and order at the global level involving nation-states, intergovernmental organizations (such as the United Nations, the European Union, etc.), non-governmental organizations, transnational enterprises and other non-state entities, using military, economic, diplomatic, legal, and communication instruments. Overview of global problems such as the proliferation of weapons of destruction, ethnic and religious conflicts, human rights, and the global environment in the 21st century. Note: This course is cross-listed as GLS 215. Students may not get credit for both POL 215 and GLS 215.

GLS 216 Comparative Political Systems 3 Credits

A general introduction to types of government and political regimes of the world as they try to cope with the dual challenge of ethnic micropolitics and transnational globalization. Major prototypes of democracy: the British parliamentary system, the American separation of powers system, and various combinations of these two. Traditional autocracy, totalitarian dictatorships, and late 20th-century authoritarian regimes. Students are expected to acquire in-depth knowledge of comparative political systems, and to develop a basic understanding and appreciation of the major concepts and themes in comparative political systems studies.

GLS 219 Terrorism, Revolutions, and Political Violence 3 Credits

Revolutions are the mad inspiration of history." Trotsky's characterization calls attention to three important dimensions of violent political participation: the historical settings, ideology, and emotional fervor of the practitioners. The course focuses on these dimensions by analyzing revolutionary and terrorist movements in the 20th century. Special attention is given to the use of violence in the post-Cold War new world disorder. Note: This course is cross-listed as POL-219. Students may not get credit for both GLS 219 , POL-219 and HLS 219.

GLS 225 Nationalism in World Politics 3 Credits

Nations and nationalism. An overview of nationalistic manifestations in the world today. Nations, states, nation-states. Multinational states, stateless nations. Imperialism, anti-imperialism; nativism vs. internationalism and globalism. Topics include nationalisms in the Holy Land; in the former Yugoslavia; in the former Soviet Union and its successor states; and economic Nationalism vs. Globalization. Note: This course is cross-listed as POL 225. Students may not get credit for both GLS 225 and POL 225.

GLS 252 Intercultural Communication 1.5-3 Credits

Develops intercultural communication competence through an awareness and understanding of diverse cultures and their impact on communication. This course will be different from the international communication course, which focuses on communication between nations. This course will focus on the more personal aspects of communication—what happens when people from different cultures interact face-to-face. It will introduce students to those general factors that influence communication with people from diverse cultures both internationally and within the United States, and offer a blend of skill development, communication theory, and hands- on application. Note: This course is cross-listed as COM 252. Students may not get credit for both GLS 252 and COM 252.

GLS 267 China in Transition 3 Credits

This course has two focal points: one is the rise and fall of great powers in the history of world transformation; the other is China's whereabouts in this transition. The former deals with a group of international relations theories, which focuses on system transformation. Students are expected to learn extant theoretical knowledge on how and why a great power rises and falls. The latter is our empirical referent. Students are led to study China's contemporary history, geopolitics, political economy, and international relations as to make a learned connection between theoretical wisdom and practical data on China. This course will provide students with a better understanding of China in general and its superpower status in the making in world politics in particular, offer students a chance to review the sources consequences of different approaches to greatness, and help students find his or her own analytical framework for understanding international political events that may have transforming effects in Northeast Asia as well as on the world stage. Note: This course is cross-listed with POL 267. Students may not get credit for both GLS 267 and POL 267.

GLS 280 Sex & Gender in International Politics 3 Credits

What's a student of political science, International Relations (IR), or another social science field to do about feminism? This is a question that has troubled IR for decades. While feminist debates engaged people in spaces outside the disciplines of political science and particularly IR, IR scholars did their best not to see the relevance of feminism for their own debates. That did not stop some feminists from rethinking key IR concepts like power, race and the state, but such contributions were largely ignored by IR scholars until very recently. It was only in the last decades, when feminist questions pushed their way onto the IR agenda through books, journals, and conferences, that feminism suddenly seemed attractive to IR scholars. Designed as an interdisciplinary course with a strong reference to Global and International Politics, this course will provide a basic introduction to some of the major global questions through a feminist lens.

GLS 285 The Student Global Village 3 Credits

This course involves deliberative discussions carried out internationally among college students using videoconferencing technology. The project involves a series of 12 weekly videoconferences between students at Rider University and students at the American University of Cairo, or another international university. Students will be provided with materials to supplement their knowledge of the other country, and to allow them to discuss chosen themes in depth. The students will be required to write papers that describe their attitudes and impressions of the other country at the beginning and the end of the project, and to summarize what they have learned based upon the conferences and readings. Short papers will be required each week to prepare the students for the videoconference theme of the week.

GLS 295 Emerging Issues in Global Studies 3 Credits

The process of globalization defines a condition of rapid political, social, and economic change. As such, subjects for study become relevant at an alarming speed in the current international environment. This course will give students the opportunity to study a current critical issue or subject, chosen according to its relevance or the special expertise of a visiting or current professor. Topics may include political, economic, or social crises that exist currently, how to deal with specific global problems such as global warming, humanitarian crises, or wars, but may also concentrate on the background of relevant areas such as Iraq or the European Union.

GLS 303 Global Justice 3 Credits

This course examines some of the most vexing problems in today's world of global interconnectedness. How can we harness the potential of global cooperation to solve problems that cross national borders? We will critically analyze the potential for human rights to protect vulnerable individuals, including victims of human trafficking. We will also evaluate the distribution of global resources and costs, including natural resources, extreme poverty and environmental degradation. What do we owe those who live in distant lands? Throughout we will ask how reality matches up to our best hopes for the present and future.

GLS 306 American Political Film 3 Credits

This course analyzes the structure, history, and impact of the genre of political film. It begins with a discussion of how one distinguishes a political film from other forms of cinema. It then proposes insights into the manner in which these films evoke a particular time and place in politics, affect the viewer's interpretation of a political event or figure, and have an effect upon a viewer's political perceptions or behavior. The student will also learn to review films critically, both as political statements and as effective (or ineffective) conveyors of political messages. Note: This course is cross-listed as POL 306. Students may not get credit for both GLS 306 and POL 306.

GLS 307 Political Communication 3 Credits

The meaning and uses of political communication are examined, the manner and forms such communication takes, and the history of political discourse. Major topics include the role of communication in elections and the development of public policy, how political communication strategies have changed with the rise of mass media, and the development of national and international publics for discourse. Note: This course is cross-listed as POL 307. Students may not get credit for both GLS 307 and POL 307.

GLS 308 World Music 3 Credits

The student is introduced to selected world cultures by listening to and analyzing specific music that is indigenous to each culture. The position and importance of the music within each society will be the main focus of the investigation. Comparing this music to the music of our American culture will provide a basis for judging and interacting with unfamiliar world cultures. This course is cross-listed as MUS 308. Students may not get credit for both GLS 308 and MUS 308.

GLS 309 Will China Be Next Superpower? 3 Credits

This course has two focal points: one is the rise and fall of great powers in the history of world transformation; the other is China's whereabouts in this transition. The former deals with a group of International Relations theories, which focuses on systematic transformation. Students are expected to learn extant theoretical knowledge on how and why a great power rises and falls. The latter is our empirical referent. Students are led to study China's contemporary history, geopolitics, political economy, and international relations as to make a learned connection between theoretical wisdom and practical data on China. This course will provide students with a better understanding of China in general and its superpower status in the making in world politics in particular, offer students a chance to review the sources and consequences of different national approaches to greatness, and help students find his or her own analytical framework for understanding international political events that may have transforming effects in Northeast Asia as well as on the world stage. This course is cross-listed as POL 309. Students may not get credit for both GLS 309 and POL 309.

GLS 310 Ethnographic Film 3 Credits

Explores the manner in which different civilizations are depicted through the medium of documentary film. Discusses the manner in which film may contribute to ethnographic understanding of a given people, and the limitations of the genre that may misrepresent the subject matter. Special attention is given to the role of the filmmaker and his/her position as participant, observer, and recorder of the events shown on the film. The films will be analyzed in terms of how they reflect, and potentially affect, a civilization's international image and global standing. These factors will then be considered in terms of their effects upon the place and actions of the civilization in global politics.

GLS 315 Global Issues 3 Credits

Military, economic, demographic, and environmental threats to global security in the post-Cold War era. Forces of transnational integration vs. forces of intrastate fragmentation. Inadequacy of international law and organization to deal with these problems within the confines of the sovereign nation-state system. Note: This course is cross-listed as POL 315. Students may not get credit for both GLS 315 and POL 315.

GLS 318 Global Political Film 3 Credits

Political films are a powerful form of political communication. This power derives from the ability of the filmmaker to control the characters, plot, dialogue, setting, and other aspects of the context in which the political message is delivered. It is difficult to conceive of any other form of political communication in which the individual or individuals presenting the message have so much control. Even the most programmed of political events or "photo opportunities" provide instances where outside factors or events may intervene. Further, audiences who watch a film are willing to suspend disbelief for the period of viewing; as such, the filmmaker has a willing participant in the narrative he or she develops. Since political communication is the primary means by which political reality is constructed, and since films provide a very persuasive visual and auditory means of creative narratives, they are important subjects for study and analysis. Nearly all scholars recognize the importance of film as a means of affecting, and reflecting, the political climate of a society, especially during specific historical eras. President Woodrow Wilson, upon first seeing *Birth of a Nation*, said it was like "watching history written in lightning"; by contrast, James Baldwin referred to the film as "an elaborate justification for mass murder." Both recognized the persuasive powers of film and its potential propaganda value. Marshall McLuhan described film as a "cold" media because individuals could not choose to edit messages from it, as they could from "hot" media such as newspapers. These early observations mark the study of political film as a developing field. For several years, scholars have proposed a section on Politics and Film in the American Political Science Association. The present political film offering, POL 306/GLS 306 deals almost exclusively with political films from the United States. Our students have therefore not had the oppo.

GLS 319 Terrorism, Revolutions and Political Violence 3 Credits

Revolutions are the mad inspiration of history. Trotsky's characterization calls attention to three important dimensions of violent political participation: the historical settings, ideology, and emotional fervor of the practitioners. The course focuses on these dimensions by analyzing revolutionary and terrorist movements in the 20th century. Special attention is given to the use of violence in the post-Cold War new world disorder. Note: this course is cross-listed as HLS 319 and GLS 319. Students may only get credit for one course: HLS 319, GLS 319 or POL 319.

GLS 320 Politics of the Middle East 3 Credits

The course emphasizes the relationships between social and political structures, the role of religion, and the problems of modernization in the Middle East. Similarities and contrasts will be drawn between the Arab and non-Arab countries of the Middle East. The political systems of Egypt, Syria, Israel and Saudi Arabia are examined in terms of political culture, structure, and political processes.

GLS 321 International Law 3 Credits

This course covers the basic doctrines of international law and their relationship to the contemporary international community. These include the jurisprudence of international law; the history of the international legal system; customary international law; Treaty law; sovereignty, statehood and recognition; jurisdiction and immunities; the role of international organizations; international criminal responsibility; and the relationship of the international legal system to the U.S. domestic legal system. The objectives of international law are to foster the peaceful settlement of disputes; facilitate transnational communication and commerce; encourage respect for human rights; as well as to preserve the environment. This course is cross-listed as POL 321. Students may not get credit for both POL 321 and GLS 321.

GLS 325 Global Perspectives on Health and Illness 3 Credits

Explores the different international perspectives on health and illness. Themes include how men, women, and children in respective civilizations are treated and viewed within their communities or nations, as they become ill. Particular attention is given to the contrast between various types of traditional healing and Western medical practices, and their interactions. Discussions will also compare the usefulness of national versus international health agencies in dealing with global health problems.

GLS 328 Environmental Policy 3 Credits

Environmental Politics examines how policymakers deal with the political challenges of unsustainable resource consumption, which is a primary determinant of environmental problems such as climate change, adverse health effects, and biodiversity loss. The course introduces students to environmental politics and policies at the local, state, national, and international levels. The course is designed to provide students with a framework for understanding how varied interests compete within political institutions in order to transform contending ideas into public policy. With that in mind, students will not only become more informed consumers of political information, but will also become more effective at analyzing and advocating for policies as it relates to the environment.

GLS 329 Comparative Environmental Policy 3 Credits

Analyzes cross-national approaches in developing, implementing, and evaluating policy responses to environmental problems. The course analyzes the political factors, actors, and tools that help and explain why some societies have been more likely to develop effective responses to environmental threats. Note: This course is cross-listed as POL 329. Students may not get credit for both GLS 329 and POL 329.

GLS 340 Modern Democracy and Its Critics 3 Credits

The course examines the fundamental assumptions underlying modern democratic theories and the main theoretical attacks launched against them. Among the contending theories to be discussed are right and left-wing anarchism, the old and the new left, fascism, intellectual elitism, and techno-conservatism. Note: This course is cross-listed as POL 340. Students may not get credit for both GLS 340 and POL 340.

GLS 342 Freedom and Authority 3 Credits

Concepts of freedom and authority in 19th and 20th-century political theory. Emphasis on such important thinkers as Nietzsche, Freud, Sartre, Camus, and Marcuse. This course is cross-listed as POL 342. Students may not get credit for both GLS 342 and POL 342.

GLS 350 U.S. Foreign Policy and Security Policy 3 Credits

Principles, institutions, and processes involved in the formulation and implementation of policies regarding the nation's military, economic, and environmental security within the global framework. Strands, trends, and problem areas in U.S. foreign policy, with focus on the changing global environment of the post-Cold War world. Note: This course is cross-listed as HLS 350, POL 350. Students may get credit for only once.

GLS 352 Chinese and American Intercultural Communication 3 Credits

Instructs students about Chinese culture and communication. Culture impacts communication practices and styles in significant and subtle ways. Through readings, lectures, discussions, and first-hand interactions with Chinese international students, the students of this course will gain both conceptual and practical understanding of major communication differences between the two cultures, and become a more skilled intercultural communicator. Note: This course is cross-listed as COM352. Students may not get credit for both GLS 352 and COM 352.

GLS 365 Third World Politics 3 Credits

Studies the major political issues of the Third World. Particular reference to political systems of Africa, Asia, Latin America, and the Middle East according to the relevance of the examples to large conceptual issues, and according to the major interests of the instructor. Typical issues include neocolonial dependency, the role of the state in newly developed countries, military rule and democratization. Note: This course is cross-listed as POL 365. Students may not get credit for both GLS 365 and POL 365.

GLS 366 Communist Systems: Politics and Policies 3 Credits

The course aims to provide students with an understanding of the origin, development, and history of communism, as well as the current political systems and practices of communist regimes in the world. Students are expected to acquire in-depth knowledge about the origin and development of communism, the influence of communism in world politics, and political systems and policies of contemporary communism regimes. Topics examined include Communist Manifesto, communism in the USSR, communism in China, McCarthyism in the U.S., Cold War, collapse of the USSR, fall of Berlin Wall, and communism in contemporary Cuba and Korea.

GLS 367 Politics of Exile, Asylum and Diaspora 3 Credits

This course analyzes mass migrations and refugee movements and what they mean for the stability of nations, the increasing potential of severe culture clashes within societies, and the root causes of (forced) migration movements, such as problems of violence, terror and genocide, as recently seen in Darfur, Rwanda and Bosnia. In certain European countries the frequently failed integration and assimilation policies resulted in an Islamic alienation; terrorist attacks and race riots are some of the consequences. Particular attention will be given to the conflict between the refugees' and migrants' needs that result from violent, socio-economic or ecological catastrophes in the countries of origin and the various forms of reception within the host countries. Students will explore theoretical, political, legal, and socio-economic dimensions of the refugee and immigration phenomena in a global world. Other themes will include international human rights and refugee laws, theories of immigration, for example, the feminization of migration, as well as problems of acculturation, assimilation and integration in different host societies. Note: This course is cross-listed as POL 367. Students may not get credit for both GLS 367 and POL 367.

GLS 368 International Organizations 3 Credits

This course introduces students to the study of international organizations. The course examines mostly formal and governmental institutions as well as informal institutions or regimes. Topics to be covered include and are not limited to: the establishment of international organizations, involvement of international organizations, structure of international organizations, decision-making of international organizations and influence of international organizations. This course employs both theoretical and practical approaches in its examination on international organizations. Note: This course is cross-listed as POL 368. Students may not get credit for both GLS 368 and POL 368.

GLS 371 The Arab-Israeli Conflict 3 Credits

The course will begin by introducing the main players: the neo-patrimonial Arab regimes on the one hand, and the democratic, economically modern Jewish sector in Palestine on the other. The analysis will focus on the impact of the social, economic, political and religious differences between the sides on their conception of the conflict among the participants and powers outside the region. The course will concurrently examine the impacts of the dynamics of the conflict itself, relations within Islam on the one hand and between Islam and the West on the other. The latter part of the course will consider the sources of perceptual shift that led simultaneously to the narrowing of the conflict with the withdrawal of some of its participants (most Arab states) and its widening with the addition of Al Qaeda and Iran (via Hezbollah). Note: This course is cross-listed as POL 371. Students may not get credit for both GLS 371 and POL 371.

GLS 393 International Communication 3 Credits

Examines mass media systems and their influence on international communication. Emphasizes media systems of major political powers such as Russia, China, the European community, the United States, and geo-political centers such as Africa, Asia, the Middle East, and Latin America. Using a seminar format, the course explores how a nation's mass media reflect its socio-political environment and national values. Focuses on the international images constructed by the mass media. Note: This course is cross-listed as COM 393. Students may not get credit for both GLS 393 and COM 393.

GLS 447 Global Literature 3 Credits

An in-depth study of the recent literature in English of one or more writers whose cultural identification is with one of the former colonies of the British Empire, as it was defined at the beginning of the 20th century. Literature in the English language, written by authors of African, Caribbean, Pacific Island, East Asian, or South Asian cultures may be included.

GLS 490 Independent Study: Research and Creative Expression 1-4 Credits

This course allows students with permission of the instructor to conduct an independent research project in Global Studies in a relevant area of interest to the student and faculty member.

GLS 491 Internship in Global Studies 1-4 Credits

Students work under supervision, either in the United States or abroad, in an environment which provides experiential learning in institutions that operate in a global environment, including those in government, business, and international non-governmental organizations (INGOs). Domestic internships might also include work in agencies that deal with global problems such as an international environmental group or a refugee resettlement center. A minimum of 52 hours of field work per credit is required, with regular reports and a concluding critique analyzing the experience. No more than six credits allowed toward graduation.

Global Supply Chain Management (GSC)

GSC 115 Introduction to Global Supply Chain Mgt. 3 Credits

This course introduces students to components of global supply chains and issues of managing the global supply chain. It is designed as a survey course to give first or second year business students a general view of supply chain management at both domestic and international levels, as well as familiarize them with basic concepts and major challenges of supply chain management. Delivery of course material will include lectures and guest speakers from industry, and in-class logistics mini cases.

GSC 235 Supply Chain External Focus: Customer and Supplier Logistics 3 Credits

This course is a detailed discussion of some of the major issues and components of supply chain management that are mainly external to an organization. In other words, it provides an "outward looking" perspective of supply chain management. Topics to be covered include sourcing, procurement, transportation, customer logistics, and distribution. The linkages to internal issues and components of supply chain will be made.

Prerequisite(s): GSC 115.

GSC 290 Strategic Sourcing and Procurement 3 Credits

Sourcing and procurement are vital components of a well-functioning and efficient supply chain. Obtaining raw materials, components, finished and semi-finished goods, critical technology, and essential services from different suppliers and countries with different languages, currencies, legal and cultural norms is a complex and risky task and made essential due to the value of these activities to the bottom-line of any global business today. Additionally, globalization raises issues involving not just costs but reliability, quality, credibility, product safety, product liability, and related social, ethical, governance, and environmental impact. In this course, students will learn and apply the concepts, principles, and techniques required to manage the sourcing process effectively. Topics include purchasing, outsourcing, materials management, inventory management, forecasting, price and cost analysis, transportation analysis, supplier selection, negotiation strategies, auctions, and legal framework. Students will apply the concepts covered in lectures, articles, case study analysis, a team project, and discussions. Additionally, a special component of this course will include participating in a multi-week real world procurement simulation where students will have an opportunity to interact in a purchasing process with senior industry procurement executives. The simulation will both teach and allow students to participate in developing and implementing bidding and negotiating strategies in real world vendor-customer relationships. Sophomore standing or higher.

Prerequisite(s): at least one of the following courses: ACC 210, or ECO 200, or ECO 201, or GSC 115.

GSC 315 International Business Tour 3 Credits**GSC 345 Customer Focus: The Customer Driven Supply Chain 3 Credits**

Marketing and supply chain management programs are concerned with the creation and delivery of value to customers and organizations. No longer simply the domain of the warehouse manager or logistics director, supply chain management is viewed by most companies as a mission critical element. Marketing focuses on developing an understanding of customers and markets, creating products and services based on that understanding, and communicating and delivering the value added. This course will teach the student the essential role of marketing in all aspects of successful supply chain management - relationship management, technological and financial management - and it will help the student understand the structure, functions, principles and methods employed in discovering and translating consumer needs and wants into product and service specifications, and then transferring these goods and services from producers to consumers or end users.

Prerequisite(s): GSC 115 and MKT 200.

GSC 355 Supply Chain Internal Focus: Firm Operations 3 Credits

This course is a detailed discussion of some of the major issues and components of supply chain management that are mainly internal to an organization. In other words, it provides an "inward looking" perspective of supply chain management. Topics to be covered include: manufacturing, quality, product design, inventory, and warehousing. The linkages to external issues and components of supply chain will be made.

Prerequisite(s): GSC 115 and MSD 340.

GSC 375 Adv.Sem in Global Outsourcing 3 Credits

The course is aimed at generating a comprehensive understanding of the emergent domain of global business process outsourcing. Various referred to as knowledge process outsourcing, IT-enabled services outsourcing, and business services outsourcing, the industry has seen enormous growth over the last decade and continues to grow. India commands the single largest share of this market but South Africa, Eastern Europe, Philippines, Morocco and Egypt have all emerged as other contenders in this global sector. The course is divided into four modules: the political economy of global outsourcing, process modeling, outsourcing management, and industry analysis. Please note: Students will not receive credit for both CIS 375 and GSC 375.

Prerequisite(s): junior standing.

GSC 385 Management Information Systems for Global Supply Chain Management 3 Credits

The purpose of this junior level management information systems course is to prepare students for today's dynamic business environment by increasing their understanding of IT-enabled global information processing and management. This course has a specific emphasis on the impact and effective utilization of information systems and technology for the global supply chain. Students will gain a solid understanding of the value of business process integration through a combination of conceptual learning, business process analysis, and collaborative decision-making. This will be facilitated through hands-on experience with SAP ERP and analytical software as well as Microsoft Excel. GSC 385 is required for the Global Supply Chain Management major and can fulfill the CIS 385 requirement for all business majors. Please note: Students will not receive credit for both GSC 385 and CIS 385 without prior approval by the Dean's office.

Prerequisite(s): CIS 185 and junior standing.

GSC 399 GSC Co-op Program 6 Credits

The co-op program provides students with an opportunity to work full-time in an organization and apply what they have learned in their global supply chain and other business classes. It also enhances students' employment opportunities since many employers use a co-op program as a first-step before they hire full-time employees. Eligible students include junior and senior global supply chain management majors with a minimum GPA of 3.0. The six credits are intended to be used as business electives, but it is also possible for them to be used as a combination of business and free electives.

Prerequisite(s): GSC 115 plus one additional course within the global supply chain management major, and permission of instructor.

GSC 445 Supply Chain Strategy and Design 3 Credits

This course introduces the student to the concepts and techniques necessary to design and operate global supply chains. It covers some of the strategic issues of managing a global supply chain and emphasizes the importance of understanding the organization, its value chain, industry, competitors, suppliers, and customers in a global framework. The course covers various strategies as well as different supply chain design models and approaches for efficient and effective supply chain operation.

Prerequisite(s): GSC 235 and GSC 355.

GSC 490 Independent Study: Research and Creative Expression 3 Credits

Topics to be approved by instructor, program director, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

Prerequisite(s): GSC 115 and permission of instructor.

GSC 491 GSC Internship 3 Credits

The Global Supply Chain Management (GSCM) Program formally sponsors an internship in global supply chain management. The intention of the course is to supplement theoretical foundations and other material introduced in the classroom with an opportunity to work in a sponsoring organization. Through the internship experience, the student will get a chance to see how supply chains are managed and will get a chance to apply supply chain concepts for themselves. If used in place of the co-op, internship credits will count toward GSCM major requirements, but can also be used as a business or free elective.

Prerequisite(s): GSC 115 plus one additional course within the GSCM major, and permission of instructor.

Health Administration (HTH)**HTH 201 Excel for Healthcare Management and Administration 1 Credits**

This course is a refresher on Excel designed to fill gaps in knowledge and application of skills for students who are preparing for their internships. Students will review the essentials of Microsoft Excel. Within seven weeks, students will learn to expertly navigate the Excel user interface, perform basic calculations with formulas and functions, professionally format spreadsheets, and create visualizations of data through charts and graphs. This course will provide students with a practical hands-on opportunity that is designed for students to gain the skills necessary to proficiently create pivot tables, analyze data, utilize more advanced Excel data tools, and interpret statistical results.

HTH 205 Introduction to Health Care 3 Credits

This course is an introduction to the components of the health care industry in the United States and to the interactions of these components in producing and supplying health care. We examine the nature of health, and the various institutions and personnel which seek to provide health services; we explore the means by which we pay for these services; we assess the relationship of technology to provision of health care services; we study the various ways that our government interacts with the providers of health care services; we investigate the ethical implications of issues in health care; and we explore health care sectors from an international perspective.

HTH 215 Population Health Care Management 3 Credits

In this course, we study how disease is distributed in populations and of the factors that influence or determine this distribution. This course introduces the basic methods and tools epidemiologists use to study the origin and control of non-communicable and communicable diseases so that policies and mechanisms to enhance the health of populations can be developed.

Prerequisite(s): MSD 205 or MTH 120 or ENV 200 or PSY 201 or BNS 250.

HTH 225 Health Care Financing 3 Credits

The goals of this course are: (1) to provide a description of how Americans pay for health care; (2) to explain how payment arrangements affect the health care system; and (3) to evaluate newly emerging arrangements. Specifically, we will focus on insurance (both public and private) in the United States, provider payment reform, the incentives of the parties in these arrangements and how these incentives impact cost containment in health care.

Prerequisite(s): HTH 205 and sophomore standing.

HTH 315 Health Care Law, Ethics and Policy 3 Credits

This course analyzes the role of the law in promoting the quality of health care, organizing the delivery of health care, assuring adequate access to health care, and protecting the rights of those who are provided care within the health care system. It will also examine the public policy, economic, and ethical issues raised by the health care system.

HTH 336 Economics of Health Care System 3 Credits

This course presents ways in which economic analysis can be used to explain issues in the health care industry. Microeconomics tools will be used to describe the behavior of consumers, producers, and third parties of the health care sector. The course also investigates the role of government in regulating the health care sector, and in providing services to the poor and elderly. Finally, we will use this foundation to examine some recent changes in this industry, and to analyze the most recent proposals for further changes.

HTH 365 Health Care Information Systems 3 Credits

The Electronic Health Record (EHR) is one of the most complex technological projects ever undertaken. EHR involves the shared management, potentially on a global scale, of a variety of private, time-sensitive, multimedia data across activities including capture, processing, storage and access. The purpose of this course is to provide the future Health Administration professional with specifics of the socio-technical issues involved in this effort. The goals of this course are to study data standards used in modern EHR systems, technology platforms used to implement EHR in various types of organizations, data governance and regulations associated with health data, analytics that support quality of care and evidence-based practice.

Prerequisite(s): HTH 205; CIS 385 or GSC 385; HTH 215 or CIS 360; and junior standing.

HTH 367 Special Topics in Health Administration 3 Credits

This course covers a current area of health care administration. Topics will vary from semester to semester.

HTH 450 Seminar in Health Research 3 Credits

Students in the course learn to conduct health administration-related research by engaging in an actual community-based research project. At the beginning of the semester, students are assigned to a health-related community-based organization. As a team, students meet with the client, devise a plan of action, collect and analyze data and other information, and write a report to the client. At the end of the semester, students present their findings to the client.

Prerequisite(s): Permission of instructor.

HTH 490 Independent Study in Health Admin 3 Credits

An independent study in health administration allows a student to conduct an in-depth exploration of a topic in health administration under the supervision of a faculty member. The project helps develop a student's research and written skills.

Prerequisite(s): JR or SR standing, Permission of Instructor.

HTH 491 Health Management Internship 3 Credits

This course provides students minoring in health administration an opportunity to supplement and apply their classroom work in a supervised employment setting with participating firms in the health care sector. Requirements include: a log of daily activities, oral and written reports to the faculty supervisor and a term paper. In addition, the employer will also submit an evaluation of the student's performance.

Prerequisite(s): HTH 205; junior or senior standing; and permission of faculty supervisor.

Health Care Policy (HCP)

HCP 301 Global Health Care Systems 3 Credits

Global Health Care Systems is an introduction to visions of global health care, drawing upon the fields of medical anthropology, global public health, and public policy. The course focuses upon different understandings of health care, reflected in the actual health systems in place around the world. Because responsible health-giving health systems respond to societies' changing needs and situations, students will learn about the skills needed for this kind of problem-solving, but also come to understand that there is an urgent and vital global need for the exchange of ideas in global health care systems.

HCP 302 Environmental Epidemiology, Pandemics and Globalization 3 Credits

This course is intended to provide basic knowledge of principles and methods of environmental epidemiology for students whose career interests in a health-related field may include using epidemiologic information. The course presents a holistic view of global health by crossing several disciplines, including medical anthropology and disease history, focusing upon the social processes by which groups are stigmatized during disease outbreaks, and public health policies for confronting outbreaks of epidemics and pandemics. The course emphasizes the conceptual aspects of epidemiologic investigation and application of these concepts in global health policy and related professions. Topics include: disease surveillance; population screening; interpreting epidemiologic associations, and the health risks and benefits of globalization. Salient foci will be: the evaluation of the role of health diplomacy in addressing shared global health problems among countries, and the evaluation of cultural, ethical, social, systemic, and anthropological determinants of global health problems.

HCP 303 Global Health and Human Rights 3 Credits

This course introduces students to the basic concepts of human rights and their links to national/global health, as well as to issues where human rights and health collide. Students will become familiar with global efforts for developing practical and effective responses to global health challenges with a human rights framework.

HCP 304 Health Policy, Administration, and Compliance 3 Credits

Health Policy, Administration, and Compliance explores the politics of health care policy at the local level. The course identifies and evaluates various measures of the health and function of populations, organizations, partnerships, systems, and communities. The course provides students with an overview of the realities, challenges, and requirements of practicing community oriented primary health care.

HCP 450 Seminar in Health Care Policy 3 Credits

Rider University is uniquely positioned through Global Studies to have access to the nongovernmental organization United Front against River Blindness (UFAR). It is an African-inspired, U.S.-based nonprofit and tax exempt organization. Its primary mission has been to participate in partnerships with other global health organizations in the elimination of onchocerciasis (river blindness), as a major public health problem in the Democratic Republic of the Congo (DRC). UFAR was founded and registered in the U.S. in 2004 by Dr. Daniel Shungu, a former Merck & Co. Inc. employee, who is a Congolese by birth and a naturalized U.S. citizen. The U.S. office is in Lawrenceville, N.J. and the Congo office is in Kinshasa, DRC. Dr. Roberta Fiske-Rusciano of Rider University's Global Studies faculty is a founding UFAR board member and has hosted Dr. Shungu several times in her course Global Perspectives on Health and Illness. For the past eleven years UFAR in partnership with several organizations (World Health Organization, Sightsavers Intl., Merck, DRC coalition group for onchocerciasis, and the DRC Health Minister, have successfully treated three million (as of 2015) Congolese with Ivermectin (Mectizan), donated by Merck and Co., Inc. Taken once a year for approximately ten years prevents infection of river blindness, by interrupting the cycle of the parasite. Because of UFAR's continued success in its mission, it has been asked to expand its work to include more neglected tropical diseases, using the same method of health delivery system: community directed treatment with the appropriate medication, e.g. Ivermectin. Now that treatments of other diseases have been added to UFAR's mission (trachoma, lymphatic filariasis, schistosomiasis, guinea worm and helminthes infestations), additional medical treatments are scheduled to be added once these conditions are thoroughly mapped in the population.

HCP 491 Health Care Policy Internship 1-3 Credits

Students will complete an internship that will build on prior work in the HCP major.

Health Sciences (HSC)**HSC 100 Intro to Human Nutrition 3 Credits**

This course is designed to offer the student understanding of fundamental human nutrition concepts including, but not limited to, digestion, absorption, metabolism, functions and sources of macronutrients and micronutrients. The theme of the course will align with human health and disease states and the important conceptions about the food industry and its relation to healthy dietetic choices.

HSC 102 Medical Terminology 1 Credits

Medical terminology is the study of the principles of medical word building to help the student develop extensive medical vocabulary used in health care occupations. Students will gain an understanding of basic elements, rules of building and analyzing medical words, and medical terms associated with the body as a whole.

Prerequisite(s): Permission of instructor.

HSC 105 Introduction to Health Professions 1 Credits

Course Description: This course will provide a basic overview of the health science professions including but not limited to: athletic training, clinical exercise physiology & cardiac rehabilitation, chiropractic, physician assistant, occupational therapy, nursing, community health education specialist, and physical therapy. The course will also cover the professional activities (i.e. professional organizations, certifications, professional issues, and professional liabilities) that are related to these professional applications.

HSC 150 Introduction to Public Health 3 Credits

Public Health is the science of protecting, promoting, and improving the health of people and the communities where they live, learn, work, and play. Students will gain an understanding of the history and functions of public health, strategies and methods used in public health research, and the determinants of health.

HSC 200 Environmental Health & Human Health 3 Credits

The health of any individual is a function of both our genetics and environmental factors. Environmental factors most broadly defined include the air we breathe, the water we drink and the food we eat. This course will focus on numerous examples of how bacteria, viruses, and exposure to environmental chemicals result in human diseases. Examples range from failures in public health infrastructure (cholera, diphtheria, river blindness, etc), failures to vaccinate (polio, measles, hepatitis, etc) and chemical exposures (birth defects, cancer, etc). There is also much known about how diet and nutrition can prevent diseases.

Prerequisite(s): BIO 10X Life Science course or any biology laboratory course (BIO 115, 116 or 117).

HSC 201 Nutrition for Exercise and Physical Activity 3 Credits

An introductory exploration of evidence based nutritional theory and applications in sport and exercise.

HSC 250 Introduction to Epidemiology 3 Credits

Epidemiology is the study of distribution and determinants of defects, disease, and injury in human populations and the application of that study to assess the magnitude of health problems and the result of interventions designed to control them. This course is designed to introduce students to the basic principles, methods, and uses of epidemiology to better understand and characterize health and disease at a population level. The role of epidemiological evidence in planning and evaluation will be also be explored.

Prerequisite(s): MTH 102 or higher OR MSD 105 or higher OR POI.

HSC 302 Kinesiology 3 Credits

The purpose of this course is to explore human movement during performance of activities. This course will explore the relationship between anatomical structures and function in the production of movement. The application and relationships between the fundamental principles of mechanics and musculoskeletal system function will be addressed within the framework of clinical and research perspectives. Both qualitative and quantitative approaches will be applied towards a better understanding of human movement, the analysis of physical activity. **Prerequisite(s):** BIO 221 & MTH 105 (or equivalent) or POI.

Corequisite: HSC 302L.

HSC 302L Kinesiology Lab 1 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): HSC 302.

HSC 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in health science-related research. The student learns to organize material, use relevant medical/scientific literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

HSC 491 Internship in Health Sciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations. These can include educational or research institutions. The method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty member and should include keeping a journal of activities, a term paper or project report and an oral or poster presentation.

Prerequisite(s): 2.5 GPA required.

History (HIS)

Courses and Descriptions

HIS 150 World History to 1500 3 Credits

This course traces both regional histories and global interactions, and covers the development of societies and states in Africa, the Americas, Asia and Europe from prehistoric times until about 1500. Certain major topics will be pursued, including agriculture, great empires, the major world religions, long-distance trade, and early modern exploration. While learning about these topics, students will also gain an understanding of the practice of history, especially of the kinds of sources historians use and how they reconstruct and interpret the past.

HIS 151 World History Since 1500 3 Credits

Learn what college students should know about history as a discipline and why history matters by tracing the development and interactions of the cultures of Europe, Africa, Asia and the Americas from 1500 to the present. Students will gain an appreciation for the value of historical thinking and a greater understanding of the relationships among modern nations so necessary for global citizenship.

Prerequisite(s): HIS 150.

HIS 160 Seminar in History 3 Credits

This course introduces students to the discipline of history and to the skills needed for its pursuit. Students will learn to analyze and evaluate primary sources and to identify the thesis and argument of secondary sources, as well as to locate sources using library databases. They will complete a short research paper in which they put these skills into practice. The seminar is intended for History majors and minors and Social Studies majors in their freshman year. Transfer students with fewer than 45 credits should consult their advisor on the suitability of the course for their program. Enrollment limited to 16.

HIS 180 U.S. History I 3 Credits

A survey of American history from the early 17th century through 1877. Among the topics covered will be settlement and regional differences, the American Revolution and the formation of a national government by 1787. The beginning stages of industrialization, the rise of democratic and reform politics, westward expansion, the debate over slavery and growing sectional tensions through the Civil War and Reconstruction will be major themes in the 19th century. Included will be discussions of African Americans, Native Americans, and women.

HIS 181 U.S. History II 3 Credits

A survey of United States history from the end of the Civil War through the present. Included will be discussions of the maturing of an industrial economy, and expansion in the west and overseas. The role of the United States as a world power and the growth of presidential power will be shaped and sometimes challenged by movements designed to expand democratic institutions and human rights. Included will be discussions of African Americans, Native Americans, and women.

HIS 190 Europe to 1715 3 Credits

Examines the development of European civilization from late Roman times until 1715, stressing the Classical heritage, the main currents of European thought and letters, the Renaissance and Reformation, the Age of Discoveries, and the development of the Old Regime.

HIS 191 Europe Since 1715 3 Credits

Examines major political, economic, social, and cultural developments in Europe and the West from 1715 to the present.

HIS 200 Native American History 3 Credits

Traces the experiences of North American Indians from early colonial times to the present day, demonstrating how Indian life has varied and changed throughout our nation's history. Topics include strategies of resistance and accommodation to colonial powers, 19th-century impacts of U.S. government removal and cultural assimilation policies, and 20th-century cultural and political developments among the nation's surviving tribes. Rather than "vanishing," American Indians are a vital and expanding force in modern America.

HIS 201 African American History 3 Credits

Examines the actions and thought of peoples of African ancestry in the United States. Briefly considers Africa before the Atlantic slave trade, then concentrates on major themes in African-American history—the slave trade, slavery, and the genesis of African American society, emancipation and its consequences, urbanization and industrialization, Black Nationalism, the Civil Rights Movement, and African Americans today. Emphasizes African Americans' dynamic and creative role both in shaping their society and establishing their place in United States society. The on-going struggle for freedom and equality provides thematic continuity for analyzing nearly 400 years of African-American history.

HIS 220 America's Culture Wars 3 Credits

For much of the recent past Americans have lived in a state of "culture war." This course will examine the history of modern culture and the conflict that sprang up around it, focusing on the rise of cities, race and racism, shifting sex and gender norms, religion, pleasure, education, immigration, and politics. Students will assess cultural and political developments over the course of the twentieth century with an eye toward understanding the twenty-first.

HIS 224 American Environmental History 3 Credits

Surveys the history of the North American environment from pre-Columbian times through the 20th century. Topics include Native American uses of the environment; the reshaping of ecosystems under European colonization; U.S. frontier expansion; the ecological impact of industrialization and urbanization; and the rise of the environmental movement.

HIS 225 A History of American Business 3 Credits

Examines the history of business in the United States from the Colonial Era to the present. Emphasizes such themes as the changing capitalist system, the function of business institutions, the roles of the entrepreneur, the relationship between government and business, and the emergence of the corporation.

HIS 226 History of New Jersey 3 Credits

Explores the history of New Jersey from the colonial period to the present including the role of New Jersey in the American Revolution, the establishment of the Constitution, and the course of industrialization. Examines the impact of national and international developments on New Jersey and emphasizes the distinctive characteristics of the Garden State.

HIS 227 U.S. Cultural History I 3 Credits

Examines cultural developments in the United States through the Civil War. Topics include popular culture, the history of the body, reading and print culture, public celebrations and holidays, religion, race and ethnicity, and material culture. Some of the larger trends explored include the creation of American nationalism, the development of a consumer society, and the rise and decline of 19th-century family life and culture.

HIS 230 History on Screen 3 Credits

This course explores the ways in which feature films and documentaries construct the historical past and shape, reflect, or revise popular understandings and national or cultural myths about the past. We will consider films as products of particular moments in history (potential primary sources), as well as arguments about the moments they portray (potential secondary sources). We will explore how audiences take an active role in shaping the meaning of a film, and thus how that meaning may shift as audiences change over time. We will trace how and why filmed representations of our understanding and interpretation of the past have changed over time. The topics of the films analyzed in this course may vary.

HIS 240 History of Ancient Greece 3 Credits

Surveys the intellectual and cultural life of ancient Greek civilization against the background of its political, economic, and social history.

HIS 241 History of Ancient Rome 3 Credits

Studies the history and culture of Rome, emphasizing such topics as Roman law, government, literature, religion, art, and philosophy.

HIS 243 Italy Middle Ages to Present 3 Credits

Traces the history of Italy from the Middle Ages to the present, stressing the connection between culture, religion, politics, and wealth in successive historical periods. Students participating in the two-week travel component at the end of the course may receive four credits.

HIS 245 Britain to 1688 3 Credits

British history from pre-Roman times to the Glorious Revolution is examined, emphasizing the growth of royal government, parliament, and the origins of the British colonial empire.

HIS 246 Modern Britain 3 Credits

Examines British history from the Glorious Revolution to the present, stressing the reform movements of the 18th and 19th centuries, the Pax Britannica, the Industrial Revolution, imperialism, and the impact of the two world wars.

HIS 248 History of Ireland 3 Credits

Beginning with an overview of the Irish past, focuses upon the past century of the island's history—the problems, challenges, and accommodations that led to the present situation as one of the most protracted unresolved partitions in the modern nation-state system.

HIS 249 Women in Europe from Antiquity to the French Revolution 3 Credits

Traces the history of women in Europe from Rome to the French Revolution, covering the religious, social, political, and economic context in which women participated. Also offers a brief overview of theories and issues in women's history and gender history.

HIS 255 History Abroad 3 Credits

Two-week travel course to a destination chosen by the professor. Exposes students to historic and cultural sites and works of art that have been studied in class. Students must attend orientation sessions, read assigned writings, complete a travel journal, write a final paper on a topic relevant to the course, and attend all scheduled course activities abroad. Travel will take place in January or at the end of the spring semester.

HIS 260 Craft of History 3 Credits

This seminar focuses on historiography and research skills to further students' progress toward the major capstone experience of conducting independent historical research. Students will explore how historians approach, interpret, and write about a particular topic selected by the instructor, and discover how and why interpretations and methods have changed over time. Topics will vary by instructor. Course may be taken a second time on a different topic for 200-level credit. The course is required for History majors who are Sophomores or Juniors. Enrollment limited to 16.

HIS 273 Imperial Russia 3 Credits

Discusses the political, economic, social and cultural developments in Russia and its borderlands during the Imperial period, that is to say the 18th and 19th centuries from Peter the Great to the Revolutions of 1917. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 274 Modern Russia 3 Credits

Covers the background to the Russian revolutions of 1917, the revolutions themselves, and the evolution and dissolution of the Soviet regime. Cultural, social and economic aspects of this period receive as much attention as political aspects. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 280 Vietnam in Peace and War 3 Credits

Examines the history of modern Vietnam, with a focus on the struggle for independence from the late 18th century to the present. Discusses the traditional culture, French colonialism and the development of Vietnamese nationalism, the Japanese occupation in WWII, and the struggle against France and the U.S. in the First and Second Indochinese Wars, as well as the postwar period. Explores the American experience in Vietnam and the impact of the war in the United States.

HIS 281 Modern Middle East 3 Credits

Examines political, economic, social, and cultural developments in the Near East, from the rise of the Ottoman Empire to the present, stressing the impact of contacts with the West in the 19th and 20th centuries, and the emergence of the contemporary Arab World, Israel, Turkey, and Iran.

HIS 282 Colonial Latin America 3 Credits

Examines the pre-Columbian and colonial periods of Latin-American history. Discusses the Indian, African, and European peoples and pays particular attention to the colonial Spanish and Portuguese societies from their establishment up to the revolutions that brought about political independence.

HIS 283 Modern Latin America 3 Credits

Considers the post-independence history of Latin America, emphasizing the rise of export economies and external economic domination, modernization, and pan- Americanism. Examines the changes undergone by Latin-American nations in the 20th century through an analysis of Mexico, Argentina, Chile, Brazil, Peru, Cuba, and Central America.

HIS 284 Caribbean History 3 Credits

Analyzes the history of the West Indian islands and the lands bordering the Caribbean Sea from pre-Columbian times to the present.

HIS 286 Modern East Asia 3 Credits

Examines the disintegration of the Ch'ing dynasty in China and the Tokugawa Shogunate in Japan under internal stresses and foreign incursions, and the varied experience of those states in coming to terms with the challenges of modernization and westernization. Covers political, economic, social, and cultural factors in China, Japan, and East Asia.

HIS 288 African History 3 Credits

Traces the history of Africa, analyzing the unique problems of African historical evidence and the complexity of the continent's past. Examines the genesis of African culture, early African societies, and the character of African civilizations and empires, then considers external influences such as religion (especially Islam and Christianity), contacts with Europe, the slave trade, the colonial scramble for Africa, colonial rule, modernization and dependency, and concludes by assessing the rise of independent Africa after World War II, its present status and future prospects.

HIS 289 History of Modern Japan 3 Credits

Examines the history of modern Japan from the age of the samurai in the Tokugawa Shogunate to today's high-tech mass consumer society. It traces the interaction of elements of Japan's traditional culture with impacts from the outside to create a uniquely-Japanese modernity. It stresses social, economic, and cultural trends, as well as political history, and includes an examination of modern Japanese culture through fiction and film.

HIS 298 Special Topics in History 3 Credits

Exploration of special topics, themes or methodologies in history. This course may be repeated for credit on different topics.

Prerequisite(s): permission of instructor.

HIS 300 Economic History of the U.S. 3 Credits

Studies the main currents in the economic growth of America from colonial times to the present. Stresses the process of economic development from an agrarian to an industrial society, and examines the challenges and dislocations resulting from economic change.

HIS 301 Constitutional History of U.S. 3 Credits

Surveys the English, Colonial, and Confederation backgrounds of American law and constitutionalism; the framing, adoption, and implementation of the Federal Constitution and its later development; the role of law in the nation's history; the changing interpretations of federalism; the growth of judicial review; and the increasing role of the Supreme Court.

HIS 302 American Worker: Social History 3 Credits

Investigates the American workers' varied social, cultural, religious, and ethnic environment from post-Civil War to the present. Emphasizes worker response to industrialization, urbanization, the technical revolution, and automation.

HIS 303 American Urban History 3 Credits

Traces the growth of urbanism in America from colonial times to the present. Focuses on the interaction between the city dweller and the urban environment and explores the problems confronting urban America today.

HIS 304 Civil War and Reconstruction 3 Credits

Considers the Civil War as a watershed in the development of the American republic. Analyzes antebellum sectional conflict, the war years, and the era of Reconstruction.

HIS 306 U.S. Cultural History II 3 Credits

Examines cultural developments in the United States from the late 19th century to the present. Topics include popular culture, intellectual history, gender history, literary history, film, institutions like museums and department stores, subcultures and counter- cultures, popular commemorations like World's Fairs, and political culture. Some of the larger trends explored include the development of the modern culture of consumption, the urban landscape, and the polarization of cultural values.

HIS 307 The Immigrant in American Life 3 Credits

Examines the experiences of immigrants in the United States, their assimilation, the reactions to them, and their contributions.

HIS 309 Women in American History 3 Credits

Examines the roles, status, and influence of women from the colonial era to the present. Studies the origins and development of feminism, including legal, political, educational, economic, and sexual rights; and studies social feminism, including reform movements in such fields as abolition, prohibition, pacifism, child labor, and social welfare.

HIS 318 The American Revolution 3 Credits

Examines the growing rift between the American colonies and the British Empire, the War for Independence, and the creation of a new American republic. Explores the political, economic, social and cultural history of the Revolutionary era, and includes the experiences of various groups such as Native Americans, slaves, and women.

HIS 319 Gender and Sexuality in American History 3 Credits

What makes a man, exactly, and what makes a woman? What kinds of sex are normal, and what kinds are abnormal? Who decides, and why? The answers to these questions are not fixed. Throughout American history, popular understandings of gender and sexual norms evolved in close relationship with the political, economic, racial, and social dictates of the time. This course will trace the evolution of ideas on sex and gender from the 18th century to the present using various historical sources including fiction and film, particular attention will be given to analyzing dominant models of proper behavior and the complex relationships of power enmeshed within them.

HIS 320 The History of Christianity 3 Credits

Examines Christianity's role in world history from the life and times of Jesus to the present. Emphasizes the quest for the historical Jesus, the emergence of Christianity after his death and triumph during the later Roman Empire, and Christian relations with pagans, Jews, heretics, witches and Muslims. Traces the various branches of Christianity, its spread throughout the world, church-state relations and responses to secularism, capitalism and communism.

HIS 325 Church & Society in Med Europe 3 Credits

Studies the role of the church in the shaping of early medieval society. Emphasizes the emergence of Christianity as a world force, its challenge from Islam, and the church's impact on the politics, thought, and economy of early medieval Europe.

HIS 326 Renaissance and Reformation 3 Credits

Studies the Renaissance, including the development of humanism and art as well as the political and economic changes of the period. Discusses the Renaissance church and movements for religious reform, leading to a consideration of the origins, development, and consequences of the Reformation. Examines the influence of the Renaissance and Reformation on the development of capitalism and the dynamic, secular nation-state.

HIS 333 20th-Century Europe 3 Credits

This course covers the history of twentieth-century Europe, a time when major wars brought Europe from the heights of prosperity and power to the brink of ruin. Europe's experience in war, social upheaval, and ideological conflict shaped the twentieth century not just in Europe but globally. We begin with a look at the condition of Europe at the turn of the century and assess why the European states plunged into what was a disastrous series of conflicts. We will consider the First World War and its impact, including the Russian Revolution and the peace settlement, and then focus on attempts to find stability and the emergence of radically new political movements that challenged the postwar order. Next we will examine the ways in which Europe embarked on the path of near self-destruction during World War Two. A discussion of the origins and consequences of the Cold War and the fate of the socialist and capitalist systems follows. Throughout the course we will touch upon European art and culture. We will conclude with a look at the events of 1989 and attempt to understand the meaning of the twentieth century. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 334 The Era of World War II 3 Credits

Investigates selected topics relating to the origins, events, and outcome of World War II, emphasizing the war's impact on 20th-century civilization. Traces the roots of the conflict back to the World War I peace settlements, and examines the rise of totalitarianism, pre-war aggression and appeasement, the immediate causes of the war's outbreak, the course of military actions, the diplomacy of the belligerents, the War's impact on civilian life, and factors that shaped the post-war world. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 335 Nazi Germany & Hitler's Europe 3 Credits

Examines the Nazi dictatorship in all its complex dimensions, from the early life of Adolf Hitler to total war and genocide. Students will explore how the Nazi movement arose in the context of modern German and European history, and how the Nazis were able to win the support of significant segments of the German population. We will study the Nazis' massive project of social and biological engineering – pronationalism, forced sterilization, extermination of "social and biological deviants," and, ultimately, the genocide of the Jews. Through memoirs, state documents, and historical accounts, the class will examine life from the vantage point of perpetrators, accommodators, victims, and resisters. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 336 Modern European Intellectual History 3 Credits

Examines the 17th-century revolution in scientific, philosophical, and political thought; the Enlightenment; Romanticism; the ideologies of Conservatism, Liberalism, and Socialism; Positivism; Darwinism; the crisis of European thought (1880-1914); and the major intellectual trends of the 20th century.

HIS 337 Post-1945 United States History 3 Credits

This course will magnify American society, politics, culture, and foreign policy from 1945 to the present, tracing the rise and fall of the "American Century". We will focus on topics such as the Red Scare, suburbanization, mass culture, the power of the presidency, the Civil Rights movement, Vietnam, disco, and the war on terror, offering students a unique opportunity to delve deeply into our recent past.

HIS 341 China in Revolution 3 Credits

Treats the Chinese Revolution in terms of political, economic, and social transformation.

HIS 342 Women in East Asia 3 Credits

Treats the history of the relationship between women and society in traditional East Asia and the modern transformation of their relationship.

HIS 343 Ottoman Empire and the Balkans 3 Credits

This course is divided into two parts. Part one examines the rise, zenith, and gradual disintegration of the Ottoman Empire, one of the greatest, most extensive, and long lasting empires in history, with special focus on the southeastern projection of Europe, known as the Balkan Peninsula. The second half of the course concentrates on Balkan history proper, from the First World War until the demise of communist regimes in the late 1980s. Lastly, we will consider contemporary developments, especially the breakup of Yugoslavia and its aftermath. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 351 Warfare in History 3 Credits

Studies the evolution of international and intergroup conflict through the ages; principles, theories, and kinds of war; the great military practitioners and thinkers of world history. Briefly touches upon the American experience as a recent segment in world military and cultural history.

HIS 352 History of Socialism 3 Credits

Considers the historical development of socialist ideas and their adaptations from ancient times to the present, including ancient and Judaeo-Christian antecedents, Utopian Socialism, Marxism, Anarchism, Communism, and Democratic Socialism, emphasizing the historical comparisons among these schools. This course counts towards the fulfillment of the Global Perspectives element of the CLAS general education curriculum.

HIS 353 Oral History 3 Credits

A study of the theory and practice of oral history. Involves an examination of the methodology and functions of oral history, the nature and character of oral evidence, and the place of oral testimony within the historical discipline.

HIS 398 Special Topics in History 3 Credits

Advanced exploration of special topics, themes or methodologies in history. This course may be repeated for credit on different topics.

Prerequisite(s): Permission of Instructor.

HIS 460 Research Seminar 3 Credits

Students produce a major research paper in this topical capstone seminar. Topics and themes vary by instructor. The seminar has a maximum enrollment of 16 students, so professors and students have an opportunity to work together closely over the course of a semester.

Prerequisite(s): HIS 260, and permission of instructor.

HIS 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Proposals must be approved by the Dean's Office no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours.

Prerequisite: Permission of instructor. When taken to substitute for HIS 460, HIS 260 and permission of instructor.

HIS 491 Internship in History 1-4 Credits

Internships to be offered each semester with such institutions as the New Jersey State Archives and the David Library of the American Revolution. Four credits may be taken for Category III History credit. Additional credits may be taken for Liberal Arts elective credit.

Prerequisite: Permission of internship coordinator.

Homeland Security (HLS)

HLS 100 Intro to American Politics 3 Credits

An examination of basic principles of the U.S. constitutional system; the operation of the democratic process; the organization, powers and procedures of Congress, the presidency and the federal judiciary; and the functions, services, and financing of the national government. Emphasis is on public issues, national priorities, and civil liberties. Note: This course is cross-listed as POL 100. Students may not get credit for both HLS 100 and POL 100.

HLS 202 The Political System - Theories/Theme 3 Credits

This course serves as a gateway to the subfields of comparative politics and international relations. The concept of the political system helps political scientists to organize political interrelations into patterns that allow systematic selection and interpretation of information and the study of processes and outcomes of politics in a variety of settings. The course introduces students to the main brands of normative theory prescribing the principles directing the operation of the political system, to some of the most important methods used to compare political systems and/or their components, and to the foremost approaches utilized in the study of the relations between political systems and their environments. Note: This course is cross-listed as POL 202. Students may not get credit for both HLS 202 and POL 202.

HLS 203 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective. Note: This course is cross-listed as POL 203. Students may not get credit for both HLS 203 and POL 203.

HLS 204 Development and Structure of the US Intelligence Community 3 Credits

This course provides a historical review of intelligence following World War II. It will examine the major functions of intelligence, as well as intelligence as a part of the foreign policy process: collection, analysis, counterintelligence, and covert action. Students will be introduced to a range of collection procedures: human, open source, electronic, photographic, and signal, with emphasis placed on interpreting and writing intelligence summaries. Note: This course is cross-listed as POL 204. Students may not get credit for both POL 204 and HLS 204.

HLS 205 Spies, Double Agents, and Moles: The World of Counterintelligence 3 Credits

This course provides in-depth exposure to historical, open-source investigations and concepts that illustrate the defensive, offensive, investigative, and collection efforts of counterintelligence (CI) activities. This course looks through the ideological and political prisms of how and why the Western and Eastern blocs fought the Cold War with agents, double agents, sleepers, and moles, and how MICE (money, ideology, compromise, and ego) and RASCALS (reciprocation, authority, scarcity, commitment, liking, and social proof) caused thousands to betray their countries and become the 'enemy within'. Counterintelligence (CI) is a critical element of US national security policy and interests both in the United States and abroad, and the course will focus on activities that comprise counterintelligence functional activities, including the detection of espionage and elicitation; counterintelligence interviews/debriefings; and the collection of counterintelligence information.

Prerequisite(s): POL 100 or POL 102.

HLS 220 Terrorism & Counter Terrorism 3 Credits

This course introduces students to the arguments about the definition of terrorism, the historical use of terrorism and the roles of ideology, religion, and psychological factors that help explain and predict it. The course seeks to identify the components of national security policy aimed at countering such elements and their cost, both in financial and civil right terms. Finally, to illuminate both the definition and the policies discussed, the course will offer brief comparisons with other states, especially Israel, the UK, and Russia.

HLS 270 Networking/Telecommunications 3 Credits

This course provides an introduction to business data communications and networking. The Internet and OSI models are discussed. Network technologies include local area networks, backbone, wide area networks, and the Internet. Introduction to network design, security, and network management are also provided.

Prerequisite(s): CIS 185.

HLS 300 U.S. Constitutional Law 3 Credits

The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as POL 300. Students may not get credit for both HLS 300 and POL 300.

HLS 301 Civil Liberties in the US 3 Credits

The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as POL 301. Students may not get credit for both HLS 301 and POL 301.

HLS 304 Political Behavior: Fear, Risk and Crisis 3 Credits

The course focuses on various analytical approaches in behavioral political science. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior—e.g., voting/non-voting, the formation of political partisanship and ideology, issue perceptions, responding to risk and uncertainty in the political environment, and engaging in civic political participation. Note: This course is cross-listed as POL 304. Students may not get credit for both HLS 304 and POL 304.

HLS 311 Sovereignty, the State and Borders 3 Credits

Borders have a prominent place in politics and human history. In the twentieth century, the best known barriers were the militarized Maginot Line and the Iron Curtain. Today, the political popularity of borders persists but the nature and quality of these borders and the threats they are created to repel have changed. Modern borders are designed not to keep militaries out, but to deter a perceived invasion of “undesirables”—with terrorists and unwanted immigrants leading the list of state concerns. Nowhere is this more evident than along the geographic fault lines dividing rich and poor regions, e.g. the Mediterranean Sea and the U.S.-Mexican border region. This course will examine the dynamic interactions between the question of how to govern one's borders and the twenty-first century liberal state with its diluted sovereignty—due to immigration, trade and international laws and regimes. In the first post-Cold War decades it was intellectually fashionable to dismiss borders as increasingly irrelevant to the human experience in the age of globalization. Scholars saw the significance of national borders for the Western world as having been vastly reduced by the three forces of military change, economic development and modern communication technologies (Horsman and Marshall 1994). Some free market liberals have even popularized the notion of an emergent “borderless world” (Ohmae 1990). These cheerful views stressing the benign, pacifying effects of economic integration and interdependence that must lead to a rollback of the state and the erosion of borders, came crashing down on September 11, 2001. After two decades of debordering, the new rules of the game focus on rebordering, and the importance of state with its reassertion of border controls and an ideological redefinition of border functions (Andreas and Snyder 2000). To be sure, borders, with all their practical and formal features, are increasingly just one element in a larger emergent operational sp.

HLS 314 Congressional Power and National Security Policy 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. Particular attention is paid to the role of the US government being able to balance individual rights and liberties within the national security state. Last, the course also takes an in-depth analysis of the U.S. Congress, looking comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror? Note: This course is cross-listed as POL 314. Students may not get credit for both HLS 314 and POL 314.

HLS 316 Presidential Power and National Security Policy 3 Credits

This course examines the development of the National Security State since the Second World War, and the ways in which it has affected, and been affected by, the Federal Executive. Topics to be covered will include the post-World War II redefinition of “national security”, the Cold War (with a special focus upon war powers during Korea and Vietnam) and the changes that have occurred with the “War on Terror.” Note: This course is cross-listed as POL 316. Students may not get credit for both POL 316 and HLS 316.

HLS 319 Terrorism, Revolutions and Political Violence 3 Credits

Revolutions are the mad inspiration of history. Trotsky's characterization calls attention to three important dimensions of violent political participation: the historical settings, ideology, and emotional fervor of the practitioners. The course focuses on these dimensions by analyzing revolutionary and terrorist movements in the 20th century. Special attention is given to the use of violence in the post-Cold War new world disorder. Note: this course is cross-listed as POL 319 and GLS 319. Students may only get credit for one course: HLS 319, GLS 319 or POL 319.

HLS 325 Public Administration 3 Credits

Public administration in modern society, emphasizing the administrative formulation of public policy and its implementation. Attention on who gets what, when, and how from the decisions of administrative units; the role administrators have in policy-making compared to elected legislators, chief executives and judges; the effect administrators have on the benefits citizens receive from government; and the effect administrators have on citizens' behavior. Note: This course is cross-listed as POL 325. Students may not get credit for both HLS 325 and POL 325.

HLS 334 Cyber Strategy 3 Credits

The course examines issues and challenges related to national security concerns and cybersecurity. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation's cyber infrastructure. The emphasis of this course is on “hands-on” experience whereby students will “learn by doing” analysis.

Prerequisite(s): Completion or transfer of HLS 203 or HLS 204 or POL 100 or POL 102 or permission of instructor.

HLS 341 Cybersecurity Policy: Hacktivism and Cyberviolence 3 Credits

Hactivism is a process designed to be “the creative use of computer technology for the purposes of facilitating online protests, performing civil disobedience in cyberspace.

Prerequisite(s): Completion or transfer of HLS 203 or HLS 204 or POL 100 or POL 102 or permission of instructor.

HLS 346 The Politics and Ethics of Emergencies 3 Credits

This course explores historic and present day cases, ranging across Europe and the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, take on emergency powers to become so-called "states of exception." While in some cases such states have imposed mild and limited emergency measures, others have employed more draconian measures, suspending, if not dissolving, constitutionally guaranteed civil liberties, often for indeterminate and protracted periods. How various states have behaved in emergency situations will be the major content of this course. Note: This course is cross-listed as POL 346. Students may not get credit for both HLS 346 and POL 346.

HLS 350 U.S. Foreign Policy and Security Policy 3 Credits

Principles, institutions, and processes involved in the formulation and implementation of policies regarding the nation's military, economic, and environmental security within the global framework. Strands, trends, and problem areas in U.S. foreign policy, with focus on the changing global environment of the post-Cold War world. Note: This course is cross-listed as POL 350, GLS 350. Students may get credit only once.

HLS 351 Critical Views of Global Security 3 Credits

This course will examine the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspective on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security. Note: This course is cross-listed as HLS 351. Students may not get credit for both HLS 351 and POL 351.

HLS 353 Cyber War 3 Credits

Cyber-attacks are a growing concern for the international community. When does a cyber-attack constitute an act of war, or is it merely an inconvenience? Is cyber power military power? How prevalent are such attacks, and to what extent can cyber-attacks lead to conventional conflicts? Will cyber-attacks by non-state actors render more power to such players in destabilizing states? This course explores the different types of issues experienced in cyber wars, including mechanisms through which targeting of communication technology could escalate tensions and lead to an armed conflict, and ways through which states and international organizations could limit the destructive potential of cyber technology.

HLS 361 Courts, Judges and Politics 3 Credits

In-depth examination of the nature of judicial decision-making and the impact that judicial decisions have on society. Considers the sources of judicial authority, judicial fact-finding, statutory and constitutional interpretation, individual and collective processes of judicial decision-making, relations between judges and other government officials, and the political consequences of judicial decisions with particular emphasis on federal courts and judges. Note: This course is cross-listed as POL 361. Students may not get credit for both POL 361 and HLS 361.

HLS 363 Human Rights in Global Context 3 Credits

Examines human rights – droits de l'homme, derechos humanos, Menschenrechte, "the rights of man" – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breath and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as POL 363. Students may not get credit for both HLS 363 and POL 363.

HLS 420 Enterprise Security 3 Credits

Students will be provided with complete coverage of computer security in all forms including hardware, network, and software program security. Through hands-on labs, students will learn firsthand how enterprise systems can be comprised and how computer professionals can prevent and provide counterattacks for security intrusions.

Prerequisite(s): CIS 310 or permission of instructor.

HLS 491 Internship in NJ Homeland Security 1-4 Credits

Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of field work per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.

Prerequisite(s): permission of instructor.

Human Resource Mgt (HRM)

HRM 312 Intro to Labor Relations 3 Credits

This course deals with the relationship of labor unions and management, the fundamentals of collective bargaining, and labor legislation. The structure and growth of unions as well as the relationships and problems that exist among private and public sector organizations, the labor force, and government are surveyed.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 313 Legal Aspects of Human Res Mgt 3 Credits

This course deals with the various laws that affect human resource management, including social insurance, legislation, minimum wage laws, OSHA, ERISA, as well as equal employment opportunity legislation. This course is concerned not only with the provisions of these laws, but also with their constitutionality, their effects, and how they are administered.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 315 Employee Selection & Training 3 Credits

This course explains the processes involved in selecting and training employees. With regards to selection, specific examples include, evaluating applicant credentials, administering pre-employment tests and complying with equal employment opportunity legislation. With regards to training, topics include assessing the need for training, designing effective training programs, utilizing methods such as technology to deliver training, and evaluating the effectiveness of training programs.

Prerequisite(s): MGT 310.

HRM 316 Employee Compensation Systems 3 Credits

The goal of this course is to familiarize you with the common methods of compensation used by today's organizations and how these methods could be used to increase motivation, job satisfaction, and performance in the workplace. To accomplish this, we will first discuss the bases of motivation in the workplace. Next, we will then talk about the various compensation options and techniques and the strengths and weaknesses of each in maximizing motivation and performance in an organization.

Prerequisite(s): MGT 310.

HRM 333 Employee Engagement 3 Credits

Employee Engagement is commonly described as a focused passion and enthusiasm that employees bring to their work that produces high-quality performance and positive organizational outcomes such as enhanced firm reputation, customer loyalty, and profitability. In this course, students will explore the concept and value of Employee Engagement, and strategies for energizing an organization's workforce. Projects and activities will focus on the role of the Human Resource function in measuring employee attitudes, designing relevant interventions, and influencing a culture of engagement.

Prerequisite(s): MGT 310.

HRM 441 Sel. Topics: Human Res Mgt 3 Credits

Deals with one area of study in the field of human resource management such as protective labor legislation, mediation and arbitration, the administration of labor unions, or case problems in human resource management. The topic varies each semester and is announced at the time of registration.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or HRM major elective.

Prerequisite(s): MGT 310 or permission of instructor.

HRM 491 Internship 1-4 Credits

Provides the student with the opportunity to supplement and apply human resource management coursework in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing work experiences. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

Prerequisite(s): Junior or Senior; Major in human resource management and MGT 310; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

HRM 492 Internship in Human Res Mgt 3 Credits

Provides the student with the opportunity to supplement and apply their human resource management classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions. 2.75 GPA overall and 3.0 GPA in the major is required.

Prerequisite(s): major in human resource management or management and leadership, and MGT 310; senior status; and permission of instructor.

Integrated Sciences (SCI)

SCI 480 Science Seminar Series 1 Credits

A companion 1 credit pass/fail seminar series to the Science Seminar series. Students in this class will critically evaluate journal articles in multiple scientific disciplines suggested by speakers and discuss them with peers and faculty mentors.

Integrated Sciences and Math (ISM)

ISM 100 Introduction to the Integrated Sciences and Math 4 Credits

Traditional lectures and laboratory experiences are blended to encourage students to begin asking questions and designing experiments to learn about the physical, life, and Earth sciences. This is the entry-level course for the integrated sciences and math major, though it is open to all students who want to actively explore the nature of science. Two three-hour combined lab/lecture sessions per week.

ISM 410 Seminar in the Integrated Sciences and Math 3 Credits

As a senior seminar course, class discussion, presentation, and participation will be emphasized. Science topics covered will extend beyond the range of a single science discipline. Students will evaluate articles (from popular science magazines, newspapers, etc.) to discern the connections among various scientific disciplines. Students will present written critiques of the articles focusing on the proper use of the scientific method, data analysis techniques (e.g., statistics, mathematics, etc.), and on the plausibility of the interpretations. Students will also present a semester-long project (both written and oral) that focuses on the connections among disciplines of a scientific issue.

Prerequisite(s): ISM 100, senior standing, or permission of instructor.

Interdisciplinary Studies (IND)

IND 101 Introduction to Education 3 Credits

High School Partnership introduces high schools students to the teaching profession through four main tenants: growth and development of learners, history, structure, and trends in teaching, classroom instruction, and analysis and reflection. Facilitated by their teacher-mentors (instructors of the course), students will work in small groups to learn about the development and structure of the American education system, explore careers in the teaching profession, analyze ways a teacher's personality, disposition, and cultural competence impact how students learn, and observe, develop, implement, and evaluate lesson plans and teaching strategies. Students will have the opportunity to explore the various joys and challenges of teaching diverse learners in today's classrooms along with an opportunity to examine their own motivations of why they wish to pursue the teaching profession.

IND 133 Creativity: Edu & Psych Persp 3 Credits

This course will examine both psychological and educational research about creativity. It will consider the various definitions of creativity that have guided research and theory; compare current theories of creativity in the fields of education and psychology, including cognitive, personality, and motivational theories; review research regarding what has been termed the "dark side" of creativity, including possible links to mental illness; and consider if and how schools and colleges might include creativity in admissions and promote creativity among students.

IND 200 Study Away 3-17 Credits

Study Away programs are domestic, off-campus programs that enable students to engage in experiential learning complemented by academic credit-bearing coursework at an accredited institution.

Prerequisite(s): 2.5 GPA, sophomore standing or above, and permission of Dean required.

IND 210 Global Encounters 3 Credits

This course provides students with an exposure to foreign cultures consisting of both travel and study components. Destinations may include countries in Europe, Latin America, or Asia. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political, and aesthetic cultural components appropriate to the location(s) visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. A travel fee is required. No foreign language skills are required unless otherwise indicated.

IND 233 The Development of Children's Imagination 3 Credits

The Development of Children's Imagination will introduce students to key theories and research in developmental psychology related to the development of children's imaginations. It will focus especially on children's literature and how experiences with fiction in a variety of media influence the development of children's imaginations. Students will be introduced to relevant theory and research from the fields of developmental psychology and children's literature in class meetings at Rider University on weekends during Spring Term and use Disney World as a "laboratory" in which to apply developmental theory in a real-world context soon after Commencement.

IND 252 Cultural Transition: From China to U.S. 3 Credits

The primary purpose of this course is to help Sanda students adapting to American culture and college life at Rider. As a sequenced two-semester course, it will introduce students to a number of carefully selected intercultural theories/concepts that best explain major differences between Chinese and American culture and communication. In addition, this course is also designed to help Sanda students improving both oral and written communication in English. During the course, each Sanda student will be paired with a Rider student who takes Chinese language classes his or her study partner. This partnership is meant to be mutually beneficial to both Sanda and Rider students. Through their interaction, they can help each other to learn about their respective target languages and cultures. They will also be assigned a final project, such as a radio show or a presentation at the cultural event on campus, which will illustrate their effective collaboration and their understanding of each other's language and culture.

IND 300 Supervised Study 1-4 Credits

Juniors and seniors in good academic standing who, for reasons beyond their control, find that a required course has not been scheduled before they expect to graduate, may receive permission from a faculty sponsor, the chairperson, and the dean to register for a supervised study. Appropriate forms (available in the dean's office) must be completed and approved no later than the last day to add courses for the semester in which the supervised study is to be undertaken.

IND 316 Nature's Business 3 Credits

This interdisciplinary, team-taught, experiential learning course brings together various science, liberal arts, and business perspectives in examining the relationships among biological, social, environmental, economic, geological, and political issues. Topics to be discussed and researched by students can include, but are not limited to, ecotourism, sustainable development, biodiversity, local and regional environmental and historical geology, cultural norms, and the legal and political systems of the country being visited. The study tour component of the course provides students with a first-hand opportunity to observe and record field data from settings outside of the United States and in their discipline of interest. Typically, there are approximately 12 hours of pre-trip lectures, seminars, and/or faculty/student presentations during the fall semester, an international study tour, 9-14 days in length, during January (exact dates and length depend on the international location), and approximately three hours of post-trip meetings, seminars, and student presentations during the spring semester. Students enroll in the course during the spring semester. Note: This course is cross-listed as CBA 316; Students may not get credit for both CBA 316 and IND 316. For Business students who take the course as CBA 316, the course will count as a business course. If taken as IND 316, the Business student will receive credit as a liberal arts and science course.

Prerequisite(s): Permission of Instructor.

IND 350 The Rider Shadow Experience 1 Credits

The Rider Shadow Experiences provides students with the opportunity to gain hands-on experience in a professional setting connected to their academic goals and career plan. The Shadow Experience helps students connect classroom learning to real-world applications and build mentoring relationships and networking skills. Students must have a GPA minimum of 3.0 and submit an application with at least one letter of recommendation from a member of the Rider Faculty. IND 350 is a pass/fail course.

Prerequisite(s): This course is open to students with 45 or more completed credits.

IND 381 Training Residence Educ I 1 Credits

The focus of this course will be on the basics duties and skills of the resident advisor position. The skills introduced in this course will be used in their role as a resident advisor and will also enhance their everyday lives. Participation in shared learning experiences will be part of this course.

IND 382 Training Residence Educ II 1 Credits

This course builds upon the skills learned in IND 381, providing continued support and training for students to become successful resident advisors or house managers. Students will gain a greater understanding of the RA/HM position through the discussions and written reflection on their job experiences. Out of class readings will be used to reinforce the basic policies and procedures they have learned, as well as emphasizing the types of personal characteristics that will allow one to excel in the position. Participants are exposed to leadership content that deals with concepts such as diversity, teamwork, critical thinking, ethical decision making, and peer leadership.

IND 383 Training Residence Educ III 1 Credits

A reinforcement of the skills learned in IND 382 through discussions and written reflections of job experiences. Basic policies, procedures and leadership characteristics will be emphasized. Students will further examine the various concepts of diversity, teamwork, critical thinking, ethical decision making and peer leadership.

IND 398 The Co-Operative Experience Seminar 3-6 Credits

This course will typically meet one day per week during the co-operative experience. The seminar is designed to expose participants to appropriate interdisciplinary content, ethical principles, professionalism, group and organizational behavior, interpersonal communication skills, critical thinking and problem solving skills. Students may be assessed on presentations, papers, journals and other measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organizational representative of the placement site, and the student. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. Contact the appropriate department for additional information. Must have a 2.75 GPA at time of registration. Prerequisite(s): junior standing.

Corequisite(s): (dept) 399 The Cooperative Experience; IND 398 and (dept) 399 combined cannot exceed 15 credits.

IND 403 New Literacy for New Learning 3 Credits

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid (a mix of online and face-face meetings) course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for our own work as readers and writers across the varied disciplines and social and professional settings in which we engage as well as how we make sense of the information that streams across our bound books, our digital devices, and our visual landscapes. What counts? What doesn't? How do we decide? Is the 21st century digital context in which we are situated shaping literacy differently than before the information explosion?

IND 490 Independent Study: Research and Creative Expression 3 Credits

Students who wish to pursue special topics that they have become interested in as a result of course work may take up to 12 semester hours of independent research and study toward graduation. To be eligible for independent research and study, however, a student must be a junior or a senior in good academic standing. Only one project can be scheduled in a semester, and for no more than four semester hours. Each independent research and study proposal must be approved by a faculty sponsor, the department chairperson, and the dean of liberal arts and sciences by no later than the third week of the semester in which the project is to be conducted.

International Study (INT)**INT 314 Study Abroad 12-18 Credits**

Study Abroad options available to students through Rider study abroad agreements include a wide variety of academic locations and courses. Programs may include opportunities for intensive language study as well as courses in other academic disciplines that may include the local culture, literature, art, music, history, or politics of the site selected for study. Some sites provide courses taught in English. Students may be approved to enroll in Study Abroad for a semester, summer session, or a full year. Additional information is available from the study abroad office.

Prerequisite(s): 2.5 GPA; sophomore standing or above.

INT 315 Study Abroad 12-17 Credits

Study Abroad options available to students through Rider study abroad agreements include a wide variety of academic locations and courses. Programs may include opportunities for intensive language study as well as courses in other academic disciplines that may include the local culture, literature, art, music, history, or politics of the site selected for study. Some sites provide courses taught in English. Students may be approved to enroll in Study Abroad for a semester, summer session, or a full year. Additional information is available from the study abroad office.

Prerequisite(s): 2.5 GPA; sophomore standing or above.

INT 316 Study Abroad 1-14 Credits

Study Abroad options available to students through Rider study abroad agreements include a wide variety of academic locations and courses. Programs may include opportunities for intensive language study as well as courses in other academic disciplines that may include the local culture, literature, art, music, history, or politics of the site selected for study. Some sites provide courses taught in English. Students may be approved to enroll in Study Abroad for a semester, summer session, or a full year. Additional information is available from the study abroad office.

Prerequisite(s): 2.5 GPA; sophomore standing or above.

Italian (ITA)**ITA 100 Italian I 3 Credits**

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive and presentational communication skills as well as growth in cultural, literary and interdisciplinary knowledge as they move through a sequence of study. This course is the first part of the first year experience in Italian during which the development of communicative and cultural competencies are at the center of this experience. At the end of the course, successful students will be able to communicate short messages on highly predictable, everyday topics that affect them directly. They will also develop a sense of the cultural aspects of people who speak the target language. Cultural components include the importance or regions in the construction of Italian identity; differences in American and Italian school and university systems; the role of the family in Italian life. The course is conducted in Italian. This course fulfills LAS Core Curriculum Requirement I. Essential Competencies: Foreign Language.

ITA 101 Italian II 3 Credits

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive and presentational communication skills as well as growth in cultural, literary and interdisciplinary knowledge as they move through a sequence of study. This course is the second part of the first year experience in Italian during which the development of communicative and cultural competencies are at the center of this experience. At the end of the course, successful students will be able to handle successfully a variety of uncomplicated communicative tasks in straightforward social situations. They will also develop a sense of the cultural aspects of people who speak the target language. Cultural components include differences between American and Italian cuisines, sports, routines, and healthcare systems. The course is conducted in Italian.

Prerequisite(s): ITA 100 with a minimum grade of D or LL 145 with a minimum grade of C. This course fulfills LAS Core Curriculum Requirement I. Essential Competencies: Foreign Language.

ITA 200 Italian III 3 Credits

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive and presentational communication skills as well as growth in cultural, literary and interdisciplinary knowledge as they move through a sequence of study. This course is the third part of the four-semester sequence in Italian. At the end of ITA 200, successful students achieve proficiency in Italian at the intermediate level in oral expression, listening comprehension, reading of short texts, and writing. Students will be able to successfully navigate conversational and written Italian in cultural contexts related to course themes: personal relationships, Italian communities, hobbies and free time activities, the value of social and political ideas, the Italian family across the generations. The course is conducted in Italian. This course fulfills LAS Core Curriculum Requirement I. Essential Competencies: Foreign Language.

Prerequisite(s): ITA 101 with a minimum grade of D or LL 146 with a minimum grade of C.

ITA 201 Italian IV 3 Credits

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive and presentational communication skills as well as growth in cultural, literary and interdisciplinary knowledge as they move through a sequence of study. This course is the fourth and final part of the four-semester sequence in Italian. At the end of ITA 201, successful students achieve proficiency in Italian at the intermediate level in oral expression, listening comprehension, reading of short texts, and writing. Students will be able to successfully navigate conversational and written Italian in cultural contexts related to course themes: societal changes in Italian culture, science and technology, Italian contributions to the arts, media, and the culture of business in Italy. The course is conducted in Italian.

Prerequisite(s): ITA 200 with a minimum grade of D or LL 247 with a minimum grade of D. This course fulfills LAS Core Curriculum Requirement I. Essential Competencies: Foreign Language.

Latin American and Caribbean (LAC)**LAC 420 From Colonies to Nations 3 Credits**

This course consists of a panoramic survey of Colonial and Post-Colonial Latin American literature in light of the unique social, cultural and political history from the pre-Columbian to the Independence period (1825). The approach brings together vivid accounts of places and events, speeches, profiles, oral histories, excerpts from a wide range of literature, policy papers, and other readings. The analysis and discussion of selected literary works and representative films will show how Latin American and Caribbean artistic and creative endeavors express the social, cultural and political context of the Americas. Videos and films will provide the sights and sounds of this vast and vital region. Note: This course is cross-listed as LAC 420. Students may not get credit for both SPA 420 and LAC 420.

Prerequisite(s): SPA 201, or placement test at 300-level or above or SPA 300 or above.

Law and Justice (LAW)**LAW 140 Intro Seminar in Law & Justice 3 Credits**

Introduces students to the interdisciplinary study of law and justice. The seminar is designed to enable students to think critically about legal issues, address legal problems from various viewpoints, and apply different types of theories of justice to analyze laws and legal institutions. Students will learn to examine law and legal issues from a variety of perspectives and approaches: anthropological, historical, literary, philosophical, political, psychological, and sociological. Open to freshmen and sophomores only.

LAW 305 Trial Advocacy 3 Credits

Students will apply fundamental legal concepts and rules of evidence to specific cases. By engaging in trial simulations, students will evaluate various forms of evidence, identify legal principles and evidentiary rules that impact a criminal trial, learn about trial procedures, pursuit of case theories, and witness, exhibit and jury selection.

LAW 308 Conflict & Conflict Resolution 3 Credits

Focuses on understanding the meaning of conflict and strategies for its resolution. The course examines the ways conflict functions in various social contexts including professional, community, family, education, and international relations. Traditional models of adjudication will be compared to alternative forms of dispute resolution. Students will be introduced to research on the practice and effectiveness of various forms of conflict and conflict resolution. Students will participate in various class exercises, including role-plays, simulations, and case studies.

LAW 310 Cyberspace Law and Policy 3 Credits

Explores the legal and policy concerns raised by the Internet, nationally and globally. The course considers issues of legal regulation of the Internet, and consider the debate about whether cyberspace can or should be regulated. Attention will be given to the applicability of principles of law and models of regulation. Topics addressed will include jurisdiction, freedom of expression, intellectual property, privacy protection, safety concerns, equal access, electronic commerce, and computer crime.

LAW 355 Sports and the Law 3 Credits

Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. Note: This course is cross-listed as SPT 355. Students may not get credit for both LAW 355 and SPT 355.

LAW 395 Selected Topics in Law/Justice 3 Credits

Studies specialized areas of scholarship related to laws, legal institutions, legal or law-related occupations, and/or legal decision making. The course will provide an interdisciplinary examination of a selected topic. Topics vary and are listed in the course roster.

LAW 450 Law & Justice Senior Seminar 3 Credits

Draws on and develops students' knowledge and understanding of law and legal institutions and applies it to a specific legal topic, method, institution, or controversy. Topics will vary. Students explore the social, political, ethical, and economic issues relevant to the topic. Students will be expected to contribute to seminar discussions and to complete projects related to the seminar theme. Required for seniors in law and justice minor and open to others by permission of the Director of the Law and Justice Program.

LAW 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

LAW 491 Internship in Law and Justice 1-4 Credits

Provides supervised work experience in an institution, office, or agency related to law or law enforcement, such as courts, prosecutor/defense attorney offices, private law offices, state agencies, and local police departments. Students are expected to apply and broaden the knowledge obtained from law and justice minor courses to their fieldwork experience.

Prerequisite(s): 2.75 GPA and permission of the Director of the Law and Justice program.

LAW 496 Honors Thesis in Law & Justice 3-6 Credits

Entails substantial research and writing on a topic selected by the student. Proposals must be reviewed and approved by the law and justice program committee. Proposals must be submitted at least four weeks prior to course registration.

Prerequisite(s): Seniors in the minor with a minimum cumulative GPA of 3.25 and a 3.25 GPA in law and justice minor courses.

Leadership Development Program (LDP)**LDP 200 Foundations of Leadership 3 Credits**

This course provides students with a working model of leadership to guide their personal leadership development. It also exposes students to insights about leadership from respected commentators, scholars, and practitioners. Finally, it provides students with an opportunity to actively "do" leadership through experiential learning activities.

LDP 220 Service Learning Through Minding Our Bus 3 Credits

A community service mentoring project designed to promote leadership, teamwork, and entrepreneurship among Trenton youth through a school-based team mentoring model. Students will undergo intensive training in leadership skills, communication skills, team building skills, cultural diversity, small business entrepreneurship, and problems of early adolescent development prior to their fieldwork experience. Students will form teams to mentor groups of students at a Trenton middle-school in the creation and management of their own microbusinesses. Student journals, quizzes, field trips and class meetings will serve to organize and structure experiential learning.

Prerequisite(s): permission of instructor.

LDP 398 The Co-op Experience Seminar 3-6 Credits

This course will typically meet one day per week during the co-operative experience. The seminar is designed to expose participants to appropriate interdisciplinary content, ethical principles, professionalism, group and organizational behavior, interpersonal communication skills, critical thinking, and problem solving skills. Students may be assessed on presentations, papers, journals and other measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organizational representative of the placement site, and the student. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. Contact the appropriate department for additional information. **Prerequisite(s):** junior standing and 2.75 GPA at time of registration.

Corequisite(s): (dept) 399 The Co-operative Experience; LDP 398 and (dept) 399 combined cannot exceed 15 credits.

Liberal Studies (LIB)**LIB 200 Intro to Liberal Studies 3 Credits**

Introduces students to the various perspectives and methods of the disciplines in liberal studies: natural and social sciences, humanities, and the arts. Students learn the multifaceted questions and answers offered by each discipline. They study the historical development of the university and the rise and transformation of liberal studies disciplines.

LIB 400 Seminar in Liberal Studies 3 Credits

A critical examination of the tradition of Western humanism and the way it has been transmitted through liberal arts education. Deals with a variable set of permanent problems in humanistic debate and learning e.g., specialization, the need for unifying theories of knowledge, the purpose of history, the place of intellectual life in mass society, the meaning of freedom, the modern problem of alienation, the responsibilities of the university, etc. Emphasis on why and how such problems have been addressed rather than any presumptive solutions.

LIB 490 Independent & Supervised Study 1-4 Credits

Independent and Supervised Study is available to CCS students for special study projects. Students must have completed a minimum of 45 credits applicable to a Rider degree and a minimum of 12 credit hours at Rider with a GPA of 2.5 or better. Each project may be taken for one-four credits and a maximum of six credits may be applied to the associate degree, 12 credits to the bachelor degree.

Management and Leadership (MGT)**MGT 201 Fund Management & Org Behavior 3 Credits**

This course deals with the fundamentals of organizational behavior as they relate to management such as motivation, communications, and leadership. Behavior is examined at the individual, group, and organizational level. The management functions of planning, organizing, leading and controlling are addressed. The effects of global operations and the requirements of ethical behavior on managers are also explored.

Prerequisite(s): minimum 30 credits completed.

MGT 310 Intro to Human Resource Mgmt 3 Credits

This course deals with the nature of human resource management, its functions, procedures, and practices currently found in profit, non-profit and public sector organizations. Topics covered include recruiting and selection, training, human resource development, equal employment opportunity, performance appraisal, diversity, job analysis, compensation, and employee rights and discipline.

Prerequisite(s): MGT 201 or PSY 210.

MGT 320 Managing Workforce Diversity 3 Credits

Demographic shifts, changing patterns of labor force participation, global competition, and a growing cultural emphasis on the celebration of difference have all contributed to the creation of diversity as a hot topic in management. This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the United States today. We will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious- gender, race, age, and physical characteristics. Other differences are not as easily observed - family structure, educational level, social class, and sexual orientation. This class incorporates experiential learning techniques for personal growth.

Prerequisite(s): MGT 201 or PSY 210.

MGT 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 329L Research Methods: Org Psy Lab 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

MGT 336 Career Management 3 Credits

How careers are shaped by individual needs and experience and assisted by organization systems and practices is the focus of this course. The meaning of work and the development of careers are discussed, and students undertake self-assessment for the purpose of career planning. Careers are examined in the context of important changes occurring today in the world of work. The impact of the executive, organizational counselors and trainers, and the educational system upon the development of human potential is examined, along with the techniques for human resource planning and development.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 346 Negotiation 3 Credits

The purpose of this course is first, to explore the major concepts and theories behind effective negotiating practices and second, to develop negotiating skills applicable to a wide range of contexts. A knowledge of negotiation is a crucial requirement for anyone interested in a business career since it is a common mechanism for implementing change and for resolving conflict in the workplace. Topics will include two-party negotiations, power and politics, mediation, arbitration, and collective bargaining. A variety of teaching techniques will be used including readings, discussion, and role-playing.

Prerequisite(s): MGT 201 or permission of the instructor.

MGT 355 Team Management 3 Credits

This course prepares students to work in organizations that use teams as an integral part of their functioning-an increasingly common practice. The class involves intensive group interaction, focusing on individual growth in group settings. Working with other students in role-plays, exercises, and team assignments allows the student to develop better communication and leadership skills.

Prerequisite(s): MGT 201 or PSY 210.

MGT 363 Management Skills 3 Credits

The focus of this course is on specific skills necessary for success in a management role. These skills include leading, communicating effectively, delegating, conflict and time management and motivating others. Students will have opportunities to practice skills and to apply their knowledge to business cases.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 375 International Management 3 Credits

This course explores the ways in which culture impacts management practices and organizational behavior and dynamics. Topics include cross cultural communication, expatriate selection and training, leading and motivating cross cultural teams, developing organizational strategies to compete in a global market place, international business ethics, and current topics.

Prerequisite(s): MGT 201.

MGT 410 Ethical Management 3 Credits

Managers today face a broad range of ethically challenging situations. This course will help students to confront and analyze ethical dilemmas effectively in the workplace. Cases, simulations, hands-on content will engage students with the material, and will generate robust class discussion.

Prerequisite(s): Completion of MGT 201 and Leadership Requirement course.

MGT 421 Sel Topics:Mgt & Organztn Behv 3 Credits

The seminar focuses on an area of study announced at the time of registration (students should check the registration material). Examples of possible topics are: leadership, motivation, and organizational behavior research. Prerequisites vary according to the topic and are listed in the registration material.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 450 Advanced Leadership 3 Credits

Leadership is the ability to influence a group of people towards a goal. In this course, students will increase their own leadership capacities so that they can become effective leaders of organizations and teams. They will integrate what they have learned from their experience and other coursework with diverse reading and writing assignments and team projects as they explore complex leadership issues related to vision, communication, motivation, ethics, team dynamics, power, and change management.

Prerequisite(s): MGT 201; Leadership elective (LDP 200, LDP 220, LDP 398, MGT 355, MGT 363).

MGT 490 Independent Research and Study 1-4 Credits

Topic to be approved in advance by supervising instructor, chairperson, and academic dean. Available for juniors and seniors. No more than 12 credits allowed toward graduation, and can be used as free elective or MGT major elective.

Prerequisite(s): MGT 201 or permission of instructor.

MGT 491 Intern Management/Org Behavior 3 Credits

Provides the student with the opportunity to supplement and apply their management and leadership classroom work in a supervised employment setting with participating companies. Requirements include a journal with a log of daily activities and a paper summarizing their experiences submitted to the internship supervisor. Students will receive a letter grade based upon their internship performance, as well as their performance on the journal and final paper submissions.

Prerequisite(s): major in management and leadership or human resource management and MGT 363, or senior status; Requires a 2.75 GPA overall and 3.0 GPA in the major and permission of the instructor.

Management Science (MSD)**MSD 104 Intro to Quantitative Methods 3 Credits**

The aim of this course is to give students the preparation in algebra needed for successful completion of other required courses in management sciences and the functional areas of business administration. Topics covered include linear and quadratic equations and functions, systems of linear equations, exponential functions, logarithms, linear inequalities, radicals, percent change, scientific notation and scientific digits.

MSD 105 Quantitative Methods for Business 3 Credits

The aim of this introductory course is to acquaint students with a number of basic mathematical techniques that will enhance their ability to become effective decision-makers in a realistic business environment. Topics covered include linear equations and inequalities, linear programming, summation notation, geometric series, counting techniques, event probability and discrete random variables. Where appropriate, these tools will be illustrated with examples chosen from business settings.

Prerequisite(s): MSD 104 or a passing grade on the Math Placement Exam.

MSD 110 Math for Actuarial Science I 3 Credits

The first of two courses designed to give the actuarial science student the necessary background in calculus. Topics include a brief review of a function, and introduces limits and continuity, the derivative and its applications, implicit differentiation, differentiating an inverse function, differentials, related rates, curve sketching, optimization problems, L'Hopital's rule, and an introduction to the indefinite integral. Fall.

MSD 111 Math for Actuarial Science II 3 Credits

A continuation of MSD 110. Topics include the definite integral and the fundamental theorem of calculus, change-of-variable theorems, the area between two graphs, integration by parts, improper integrals, infinite series, partial differentiation of a function of two variables and its optimization applications, and the double integral of a function of two variables.

MSD 205 Business Statistics 3 Credits

This course is designed to provide students with fundamental concepts, knowledge and tools from statistics that may be useful in one's attempt to reach intelligent conclusions in real-world settings, particularly in business applications. The focus is on the normal random variable, sampling distributions, framework of estimation and hypothesis testing, as well as the one-way ANOVA and simple regression model.

Prerequisite(s): MSD 105.

MSD 301 Operations Management 3 Credits

This course introduces students to the concepts and techniques necessary to manage firm operations. The course emphasizes enhancing students' ability in problem-solving and decision-making by (1) identifying operations problems, (2) structuring decision-making process, (3) evaluating options that provide resolution of the problems using appropriate and proven techniques. It is well recognized that today's global business competition is among supply chains. Operations management concentrates on the supply side of the corporate strategy of a supply chain, where the bulk of the organization resources are committed. Good management of operations, which may also be called management of supply chain operations, is crucial in achieving an effective supply chain. The emphasis on systematic thinking and analytic decision model discussed the course will also provide students with necessary skills and useful tools in the emerging field of Business Analytics.

Prerequisite(s): MSD 200 or MSD 205 or MTH 341.

MSD 320 Statistics for Risk Modeling I 3 Credits

This is the first course in a two course sequence to prepare actuarial science students for the Society of Actuaries' (SOA) new exam "Statistics for Risk Modeling." This course (SRM I), together with the second course of the sequence SRM II, cover all the topics in the SOA's proposed syllabus for the exam. The course covers two major topics: (i) Generalized Linear Models, and (ii) Regression-based time series models and forecasting.

Prerequisite(s): MSD 205 or MTH 341.

MSD 325 Statistics for Risk Modeling II 3 Credits

This is the second course in the two course sequence to prepare actuarial science students for the Society of Actuaries (SOA) new exam "Statistics for Risk Modeling." This course, together with MSD 320, will cover all the topics in the SOA's proposed syllabus for the exam. This course examines the use of statistical learning methods to adequately model and understand complex datasets in business and economics. The use of the statistics software R to analyze realistic data sets is an important component of the course. Topics include: (i) Basics of Statistical Learning; (ii) Principal Components Analysis; (iii) Decision Trees; and (iv) Cluster Analysis.

Prerequisite(s): MSD 205 or MTH 341 or equivalent course.

MSD 350 Financial Mathematics 3 Credits

A thorough treatment of the theory and applications of compound interest. Topics include the measurement of interest, elementary and general annuities, amortization schedules and sinking funds, and bonds and other securities.

Prerequisite(s): MSD 205 or equivalent. Fall.

MSD 490 Independent Research and Study 3 Credits

Topic to be approved by professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation.

MSD 491 Summer Mgt Sciences Internship 3 Credits

An honors course that provides the student with approximately two months of supervised employment with participating companies. Students are given a variety of work experiences. They are required to complete a term paper and to make an oral presentation to the faculty. Grading is on a pass/fail basis.

Prerequisite(s): Permission of instructor.

Marine Sciences (MAR)

MAR 120 Oceanography 3 Credits

In this course, students will investigate the geological, chemical, physical, and biological processes that shape the ocean. Emphasis will be placed on how these processes interact with each other and with human populations. These interactions influence important global phenomena that impact all our lives, including weather and climate, the distribution of marine organisms and other natural resources, and coastal processes. Understanding these phenomena will enable students to make more informed decisions and contribute to serious global marine issues. Students will learn through a combination of hands-on exercises designed to foster a deeper understanding of the scientific content as well as the scientific process, practical experiences with real data, readings, and some lectures. CLAS general education areas addressed: DP & GP.

MAR 121 Introductory Oceanography Lab 1 Credits

This lab course introduces students to the fundamental aspects of geological, chemical, physical and biological oceanography. Students learn through inquiry-based, hands-on exercises and activities using actual data collected in the lab and in the field. Independent projects and local field trips during lab and on weekends may be required. One three-hour lab per week. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): MAR 120 or GLS 120 or as prerequisite(s).

MAR 210 Marine Life through Time 4 Credits

Survey of the important developments in marine life over the last three billion years from the Pre-Cambrian evolution of one-celled organisms, through the Cambrian explosion of complex marine invertebrate life and subsequent diversification of backboned organisms in the Ordovician time, to the colonization of marginal marine and freshwater habitats in the Silurian-Devonian geological periods, and ultimately to extinctions during global crises of the late Devonian, Permian, Triassic, Cretaceous, and Pleistocene time intervals. The emphasis is on evolutionary adaptive breakthroughs within each phylum, particularly the significant morphological and anatomical innovations, and the subsequent radiation of these higher taxa into new habitats and niches through geologic time. Three hours of lecture and one three-hour lab per week.

Prerequisite(s): GEO 100 & GEO 102; or GEO 113 & GEO 102 (can be signed in to take 102 with 113); or BIO 115; or BIO 116; or permission of instructor.

MAR 210L Marine Life through Time Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. **Corequisite(s):** MAR 210.

Prerequisite(s): GEO 100 & GEO 102; or GEO 113 & GEO 102 (can be signed in to take 102 with 113); or BIO 115; or BIO 116; or permission of instructor.

MAR 290 Directed Research and Study in Marine Sciences 1-4 Credits

Provides an opportunity for freshman and sophomore students to gain hands-on research experience in the marine sciences. This is an individual program of study and each student will work with a selected faculty member on a topic of mutual interest. The course consists of a combination of project meetings, supervised research, and guided readings. The focus will be on formulating research questions, designing and conducting experiments, collecting the necessary data, reviewing the scientific literature as it relates to each student's research topic in a weekly meetings with the instructor, and communicating the findings by writing a final project report.

MAR 300 Introduction to Field Marine Science 4 Credits

In this two-week field course, students will explore various topics in marine science through practical, hands-on, inquiry-based exercises and activities. The course will focus on the biological, geological, chemical, and physical processes that influence diverse marine flora and fauna found in selected marine environments, emphasizing shallow subtidal and intertidal environments such as coral reefs, sandy beaches, turtle grass beds, rocky intertidal pools, coastal wetlands, mangrove swamps, etc. Topics will be examined using field team exercises, a group mapping project, and individual research projects. Activities will help students develop their skills in research, use of field and laboratory equipment, computer analysis of data, and scientific writing, along with gaining content knowledge about the components and processes of environments studied. The course is taught at an appropriate marine field station at a U.S. or international location. Field portion of course is completed during the summer. Additional travel costs vary, depending on location.

Prerequisite(s): BIO 115 or 116 or any 200 or higher level lab science class; and MAR 120; and permission of instructor.

MAR 325 Marine Vertebrates 4 Credits

A survey of the biology of marine vertebrate animals, including fish (jawless fish, sharks, rays, and bony fish), reptiles (sea turtles and sea snakes), sea birds, and mammals (manatees, seals, and whales). The evolution, physiology, natural history, ecological relationships, and human interactions of these groups are emphasized. Three hours of lecture and one three-hour lab per week. Field trips may be required. **Prerequisite(s):** BIO 272 and BIO 272L.

Corequisite(s): MAR 325L.

MAR 325L Marine Vertebrates Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 325.

MAR 330 Chemical Oceanography 4 Credits

Introduction to the chemical aspects of the oceans and their influence on marine ecosystems and Earth processes. Emphasis is placed on chemical and physical properties of seawater, atmosphere-ocean interactions, biogeochemical cycles with marine components, production and destruction of marine organic matter, chemical ecology, and marine pollution. During the lab portion of this course, students gain hands-on experience in analyzing ocean water samples, experimental design, and interpreting marine chemical data. Three hours of lecture and one three-hour lab per week. Weekend field trips and independent projects may be required. **Prerequisite(s):** CHE 120, CHE 121, MAR 120, and MAR 121; or permission of instructor.

Corequisite(s): MAR 330L.

MAR 330L Chemical Oceanography Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 330.

MAR 340 Marine Processes and Environments: Seminar 3 Credits

This course is designed as a seminar course. Therefore, students will learn to lead class discussions, to analyze and critique peer-reviewed journal articles, and to enhance their presentation skills. Students will interpret graphical, spatial, and numerical data to support their positions. Content will emphasize the interactions among marine processes, biological features, and geologic landforms.

Prerequisite(s): MAR 120 or GEO 100; GEO 306.

MAR 360 Plankton Ecology 4 Credits

Examines the diversity, physiology, and ecology of marine phytoplankton and zooplankton. Students will survey the dominant plankton groups, their distribution, nutritional requirements, growth kinetics, and behavior. Planktonic predator/prey interactions and food web dynamics will be discussed. Students will also examine the interdisciplinary nature and role of plankton in biogeochemical cycles. Three hours of lecture and one three-hour lab per week. Weekend field trips may be required. Prerequisite(s): MAR 120 and MAR 121; or BIO 116.

Corequisite(s): MAR 360L.

MAR 360L Plankton Ecology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 360.

MAR 380 The Learning and Teaching of Marine Science 4 Credits

This field-based course provides a practical experience in integrating marine science with pedagogical concepts. Students will use scientific methodology to explain marine ecosystems through specially designed, inquiry-based exercises. During these activities, students will address the process of applying college-level content to their own classroom settings, considering national and state standards. Hands-on, field-based exercises will provide experience with a diversity of marine habitats and the biological, geological, hydrological, and physical processes that influence them. Visited habitats can include rocky intertidal, salt marsh, tidal flat, beach and channel sand bars. As a result, students will develop field and laboratory skills in marine science and use them in designing materials for their own classroom use.

MAR 401 Marine Ecology 4 Credits

The purpose of this course is to introduce students to fundamental principles in ecology, as it relates to marine systems. Topics include the marine environment and its influence on the organisms living there; biodiversity and speciation; factors regulating population dynamics in marine systems; larval and fisheries ecology; species interactions such as predation, competition, and symbiosis; factors regulating productivity and energy flow in marine systems; and marine conservation. Hands-on laboratory exercises will provide students with the opportunity to design and conduct experiments related to marine ecology, and to collect, analyze, and interpret data from those experiments. Ecosystem modeling will also be introduced. Three hours of lecture and one three-hour lab per week. Weekend field trips may be introduced. Prerequisite(s): BIO 272, BIO 272L.

Corequisite(s): MAR 401L.

MAR 401L Marine Ecology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): MAR 401.

MAR 410 Physical Oceanography 3 Credits

Introduction to the physical aspects and processes of the oceans and their influence on marine ecosystems and Earth processes. Topics include distribution of salinity and water temperature and their effect on water movement, the oceanic heat budget, atmospheric and oceanic interactions, ocean currents including surface and deep water circulation, waves, tides, and medium- to small-scale circulation features. Throughout the course, emphasis is placed on how these physical processes affect the biology and chemistry of the ocean. Three hours of lecture per week. Weekend field trips may be required.

Prerequisite(s): MAR 120.

MAR 480 Senior Thesis 3 Credits

A senior thesis is optional for marine sciences majors. However, a senior thesis is required for eligibility to graduate with honors in marine sciences. The topic for investigation will be chosen by the student in consultation with the faculty of the Department of Geological, Environmental, and Marine Sciences. The student must initiate consideration of a proposal to the Department. The proposal must contain a discussion of the proposed project and a timetable to be followed in the study. A departmental committee consisting of a major and minor advisor will evaluate the written paper submitted at the conclusion of the study or other approved venue. An oral presentation before the department at the conclusion of the semester in which the study is completed is required. Proposals must be submitted in final form no later than the end of the ninth week of the semester prior to the semester in which the study is undertaken.

Prerequisite(s): senior standing in the marine sciences major and permission of department chair.

MAR 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in field or laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

MAR 491 Internship in Marine Sciences 1-4 Credits

A supervised work experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placements may be in private, public, non-profit, or governmental organizations. These can include consulting firms, regulatory agencies, advocacy groups, and educational or research institutions. Normally, 50 hours of internship per credit is required. A mutually agreed upon method of evaluation will be formalized prior to the approval of the internship by the sponsoring faculty and could include a term paper or project report and a poster presentation.

Prerequisite(s): 2.5 GPA and permission of instructor.

Marketing (MKT)**MKT 200 Marketing Principles 3 Credits**

This course examines market characteristics, consumer buying habits and motives, and functions of marketing within the framework of the strategic marketing planning process. Concepts and current practices in product development, pricing, promotion, distribution, and international marketing are studied.

Prerequisite(s): 15 credits.

MKT 205 Advertising Principles 3 Credits

Basic theory, functions, principles, and applications of advertising are the focus of this course. The relation of advertising to our economy, the advertising department and the ad agency, selection of media, advertising practices, and the use of research to improve advertising techniques are covered.

Prerequisite: MKT 200.

MKT 250 Retailing Management 3 Credits

The principles underlying successful retailing are analyzed within the framework of the strategic-planning process. Topics covered include location, merchandise planning, customer service, image, atmosphere, layout, pricing, promotion, personnel and operations management.

Prerequisite(s): MKT 200.

MKT 260 Service Marketing 3 Credits

Focuses on the unique challenges of managing services and delivering quality service to customers. Emphasis is placed on the total organization, and how effective marketing and customer focus must be coordinated across multiple functions. The course is applicable to service organizations and to organizations that depend on service excellence for competitive advantage. Topics include customer-focused management, and customer satisfaction, retention, lifetime value and profitability. Students will learn to map services, understand customer expectations, and develop relationship marketing strategies.

Prerequisite(s): MKT 200.

MKT 280 Sports Marketing 3 Credits

The course focuses on the unique challenges of marketing sports at a variety of levels: youth, college, professional, and international. The challenges of attracting and retaining fans and participants as well as of building and maintaining strong brand identity are at the heart of the course content. By evaluating case studies and examining current issues in sports marketing, students will gain an understanding of what it means to be a professional marketer of a sports organization and/or event.

Prerequisite(s): MKT 200.

MKT 310 Business to Business Marketing 3 Credits

This course examines the business-to-business marketplace, and the planning and control tools used by its entities in managing the product, pricing, promotion, channel and supply chain management strategies.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 320 Consumer Behavior 3 Credits

The nature and determinants of consumer behavior are studied, with attention given to the influence of socio-psychological factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumer attitudes, consumption patterns, and purchasing behavior.

Prerequisite(s): MKT 200.

MKT 330 International Marketing 3 Credits

This course examines the global marketplace and the complexities of its environmental influences, and necessary adaptations in formulating the strategies for product, pricing, promotion, channel and supply chain management.

Prerequisite(s): MKT 200; 30 credits completed.

MKT 340 Personal Selling 3 Credits

Examines persuasive techniques utilized in sales presentations conducted on a person-to-person basis. Major course emphasis is on developing effective selling techniques; understanding the company, its products and the role of the salesperson in implementing product/market strategies; understanding the customers and the selling environment; application of effective sales presentation techniques; recognizing selling opportunities and careers.

Prerequisite(s): MKT 200; 30 credits completed.

MKT 345 Customer Focus 3 Credits

Marketing supply chain management programs are concerned with the creation and delivery of value to customer and organizations. No longer simply the domain of the warehouse manager or logistics director, supply chain management is viewed by most companies as a mission-critical element. Marketing focuses on developing an understanding of customers and markets, creating products and services based on that understanding, and communicating and delivering the value added. This course will teach the student the essential role of marketing in all aspects of successful supply chain management - relationship management, technological and financial - and it will help the student understand the structure, functions, principles and methods employed in discovering and translating consumer needs and wants into product and service specifications and then transferring these goods and services from producers to consumers or end users.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 350 Retailing Management 3 Credits

The principles underlying successful retailing are analyzed within the framework of the strategic-planning process. Topics covered include location, merchandise planning, customer service, image, atmosphere, layout, pricing, promotion, personnel and operations management.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 366 Marketing Research 3 Credits

Topics include specific research procedures in gathering, processing, analyzing, and presenting information relevant to marketing problems: advertising planning and effectiveness; product development; distribution channels; sales techniques; consumer behavior; and forecasting. Student learning about research planning, implementation, and interpretation is facilitated by the use of projects or cases.

Prerequisite(s): MKT 200 and MSD 205; junior standing.

MKT 367 Marketing Web Analytics 3 Credits

This course teaches web analytics through practical applications with a focus on deriving actionable insights. It provides a broad overview of key web analytics strategies, concepts, issues, challenges and tools. Topics covered include: • How to choose a web analytics tool • Metrics and key performance indicators • Best ways to analyze effectiveness of blogs, marketing campaigns, SEO, SEM and emails • How to utilize quantitative, qualitative and competitive tools to derive actionable insights • How to optimize web sites by incorporating testing and experimentation • Analytics in social, mobile and video • Best practices and pitfalls in web analytics.

Prerequisite(s): MKT 200; junior or senior standing.

MKT 369 International Advertising 3 Credits

This course introduces students to the general landscape of international advertising with emphasis on understanding the opportunities and challenges entailed in international advertising management. The course will cover the subject from three aspects, including the international advertising environment, the international advertising industry, and international advertising strategies.

Prerequisite: MKT 200; 30 credits completed.

MKT 370 Internet Marketing 3 Credits

This course emphasizes the discipline of internet marketing, including practices of leading online marketing companies, state of the art online research and demonstrates how the Internet is creating value for customers and profits for businesses while also fitting into a firm's complete marketing strategy. This course will provide a strategic and tactical toolkit for the online marketer, help students understand how and why the Internet is changing traditional marketing and allow students to develop the skills, strategies and tactics important to develop successful Internet marketing plans.

Prerequisite(s): MKT 200 and CIS 185; junior & senior standing.

MKT 375 Digital Advertising and Social Media 3 Credits

This course surveys the concepts, principles, practices and industry standards of digital advertising, including standard display and rich media advertising, search advertising, email advertising, game advertising, and mobile advertising. It also introduces the strategies and tactics in social media marketing. The course emphasizes a strategic, holistic view of digital advertising and social media as marketing communication tools that are situated in the marketing strategic framework and employed to engage consumers in community building.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 380 Health Care Marketing 3 Credits

The purpose of this course is to introduce students to the role, functions and tasks of healthcare marketing. Attention is devoted to applying basic marketing principles to the healthcare sector. Marketing decision making and analysis will be emphasized through the use of cases and current readings that focus on a variety of healthcare organizations, including hospitals, assisted living facilities, MCOs, and pharmaceutical companies.

Prerequisite(s): MKT 200; junior & senior standing.

MKT 435 Advertising Campaigns 3 Credits

This capstone course for advertising majors provides an opportunity for students to plan comprehensive advertising campaigns. Coverage includes segmentation research, creative development of the campaign, media planning, and determining advertising effectiveness. Integration of advertising into the marketing program will be emphasized.

Prerequisite(s): MKT 205 + additional 9 credits from the Marketing courses for the Advertising Concentration; senior standing.

MKT 440 Sales Management 3 Credits

By means of lectures, discussions, and case studies, the field of marketing management is analyzed from the viewpoint of sales executives. The responsibilities for planning and administering personal selling operations are emphasized. Considerable attention is given to other activities for which sales executives may be wholly or jointly responsible, such as decision making on promotion and brand management.

Prerequisite(s): MKT 200 and senior standing.

MKT 444 Special Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations, as well as special applications of marketing decision-making, may be explored. Readings, research, lectures, discussions, or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): MKT 200; any additional prereqs requested by the instructor.

MKT 460 Marketing Management Seminar 3 Credits

This capstone course for marketing majors employs a top management approach to the overall marketing task, including planning, organizing, controlling, and integrating all the activities of the marketing program. Integration of marketing with other operations of the business unit is emphasized. Major problems and current trends are identified and analyzed through case discussion. Required for marketing majors.

Prerequisite(s): 15 Marketing credits, senior standing.

MKT 469 Selected Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision making may be explored. Readings, research, lectures, discussions, or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): MKT 200 and senior standing.

MKT 490 Independent Research and Study 1-4 Credits

Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

MKT 491 Internship-Based Indep Study 3 Credits

Provides the student an opportunity to supplement and apply classroom work in supervised employment with participating marketing and advertising firms. Requirements include a journal with a log of daily activities, and a project or term paper presented to and evaluated by the internship sponsor. Evaluation will also include a report by the company on the intern's performance. Credits may be used to satisfy business or free elective requirements.

Prerequisite(s): permission of instructor.

Mathematics (MTH)

MTH 100 Intermediate Algebra 3 Credits

This course prepares science and mathematics majors for college level mathematics courses. Topics include linear and absolute value equations and inequalities, quadratic and polynomial functions and their graphs, rational and radical equations, and systems of linear equations. This course does not fulfill the mathematical reasoning requirement of the CLAS general education curriculum.

MTH 100S Math Skills Lab 1 Credits

The Math Skills Lab helps science majors master arithmetic and elementary algebra necessary for college level mathematics courses. Students are required to attend regular class sessions. Students have access to tutors, computer-assisted instruction, and structured workshops. The one supplemental education unit does not count toward graduation; grading is done on a Y/Z (pass/not pass) basis.

MTH 102 Finite Mathematics 3 Credits

This mathematically rigorous course begins with a review of the rational numbers, repeating decimals, irrational numbers and non-repeating decimals. The elementary theory of sets is discussed with applications to surveys and data mining. This is followed by a discussion of the cardinality of infinite sets. An introduction to elementary number theory includes various applications. The Cartesian plane and the idea of a function and its graph are introduced with applications. Counting theory then precedes an elementary discussion of probability.

MTH 105 Algebra and Trigonometry 4 Credits

The course is an in depth and rigorous study of functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses, trigonometric identities.

Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

MTH 120 Introduction to Applied Statistics 3 Credits

Collection and presentation of data. Measures of location and variation, sampling theory, hypothesis testing, confidence intervals, t-tests, chi-square tests, regression, and correlation. Emphasizes practical applications. Not open to business administration, chemistry, environmental, geosciences, marine sciences, math or liberal studies: marine ecological or environmental emphasis majors.

Prerequisite(s): MTH 102 or MTH 105.

MTH 150 Mathematics for Education Majors I 3 Credits

This is the first course in a three-course sequence for education majors. This course covers the concept of Numbers, starting with counting numbers, decimals, negative numbers, fractions, and real numbers; different ways of representing numbers, and the relations between them are explored; different meanings and applications of the arithmetic operations are studied; standard and non-standard algorithms for arithmetic are considered in light of the representation of numbers. May not be used by CLAS students to satisfy the mathematics component of the core.

MTH 151 Mathematics for Education Majors II 3 Credits

This is the second course in a three-course sequence for elementary education majors. In this course, students will study proportional reasoning, Number Theory, Algebra, Geometry, and measurement. May not be used by SLAS students to satisfy the mathematics component of the core.

Prerequisite(s): MTH 150.

MTH 152 Mathematics for Education Majors III 3 Credits

This is the third course in a three-course sequence for elementary education majors. In this course, students will study area and volume, transformational geometry, statistics and probability.

Prerequisite(s): MTH 151.

MTH 210 Calculus I 4 Credits

Introduces analytic geometry, functions, limits, and derivatives; differentiation of algebraic and trigonometric functions, curve sketching, maxima and minima, and higher derivatives.

Prerequisite(s): Math SAT 650 or higher or Math ACT score of 28 or higher or MTH 105 with a grade of C or higher.

MTH 211 Calculus II 4 Credits

The definite integral, differentiation of transcendental functions, methods of integration and approximate integration, determination of area, volume, and surface area.

Prerequisite(s): MTH 210 with a grade of C or higher.

MTH 212 Calculus III 4 Credits

Infinite series; functions of two and three variables, vectors and tangent planes, partial derivatives, multiple integrals, determination of volume and density.

Prerequisite(s): MTH 211 with a grade of C or higher.

MTH 230 Discrete Mathematics 4 Credits

An introduction to topics in Discrete Mathematics. This course covers methods of proof, induction and recursion, and other topics in discrete mathematics. Topics may include graph theory, trees, and symmetry groups.

Prerequisite(s): MTH 102, MTH 105 or MTH 210.

MTH 240 Linear Algebra 3 Credits

Systems of linear equations; vector spaces; linear independence; determinants; orthogonality; linear maps; eigenvectors.

Prerequisite(s): MTH 210 or as corequisite; sophomore standing; or permission of instructor.

MTH 250 Differential Equations 3 Credits

First order differential equations, separable and exact; integrating factors; second order linear differential equations; series solutions of second order linear differential equations; higher order equations; existence and uniqueness theorems; systems of linear differential equations.

Prerequisite(s): MTH 240, MTH 211.

Corequisite(s): MTH 212 or as prerequisite.

MTH 308 Advanced Calculus 3 Credits

Vectors, gradients, and directional derivatives, Lagrange multipliers, Taylor's theorem, multiple integrals, change of variables, line and surface integrals, Stokes' theorem.

Prerequisite(s): "B" average in MTH 210 and MTH 211; MTH 212, MTH 240.

MTH 315 Modern Geometry 3 Credits

Covers geometry from a modern point of view, with emphasis on non-Euclidean geometry, particularly projective geometry.

Prerequisite(s): MTH 211, MTH 240.

MTH 340 Probability & Statistical Analysis I 3 Credits

Theory of sets and probability; discrete and continuous random variables and probability distributions. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite(s): MTH 212 or MSD 111.

MTH 341 Probability & Statistical Analysis II 3 Credits

Continuation of MTH 340. Foundations of mathematical statistics: normal distributions, estimation, confidence intervals and hypothesis testing; topics chosen from student's t-test, chi-square tests, analysis of variance and regression analysis. Emphasizes foundations and utilizes the techniques of the calculus.

Prerequisite: MTH 340. Spring.

MTH 401 Modern Algebra 3 Credits

Provides an introduction to modern abstract algebra. It emphasizes the axiomatic method to analyze the major algebraic systems. The instructor will choose the topics to be studied from among the following algebraic structures: integral domains, fields, complete ordered fields, groups, polynomials, rings, ideals and modules.

Prerequisite(s): MTH 240.

MTH 402 Topics in Advanced Mathematics 3 Credits

Chosen from advanced pure or applied mathematics. Topics vary, depending on instructor.

Prerequisite(s): MTH 308.

MTH 410 Complex Analysis 3 Credits

Analytic functions, conformal mapping, power series, Cauchy's theorem, calculus of residues.

Prerequisite(s): MTH 308.

MTH 420 Number Theory 3 Credits

Covers topics including divisibility theory, the prime numbers, the theories of congruences and of quadratic reciprocity, and Fermat's Last Theorem. Other topics may also include applications to cryptography, Pell's equations, continued fractions, and the theory of partitions.

Prerequisite(s): MTH 240 or permission of instructor.

MTH 430 Introduction to Topology 3 Credits

A comprehensive introduction to elementary topology. The concepts of topological spaces and metric spaces will be introduced. Connectedness, compactness and properties of subsets of the real numbers rooted in topology will also be considered. The quotient topology will be used to construct surfaces as identification spaces, and tools will be developed to distinguish one surface from another.

Prerequisite(s): MTH 212.

MTH 440 Real Analysis 3 Credits

Covers the theory of sets, the real number system and its properties, convergence of sequences and series of numbers and functions, and the theory of integration, including: measure theory, the Riemann integral, and introduction to the Lebesgue theory of integration.

Prerequisite(s): MTH 308 or as corequisite.

MTH 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in research and mathematical literature. If possible, the student will publish the results or present them at a scientific meeting.

Multicultural Studies (MCS)

MCS 109 Intro to Race, Class & Gender 3 Credits

This course introduces students to the concepts of race, class and gender as essential components in understanding how social identities are socially constructed in the United States. Using historical and contemporary references, the course explores the ways in which race, class, gender and ethnic relationships shape the experiences of people in the United States, and the implications of those experiences for social relationships. Part of this exploration is to expose students to inter-relatedness of race, class and gender, as identity markers, both historically and in contemporary society.

MCS 110 Race, Class and Gender in Contemporary American Society 3 Credits

This interdisciplinary course analyzes the ways in which race, class, gender and ethnic relationships shape the experience of all persons in this society. It examines the categories of race, class and gender as social constructs that have been historically developed and sustained by economic, social, political, and cultural factors. Note: This course is cross-listed with GSS 110. Students may only get credit for one course: MCS 110 or GSS 110.

MCS 110S Introduction to Race, Class and Gender in Contemporary Society 1 Credits

This course introduces students to the concepts of race, class and gender as essential components in understanding how social identities are socially constructed in the United States. Using historical and contemporary references, the course explores the ways in which race, class, gender and ethnic relationships shape the experiences of people in the United States, and the implications of those experiences for social relationships. Part of this exploration is to expose students to inter-relatedness of race, class and gender, as identity markers, both historically and in contemporary society.

MCS 210 Power and Privilege in a Multicultural Society 3 Credits

This course will examine how the intersection of power and privilege shapes race, gender and class relationships in the United States. Analyses will show how the legal, economic, political and social manifestations of power influence the assignments and distribution of privilege in the United States, both in historical and contemporary contexts. The impositions of power on identity in the social assignment of privilege will be an important component of the course. The two "big questions" to be examined in this course are: How do issues of race, ethnicity, class, age, religion, gender, and sexual orientation interact with privilege? How do the tensions between power, privilege, oppression and inequality lead to movements for social justice? Various interlocking systems of privileges—justice system, educational system, medical system, political system, economic system, etc.—will be examined, using the theoretical frameworks of inequality, oppression and dependency. Prominent public policies and social movements that have challenged the notions of power and privilege, both historically and contemporarily, will be examined: civil rights, women's suffrage, affirmative action, Occupy Wall Street, LGBT rights, Metoo movement, Equal Rights Amendment, Title IX, Lilly Ledbetter Fair Pay Act, etc.

MCS 220 Issues in Multicultural Studies 3 Credits

An examination of issues and questions posed by the existence of diversity in social life. Students build on what they have learned in MCS 110 by focusing in greater depth on selected aspects of multicultural interaction. Topics change each semester and are listed in the course roster. Recent topics include "Understanding Privilege," "The Meaning of Difference," and "Narratives of Human Difference: Science, Politics, Literature."

Prerequisite(s): MCS 110 or permission of instructor.

MCS 280 Directed Study in Multicultural Studies 1-4 Credits

An intensive study experience in multicultural studies. The student designs and carries out a course of focused study under the supervision of a multicultural studies faculty member. The student's proposed plan of work must be reviewed and approved by the faculty sponsor and by the multicultural studies advisory committee. May be repeated once for credit.

MCS 490 Independent Study: Research and Creative Expression 1-4 Credits

Individual program of study under close supervision by the instructor, with weekly meetings and reports. Topics to be approved by the department. Available to seniors who have a minimum of a 3.0 GPA. No more than six credits allowed toward graduation.

MCS 491 Internship in Multicultural Studies 1-4 Credits

A supervised community service of work experience at an approved site. Placements are made in accordance with each student's particular theme within multicultural studies. A minimum of three hours per week on site per credit (39 hours per semester); in addition, students complete readings and reports and meet weekly with the instructor. Primarily for multicultural studies minors in their junior or senior year.

Music (MUS)**MUS 001S Applied Voice Studio 0 Credits****MUS 105 Survey of Music History I 3 Credits**

A chronological survey of Western music from the Medieval through the Baroque periods stressing the origin and evolution of musical forms, musical styles, and the important composers before 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 106 Survey of Music History II 3 Credits

A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 109S Basic Music Theory 3 Credits

This is a beginner's course in music theory. It familiarizes the student with the basic elements (e.g., staff, clefs, time signatures, musical notation, intervals, triads and chords). This course is ideal for both the student wanting to know only the essential, or the student wanting to go on to develop their theoretical skills. For non-music majors, MUS 109S counts toward graduation and grades are awarded on an A-F basis. For music majors, MUS 109S does not count toward graduation, and grading is on a pass ("Y") or fail ("Z") basis.

MUS 110 Music Theory I 3 Credits

A practical introduction to the basic elements of music, beginning with the reading of music notation. Practice in scales and chords; ear-training in rhythm and pitch. Techniques may be applied to the student's own instrument (e.g., guitar, piano, winds) if he or she plays one. Prerequisite(s): MUS 109S or placement.

Corequisite(s): MUS 110L.

MUS 110L Music Theory I Lab 1 Credits

Dictation, aural skills training, sight singing, and keyboard skills to accompany MUS 110 (Music Theory I). Prerequisite(s): MUS 109S or placement.

Corequisite(s): MUS 110.

MUS 111 Music Theory II 3 Credits

Continuation of MUS 110, leading to some original composition. Prerequisite(s): MUS 110 and MUS 110L.

Corequisite(s): MUS 111L.

MUS 111L Music Theory II Lab 1 Credits

Dictation, aural skills training, sight singing, and keyboard skills to accompany MUS 111 (Music Theory II). Prerequisite(s): MUS 110 and MUS 110L or placement.

Corequisite(s): MUS 111.

MUS 113 Popular Music Theory I 3 Credits

Popular Music Theory I covers basic elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations. Practice in scales and chords; ear-training in rhythm, pitch, and timbre. Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice)

Corequisite(s): MUS 113L.

MUS 113L Popular Music Theory Lab I 1 Credits

Taken in conjunction with Popular Music Theory I, the lab applies theoretical concepts in a performance context. Applied aural training and improvisation skills on primary and secondary instruments.

Corequisite(s): MUS 113.

MUS 114 Popular Music Theory II 3 Credits

A continuation of Popular Music Theory I, progressing to intermediate elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations. Practice in scales and chords, ear-training in rhythm, pitch, and timbre. Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice).

MUS 114L Popular Music Theory Lab II 1 Credits

Taken in conjunction with Popular Music Theory II, the lab applies theoretical concepts in a performance context. Applied aural training and improvisation skills on primary and secondary instruments.

MUS 116 Digital DJing 3 Credits

Digital DJing is a three-week, software-based course that develops musical mixing skills for the purpose of creating the kinds of DJ sets one may play on the radio or at live events. Includes repertory building across several popular and dance genres.

MUS 120 Music and Society 3 Credits

Introduction to the basic elements of music (rhythm, melody, harmony, etc.) and the appreciation of representative types of music from all historical periods.

MUS 127 Pop, Rock & Hip-Hop Ensemble 1 Credits

Ensemble rehearsal and performance of contemporary music. Maximum of eight credits are accepted in band, choir, and/or theater production.

MUS 128 Choir 1 Credits

Rehearsal and performance of multi-era Western and non-Western repertoire. Instruction in music fundamentals and vocal production. Pitch matching and part-singing abilities must be demonstrated in the first-week sectional hearing.

MUS 129 Contemporary Vocal Ensemble 1 Credits

The objective of the contemporary vocal ensemble course is to allow students to experience the aesthetics of popular music through the study, interpretation and performance of the music. Students will develop their ensemble skills, independent part singing, as they experience a wide range of popular music genres (jazz, pop, R&B, world, etc.) Students must pass an audition to participate in this course.

MUS 130 Music in Children's Lives 3 Credits

Students in this course will study how music interacts in the lives of children as they sing, listen, play instruments and move. Song repertoire and selections for listening and moving from the American, European and non-Western cultures will be introduced. Playing recorder as well as pitched and non-pitched percussion instruments will be demonstrated.

MUS 131 Beginning Piano I 2 Credits

Class approach to learning to play the piano. How to read music, basic piano technique, and appropriate piano pieces and songs are studied.

MUS 132 Beginning Piano II 2 Credits

Continuation of MUS 131. Emphasis on further development of technique and the ability to interpret piano music from a variety of styles.

Prerequisite(s): MUS 131 or equivalent.

MUS 133 Class Voice I 2 Credits

Class approach to learning pop vocals. How to read music, basic vocal production technique and appropriate vocal pieces and songs are studied, especially in popular genres.

MUS 134 Class Voice II 2 Credits

Continuation of class approach to learning pop vocals started in Class Voice I. Intermediate vocal technique for popular music

Prerequisite(s): MUS 133 or placement exam.

MUS 135 Class Guitar I 2 Credits

Class approach to learning to play the guitar. How to read tablature, basic guitar technique, and appropriate guitar pieces and songs are studied, especially in popular genres. Students must provide their own guitars; if electric, they should provide their own amps, too.

MUS 136 Class Guitar II 2 Credits

Continuation of class approach to learning to play the guitar started in Class Guitar I. Intermediate guitar technique for popular music. Students must provide their own guitars; if electric, they should provide their own amps, too.

Prerequisite(s): MUS 135 or placement exam.

MUS 150A Applied Flute 2 Credits**MUS 150B Applied Flute 1 Credits****MUS 150C Applied Flute 2 Credits****MUS 150D Applied Flute Elective 1 Credits****MUS 151A Applied Oboe 2 Credits****MUS 151B Applied Oboe 1 Credits****MUS 151C Applied Oboe 2 Credits****MUS 151D Applied Oboe Elective 1 Credits****MUS 152A Applied Clarinet 2 Credits****MUS 152B Applied Clarinet 1 Credits****MUS 152C Applied Clarinet 2 Credits****MUS 152D Applied Clarinet Elective 1 Credits****MUS 153A Applied Bassoon 2 Credits****MUS 153D Applied Bassoon Elective 1 Credits****MUS 154A Applied Saxophone 2 Credits****MUS 154D Applied Saxophone Elective 1 Credits****MUS 155A Applied French Horn 2 Credits****MUS 155D Applied French Horn Elective 1 Credits****MUS 156A Applied Trumpet 2 Credits****MUS 156B Applied Trumpet 1 Credits****MUS 156C Applied Trumpet 2 Credits****MUS 156D Applied Trumpet Elective 1 Credits****MUS 157A Applied Trombone 2 Credits****MUS 157D Applied Trombone Elective 1 Credits****MUS 158A Applied Euphonium 2 Credits****MUS 158D Applied Euphonium Elective 1 Credits****MUS 159A Applied Tuba 2 Credits****MUS 159D Applied Tuba Elective 1 Credits****MUS 160A Applied Guitar 2 Credits****MUS 160B Applied Guitar 1 Credits****MUS 160C Applied Guitar 2 Credits****MUS 160D Applied Guitar Elective 1 Credits****MUS 160E Applied Guitar 2 Credits****MUS 161A Applied Violin 2 Credits****MUS 161B Applied Violin 1 Credits****MUS 161C Applied Violin 2 Credits****MUS 161D Applied Violin Elective 1 Credits****MUS 161E Applied Violin 2 Credits****MUS 161G Applied Violin 2 Credits****MUS 162A Applied Viola 2 Credits****MUS 162D Applied Viola Elective 1 Credits****MUS 163A Applied Cello 2 Credits****MUS 163D Applied Cello Elective 1 Credits****MUS 164A Applied String Bass 2 Credits****MUS 164B Applied String Bass 1 Credits****MUS 164C Applied String Bass 2 Credits****MUS 164D Applied String Bass Elective 1 Credits****MUS 165A Applied Piano 2 Credits**

MUS 201 Skills Ensemble I 1 Credits

A Contemporary Performance skills ensemble focusing on interactive musicianship, composition, ear training, transcription, and notation, for popular music studies majors. Students will develop proficiency in the following areas: • Developing ensemble skills • Preparing and rehearsing original compositions • Recognizing scales, intervals and chords • Harmonic, Melodic, and Rhythmic Transcription • Recognizing basic structural elements in different musical genres: Pop(Hip-Hop, R&B, Rock)/Jazz/Classical as well as understand their basic vernacular • Writing legible and clear musical scores (charts).

MUS 204 Jazz History 3 Credits

Survey from 19th C. roots to 21st C. styles. Development of listening skills and overview of musical skills used by jazz performers. Exploration of the relationship between jazz and poetry, race relations, and the reputation of jazz in popular culture.

Prerequisite(s): CMP 120 or CMP 125.

MUS 205 History of Pop and Rock Part I 3 Credits

This course charts the history of popular music from its origins until the 1960s. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music from its roots in the blues, early jazz, ragtime and military band marches to the music of Elvis, Chuck Berry, Little Richard, Buddy Holly, the Rolling Stones and the Beatles. We look at the recording industry and the advent of the gramophone record and the important role of radio and television in expanding the reach of popular music directly into the home, creating a vibrant soundtrack for peoples lives.

MUS 206 History of Pop and Rock Part 2 3 Credits

Description: This course charts the history of popular music from the 1960s to today's. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music through Acid Rock, Progressive (Prog) Rock, Hard Rock, Singer-Songwriters, Disco, Reggae, Funk, Punk, Heavy Metal, New Wave, Grunge, Electronica and Rap & Hip-Hop. We look at the development of analog and digital media and how new forms of delivery of product shapes the business model of the industry and beyond.

MUS 207 Masterworks in Music 3 Credits

Major works by great composers from different historical periods Mozart, Beethoven, Brahms, and Wagner, among others are studied. Up to 10 compositions by six composers are covered, with an emphasis on listening to recorded and live performances of representative works.

MUS 208 Music of the Theater 3 Credits

A study of music drama both historical and contemporary covering European opera of the Baroque, classical and romantic periods, and the American musical theatre, especially the contemporary Broadway musical.

MUS 209 Great Composers 3 Credits

A study of selected major composers life, works, and historical significance with an emphasis on the listening experience. Bach, Mozart, Beethoven, Tchaikovsky, Stravinsky, or others.

MUS 210 Music Theory III 3 Credits

Analysis of musical forms, including binary, rounded binary, ternary, and popular song. Identification of techniques that support musical form, including harmonic language, contrast/repetition, compositional process. Advanced sight singing and aural drills.

Prerequisite(s): MUS 111 and MUS 111L.

MUS 211 Music Theory for Music Theater 3 Credits

Analysis of music theater songs, scenes and scores. Various techniques, placement of examples into historical, musical, artistic, and literary perspective. Reading of full and piano/vocal scores, conducting, orchestration and harmonic language will be emphasized.

Prerequisite(s): MUS 111 and MUS 111L.

MUS 212 Cartoon and Anime Culture 3 Credits

This course investigates the music and culture of animated films and television shows, anime, animated shorts including cartoons, and related incidental music for documentary films.

MUS 213 Digital Comp of Pop Music I 3 Credits

This course is about "the doing of music". It ties music theory to pragmatic concerns with keyboards and software in the making and distribution of music.

MUS 214 Writing about Music 3 Credits

This course instructs students in the art of writing about music, from small-form criticism to large scale scholarship, focusing especially on the ability to translate what one hears into engaging prose.

Prerequisite(s): CMP 120 and 125, MUS 110, 110L, and MUS 213.

MUS 215 Music & Techn/Mobile Society 3 Credits

This course compares the recent history of music technology to past innovations, focusing on the aesthetic implications and ideological influences of an increasingly mobilized musical milieu.

MUS 216 Digital Comp of Pop Music II 3 Credits

This course is about "the doing of music." It ties music theory to pragmatic concerns with keyboards and software in the making and distribution of music, continuing the content begun in The Digital Composition of Popular Music I.

MUS 217 Black Music in America 3 Credits

This course covers the history of music made by and/or about African Americans, from minstrel shows to hip-hop and everything in between.

MUS 218 Postmodernism & Popular Culture 3 Credits

This course considers music in light of the ideological trends of postmodernism in order to better understand contemporary music in its cultural context.

MUS 219 Pop Music Arranging I 3 Credits

The Pop Music Arranging I course is the first of a two-semester course sequence whose goal is to explore the fundamental arranging techniques for popular music styles. Students will learn to arrange popular music for the standard instrumentation found in a pop/rock ensemble (bass guitar, drumset, rhythm guitar, and keyboard). This course will develop comprehensive musicianship and fundamental arranging techniques, as well as develop skills as they relate to the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 113.

MUS 220 Pop Songwriting I 3 Credits

The Songwriting I course is an introduction to songwriting in popular music styles. Students will learn to compose music by themselves and collaboratively. This course will develop comprehensive musicianship and compositional techniques, as well as learn to use the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 113 with a minimum grade of D and MUS 113L with a minimum grade of D.

MUS 233 Intermediate Piano 3-12 Credits

Continuation of MUS 132 with further development of reading skills, piano techniques and interpretation. Each student studies a set of pieces selected together with the instructor tailored specifically to the students' needs and interests.

MUS 300 Beethoven and the Romantic Age 3 Credits

A study of the Romantic period with particular emphasis on Beethoven. The classical heritage, the transformation of that heritage into romantic terms, the prominent influence of Beethoven on 19th century musical style.

MUS 301 Skills Ensemble II 1 Credits

The Contemporary Performance Skills Ensemble II is a course whose focus is interactive musicianship, composition, ear training, transcription, and notation, for popular music studies majors. This course will require a higher level of musical ability, aptitude, and technical development than the Skills I Ensemble course. Students will develop proficiency in the following areas: • Developing ensemble skills • Preparing and rehearsing original compositions • Recognizing scales, intervals and chords • Harmonic, Melodic, and Rhythmic Transcription • Recognizing basic structural elements in different musical genres: Pop(Hip-Hop, R&B, Rock)/Jazz/Classical as well as understand their basic vernacular • Writing legible and clear musical scores (charts) • Improvisation.

MUS 303 Music Literature: Baroque Era 3 Credits

A survey of European musical styles from c. 1600 to 1750, approached by listening to the music of the period, including Bach, Handel, and many lesser known masters. Topics include the development of modern musical sound, instrumental forms, Lutheran and Catholic church music, and the beginnings of dramatic music.

MUS 304 Music of the Beatles 3 Credits

This course is a very in-depth analysis of the music and personalities of the Beatles. The student will gain in depth insight to the Beatles songs and albums as the course proceeds through the music chronologically. This will be contextualized historically and sociologically where required.

MUS 305 Words and Music 3 Credits**MUS 306 Contemp Music Experience 3 Credits**

A survey of European and American musical styles of the late 19th and 20th centuries. Topics include postromantic music, neoclassicism, serialism, electronic music, and the current avant garde.

MUS 307 The Music of Radiohead 3 Credits

This course investigates the music, lyrics, art and marketing strategies of the British so called "alternative" band, Radiohead, moving song by song through their demos, videos and albums.

MUS 308 World Music 3 Credits

To understand world music as a means of appreciating and respecting our common inheritance as humans. To better understand in what ways music is a 'language' and how this functions within 'community' including aspect of ritual, celebration, religion and spirituality. The student will be expected to be able to discern between various genres of world music understanding the wider cultural context including, but not limited to, popular music within that same culture.

MUS 309 Film Music 3 Credits

A study of music in feature film, documentary film, and television. A chronological survey of film music from silent to contemporary film, animated shorts, and television, with emphasis on listening to recorded performance of representative works.

MUS 310 The Film Music of Stanley Kubrick 3 Credits

This course is an in-depth study of the way in which music impacts society through the art of film. Focusing on the films of Stanley Kubrick (e.g. The Shining; 2001: A Space Odyssey; A Clockwork Orange; Full Metal Jacket; Eyes Wide Shut; Dr. Strangelove; Lolita) we will study a variety of strategies within which music integrates, counterpoints or ironically resists themes such as war, sex, politics, religion, gender etc. Also we will observe how music interacts with other aesthetics in film such as light, camera methods, 1. diegetic/source, 2. non-diegetic/underscore and 3. metadiegetic (i.e. 1. music in the film; 2. music only the audience can hear; 3. music that seems to be coming from the mind of a character in the film) method as part of the narrative itself. In this way we will investigate the way film both integrates aspects of society and also radiates messages, indeed challenges, to society, both as a mirror but also didactically—with the direct intent of creating change.

MUS 311 Unpacking Bruce Springsteen 3 Credits

This course will survey the music of Bruce Springsteen. It will 'unpack' Springsteen's musical development not only across his official career (i.e. from signing with Columbia for his first album 'Greetings from Asbury Park, New Jersey' in 1973 to the present) but also from his childhood through his youth in Freehold, NJ. By closely studying Springsteen's life, music and lyrics as well as the themes of each album the student will become an expert in understanding how The Boss was able to universalize the Jersey Shore as well as his personal concerns into vital musical messages of great value and import today. This will also involve looking at music as varied as The British Invasion (i.e. The Beatles, The Animals & the Rolling Stones et al); Motown; Country; Soul; Folk; Rock and the American Songbook.

MUS 312 The Arts Abroad 3 Credits

A two week trip abroad that includes a critical study of music and theater. Students are required to attend all performances, guided tours, and classes before and after the trip.

MUS 315 Black Music in America 3 Credits

This course covers the history of music made by and/or about African Americans, from minstrel shows to hip hop and everything in between.

MUS 316 Digital Mixing and Mastering 3 Credits

Digital Mixing and Mastering is a practical skills class focusing on post-production skills in software interfaces. Students will learn how to work with multiple editing softwares and plug-in tools to achieve balanced, lively, professional mixes.

MUS 319 Pop Music Arranging II 3 Credits

The Pop Music Arranging II course is the terminal course of a two-semester sequence whose goal is to explore the advanced arranging techniques for popular music styles. Students will learn to arrange popular music for the standard instrumentation found in a pop/rock ensemble (bass guitar, drumset, rhythm guitar, and keyboard). This course will develop comprehensive musicianship and advanced arranging techniques, as well as develop advanced skills as they relate to the utilization of the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 219.

MUS 320 Pop Songwriting II 3 Credits

The Pop Songwriting II course is a continuation of the songwriting course sequence whose goal is to explore advanced compositional techniques for popular music styles. Students will learn to compose music by themselves and collaboratively. This course will develop comprehensive musicianship and advanced compositional techniques, as well as develop advanced skills as they relate to the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 220.

MUS 350A Applied Flute 2 Credits**MUS 350B Applied Flute 1 Credits****MUS 351A Applied Oboe 2 Credits****MUS 351B Applied Oboe 1 Credits****MUS 352A Applied Clarinet 2 Credits****MUS 353A Applied Bassoon 2 Credits****MUS 354A Applied Saxophone 2 Credits****MUS 355A Applied French Horn 2 Credits****MUS 356A Applied Trumpet 2 Credits****MUS 356B Applied Trumpet 1 Credits****MUS 357A Applied Trombone 2 Credits****MUS 358A Applied Euphonium 2 Credits****MUS 359A Applied Tuba 2 Credits****MUS 360A Applied Guitar 2 Credits****MUS 360B Applied Guitar 1 Credits****MUS 361A Applied Violin 2 Credits****MUS 362A Applied Viola 2 Credits****MUS 363A Applied Cello 2 Credits****MUS 364A Applied String Bass 2 Credits****MUS 364B Applied String Bass 1 Credits****MUS 365A Applied Piano 2 Credits****MUS 365B Applied Piano 1 Credits****MUS 366A Applied Organ 2 Credits****MUS 367A Applied Percussion 2 Credits****MUS 368A Applied Voice 2 Credits****MUS 368B Applied Voice 1 Credits****MUS 368C Applied Voice 2 Credits****MUS 368E Applied Voice 2 Credits****MUS 369A Applied Composition 2 Credits****MUS 490 Independent Research and Study 1-4 Credits**

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1 to 4 Credits. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing; good academic standing.

MUS 491 Internship in Music 1-4 Credits

Provides junior or senior music majors with the opportunity to gain practical experience working within a professional music environment. Students must be sponsored by a music professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

MUS 493 Selected Topics in Music Perf 3 Credits

Intensive study of a particular topic in applied music for the intermediate to advanced student. Students are led to understand the historic and aesthetic elements in music through critical listening, performance, research, and class projects.

MUS 495 Selected Topics in Music 3 Credits

Studies specialized aspects of the literature, history, or theory of music, to supplement the established curriculum. Emphasis on creative investigative work and individual experiences in music.

MUS 498 Popular Music Culture Capstone 3 Credits

The capstone is an independent, student-led project resulting in a material product (recording/performance/event/presentation) that demonstrates a student's interests and skills in the area of popular music.

MUS 499 Senior Honors Program 3 Credits

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, planned under the direction of a faculty advisor, represents a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Musical Theatre (MTR)

MTR 105 Musical Theatre Practicum 1 Credits

This course explores the literature of musical theatre vocal ensembles. It emphasizes examining a wide range of styles. This is a studio/academic class, not a performance ensemble.

MTR 109 Beginning Ballet I 1 Credits

This course introduces the basic elements of ballet technique. Technique is based on the five positions of the legs and feet, coupled with appropriate arm positions. The class consists of a basic ballet barre warm-up that includes stretching and developing strength and turn-out used in dance positions and combinations. Instruction includes jumping, turning, and connecting steps with movement. Ballet terminology is addressed.

MTR 111 Musical Theatre Lab 0 Credits**MTR 112 Advanced Ballet I 1 Credits**

Continuation of MTR 109, building upon techniques learned in that course.

MTR 113 Beginning Ballet II 1 Credits

Intermediate ballet, expanding upon Ballet I and concentrating upon the American lineage of ballet training.

MTR 114 Advanced Ballet II 1 Credits

Continuation of MTR 113. Intermediate ballet, expanding upon Ballet I and concentrating upon the American lineage of ballet training.

MTR 120 Hist of American Music Theater 3 Credits

The history of the American Musical from the first American production in 1750 of Gay's *The Beggar's Opera* up to the present will be traced. Emphasis will be placed upon those common elements which are solely intrinsic to the American stage. Developments and imported ideas (e.g., *The British Invasion*) will be highlighted.

MTR 131 Music Theory for MT 3 Credits

Teaches students to understand musical form, structure, melody, rhythm and harmony by applying these concepts to musical theatre literature. Includes full analysis of musical theatre songs. Required in the first year.

MTR 132 Group Piano 1 Credits

Offers the musical theatre student appropriate keyboard technique to play any vocal part and to play a rudimentary accompaniment. Required of all second-year students.

Prerequisite(s): MTR 131.

MTR 133 Sight Singing for MT 3 Credits

Intensive class in reading music, designed for musical theatre students. Traditional solfeggio techniques used with musical theatre texts whenever possible. Required of first-year students.

Prerequisite(s): MTR 131.

MTR 209 Tap Dance I 1 Credits

Introduction to the basic elements of tap dancing. Tap technique is geared to enhance rhythm and motor skills, basic elements that will be used to connect several steps and movements into combinations. Other variations such as "soft shoe" or "clogging" are included.

MTR 210 Tap Dance II 1 Credits

Continuation of MTR 209. Combinations most often used in music theater productions are emphasized.

Prerequisite(s): MTR 209.

MTR 211 Ballet III 1 Credits

Intermediate ballet, expanding upon Ballet II and concentrating upon the American lineage of ballet training.

Prerequisite(s): MTR 110.

MTR 212 Ballet IV 1 Credits

Continuation of MTR 211. Intermediate ballet, expanding upon Ballet III and concentrating upon the American lineage of ballet training.

Prerequisite(s): MTR 211.

MTR 215 MT Performance: Song as Text 3 Credits

In this course the student will learn how to develop a performance of musical text by making doable, actable choices and applying those choices to musical monologues – solo songs.

Prerequisite(s): THE 110.

MTR 216 Acting for Music Theater I 3 Credits

This professional skills course, intended for music theater majors, builds upon the student's previous acting training. Through various exercises and activities (both individual and group), the student will begin to develop a clear method for preparation that addresses first their own instrument, and then (through various methods of analysis) the character and the play. Students will begin to utilize and apply the studied techniques and exercises to simple monologues and a scene. Behavioral truth will precede the more sophisticated studies of emotional truth.

MTR 217 Acting for Music Theater Major II 3 Credits

Continuation of MTR 216. Methods for preparation are expanded as students learn and experience techniques for exploring and developing characters. This semester will focus on the application of the skills and acting techniques studied in the first semester to the needs of dramatic and sung material. Students are expected to synthesize content and skills acquired in the *Speech for the Actor*, *Body Awareness* and *Movement* classes.

Prerequisite(s): MTR 216.

MTR 218 Musical Theatre Scene Study I 3 Credits

Scene study class exploring the literature of the musical theatre – emphasis placed on two- and three-character scenes. Required of all second-year students.

Prerequisite(s): MTR 215.

MTR 219 Musical Theatre Scene Study II 3 Credits

Further exploration of scenes in the musical theatre literature – emphasis on more complex scenes. Required of all third-year students.

Prerequisite(s): MTR 218.

MTR 251 Styles and Genres I 3 Credits

Focuses teaching and learning on the ways in which musical and textual understanding inform the interpretation and performing of representative composers from the Standard, Classical, and Traditional periods of musical theater. Composers to be studied will include Rodgers and Hammerstein, Lerner and Loewe, Kern, Berlin, Gershwin, Porter, Arlen, Blitstein and Weill.

Prerequisite(s): MUS 111, MUS 111L, THE 107, MTR 216.

MTR 252 Styles and Genres II 3 Credits

Focuses teaching and learning on the ways in which musical and textual understanding inform the interpretation and performing of representative composers from the Contemporary (Non-Pop/Rock) period of music theater. Composers to be studied will include Sondheim, Styne, Kander and Ebb, Guettel, Matby and Shire, and Bernstein.

Prerequisite(s): MUS 111, MUS 111L, THE 107, MTR 216.

MTR 253 Styles and Genres III 3 Credits

Focuses teaching and learning on the ways in which musical and textual understanding inform the interpretation and performing of representative composers from the Contemporary, Pop/Rock period of music theater. Composers to be studied will include Webber, Schwartz, Fenn, Flaherty, Menkin, Brown, LaChiusa, and Lipppa.

Prerequisite(s): MUS 111, MUS 111L, THE 107, MTR 216.

MTR 255 Musical Theatre Repertoire I 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers through the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106 with a minimum grade of D and THE 311 with a minimum grade of D.

MTR 256 Musical Theater Repertoire II 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers since the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106, THE 107.

MTR 307 Tap III 1 Credits

This course is designed for the moderately advanced tap dancer. Course to be taken in the fall.

Prerequisite(s): MTR 210.

MTR 308 Tap IV 1 Credits

The course will allow the more advanced student to complete the work begun in Tap III.

Prerequisite(s): MTR 307.

MTR 309 Beginning Jazz Dance I 1 Credits

Based upon the ballet foundation, this course explores the expressive style of jazz dance, and basic Western theatrical dance forms and social dances used most often on the stage.

Prerequisite(s): MTR 109.

MTR 313 Ballet V 1 Credits

Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills.

Prerequisite(s): MTR 212.

MTR 314 Ballet VI 1 Credits

Continuation of MTR 313. Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills.

Prerequisite(s): MTR 313.

MTR 315 Advanced Jazz Dance I 1 Credits

Continuation of work begun in MTR 309.

MTR 316 Beginning Jazz Dance II 1 Credits

This course continues the work begun in MTR 309 and MTR 315.

MTR 317 MT Auditions:Preparation/Tech 3 Credits

This course, building upon skill-sets established in the Music Theatre singer-actor curriculum, will introduce and hone the required skill-sets for preparing to audition in Music Theatre. Genres and styles of music most often required for auditioning in the industry will be prepared and explored. An audition "book," based upon the demands of the industry, as well as the most suitable material for each student will be built. When appropriate, guests from the industry will be invited to present master classes and evaluations in a "mock audition" process.

Prerequisite(s): MTR 207, MTR 216, MTR 217, MTR 492.

MTR 318 Advanced Jazz Dance II 1 Credits

This course continues the work begun in MTR 309, MTR 315 and MTR 316.

Prerequisite(s): MTR 211.

MTR 319 Jazz Dance III 1 Credits

This course continues the work begun in MTR 318.

Prerequisite(s): MTR 318 and MTR 212.

MTR 320 Jazz Dance IV 1 Credits

This course continues the work begun in MTR 319.

Prerequisite(s): MTR 319 and MTR 212.

MTR 335 Speech for the Actor 3 Credits

This course introduces and develops speech techniques, specifically in the areas of relaxation, posture and alignment, respiration, phonation, support, registration, resonance, and articulation. Students learn to consistently produce a free, resonant, fully supported speaking voice. Exercises will increase flexibility and range of speaking and will foster heightened responsiveness to feeling. Regular practice in the delivery of both impromptu and prepared monologues is required. This course includes studies in Neutral American Speech.

MTR 402 Directing Music Theater/Opera 3 Credits

This elective course investigates how conceptual ideas and the process of script analysis are used in putting together a music theatre production for performance. Instruction includes staging ideas and elements needed for a complete production. Other theatrical aspects of choreography, properties, costumes, lighting, and set design are addressed. It is recommended that students complete MTR 496 before taking MTR 402.

MTR 411 Musical Theatre Ensemble 1 Credits**MTR 415 Musical Theatre Dance I 1 Credits**

This is the first capstone course in the Musical Theatre dance sequence. Practical and historical study of Broadway dance styles; main focus on jazz idiom. Emphasis placed on performance quality, auditioning skills, self-taping, and "how to swing/dance captain".

Prerequisite(s): Completion of Ballet, Tap, and Jazz requirements; senior standing.

MTR 416 Musical Theatre Dance II 1 Credits

This is the second capstone course in the Musical Theatre dance sequence. Emphasis is placed on other dance styles used on stage, film, music videos, and television. Primary focus is on Hip Hop and Street Jazz.

Prerequisite(s): MTR 415 with a minimum grade of C.

MTR 480 Dance for Performing Artist 3 Credits

This course is a culmination of the dance elements and forms studied in ballet, tap, and jazz dance. Context areas include movement used most often in performance of music theater and movement fundamentals applicable to all aspects of presentation and principle to refine and articulate the performer's awareness and use of the body through singing and dance. Performance issues and movement as a basis for music and sound production are addressed.

Prerequisite(s): MTR 209, MTR 309.

MTR 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credit hours. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing, good academic standing.

MTR 491 Internship in Music Theater 1-12 Credits

Provides junior or senior musical theatre majors with the opportunity to gain practical experience working within a professional environment. Students must be sponsored by a musical theatre or theatre professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

MTR 492 Singing Actor: Music Theater 3 Credits

This semester combines all dramatic and musical studies to create an authentic and believable character that is both emotionally truthful and musically expressive. Music is studied as "script" and dramatic choices are prepared in relationship to all elements present in the score.

Prerequisite(s): MTR 216 and MTR 217.

MTR 493 Music Theater Production 1 Credits

Preparation and performance of a solo or ensemble role in a fully staged music theatre production. Concurrent participation in stage crew activities is required.

MTR 495 Special Topics in Theater Dance 1 Credits

This class covers discrete movement styles, techniques, or forms for the advanced dancer such as the choreography and techniques of Bob Fosse, Jerome Robbins, Jack Cole, and other theatrical dance choreographers.

Prerequisite(s): MTR 319, MTR 212, and MTR 308.

MTR 496 Music Theater Workshop 3 Credits

This class, building upon the foundational studies associated with preparation and exploration (both dramatic and musical), focuses on performances. Students are taught methods for synthesizing all former training in acting, music, and movement to the needs of the character and the play/score. Each student fully prepares at least two complete roles from the music theater repertoire. The class culminates in a performance of scenes—the Junior Cabaret!

Prerequisite(s): MTR 216, MTR 217, MTR 492.

MTR 497 Musical Theatre Senior Showcase 1 Credits

This course is a senior level capstone experience for BFA Musical Theatre students, and acts as a bridge between life in the university and life as a professional musical theatre performer. Through this course the students will, in collaboration with the teacher, compile and put together a showcase to introduce the students to casting and agent professionals in the industry by way of getting the showcase performance in front of a diverse range of industry professionals who will be useful in both casting and representing recently graduated talent.

Nursing (NUR)

NUR 400 Professionalism and Professional Values 3 Credits

Professionalism and the inherent values of altruism, autonomy, human dignity, integrity, and social justice are fundamental to nursing. The nature and scope of professional nursing, critical thinking, professional accountability, ethical decision-making, and client education as integral parts of the nursing process are examined. Quality and Safety Education in Nursing (QSEN) concepts are emphasized. This course provides a foundation for the baccalaureate nurse to have a solid understanding of the broader professional standards of moral, ethical, and legal conduct in the nursing profession and to facilitate the role of the nurse as a change agent.

NUR 401 Organizational and Healthcare Systems Leadership 3 Credits

This course provides a foundation of principles of leadership based on contemporary needs for qualified nursing leaders who can function and manage in complex healthcare delivery environments. Learning activities and assignments will focus on strategies for self-assessment and self-reflection of one's own leadership skills, knowledge, and attitudes that foster and promote nursing leadership in diverse healthcare delivery settings, and strategies for best practice in nursing leadership in the 21st century.

NUR 402 Scholarship in Evidence-Based Practice 3 Credits

This course provides a foundation of evidence-based research principles to translate evidence into practice and how research informs professional nursing practice to improve patient safety and outcomes. Learning activities and assignments will focus on strategies for learning how to assess scientific merit of data-driven research, apply evidence-based practice in appropriate ways, monitor and evaluate the impact of evidence-based practice on informed nursing practice and outcomes of care as well as collaborate with interprofessional health care teams to improve patient safety and outcomes in a variety of healthcare delivery settings.

NUR 403 Information Management and Application of Patient Care Technology 3 Credits

This course provides a foundation of information management and application of patient care technology to enhance and improve patient safety and outcomes by examining linkages between information management systems and patient care technologies that support and are linked to safe nursing practice. The course examines how technology is used to inform nursing practice and enhance patient safety by applying safeguards and decision making support tools embedded in the technologies. Students are exposed to effective clinical information systems (CIS) to document nursing care, examine the ethical components of protecting patient information, challenges with data security, regulatory requirements, confidentiality and rights to privacy as well as examine the role of the professional nurse in updating and garnering information management resources and applying them in patient care settings.

NUR 404 Healthcare Policy, Finance, and Regulatory Environments 3 Credits

This course provides a foundation of U.S. healthcare policy, including financial and regulatory policies, as well as the nature and functioning of the U.S. healthcare delivery system. There is emphasis on policy processes at the organizational, local, state, national, and global levels. Learning activities and assignments focus on strategies for learning how to assess the role of the baccalaureate-prepared nurse in policy formation and reformation at all levels, demonstrating understanding of the political process at all levels, developing effective advocacy strategies for vulnerable populations, how to identify and influence key stakeholders in the policy process, the importance of effective communication of key healthcare issues, and how to influence change in the political process at all levels when there is social injustice.

NUR 405 Interprofessional Collaboration and Communication for Improving Healthcare Outcomes 3 Credits

This course provides a foundation of key concepts essential to promotion of effective interprofessional collaboration and communication for improving healthcare outcomes and patient safety. There is emphasis in the course on examination of the roles and perspectives of scope of practice for selected healthcare disciplines in intra- and interprofessional healthcare teams to improve healthcare outcomes and promote patient safety, and on effective strategies for advocacy and communication patterns in healthcare delivery settings as healthcare professionals develop trust and respect for all members of the healthcare team while recognizing unique differences and contributions of roles to patient safety and outcomes.

NUR 406 Population Health Promotion and Prevention Across the Lifespan 3 Credits

This course provides a foundation of key concepts essential to population-focused nursing, the aggregate, community or population as the unit of care. The focus of the course is on health promotion/disease prevention with emphasis on the professional nurse role in clinical prevention of disease and care of populations applying concepts of primary, secondary, and tertiary health promotion across the lifespan, identifying determinates of health, prioritizing primary prevention across the lifespan, actively identifying and targeting populations benefitting from evidence-based preventive initiatives and clinical preventive guidelines, assessment strategies for individuals and populations, applying evidence-based practice to health promotion/risk reduction, and being an advocate for vulnerable and disenfranchised populations without resources or a voice.

NUR 407 Cultural Diversity in a Global Society 3 Credits

This course provides a foundation of key concepts essential to nursing care and professional nursing leadership in assessment, planning, design, implementation, and evaluation of the knowledge, skills, and attitudes they must have as leaders of healthcare delivery focusing on improved system safety and effectiveness. There is particular emphasis on the nursing leadership role at the baccalaureate level for nursing to recognize, interrupt, evaluate, and correct healthcare errors and to implement safety principles and work with others to create a safe, caring environment for every healthcare delivery encounter as they provide care themselves, are acting in a leadership capacity, or are overseeing and delegating to other non-licensed assistive personnel. The course content focuses on identification, assessment, planning, design, and evaluation of evidence-based practice change to improve patient safety and outcomes.

NUR 408 Gerontological Nursing Concept 3 Credits

This course provides a foundation of key concepts essential to care of an aging population in a complex society. Given the diverse health status of the aging population, professional nurses must be able to develop competencies to provide high quality care to aging adults and their families or significant others. Specifically the course focuses on increased diversity and complexity of an aging society and selected health care needs, life transitions of aging adults, normal body system changes occurring with the aging process, the professional nurse role in principled care provided to a vulnerable population, and the role of the professional nurse as advocate and caregiver promoting the concepts of quality end-of-life care for aging adults, including pain and symptom management honoring the autonomy and self-wish of the aging client.

NUR 409 BSN Capstone 3 Credits

This course provides a foundation of key concepts essential to nursing care and professional nursing leadership in assessment, planning, design, implementation, and evaluation of the knowledge, skills, and attitudes they must have as leaders of healthcare delivery focusing on improved system safety and effectiveness. There is particular emphasis on the nursing leadership role at the baccalaureate level for nursing to recognize, interrupt, evaluate, and correct healthcare errors and to implement safety principles and work with others to create a safe, caring environment for every healthcare delivery encounter as they provide care themselves, are acting in a leadership capacity or are overseeing and delegating to other non-licensed assistive personnel. The course content focuses on identification, assessment, planning, design, and evaluation of evidence-based practice change to improve patient safety and outcomes.

Prerequisite(s): NUR 402, NUR 405.

Philosophy (PHL)

PHL 100 Plato and Aristotle 3 Credits

The beginnings of Western scientific and humanistic thought among the early Greeks and their progress into the two great systems of Plato and Aristotle. Selections from Plato and Aristotle are read and discussed to determine the meaning and significance of philosophical ideas that have subsequently influenced the whole history of Western civilization. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 102 Philosophical Thinking 3 Credits

An introduction to philosophical thought with an emphasis on the enduring questions and problems of philosophy. We will explore such questions as: how do I know I am not dreaming? Is there an external world? What is truth? Is there a self? Is there a God? What is the relationship between the mind and the body? How can I tell right from wrong? What makes government legitimate? What is justice? What is the meaning of life? We will consider answers to these questions from diverse philosophical traditions, reading such philosophers as Plato, Descartes, Zhuangzi, Hume, Vasubandhu, Berkeley, Aquinas, Avicenna, Udayana, Kant, Mill, Russell, Camus, and Nishitani. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 110 Logic and Language 3 Credits

A study of the logical structure of argumentation in ordinary language, with an emphasis on the relation of logic to the uses of language in practical affairs. Traditional informal fallacies are studied as well. Discussions explore the nature of validity, truth, meaning, and evidence in relation to the evaluation of arguments. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 115 Ethics 3 Credits

A combined historical and systematic analysis of the problems of ethics. Such problems as the nature and meaning of moral values and judgments, moral responsibility and freedom, conscience and happiness, the good life, and the relativity of value, are explored through the writings of such philosophers as Plato, Aristotle, Aquinas, Kant, Mill, and Nietzsche. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 120 American Philosophy 3 Credits

The development of philosophical thought in the United States from the colonial era to the 20th century. Studies such thinkers as Edwards, Jefferson, Emerson, Thoreau, Peirce, James, Dewey, and King, and their ideas on human nature, free will, religion, morality, and politics. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 125 Philosophies of Education 3 Credits

Studies classical and contemporary theories of the nature, structure, and aims of education, including major works of such philosophers as Plato, Rousseau, and Dewey. The course will also introduce students to methods of critical philosophical analysis. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 130 Political Philosophy 3 Credits

An introduction to the problems of political philosophy with an emphasis on recent and contemporary issues, such as the conflict between liberal and conservative ideologies, fascism, revolution, civil disobedience, and the concept of legitimate political authority. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 202 Social Philosophy 3 Credits

Emphasizes social ethics through critical studies of such contemporary problems as abortion, euthanasia, the death penalty, pornography and censorship, animal rights, drug use, sexual morality, environmental ethics, and world hunger. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 203 Business Ethics 3 Credits

Surveys and examines ethical problems concerning the institutions and practices of contemporary business. Problems considered include: the conflicts of economic freedom and social responsibility; the relation of profits to work and alienation; the responsibilities of business to employees, minorities, consumers and the environment; the role of truthfulness in business practices; and the ethics of self-fulfillment and career ambitions. Readings selected from works of contemporary and historical philosophers, social theorists, and business people.

PHL 207 Asian Philosophy 3 Credits

A survey of the principal philosophical perspectives of Asia. Emphasis on the traditional Indian schools of Hinduism, Jainism, and Buddhism, Chinese Confucianism and Taoism, and the development of Zen Buddhism in China and Japan. Philosophical topics include: mystical experience, the ultimate nature of reality, the existence of a soul, the causes of human suffering, and the possibility of release, the nature of virtue and its development, and the nature of society and government. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 210 Symbolic Logic 3 Credits

An introduction to logic from the standpoint of modern symbolic methods, including techniques of formal deductive proof, quantification, the logic of relations, and properties of formal deductive systems. Discussions focus on philosophical issues in recent and contemporary logical theory. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 215 Environmental Ethics 3 Credits

A comprehensive introduction to environmental ethics that examines the major theoretical approaches, including anthropocentric (human-centered), zoocentric or sentientist (animal-centered), and biocentric or ecocentric (nature-centered) value systems, as well as the most important critiques of these ethical approaches. We will examine and analyze several classical ethical theories that are particularly relevant to a study of contemporary environmental controversies. We will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption. Students will analyze and discuss the ethical dimensions of several contemporary environmental controversies. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 225 Modern Philosophy 3 Credits

Examines one of the most exciting periods in the history of philosophy during which philosophers from Descartes to Kant tried to come to terms with the following questions: What is knowledge? Can we know the physical world exists? Can we have scientific knowledge? Can we know God exists? Can we even know whether we exist? The works of Descartes, Leibniz, Spinoza, Locke, Berkeley, Hume and Kant are read and discussed. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 226 Limits of Reason: 19th Century Philosophy 3 Credits

Studies the nature and meaning of reason, freedom, individuality, and society in the writings of philosophers such as Fichte, Hegel, Schopenhauer, Emerson, Thoreau, Comte, Mill, Spencer, Marx, and Nietzsche. Examination of the impact of such philosophies as the dialectical theory of history, transcendentalism, evolutionary theory, positivism, and existentialism on ideas about the nature and limits of human reason.

PHL 230 Philosophy of the Sexes 3 Credits

Studies philosophical views of the differences between the sexes, sexual equality, love, marriage, and the family from ancient Greece to the 20th century. Texts from the contemporary women's and men's movements will also be examined. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

PHL 252 The Nature of Art 3 Credits

An inquiry into the nature of art, creativity, aesthetic experience, and value. Special attention to the importance of art in relation to the nature of man and society. Readings from classical theories of art (Plato, Hegel, Schopenhauer, Croce, Santayana), as well as from contemporary analyses of 20th-century art.

PHL 300 Philosophy and Civilization 3 Credits

An investigation of the rise and fall of civilizations in history, studying philosophical questions such as is history cyclical? Linear? Progressive? Directed toward a final goal? What is the role of the individual in history? Of economic, political, sociological, and psychological causes? Does history have a meaning? The works of St. Augustine, Vico, Hegel, Marx, and Toynbee, and the contemporary debate about the "clash of civilizations" between Islam and the West will be discussed.

PHL 303 Philosophy of Law 3 Credits

An examination and analysis of selected topics including classical and contemporary theories in the philosophy of law and moral philosophy. Such topics as the nature of the law and legal reasoning, the legal enforcement of morality, protection of personal liberty, and the moral justification of punishment are considered. Such philosophers as Aquinas, Austin, Holmes, Bentham, Hart, and Dworkin are read and discussed.

PHL 304 Medical Ethics 3 Credits

Introduces the student to ethical problems associated with the practice of medicine, the pursuit of biomedical research, and health care social policy. The course will explore such issues as: Is a physician morally obligated to tell a terminally ill patient that he or she is dying? Is society ever justified in enacting laws that would commit an individual, against his or her will, to a mental institution? Does society have a moral obligation to ensure that all its members have access to health care? To what extent, if at all, is it ethically acceptable to clone a human being? Under what conditions is human experimentation ethically acceptable? **Prerequisite(s):** CMP 125 or CMP 203 or BHP 150.

PHL 305 Philosophy of Religion 3 Credits

An inquiry into the meaning, significance, and fundamental problems of religion as they appear in their philosophical perspective. The relation between religion and science, between faith and reason; religious experience, religious truth, and symbolism, etc. will be explored. Selections from the works of Anselm, Aquinas, Augustine, Paley, Hume, Kant, James, and Wittgenstein will be discussed.

PHL 310 Problems in 20th-Century Philosophy 3 Credits

Consideration of major philosophical movements in the 20th century such as phenomenology, existentialism, pragmatism, and analytic philosophy. Within these movements such topics as the function of analysis, language and meaning, the nature of values, the nature of persons, the synthetic-analytic distinction, the mind-body problem, and the possibility of metaphysics are considered. The work of such figures as Wittgenstein, Russell, Heidegger, Husserl, Sartre, Whitehead, and Dewey are read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 315 Existentialism 3 Credits

Historical development and contemporary problems of existentialism with emphasis on the nature of man, his ability to know his situation, the relation between existence and essence, and the meaning of human life and activity. The works of such figures as Kierkegaard, Sartre, Heidegger, Camus, Kafka, Beckett, Buber, Laing, and Frankl are read and discussed.

PHL 320 Philosophy of Science 3 Credits

The logic of fundamental concepts of science and scientific methods are studied. Patterns of explanation are examined to understand the functions of laws, theories, and predictions in science. Inquiry is made into the relation between mathematics and empirical science; similarities and distinctions between the natural and social sciences. The role of science in human affairs and the value of scientific knowledge.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 334 Theories of Knowledge 3 Credits

An investigation of selected, representative theories of knowledge from classical and contemporary sources. Considers the analytic-synthetic distinctions, necessary truth, and the foundations of empirical knowledge. Such philosophers as Leibniz, Hume, Kant, Russell, and Quine are read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 336 Philosophy of Mind 3 Credits

An investigation of the nature, existence, and capacities of the mind and self in the light of recent philosophical and psychological theories, including psychoanalysis and behaviorism. Considers such topics as the interaction of mind and body, the unconscious, minds and machines, freedom of thought and action.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 343 Theories of Reality 3 Credits

An examination of metaphysical problems with an emphasis on philosophical views of human nature from ancient Greece to contemporary evolutionary theories. The writings of such classical, modern, and contemporary figures as Plato, Aristotle, Descartes, Kant, Hegel, and Darwin are read and discussed. Issues studied include the relation between mind and matter, freedom and determinism, and the existence of God.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 348 Indian Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of India. Emphasis on the disputes between the traditional Hindu and Buddhist schools of the classical period over logic, knowledge, and reality. Philosophical topics include: skepticism, the problem of universals, realism and idealism, the nature of perception, the problem of induction, the nature of causality, and the problem of identity over time. Philosophers such as Nagarjuna, Vasubandhu, Vatsyayana, Dharmakirti, and Udayana will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 358 Chinese Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of China. Emphasis on the political philosophies of ancient China. Topics include: human nature and the development of virtue, the nature and purpose of government, and the cognitive value of mystical experience. Philosophers such as Confucius, Laozi, Xunzi, Mencius, Mozi, and Zhuangzi will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 360 Contemporary Ethics 3 Credits

An examination of recent and contemporary challenges to traditional ethical theory including such movements as logical positivism, cultural relativism, feminism, environmentalism, multiculturalism, and postmodernism. Such problems as the meaning and cognitive status of value judgments, the relation between fact and value, the relativity of values, and how value judgments can be justified are considered.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 368 Japanese Philosophy 3 Credits

Consideration of major movements in the philosophical tradition of Japan, with an emphasis on Zen Buddhism in Medieval Japan and the Kyoto school in the 20th century. Topics include: the use of meditation and koans in Zen practice, the relationship between practice and enlightenment, the nature of time, meaning and nihilism, and the relationship between science and religion. Philosophers such as Kukai, Mumon, Dogen, and Nishitani will be read and discussed.

Prerequisite(s): CMP 125 or CMP 203 or BHP 150.

PHL 402 Nietzsche and Nihilism 3 Credits

A seminar dealing with Nietzsche's provocative ideas on nihilism and the possibility of creating meaning, value, and truth for human existence. Many of his important works are read, analyzed, and critically discussed. Recent scholarly interpretations of Nietzsche's philosophy are considered.

Prerequisite(s): any previous philosophy course or permission of instructor.

PHL 404 Philosophy of Wittgenstein 3 Credits

Seminar involving a concentrated study of Wittgenstein's contributions to philosophy with special attention to his analysis of language, meaning, and mental concepts.

Prerequisite(s): any previous philosophy course or permission of instructor.

PHL 406 Philosophy of David Hume 3 Credits

Seminar involving a concentrated study of Hume's contributions to philosophy, including his work on epistemology, metaphysics, ethics, philosophy of science, and philosophy of religion.

Prerequisite(s): any previous philosophy course or permission of instructor.

PHL 407 Philosophy of Hannah Arendt 3 Credits

Seminar involving a concentrated study of the philosophy of Hannah Arendt with special attention to her analysis of action, thought, and freedom.

Prerequisite(s): any previous philosophy course or permission of instructor.

PHL 408 The Philosophy of William James 3 Credits

Seminar involving a concentrated study of William James' contributions to philosophy with special attention to his pragmatism, pluralism, and radical empiricism. Many of James' philosophical works are read, analyzed, and critically discussed. Recent scholarly interpretations of James' philosophy are considered.

PHL 418 Great Buddhist Thinkers 3 Credits

Concentrated study of a single Buddhist philosopher, emphasizing the systematic views of that philosopher across a range of philosophical issues. Through an examination of primary sources in translation and recent scholarship, students will investigate the views and arguments of one important figure from the Buddhist philosophical tradition on a variety of philosophical problems regarding knowledge, existence, consciousness, religion, and ethics.

PHL 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

PHL 491 Internship in Philosophy 1-4 Credits

Students will work under supervision within an area hospital, corporation, or legal agency. The specific duties and tasks will be developed jointly by the intern, intern agency, and faculty supervisor. Within the hospital setting, students will work with the Hospital Medical Ethics Committee. Within the corporate setting, there will be two types of internships: students will work in the corporate office responsible for addressing the ethical issues that arise in the business environment; or students will work in a department that allows them to explore the potential business applications of their philosophic intellectual training. Within the legal setting, students will work with the federal magistrate, prosecutor, or public defender, exploring issues in the philosophy of law that arise in the practice of law. Students must have completed four philosophy courses, one at the 300 level, before applying for the internship. No more than six credits will be allowed toward graduation. A member of the department of philosophy will supervise the internship.

Prerequisite(s): juniors and seniors with a minimum of 2.7 cumulative GPA and 3.0 GPA in philosophy, or permission of the department of philosophy.

PHL 494 Preparation and Research for Senior Philosophy Thesis 1 Credits

Supervised by a faculty member, the Philosophy major chooses a topic, composes an outline and a bibliography. Must be completed prior to enrolling in PHL 495.

PHL 495 Senior Philosophy Thesis 3 Credits

In a tutorial setting, the Philosophy major will write a thesis which serves as the Capstone Experience in the Department.

Prerequisite(s): PHL 494.

Physics (PHY)**PHY 100 Principles of Physics I 3 Credits**

Introductory noncalculus physics with applications for pre-professional, biology, and geological, environmental and marine sciences majors. Classical mechanics, energy, mechanical waves, fluid statics and dynamics, thermodynamics. Elements of modern physics are interwoven with those of classical physics from the beginning. Not open to chemistry, physics, or mathematics majors. Three hours of lecture per week. Prerequisite(s): MTH 105, MTH 210, MTH 211 or MTH 212.

Corequisite(s): PHY 100L.

PHY 100L Principles of Physics I Lab 1 Credits

For students concurrently taking PHY 100. One three-hour lab per week.

Corequisite(s): PHY 100.

PHY 101 Principles of Physics II 3 Credits

Continuation of Physics 100. Electrostatics, electricity, and magnetism; DC and AC circuits, physical and geometrical optics, introduction to elementary particle and quantum physics. Three hours of lecture per week. Prerequisite(s): PHY 100.

Corequisite(s): PHY 101L.

PHY 101L Principles of Physics II Lab 1 Credits

For students concurrently taking Physics 101. One three-hour lab per week.

Corequisite(s): PHY 101.

PHY 103 Science of Light and Color 3 Credits

An introduction to the science of light, color, and optics. Covers history of theories of light and vision, applications in art, photography, natural phenomena (rainbows, mirages, etc.), and modern technology, e.g., lasers and telecommunications. Many topics are illustrated by in-class demonstration experiments with lasers and other optical devices.

PHY 104 Energy, the Environment & Man 3 Credits

The many vital roles played by energy in the universe at large, on the earth, and in the activities of man are examined, including the basic sources of energy, the impact upon the environment due to these processes and possible future sources. A high school course in physics or chemistry is desirable but not necessary.

PHY 105 Matter, Forces, and Energy: A Exploration of Physics Concepts 4 Credits

An introduction to the basic principles of physics focusing on the concepts of matter, force, and energy. The course will study, in depth, simple physical systems chosen to emphasize the interconnection of these three basic concepts. It will explore the behavior of these simple physical systems using directed group exercises coordinated with hands-on laboratory activities. One three-hour lecture and one three-hour lab per week.

PHY 105L Matter, Forces and Energy Lab 0 Credits**PHY 180 Astronomy 3 Credits**

Examines mankind's quest to understand the origin and form of the universe. Emphasis on the ideas of modern cosmology and their impact on our changing perception of our place in the universe, making use of information gleaned by simply looking at the night sky as well as post Apollo-era views of the solar system and the evolving universe as a whole.

PHY 200 General Physics I 4 Credits

Introductory classical physics; Newtonian mechanics, including the conservation laws, wave motion, gravity, thermodynamics. Three hours of lecture and one three-hour lab per week. Prerequisite(s): MTH 210 or concurrent enrollment

Corequisite(s): PHY 200L.

PHY 200L General Physics I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 200.

PHY 201 General Physics II 4 Credits

A continuation of the concepts developed in Physics 200. Electricity, electrical circuits, magnetism, Maxwell's equations. Light and optics, including lenses, interference, and diffraction. Three hours of lecture and one three-hour lab per week. Prerequisite(s): PHY 200, MTH 211 or concurrent enrollment.

Corequisite(s): PHY 201L.

PHY 201L General Physics II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PHY 201.

PHY 203 Introduction to Modern Physics 3 Credits

Covers space-time relativity, elementary particles, and basic quantum mechanics, including solutions of the Schrodinger wave equation. Applications of quantum theory in atomic, nuclear, and solid-state physics.

Prerequisite(s): PHY 201 or permission of instructor.

PHY 250 Scientific Computing 3 Credits

Introduces students to modern techniques and applications of scientific computing. Students will learn to write code in python, a popular, modern programming language used by scientists and industry around the world. They will also retrieve and analyze large datasets using SQL, a standard database language. Students will develop their own software and learn to manage it online using github, an online code repository.

PHY 300 Mechanics 3 Credits

Kinematics and dynamics of particles and systems, analysis of harmonic oscillator systems, normal modes, Lagrangian and Hamiltonian dynamics and classical waves are studied.

Prerequisite(s): PHY 201, MTH 250.

PHY 305 Electricity and Magnetism 3 Credits

Electro- and magnetostatics, fields and potentials, and boundary value problems are covered.

Prerequisite(s): PHY 201, MTH 250.

PHY 310 Advanced Electricity and Magnetism 3 Credits

Maxwell's equations; electromagnetic waves in vacuum and in material media; radiation, propagation, reflection, and refraction.

Prerequisite(s): PHY 305, MTH 308.

PHY 315 Thermodynamics and Statistical Mechanics 3 Credits

Thermodynamic systems; the first and second laws of thermodynamics; entropy and thermodynamic potentials; distribution of molecular speeds; Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac distributions.

Prerequisite(s): PHY 201.

PHY 320 Quantum Mechanics 3 Credits

Historical background; the Bohr Theory; the Schrodinger equation, its interpretation and applications; the uncertainty and exclusion principles; development of the formalism.

Prerequisite(s): PHY 300.

PHY 330 Basic Electronics 3 Credits

An experimental study of devices and circuits in analog and digital electronics. No previous experience with electronic circuits is assumed; introductory topics including signal acquisition, computer interfaces, and analog/digital signal processing will be covered. One hour of lecture plus two three-hour labs per week.

Prerequisite(s): PHY 201 or permission of instructor.

PHY 350 Advanced Laboratory 2 Credits

Experiments in atomic and nuclear physics, electricity and magnetism, and physical optics. Students have the opportunity to work intensively on a particular experiment. Minimum of five to six hours per week.

PHY 400 Atomic Physics 3 Credits

Quantum mechanics and the one-electron atom; atomic structure and optical spectra of multi-electron atoms. Quantum statistics, band theory of solids.

Prerequisite(s): PHY 320.

PHY 405 Fundamentals of Nuclear Physics 3 Credits

Nuclear mass and size; nuclear forces and some models of the nucleus; radioactivity and detection; subnuclear particles and resonances.

Prerequisite(s): PHY 320.

PHY 415 Physical Optics 3 Credits

Waves and the superposition principle; interference, Fraunhofer and Fresnel diffraction; electromagnetic nature of light; absorption and scattering; dispersion; polarization.

Prerequisite(s): PHY 201, MTH 250.

PHY 416 Modern Experimental Optics Lab 1 Credits

A laboratory course in geometrical and physical (wave) optics, designed to supplement the material presented in PHY 415. Serves as an introduction to the optical equipment and techniques that are employed in laboratory research. A series of experiments cover the topics of polarization, interference, image formation, Fourier optics and lasers, and optical spectroscopy.

Prerequisite(s): PHY 201.

PHY 450 Topics in Modern Physics 3 Credits

A selected topic of contemporary interest in physics, e.g., general relativity and gravity waves, is studied. Emphasis on current journal literature and research. May be taken more than once with departmental approval. An excellent introduction to independent research in one area of physics.

Prerequisite(s): PHY 201.

PHY 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in laboratory research. The student learns to organize material, use the literature, make precise measurements, and obtain reproducible data. If possible, the student will publish the results or present them at a scientific meeting.

PHY 491 Internship in Physics 1-4 Credits

A supervised research experience in an approved organization where qualified students gain real-world knowledge and utilize their academic training in a professional environment. Placement may be in private, public, non-profit, or governmental organizations under the guidance of a mentor. The mentor and student will have regular consultation with the departmental internship coordinator to assess the student's progress. Normally, 50 hours of internship per credit is required. The grade for the course will be determined by the student's overall performance in their research work, a research paper documenting their work with their internship mentor and an oral or poster presentation at the end of the semester.

Prerequisite(s): 2.5 GPA and permission of the instructor.

Political Science (POL)

POL 100 Introduction to American Politics 3 Credits

An examination of basic principles of the U.S. constitutional system; the operation of the democratic process; the organization, powers and procedures of Congress, the presidency and the federal judiciary; and the functions, services, and financing of the national government. Emphasis is on public issues, national priorities, and civil liberties. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Note: This course is cross-listed as HLS 100. Students may not get credit for both POL 100 and HLS 100.

POL 102 Understanding Politics 3 Credits

Introduction to the study of politics and government, including major political theories and ideologies, systems of government (i.e., presidential, parliamentary, authoritarian, totalitarian), public opinion and behavior, international relations and war, and contemporary policy issues. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

POL 200 NJ Government and Politics 3 Credits

Political institutions, processes, and problems of state and local governments of New Jersey. Analysis of legislative, executive, judicial, regulatory bodies, special districts, and autonomous agencies. Aspects of personnel, finance, and services, as well as political parties and elections.

POL 201 Policy Issues, Advocacy, and Budgeting 3 Credits

Surveys various domestic economic and social policy issues, the government budgeting process, and how citizens and groups advocate their interest through organizing, coalition-building and lobbying. Emphasis on developing practical skills in issue analysis, lobbying, legislative tracking, and public budgeting.

POL 202 The Political System - Theories and Themes 3 Credits

This course serves as a gateway to the subfields of comparative politics and international relations. The concept of the political system helps political scientists to organize political interrelations into patterns that allow systematic selection and interpretation of information and the study of processes and outcomes of politics in a variety of settings. The course introduces students to the main brands of normative theory prescribing the principles directing the operation of the political system, to some of the most important methods used to compare political systems and/or their components, and to the foremost approaches utilized in the study of the relations between political systems and their environments. Note: This course is cross-listed as HLS 202. Students may not get credit for both POL 202 and HLS 202.

POL 203 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective. Note: This course is cross-listed as HLS 203. Students may not get credit for both HLS 203 and POL 203.

POL 204 Development and Structure of the US Intelligence Community 3 Credits

This course provides a historical review of intelligence following World War II. It will examine the major functions of intelligence, as well as intelligence as a part of the foreign policy process: collection, analysis, counterintelligence, and covert action. Students will be introduced to a range of collection procedures: human, open source, electronic, photographic, and signal, with emphasis placed on interpreting and writing intelligence summaries. Note: This course is cross-listed as HLS 204. Students may not get credit for both POL 204 and HLS 204.

POL 205 Introduction to Public Policy 3 Credits

The course provides students with an introduction to the study of public policy by linking the theoretical with the practical. The course focuses on three areas of analysis: 1) descriptive 2) evaluative and 3) prescriptive. Students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options. Last the course provides examples of public policy problems through the substantive policy areas of health, environment and education.

POL 206 Healthcare Regulation and Governance 3 Credits

Health Regulation and Governance explores the institutions, processes and actors involved in governing and regulating the healthcare system in the US. The course engages the topic through the lens of federalism by examining the role of the Executive, Legislative and Judicial branches of government in regulating and governing healthcare at the national level as well as the role of the states in this policy area. Students will not only be introduced to the structure of regulation and governance of healthcare in the US, but will also be able to contextualize contemporary issues in healthcare in order to not simply addresses problems in the sector, but to also begin to identify solutions to issues that impact the population.

POL 210 Public Opinion 3 Credits

Public opinion as a social force and as expression of public sentiment on political and social issues. Topics include: development and dissemination of opinions, the measurement of public opinion, public opinion and governmental processes, and the reciprocal relationship between mass media and public opinion. Note: This course is cross-listed as GLS 210. Students may not get credit for both POL 210 and GLS 210.

POL 215 Global Politics 3 Credits

The struggle for power, wealth, and order at the global level involving nation-states, intergovernmental organizations (such as the United Nations, the European Union, etc.), non-governmental organizations, transnational enterprises and other non-state entities, using military, economic, diplomatic, legal, and communication instruments. Overview of global problems such as the proliferation of weapons of destruction, ethnic and religious conflicts, human rights, and the global environment in the 21st century. Note: This course is cross-listed as GLS 215. Students may not get credit for both POL 215 and GLS 215.

POL 216 Comparative Political Systems 3 Credits

A general introduction to types of government and political regimes of the world as they try to cope with the dual challenge of ethnic micropolitics and transnational globalization. Major prototypes of democracy: the British parliamentary system, the American separation of powers system, and various combinations of these two. Traditional autocracy, totalitarian dictatorships, and late 20th-century authoritarian regimes. Students are expected to acquire in-depth knowledge of comparative political systems, and to develop a basic understanding and appreciation of the major concepts and themes in comparative political systems studies.

POL 220 Terrorism & Counter Terrorism 3 Credits

This course introduces students to the arguments about the definition of terrorism, the historical use of terrorism and the roles of ideology, religion, and psychological factors that help explain and predict it. The course seeks to identify the components of national security policy aimed at countering such elements and their cost, both in financial and civil right terms. Finally, to illuminate both the definition and the policies discussed, the course will offer brief comparisons with other states, especially Israel, the UK, and Russia.

POL 225 Nationalism in World Politics 3 Credits

Nations and nationalism. An overview of nationalistic manifestations in the world today. Nations, states, nation-states. Multinational states, stateless nations. Imperialism, anti-imperialism; nativism vs. internationalism and globalism. Topics include nationalisms in the Holy Land; in the former Yugoslavia; in the former Soviet Union and its successor states; and economic Nationalism vs. Globalization. Note: This course is cross-listed as GLS 225. Students may not get credit for both POL 225 and GLS 225.

POL 230 Methods of Political Analysis 3 Credits

An overview of the various qualitative and quantitative methods that political scientists use to study their discipline. Themes include analyses of political participation and support, methods of studying elections, measures of political tolerance and liberalism.

POL 235 Race and Ethnicity in American Politics 3 Credits
