Examines the changing political, economic, and social situation of racial and ethnic groups in American politics since the 1950s. Topics include the relationship between race/ethnicity and voting behavior, political parties, and election results. Includes an analysis of specific areas of contemporary racial and ethnic conflict, such as voting rights, immigration, and affirmative action.

POL 239 Political Thinkers & Thought 3 Credits

A survey of the most significant political thought from ancient times into the modern era. Subject matter includes discussion of such questions as the nature of freedom, natural law and right, constitutionalism, political obligation, justice, form of regime.

POL 247 Political Campaigning 3 Credits

This course entails the study of campaigning for political office at the federal, state and local levels in the United States. While attention will be given to how the broader political environment and specific factors, e.g., partisanship, hot button issues, local interests, and money, affect the nature of campaigns, the course's primary focus will be on how to organize and conduct a successful and ethical campaign, including how to collect and analyze pertinent data, manage a staff, develop a communications plan, including social media, and get out the vote.

POL 255 European Politics 3 Credits

A comparative analysis of the social and political systems of Britain, France, Germany and other Western countries within the European framework. Emphasis will be on the identification of ways in which countries similar in social characteristics are also similar in their political systems and on the extent and circumstances under which they differ. Similarities and contrasts will also be drawn with political structures and processes in the United States. This course, on occasion, may contain an optional travel component during January.

POL 260 Politics of Law and Order 3 Credits

The constitutional, legal, political, and administrative aspects of the criminal justice system in the United States are studied, including the court system at all levels of government, law enforcement agencies, correctional programs and institutions, probation, parole, and the relationship of our legal institutions to the broader political system.

POL 270 Interest Groups and Lobbying 3 Credits

The course will introduce students to the area of interest groups and lobbying. Topics to be covered include theoretical developments, methodological approaches of group formation, organizational maintenance, and strategies used to influence public policy in the executive, legislative, and judicial branches of government.

POL 280 Sex & Gender in International Politics 3 Credits

What's a student of political science, International Relations (IR), or another social science field to do about feminism? This is a question that has troubled IR for decades. While feminist debates engaged people in spaces outside the disciplines of political science and particularly IR, IR scholars did their best not to see the relevance of feminism for their own debates. That did not stop some feminists from rethinking key IR concepts like power, race and the state, but such contributions were largely ignored by IR scholars until very recently. It was only in the last decades, when feminist questions pushed their way onto the IR agenda through books, journals, and conferences, that feminism suddenly seemed attractive to IR scholars. Designed as an interdisciplinary course with a strong reference to Global and International Politics, this course will provide a basic introduction to some of the major global questions as seen through a feminist lens. This course is cross-listed as GLS 280. Students may not get credit for completing both GLS 280 and POL 280.

POL 281 Sex & Gender in U.S. Politics 3 Credits

Legal traditions have long maintained that a "man's home is his castle," beyond the reach of the state (thereby ignoring "private" injustices like domestic violence). But the state has always found ways to justify some interventions in citizens' private lives, including legislation of abortion and homosexuality. The personal has always been political, as second-wave feminists rightly insisted in the 1960s. This course examines the intersection of private and public, looking at the ways in which sex, identity and sexuality are implicated in and shaped by politics and policy-making: including the gendered division of labor inside and outside the home; the politics of gender identity; the legislation and policing of sex, sexuality, marriage and families; and the challenges facing women who enter politics. We will ask provocative and pressing questions like: How do sex and sexuality intersect with race, class, disability, and more? Can women (or anyone) really "have it all"? What is the future of transgender rights in the U.S.? Why do women still make up only 20% of Congress? Do women lead differently? To answer these questions, we will turn to political theory, political science, public policy, legal studies, and more.

POL 295 Special Topics in Political Science 3 Credits

For non-seniors who engage in serious research in political science. Topic to be approved by instructor and department chairperson.

POL 300 U.S. Constitutional Law 3 Credits

The role of the Supreme Court in the American political system is assessed. Topics include the staffing and functioning of the Supreme Court and the federal judicial bureaucracy, the origins and development of judicial review, and the role of the Supreme Court in national policy-making. Note: This course is cross-listed as HLS 300. Students may not get credit for both HLS 300 and POL 300.

POL 301 Civil Liberties in the U.S. 3 Credits

The American doctrine of civil liberties in theory and practice. Emphasis on analyzing the freedoms of speech, press, assembly, and religion, the right of privacy, and the problem of discrimination in the context of contemporary issues and problems. Particular attention to the role of the Supreme Court in this area. Note: This course is cross-listed as HLS 301. Students may not get credit for both HLS 301 and POL 301.

POL 302 Insurgency 3 Credits

The course explores the occurrence of insurgencies and civil wars. It examines the causes of such conflicts by focusing on the role of resources, state capacity, ethnic/religious differences and power in the initiation of violence. Students will learn how recruitment tactics and access to funding sustain guerrilla warfare. Lastly, the course will focus on conflict management by emphasizing specific tools for terminating and preventing intrastate conflicts including the impact of international interventions, counterinsurgency strategy of winning the hearts and minds, institutional design, and reconciliation.

POL 303 Global Justice 3 Credits

This course examines some of the most vexing problems in today's world of global interconnectedness. How can we harness the potential of global cooperation to solve problems that cross national borders? We will critically analyze the potential for human rights to protect vulnerable individuals, including victims of human trafficking. We will also evaluate the distribution of global resources and costs, including natural resources, extreme poverty and environmental degradation. What do we owe those who live in distant lands? Throughout we will ask how reality matches up to our best hopes for the present and future.

POL 304 Political Behavior: Fear, Risk and Crisis 3 Credits

The course focuses on various analytical approaches in behavioral political science. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior—e.g., voting/non-voting, the formation of political partisanship and ideology, issue perceptions, responding to risk and uncertainty in the political environment, and engaging in civic political participation. Note: This course is cross-listed as HLS 304. Students may not get credit for both POL 304 and HLS 304.

POL 305 Political Parties and Electoral Behavior 3 Credits

The structure, character, and functions of U.S. political parties and pressure groups, and their impact on public policy. Parties are analyzed within the broader scope of organizational theory and comparative party systems. Major emphases on their historical origins, their role in contemporary political life, and particular aspects of party politics—local organization, membership, campaigning and elections, policy-making roles, and leadership.

POL 306 American Political Film 3 Credits

This course analyzes the structure, history, and impact of the genre of political film. It begins with a discussion of how one distinguishes a political film from other forms of cinema. It then proposes insights into the manner in which these films evoke a particular time and place in politics, affect the viewer's interpretation of a political event or figure, and have an effect upon a viewer's political perceptions or behavior. The student will also learn to review films critically, both as political statements and as effective (or ineffective) conveyors of political messages. Note: This course is cross-listed as GLS 306. Students may not get credit for both POL 306 and GLS 306.

POL 307 Political Communication 3 Credits

The meaning and uses of political communication are examined, the manner and forms such communication takes, and the history of political discourse. Major topics include the role of communication in elections and the development of public policy, how political communication strategies have changed with the rise of mass media, and the development of national and international publics for discourse. Note: This course is cross-listed as GLS 307. Students may not get credit for both POL 307 and GLS 307.

POL 308 Capitalism and Inequality 3 Credits

This class is about market economies: how they are theorized, how they operate, and how they affect the humans who live and work within them. The first part of this course offers an overview of major modern theorists of capitalism (with selections chosen for a political science audience), including Smith, Veblen, Schumpeter and Keynes. These thinkers have made influential contributions to debates about the proper role of government in regulating and shaping economic relations and conditions. We then turn to contemporary theories of distributive justice, including libertarianism and egalitarianism. The second half of the course explores realities of socioeconomic inequality, the experience of poverty in the U.S., as well as the kinds of policies which might alleviate or resolve various dimensions of inequality and poverty. This course prepares students to evaluate public policies and articulate policy positions while attending to their economic and human costs.

POL 310 Political Psychology and Human Nature 3 Credits

The 2016 presidential campaign season saw a marked increase in partisanship, polarization, animosity and resentment among Americans, mirroring a worldwide trend toward "tribalistic" group identification at the expense of outsiders. Why can't we all just get along? What makes it so hard to sympathize with those who seem different or unfamiliar, and so easy to assume the worst about them? This course will bring together classic political theory, psychology and the social sciences, in order to help explain political beliefs and behaviors. We will begin by considering how classic political theory has conceptualized human nature, and the various implications for political life. We will then consider scientific perspectives: evolutionary anthropology, social psychology and cognitive neuroscience. We will examine the role of bias in cognition and politics and we will critically interrogate assumptions about rationality. We will also see that different psychological dispositions underlay conservatism and liberalism. Ultimately, this course will consider how these features of human cognition shed light on partisanship and polarization, racial bias, and policy preferences, including popular reception of science concerning vital issues such as climate change and the safety of GMOs. We will conclude with considerations of how a better understanding of psychology might propel us toward a more productive political discourse.

POL 311 Sovereignty, the State and Borders 3 Credits

Borders have a prominent place in politics and human history. In the twentieth century, the best-known barriers were the militarized Maginot Line and the Iron Curtain. Today, the political popularity of borders persists but the nature and quality of these borders and the threats they were created to repel have changed. Modern borders are designed not to keep militaries out, but to deter a perceived invasion of "undesirables"—with terrorists and unwanted immigrants leading the list of state concerns. Nowhere is this more evident than along the geographic fault lines dividing rich and poor regions, e.g. the Mediterranean Sea and the U.S.-Mexican border region. This course will examine the dynamic interactions between the question of how to govern borders and the twenty-first century liberal state with its diluted sovereignty—due to immigration, trade and international laws and regimes.

POL 312 Congressional Politics 3 Credits

An intensive analysis of the legislative process in the United States, considering both the internal organization and operation of Congress, and Congress' role in the broader American political system. Fundamental issues include the theory and practice of representation; the committee system, seniority and expertise; executive and legislative interaction; and the politics of congressional reform.

POL 313 American Presidency 3 Credits

A description and analysis of the American presidency: its historical development, the internal organization, and ecological context. Basic issues include the intent of the framers of the Constitution, the historical accumulation of presidential powers, and institutional limits on presidential power (e.g., Congress and the bureaucracy).

POL 314 Congressional Power and National Security Policy 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. Particular attention is paid to the role of the US government being able to balance individual rights and liberties within the national security state. Last, the course also takes an in-depth analysis of the U.S. Congress, looking comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror? Note: This course is cross-listed as HLS 314. Students may not get credit for both HLS 314 and POL 314.

POL 315 Global Issues 3 Credits

Military, economic, demographic, and environmental threats to global security in the post-Cold War era. Forces of transnational integration vs. forces of intrastate fragmentation. Inadequacy of international law and organization to deal with these problems within the confines of the sovereign nation-state system. Note: This course is cross-listed as GLS 315. Students may not get credit for both POL 315 and GLS 315.

POL 316 Presidential Power and National Security Policy 3 Credits

This course examines the development of the National Security State since the Second World War, and the ways in which it has affected, and been affected by, the Federal Executive. Topics to be covered will include the post-World War II redefinition of "national security", the Cold War (with a special focus upon war powers during Korea and Vietnam) and the changes that have occurred with the "War on Terror." Note: This course is cross-listed as HLS 316. Students may not get credit for both POL 316 and HLS 316.

POL 317 Model United Nations 3 Credits

Model United Nations (POL 317) is the course that prepares Rider University's award-winning Model United Nations (MUN) team for the annual National MUN competition in New York City. The team has brought home top awards for the past decade and continuously strives for excellence. POL 317 is a student-led course that hones writing, public-speaking and researching skills of student-delegates and it represents student engagement at the highest level. Chosen through a rigorous selection process in the fall semester, the student-delegates write position papers during the winter break, and develop caucusing, team-working, and presentation skills in class during the spring semester. During the past five decades, Rider University's MUN team has represented more than 50 countries, and competed with thousands of delegates from national and international universities. It is one of the premier engaged learning and cohort-building institutions on campus.

POL 318 Conflict Resolution 3 Credits

How do you craft a peace deal in a war-ravaged environment? Can negotiations with rogue regimes succeed and prevent the onset of conflict? With massive casualties, and unspeakable human rights abuses, conflicts continue to present a challenge to people around the globe. In this course, we will explore the dynamics of conflict management designed to keep countries from waging violence against each other. Our focus is both on ending existing violent conflicts and on preventing escalation of tensions. We will explore the impact of mediators and external interventions by international organizations or individual countries on conflict management. We will also examine the role of the International Court of Justice in resolving disputes when direct negotiations fail to succeed. Finally, we will study existing peacebuilding efforts designed to improve relations among victims and killers in post-conflict environment. Insights from theory on commitment problems will help us understand why peace is more vulnerable in domestic than in international conflicts. Throughout the semester, we will rely on various case illustrations from international and domestic conflicts, and participate in a simulation activity that will allow us to assume the roles of negotiators in disputes.

POL 319 Terrorism, Revolutions and Political Violence 3 Credits

Revolutions are the mad inspiration of history. Trotsky's characterization calls attention to three important dimensions of violent political participation: the historical settings, ideology, and emotional fervor of the practitioners. The course focuses on these dimensions by analyzing revolutionary and terrorist movements in the 20th century. Special attention is given to the use of violence in the post-Cold War new world disorder. Note: this course is cross-listed as HLS 319 and GLS 319. Students may only get credit for one course: HLS 319, GLS 319 or POL 319.

POL 320 Politics of the Middle East 3 Credits

The course emphasizes the relationships between social and political structures, the role of religion, and the problems of modernization in the Middle East. Similarities and contrasts will be drawn between the Arab and non-Arab countries of the Middle East. The political systems of Egypt, Syria, Israel and Saudi Arabia are examined in terms of political culture, structure, and political processes.

POL 321 International Law 3 Credits

This course covers the basic doctrines of international law and their relationship to the contemporary international community. These include the jurisprudence of international law; the history of the international legal system; customary international law; Treaty law; sovereignty, statehood and recognition; jurisdiction and immunities; the role of international organizations; international criminal responsibility; and the relationship of the international legal system to the U.S. domestic legal system. The objectives of international law are to foster the peaceful settlement of disputes; facilitate transnational communication and commerce; encourage respect for human rights; as well as to preserve the environment. This course is cross-listed as GLS 321. Students may not get credit for both POL 321 and GLS 321.

POL 322 African Politics 3 Credits

Africa is in a process of transition, a continent of growing strategic importance to the U.S. and a land with considerable variation in political and economic success. The course is an introduction to the politics of sub-Saharan Africa. To understand the continent's current challenges, the course examines the legacies of colonial rule, including colonial mark on the politics of ethnicity; focuses on the rise of authoritarianism in Africa in the 1970s and 1980s; examines the success and failure of democratization that is transforming the continent today; embarks on the quest to understand the continent's struggle with poverty and debt. Lastly, the course explores some of the biggest obstacle to Africa's stability, including state collapse, wars, corruption, while contemplating the future that lies ahead.

POL 325 Public Administration 3 Credits

Public administration in modern society, emphasizing the administrative formulation of public policy and its implementation. Attention on who gets what, when, and how from the decisions of administrative units; the role administrators have in policy-making compared to elected legislators, chief executives and judges; the effect administrators have on the benefits citizens receive from government; and the effect administrators have on citizens' behavior. Note: This course is cross-listed as HLS 325. Students may not get credit for both HLS 325 and POL 325.

POL 326 Power in American Politics 3 Credits

Examines various explanations of who has power in American politics. Explores the roles of appointed and elected officials, business and interest groups, the media, and the general public in shaping public policy. Special attention to political change, including the impact of broad social movements on the responsiveness of the political system.

POL 327 Contemporary Issues in American Public Policy 3 Credits

An in-depth examination of current issues in American politics. Drunk driving, political corruption, drug policy, education, and poverty are among the issues to be considered. Emphasis on analyzing policy problems and on developing and evaluating proposed solutions.

POL 328 Environmental Politics 3 Credits

Environmental Politics examines how policymakers deal with the political challenges of unsustainable resource consumption, which is a primary determinant of environmental problems such as climate change, adverse health effects, and biodiversity loss. The course introduces students to environmental politics and policies at the local, state, national, and international levels. The course is designed to provide students with a framework for understanding how varied interests compete within political institutions in order to transform contending ideas into public policy. With that in mind, students will not only become more informed consumers of political information, but will also become more effective at analyzing and advocating for policies as it relates to the environment.

POL 329 Comparative Environmental Policy 3 Credits

Comparative Environmental Policy analyzes cross-national approaches in developing, implementing, and evaluating policy responses to environmental problems. The course analyzes the political factors, actors, and tools that help and explain why some societies have been more likely to develop effective responses to environmental threats. Note: This course is cross-listed as GLS 329. Students may not get credit for both GLS 329 and POL 329.

POL 330 Geopolitics of Energy 3 Credits

Geopolitics of Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

POL 331 Political Corruptions 3 Credits

This course will introduce students to one of the central political issues in the USA as well as abroad: corruption. Whereas this was considered in earlier days as 'temporary malady' of third world systems, today it is considered a pervasive phenomenon in democratic systems as well. As such it acquired widespread scholarly as well as public attention in established democracies such as the USA (at least since the elections of 2016). The course will utilize a range of approaches to examine the meaning of corruption, the link between what the law defines as corruption and what is understood by the term by broad publics, the interaction between both conceptions and system legitimacy, and the methods by which corruption may be contained.

POL 335 Urban Politics 3 Credits

Political structure and administration of municipalities in the United States. Emphasis on challenges posed by suburbanization, global and regional shifts in business, economic dislocation, housing, mass transportation, race relations, and policing.

POL 340 Modern Democracy and Its Critics 3 Credits

The course examines the fundamental assumptions underlying modern democratic theories and the main theoretical attacks launched against them. Among the contending theories to be discussed are right and left-wing anarchism, the old and the new left, fascism, intellectual elitism, and techno-conservatism. Note: This course is cross-listed as GLS 340. Students may not get credit for both POL 340 and GLS 340.

POL 342 Contemporary Political Theory: Freedom and Authority 3 Credits

Concepts of freedom and authority in 19th and 20th-century political theory. Emphasis on such important thinkers as Nietzsche, Freud, Sartre, Camus, and Marcuse. Note: This course is cross-listed as GLS 342. Students may not get credit for both POL 342 and GLS 342.

POL 343 American Political Thought 3 Credits

The philosophical background and moral principles of American political society: liberty, equality, natural law and natural right; constitutionalism and nation-building. The development of the ideologies of liberalism, conservatism, and libertinism are also covered.

POL 345 Ancient Political Theory: Justice 3 Credits

The existence of society over time requires high degree of predictability and hence laws, whether explicit or implicit. These derive their capacity to regulate life from the widespread notion that they are proper and that they should be obeyed. In a word, they accord to our notions of justice. These, however, are not stable. Resting on the understandings of man, society, nature and the relations between them, they develop under the impact of human thought and changing realities. The result is what can be compared to a layered cake. This course treats some of the main contributions made by philosophers from Plato to Rawls to our concept of justice and the manner by which they have shaped our concepts of justice in the US and West in general. Cases in which courts (mainly the US Supreme Court) made use and applied the thinking of earlier philosophies of justice will illustrate the process by which we adjust the boundaries between legality and criminality and determine how we should behave towards each other.

POL 346 The Politics and Ethics of Emergencies 3 Credits

This course examines historic and present day cases, ranging across Europe and the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, take on emergency powers to become so-called "states of exception." While in some cases such states have imposed mild and limited emergency measures, others have employed more draconian measures, suspending, if not dissolving, constitutionally guaranteed civil liberties, often for indeterminate and protracted periods. How various states have behaved in emergency situations will be the major content of this course. Note: This course is cross-listed as HLS 346. Students may not get credit for both HLS 346 and POL 346.

POL 350 U.S. Foreign Policy and Security Policy 3 Credits

Principles, institutions, and processes involved in the formulation and implementation of policies regarding the nation's military, economic, and environmental security within the global framework. Strands, trends, and problem areas in U.S. foreign policy, with focus on the changing global environment of the post-Cold World War. Note: This course is cross-listed as HLS 350, GLS 350. Students may get credit for only one.

POL 351 Critical Views of Global Security 3 Credits

This course will examine the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspective on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security. Note: This course is cross-listed as HLS 351. Students may not get credit for both HLS 351 and POL 351.

POL 361 Courts, Judges and Politics 3 Credits

In-depth examination of the nature of judicial decision-making and the impact that judicial decisions have on society. Considers the sources of judicial authority, judicial fact-finding, statutory and constitutional interpretation, individual and collective processes of judicial decision-making, relations between judges and other government officials, and the political consequences of judicial decisions with particular emphasis on federal courts and judges. Note: This course is cross-listed as HLS 361. Students may not get credit for both POL 361 and HLS 361.

POL 363 Human Rights in Global Context 3 Credits

Examines human rights – droits de l'homme, derechos humanos, Menschenrechte, "the rights of man" – are, literally, the rights that one has because one is human. What does it mean to have a right? How are being human and having rights related? This course provides an introduction to theory and global practice of human rights. Human rights claims play an increasingly central role in political and social struggles across the world. The adoption of the Universal Declaration of Human Rights in 1948 signaled a proliferation of international human rights law and transnational non-governmental activism. While the promotion of human rights has become global, adherence to those standards remains highly uneven and gross violations and atrocities continue to occur. Given the breath and complexity of the human rights movement, including its engagement with law, politics and morals, in radically different cultures, this course is by its very nature multidisciplinary. Note: This course is cross-listed as HLS 363. Students may not get credit for both HLS 363 and POL 363.

POL 365 Third World Politics 3 Credits

Studies the major political issues of the Third World. Particular reference to political systems of Africa, Asia, Latin America, and the Middle East according to the relevance of the examples to large conceptual issues, and according to the major interests of the instructor. Typical issues include neocolonial dependency, the role of the state in newly developed countries, military rule and democratization. Note: This course is cross-listed as GLS 365. Students may not get credit for both POL 365 and GLS 365.

POL 367 Global Immigration 3 Credits

This course analyzes mass migrations and refugee movements and what they mean for the stability of nations, the increasing potential of severe culture clashes within societies, and the root causes of (forced) migration movements, such as problems of violence, terror and genocide, as recently seen in Darfur, Rwanda and Bosnia. In certain European countries the frequently failed integration and assimilation policies resulted in an Islamic alienation; terrorist attacks and race riots are some of the consequences. Particular attention will be given to the conflict between the refugees' and migrants' needs that result from violent, socio-economic or ecological catastrophes in the countries of origin and the various forms of reception within the host countries. Students will explore theoretical, political, legal, and socio-economic dimensions of the refugee and immigration phenomena in a global world. Other themes will include international human rights and refugee laws, theories of immigration, for example, the feminization of migration, as well as problems of acculturation, assimilation and integration in different host societies. Note: This course is cross-listed as GLS 367. Students may not get credit for both POL 367 and GLS 367.

POL 368 International Organizations 3 Credits

This course introduces students to the study of international organizations. The course examines mostly formal and governmental institutions as well as informal institutions or regimes. Topics to be covered include and are not limited to: the establishment of international organizations, evolution of international organizations, structure of international organizations, decision-making of international organizations and influence of international organizations. This course employs both theoretical and practical approaches in its examination on international organizations. Note: This course is cross-listed as GLS 368. Students may not get credit for GLS 368 and POL 368.

POL 371 The Arab-Israeli Conflict 3 Credits

The course will begin by introducing the main players: the neo-patrimonial Arab regimes on the one hand, and the democratic, economically modern Jewish sector in Palestine on the other. The analysis will focus on the impact of the social, economic, political and religious differences between the sides on their conception of the conflict among the participants and powers outside the region. The course will concurrently examine the impacts of the dynamics of the conflict itself, relations within Islam on the one hand and between Islam and the West on the other. The latter part of the course will consider the sources of perceptual shift that led simultaneously to the narrowing of the conflict with the withdrawal of some of its participants (most Arab states) and its widening with the addition of Al Qaeda and Iran (via Hezbollah). Note: This course is cross-listed as GLS 371. Students may not get credit for both GLS 371 and POL 371.

POL 399 The Co-operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. IND 398 and (dept.) 399 combined cannot exceed 15 credits. Pass/fail. Prerequisite(s): junior standing and 2.75 GPA at the time of registration.

Corequisite(s): IND 398 The Co-operative Experience Seminar.

POL 415 Political Internship 3-6 Credits**POL 450 Seminar in Political Science 3 Credits**

A multidimensional framework within which to integrate the variety of perspectives and methodologies extant in the field of political science. Topics for discussion and analysis may range from broad concepts of political discourse such as power and interdependence to specific political issues such as executive-legislative relations and judicial policymaking.

POL 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

POL 491 Internship in Political Science 1-4 Credits

Students work under supervision in a public agency, political party, or public interest group. A minimum of 52 hours of fieldwork per credit required, with regular reports and a concluding critique analyzing and evaluating the experience. Primarily for seniors and qualified juniors. No more than six credits allowed toward graduation.

Prerequisite(s): permission of instructor.

POL 499 Senior Honors Thesis 3-6 Credits

Majors having completed the department's core requirements and having a minimum GPA of 3.5 in political science courses may apply for honors in their sixth semester. Applicants enroll in POL 490 Independent Research and Study in their seventh semester to develop and submit a thesis proposal to the department. With departmental approval, applicants prepare an honors thesis in their last semester. Upon acceptance of the thesis by the department, the student will be graduated with honors in political science.

Psychology (PSY)

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 102 Explorations in Psychology Honors 3 Credits

The course introduces the history of psychology, and demonstrates how the discipline is a science. It provides students with experience exploring the mind, behavior, and the relationship between the two, from multiple perspectives, including biological, behavioral, cognitive, developmental, humanistic, social, and abnormal. It tackles questions including (but not limited to) how different areas of the brain are involved in behavior and are affected by injury, how humans sense and perceive the world, how states of consciousness differ from one another, how humans learn, remember, communicate, and develop, what motivates humans to behave in particular ways, how social groups affect behavior and decision-making, and what happens when behavior and emotions deviate from what is typical.

PSY 105 Introduction to Research in Psychology 3 Credits

Students will be introduced to the basic research methods used in psychology including, surveys, experiments and observation. Students will collect data and learn to describe this data using basic tools of analysis including graphic display and statistical analysis. Students will read original psychological research and learn to write using the conventions of the American Psychological Association.

Prerequisite(s): a grade of "C" in PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 110 Psychology: The Science of Well-being 3 Credits

This course is an overview of the science of psychology applied to the question of how to build well-being. The framework for PSY 110 mirrors Introduction to Psychology in its presentation of the major perspectives in psychology – Research Methods, Behaviorism, Cognition, Development, Social Behavior, Motivation and Mental Health. Topics in PSY 110 include: Perspectives in Psychology, Research Methods, Relationships, Social Behavior, Developmental Psychology, Behavior and Cognition, Motivation, Self & Identity, Positive Psychology, Optimism.

PSY 117 Psychology of Creativity 3 Credits

Is creativity reserved only for geniuses, or can ordinary individuals also be creative? Is it domain-specific or domain-general? How do we measure it? What is the connection between creativity and innovation? Can you and I become more creative, and if so, what factors influence creative thinking? This course surveys the modern theories of creativity and problem solving from a psychological perspective, and their applications to real-world challenges. Specific topics will focus on convergent and divergent thinking, the role of constraints, change, and motivation in creativity, social and personality factors, techniques such as brainstorming, design thinking, and creative problem solving, and innovation in organizations. You will apply what you have learned in hands-on activities that challenge you to propose creative solutions to real-world problems.

PSY 118 Psychology of Women 3 Credits

Examines the psychological development of women in our culture from birth to maturity, with an emphasis on the interaction of biological and social influences on personality, social behavior, and achievement of women. Investigates psychological sex differences in terms of current measurement approaches. Readings and text are drawn from psychological theory and research.

PSY 131 The Science of Mental Illness 3 Credits

This course introduces students to the separate and interactive effects of the person and the nervous system in the etiology and treatment of mental illness. Effectively, students receive in-depth exposure to research methods, the process of making and evaluating evidence based claims, classic and clinical applications of learning theory, the development of personality and the role of personality theories in the major systems of psychotherapy, the role of the central and peripheral nervous systems in behavior and mental illness, selected major DSM-5 categories of mental illness (stress, anxiety, depression, schizophrenia, and neurocognitive disorders), the major systems of psychotherapy, and the classifications and neural bases of pharmacological treatments for mental illness.

PSY 201 Statistics and Research Design 3 Credits

Introduces students to statistics and research methods in the behavioral sciences. Covers the fundamentals of descriptive and inferential statistics, a variety of issues in research design, selected research designs including the case study, correlational and experimental designs. In addition, students will explore the literature in psychology in order to examine the use of statistics and research design in real research problems.

Prerequisite(s): grade of "C" in PSY 105.

PSY 210 Organizational Psychology 3 Credits

Focuses on issues related to human behavior in work settings. Topics include personnel issues such as hiring and promotion decisions, performance appraisals, and methods of on-the-job training. Issues of job satisfaction, motivation, productivity, and effective leadership styles are also examined. Finally, organizational structure as it relates to communication within organizations will be examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 212 Introduction to Applied Behavior Analysis 3 Credits

Presents a review of classical and operant conditioning, data collection and research design, data analysis and interpretation. In addition, assessment and treatment strategies in a variety of settings, contingency management in institution, classroom and home, systematic self-desensitization, and ethical consideration are discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 215 Personality 3 Credits

A synthesis of the most recent research in the field of personality development. Topics include interplay of biological, cultural, and subjective personal processes; analysis of the broad trends in personality theories; and introduction to personality measurement.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 220 Abnormal Psychology 3 Credits

The development of abnormal personalities is discussed, with a survey of the various types of mental abnormalities, including their symptoms, diagnoses, and treatments. Neuroses and psychoses are emphasized.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 225 Learning Theory 3 Credits

A broad coverage of the expanding fields of learning, memory, and cognition is provided, while addressing their relevance and impact on human behavior. Continuity between early associationistic and contemporary cognitive theories is established. Topics range from basic conditioning to the more complex processes of memory, concept learning, thinking, and problem solving.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 226 Cognitive Psychology 3 Credits

The study of the mind has been the focus of psychology since its inception in the 19th century. Today, the majority of psychological research focuses on the cognitive system and its biological basis. This course will provide an overview of knowledge regarding the components of the human cognitive system (e.g., attention, memory, executive processes) and how they form the basis for higher-order cognitive skills (e.g., language and decision making). The course will provide a history of the field and the methodologies that have been and are currently being used to study the human mind. Each section of the course will include an overview of basic and applied research to demonstrate how knowledge of the cognitive system can be used to enhance human functioning in applied settings and better understand human limitations and tendencies to commit certain types of errors.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 230 Child Development 3 Credits

Presents theory and research on the social, emotional and cognitive development of children birth to age 12.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 231 Youth and Adolescent Development 3 Credits

Presents theories, research and problems concerning development in youth and adolescence.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 237 Cognitive Disabilities 3 Credits

Investigates various types of intellectual differences, focusing on etiology, methods of diagnosis, programs and services available to individuals and families. Considers problems relating to adjustment in academic, social, and vocational areas.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 238 Sensation and Perception 3 Credits

The facts and theories of sensation and perception, their role in the total psychology of the individual, and current application are examined.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 240 Social Psychology 3 Credits

Deals with the scientific study of human beings in social situations, focusing on reciprocal influence of the individual and the group, especially aspects of behavior that are socially determined. The nature of attitudes: their development and change; the nature of social influence; interpersonal perception and attraction; dynamics of social behavior; and social phenomena, such as prejudice and social movements, are covered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 250 Psychology of Aging 3 Credits

This survey course focuses on basic psychological issues in the aging process and in the elderly. It examines myths and stereotypes about aging and the elderly by way of research evidence pertaining to physical, psychological, and social changes accompanying aging.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 255 Biopsychology 3 Credits

Basic biological structures and processes underlying behavior, including general neuroanatomy and neurophysiology; sensory physiology; structure and function of the motor systems; physiology of emotions, motivation, learning, memory; brain dysfunction; psychoactive drugs.
Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 283 Sport Psychology 3 Credits

This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.
Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 292 Professional Development in Psychology 3 Credits

This course is designed to help students understand the connections between the required curriculum in psychology and their professional and post-graduation goals. Through this required course all psychology majors will have the opportunity to recognize and use the many applications of psychology to their plans for career development and employment. Students will articulate individual goals beyond graduation, understand the individual characteristics that predict success in the work environment, recognize and apply selected research in psychology to their goals and the world of employment. The course will better prepare students to articulate post-graduation goals early in their education, and apply those goals to the following years of their education. PSY major/minor students only.
Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131.

PSY 295 Directed Study in Psychology 1-4 Credits

Provides an opportunity for students to obtain research experiences in psychology. Consists of a combination of project meetings, assigned readings and supervised research. Each student will work with a selected faculty member on a topic of mutual interest. Projects may include learning some components of research methods and applying these techniques to the collection and analysis of data. Provides focused reading and discussion as it relates to each student's research topic.
Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 or permission of instructor and chair.

PSY 299 Field Placement in Applied Behavior Analysis 1 Credits

The practicum provides hands-on experience using the tools of applied behavior analysis in a field setting. Provides supervised field placement experience in an approved institution or agency in order for students to gain knowledge in applications of applied behavior analysis. Placement is made in various community institutions and agencies that offer services to diverse populations.
Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131, and PSY 212.

PSY 302 Research Methods: Cognition 4 Credits

Provides students with an in-depth coverage of the expanding field of cognition and memory. Addresses issues and research within the field. Emphasis is on current views of human memory. Students learn how to design and conduct their own experiments from the topic areas of information processing, psycholinguistics, problem solving, learning and memory, social cognition, and cognitive neuroscience. Laboratory skills include programming computers, developing multimedia stimuli, recording psycho-physiological data, and composing an APA-format research report in a network-based writing lab. Prerequisite(s): a grade of "C" in PSY 201; PSY 225, PSY 237 or PSY 325 or permission of instructor.
Corequisite(s): PSY 302L.

PSY 302L Research Methods: Cognition Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): PSY 302.

PSY 303 Research Methods: Social Psychology 4 Credits

Covers research methodology within the context of social psychology (i.e., topics include altruism, aggression, attraction and social perception). Both experimental and descriptive methodologies will be covered. Students learn about various aspects of the research process (e.g., design and execution of a social psychological study, analyzing and interpreting the results). Students also learn to integrate their research findings to produce an APA-style paper. Students use computer-based word processing and statistical analysis packages to achieve these goals. Prerequisite(s): a grade of "C" in PSY 201; PSY 240 or PSY 279 or permission of instructor.
Corequisite(s): PSY 303L.

PSY 303L Research Methods: Social Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): PSY 303.

PSY 305 Theories of Psychotherapy 3 Credits

An exploration of the history and theory of the psychoanalytic, behavioral, and humanistic approaches to psychotherapy. Comparisons and contrasts between these therapeutic modalities are discussed, as well as the theory underlying specific therapeutic techniques such as dynamic interpretations, dream analysis, the analysis of resistance and transference, counter-conditioning, modeling, and cognitive restructuring. Class exercises in addition to transcripts and tape recordings from therapy sessions are used to illustrate the various therapeutic approaches.
Prerequisite(s): PSY 215 or PSY 220 or permission of instructor.

PSY 306 Research Methods: Sensation & Perception 4 Credits

Provides instruction in research design, research methods, and integration of data analysis and methodology within the content framework of sensation and perception. All the general psychology research methods are taught. Special emphasis is given to the study of human vision and audition. Students design, conduct, and report laboratory research in the areas of sensation and perception. The computer-based components of the laboratory include lessons on interactive software instrumentation for research, and network-based technical writing using APA format. Projects are conducted during the term. Each student uses a dedicated networked Macintosh computer to:

- develop and generate research stimuli and procedures,
- analyze and report research data, and
- write formal research reports.

Prerequisite(s): a grade of "C" in PSY 201 or permission of instructor.

Corequisite(s): PSY 306L.

PSY 306L Sensation & Perception Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 306.

PSY 310 Introductory Counseling Skills 3 Credits

This course examines theory and research related to the therapy process and outcome. Students will practice foundational counseling skills with one another within a culturally-sensitive framework, including active listening, reflections of feelings, open questions, interpretations, self-disclosures, and challenges. Through experiential learning activities, students will develop a working knowledge of when and how to implement counseling skills. Students should be willing to talk about personal issues in this class.

Prerequisite(s): PSY 100, PSY 102, PSY 110, PSY 131.

PSY 315 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 324 Play and Imagination 3 Credits

This course surveys two of the most important manifestations of children's imagination: pretend play and imaginary companions. It will discuss the evolution of play, the purpose of play, the role of play in the development of creativity, and individual differences in play (e.g., among children of different gender, cultures, and ability levels). Finally, it will discuss the application of play to therapeutic methods for children.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 230 or PSY 231 or PSY 237.

PSY 325 Cognitive Development 3 Credits

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 329 Research Methods in Organizational Psychology 4 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

Prerequisite(s): PSY 105 and PSY 201 or MSD 205.

PSY 329L Research Methods in Organizational Psychology 0 Credits

This course covers general area of research methods such as experimental and non-experimental methods, measurement, statistics, and preparation of reports for presentation and publication. In addition, research topics common in the area of organizational psychology such as worker motivation, job satisfaction, stress and burnout, communications in the workplace, productivity, decision-making, leadership style, and organizational structure will also be discussed. Students gain hands-on experience conducting empirical research.

PSY 330 Developmental Disabilities 3 Credits

Introduces students to the genetic, biological, sensory-motor, cognitive, and social-emotional foundations of developmental disabilities. Selected syndromes will be reviewed in depth, as will treatments and intervention at the individual and family levels.

Prerequisite(s): PSY 230, PSY 231 or PSY 237.

PSY 333 Autism Spectrum Disorder 3 Credits

Provides students with a general understanding of the etiology, neurocognitive underpinnings, and general characteristics of the autism spectrum disorders. The course will examine the history of the study of these disorders, the main problems associated with these conditions, and will explore psycho-educational treatment alternatives.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 334 Disabilities Across Cultures 3 Credits

The course is designed around the question of how a culture defines the concept of "Disabilities", how societies perceive individuals with disabilities, and how historical, social and political circumstances might shape an individual's understanding of diversity. The course encourages critical thinking and a comparative analysis of cultural differences and psychological practices. Key challenges associated with diagnosis, intervention and integration of individuals with disabilities across the globe will be discussed. This course fulfills the College of Liberal Arts and Sciences Essential Competencies Requirement: Global Perspectives.

Prerequisite(s): PSY 100, PSY 102, PSY 110 or PSY 131.

PSY 335 Research Methods: Human Cognitive Neuroscience 4 Credits

Covers the interdisciplinary study of the nervous system integrating neurobiology, physiology, pharmacology, and psychology as explanations for both normal and pathological human behavior. Topics integrate molecular levels of analysis, such as neuron structure and function, neurotransmitters, action potentials, and receptors, with molar levels, such as sensory and hormonal processes, learning and memory, emotions, drug use, and biological rhythms. Introduces research techniques used to study the function of the nervous system and the neural bases of behavior in humans. Neuroanatomical, electrophysiological, pharmacological, and neuropsychological assessment techniques may be explored as part of laboratory or field research projects designed in collaboration with the instructor. Prerequisite(s): grade of "C" or better in PSY 201 and PSY 255 or permission of instructor.

Corequisite(s): PSY 335L.

PSY 335L Research Methods: Human Cognitive Neuroscience Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 335.

PSY 336 Research Methods: Animal Learning & Behavior 4 Credits

Provides a comprehensive overview of the acquisition and modification of the behavior of animals, especially on laboratory strains of rodents and pigeons. Core topics include respondent and operant conditioning, animal cognition, observational learning, animal safety and welfare, single-subject and between-groups approaches to methodology, and the statistical analysis of the results of studies of behavior. The laboratory component of the course provides a comprehensive overview of animal handling and maintenance, animal welfare, and the recording of experimental results. Two substantial projects are undertaken; demonstration of a conditioned taste aversion and its effect upon the acquisition and extinction of an operant (bar press) response and subsequent discrimination and reversal learning. Results of both projects are written into APA-formatted reports. Prerequisite(s): a grade of "C" in PSY 201, PSY 225 or permission of instructor.

Corequisite(s): PSY 336L.

PSY 336L Animal Learning and Behavior Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 336.

PSY 339 Research Methods in Applied Behavior Analysis 4 Credits

This upper-level laboratory course will provide students with in-depth study of the principles and applications of Applied Behavior Analysis. Students will examine behavioral principles, ethical considerations and real-life applications of ABA. Each student will design and implement a self-management plan to alter a behavior of their choosing. Prerequisite(s): PSY 105 and PSY 201, PSY 212.

Corequisite(s): PSY 339L.

PSY 339L Research Methods in ABA Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 339.

PSY 340 Research Methods: Group Dynamics 4 Credits

Focuses on selected issues pertaining to group dynamics. Emphasizes an understanding of the personality and social factors that influence the functioning of unstructured and task-oriented groups. Students participate in a task group for the purpose of conducting a comprehensive research project on selected issues in group dynamics and the psychology of groups. The task group prepares an APA-style paper describing their research as well as an in-class presentation. Each student also submits a midterm and final written analysis of the interactional processes and development of the task group. Prerequisite(s): a grade of "C" in PSY 201 or permission of instructor.

Corequisite(s): PSY 340L.

PSY 340L Group Dynamics Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 340.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 350 Research Methods: Developmental Psychology 4 Credits

Focuses on one or more research areas in cognitive, personality, or social development. Includes an overview of major theoretical approaches to age-related change. Students review original research on selected aspects of behavioral change. The laboratory component of the course presents an overview of developmental research designs and methods focusing on the measurement of age-related change in psychological functioning. Students conduct field research projects designed in collaboration with the instructor and prepare an APA-style research report. Prerequisite(s): a grade of "C" in PSY 201 and PSY 230 or permission of instructor.

Corequisite(s): PSY 350L.

PSY 350L Developmental Psychology Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): PSY 350.

PSY 360 Psychology of Peace & Conflict 3 Credits

This course examines issues related to peace, conflict, violence, and conflict resolution. Theories and strategies that suggest ways of reducing and eliminating conflict are discussed. Psychological and social causes and consequences of violence and nonviolence are considered.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 365 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 367 Creativity and Innovation 3 Credits

What is creativity, and how do we measure, study, and enhance it? This course will survey the modern theories of creativity from a psychological perspective, with an emphasis on the processes that underlie creative thinking and the variables that influence creative idea generation. Specific topics will include: convergent and divergent thinking, the role of the unconscious in creative ideation, flow and mindfulness, individual and group creativity, techniques such as brainstorming and creative problem solving, the neuroscience of creativity, the role of motivation, and creativity and innovation in organizations. Discussions of theoretical findings will be complemented by in-class activities and assignments that highlight applications to day-to-day living and to larger-scale challenges that require creativity and innovation.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 372 States of Consciousness 3 Credits

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 373 Cyberpsychology 3 Credits

Cyberpsychology is the study of how emerging computer technologies, especially social media, affect the way people think, feel, and behave both online and in the face-to-face world. This course explores a wide range of topics concerning this rapidly developing field of psychology, including how individuals, interpersonal relationships, and groups function in cyberspace with both positive and negative consequences for mental health. It emphasizes an understanding of the basic concepts of cyberpsychology along with the implications of this knowledge for improving wellbeing in the digital age.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 374 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 230 or permission of instructor.

PSY 375 Psychology and Film 3 Credits

Attitudes, perceptions and memories are shaped by motion pictures. Filmmakers create enduring images by using cinematic techniques to portray social and interpersonal themes. This course will examine various cinematic techniques as well as how film portrays interpersonal relations, gender roles, race relations, mental illness, The Holocaust, and other genocides.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 377 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

Prerequisite(s): PSY 230 or PSY 231.

PSY 379 Psychology and Law 3 Credits

Introduces students to a study of selected topics in psychology and law. Topics include eyewitness testimony, jury selection, and decision making.

Prerequisite(s): PSY 240, PSY 215.

PSY 381 Psychology of Gender 3 Credits

This course examines the meaning of sex and gender in modern society. The course readings and discussion will review and analyze the influence of gender on human behavior and emotions. The course will examine the significance of gender in shaping experience. Topics will include: gender differences in behavior, gender role development, gender and sexual identity, gender and social roles, cross-cultural perspectives on gender and transcending gender.

Prerequisite(s): PSY 100, PSY 218 or permission of instructor.

PSY 382 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 383 Psychology and Culture 3 Credits

Students enrolled in this course will critically examine the intersection of culture and psychology. Topics covered include cultural influences on: identity, the perceptions and manifestations of mental illness, and treatment seeking.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 384 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 384 is crosslisted with PSY 584.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 385 Death, Dying and Suicide 3 Credits

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. Class members will examine difficult and controversial psychosocial issues related to dying and death, death perceptions from childhood through older adulthood, religious and death attitudes, the dying process, living with dying, dying in the American health care system, euthanasia and biomedical issues, pain management, suicide, cross-cultural perspectives on dying and death, the business of dying, the legal aspects of dying, and the bereavement process.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 386 Introduction to Child Life: Working with Children and Families in Healthcare Settings 3 Credits

The course provides the student with an introduction to the practice of Child Life in healthcare settings, serving as an educational foundation for those interested in pursuing a Child Life internship or other career working with children and families in a healthcare setting. Child Life programs seek to promote optimum development of children, adolescents, and families within a healthcare setting by helping to maintain normal living patterns and minimizing psychological trauma. Various theoretical positions related to the field (including but not limited to child development, play, stress, illness, trauma, and bereavement) will be described and their implications discussed. Classroom activities and assignments will help to develop relevant clinical skills including therapeutic play techniques, procedural preparation and support, coping strategies, child assessment, promoting advocacy/family-centered care, and health education. Official documents created by the Child Life Council, the certifying body for the field, will be reviewed, in addition to other seminal Child Life publications. The necessity for evidence-based practice will be discussed and relevant empirical studies will be presented (including those conducted in analogous academic fields such as developmental pediatrics and behavioral medicine).

Prerequisite: PSY 230.

PSY 388 Learning and the Experimental Analysis of Behavior 3 Credits

Students will review principles of behavior covered in PSY 212 Intro to ABA (or PSY 225 Learning Theory) and move into more complex concepts and principles of behavior analysis including respondent behavior, respondent conditioning, motivating operations, schedules of reinforcement, and verbal operants. Students will also learn elements of behavior change and specific behavior-change procedures including: verbal behavior training, discrete trial training, interventions based on motivating operations and discriminative stimuli, and stimulus equivalence procedures.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131 and PSY 212 or PSY 225.

PSY 389 Professional Issues in ABA 3 Credits

This course will provide students interested in working in the field of applied behavior analysis at the bachelor's level content based on the task list of the Behavior Analyst Certification Board (BACB) The course covers ethical and professional considerations relevant to the profession of applied behavior analysis as well as ethical and disciplinary standards of the profession. In addition, the course covers behavioral assessment and intervention, competency-based training, and evaluating the effectiveness of behavioral programs. Students will also have the opportunity to read seminal and current research literature on the topics.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 395 Special Topics in Psychology 3 Credits

This course examines contemporary issues in psychology, with the particular topic varying each time it is offered. New directions in the field and/or current controversies will be the focus. Past offerings include Positive Psychology, Creativity, and Brain Games.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 400 Senior Seminar 3 Credits

This capstone course will provide a synthesis and evaluation of important critical issues in psychology, such as the role of modern psychology in solving social problems, the scientific vs. human services perspectives on behavior, emotion and cognition; and the nature of mental illness and well-being. Students will be expected to draw broadly from their education in psychology; to grapple with conflicting points of view; and produce professional quality writing, oral or multimedia presentations.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 420 History of Psychology 3 Credits

Provides a coverage of systems and schools of psychology; great psychologists, their contributions, and later influence in psychology. Current psychological problems are also discussed.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 490 Independent Study: Research and Creative Expression 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. All students must have approval from the department and the dean to register for PSY 490.

Prerequisite(s): PSY 201.

PSY 491 Internship in Psychology 1-4 Credits

Provides supervised work experience in an approved institution or agency in order for students to gain knowledge in applications of psychology.

Placement is made in various community institutions and agencies that offer services to both exceptional and normal individuals. Prerequisite(s): senior psychology majors or minors.

Prerequisite(s): PSY 100.

Secondary Education (SED)**SED 370 Teaching in the High School 3 Credits**

This field-based course focuses on general pedagogy in grades nine through 12. Emphasis will be on generic teaching approaches, planning lessons and developing units of study, learning styles, issues and techniques of evaluation, and multiculturalism. Working in local high schools, students continue observing and begin teaching lessons in their subject area specialization. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 400 Teaching English Language Arts in the Secondary School 3 Credits

Students preparing to teach English in middle schools and senior high schools explore strategies for the imaginative teaching of literature, poetry, drama, grammar, composing processes, vocabulary, and oral language use. Students research, develop, and critique thematic units, analyze curriculum, and study the selection, development, and use of a wide variety of teaching materials. Traditional and alternative methods of assessment are explored. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 405 Teaching Social Studies in Secondary Schools 3 Credits

The theoretical foundations of teaching social studies in junior and senior high schools. Basic goals and aims of social studies instruction are studied, and specific methodological techniques are described and practiced. Demonstration lessons are prepared and presented. Considers typical problems with which teachers are confronted. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 410 Teaching Science in Secondary Schools 3 Credits

Classroom interaction analysis systems are utilized in the study of the teaching-learning process. Students develop their own repertoire of teaching strategies. Emphasis on the investigation and interpretation of recent curriculum developments, and the use of the laboratory in science instruction. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 415 Teaching Mathematics in Secondary Schools 3 Credits

The critical analysis of the aims of teaching mathematics in the secondary school; review of recent research in the content and teaching of mathematics by individuals and groups; demonstration lessons (reflective teaching) to illustrate techniques of teaching; the planning of lessons; selection and organization of materials and subject matter; and evaluation of lesson presentation. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 420 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students keep a journal and develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. A cumulative GPA of 2.75 is required. *NOTE: This course is cross-listed as FLE 420. Students cannot get credit for both FLE 420 and SED 420.

Prerequisite(s): EDU 106 and EDU 206.

SED 431 Content Area Reading and Writing 3 Credits

Explores theoretical and methodological issues concerned with teaching reading and writing within content area classes. Students analyze junior high and high school textbooks and other reading materials, study methods of adjusting instruction to varying reading and writing needs of students, prepare directed reading activities in their specific content areas, and use informal diagnostic reading tools. Included is the preparation of content area writing assignments and the evaluation of student writing as well as the teaching of study skills? Emphasis throughout is on the integration of reading and writing into secondary school subject classes. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

SED 490 Independent Research and Study 1-6 Credits

The outline for study must be accepted by the professor and approved by the department. The semester hours credit to be assigned is determined by the department.

Social Studies Topics (SST)

SST 300 Historical & Contemporary Issues in the Social Studies 3 Credits
 This course is designed to provide education and non-education majors a comprehensive introduction to, and understanding of, social studies knowledge. This knowledge covers a broad array of academic disciplines, including American/World History, Government and Politics, Geography, Economics, and the various behavioral sciences. The course is aimed at engendering a theoretical grasp of the essential elements of these disciplines, as well as a practical understanding of how the content areas exist in both human society and contemporary policies/issues.

Social Work (SOW)

SOW 200 Social Services & Social Work 3 Credits
 An overview of the historical development of social work. Emphasis on current issues in social welfare and social service programs in the United States. Among the programs explored are those in public welfare, mental health, medical services, child abuse/neglect, school social work, and care for the elderly.

SOW 300 Methods Social Work Practice 3 Credits

Interviewing techniques are taught and practiced. Skills in forming and running small groups, working with community organizations, and administering social programs are emphasized. Students study how to gather pertinent psycho-social facts about clients, make an assessment, plan an intervention, and successfully complete service to the client. Students who next will take SOW 301 Field Work Experience will be placed in a social service agency by the end of the semester.

Prerequisite(s): SOW 200.

SOW 301 Field Work Experience 3 Credits

Students observe and work in a social service agency. They study the structure of the agency and the people and roles within it, and develop helping skills with clients. Approximately six to eight hours of field work a week for each three credits are required, plus class sessions during the semester.

Prerequisite(s): SOW 200, SOW 300. May be taken twice in two separate semesters for a maximum of six credits toward the total credits required for graduation.

Sociology & Criminology (SOC)

SOC 101 Sociological Imagination 3 Credits

Introduction to principles and concepts for the sociological analysis of human societies. Social relations, social structure, and institutions characteristic of societies past and present are examined, and causes and directions of social change are considered. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

SOC 110 Cultural Anthropology 3 Credits

The anthropological perspective is introduced, placing human behavior and institutions within their evolutionary, ecological, structural, and ideological contexts. Examples are drawn from the full range of human societies, with an emphasis on nonindustrial forms.

SOC 119 Introduction to Criminal Justice: Police, Courts, Corrections 3 Credits

This course introduces students to the sociological study of the criminal justice system. It examines the cultural and social foundations of this system, and review debates about problems with the criminal justice system and proposals to change it. Topics covered include nature of the crime problem, requirements of criminal law, policing, the role of the courts and legal professionals, sentencing, incarceration and alternatives to it.

Prerequisite(s): SOC 101.

SOC 150 Introduction to Forensics 3 Credits

Introduces students to principles of forensic science. Whether the issue is establishing paternity or cause of death, determining arson or liability, or deciding criminal guilt or innocence, collecting and evaluating forensic material is typically involved. Students will learn the meaning and significance of scientific evidence and its role in criminal investigations and civil and criminal trials. Students will learn how forensic scientists work, define a problem, collect data, and analyze results. Case studies, crime simulations and examination of criminal evidence will highlight the application of scientific principles.

SOC 201 Intro Seminar in Sociology 3 Credits

Designed for students considering a major or minor in sociology. The seminar locates sociology in relation to other disciplines; reviews the basic perspectives used by sociologists to study human behavior; and considers the methods and applications of sociological inquiry.

Prerequisite(s): SOC 101.

SOC 204 Law, Literature, and Film in America 3 Credits

Focuses in an interdisciplinary manner on law and justice as represented in American literature and films. It analyzes novels, short stories, and selected non-fiction texts from the perspectives of literary criticism, social history, and cultural and American studies.

SOC 205 Families 3 Credits

Examines families in the United States, past and present, emphasizing the variety of family experiences in different social contexts and the relationship between family life and social change. Includes comparative material on families in other countries and considers possible alternatives to current family forms.

Prerequisite(s): SOC 101.

SOC 206 Deviance and Crime 3 Credits

Considers deviant behavior as violation of social norms. Examines the concepts of deviance and crime in socio-historical context. Evaluates major theories advanced to explain deviance. Surveys different types of deviance, including conventional crime, non-criminal deviant behavior, and white-collar corporate, and government crime.

Prerequisite(s): SOC 101.

SOC 207 Racial and Ethnic Relations 3 Credits

Examines the social origins of prejudice and discrimination, and analyzes intergroup trends in conflict, competition, and cooperation. Considers issues of immigration, economic and political power, and ethnic, racial, and religious pluralism.

Prerequisite(s): SOC 101.

SOC 210 Criminal Investigation 3 Credits

Approaches criminal investigation conceptually. Students consider the social issues involved in criminal investigation, as well as ethical and legal aspects of it. The course covers such topics such as the principles of criminal investigations, the rules and procedures of preliminary and follow-up investigations, the art of interrogation, recording of statements, confessions, and the collection and preservation of physical evidence at the crime scene. Emphasis is placed on the need for meticulous adherence to rules of law and ethical practices, as an investigation proceeds from initial actions to arrest, and eventual prosecution. The course also examines the methods used in scientific interpretation of evidence and the preparation of criminal cases for trials, as well as its role in today's criminal justice system.

Prerequisite(s): SOC 150.

SOC 211 Social Movements 3 Credits

This course examines social movements that seek change in the social, cultural and political structures of society. The social, economic and political contexts of these movements are treated as well as their origins, tactics, organization, recruitment, and successes and failures. Case studies focus on movements in the areas of labor, civil rights, feminism, the environment, "right wing politics", and neighborhood activism.

Prerequisite(s): SOC 101.

SOC 216 Youth and Crime 3 Credits

In-depth examination of the nature and extent of youth criminality in the U.S. Explores changes in youth culture and theories of delinquency. Social policies are related to youth criminality and the youth justice system is considered.

Prerequisite(s): SOC 101.

SOC 225 Population Study 3 Credits

Demography; its definition, historical emergence, and growth; population as a social problem in developing and developed nations; population theories, sources and methods of demographic data, population composition, and distribution; demographic processes including fertility, mortality, and migration.

Prerequisite(s): SOC 101.

SOC 230 Foundations of Civic Engagement 3 Credits

This course is an introduction to civic engagement: its meanings, opportunities and limitations. Students will learn about the different opportunities for civic engagement in the community as well as the theories and skills associated with it. Students will learn the role of formal and informal institutions in community engagement and will identify a specific organization for in depth investigation.

Prerequisite(s): SOC 101.

SOC 245 Social Problems 3 Credits

American social, economic, and political institutions and their interrelationships are analyzed, with an emphasis on the causes, directions, and consequences of social change in American society.

Prerequisite(s): SOC 101.

SOC 246 Drugs, Crime & American Society 3 Credits

Explores the nature and extent of drug use in the U.S., how drugs are legally defined and socially constructed, and considers how and why drug policies have developed and changed historically. Considers how the criminalization of drugs has impacted policing strategies, courts, probation programs, sentencing and corrections, as well as other social institutions. Examines the role of local and federal agencies in enforcing drug laws, and considers debates about directions for legal reforms.

Prerequisite(s): SOC 101.

SOC 247 Aging 3 Credits

The emergence of social gerontology, demographic foundation of aging, the aging process, comparative study of aging and aged, effect of aging on the individual, social institutions and aging, and problems of aging and some solutions.

Prerequisite(s): SOC 101.

SOC 248 Social Service Organizations 3 Credits

Examines the growth and variety of social service organizations. The training of providers, such as teachers and physicians, and relationships between professionals and clients in settings such as schools and hospitals are studied as well as organizational decision-making, finances, and community relations.

Prerequisite(s): SOC 101.

SOC 252 Media, Culture and Society 3 Credits

Examines mass-produced commercial culture, how it has developed, and the role it plays in modern society. Analyzes the content of these cultural forms, how its production is organized, and how audiences perceive it.

Prerequisite(s): SOC 101.

SOC 261 Schools and Schooling 3 Credits

Schools and the process of schooling are analyzed within a broad historical perspective as well as within the structural and cultural context of American society. Education within a global perspective is also considered. Issues discussed include school funding, integration, tracking, technology, bureaucratization, and the "cultural wars" fought within the schools.

Prerequisite(s): SOC 101.

SOC 269 Physical Anthropology 3 Credits

An analysis of the biological development of the human capacity for culture. Topics include: modern theories of evolution and their application to human evolution; the relationship of human beings to other primates, the human fossil record, and variation among modern human populations. A background in biological studies is not necessary.

Prerequisite(s): SOC 101.

SOC 270 Area Studies: Africa 3 Credits

An intensive investigation of problems arising from historical and contemporary studies of tribal, peasant, and transitional societies in Africa south of the Sahara.

Prerequisite(s): SOC 101.

SOC 271 Area Studies 3 Credits

Studies problems arising from historical and contemporary studies of peasant populations of Europe.

Prerequisite(s): SOC 101.

SOC 272 Area Studies: Indians of North America 3 Credits

Societies and cultures of the Indians of North America from the Arctic to Mesoamerica. Emphasis on evidence of these tribal groups prior to extensive acculturation and their contemporary situation.

Prerequisite(s): SOC 101.

SOC 300 Work and Occupations 3 Credits

Analyzes the nature and organization of work in modern society.

Focuses on such issues as division of labor, specialization, alienation, professionalization, and the role of technological change. Includes an examination of the historical development of work in the 20th century, and a consideration of contemporary and future patterns of work organization.

Prerequisite(s): SOC 101.

SOC 301 Methods of Sociological Research 3 Credits

One of the required courses in both the Sociology and Criminal Justice majors, Methods of Sociological Research introduces students to basic research processes in the social sciences. The course introduces students to both quantitative and qualitative approaches and data analysis using both original and secondary sources. Students will also complete an original research paper in this course.

Prerequisite(s): SOC 101.

SOC 302 Crime & Justice in the Media 3 Credits

This course focuses on the impact of media on Americans' perceptions and understanding of the extent and causes of crime, and the effectiveness and purposes of crime policy. It examines how criminals, types of crime, crime policies and the criminal justice system are portrayed in various media outlets, including film, tv, newspaper, and electronic/internet. It explores the historical and contemporary relationships between media representations of criminal behavior, crime as a social problem, and the nature of the criminal justice system and contrasts these to their social realities.

SOC 304 Women and Law 3 Credits

Explores the social, economic, political and cultural context of laws relating to women and gender, such as workplace discrimination, divorce and child custody and reproductive rights. It examines how such laws have changed historically and the impact such laws have had on women as well as on men and on American social institutions, such as the family, politics, and the workplace. The course also examines women in the legal profession and their impact on the practice of law and legal reasoning.

SOC 307 Criminal Justice Practice 3 Credits

This course will consider the ways criminal justice agencies and occupations are shaped by social, economic, political, technological and legal changes. Through case studies and projects students will examine the work, culture, and work settings of various criminal justice practitioners, assess the impact of social policies on criminal justice careers, and identify new directions in the field. Students will develop the reading and writing skills needed by an array of criminal justice practitioners.

SOC 308 Cities And Suburbs 3 Credits

Examines the growth of an urban way of life under the influence of industrialism. Study of community, political, and economic institutions in cities. Comparisons between urban and suburban areas.

Prerequisite(s): SOC 101.

SOC 309 Peasant Society 3 Credits

A comparative view of peasants and their significance in agrarian, colonial, and industrial societies. Peasant economic, political, and social institutions are analyzed with an eye to both their internal operation and the way they relate to non-peasant groups who hold power in these societies. The changes that have occurred in the peasant world are viewed both as a consequence and a cause of wide reaching political and economic upheaval.

Prerequisite(s): SOC 101.

SOC 310 Pre-Industrial Economies 3 Credits

The anthropological study of technology, production, and exchange in nonmarket cultures, as related to the social, ideological, and ecological systems in which they are embedded. The question of whether the concepts that derive from market economies can be applied to all economic systems is considered in detail.

Prerequisite(s): SOC 101.

SOC 311 Social and Cultural Change 3 Credits

Investigates the process of change in both industrial and nonindustrial settings. Particular attention paid to the role of the individual in change as well as the roles played by the mode of production, social organization, and ideological constructs. Case studies are drawn from non-Western as well as Western sources.

Prerequisite(s): SOC 101.

SOC 312 Women in Society 3 Credits

Examines changes in women's roles and in male-female relationships. Focuses on impact of law, economy and social movements in shaping women's positions as wives and as workers. Explores theories and evidence concerning the nature and extent of sex differences. Attention to women's socialization through language, schools and media.

Prerequisite(s): SOC 101.

SOC 313 Gender and Criminal Justice 3 Credits

This course will examine women's experiences with the criminal justice system as offenders, victims, prisoners, and practitioners. It will consider how gender has shaped theories of crime and criminological research. It will explore how cultural constructions of gender have influenced substantive and procedural criminal law, the ways criminal justice agencies respond to crime, and how these have changed historically. Attention will be given to the development of new approaches, reforms, and challenges.

Prerequisite(s): SOC 101.

SOC 314 Social Theory 3 Credits

Introduces the major thinkers and conceptual problems characterizing the development of sociological thought. Required of sociology majors.

Prerequisite(s): SOC 201.

SOC 315 Issues in Modern Social Theory 3 Credits

Examines current trends and issues in sociological thought.

Prerequisite(s): SOC 314 or permission of instructor.

SOC 316 Feminist Social Thought 3 Credits

An introduction to feminist social theory, with emphasis on its breadth and variety. Special attention paid to the ways feminist theorists have analyzed the relationship of gender to other kinds of group differences.

Prerequisite(s): SOC 101.

SOC 317 Law and Lawyers 3 Credits

Relationships between law, the economy, and the state are explored. Discussion of laws, legal systems and legal reasoning using cross-cultural comparisons and historical analysis of these in the United States. Particular attention given to impact of law on corporations, workers, women, and minorities. Changes in legal profession and legal education are examined.

Prerequisite(s): SOC 101.

SOC 318 Hate Crimes in the United States 3 Credits

Provides an interdisciplinary exploration of hate crimes in the United States, its causes and consequences. It will examine the social, political, and legal issues that have shaped policies and laws designed to respond to hate crimes and assess their effectiveness. Debates about the nature of hate crimes and the special laws and sentencing provisions developed to deal with them will be discussed. Topics include hate crimes on college campuses, hate on the Internet, legal and constitutional issues, and criminal justice enforcement.

SOC 320 Religion and Belief Systems 3 Credits

The relation of religious phenomena to social structures and processes; religion in cross-cultural perspective.

Prerequisite(s): SOC 101.

SOC 321 White Collar & Corporate Crime 3 Credits**SOC 322 Punishment and Corrections 3 Credits**

This course explores the nature, forms, rationales, and effectiveness of punishment as a form of crime control. It traces the development of corrections in the U.S., identifies cultural trends and developments in penology, including mass incarceration and supermax prisons, considers the ways race and class have shaped these, and the reverberating effects penal policies have had on American culture and society beyond the criminal justice system. It examines the role of laws, politics, crime control agencies, as well as of media, and corporations in shaping penal policies. Topics also include: prison subcultures, inmate rights, correctional practices, privatization of prisons, and alternatives to punitive policies of incarceration and capital punishment.

Prerequisite(s): SOC 101.

SOC 325 Population Study 3 Credits**SOC 330 Class and Economic Inequality 3 Credits**

Social, economic, and political aspects of the division of society into classes are considered. Theories of stratification and the distribution of wealth, power, and prestige in societies past and present are examined.

Prerequisite(s): SOC 101.

SOC 340 Power and Politics 3 Credits

Examines the nature and distribution of power in contemporary societies; analyzes the relationships between power and politics.

Prerequisite(s): SOC 101.

SOC 341 Developing Societies 3 Credits

Examines theories explaining patterns of development; indicators and measures of social well-being; and problems such as population, hunger and environmental crises in developing countries. Focuses especially on patterns of development in Latin America or China.

Prerequisite(s): SOC 101.

SOC 342 Police and American Society 3 Credits

This course examines important issues regarding police in American society, such as the paradoxes inherent in police work, police organization and strategies and their effectiveness, the dilemmas of supervising police work, police unionism, the nature and implications of police occupational subculture, the use of police discretion, forms of police misconduct and accountability, professionalization of police and the trend toward police privatization. It also considers the diversity of the police force, trends in the delivery of policing services, the impact of new technologies on policing, and the challenges of policing in a multicultural society.

Prerequisite(s): SOC 101.

SOC 343 Policing and Counter Terrorism 3 Credits

This course is designed as an upper level (undergraduate/graduate) combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

Prerequisite(s): SOC 101.

SOC 345 Race and Crime 3 Credits

Examines the impact of crime policy on minority communities in the United States, with particular attention to the impact of "The War on Drugs", three-strike laws, and mandatory sentencing on minorities and minority communities. Drawing on sociological research, the course explores myths and realities concerning the relationship between race and crime. The relationship between racial attitudes, historical race relations, and mass incarceration are discussed.

Prerequisite(s): SOC 101.

SOC 346 Health Care and Society 3 Credits

Application and contributions of sociology to medicine; the strategy and methods of sociomedical research; sociology of illness, addictive and mental disorder; medical institutions; health services and medical care; and current status of medical sociology.

Prerequisite(s): SOC 101.

SOC 347 Aging and the Elderly 3 Credits**SOC 348 Human Service Organizations 3 Credits****SOC 349 Retirement and Leisure 3 Credits**

Examines the social phenomena of retirement as an event, process, social role, and life stage. Explores the meaning of leisure, time utilization, and creativity among the elderly. Defines related problems and issues, i.e., financial, physical, psychosocial, and environmental. Positive as well as negative implications are presented and evaluated.

Prerequisite(s): SOC 247 recommended.

SOC 350 Social Policy 3 Credits

Investigates the relationship between economic development and social policy in comparative and historical context. The main features of preindustrial, early industrial, and advanced industrial social welfare systems are described. Social, economic and political factors that shape social policy are investigated.

Prerequisite(s): SOC 101.

SOC 351 The Rights of the Accused 3 Credits

Analyzes the major substantive and procedural rights accorded to the criminally accused by the United States Constitution. Particular attention will be given to the right to counsel, confessions and self-incrimination, arrest, search and seizure. Students will learn to argue and write hypothetical case opinions.

SOC 355 Social Interaction 3 Credits

Examines the interpersonal relation between and among people in private life, public places, and at work. Explains how such relations affect and are affected by changes in the larger social structure.

Prerequisite(s): SOC 101.

SOC 360 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 361 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 362 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 363 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 364 Selected Topics 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 365 Selected Top: Social Movements 3 Credits

FALL 2012 - This course examines movements that seek change in the social, cultural and political structures of society. The social, economic and political contexts of these movements are treated as well as their origins, tactics, organization, recruitment, and successes and failures. Case studies focus on movements in the areas of labor, civil rights, feminism, the environment, "right wing politics", and neighborhood activism. In today's world, social movements abound. Movements such as the Tea Party and the Occupy movements demonstrate that they can take place across the political spectrum of society. Moreover, the interconnectedness of the world economy creates social movements throughout the world, whether in Asia, the Mid-East or Europe that have direct affects on the United States. Because the coverage of these movements are given considerable media exposure, students (and the public) tend to accept the interpretations of these movements as presented in the narratives of the media coverage. This class will provide a systematic academic treatment of social movements. Because social movements target structural and cultural institutions in society, the study of these movements will not only provide an understanding of these movements, but of larger social problems in society as well.

Prerequisite(s): SOC 101.

SOC 367 Selected Topics: Environment 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 368 Selected Topics in Sociology 3 Credits

Exploration of a specialized topic or problem in sociology. Permission of the instructor required.

Prerequisite(s): SOC 101.

SOC 369 Selected Topics in Sociology 3 Credits**SOC 396 Applied Sociology 3 Credits**

Shows how sociology can be applied in work settings. As participant observers in organizations related to their career objectives, students learn to apply sociological knowledge, perspectives, and skills. In class meetings and individual consultations with the instructor, students examine the applied dimensions of sociology, the uses of sociology in various occupations, the ethical issues involved in applied sociology, and the culture and structure of their work organization.

Prerequisite(s): SOC 101.

SOC 400 Senior Seminar 3 Credits

For sociology majors only. This seminar involves in-depth examination and research of a specific issue of current importance in the discipline. Learning to do sociology is emphasized.

Prerequisite(s): SOC 201, SOC 301, SOC 314.

SOC 401 Sex and the Body in Society 3 Credits

Examines cultural meanings and social practices associated with sex and the body. Contemporary cultural norms and practices in the U.S. will be compared to other societies, historically and cross-culturally. Variations in sexual practices, ideals of sexual attractiveness according to age, gender, race, ethnicity, class and sexual orientation also will be discussed. Topics may include beauty industries (e.g. cosmetics, diet, fashion, surgery, drugs), sex and the workplace, the impact of media, social policy, and technology on ideals of sexual attractiveness, birth control, and sexual violence.

Prerequisite(s): SOC 101.

SOC 460 Criminal Justice Senior Seminar 3 Credits

Draws on and develops students' knowledge and understanding of crime, criminal law and criminal justice institutions, and applies these to a specific topic, method, institution, or controversy. Topics vary. Students will be expected to contribute to seminar discussions and to complete research projects related to the seminar theme. Required for senior criminal justice majors; open to others only by permission of the chair.

SOC 490 Independent Study: Research and Creative Expression 1-4 Credits

Juniors or seniors who have completed at least 12 credit hours in sociology may propose an independent research project with the aid and advice of any full-time faculty member of the department. Proposals must be reviewed and approved by the sponsoring faculty member and submitted to the department's Independent Study Committee at least four weeks prior to the last day of classes for the semester preceding Independent Study.

Prerequisite(s): SOC 101.

SOC 491 Internship in Sociology 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of applications of sociology in work settings and to analyze work settings using sociological knowledge and research methods. Placements are made in business, government, and community offices that utilize sociological knowledge or research skills.

Prerequisite(s): 2.75 GPA.

SOC 496 Honors in Sociology 3-6 Credits

Training in the efficient collection of data that has a bearing on the problem being investigated. Stresses the technique of proper summarization of the collected material as well as the integration of that material into a comprehensive report. A research design is prepared and hypotheses tested in the field. The original library research is then combined with the findings to produce a mini-thesis. Approval of student's program by a sponsoring faculty member and the department Independent Study Committee is required.

Prerequisite(s): SOC 201, SOC 301.

SOC 497 Honors in Sociology 3-6 Credits

Training in the efficient collection of data that has a bearing on the problem being investigated. Stresses the technique of proper summarization of the collected material as well as the integration of that material into a comprehensive report. A research design is prepared and hypotheses tested in the field. The original library research is then combined with the findings to produce a mini-thesis. Approval of student's program by a sponsoring faculty member and the department Independent Study Committee is required.

Prerequisite(s): SOC 201, SOC 301.

Spanish (SPA)

SPA 100 Spanish I 3 Credits

Introduction to the fundamentals of Spanish grammar, with emphasis on communicative skills, in culturally authentic contexts. Students are required to work extensively with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): placement test if Spanish has been studied elsewhere.

SPA 101 Spanish II 3 Credits

Continuation of Spanish 100. Emphasizes the use of language for communicative and cultural competency while developing a solid grammar foundation in Spanish. Students are required to work extensively with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): SPA 100 or placement test.

SPA 102 Elementary Spanish II Abroad 3 Credits

This course is the second part of the first-year experience in Spanish and is designed for students who have taken Spanish for Beginners I and who are interested in experiences abroad in a Spanish speaking culture. The aim is to develop the four basic skills (listening comprehension, speaking, reading, and writing) in and beyond the classroom. The discussion of distinctive cultural aspects of the Hispanic world is an integral part of this course as well as to encourage students to experience the world through the eyes of the other culture by exposing them to the literature and arts of the local culture. This course takes 8 weeks in total, 7 weeks at Rider online and 1 week abroad. During the seven weeks, students practice linguistic skills and gain cultural knowledge related to the country of destination. These skills and knowledge will prepare the students for the one week abroad experience.

Prerequisite(s): SPA 100 with a minimum grade of D.

SPA 103 Introductory Medical Spanish 3 Credits

The language program objectives of our department are based on the premise that students must be able to demonstrate increased proficiency in interpersonal, interpretive, and presentational communication skills as well as growth in cultural, literary, and interdisciplinary knowledge as they move through a sequence of study. This course is the second part of the first-year experience in Spanish during which the development of communicative and cultural competencies is at the center of this experience. At the end of the course, successful students will be able to handle a variety of uncomplicated communicative tasks in straightforward social situations. They will also develop a sense of the cultural aspects of peoples who speak the target language. This course offers an additional focus on the use of Spanish across a variety of medical professions. Students interested in careers in medicine, nursing, counseling, physical therapy, chiropractic education, healthcare communication, public policy or other related fields will benefit from the linguistic (i.e., vocabulary and grammar) and sociocultural topics examined in this course. In addition to learning grammar and vocabulary that will translate into real-world skills in medical and healthcare professions (e.g., talking to patients, navigating a hospital setting, diagnosing illnesses), students will also explore sociocultural topics on how Latinx communities in the United States relate to medical and healthcare services and industries. In order to take this course, students must have taken Spanish I (SPA 100) at Rider or placed into Spanish II or Introductory Medical Spanish (SPA 101 or SPA 103) on the Foreign Language Placement Test.

SPA 200 Spanish III 3 Credits

A focus on key communicative structures in Spanish with emphasis on aural-oral (listening and speaking skills) and composition writing. Cultural and literary readings and films will be used to develop these skills. A special section may be offered to address the needs of native speakers. Students may be required to work with audio and/or video materials and online sources. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisite(s): SPA 101, 102, 103 or placement test.

SPA 201 Spanish IV 3 Credits

A continuation of communicative Spanish review with emphasis on aural-oral and written skills to prepare students for further study. The discussion of distinctive cultural aspects of the Hispanic world is an integral part of this course. This course counts towards the fulfillment of the Essential Competencies element of the CLAS general education curriculum.

Prerequisites: SPA 200 or placement test.

SPA 300 Advanced Grammar & Composition 3 Credits

A systematic review of grammatical structure. The development of writing skills, in preparation for upper level courses in literature, culture and professional language.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 301 Spanish for Business 3 Credits

A solid foundation in business vocabulary and cultural concepts; situational practice in geographic and cultural contexts necessary to be successful in today's Spanish-speaking world. Practice in writing business letters and other documents. Oral and written assignments to help students improve their critical thinking and become better communicators.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 302 Writing and Translating 3 Credits

Practice in writing and an introduction to translation for students who will use Spanish in their professional lives. Using literary, cultural and journalistic sources, students learn various writing discourses including narration, description, exposition, argumentation, and journalistic and letter writing. Translation involves preliminary study of translation theory and techniques, and practice with texts from students' chosen careers. Additional study of Spanish grammar as necessary.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 303 Advanced Communication and Popular Cultures 3 Credits

The focus of the course is to strengthen the student's aural comprehension and speaking skills by providing a framework for regular guided practice of fundamental grammar structures and vocabulary enhancement in the context of Hispanic cultures. Listening activities will include live speech, video recordings, film shorts and one full-length movie. Speaking tasks will be reinforced with written exercises.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 305 Cervantes 3 Credits

A detailed study of Cervantes' masterpiece, *El ingenioso hidalgo Don Quijote de la Mancha*. Lectures, discussions, and supplementary readings.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 310 Spanish Culture & Civilization 3 Credits

Spain's cultural achievements are studied in light of the country's unique historical and social reality through the use of historical, artistic, architectural, cinematic and literary sources. Cross-cultural awareness is enhanced through exercises that compare Spanish and American society. Classes are in English. No knowledge of Spanish required. This course may contain an optional travel component offered before or after the semester or during spring break.

SPA 311 Latin American Cultures 3 Credits

A panoramic survey of Latin American cultural achievements in light of the unique social and political history from the pre-Columbian period to the present. Classes are in English. No knowledge of Spanish is required.

SPA 312 Latinx Cultures 3 Credits

This course focuses on the cultural formation of Latinos/as/x in the United States, as well as the social and political motivations for Latin American migration to this country. Our class will analyze and question how various Latinx communities are grouped into a single U.S.-Latino Diaspora. This course takes a transdisciplinary approach, thus we will consider literary texts (short stories, poems, films, novels), historical and anthropological studies, and sociological works in our examination of Latinx cultures. The main goals of the course are for students to begin to conceptualize: 1) how the United States has been shaped by the presence of Latino/a/x communities, and 2) how Latino/a/x experiences are reflected in literature and art. Classes are in English. No knowledge of Spanish is required.

SPA 320 Introduction to Spanish Literature 3 Credits

Examines through lectures, readings and class discussions selected texts and their relationship to the main currents of European literary history. Introduction to the practice of literary analysis through written composition. Required for majors. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 325 Introduction to Latin-American/Latino Literature 3 Credits

A study of the development of Latin-American and Latino literature from its origins to the present through the reading, analysis and discussion of representative works by major authors. This course increases the understanding of how social, historical, and political events, together with native as well as foreign literary movements, create a unique literature, conveying the Hispanic-American reality. Required for majors. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 395 Phonetics for Communication 3 Credits

A systematic study of the production of Spanish sounds with practice in phonetic transcription and a preliminary investigation of dialects.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 403 Medieval Literature 3 Credits

Surveys the literature of Spain during the Middle Ages, with special emphasis on major writers such as Gonzalo de Berceo and Don Juan Manuel, and attention to the epic and the medieval ballad. Modern versions of medieval Spanish are used.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 410 Modern Hispanic Poetry 3 Credits

Surveys the poetic genre, emphasizing how to read, analyze, and appreciate poetry. Major poets from Spain and Spanish America of the 19th and 20th centuries representing the main currents of modern lyricism are studied. Focuses on such major writers as Rosalía de Castro, Darío, Jiménez, Machado, Vallejo, Mistral, Neruda, Lorca, Paz, Ana Rossetti, Nicolas Guillen, and Nancy Morejon.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 411 Modern Spanish Novel 3 Credits

Traces the development of the Spanish novel, paying particular attention to the masters of the 19th-century Realism (Galdos and Clarín), the innovations and experimentation of the Generation of '98 (Unamuno, Baroja, Valle-Inclán, and Pérez de Ayala), and the novelists of the post-Civil War and contemporary periods (Cela, Delibes, Goytisolo, Martín Gaité, Matute, Fernández Cubas, and Javier Marías). Emphasis on the aesthetics of the novel as a literary form.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 412 Theater and Film of the Hispanic World 3 Credits

This course explores through theater and cinema the compelling issues that have shaped Hispanic cultures and consciousness throughout the centuries. Sample topics include war and remembrance; myth and history; freedom and authority; immigration; globalization; and race, class, and gender. The course may focus on specific authors or historical periods. Representative playwrights include Lope de Vega, Zayas, Zorrilla, Avellaneda, Lorca, Buero Vallejo, Sastre, Solorzano, Carballido, López Mozo, and Pedrero. Directors include Buñuel, Saura, Gutiérrez Alea, Almodovar, Rocha, Salles, Erice, Zambrano, and Bollain.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 413 The Hispanic Short Story: Transatlantic Connections 3 Credits

This course will introduce students to the most representative writers of the short story in Spain and Latin America from Romanticism to the present. Students will be prepared to perform close readings of the literary genre under study, to analyze the form and content of the texts read, paying due attention to all internal and external aspects that impact the narrative process and the evolution of the short story. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 415 Spanish Renaissance 3 Credits

The origins and evolution of the Renaissance in Spain and of the literary expression of Renaissance culture as reflected in the development and perfection of prose and lyrical styles through the 16th century. Topics include the medieval heritage, Spanish Humanism, the Celestina, the Renaissance ideal in amatory prose and poetry, mysticism, the ballad, and the picaresque novel.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 416 The Spanish Golden Age 3 Credits

The literature of Spain during a period of political decline and outstanding aesthetic achievement: Lope de Vega and the rise of a national theatre; Calderón's drama of ideas; the development of the novella and the picaresque novel; the poetry and prose of Gongora, Quevedo, and Gracian. Also includes an introduction to literary theory.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 420 From Colonies to Nations 3 Credits

This course consists of a panoramic survey of Colonial Latin American literature in light of the unique social, cultural and political history from the pre-Columbian to the Independence period (1825). Course taught in Spanish. Note: This course is cross-listed as LAC 420. Students may not get credit for both SPA 420 and LAC 420.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 426 Latin American/Latino Film and Fiction 3 Credits

A study of the main trends in contemporary Hispanic fiction written in Latin America and the United States. Analysis and discussion of selected novels and short stories, and their cinematic representation on film. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum. Course taught in Spanish.

Prerequisite(s): SPA 201 or above, or placement test at 300-level or above.

SPA 430 Latinx Community Engagement 3 Credits

This course explores the experiences of Latinx individuals and communities across the United States through a) class meetings and discussions, and b) community engagement with pre-established partner organizations in and around Lawrenceville, NJ. Broadly, our course will examine questions related to identity, race, ethnicity, language, transnationalism, (im)migration, the border, (im)migrant detention, and solidarity movements.

Prerequisite(s): SPA 201 or above.

SPA 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

SPA 491 Internship in Foreign Languages 1-4 Credits

A supervised work experience in an approved organization to gain knowledge of the importance and interrelationship of foreign languages and cultures in the workplace. Placements can be made in international governmental agencies, international trade associations, multinational corporations, social service agencies and other appropriate workplace environments both in the United States and abroad. With permission of the supervisor and faculty advisor, a three-credit internship may be substituted for a collateral requirement as credit toward the major.

Prerequisite(s): students should have completed at least one 300-level course in the foreign language.

SPA 496 Special Studies 3 Credits

A seminar open to a variety of topics treating a particular author, period, genre, theme, or issue.

Prerequisite(s): permission of instructor.

Special Education-UG (SPE)

SPE 201 Foundations in Special Education and Inclusive Practice 3 Credits

This course emphasizes the foundations of special education and introduces students to inclusive practice. Philosophical, historical, and legal foundations of special education and characteristics of students with disabilities will be examined. Students will learn the components of an Individualized Education Program (IEP), how to adapt learning environments and curricular materials, as well as how to select and implement modifications for students with disabilities. Inclusive educational practices including communication, coteaching, and collaborative partnerships will be addressed through case studies and fieldwork. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours.

Prerequisite(s): A cumulative GPA of 2.75 is required.

SPE 202 Teaching Students with Autism Spectrum Disorder and Low-Incidence Disabilities 3 Credits

This course is designed to examine the characteristics of individuals with Autism Spectrum Disorder (ASD) and strategies to support their academic, communication, and social/behavioral growth, including the use of assistive technology and positive behavioral supports. Methods and strategies for ASD and other low incidence disabilities will be explored. Through active participation in class and field sites, students will become aware of the various social issues related to family, education, transition, community resources and work experiences of individuals with these disabilities. Students will be required to complete a minimum of 30 weekday field hours in addition to regularly scheduled class hours.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 210 Global Encounters 3 Credits

This course is an international learning experience focused on exploring educational opportunities in the United States and abroad. Students will study the history, policy and practice of special education in the United States and compare it with another country and culture first hand, through lectures, school visits and reflection. Current strategies and challenges of educators and families supporting individuals with disabilities will be examined. Through this cross-cultural experience, students will broaden perspectives and develop cultural awareness, knowledge, and understanding of diversity. This course is open to all students and disciplines. There are no prerequisites.

SPE 300 Inclusive Practices for General Education Teachers 3 Credits

This online course is designed to introduce preservice general education teachers students to special education and the inclusive classroom. Students will explore current issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed. Students will be required to complete a minimum of 15 field hours in addition to regularly scheduled class hours. Prerequisite(s): EDU 106 and EDU 206. A cumulative gpa of 2.75 is required.

SPE 303 Assessment and Instruction for Students with Disabilities 3 Credits

This course will emphasize the relationship between assessment and instructional design and implementation. Coursework includes the evaluation, selection, development, and adaptation of standardized, normreferenced, and functional assessments, such as a Functional Behavioral Assessment (FBA) and Ecological Assessment. Strategies to support literacy instruction for students with disabilities will be examined. Transition planning, program development, and agencies available to support students with disabilities and their families will be explored. This course requires a field experience in order to help students apply theory to practice.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 304 Assessment and Instruction in the Inclusive Classroom 3 Credits

This course will emphasize assessment, planning, and instructional design to maximize the learning of all students, including those with exceptional learning needs, in the inclusive classroom. Students will have the opportunity to explore a variety of instructional strategies to meet the needs of diverse learners. Organization of learning environments and the collaborative process, including co-teaching models, will be utilized to design a long-term unit plan. This course requires a field experience in order to help students apply theory to practice.

Prerequisite(s): A cumulative GPA of 2.75 and SPE 201.

SPE 305 Assessment and Instruction for Students with Autism Spectrum Disorders 3 Credits

Through this course, teacher candidates will learn both theories related to teaching students with Autism Spectrum Disorder (ASD) as well as best practices in the classroom related to academic instruction, as well as emotional, behavioral, and communicative interventions. This course also includes a field component, in which teacher candidates are expected to complete 10 hours of observation in a classroom with students with ASD. The course begins by examining the characteristics of the disability, causes, early warning signs, diagnostic procedures, and early intervention practices. Specific practices related to instruction and intervention as well as how to best structure a classroom for students will be examined. Teacher candidates will receive instruction in a variety of strategies and practices, even those that do not yet qualify as EBPs, as well as their theoretical underpinnings. Strategies for communicating effectively and efficiently with parents, as well as the most current and/or special issues in the field will also be discussed. Issues related to post-secondary transition will also be examined.

Prerequisites: A cumulative GPA of 2.75 and SPE 201.

Sport Management (SPT)

Courses and Descriptions

SPT 250 Introduction to the Business of Sports 3 Credits

This course is designed to introduce the student to the business of sports. Business principles, such as management, marketing, law, finance and economics will be applied to the business of sports. The course will also explore the various career opportunities in the world of sports.

SPT 320 Business of Global Sport 3 Credits

The course explores the diverse challenges and issues facing the managers of sport enterprises in the context of the global marketplace. Issues of governance, cross-cultural interactions and business activities will be examined as they relate to modern sport at the international level. By evaluating case studies and examining current issues in the field, students will gain an understanding of the relationships and responsibilities associated with being a business professional in the global sport industry.

SPT 322 Sports Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of statistical techniques and visualizations to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations and fantasy competitions. Classwork will consist of readings, lectures, discussions, presentations from guest speakers, and hands-on labs. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite(s): CIS 185, MSD 200 or MSD 205, and SPT 250.

SPT 325 Financial Management in the Sport Industry 3 Credits

This course is designed to build upon earlier knowledge from courses in economics, accounting and finance that emphasizes the sports industry and the challenge for financial managers in areas such as stadium/arena financing, financial analysis and valuation. Business models and their financial implications for media and sports related enterprises as well as the business of college athletics will also be covered.

SPT 355 Sports and the Law 3 Credits

Examines the legal, ethical, economic, social and managerial issues related to sports. Topics include liability issues, contracts, employment discrimination, antitrust law, and constitutional law. This course is cross-listed as LAW 355. Students may not get credit for both SPT 355 and LAW 355.

SPT 444 Selected Topics in Sport Management 3 Credits

This course is offered occasionally with topics and prerequisites set by the Business of Sports Program faculty. This course can be used as an elective for the Sport Management major, Sport Studies minor, or as a free elective. This course is graded on a letter grade basis.

Prerequisite: SPT 250.

SPT 450 Contemporary Issues in Sport Management 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of lectures, discussions, and guest speakers from the sports industry. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports.

Prerequisite: SPT 250, senior standing, and completion of 15 credit hours in business of sports coursework or permission of instructor.

SPT 490 Independent Research and Study 1-4 Credits

Topic to be approved by the professor and chairperson. Available for juniors and seniors. No more than 12 credits allowed toward graduation, which may be counted as a business or free elective.

Prerequisite(s): Junior standing, 9 credits in Sport Management courses (including SPT 250) and permission of instructor.

SPT 491 Sport Management Internship 1-3 Credits

Sports related internships can be used to satisfy an elective requirement for the Sport Management Major, Business of Sports Minor and Sport Studies Minor. The course is graded as Pass/Fail.

Sustainability Studies (SUS)

SUS 100 Introduction to Sustainability Studies 4 Credits

Sustainability is an idea that will shape the lives of all in the 21st century. Students will explore how we arrived at our current precarious environmental situation and investigate cutting-edge methods that support human development and protect the natural ecosystems on which we will depend. By exploring principles of sustainability (whole-systems approaches, resource limitations, stewardship) through many different lenses, students will appreciate the interdisciplinarity of the sustainability enterprise. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Corequisite(s): SUS 100L.

SUS 100L Intro to Sustainability Lab 0 Credits

For students concurrently taking SUS 100. Field trips, visiting speakers, and films to complement topics covered in the introductory course. One three-hour laboratory per week.

Corequisite(s): SUS 100.

SUS 400 Sustainability Studies Seminar 3 Credits

To synthesize sustainability studies coursework and internship experiences, students will collaboratively develop and implement a sustainability project on the Rider campus, aiming to simultaneously reduce both depletable resource use and environmental impact. Seminar sessions will explore the historical development of current systems and innovative thinking related to sustainability planning related to the focal issue. Specific topic at discretion of the instructor. **Prerequisite(s):** SUS 100, SUS 100L.

Corequisite(s): SUS 400 or as prerequisite or permission of instructor.

SUS 490 Independent Study: Research and Creative Expression 1-4 Credits

Immerses the student in applying sustainability principles in a field setting. Students are expected to assess the outcomes of their projects and communicate their results verbally and in writing to interested audiences.

SUS 491 Internship in Sustainability 1-4 Credits

A supervised work/service experience in an approved organization where students gain understanding and experience with applying sustainability principles. Placements may be in private, public, educational, non-profit or governmental organizations. Students are expected to include measurement and documentation of the environmental, social, and economic impact of their work. A minimum of 50 hours of work is required for one credit. At least 150 hours are required to earn 3 credits.

Theatre (THE)

THE 103 The Authentic Instrument I: Introduction to Performance Skills 3 Credits

Through Alexander Technique and other methodologies, actors gain awareness of personal habits and begin to find their authentic, truth-telling voice and body—a dynamic and expressive instrument to serve them in any medium.

THE 104 The Authentic Instrument II: Developing the Imaginative Performer 3 Credits

Continuing from THE 103, actors explore psycho-physical techniques (e.g. Michael Chekhov, Viewpoints, Laban) to develop the actor's imagination. The class culminates in a public presentation using the tools that have been cultivated in Authentic Instrument I & II.

Prerequisite(s): THE 103.

THE 105 Theatre History to 1700 3 Credits

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 107 Acting I: Intro to Acting 3 Credits

Exercises and improvisations developing the fundamental prerequisites for the actor are provided. The emphasis is on vocal and physical mobility and the ability to communicate emotional states from the stage.

THE 110 Acting II: Scene Study 3 Credits

Basic acting techniques. Emphasis on the ingredients of any action: what am I doing, where, why, who am I, what is my attitude toward partner?

Prerequisite(s): THE 107.

THE 111 Theatre Lab 0 Credits

This class serves as a forum for students to cultivate practical professional skills. Through seminars, guest speakers and master classes, this lab will give the students necessary tools to enter the professional theater. Theater majors must meet the weekly attendance and participation requirements during every semester up to a total of six.

THE 115 Stagecraft 3 Credits

The theory and practice of construction and rigging of stage scenery is offered. Emphasis is on actual productions and road show set-ups. One lecture and two labs per week.

THE 116 Stagecraft Practicum 1 Credits

Work in the various shops and stages specializing in different areas such as carpentry, scenic painting, lighting and electrics, costumes and props, assisting main stage productions under the supervision of the design or technical staff.

Prerequisite(s): THE 115.

THE 118 Visual Imagination 3 Credits

Introduction to the visual world of theater design. Visual examples, physical exercises and handcraft of composition and style, with dramatic input and meaning. The course explores how to translate ideas in a dramatic text into a visual context.

THE 120 Theater Appreciation 3 Credits

By exploration of dramatic literature, conclusions are drawn as to man's relationship to his particular period, style, political, social, and psychological environment. Appreciation of the theatrical event is included. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 127 Theatre Production 1 Credits

Students rehearse and perform roles in a play produced by the department and directed by a member of its faculty. Students may also prepare a major element of design or technology for the production. Maximum of eight credits are accepted in theatre production, band and/or choir.

THE 190 Production I 1-3 Credits

Students carry out a technical theatre crew position for one or more theatre, musical theatre or dance productions during the semester of course registration. May be repeated seven times, for a total of eight credits.

THE 199 The Arts in Contemporary Civil 3 Credits

An integrated study of the arts and their place in contemporary American life. Includes attendance at several events in art, music, and drama.

THE 201 Devised Theatre 3 Credits

Devised theatre is a process in which a whole creative team – from actors to technicians - develop a new work collaboratively. Students will create an original production inspired by a theme, topic, poem, or circumstance using multimedia, interviews, and other methods and build them through collaborative workshops and rehearsals.

THE 206 American Theatre History 3 Credits

The history of the American theater from the colonial period to the present, emphasizing dramatic scripts and theatrical conventions. Examines important playwrights, theorists, and practitioners representative of each period of American history, emphasizing the 19th and 20th centuries.

THE 215 Introduction to Theatrical Lighting and Sound 3 Credits

This course will introduce students to basic lighting and sound principles and how those integrate into a theatrical performance. The main focus of the class will be analysis and application of lighting and sound equipment commonly used in live performance and how that equipment functions and is installed. The class will also touch on the design process, script analysis, and lighting color theory. These objectives will be achieved through in-depth lectures, class discussions, and hands-on demonstration sessions.

THE 216 Introduction to Scenic Construction 3 Credits

This course will expose students to reading construction drawings, construction techniques, generating material lists, problem-solving, and material and time management as related to scenic construction. A shop participation requirement will allow students to apply course objectives within a real-time production schedule and construction environment.

THE 218 Stage Lighting 3 Credits

The theory and practice of stage lighting as utilized in concept, dance, and theatre. Considers the nature of light, controlling light, color theory, electricity, electrical safety, and lighting design.

Prerequisite(s): THE 115.

THE 219 Stage Management 3 Credits

Provide necessary tools to get started as a production stage manager (PSM), including management, leadership, communication and organizational skills. Providing guidelines to prepare production paperwork. Overview of the relationship between the PSM and other production personnel.

Prerequisite(s): THE 115.

THE 220 Movement for the Actor I 3 Credits

This course is an introduction to movement training methodologies, and emphasizes physical awareness and expressivity as it relates to development of character.

Prerequisite(s): THE 110, For Acting majors or by permission of the instructor.

THE 221 Voice for the Actor 3 Credits

Focuses on exploration of the basic principles of vocal production and cultivating natural expressivity of the voice. Class work is based upon the classic progression of voice exercises of Kristin Linklater.

Prerequisite(s): THE 107; Open to Theatre majors or minor, or by permission of the instructor.

THE 222 Speech and Dialects for the Actor 3 Credits

Focuses on exploration of the International Phonetic Alphabet (IPA) and the use of the IPA in learning dialects (including Standard Neutral American) for the stage.

Prerequisite(s): THE 107; Open to Theater majors or minor, or by permission of the instructor.

THE 223 Costume Design 3 Credits

Introduction to tasks, skills and expertise of costume design and costuming techniques, relationship with other creative production and cast members. Students will create sketches and develop basic construction plans. Develop familiarity with fabrics, patterns, common challenges in costume design.

Prerequisite(s): THE 115, THE 118.

THE 224 Stage Make Up 3 Credits

Basic application of make up artistry and techniques for the stage. How it can help build a character, and how to apply to self and others.

THE 225 Sound Design 3 Credits

Introduction to sound design and its diverse use and practice for the staged productions, e.g. plays, musicals, operas and dance.

Prerequisite(s): THE 115.

THE 226 Drafting for the Stage 3 Credits

Covers essential drafting language for staged productions. Drafting of ground plans, sections, elevations, and renderings by hand and with computers.

Prerequisite(s): THE 115.

THE 227 Properties and Scenic Painting 3 Credits

Covers general aspects of scenic painting and props for the stage. Hands on exercises, needs and challenges of each area, how work is usually accomplished in the professional world. Explore different textures, materials and how to combine them.

Prerequisite(s): THE 115, THE 118.

THE 228 Projection Design 3 Credits

In this course students will learn the basics of video editing software and its application to the performing arts. It will provide them with a general understanding of the needs for projection design, visual possibilities, explore the reasons to use video or projection in a production and its most effective applications within theatrical production limitations.

Prerequisite(s): THE 115, THE 118.

THE 229 Movement for the Actor II 3 Credits

This course is a continuation of study in movement training methodologies (Alexander Technique, Viewpoints, Laban). It will emphasize developing physical awareness and expressiveness as it relates to the development of character work. It will also continue the further cultivation of awareness of habitual psycho-physical patterns that inhibit students in their professional development.

Prerequisite(s): THE 220, THE 221.

THE 240 Script Analysis 3 Credits

This course provides students with a technique for analyzing a theatrical script in terms of its theatrical requirements and aesthetic qualities.

Students will use critical research and develop the abilities to write and speak clearly about dramatic literature, the requirements of production, and the experience of performance.

Prerequisite(s): THE 107 with a minimum grade of C.

THE 250 Introduction to Costume Construction 3 Credits

This course will introduce students to basic costume construction methods and alteration skills used by professional costume shops and costume houses to create theatrical costumes. Students will complete several projects, covering hand and machine sewing, cutting, fabric identification, and will also learn how to use home and commercial patterns to cut out garments and simple patterning and draping techniques. Students will also get practical experience by assisting the costume designer and/or shop manager in supporting the needs of the current productions and will have experience taking measurements, fitting and the alteration of actual costumes.

THE 260 History of Style and Decor 3 Credits

This class is a survey of elements, furnishings, decorative motifs and trends in architecture, decor and fashion, starting with prehistory and moving through the early part of the 21st century. It is intended to be a visual survey of the major "periods" of both decor and fashion and is intended to help theatre artists to develop an understanding of visual history.

Prerequisite(s): THE 115.

THE 290 Production II 1-3 Credits

Students carry out an intermediate level technical theatre crew position for one or more theatre, musical theatre, or dance productions during the semester of course registration. Intermediate level technical theatre positions are supervisory positions or assistants to department heads which include, but not limited to, assistant to a designer, Stage Manager, Wardrobe Supervisor, and Master Carpenter.

Prerequisite(s): SO standing; 3 credits of THE 190.

THE 300 Acting for the Camera 3 Credits

Focuses on the craft and artistry of acting in television and film. Examination of TV production and the styles needed for work in various media will be discussed. Physicalization, simplicity, listening, marking and other technical requirements will be explored. Staging involving different camera angles will be rehearsed. The emphasis of this class is on adapting the performance to the special needs of the camera.

Prerequisite(s): THE 107.

THE 307 Contemporary Theater 3 Credits

The richness and diversity of contemporary theatre artists across the world are discussed. Focusing on playwrights and innovative performing arts practitioners, the form and content of dramatic literature and production styles considered most significant today are examined from a global context.

THE 308 Modern Drama 3 Credits

Surveys American and European drama from 1920 to 1970. All plays are read in English translation. In these plays, theatrical artists address the great themes of this century. While doing so, they also expand the limits of theatrical expression.

THE 310 Acting III 3 Credits

Students will study in-depth techniques for exploring characterization. They will be introduced to the "magic if" and study techniques for placing themselves in the circumstances of the characters they are portraying. They will learn the interior and exterior analysis of characters using "Adler" and "Practical Aesthetics" techniques.

Prerequisite(s): THE 107, THE 110.

THE 311 Acting IV 3 Credits

Students will learn the appropriate techniques to explore characters in the three styles of Elizabethan, Restoration, and Commedia dell'arte theatre. Sessions will include movement, effective speech, and finding appropriate actions for each style. Students will also learn proper research techniques to understand cultural influences on plays and characters.

Prerequisite(s): THE 107, THE 110, THE 310.

THE 312 The Arts Abroad 3 Credits

A two-week trip abroad that includes a critical study of the music and theatre. Students are required to attend all performances, guided tours, and classes before and after the trip. A travel journal and final paper is required. A travel fee is required. Travel sites and artistic disciplines may vary year to year. May be taken more than once for credit.

Prerequisite(s): Permission of instructor.

THE 313 Advanced Voice and Speech for the Actor I 3 Credits

Actors continue their study of vocal progression of Kristen Linklater and the speech work of Patsy Rodenberg, Edith Skinner and Louis Colaianni to develop physical freedom, energy and expressivity. Advanced diagnostic work of students' voice and speech habits is explored in relationship to work with contemporary, heightened, and stylized texts.

Prerequisite(s): THE 221, THE 222.

THE 314 Advanced Voice and Speech for the Actor II 3 Credits

Continuing from THE 313, actors apply advanced principles of vocal production and speech work to contemporary, heightened and stylized texts.

Prerequisite(s): THE 313.

THE 315 Acting V: Advanced Acting for the Camera 3 Credits

This course is a continuation of the study of acting for Television, Film, Internet Content, Voiceover and other mediums.

Prerequisite(s): THE 229, THE 311.

THE 317 Scenic Design 3 Credits

The study and application of design principles as related to the stage. Incorporates the design process, decor research, styles, materials, and construction technology.

THE 329 Movement for the Actor III 3 Credits

This course is a continuation of study in movement training methodologies focusing on continued development of expressivity, ease, dynamics and authenticity in character development.

Prerequisite(s): THE 229.

THE 390 Production III 1 Credits

Students carry out an advanced level technical theatre crew position for one or more theatre, musical theatre, or dance productions during the semester of course registration. These positions include, but are not limited to, Designer, Production Stage Manager, Props Master, and Technical Director. This course may be taken up to three times for credit.

Prerequisite(s): JR or SR standing; 2 credits of THE 290 and related management/design course or permission of Instructor.

THE 400 Directing for the Stage I 3 Credits

The technique of play directing and production management. Lectures present aesthetic and theoretical concepts that are explored in workshops.

Prerequisite(s): THE 107, THE 115.

THE 410 Advanced Performance Workshop 3 Credits

An opportunity to work an entire semester on a specific style or period of theatre, e.g., Shakespeare, farce, Readers' Theater.

Prerequisite(s): THE 107, THE 110.

THE 411 Advanced Performance Online Workshop 3 Credits

An opportunity to work an entire term on a specific style or period of theatre that is most conducive to online instruction.

Prerequisite(s): THE 107, THE 110.

THE 450 NY Experience: Professional Audition Technique and the Business of Acting 3 Credits

Students engage weekly with New York professionals to learn the business of acting and strategies for successful auditions in the NY Film, Television and Theatre industry. Students will participate in mock auditions with casting directors and theatre and on camera directors to refine audition skills. Travel costs to New York are the responsibility of the student.

THE 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credits. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing, good academic standing.

THE 491 Internship in Theater 1-12 Credits

Provides junior or senior theatre majors the practical experience of working within a professional theater environment. Students must be sponsored by a theatre professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

THE 493 Contemporary Theatre Ensemble 1 Credits

This course gives Contemporary Theatre Practice students the opportunity to create a full season of student-directed, acted and designed productions.

Prerequisite(s): THE 190 (3 times) and 60 semester hours.

THE 495 Selected Topics in Theatre History 3 Credits

Intensive study of a particular topic, such as the work of one dramatic movement, one period in dramatic history, or one nation's history. Students become deeply involved in an area through research, class discussions, and individual consultation with the instructor.

THE 496 Senior Internship 6-12 Credits**THE 497 Theatre Senior Showcase 1 Credits**

This course is a senior level experience for BFA acting students, and acts as a bridge between life in the university and life as a professional actor. Through this course the students will, in collaboration with the teacher, compile and put together a showcase to introduce the students to casting and agent professionals in the industry by way of getting the showcase performance in front of a diverse range of industry professionals who will be useful in both casting and representing recently graduated talent.

THE 498 Senior Capstone 3 Credits

The senior capstone is intended for technical theatre students in their final year. Depending on the required abilities, students will be able to design sets, lights, costumes, props or sound for a mainstage show at Rider University, do research on topics related to technical Theatre, internships outside Rider University or work on projects that will improve the use of facilities, storage or equipment for Theater and Dance Department.

THE 499 Senior Honors Program 3 Credits

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, to be planned under the direction of a faculty advisor, will represent a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

UNDERGRADUATE ACADEMIC POLICIES

Introduction

Students should refer below for important information regarding Rider's undergraduate academic policies. College/school-specific academic policies are also listed within each of the colleges/schools in the Academic Catalog.

Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to, those standards and policies set forth in this catalog and in The Student Code of Social Conduct (https://www.rider.edu/sites/default/files/docs/student_code_of_social_conduct.pdf). **Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student.**
2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirements), creations, and activities engaged in by the student while at the University, including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, internet/web-based productions and sales, and athletic events and all proceeds therefrom. The student has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

Rider University's Right to Change Catalog Content

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student.

While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and

reasonable treatment of interested parties requires in the University's best judgment.

- Withdrawal from the University (p. 800)

- Undergraduate Education Minimum Standards (p. 785)
- Readmission after Academic Dismissal (p. 785)

All students permitted to enroll at Rider University are in good standing and are qualified to be bona fide students. Decisions regarding academic progress, conditional standing, and dismissal for poor scholarship are the responsibility of the Committee on Academic Standing within each college or school. These committees may establish and apply criteria in addition to the minimum university cumulative grade point average (GPA).

Using approved academic criteria, the Committee on Academic Standing within each college or school may review the academic record of any student.

Because a minimum 2.0 cumulative grade point average (GPA) is required for graduation, students are expected to maintain a minimum 2.0 cumulative GPA while enrolled at Rider. Students who fail to meet this minimum will be reviewed by the appropriate Committee on Academic Standing and may receive a letter of academic concern, be placed on conditional standing, or be dismissed from the University. Students who meet the minimum cumulative GPA but who are dismissed from a specific college or school for other reasons are eligible to apply to another college or school of Rider University.

Undergraduate education students are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University and must receive a grade of 'C+' or higher in all education courses. It is the individual student's responsibility to re-take any education course in which a grade lower than 'C+' has been earned. Undergraduate education students will be permitted to undertake student teaching only if they have received 'C+' or higher in all education courses and have a minimum 3.0 cumulative GPA. See the Undergraduate Education section below for further information.

Undergraduate music education students are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University and must pass the sophomore portfolio to remain in good standing in the major. See the Undergraduate Education section below for further information.

Academic Classification

Students must carry twelve (12) credit hours or more (or their equivalent) in a fall or spring semester to be considered a full-time student. Normal progress toward a degree and academic classification consists of the following credit advancement:

Academic Classification	Credit Advancement
Freshman	0 - 23 hours
Sophomore	24 - 53 hours
Junior	54 - 89 hours
Senior	90 or more hours

All colleges at Rider, with the exception of Westminster Choir College, require a minimum of 120 hours for baccalaureate degree completion.

Westminster Choir College requires a minimum of 124 hours for baccalaureate degree completion. In some colleges, some degrees require more. Continuing Education Program students require 60 credit hours for associate degree completion.

Students receiving financial aid from any source need to be particularly concerned with their full-time status and making normal progress toward a degree.

In **Westminster College of the Arts**, special (non-degree) students are not enrolled in a program that will lead to a degree, although they may have previously completed a degree in the college. They may enroll in courses at or below the 500-level at the discretion of appropriate academic personnel. Those holding baccalaureate degrees who wish to take courses at the 600 or 700-level may be asked to qualify by means of completing the graduate application process or by satisfying other criteria.

Academic Concern, Conditional Standing/ Dismissal and Readmission

- Academic Concern
- Conditional Academic Standing (p. 784)
- Academic Dismissal from the University (p. 785)
- Dismissal from a Major within Westminster College of the Arts (p. 785)

Academic Concern

Upon review of a student's academic record, a Committee on Academic Standing may issue a letter of concern, which responds to academic progress that does not meet college, school or university expectations, and describes an academic plan of study that must be met in the subsequent semester. Students who fail to pursue a course of study prescribed by an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be placed on Conditional Academic Standing or dismissed.

Conditional Academic Standing

Upon review of a student's academic record, a Committee on Academic Standing may place a student on Conditional Academic Standing. In reaching this decision, the committee may require a student who does unsatisfactory work to pursue a specific course of study during a particular academic session. Students who fail to pursue a course of study prescribed by an academic standing committee, who do unsatisfactory work in the prescribed course of study, or who fail to meet other academic standards may be continued on Conditional Academic Standing or may be dismissed without further right of appeal. There must be substantial evidence of proper motivation and a capacity for

doing college level work to warrant maintaining a student in school with a record of continued conditional status as opposed to dismissal.

Students on conditional academic standing may not register for an academic overload. Additionally, students must be removed from conditional status in order to be approved for graduation.

Academic Dismissal from the University

Students who have not done satisfactory work may be dismissed from the University for poor scholarship at the end of any semester after an appropriate review of their scholastic records by the Committee on Academic Standing within their college or school. Students may also be subject to academic dismissal if their cumulative GPA falls below the required minimum for two or more consecutive semesters, or the GPA falls below the required averages established at the freshman, sophomore, junior and senior levels. Academic dismissal at the end of the fall semester is effective prior to the beginning of the spring semester.

Academic dismissal at the end of the spring semester is effective prior to the beginning of summer session II.

Students who wish to appeal a dismissal must submit a written statement of appeal to the academic dean of their college or school within 10 days from the date on their letter of dismissal. All appeals submitted by the deadline will receive consideration by the appropriate academic standing committee.

Dismissal for academic reasons terminates a student's relationship with Rider. Dismissed students may not enroll for courses nor participate in university-sponsored activities or ensembles at either campus for a period of one year following their dismissal. Students dismissed for academic reasons normally will not be eligible for readmission within one calendar year of the dismissal date. Although some students will apply for readmission, there is no real or implied right to such readmission.

Students dismissed by the School of Fine and Performing Arts (SFPA) or Westminster Choir College (WCC) but not Rider University may apply for enrollment in other colleges of the University. Students dismissed by WCC but not Rider University may not enroll in WCC courses, ensembles or activities until they have been readmitted to WCC with the exception of courses, ensembles or activities that are delivered by or at WCC and are required in music degrees housed within the School of Fine and Performing Arts (SFPA). Students dismissed by SFPA but not Rider University may not enroll in SFPA courses, ensembles or activities until they have been readmitted to SFPA.

Dismissal from a Major within Westminster College of the Arts

Academic departments within Westminster College of the Arts reserve the right to dismiss a student from a major following notification that their standing in the major is in jeopardy and the passage of a suitable amount of time permitted to address stated issues, typically one semester. Such dismissal may be based upon any of the following conditions: failure to maintain a satisfactory or minimum GPA; failure to sustain academic progress in the courses of the major; conduct in violation of the standards of the department or profession; failure to meet conditions or requirements as stated in university catalogs, The Student Code of Social Conduct, or the departmental handbook; or the student's general standing at Rider University. Such dismissal will become effective at the end of the semester in which the decision is reached. Students dismissed from Music Education are not permitted

to enroll in Music Education courses until readmitted into the Music Education major.

Undergraduate Education Minimum Standards

Undergraduate education students are required to have a minimum 3.0 cumulative GPA by the time they register for student teaching and must receive a grade of 'C+' or higher in any Education course (a) that is specifically required for a major or minor in Education and (b) in which enrollment is limited to Education majors. It is the individual student's responsibility to re-take any required education course in which a grade lower than 'C+' has been earned. Undergraduate education students will be permitted to undertake student teaching only if they have received 'C+' or higher in all required education courses and have a minimum 3.0 cumulative GPA. See the Undergraduate Education section below for further information.

The undergraduate education department also reviews the professional development of all students to ensure that they meet departmental standards for professional conduct and that they show promise of success in teaching. This review is in addition to the grade requirements listed above. Students must earn a passing score on all sections (reading, writing, math) of the Core Academic Skills for Educators Test before registering for any methods courses. This is a NJ Department of Education rule that applies to all elementary, secondary and business education students.

Undergraduate music education majors are required to maintain a minimum 3.0 cumulative GPA in all courses taken at Rider University, must pass the sophomore portfolio to remain in good standing in the major, and must earn a passing score on all sections (reading, writing, math) of the Core Academic Skills for Educators Test.

All undergraduate education and music education students must present evidence of a passing score on the Praxis Content Area (Secondary) or Multi-Subject (Elementary) Assessment (formerly Praxis II) in their specialization area prior to the full time student teaching semester (by March 1 for those applying for full time student teaching in the fall semester and July 1 for those students applying for full time student teaching in the spring for Secondary Education and before registering for ELD 308/376 for Elementary Education). This is the same Praxis Content Area or Multi-subject Assessment (formerly Praxis II) students will need for certification.

As appropriate, students who fail to meet the undergraduate education department's standards will be counseled on ways to improve their performance or will be asked to leave the program.

Readmission after Academic Dismissal

Dismissed students seeking readmission must first contact the Registrar's Office (<https://www.rider.edu/academics/academic-support-services/registrar/>), Bart Luedeke Center, or the Associate Dean of Students Office, Bart Luedeke Center, to obtain appropriate forms. Once the Registrar or Associate Dean of Students or his/her designee approves the readmission application, the application is forwarded to the dean of the college to which the student seeks reentry. Students dismissed for academic reasons must submit with their readmission application a personal letter to the Academic Standing Committee which will make decisions concerning their readmission. They should also provide evidence, usually in the form of a transcript from another institution, of formal study and/or accomplishment. If possible, such

work should have been done in specific areas of deficiency in the student's academic record.

Academically dismissed students must meet all academic requirements in place at the time of their readmission. Readmission will be dependent upon various criteria including GPA, current academic progress, and the student's general standing. Students in the Westminster College of the Arts may be required to reapply or reaudition.

If readmission is granted, the student is placed on conditional academic standing until the cumulative GPA reaches a satisfactory level of at least 2.0. A readmitted student is responsible for curriculum requirements in effect at the time of readmission.

Academic Disability Policy

Rider University supports the protections available to students with disabilities under Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended, and the New Jersey Law Against Discrimination.

Student Accessibility and Support Services (<https://www.rider.edu/academics/academic-support-services/student-accessibility-support-services/>) (SASS) facilitates equal access to the programs and activities at Rider University for students with disabilities, as defined by the Americans with Disabilities Act (ADA).

Students must initiate contact with SASS in order to receive services and to arrange reasonable accommodations, such as course adjustments, course substitutions and auxiliary aids. Any Rider student who supplies SASS with appropriate documentation of a disability is eligible on a case-by-case basis for reasonable accommodations. Students with disabilities should contact SASS (Bart Luedeke Center, Suite 201, accessibility@rider.edu, 609-895-5492) to discuss available services and reasonable accommodations, including academic adjustments.

Only students with documented disabilities that prevent equal access to an academic course or program are entitled to reasonable accommodations, which may include course adjustments, course substitutions and auxiliary aids. A reasonable accommodation is an accommodation that provides the student with equal access to the academic course or program, including all course or program materials, but does not impose an undue burden on the University or constitute a fundamental alteration to the course or program in question. Knowledge of the essential course and program standards resides primarily with the individual faculty member and/or the academic department.

SASS evaluates the disability documentation provided by the student, collects additional information from the student, and gathers information from relevant educational support personnel (e.g., high school guidance counselors), medical and psychological professionals, and other pertinent sources outside of Rider University. When the student's disability has been sufficiently documented and potential reasonable accommodations have been identified, the student is provided a Notice of Academic Adjustments specific to each course and encouraged to present that Notice of Academic Adjustments to the relevant faculty member and to discuss, in a private setting, how the reasonable accommodations will be implemented.

If any such faculty member has concerns that the accommodations constitute a fundamental alteration to the course or program in question, that faculty member shall promptly contact SASS to initiate discussion and resolution of those concerns.

If the faculty member does not demonstrate to SASS that the accommodation constitutes a fundamental alteration of the course or program in question, the accommodation shall be put in place. If the faculty member demonstrates to SASS that the accommodation constitutes a fundamental alteration of the course or program in question, alternate accommodations, to the extent available, shall be made. If SASS and the faculty member are unable to mutually agree on this issue, they shall appeal it to the Provost or his/her designee, who shall hear both positions, review any necessary documents, and render a final decision.

If such an appeal is taken to the Provost or his/her designee, and the semester has already begun, the Provost or his/her designee shall determine at the outset of the appeal process whether or not the student will suffer an immediate negative impact, if the proposed accommodation is not yet in place. If the determination is that the student will suffer such an immediate negative impact, then the proposed accommodation will be put into place pending resolution of the appeal. If no such immediate negative impact is apparent, the proposed accommodation will be withheld, pending resolution of the appeal. In either case, the Provost or his/her designee will make every reasonable effort to render his/her decision within four working days of the initiation of the appeal.

This policy is designed to ensure the University's compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended and the New Jersey Law Against Discrimination, and to enable every Rider student with a disability to enjoy an equal opportunity to achieve his/her full potential while attending this University.

Academic Load/Overload

The normal maximum academic load for Lawrenceville students shall not exceed 17 semester credit hours per semester. The normal maximum academic load for Westminster Choir College students shall not exceed 18 semester credit hours per semester. Permission to exceed these loads must be obtained from the student's academic dean's office.

Westminster Choir College students may exceed the normal maximum academic load after passing 24 semester credit hours and attaining a cumulative grade point average of 3.0 or higher. All other students may exceed the normal maximum academic load after passing 45 semester credit hours and attaining a cumulative grade point average of 3.0 or higher.

Students who exceed the normal load are required to pay an overload per credit fee for each credit over 18, except in the case of non-billable hours.

Students on Conditional Academic Standing may not register for an academic overload.

Students may enroll for a maximum of 14 credits during Summer I and II combined with no more than 7 credits in any combination of I sessions or II sessions. These maximums may be exceeded only with the permission of the student's academic dean.

Students should understand that for every hour spent in class, they are expected to spend two to three hours studying outside of class time, and should therefore plan their academic load accordingly. Study time may vary based on the student's background knowledge and class difficulty.

Academic Programs

The Academic Programs A to Z Chart (p. 20) lists Rider University's majors, minors and certificates alphabetically, along with the college

or school (p. 22) that grants each degree, major, minor and certificate. The following definitions explain the difference between majors, minors, tracks, concentrations, and emphases:

Major An organized group of courses ranging from introductory through advanced levels. Typically most if not all courses are in a single primary area of study, although some majors include study in multiple disciplines. Undergraduate majors require between 18 and 90 credits, depending upon the liberal arts or professional focus. Graduate majors require between 30 and 45 credits. Entrance into some majors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the major is listed on the official transcript.

Minor An organized group of courses, typically involving introductory through intermediate levels. While most minors are in a single discipline, Rider University offers several interdisciplinary minors, such as Law and Justice, and Sustainability Studies. Minors are offered at only the undergraduate level, and require between 15-24 credits. Some departments have restrictions on the connection between major and minor options. Entrance into some minors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the minor is listed on the official transcript.

Track A choice of specialty within a degree, tracks comprise an organized group of courses serving a particular focus within a major. In undergraduate and graduate majors that represent multiple disciplines, tracks indicate a particular disciplinary focus. In a single discipline major with tracks, each track represents a singular focus, often representing a liberal arts or professional path. In some cases, a track represents a sub-specialization within the major field. Entrance into some tracks, particularly those that represent a particular disciplinary focus, may require prerequisites, portfolios, auditions, or other forms of assessment. Tracks require between 21 and 52 credits. Upon completion of all requirements, the track is listed on the official transcript along with the major field of study.

Concentration Concentrations, such as English Literature or English Writing, represent a specialty or focus within an undergraduate or graduate major field of study. Typically, a concentration unites courses around content or a particular theme. Concentration requirements are a portion of a major, not the entire major itself. In some cases, concentrations refer to an interdisciplinary combination. Entrance into some concentrations may require prerequisites, portfolios, auditions, or other forms of assessment. Undergraduate concentrations require between 12 and 36 credits; graduate concentrations range from 9 to 18 credits. Upon completion of all requirements, the concentration is listed on the official transcript along with the major field of study.

Emphasis Typically an organized group of courses in a single discipline, the emphasis represents a subset of credits within an undergraduate or graduate major. The emphasis provides a coherent focus of study within a discipline, which may or not be in the major field. Typically an emphasis represents less than a third of the total major credits, mostly ranging from 15 to 19 credits. Entrance into some areas of emphasis may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the emphasis is listed on the official transcript along with the major field of study.

Academic Records

Academic Records are retained for varying periods of time depending on record type pursuant to University policy. Records may be kept longer at the sole discretion of the University.

Access to student academic and other records may be accorded to Rider personnel with a legitimate educational interest in the records. Information may be released to other agencies and individuals according to these policies in compliance with the Family Educational Rights and Privacy Act (FERPA) of 1974 (as amended):

- Rider may release the following information without written permission from the student: fact of enrollment, dates of enrollment, degree candidacy, degree awarded, and major field.
- Rider may release the following information unless the student has requested in writing by the end of the second week of classes each semester that the information not be released: name, email, home and local address, and home and local telephone number, participation on athletic teams and organizations, dates of attendance and honors and awards received.

No other information concerning a student will be released without that student's written permission.

Students having a complaint or question regarding FERPA may write to: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-8520.

Students may request to view their academic record by making an appointment with the appropriate dean's office.

Accompanying Costs for Voice Students

Any student studying individual voice at Rider University should expect, in most cases, to hire an accompanist. Students may choose to hire a college-approved accompanist. The per-semester fee is not refundable in any part if a student discontinues voice study or decides to seek out another accompanist. For additional information, see Tuition and Fees on Rider's website: <https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees> (<https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/>).

Advanced Placement (AP) Credit

Students who have taken an AP exam may submit official scores to obtain credit. For a complete listing of courses and credits and other information, see AP Credits at <https://www.rider.edu/admissions/first-year/requirements-deadlines/college-credit/ap> (<https://www.google.com/url?q=https://www.rider.edu/>

admissions/first-year/requirements-deadlines/college-credit/ap&sa=D&source=editors&ust=162274363389000&usg=AOvVaw1aBjT3Ouk0agZP8yBVSSK)

Applied Music - Westminster College of the Arts

Individual applied music lessons for academic credit are available to all Rider University students with prior experience, regardless of major.

Lessons are available in brass, composition, conducting, guitar/bass, harpsichord, organ, percussion, piano, strings, woodwinds, and voice. For all students whose major or minor program does not require applied music lessons, and for those students who have completed the applied music requirements for their degree program, fees for this elective (non-required) study will apply. Elective lessons are provided on a space-available basis. All part-time students are charged an applied music fee.

Students may earn 1 or 2 credits per semester, with the exception of graduate applied composition courses, which carry 3 credits per semester. Each fall, spring or summer applied course consists of twelve private lessons, or the equivalent instructional time, and may require participation in studio classes, performance classes, and/or an end-of-semester jury or performance review. Applied lessons completed during the January term follow specific departmental requirements regarding instructional time.

All applied music students must observe departmental applied requirements listed in the catalog and in department handbooks.

Applied lesson fees are described in the Tuition and Fees section of Rider's website (<https://www.rider.edu/tuition-aid/tuition-fees/undergraduate/>).

All applied music students must observe departmental applied requirements listed elsewhere in this catalog and in department handbooks. Students for whom applied music lessons are not required may register for lessons on a space-available basis. Interested students should consult the Associate Dean.

Applied lesson fees are described on the Undergraduate Tuition and Fees (<http://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees/>) section of Rider's website (<https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees/>).

Effective as of the fall 2009 semester for all new or readmitted Rider University students, for all students whose major or minor program does not require applied music study, or for those students who have completed applied music requirements, elective fees will apply. All part-time students are charged an applied music fee.

Registration for applied music study follows this table of suffixes. Students will register for the appropriate course number and suffix, as indicated in the curriculum pages found elsewhere in this catalog.

Full-time Students

A – One-hour, 2-credit required lesson. Included in tuition – no extra charge.

- Fine and Performing Arts example: Musical Theatre major
- Westminster Choir College example: All undergraduate majors

B – Half-hour, 1-credit required lesson. Included in tuition – no extra charge.

- Fine and Performing Arts example: Popular Music Culture, up to 3 semesters
- Westminster Choir College example: Theory/Composition major (half-hour voice or keyboard lesson)

C – One-hour, 2-credit elective lesson. Not included in tuition – fee charged per semester.

- For students who have completed all required lessons in their major, or students whose major does not require lessons.

D – Half-hour, 1-credit elective lesson. Not included in tuition – fee charged per semester.

- For students who have completed all required lessons in their major or students whose major does not require lessons.

G – One-hour, 2-credit required/elective lesson. Half-hour is required and is included in tuition. The second half-hour is elective and is not included in tuition – fee charged per semester.

- Fine and Performing Arts example: Popular Music Culture, up to 3 semesters
- Westminster Choir College example: Theory/Composition major (full-hour voice or keyboard lesson)

Part-time Students

(all part-time students regardless of major or requirements)

- Suffix E – One-hour, 2-credit required or elective lesson – fee charged per semester
- Suffix F – Half-hour, 1-credit required or elective lesson – fee charged per semester

Change of Applied Teacher

Students wishing to change their applied lesson teacher must make a request to the chair of the appropriate department. Any change requested after the beginning of a semester will require the permission of both applied lesson teachers and the department chair. If either applied lesson teacher is the department chair, permission of the Associate Dean also is required.

Change of Major or Applied Primary Area

Students wishing to change their major or the applied primary instrument they play must complete the appropriate form. Permission of the old and new major department is required.

Class Attendance/Absence

It is the prerogative as well as the responsibility of each faculty member to establish a clear policy for each course of instruction in regard to the nature and extent of student participation that will be expected and required.

The effect of absences upon the student's standing in a particular class will be left to the determination of the instructor of the course. However, it is expected that faculty members will be fair and reasonable concerning validated absences due to field trips, practicum, religious observance, participation in varsity athletics, placement interviews for graduating seniors, Westminster College of the Arts rehearsals or performances, and

illnesses sufficiently serious to be certified by either the University Health Center or the student's physician. The faculty member should consult with the Dean of Students in instances where doubts arise regarding the course to follow in evaluating student absences.

It is the student's responsibility to inform instructors of the nature and extent of an actual or anticipated absence. If that is impossible, or if the absence is or will be more than three (3) consecutive class sessions or longer than seven [7] calendar days, the student should contact the Office of the Dean of Students at 609-896-5101. Then, the dean's office will notify the appropriate faculty member.

Class Cancellation

In most cases, Rider will remain open and fully operational during inclement weather and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, close certain buildings or take other emergency actions.

If such circumstances should arise, notification will be made by phone call, text and/or email via RiderAlert, Rider's mass electronic messaging system. Students can update their information via the link: RiderAlert (<http://www.rider.edu/rideralert/>) (<https://www.rider.edu/rideralert> (<https://www.rider.edu/rideralert/>)).

Cancellations will also be announced online at www.rider.edu (<https://www.rider.edu/>) and on the Rider University information hotline at 609-219-2000, option 1.

Class Cancellation Policy and Excused Absences for Westminster Choir College Students Only

During run-outs involving Westminster ensembles, private lessons for those students not involved in the run-out continue to meet. When a college-sponsored performance necessitates that 30% or more of the students in a class be absent, the class may be cancelled at the discretion of the faculty member.

The dean will excuse individuals or groups of students who are participating in college-sponsored events. Only students registered for the class or ensemble participating in an activity will be excused from class. Students excused from class(es) under these circumstances remain responsible for all class work.

College Level Examination Program (CLEP)

In certain cases, Rider University accepts credits earned through the College Level Examination Program (<https://clep.collegeboard.org/>) (CLEP). Students should consult with their academic dean to determine if credit may be awarded by CLEP. Typically, a minimum score of 50 is required on an individual examination. Generally, students may obtain CLEP credits prior to reaching Junior standing.

Commencement Requirements – Westminster Choir College only

Academic year requirements of students at Westminster Choir College extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Schola Cantorum, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness.

In particular, credit for spring semester choir participation is lost if a student does not attend and is not excused from Commencement. All other students are encouraged to participate in Commencement.

Students singing in one of the choirs for the Commencement ceremony will be provided with a red choir robe for the ceremony. Students participating in the ceremony as part of the graduating class can order academic regalia free of charge from the Rider University Bookstore (<https://www.rider.edu/about/offices-services/bookstore/>).

Course Credits

Rider University maintains a 13-week semester, followed by seven days of examinations.

Rider uses the true number of minutes per hour-long session; i.e., a one-hour meeting is actually 60 minutes. Three-credit classes meet for 60, 90, or 180 minutes, corresponding to, respectively and typically, 3, 2, or 1 meetings per week.

In the Westminster College of the Arts all performance courses receive credit:

- All ensembles receive 1 credit
- Other performance-based courses receive 1-3 credits
- A full-semester Student Teaching experience receives 12 credits.
- Westminster Choir College students enrolled in CRC 100, PI 045, or TH 045 receive credit toward their semester course load, but such credits do not count toward graduation.

Applied music instruction receives 1-3 credits.

Course Level Numbering

Courses numbered below 100 are taught at pre-college level and carry no credit. Courses numbered at the 100- to 400-level carry only undergraduate credit. The course number indicates the anticipated audience for a course; 100 level courses are designed for freshmen, 200 level for sophomores, etc.

In Westminster Choir College:

1. Courses at the 500-level are open to undergraduate and graduate students. Undergraduate students who have earned at least 60 credits and a minimum cumulative GPA of 3.0 may enroll in a 600-level course upon permission of the instructor and the Associate Dean. Undergraduate students who have earned at least 90 credits and a minimum cumulative GPA of 3.8 may enroll in a 700-level course upon permission of the instructor, the Director of Graduate Studies and the Associate Dean.
2. Students with undergraduate status in the five-year B.M./M.A.T. program may take graduate courses required in that curriculum at the 500- or 600-level. Students in the B.M./M.A.T. program may take required 700-level courses in the senior year or upon successfully completing 124 credits and the student teaching semester. Students in the B.M./M.A.T. program who have not attained graduate status may enroll in non-required 700-level courses according to the restrictions stated in the previous paragraph.
3. Special students who have completed a baccalaureate degree may apply for permission to take 600- or 700-level courses. Undergraduate students in the Baccalaureate Honors Program (BHP)

should see the Assistant Registrar regarding enrollment in graduate courses.

Course Repeats - Westminster College of the Arts

All undergraduate and graduate students who are enrolled in a major or minor offered by the Westminster College of the Arts may enroll for a second or subsequent time in any *non-repeatable* WCA course from which they have withdrawn, in which they have earned an "F," or in which they have failed to earn the required minimum grade ¹ according to the following rules:

- 1) Students who have withdrawn from, failed, or failed to achieve the required minimum grade in a required course ¹ in their first attempt at the course may enroll for a second time without permission. All other students must have the permission of the Associate Dean.
- 2) Permission of the dean or associate dean of the college or school (WCC or FPA) offering the course in question is required in order to enroll in a course for the third time.
- 3) Permission of the Academic Standing Committee of the college or school (WCC or FPA) offering the course in question is required in order to enroll in a course for the fourth time. Permission for a fourth enrollment will be granted only in rare, extenuating, and documented circumstances.

In all instances, the most recent grade is calculated into the grade point average, and all listings and grades will remain on the transcript.

¹ Examples include: a minimum grade of "B-" is required in Piano Secondary, a minimum grade of "C" is required in foreign language study in order to progress to the next level in that language.

Courses – Adding, Dropping, Withdrawing, Repeating, Auditing

Timetables and deadlines given below pertain to fall and spring semesters. Students should consult the Registrar's web page (<http://www.rider.edu/academics/academic-support-resources/registrar/>) for summer session deadlines.

Adding Courses

Students may add courses through the first week of the regular semester at their own discretion provided the course is still open for registration.

Dropping Courses

Students may drop courses through the second week of the regular semester at their own discretion. In such cases, the courses are deleted from the student's record. After the second week of the semester, a withdrawal from the course is necessary and a 'W' is recorded on the transcript.

Course Withdrawals

Students may withdraw from courses and receive a grade of 'W' during the third through seventh weeks of the semester. In the semester's eighth through eleventh weeks, students may withdraw from courses with the written consent of the course instructor and receive a grade of 'W'. Differing subject matters, instructional methodologies and course

objectives make it likely that instructors will have differing criteria for giving consent to withdrawal in this period.

After the end of the eleventh week of the semester, students may withdraw from courses and receive a grade of 'W' only for validated reasons of physical or psychological incapacity. Validated reasons of physical or psychological incapacity serve as justification for a student to withdraw from courses with a grade of 'W' at any time beyond the add/drop period. Reasons must be validated by the Dean of Students and approved by the academic dean of the college in which the student is enrolled.

Students are required to notify Student Financial Services when withdrawing from courses as these circumstances may impact financial aid eligibility.

Student-athletes are required to notify the Associate Director of Athletics for Compliance and Academic Support or the Director of Athletics prior to withdrawing from courses.

Students receiving veterans benefits must report such changes to the Registrar's Office immediately.

Course withdrawal forms are available on the Registrar's Office (<https://www.rider.edu/academics/academic-support/registrar/>) website.

Withdrawal policies during special sessions (summer session, J-term) observe time limits proportional to the time limits of a regular semester.

Repeating Courses

Students may request permission from the academic dean to repeat a course to earn a better grade provided that the course is one that cannot be repeated for additional credit (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). The grade first earned will remain on the transcript but only the latest grade will be used in computing grade point average and determining whether or not degree requirements have been met.

Students who fail a required course must repeat the course until a passing grade is received. Students do not have to repeat a failed elective, but must pass another acceptable elective of comparable credit in order to meet graduation requirements.

Students receiving financial aid should consult with Student Financial Services before repeating a course already passed to determine the possible impact upon the student's continuing eligibility for financial aid.

Auditing Courses

Students who want to attend classes without taking examinations or receiving grades may audit courses subject to space availability and the permission of the instructor. No credit is earned for audited courses. Transcripts will record an audit with the notation of 'AU.'

Performance based courses cannot be audited (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). For a complete list of performance-based classes, please see the WCA Assistant Registrar.

The extent to which an auditor may take part in a course's activities is determined by the student and the instructor. In addition to the audit fee, students auditing a course carrying separate fees must pay all such required fees.

Students should apply and register through their dean's office and the Registrar. Westminster Choir College students who wish to audit courses should apply and register in the office of the Registrar during the first week of class.

Students who register on an audit basis may not change from audit to credit during a semester, except during the add period. Students originally registered for credit may change to audit status during the add/drop period. Students should refer to the academic calendar (<http://www.rider.edu/academics/academic-support-services/registrar/academic-calendars/>) of each term (Spring, Summer, Fall, or JTerm) for specific add and drop / add dates. Students who have audited a course may take that same course for credit in a later semester at full tuition.

Credit by Examination

Credit for certain undergraduate courses may be earned by examination. Please see the chairperson of the department offering the course to determine if a course is available for credit by examination.

Dance Study

Effective as of the fall 2014 semester for all new or readmitted Rider

University students: All students whose major or minor program does not require applied dance study under the DAN prefix, or for those students who have completed dance requirements, elective fees will apply. All part-time students are charged a dance fee.

Registration for applied dance study follows this table of courses.

Students will register for the appropriate course number, as indicated in the curriculum pages found elsewhere in this catalog. Maximum enrollment under full-time tuition:

- In **B.A.-Dance/Performance Track**, a total of 15 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School (PBS).
- In **B.A.-Dance/Dance Studies Track**, a total of 14 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School.
- In **Dance Minor**, a total of 8 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School.
- **Registration for DAN 100 and DAN 300** requires a placement completed with dance faculty.

Full-time Students

DAN 100-01 (Fundamentals of Dance) – 1-credit required course taken at PBS. Included in tuition – no extra charge.

Example: B.A./Dance majors and minors up to the maximum stated above.

DAN 100-EF (Fundamentals of Dance) – 1-credit elective course taken at PBS. Not included in tuition – fee charged per semester.

Examples: Student who has completed all required applied dance study in their major; student who has completed all required applied dance study in their minor; or student whose major or minor does not require lessons.

DAN 151 (Pilates and Modern) – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

DAN 152 (World Dance and Improvisation) – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

DAN 300-01 (Lecture and Studio in Dance) – 2-credit required course taken at PBS. Included in tuition – no extra charge.

Example: B.A./Dance majors and minors up to the maximum stated above.

DAN 300-EF (Lecture and Studio in Dance) – 1-credit elective course taken at PBS. Not included in tuition – fee charged per semester.

Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

Note: Students choosing to register for both DAN 100-EF and DAN 300-EF as elective study in the same semester will be charged an inclusive fee.

Part-time Students

(applies to all students, regardless of major or requirements)

DAN 100-EP – 1-credit course taken at PBS. Not included in tuition – fee charged per semester. For majors and minors, course counts toward the maximum stated above.

DAN 300-EP – 2-credit course taken at PBS. Not included in tuition – fee charged per semester. For majors and minors, course counts toward the maximum stated above.

Note: Part-time students choosing to register for both DAN 100-EP and DAN 300-EP in the same semester will be charged an inclusive fee.

Dean's List

The **Dean's list** is prepared at the end of the fall and spring semesters to recognize students who have earned academic honors.

Eligibility for the Dean's list is as follows:

In the Norm Brodsky College of Business, College of Liberal Arts and Sciences, College of Education and Human Services, and School of Fine and Performing Arts, a student must be enrolled full-time, have no grade lower than "C" and must achieve a minimum semester grade point average of 3.50.

In Westminster Choir College, a student must be enrolled full-time, have no grade lower than "C," have no "Z" grades, and must achieve a minimum semester grade point average of 3.70.

Degree Completion

Students who have not completed all requirements within 10 years of initial enrollment may be required to repeat courses and/or meet further requirements. Students for whom more than one year has elapsed since the date of last enrollment may be required to re-apply and/or re-audition for the program, and must meet all requirements in place at the time of their readmission.

Credits earned at another institution or through Westminster Continuing Education outside the 10 year period that commenced with initial enrollment in a degree program must be approved for transfer into that program by the department offering the degree.

Diploma Conferral

Diplomas are conferred four times each year: January, May, August, and December.

Students must submit a degree application form, available online via MyRider (<http://myrider.rider.edu>) or in their academic dean's office, in order to be eligible to receive a diploma on any date. Students must apply for graduation by the deadlines established each year by the Registrar's Office. More information is available on the Commencement Candidates (<https://www.rider.edu/academics/academic-support/registrar/commencement-candidates/>) web page.

Diplomas are conferred only upon those who have met 100% of all degree requirements. Students in the combined B.M./M.A.T. program receive both diplomas upon the completion of all requirements.

Double Major

Students wishing to pursue two majors within a college or school (or majors in different colleges or schools), each of which leads to the same baccalaureate degree (e.g., B.A. or B.M.) may do so provided they receive requisite approvals, satisfy the general education or core requirements for the degree they designate as primary, satisfy all of the major area requirements for each program, and satisfy all other requirements for each major. Upon completion of all requirements, the student will be awarded one degree but the transcript will indicate two majors.

Dual Degrees

Students wishing to pursue two majors within a college or school (or majors in different colleges or schools), each of which leads to a separate and distinct baccalaureate degree may do so provided they receive requisite approvals, satisfy all of the requirements for each major, and satisfy all other requirements for each degree. Upon completion of all requirements, the student will be awarded a second baccalaureate degree.

Employment Opportunities – Westminster Choir College

The University provides work opportunities both on and off campus.

Students who demonstrate financial need as determined by the FAFSA are offered Federal Work Study in their award. Students who have no need are paid through a student employment budget. It is the responsibility of students to find their own jobs. All students are encouraged to apply for available employment opportunities. Bi-weekly paychecks are provided directly to students rather than to student accounts.

Weekend church positions: Many Westminster students are employed in area churches on a part-time basis as organists, directors, and singers.

Lawrenceville and the surrounding area provides many opportunities for part-time employment in local businesses.

Engaged Learning Program

Definition

"Engaged Learning" refers to activities in which students apply knowledge gained in educational settings beyond the classroom; delve further with independent scholarship and creative expression; broaden their horizons with study abroad or cross-cultural encounters; become

problem solvers, leaders and team members in their communities; and prepare for professional and civic lives that make a difference. Rider's students are required to complete at least two high-impact Engaged Learning Experiences that reflect the University's strategic themes of leadership, ethics and social responsibility, and global and multicultural perspectives. Students are required to reflect upon how the experience impacted themselves and others in either a written short essay or in a structured group setting. These experiences will help students build bridges between their course of study and the world in which they live.

Requirements

All Rider University undergraduate students^{1,2} are required to earn a minimum of six points, spread across at least two Engaged Learning categories. The six categories of Engaged Learning are:

1. Leadership and Mentoring
2. Study Abroad and Cultural Exploration
3. Guided Research and Scholarship
4. Civic and Community Engagement
5. Internship, Co-Op, and Field Work
6. Arts, Media and Creativity

¹ Transfer students who bring fewer than 31 accepted credits to Rider are required to earn six (6) Engaged Learning points which must be spread across two or more Engaged Learning categories. Transfer students who bring 31 or more accepted credits to Rider are required to earn three (3) Engaged Learning points in any one or more categories.

² All NCAA Division I athletes will receive 3 Engaged Learning points each semester when the Director of Athletics submits the roster to the Registrar. Their remaining points will be completed from the approved list of Engaged Learning experiences or courses. Points must be spread across at least two Engaged Learning categories.

Earning Points

Academic courses

Credit bearing courses approved as Engaged Learning Experiences need not be submitted by students to earn points. Once a student completes a course that has been designated as Engaged Learning, points equal to the number of credits (up to a maximum of 3 points), will be automatically assigned by the Registrar's Office. The Registrar's Office will insert the course on the Engaged Learning Transcript. A full list of the eligible courses is available on the Engaged Learning Program (<https://www.rider.edu/academics/engaged-learning/approved-courses/>) webpage.

Experiences

When students engage in experiences that are not connected to academic courses, they must initiate the review and approval process themselves. Forms for student submissions of eligible experiences are available in BroncNation (<https://brncnation.rider.edu/>), the student engagement platform. Instructions for completing the forms, submission guidelines, and a list of many eligible experiences are available on the Engaged Learning Program (<https://www.rider.edu/academics/engaged-learning/co-curricular-experiences/>) website.

Submitted experiences will be reviewed by designated approvers and, upon approval, will be reported to the Registrar by the end of each semester to be listed on the student's Engaged Learning Transcript. For experiences not approved, students may appeal to their academic dean.

Ensembles/Productions - Attire and Registration

Attire

Students must purchase official ensemble attire for choirs in which they are enrolled. Freshman/transfer students in Westminster Choir College must be fitted during orientation and purchase a red robe which will be charged to their student account by the Bursar's Office.

Registration

Students participating in music ensembles or artistic productions must be registered for the course that accompanies that activity. It is the responsibility of the student to ensure proper registration in the appropriate course. Excused absences are granted only to registered students.

Each semester, the official personnel roster for each ensemble will be finalized for that semester at the end of the schedule adjustment period, typically two weeks after the first day of classes.

Freshman class eligibility for non-required ensembles or productions is determined by the appropriate department/program/applied area, with the approval of the appropriate Academic Policy Committee.

Full-Time Tuition Inclusion

School of Fine and Performing Arts Students

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred when full-time students exceed maximum load levels, excluding recital credits or participation in auditioned choirs or productions for School of Fine and Performing Arts majors.

For School of Fine and Performing Arts students, full undergraduate tuition includes:

1. A minimum of 12 and maximum of 18 credits per semester or the equivalent including non-credit courses.
2. Primary applied music study (p. 788) to the maximum required credits/semesters.
3. Applied dance study to the maximum required credits/semesters. (see below)
4. Once all applied music or dance requirements have been completed, all additional lessons or courses will be billed at the elective rate.
5. Music students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate.

Please see the table of applied lesson suffixes in the "Applied Music (p. 788)" section in the Undergraduate Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

Westminster Choir College Students

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred when full-time students exceed maximum load levels, excluding VC 593 or participation in auditioned choirs.

Please see the Tuition and Fees Table (<https://www.rider.edu/tuition-aid/tuition-fees/undergraduate/>) for elective and part-time charges for elective music and dance study.

Full undergraduate tuition includes:

A minimum of 12 and maximum of 18 credits per semester or the equivalent including non-credit courses. Exception: during the senior student teaching semester for Music Education majors, full-time tuition covers only the course ME 492. For primary applied music study, one hour per week of applied music instruction each semester, except during the student teaching semester for Music Education majors or a full-time (12 cr) internship semester for Bachelor of Arts in Music majors. Composition majors receive one hour per week of private composition instruction and one half-hour per week of either private voice or private keyboard instruction. Once all applied requirements have been completed, all additional applied lessons will be billed at the elective rate. Students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate. Any non-required private lesson will be billed at the elective rate.

Please see the table of applied lesson suffixes in the Applied Music (p. 788) section in the Undergraduate Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

Dance Study

Effective as of the fall 2014 semester for all new or readmitted Rider University students, for all students whose major or minor program does not require applied dance study under the DAN prefix, or for those students who have completed dance requirements, elective fees will apply. All part-time students are charged a dance fee. Please see below.

Registration for applied dance study follows this table of courses. Students will register for the appropriate course number, as indicated in the curriculum pages later in this section.

Maximum enrollment under full-time tuition: In B.A.-Dance/Performance Track, a total of 15 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School (PBS); in B.A.-Dance/Dance Studies Track, a total of 14 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School; in Dance Minor, a total of 8 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School.

Registration for DAN 100 and DAN 300 require a placement audition completed with dance faculty.

Full-Time Students

DAN 100:

- DAN-100-01 – 1-credit required course taken at PBS. Included in tuition – no extra charge. Example: B.A./Dance majors and minors up to the maximum stated above.
- DAN-100-01F – 1-credit elective course taken at PBS. Not included in tuition – \$740 extra per semester. Examples: Student who has

completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

DAN 151 – 1-credit course taken on the Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

DAN 152 – 1-credit course taken on the Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

DAN 300:

- DAN-300-01 – 2-credit required course taken at PBS. Included in tuition – no extra charge. Example: B.A./Dance majors and minors up to the maximum stated above.
- DAN-300-01F – 2-credit elective course taken at PBS. Not included in tuition – \$1,500 extra per semester. Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

Note: Students choosing to register for both DAN 100-01F and DAN 300-01F as an elective study in the same semester will be charged a total fee of \$2,000.00.

Part-Time Students

(all students, regardless of major or requirements)

DAN 100

- DAN-100-01P – 1-credit course taken at PBS. Not included in tuition – \$1,050 extra per semester. For majors and minors, course counts toward the maximum stated above.

DAN 300

- DAN-300-01P – 2-credit course taken at PBS. Not included in tuition – \$2,090 extra per semester. For majors and minors, course counts toward the maximum stated above.

Note: Part-time students choosing to register for both DAN 100-01P and 300-01P in the same semester will be charged a total fee of \$3,050.00.

Grades: Grade Reports, Grade Point Average, Incomplete Grades, Grade Appeals

- Grade Reports (p. 794)
- Grade Point Average (GPA) (p. 795)
- Incomplete Grades (p. 795)
- Grade Appeals (p. 795)

Grade Reports

Members of the faculty are officers of instruction at Rider University. Among their responsibilities as such is the evaluation of students' academic accomplishments in courses of instruction. These evaluations ultimately are expressed in grades that are recorded in the students' academic record. Members of the faculty, judging the competencies and performances of students, assign grades based on their professional experience and training. Grades assigned by the faculty follow practices

and procedures within the standards established by Rider and within the standards established by individual course requirements.

Letter grades are used at Rider University for recording faculty evaluations of final student achievement in individual courses and are entered on the permanent academic record of a student's academic performance.

The academic grades used by faculty for recording evaluations of student achievement are as follows. For determining grade point averages (GPAs), grades have weighted values called variously honor points, quality points, or grade points as follows:

Letter Grade	Grade Point Value
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
D*	1.0
F	0.0

* Failing academic work; fail to abide by standards of academic honesty and integrity; unauthorized withdrawal, and fail to complete work in prescribed time.)

Each instructor of a course will inform the student of the course objectives, procedures, and applicable grading standards. Upon a student's written request, members of the faculty will provide a review of the student's course standing at least once each term by the mid-point of that term. Each student may also review material submitted to the instructor for evaluation such as papers, examinations, and the like. In these ways, students will be able to assess their own progress in a course before final grades are assigned.

NOTE: Faculty members are not required to maintain student course materials more than four months after the end of an academic term.

A student grade report may also show the following transcript notations, which carry no grade point value:

Transcript Notation	Explanation
I	Incomplete
L	Late grade
N	Registered; did not attend
AU	Audit
P	Pass
S	Satisfactory progress
U	Failure in pass/fail course
W	Withdrawal
Y	Satisfactory completion of supplemental education course
Z	Insufficient progress in supplemental education course
NCR	No credit

"N" and "W" notations are included in the total semester hours attempted, as far as tuition payment is concerned.

Grade Point Average (GPA)

Grade point averages (GPA) are used to establish academic standing. In order to compute the grade point average, students must first determine the number of quality points earned for each course. The total number of quality points for a course is derived by multiplying the number of credits for the course by the number of quality points for each letter grade. The grade point average (GPA) is determined by dividing the number of quality points by the number of GPA hours.

Incomplete Grades

Students who, as a result of extenuating circumstances, are unable to complete the required work of a course within the term, may request an extension of time from a faculty member. Such extensions of time can be granted only in cases in which illness or another serious emergency has prevented the student from completing the course requirements or from taking a final examination. The request for extension of time must be made prior to the last scheduled class meeting, except in those unusual situations in which prior notification is impossible.

The faculty member shall determine whether to grant the request for a time extension and the type of verification (if any) required to support the request. The faculty member shall specify the time, up to four weeks from the last day of the term, as specified in the academic calendar, by which work must be completed by the student. If the faculty member does agree to the request, the notation "I" (Incomplete) shall be submitted on the grade roll. In those situations where the faculty member has not received a request for an extension of time, the notation "I" (Incomplete) may be submitted on the grade roll by the faculty member when, in his or her judgment, such a determination appears justified. Upon submission of completed required work the faculty member shall submit a Change of Grade form to the Registrar.

Students who, as a result of extenuating circumstances, are unable to submit the completed required work at the end of the four-week period may request an extension of the incomplete grade. The request for an extension of the incomplete must be made prior to the expiration of the four-week period. If the faculty member agrees to the request for an extension of the incomplete, the faculty member shall specify the time, up to a maximum of two weeks from the date of expiration of the four-week period (i.e., six weeks from the last day of the term) by which work must be completed by the student and shall submit an Extension of Incomplete form to the Registrar.

Upon submission of completed required work, the faculty member shall submit a Change of Grade form to the Registrar and assign the course grade. Failure of the Registrar to receive from the faculty member a Change of Grade form or an Extension of Incomplete form at the end of the four-week period, or a Change of Grade form at the end of the six-week period shall result in the automatic assignment of the grade "F," "Z," or "U" by the Registrar.

Students who receive an incomplete in a course that is part of a course sequence must obtain permission from the department chairperson to remain enrolled in the next course in the sequence or they will be removed from that next course.

Grade Appeals

Basis for Grade Appeal

A final course grade may be changed only at the initiative of the faculty member who originally assigned the grade or as the result of a decision made in the hearing of a grade appeal by the Faculty Grade Review Panel. It is assumed that the final course grade is assigned in good faith and based on the professional expertise of the faculty member.

A student may appeal a final course grade only on the grounds that it represents an arbitrary, capricious, and/or unreasonable evaluation of his or her performance.

A grade appeal may not be based on a disagreement with the faculty member's professional academic evaluation of the student's work. The burden of proof rests with the student. A grade appeal shall be supported only when a student convincingly demonstrates that an arbitrary, capricious, and/or unreasonable evaluation occurred. Changes and appeals for grades on written comprehensive graduate examinations are subject to the same requirements and procedures as course grades.

The Faculty Grade Review Panel may return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process; may decline to hear an appeal when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading; and shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

Faculty Grade Review Panel

The Faculty Grade Review Panel has final authority concerning all grade appeal questions. **The panel consists of the following nine members:**

1. Six tenured faculty members including one tenured faculty member elected by the bargaining unit members of each of the five college/school academic policy committees and one selected by the bargaining unit members of the University Academic Policy Committee, who shall serve as chairperson of the panel;
2. A seventh faculty member selected jointly by the Provost and Vice President for Academic Affairs and the academic deans;
3. Two full-time students selected by the Student Government Association who, at the time of their service, must be seniors who have attained a grade point average of at least 3.25.

Each of the above appointing groups shall also designate an alternate for each member they appoint to the panel. Faculty members of the panel shall serve two-year terms and may be reappointed.

A quorum of the Faculty Grade Review Panel shall consist of any five members. The failure or inability of any appointing body to fulfill its responsibility to appoint any member or members to the panel shall not prevent the panel from organizing itself and exercising its duties.

The chairperson of the panel will serve as the hearing coordinator and has the following duties and responsibilities:

1. Inform the members of the panel that a grade appeal has been received and set a date for the hearing,
2. Distribute documentary materials pertaining to the appeal to members of the panel,
3. Maintain a permanent record of the panel's proceedings,

4. Prepare and distribute any decision made by the panel to the appropriate parties.

Prior to Initiating a Grade Appeal

A student who believes that his or her final course grade represents an arbitrary, capricious, and/or unreasonable evaluation of his or her work is strongly encouraged to talk with the faculty member in an effort to resolve the issue before filing a formal grade appeal. However, it must be emphasized that this informal discussion does not constitute the initiation of a grade appeal and does not extend the time limits specified in the next paragraph.

Initiating a Grade Appeal

To initiate a grade appeal, the student must forward a letter to the faculty member which clearly and precisely describes the student's reasons for believing that the final course grade constitutes an arbitrary, capricious, and/or unreasonable evaluation of his or her performance. A copy of this letter shall also be sent to the faculty member's department chairperson. (If the faculty member taught the relevant course in another department, the letter shall be sent to the chair of that other department. If the relevant course is in a program and is not cross-listed, the letter shall be sent to the chair of the program director's home department.)

For appeal of fall semester grades, the letter must be postmarked or hand-delivered within seven (7) days of the start of the upcoming spring semester. For appeal of spring semester grades, it must be postmarked or hand-delivered within thirty (30) days of the last regularly scheduled spring semester examination. For appeal of summer grades, it must be postmarked or hand-delivered within seven (7) days of the start of the upcoming fall semester. For appeal of grades on written comprehensive graduate examinations, it must be postmarked or hand-delivered within thirty (30) days of the date that grades were issued for the examination.

If a change of grade occurs after the aforementioned deadlines, the grade appeal must be filed within thirty (30) days of the submission of the changed grade to the registrar.

If the faculty member who assigned the grade in question is no longer at Rider or is away from Rider on an extended basis and not available for consultation, the initial review shall be conducted by the appropriate department chairperson, and the schedule may be extended at the appropriate dean's discretion.

If the faculty member who assigned the grade in question is the department chairperson, the chairperson's dean or that dean's designee shall replace the chairperson in all the procedures that follow.

Failure to submit a written statement of the appeal within the time guidelines established above shall constitute grounds for denying a student access to the grade appeal process. Failure to provide a clear and precise statement shall constitute grounds for denying the appeal at any step in the process. Once a grade appeal is initiated, the basis of all subsequent proceedings must be limited to the allegations appearing in the initial written statement. This limitation does not exclude the introduction of new evidence directly related to the initial allegations.

The chairperson of the Faculty Grade Review Panel, upon written request of any party, may extend any deadline contained in this policy if he or she believes that circumstances beyond the control of a party to the appeal have prevented compliance with stated deadlines. The decision of the panel chairperson to extend or not to extend a deadline shall not be subject to appeal.

The Grade Appeal Process

Step One

In the letter of appeal, the student may request a formal meeting with the faculty member. If the faculty member agrees to such a meeting, the meeting shall be held no later than fourteen (14) days after the beginning of the fall or spring semester following the semester or session in which the grade was given. However, the parties are encouraged to schedule such a meeting at an earlier date if mutually convenient.

The faculty member shall render a decision on the appeal within seven (7) days of such a meeting and shall notify the student and the department chairperson in writing of the decision. If the faculty member agrees to change the final course grade of the student, he or she shall submit a Change of Grade form to the Registrar.

If the faculty member believes that a meeting with the student would not be productive, he or she shall make a decision on the appeal based on the student's letter and shall communicate the decision in writing to the student and the department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given.

If the student accepts the decision of the faculty member at Step One, no further action is required. If the student does not accept the faculty member's decision at Step One, he or she may appeal the decision to Step Two in writing to the department chairperson with a copy to the faculty member's dean. This letter must be postmarked or hand-delivered within seven (7) days of the postmark date of the faculty member's Step One decision.

If the student does not receive a written response from the faculty member or department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given, the student may, within twenty-one (21) days of the beginning of that semester, proceed to Step Two as indicated below. All such written responses shall be mailed to the student's campus address, if the student resides on campus, or otherwise to the student's home address on record.

Step Two

Within fourteen (14) days of the receipt of a student's letter of appeal to Step Two, the department chairperson shall schedule a meeting with the student and the faculty member. At such meeting, the student and the faculty member will have the opportunity to explain their positions with respect to the grade in question, but they shall be limited to the allegations raised in the student's initial written statement.

The department chairperson shall render an opinion on the matter within seven (7) days of the Step Two meeting and shall provide explanatory language for this opinion in writing to the student, the faculty member and the faculty member's dean.

If the department chairperson's opinion supports the position of the faculty member, the student shall have seven (7) days from the postmark date of the letter from the department chairperson to continue his or her appeal to the Faculty Grade Review Panel as described in Step Three.

If the department chairperson's opinion supports the student's position in the appeal, the faculty member shall have seven (7) days from the postmark date of the department chairperson's letter opinion either to accept that opinion and submit a Change of Grade form to the registrar, or to reject the opinion and notify the student, department chairperson,

and faculty member's dean that the faculty member is making an appeal pursuant to the Step Three process.

If the student does not receive notification of a change of grade within twenty-one (21) days of the date of the department chairperson's written decision, the student may carry the appeal to Step Three.

Step Three

To carry the appeal to Step Three, the student must submit a letter expressing that intent to the chairperson of the Faculty Grade Review Panel with copies to the faculty member, the department chairperson, the dean, and the Provost and Vice President for Academic Affairs.

Within seven (7) days (excluding vacation and examination periods) of the receipt of this letter, or the letter from the faculty member who has appealed, whichever the case may be, the chairperson of the Faculty Grade Review Panel shall schedule a meeting of the panel to consider the appeal.

The student and the faculty member shall have the right to appear before the panel to present information pertaining to the allegations made in the student's initial written statement.

The Faculty Grade Review Panel may, if it deems it desirable, request attendance by the chairperson, the dean, and/or any other representatives of the University. Attorneys or advisors to the participants may attend but not participate in the meeting of the panel.

The unwillingness of the faculty member or student to appear before the panel shall not prevent the panel from proceeding with its deliberations. In those deliberations, the panel shall have access to written documents pertaining to the appeal, pertinent records of student performance, and such verbal presentations as may be made during panel deliberations.

On the basis of careful consideration of the available information, the Faculty Grade Review Panel will determine if an arbitrary, capricious, and/or unreasonable evaluation of the student's performance has occurred. This determination will be made in writing and provided to all affected parties.

If the panel determines that no such action occurred, the case will be closed with no further right of appeal. If the panel determines that an arbitrary, capricious, and/or unreasonable evaluation has occurred, it will direct the faculty member's department (or will establish an evaluation committee of faculty members in the field of the course offered) to re-evaluate the student's performance based upon the panel's decision, the records and documentary materials.

Within fourteen (14) days of the receipt of the panel's directive, the department or evaluation committee shall recommend to the panel a grade that it deems appropriate, whether higher than, lower than, or the same as the original grade. Normally, the panel will accept the revised evaluation by the department or committee and will subsequently notify the Registrar of any change of grade. Should the panel feel that the department or committee has not conducted its review in an appropriate manner and that, as a result, the suggested substitute grade is not appropriate, it shall have the authority to direct the Registrar to enter the grade that the panel judges appropriate.

Decisions of the panel are not subject to further appeal. The panel may also return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process, or when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading. The panel shall decline an appeal if it is based on

failure to accommodate a disability covered by the University Disability Policy.

Expediting a Grade Appeal

When a student's graduation is affected by the outcome of a grade appeal in a semester, term, or session immediately preceding such graduation, faculty members shall make reasonable efforts to expedite the process.

Grade Changes Made at Initiative of Faculty Member

The individual faculty member may determine that it is appropriate to change a recorded academic grade. Such changes must be made within four (4) months of the date that the original grade was assigned. Any change of grade initiated by a faculty member more than four (4) months after the date the original grade was assigned must be approved by the faculty member's dean. Faculty members, using forms supplied by the Office of the Registrar, will prepare a written change of grade stating the reasons for the grade change with a copy to the student, the department chairperson and the faculty member's dean. Upon receipt of this form by the Office of the Registrar, the grade will be changed on the official records of the University.

Graduation with Honors

Graduation with distinction (sometimes referred to as Latin honors) depends upon the achievement of exceptionally high scholastic averages and completion of all requirements. This distinction is reflected by the awarding of degrees cum laude, magna cum laude, and summa cum laude. All grade point averages are computed on work completed at Rider University only.

For all college degrees except those in Westminster Choir College, graduation with distinction is awarded on the following basis:

Summa Cum Laude – averages between 3.75 and 4.00

Magna Cum Laude – averages between 3.50 and 3.74

Cum Laude – averages between 3.25 and 3.49

For Westminster Choir College degrees, graduation with distinction is awarded on the following basis:

Summa Cum Laude - averages between 3.80 and 4.00

Magna Cum Laude - averages between 3.60 and 3.79

Cum Laude - averages between 3.40 and 3.59

Health and Safety – Westminster College of the Arts

Westminster Choir College/Westminster College of the Arts of Rider University, as required by the National Association of Schools of Music, is obligated to inform students and faculty of health and safety issues, hazards, and procedures inherent in practice, performance, teaching, and listening, both in general and as applicable to their specific specializations. This includes but is not limited to information regarding hearing, vocal and musculoskeletal health, injury prevention, and the use, proper handling, and operation of potentially dangerous materials, equipment, and technology.

It is important to note that health and safety depends largely on personal decisions made by informed individuals. Rider University has health and

safety responsibilities, but fulfillment of these responsibilities cannot and will not ensure any individual's health and safety. Too many factors beyond the University's control are involved.

Each individual is personally responsible for avoiding risk and preventing injuries to themselves before, during, and after study or employment at Rider University. The policies, protocols, and operational procedures developed do not alter or cancel any individual's personal responsibility, or in any way shift personal responsibility for the results of any individual's personal decisions or actions in any instance or over time to the University.

All members of the Westminster College of the Arts community are encouraged to visit Health and Safety Recommendations (<http://www.rider.edu/student-life/health-wellness/student-health-services/health-safety-sfpa-wcc-students/>) on Rider's website for a series of recommendations and resources designed to help each individual to become aware of and attend to various issues.

Independent Study

In order to challenge students with exceptional talents and interests and to provide opportunities for individual study and research, independent study is available for credit to qualified students under the terms stated below. Each project must be directed by a Rider University faculty member.

The advisor-student relationship is one of mutual agreement between the faculty member and the student. The choice of project is limited primarily by the availability of an advisor who has some knowledge and interest in the field. Application forms are available in the office of the dean of the student's college or school.

The following policies apply to independent study courses:

1. Students must be a junior or senior in good academic standing with a cumulative grade point average of 3.00 or better.
2. Approval for an independent study course must be secured in writing, normally during the term prior to that in which the study will be carried out, but in any case in advance of the first day of classes of the applicable term. All proposals must be approved by the faculty/advisor, department chair, and by the office of the instructor's dean and the office of the student's dean. Upon approval, the student must enroll by the end of the third week of class.
3. A student may not enroll for more than one independent study course per term. Courses usually carry one to four credits, with a maximum of six allowable in special cases involving a full year of work.
4. A maximum of 18 credits may be earned in all independent study courses.
5. A student is expected to earn a minimum grade of "B" in any independent study course, as assigned by the faculty advisor for the project. A grade of "B-" or lower may result in ineligibility for future independent study courses.

International Baccalaureate (IB) Credits

Incoming students may be granted up to 20 credits on the basis of their International Baccalaureate coursework. Credits are awarded for Higher Level IB courses based on the student receiving a score at or above the level approved by the department that evaluated the course (in no case less than a score of five).

In order to grant credit, Rider's Office of Undergraduate Admission must be sent an official IB transcript. For further information, please see International Baccalaureate (IB) Course Equivalency (<https://www.rider.edu/admissions/first-year/requirements-deadlines/college-credit/ib-course-equivalency/>) on Rider's website.

International Student Status

Federal regulations require that all F-1 and J-1 undergraduate and graduate international students maintain full-time status. International students may engage in one online course per mandatory term (fall and spring term) as long as they are enrolled in a full course load. Students may request part-time status under specified, limited circumstances, including during their final semester. Prior approval of the Office for International Education (<https://www.rider.edu/academics/centers-institutes/office-of-international-education/>) is required.

All international students do not need to comply with the above restrictions for summer course work.

Outside Activities – Westminster Choir College only

Westminster Choir College students are expected to give priority to all officially scheduled classes, lessons, rehearsals, on- and off-campus performances (including tours), and other official functions involving music students. Outside activities, such as employment, church or volunteer work, or other professional engagements should not conflict with college requirements or those listed on course syllabi. Students employed outside of the college should inform employers of their commitment to their education and their obligation to college classes and ensembles.

Placement Testing Information

Mathematics (p. 798)

Reading (p. 799)

Math Placement Test

Placement in some Mathematics classes and all Management Sciences classes is based upon the Mathematics score on the SAT and/or a math placement test.

Norm Brodsky College of Business Students

Business students not majoring in Actuarial Science:

- Students with a Math SAT score of 570 or ACT score of 23 or higher are placed in Quantitative Methods for Business (MSD 105). No placement test is required.
- Students with a Math SAT score of 560 or lower or ACT score of 22 or lower are required to take an online Math Placement Test prior to attending Orientation. Details on this placement test will be included in the Norm Brodsky College of Business Dean's Welcome Letter.

Business students majoring in Actuarial Science:

- Students with a Math SAT score of 650 or higher or ACT score of 28 or higher are placed in Calculus I (MTH 210). No placement test is required.
- Students with a Math SAT score of 640 or lower or ACT score of 27 or lower are required to take an online Math Placement Test

prior to attending Orientation. Details on this placement test will be included in the Norm Brodsky College of Business Dean's Welcome Letter.

College of Liberal Arts and Science

Science and mathematics majors who were admitted test optional are required to take the math placement test. Students with test scores will be placed as follows.

- Students with an SAT Math score of 560 (of ACT Math score of 23) or below will be placed in MTH 100 and students with an SAT Math score of between 570 and 640 (ACT Math score between 24 and 27) will be placed into MTH 105.
- Students with an SAT Math score of 650 (ACT Math score of 28) and above will be placed into MTH 210 (<http://catalog.rider.edu/search/?P=MTH%20210>).

Students wishing to challenge these placements may take the math placement test.

Reading Placement

Students will be placed based in a reading course based upon the following criteria:

- Students who were admitted **test optional** will be placed according to High School GPA:
 - Students with a high school GPA below 3.11 will be placed into CRC 100: College Reading.
- Students using their **SAT EBRW score and High School GPA** will be placed as follows:
 - Students with an SAT EBRW score below 470 and who have a High School GPA below 3.4 will be placed into CRC 100.

Recital Scheduling Information – Westminster Choir College

Recital Scheduling

Recital scheduling policies are being revised and will be posted to this page soon.

Transfer Appeals

An appeal process for transfer course equivalency is open to students who have attended an accredited community college or four-year institution and have been admitted to a Rider degree program. *Course appeals will only be considered prior to the completion of the last 30 credits in the bachelor's degree.*

All communication regarding appeal[s] will be communicated to the student through Rider email.

The appeal process is as follows:

1. For each course being appealed the student should submit the following information/documentation:
 - a. Program the student is pursuing
 - b. Course[s] the student wishes to appeal (include course number, title and the name of the transfer institution)
 - c. Supporting documentation [course syllabus, course work] to justify appeal[s]
 - d. Desired outcome of appeal[s] [please check one]:

- Substitution for a required course in the major, list course[s]: _____
- Substitution for a required course in the minor, list course[s]: _____
- Substitution for a core course, list course[s]: _____
- Transfer as a general or free elective
- Transfer as a business elective [CBA only], list discipline or course prefix (e.g. MKT, ECO) _____
- Other: _____

2. All appeals must be submitted electronically through the student's Rider email address to the Office of the Registrar at transferappeal@rider.edu.
3. Appeals will be reviewed by the Transfer Appeals Committee. A member of the Transfer Appeals Committee will respond to the student's petition fifteen [15] days after receipt of the appeal.

The Transfer Appeals Committee is comprised of the relevant department chair(s) or program director(s), as well as the dean or associate/assistant dean of the college/school in which the program resides.

Transfer Credit While Currently Enrolled at Rider

Policy for students except for Westminster Choir College (p. 799)
Policy for Westminster Choir College students (p. 800)

**All students except Westminster Choir College:
Students seeking permission to transfer credit from another accredited college after matriculating at Rider University:**

1. must complete an off-campus approval form at least 30 days in advance of the start of the proposed off-campus course, to be approved by the student's academic dean's office. If prior approval is not obtained, there is no guarantee that transfer credit will be granted;
2. must have a cumulative grade point average of at least 2.00;
3. may not be within the final 30 credits of the Rider baccalaureate degree program.

Baccalaureate degree-seeking students with less than 60 credits may enroll in courses in either two-year or four-year accredited postsecondary institutions for transfer to a program of study at Rider as long as prior approval is obtained as described above.

Baccalaureate degree-seeking students with more than 60 credits may only enroll in courses in four-year accredited postsecondary institutions for transfer to a program of study at Rider as long as prior approval is obtained as described above.

Upon the completion of 21 credits, students pursuing a two-year (A.A.) program will not be permitted to enroll in courses at other institutions for transfer to that program of study at Rider University.

Credit by transfer from other institutions may be applied toward baccalaureate degrees under these conditions:

1. An official transcript must be forwarded directly from the sending institution to the student's academic dean's office.
2. A minimum grade of "C" or its equivalent is required for transfer of courses. Grades such as "pass" or "credit" are also acceptable. **Grades of "C-" or below are not acceptable.**

3. Courses taken 10 or more years prior to entering Rider University are subject to individual evaluation for contemporary transfer applicability.
4. Transfer credits are not associated with grades and are not included in grade point average calculation, except for courses taken at other colleges of Rider University or under the cooperative program between Westminster Choir College and Princeton University.

Westminster Choir College Students:

1. Transfer credit is equivalent to the credit earned at the sending institution, except that credit by transfer may not exceed three credits per course.
2. Many non-music courses may be transferred to satisfy Arts and Science requirements; excluded are courses dealing with highly technical or scientific subjects, specialized professional school courses, physical education courses and others determined by the college. The Arts and Science Program has the final authority in determining whether or not a specific course may transfer.
3. Music courses are not transferable. Credit will be awarded, however, for all college-level music courses exempted by examinations, which are given only after a student has enrolled at Westminster.

Withdrawal from the University

Students should refer to the University website, <https://www.rider.edu/academics/academic-support-services/registrar/withdrawals-and-readmission> (<https://www.rider.edu/academics/academic-support-services/registrar/withdrawals-and-readmission/>) for information regarding the circumstances and procedures related to withdrawing from the University.

In addition, students should refer to Rider's website at <http://www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds> (<http://www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds/>) for refund and other related information as it concerns withdrawal from the University.

GRADUATE

Rider University's Vision and Mission

Rider's Vision

Rider University will be a premier, forward-looking university known for its Engaged Learning Program that, together with dynamic academic programs, enriching co-curricular experiences and a vibrant living and learning community, challenges students, excites their imaginations and instills in them excellence in thought and action, preparing them for highly engaged and fulfilling professional and personal lives.

Rider's Mission

Rider University welcomes students from throughout the region, across the nation, and around the world who seek to be challenged and supported as active members of our inclusive and vibrant living and learning community. Committed to student growth, transformation and leadership, we connect rigorous academic, artistic and professional programs of study with a rich array of learning experiences that engage students inside and outside the classroom. We prepare graduates to thrive professionally and to be lifelong independent learners and responsible citizens who embrace diversity, support the common good, and contribute meaningfully to the changing world in which they live and work.

Our students, alumni, faculty, staff and administrators live the **RIDER PROMISE** by being forever:

P - prepared to contribute meaningfully to the changing world in which they live and work

R - respectful of all people, rights, freedoms and individual differences

O - open to a life of independent learning

M - motivated to be responsible citizens who support the common good

I - innovative, creative and resourceful

S - skilled and thriving professionals, educators, artists and performers

E - engaged in their communities as leaders and role models

Accreditations

Rider University is regionally accredited by the Middle States Commission on Higher Education (<https://www.msche.org/>).

The University also holds many specialized accreditations that attest to the quality of its academic programs. Rider is among the select business schools to have attained AACSB International (<https://www.aacsb.edu/>) (Association to Advance Collegiate Schools of Business) accreditation. Elementary and secondary education programs and their applicable graduate programs are accredited by the Council for the Accreditation of Educator Preparation (<http://caepnet.org/>) (CAEP). The undergraduate and graduate music programs of Westminster Choir College are accredited by the National Association of Schools of Music (<https://nasm.arts-accredit.org/>) (NASM). In addition, Rider's graduate counseling services program in the School of Education and Human Services holds the Council for Accreditation of Counseling and Related Education Programs (<https://www.cacrep.org/>) (CACREP) national accreditation, and its school psychology program holds the National Association of School Psychologists (<https://www.nasponline.org/>) (NASP) accreditation. Rider's B.S. in Chemistry program is approved by

the Professional Training of the American Chemical Society (<https://www.acs.org/content/acs/en/about/governance/committees/training.html>).

Rider University is a member of the National Collegiate Athletic Association (<http://www.ncaa.org/>) (NCAA) both men's and women's athletics. The University offers 20 NCAA Division I sports—10 men's and 10 women's. Rider is a member of the Metro Atlantic Athletic Conference (<https://maacsports.com/>) (MAAC) for most sports while wrestling competes in the Mid-American Conference (<https://getsomemaction.com/news/2019/3/4/mac-announces-historic-wrestling-expansion.aspx>) (MAC) and field hockey competes in the Northeast Conference (<https://northeastconference.org/?path=fhockey>) (NEC).

Notice of the Title IX Coordinator

As a community of educators and learners, Rider University is committed to fostering an environment dedicated to learning and mutual respect as reflected in the University's mission, Statement of Community Values, Anti-Harassment and Non-Discrimination Policy and Title IX. All students, faculty, administrators and staff at the University have the right to expect an environment that allows them to enjoy the full benefits of their work or learning experience. The University, therefore, does not condone violations of its Anti-Harassment and Non-Discrimination Policy and treats all allegations about violations very seriously. As outlined in the Anti-Harassment and Non-Discrimination Policy (<https://www.rider.edu/about/consumer-information/handbooks-policies/ahnd>) (http://www.rider.edu/sites/default/files/docs/anti-harassment-non-discrimination-2015-16_v08012016.pdf), the University prohibits all forms of discrimination, harassment, sexual assault, sexual misconduct, sexual harassment, dating violence, domestic violence and stalking.

Rider University is an Equal Opportunity and Affirmative Action Employer.

No one will be denied employment at, admission to, or the opportunity to participate in educational programs and activities at the University on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law. The University does not discriminate on the basis of any of the aforementioned protected bases in the recruitment and admission of students, the recruitment and employment of faculty, administrators and staff, and the operation of any of its programs and activities.

The Vice President for Human Resources serves as both the Affirmative Action Officer and the Title IX Coordinator for the University, and is the resource available to anyone seeking additional information or wishing to file a complaint related to Affirmative Action and discrimination on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation, gender identity, national origin, ethnicity, status as a Vietnam-era, qualified disabled veteran or other protected veteran, or status as a member of any other protected class under federal or state law.

The Affirmative Action Officer and the Title IX Coordinator for the University may be contacted as follows:

Robert Stoto

Senior Vice President for Human Resources and Affirmative Action
Moore Library, Room 108
609-895-5683

rstoto@rider.edu

Rider University is an Equal Opportunity and Affirmative Action Employer.

The Senior Vice President for Human Resources serves as both the Affirmative Action Officer and the Title IX Coordinator for the University, and is the resource available to anyone seeking additional information or wishing to file a complaint related to Affirmative Action and discrimination on the basis of race, creed, color, religion, handicap/disability, gender, age, marital status, sexual orientation or national origin. The Senior Vice President for Human Resources is located in Moore Library, Room 108 and can also be reached at 609-895-5683.

Summer Session 2022

Students interested in calendar and course offerings for the summer sessions should consult the summer session catalog, available from the College of Continuing Studies at 609-896-5033 or go to www.rider.edu/summer (<http://www.rider.edu/summer/>).

Commencement Information

For Commencement ceremonies information, go to www.rider.edu/commencement (<http://www.rider.edu/commencement/>)

Cancellation of Classes

In most cases, Rider will remain open and fully operational during snowstorms and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, and close certain buildings or take emergency actions.

If such circumstances should arise, a notice will be sent via the Rider Alert System.

Students may sign up for Rider Alert at <https://www.rider.edu/offices-services/public-safety/rider-alert> (<https://www.rider.edu/offices-services/public-safety/rider-alert/>)

Cancellations will also be announced online at www.rider.edu (<http://www.rider.edu>) and on the Rider University information hotline at 609-219-2000, option 1.

Norm Brodsky College of Business

The Norm Brodsky College of Business seeks to develop in students the skills needed to perform effectively in a variety of organizational settings—small business, multinational corporations, service industry, not-for-profits, family companies, government, or Wall Street—depending upon the student's interests and goals. Each graduate degree program is designed to provide an educational experience for the whole person by combining theory and practice. Since most of the students in our degree programs are employed in professional or managerial positions, they

bring a wealth of business experience to share with their peers as part of the networking and learning process.

Mission Statement

The mission of Rider University's Norm Brodsky College of Business is to provide a dynamic and innovative business education that builds functional expertise as well as professional competencies that enable our students to be productive, ethical, and socially responsible participants in the rapidly changing global marketplace.

The College fosters a supportive and personalized environment in which students develop communication, interpersonal, teamwork, leadership, and critical thinking skills for integrated problem solving.

The Norm Brodsky College of Business infuses current theory and practice into the curricula through professional activity, business partnering, and experiential learning as well as through a combination of discipline-based, pedagogical, and applied scholarly research efforts.

Professional Accreditation

Rider University's Norm Brodsky College of Business graduate and undergraduate programs are accredited by AACSB International – The Association to Advance Collegiate Schools of Business. The initial accreditation was achieved in 1993 and reaffirmed regularly thereafter. In addition, the accounting program was further recognized for excellence with AACSB International Accounting Accreditation in 2000 and also is reaffirmed on a regular basis.

Faculty

Courses are taught in small sections, usually by full-time faculty holding doctorates. Faculty members are engaged in research in their fields, and many have relevant business experience as well. Adjunct faculty come to Rider from the ranks of executives from major corporations and thought leaders in business and service organizations.

Graduate Degree Programs and Certificate Summary

Introduction

The Norm Brodsky College of Business offers six degree programs and three certificate programs that provide individuals seeking a graduate degree in business or accounting with options to fit their career goals. The various programs offer students the flexibility to balance school with on-going professional and life demands. Whether a student is a full-time professional wanting to complete the degree on a part-time basis or is looking to pursue a degree on a full-time basis, there is a program and a mode of delivery to suit every students' needs.

The Master of Accountancy (MAcc)

The MAcc program prepares individuals for a flexible career path and, ultimately, leadership positions in the accounting profession. Those students who wish to pursue a career in public accounting will develop specialized technical competencies to meet the 150 credit-hour requirement for licensure. Accounting career paths in corporate, financial or governmental sectors are facilitated through the core curriculum and specialized elective courses. The comprehensive curriculum focuses on development of analytical and professional skills necessary for success in today's global business environment. Learn more by visiting the Master of Accountancy (p. 822) (<http://catalog.rider.edu/graduate/colleges-schools/business-administration/graduate/colleges-schools/business->

administration/programs-certificates/master-accountancy/)page in this catalog.

Students have the option to pursue a dual degree combining the MAcc and the Master of Science in Information Systems within the Norm Brodsky College of Business. Our dual degree offering allows students to earn both degrees with fewer total credits than if earning the degrees separately. Learn more by visiting the MAcc/MS Dual Degrees (p. 815) page in the catalog.

Please see the MAcc website at www.rider.edu/macc (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/graduate-programs/master-of-accountancy/>) for up-to-date information on the program and faculty.

The Online Master of Accountancy (OL MAcc)

Similar to the on-campus MAcc, the Online MAcc program prepares individuals for a range of careers in the accounting profession, using the online educational format. Students may enter the Online MAcc in one of six start dates and follow a structured progression of courses, earning the same graduate degree as our on-campus Master of Accountancy. An online orientation is required for all students entering the program. Learn more by visiting the Online Master of Accountancy (p. 836) page in this catalog.

Please see the Online MAcc website at www.rider.edu/onlinemacc (https://online.rider.edu/online-masters-degrees/masters-accountancy/?Access_Code=RDU-MACC-SEO2&utm_campaign=RDU-MACC-SEO2) for up-to-date information on the program and faculty.

The Master of Business Administration (MBA)

The MBA program prepares individuals for career advancement as business professionals, managers and leaders of organizations. Structured around contemporary business knowledge and the development of strong analytical and leadership skills, Rider has developed a forward-looking MBA program built on a long tradition of business education excellence. The curriculum provides a distinctive and effective business learning environment that emphasizes advanced business theory, interpersonal and communication skills, cross-functional integration of business theory and practice, and the ability to manage in a changing environment. Learn more by visiting the Master of Business Administration (p. 825) page in this catalog.

Students have the option to pursue a dual degree combining the MBA and the Master of Science in Information Systems degree within the Norm Brodsky College of Business. Our dual degree offering allows students to earn both degrees with fewer total credits than if earning the degrees separately. Learn more by visiting the MBA/MS Dual Degree (<http://catalog.rider.edu/graduate/colleges-schools/business-administration/mba-dual-degree-info-sys-corp-fin/>) page in the catalog.

Please see the MBA website at www.rider.edu/mba (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/graduate-programs/mba-master-of-business-administration/>) for up-to-date information on the program and faculty.

The Online Master of Business Administration (OL MBA)

The Online MBA program prepares individuals for career advancement as business professionals, managers and leaders of organizations, offering the same high quality graduate degree as our on-campus MBA, but in a flexible, online educational format. An online orientation is required for all

students entering the program. Learn more by visiting the Online Master of Business Administration (p. 838) page in this catalog.

Please see the Online MBA website at www.rider.edu/onlinemba (https://online.rider.edu/online-masters-degrees/masters-business-administration/?Access_Code=RDU-MBA-SEO2&utm_campaign=RDU-MBA-SEO2) for up-to-date information on the program and faculty.

The Executive Master of Business Administration (EMBA)

The Executive MBA program is a cohort-based program for experienced business professionals that offers courses in an accelerated program format across 14 months. Classes are held in person on two Saturdays a month, and online once a month, so students can continue to work full-time. Students enter the program, complete classes and graduate with the same integrated group of up to 20 students. The program consists of two parts: the first part delivers a solid foundation in business concepts, and leadership and team skills. The second part of the program provides advanced executive sessions on a variety of current business topics of relevance to today's leaders. A personal, professional coaching program called Leadership Edge is also included in the curriculum.

In addition, there is a seminar on international business, which includes up to two weeks of travel in a key economic region of the globe. Other program highlights include learning advanced business theory from the faculty while receiving practical insights from executives who work alongside the faculty in the classroom. Learn more by visiting the Executive MBA (p. 818) page in this catalog.

Please see the Executive MBA website at www.rider.edu/emba (<https://www.rider.edu/emba/>) for unique admission requirements, program schedules and other relevant information.

The Master of Science in Information Systems

The Master of Science in Information Systems is a STEM designated degree that provides students with a strong foundation in information technology and organizational leadership, followed by electives personalized to each student's career goals. The mission is to graduate a new class of information and business leaders ready to rise as CTO/ CIOs and other senior information management roles. The program begins with a core foundation of management, information technology, and analytics, followed by in-depth investigations into the relationship between technology systems and high-level business strategies. The curriculum offers universal skills for students from all over the world at our convenient central New Jersey campus. Students will graduate with a deep and profound understanding of information systems for businesses – and how to execute innovative strategies in their own work. Learn more by visiting the Master of Science in Information Systems (p. 833) page in this catalog.

Students have the option to pursue a dual degree combining the Master of Science in Information Systems and the MBA or MAcc. Our dual degree offerings allow students to earn both degrees with fewer total credits than if earning the degrees separately. Learn more by visiting the MBA/MS Dual Degrees (<http://catalog.rider.edu/graduate/colleges-schools/business-administration/mba-dual-degree-info-sys-corp-fin/>) and MAcc/MS Dual Degree pages in the catalog.

Please see the MS in Information Systems website at www.rider.edu/infosystems (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/graduate-programs/master-science->

information-systems/) for up-to-date information on the program and faculty.

Business Analytics Graduate Certificate Program

The Graduate Certificate Program in Business Analytics has been developed in response to the overwhelming demand from corporations and organizations for employees with skills and knowledge of technologies, applications and processes to analyze data in order to better inform the decisions of the organization. This skill set is applicable in all aspects of business including finance, marketing, accounting and operations. This program is designed for people with limited background in statistics and business analytics. Learn more by visiting the Business Analytics Graduate Certificate Program (p. 810) page in this catalog.

Please see the Business Analytics Graduate Certificate Program website at www.rider.edu/businessanalytics (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/graduate-programs/business-analytics-certificate/>) for unique admission requirements, program schedules and other relevant information.

Forensic Accounting Graduate Certificate Program

The Graduate Certificate Program in Forensic Accounting is designed to meet the needs of businesses and organizations who know they must make the detection, prevention and prosecution of financial fraud a priority. There has been a tremendous increase in demand for employees with skills and knowledge of technologies, applications and processes to analyze data in order to better inform the decisions of the organization. Career opportunities in forensic investigation include positions in the government, public accounting, insurance, law, business and non-profit sectors. Students acquire the skills to identify, collect and examine evidence for accounting fraud and abuse. Learn more by visiting the Forensic Accounting Graduate Certificate Program (p. 821) page in this catalog.

Please see the Forensic Accounting Graduate Certificate Program website at www.rider.edu/forensicacct (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/graduate-programs/forensic-accounting-graduate-certificate-program/>) for unique admission requirements, program schedules and other relevant information.

Sport Management Graduate Certificate Program

The Graduate Certificate Program in Sport Management is designed to provide students with an edge to enter into or enhance their current business careers in the continually growing sport industry, deemed one of the most challenging industries to break into. The curriculum develops a students' breadth of knowledge on sport management business ideologies, as well as their ability to apply these concepts to the sport business industry to become effective leaders and decision makers in this unique field. Learn more by visiting the Sport Management Graduate Certificate Program (p. 843) page in this catalog.

Please see the Sport Management Graduate Certificate Program website at <https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/certificates/sport-management-certificate> (<https://www.rider.edu/academics/colleges-schools/norm-brodsky-college-business/certificates/sport-management-certificate/>) for unique admission requirements, program schedules and other relevant information.

Business Analytics Graduate Certificate Program

Program Overview

Rider's Graduate Certificate program in Business Analytics helps business professionals, with no prior background in statistics or business analytics, to develop the skills and gain the knowledge of the technologies, applications and processes used by organizations to analyze data and drive their decision making across all aspects of business.

Redesigned with the valuable input of executives in the analytics field, this certificate takes a hands-on, business approach to analytics and exposes students to a variety of software from Tableau and Excel to Rapidminer and Python.

Curriculum Overview

The Business Analytics Graduate Certificate consists of 15 graduate credits that can be completed in one year on a part-time basis. The classes are highly applied in nature, integrating project-based learning, simulations, and case studies. Students learn both the technical and management sides of business analytics to harness the power of this critical tool in both operational and strategic decision making. There is one foundation course in statistics (PMBA 8051) which must be satisfied before starting on the core of the certificate.

Completion of the Certificate

To complete this certificate program, students must meet the following requirements:

- Overall GPA of 3.0 in the Business Analytics Certificate Program; and,
- Cannot have any grades below a "C".

Current MAcc or MBA students at Rider

Current MAcc and MBA students can easily work the Business Analytics Graduate Certificate Program into their graduate degree program. Please contact the Academic Coordinator to plan how the Business Analytics Graduate Certificate will fit into your MBA or MAcc program.

Certificate Awarded:

- Business Analytics Graduate Certificate

Business Analytics Graduate Certificate Program Requirements

(15 credits)

Foundation Course for the Program

Students must demonstrate proficiency in statistics by satisfying ONE of the following conditions before they can move into the main requirements of the program:

- Earn a grade of "B" or better in course work equivalent to Rider's MSD 205 Business Statistics and BDA 201 Introduction to Business Analytics at an accredited four-year institution within six years prior to the semester admitted; OR
- Complete [PMBA 8051 Fundamentals of Statistical Analysis](#) with a grade of "B" or better; OR
- Take the proficiency exam for PMBA 8051 and pass with a grade of 80% or better. Must have approval from the Associate Dean for Graduate Programs in order to use this option.

Core Curriculum

Code	Title	Credits
PMBA 8351	Introduction to Business Analytics ¹	3
PMBA 8312	Business Intelligence Tech-Data Mining	3
PMBA 8317	Applied Data Management for Business Users	3
PMBA 8355	Visual Analytics	3
PMBA 8358	Data-Driven Strategies for Business	3
Total Credits		15

¹ PMBA 8351 is a prerequisite for PMBA 8355 and PMBA 8358.

Certificate Completion

To complete the BA Certificate Program, students must meet the following requirements:

- Overall GPA of 3.0 in the Business Analytics Certificate Program;
- Cannot have any grades below at "C".

Business Analytics Graduate Certificate Program Policies

Admission

To be admitted to the Business Analytics Graduate Certificate Program, students must meet the following requirement:

Completion of at least a bachelor's degree or equivalent from an accredited institution of higher learning with a GPA of 3.0 or better.

Certificate Completion

To complete the BA Certificate Program, students must meet the following requirements:

- Overall GPA of 3.0 in the Business Analytics Certificate Program;
- Cannot have any grades below at "C".

Courses and Descriptions

PMBA 8051 Fundamentals of Statistical Analysis 3 Credits

Covers basic statistical techniques useful in business decision making. Includes descriptive statistics, event probability, random variables, sampling distributions, regression analysis and topics in statistical inference.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions.

This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8351 Introduction to Business Analytics 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis.

Prerequisite(s): PMBA 8051.

PMBA 8355 Visual Analytics 3 Credits

This graduate course will equip the students with the fundamental skills to perform visual analytics with Tableau. Specifically, students will learn how to prepare a dataset for visual analysis, and how to “tell a good story” using basic and advanced visualizations. At the completion of this course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience. Students who have earned credits for BDA 205 or equivalent cannot take PMBA 8355 for credit.

Prerequisite(s): PMBA 8351.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

Concentrations for MBA, MACC & EMBA Students

Concentrations Overview

The required courses in the MBA, MACC and EMBA provide a distinct and consistent advanced business knowledge and skill structure for all students in the programs. The electives allow the student to tailor the graduate educational experience to fit their individual needs by pursuing

a specific concentration or strategically selecting different elective classes that enhance their overall professional skills.

Concentrations are comprised of three-course elective (nine credit hours) sequences selected from a menu of electives by either the functional area (**business analytics, finance, forensic accounting, information systems**) or interdisciplinary area (**sport management**.) Students in the online MAcc or MBA may have a limited selection of electives based on what is available in the online format.

Electives counted toward a concentration must carry a grade of “B” or better, and students must achieve a 3.2 GPA in those electives.

Total Credits		9

Courses and Descriptions

MACC 662 Auditing Practice & Problems 3 Credits

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

Prerequisite(s): ACC 400 or ACC 400P.

MACC 663 Fraud and Forensic Accounting 3 Credits

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8040 and PMBA 8020 or the Preliminary Accounting Requirements.

Prerequisites: PMBA 8040 or VL12 with a score of WV AND PMBA 8020 or VL10 with a score of WV OR VL25 with a score of WV OR VL26 with a score of WV.

PMBA 8311 Information Security for the Enterprise 3 Credits

This course will teach students how businesses can implement security policies which will protect their significant investment in computer systems. The course topics include but are not limited to security attacks, attack prevention and mediation and security audits. Security devices, firewalls, PC and server security, authentication methods and procedures, and network security will all be discussed. The course will be delivered through a combination of hands-on labs where students will evaluate and implement computer security on computers, and class lectures.

Prerequisite(s): PMBA 8210.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions.

This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8315 Globalization and Technology 3 Credits

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8318 Business Analysis and Design 3 Credits

This course will integrate the skills of business analysis with those of system design. Students will learn a dynamic visioning/planning process which will guide the development of a technology architecture model for the business enterprise. Students will learn requirements elicitation techniques and use cases. Design methods such as object modeling and prototyping and data modeling with enterprise relationship diagrams will also be covered.

Prerequisite(s): PMBA 8210.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management.

Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8344 Financial Market Operations 3 Credits

Flow of funds analysis is used to study financial intermediation and interest rate determination in money and capital markets. Includes the flow of funds accounts, funds flow through financial institutions, the demands for and supply of credit by economic sectors, and the impact of public policies on financial market behavior.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8346 Financial Modeling 3 Credits

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8347 Portfolio Management 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8348 Fixed Income Securities and Alternative Investments 3 Credits

This is an introductory course in fixed income securities and alternative investments. The first part of the course covers the markets for fixed income securities and their derivatives. Valuation of these securities and determination of the risk inherent in these securities are discussed. Methods for managing that risk, such as hedging and credit derivatives, are also discussed. The second part of the course covers a variety of alternative investments, including real estate funds, venture capital, hedge funds, and commodities. Valuation of these investments and determination of their risk are discussed.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8349 Personal Financial Planning 3 Credits

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8351 Introduction to Business Analytics 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis.

Prerequisite(s): PMBA 8051.

PMBA 8352 Design Thinking and Innovation 3 Credits

This graduate course on Design Thinking and Innovation provides students with a framework for dealing with unstructured problems, and for managing the innovation process. This course introduces students to design thinking as a systematic approach to innovation, but also guide students through the process to identify and translate broadly defined opportunities into actionable innovation possibilities. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

Prerequisite(s): PMBA 8210.

PMBA 8353 Digital Futures 3 Credits

This course is a holistic course drawing on all areas of Information Technology. It leverages the in-depth understanding of Technology that MSIS students possess and transforms such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. It will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future. Case studies and readings will familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology/innovation. Students will be engaged in a discussion of multi-firm cases of strategic innovation and will examine policy decisions by the firm and various ethical dilemmas engendered by technological changes of the last four decades.

Prerequisites: PMBA 8210.

PMBA 8355 Visual Analytics 3 Credits

This graduate course will equip the students with the fundamental skills to perform visual analytics with Tableau. Specifically, students will learn how to prepare a dataset for visual analysis, and how to "tell a good story" using basic and advanced visualizations. At the completion of this course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience. Students who have earned credits for BDA 205 or equivalent cannot take PMBA 8355 for credit.

Prerequisite(s): PMBA 8351.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

PMBA 8402 The Business of Sports 3 Credits

This course examines diverse managerial issues involving the sports industry. The course covers topics at the league level, the team level, the athlete-agent level, and the college level. The constituencies with interests in sports issues such as athletes, fans, media, companies, advertisers, and legislators are discussed along with global aspects of sports enterprises. Valuation issues related to sports teams are also covered. The course is designed to integrate all aspects of businesses as they apply to sports with an emphasis on strategy, management, marketing, and finance.

PMBA 8403 Sport Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of hands-on labs, a data project, a research project, quizzes, and online discussions. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports. This course assumes a basic level of skill working with Microsoft Excel.

Prerequisite(s): PMBA 8051 or waiver.

PMBA 8404 Sports Marketing 3 Credits

This course explores the complex and diverse nature of sports marketing. It applies fundamental marketing concepts to the sports industry, including the marketing mix, consumer behavior, marketing research, segmentation analysis, and assessment of marketing programs specific to sports. Guidelines for the formulation of marketing plans and strategies will be included. Trends, issues, and problems influencing the industry will also be examined. Discussions cover professional, collegiate, non-profit, and other areas of the sport industry.

PMBA 8405 Legal and Ethical Issues in Sports 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues which will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be done at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and during the semester he/she receives credit for the internship is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study. **Prerequisite(s):** Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

Dual Degrees

Overview

The Dual Degree Program allows students to build on the best of Rider's MBA or MAcc program by combining it with the in-depth technical expertise developed in its Master of Science degree in Information Systems. The Dual Degree permits students to share three classes (9 credits) from the MBA or the MAcc with the requirements of the MS

degree to earn the second degree with only an 21 additional credits. (assuming all foundation requirements have been met.)

Students who are currently in the MBA, MAcc or MS program may easily opt into the dual degree program by seeing their Academic Coordinator to add the second degree. Planning should begin early so students can ensure they are taking the correct elective classes that are shared between the two degrees. Students who have completed the MBA, MAcc or MS degree in the last five years may be eligible to add the second degree by applying for readmission to the University.

As with the other graduate business degree programs at Rider, the curriculum within the dual degree may include foundation classes, depending on the background of the individual student. Foundation courses are shared between the MBA or MAcc and the MS degrees. Students will be provided with a list of all the classes they will need to take in the program when they are admitted.

Rider's Graduate Business Programs are accredited by the AACSB International (<http://www.aacsb.edu/>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide

Classes are offered in the evening, Monday through Thursday, and in the online and hybrid formats. Courses are offered during the fall, spring and summer semesters. Students can pursue dual degrees on a full or part-time basis. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well.

Degree Offered:

- MBA/MS in Information Systems
- MAcc/MS in Information Systems

Code	Title	Credits
Courses Required for the MBA:		36
PMBA 8000	Executive Communications	
PMBA 8210	Information Technology Management ¹	
PMBA 8220	Strategic Accounting for Manager	
PMBA 8230	Managerial Economics	
PMBA 8240	Applied Corporate Finance	
PMBA 8250	Operations & Supply Chain Management ¹	
PMBA 8260	Mkt Analysis & Decision Making	
PMBA 8270	Adv. Organizational Behavior	
PMBA 8290	Legal and Ethical Aspects of Management	

PMBA 8880	Strategic Management	
Two Elective Courses (one shared with the MS in Information Systems elective) ^{1,2}		
Additional Required Courses for the MS:		21
PMBA 8311	Information Security for the Enterprise	
PMBA 8314	Project Management	
PMBA 8317	Applied Data Management for Business Users	
PMBA 8318	Business Analysis and Design	
PMBA 8352	Design Thinking and Innovation	
PMBA 8353	Digital Futures	
One Elective Course ³		
Total Credits		57

¹ These courses are shared between programs and counted only once to satisfy both MBA and MS dual degree requirements.

² One of these electives may be selected from any MAcc or PMBA course (except for PMBA 80xx foundation courses) for which the student has satisfied the foundation requirement. Must be different from any of the courses, including the elective, taken in the MS in Information Systems.

The second elective must be selected from the following list: PMBA 8312, PMBA 8351, PMBA 8353, PMBA 8355, or PMBA 8358, and will be shared with the MS in Information Systems program.

³ This elective must be selected from the following list: PMBA 8312, PMBA 8351, PMBA 8353, PMBA 8355, PMBA 8358 and must be different than the MBA electives taken.

MAcc/MS in Information Systems

(51 credits)

Code	Title	Credits
Required Courses for the MAcc:¹		21
MACC 611	Professional Research and Communication	
MACC 650	Seminar in Federal Taxes	
MACC 652	Analysis of Accounting Data	
MACC 654	Issues in Financial Reporting	
MACC 664	Issues in Managerial Accounting	
MACC 662	Auditing Practice & Problems	
PMBA 8312	Business Intelligence Tech-Data Mining ²	
Required Courses for the MS in Information Systems :		24
PMBA 8210	Information Technology Management	
PMBA 8250	Operations & Supply Chain Management	
PMBA 8311	Information Security for the Enterprise	
PMBA 8314	Project Management	
PMBA 8317	Applied Data Management for Business Users ³	
PMBA 8318	Business Analysis and Design	
PMBA 8352	Design Thinking and Innovation	
PMBA 8353	Digital Futures	
Elective Courses for the Dual Degree:		6
Select one of the following:		
PMBA 8260	Mkt Analysis & Decision Making	
PMBA 8270	Adv. Organizational Behavior	
PMBA 8290	Legal and Ethical Aspects of Management	
PMBA 8351	Introduction to Business Analytics	
PMBA 8355	Visual Analytics	

PMBA 8358	Data-Driven Strategies for Business	
Select one PMBA or MAcc class not already completed as a requirement. ⁴		
Total Credits		51

¹ The MAcc requires three elective courses. Two of those electives must be shared with classes in the MS in Information Systems. These shared classes are denoted in the footnotes below. The last elective is shown in the "electives" section.

² This required class in the MAcc is shared with the MS in Information Systems as an elective in that program.

³ This required class in the MS in Information Systems is shared with the MAcc as an elective in that program.

⁴ This elective may be taken in any PMBA or MBA class except for PMBA 8010, PMBA 8020, PMBA 8030, PMBA 8040, PMBA 8052, PMBA 8060, or PMBA 8070. This elective is not shared between programs.

Courses and Descriptions

PMBA 8000 Executive Communications 3 Credits

Professionals spend about seventy percent (70%) of their work-time communicating with other people. It is therefore no surprise that, without good communication skills, it is impossible to succeed in one's workplace. Yet, effective communication skills do not come naturally for most people. This course aims to prepare you to speak compellingly, write clearly and concisely, listen actively and critically, and persuade others by constructing sound arguments. To that end, we will learn the key aspects of communication: audience analysis, communicator credibility, message construction, and delivery. Deliverables will include written documents and oral presentations, as well as both individual and team presentations. Importantly, in doing so, you will enhance your leadership potential in your workplace by motivating your colleagues, team, and organization to work toward important goals.

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): PMBA 8020.

PMBA 8230 Managerial Economics 3 Credits

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8020.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of PMBA 8051 and 8052.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): PMBA 8060.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): PMBA 8070.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8311 Information Security for the Enterprise 3 Credits

This course will teach students how businesses can implement security policies which will protect their significant investment in computer systems. The course topics include but are not limited to security attacks, attack prevention and mediation and security audits. Security devices, firewalls, PC and server security, authentication methods and procedures, and network security will all be discussed. The course will be delivered through a combination of hands-on labs where students will evaluate and implement computer security on computers, and class lectures.

Prerequisite(s): PMBA 8210.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8318 Business Analysis and Design 3 Credits

This course will integrate the skills of business analysis with those of system design. Students will learn a dynamic visioning/planning process which will guide the development of a technology architecture model for the business enterprise. Students will learn requirements elicitation techniques and use cases. Design methods such as object modeling and prototyping and data modeling with enterprise relationship diagrams will also be covered.

Prerequisite(s): PMBA 8210.

PMBA 8351 Introduction to Business Analytics 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis.

Prerequisite(s): PMBA 8051.

PMBA 8352 Design Thinking and Innovation 3 Credits

This graduate course on Design Thinking and Innovation provides students with a framework for dealing with unstructured problems, and for managing the innovation process. This course introduces students to design thinking as a systematic approach to innovation, but also guide students through the process to identify and translate broadly defined opportunities into actionable innovation possibilities. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

Prerequisite(s): PMBA 8210.

PMBA 8353 Digital Futures 3 Credits

This course is a holistic course drawing on all areas of Information Technology. It leverages the in-depth understanding of Technology that MSIS students possess and transforms such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. It will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future. Case studies and readings will familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology/innovation. Students will be engaged in a discussion of multi-firm cases of strategic innovation and will examine policy decisions by the firm and various ethical dilemmas engendered by technological changes of the last four decades.

Prerequisites: PMBA 8210.

PMBA 8355 Visual Analytics 3 Credits

This graduate course will equip the students with the fundamental skills to perform visual analytics with Tableau. Specifically, students will learn how to prepare a dataset for visual analysis, and how to "tell a good story" using basic and advanced visualizations. At the completion of this course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience. Students who have earned credits for BDA 205 or equivalent cannot take PMBA 8355 for credit.

Prerequisite(s): PMBA 8351.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

PMBA 8880 Strategic Management 3 Credits

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

Prerequisite(s): All other MBA breadth courses.

Executive Master of Business Administration (EMBA)

Program Overview

The Executive MBA is a 45 credit, 14-month program taught in an integrated group setting. Courses meet in person on Saturdays on the Lawrenceville campus two times a month, with coursework done online one Saturday a month. While there are many students with undergraduate business degrees in the EMBA program, it is especially appropriate for individuals who have non-business educational backgrounds and those who are transitioning to positions requiring higher levels of business, management, and leadership skills. A key goal of the program is to emphasize application of the information and skills being taught; therefore, students will find this emphasis throughout all aspects of the program.

The program consists of two parts: the first part sets expectations concerning what it means to operate at an executive level and then delivers a solid foundation in business concepts, basic leadership and team skills; the second part provides "advanced executive sessions" on a variety of current business topics of relevance to the business executive.

The EMBA program also has multiple coaches who work with students individually throughout the 14-month program to develop essential management, leadership, time management, stress management, and personal career development skills.

Student Learning Outcomes

The learning outcomes and competencies below are the core of the Rider University Norm Brodsky College of Business Executive MBA program. They provide the foundation for its curriculum and are designed to enhance student success, both throughout the program and post-graduation.

- **Career Maturity** - Demonstrate competencies (knowledge, skills, abilities, behaviors) reflective of career maturity
- **Decision-making** - Make strategic decisions that are integrative
- **Leadership** - Manage organizational activities in a global environment
- **Communication** - Effectively communicate business information in the appropriate format

Waiver of Program Coursework

There are no course waivers granted for the EMBA program.

Executive-in-Residence Program

Successful business executives, each with their own specialization, are brought in to work alongside Rider faculty to lend their personal insight

to classroom discussion during several of the courses in the “advanced executive session” portion of the program.

International Experience

The international experience includes up to two weeks traveling in one or more countries around the world. The actual location for each integrated group is partially dependent upon the interests and needs of the group. Through a series of site visits, the group will meet with business leaders, develop relationships with overseas firms, and get a up-close look at how business is handled in some of the world’s most dynamic markets.

Cost

The cost of the program is all-inclusive, covering tuition, food, fees, and the international study experience. Students are responsible for purchasing their own textbooks.

Application Procedures

To apply for admission to the Executive MBA program, the procedures are:

- Obtain and complete an application for admission from the Office of Graduate Admission or online at <https://www.rider.edu/admissions/graduate/requirements-deadlines/business> (<https://www.rider.edu/admissions/graduate/requirements-deadlines/business/>).
- Submit your resume, statement of aims and objectives, and two work-related recommendations (employer or another business-related resource) to the Office of Graduate Admission.
- Arrange to have an official transcript(s) sent to the Office of Graduate Admission from every institution of higher learning attended (including Rider University). A transcript should be sent even if only one course was taken at the institution. Only official transcripts will be accepted. Transcripts sent to the student are not acceptable unless they are sealed in the original envelope when received by the Office of Graduate Admission.
- International students are asked to have their transcripts evaluated (and translated, if necessary) for program equivalency by a recognized credential evaluation service. World Education Services (<https://www.wes.org/>) in New York City is suggested for this evaluation.
- For international students, a notarized financial resource statement or notarized bank statement is required to demonstrate the student’s ability to pay the total cost of attendance.
- Upon submission of all application materials, applicants will be asked to take part in an admissions interview with the Director of the Executive MBA Program.

Application Deadlines

The deadline for application to the EMBA program is December 1. Applications received after the official deadlines may be given consideration at the discretion of the Norm Brodsky College of Business.

EMBA 9001 Top Management Perspective 3 Credits

This team-taught course will serve as the initial course of the EMBA program. The course will take place over three weekends. Top managers will also attend and provide their perspectives to students and faculty in attendance. This course will explore the “art” of case study analysis. Students will focus on identifying, analyzing, and resolving issues from a top management perspective. This course will consider various issues confronted by top managers and heavily emphasizes contemporary cases that illustrate a wide range of management issues. By having the course team-taught by a faculty member and an Executive-in-Residence, both the academic and applied aspects of business will be represented in the classroom. This sets the tone for the approach and philosophy of the entire program - a blending of business theory with real world application. Another of the course’s purposes is to allow the students to get to know one another, become acquainted with the faculty who will be teaching in the program, and receive an overview of the material that will be covered.

EMBA 9220 Financial Accounting 3 Credits

This course provides a managerially-oriented focus on the aspects of financial accounting most relevant to business decision makers. Students will develop the ability to read, analyze, and interpret financial information for decisions regarding operating, investing, and financing activities as well as serving as a foundation for more advanced analysis in areas such as credit and equity decisions.

EMBA 9231 Economic Analysis and Decision Making 3 Credits

This course focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

EMBA 9240 Corporate Finance 3 Credits

This course introduces modern corporate finance principles that today's managers should know. Its purpose is to give students a thorough introduction to the theory and practice of financial management. The course reviews the principles executives need to acquire to manage for value creation. Topics covered include valuation of securities, capital budgeting, cost of capital, capital structure, and value-creating decisions in a global environment.

EMBA 9250 Statistical Analysis for Bus 3 Credits

This course introduces students to basic concepts and methodologies in probability theory and statistics. Emphasis is on real-world application of reasoning techniques used for interpreting data for decision criteria of managerial decision making. Topics include probability, variables, estimation, hypothesis, regression, and sampling. Concepts of learning are facilitated through real-world practices.

EMBA 9251 Supply Chain and Operations Management 3 Credits

This course focuses on the issues, concepts, skills, and techniques related to the management of operations of organizations. Students are introduced to various techniques of operations research and management science as they are applied to decision making in the management of operations. Topics include productivity, supply chain management, manufacturing strategies, and competitiveness.

EMBA 9260 Strategic Marketing 3 Credits

The focus of this course is to provide students with the analytical skills required to understand and assess complex marketing situations in order to develop and implement appropriate marketing strategies. Identifying individual case factors and understanding the relationship between developments of strategies is emphasized. Students will apply the material using real-world cases faced by organizations.

EMBA 9270 Management/Team Skills 3 Credits

This course is based on the assumption that management and team skills can be learned. To learn skills requires active involvement in the classroom exercises and many learning opportunities come from group activities. To develop these skills, students will need to set personal goals and experiment with new behavior. This course will involve a variety of in-class exercises including self-assessments, interpersonal activities, and a team project.

EMBA 9271 Leadership 3 Credits

This course has been designed to provide students with an understanding of leadership from both a scholarly and a practitioner perspective. The purpose is to help students understand what it means to be a leader in general and in the current business environment specifically. Students will be encouraged to consider their own leadership aspirations, to observe others in leadership roles, and to test their own leadership acumen.

EMBA 9301 Corp Governance Legal Ethical Issues 3 Credits

This course provides an overview of corporate governance. The governance structure specifies the distribution of rights and responsibilities among different participants in the corporation, such as the board of directors, managers, shareholders, and other stakeholders. In this course, students will discuss the importance of corporate governance and the roles of various stakeholders in the governance structure. Conflicts of interest that arise between the stakeholders and approaches to mitigate those conflicts will be a central focus of the course. Because corporate governance plays an integral role in creating a culture in which ethical behavior is the norm, this course will also focus on identifying, analyzing, and resolving ethical dilemmas in business. The course will consider ethical issues confronted by managers and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues.

EMBA 9302 Corporate Performance Evaluation 3 Credits

This course emphasizes to executives that shareholder value creation should be an enduring focus of concern because value is the foundation of survival and prosperity for the enterprise. The course introduces multiple perspectives in evaluating the performance of the firm. Among them are management control systems, financial statement analysis, cash flow analysis, and the balanced score card (BSC) including Economic Value Added. The nature of these approaches to evaluation draws from the disciplines of accounting and finance. Structuring the course as a team-taught course in which instructors from both of these disciplines will be present helps to ensure that students will receive a comprehensive and integrated understanding of the course topics. Students will experience using real-world cases in evaluation.

EMBA 9303 Intl Bus Seminar W/ Travel Exp 3 Credits

The purpose of this course is to examine the intricacies of conducting business internationally. With each offering, the course will focus on parts of the world where emerging economies are becoming influential players in international business. Examples of these emerging economies include China, South America, Argentina and Chile in particular, and Eastern Europe or Southeast Asia. The influence of external forces resulting from the socio-cultural, economic, technological and political aspects of the macro-environment will be examined. The competitive environment will be examined from the perspective of both multinational and domestic corporations. Finally, consideration will be given to the corporate level strategies and the functional operation of these corporations as they compete for market share, financial investment and human resources.

EMBA 9309 Special Topics 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9310 Information Technology and Management 3 Credits

This course enables current and future senior executives to gain a strategic perspective of information technology resources within the organization. The focus is on opportunities and challenges associated with managing technological resources as well as how the effective management of information technology can improve competitive positioning and operational performance. Course format will be a combination of lectures, guest speakers, case studies, and hands-on exercises. Experiential learning opportunities will allow students to work with real-world case studies using relevant technologies.

EMBA 9362 Product Development and Commercialization 3 Credits

The purpose of this course is to provide an in-depth overview of the Product Development and Commercialization (PD&C) process. This will be done through the analysis of cases that describe actual PD&C as well as innovation problems faced by a variety of organizations (e.g. consumer, health care service). Topics covered include innovation funding, opportunity analysis, common PD&C challenges and issues, and the interface among various disciplines to achieve best-in-class PD&C strategies.

EMBA 9880 Strategic Management: a Capstone Course 3 Credits

The capstone course focuses on the elements required to make effective strategic decisions in organizations with reference to the impact these decisions have on all stakeholders. The purpose of this course is to provide students with an understanding of the strategy process through an analysis of how a firm develops a mission, vision, and establishes a sense of purpose while simultaneously monitoring the external environment for emerging opportunities and threats. Topics focus on real-world cases, the evolution of strategic management processes, and strategies for a global world.

EMBA 9900 Leadership Edge 0 Credits

This course is structured as pass/fail. It provides students at, or aspiring to, executive positions within their organization's career, leadership and management development with a real-time, practical approach to leadership. This differentiator and developmental component is referred to as "The Leadership Edge." Students will reflect on self-assessments completed as part of the program. They are then able to leverage the Leadership Edge experience by pursuing different methods of developing career, leadership, and management competencies to fill identified gaps. Opportunities for development are met through group sessions and student participation in individual (private) coaching or group seminars to discuss personal career and organizational situations. The choice of which avenue is taken (individual or group) is made on an integrated group basis.

EMBA 9906 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Forensic Accounting Graduate Certificate

Program Overview

Over the last four decades, the field of forensic accounting has grown tremendously as increased federal legislation and more stringent auditing standards have helped to make the detection, prevention and prosecution of financial fraud a priority.

Career opportunities in forensic investigation include positions in the government, public accounting, insurance, law, business and non-profit sectors. The role of forensic accountants is far-reaching: these skilled professionals combine their accounting knowledge with critical investigative and analysis skills. They help to manage and reduce risk; identify and prosecute criminal activities such as embezzlement or illegally obtained funds; and advise on critical financial transactions from mergers and acquisitions to bankruptcy proceedings.

For the convenience of professionals, Rider's 12-credit Forensic Accounting Graduate Certificate program is offered in a variety of delivery

formats: all-online, blended or on-campus evening classes. Classes are offered year-round with start dates in the spring, summer and fall.

You can complete the certificate in as little as two semesters, acquiring the skills to identify, collect and examine evidence for accounting fraud and abuse. Learning outcomes are:

- Identify, detect and prevent common fraud schemes and fraudulent financial reporting
- Recognize misappropriation of assets and corruption
- Gather and deliver evidence for the purpose of litigation
- Support fraud cases through documentation and analysis for litigation support
- Understand how internal control systems minimize or mitigate the potential for fraud including control frameworks and specific control procedures

Completion of the Certificate

You must achieve an overall GPA of 3.0 in the program, with no grades earned below a "C", to earn the certificate.

Certificate Offered

- Certificate in Forensic Accounting

Program Requirements

(12 credits)

The Forensic Accounting Graduate Certificate requires students to complete four graduate-level courses (12 credit hours) to complete the program.

Foundation Courses for the Program

Before starting with the core program's courses, students must demonstrate technology proficiency by satisfying ONE of the following conditions:

1. Earn a grade of "C" or better in Rider University's ACC 310, ACC 311 and ACC 400 or similar coursework at an accredited four-year institution within six years prior to the semester admitted;

OR

2. Complete PMBA 8020 with a grade of B or better AND PMBA 8324 and ACC 400 with a grade of C or better.

Core Requirements for the Program

Code	Title	Credits
MAcc 663	Fraud and Forensic Accounting	3
MAcc 665	Fraud Detection and Deterrence	3
MAcc 667	Business Valuations: Fundamentals, Techniques and Theory	3
PMBA 8312	Business Intelligence Tech-Data Mining	3
Total Credits		12

Courses and Descriptions

MAcc 663 Fraud and Forensic Accounting 3 Credits

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MAcc 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MAcc 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8040 and PMBA 8020 or the Preliminary Accounting Requirements.

Prerequisites: PMBA 8040 or VL12 with a score of WV AND PMBA 8020 or VL10 with a score of WV OR VL25 with a score of WV OR VL26 with a score of WV.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions.

This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

Master of Accountancy (MAcc)

Program Overview

The Master of Accountancy develops the technical and interpersonal skills necessary for success in the accounting profession and fulfills the

150 credit-hour requirement for CPA licensure. Students can choose a concentration in business analytics, finance, information systems, sport management, or forensic accounting. This approach allows students to customize their degree.

Many full-time students enter the MAcc directly after completing their undergraduate degree and take sections of the CPA exam during the MAcc program. Most part-time students in the program are employed in professional or managerial positions and bring business experience to share. There are internship opportunities for MAcc students.

Student Learning Outcomes

The learning outcomes and competencies below are the core of the Rider University Norm Brodsky College of Business MAcc program. They provide the foundation for its curriculum and are designed to enhance student success, both throughout the program and post-graduation as they pursue their career paths in the accounting and beyond.

- Comprehend the conceptual foundations and the legal and regulatory environment of accounting and research, and analyze current issues in financial reporting within these frameworks using critical thinking and professional judgment.
- Demonstrate technical accounting knowledge and the ability to apply and integrate this knowledge through financial statement analysis using appropriate techniques in various decision-making settings.
- Exhibit professional competencies including working in teams, presentation and written communication skills, analytical reasoning and problem solving ability.
- Identify, research and analyze international accounting issues.

Curriculum Overview

Courses are taught in small sections by full-time faculty who research in their fields and by part-time faculty who are active in the profession. The accounting program has earned the AACSB Accounting accreditation (<https://www.aacsb.edu/>), the international standard of excellence in accounting and business education that is held by less than 3% of accounting programs worldwide.

Classes are offered in the evening, Monday through Thursday, and in the online format. All required courses are offered during the fall, spring and summer semesters. Students can pursue the MAcc on a full or part-time basis.

Master of Accountancy Program Requirements

The MAcc program consists of 30 semester hours at the graduate level (MAcc and PMBA only). The program includes 21 semester hours in required courses and 9 semester hours in MBA or MAcc electives. Please refer to the MBA course descriptions for a listing of PMBA elective courses. MAcc students may choose to use both MAcc and MBA electives to create concentrations. See the "Concentration (p. 811)" section provided in this catalog. Required graduate accounting courses are offered each semester. Graduate accounting electives are typically offered on a three-semester rotational basis. Students without an educational background in accounting may also be required to take an additional 25.5 credit hours of foundation requirements based on their educational and professional experience.

Foundation Requirements

MAcc students who hold an undergraduate degree in an area other than business will need to complete all of the Business Foundation Requirements and Accounting Foundation Requirements before taking graduate level Accounting courses.

MAcc students who hold an undergraduate business degree in an area other than accounting may be eligible to waive the Business Foundation Requirements but must complete the Accounting Foundation Requirements before taking graduate level Accounting Courses.

MAcc students who hold an undergraduate degree in accounting may be eligible to waive the Business Prerequisite Requirements and the Accounting Prerequisite Requirements.

Waiver of these courses follows the guidelines defined under the Waiver of Courses section.

Business Foundation Requirements

7.5 credits (for students with a non-business undergraduate degree or outdated course work that does not meet the waiver requirements).

Code	Title	Credits
PMBA 8020	Fundamentals of Accounting	3
PMBA 8030	Economic Analysis	3

PMBA 8040	Basic Financial Principles	1.5
Total Credits		7.5

Accounting Foundation Requirements

18 credits (for non-accounting business undergraduate degree or outdated course work that does not meet the waiver requirements)

Code	Title	Credits

The Master of Accountancy (MAcc)–Waiver of Courses

A waiver of a course from business foundation requirements may be granted under the following conditions:

I) *PMBA foundation class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA foundation class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA foundation class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

Waivers of courses for the "Accounting Foundation Requirements" may be granted as outlined in condition I, if the student receives a "C" or better for these ACC courses. There are no waiver examinations for the "Accounting Foundation Requirements" in the MAcc program. When the MAcc "Foundation Requirements" are waived, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of

a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

Courses and Descriptions

MACC 611 Professional Research and Communication 3 Credits

Effective communication and interpersonal skills are key for success in the accounting profession. This course is an interactive seminar designed to provide a strong foundation in professional research and to develop communication and interpersonal skills with an emphasis on the communication and interpersonal challenges that accountants commonly face. Course work is primarily base based and includes a wide variety of video and written assignments that require research to develop accounting services and present to guest professionals and the "client".

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 650 Seminar in Federal Taxes 3 Credits

The course examines tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts. Topics include tax issues involved in the decision to select a particular form of business organization, fundamental concepts of interstate, international, and New Jersey taxation, and to expose the student to a variety of common tax returns, applicable to the above topics.

Prerequisite(s): completion of ACC 410 or ACC 410P.

MACC 652 Analysis of Accounting Data 3 Credits

This course uses information technology and data analytical techniques to conduct analysis needs commonly faced by accounting professionals. The course uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 654 Issues in Financial Reporting 3 Credits

This course uses the conceptual framework to examine standards for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 656 International Dimensions of Accounting 3 Credits

This course examines the global applications of accounting principles and practices, including the relationship between international accounting issues and company strategy. Topics include theoretical and societal considerations of international accounting issues, the identification of transnational accounting practices, and attempts at harmonization.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 658 Governmental and Not-for-Profit Accounting 3 Credits

This course provides an in-depth study of the concepts, objectives and techniques of the evolving field of accounting for nonprofit institutions and organizations. Areas emphasized include municipal and state governmental units, hospitals, colleges and universities and service organizations. Problems, cases and selected readings are employed.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 662 Auditing Practice & Problems 3 Credits

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

Prerequisite(s): ACC 400 or ACC 400P.

MACC 663 Fraud and Forensic Accounting 3 Credits

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 664 Issues in Managerial Accounting 3 Credits

This course examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

Prerequisite(s): completion of ACC 302, ACC 302P or PMBA 8220.

MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8040 and PMBA 8020 or the Preliminary Accounting Requirements.

Prerequisites: PMBA 8040 or VL12 with a score of WV AND PMBA 8020 or VL10 with a score of WV OR VL25 with a score of WV OR VL26 with a score of WV.

MACC 668 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisites: ACC 302, ACC 302P or PMBA 8220.

MACC 670 Accounting Internship 3 Credits

This course provides on-site experiential learning through supervised employment with a participating company. Students will be reviewed periodically by senior staff. Academic assignments, including a formal report, will be developed in conjunction with a faculty member. Permission of the instructor is required.

MACC 690 Special Topics 3 Credits

This course provides study of a timely topic that represents a dimension of business administration or accounting that not covered in a regular course. Such a topic may be offered by the Accounting Department. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Master of Business Administration (MBA)

Program Overview

In recent years, businesses have become more global in their outreach, increasingly driven by analytics in their decision making and progressively more entrepreneurial in their approach. These shifts have lead to a need for business professionals to regularly make decisions outside of their functional areas of operation, to be better problem solvers and decisions makers who understand how their actions impact the entire organization and the competitive landscape. The Rider MBA program provides advanced preparation for successful participation in a rapidly changing world. Students are exposed to real-world situations that encourage them to question and analyze.

Student Learning Outcomes

The learning outcomes and competencies below are the core of the Rider University Norm Brodsky College of Business MBA program. They provide the foundation for its curriculum and are designed to enhance student success, both throughout the program and post-graduation. There are three main focus areas: decision-making, leadership, and communication.

- # Decision-making - Make strategic decisions that are integrative.
- # Leadership - Manage organizational activities in a global environment.
- # Communication - Effectively communicate business information in the appropriate format.

Curriculum Overview

The Rider MBA classes include foundation, core and elective classes. Depending on the background of the individual student, completion of the degree will require between 36 and 51 credits. The MBA program is accredited by the AACSB International (<http://www.aacsb.edu/>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide

Classes are offered in the evening, Monday through Thursday, as well as in the online and hybrid formats. All prerequisite courses are offered during the fall, spring and summer semesters. Students can pursue the

MBA on a full or part-time basis. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well.

There are two electives in the MBA program which allows MBA students to customize their degree to suit their needs. By adding a third elective, MBA students may choose to concentrate in a particular area of interest. See the "[Concentrations \(p. 811\)](#)" section provided in this catalog to learn more about the concentrations that are available. The other approach to electives is to select two classes that enhance the student's knowledge in selected topics.

(36 credits)

Course Requirements

The MBA Program requires a core of 30 credit hours of Breadth course requirements and 6 credit hours of elective courses. Students may also be required to take up to an additional 15 credit hours of Foundation requirements based on their educational and work experience. A student must complete between 36 and 51 semester hours for the MBA, depending on the number of Foundation courses that are waived. To enrich the MBA degree, students may take electives in the areas of finance, information systems, business analytics, forensic accounting and sport management.

The Master of Business Administration (MBA) – Waiver of Courses

A waiver of a course from foundation requirements may be granted under the following conditions:

I) *PMBA foundation class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA foundation class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA foundation class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

If a student is granted a waiver for any foundation requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

MBA Breadth Course Waivers

It is possible for students to substitute an elective for an MBA Breadth course in the following situations, so as not to duplicate course work that may have been done as undergraduates:

- Students who graduated in the last five years as marketing majors and had at least a 3.0 in their marketing courses will not need to take PMBA 8260 Mkt Analysis & Decision Making. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years as accounting majors who graduated with at least a 3.0 in their accounting courses, will not need to take PMBA 8220 Strategic Accounting for Manager. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years with an undergraduate degree in Information Systems/Technology, Computer Science or Electrical Engineering with at least a 3.0 GPA in their major area courses and have at least five years professional experience in IS/IT and strategy, OR for students with a graduate degree in Information Systems/Technology, Computer Science or Electrical Engineering and over five years professional experience in IS/IT and strategy will not need to take PMBA 8210 Information Technology Management. In its place, students must take an elective from either the MBA or MAcc program.
- Students who graduated in the last five years as supply chain majors and had at least a 3.0 in their supply chain courses will not need to take PMBA 8250 Operations & Supply Chain Management. In its place, students must take an additional elective from the MBA or MAcc programs.

Course Descriptions**PMBA 8000 Executive Communications 3 Credits**

Professionals spend about seventy percent (70%) of their work-time communicating with other people. It is therefore no surprise that, without good communication skills, it is impossible to succeed in one's workplace. Yet, effective communication skills do not come naturally for most people. This course aims to prepare you to speak compellingly, write clearly and concisely, listen actively and critically, and persuade others by constructing sound arguments. To that end, we will learn the key aspects of communication: audience analysis, communicator credibility, message construction, and delivery. Deliverables will include written documents and oral presentations, as well as both individual and team presentations. Importantly, in doing so, you will enhance your leadership potential in your workplace by motivating your colleagues, team, and organization to work toward important goals.

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): PMBA 8020.

PMBA 8230 Managerial Economics 3 Credits

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8020.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of PMBA 8051 and 8052.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): PMBA 8060.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): PMBA 8070.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8303 International Business Study Tour 3 Credits

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8319 Selected Topics in CIS 3 Credits

The study of a topic (or combination of topics) that represents some dimensions of computer information systems or has important and direct implications for CIS management. Topics recently covered include project management, data mining and data privacy. Theoretical foundations as well as applications may be explored. Readings, research, lectures, projects, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8321 Managerial Taxation and Strategy 3 Credits

This course is designed for students who are embarking on (or already in) careers in investment banking, corporate finance, strategy consulting, money management, or venture capital. The focus of the course comes from integrating the tax law with the fundamentals of corporate finance and microeconomics.

Prerequisite(s): PMBA 8020.

PMBA 8324 Financial Accounting & Report 3 Credits

Focus is on analysis and evaluation of alternative accounting methods and the relationship to company policy. Insight is gained through the reading of articles in leading accounting and financial periodicals and Internet research. Cases demonstrating financial reporting methods are assigned and discussed in class. Term project required. Topics include financial instruments, earnings per share, deferred taxes, post-retirement benefits and the accounting rule-making process.

Prerequisite(s): PMBA 8020 and PMBA 8040.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management.

Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8346 Financial Modeling 3 Credits

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8347 Portfolio Management 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8348 Fixed Income Securities and Alternative Investments 3 Credits

This is an introductory course in fixed income securities and alternative investments. The first part of the course covers the markets for fixed income securities and their derivatives. Valuation of these securities and determination of the risk inherent in these securities are discussed. Methods for managing that risk, such as hedging and credit derivatives, are also discussed. The second part of the course covers a variety of alternative investments, including real estate funds, venture capital, hedge funds, and commodities. Valuation of these investments and determination of their risk are discussed.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8349 Personal Financial Planning 3 Credits

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8365 International Marketing Management 3 Credits

Examination of the nature and scope of global marketing activities, including the theoretical framework of international marketing, foreign marketing environments, multinational markets, MNC information systems, strategic marketing decisions, and organization for transnational marketing. This course applies to the Global Business concentration.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8369 Selected Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision-making may be explored. Readings, research, lectures, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8371 Human Resource Management 3 Credits

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

Prerequisite(s): PMBA 8070.

PMBA 8372 Management Skills 3 Credits

This is a practicum in interpersonal skills that are useful for practicing managers. Topics include motivating oneself and others, persuasive communication, creative problem-solving, managing conflict, using power constructively, managing change, and team management. Students are given opportunities to practice these skills in class and are asked to apply them to their current lives and report on the results of their applications. The course will provide students with a better understanding of the art of managing and of themselves as current or future managers.

Prerequisite(s): PMBA 8070.

PMBA 8375 International Management 3 Credits

This course focuses on the complexities of working and managing in a global business environment. Emphasis is placed on cross-cultural awareness, international communication, and negotiations. Students will explore the effect of culture on organizational behavior, managerial decision making, and global leadership.

Prerequisite: PMBA 8070.

PMBA 8380 Business Analytics Optimization 3 Credits

This course has been designed to provide professional MBA students with the current knowledge and practice of optimization business analysts use. Optimization aims at selecting the best alternative from among available alternatives according to a predetermined objective. In general it involves building a mathematical model and finding the best alternative through a mathematical procedure. Optimization techniques help decision-makers make fact (i.e. data) based decisions and offer the potential of making significant profits or cost savings. The main focus of this course will be on developing modeling skills to gain insight into a wide variety of business decision problems. In other words, the emphasis in this course will be on modeling practical business decision problems, use of relevant software for optimal solution, interpretation of results, and sensitivity analysis rather than the theory of mathematical solution techniques. Coverage of course material will follow the typical sequence of (1) identification and discussion of a business decision problem; (2) developing a graphical model (e.g. influence diagram); (3) developing a mathematical model; (4) computer solution; (5) interpretation of results and sensitivity analysis; (6) discussion of insights gained from the experience; (7) discussion of implementation issues. In addition, heuristics will be discussed when optimization techniques are not available or too costly.

Prerequisites: PMBA 8010 and PMBA 8051.

PMBA 8383 Entrepreneurship 3 Credits

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8384 Consulting for New and Small Ventures 3 Credits

This course provides experience-based learning to students through the use of student teams to assist area small businesses/organizations. These small firms could have a variety of needs ranging from market research, improving financial reporting and bookkeeping, business planning, streamlining operational procedures, etc. This course will provide students the opportunity to experience in-depth analysis of an individual organization. The emphasis is on student consultants generating immediate, actionable recommendations for the client. Thus, this course is useful not only for those considering small business ownership, but provides an opportunity to students to learn entrepreneurial thinking.

Prerequisite(s): Completion of MBA pre-program courses and permission of instructor.

PMBA 8385 New Venture Launch 3 Credits

Students will start and run a new venture while under the supervision and guidance of faculty. Students will take a business plan they have developed and execute it. This is an opportunity to experience the launch process and learn hands-on how to adapt to the marketplace. Some businesses started in this class may also be eligible to receive venture funding from Rider.

PMBA 8386 Green Entrepreneurship 3 Credits

This course is both a traditionally academic graduate course and a practical, case study based, business development course. Lectures will present the scientific, technical, financial, and business underpinnings required to understand the rationale for and the range of solutions possible that businesses can utilize when initiating or developing sustainable practices or new entrepreneurs can consider as they develop new businesses. Students will be learning about real business examples and discussing how the technical aspects of sustainability interact with the more practical and immediate demands of running a business – making a profit and maintaining positive cash flow while acting ethically.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8491 Business Law 3 Credits

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement.

Prerequisite(s): BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

PMBA 8880 Strategic Management 3 Credits

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

Prerequisite(s): All other MBA breadth courses.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study.

Prerequisite(s): Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be done at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and during the semester he/she receives credit for the internship is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

PMBA 8906 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8907 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8908 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8909 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

Master of Science in Corporate Finance

Note: The MS in Corporate Finance is not taking new students into the program for the current academic year.

Program Overview

Rider's Master of Science in Corporate Finance is designed to prepare students for a leadership role in managerial finance in a corporate setting. Our program capitalizes on the strengths of Rider's AACSB-accredited Accounting program and nationally-ranked Finance program, allowing students to develop and practice skills that can lead to success in the corporate environment. Our distinctive managerial and accounting emphasis will put students on track to become a CFO. Through this

program, students will become adept at synthesizing financial and accounting data, and using modeling to recommend financial strategies that impact high-level business decisions.

Student Learning Outcomes

The learning outcomes and competencies below are the core of the Rider University Norm Brodsky College of Business MS in Corporate Finance program. They provide the foundation for its curriculum and are designed to enhance student success, both throughout the program and post-graduation.

- **Applying Technical Knowledge** - Synthesize financial information (data) to perform appropriate tasks reflective of various influences among enterprises;
- **Decision-making** - Make strategic decisions that are integrative;
- **Leadership** - Manage organizational activities in a global environment;
- **Communication** - Effectively communicate business information in the appropriate format.

Curriculum Overview

The MS in Corporate Finance curriculum includes foundation and core classes. Depending on the background of the individual student, completion of the degree may require between 30-40.5 credits.

Rider's Norm Brodsky College of Business is accredited by the AACSB International (<http://www.aacsb.edu/>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide

Classes for the program are offered in the evening, Monday through Thursday, with some courses offered online. Students may enter the program in the fall, spring or summer semester and can elect to pursue the MS in Corporate Finance on a full or part-time basis. Students who would like to complete the program within a year must start in the fall. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well.

Master of Science in Corporate Finance Program Requirements

(30 credits)

The Master of Science in Corporate Finance program consists of 30 semester hours at the graduate level. The courses in the program provide a depth of knowledge and skills in three main areas: managerial accounting and financial statement analysis, corporate finance, and investments, and legal/ethical aspects of management.

Program Requirements (p. 831)

Foundation Requirements (p. 831)

Core Course Waiver (p. 831)

Program Requirements

Code	Title	Credits
PMBA 8220	Strategic Accounting for Manager	3
PMBA 8240	Applied Corporate Finance	3
PMBA 8290	Legal and Ethical Aspects of Management	3
PMBA 8324	Financial Accounting & Report	3
PMBA 8325	Enterprise Risk Management	3
PMBA 8343	Investment Instruments and Strategies	3
PMBA 8345	International Financial Management	3
PMBA 8346	Financial Modeling	3
MAcc 652	Analysis of Accounting Data	3
Elective ¹		3
Total Credits		30

¹ Elective may be selected from any MAcc or PMBA course (except for PMBA 80xx prerequisites) for which the student has satisfied the prerequisite.

Foundation Requirements

Students may also be required to take an additional 10.5 credit hours of foundation requirements based on their educational and professional experience. Waiver of these courses follows the guidelines defined under the Waiver of Courses section.

Code	Title	Credits
Required Courses:		
PMBA 8020	Fundamentals of Accounting	3
PMBA 8030	Economic Analysis	3
PMBA 8040	Basic Financial Principles	1.5
PMBA 8051	Fundamentals of Statistical Analysis	3
Total Credits		10.5

MS in Corporate Finance –Waiver of Courses

A waiver of a course from foundation requirements may be granted under the following conditions:

I) *PMBA foundation class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA foundation class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.

- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA foundation class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

If a student is granted a waiver for any foundation requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation for advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

Core Course Waivers

Students with undergraduate coursework in accounting may be able to substitute electives for PMBA 8220 (<http://catalog.rider.edu/search/?P=PMBA%208220>) and PMBA 8324 (<http://catalog.rider.edu/search/?P=PMBA%208324>) in the following situations so as not to duplicate course work content:

1. Students who took the equivalent ACC 302 (<http://catalog.rider.edu/search/?P=ACC%20302>) Cost Management and meet the waiver guidelines list above with a B or better, may waive PMBA 8220 (<http://catalog.rider.edu/search/?P=PMBA%208220>) Strategic Accounting for Manager and replace it with a PMBA or MAcc elective.
2. Students who took the equivalent ACC 310 (<http://catalog.rider.edu/search/?P=ACC%20310>) Acct Theory & Concepts I AND ACC 311 (<http://catalog.rider.edu/search/?P=ACC%20311>) Acct Theory & Concepts II and meet the waiver guidelines list above with a B or better, may waive PMBA 8324 (<http://catalog.rider.edu/search/?P=PMBA%208324>) Financial Accounting & Report and replace it with a PMBA or MAcc elective.

Courses and Descriptions

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): PMBA 8020.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8020.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8324 Financial Accounting & Report 3 Credits

Focus is on analysis and evaluation of alternative accounting methods and the relationship to company policy. Insight is gained through the reading of articles in leading accounting and financial periodicals and Internet research. Cases demonstrating financial reporting methods are assigned and discussed in class. Term project required. Topics include financial instruments, earnings per share, deferred taxes, post-retirement benefits and the accounting rule-making process.

Prerequisite(s): PMBA 8020 and PMBA 8040.

PMBA 8325 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisites: ACC 302 or ACC 302P or PMBA 8220.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8346 Financial Modeling 3 Credits

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures.

Prerequisite(s): Completion of PMBA 8040.

MACC 652 Analysis of Accounting Data 3 Credits

This course uses information technology and data analytical techniques to conduct analysis needs commonly faced by accounting professionals. The course uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics.

Prerequisite(s): completion of Preliminary Accounting requirements.

Master of Science in Information Systems

Program Overview

The Information Technology (IT) job market continues its rapid growth as the lower cost of developing applications and expanding user platforms creates additional demands for qualified IT employees. The Master of Science in Information Systems is a STEM designated degree designed for early to mid-career professionals who aspire to become CTO's / CIO's or rise to other senior management roles in career tracks that have a significant technological component. Such career advancements are possible through multiple pathways because of the role of technology in every aspect of an organization's functioning. This program helps students to develop the knowledge and skills needed to evaluate IS for a business organization and develop and implement the appropriate IT strategies, all while attending to the the ethical and legal implications of data and technology-related issues. The program also provides students with practical experience to develop their professional communication skills and ability to work with others in diverse environments to solve IT problems.

Curriculum Overview

The Rider MS in Information Systems curriculum includes prerequisite, core and elective classes. Depending on the background of the individual student, completion of the degree may require between 30-36 credits. Rider's Norm Brodsky College of Business is accredited by the AACSB International (<http://www.aacsb.edu/>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide

Classes for the program are offered in the evening, Monday through Thursday, with some courses offered online. Students may enter the program in the fall, spring or summer semesters and can elected to pursue the MS in Information Systems on a full or part-time basis. Students who would like to complete the program within a year must start in the fall or spring. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well.

MS in Information Systems –Waiver of Foundation Courses

A waiver of a course from foundation requirements may be granted under the following conditions:

I) *PMBA foundation class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA foundation class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA foundation class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

If a student is granted a waiver for any foundation requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

Courses and Descriptions

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of PMBA 8051 and 8052.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): PMBA 8060.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): PMBA 8070.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8311 Information Security for the Enterprise 3 Credits

This course will teach students how businesses can implement security policies which will protect their significant investment in computer systems. The course topics include but are not limited to security attacks, attack prevention and mediation and security audits. Security devices, firewalls, PC and server security, authentication methods and procedures, and network security will all be discussed. The course will be delivered through a combination of hands-on labs where students will evaluate and implement computer security on computers, and class lectures.

Prerequisite(s): PMBA 8210.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8315 Globalization and Technology 3 Credits

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8316 Application Development for the Web 3 Credits

This class will examine application development for the Web platform in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications and the skills needed to develop applications using that architecture. Specific skills learned include programming with the JavaScript programming language, creating Web pages using the HyperText Markup Language (HTML) and Cascading Style Sheets (CSS). Other skills learned in this course include how to create user-friendly user interfaces, and how to retrieve and update information stored on computer servers.

Prerequisite(s): PMBA 8210.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8318 Business Analysis and Design 3 Credits

This course will integrate the skills of business analysis with those of system design. Students will learn a dynamic visioning/planning process which will guide the development of a technology architecture model for the business enterprise. Students will learn requirements elicitation techniques and use cases. Design methods such as object modeling and prototyping and data modeling with enterprise relationship diagrams will also be covered.

Prerequisite(s): PMBA 8210.

PMBA 8351 Introduction to Business Analytics 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis.

Prerequisite(s): PMBA 8051.

PMBA 8352 Design Thinking and Innovation 3 Credits

This graduate course on Design Thinking and Innovation provides students with a framework for dealing with unstructured problems, and for managing the innovation process. This course introduces students to design thinking as a systematic approach to innovation, but also guide students through the process to identify and translate broadly defined opportunities into actionable innovation possibilities. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

Prerequisite(s): PMBA 8210.

PMBA 8353 Digital Futures 3 Credits

This course is a holistic course drawing on all areas of Information Technology. It leverages the in-depth understanding of Technology that MSIS students possess and transforms such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. It will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future. Case studies and readings will familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology/innovation. Students will be engaged in a discussion of multi-firm cases of strategic innovation and will examine policy decisions by the firm and various ethical dilemmas engendered by technological changes of the last four decades.

Prerequisites: PMBA 8210.

PMBA 8355 Visual Analytics 3 Credits

This graduate course will equip the students with the fundamental skills to perform visual analytics with Tableau. Specifically, students will learn how to prepare a dataset for visual analysis, and how to "tell a good story" using basic and advanced visualizations. At the completion of this course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience. Students who have earned credits for BDA 205 or equivalent cannot take PMBA 8355 for credit.

Prerequisite(s): PMBA 8351.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

Online Master of Accountancy (OL MAcc)

Program Overview

The Online Master of Accountancy (MAcc) is designed for working professionals with a background in accounting who seek advanced credentials and education for CPA or other professional licensures but want the flexibility and convenience of a totally online program. The Online Macc program offers the same course work as the in-person MAcc program, with which it shares the prestigious AACSB Accounting accreditation, the international standard of excellence in accounting and business education. The accounting faculty who teach in the program publish research in top accounting publications and are actively involved in the professional community. Students in the Online MAcc may not take in-person classes on the Rider campus.

Curriculum Overview

The Online MAcc program enhances the knowledge and skills required of accounting professionals while meeting the educational requirements for CPA licensure.

Acceptance into the online program assumes that students have mastered the basic foundation of accounting and business courses at

the undergraduate level. Students who do not have this background will need to complete the prerequisite courses before beginning the core of the MAcc program. The core of the MAcc is comprised of seven required courses which cover relevant topics and skills needed to be successful in the field of accounting. Those skills and knowledge include oral and written communication skills, ability to do in-depth research, knowledge of data analytics and the manipulation of accounting data. The MAcc also requires the completion of three electives, which include the courses for a concentration in forensic accounting, finance, information systems, sport management or business analytics. See the "Concentration (p. 811)" section provided in this catalog. There is a required online orientation before a student can begin in the program.

Course work and connections with fellow students and faculty are facilitated through our user friendly technology platform. Students also have access to the MAcc resource center including webinars from leading accounting professionals on matters in the profession and CPA licensure.

Total Credits		30

Foundation Requirements

MAcc students who hold an undergraduate degree in an area other than business will need to complete the Business Foundation Requirements and Accounting Foundation Requirements before taking upper level Accounting Courses.

MAcc students who hold an undergraduate business degree in an area other than accounting may be eligible to waive the Business Foundation Requirements but must complete the Accounting Foundation Requirements before taking upper level Accounting Courses.

MAcc students who hold an undergraduate degree in accounting may be eligible to waive the Business Foundation Requirements and the Accounting Foundation Requirements.

Waiver of these courses follows the guidelines defined under the Waiver of Courses section.

Business Foundation Requirements

7.5 credits (for students with a non-business undergraduate degree or outdated course work that does not meet the waiver requirements).

Code	Title	Credits
PMBA 8020	Fundamentals of Accounting	3
PMBA 8030	Economic Analysis	3
PMBA 8040	Basic Financial Principles	1.5
Total Credits		7.5

Accounting Foundation Requirements

18 credits (for non-accounting business undergraduate degree or outdated course work that does not meet the waiver requirements)

Code	Title	Credits

MAcc and Online MAcc–Waiver of Courses

A waiver of a course from business foundation requirements may be granted under the following conditions:

I) *PMBA foundation class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA foundation class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.

- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA foundation class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

Waivers of courses for the "Accounting Foundation Requirements" may be granted as outlined in conditions I, if the student receives a "C" or better for these courses. There are no waiver examinations for the "Accounting Foundation Requirements" for the MAcc program. When the MAcc "Foundation Requirements" are waived, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

MACC 611 Professional Research and Communication 3 Credits

Effective communication and interpersonal skills are key for success in the accounting profession. This course is an interactive seminar designed to provide a strong foundation in professional research and to develop communication and interpersonal skills with an emphasis on the communication and interpersonal challenges that accountants commonly face. Course work is primarily base based and includes a wide variety of video and written assignments that require research to develop accounting services and present to guest professionals and the "client".
Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 650 Seminar in Federal Taxes 3 Credits

The course examines tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts. Topics include tax issues involved in the decision to select a particular form of business organization, fundamental concepts of interstate, international, and New Jersey taxation, and to expose the student to a variety of common tax returns, applicable to the above topics.

Prerequisite(s): completion of ACC 410 or ACC 410P.

MACC 652 Analysis of Accounting Data 3 Credits

This course uses information technology and data analytical techniques to conduct analysis needs commonly faced by accounting professionals. The course uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 654 Issues in Financial Reporting 3 Credits

This course uses the conceptual framework to examine standards for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 662 Auditing Practice & Problems 3 Credits

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

Prerequisite(s): ACC 400 or ACC 400P.

MACC 663 Fraud and Forensic Accounting 3 Credits

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 664 Issues in Managerial Accounting 3 Credits

This course examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

Prerequisite(s): completion of ACC 302, ACC 302P or PMBA 8220.

MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8040 and PMBA 8020 or the Preliminary Accounting Requirements.

Prerequisites: PMBA 8040 or VL12 with a score of WV AND PMBA 8020 or VL10 with a score of WV OR VL25 with a score of WV OR VL26 with a score of WV.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions.

This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8491 Business Law 3 Credits

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement.

Prerequisite(s): BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

Online Master of Business Administration

Program Overview

The Rider Online MBA program is designed to offer flexibility, convenience, and value to students preparing for advanced careers as decision makers in a rapidly changing world. Students are provided with a broad understanding of overall business concepts and operations, moving from a "one-dimensional" focus to one that mirrors the complexity of today's business enterprise. By utilizing the case study approach to analyze real-world situations, students are encouraged to question, apply business knowledge and develop informed decisions.

This program is accredited by the AACSB International (<http://www.aacsb.edu/>) (Association for the Advancement of Collegiate Schools of Business), a distinction held by fewer than 4% of business programs worldwide.

Student Learning Outcomes

The learning outcomes and competencies below are the core of the Rider University Norm Brodsky College of Business MBA program. They provide the foundation for its curriculum and are designed to enhance student success, both throughout the program and post-graduation.

There are three main focus areas: decision-making, leadership, and communication.

Decision-making - Make strategic decisions that are integrative.

Leadership - Manage organizational activities in a global environment.

Communication - Effectively communicate business information in the appropriate format.

Curriculum Overview

Rider's Online MBA classes include foundation, breadth and elective classes that provide the same knowledge and experience as in-person MBA courses. Students within the Online MBA program are not eligible to take in-person classes on the Rider campus. Depending on the background of the individual student, selected foundation courses may be waived, leaving students with between 36 and 54 credits to complete the degree. With six start dates (two in fall, two in spring and two in summer), students may complete the MBA on a part-time basis in as few as 24 months. Courses are taught in small sections, usually by full-time faculty holding doctoral degrees. Faculty are engaged in research in their fields and have business experience as well. There is a required online orientation before a student can begin in the program.

To enrich the MBA degree, students may take electives in the areas of finance, information systems, sport management and business analytics. See the "[Concentrations \(p. 811\)](#)" section provided in this catalog.

The Master of Business Administration (MBA) – Waiver of Courses

Waiver of Foundation Courses

A waiver of a course from foundation requirements may be granted under the following conditions:

1) *PMBA foundation class is waived based on previous undergraduate coursework if:*

- Student took the equivalent course less than six years ago and received a grade of B or above.
- Student took the equivalent course more than six years ago and received a grade of B or above and utilizes the knowledge in their

professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

II) *PMBA foundation class is waived upon the proficiency assessment or successful completion of a review short-course if:*

- Student took the equivalent course less than six years ago and received a grade of B- or C+.
- Student took the equivalent course more than six years ago and received a grade of B or better.
- Student took the equivalent course more than six years ago and received a grade of B- or C+ and utilizes that specific knowledge in their professional position on a regular basis, as determined by the Associate Dean for Graduate Programs.

III) *PMBA foundation class must be taken if:*

- Student has never taken the undergraduate equivalent class.
- Student received below a C+ in the class, regardless of when it was taken.

In all cases, the comparable undergraduate courses must have been taken from an accredited school.

If a student is granted a waiver for any foundation requirements, the student is responsible for a satisfactory level of competency with the representative material. If necessary, the student should review and/or seek tutoring support for the waived material in preparation of advanced courses. Any appeal of a waiver decision based on previous course work must be made to the Associate Dean for Graduate Programs within the first semester of the program.

MBA Breadth Course Waivers

It is possible for students to substitute an elective for an MBA Breadth course in the following situations, so as not to duplicate course work that may have been done as undergraduates:

- Students who graduated in the last five years as marketing majors and had at least a 3.0 in their marketing courses will not need to take PMBA 8260. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years as accounting majors with at least a 3.0 in their accounting courses will not need to take PMBA 8220. In its place, students must take an additional elective from the MBA or MAcc programs.
- Students who graduated in the last five years with an undergraduate degree in Information Systems/Technology, Computer Science or Electrical Engineering with at least a 3.0 GPA in their major area courses and have at least five years professional experience in IS/IT and strategy, OR for students with a graduate degree in Information Systems/Technology, Computer Science or Electrical Engineering and over five years professional experience in IS/IT and strategy, will not need to take PMBA 8210. In its place, students must take an elective from either the MBA or MAcc program.

Courses and Descriptions

PMBA 8000 Executive Communications 3 Credits

Professionals spend about seventy percent (70%) of their work-time communicating with other people. It is therefore no surprise that, without good communication skills, it is impossible to succeed in one's workplace. Yet, effective communication skills do not come naturally for most people. This course aims to prepare you to speak compellingly, write clearly and concisely, listen actively and critically, and persuade others by constructing sound arguments. To that end, we will learn the key aspects of communication: audience analysis, communicator credibility, message construction, and delivery. Deliverables will include written documents and oral presentations, as well as both individual and team presentations. Importantly, in doing so, you will enhance your leadership potential in your workplace by motivating your colleagues, team, and organization to work toward important goals.

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): PMBA 8020.

PMBA 8230 Managerial Economics 3 Credits

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8020.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of PMBA 8051 and 8052.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): PMBA 8060.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): PMBA 8070.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8303 International Business Study Tour 3 Credits

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8325 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisite(s): ACC 302 or ACC 302P or PMBA 8220.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8349 Personal Financial Planning 3 Credits

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8371 Human Resource Management 3 Credits

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

Prerequisite(s): PMBA 8070.

PMBA 8383 Entrepreneurship 3 Credits

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8492 Ethical Issues in International Business 3 Credits

This course is an introduction to identifying, analyzing and resolving ethical dilemmas in both U.S. and international business, including reference to legal and regulatory issues. The course begins with a general introduction to ethics, considers ethical issues connected with the economic, legal and regulatory systems within which modern business takes place and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues, including cases resulting in civil and criminal litigation. The primary focus of this course will be ethics in the international business environment. Most of the readings and discussion board topics, the group case studies and the individual research paper will have an international focus.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8880 Strategic Management 3 Credits

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

Prerequisite(s): All other MBA breadth courses.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study. Prerequisite(s): Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be done at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and during the semester he/she receives credit for the internship is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

Sport Management Graduate Certificate

Overview

Rider's Sport Management Graduate Certificate program is designed to provide its students with an edge to enter into, or enhance their current business careers, in the continually growing sports industry, deemed one of the most challenging industries to break into. The curriculum develops students' breadth of knowledge on sport management business ideologies, as well as their ability to apply these concepts to the sport business industry to become effective leaders and decision makers in this unique field.

Situated in Central New Jersey, Rider University is uniquely positioned between two of the largest sports cities in the U.S., New York and Philadelphia, and in a state with numerous sports leagues, associations and businesses. This proximity allows Rider's Sport Management program to build relationships with sports industry employers that benefit Rider students in the classroom and in the job market.

Current MBA and MAcc students can earn the Sport Management Certificate, while pursuing their graduate degree, with minimal additional courses.

Program Requirements

1. Communication skills with a particular emphasis on sport management concepts and modes of operation;
2. Information literacy, which includes the research and collection of information, evaluating its quality and synthesizing it for effective use within the organization;
3. Analytical and critical thinking including identifying issues occurring in the sport industry and organizations, applying quantitative or qualitative problem-solving tools, drawing logical conclusions through critical analysis, and making strategic decisions for the organization.
4. Ethics and social responsibility, which includes the ability to identify and evaluate ethical and social responsibility issues within the sport industry and organizations and understand their impact on decisions within a diverse personal and professional setting.

Certificate Awarded

- Graduate Certificate in Sport Management

Sport Management Graduate Certificate Requirements

(12 credits)

Core Curriculum

Code	Title	Credits
Complete the following courses:		
PMBA 8402	The Business of Sports	3
PMBA 8403	Sport Analytics ¹	3
PMBA 8404	Sports Marketing	3
PMBA 8405	Legal and Ethical Issues in Sports	3
With permission of the Associate Dean for Graduate Programs, students may replace one of the courses listed above with one of the following options:		
PMBA 8902	Independent Studies in Business Administration	
PMBA 8905	Internship	
Total Credits		12

¹ PMBA 8051 - Fundamentals of Statistics is a prerequisite for this course. It may be waived with previous coursework. Check with the Graduate Academic Coordinator.

Certificate Completion

To complete the BA Certificate Program, students must meet the following requirements:

- Overall GPA of 3.0 in the Business Analytics Certificate Program;
- Cannot have any grades below at "C".

Courses and Descriptions

PMBA 8402 The Business of Sports 3 Credits

This course examines diverse managerial issues involving the sports industry. The course covers topics at the league level, the team level, the athlete-agent level, and the college level. The constituencies with interests in sports issues such as athletes, fans, media, companies, advertisers, and legislators are discussed along with global aspects of sports enterprises. Valuation issues related to sports teams are also covered. The course is designed to integrate all aspects of businesses as they apply to sports with an emphasis on strategy, management, marketing, and finance.

PMBA 8403 Sport Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of hands-on labs, a data project, a research project, quizzes, and online discussions. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports. This course assumes a basic level of skill working with Microsoft Excel.

Prerequisite(s): PMBA 8051 or waiver.

PMBA 8404 Sports Marketing 3 Credits

This course explores the complex and diverse nature of sports marketing. It applies fundamental marketing concepts to the sports industry, including the marketing mix, consumer behavior, marketing research, segmentation analysis, and assessment of marketing programs specific to sports. Guidelines for the formulation of marketing plans and strategies will be included. Trends, issues, and problems influencing the industry will also be examined. Discussions cover professional, collegiate, non-profit, and other areas of the sport industry.

PMBA 8405 Legal and Ethical Issues in Sports 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues which will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study. Prerequisite(s): Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be done at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and during the semester he/she receives credit for the internship is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

Graduate Program Policies

Academic Integrity (p. 845)

Admission Classifications (p. 845)

Admission Requirements (p. 844)

Advising (p. 845)

Course Repeat Policy (p. 845)

Dismissal (p. 845)

Graduation Requirements and Application (p. 846)

Honors Graduates (p. 846)

Transfer of Courses (p. 845)

Undergraduate Students Taking Graduate Business Courses (p. 846)

Admission Requirements

No decision is made on an application for admission to the graduate programs of business administration until all required documents have been submitted. These include a completed application form, the \$50 application fee, official notification by GMAC as to the score achieved on the Graduate Management Admissions Test (GMAT), your resume, statement of aims and objectives, and an official transcript from every institution of higher learning attended. To be admitted to the programs, an applicant must show evidence that he or she has earned a bachelor's degree or equivalent from an accredited institution of higher learning and has the potential to perform satisfactorily at the graduate level. The primary criteria used in making admission decisions are the undergraduate grade point average, the score achieved on the GMAT (unless waived), professional experience, and graduate level GPA (if applicable). The Graduate Record Examination (GRE) is acceptable as an admissions examination in place of the GMAT.

International Applicants

International students are required to present evidence of completion of a university degree equivalent to, or higher than, a bachelor's degree in the United States. A program equivalency evaluation by a recognized evaluation service is required. World Education Services (<http://www.wes.org/>) in New York City is suggested for this service. International applicants must also provide a notarized financial resource statement or notarized bank statement demonstrating their ability to pay the total cost of program attendance at Rider.

GMAT/GRE Waiver Guidelines

MBA / Online MBA Applicants

MBA / MBA Online applicants who meet the one of the following criteria established by the Norm Brodsky College of Business would qualify for a waiver for the GMAT/GRE:

1. Applicant has graduated from a regionally accredited undergraduate program with a bachelor's degree AND has one of the following:
 - a. A minimum cumulative undergraduate GPA of 3.0.
 - b. 5 or more years of professional experience (reviewed on a case-by-case basis)
2. Applicant has earned a graduate degree from a regionally accredited program.
3. Applicant has passed a business-related, professional certifying exam, such as the CPA, CFA, CMA, etc (reviewed on a case-by-case basis).

MAcc / Online MAcc Applicants

MAcc/ MAcc Online applicants are not required to provide a GMAT or GRE score with their application.

MS in Information Systems Applicants

MS in Information Systems applicants who meet the one of the following criteria established by the Norm Brodsky College of Business would qualify for a waiver for the GMAT/GRE:

1. Applicant has a BA/BS degree from a regionally accredited undergraduate program and has earned an overall GPA of 3.3 or better.
2. Applicant has 3 years professional experience in an IS field and earned a BS/BA degree from a regionally accredited undergraduate institution with an overall GPA of 3.0 or better.

3. Applicant has an undergraduate degree from a regionally accredited institution AND a graduate degree (MBA, Ph.D. or other appropriate terminal degree) from a regionally accredited graduate program.

- graduated with an undergraduate degree from an accredited university with a minimum 3.0 GPA OR has earned a graduate degree
- meets prerequisite requirements for desired course(s).

Executive MBA Admission Requirements

To qualify for the program, you must demonstrate the following:

Academic Background

- Bachelor's degree from an accredited university;
- Minimum 3.0 GPA (if the student's GPA is less than 3.0, the GMAT may be required.)

Business-Related Background

- Full-time employment;
- Minimum five years of work experience;
- Three years managerial/supervisory experience;
- Two work-related recommendations (employer or another business-related source.)

Interview

- Students will also have a personal interview with the EMBA Program Director to assess their academic and professional qualifications and readiness for the program.

Non-degree students will only be allowed to take 6 credits in the graduate business program. If a non-degree student desires to take more than 6 credits in the graduate business program, he/she will need to fully apply to the program.

Special

Special student status is granted to those students enrolled in a graduate program at another institution who have been granted permission to take graduate business courses at Rider.

Executive MBA students and graduate certificate program students are admitted as "full standing" only.

Transfer of Courses

A student may request the transfer of a graduate course taken at an AACSB-accredited institution. Such a request may be granted if the course was taken within the past three years, was passed with a grade of "B" or higher, and was taken before admission to the graduate program at Rider. Once a student has been admitted to the program, graduate courses taken at other AACSB-accredited institutions must have prior approval of the Associate Dean for Graduate Programs before transfer credit will be allowed. A maximum of six semester hours of transfer credit may be granted for application against the elective requirements. No academic credit will be granted for corporate-sponsored management or professional development courses.

As the EMBA program is cohort-based, the transfer of courses does not apply.

Advising

The Academic Coordinator of Graduate Programs is the advisor to students in all graduate business programs (except the EMBA) and tracks program progress. The Director of the Executive MBA Program is the advisor to the EMBA students. Students are also encouraged to contact members of the faculty and the program's executives-in-residence for career and related advising.

Note: The most significant policies and procedures for the graduate business programs are covered in this catalog. Questions and issues not addressed here default to other University-wide policy statements.

Course Repeat Policy

With the written permission of the Associate Dean for Graduate Programs, graduate business students may repeat graduate courses for which they received grades of "C+" or lower. Both grades will appear on the student's transcript, but only the second grade will count in the GPA.

Academic Integrity

Students are expected to conduct themselves professionally and with the highest standards of academic integrity. See Rider's Code of Academic Integrity (p. 1251) in this catalog for further information.

Dismissal

Rider University reserves the right to dismiss any student when, in the judgment of the faculty or officers of Rider, such action seems advisable.

Graduate Business Certificate Programs - Business Analytics, Forensic Accounting and Sport Management - Admission Requirements

An application for admission to the graduate certificate program of business administration is not reviewed for a decision until all required documents have been submitted. These include a completed application form, the \$50 application fee, your resume, and an official transcript from every institution of higher learning attended.

To be considered for admission into one of Rider's Graduate Certificate Programs, you must hold a minimum of a bachelor's degree or its equivalent from an accredited institution of higher learning with a GPA of 3.0 or better.

Admission Classifications

Each student admitted to the MBA, MS-IS or MAcc program is assigned to one of the following classifications:

Full Standing

Students who have full standing are permitted to register for any foundation courses that have not been waived or for certain breadth courses, if those courses are needed by the student.

Conditional Admission

Conditionally admitted students have been admitted into the graduate business program with specific conditions outlined for them to meet within the first 6 credits they take in the program. These conditions may include maintaining a certain GPA and taking specific courses within the program as part of those first 6 credits.

Conditionally admitted students must meet the foundation course requirements for the specific classes they take and may not take classes that could be waived if they were admitted to the program.

Non-Degree Students

Prospective students may take MBA classes as non-degree students under the following conditions:

A student in a graduate business program will be subject to dismissal based on academic standing for any of the following reasons:

- Receiving more than two grades of "C+" or below in graduate-level work;
- Completing graduate course work with a cumulative grade point average of less than 3.0; or,
- Failure to complete the MAcc, MBA, or MS-IS program in the required six years.

In all cases of dismissal, graduate business students have the right of appeal. Academic standing dismissal is a progressive process with student participation and advising designed to help students regain good academic standing. Students approaching the six-year time limit to complete a graduate business program may request a time limit extension prior to actual dismissal. The request should be based on unique work requirements, personal, or other reasons. Time limit appeals will be reviewed and acted on by the Associate Dean for Graduate Business Programs.

Honors Graduates

Students who graduate with an overall grade point average of 3.85 or better are designated as graduating with distinction. This term appears on the student's official transcript, below the student's name in the commencement program and on the diploma.

Graduation Requirements and Application

To graduate from the a graduate business degree or certificate program, students must have completed all of the course requirements as described above, within the six-year time frame, and have a cumulative Grade Point Average (GPA) of 3.0 or above. In addition, a candidate for graduation:

- Cannot have any grades below a "C", and cannot have received more than two grades of "C+" or "C" in graduate-level courses.

A student who expects to graduate with a graduate degree must complete and file a degree application form no later than the date indicated on the calendar for each semester, found at the front of this publication.

Undergraduate Students Taking Graduate Business Courses

Seniors enrolled in any business major can take one or two graduate business courses (PMBA or MAcc) in their senior spring (or equivalent) semester if the following conditions are met:

For taking an PMBA course:

- Students must have at least a 3.5 GPA;
- Students may take an elective or PMBA breadth course if all prerequisites have been met.

For taking a MAcc course:

- Students must have at least a 3.3 GPA or higher overall and in accounting courses;
- Students may take either MACC 654 or a MAcc elective, if all prerequisites have been met.

A graduate business course taken as an undergraduate can fulfill the requirements of only one program, either graduate or undergraduate.

There is no "double dipping" of coursework between graduate and undergraduate programs. Permission to take such courses will be granted by the Associate Dean for Graduate Business Programs based on a review of a student's academic record.

College of Education and Human Services

<http://www.rider.edu/cehs> (<http://www.rider.edu/cehs/>)

The College of Education and Human Services prepares students to be effective educators. Rider was the first private New Jersey institution to hold the highest accreditation possible in teaching from the National Council for the Accreditation of Teacher Education (NCATE) (<http://www.ncate.org/>), now known as the Council for the Accreditation of Educator Preparation (CAEP) (<http://catalog.rider.edu/graduate/colleges-schools/education/caepnet.org/accreditation/about-accreditation/what-is-accreditation/>)CAEP (<http://caepnet.org/>). This in turn offers graduates added value and recognition nationwide when seeking employment or admission to graduate study. The College has created partnerships with local schools, businesses, and government and community agencies so that students work collaboratively to develop high-quality programs. Professors value excellence in teaching, scholarship and service and serve as devoted advisors and mentors who relate well to each and every student.

Graduate Education, Leadership, and Counseling

The **Department of Graduate Education, Leadership, and Counseling** strives to provide quality programs with personal attention. Our full-time faculty, all of whom have doctoral degrees, teach the majority of our courses. The College of Education and Human Services is accredited by the Council for the Accreditation of Educator Preparation (CAEP (<http://caepnet.org/>)) and our Master's degrees in Counseling Services and Clinical Mental Health Counseling are accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP (<https://www.cacrep.org/>)). Other programs that have received national accreditation include School Psychology and Educational Leadership.

Classes are scheduled to enable those who work full-time to complete their programs. Class sizes are moderate to small, and many degree programs have internships.

The department offers educational specialist degrees, master's degrees, a doctoral degree, and certifications and endorsements in a variety of areas. These degree programs of study, their descriptions, and the certifications associated with them appear under programs and certificates (p. 855). Course descriptions for each program can be found in this catalog and on the Registrar's Office website. All programs require an application available from the Office of Graduate Admission (<https://www.rider.edu/admissions/graduate/>).

You may also apply as a special student in some programs. Students enrolled in graduate programs elsewhere or students seeking course work for professional development not leading to a degree, certification or endorsement from Rider University may take courses as a special student. Apply to the Office of Graduate Admission (<https://www.rider.edu/admissions/graduate/>).

Mission Statement

The College of Education of Education and Human Services:

- prepares undergraduate and graduate students for professions in education, health and wellness, organizations, and agencies in the diverse American society;
- fosters the intellectual, personal, and social development of each student for a changing world by creating and providing programs that embody the highest academic and professional standards;
- develops students who are committed, knowledgeable, professional, and reflective and who value service, ethical behavior and the improvement of one's self and profession; and
- promotes a climate of scholarly inquiry, high expectations for achievement, and best professional practices, while establishing beneficial relationships with the public and exchanging relevant ideas and services that speak to emerging needs.

College of Education and Human Services Conceptual Framework

Knowledgeable

The College of Education and Human Services emphasizes content and pedagogical knowledge, which candidates implement in supervised classroom and field experiences. Candidates use acquired technological expertise and reference relevant standards for planning and reflecting on their classroom work.

Professional

Novice and experienced educators enrolled in the College of Education and Human Services are on a career-long path toward professionalism that does not end with graduation. We encourage candidates to become thoughtful, creative problem-solvers.

Reflective

The College of Education and Human Services defines reflection as the process of thinking clearly and deliberately to promote understanding about professional practice. Reflection, grounded in active experience, has value for developing educators, through classroom observation, self-assessment, and journal writing.

Committed

Commitment, highly prized by the College of Education and Human Services, serves as an essential cornerstone for teaching and learning. Commitment is a set of connected attitudes, values, and beliefs that result in professional behaviors expected of dedicated educators.

Admission Status

Upon completion of the steps in the application procedures described below, the applicant will be assigned to one of the following classifications once admitted:

Graduate Standing

The student is qualified to undertake graduate study and is recognized as a degree or certification candidate upon admission;

Conditional Standing

Students who do not satisfy all of the admission requirements or have not completed all of the undergraduate preparatory requirements or both may be permitted to enroll in studies during a probationary period not exceeding twelve (12) graduate credits (six credits for the Master of Science in Nursing [M.S.N.]) with a minimum grade point average of 3.0. Students who fail to attain a 3.0 grade point average upon completion of up to twelve (12) credits (six for the M.S.N.) will be subject to dismissal.

Special Standing

This category of admissions applies to those students who may need only several courses, often for the purpose of obtaining certification. If special standing students apply for admission to a master's, educational specialist, or doctoral degree program and are accepted, they may apply for transfer of course credits toward that program according to policy guidelines of the Department.

Transfer of Credit

Upon application to and before admission to any graduate degree program in education, leadership, and counseling, students may request transfer of up to 12 semester hours of graduate credits completed at an accredited institution, or up to 30 graduate credits for the Clinical Mental Health Counseling program. These credits must have been earned within six years of the date of credit transfer approval. All transfer credits must be approved by the program director and the department chair. Courses accepted for transfer must be similar to required or elective courses that are approved for the respective programs, and a grade of at least "B" must have been earned in each of these courses.

Students who are eligible to transfer graduate credits from other institutions must submit official transcripts of these credits. The Department of Graduate Education, Leadership, and Counseling will consider specific written requests for appropriate transfer credits. Official transcripts covering courses submitted for transfer must accompany the written request for such transfer if the transcripts have not already been filed.

Transfer of Credit for Educational Specialist (Ed.S.) Students

The Department of Graduate Education, Leadership, and Counseling recognizes that students enrolled in an educational specialist program may enter after completing an appropriate master's program. Consideration is typically given to their prior graduate training and its application to the current degree. The program director/designee and the department chairperson will determine the number of credits to be transferred given the following guidelines.

Guidelines for Transfer of Credits for Ed.S. Students

- All transfer credits must carry a letter grade of at least "B."
- Transfer credits must be taken within the six years from the date of acceptance into the program. Exceptions may also be granted by the program director/designee for courses where content remains consistent over time and supports current program objectives.

- For students in the School Psychology Program up to 36 credits may be transferred so long as course equivalency can be thoroughly documented. Students in the Counseling Services Program may transfer up to 48 credits from a CACREP approved program. Students admitted from a non-CACREP approved program may transfer up to 36 credits.
- Official transcripts must accompany the request for transfer of credit. The program director/designee must approve the credits to be transferred upon admission.
- Credits approved for transfer will be added to the student's transcript at the time of admission to the program.
- Course descriptions and/or syllabi of the courses being requested for transfer may be required.

Course Repeat Policy

Students may not repeat any graduate course for credit that they have already taken, except a course in which they have received a grade lower than "B" or one from which they withdrew. Any exceptions must be approved by the program director and department chair.

Comprehensive Examination

Students who are pursuing a graduate program leading to the Master of Arts in counseling services, clinical mental health counseling, or to an Educational Specialist degree in school psychology must successfully pass a comprehensive examination covering knowledge of a specialized field; major concepts, theories and ideas; techniques for applying to a problem area knowledge of the specialized field and/or the related areas of foundations and research; adequate communication of ideas in light of the question(s) posed.

The date, location, and time of the Comprehensive Examination is determined by the appropriate program director. Only those students who have achieved the following requirements for the Master's or EdS degree are eligible to sit for this exam:

- A cumulative average of 3.0 or better by the time of application for the comprehensive exam.
- In the last semester of the program; or, may take the examination in the spring if only one course remains and will be taken in the summer. Permission of program director/designee is required.

Application for Comprehensive Examination and Graduation

A student who plans to take the comprehensive examination and graduate must fill out and file an Application for Comprehensive Examination and Graduation form on or before his or her final semester. This form must be filed with the chair of the Department of Graduate Education, Leadership, and Counseling.

Dismissal

Any one of the following situations will result in the automatic dismissal of a student working toward a graduate degree or certification program in the Department of Graduate Education, Leadership, and Counseling:

- Receiving two grades of "F" in graduate course work in either the same graduate course or in two different graduate courses;
- Receiving any grade of C (C+, C, or C-) or lower in more than two graduate courses (with the exception of the graduate nursing program where receiving more than two grades of C or lower in

nonclinical courses or B- or lower in concentration and practicum courses, or any combination thereof will result in dismissal);

- Not attaining a grade point average of 3.0 for the Master's degree and certificate programs or a grade point average of 3.3 for the Educational Specialist degree or the Ed.D. after taking twelve or more graduate credits at Rider University;
- Failing the comprehensive examination for the second time (pertains only to students enrolled in degree programs that require the examination);
- Failure to complete degree or certification requirements in six years (with the exception of the Master's in Counseling Services program, which is eight years from the date of acceptance into the program; the Master's in Clinical Mental Health Counseling, which is 10 years from the date of acceptance into the program; and the Ed.S. in School Psychology, which is 10 years from the date of acceptance into the program; and 4 years after the completion of APRN 5007 in the Graduate Nursing program).

The Department of Graduate Education, Leadership, and Counseling reserves the right to dismiss any student when, in the judgment of the faculty or the officers of Rider, such action seems advisable.

Honors Graduates

Students who graduate with an overall grade point average of 3.85 or better are designated as graduating with distinction. This term appears on the student's official transcript, below the student's name in the commencement program, and on the diploma.

Programs of Study

Degrees and Certifications Offered

The Educational Specialist (Ed.S.) degree is offered in the following areas:

- Counseling Services (p. 868)
- School Psychology (p. 935)

The Master of Arts (M.A.) degree is offered in the following areas:

- Clinical Mental Health Counseling (p. 856)
- Counseling Services (p. 865)
- Educational Leadership (p. 886)
- Organizational Leadership (p. 928)
- Special Education (p. 943)
- Teaching (p. 963)
- Teacher Leadership (p. 948)

The Master of Science (M.S.) degree is offered in the following areas:

- Nursing (p. 914)
- Higher Education Assessment, Analytics, and Change Management (p. 908)

The Education Doctorate (Ed.D) is offered in the following area:

- Educational Leadership (p. 880)

In addition, the department provides opportunities for study leading to teacher certification and other types of educational and human services certification.

Educational Certificates

The Department of Graduate Education, Leadership, and Counseling provides an opportunity for study leading to teacher certification and other types of certification and credentialing in the following areas:

- Comprehensive Business (K-12) (p. 863)
- Dance (K-12) (p. 874)
- Dance/Movement Therapy Concentration (p. 875)
- Early Childhood (P-3) (p. 884)
- Elementary (K-6) (p. 890)
- English as a Second Language/ESL (K-12) (p. 905)
- English as a Second Language/ESL Endorsement Certificate (P-12) (p. 907)
- English (K-12) (p. 903)
- Life and Career Coaching Certificate (p. 912)
- Mathematics (K-12) (p. 920)
- Music (K-12) (p. 921)
- Post-Baccalaureate Teacher Certificate (p. 932)
- Reading Specialist Endorsement (p. 934)
- Principal Certificate (p. 932)
- School Counselor (p. 865)
- School Psychologist (p. 935)
- Science Certificate in Biological Science, Chemistry, Earth Science, Physical Science, and/or Physics (K-12) (p. 940)
- Social Studies (K-12) (p. 941)
- Student Assistance Coordinator Certificate (p. 945)
- Supervisor of Instruction Certificate (p. 947)
- Teacher Leadership Professional Development Certificate (p. 958)
- Theater (K-12) (p. 964)
- World Languages Certificate in French or Spanish (K-12) (p. 966)

Endorsement to Existing Teaching Certificates

- Bilingual Education Endorsement Certificate (p. 855)
- English as a Second Language/ESL Endorsement Certificate (P-12) (p. 907)
- Early Childhood (P-3) (p. 884)
- Cooperative Education Coordinator Certificate (p. 864)
- Teacher of Students with Disabilities Certificate (p. 960)

General Master's Degree Application Requirements

All programs require an application available from the Office of Graduate Admission. A decision is made about an application for admission only when all required credentials have been submitted. Application deadlines are specified by graduate admissions (<https://www.rider.edu/admissions/graduate/how-apply/graduate-education-counseling-leadership-students/>) for specific programs. Completed applications received after the official deadline may be given consideration pending program capacity.

The faculty encourages prospective students from diverse ethnic and cultural backgrounds to apply. The following are due by the application due date:

- A completed application form, with a non-refundable \$50 application fee;

- Official transcripts from all colleges and universities attended;
- Other such admission requirements as specified within the particular program to which you are applying;
- If the due dates are different, they will be specified within the program requirements.

- Successfully pass a written comprehensive examination or other approved exit requirement;
- Attain and maintain an average grade of “B” (3.0) or better for work submitted for the Master’s degree, a certification program or a 3.3 grade-point average for the Educational Specialist degree and the Ed.D.;
- Complete the program within six years of the enrollment date of the first course (with the exception of the Master’s in Counseling Services program, which is eight years from the date of acceptance into the program; the Master’s in Clinical Mental Health Counseling, which is 10 years from the date of acceptance into the program; and the Ed.S. in School Psychology, which is 10 years from the date of acceptance into the program; and four years after completion of APRN 5007 in the Graduate Nursing program).

General Master’s Degree Requirements

To qualify for the Master’s degree, the candidate must:

- Comply with the general requirements concerning graduate study;
- Enroll in graduate study at Rider for no fewer than two academic semesters or the equivalent thereof;
- Complete the number of semester hours of graduate credit required by the degree or certification program;
- Complete an internship/practicum as required by individual programs;

Bilingual Education Endorsement Certificate

Program Overview

This Bilingual Endorsement program is for those educators already certified in another specialization. Rider's Bilingual Endorsement Program trains future educators to be sensitive to the cultural, sociological, linguistic, and psychological diversities that English Language Learner students bring with them to school. The mission of the Bilingual program at Rider University is to provide the skills, attitudes and understandings necessary to teach non-native speakers of English in order for them to achieve their greatest potential through education for life. Furthermore, Rider's Bilingual program introduces future educators to the different laws, programs, and approaches in the classroom that use the ELL's native language as a resource for instruction.

Curriculum Overview

This endorsement provides bilingual teaching credentials for those already certified in another specialization. It is a 15-credit program requiring five teacher preparation courses offered in the late afternoon/evening.

Courses and Descriptions

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

Clinical Mental Health Counseling (M.A.)

Program Overview

The **Master of Arts in Clinical Mental Health Counseling Concentration** is a 60-credit program that prepares students for counseling positions in community agencies, mental health agencies, hospitals, government facilities, institutions of higher education, industry and private practice. This program meets the academic requirements for the Licensed Professional Counselor (LPC) (<http://www.njconsumeraffairs.gov/pc/Pages/default.aspx>) in New Jersey, Pennsylvania, and most other states. It also meets all educational requirements for certification as a National Certified Counselor (NCC), (<http://www.nbcc.org/Certification/NationalCertCounselor/>) Approved Clinical Supervisor (ACS) (<http://www.cce-global.org/ACS/>), Board Certified Coach (BCC) (<http://www.cce-global.org/bcc/>) and Licensed Clinical Alcohol and Drug Counselor (LCADC) (<http://certbd.org>) and Certified Alcohol and Drug Counselor (CADC) (<http://certbd.org>) in New Jersey. Students may

take two additional courses and a SAC practicum or internship in a school to qualify for the Student Assistance Coordinator (SAC) CEAS (<https://nj.gov/education/license/endorsements/3461CEAS.pdf>) (two courses may be able to count as electives for the M.A. CMHC program). (<http://www.state.nj.us/education/educators/license/endorsements/3461CEAS.pdf>) Master's students in their final year are provided with preparation for the National Counselor Exam (NCE) (<https://www.nbcc.org/Exams/NCE/>) which is taken during their last semester at Rider.

The **Master of Arts in Clinical Mental Health Counseling with a Dance/Movement Therapy Concentration** is an interdisciplinary 60-credit program that prepares students for counseling positions specializing in Dance/Movement Therapy in a wide range of settings. This program meets the academic requirements for the Licensed Professional Counselor (LPC) (<http://www.njconsumeraffairs.gov/pc/Pages/default.aspx>) in New Jersey, Pennsylvania, and most other states and for the national Registered Dance Movement Therapist (R-DMT) (<https://www.adta.org/r-dmt/>) through the American Dance Therapy Association (<https://adta.org/>). It also meets all educational requirements for certification as a National Certified Counselor (NCC) (<https://www.nbcc.org/certification/ncc/>) and Board Certified Coach (BCC) (<http://www.cce-global.org/bcc/>). Master's students in their final year are provided with preparation for the National Counselor Exam (NCE) (<https://www.nbcc.org/Exams/NCE/>) which is taken during their last semester at Rider.

The concentration combines the unique elements of dance/movement therapy with the mental health counseling tradition. In keeping with the University's core mission, all degree and certification programs are student-centered, created to be flexible to meet the needs of returning and professional students with busy lives, provide cutting-edge instruction, hands-on practice in mental health organizations and agencies, and supportive faculty who are dedicated to mentoring students. The faculty and training are focused on dance therapy, wellness counseling and positive psychology, with an emphasis on clients' strengths, rather than on deficits.

Accreditation Information: The Clinical Mental Health Counseling program has been accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP) (<https://www.cacrep.org/>) since 1999. The program is accredited through October 31, 2022.

Curriculum Overview

All students in this area of study are required to complete 60 credits of coursework and to participate in at least 700 hours of counseling fieldwork in an agency. An appropriate agency for the intern is one which provides a program of services designed to help individuals function to their optimal capacity. Such programs exist in a wide variety of settings, such as mental health clinics, correctional facilities, hospital settings, family service centers, comprehensive rehabilitation centers, social service organizations, vocational counseling programs, private counseling programs, substance abuse treatment programs, employee assistance programs, college counseling centers, and other appropriate sites.

All degree candidates must purchase student professional liability insurance.

Accelerated BA to MA Program

(15 credits)

Highly qualified undergraduate psychology majors are eligible to apply in their junior year for the accelerated BA-MA program in Clinical Mental Health Counseling. This program enables students to take graduate courses during their senior year that count toward both the bachelor's and master's degrees.

Applicants for this accelerated program must have a GPA of at least 3.0 and must meet the same admission requirements as all other applicants. Students must apply by February 10 of their junior year. Those admitted must maintain a 3.0 GPA throughout the bachelor's part of the program. In addition, performance in graduate-level courses is subject to all academic policies and requirements of the Department of Graduate Education, Leadership, & Counseling.

Students accepted into the CMHC accelerated program who would like to complete the BA/MA in 5 ½ years will take the following 15 credits of graduate courses during their senior year, in addition to the necessary undergraduate courses:

Code	Title	Credits
COUN 500	Introduction to Counseling and Helping Professions	3
COUN 503	Group Counseling	3
COUN 550	Counseling and Helping Techniques Laboratory	3
CNPY 502	Theories of Counseling and Helping Professions	3

CNPY 514	Psychopathology	3
Total Credits		15

* Undergraduate students who would like to take fewer than 15 graduate credits during their senior year are also eligible to apply for the accelerated program. Taking fewer than 15 courses as an undergraduate student may mean that it will take longer than 5 ½ years to complete the BA/MA.

Following successful completion of the undergraduate program, students will automatically be matriculated into the Clinical Mental Health Counseling MA-degree program, where they will complete the remaining MA-level coursework.

Courses and Descriptions

CNDT 584 Counseling and Dance/Movement Therapy Practicum I 3 Credits

Students develop clinical observation skills by being active participant observers in clinical field settings. Supervision class will focus on understanding the professional, legal, and ethical responsibilities of being a dance/movement therapist in clinical settings from a multicultural perspective. Issues pertaining to professional identity development will be addressed.

CNDT 585 Counseling and Dance/Movement Therapy Practicum II 3 Credits

A supervised field experience in counseling and dance/movement therapy techniques. In this second semester of practicum, students will continue to advance their clinical skills by co-leading dance/movement therapy sessions with field supervision. The goal is for students to facilitate entire sessions by the end of the semester. The course will include seminar discussions, observations and analysis of the therapeutic process of dance/movement therapy sessions and individual supervision with the instructor. A total of 100 field hours is required with a minimum of 40 direct contact hours with clients. The approval and cooperation of the fieldwork agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): CNDT 584.

CNDT 590 Counseling and Dance/Movement Therapy Internship I 3 Credits

This course is one of two internship courses required in the student's final year. It fulfills 350 of the internship hours required by the American Dance Therapy Association and by CACREP. Students will be at a clinical site approved by faculty, with a supervisor who meets all CACREP standards and is a board certified Dance/Movement Therapist. Supervision class will support students in the clinical setting and in effectively utilizing counseling and dance/movement therapy knowledge and skills, including clinical appraisal, treatment planning, and documentation for dance/movement therapy. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): CNDT 585. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

CNDT 591 Counseling and Dance/Movement Therapy Internship II 3 Credits

The second semester of the internship that fulfills the remaining internship hours required by the American Dance Therapy Association and CACREP. Students will be at a clinical site approved by faculty, and will engage in all activities that a regularly employed staff member would be expected to perform. A regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring. Students will be under the field supervision of a supervisor who meets all CACREP requirements and is a Board Certified Dance/Movement Therapist. Supervision class will provide opportunities for students to analyze their practice, reflect on their progress as clinicians, and develop skills to internally self-evaluate their effectiveness as counselors and dance/movement therapists. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement. Prerequisite(s): CNDT 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the instructor.

CNDT 600 Body Mind Integration through Movement I 0 Credits

This is a movement laboratory class to explore how dance and movement reflect and affect physical, cognitive, mental, emotional, and spiritual states. Students learn to attune to their bodies in movement and develop awareness of the bidirectional interactions between body and mind.

CNDT 610 Dance/Movement Therapy Theory and Practice I 3 Credits

This course covers the foundational principles, theories, and techniques of dance/movement therapy and will examine the social and cultural foundations of dance as art and medium for growth, change, and healing. Works of dance/movement therapy pioneers and the evolution of dance/movement therapy practices will be explored didactically and experientially.

CNDT 612 Movement Observation, Analysis, and Assessment 3 Credits

This course is designed to provide students with the language and skills to observe, describe, analyze, and document human movement patterns and behaviors using Laban Movement Analysis. The didactic and experiential format of this class will allow students to embody movements and make connections to clinical practice with various client populations. Students will learn to translate movement based terminology and dance/movement therapy goals into clinical language used in treatment plans and progress notes.

CNDT 620 Clinical Applications of Dance/Movement Therapy 3 Credits

Group and individual dance/movement therapy practices in various clinical settings are addressed: psychiatric hospitals, addiction recovery programs, therapeutic schools for children with emotional and behavioral problems, developmental disabilities, and special needs; hospices; and hospitals. Students develop their own working theoretical model of dance/movement therapy to guide their work as emerging dance/movement therapists.

CNDT 700 Body Mind Integration through Movement II 0 Credits

The second semester of the movement laboratory class focuses on the use of mindfulness practices and Authentic Movement methods for further develop body-mind awareness, to experience and observe movements simultaneously as internal and external experience, and to decipher the nature of knowledge and meaning inherent in dance and movement.

Prerequisite(s): CNDT 600.

CNDT 710 Dance/Movement Therapy Theory and Practice II 3 Credits

In this didactic and experiential course, select theories from psychology, counseling, psychotherapy, and neuroscience are studied in order to identify the healing and transformative factors of the creative arts therapies. Some of the topics covered in this course are: psychodynamics and object relations theories; intersubjectivity; symbolism and metaphor; psychology of creativity; and neuroscience in dance/movement therapy.

Prerequisite(s): CNDT 610.

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

CNPY 516 Advanced Psychopathology 3 Credits

An in-depth study of psychopathology with emphasis on developmental and personality disorders, and physiological disturbances. Includes assessment, classification, and treatment with emphasis on utilization in a variety of counseling and school settings. Biological, pathological, pharmacological bases of mental disorders are introduced and discussed in relationship to specific disorder classifications.

Prerequisite(s): CNPY 514 or permission of instructor.

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 502 Prevention and Intervention for Body Image and Disordered Eating 3 Credits

In this course, students will gain an understanding of strategies relevant to the prevention and treatment of body image and disordered eating concerns. Prevention strategies applicable to individual client care, small group work, and large group programming will be discussed. Students will also learn how to communicate and teach prevention strategies to parents, teachers, partners, and others who may be key influences in body image and/or disordered eating issues. In addition, various treatment and intervention approaches for individuals already exhibiting problematic body image and/or disordered eating attitudes and behaviors will be reviewed.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 510 Approaches to Family Counseling 3 Credits

Presents a basic understanding of major approaches of family counseling. Family counseling approaches covered include structural, systems, Ackerman, Satir, and analytical. These approaches are presented as related to major problem centered family concerns--child-rearing concerns, alcohol, drugs, child abuse, dysfunctional marriage, divorce, etc. Emphasizes self-awareness as related to family development.

Prerequisite(s): COUN 500, CNPY 502, or permission of instructor or advisor.

COUN 512 Disaster Response, Trauma, Crisis, and Grief Counseling 3 Credits

This course is an introduction to the research and practice of disaster response, trauma, crisis, and grief and loss counseling in clinical and educational settings. Course will include an overview of the impact of disasters, crisis, and trauma-causing events on individuals, communities, and educational settings and of the impact of working with traumatized clients on practitioners. Emphasis will be placed on prevention, intervention, and postvention practices in working effectively with individuals, families, and groups of people in the midst of traumatic situations and who have experienced loss, crisis, disasters and trauma-causing events.

Prerequisite(s): COUN 550.

COUN 515 Substance Abuse Counseling 3 Credits

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

COUN 516 Strategies in Addiction Counseling 3 Credits

This is an experiential and laboratory-based experience in which students will learn to implement evidence based counseling techniques that are utilized in the field of substance abuse counseling. Students will be able to expand their basic counseling skills and techniques learned in COUN 550, as well as become exposed to techniques that are unique to addiction counseling. In addition to learning assessment skills, students will learn interventions that include motivational interviewing, relapse prevention, alternative therapies, group counseling, family counseling, and others. This course will also focus on issues of ethics and prevention in counseling.

Prerequisite(s): COUN 550.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 525 Gender Issues in Counseling 3 Credits

Examines the psychological, physiological, historical, and socio-cultural factors that affect the development of women and men across the life span and discusses implications for counseling. Focuses on relevant gender issues including gender bias and equity, misdiagnosis, self-esteem, depression, violence and sexual abuse, the feminization of poverty, and the importance of relationship for women. Presents an overview of feminist psychotherapy and explores the context of the behavioral, emotional and biological problems that impact on mental health. Also discusses the emerging men's movement and trends in counseling men; introduces gay and lesbian issues, the issues of minority women, and factors in counseling the HIV/AIDS client.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 535 Holistic Wellness Counseling 3 Credits

Based on current methods and research, students will explore holistic wellness (e.g., spirituality, self-direction, work and leisure, friendship, and love) positive psychology (e.g., hope, forgiveness, etc.), and human change from personal and interpersonal perspectives.

Prerequisite(s): CNPY 502.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

COUN 555 Introduction to Play Therapy 3 Credits

Introduction to Play Therapy provides an overview of the fundamental principles of play therapy, including history, theories, skills, and applications. The course emphasizes developing the therapeutic relationship with children and utilizing play to facilitate children's self-expression, self-understanding, and personal growth. Observation of and supervised experiential activities in play therapy with children are an integral part of the course.

Prerequisite(s): CNPY 502, can take concurrently with COUN 550.

COUN 556 Parent-Child Play Therapy 3 Credits

Parent-child play therapy builds upon the introduction to play therapy course and focuses on helping parents/caregivers enhance their relationship with children through play therapy modalities. Students will learn the history, principles, and skills of filial therapy, with an emphasis on Child-Parent Relationship Therapy (CPRT). Students will have opportunities to strengthen their play therapy skills, develop the ability to conduct CPRT, and learn how to facilitate systemic changes in children's lives through working with parents/caregivers. This course contains an experiential component including in-class role-playing and supervised parent-child play therapy experiences with parents/caregivers.

Prerequisite(s): CNPY 502, COUN 550, EDPS 503, COUN 555.

COUN 581 Secondary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 585 Clinical Mental Health Counseling Practicum 3 Credits

A supervised experience in counseling and consulting techniques in mental health facility, community counseling agency, or college setting. Includes seminar discussions, interview analyses or audiotape/videotape observations, and individual supervision with the instructor. For the experienced counselor or the advanced counselor in training who desires to review and/or strengthen individual counseling and consulting techniques. A field placement of 100 hours is required with a minimum of 40 direct contact hours with clients. Students registering for this course should contact the instructor the semester prior to the course being offered.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 590 Internship in Counseling I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

Prerequisite(s): COUN 580 or COUN 581 or COUN 585 or CNSC 580 or CNSC 581. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

COUN 591 Internship in Counseling II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 or concurrent enrollment. All other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

COUN 600 Independent Study and Research in Counseling Services 1-3 Credits

Students may take two independent studies. However, under special circumstances, such as students seeking certifications (e.g., Student Assistance Coordinator), students may be approved by their advisor to take up to six COUN 600 3-credit courses for a total of 18 credits.

COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

Prerequisites: COUN 590.

EDPS 502 Psychological Development of the Child and Adolescent 3 Credits

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDPS 521 Statistics and Quantitative Analysis 3 Credits

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

Prerequisite(s): EDPS 520, EDUC 500.

EDPS 535 Biological Basis of Behavior 3 Credits

This course will emphasize a biological approach to the study of psychology and behavior. Topics studied will include the following: 1) the genetics of human psychological differences; 2) the anatomy of the nervous system; 3) psychopharmacology; 4) neuropsychological diseases (e.g., epilepsy, autism, multiple sclerosis); 5) memory and amnesia; 6) sleeping, dreaming, and circadian rhythms; and 7) the biopsychology of mental health difficulties.

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Stdnts and Stdnts With Special Needs 3 Credits

The course provides an overview of the foundations of counseling in educational settings, including the historical roots, current and future trends, roles, and functions in multicultural schools and higher education settings. Students examine the roles and responsibilities of professional school counselors to facilitate student success through the development of a comprehensive school counseling program as an integral component of the total education system.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

Comprehensive Business (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in Comprehensive Business (P-12) is designed for college graduates seeking initial teacher certification in the subject area of Comprehensive Business. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 963)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Comprehensive Business is a 21-credit graduate program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Certificates Offered

- Comprehensive Business Certificate (K-12)

- Completion of all courses before the clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

Courses and Descriptions

BSED 530 Emerging Instructional Strategies in Business Education 3 Credits

Emphasis is placed on the enhancement of teaching effectiveness in business education as emerging instructional strategies are reviewed and studied. Special attention is devoted to the new technology and its use in business education while focusing attention to the present and future needs of the employer. Current instructional materials are presented and utilized. Master practicing business education teachers will augment the instructor's presentations.

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

Cooperative Education Coordinator Certificate

Program Overview

Rider University offers the two required graduate courses for this certificate. The applicant should refer to the certification requirements on the NJDOE website (<http://www.state.nj.us/cgi-bin/education/license/endorsement.pl?string=999&maxhits=1000&field=2>).

COUN 505	Vocational/Career Development	3
Total Credits		6

Courses and Descriptions

BSED 508 Organizing and Administering Cooperative Work Experience Programs 3 Credits

An overview of the current administrative and instructional strategies used in organizing and administering cooperative work experience programs at the secondary and post-secondary levels. Up-to-date concepts are reviewed relative to program approval, teacher coordinator certification, work agreements, labor laws, funding, reporting supervision of student learners, related instruction, student wages, and vocational student organizations. Current instructional materials are reviewed and evaluated. Improvement in the organization and administration of cooperative work experience programs is the primary goal.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

Counseling Services (M.A.)

Program Overview

The Master of Arts in Counseling Services (*school counseling concentration*) is a 48-credit program that prepares students for school counseling positions in elementary and secondary public and private schools. This program meets the educational requirements for state certification as a K-12 school counselor in New Jersey (<https://www.schoolcounselor.org/school-counselors-members/careers-roles/state-certification-requirements/>), and meets the certification requirements of most other states. In addition, the program prepares students for the eight core content areas of the National Counselor Exam (NCE) (<https://www.nbcc.org/exams/nce/>), required by the National Board of Certified Counselors (NBCC) in order to become a National Certified Counselor. Students completing this program will also have met the educational requirements for Board Certified Coach (BCC) (<https://www.cce-global.org/BCC/>) and, with two additional courses, for the Student Assistance Coordinator (SAC) (<https://nj.gov/education/license/endorsements/3461CEAS.pdf>) certificate.

In keeping with the University's core mission, this program is student-centered. Courses are offered in the evenings with full-time and part-time enrollment options available to meet the needs of returning and professional students with busy lives. Cutting-edge instruction, hands-on practice in schools, and supportive faculty who are dedicated to mentoring students are core program components. The faculty and training are focused on wellness counseling and positive psychology, with an emphasis on the strengths of the individuals served, rather than on deficits.

Accreditation Information: The Counseling Services program (school counseling concentration) has been accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP) (<https://www.cacrep.org/>) since 1999. The program is accredited until October 31, 2022.

Curriculum Overview

All students in this area of study are required to complete 48 credits of coursework and to take classes that cover the theories of counseling and psychotherapy, ethical and legal issues, counseling children, adolescents and their families, along with an elementary school counseling or secondary school counseling practicum and two internships. The practicum and internships require 700 hours of fieldwork in preparation for professional practice. Fieldwork placement occurs through close collaboration with Rider's clinical coordinator and is supervised by both practitioners in the field and professors in the classroom.

All degree candidates must purchase student professional liability insurance once they enter the field.

Accelerated BA / MA

(15 credits)

Highly qualified undergraduate psychology majors are eligible to apply in their junior year for the accelerated BA-MA program in School Counseling. This program enables students to take graduate courses during their senior year that count toward both the bachelor's and master's degrees.

Applicants for this accelerated program must have a GPA of at least 3.0 and must meet the same admission requirements as all other applicants. Students must apply by February 10 of their junior year. Those admitted must maintain a 3.0 GPA throughout the bachelor's part of the program. In addition, performance in graduate-level courses is subject to all academic policies and requirements of the Department of Graduate Education, Leadership, & Counseling.

Students accepted into the School Counseling accelerated program who would like to complete the BA/MA in 5 years will take the following 15 credits* of graduate courses during their senior year, in addition to the necessary undergraduate courses:

Code	Title	Credits
COUN 500	Introduction to Counseling and Helping Professions	3
CNPY 502	Theories of Counseling and Helping Professions	3
COUN 503	Group Counseling	3
COUN 550	Counseling and Helping Techniques Laboratory	3
EDSO 501	Foundations of Counseling in Edu Settings: Referral Sources for Stdnts and Stdnts With Special Needs	3

* Undergraduate students who would like to take fewer than 15 graduate credits during their senior year are also eligible to apply for the accelerated program. Taking fewer than 15 courses as an undergraduate student may mean that it will take longer than 5 years to complete the BA/MA.

Following successful completion of the undergraduate program, students will automatically be matriculated into the School Counseling MA-degree program, where they will complete the remaining MA-level coursework.

Courses and Descriptions

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 590 Counseling Internship I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School counselors, student assistance coordinators (SACs) and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled. Students must be supervised by an SAC.

Prerequisite(s): COUN 585 OR COUN 580 OR COUN 581 OR CNSC 580 OR CNSC 581. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

CNSC 591 Counseling Internship II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School counselors, Student Assistance Coordinators (SACs), and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. Students must be supervised by a SAC. The approval and cooperation of the intern's field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

COUN 580 Elementary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 581 Secondary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 590 Internship in Counseling I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

Prerequisite(s): COUN 580 or COUN 581 or COUN 585 or CNSC 580 or CNSC 581. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

COUN 591 Internship in Counseling II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 or concurrent enrollment. All other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Stdnts and Stdnts With Special Needs 3 Credits

The course provides an overview of the foundations of counseling in educational settings, including the historical roots, current and future trends, roles, and functions in multicultural schools and higher education settings. Students examine the roles and responsibilities of professional school counselors to facilitate student success through the development of a comprehensive school counseling program as an integral component of the total education system.

EDSO 510 Sociological and Cultural Foundations of Education 3 Credits

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

Counseling Services (Ed.S.)

Program Overview

The Ed.S. in Counseling Services is a 66-credit program that meets the academic requirements for the Licensed Professional Counselor (LPC) (<http://www.njconsumeraffairs.gov/pc/Pages/default.aspx>) in New Jersey, Pennsylvania, and most other states. It also meets all educational requirements for certification as an Approved Clinical Supervisor (ACS) (<http://www.cce-global.org/ACS/>) as per N.J.A.C. 13:34-10.2 and 13.1 and as a National Certified Counselor (NCC) (<http://www.nbcc.org/Certification/NCC/>). Students may also qualify for the Student Assistance Coordinator (SAC) CEAS (<https://nj.gov/education/license/endorsements/3461CEAS.pdf>). It also provides opportunity for candidates whose masters degree in counseling was completed with 48 or less credits, to complete the 60 credits now required for LPC by many state counseling licensure boards. Such candidates may apply to the Ed.S. program as advanced students and apply their already-completed MA credits toward the Ed.S. degree. Candidates who wish to qualify for Licensed Clinical Alcohol and Drug Counselor (LCADC) (<https://www.certbd.org>) or Certified Alcohol and Drug Counselor (CADC) (<https://www.certbd.org>), may do so by completing all the educational requirements through the Ed.S. program.

Flexibilities built into the Ed.S. degree program allow for career change for both LPC's and school counselors. LPC's who wish to become school counselors can complete courses required to become certified school counselors and master's-level school counselors can complete the courses required for LPC's in many states. Practicing counselors who wish to become certified as Director of School Counselor Services or as Student Assistance Coordinators may also complete these through the EdS program. Clinical supervised hours obtained during the Ed.S. post-Master's program may count toward satisfying a portion of the supervised professional counseling experience requirement as per N.J.A.C. 13:34-11.2. Program faculty work with students to develop a

customized plan of study necessary to accomplish their desired career goals.

Curriculum Overview

The Ed.S. in Counseling Services is a 66-credit program that is customized to the student's career goals. Some candidates may require more than 66 credits to achieve their desired professional objectives.

There are three concentrations:

- school counseling
- community counseling
- director of school counseling services

Individualized advising helps candidates develop and grow professionally in the following specialty areas:

- multicultural counseling issues
- college counseling and higher education affairs
- group counseling and process
- special needs of at-risk students
- legal and ethical issues in counseling
- career counseling and development
- substance abuse
- geriatrics/hospice issues
- probation/parole counseling
- elementary/secondary school counseling
- family and marital issues in counseling
- grief and crisis counseling
- grant writing/management

Counseling Services, Educational Specialist Requirements

(66-69 credits)

- A minimum of 66 graduate credits including appropriate master's level work.
- Eighteen credits must be completed after admission to the Ed.S. for candidates from CACREP approved master's programs.
- Thirty credits must be completed after admission to the Ed.S. for all non-CACREP approved program graduates.
- Degree completion requires a minimum of 3.3 GPA.

The program will be individualized to allow students to meet their career goals and to provide in-depth training and experience in a specialized area.

Courses and Descriptions

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 502 Prevention and Intervention for Body Image and Disordered Eating 3 Credits

In this course, students will gain an understanding of strategies relevant to the prevention and treatment of body image and disordered eating concerns. Prevention strategies applicable to individual client care, small group work, and large group programming will be discussed. Students will also learn how to communicate and teach prevention strategies to parents, teachers, partners, and others who may be key influences in body image and/or disordered eating issues. In addition, various treatment and intervention approaches for individuals already exhibiting problematic body image and/or disordered eating attitudes and behaviors will be reviewed.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 510 Approaches to Family Counseling 3 Credits

Presents a basic understanding of major approaches of family counseling. Family counseling approaches covered include structural, systems, Ackerman, Satir, and analytical. These approaches are presented as related to major problem centered family concerns--child-rearing concerns, alcohol, drugs, child abuse, dysfunctional marriage, divorce, etc. Emphasizes self-awareness as related to family development.

Prerequisite(s): COUN 500, CNPY 502, or permission of instructor or advisor.

COUN 512 Disaster Response, Trauma, Crisis, and Grief Counseling 3 Credits

This course is an introduction to the research and practice of disaster response, trauma, crisis, and grief and loss counseling in clinical and educational settings. Course will include an overview of the impact of disasters, crisis, and trauma-causing events on individuals, communities, and educational settings and of the impact of working with traumatized clients on practitioners. Emphasis will be placed on prevention, intervention, and postvention practices in working effectively with individuals, families, and groups of people in the midst of traumatic situations and who have experienced loss, crisis, disasters and trauma-causing events.

Prerequisite(s): COUN 550.

COUN 515 Substance Abuse Counseling 3 Credits

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

COUN 516 Strategies in Addiction Counseling 3 Credits

This is an experiential and laboratory-based experience in which students will learn to implement evidence based counseling techniques that are utilized in the field of substance abuse counseling. Students will be able to expand their basic counseling skills and techniques learned in COUN 550, as well as become exposed to techniques that are unique to addiction counseling. In addition to learning assessment skills, students will learn interventions that include motivational interviewing, relapse prevention, alternative therapies, group counseling, family counseling, and others. This course will also focus on issues of ethics and prevention in counseling.

Prerequisite(s): COUN 550.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 525 Gender Issues in Counseling 3 Credits

Examines the psychological, physiological, historical, and socio-cultural factors that affect the development of women and men across the life span and discusses implications for counseling. Focuses on relevant gender issues including gender bias and equity, misdiagnosis, self-esteem, depression, violence and sexual abuse, the feminization of poverty, and the importance of relationship for women. Presents an overview of feminist psychotherapy and explores the context of the behavioral, emotional and biological problems that impact on mental health. Also discusses the emerging men's movement and trends in counseling men; introduces gay and lesbian issues, the issues of minority women, and factors in counseling the HIV/AIDS client.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 535 Holistic Wellness Counseling 3 Credits

Based on current methods and research, students will explore holistic wellness (e.g., spirituality, self-direction, work and leisure, friendship, and love) positive psychology (e.g., hope, forgiveness, etc.), and human change from personal and interpersonal perspectives.

Prerequisite(s): CNPY 502.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

COUN 555 Introduction to Play Therapy 3 Credits

Introduction to Play Therapy provides an overview of the fundamental principles of play therapy, including history, theories, skills, and applications. The course emphasizes developing the therapeutic relationship with children and utilizing play to facilitate children's self-expression, self-understanding, and personal growth. Observation of and supervised experiential activities in play therapy with children are an integral part of the course.

Prerequisite(s): CNPY 502, can take concurrently with COUN 550.

COUN 556 Parent-Child Play Therapy 3 Credits

Parent-child play therapy builds upon the introduction to play therapy course and focuses on helping parents/caregivers enhance their relationship with children through play therapy modalities. Students will learn the history, principles, and skills of filial therapy, with an emphasis on Child-Parent Relationship Therapy (CPRT). Students will have opportunities to strengthen their play therapy skills, develop the ability to conduct CPRT, and learn how to facilitate systemic changes in children's lives through working with parents/caregivers. This course contains an experiential component including in-class role-playing and supervised parent-child play therapy experiences with parents/caregivers.

Prerequisite(s): CNPY 502, COUN 550, EDPS 503, COUN 555.

COUN 580 Elementary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 581 Secondary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 585 Clinical Mental Health Counseling Practicum 3 Credits

A supervised experience in counseling and consulting techniques in mental health facility, community counseling agency, or college setting. Includes seminar discussions, interview analyses or audiotape/videotape observations, and individual supervision with the instructor. For the experienced counselor or the advanced counselor in training who desires to review and/or strengthen individual counseling and consulting techniques. A field placement of 100 hours is required with a minimum of 40 direct contact hours with clients. Students registering for this course should contact the instructor the semester prior to the course being offered.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 586 Practicum II 1 Credits

The continuation of Practicum, this 1-credit course is required for those students who were unable to complete the 100-fieldwork hours of Practicum in the fall or spring semester. Students will continue at their Practicum fieldwork site and will be responsible for completing the remainder of their 100-hours. A grade will not be granted in Practicum until the successful completion of Practicum II. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor, director, and professor permission and a comprehensive plan for fieldwork-hour completion to the clinical coordinator.

Prerequisite(s): COUN 580 or CNSC 580 or COUN 581 or CNSC 581 or COUN 585 and all other required course work must be completed or in progress. Program director approval with professor of record approval is required.

COUN 590 Internship in Counseling I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

Prerequisite(s): COUN 580 or COUN 581 or COUN 585 or CNSC 580 or CNSC 581. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

COUN 591 Internship in Counseling II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 or concurrent enrollment.

All other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

COUN 600 Independent Study and Research in Counseling Services 1-3 Credits

Students may take two independent studies. However, under special circumstances, such as students seeking certifications (e.g., Student Assistance Coordinator), students may be approved by their advisor to take up to six COUN 600 3-credit courses for a total of 18 credits.

COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

Prerequisites: COUN 590.

COUN 690 Internship in Counseling Speciality I 3-6 Credits

This internship provides on-the-job clinical experience in approved settings. Placement is selected based on students' specialty area goals and must be approved by the faculty advisor the semester prior to actual placement. Students must also submit in writing a description of clinical activities available in the field site before the placement is approved. Students will be required to attend a weekly seminar during which time each student will present and/or discuss legal, ethical, multicultural, contemporary, and clinical issues in her/his specialty area.

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 503 Psychological Development of the Adult and Aging 3 Credits

Surveys psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human adult development and transitions throughout the adult life span. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the adult and aging will be examined.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

CNPY 515 Consultation in School and Agency Settings 3 Credits

This course provides an introduction to school and agency based consultation theories and practices. Contemporary models of consultation are presented with students' emphasis on mental health, behavioral, and systems approach. In addition to the study of conceptual models, the development of skills in the consultation process in school and/or agency settings is emphasized. Students engage in behavioral consultations with consultees in approved placements.

CNPY 516 Advanced Psychopathology 3 Credits

An in-depth study of psychopathology with emphasis on developmental and personality disorders, and physiological disturbances. Includes assessment, classification, and treatment with emphasis on utilization in a variety of counseling and school settings. Biological, pathological, pharmacological bases of mental disorders are introduced and discussed in relationship to specific disorder classifications.

Prerequisite(s): CNPY 514 or permission of instructor.

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

EDPS 502 Psychological Development of the Child and Adolescent 3 Credits

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDPS 521 Statistics and Quantitative Analysis 3 Credits

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

Prerequisite(s): EDPS 520, EDUC 500.

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Stdnts and Stdnts With Special Needs 3 Credits

The course provides an overview of the foundations of counseling in educational settings, including the historical roots, current and future trends, roles, and functions in multicultural schools and higher education settings. Students examine the roles and responsibilities of professional school counselors to facilitate student success through the development of a comprehensive school counseling program as an integral component of the total education system.

EDSO 510 Sociological and Cultural Foundations of Education 3 Credits

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

Dance (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in Dance (K-12) is designed for college graduates seeking initial teacher certification in the subject area of Dance. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 963)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Dance is a 21-credit graduate program requiring courses taken in late afternoons/evenings followed by a full semester of full-time student teaching.

Certificate Offered

- Dance Certificate (K-12)

Additional Requirements for Completion of the Certificate:

- Completion of all courses before final clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade of better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 711 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. The existing methods course in Dance for beginning teachers is cross-listed with DAN 450.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

Clinical Mental Health Counseling M.A. (with a DMT concentration)

Concentration Overview

Students may also apply to and enroll in the Dance/Movement Therapy concentration in the **Master of Arts in Clinical Mental Health Counseling** degree program. This concentration (60 credits) prepares students for counseling positions specializing in Dance/Movement Therapy in a wide range of settings. The concentration meets the academic requirements for the Licensed Professional Counselor (LPC) (<http://www.njconsumeraffairs.gov/pc/Pages/default.aspx>) in New Jersey, Pennsylvania, and most other states and is in candidacy for the national Registered Dance Movement Therapist (R-DMT) (<https://www.adta.org/r-dmt/>) through the American Dance Therapy Association (<https://adta.org/>). It also meets all educational requirements for certification as a National Certified Counselor (NCC) (<https://www.nbcc.org/certification/ncc/>) and Board Certified Coach (BCC) (<http://www.cce-global.org/bcc/>).

Master's students in their final year are provided with preparation for the National Counselor Exam (NCE) (<https://www.nbcc.org/Exams/NCE/>) which is taken during their last semester at Rider.

In this concentration, students are trained in clinical mental health counseling with a specialization in dance/movement therapy. In keeping with the University's core mission, all degree and

certification programs are student-centered, created to be flexible to meet the needs of professionals and students with busy lives, provide cutting-edge instruction, hands-on practice in mental health organizations and agencies, and supportive faculty who are dedicated to mentoring students. The faculty and training are focused on clinical mental health counseling, with additional emphases in dance therapy, wellness counseling, and positive psychology as well as the creative process in dance with a focus on the clients' strengths, rather than on deficits.

Curriculum Overview

All students in this area of study are required to complete 60 credits of coursework and to participate in 900 hours of counseling and dance/movement therapy fieldwork. An appropriate agency for the intern is one which provides a program of services using counseling and dance/movement therapy to help individuals function to their optimal capacity. Potential clinical sites include mental health clinics, psychiatric hospitals, family service centers, comprehensive rehabilitation centers, correctional facilities, social service organizations, private counseling programs, substance abuse treatment programs, employee assistance programs, college counseling centers, and schools for children with developmental or intellectual disabilities as well as behavioral disorders.

All degree candidates must purchase student professional liability insurance.

Accreditation Information

Rider's CMHC program is accredited by CACREP (<https://www.cacrep.org/>), the premier national accrediting body that ensures excellence in counselor preparation and training.

Courses and Descriptions

Required Core Courses

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

Required Dance/Movement Therapy Courses**CNDT 584 Counseling and Dance/Movement Therapy Practicum I 3 Credits**

Students develop clinical observation skills by being active participant observers in clinical field settings. Supervision class will focus on understanding the professional, legal, and ethical responsibilities of being a dance/movement therapist in clinical settings from a multicultural perspective. Issues pertaining to professional identity development will be addressed.

CNDT 600 Body Mind Integration through Movement I 0 Credits

This is a movement laboratory class to explore how dance and movement reflect and affect physical, cognitive, mental, emotional, and spiritual states. Students learn to attune to their bodies in movement and develop awareness of the bidirectional interactions between body and mind.

CNDT 610 Dance/Movement Therapy Theory and Practice I 3 Credits

This course covers the foundational principles, theories, and techniques of dance/movement therapy and will examine the social and cultural foundations of dance as art and medium for growth, change, and healing. Works of dance/movement therapy pioneers and the evolution of dance/movement therapy practices will be explored didactically and experientially.

CNDT 612 Movement Observation, Analysis, and Assessment 3 Credits

This course is designed to provide students with the language and skills to observe, describe, analyze, and document human movement patterns and behaviors using Laban Movement Analysis. The didactic and experiential format of this class will allow students to embody movements and make connections to clinical practice with various client populations. Students will learn to translate movement based terminology and dance/movement therapy goals into clinical language used in treatment plans and progress notes.

CNDT 620 Clinical Applications of Dance/Movement Therapy 3 Credits

Group and individual dance/movement therapy practices in various clinical settings are addressed: psychiatric hospitals, addiction recovery programs, therapeutic schools for children with emotional and behavioral problems, developmental disabilities, and special needs; hospices; and hospitals. Students develop their own working theoretical model of dance/movement therapy to guide their work as emerging dance/movement therapists.

CNDT 700 Body Mind Integration through Movement II 0 Credits

The second semester of the movement laboratory class focuses on the use of mindfulness practices and Authentic Movement methods for further develop body-mind awareness, to experience and observe movements simultaneously as internal and external experience, and to decipher the nature of knowledge and meaning inherent in dance and movement.

Prerequisite(s): CNDT 600.

CNDT 710 Dance/Movement Therapy Theory and Practice II 3 Credits

In this didactic and experiential course, select theories from psychology, counseling, psychotherapy, and neuroscience are studied in order to identify the healing and transformative factors of the creative arts therapies. Some of the topics covered in this course are: psychodynamics and object relations theories; intersubjectivity; symbolism and metaphor; psychology of creativity; and neuroscience in dance/movement therapy.

Prerequisite(s): CNDT 610.

Required Fieldwork Courses**CNDT 585 Counseling and Dance/Movement Therapy Practicum II 3 Credits**

A supervised field experience in counseling and dance/movement therapy techniques. In this second semester of practicum, students will continue to advance their clinical skills by co-leading dance/movement therapy sessions with field supervision. The goal is for students to facilitate entire sessions by the end of the semester. The course will include seminar discussions, observations and analysis of the therapeutic process of dance/movement therapy sessions and individual supervision with the instructor. A total of 100 field hours is required with a minimum of 40 direct contact hours with clients. The approval and cooperation of the fieldwork agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): CNDT 584.

CNDT 590 Counseling and Dance/Movement Therapy Internship I 3 Credits

This course is one of two internship courses required in the student's final year. It fulfills 350 of the internship hours required by the American Dance Therapy Association and by CACREP. Students will be at a clinical site approved by faculty, with a supervisor who meets all CACREP standards and is a board certified Dance/Movement Therapist. Supervision class will support students in the clinical setting and in effectively utilizing counseling and dance/movement therapy knowledge and skills, including clinical appraisal, treatment planning, and documentation for dance/movement therapy. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): CNDT 585. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

CNDT 591 Counseling and Dance/Movement Therapy Internship II 3 Credits

The second semester of the internship that fulfills the remaining internship hours required by the American Dance Therapy Association and CACREP. Students will be at a clinical site approved by faculty, and will engage in all activities that a regularly employed staff member would be expected to perform. A regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring. Students will be under the field supervision of a supervisor who meets all CACREP requirements and is a Board Certified Dance/Movement Therapist. Supervision class will provide opportunities for students to analyze their practice, reflect on their progress as clinicians, and develop skills to internally self-evaluate their effectiveness as counselors and dance/movement therapists. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement. **Prerequisite(s):** CNDT 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the instructor.

Developing People and Organizations Certificate

Program Overview

This track is aimed at preparing students to be successful, strategic and impactful professionals who are able to work effectively through others. The program will:

- offer insight into human and organizational relationships;
- enhance the capacity for sound analytical judgment; and
- encourage the ability to see the "big picture" as it relates to an organization and its environment.

Curriculum Overview

Coursework focuses on applied action grounded in theory, and embraces principles applicable to administrative issues in the private, public, and nonprofit sectors. The courses enable students to enhance their knowledge and skills in:

- employee recruitment
- leadership development
- group dynamics
- organizational change
- conflict management
- succession planning
- training and development
- adult learning theory

Total Credits 15

Courses and Descriptions

LEAD 510 Organizations: Design and Dynamics 3 Credits

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 512 Forms of Diversity in Organizations 3 Credits

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different "worldviews" which organizational members bring into the organization, and how that affects their ability to work together. The course develops students' knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 531 Developing The Human Side of Organizations 3 Credits

This course examines Strategic Human Resources Management (SHRM) within today's organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 532 Program Design for Training and Development in Organizations 3 Credits

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore “real world” applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 533 Conflict and Crisis Resolution in Organizations 3 Credits

Leaders face conflict and crisis in their organizations. Being effective in their resolution is an important leadership attribute. Skills that support positive and integrative outcomes include mediation, negotiation and crisis resolution skills. This course will use multiple case studies and role-playing assignments to engage students in understanding how individuals and teams handle mediation and negotiation scenarios. The course will also use multiple case studies to enhance students’ understanding of the components of effective and ineffective leadership for crisis.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 534 Facilitation and Team Leadership 3 Credits

This course examines the characteristics and behaviors of teams that produce good results and/or generate new ideas. The focus of the course is on how to lead high functioning teams and the development of facilitation capabilities, so that students can effectively lead teams and organizations.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

Doctor of Educational Leadership

Program Overview

Rider’s Doctor of Educational Leadership brings together passionate and experienced educators to collaboratively study the complex and pressing issues facing students and teachers today – and to develop practical, evidence-based solutions to respond to those issues through action research.

The **36-month, 51-credit program** involves two years of coursework and a year of dissertation research and analysis. Hybrid (online and on-campus) studies and summer residencies enable education professionals to pursue the degree without career interruption.

The goal of Rider’s Ed.D. program is to prepare skilled professionals who use research and scholarship to inform their leadership and decision making. Through the required coursework, you will develop a greater understanding and sense of context for today’s major educational challenges, including:

- Educational reform
- Instructional leadership
- Educational accountability and assessment
- Research methods and data analysis
- Social context of education
- Politics and governance

- Teachers and teaching
- Resource allocation and deployment

Curriculum Overview

Much of the program’s coursework will relate to issues facing your own school, district or college, giving you practical knowledge and insights that you can apply every day to your work. Early in the program, you will learn how action research can be used to determine needs and options, and begin working with members of the doctoral faculty to identify a potential problem, issue or opportunity of interest to you. You will then implement and evaluate your own dissertation change project.

As an added feature of our program we are currently offering our candidates the option to take a concentration of four courses focused on higher education. See the Concentration tab for the coursework related to this option.

Carnegie Project on the Education Doctorate Rider has been invited to become a member of the prestigious Carnegie Project on the Education Doctorate

The Carnegie Project on the Education Doctorate (<https://www.cpedinitiative.org/>) (**CPED**) includes over 100 colleges and schools of education, which have committed resources to work together to undertake a critical examination of the doctorate in education (EdD) through dialog, experimentation, critical feedback and evaluation.

Vision

The Vision of the Carnegie Project on the Education Doctorate (CPED) is to inspire all schools of education to apply the CPED framework to the preparation of educational leaders to become well-equipped scholarly practitioners who provide stewardship of the profession and meet the educational challenges of the 21st century.

Mission

The Mission of the Carnegie Project on the Education Doctorate (CPED) is to strengthen, improve, support and promote the CPED framework through continued collaboration and investigation.

The Framework

Through a collaborative, authentic process, members of CPED developed a Framework for EdD program design/redesign that supports creating quality, rigorous practitioner preparation while honoring the local context of each member institution. The CPED Framework consists of three components—a new definition of the EdD, a set of guiding principles for program development and a set of design-concepts that serve as program building blocks.

Members enter the Consortium at points of considering a new EdD. As they engage in the Consortium, they utilize this Framework to design/redesign, evaluate and improve their programs. As such CPED members are often at different levels in the design/redesign process.

Guiding Principles for Program Design

With this understanding, we have identified the following statements that will focus a research and development agenda to test, refine, and validate principles for the professional doctorate in education. The professional doctorate in education:

1. Is framed around questions of equity, ethics, and social justice to bring about solutions to complex problems of practice.
2. Prepares leaders who can construct and apply knowledge to make a positive difference in the lives of individuals, families, organizations, and communities.
3. Provides opportunities for candidates to develop and demonstrate collaboration and communication skills to work with diverse communities and to build partnerships.
4. Provides field-based opportunities to analyze problems of practice and use multiple frames to develop meaningful solutions.
5. Is grounded in and develops a professional knowledge base that integrates both practical and research knowledge, that links theory with systemic and systematic inquiry.
6. Emphasizes the generation, transformation, and use of professional knowledge and practice.

Standards-Based Studies

The curriculum is built around the National Policy Board for Educational Administration's student-centric 2015 Professional Standards for Educational Leaders (http://npbea.org/wp-content/uploads/2017/06/Professional-Standards-for-Educational-Leaders_2015.pdf) (formerly known as the ISLLC Standards).

Prepared for and by educational leaders, the standards focus on 10 high-impact areas that drive and measure excellence in professional practice:

1. Mission, Vision and Core Values
2. Ethics and Professional Norms
3. Equity and Cultural Responsiveness
4. Curriculum, Instruction and Assessment
5. Community of Care and Support for Students
6. Professional Capacity of School Personnel
7. Professional Community for Teachers and Staff
8. Meaningful Engagement of Families and Community
9. Operations and Management
10. School Improvement

Program Format

A defining element of this innovative doctoral program is its cohort model of 10 to 12 students. This design creates a highly supportive and interactive learning environment that promotes peer-to-peer learning and networking, as well as close mentoring relationships between faculty and students. The coursework is progressive, with each class building the knowledge base.

Program Features

- **Flexibly designed** around the schedules of working professional educators
- **Asynchronous online classes** throughout each semester
- **Three on-campus Saturday sessions** (9 a.m. – 3 p.m.) each fall and spring semester
- **8-day summer residencies in July** (2 consecutive weeks, Monday through Thursday)

The Online Experience

Your online courses will be asynchronous, enabling you to complete most of your course assignments and activities at the time and place that's best for you. For example, discussion board question responses can be posted and assignments submitted at a time that is convenient (as long as the activity is completed by the stated due date).

Real-time, interactive e-sessions will be scheduled periodically. Over the course of your studies, peer-to-peer and faculty interactions will include such activities as team projects and special presentations. (*Note: Web cam access will be needed for these sessions.*)

One-to-one access to our doctoral faculty is a critical part of the program. Your professors will be available for meetings on-campus, as well as by phone or streaming video. Each semester, your professors will interact with you by phone and email, participate actively in discussion boards and webinars, and provide feedback on assignments.

You will be assisted in all your scheduling and registration needs, as well as planning your coursework and maintaining academic progress based on your goals (a minimum 3.0 GPA is required for the doctoral program). You also will have full access to services and resources of the University.

Courses

EDLD 800 Strategic Management, Organizational and Moral Leadership Behavior in a Culture of Learning 3 Credits

This course will challenge students to embrace a system view of leadership and organizational change at the organizational level. Students will compare, contrast and critique theories and models of organizational learning, knowledge creation, and organizational capacity building and apply them to their own organizational settings. The course will focus on three leadership standards: instructional leadership, operational and managerial leadership, and professional culture. While the course will focus on conceptual frameworks and theory, it is a practice-based course. The course will enhance student ability to think systematically and develop comprehensive understanding of core competencies required to lead, initiate and sustain change in organizations. It investigates process and content issues of team building, interpersonal and group relations, and effective problem solving and decision making skills in collaborative environments. The course emphasizes the moral, ethical and social responsibilities of organizational leaders, as well as the application of principles to organizational leadership behavior and decision-making. Students will also investigate current research trends regarding ethical issues in education and other organizational contexts.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 801 Action Research: Principles and Methods 3 Credits

This course provides an introduction to action research, with emphasis on its application in educational settings. The course covers definitions and purposes of action research. Students will explore theoretical, methodological, and ethical issues pertinent to action research. During the course, students will engage in an action research project in an educational setting.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 802 Educational Change, Systemic Reform, Exercising the Politics of Change 3 Credits

This course will provide students with the skills necessary to achieve educational reform and improvement while navigating the political environment within educational institutions. Through this course, students will analyze various theories and how these ideas apply to education, organizations, change, and leadership.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 803 Instructional Leadership and Educational Reform 3 Credits

Through this course, students will examine contemporary educational practices and their relationship to leadership theories, models, and strategies. Participants will investigate research based instructional practices and develop the skills necessary to identify issues within organizations in suburban and urban settings. The course will provide students with a deep knowledge of the educational challenges faced by educational leaders in today's society. The focus will be on learning a successful organization through the implementation of research based strategies.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 804 Community Building and Sustaining Community Partnerships 3 Credits

Drawing on philosophies/theories, processes, and practices that build and sustain effective school-community partnerships, this course addresses the identification and utilization of community resources and the development of effective intra- and inter-organizational strategies, community linkages, and collaborative efforts necessary to provide for the holistic needs of students and families. Special attention is focused on the role of school leaders in planning and implementing community-wide and building level communications and involvement networks, through the development of practical action learning sets and tools. Building Commitment: How do leaders build and use public awareness and commitment to support their schools?

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 805 Valuing Diversity/Equity: Developing and Fostering a Community of Learners 3 Credits

The focus of the course is academic excellence with equity. The value orientation of the course is toward high-quality developmental outcomes for youth of all racial, ethnic, and social class backgrounds. With an emphasis on students of color and youth from less-advantaged families, the course explores several policy and strategic responses to achievement disparity: identify and work to remove key structural barriers to educational equity; excellence with equity goals; design more effective policies and practices to improve the quality of teaching; support families with ideas and practices for parenting children more effectively; engage youth to reshape their culture of achievement to align with their most positive values. The course explores theories, evidence, designs, methods, and mechanisms associated raising achievement and closing gaps.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 806 Research Proposal Development 3 Credits

This course builds on the action research course to more clearly define the rationale and procedures of educational and social science research. The course is designed for our first-year doctoral students. Topics will include the nature and purpose of research, planning and conducting research, critiquing and evaluation research, sampling, survey and experimental design, evaluation research, naturalistic observation and inquiry, measurement and methods of data collection, ethics, and the use of computers in data analysis. Methods are considered for collecting both quantitative and qualitative data. Students will build on prior project ideas, concepts, and research practice to more fully develop into their Dissertation of Practice topic. This course has two objectives: to increase participants' knowledge of methods for making causal inferences in quantitative research, and to provide participants with a forum for presenting and receiving feedback on their research topic for the Dissertation of Practice.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 807 Law and Policy 3 Credits

This course explores legal, ethical and politics issues governing PreK-12 education in America and the legal responsibilities and powers of state and local governing bodies and individuals that arise in elementary and secondary schools. Emphasis is given to federal and state statutes and case law affecting due process, liability, equal protection, and the rights of teachers and students in order to better understand the risks in education management and possible strategies to reduce those risks. The course will explore evolving legal standards on a variety of issues. The course will draw on real cases and legal/policy dilemmas that practitioners face, and focus on preventive law - providing current and future school learners with knowledge and skills they will need to make sound decisions, advance important educational objectives, and minimize legal problems.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 808 Generating, Using, and Assessing Data Accountability and Student Assessment 3 Credits

This course will develop the skills necessary for educational leaders to identify and define problems, implement data collection methods, and analyze, interpret, and report data across multiple levels from the individual student to the larger system. Students will gain the knowledge and skills to use data in decision making within a problem solving framework that enables evaluation of instructional programs and practices. Within this course, students will engage in activities designed to enhance skills in data-based decision making, including: large and small group discussion; review of the extant literature base; review and use of different technologies and statistical methods for data collection and analyses; case studies and simulated data analyses; and application of skills in real world settings. Attainment of these skills will prepare the student for the dissertation process to serve as an instructional leader in the field. The course references and aligns with state adopted core curriculum content standards and professional development standards, the Standards for Schools Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 809 Finance, Fundraising and Fiscal Management 3 Credits

Financial and managerial leadership of a school building or district is a primary factor in the success or failure of school instructional programs. This course provides an opportunity for public and private school practicing and prospective administrators to gain an understanding of their role in these critical areas. Providing the resources to fund academics/instruction/athletics, facilities and capital projects is a focus of this course. A comprehensive understanding of the financial implications of systemic reform, centralized goal setting, accountability standards, and decentralized forms of site-based management, school choice, and charter schools will be a focus of study. This course will also provide a comprehensive overview of fund raising. Students are provided with an ethical foundation and are introduced to basic terminology and concepts in the field. Various fund raising vehicles are surveyed and participants learn to apply fund raising strategies that are appropriate to their organizational setting.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 810 Curriculum Leadership: Transforming Teachers/Developing Teacher Talent 3 Credits

This course will focus on the complex nature of teaching and learning and provide participants with the skills necessary to guide instructional practice. Adult learning theory will be examined as will curriculum theories, instructional practices, professional development, and human capital.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 811 Innovation and the Use of Educational Technology 3 Credits

This course addresses the intersection of organizational change and educational technology. Students will develop a philosophy of educational technology and explore related issues in policy, diversity, ethics, and evaluation. The course also covers research and theory on organizational change and processes for developing a culture of innovation. Students will apply theories of organizational change to the implementation and use of technology in educational contexts.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 812 Leading Programs for Diverse Learners and At Risk Students 3 Credits

This course examines some of the best practices for supporting diverse learners and at-risk students and some of the reasons behind the intrinsic and bureaucratic/policy barriers that may hinder their success. Schools are faced with an increasing number of diverse learners and at-risk students who require additional academic, social and/or medical supports for them to achieve success. This course will examine the root causes that may hinder student success and some of the programs and approaches that have proved successful in meeting their needs.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 813 Dissertation of Practice I 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 814 Dissertation of Practice II 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice I.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 815 Dissertation of Practice III 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice II.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 816 Dissertation of Practice IV 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice III.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

Early Childhood (P-3)

Program Overview

This Post-Baccalaureate Teacher Certification Program in Early Childhood Education (P-3) is designed for college graduates seeking initial teacher certification in Early Childhood, Preschool through Grade 3. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 963)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Early Childhood Education (P-3) is a 24-credit graduate program requiring five teacher

preparation courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Certificate Offered

- Early Childhood Certificate (P-3)

Additional requirements for completion

- Completion of all courses before the clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 702 Early Literacy Development for Diverse Learners 3 Credits

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

Prerequisite(s): CURR 700.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

ECED 532 Families, Community, and Diversity in Early Childhood Education 3 Credits

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ECED 550 Development Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.
Prerequisite(s): EDU 106 and EDU 206.

Educational Leadership (M.A.)

Program Overview

The program in Educational Leadership at Rider University prepares candidates for leadership positions at different administrative levels in elementary and secondary schools, colleges and related educational organizations. All programs are accredited. The program has been designed to be developmental and experiential in nature, fostering ethical behavior and the improvement of self and one's profession. Candidates are prepared for leadership opportunities in a collegial and collaborative academic environment that promotes inquiry and discovery, personal growth and initiative, and professional development. The Option Sequences build upon and reference the appropriate professional standards.

Preparing Principals for New Emerging Needs

Rider's Educational Leadership program recognizes that it is principals who are best positioned to lead the effort in their schools to ensure that teaching and learning are as excellent as possible. Principals who have a school-wide focus on better teaching and learning, who know how to create a vision and share authority, and who are prepared to be accountable for achieving the school's educational goals, are vital to ensuring the quality of our children's education. The professionals in the College of Education and Human Services work with the program's participants to develop and evaluate curricula, use data to diagnose student needs, coach teachers, plan professional development in their schools, and establish school-wide norms that support high quality teaching and learning.

Curriculum Overview

Leading to a Master of Arts in Educational Leadership, the Principal Leadership program's cohort-based, executive-style format brings educational peers together to study, network and learn as a unit throughout the program. Participants engage in online classes during the school year and attend scheduled face to face class meetings. The program's flexible, blended learning format recognizes the demands of the teaching profession while maintaining the rigors of a quality leadership training program. Participants pursue their graduate studies without interrupting their professional and personal responsibilities. Candidates complete their graduate studies in two years, and are eligible to apply for both the principal and supervisor certificates.

Educational Leadership Highlights

The 36-credit program of study consists of 12 courses that focus on three areas of leadership:

- personal leadership
- instructional leadership
- school culture leadership

An accomplished and distinguished faculty whose members bring deep practical and theoretical knowledge to their disciplines lead the program. There is close integration of coursework and fieldwork, using techniques such as case studies, problem-based learning and journaling to encourage continuous reflection about the connections between theory and practice. The curriculum heavily emphasizes teaching and learning, school redesign and collaborative decision-making. Relevant field-based experiences (Leadership Growth Projects) are also integrated throughout the program of study, beginning with the very first course.

Planned Internship Experiences

This year-long aspect of the program emphasizes both the management and instructional facets of leadership for increased student performance. Coordinated by the program director at Rider and a school-based mentor, participants develop the skills needed to strategically transform public schools that prepare students for college and career success.

¹ This course should be taken in the fall semester.

² This course should be taken in the spring semester.

Notes:

1. Meet general master's degree requirements.
2. Candidates will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted curriculum content standards, professional development standards, and National/State school leadership standards.
3. Develop and refine the personal leadership platform statement throughout the program.
4. Complete a 9–12 hour standards and outcome-based growth project in each class and a 300 hour “capstone internship” in the Seminar/Practicum courses in Educational Leadership (EDAD 591/EDAD 592). Teacher Leadership candidates need only complete a 150 hour “capstone internship” in the Seminar/Practicum course EDAD 510.
5. Submit an electronic Leadership Growth Project Portfolio.
6. Complete a comprehensive standards-based self-assessment.
7. Complete a “Capstone School Improvement/Change Project.”

Courses and Descriptions

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, and national school leadership standards.

Prerequisite(s): CURR 531.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/ research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 505.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

EDUC 515 Issues in American Schools and Society 3 Credits

This course is designed to examine contemporary educational issues impacting on schools and to re-examine the purposes of schooling in a democratic society. Students will explore current and emerging policy issues and the demands for reform in schools and districts. Emphasis will be placed on identifying and developing politically feasible responses to policy issues and procedural problems facing educational leaders today. The role of the leader in promoting the development of a collaborative institutional culture and climate and the identification of best-practice strategies to involve community stakeholders in the development of policies and programs will be emphasized. Effective communication models for use within the school, district and greater community and the use of different media and technology formats will be examined and evaluated. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Elementary (K-6)

Program Overview

This Post-Baccalaureate Elementary Education Teacher Certification Program is designed for college graduates seeking initial teacher certification in Elementary (K-6), Kindergarten through Grade 6. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 963)

Curriculum Overview

The Post-Baccalaureate Elementary K-6 Teacher Certification Program is a 21-graduate credit program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 702 Early Literacy Development for Diverse Learners 3 Credits

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

Prerequisite(s): CURR 700.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 715 Inclusive Elementary Science, Arts, & Social Studies Teaching 3 Credits

This course provides aspiring elementary school teachers with a variety of developmentally appropriate options for designing, implementing, and evaluating curriculum and instruction in science, social studies, and the arts. Using NJ Student Learning Standards, emphasis is placed on inclusive practices and differentiation of instruction (e.g., modifying curriculum planning, learning environments, and instructional materials, content, processes, and products), curriculum integration, thematic unit and lesson planning, various teaching strategies, hands-on learning experiences, inquiry learning, career readiness skills, higher-order thinking, reflective practice, and various assessment strategies. Other facets of teaching also are addressed or reviewed in the course. These include the characteristics and needs of students with disabilities motivation, classroom management, and becoming a team member of a school faculty. Candidates also refine their pedagogical knowledge and skills by participating in the modification of instruction to meet the needs of diverse learners in nearby school settings.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

Endeavor/Rider Certificate in STEM Education

Program Overview

The Endeavor/Rider Certificate in STEM Education is a 15 credit experience. Participants will complete 5 approved online courses. The courses are designed to enhance knowledge and ability to deliver instruction in Science and Math content. The Endeavor/Rider Certificate in STEM Education is appropriate for a wide range of educators looking to share their knowledge with a classroom, school or district.

Courses and Descriptions

CURR 517 Teaching and Learning Number and Operations 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Content and Mathematical Practices.

CURR 520 Teaching and Learning Geometric Understanding 3 Credits

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 522 Teaching and Learning Measurement and Data 3 Credits

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

CURR 640 Teaching and Learning Physical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected physical science (physics and chemistry) topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 641 Teaching and Learning Life Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 642 Teaching and Learning Earth and Space Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 643 Engineering Solutions to the Challenges of Contemporary Science Issues 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 644 Teaching and Learning Chemical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be placed on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

CURR 660 Authentic Data in the Elementary STEM Classroom. 3 Credits

Young learners can think deeply about content and make meaningful connections between their experiences, natural phenomena, and authentic data when teachers integrate data in purposeful ways. In this course, teachers construct student-centered STEM investigations integrating real-world scientific and mathematical data and build their understanding of the theoretical basis for this work. Participants gain knowledge of STEM resources, learn to access entry points for STEM in elementary classrooms and foster engaging contexts, like engineering, coding, and NASA mission exploration. Teachers explore the synergies between Common Core State Standards and Next Generation Science Standards for a productive and exciting learning environment that prepares students for ongoing interest in STEM. This course is recommended as a foundation for the STEM certificate program.

CURR 661 Authentic Data in the Secondary STEM Classroom 3 Credits

Middle and High School students are capable of deep sense making when teachers utilize engaging STEM classroom practices to teach content with authentic data connections. In this course, teachers learn to apply research-based best practices central to today's classrooms. In a collaborative professional learning environment, they build knowledge of resources for accessing, analyzing, and making use of authentic data in meaningful activities. Coursework includes planning student-centered lessons that integrate data, building cultural relevance with engaging phenomena, and developing meaningful assessments for STEM activities. Participants identify how to integrate engineering design into the STEM classroom and learn how to represent the Nature of Science as students develop conceptual understanding and apply critical thinking to real-world decisions. A library of content rich lessons becomes available to all participants through a shared online community. This course is recommended as a foundation for the STEM certificate program.

CURR 662 Eyes on Earth: Teaching Earth Science from Space (PK-8) 3 Credits

This course will take participants through a journey about space exploration and specific NASA missions that examine components of earth. Participants will learn science content grounded in Earth's Lithosphere, Hydrosphere, Atmosphere, and Biosphere. By learning to use authentic data from NASA and other sources participants will experience an exploratory approach to learning about the Earth, and then bring these experiences to their own classrooms. Teachers will utilize several web-based tools and real-time data along with the three-dimensional learning in the Next Generation Science Standards to create lessons that can be used directly in the classroom.

CURR 663 Lessons from the Ocean: Science on the Water Planet (Grades 2-12) 3 Credits

Bring the ocean into your classroom by using Earth's waters as a context for standards-based STEM content. The ocean is critical to the functioning of the Earth system, and is an authentically integrated context for learning about topics such as density, weather and climate, heat transport, environmental issues, biogeochemical cycles, mathematics, and much more. Access a myriad of data sets to apply science concepts and make connections between the ocean and atmosphere, living and nonliving parameters, and life on land, as well as in the deep sea. Use the context of the ocean to teach Next Generation Science Standards topics with deep understanding and meaning for learners.

CURR 664 The Arts in STEM: Advancing Meaningful Integration (K-12) 3 Credits

Apply art in the context of exciting STEM concepts and learn to integrate art, science, math, technology, and engineering in more meaningful ways in your classroom. At the core of the STEM Education movement are critical thinking, creativity, problem solving, and authentic learning environments that engage diverse students in meaningful ways with content. The many mediums for art and artistic expression are a valuable component of communication and expression. Scientists and researchers at NASA and across the globe use myriad forms of art in their work. This course invites students to take a close look at the incorporation of art in the STEM classroom and provides resources, exemplars, and access to collaborative support for arts integration.

CURR 665 Climate Change with NSF SPRINTT 3 Credits

Award-winning curriculum and eloquent, online student investigations help students study science concepts emphasized in the Next Generation Science Standards, in the context of Earth's Polar Regions to better understand the complexity of Earth's climate and how it is changing. View the Earth using real scientific data from satellites and western researchers. Then, consider the lens of indigenous peoples of the Arctic. Examine tons of data and changes in ice, permafrost, weather patterns, biological change, and more as you conduct research with simple-to-use, web-based instructional tools, using authentic data sets and models to study our planet's past, present, and future climate. Interdisciplinary investigations address many Common Core State Standards in reading, writing, science, and technical subjects as well as mathematics in the context of climate science.

CURR 666 Exploring Mars: A New Twist on Science (or Math) 3 Credits

Use a wealth of data sets and technological tools to explore and understand features of Earth's neighbor, the Red Planet. Look for and study the physical and chemical evidence of water and ice; compare erosion patterns on Mars and Earth; and make inferences about the planet's history as you study both its geologic features, including volcanoes and craters, and the physics of the atmosphere. Teach Next Generation Science Standards topics in Earth, physical, and chemical science integrating mathematics, in the context of Mars using recent data from Curiosity Rover and other missions.

CURR 667 Physical Science in Motion: Classroom Applications 3 Credits

Physical science, when applied, makes tough-to-understand concepts easy and fun. Participants learn to solve problems relating to one-dimensional motion; become acquainted with and apply Newton's Laws of Motion and equilibrium of forces; learn about constant acceleration and gravitational acceleration; investigate concepts in aerodynamics; and learn about two-dimensional motion. Participants will use free, simple-to-use, software simulations from NASA Glenn Research Center, which help to present these concepts for you, and, then, your students, in the context of aeronautics, including airplane design, rocketry, sports, and more. A carefully developed resource page provides access to excellent resources and engaging activities for implementing course content in your classroom with important connections to Next Generation Science Standards and Common Core mathematics.

CURR 668 Coding, Robotics, and 1:1 Devices 3 Credits

Learn applications of Coding as a mathematics pedagogy, explore opportunities for Robotics, and learn cutting-edge implementation of One-to-One Devices (1:1) in K-12 classrooms. Participants learn about and explore best practices in the newest learning pedagogies and technologies. Whether you are already involved, or looking to integrate these cutting-edge tools and strategies for the classroom, you will begin to expand your reach for enhancing student learning. Scaffolded to allow success at all grade levels, Coding, Robotics, and 1:1 Devices offers resources for application into elementary, middle, and high school. Participants will interact with no-fee computer programming, robotics opportunities, and the latest uses of devices. All participants have the opportunity to work with innovative technologies and interact with talented educators, practitioners and special guests who are already making a difference in K-12 classrooms.

CURR 669 Culturally Relevant Pedagogy in the STEM Classroom 3 Credits

Classrooms comprise individual learners, each bringing their own culture and experiences to the learning environment. The value and strength of diversity has become increasingly described in educational literature. This course introduces teachers to the curriculum and pedagogical issues relevant to race, language, gender, and socio-economic differences. Participants apply content and pedagogy involving science and mathematics contexts for effective learning. STEM activities will integrate meaningful, engaging practices for teaching diverse learners. The course is differentiated for elementary and secondary school educators to provide relevant connections, to be directly applied, in each participant's classroom.

CURR 670 Life and Marine Science: Tracking Live Marine Animals 3 Credits

Follow marine animals (e.g., polar bears, sea turtles, sharks, and whales) in real-time, and apply life and Earth science topics to the ocean. Study topics such as ecosystems, biodiversity, cell structures, food webs, and conservation, as you make connections to ocean currents, seafloor features, density and more. Discover the importance of the ocean to humans, as well as our impacts, both positive and negative, on marine environments. The in-depth use of data lends itself to Next Generation Science Standards by integrating instructional technology with life, Earth and physical science.

CURR 671 Life in Space: NASA ISS and Astrobiology 3 Credits

The International Space Station (ISS) is an amazing undertaking comprising technology, engineering, science and math—the perfect context for exciting students for learning. NASA research leads to technological advances on Earth and in human space exploration. As NASA plans for manned missions to Mars, scientists explore our solar system and beyond for determining if and where life could exist. Extremophiles are fascinating for teaching Earth science in a context for astrobiology research. The course explores how space travel impacts the human body; growing food in space; engineering protection from radiation, and searching for habitable environments. With its application of subject matter, it offers excellent resources and interactions with NASA scientists, and data for educators to bring the exciting context of space travel to the classroom.

CURR 672 Math Connections to STEM Education 3 Credits

The course introduces a wealth of applied mathematics exercises and activities relevant to integrated STEM assets and science activities. Some are in the realm of topics seen in Earth and Space science and physics. Live presenters break down authentic examples and projects, and demonstrate to educators how problems incorporate Common Core State Standards-based mathematics with applications that meet Next Generation Science Standards performance expectations. Educators survey math and science examples and tools as the course promotes the use of applied mathematics in science, or science in mathematics, to meet content goals in the classroom.

CURR 673 NASA Astronomy and Space Science 3 Credits

Harness your students' enthusiasm for space and astronomy by using astronomical images to enrich your physical, Earth, and life science courses. Measure the speed of an asteroid, learn about erosion on Mars, and see the tracers of life that are visible from space. In this course, we explore the many ways in which real data from NASA's space science and astronomy missions can be used to teach math and science content in your classroom, meeting science and math standards in Next Generation Science Standards and Common Core State Standards. Through the use of cutting-edge technology tools, and with a NASA scientist visiting our class, you will not only learn more about the universe, you will learn how to bring the universe into your education context.

CURR 674 NASA Physics for Real Beginners: Earth, Moon, and Space 3 Credits

Gain an introduction to physics in this conceptual course that uses NASA's space initiatives as the context for content. Learn about gravitation between celestial bodies, how to get a satellite into orbit, what it takes to blast off into space, and more. This course will discuss these and related topics while exploring NASA content related to space and the Hubble Space Telescope and Kepler Missions. Bring cutting-edge examples to your classroom while addressing Next Generation Science Standards performance expectations.

CURR 675 Reading and Writing in the Science Classroom 3 Credits

Discuss and analyze the ways that literacy and science connect in the science classroom, and highlight how reading and writing can be used to increase students' understanding of science content. Focus on how to integrate important literacy skills from Common Core State Standards in your science and STEM classroom to address content standards from Next Generation Science Standards. Cutting-edge strategies and well-founded principles pave the way to success with non-fiction reading material. The manner in which information and scientific content is presented shapes student success, not just for reading, but student writing, organization, and presentation.

CURR 676 The E in STEM: Meaningful Content for Engineering 3 Credits

Learn how to use engineering to make your classroom come alive. Bridge and teach math and science concepts through exciting applications in the Engineering Design Process where you and your students design, test, and evaluate models and real-life applications. Activities are hands-on and emphasize the reciprocities between science, technology, engineering, and mathematics in formal design challenges. Educators enrich classroom curriculum with elements of design in science, mathematics, or technology activities, addressing important Next Generation Science Standards' engineering design practices.

CURR 677 WDLC - Weather Data Learning Center 3 Credits

Use weather data to teach and learn math. This course teaches content in a math curriculum that uses weather data. Weather Data Learning Center demonstrates increases in student performance in grade 4 mathematics. Collect, access, and interpret current real-time imagery, maps and data. Make connections from weather to learn Common Core-based mathematics using various STEM pedagogical strategies. Learn the basics of clouds, air masses, humidity, fronts, pressure, jet stream, and climatic patterns as you apply these ideas to math concepts such as measurement, fractions, number sense, data collection, and analysis.

CURR 678 Action Research in the STEM Classroom 3 Credits

A Capstone Course requirement "option", this course may be part of joint Master's Degree programs, or Endeavor's "5-course" certificate program earning Research Distinction and an award.

CURR 679 Practicum in STEM Leadership 3 Credits

Share your knowledge of STEM teaching and learning with colleagues in your building, district, or region.

CURR 680 STEM Leadership Seminar 3 Credits

The course contains STEM pedagogical content knowledge, incorporating authentic data and using technology as a tool for learning. The course provides a springboard for cultivating problem solving skills, inspiring student research projects, and integrating STEM methods and essential principles addressed in new standards.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

Endeavor/Rider Leadership Certificate in STEM Education

Program Overview

The Endeavor/Rider Leadership Certificate in STEM Education is a 15 credit experience. Participants will complete 5 approved online courses. EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning is taken as the fifth and capstone course in the program. The courses are designed to enhance knowledge and ability to deliver instruction in Science and/or Math content. The Endeavor/Rider Leadership Certificate in STEM Education is appropriate for a wide range of educators looking to share their knowledge with a classroom, school or district.

CURR 517 Teaching and Learning Number and Operations 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Content and Mathematical Practices.

CURR 520 Teaching and Learning Geometric Understanding 3 Credits

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 522 Teaching and Learning Measurement and Data 3 Credits

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

CURR 640 Teaching and Learning Physical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected physical science (physics and chemistry) topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 641 Teaching and Learning Life Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 642 Teaching and Learning Earth and Space Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 643 Engineering Solutions to the Challenges of Contemporary Science Issues 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 644 Teaching and Learning Chemical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be placed on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

CURR 660 Authentic Data in the Elementary STEM Classroom. 3 Credits

Young learners can think deeply about content and make meaningful connections between their experiences, natural phenomena, and authentic data when teachers integrate data in purposeful ways. In this course, teachers construct student-centered STEM investigations integrating real-world scientific and mathematical data and build their understanding of the theoretical basis for this work. Participants gain knowledge of STEM resources, learn to access entry points for STEM in elementary classrooms and foster engaging contexts, like engineering, coding, and NASA mission exploration. Teachers explore the synergies between Common Core State Standards and Next Generation Science Standards for a productive and exciting learning environment that prepares students for ongoing interest in STEM. This course is recommended as a foundation for the STEM certificate program.

CURR 661 Authentic Data in the Secondary STEM Classroom 3 Credits

Middle and High School students are capable of deep sense making when teachers utilize engaging STEM classroom practices to teach content with authentic data connections. In this course, teachers learn to apply research-based best practices central to today's classrooms. In a collaborative professional learning environment, they build knowledge of resources for accessing, analyzing, and making use of authentic data in meaningful activities. Coursework includes planning student-centered lessons that integrate data, building cultural relevance with engaging phenomena, and developing meaningful assessments for STEM activities. Participants identify how to integrate engineering design into the STEM classroom and learn how to represent the Nature of Science as students develop conceptual understanding and apply critical thinking to real-world decisions. A library of content rich lessons becomes available to all participants through a shared online community. This course is recommended as a foundation for the STEM certificate program.

CURR 662 Eyes on Earth: Teaching Earth Science from Space (PK-8) 3 Credits

This course will take participants through a journey about space exploration and specific NASA missions that examine components of earth. Participants will learn science content grounded in Earth's Lithosphere, Hydrosphere, Atmosphere, and Biosphere. By learning to use authentic data from NASA and other sources participants will experience an exploratory approach to learning about the Earth, and then bring these experiences to their own classrooms. Teachers will utilize several web-based tools and real-time data along with the three-dimensional learning in the Next Generation Science Standards to create lessons that can be used directly in the classroom.

CURR 663 Lessons from the Ocean: Science on the Water Planet (Grades 2-12) 3 Credits

Bring the ocean into your classroom by using Earth's waters as a context for standards-based STEM content. The ocean is critical to the functioning of the Earth system, and is an authentically integrated context for learning about topics such as density, weather and climate, heat transport, environmental issues, biogeochemical cycles, mathematics, and much more. Access a myriad of data sets to apply science concepts and make connections between the ocean and atmosphere, living and nonliving parameters, and life on land, as well as in the deep sea. Use the context of the ocean to teach Next Generation Science Standards topics with deep understanding and meaning for learners.

CURR 664 The Arts in STEM: Advancing Meaningful Integration (K-12) 3 Credits

Apply art in the context of exciting STEM concepts and learn to integrate art, science, math, technology, and engineering in more meaningful ways in your classroom. At the core of the STEM Education movement are critical thinking, creativity, problem solving, and authentic learning environments that engage diverse students in meaningful ways with content. The many mediums for art and artistic expression are a valuable component of communication and expression. Scientists and researchers at NASA and across the globe use myriad forms of art in their work. This course invites students to take a close look at the incorporation of art in the STEM classroom and provides resources, exemplars, and access to collaborative support for arts integration.

CURR 665 Climate Change with NSF SPRINTT 3 Credits

Award-winning curriculum and eloquent, online student investigations help students study science concepts emphasized in the Next Generation Science Standards, in the context of Earth's Polar Regions to better understand the complexity of Earth's climate and how it is changing. View the Earth using real scientific data from satellites and western researchers. Then, consider the lens of indigenous peoples of the Arctic. Examine tons of data and changes in ice, permafrost, weather patterns, biological change, and more as you conduct research with simple-to-use, web-based instructional tools, using authentic data sets and models to study our planet's past, present, and future climate. Interdisciplinary investigations address many Common Core State Standards in reading, writing, science, and technical subjects as well as mathematics in the context of climate science.

CURR 666 Exploring Mars: A New Twist on Science (or Math) 3 Credits

Use a wealth of data sets and technological tools to explore and understand features of Earth's neighbor, the Red Planet. Look for and study the physical and chemical evidence of water and ice; compare erosion patterns on Mars and Earth; and make inferences about the planet's history as you study both its geologic features, including volcanoes and craters, and the physics of the atmosphere. Teach Next Generation Science Standards topics in Earth, physical, and chemical science integrating mathematics, in the context of Mars using recent data from Curiosity Rover and other missions.

CURR 667 Physical Science in Motion: Classroom Applications 3 Credits

Physical science, when applied, makes tough-to-understand concepts easy and fun. Participants learn to solve problems relating to one-dimensional motion; become acquainted with and apply Newton's Laws of Motion and equilibrium of forces; learn about constant acceleration and gravitational acceleration; investigate concepts in aerodynamics; and learn about two-dimensional motion. Participants will use free, simple-to-use, software simulations from NASA Glenn Research Center, which help to present these concepts for you, and, then, your students, in the context of aeronautics, including airplane design, rocketry, sports, and more. A carefully developed resource page provides access to excellent resources and engaging activities for implementing course content in your classroom with important connections to Next Generation Science Standards and Common Core mathematics.

CURR 668 Coding, Robotics, and 1:1 Devices 3 Credits

Learn applications of Coding as a mathematics pedagogy, explore opportunities for Robotics, and learn cutting-edge implementation of One-to-One Devices (1:1) in K-12 classrooms. Participants learn about and explore best practices in the newest learning pedagogies and technologies. Whether you are already involved, or looking to integrate these cutting-edge tools and strategies for the classroom, you will begin to expand your reach for enhancing student learning. Scaffolded to allow success at all grade levels, Coding, Robotics, and 1:1 Devices offers resources for application into elementary, middle, and high school. Participants will interact with no-fee computer programming, robotics opportunities, and the latest uses of devices. All participants have the opportunity to work with innovative technologies and interact with talented educators, practitioners and special guests who are already making a difference in K-12 classrooms.

CURR 669 Culturally Relevant Pedagogy in the STEM Classroom 3 Credits

Classrooms comprise individual learners, each bringing their own culture and experiences to the learning environment. The value and strength of diversity has become increasingly described in educational literature. This course introduces teachers to the curriculum and pedagogical issues relevant to race, language, gender, and socio-economic differences. Participants apply content and pedagogy involving science and mathematics contexts for effective learning. STEM activities will integrate meaningful, engaging practices for teaching diverse learners. The course is differentiated for elementary and secondary school educators to provide relevant connections, to be directly applied, in each participant's classroom.

CURR 670 Life and Marine Science: Tracking Live Marine Animals 3 Credits

Follow marine animals (e.g., polar bears, sea turtles, sharks, and whales) in real-time, and apply life and Earth science topics to the ocean. Study topics such as ecosystems, biodiversity, cell structures, food webs, and conservation, as you make connections to ocean currents, seafloor features, density and more. Discover the importance of the ocean to humans, as well as our impacts, both positive and negative, on marine environments. The in-depth use of data lends itself to Next Generation Science Standards by integrating instructional technology with life, Earth and physical science.

CURR 671 Life in Space: NASA ISS and Astrobiology 3 Credits

The International Space Station (ISS) is an amazing undertaking comprising technology, engineering, science and math—the perfect context for exciting students for learning. NASA research leads to technological advances on Earth and in human space exploration. As NASA plans for manned missions to Mars, scientists explore our solar system and beyond for determining if and where life could exist. Extremophiles are fascinating for teaching Earth science in a context for astrobiology research. The course explores how space travel impacts the human body; growing food in space; engineering protection from radiation, and searching for habitable environments. With its application of subject matter, it offers excellent resources and interactions with NASA scientists, and data for educators to bring the exciting context of space travel to the classroom.

CURR 672 Math Connections to STEM Education 3 Credits

The course introduces a wealth of applied mathematics exercises and activities relevant to integrated STEM assets and science activities. Some are in the realm of topics seen in Earth and Space science and physics. Live presenters break down authentic examples and projects, and demonstrate to educators how problems incorporate Common Core State Standards-based mathematics with applications that meet Next Generation Science Standards performance expectations. Educators survey math and science examples and tools as the course promotes the use of applied mathematics in science, or science in mathematics, to meet content goals in the classroom.

CURR 673 NASA Astronomy and Space Science 3 Credits

Harness your students' enthusiasm for space and astronomy by using astronomical images to enrich your physical, Earth, and life science courses. Measure the speed of an asteroid, learn about erosion on Mars, and see the tracers of life that are visible from space. In this course, we explore the many ways in which real data from NASA's space science and astronomy missions can be used to teach math and science content in your classroom, meeting science and math standards in Next Generation Science Standards and Common Core State Standards. Through the use of cutting-edge technology tools, and with a NASA scientist visiting our class, you will not only learn more about the universe, you will learn how to bring the universe into your education context.

CURR 674 NASA Physics for Real Beginners: Earth, Moon, and Space 3 Credits

Gain an introduction to physics in this conceptual course that uses NASA's space initiatives as the context for content. Learn about gravitation between celestial bodies, how to get a satellite into orbit, what it takes to blast off into space, and more. This course will discuss these and related topics while exploring NASA content related to space and the Hubble Space Telescope and Kepler Missions. Bring cutting-edge examples to your classroom while addressing Next Generation Science Standards performance expectations.

CURR 675 Reading and Writing in the Science Classroom 3 Credits

Discuss and analyze the ways that literacy and science connect in the science classroom, and highlight how reading and writing can be used to increase students' understanding of science content. Focus on how to integrate important literacy skills from Common Core State Standards in your science and STEM classroom to address content standards from Next Generation Science Standards. Cutting-edge strategies and well-founded principles pave the way to success with non-fiction reading material. The manner in which information and scientific content is presented shapes student success, not just for reading, but student writing, organization, and presentation.

CURR 676 The E in STEM: Meaningful Content for Engineering 3 Credits

Learn how to use engineering to make your classroom come alive. Bridge and teach math and science concepts through exciting applications in the Engineering Design Process where you and your students design, test, and evaluate models and real-life applications. Activities are hands-on and emphasize the reciprocities between science, technology, engineering, and mathematics in formal design challenges. Educators enrich classroom curriculum with elements of design in science, mathematics, or technology activities, addressing important Next Generation Science Standards' engineering design practices.

CURR 677 WDLC - Weather Data Learning Center 3 Credits

Use weather data to teach and learn math. This course teaches content in a math curriculum that uses weather data. Weather Data Learning Center demonstrates increases in student performance in grade 4 mathematics. Collect, access, and interpret current real-time imagery, maps and data. Make connections from weather to learn Common Core-based mathematics using various STEM pedagogical strategies. Learn the basics of clouds, air masses, humidity, fronts, pressure, jet stream, and climatic patterns as you apply these ideas to math concepts such as measurement, fractions, number sense, data collection, and analysis.

CURR 678 Action Research in the STEM Classroom 3 Credits

A Capstone Course requirement "option", this course may be part of joint Master's Degree programs, or Endeavor's "5-course" certificate program earning Research Distinction and an award.

CURR 679 Practicum in STEM Leadership 3 Credits

Share your knowledge of STEM teaching and learning with colleagues in your building, district, or region.

CURR 680 STEM Leadership Seminar 3 Credits

The course contains STEM pedagogical content knowledge, incorporating authentic data and using technology as a tool for learning. The course provides a springboard for cultivating problem solving skills, inspiring student research projects, and integrating STEM methods and essential principles addressed in new standards.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

Endeavor STEM Concentration

Program Overview

The Master of Arts in Teacher Leadership with a STEM concentration seeks students who wish to enhance their knowledge and ability to deliver content instruction and further develop their leadership skills in educational settings. This program is designed to be developmental and experiential in nature, fostering ethical behavior and the improvement of self and one's profession.

Participants who complete the full master's degree will acquire both content knowledge and the skills needed to be effective teacher leaders in their schools and school districts. The full master's degree program includes both the 21 credit Teacher Leadership core and 15 credits in approved STEM courses. A Capstone Project demonstrating the ability to develop and practice teaching and shared leadership skills is a requirement of this concentration.

Curriculum Overview

Developed as a partnership between Rider University and the U.S. Satellite (Endeavor) Laboratory, the Master of Arts in Teacher Leadership with a STEM concentration is designed to prepare experienced STEM teachers to assume a greater leadership role in their schools, and share their skills and knowledge while remaining active in the classroom.

Degree Offered

Courses and Descriptions

CURR 517 Teaching and Learning Number and Operations 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Content and Mathematical Practices.

CURR 520 Teaching and Learning Geometric Understanding 3 Credits

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 522 Teaching and Learning Measurement and Data 3 Credits

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

CURR 640 Teaching and Learning Physical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected physical science (physics and chemistry) topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 641 Teaching and Learning Life Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 642 Teaching and Learning Earth and Space Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 643 Engineering Solutions to the Challenges of Contemporary Science Issues 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 644 Teaching and Learning Chemical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be place on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

CURR 660 Authentic Data in the Elementary STEM Classroom. 3 Credits

Young learners can think deeply about content and make meaningful connections between their experiences, natural phenomena, and authentic data when teachers integrate data in purposeful ways. In this course, teachers construct student-centered STEM investigations integrating real-world scientific and mathematical data and build their understanding of the theoretical basis for this work. Participants gain knowledge of STEM resources, learn to access entry points for STEM in elementary classrooms and foster engaging contexts, like engineering, coding, and NASA mission exploration. Teachers explore the synergies between Common Core State Standards and Next Generation Science Standards for a productive and exciting learning environment that prepares students for ongoing interest in STEM. This course is recommended as a foundation for the STEM certificate program.

CURR 661 Authentic Data in the Secondary STEM Classroom 3 Credits

Middle and High School students are capable of deep sense making when teachers utilize engaging STEM classroom practices to teach content with authentic data connections. In this course, teachers learn to apply research-based best practices central to today's classrooms. In a collaborative professional learning environment, they build knowledge of resources for accessing, analyzing, and making use of authentic data in meaningful activities. Coursework includes planning student-centered lessons that integrate data, building cultural relevance with engaging phenomena, and developing meaningful assessments for STEM activities. Participants identify how to integrate engineering design into the STEM classroom and learn how to represent the Nature of Science as students develop conceptual understanding and apply critical thinking to real-world decisions. A library of content rich lessons becomes available to all participants through a shared online community. This course is recommended as a foundation for the STEM certificate program.

CURR 662 Eyes on Earth: Teaching Earth Science from Space (PK-8) 3 Credits

This course will take participants through a journey about space exploration and specific NASA missions that examine components of earth. Participants will learn science content grounded in Earth's Lithosphere, Hydrosphere, Atmosphere, and Biosphere. By learning to use authentic data from NASA and other sources participants will experience an exploratory approach to learning about the Earth, and then bring these experiences to their own classrooms. Teachers will utilize several web-based tools and real-time data along with the three-dimensional learning in the Next Generation Science Standards to create lessons that can be used directly in the classroom.

CURR 663 Lessons from the Ocean: Science on the Water Planet (Grades 2-12) 3 Credits

Bring the ocean into your classroom by using Earth's waters as a context for standards-based STEM content. The ocean is critical to the functioning of the Earth system, and is an authentically integrated context for learning about topics such as density, weather and climate, heat transport, environmental issues, biogeochemical cycles, mathematics, and much more. Access a myriad of data sets to apply science concepts and make connections between the ocean and atmosphere, living and nonliving parameters, and life on land, as well as in the deep sea. Use the context of the ocean to teach Next Generation Science Standards topics with deep understanding and meaning for learners.

CURR 664 The Arts in STEM: Advancing Meaningful Integration (K-12) 3 Credits

Apply art in the context of exciting STEM concepts and learn to integrate art, science, math, technology, and engineering in more meaningful ways in your classroom. At the core of the STEM Education movement are critical thinking, creativity, problem solving, and authentic learning environments that engage diverse students in meaningful ways with content. The many mediums for art and artistic expression are a valuable component of communication and expression. Scientists and researchers at NASA and across the globe use myriad forms of art in their work. This course invites students to take a close look at the incorporation of art in the STEM classroom and provides resources, exemplars, and access to collaborative support for arts integration.

CURR 665 Climate Change with NSF SPRINTT 3 Credits

Award-winning curriculum and eloquent, online student investigations help students study science concepts emphasized in the Next Generation Science Standards, in the context of Earth's Polar Regions to better understand the complexity of Earth's climate and how it is changing. View the Earth using real scientific data from satellites and western researchers. Then, consider the lens of indigenous peoples of the Arctic. Examine tons of data and changes in ice, permafrost, weather patterns, biological change, and more as you conduct research with simple-to-use, web-based instructional tools, using authentic data sets and models to study our planet's past, present, and future climate. Interdisciplinary investigations address many Common Core State Standards in reading, writing, science, and technical subjects as well as mathematics in the context of climate science.

CURR 666 Exploring Mars: A New Twist on Science (or Math) 3 Credits

Use a wealth of data sets and technological tools to explore and understand features of Earth's neighbor, the Red Planet. Look for and study the physical and chemical evidence of water and ice; compare erosion patterns on Mars and Earth; and make inferences about the planet's history as you study both its geologic features, including volcanoes and craters, and the physics of the atmosphere. Teach Next Generation Science Standards topics in Earth, physical, and chemical science integrating mathematics, in the context of Mars using recent data from Curiosity Rover and other missions.

CURR 667 Physical Science in Motion: Classroom Applications 3 Credits

Physical science, when applied, makes tough-to-understand concepts easy and fun. Participants learn to solve problems relating to one-dimensional motion; become acquainted with and apply Newton's Laws of Motion and equilibrium of forces; learn about constant acceleration and gravitational acceleration; investigate concepts in aerodynamics; and learn about two-dimensional motion. Participants will use free, simple-to-use, software simulations from NASA Glenn Research Center, which help to present these concepts for you, and, then, your students, in the context of aeronautics, including airplane design, rocketry, sports, and more. A carefully developed resource page provides access to excellent resources and engaging activities for implementing course content in your classroom with important connections to Next Generation Science Standards and Common Core mathematics.

CURR 668 Coding, Robotics, and 1:1 Devices 3 Credits

Learn applications of Coding as a mathematics pedagogy, explore opportunities for Robotics, and learn cutting-edge implementation of One-to-One Devices (1:1) in K-12 classrooms. Participants learn about and explore best practices in the newest learning pedagogies and technologies. Whether you are already involved, or looking to integrate these cutting-edge tools and strategies for the classroom, you will begin to expand your reach for enhancing student learning. Scaffolded to allow success at all grade levels, Coding, Robotics, and 1:1 Devices offers resources for application into elementary, middle, and high school. Participants will interact with no-fee computer programming, robotics opportunities, and the latest uses of devices. All participants have the opportunity to work with innovative technologies and interact with talented educators, practitioners and special guests who are already making a difference in K-12 classrooms.

CURR 669 Culturally Relevant Pedagogy in the STEM Classroom 3 Credits

Classrooms comprise individual learners, each bringing their own culture and experiences to the learning environment. The value and strength of diversity has become increasingly described in educational literature. This course introduces teachers to the curriculum and pedagogical issues relevant to race, language, gender, and socio-economic differences. Participants apply content and pedagogy involving science and mathematics contexts for effective learning. STEM activities will integrate meaningful, engaging practices for teaching diverse learners. The course is differentiated for elementary and secondary school educators to provide relevant connections, to be directly applied, in each participant's classroom.

CURR 670 Life and Marine Science: Tracking Live Marine Animals 3 Credits

Follow marine animals (e.g., polar bears, sea turtles, sharks, and whales) in real-time, and apply life and Earth science topics to the ocean. Study topics such as ecosystems, biodiversity, cell structures, food webs, and conservation, as you make connections to ocean currents, seafloor features, density and more. Discover the importance of the ocean to humans, as well as our impacts, both positive and negative, on marine environments. The in-depth use of data lends itself to Next Generation Science Standards by integrating instructional technology with life, Earth and physical science.

CURR 671 Life in Space: NASA ISS and Astrobiology 3 Credits

The International Space Station (ISS) is an amazing undertaking comprising technology, engineering, science and math—the perfect context for exciting students for learning. NASA research leads to technological advances on Earth and in human space exploration. As NASA plans for manned missions to Mars, scientists explore our solar system and beyond for determining if and where life could exist. Extremophiles are fascinating for teaching Earth science in a context for astrobiology research. The course explores how space travel impacts the human body; growing food in space; engineering protection from radiation, and searching for habitable environments. With its application of subject matter, it offers excellent resources and interactions with NASA scientists, and data for educators to bring the exciting context of space travel to the classroom.

CURR 672 Math Connections to STEM Education 3 Credits

The course introduces a wealth of applied mathematics exercises and activities relevant to integrated STEM assets and science activities. Some are in the realm of topics seen in Earth and Space science and physics. Live presenters break down authentic examples and projects, and demonstrate to educators how problems incorporate Common Core State Standards-based mathematics with applications that meet Next Generation Science Standards performance expectations. Educators survey math and science examples and tools as the course promotes the use of applied mathematics in science, or science in mathematics, to meet content goals in the classroom.

CURR 673 NASA Astronomy and Space Science 3 Credits

Harness your students' enthusiasm for space and astronomy by using astronomical images to enrich your physical, Earth, and life science courses. Measure the speed of an asteroid, learn about erosion on Mars, and see the tracers of life that are visible from space. In this course, we explore the many ways in which real data from NASA's space science and astronomy missions can be used to teach math and science content in your classroom, meeting science and math standards in Next Generation Science Standards and Common Core State Standards. Through the use of cutting-edge technology tools, and with a NASA scientist visiting our class, you will not only learn more about the universe, you will learn how to bring the universe into your education context.

CURR 674 NASA Physics for Real Beginners: Earth, Moon, and Space 3 Credits

Gain an introduction to physics in this conceptual course that uses NASA's space initiatives as the context for content. Learn about gravitation between celestial bodies, how to get a satellite into orbit, what it takes to blast off into space, and more. This course will discuss these and related topics while exploring NASA content related to space and the Hubble Space Telescope and Kepler Missions. Bring cutting-edge examples to your classroom while addressing Next Generation Science Standards performance expectations.

CURR 675 Reading and Writing in the Science Classroom 3 Credits

Discuss and analyze the ways that literacy and science connect in the science classroom, and highlight how reading and writing can be used to increase students' understanding of science content. Focus on how to integrate important literacy skills from Common Core State Standards in your science and STEM classroom to address content standards from Next Generation Science Standards. Cutting-edge strategies and well-founded principles pave the way to success with non-fiction reading material. The manner in which information and scientific content is presented shapes student success, not just for reading, but student writing, organization, and presentation.

CURR 676 The E in STEM: Meaningful Content for Engineering 3 Credits

Learn how to use engineering to make your classroom come alive. Bridge and teach math and science concepts through exciting applications in the Engineering Design Process where you and your students design, test, and evaluate models and real-life applications. Activities are hands-on and emphasize the reciprocities between science, technology, engineering, and mathematics in formal design challenges. Educators enrich classroom curriculum with elements of design in science, mathematics, or technology activities, addressing important Next Generation Science Standards' engineering design practices.

CURR 677 WDLC - Weather Data Learning Center 3 Credits

Use weather data to teach and learn math. This course teaches content in a math curriculum that uses weather data. Weather Data Learning Center demonstrates increases in student performance in grade 4 mathematics. Collect, access, and interpret current real-time imagery, maps and data. Make connections from weather to learn Common Core-based mathematics using various STEM pedagogical strategies. Learn the basics of clouds, air masses, humidity, fronts, pressure, jet stream, and climatic patterns as you apply these ideas to math concepts such as measurement, fractions, number sense, data collection, and analysis.

CURR 678 Action Research in the STEM Classroom 3 Credits

A Capstone Course requirement "option", this course may be part of joint Master's Degree programs, or Endeavor's "5-course" certificate program earning Research Distinction and an award.

CURR 679 Practicum in STEM Leadership 3 Credits

Share your knowledge of STEM teaching and learning with colleagues in your building, district, or region.

CURR 680 STEM Leadership Seminar 3 Credits

The course contains STEM pedagogical content knowledge, incorporating authentic data and using technology as a tool for learning. The course provides a springboard for cultivating problem solving skills, inspiring student research projects, and integrating STEM methods and essential principles addressed in new standards.

English (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in English (K-12) is designed for college graduates seeking initial teacher certification in the subject area of English. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 963)

Curriculum Overview

This Post-Baccalaureate Teacher Certification Program in English (K-12) is a 21-credit graduate program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Certificate Offered

- Certificate in English (K-12)

- Completion of all courses before clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

English as a Second Language/ESL (K-12)**Program Overview**

This Post-Baccalaureate Teacher Certification Program in English as a Second Language/ESL (K-12) is designed for college graduates seeking initial teacher certification in the subject area of English as a Second Language. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical

experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

Rider's ESL Program trains future and current educators to develop students' level of English and to be sensitive to the complex backgrounds of culturally and linguistically diverse students. The mission of the ESL Program is to provide the skills, understandings and the development of attitudes necessary to teach culturally and linguistically diverse students for them to achieve their highest potential through education for life.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 963)

Curriculum Overview

This Post-Baccalaureate Teacher Certification Program in English as a Second Language is a 24-credit graduate program requiring five teacher preparation courses to be taken in late afternoons/evenings followed by a semester of full-time student teaching.

Courses and Descriptions

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

English as a Second Language/ESL Endorsement Certificate (P-12)

Program Overview

This English as a Second Language/ESL Endorsement Certificate program is for those educators already certified in another specialization who want to add the endorsement as an ESL teacher to help English Language Learners become fluent in the English language. This is a streamlined, rigorous, and sequential program of professional studies and teacher preparation that combines theory, research, fieldwork, and practice.

Curriculum Overview

This endorsement certificate provides ESL teaching credentials for those already certified in another specialization. It is a 15-credit program requiring five teacher preparation courses offered in the late afternoon/evening.

Certificate Offered

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

Higher Education Assessment, Analytics, and Change Management M.S.

Overview

The M.S. in Higher Education Assessment, Analytics, and Change Management is an applied interdisciplinary online degree program that fuses education and business practices to improve institutional function and influence. The 30-credit accelerated and fully online curriculum helps students use data, research, theory, and analytics to understand how higher education institutions identify and improve performance outcomes. Students will become change leaders as they develop expertise in higher education administration, organizational performance, data mining, analytics, and change leadership.

The program is intended to advance the careers of educational professionals interested in institutional research, outcomes assessment, enrollment management, data analytics, and organizational effectiveness. The primary target audience will be professionals working in institutions of higher education who have experience or responsibilities in the aforementioned areas. Secondary audiences may be those working in the aforementioned areas but at the K-12 level or in educational services organizations. Both rising education disruptors and seasoned professionals will find new tools, practices, and credentials to create stronger, more effective higher education organizations.

Curriculum Overview

The 30-credit program serves those who work in a range of higher education functions and provides coursework to promote and support strategic thinking and leadership of organizational change through data analytics and collaborative decision making. Courses are offered fully online over seven weeks in the fall, spring, and summer semesters providing students with flexibility in developing their own program plan.

For those professionals who are not seeking a degree, an opportunity for professional development is provided via a noncredit option, the Higher Education Assessment Certificate (<https://www.rider.edu/academics/>

[colleges-schools/college-education-human-services/certificates-endorsements/higher-education-assessment/](https://www.rider.edu/academics/colleges-schools/college-education-human-services/certificates-endorsements/higher-education-assessment/)).

Students in this program will:

- Comply with the general requirements concerning graduate study at the master's degree level.
- Enroll in graduate study at Rider for no fewer than two academic semesters or the equivalent thereof.
- Complete at least 30 credits of graduate study.
- Successfully pass a culminating experience and related written requirements.
- Maintain a GPA of "B" (3.0) or better for work submitted for the master's degree.
- Complete the program within six years of the date the student enrolled in his/her first course unless an extension is approved by the Department of Graduate Education, Leadership, and Counseling.

Academic Plan Options:

Full-Time Study (p. 909)

Part-Time Study (p. 909)

The following educational plan is provided as a sample only. Students may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. A focus on determining what should be assessed in academic and administrative units and strategies for initiating performance assessment programs is reviewed.

EDUC 542 Assessment of Student Learning in Higher Education 3 Credits

This course examines institutional effectiveness matters focusing on assessment processes in higher education. It explores topics such as the evaluation of academic programs, assessment of student learning outcomes, and involvement in accreditation and accountability demands in higher education. Here, the focus is on how colleges and universities are doing assessment, at the classroom, program, and institutional levels. The course covers the pragmatic planning skills and decision-support tools relevant to assessing student learning. Just as businesses are expected to adhere to compliance and ethics standards, this course provides an in-depth look at how universities' adherence to standards pertaining to academic success can and will lead to an assurance that accredited universities are achieving their institutional goals, meeting the public's' expectations, and realizing their greater societal mission.

EDUC 543 Communicating Educational Data 3 Credits

Through this course, students will develop skills in statistical communication, incorporating data into delivery methods such as writing, public speaking, teaching, informal conversation and collaboration, programming, and graphic visualizations. Students will understand the importance of creating a data-informed culture and how it contributes to an organization's success. They will also learn methods and strategies of how to communicate to a non-technical audience.

EDUC 545 Capstone Seminar in Institutional Effectiveness 3 Credits

This course will offer students an opportunity to reflect on their own work, considering their development as scholars, practitioners, and leaders in the field of higher education. Students will demonstrate mastery of content through a significant project adapted to the professional requirements of a practicum site or their current employer, which will require students to access, analyze, manage, and present data to an organization's decision makers. The goal is to provide an opportunity to apply what students have learned about how to make data-driven decisions to a real business or operational challenge faced by a higher education organization.

Prerequisite(s): Requires approval from Program Director. Must have completed all other program requirements.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

Higher Education Assessment Certificate

Program Overview

This certificate program provides an opportunity for educational professionals to earn a credential in organizational and learning outcome assessment. The program is intended to advance the careers of educational professionals interested in institutional research, outcomes assessment, enrollment management, and organizational effectiveness. The primary target audience will be professionals working in institutions of higher education who have experience or responsibilities in the aforementioned areas. Secondary audiences may be those working in the aforementioned areas but at the K-12 level or in educational services organizations.

Curriculum Overview

Students must have completed an undergraduate degree with a minimum 2.7 GPA before applying to the program. This 15-credit program of study consists of five courses offered online in an accelerated, seven-week format.

Select one of the following:		3
EDUC 525	The Higher Education Organization or EDUC 543 Communicating Educational Data	
Total Credits		15

Courses and Descriptions

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. A focus on determining what should be assessed in academic and administrative units and strategies for initiating performance assessment programs is reviewed.

EDUC 542 Assessment of Student Learning in Higher Education 3 Credits

This course examines institutional effectiveness matters focusing on assessment processes in higher education. It explores topics such as the evaluation of academic programs, assessment of student learning outcomes, and involvement in accreditation and accountability demands in higher education. Here, the focus is on how colleges and universities are doing assessment, at the classroom, program, and institutional levels. The course covers the pragmatic planning skills and decision-support tools relevant to assessing student learning. Just as businesses are expected to adhere to compliance and ethics standards, this course provides an in-depth look at how universities' adherence to standards pertaining to academic success can and will lead to an assurance that accredited universities are achieving their institutional goals, meeting the public's expectations, and realizing their greater societal mission.

EDUC 543 Communicating Educational Data 3 Credits

Through this course, students will develop skills in statistical communication, incorporating data into delivery methods such as writing, public speaking, teaching, informal conversation and collaboration, programming, and graphic visualizations. Students will understand the importance of creating a data-informed culture and how it contributes to an organization's success. They will also learn methods and strategies of how to communicate to a non-technical audience.

Higher Education Leadership Certificate

Higher education is continually changing. The Higher Education Leadership Certificate will help professionals stay abreast of those changes. The coursework in this Graduate Certificate covers four critical areas that together describe how institutions of higher learning operate. Major content areas are: how colleges and universities organize themselves; how they affect students in terms of learning and development; how they are shaped by the larger environment and legal mandates; and how they change and adapt to the changing landscape of education.

The coursework is aimed at working professionals who want to deepen their knowledge of functions such as student affairs, to gain an understanding of how schools assess, plan and change, and also who want to develop insight into the complex and changing "big picture" of higher education.

Students will earn a Graduate Certificate upon completion of the four required courses. Students who wish to earn the MA in Organizational Leadership (p. 928) or the MS in Higher Education Assessment, Analytics, and Change Management (p. 908) programs may use the Higher Education Leadership Certificate course credits towards those programs.

EDUC 541	Assessing Organizational Performance in Higher Education	
EDUC 542	Assessment in Higher Education	
Total Credits		12

Courses and Descriptions

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. Life and Career Coaching Certificate

Program Overview

The Life and Career Coaching certificate program at Rider University is designed to meet the educational requirements for certification as a Board Certified Coach through the Center for Credentialing and Education, Inc. (<http://www.cce-global.org/bcc/>) Coaches are helping professionals who assist clients in achieving goals in areas such as life transitions, significant relationships, physical health, emotional well-being, career choices, and spirituality. Some coaches carve out a niche by working with business leaders as executive coaches. Coaches differ from other mental health professionals in that they do not work with clients with mental disorders.

Curriculum Overview

There are three pathways to completion of required coursework, depending on a student's educational and professional background. These pathways range from one to three courses.

Certificate Offered

Life and Career Coaching Certificate Requirements

There are three pathways to the Life and Career Coaching certificate in order to meet the educational requirements for certification, depending on a student's educational and professional background.

For students who hold a *bachelor's degree or a graduate degree in a field outside of social or behavioral science* (e.g. mathematics, biology), three courses are required.

(9 credits)

Code	Title	Credits
COUN 500	Introduction to Counseling and Helping Professions	3
CNPY 502	Theories of Counseling and Helping Professions	3
COUN 505 or COUN 504	Vocational/Career Development Vocational/Career Development in Educational Settings	3

For students who hold a *master's degree in counseling or a doctoral degree in a social or behavioral science* (e.g. social work, education, health, or business), one course is required.

(3 credits)

Code	Title	Credits
COUN 501	Coaching Principles and Practices	3

For students who hold a *master's degree in a social or behavioral science other than counseling* (e.g. social work, education, health, or business), two courses are required.

(6 credits)

Code	Title	Credits
COUN 501 or CURR 501	Coaching Principles and Practices Coaching Principles and Practices	3
Choose one of the following electives:		3
COUN 504 or CURR 504	Vocational/Career Development in Educational Settings Vocational/Career Development in Educational Settings	
COUN 505	Vocational/Career Development	
COUN 550	Counseling and Helping Techniques Laboratory	

Courses and Descriptions

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 501 Coaching Principles and Practices 3 Credits

The course covers core coaching competencies, including coaching screening and orientation, fundamental skills, assessment, approaches for organizations, and coaching ethics. The course meets all 30-hour educational requirements for certification as a Board Certified Coach (BCC) through the Center for Credentialing and Education and is required course for the 60-hour BCC educational requirements.

COUN 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This is a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

CURR 501 Coaching Principles and Practices 3 Credits

This course is an introduction to the profession of coaching for educators. It is designed to fulfill the educational requirements for certification as a Board Certified Coach through the Center for Credentialing and Education (CCE). The CCE competencies for certification provide the basis for course material.

CURR 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design for educators who work in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

Master of Science in Nursing and Post-Master's Certificate

Overview

The Master of Science in Nursing (M.S.N.) program offers an educational pathway to prepare baccalaureate level, registered nurses that are seeking a graduate degree that provides eligibility for nurse practitioner (NP) certification. The M.S.N. program offers three NP concentrations; Adult Gerontology Primary Care, Psychiatric-Mental Health Nurse, and Family. This program offers Fall, Spring, and Summer admission. Academic plans vary depending on the initial semester of enrollment and the student's progression in the courses. Please review the sample academic plans of study for the Family (p. 916), Adult-Gerontology Primary Care (p. 916), and Psychiatric-Mental Health (p. 917) nurse practitioner concentrations.

The Post-master's Certificate in Nursing (P.M.C.) program provides registered nurses and advanced practice registered nurses (APRN) with a M.S.N. degree an alternate pathway to receive eligibility for NP certification. For practicing NPs, the P.M.C. gives students an opportunity to expand their scope of practice with the addition of a certification in a population focus or specialty. The P.M.C. program offers two NP concentrations; Adult Gerontology Primary Care and Family. This program offers Fall semester admission. Plans of study are developed after a review of prior graduate nursing course work, NP certifications, and licensure.

This online, asynchronous program offers diverse approaches to teaching and engaged faculty that encourage self-directed learning and critical reasoning. Regular student participation is expected in all courses

as the graduate nursing program follows the university's academic calendar. Courses are offered in the Fall, Spring, and Summer semesters.

Advanced Pathophysiology and all concentration and practica courses are taught over a full academic semester while the core courses are delivered as 7-week, intensive courses.

Upon completion of the program, graduates will be eligible to sit for the following certification examinations:

- Rider University's family nurse practitioner (FNP) and adult-gerontology primary care nurse practitioner (AGPCNP) concentrations prepare students to sit for the American Nurses Credentialing Center (ANCC) and American Academy of Nurse Practitioners Certification Board (AANPCB) exams.
- Rider University's psychiatric-mental health nurse practitioner (PMHNP) concentration prepares students to sit for the American Nurses Credentialing Center (ANCC) exam.

Graduate Nursing Program Goals

1. Develop advanced practice registered nurses that demonstrate professional, ethical, skilled, and evidence-based practice competencies in their roles.
2. Develop graduates with a sustained commitment to life-long learning, respect for individual differences, and the advancement of the nursing profession.
3. Prepare advanced practice registered nurses as leaders and role models that promote quality, equitable patient care and health promotion at the local, state, national, and global levels.
4. Prepare innovators to collaborate with health care teams and community stakeholders in order to improve health outcomes, eliminate health disparities, and advocate for patients.

Student Learning Outcomes

Students completing the Rider University's Graduate Nursing program will be able to:

1. Synthesize theoretical and empirical knowledge from the physical and behavioral sciences and humanities with nursing theory and advanced nursing practice.
2. Collaborate on the interdisciplinary health team to identify and effect needed change which will improve delivery within specific health care systems.
3. Utilize evidence-based practice recommendations, professional standards of care and research to promote health, prevent disease and improve the health status of individuals, families, groups, communities, and populations.
4. Demonstrate communication skills, including health information management to enhance the quality of care and improve patient outcomes provided at individual and aggregate levels.
5. Utilize leadership skills through interaction with consumers and providers in meeting health needs and advancing nursing goals.
6. Provide culturally competent care to improve health outcomes to all persons regardless of race, sex, sexual orientation, age, socioeconomic status, culture, health care beliefs, and religion.
7. Demonstrate individual responsibility and accountability in defining and advocating for quality care, patient safety and the nursing profession at the local, state, national and global level.

8. Practice in the APRN role independently and collaboratively with an interprofessional team while delivering direct and indirect care services to patients, families, and communities.

609-896-5353
lprol@rider.edu

Master of Science in Nursing Program Requirements

Master of Science in Nursing - Adult-Gerontology Primary Care Nurse Practitioner (p. 915)

Master of Science in Nursing - Family Nurse Practitioner (p. 915)

Master of Science in Nursing - Psychiatric-Mental Health Nurse Practitioner (p. 916)

Admission Requirements

Admission to the M.S.N. program is open to registered nurses with a baccalaureate degree in nursing. Admission to the P.M.C. program is open to registered nurses or advanced practice registered nurses with a master's degree in nursing. Prospective applicants must meet the following criteria, though meeting the minimum criteria does not guarantee admission:

- Provide official transcripts. Nursing degrees must be from NLN-CCNE-accredited schools.
 - M.S.N. - Minimum nursing degree must be a B.S.N.
 - P.M.C. - Minimum nursing degree must be an M.S.N.
- Meet *one of the two* requirements for M.S.N. admission only:
 - Cumulative GPA of 3.0 or higher in the B.S.N. degree program (on a scale of 4.0) with a minimum, cumulative GPA in all nursing courses of a 3.0
 - Cumulative GPA of 3.0 in at least two graduate nursing courses when the B.S.N. cumulative GPA is less than or equal to 2.99
- Completion of undergraduate level, prerequisite courses: Health Assessment, Nursing or Health-Discipline Research, Statistics.
- All current nursing and APRN licenses in good standing and unencumbered.
- Students must meet the "Technical Standards" that are defined in the application for admission.

Applicants to the P.M.C. program from NP programs must present a valid certification and NP licensure in their practice specialty. A gap analysis of previous clinical courses including syllabi and confirmation of clinical hours will be completed to ensure all graduates complete the required number of clinical hours in the population foci at the time the degree is awarded. All documents will be considered upon admission for academic planning.

Applicants to the P.M.C. program from a non-NP M.S.N. will submit syllabi from previous courses. A gap analysis of previous coursework will be completed to ensure all graduates fulfilled the appropriate APRN coursework in Advanced Pathophysiology, Advanced Physical Assessment, and Advanced Pharmacology. All documents will be considered upon admission for academic planning.

Degree Offered

- Master of Science in Nursing (M.S.N.)
- Post-master's Certificate in Nursing (P.M.C.)

Accreditation Statement

The master's degree program in nursing and post-graduate APRN certificate program at Rider University are pursuing initial accreditation by the Commission on Collegiate Nursing Education, 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791. Applying for accreditation does not guarantee that accreditation will be granted.

Post-Master's Certificate Requirements

Individual plans of study are finalized upon admission after a gap analysis of prior graduate course work, clinical hours, licensure with prescriptive authority, and NP certifications are reviewed. The Post-master's certificate requirements below are based on the eligibility requirements for the nurse practitioner certification exams in the Adult-Gerontology Primary Care and Family population foci.

- Post-Master's Certificate - Adult Gerontology Primary Care Nurse Practitioner (p. 917)
- Post-Master's Certificate - Family Nurse Practitioner (p. 917)
- Post-Master's Certificate - Psychiatric Mental Health Nurse Practitioner (available in Fall 2022) (p. 918)

Post-Master's Certificate - Adult Gerontology Primary Care Nurse Practitioner
(24 credits)

Code	Title	Credits
The following courses are required for the certification:		
APRN 5007	Advanced Physical Assessment ¹	3
APRN 5008	Advanced Pharmacology ²	3
APRN 5009	Primary Care of the Young Adult	3
APRN 5010	Young Adult Practicum	3
APRN 5011	Primary Care of the Middle-Aged Adult	3
APRN 5012	Middle-Aged Adult Practicum	3
APRN 5013	Primary Care of the Older Adult	3
APRN 5014	Older Adult Practicum	3
Total Credits		24

¹ APRN 5003 is a prerequisite and should be completed in advance of APRN 5008.
² Students may need to complete APRN 5008 if they do not currently hold prescriptive authority in their nursing practice.

Post-Master's Certificate - Family Nurse Practitioner
(30 credits)

Code	Title	Credits
The following courses are required for the certificate:		
APRN 5007	Advanced Physical Assessment ¹	3
APRN 5008	Advanced Pharmacology ²	3
APRN 5009	Primary Care of the Young Adult	3
APRN 5010	Young Adult Practicum	3

Courses and Descriptions

APRN 5001 Socialization to the APRN Role 3 Credits

The course will examine the critical issues that define the APRN's scope of practice and nurse practitioner competencies. Issues related to health policy, interprofessional collaborative practice, team building, conflict resolution, and leadership will be discussed. Guidelines for resolving professional legal and ethical issues that are often confronted in APRN practice will be analyzed.

APRN 5002 Applied Theory for the APRN Role 3 Credits

This course will demonstrate the use of science-based theories to analyze healthcare delivery at the patient, family, community and organizational levels in order to improve health outcomes. Theories addressing nursing practice, teaching and learning, health behaviors, and families within the context of cultural influences will be explored. Issues related to ethical decision making and advocacy in APRN practice will be analyzed.

APRN 5003 Advanced Pathophysiology 3 Credits

This course analyzes alterations in various physiological systems. General physiological and pathophysiological principles that regulate inflammation, cellular/tissue repair, genetics, immunity, and cancer will be discussed. Pathophysiology of disease processes in primary care conditions across the lifespan will be examined.

APRN 5004 Clinical Prevention and Population Health 3 Credits

This course will enable students to analyze epidemiological and biostatistical data in the development, implementation, and evaluation of clinical prevention and population health initiatives. Concepts of public health, health promotion, morbidity and mortality, determinants of health, and cultural diversity and sensitivity will be incorporated into the advanced practice nursing role.

APRN 5005 Research and Quality Improvement 3 Credits

This course builds a foundation for advanced clinical scholarship and healthcare improvement while developing skills in analytical methods for evidence-based practice. Concepts of quality process, regulatory practices, root cause analysis, and problem identification will be explored.

APRN 5006 Health Delivery and Information Systems 3 Credits

This course focuses on trends, issues, and policies related to the transformation of the U.S. health care system. Emphasis will be placed on the economics of care and equity, access, and quality of the health care system. The role of the APRN in the utilization of information systems to reduce health disparities and promote quality initiatives will be presented.

APRN 5007 Advanced Physical Assessment 3 Credits

This course builds upon scientific underpinnings to enable the learner to develop a holistic approach to culturally sensitive health assessment including health related behaviors across the life span. The student begins to synthesize data in diagnostic reasoning to determine appropriate and effective healthcare strategies, including disease prevention, health promotion and health restoration. Prerequisite(s): APRN 5003.

Corequisite(s): APRN 5008.

APRN 5008 Advanced Pharmacology 3 Credits

This course is designed to meet the needs of APRNs that are eligible for prescriptive privileges. Content will focus on the pharmacological management of self-limited, episodic complaints and stable chronic disease states across the life span. Emphasis is placed on the decision-making process utilized to safely and effectively prescribe and monitor pharmacotherapeutics appropriate to the client situation. Prerequisite(s): APRN 5003.

Corequisite(s): APRN 5007.

APRN 5009 Primary Care of Young Adult 3 Credits

This course focuses on the care of young adults and women. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions as well as application of U.S. health promotion guidelines and screening for young adults and women. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for young adults and women. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5010.

APRN 5010 Young Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5009 - Primary Care of the Young Adult. The focus is on primary care of the young adult client and women. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5009.

APRN 5011 Primary Care of the Middle-Aged Adult 3 Credits

This course focuses on the health state of middle-aged adults. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions, as well as application of U.S. health promotion guidelines and screening for middle-aged adults. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of adults. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5012.

APRN 5012 Middle-Aged Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5011 - Primary Care of the Middle-Aged Adult. The focus is on primary care of common acute and chronic disease processes of the middle-aged population. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5011.

APRN 5013 Primary Care of the Older Adult 3 Credits

This course focuses on the health state of older adults. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions, as well as application of U.S. health promotion guidelines and screening for older adults. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of older adults. Prerequisite(s): APRN 5011, APRN 5012.

Corequisite(s): APRN 5014.

APRN 5014 Older Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5013 - Primary Care of the Older Adult. The focus is on primary care of common acute and chronic disease processes of the older adult population. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5011, APRN 5012.

Corequisite (s): APRN 5013.

APRN 5015 Primary Care of the Pediatric and Perinatal Patient 3 Credits

This course focuses on the health state of pediatric and perinatal patient populations. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions as well as application of U.S. health promotion guidelines and screening for pediatric and perinatal patients. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of adults.

Prerequisite(s): APRN 5013, APRN 5014.

Corequisite(s): APRN 5016.

APRN 5016 Pediatric Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in Primary Care of the Pediatric and Perinatal Patient. The focus is on primary care of common acute and chronic disease process of the pediatric and perinatal populations. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 120 clinical hours. Prerequisite(s): APRN 5013, APRN 5014.

Corequisite(s): APRN 5015.

APRN 5023 Advanced Psychopharmacology 2 Credits

The course builds on the knowledge from advanced pharmacology and provides an in-depth examination of drug classifications related to the treatment of psychiatric disorders across the lifespan. The pharmacokinetics and pharmacodynamics of psychopharmacologic agents and therapeutic treatment plans will be emphasized. Special topics on issues related to polypharmacology, drug abuse, and psychiatric-mental health nurse practitioner prescribing issues are discussed. Prerequisite(s): APRN 5008

Corequisite(s): APRN 5024, APRN 5025.

APRN 5024 Psychiatric Assessment and Diagnosis 3 Credits

This course will examine the advanced concepts of assessment and differential diagnosis in advanced practice, psychiatric-mental health nursing. The Diagnostic and Statistical Manual of Mental Disorders (DSM-5) will be used in clinical decision making to determine screening, assessment, diagnostic studies, and differential diagnoses for psychiatric disorders across the lifespan. A holistic approach to assessment will be incorporated by examining social, genetic, cultural, ethnic, and gender elements in psychiatric illnesses. Prerequisite(s): APRN 5007

Corequisite(s): APRN 5023, APRN 5025.

APRN 5025 Foundations in Therapy 2 Credits

This course provides a foundation in the application of psychotherapeutic interventions to the management of psychiatric disorders for individuals, families, and groups across the lifespan. The practice of psychotherapy and crisis intervention in the psychiatric-mental health nurse practitioner role will be examined in relation to cultural, ethical, moral, and legal issues.

Corequisite(s): APRN 5023, 5024.

APRN 5026 Psychiatric-Mental Health I 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse adult populations. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for adults with psychiatric disorders. Prerequisite(s): APRN 5023, APRN 5024, APRN 5025
Corequisite(s): APRN 5027.

APRN 5027 Psychiatric-Mental Health Practicum I 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health I. The focus is on psychiatric health care of adults. Students will utilize the necessary resources in health care to optimize health in this population. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5026.

APRN 5028 Psychiatric-Mental Health II 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse older adult populations. Complex disorders will be examined. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for older adults with psychiatric disorders. Prerequisite(s): APRN 5026, APRN 5027
Corequisite(s): APRN 5029.

APRN 5029 Psychiatric-Mental Health Practicum II 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health II. The focus is on psychiatric health care of older adults. Students will utilize the necessary resources in health care to optimize health in this population. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5028.

APRN 5030 Psychiatric-Mental Health III 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse pediatric populations and families. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for children with psychiatric disorders. Prerequisite(s): APRN 5028, APRN 5029
Corequisite(s): APRN 5031.

APRN 5031 Psychiatric-Mental Health Practicum III 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health III. The focus is on psychiatric health care of pediatric patients and families. Students will utilize the necessary resources in health care to optimize health in these populations. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5030.

Mathematics (K–12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in Mathematics (K-12) is designed for college graduates seeking initial teacher certification in the subject area of Mathematics. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is

designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 963)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Mathematics is a 21-credit graduate program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Certificate Offered

- Mathematics (K–12)

- Completion of all courses before the clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 707 Inclusive Methods for Teaching Mathematics 3 Credits

This course critically analyzes the aims of teaching mathematics in secondary schools. Research pertaining to mathematics teaching and learning is analyzed. Demonstration lessons including reflective teaching and individual and group processing are created and carried out to clarify teaching, mathematics curriculum planning using NJ Student Learning Standards in Mathematics, the organization of materials and subject matter, assessment processes classroom management strategies, and awareness of career requirements in STEM fields. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying mathematics curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

Music (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in Music (K-12) is designed for college graduates seeking initial teacher certification in the subject area of Music. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical

experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 963)

Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 712 Inclusive Methods for Teaching Music 3 Credits

This course provides experience with various methods of teaching and learning music K-12. Course readings and field observations focus on inclusive teaching practices in music and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Music/Visual and Performing Arts.

Prerequisite(s): CURR 700, CURR 703, CURR 720.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. NJ Alternate Route Teacher Certification**Overview**

The NJ Alternate Route Teaching Certificate Program (also known as Provisional Teacher Process or PTP) provides rigorous teacher preparation and individualized guidance to help candidates develop knowledge, skills, and confidence as a teacher while teaching with a Certificate of Eligibility (CE) under provisional agreement with a school district. This 2-year program comprises 27 graduate-level credit hours to meet certification requirements. With the addition of just one 3-credit graduate course, candidates in the program can earn their 30-credit Master of Arts in Teaching (MAT) degree.

Certificates Offered

- Art
- Business Education
- Dance
- ESL
- Health and Physical Education
- Science
- Elementary K-6
- English Language Arts

- Mathematics
- Early Childhood P-3
- Social Studies
- Theater
- Music

Courses and Descriptions**BSED 530 Emerging Instructional Strategies in Business Education 3 Credits**

Emphasis is placed on the enhancement of teaching effectiveness in business education as emerging instructional strategies are reviewed and studied. Special attention is devoted to the new technology and its use in business education while focusing attention to the present and future needs of the employer. Current instructional materials are presented and utilized. Master practicing business education teachers will augment the instructor's presentations.

CURR 510 Reflection and Mentoring in Professional Teaching Practice 3 Credits

This course serves as an introduction to professional teaching work in classrooms. The hands-on work in the course complements required classroom observations and reflections. The course uses participants' classroom observations and reflections as the bases for targeted, practical discussions and study on topics such as classroom management, teacher identity and diversity, teaching and content, asking for feedback, and working with mentors.

Prerequisite(s): Permission of Program Director.

CURR 532 Strategies for Curriculum Change 3 Credits

This course will examine organizational skills and knowledge necessary to effect curriculum development and change, K-12. The course will address the socio-political context of curriculum change along with alternative strategies for initiating, implementing and sustaining standards-based curriculum improvements. Topics of study include strategic planning, problem-solving strategies, needs assessments, curriculum alignment, program evaluation, staff development and the organization of staff members for collaborative deliberation and decision making as essential means for promoting successful curriculum change at all levels of schooling. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531.

CURR 541 Assessment and Student Learning 3 Credits

This course provides hands-on opportunities to create and design varied classroom assessments that help teachers align their teaching goals with student learning goals. With a focus on NJ Student Learning Standards across the curriculum content areas and grade levels, assessments will be designed for use in individual teaching practice and with a variety of diverse learners. Topics include designing assignment rubrics and effective essay prompts as well as developing evaluation criteria.

Prerequisite(s): CURR 510, CURR 700.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

CURR 652 Differentiating Instruction for the Gifted and Talented 3 Credits

This course provides the rationale and practical strategies for effective instructional differentiation for the gifted and talented within and beyond the regular classroom. Participants will learn how to differentiate within subject areas by adjusting content, process, product, and learning environment to meet the needs of learners. They also will explore the nature and nuances of differentiation by ability, readiness, and interest, as well as the implications of instructional differentiation for formative and summative assessment. Throughout the course they will design and share examples of differentiation including tiered assignments, complex instruction, independent studies, graphic organizers, and learning contracts.

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 702 Early Literacy Development for Diverse Learners 3 Credits

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

Prerequisite(s): CURR 700.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

CURR 705 Inclusive Methods for Teaching Social Studies 3 Credits

This course addresses the practical and theoretical aspects of teaching social studies to diverse adolescents in secondary schools. Using the NJ Student Learning Standards in Social Studies, candidates will prepare and design curriculum and assessment for students in various learning environments and with diverse learning needs. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying social studies curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 706 Inclusive Methods for Teaching Science 3 Credits

Classroom interaction analysis systems are used in the study of the instructional processes that support inquiry-based science learning. Candidates develop their own repertoires of teaching strategies, classroom management strategies, and awareness of career requirements in STEM fields. Emphases are on the investigation and interpretation of recent curriculum developments in NGSS and NJ Student Learning Standards in Science as well as the use of lab-based processes in science learning. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying science curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 707 Inclusive Methods for Teaching Mathematics 3 Credits

This course critically analyzes the aims of teaching mathematics in secondary schools. Research pertaining to mathematics teaching and learning is analyzed. Demonstration lessons including reflective teaching and individual and group processing are created and carried out to clarify teaching, mathematics curriculum planning using NJ Student Learning Standards in Mathematics, the organization of materials and subject matter, assessment processes classroom management strategies, and awareness of career requirements in STEM fields. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying mathematics curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 711 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. The existing methods course in Dance for beginning teachers is cross-listed with DAN 450.

CURR 712 Inclusive Methods for Teaching Music 3 Credits

This course provides experience with various methods of teaching and learning music K-12. Course readings and field observations focus on inclusive teaching practices in music and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Music/Visual and Performing Arts.

Prerequisite(s): CURR 700, CURR 703, CURR 720.

CURR 713 Inclusive Methods for Teaching Art 3 Credits

This course provides experience with various methods of teaching and learning Art K-12. Course work and fieldwork focus on inclusive teaching practices in art and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Visual and Performing Arts.

Prerequisite(s): CURR 510, CURR 700, CURR 703.

CURR 714 Inclusive Methods for Teaching Health and Physical Education 3 Credits

This course provides experience with various methods of teaching and learning Health and Physical Education K-12. Course work and fieldwork focus on inclusive teaching practices in health and physical education and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Comprehensive Health and Physical Education.

Prerequisite(s): CURR 510, CURR 700, CURR 703.

CURR 715 Inclusive Elementary Science, Arts, & Social Studies Teaching 3 Credits

This course provides aspiring elementary school teachers with a variety of developmentally appropriate options for designing, implementing, and evaluating curriculum and instruction in science, social studies, and the arts. Using NJ Student Learning Standards, emphasis is placed on inclusive practices and differentiation of instruction (e.g., modifying curriculum planning, learning environments, and instructional materials, content, processes, and products), curriculum integration, thematic unit and lesson planning, various teaching strategies, hands-on learning experiences, inquiry learning, career readiness skills, higher-order thinking, reflective practice, and various assessment strategies. Other facets of teaching also are addressed or reviewed in the course. These include the characteristics and needs of students with disabilities motivation, classroom management, and becoming a team member of a school faculty. Candidates also refine their pedagogical knowledge and skills by participating in the modification of instruction to meet the needs of diverse learners in nearby school settings.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 772 Clinical Experience in Teaching Seminar 3 Credits

The Clinical Experience in Teaching Seminar is available only to candidates completing teacher certification through the Alternate Route program and who currently work full-time teaching. Candidates may apply to the program for the Clinical Experience in Teaching Seminar by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area, attend and participate in on-campus seminar, and complete and submit the edTPA required for NJ certification.

Prerequisite(s): CURR 510, CURR 700, CURR 541 and Permission of Program Director.

ECED 550 Development Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

Organizational Leadership M.A.

Program Overview

The Master of Arts (M.A.) in Organizational Leadership

program is an applied program that will enhance your leadership, supervisory and administrative skills. You will learn how to be more effective, strategic and creative in complex organizational settings — and graduate with a vision of leadership, values to guide your decisions, and the knowledge to transform vision into a reality. The program recognizes the value of people-oriented leaders who understand individual strengths and leadership styles, group behaviors and motivation. We offer a relevant, real-world education you can apply immediately to your life's work.

While cultivating the ability to ethically lead organizations is the focus of the program, students will also develop and refine their critical thinking and problem-solving skills, approaches to change management, ability to motivate and empower others, and aptitude to communicate effectively and persuasively. Through a concentration of courses, students will apply the concepts of leadership as they pertain to the advanced study of another academic discipline.

By successfully completing the program, students will develop a core set of leadership competencies that will enable them to:

- develop a personal leadership philosophy and approach to ethical leadership practice;
- understand approaches to leadership practice;
- communicate, interact, and engage effectively with a diverse workforce;
- facilitate major leadership processes;
- lead organizations in a changing landscape; and
- be proficient in enhancing human and organizational performance.

In addition to developing a core set of leadership skills and knowledge, the program (depending on the selected area of concentration) will provide students with skills and knowledge requisite to:

- Higher Education Leadership
- Developing People and Organizations
- Leadership in Counseling-Related Services
- Life and Career Coaching

Curriculum Overview

The 30-credit M.A. in Organizational Leadership can be earned in just two years of study, although most students complete the program in 30 months or longer. Each student completes a capstone course (LEAD 598: Capstone in Organizational Leadership), featuring an action research experience in an organization or an independent research

project. Students' broad understanding of leadership and organizations is accomplished through the program's core courses. Developing an effective leadership practice takes self-knowledge, knowledge of others, financial and strategic acumen, a grasp of contextual forces and organizational dynamics, and a rigorous approach to making decisions and solving problems creatively.

Students may pursue a concentration in the following areas:

- The **Counseling-Related Services concentration** prepares graduates with knowledge of mental health and related issues in order to increase their effectiveness as leaders and change agents in organizations that serve individuals with mental health or wellness needs. Coursework studies include focuses on foundations of counseling, legal and ethical issues of concern to those in the counseling arena, and psychopathology. Students also learn from among courses in vocational and career development, multicultural counseling, or substance abuse counseling.
- The Organizational Leadership Program concentration in **Developing People and Organizations** prepares students to be successful, strategic and impactful professionals who are able to work effectively through others. This program concentration offers insight into human and organizational relationships; creates the capacity for sound analytical judgement; and the ability to see the "big picture" as it relates to an organization and its environment.
- The program concentration in **Higher Education Leadership** prepares graduates for a variety of institutional roles in higher education, with an emphasis on developing leadership skills for organizational change. A unique graduate program for emerging higher education professionals, our program provides you with the leadership capacity to face organizational challenges in today's colleges and universities.
- The **Life and Career Coaching** concentration prepares graduates to form mentoring and coaching relationships to aid others in achieving goals in areas such as life transitions, career choices and work/life balance

Forms of Study

Students take their core courses in an online or hybrid format. Depending on their chosen concentration, they will complete their 30 credit degree in one of two ways. They will complete their studies entirely online, or with a set of classroom, online or hybrid courses. The fully online MA in Organizational Leadership is offered for the Developing People and Organizations and Higher Education Leadership concentration in a traditional or accelerated (7-week) course format and the Life and Career Coaching concentration is offered online with a combination of 7- and 14-week courses.

Degree Offered

- M.A. in Organizational Leadership

Related Programs

- Developing People and Organizations Certificate (p. 879)
- Higher Education Leadership Certificate (p. 911)

Program Requirements

(30 credits)

Group I - Core Courses (15-18 credits)

Group II - Concentration Courses (12 credits)

Organizational Leadership (M.A.)

- Comply with the general requirements concerning graduate study at the master's degree level.
- Enroll in graduate study at Rider for no fewer than two academic semesters or the equivalent thereof.
- Complete at least 30 credits of graduate study.
- Successfully pass a culminating research experience and related written requirements.
- Maintain a GPA of "B" (3.0) or better for work submitted for the master's degree.
- Complete the program within six years of the date the student enrolled in his/her first course unless an extension is approved by the Department of Graduate Education, Leadership, and Counseling.

Group I - Core Courses - Required

Code	Title	Credits
LEAD 500	The Practice of Leadership	3
LEAD 510	Organizations: Design and Dynamics	3
LEAD 531	Developing The Human Side of Organizations	3
LEAD 540	Strategic and Financial Decision-Making in Organizations ¹	0-3
LEAD 550	Organizational Research	3
LEAD 598	Project Seminar in Leadership	3
Total Credits		15-18

¹ LEAD 540 is not a requirement for the concentration in Higher Education Leadership.

Group II - Concentration Courses

Students will be expected to meet the requirements for any one of the four concentrations outlined below.

Developing People and Organizations

Program Goal: Prepare graduates to be strategic professionals who work effectively through others, particularly in the area of organization and human development. This concentration helps students to understand broad organizational concepts that apply to private and non-profit sectors. Students build conceptual understanding and explore connections to applied settings.

Code	Title	Credits
Required courses:		
Must take four courses:		12

Select at least two of the following:

LEAD 511	Facilitating Culture and Process Change in Organizations
LEAD 512	Forms of Diversity in Organizations
LEAD 532	Program Design for Training and Development in Organizations
LEAD 533	Conflict and Crisis Resolution in Organizations
LEAD 534	Facilitation and Team Leadership
May take up to two from the following:	
COUN 505	Vocational/Career Development
COUN 520	Multicultural Counseling and Relationship Development

Courses and Descriptions

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 515 Substance Abuse Counseling 3 Credits

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of a higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. A focus on determining what should be assessed in academic and administrative units and strategies for initiating performance assessment programs is reviewed.

EDUC 542 Assessment of Student Learning in Higher Education 3 Credits

This course examines institutional effectiveness matters focusing on assessment processes in higher education. It explores topics such as the evaluation of academic programs, assessment of student learning outcomes, and involvement in accreditation and accountability demands in higher education. Here, the focus is on how colleges and universities are doing assessment, at the classroom, program, and institutional levels. The course covers the pragmatic planning skills and decision-support tools relevant to assessing student learning. Just as businesses are expected to adhere to compliance and ethics standards, this course provides an in-depth look at how universities' adherence to standards pertaining to academic success can and will lead to an assurance that accredited universities are achieving their institutional goals, meeting the public's expectations, and realizing their greater societal mission.

EDUC 543 Communicating Educational Data 3 Credits

Through this course, students will develop skills in statistical communication, incorporating data into delivery methods such as writing, public speaking, teaching, informal conversation and collaboration, programming, and graphic visualizations. Students will understand the importance of creating a data-informed culture and how it contributes to an organization's success. They will also learn methods and strategies of how to communicate to a non-technical audience.

LEAD 500 The Practice of Leadership 3 Credits

This course allows students to gain an understanding of the practice of leadership and how they can develop as leaders. Students will explore leadership models, creativity in organizations, and approaches to decision making as they begin to form their own leadership philosophy.

LEAD 510 Organizations: Design and Dynamics 3 Credits

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 512 Forms of Diversity in Organizations 3 Credits

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different "worldviews" which organizational members bring into the organization, and how that affects their ability to work together. The course develops students' knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 531 Developing The Human Side of Organizations 3 Credits

This course examines Strategic Human Resources Management (SHRM) within today's organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 532 Program Design for Training and Development in Organizations 3 Credits

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore "real world" applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 533 Conflict and Crisis Resolution in Organizations 3 Credits

Leaders face conflict and crisis in their organizations. Being effective in their resolution is an important leadership attribute. Skills that support positive and integrative outcomes include mediation, negotiation and crisis resolution skills. This course will use multiple case studies and role-playing assignments to engage students in understanding how individuals and teams handle mediation and negotiation scenarios. The course will also use multiple case studies to enhance students' understanding of the components of effective and ineffective leadership for crisis.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 534 Facilitation and Team Leadership 3 Credits

This course examines the characteristics and behaviors of teams that produce good results and/or generate new ideas. The focus of the course is on how to lead high functioning teams and the development of facilitation capabilities, so that students can effectively lead teams and organizations.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 540 Strategic and Financial Decision-Making in Organizations 3 Credits

This course explores the importance of information and financial resources within the culture of organizations, and the necessary relationship that exists between the two. The course draws on current literature and student experience to explore resource management and focuses on the effective use of information resources within the boundaries defined by financial realities. The relationship between data analyses and effective decision-making will be explored.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

LEAD 550 Organizational Research 3 Credits

The purpose of this course is to prepare future organizational leaders to read professional journal articles, plan research, and critique research. The course covers basic research methods, such as experimental, ex post facto, correlational, case study, time series, interviews, surveys, and basic statistics in terms of understanding and selecting statistics. These concepts are taught within the framework of organizational leadership. This course should be taken at the end of your program.

Prerequisite(s): LEAD 500, LEAD 51. Permission of Program Director required.

LEAD 598 Capstone in Organizational Leadership 3 Credits

All MA candidates complete a capstone research project to demonstrate the application of core program competencies to a specific organizational or leadership problem. Reflecting upon their own leadership philosophy developed throughout the program, students will formulate, research, and write a leadership capstone paper that integrates the skills and concepts from the core courses as students use quantitative and qualitative methods to analyze a problem. Core and concentration courses should be completed before taking this course.

Prerequisite(s): Must be taken in last semester of study. Permission of Instructor required.

Post-Baccalaureate Teacher Certification Program

Program Overview

The Post-Baccalaureate Teacher Certification Program (PBTC) is designed for college graduates seeking initial teacher certification. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and

practice. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

Depending on the initial certificate pursued, the program consists of 21 or 24 graduate credits and is designed as a part-time program that may be completed over three semesters. The program is also available in a full-time accelerated format that may be completed within nine months.

Graduate credits earned in the initial teacher certificate program may be combined with courses offered through the Master of Arts in Teaching (MAT) Program to earn a 30-credit MAT degree. In addition to earning the MAT degree, candidates may apply coursework and credits to other Master's programs, endorsements, and/or professional development certificates offered through the Department of Graduate Education, Leadership, and Counseling.

Program Information for Certificates Offered:

Comprehensive Business (K-12) (p. 863)

Dance Certificate (K-12) (p. 874)

Elementary Certificate (K-6) (p. 890)

English as a Second Language/ESL Certificate (P-12) (p. 907)

English Certificate (K-12) (p. 903)

Mathematics Certificate (K-12) (p. 920)

Music Certificate (K-12) (p. 921)

Science Certificate in Biological Science, Chemistry, Earth Sciences,

Physical Science, and/or Physics (K-12) (p. 940)

Social Studies Certificate (K-12) (p. 941)

Theater Certificate (K-12) (p. 964)

World Languages Certificate in French or Spanish (K-12) (p. 966)

Principal Certificate

Program Overview

The Principal certificate in Educational Leadership is a sequence option designed for candidates who aspire to obtain school leadership positions as a director, assistant principal or principal.

Curriculum Overview

Candidates have completed a master's degree and hold New Jersey certification as a supervisor. A second course in leadership (EDAD 592) is required of candidates who have previously taken only one course in a state-approved supervisory certification sequence. Candidates will complete a year-long (300 hours) internship EDAD 591 and EDAD 592 along with a "Capstone School Improvement/Change Project."

The frameworks for the program have been established to meet preparatory requirements as established in the New Jersey

Administrative Code (6A:9-12.5) as well as the challenges, responsibilities, and opportunities inherent in educational leadership.

Courses and Descriptions

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 505.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

Reading Specialist Endorsement

Program Overview

The Reading Specialist endorsement is designed for educators who have an earned master's degree in education or a related field and are interested in becoming a reading or literacy specialist in a pre-K-12 school.

Curriculum Overview

In order for candidates to be eligible for the Reading Specialist endorsement they must complete four graduate level literacy courses at Rider University. These include:

LITR 501 Psychology and Pedagogy of Literacy Processes

LITR 502 Curriculum, Instruction and Supervision in Literacy

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum

One Graduate Level Literacy Elective

Candidates must also show evidence of at least 18 credits of graduate study across three areas selected from the list below. These areas of study will come from the state approved graduate courses offered in the College of Education and Human Services at Rider University or a candidate's master's degree program at other institutions. These include:

- Children's or Adolescent Literature
- Measurement
- Organization of Reading Programs
- Psychology
- Staff Supervision
- Linguistics
- Special Education
- Research
- Foundations of Education

Certificate Offered

- Reading Specialist

LITR 510	Research and Survey of Texts for Children and Adolescents	
LITR 560	Writing Project at Rider	
LITR 600	Independent Research and Study in Literacy Education	
Total Credits		12

Note:

- Candidates must have completed at least two years of teaching by program completion.

¹ Additional graduate courses with a literacy focus may be counted towards the elective requirement for the endorsement with prior approval from the coordinator.

Courses and Descriptions

Note: Additional graduate courses with a literacy focus may be counted towards the elective requirement for the endorsement with prior approval from the coordinator.

LITR 500 Multimodal Teaching and Learning 3 Credits

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and challenges and assessment measures. Observational techniques and diagnostic teaching for assessment are stressed. Students will apply concepts learned in seminar to their associated practicum/field experience.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

LITR 510 Research and Survey of Texts for Children and Adolescents 3 Credits

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-print texts into the school curricula in ways that support youth and adolescent literacy development.

LITR 560 Writing Project at Rider 3 Credits

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas.

LITR 600 Independent Research and Study in Literacy Education 1-3 Credits

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education.

School Psychology (Ed.S.)

Program Overview

Rider University offers one of the region's finest school psychology programs. It is one of only seven specialist-level programs in New Jersey to hold full accreditation from the National Association of School Psychologists (NASP) (<http://www.nasponline.org/>). This program is designed for students seeking national certification as a school psychologist.

Making a Difference in the Lives of Children

Across the country, there is a growing need for specially trained school psychologists who can work with students, teachers, families and other

professionals to promote safe and supportive learning environments. They play an increasingly important role in helping children succeed — and thrive — academically, socially and behaviorally.

Highlights

- Rider's 64-credit Educational Specialist degree is a graduate-level program that typically takes three years of full-time study to complete.
- This program follows a cohort model in which students take classes together in a group, or team. Each cohort begins in the fall.
- Students develop and apply skills through fieldwork that complements coursework, starting with their first semester. Each student is expected to complete a 100-hour practicum each semester during the first two years.
- During the third year, students complete a one-year professional internship (1,200 hours) in a school setting where they perform the role and function of a professional school psychologist. Students have the option of completing this internship at an approved site setting anywhere in the country.
- In addition to New Jersey, the program meets requirements for certification in other states, including Pennsylvania and New York.
- Graduates of the program are eligible for national certification as a school psychologist after earning a passing score on the School Psychology Praxis.

Curriculum Overview

Rider University's School Psychology program will prepare students to become a productive and vital member of the school team through a highly-structured, developmental curriculum that builds on coursework and hands-on experience.

Students will learn to:

- effectively assess children's skills and abilities, including diverse learning needs;
- assess emotional and behavioral needs;
- apply effective social-emotional and academic interventions;
- plan appropriate Individualized Education Programs for students with disabilities;
- evaluate the effectiveness of prevention and intervention programs;
- consult with parents, administrators and teachers.

The program emphasizes problem solving and data-based decision making aimed at improving the educational and mental health of children and adolescents. Rider's innovative program provides a blend of traditional and contemporary school psychology training, including psychological assessment, response to intervention, consultation, positive behavior support, counseling and curriculum-based measurement. And, students learn to work sensitively with people from diverse cultural and individual backgrounds.

School Psychology Educational Specialist Program Requirements

- Satisfactory annual ratings for retention and progression in the School Psychology program. Program faculty will evaluate the academic, professional competencies, and professional work characteristics of each student based upon their portfolio and personal statement. A recommendation for continuation, continuation with remediation, or dismissal will be made by August 31st of each year.
- Based upon the National Association of School Psychologists (<https://www.nasponline.org/>) (NASP) standards, all students must fulfill a residency requirement by enrolling as a full-time student (minimum of nine graduate credits for one semester) so as to develop an affiliation with colleagues, faculty, and the profession.
- Completion of 64 graduate credits with a minimum GPA of 3.3.
- Take and attain a passing score established by NASP on the Praxis Submitted Assessment test in school psychology during the first semester of internship, EDPS 590. Furnish a copy of the score to the Director of the School Psychology program.

Internship serves as the culminating experience consisting of 1,200 hours. The internship occurs on a full-time basis over the period of one year OR on a part-time basis over two consecutive years.

Courses and Descriptions

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/ research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDPS 500 Cognitive Assessment 3 Credits

This course addresses contemporary intellectual theories and the process and procedure of cognitive assessment. It presents the relevant issues related to intelligence testing and interpretation. Through a variety of pedagogical approaches, students acquire needed skills in administering, scoring, and interpreting results from contemporary tests of cognitive ability.

Prerequisite(s): EDPS 513.

EDPS 502 Psychological Development of the Child and Adolescent 3 Credits

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 506 Testing and Measurement Techniques in Reading/Literacy Education 3 Credits

Studies basic characteristics of test scores, including: reliability and validity, selection, administration, and scoring of tests; measurement of achievement, intelligence, aptitude, and interests; and the writing and editing of items of teacher-made tests, school marking procedures, interpreting of test scores. Covers basic statistical tools needed by reading specialists.

EDPS 507 Advanced Educational Psychology 3 Credits

A critical examination of contemporary learning theory as applied to educational thought and practice. The psychological, physiological, and sociological foundations of education and training; personality problems encountered by classroom teachers.

EDPS 508 Cognitive Processes and Learning 3 Credits

This course deals with what is known relative to the principles of cognitive psychology and their application to learning. The flow of information is followed from where it begins through the processes of integration and storage. Cognitive principles will be studied relative to concept formation, reasoning, and problem solving. Their relationship to specific educational tasks such as the teaching of reading, writing, mathematics, and other content will be explored and confirmed through empirical evidence.

EDPS 509 Psychoeducational Assessment and Report Writing 3 Credits

This course furnishes students with the clinical, practical, and theoretical sophistication to understand the assessment and report writing process for academic, behavioral, adaptive, and social-emotional concerns. Students are expected to master a wide range of concepts and skills to successfully complete this course including integrating multiple pieces of assessment data for case conceptualization, classification, and treatment recommendation. Students are required to synthesize data from multiple methods of assessment and sources to produce written psychoeducational reports that inform intervention practice.

Prerequisite(s): EDPS 513.

EDPS 510 Assessment of Behavioral and Social-Emotional Functioning 3 Credits

The assessment of behavioral and social-emotional functioning is studied from an empirically based, problem-solving model that links directly to intervention. Students learn to select appropriate assessment tools to match individual referral questions so as to evaluate the behavioral and social/emotional problems of children and adolescents.

Prerequisite(s): EDPS 513.

EDPS 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with specific educational exceptionalities, including learning disabilities, mental retardation, behavior disorders, physical handicaps, and giftedness. The characteristics, identification procedures, and current intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

EDPS 513 Professional Practice of School Psychology: Issues and Historical, Ethical, and Legal Considerations 3 Credits

This course is designed to provide an introduction to school psychology through an analysis of the contemporary roles and functions of school psychologists. Professional issues are explored in the context of the history and evolution of school psychology as a specialty area of professional psychology. In addition, the study of professional ethics, best practices, and standards for delivery of school psychological services that have been adopted by national organizations representing the profession of school psychology will be reviewed.

EDPS 514 Standardized Measures of Academics and Behavior 3 Credits

This course will increase students' understanding of the standardized assessment process, measurement issues, psychometric properties of assessment instruments, and the role of these instruments in informing academic, behavioral, and social-emotional interventions.

EDPS 515 Curriculum-Based Assessment and Measurement 3 Credits

This course will build upon students' knowledge and skills in individual-referenced assessment based upon the standards and general curriculum. Students will be able to design, administer, score, and interpret curriculum-based assessment and link these data to intervention.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDPS 521 Statistics and Quantitative Analysis 3 Credits

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

Prerequisite(s): EDPS 520, EDUC 500.

EDPS 535 Biological Basis of Behavior 3 Credits

This course will emphasize a biological approach to the study of psychology and behavior. Topics studied will include the following: 1) the genetics of human psychological differences; 2) the anatomy of the nervous system; 3) psychopharmacology; 4) neuropsychological diseases (e.g., epilepsy, autism, multiple sclerosis); 5) memory and amnesia; 6) sleeping, dreaming, and circadian rhythms; and 7) the biopsychology of mental health difficulties.

EDPS 538 Developmental Child Psychopathology 3 Credits

The course will furnish students with a comprehensive account of the characteristics, correlates, causes, contexts, and outcomes of psychopathology in children. It serves to augment students' understanding of specific conditions in childhood and adolescence including autism spectrum disorders, attention-deficit/hyperactivity disorder, mental retardation, childhood anxiety/depression, enuresis/encopresis, learning disabilities, communication disorders including selective mutism, and emotional/behavioral disorders. The diagnostic nosologies of the DSM and IDEA will be referenced and thoroughly discussed. A special emphasis upon a developmental-systems framework for understanding child psychopathology will be presented wherein the importance of context and the influence of multiple, interacting events and processes in shaping adaptive and maladaptive development will be investigated.

EDPS 570 Advanced Interventions for Children, Adolescents and Families 3 Credits

This course provides opportunity to expand each student's knowledge and skills in the development of effective interventions to meet academic, behavioral, and social-emotional needs. Currently accepted practices based upon the individual's referral problem will be explored. Intervention will be approached from a problem-solving model and based on current assessment data. Case studies will be used to link theory and application.

Prerequisite(s): EDPS 513.

EDPS 581 Practicum in Psychoeducational Assessment and Report Writing 1 Credits

This practicum experience provides supervised practice in administering, scoring, and interpreting an array of individually administered assessment instruments for the purpose of producing a written psychological report that is linked to intervention.

Prerequisite(s): EDPS 513.

EDPS 582 Practicum in the Assessment of Behavioral and Social-Emotional Needs 1 Credits

This practicum experience provides supervised practice using the techniques and methods taught in EDPS 510 Assessment of Behavioral and Social-Emotional Needs. Students will be expected to complete a Functional Behavioral Assessment including recommendations for a behavior intervention plan and a means to monitor and evaluate the target student's progress.

Prerequisite(s): EDPS 513.

EDPS 583 Practicum in Consultation in School and Agency Settings 1 Credits

This practicum experience provides supervised practice in the study, implementation, and evaluation of a problem-solving model to provide consultation across school and agency settings. Students will be expected to successfully initiate and lead the 4-step consultation process resulting in a databased intervention. The consultation will be documented in a formal report.

Prerequisite(s): EDPS 513.

EDPS 584 Practicum in Curriculum-Based Measures 1 Credits

This practicum provides supervised experience in identifying academic needs of students utilizing curriculum-based assessment (CBA) methods within a problem-solving framework. Students will practice the selection and administration of appropriate CBA tools to match referral question(s) at the individual, class-wide and school-wide levels. Students will also practice assessment of the academic environment by conducting structured direct observation of the classroom. Students will summarize and analyze assessment data, develop goals and objectives and make recommendations for intervention.

Prerequisite(s): EDPS 513.

EDPS 590 Internship in School Psychology I 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 581, EDPS 582, and EDPS 583.

EDPS 591 Internship in School Psych II 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 590.

EDPS 600 Independent Research and Study in School Psychology 1-3 Credits

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of school psychology.

EDSO 510 Sociological and Cultural Foundations of Education 3 Credits

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

SPED 514 Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals through Applied Behavior Analysis for students with Autism Spectrum Disorder and other behavioral issues. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multi-component interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

Science Certificate in Biological Science, Chemistry, Earth Science, Physical Science, &/or Physics

Program Overview

This Post-Baccalaureate Teacher Certification Program in Science (K-12) is designed for college graduates seeking initial teacher certification in the subject areas of one or more of the scientific disciplines (Biological Science, Chemistry, Earth Science, Physical Science, and/or Physics). The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 963)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Science is a 21-credit graduate program requiring four teacher preparation courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Certificate Offered

- Science Certificate in Biological Sciences, Chemistry, Earth Science, Physical Science, and/or Physics (K-12)

CURR 770	Clinical Experience and Seminar in Teaching	9
or CURR 771	Supervised Clinical Experience in Teaching	
Total Credits		21

Additional requirements for completion

- Completion of all courses before the clinical experience (student teaching) with a "C+" or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 706 Inclusive Methods for Teaching Science 3 Credits

Classroom interaction analysis systems are used in the study of the instructional processes that support inquiry-based science learning. Candidates develop their own repertoires of teaching strategies, classroom management strategies, and awareness of career requirements in STEM fields. Emphases are on the investigation and interpretation of recent curriculum developments in NGSS and NJ Student Learning Standards in Science as well as the use of lab-based processes in science learning. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying science curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

Social Studies (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in Social Studies (K-12) is designed for college graduates seeking initial teacher certification in the subject area of Social Studies. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 963)

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students’ career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 705 Inclusive Methods for Teaching Social Studies 3 Credits

This course addresses the practical and theoretical aspects of teaching social studies to diverse adolescents in secondary schools. Using the NJ Student Learning Standards in Social Studies, candidates will prepare and design curriculum and assessment for students in various learning environments and with diverse learning needs. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying social studies curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

Special Education (M.A.) Online

Program Overview

The Master of Arts in Special Education online program is designed to prepare certified teachers to teach students with special needs in a variety of settings.

The program provides opportunities for students to understand the nature and causes of disabilities, become familiar with agencies and resources for persons with disabilities, and learn the best practices and materials for teaching students with disabilities. This knowledge base, combined with a variety of shared and individual field-based experiences, provides opportunities for teachers to develop their expertise and become confident in their ability to work with students with special needs and become leaders in meeting the challenges of diverse classrooms. This program is offered completely online.

Curriculum Overview

The M.A. in Special Education program comprises a sequence of coursework that includes courses required for a New Jersey Teacher of Students with Disabilities Endorsement. Candidates who are successful in the Teacher of Students with Disabilities Certification Program may apply their credits toward the M.A. in Special Education.

For individuals who are currently prepared to teach in general education settings, a 30-credit course sequence is designed to strengthen their preparation to meet the needs of all children, particularly those with disabilities. Students who currently hold a regular New Jersey instructional certificate in another field and successfully complete the program will be eligible for the New Jersey Teacher of Students with Disabilities Endorsement.

Those who already hold New Jersey Teacher of the Handicapped or Teacher of Students with Disabilities (TOSD) certification, may be eligible for up to nine credits waived depending on prior course work and transcript review. A total of 30 credits in graduate work is still required to receive the M.A. degree.

Teacher of Students with Disabilities Coursework

(21 credits)

Candidates entering with an undergraduate degree in education and teacher certification will be required to take the following courses. SPED 512 is the prerequisite for all other courses.

Code	Title	Credits
SPED 504	Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities	3
SPED 512	Psychology of Exceptionality	3
SPED 514	Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs	3
SPED 524	Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities	3
SPED 531	Assessment for Instruction in Special Education	3
SPED 536	Instruction and Transition for Autism and Severe Disabilities	3
SPED 539	Instructional Practices for Students with Disabilities	3
Total Credits		21

Additional Courses for Special Education (M.A.)

(9 credits)

Code	Title	Credits
EDUC 500	Introduction To Research	3
SPED 542	Literacy and Students With Special Needs	3
SPED 590	Professional Seminar in Special Education	3
Total Credits		9

Additional Courses for Special Education M.A. with Reading Specialist Certification

(9 credits)

All additional courses for this certification can be completed online.

Code	Title	Credits
LITR 501	Psychology and Pedagogy of Literacy Processes	3
LITR 502	Curriculum, Instruction and Supervision in Literacy	3
LITR 504	Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum	3
Total Credits		9

Graduation Requirements

- Meet the general master's degree requirements.
- Successful completion of all academic and field requirements.
- Completion of 30 graduate credits with a minimum GPA of 3.00 on a 4.00 scale.

- Successful completion of a required sequence of field experiences.
- Candidates must successfully pass a comprehensive examination covering knowledge and skills related to the field of special education.
- Successful demonstration of professional dispositions and behavior.

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and challenges and assessment measures. Observational techniques and diagnostic teaching for assessment are stressed. Students will apply concepts learned in seminar to their associated practicum/field experience.

SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals through Applied Behavior Analysis for students with Autism Spectrum Disorder and other behavioral issues. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multi-component interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 531 Assessment for Instruction in Special Education 3 Credits

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

Prerequisite(s): SPED 512.

SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications.

Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 542 Literacy and Students With Special Needs 3 Credits

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 590 Professional Seminar in Special Education 3 Credits

This course addresses the current issues in the field of special education. Students will synthesize research and literature from the field of special education to address current issues and practice. Collaboratively, students will examine one area of special education through research and presentation. A reflective comprehensive view of special education including assessment, instruction, inclusive practice, assistive technology, Autism Spectrum Disorder, behavior, literacy etc. will be shared. Students are expected to complete a comprehensive exam in these related special education topics and submit 100 hours of supervised field hours. This course should be taken in the final semester of the MA program as it is the culminating reflective course of study.

Prerequisite(s): Permission of instructor.

Student Assistance Coordinator Certificate

Program Overview

This Rider Student Assistance Coordinator (SAC) Certificate qualifies students to apply for the Student Assistance Coordinator Certificate of Eligibility with Advanced Standing (SAC CEAS (<https://www.state.nj.us/education/license/sac/>)) in New Jersey, which is supplied by the NJ Department of Education (<https://www.state.nj.us/education/>). For students interested in the school counseling profession, the SAC plays a specialized counseling role in the schools. SACs help students who are coping with social, emotional, and behavioral issues related to substance abuse and typically provide drug and alcohol prevention and intervention counseling services.

Students should consult the NJ Department of Education (<https://www.state.nj.us/education/>) for the most updated and detailed explanations of the requirements to ultimately qualify for a standard New Jersey SAC certificate.

Curriculum Overview

This certificate is comprised of seven courses or 21 credits.

Current M.A. students seeking either the Master of Arts in Counseling Services, School Counseling Concentration or the Master of Arts in Clinical Mental Health Counseling, may fulfill requirements for the SAC certificate as they complete their M.A. degree. Extra courses will be required beyond their M.A. degree requirements. For those who are pursuing a master's in school counseling at Rider, completion of only two extra courses in additions is required. For those who are pursuing a Master of Arts in Clinical Mental Health Counseling, three extra courses are required (two courses may be able to count as electives for the M.A. CMHC program).

For practicing counselors interested in acquiring the SAC CEAS, the 21 credits are standard; however, Rider faculty recommend that interested students submit their transcripts to the NJ Department of Education for review and final determination of a required plan of study.

Certificate Offered

- Student Assistance Coordinator (SAC) Certificate of Eligibility with Advanced Standing

Student Assistance Coordinator Certificate Requirements

For Current Master of Arts in Counseling Services (School Counseling Concentration) Students:

(9 credits)

Current Master of Arts in Counseling Services students with a School Counseling Concentration may fulfill requirements for the SAC as they complete their M.A. degree. One course (CNSC 580, CNSC 581,

CNSC 590 or CNSC 591) may be taken as part of the M.A. degree requirements and two extra courses will be required beyond the M.A. degree requirements. At least one of the extra courses must be taken before CNSC 580, CNSC 581, CNSC 590, or CNSC 591. Currently enrolled students should consult with their program advisors for more information about course selection and this certificate option.

Code	Title	Credits
COUN 515	Substance Abuse Counseling	3
COUN 516	Strategies in Addiction Counseling	3
CNSC 580	Elementary School Counseling Practicum and Student Assistance Coordinator Practicum	3
or CNSC 581	Secondary School Counseling Practicum and Student Assistance Coordinator Practicum	
or CNSC 590	Counseling Internship I	
or CNSC 591	Counseling Internship II	
Total Credits		9

For Current Master of Arts in Clinical Mental Health Counseling Students:

(9 credits)

Current Master of Arts in Clinical Mental Health Counseling students may fulfill requirements for the SAC as they complete their M.A. degree. Three extra courses will be required; two courses may be able to count as electives for the M.A. CMHC program. Currently enrolled students should consult with their program advisors for more information about course selection and this certificate option.

Courses and Descriptions

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

COUN 515 Substance Abuse Counseling 3 Credits

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

COUN 516 Strategies in Addiction Counseling 3 Credits

This is an experiential and laboratory-based experience in which students will learn to implement evidence based counseling techniques that are utilized in the field of substance abuse counseling. Students will be able to expand their basic counseling skills and techniques learned in COUN 550, as well as become exposed to techniques that are unique to addiction counseling. In addition to learning assessment skills, students will learn interventions that include motivational interviewing, relapse prevention, alternative therapies, group counseling, family counseling, and others. This course will also focus on issues of ethics and prevention in counseling.

Prerequisite(s): COUN 550.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Stdnts and Stdnts With Special Needs 3 Credits

The course provides an overview of the foundations of counseling in educational settings, including the historical roots, current and future trends, roles, and functions in multicultural schools and higher education settings. Students examine the roles and responsibilities of professional school counselors to facilitate student success through the development of a comprehensive school counseling program as an integral component of the total education system.

Supervisor of Instruction Certificate

Program Overview

This program is designed for experienced and fully-certified teachers and other related instructional personnel to gain the necessary skills and professional knowledge to become supervisors in a school system.

It is a coherent program that develops the reflective capacities of students to perform a wide range of supervisory functions in accord with recognized professional standards, best practices and values.

Students should note that the recommended course sequence set by Rider University has been approved by the New Jersey Department of Education for the New Jersey supervisor's certificate and meets the four course requirements established by the Department: a course in the general principles of staff supervision (N-12); two courses in general principles of curriculum development (N-12); and a practicum in supervision where students will be expected to complete a mentored internship in a school or appropriate work setting as a requirement of the culminating course in the sequence.

Courses and Descriptions

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, and national school leadership standards.

Prerequisite(s): CURR 531.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

Teacher Leadership (M.A.)

Program Overview

The Master of Arts in Teacher Leadership program seeks students who wish to enhance their knowledge and ability to deliver content instruction and further develop their leadership skills in educational settings. This program is designed to be developmental and experiential in nature, fostering ethical behavior and the improvement of self and one's profession. The program is based upon current leadership standards. These standards emphasize performance-based learning opportunities in the areas of articulating and implementing a vision for learning, promoting effective instruction, effectively utilizing and managing resources in the learning environment, collaborating with families and community members, promoting the success of all students in an ethical manner, and recognizing the influence of the larger political, social, economic, legal, and cultural context.

The teacher leadership degree program serves those students who seek a graduate program that will develop their professional capacities as teachers and leaders. Increasingly, teachers are called upon to play a leadership role in the following areas: design, coordinate, and evaluate standards-based curricular programs; assess the outcomes of instruction; support the work of other teachers through mentoring, peer-coaching, and collaborative problem-solving; contribute to the professional development of the staff by providing and facilitating teacher in-service programs; and to promote a positive climate and culture for learning both inside and outside of the classroom. This program also prepares students for formal instruction/supervisory roles by emphasizing the knowledge, skills, and dispositions needed to assume leadership responsibilities for school and district-wide improvement initiatives.

Leadership Growth Projects are a requirement of every teacher leadership core course within the program. They provide students with an opportunity to develop and practice their teacher/supervisory leadership skills throughout the program so that they are well-prepared for the

requirements of their internship experience (Capstone Project). An electronic portfolio showcasing how Standards have been addressed will be submitted during the internship course to document continuous and sustained accomplishments of all candidates in their educational settings. Upon the completion of the Master of Arts Degree in Teacher Leadership, graduates will qualify for the New Jersey Instructional Supervisor Certificate.

Curriculum Overview

Developed by Rider University's respected and CAEP (<http://www.ncate.org/>)-accredited College of Education and Human Services, the Master of Arts is designed to prepare experienced teachers to assume a greater leadership role in their schools, and share their skills and knowledge while remaining active in the classroom.

Teachers who complete the full master's degree will acquire both content knowledge and the skills needed to be effective teacher leaders in their schools and school districts. The full master's degree program includes both the 21-credit teacher leadership core and the 15-credit core content disciplines. Students who complete the master's degree track are eligible to apply for New Jersey Supervisor Certification.

The teacher leadership core is designed to prepare experienced teachers to assume a greater leadership role in their schools and share their skills and knowledge while remaining active in the classroom. This is a low-residency program that combines the best of face-to-face learning with the convenience of online learning. Its innovative design gives participants the flexibility they need to balance work and family demands while advancing their skill as teacher leaders. In the core content disciplines, teachers select content courses designed to build content knowledge and pedagogy in specialized fields. Teachers may select courses in only one concentration or a combination of courses in more than one concentration.

Teacher Leadership Concentration Options

The concentrations provide teachers with face-to-face and/or online courses that require the application of what is being learned in class to how content is being taught in their classrooms. The primary goal is to enhance content knowledge and ability to deliver instruction in a common core curriculum area of specialization. The completion of five courses in the concentrations will result in a Rider University Professional Development Certificate in that specific concentration and in some instances a New Jersey Department of Education endorsement/certification.

Courses and Descriptions

CURR 517 Teaching and Learning Number and Operations 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Content and Mathematical Practices.

CURR 520 Teaching and Learning Geometric Understanding 3 Credits

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 522 Teaching and Learning Measurement and Data 3 Credits

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, and national school leadership standards.

Prerequisite(s): CURR 531.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

CURR 552 Creative, Ethical Teacher Leadership 3 Credits

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

CURR 640 Teaching and Learning Physical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected physical science (physics and chemistry) topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 641 Teaching and Learning Life Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 642 Teaching and Learning Earth and Space Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 643 Engineering Solutions to the Challenges of Contemporary Science Issues 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 644 Teaching and Learning Chemical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be placed on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

CURR 650 Understanding Gifted Learners 3 Credits

The course explores the ways in which the gifted and talented can differ from more typical learners in terms of their cognition, social-emotional dimensions, behavior, and long-term development. It focuses on theories of intelligence, differing conceptions of giftedness and talent development, and learning processes. Some specific topics include underachievement, perfectionism, dual exceptionalism, gender issues, and underserved populations. The course also addresses the ways in which gifted education can evolve to fit the demands and opportunities embedded in complex, 21st-century socioeconomic, cultural, and technological contexts.

CURR 652 Differentiating Instruction for the Gifted and Talented 3 Credits

This course provides the rationale and practical strategies for effective instructional differentiation for the gifted and talented within and beyond the regular classroom. Participants will learn how to differentiate within subject areas by adjusting content, process, product, and learning environment to meet the needs of learners. They also will explore the nature and nuances of differentiation by ability, readiness, and interest, as well as the implications of instructional differentiation for formative and summative assessment. Throughout the course they will design and share examples of differentiation including tiered assignments, complex instruction, independent studies, graphic organizers, and learning contracts.

CURR 654 Innovative Instructional Strategies for Gifted Education 3 Credits

This hands-on, experiential course immerses participants in simulations and analyses of new and revised student-centered teaching models and strategies that are conducive to creative and critical thinking, advanced content mastery, and the invigoration of students' interests. Participants analyze the potential of each model/strategy while considering the ways in which it can apply to content learning in various subject areas/domains. The course also engages participants in studying the fundamental principles of program design in gifted education so they can make the best possible use of the instructional models and strategies.

CURR 656 Creative, Interdisciplinary Thinking 3 Credits

This course facilitates creative thinking through the exploration of important insights from a wide variety of disciplines in the social sciences, humanities, natural sciences, and education. The process of creative association enables participants to combine diverse, remotely associated constructs to create new products and processes. Applications of interdisciplinary thinking to curriculum and instruction are explored. These applications include novel methods for curriculum integration, discovery and development of children's interests, and instructional modifications for the gifted and talented. Exploration of concepts and processes in multiple academic domains and professional fields also provide appreciation for the domain-specific natures of giftedness and creativity.

CURR 660 Authentic Data in the Elementary STEM Classroom. 3 Credits

Young learners can think deeply about content and make meaningful connections between their experiences, natural phenomena, and authentic data when teachers integrate data in purposeful ways. In this course, teachers construct student-centered STEM investigations integrating real-world scientific and mathematical data and build their understanding of the theoretical basis for this work. Participants gain knowledge of STEM resources, learn to access entry points for STEM in elementary classrooms and foster engaging contexts, like engineering, coding, and NASA mission exploration. Teachers explore the synergies between Common Core State Standards and Next Generation Science Standards for a productive and exciting learning environment that prepares students for ongoing interest in STEM. This course is recommended as a foundation for the STEM certificate program.

CURR 661 Authentic Data in the Secondary STEM Classroom 3 Credits

Middle and High School students are capable of deep sense making when teachers utilize engaging STEM classroom practices to teach content with authentic data connections. In this course, teachers learn to apply research-based best practices central to today's classrooms. In a collaborative professional learning environment, they build knowledge of resources for accessing, analyzing, and making use of authentic data in meaningful activities. Coursework includes planning student-centered lessons that integrate data, building cultural relevance with engaging phenomena, and developing meaningful assessments for STEM activities. Participants identify how to integrate engineering design into the STEM classroom and learn how to represent the Nature of Science as students develop conceptual understanding and apply critical thinking to real-world decisions. A library of content rich lessons becomes available to all participants through a shared online community. This course is recommended as a foundation for the STEM certificate program.

CURR 662 Eyes on Earth: Teaching Earth Science from Space (PK-8) 3 Credits

This course will take participants through a journey about space exploration and specific NASA missions that examine components of earth. Participants will learn science content grounded in Earth's Lithosphere, Hydrosphere, Atmosphere, and Biosphere. By learning to use authentic data from NASA and other sources participants will experience an exploratory approach to learning about the Earth, and then bring these experiences to their own classrooms. Teachers will utilize several web-based tools and real-time data along with the three-dimensional learning in the Next Generation Science Standards to create lessons that can be used directly in the classroom.

CURR 663 Lessons from the Ocean: Science on the Water Planet (Grades 2-12) 3 Credits

Bring the ocean into your classroom by using Earth's waters as a context for standards-based STEM content. The ocean is critical to the functioning of the Earth system, and is an authentically integrated context for learning about topics such as density, weather and climate, heat transport, environmental issues, biogeochemical cycles, mathematics, and much more. Access a myriad of data sets to apply science concepts and make connections between the ocean and atmosphere, living and nonliving parameters, and life on land, as well as in the deep sea. Use the context of the ocean to teach Next Generation Science Standards topics with deep understanding and meaning for learners.

CURR 664 The Arts in STEM: Advancing Meaningful Integration (K-12) 3 Credits

Apply art in the context of exciting STEM concepts and learn to integrate art, science, math, technology, and engineering in more meaningful ways in your classroom. At the core of the STEM Education movement are critical thinking, creativity, problem solving, and authentic learning environments that engage diverse students in meaningful ways with content. The many mediums for art and artistic expression are a valuable component of communication and expression. Scientists and researchers at NASA and across the globe use myriad forms of art in their work. This course invites students to take a close look at the incorporation of art in the STEM classroom and provides resources, exemplars, and access to collaborative support for arts integration.

CURR 665 Climate Change with NSF SPRINTT 3 Credits

Award-winning curriculum and eloquent, online student investigations help students study science concepts emphasized in the Next Generation Science Standards, in the context of Earth's Polar Regions to better understand the complexity of Earth's climate and how it is changing. View the Earth using real scientific data from satellites and western researchers. Then, consider the lens of indigenous peoples of the Arctic. Examine tons of data and changes in ice, permafrost, weather patterns, biological change, and more as you conduct research with simple-to-use, web-based instructional tools, using authentic data sets and models to study our planet's past, present, and future climate. Interdisciplinary investigations address many Common Core State Standards in reading, writing, science, and technical subjects as well as mathematics in the context of climate science.

CURR 666 Exploring Mars: A New Twist on Science (or Math) 3 Credits

Use a wealth of data sets and technological tools to explore and understand features of Earth's neighbor, the Red Planet. Look for and study the physical and chemical evidence of water and ice; compare erosion patterns on Mars and Earth; and make inferences about the planet's history as you study both its geologic features, including volcanoes and craters, and the physics of the atmosphere. Teach Next Generation Science Standards topics in Earth, physical, and chemical science integrating mathematics, in the context of Mars using recent data from Curiosity Rover and other missions.

CURR 667 Physical Science in Motion: Classroom Applications 3 Credits

Physical science, when applied, makes tough-to-understand concepts easy and fun. Participants learn to solve problems relating to one-dimensional motion; become acquainted with and apply Newton's Laws of Motion and equilibrium of forces; learn about constant acceleration and gravitational acceleration; investigate concepts in aerodynamics; and learn about two-dimensional motion. Participants will use free, simple-to-use, software simulations from NASA Glenn Research Center, which help to present these concepts for you, and, then, your students, in the context of aeronautics, including airplane design, rocketry, sports, and more. A carefully developed resource page provides access to excellent resources and engaging activities for implementing course content in your classroom with important connections to Next Generation Science Standards and Common Core mathematics.

CURR 668 Coding, Robotics, and 1:1 Devices 3 Credits

Learn applications of Coding as a mathematics pedagogy, explore opportunities for Robotics, and learn cutting-edge implementation of One-to-One Devices (1:1) in K-12 classrooms. Participants learn about and explore best practices in the newest learning pedagogies and technologies. Whether you are already involved, or looking to integrate these cutting-edge tools and strategies for the classroom, you will begin to expand your reach for enhancing student learning. Scaffolded to allow success at all grade levels, Coding, Robotics, and 1:1 Devices offers resources for application into elementary, middle, and high school. Participants will interact with no-fee computer programming, robotics opportunities, and the latest uses of devices. All participants have the opportunity to work with innovative technologies and interact with talented educators, practitioners and special guests who are already making a difference in K-12 classrooms.

CURR 669 Culturally Relevant Pedagogy in the STEM Classroom 3 Credits

Classrooms comprise individual learners, each bringing their own culture and experiences to the learning environment. The value and strength of diversity has become increasingly described in educational literature. This course introduces teachers to the curriculum and pedagogical issues relevant to race, language, gender, and socio-economic differences. Participants apply content and pedagogy involving science and mathematics contexts for effective learning. STEM activities will integrate meaningful, engaging practices for teaching diverse learners. The course is differentiated for elementary and secondary school educators to provide relevant connections, to be directly applied, in each participant's classroom.

CURR 670 Life and Marine Science: Tracking Live Marine Animals 3 Credits

Follow marine animals (e.g., polar bears, sea turtles, sharks, and whales) in real-time, and apply life and Earth science topics to the ocean. Study topics such as ecosystems, biodiversity, cell structures, food webs, and conservation, as you make connections to ocean currents, seafloor features, density and more. Discover the importance of the ocean to humans, as well as our impacts, both positive and negative, on marine environments. The in-depth use of data lends itself to Next Generation Science Standards by integrating instructional technology with life, Earth and physical science.

CURR 671 Life in Space: NASA ISS and Astrobiology 3 Credits

The International Space Station (ISS) is an amazing undertaking comprising technology, engineering, science and math—the perfect context for exciting students for learning. NASA research leads to technological advances on Earth and in human space exploration. As NASA plans for manned missions to Mars, scientists explore our solar system and beyond for determining if and where life could exist. Extremophiles are fascinating for teaching Earth science in a context for astrobiology research. The course explores how space travel impacts the human body; growing food in space; engineering protection from radiation, and searching for habitable environments. With its application of subject matter, it offers excellent resources and interactions with NASA scientists, and data for educators to bring the exciting context of space travel to the classroom.

CURR 672 Math Connections to STEM Education 3 Credits

The course introduces a wealth of applied mathematics exercises and activities relevant to integrated STEM assets and science activities. Some are in the realm of topics seen in Earth and Space science and physics. Live presenters break down authentic examples and projects, and demonstrate to educators how problems incorporate Common Core State Standards-based mathematics with applications that meet Next Generation Science Standards performance expectations. Educators survey math and science examples and tools as the course promotes the use of applied mathematics in science, or science in mathematics, to meet content goals in the classroom.

CURR 673 NASA Astronomy and Space Science 3 Credits

Harness your students' enthusiasm for space and astronomy by using astronomical images to enrich your physical, Earth, and life science courses. Measure the speed of an asteroid, learn about erosion on Mars, and see the tracers of life that are visible from space. In this course, we explore the many ways in which real data from NASA's space science and astronomy missions can be used to teach math and science content in your classroom, meeting science and math standards in Next Generation Science Standards and Common Core State Standards. Through the use of cutting-edge technology tools, and with a NASA scientist visiting our class, you will not only learn more about the universe, you will learn how to bring the universe into your education context.

CURR 674 NASA Physics for Real Beginners: Earth, Moon, and Space 3 Credits

Gain an introduction to physics in this conceptual course that uses NASA's space initiatives as the context for content. Learn about gravitation between celestial bodies, how to get a satellite into orbit, what it takes to blast off into space, and more. This course will discuss these and related topics while exploring NASA content related to space and the Hubble Space Telescope and Kepler Missions. Bring cutting-edge examples to your classroom while addressing Next Generation Science Standards performance expectations.

CURR 675 Reading and Writing in the Science Classroom 3 Credits

Discuss and analyze the ways that literacy and science connect in the science classroom, and highlight how reading and writing can be used to increase students' understanding of science content. Focus on how to integrate important literacy skills from Common Core State Standards in your science and STEM classroom to address content standards from Next Generation Science Standards. Cutting-edge strategies and well-founded principles pave the way to success with non-fiction reading material. The manner in which information and scientific content is presented shapes student success, not just for reading, but student writing, organization, and presentation.

CURR 676 The E in STEM: Meaningful Content for Engineering 3 Credits

Learn how to use engineering to make your classroom come alive. Bridge and teach math and science concepts through exciting applications in the Engineering Design Process where you and your students design, test, and evaluate models and real-life applications. Activities are hands-on and emphasize the reciprocities between science, technology, engineering, and mathematics in formal design challenges. Educators enrich classroom curriculum with elements of design in science, mathematics, or technology activities, addressing important Next Generation Science Standards' engineering design practices.

CURR 677 WDLC - Weather Data Learning Center 3 Credits

Use weather data to teach and learn math. This course teaches content in a math curriculum that uses weather data. Weather Data Learning Center demonstrates increases in student performance in grade 4 mathematics. Collect, access, and interpret current real-time imagery, maps and data. Make connections from weather to learn Common Core-based mathematics using various STEM pedagogical strategies. Learn the basics of clouds, air masses, humidity, fronts, pressure, jet stream, and climatic patterns as you apply these ideas to math concepts such as measurement, fractions, number sense, data collection, and analysis.

CURR 678 Action Research in the STEM Classroom 3 Credits

A Capstone Course requirement "option", this course may be part of joint Master's Degree programs, or Endeavor's "5-course" certificate program earning Research Distinction and an award.

CURR 679 Practicum in STEM Leadership 3 Credits

Share your knowledge of STEM teaching and learning with colleagues in your building, district, or region.

CURR 680 STEM Leadership Seminar 3 Credits

The course contains STEM pedagogical content knowledge, incorporating authentic data and using technology as a tool for learning. The course provides a springboard for cultivating problem solving skills, inspiring student research projects, and integrating STEM methods and essential principles addressed in new standards.

EDAD 501 Educational Leadership and Organizational Theory 3 Credits

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): CURR 531, CURR 532 or CURR 538, EDAD 505, and Permission of Program Director.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 505.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501 and EDAD 514.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

LITR 500 Multimodal Teaching and Learning 3 Credits

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and challenges and assessment measures. Observational techniques and diagnostic teaching for assessment are stressed. Students will apply concepts learned in seminar to their associated practicum/field experience.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

LITR 510 Research and Survey of Texts for Children and Adolescents 3 Credits

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-print texts into the school curricula in ways that support youth and adolescent literacy development.

LITR 560 Writing Project at Rider 3 Credits

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas.

LITR 600 Independent Research and Study in Literacy Education 1-3 Credits

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education.

SPED 500 The Inclusive Classroom: Effective Practices for General Education Teachers 3 Credits

This course is designed to introduce general education teachers to special education and the inclusive classroom. Students will explore current research, issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals through Applied Behavior Analysis for students with Autism Spectrum Disorder and other behavioral issues. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multi-component interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 531 Assessment for Instruction in Special Education 3 Credits

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

Prerequisite(s): SPED 512.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 542 Literacy and Students With Special Needs 3 Credits

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

Teacher Leadership Professional Development Certificate

Program Overview

This 36-credit teacher leadership certificate provides mediated field placements, mentored internships, face-to-face and online courses and experiences, and on-the-job training that build necessary skills in teacher leadership. Those teachers who complete the teacher leadership core,

which consists of seven core courses, will receive the Rider University Professional Development Certificate in Teacher Leadership.

Certificate Offered

Courses and Descriptions

CURR 552 Creative, Ethical Teacher Leadership 3 Credits

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, and national school leadership standards.

Prerequisite(s): CURR 531.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 505.

EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): CURR 531, CURR 532 or CURR 538, EDAD 505, and Permission of Program Director.

Teacher of Students with Disabilities Certificate Online

Program Overview

The Teacher of Students with Disabilities (TOSD) certification program is a complete on-line remote course of study. Some courses may have remote asynchronous meeting schedules. Students are reminded to check specific course schedules during registration.

The graduate education certification program for Teacher of Students with Disabilities (TOSD) includes the 21 credits required by the State of New Jersey for endorsement as a TOSD. This certification program is for candidates that possess a current New Jersey instructional elementary, secondary, or P-3 certification. The course sequence is designed to provide a knowledge base in the current research and practice in special education. Each course in the program will make connections from theory to practice with specific field assignments embedded in coursework.

Curriculum Overview

Courses include Psychology of Exceptionality, Applied Behavior Analysis for students with Autism Spectrum Disorder and other Behavior Needs, Instruction and Transition for Autism and Severe Disabilities, Collaboration and Inclusive Practice for students with Mild and Severe Disabilities, Assessment for Instruction in Special Education, Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities, and Instructional Practices for Students with Disabilities.

The M.A. in Special Education program comprises a sequence of coursework that includes courses required for a New Jersey Teacher of Students with Disabilities Endorsement. Candidates who are successful in the Teacher of Students with Disabilities Certification Program may apply their credits toward the M.A. in Special Education.

Teacher of Students with Disabilities Certificate Requirements

The graduate education certification program for teacher of students with disabilities will require a minimum of 21 credits required by the State of New Jersey for endorsement as a teacher of students with disabilities. Candidates must possess an existing instructional certificate or certificate of eligibility in elementary education, secondary education, or P-3 education. Completion of a sequence of field-based activities is required. SPED 512 is a prerequisite for all other SPED courses.

Courses and Descriptions

SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals through Applied Behavior Analysis for students with Autism Spectrum Disorder and other behavioral issues. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multi-component interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 531 Assessment for Instruction in Special Education 3 Credits

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

Prerequisite(s): SPED 512.

SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

Teaching English to Speakers of Other Languages (TESOL) at the Graduate Level

Program Overview

At the graduate level, the Teaching English to Speakers of Other Languages (TESOL) Program is offered to post-baccalaureate students looking to teach English to adult learners. The TESOL program consists of 9 credits that include courses in culture, linguistics, and teaching methods with 20 hours of field experience.

Certificate Offered

Courses and Descriptions

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

Teaching (M.A.T.)

Program Overview

The Master of Arts in Teaching (MAT) is a 30-credit degree program that incorporates work completed during the initial teacher preparation phase of candidates' development while adding broad professional knowledge about innovative curriculum design, inclusive practices, and data-based decision making in teaching and learning. The program is open to candidates from Rider's Post-Baccalaureate Teacher Certification Program.

In addition to earning the MAT degree, candidates may apply coursework and credits to other Master's programs, endorsements, and/or professional development certificates offered through the Department of Graduate Education, Leadership, and Counseling.

Students can take much of the initial coursework for the MAT degree by completing one of the teacher certification programs through the Post-Baccalaureate Teacher Certification Program:

- Comprehensive Business (K-12) (p. 863)
- Dance (K-12) (p. 874)
- Early Childhood (P-3) (p. 884)
- Elementary (K-6) (p. 890)
- English as a Second Language/ESL (K-12) (p. 907)
- English (K-12) (p. 903)
- Mathematics (K-12) (p. 920)
- Music (K-12) (p. 921)
- Science Certificate in Biological Science, Chemistry, Earth Sciences, Physical Science, and/or Physics (K-12) (p. 940)
- Social Studies (K-12) (p. 941)
- Theater (K-12) (p. 964)
- World Languages Certificate in French or Spanish (K-12) (p. 966)

Degree Offered

- MAT (Master of Arts in Teaching)

- Meet general master's degree requirements;
- Successful completion of all academic requirements;
- Completion of 30 graduate credits with a minimum GPA of 3.00; and,
- Successful demonstration of professional dispositions and behavior.

Courses and Descriptions

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, and national school leadership standards.

Prerequisite(s): CURR 531.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501 and EDAD 514.

Theater (K-12)

Program Overview

The Post-Baccalaureate Teacher Certification Program in Theater (K-12) is designed for college graduates seeking initial teacher certification in the subject area of Theater. The streamlined, rigorous, and sequential program of professional teacher preparation studies combines theory, research, field experience, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program may be applied toward completion of the 30-credit Master of Arts in Teaching (MAT). (p. 963)

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in Theater is a 21-graduate credit program requiring teacher preparation courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

- Completion of CURR 770 or CURR 771 with a "C+" grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

World Languages Certificate in French or Spanish (K-12)

Program Overview

This Post-Baccalaureate Teacher Certification Program in World Languages (K-12) is designed for college graduates seeking initial teacher certification in French or Spanish. The streamlined, rigorous, and sequential program of professional studies combines the best of theory, research, and practice. It is designed for part-time students who take one or two late afternoon/evening courses per semester. The final clinical experience (student teaching and seminar) at the end of the program requires full-time enrollment for one semester.

The course work in this program counts toward completion of the Master of Arts in Teaching (MAT) (p. 963).

Curriculum Overview

The Post-Baccalaureate Teacher Certification Program in World Languages (French or Spanish) is a 21 credit graduate program requiring four courses taken in late afternoons/evenings followed by a semester of full-time student teaching.

Certificate Offered

- World Languages Certificate in French or Spanish (K-12)

Additional requirements for completion

- Completion of all courses before the clinical experience (student teaching) with a “C+” or better in each course and with a 3.0 grade point average.
- Completion of CURR 770 or CURR 771 with a “C+” grade or better.

Courses and Descriptions

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

College of Liberal Arts and Sciences

The College of Liberal Arts and Sciences (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/>) (CLAS) offers advanced degrees designed to build professional success in a variety of organizational settings. With programs in Applied Psychology, Business Communication and Homeland Security, graduate programs in CLAS focus on refining essential skill sets for data analysis and its critical application, for career advancement and personal growth. A Master's degree from Rider will connect cutting edge curricula with real-world learning opportunities resulting in a unique and enriching educational experience.

Masters in Athletic Leadership (p. 974)

The M.A. in Athletic Leadership provides current and aspiring coaches and administrators, at all levels, the opportunity to obtain a graduate education focused on leadership, ethics, and coaching development within the current landscape of athletics. This graduate program is designed to promote personal and professional growth in leadership, coaching integrity, and community influence using most of the standards of the National Association for Sport and Physical Education (N.A.S.P.E.) (<https://www.pgpedia.com/n/national-association-sport-and-physical-education/>) and the university's commitment to preparing caring, competent, and connected graduates. This program will promote the university's mission of educating students to meet the challenges of our times. Intercollegiate athletics is a core component of the college experience and developing leaders within context promotes multiple aspects of the Rider mission that include good decision-making, ethical lifestyles, and tolerance and respect for others.

Masters in Applied Psychology (p. 969)

The M.A. in Applied Psychology: Applied Behavior Analysis (ABA) prepares students to excel in professional careers as scientist-practitioners. By challenging students to use a scientific lens when creating and evaluating clinical interventions, and to use an applied lens when designing research, this program will ensure that students

are prepared to achieve success in behavior analytic employment, or to pursue further education upon completion of the program.

Masters in Business Communication (p. 978)

The M.A. in Business Communication focuses on the application of communication skills within a business context. Students learn to better understand and leverage communication strategies to achieve organizational goals. The program introduces students to best practices in business communication, and engages them in real life current issues and scenarios faced by professionals on the job.

Masters in Cybersecurity (p. 982)

The M.S. in Cybersecurity will provide students with the expert knowledge and technologies needed to detect, investigate, and prevent computer-related crimes, and to examine the theory, best practices, and methodologies to conduct computer forensics investigations. Students pursuing this degree will bring to the job a powerful combination of a traditional liberal arts education with foundational knowledge and technical training needed to excel in the cybersecurity field.

Masters in Health Communication (p. 984)

The M.A. in Health Communication prepares graduates to advance public health policy, influence the health and lifestyle behaviors of individuals and underserved population groups, and improve overall health outcomes. The Health Communication program offers students a rich and engaging learning experience. Designed for working professionals, this online graduate program provides a rich and engaging learning experience.

Masters in Homeland Security (p. 987)

The M.A. in Homeland Security is a broad, theory-based program which offers a distinctive and multidisciplinary approach to preparing professionals for leadership roles in protecting the United States, its interests and its allies from terrorist attacks, as well as responding to natural disasters and other threats to the safety and welfare of our communities, state and nation. Students will gain the knowledge and foundation needed to pursue private or public sector employment in the expanding area of homeland security and emergency preparedness, or further study in public policy.

Policies

Undergraduate Students Taking Graduate Courses

Students who are eligible to take CLAS graduate courses during their senior year must have a minimum cumulative GPA of 3.0. Under most circumstances, up to six credits of graduate courses may be taken as an undergraduate and would be included in the regular, full-time tuition fee. These credits may be applied towards the undergraduate degree requirements, including in the calculation of undergraduate GPA. Should the student matriculate into the CLAS graduate program, these credits, but not the grades, would be subsequently transferred to the graduate transcript.

Applied Psychology (M.A.)

Program Overview

The Master of Arts in Applied Psychology: Applied Behavior Analysis (ABA) is intended to provide students with theoretical and practical knowledge in applied behavioral psychology while also providing general understanding of how psychology relates to ABA practice.

Applied behavior analysis is the application of the science of motivation and learning to describe, explain, predict, and change individual behavior.

ABA is used in educational settings, organizational settings (e.g., job training, performance assessment, task analysis and training), behavior change related to health outcomes (e.g., compliance with medication, addictions, feeding problems, exercise, etc.) and most often in interventions with individuals with autism spectrum disorders or other developmental disabilities.

Mission Statement

The Master of Arts in Applied Psychology: Applied Behavior Analysis (ABA) prepares students to excel in professional careers as scientist-practitioners. By challenging students to use a scientific lens when creating and evaluating clinical interventions, and to use an applied lens when designing research, this program will ensure that students are prepared to achieve success in behavior analytic employment, or to pursue further education upon completion of the program.

National Certification in Behavior Analysis

The Association for Behavior Analysis International (ABAI) has verified Rider University's ABA core course sequence as providing the content hours under the Behavior Analyst Certification Board, Inc. (<http://www.bacb.com/>)® (BCBA) 5th Edition Task List and meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst Examination®. Applicants will have to meet additional requirements to qualify.

Admission Status

Upon completion of the steps in the application procedure, the applicant will be assigned to one of the following classifications once admitted:

Graduate Standing

- The student is qualified to undertake graduate study and must apply for matriculated status when eligible;

Conditional Standing

- The student either has not satisfied all of the admission requirements or has not completed all of the undergraduate preparatory requirements or both and may be permitted to engage in studies during a probationary period;

Special Standing

- The student does not plan to matriculate in a Rider graduate degree.

Transfer of Credits

Upon acceptance to the Master of Arts in Applied Psychology: Applied Behavior Analysis program, students may request transfer of up to nine semester hours of graduate credits completed at an accredited institution. These credits must have been earned within six years of the date of credit transfer approval. All transfer credits must be approved by the Applied Psychology Steering Committee. Courses accepted for transfer must be similar to required or elective courses that are approved for the respective program, and a grade of at least "B" must have been earned in each of these courses.

Academic Standing

A minimum grade of "B" is required to obtain credit toward graduation. A grade of "B-" or lower will not count toward graduation credits. A GPA of 3.0 must be maintained to remain in good academic standing. Students whose GPA falls below 3.0 will be placed on Conditional Standing.

Course Repeat Policy

Students may not repeat any graduate course for credit that they have already taken, except a course in which they have received a grade lower than "B" or one from which they withdrew. Any exceptions must be approved by the department chair.

Dismissal

Rider University reserves the right to dismiss any student when, in the judgment of the faculty or the officers of Rider, such action seems advisable. Any of the following situations will result in the automatic dismissal of a student working toward a graduate degree or certification program in Applied Psychology:

- Receiving two grades of "B-" or lower in two graduate courses;
- Not attaining a grade point average of 3.0 after taking 12 or more graduate credits at Rider University;
- Failure to complete the program within the required 6 years.

Graduation Requirements

To graduate, students must have completed all the requirements for the degree within 6 years of enrolling in the program, have a GPA of 3.00 or higher, and have submitted the degree application for graduation form to the Dean's office.

Graduation with Distinction

Students who graduate with an overall grade point average of 3.85 or higher are designated as graduating with distinction. This term appears on the student's official transcript, below the student's name in the commencement program, and on the diploma.

Degree Requirements

The program requires 36 semester hours including 8 courses verified by the international organization and 4 electives. A thesis is available as an option for students interested in research.

Course Requirements:

(36 credits)

Code	Title	Credits
Core Curriculum Requirement		
PSY 510	Introduction to Applied Behavior Analysis	3
PSY 511	Principles of Learning	3
PSY 513	Functional Assessment	3
PSY 514	Single Subject Research Design and Analysis	3
PSY 516	Ethics for Behavior Analysts	3
PSY 519	Models of ABA Instruction	3
PSY 520	Interventions for Challenging Behavior	3
PSY 521	Supervision and Management in ABA	3
Electives		
Select four of the following courses:		12
PSY 501	Introduction to Applied Psychology Skills	
PSY 518	Organizational Behavior Management	
PSY 522	Recent Research in ABA	
PSY 530	Interventions for Individuals with Developmental Disabilities	
PSY 533	Interventions for Autism	
PSY 535	Language Assessment and Intervention	
PSY 536	Social Skills Assessment & Intervention	
PSY 550	Behavior Analytic Approaches to Health and Physical Activity	
PSY 551	Behavioral Appro to Addiction	
PSY 577	Developmental Psychopathology	
PSY 595	Selected Topics in Applied Psychology ¹	
PSY 690	Independent Research and Study	
Thesis (optional - replaces 2 electives)²		
PSY 700	ABA Thesis I	
PSY 701	ABA Thesis II	
PSY 702	ABA Thesis III	
Optional Course (3 additional credits)³		
PSY 720	Practicum in ABA	
Total Credits		36

¹ Topics change each semester. Students may take up to 12 credits in Special Topics courses.

² Students opting to complete a thesis will take a minimum of 37 credits.

³ Students opting to complete a practicum will take an additional 3 to 6 credits.

4+1 Masters Overview

The 4+1 Masters in Applied Psychology, Applied Behavior Analysis concentration is designed for students who wish to combine undergraduate study in psychology leading to a Bachelor's of Arts degree with graduate study leading to a Masters of Arts in Applied Psychology.

The admission process for this program ensures that only capable students are enrolled. Freshman students are encouraged to seek advice about the program from their advisor and the program coordinator. The following courses must be completed if the student intends to apply to the program:

- PSY 212 Intro to Applied Behavior Analysis
- PSY 299 Field Placement in Applied Behavior Analysis. This course is intended to assist the student in determining if the program is a good match for them.

During the first semester of the junior year, the student will formally apply to the Applied Psychology program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Applied Psychology program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- Two letters of reference from professors or supervisors of relevant work or internship experience;
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the Applied Psychology program;
- An interview with faculty from the Applied Psychology program; and
- Completion of required 200 level courses.

Students accepted into the Applied Psychology program at the end of their junior year will complete one graduate level elective course during each semester of their senior year.

Additional Applied Behavior Analysis courses are offered at the undergraduate level. While not required, it is recommended that students accepted into the Applied Psychology program as a 4+1 student take the following:

- PSY 339 Research Methods in Applied Behavior Analysis
- PSY 388 Learning and the Experimental Analysis of Behavior
- PSY 389 Professional Issues in ABA

Students will be awarded the BA degree when they complete the requirements for that degree in psychology. The MA will be awarded upon completion of the Applied Psychology graduate program requirements.

Academic Plans of Study

The following educational plan is provided as a sample only. Students may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

PSY 501 Introduction to Applied Psychology Skills 3 Credits

This course will provide students with an examination of several facets of applied psychology with a focus on consuming research, understanding differences in methods and perspectives, writing according to APA style, and demonstrating understanding of several methods and perspectives in applied psychology. These are necessary skills to function meaningfully in the field. We will review and evaluate scholarly literature from across several psychology application areas. This course is available to MA Applied Psychology students only and should be taken near the beginning of entering the MA program.

PSY 510 Introduction to Applied Behavior Analysis 3 Credits

This course will provide an introduction to applied behavior analysis. Students will learn the history and defining features of the field. Due to the scientific nature of applied behavior analysis, students will also learn characteristics and processes associated with the scientific method. Furthermore, foundational concepts will be defined, along with relevant behavior change procedures.

PSY 511 Principles of Learning 3 Credits

This course will provide students with more in depth understanding of the philosophical assumptions, characteristics and basic principles of behavior analysis. Students will have the opportunity to review concepts learned during Introduction to Applied Behavior Analysis. This course will also provide an introduction to the basic research in behavior analysis. Students will become more fluent in definitions, characteristics, principles, processes, and concepts of behavior analysis.

Prerequisite(s): PSY 510.

PSY 513 Functional Assessment 3 Credits

This course is designed to provide knowledge and skills of methodologies to conduct a thorough behavioral assessment, interpret the assessment data, and identify goals for treatment. Topics will include direct observation/data collection methods, data analysis, functional assessment, stimulus preference and reinforcer assessments, and ethical and professional issues. The second half of the course will deal specifically with functional analysis including the history of and variations to the methodology. The relationship between assessment techniques and the development of the least-restrictive but most effective behavioral intervention will also be discussed.

Prerequisite(s): PSY 510, PSY 511.

PSY 514 Single Subject Research Design and Analysis 3 Credits

Students will be introduced to the basic evaluative methods used in behavior analysis including various models of single subject design such as multiple baselines, reversal designs, and alternating treatment models. Students will design analyses, collect data, graphically display their data, and provide an analysis of findings. Students will read original behavior analytic research articles and practice analysis of findings.

PSY 516 Ethics for Behavior Analysts 3 Credits

This course will familiarize the student with ethical issues and responsibilities of behavior analysts working in applied settings. Informed consent, due process, protection of confidentiality, and selection of least intrusive, least restrictive behavior change procedures will be presented and discussed within the context of case method. Ethical decision making processes will be emphasized, and the relationship between ethics and law will be explored.

PSY 518 Organizational Behavior Management 3 Credits

This course will provide an overview of research and practice in the field of Organizational Behavior Management (OBM), also referred to as Performance Management in organizational settings. Performance Management is a behaviorally-based area of specialization within the broad field of Industrial-Organizational Psychology. The concepts and techniques used in Performance Management originated from the field of behavior analysis.

PSY 519 Models of ABA Instruction 3 Credits

This course provides students with a general knowledge of the different procedures used to teach new skills and new behaviors in the field of applied behavior analysis. Areas covered will include the assessment of relative strengths and deficits, use of discrete-trial and naturalistic teaching procedures, use of reinforcement procedures to strengthen behaviors, use of motivating operations and discriminative stimuli, use of prompting and prompt-fading procedures to transfer stimulus control, use of shaping procedures to teach new behavior, use of task analysis and chaining procedures to teach new behaviors, use of precision teaching and fluency-based instruction, and use of personalized systems of instruction. Additionally, various components of the aforementioned areas will be integrated and culminate in two modules: one designed to teach communicative behavior and the other to perform discrimination training.

Prerequisite(s): PSY 510.

PSY 520 Interventions for Challenging Behavior 3 Credits

Students will review principles of behavior in the context of application to functional assessment and treatment of socially significant problem behavior. Topics including extinction, functional communication training, differential reinforcement, choice, environmental manipulations, and punishment will be covered. Students will move through the process of developing function-based interventions and writing behavior plans.

Prerequisite(s): PSY 510 and PSY 513 (or co-req).

PSY 521 Supervision and Management in ABA 3 Credits

This course provides students with skills needed to provide supervision and management in the field of applied behavior analysis. Students will apply the basic principles of behavior analysis to supervision and management of their staff and trainees. Areas covered include establishing performance expectations, selecting supervision goals based on assessment of current skills, how to train personnel to competence, performance monitoring and feedback, functional assessment and function-based strategies of personnel behavior, and how to evaluate the effects of supervision. Additional areas of discussion will include professional behavior, leadership, ethics, and professional development.

Prerequisite(s): PSY 510, PSY 511, PSY 513 and PSY 514.

PSY 522 Recent Research in ABA 3 Credits

This course provides an overview of recent behavior analytic research. Topics will vary semester to semester to capture changes in the field as they occur. Students will have the opportunity to practice reviewing, discussing, and interpreting research methodology, results, and potential areas for future research.

Prerequisite(s): PSY 510, PSY 511, PSY 513, PSY 514.

PSY 530 Interventions for Individuals with Developmental Disabilities 3 Credits

The purpose of this course is to prepare students to work with individuals with a broad spectrum of developmental disabilities. The course will begin with a discussion of typical child development and milestones, address how development might differ from the norm, introduce subsequent assessment and diagnosis and ultimately, introduce appropriate interventions. The main focus of this course is applied behavior analysis [ABA] and common ABA strategies for intervention.

PSY 533 Interventions for Autism 3 Credits

The purpose of this course is to provide students with a general understanding of the clinical characteristics of autism spectrum disorders. The course will briefly address etiology and neurocognitive underpinnings of these disorders but will focus on psycho-educational interventions. The course will be taught from an applied behavior analytic perspective.

PSY 535 Language Assessment and Intervention 3 Credits

Students will be introduced to the classification of verbal responses, both vocal and non-vocal. Using videotaped examples, students will categorize observed verbal behavior. Students will be provided with practical tools for the assessment of verbal behavior, as well as an array of intervention strategies. A focus will include the design of teaching strategies to enhance language acquisition, as well as ongoing evaluation of intervention efficacy will be employed.

Prerequisite(s): PSY 510, PSY 511.

PSY 536 Social Skills Assessment & Intervention 3 Credits

Students will be introduced to the development of social skills and the identification social skills deficits. Using videotaped examples, students will categorize observed social behavior. Next, students will be provided with practical tools for the assessment of social and emotional behavior, as well as an array of intervention strategies. Tools for the collection of data and the evaluation of the success of target interventions will be stressed.

Prerequisite(s): PSY 510, PSY 511.

PSY 550 Behavior Analytic Approaches to Health and Physical Activity 3 Credits

The application of behavior analytic methods, practices, and principles has been demonstrated through research and clinical applications to be effective at changing health and fitness behavior. This course will provide an overview of research and practice in applying behavior analytic principles to changing health behavior and physical activity. Behavior change across various populations will be covered including both adults and children with and without disabilities. Discussion will focus on both functional assessment as well as interventions effective at changing health and physical activity including self-management, self-monitoring, goal setting, contingency management, etc. Students will spend the semester implementing self-management projects for their own health and/or fitness behavior.

PSY 551 Behavioral Appro to Addiction 3 Credits

Evidence from laboratory and clinical settings suggests that addiction can be conceptualized and effectively treated through the application of principles of conditioning. This course provides an overview of behavior analytic research in understanding and intervening on addictive behavior. Behavioral technologies for change regarding substance-related and behavioral addiction will be covered.

Prerequisite(s): Graduate students in Applied Psychology.

PSY 577 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

PSY 590 Field Placement in Applied Behavior Analysis 3 Credits

The applied behavior analysis practicum includes a required field placement of 15 hours per week and periodic on campus meetings. The practicum experience will allow students to experience the professional life of a behavior analyst in one of several preapproved sites. Sites approved include those for children, adolescents or adults with disabilities. Placements will be selected in consultation with the Practicum Coordinator and will require a written practicum plan from the cooperating field supervisor.

Prerequisite(s): PSY 510, PSY 511, PSY 513, PSY 514.

PSY 595 Selected Topics in Applied Psychology 3 Credits

Students will actively engage in an in-depth inquiry into a special topic area concerning applied psychology. Though the topics will change, students will be required to read and discuss current literature as well as considering the application of tools of the discipline to research questions of their own.

PSY 690 Independent Research and Study 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of Instructor.

PSY 700 ABA Thesis I 1 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 701 ABA Thesis II 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 702 ABA Thesis III 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 720 Practicum in ABA 3 Credits

The Master in Applied Psychology - Applied Behavior Analysis (MAP-ABA) program's practicum offers students supervision from Rider's MAP-ABA faculty and a variety of high quality in-vivo experiences, under the direct supervision of a Rider-Approved Board Certified Behavior Analyst (BCBA), during which students apply the skills acquired in coursework.

Prerequisite(s): PSY 510, PSY 511.

Athletic Leadership M.A. and Online M.A.

The Master of Arts in Athletic Leadership and Master of Arts in Athletic Leadership Online provides current and aspiring coaches and administrators, at all levels, the opportunity to obtain a graduate education focused on leadership, ethics, and coaching development within the current landscape of athletics. This graduate program is designed to promote personal and professional growth in leadership, coaching integrity, and community influence using most of the standards of the National Association for Sport and Physical Education (N.A.S.P.E.) (<http://pgpedia.com/n/national-association-sport-and-physical-education/>) and the university's commitment to preparing caring, competent, and connected graduates. This program will promote the university mission of educating students to meet the challenges of our times. Intercollegiate athletics is a core component of the college experience and developing leaders within context this promotes multiple aspects of the Rider mission that include good decision-making, ethical lifestyles, and tolerance and respect for others.

Curriculum Overview

There are two models for the degree program, both requiring 36 credit hours. The first model is a "4+1" program for undergraduates in which two (2) courses (ATHL 501 (<http://catalog.rider.edu/search/?P=ATHL%20501>) and ATHL 502 (<http://catalog.rider.edu/search/?P=ATHL%20502>)) are completed by rising seniors; the remaining 30 hours will be completed post-graduation. The second model is a traditional master's program consisting of 36 credits. The program allows the possibility of receiving credit for up to six (6) hours of the coaching/athletic administrative depending upon prior professional experience (e.g., 2 years of full-time coaching or athletic administrative experience).

Athletic Leadership M.A. Program Requirements

(36 credits)

All students must complete the Core Requirements (p. 974) below and select one of the following Tracks:

Athletic Administration Track (p. 974)

Career Exploration Track (p. 975)

Coaching Track (p. 975)

Sports Psychology Track (p. 975)

Athletic Leadership Core Requirement (15 credits)

Code	Title	Credits
The following courses are required for each track:		15
ATHL 501	Sport Psychology	
ATHL 502	Evidence-Based Research and Athletics	
ATHL 515	Athletic Leadership	
ATHL 650	Internship of Athletic Leadership ¹	
ATHL 651	Internship of Administration ¹	
Total Credits		15

¹ Students may complete both ATHL 650 and ATHL 651 for 3 credits each or complete a total of 6 credits in either course.

Elective Course Options for All Tracks

See each track to determine the number of elective courses to select.

Code	Title	Credits
ATHL 507	Athletic Governance and Policy	3
ATHL 508	Athletic Risk Management & Wellness	3
ATHL 509	Seminar in Legal and Ethical Issues in Athletics	3
ATHL 514	Women and Sports	3
ATHL 516	Sport Analytics	3
ATHL 517	Athletic Finances	3
ATHL 518	Athlete Development	3
ATHL 519	Ethics in Sport	3
ATHL 550	Current Issues in Athletics	3

Athletic Administration Track

(36 credits)

Code	Title	Credits
Core Courses (see above)		15
Required Courses for Track:		12
ATHL 505	Athletic Communication and Marketing	
ATHL 506	Facilities Management	
ATHL 621	Concepts and Principles of Athletic Administration	
ATHL 622	Administrative Decision-Making	
Elective Course Credits		9

Select 9 credits from the list of elective courses or from the courses available under any Track option.

Total Credits 36

Career Exploration Track

(36 credits)

Athletic Leadership M.A. 4 + 1

Overview

The Athletic Leadership M.A. 4+1 option is designed for undergraduate students who wish to combine undergraduate study in a major leading to a Bachelor's degree with graduate study leading to a Master of Arts in Athletic Leadership. Eligible students may complete six credits as an undergraduate, then 30 credits to complete the graduate requirement.

Undergraduate students accepted into the program will take the following two (2) courses during their Senior year.

- ATHL 501 (<http://catalog.rider.edu/search/?P=ATHL%20501>)
- ATHL 502 (<http://catalog.rider.edu/search/?P=ATHL%20502>)

The remaining 30 credits will be completed upon acceptance into the M.A. in Athletic Leadership program.

The admission process for this program ensures that only capable students are enrolled. For more information please visit the Master of Arts in Athletic Leadership (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-sciences/graduate/athletic-leadership/>) page on the Rider website.

brosvic@rider.edu

Courses and Descriptions

ATHL 501 Sport Psychology 3 Credits

This course covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics. Emphasis is placed on applications for maximizing effectiveness while serving in the position of coach or administrator.

Prerequisite(s): Permission of Program Director.

ATHL 502 Evidence-Based Research and Athletics 3 Credits

This course in research methods prepares the student to understand materials and issues associated with but not limited to the logic of the scientific method, research design, and qualitative and statistical analysis of data. Students will be afforded the opportunity to conduct research in the course on topics.

Prerequisite(s): Permission of Program Director.

ATHL 503 Strength, Speed, and Conditioning 3 Credits

Emphasis will be placed upon assessment, description, and analysis of sport movement and designing training programs to enhance performance variables. While this course will assist those who desire to sit for the National Strength and Conditioning Association's (NSCA) Certified Exam, it is NOT a preparation course for the NSCA-CSCS exam.

Prerequisite(s): Permission of Program Director.

ATHL 504 Seminar in Athletic Training 3 Credits

Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

Prerequisite(s): Permission of Program Director.

ATHL 505 Athletic Communication and Marketing 3 Credits

Seminar in Sports Media and Communication is a critical examination of the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): Permission of Program Director.

ATHL 506 Athletic Facilities Management 3 Credits

Seminar in Facilities Management and Event Planning provides an examination of principles and techniques of planning and operating sport facilities. Emphasizes the principles and concepts of organization and administration including communication, personnel management, management of physical resources, and risk management. Examines a variety of sport operations such as indoor stadiums, athletic field complexes, and managing recreation and intramural activities.

Prerequisite(s): Permission of Program Director.

ATHL 507 Athletic Governance and Policy 3 Credits

Students in this course will explore principles, techniques, and processes related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. Studying collegiate athletic administration involves interpreting NCAA By-laws, including a comparison between Division I, II, and III compliance regulations. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level. At the end of the course, students will understand the primary duties of the athletic director and the intricacies of managing an intercollegiate athletic program.

Prerequisite(s): Permission of Program Director.

ATHL 508 Athletic Risk Management & Wellness 3 Credits

Students in this course will explore proactive approaches to managing risks associated with conducting health, physical education, recreation and outdoor education programs. This course will emphasize safety as a foundation of quality program planning. Students will study governing associations and leadership/management skills required to be successful in the world of college athletics.

Prerequisite(s): Permission of Program Director.

ATHL 509 Seminar in Legal and Ethical Issues in Athletics 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues that will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

Prerequisite(s): Permission of Program Director.

ATHL 514 Women and Sports 3 Credits

Women and Sport focuses on women winning access to the playing field as well as the front office in sport. Using research-based materials, course members will gain an understanding of how women have been involved in sport and physical activity, how women have struggled for widespread recognition and legitimacy, how women continue to carve out their role in shaping sport as it is known today, in the future, and society's ongoing conversation about what it means to be a female athlete or a woman working in sport.

ATHL 515 Athletic Leadership 3 Credits

In any profession or endeavor, the attitude and overall culture of a team is a direct reflection of its leadership. In the sports realm, there are many different leadership approaches that have been considered effective. This course will provide an overview of these approaches based on a comprehensive review of the literature related to sport leadership. The primary goals of this course are to help current and aspiring sport leaders gain a better understanding of effective leadership, to provide the necessary tools in developing effective leaders, and to provide networking opportunities for individuals who share similar goals and aspirations across various domains. The leadership principles may be beneficial to individuals in a variety of settings. This course offers coaches, administrators, players, and scholars the opportunity to learn and apply leadership principles within various contexts.

ATHL 516 Sport Analytics 3 Credits

This course will discuss the theory, development, and application of analytics in sports and the application of analytics in sports for purposes of in-game strategy, player performance, team management, sports operations, and fantasy competitions. Students will be introduced to topics in the applied analysis of sports, with a focus on supporting team decision-makers and applying modern, practical analytic techniques to sports data in search of actionable insight and a competitive edge. The four major team sports of North America (football, baseball, basketball, and hockey) will be the primary subjects of study, but the course's learning objectives are universally applicable to all sports. Emphasis will be placed upon becoming familiar with the full analytic life-cycle: asking productive and relevant research questions, finding the correct data, applying the appropriate tools, discovering insights, and clearly communicating results.

ATHL 517 Athletic Finances 3 Credits

Athletic Finances examines the financial tools that sports managers use to run their sport businesses. Course members will explore traditional and innovative methods of revenue acquisition and financial management in sports organizations, the financial business structure of sports organizations, and the financial planning and forecasting processes that make organizations effective. Various other aspects of finance are discussed as they relate to sports organizations, including the time value of money, capital structuring, stocks and bonds, inventory management, and higher education.

ATHL 518 Athlete Development 3 Credits

Athlete Development focuses on sports-specific learning to prepare athletes with the necessary critical elements leading to an improvement in their chosen sport, emphasizing technical development, physical preparation and sports specific knowledge. The course follows the Long-Term Athlete Development (LTAD) model, an approach to athlete-centered sport that combines skill instruction with long-term planning and an understanding of human development. The LTAD model integrates current research on talent development and assessment into practice to help sport leaders plan athletic development across the life span or design detailed programs for a particular group, including those with physical and cognitive disabilities.

ATHL 519 Ethics in Sport 3 Credits

Ethics in Sport focuses on how people should treat one another in sport settings and, therefore, on a critical examination of ethical issues central to contemporary sport. As a class we will thus consider these questions: 1) What place, if any, does sport have in a good life? 2) What counts as cheating in sport, and why is it morally wrong? 3) Is it morally permissible to use performance-enhancing drugs or genetic forms of enhancement to boost athletic performance? 4) How is it possible to achieve equality for women in sports in a culture where dominant sports tend to privilege such traditionally male features as strength, power, and speed?

ATHL 520 Applied Sport Psychology 3 Credits

Applied sport psychology involves extending theory and research into the field to educate coaches, athletes, parents, exercisers, fitness professionals, and athletic trainers about the psychological aspects of sport or activity. A primary goal of professionals in applied sport psychology is to facilitate optimal involvement, performance, and enjoyment in sport and exercise. Applied sport psychology is an emerging practice area focusing on applying psychological principles, theories, and skills to enhance optimal performance among populations such as performing artists, athletes, and those in the business world.

Prerequisite(s): ATHL 501.

ATHL 521 Clinical Sport Psychology 3 Credits

Clinical Sport Psychology presents a new way of thinking about the psychological processes that are involved in attaining and maintaining sport expertise. The course, based on clinical and sport research, bridges the gap between clinical and sport psychologists by presenting a model that connects athletic performance, basic psychological processes, and relevant empirical findings. Successful completion of course materials provides the practitioner with greater understanding of the varying dimensions of clinical phenomena and how nonclinical, subclinical, and clinical issues affect athletic performance and the overall well-being of athletes.

Prerequisite(s): ATHL 501.

ATHL 522 Assessment in Sport Psychology 3 Credits

Assessment in Sport Psychology integrates and synthesizes the theoretical concepts of sport and performance psychology into meaningful application. Emphasis is placed on creating and then assessing performance-enhancement programs for clients through the exploration and application of theory, research, and intervention strategies to assist clients pursuing excellence. The construct of excellence is thoroughly explored, including common roadblocks and the type of contexts in which the skills and knowledge are used in the field of clinical mental health counseling, sport and performance, intrapersonal relationships, and career.

Prerequisite(s): ATHL 501.

ATHL 550 Current Issues in Athletics 3 Credits

This course will provide students the opportunity to survey the various sub-disciplines related to coaching and athletic administration, and their methods of inquiry. The course will place emphases on critically appraising research literature, and data collection, data organization and analyses for various research questions.

ATHL 601 Concepts and Principles of Coaching 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director.

ATHL 602 Developing a Philosophy of Coaching 3 Credits

Athletic Coaching – Developing a Philosophy provides the opportunity to learn and reflect upon the necessary skills for a successful coach. The course will cover numerous topics to allow course members the opportunity to learn, evaluate and self-reflect on their abilities and skills as a coach, and to develop a personal philosophy of coaching. The course addresses the differences in levels of competitive sports, the personal roles that coaches should exhibit, the professional roles expected and the organizational influences on the world of a coach in order to maximize the development of athletes and team while progressing from one season to the next in the annual coaching cycle.

Prerequisite(s): ATHL 601.

ATHL 621 Concepts and Principles of Athletic Administration 3 Credits

Concepts and Principles of Athletic Administration explores the complexities of intercollegiate athletics while explaining the organizational structures, key players, terms, and important issues most relevant to the growing but often misunderstood fields of recreational studies, sports management, and athletic administration. Intercollegiate athletics create unique challenges to higher education—for while they are closely integrated into their institutions—athletic programs often operate outside of traditional university governance structures while contributing significantly to a school's culture, identity, and financial outlook. Course members in this course will explore principles, techniques, and process related to the management of college athletics, characterize the critical steps to getting hired in collegiate athletics, and prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level.

ATHL 622 Administrative Decision-Making 3 Credits

Students in this course will explore principles, techniques, and process related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level.

Prerequisite(s): ATHL 621.

ATHL 650 Internship of Athletic Leadership 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director.

ATHL 651 Internship of Athletic Administration 3 Credits

The internship affords students professional experience with an organization where the course theory can be applied to best practices. The internship is developed in consultation with the student, the student's academic advisor and the Internship. A learning/work plan is prepared by the student for approval by the site supervisor, both of whom share responsibility for the internship.

Prerequisite(s): Permission of Program Director or approval by CLAS Dean's Office.

Business Communication (M.A.)

Program Overview

Rider's M.A. in Business Communication (MABC) focuses on the application of communication skills within a business context. Through face-to-face, online, and hybrid courses, students learn to better understand and leverage communication strategies to achieve organizational goals. The program introduces students to best practices in business communication, and engages them in real life current issues and scenarios faced by professionals on the job.

Students also benefit from Rider's central location between New York City and Philadelphia, which connects them to the business, financial and cultural nexus of Princeton and the burgeoning Route 1 corridor.

Curriculum Overview

The MABC is a 33-credit program designed to advance communication knowledge and skills as they apply to the professional work setting. Communication is the common thread weaving throughout every working day in every workplace. Most employees are required to communicate orally or in writing to clients, colleagues, supervisors and/or the public on a daily basis.

Completion of this 33-credit program will prepare students for jobs in business communication and as professional communicators in a range of organizational settings. Strategic communication is a central activity in the professional world and requires knowledge, case analysis and skill refinement at a high level. Courses focus on understanding the business environment and on analysis of business communication challenges and development of appropriate solutions to them. Students will learn the theories that are the foundation for effective communication and apply this knowledge to class exercises and professional experiences.

The program includes graduate-level courses from Rider's Norm Brodsky College of Business, which holds prestigious accreditation by

AACSB International: The Association to Advance Collegiate Schools of Business.

Among the skills participants in the MABC develop are learning how to manage crisis communication, internally and externally, with credibility and transparency; thinking and writing strategically for the effective communication of business goals; being ethical and responsible communicators; functioning within the laws and regulations relative to workplace communication; and understanding organizational dynamics, including leadership and team building.

M.A. in Business Communication (MABC) 4+1 Option

Overview

The 4+1 Masters in Business Communication is designed for students who wish to combine undergraduate study in a major leading to a Bachelor’s degree with graduate study leading to a Masters of Arts in Business Communication.

The admission process for this program ensures that only capable students are enrolled. Freshman and sophomore students are encouraged to seek advice about the program from their advisor and the program director. During the junior year, the student will formally apply to the MABC program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Business Communication program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- A statement of objectives prepared by the student that presents the student’s reasons for wanting to enter the Business Communication program;
- Two letters of recommendation, at least one from a college professor.

Students accepted into the Business Communication program at the end of their junior year will complete one graduate level elective course during each semester of their senior year.

Students will be awarded the B.A. or B.S. degree when they complete the requirements for that degree. The M.A. will be awarded upon completion of the Business Communication requirements.

Academic Plan of Study

The Four-Plus-One MABC is designed to begin in the senior year of undergraduate study and is completed in one additional year by the student who plans to attend the program on a full-time basis. The following educational plan is provided as a sample only. Each student, with the guidance from the MABC/MAHC director, will develop a personalized educational plan.

Course	Title	Credits
Year 1		
Fall Semester		
Senior Year		

COMM 503	Crisis Communication	3
Semester Credit Hours		3
Spring Semester		
COMM 504	Strategic Writing	3
Semester Credit Hours		3

COMM 555	Organizational Culture & Storytelling	1.5
PMBA course		3
Semester Credit Hours		12
Year 2		
Fall Semester		
Graduate Year		
COMM 552	Communication in a Multicultural Workplace	1.5
COMM 553	Communication in a Global Market	1.5
COMM 545	Information Gathering & Analysis	3
COMM 520	Social Media Planning	3
Semester Credit Hours		9
Spring Semester		
COMM 531	Legal/Ethical Issues for Professional Communication	3
COMM 599	Capstone Seminar	3
Semester Credit Hours		6
Total Credit Hours for Graduation		33

Courses and Descriptions

COMM 503 Crisis Communication 3 Credits

Crises can bring harm to an organization’s brand and threaten its reputation. Knowing how to anticipate and plan for problems and challenges, and knowing how to manage a crisis if it does strike, are key factors in effective crisis communication. Students will develop theoretical knowledge of issues management and crisis communication and, through case studies and hands-on assignments, will learn to think strategically about importance of public opinion, the role of the media and social media in a crisis, how to develop effective crisis-related messages, and learn how to evaluate crisis responses.

COMM 504 Strategic Writing 3 Credits

This course will provide students with the tools to think and write strategically in today’s dynamic, hyper-competitive, and ever-changing global marketplace. Students will gain competency in a number of areas including: creating a clear, concise, and compelling strategic outline, understanding the need to customize strategies and tactics for different stakeholders, and focusing on actionable intelligence and outcomes-based writing. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 507 Presentation Strategies 1.5 Credits

This course develops the ability to create presentations for targeted audiences. Students will gain competency in preparing purposeful messaging and incorporating visual presentation tools, with a goal of delivering impactful professional presentations that achieve results. The course will focus on developing the knowledge and skills to influence and inspire internal and external constituencies, which is a key part of communication practitioners' jobs.

COMM 525 Visual Communication 1.5 Credits

This course introduces students to the theory and practice of visual communication design. Students will learn how to critique, evaluate, and edit visual communications with specific audiences in mind. Possible topics include the elements and principles of design, color theory, visual perception theories, typography, symbols, brand identity, logos, propaganda, and information design in both current and historical contexts. Readings and viewings of relevant films may be required component of the course. Assignments will afford students opportunities to analyze and critique visual communications for various professional environments.

COMM 531 Legal/Ethical Issues for Professional Communication 3 Credits

Provides students with the knowledge to understand and apply ethical guidelines and current laws and regulations relative to workplace communication, as well as the legal limits impacting professional communications. This knowledge is particularly important for those in or aspiring to managerial/senior staff roles.

COMM 545 Information Gathering & Analysis 3 Credits

Develops the knowledge and skills to use various research methods and analysis techniques to provide critical information for, and assist with, business decisions. It will cover developing research tools, gathering and verifying information, analyzing, and reporting results. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 552 Communication in a Multicultural Workplace 1.5 Credits

Instructs in the use of diversity and cultural communication principles and strategies to effectively manage a culturally diverse workforce. This course will help organizational leaders understand how gender, ethnic, religious, and other differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relations, and ultimately, good productivity for the organization.

COMM 553 Communication in a Global Market 1.5 Credits

Examines communication between and among businesses in a global context. The course presents communication as an essential pivot around which revolve the social and institutional relationships within and among nations. Hence, exploring global communication structures and tendencies is an important means to understanding social, cultural, economic and political impositions on global business. The emerging role of technologies of communication, such as social media, will be a particular focus of this course.

COMM 554 Effective Group Communication 1.5 Credits

Encompasses the study of individual and group behavior in the workplace. Emphasis is placed on individual behavior and group dynamics, application of current group theories, effective group communication, and effective leadership/followership skills. A comprehensive review of these processes, as well as others, will allow students to examine their role in groups as well as teams.

COMM 555 Organizational Culture & Storytelling 1.5 Credits

Organizational culture matters and, according to the research, it is the secret to the most successful organizations in the world. This course will define organizational culture, explore how culture is communicated through organizational mission and value statements, and provide insight into leveraging culture for organizational performance. Students will explore a variety of topics related to organizational culture including the role of the leader, its importance to recruiting and hiring, how to share culture through organizational practices and storytelling, and how to leverage culture to inspire change and innovation.

COMM 599 Capstone Seminar 3 Credits

As the final course in the curriculum, students will use concepts, theories and practices from previous courses as they contemplate complex issues. As a comprehensive assessment of student learning, a committee will ask students to respond to questions related to course material. This course will culminate with several research-based position papers on topics related to individual student interests. This course should be taken in a student's final semester. Minimum required GPA of 3.0; permission of instructor required.

PMBA 8020 Fundamentals of Accounting 3 Credits

For those students having no previous knowledge of accounting. Subject is approached from the point of view of the user of accounting information rather than that of the accountant who supplies the information. Surveys mechanics of accounting as a means to an end, emphasizing accounting as a tool of management and the language of business. Problems and cases bring out the managerial implications of accounting.

PMBA 8030 Economic Analysis 3 Credits

An intensive exposition of the essentials of price theory and income and employment theory. For students with less than a year of introductory economics at the undergraduate level. Topics include an analysis of markets, the nature and characteristics of producer behavior, the theory of pricing in competitive and non competitive markets, and their welfare effects. At the macro level, coverage of the economy in the short run deals with economic fluxuations, fiscal policy, and monetary policy. An examination of the economy in the long run covers factors effecting economic growth.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

Communication Leadership Certificate

Overview

The Communication Leadership Certificate combines important two workplace constructs—communication and leadership, which will help employees move from lower levels to management positions.

Students who complete this 12-credit certificate may apply credits to a future master's program, providing them with not only a certificate, but also a headstart on a graduate degree.

Certificate Offered

Courses and Descriptions

COMM 503 Crisis Communication 3 Credits

Crises can bring harm to an organization's brand and threaten its reputation. Knowing how to anticipate and plan for problems and challenges, and knowing how to manage a crisis if it does strike, are key factors in effective crisis communication. Students will develop theoretical knowledge of issues management and crisis communication and, through case studies and hands-on assignments, will learn to think strategically about importance of public opinion, the role of the media and social media in a crisis, how to develop effective crisis-related messages, and learn how to evaluate crisis responses.

COMM 507 Presentation Strategies 1.5 Credits

This course develops the ability to create presentations for targeted audiences. Students will gain competency in preparing purposeful messaging and incorporating visual presentation tools, with a goal of delivering impactful professional presentations that achieve results. The course will focus on developing the knowledge and skills to influence and inspire internal and external constituencies, which is a key part of communication practitioners' jobs.

COMM 510 Theory and Practice of Negotiations 3 Credits

This course provides students with the theory and skills required to be effective negotiators. Students will learn how to prepare for and participate in negotiations by applying various strategies and tactics. This course will be evenly split between theoretical lecture/discussion and practical application / skill development, including in-class simulations.

COMM 520 Social Media Planning 3 Credits

Social media has changed the way that organizations communicate with their various audiences blurring the lines of public relations, marketing and customer service. Communication professionals must be able to think strategically across all social media platforms to effectively define their brand, speak in an authentic voice and build relationships. Through case study analyses, best-practices research and hands-on assignments, students will learn how to strategically plan a social media campaign through research, content development and curation, and evaluation using meaningful metric analysis.

COMM 554 Effective Group Communication 1.5 Credits

Encompasses the study of individual and group behavior in the workplace. Emphasis is placed on individual behavior and group dynamics, application of current group theories, effective group communication, and effective leadership/followership skills. A comprehensive review of these processes, as well as others, will allow students to examine their role in groups as well as teams.

COMM 559 Communicating Crises in Health 3 Credits

In the health setting, multiple events can be considered a crisis: the outbreak of a disease, contamination of food, a natural disaster, and more. The response to a crisis can have a significant, long-lasting impact on the organization's reputation. The development of a crisis plan, which sets forth guidelines for an organization's response to a crisis and involves multiple steps, can be completed before any events occur and can significantly affect the way an organization handles a crisis. This class explores the types of crises that occur in health communication, the factors involved in a crisis, the development of a crisis plan, and the effects of a crisis on an organization.

COMM 560 Communication Issues for Leaders 3 Credits

Focuses on analysis of contemporary issues that highlight the necessity of effective communication for those in a leadership position. Through analysis and discussion of historical and current challenges faced by organizations, students will learn to recognize how effective leaders apply successful communication strategies. Case studies will also explore the effect that poor communication choices have had on organizations. Emphasis will be placed on discussion, research, and presentation.

COMM 564 Communication and Diversity in the Workplace 3 Credits

The culture of work, like society, is multicultural. More than ever, today's organizational leaders, including CEOs, managers and supervisors, must understand how to use diversity and cultural communication principles and strategies to effectively nurture and promote a culturally diverse workforce. This course helps organizational leaders understand how gender, ethnic, religious, and other social and cultural differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relationship, and ultimately, good productivity for the organization.

LEAD 500 The Practice of Leadership 3 Credits

This course allows students to gain an understanding of the practice of leadership and how they can develop as leaders. Students will explore leadership models, creativity in organizations, and approaches to decision making as they begin to form their own leadership philosophy.

LEAD 510 Organizations: Design and Dynamics 3 Credits

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 531 Developing The Human Side of Organizations 3 Credits

This course examines Strategic Human Resources Management (SHRM) within today's organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 532 Program Design for Training and Development in Organizations 3 Credits

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore "real world" applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

Cybersecurity (M.S.)

Program Overview

Cybersecurity is one of the most difficult and pressing challenges facing our nation, and industry, the government, and higher education are underprepared to address this threat. The M.S. in Cybersecurity will provide students with the expert knowledge and technologies needed to detect, investigate, and prevent computer-related crimes, and to examine the theory, best practices, and methodologies to conduct computer forensics investigations. There is a tremendous workforce shortage projected for well-prepared cyber professionals in New Jersey and the surrounding metro areas. Students pursuing this degree will bring to the job a powerful combination of a traditional liberal arts education with foundational knowledge and technical training needed to excel in the cybersecurity field.

Curriculum Overview

The program allows students the flexibility to design a plan of study that meets their personal and professional needs. Classes meet face-to-face, totally online, or a combination of the two. The curriculum teaches and reinforces skills in the foundational topics of data and software security, component and connection security, system and human security, as well as organizational and societal security. Students successfully completing this program will:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of cybersecurity.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Apply security principles and practices to maintain operations in the presence of risks and threats.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

Degree Offered:

- Master of Science in Cybersecurity

CYBR 590	Independent Research and Study	
CYBR 591	M.S. in Cybersecurity Internship	
Total Credits		36

Courses and Descriptions

CYBR 500 Beyond Code: Cybersecurity in Context 3 Credits

At its core, cybersecurity is a technical, computing-based discipline. This course explores the most important non-technical elements that shape the landscape upon which cybersecurity problems emerge and are managed. Students will assume different lenses – legal, economic, political, societal, and ethical – to better understand how different forces enable and constrain security technologies and policies. Specific topics include ethical and societal issues, policy-making, business models, legal frameworks, national security considerations, and the roles of users, industry, and government which includes the military.

CYBR 510 Cryptography for Cybersecurity 3 Credits

This course focuses on both mathematical foundations and practical applications of cryptography. The course discusses asymmetric and symmetric cryptography, Kerckhoff's Principle, chosen and known plaintext attacks, public key infrastructure, authentication protocols. The course includes a close examination of various cryptosystems including the RSA, DES, AES, Elliptic Curve, and SHA family cryptosystems. Topics include a brief history of cryptography, ciphers, digital signatures, hash functions, message authentication codes, secure e-commerce, and digital cash.

CYBR 520 Managing Cyber Risks 3 Credits

In the context of risk management, this course examines the motivating reasons behind cyber attacks and data breaches. Various risk management frameworks to measure organizational cybersecurity threats and vulnerabilities are presented. Further, students will model cybersecurity risks, using both qualitative and quantitative risk assessment methods. Students also will articulate the organizational consequences of the assessed risks along with mitigating strategies to reduce or eliminate the cyber risks.

CYBR 530 Mobile Computing and Wireless Security 3 Credits

This course examines the cybersecurity of mobile computing and wireless networking, especially the vulnerabilities, threats, and mitigation techniques. Topics include: mobile malware, wireless communications infrastructure vulnerabilities and associated mitigation techniques, mobile platform vulnerabilities and associated mitigation techniques, mobile app vulnerabilities and associated mitigation techniques, mobile device vulnerabilities and associated mitigation techniques, and organizational policies for mobile computing and wireless networking.

Prerequisite(s): CYBR 510.

CYBR 540 Secure Coding for Cyber Defense 3 Credits

This combined course of lecture and hands-on labs follows the philosophy and principles of secure and robust programming, using the Java language. The eight design principles that govern secure and robust coding will be emphasized with follow-on coding labs to apply these design methods to real-world problems. Design choices, good or bad, drive implementation in coding, so designing software security from the beginning will be practiced. Common software vulnerabilities and static analysis of code will be examined, as well as informal, formal, and ad hoc coding methods will be differentiated. Prior experience with the Java programming language is highly recommended.

CYBR 550 Cybercrime and Digital Forensics Analysis 3 Credits

Digital forensics is a hybrid science that offers a systematic approach for conducting comprehensive investigations to solve cybercrimes. In this course, students will learn the principles and techniques of digital forensics investigations to ensure court admissibility of electronic evidence, including the legal and ethical implications. Students also will also gain hands-on experience with performing proper forensic investigations with different file systems (e.g., Unix/Linux, Mac, Windows, Android) and writing appropriate forensics analysis reports.

CYBR 560 Usable Privacy and Security 3 Credits

There is growing recognition that technology alone cannot provide all of the solutions to security and privacy problems. Human factors play an important role, and it is important for security and privacy experts to have an understanding of how people might interact with the systems they develop. This course explores a variety of usability and user interface pitfalls related to privacy and security and provides experiences in designing studies aimed at helping to evaluate usability issues in security and privacy systems.

Prerequisite(s): CYBR 500.

CYBR 570 Special Topics in Cybersecurity 3 Credits

This course is used as a general placeholder for one time offerings and new courses that have not been assigned a permanent designation. The course will cover advanced and emerging topics of current interest in cybersecurity. This course code may be taken more than once as long as the topic offered is different each time.

Prerequisite(s): Permission of instructor.

CYBR 590 Independent Research and Study 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of instructor.

CYBR 591 M.S. in Cybersecurity Internship 3 Credits

The course is part of the capstone requirement for the M.S. in Cybersecurity. The course will have students complete an internship, self-evaluation, and a project related to their experience working in a cybersecurity related position. Permission of instructor.

CYBR 600 Software Vulnerability and Malware Analysis 3 Credits

This combined course of lecture and hands-on labs covers both the art and science of discovering software vulnerabilities and malware. Beginning with the foundational techniques used to analyze both source and binary code, this course will examine current threats and evaluate the actions needed to prevent attackers from taking advantage of both known and unknown vulnerabilities. The course will cover passive and active reverse engineering techniques in order to discover and categorize software vulnerabilities and malware, create workarounds to better secure the system, and demonstrate security solutions that provide protection from an adversary attempting to exploit the vulnerabilities. Techniques covered include the use of static analysis, dynamic reverse engineering tools, and fault injection to better understand and improve the security of software. Prior exposure to Intel assembly is helpful, though not required.

Prerequisite(s): CYBR 540.

CYBR 610 Cloud Computing Security and Privacy 3 Credits

This course focuses on the security and privacy issues in Cloud Computing. While the Cloud Computing paradigm gains in popularity, there are many unresolved cybersecurity issues related to confidentiality, integrity, and availability of data and computations involving the Cloud. This course examines Cloud Computing models and the associated risks, threats and vulnerabilities; focuses on sound architectural design for secure and private computing; and explores practical applications of cloud computing and the Internet of Things (IoT).

Prerequisite(s): CYBR 530.

CYBR 620 Blockchains and Cryptocurrencies 3 Credits

This combined Lecture-Lab course covers the mathematical, computational, and economic foundations of Blockchain technology, and exposes students to the societal and legal implications of a decentralized monetary system based on consensus. Students learn what cryptocurrencies are, why it is possible to make money using cryptocurrencies such as bitcoins, and why it is so volatile. Through hands-on practice with the bitcoin and Ethereum-based software platforms, students will program secure decentralized applications (Dapps), develop an understanding of cryptographic principles, and reexamine critical economic questions.

Prerequisite(s): CYBR 510.

Health Communication (M.A.)

Program Overview

Rider's M.A. in Health Communication (MAHC) focuses on the application of communication skills within the health context. Health communication is one of the areas of communication that is growing exponentially and is projected to experience continued growth. Communication contributes to vital health outcomes by directing positive health behaviors. Interventions, strategies, and programs to change health behaviors are communicative acts and are the primary tools used in health communication. The program introduces students to best practices in communication, and engages them in real-life current issues and scenarios faced by professionals on the job. Students in the program learn to better understand and leverage communication strategies to achieve organizational goals.

Curriculum Overview

The MAHC is a fully online, 33-credit program designed to prepare students for careers in the fast-paced, expanding field of health. Students learn to identify and explain current issues in health communication; use theory and research methodology to examine and explain trends and phenomena in health; interpret the verbal and nonverbal communication practices of individuals, healthcare providers, and organizations in order to reform conversations about health; explain complex medical terminology, statistics, and research findings in simplified language; compose written materials and develop health communication campaigns for general audiences, healthcare professionals, medical organizations, and advocacy groups; understand the far-reaching, multi-layered impact that culture has on health communication and health outcomes; and develop a variety of health communication campaigns that inform, educate, promote, or call for action.

Accelerated Program

Overview

The 4+1 Masters in Health Communication is designed for students who wish to combine undergraduate study in a major leading to a Bachelor's degree with graduate study leading to a Master of Arts in Health Communication. The Master of Arts in Health Communication is a fully online program.

The admission process for this program ensures that only capable students are enrolled. Freshman and sophomore students are encouraged to seek advice about the program from their advisor and the program director. During the junior year, the student will formally apply to the MAHC program through the Graduate Admissions Office. The process involves the following:

- A completed application form for admission to the Health Communication program, accompanied by a \$50 nonrefundable application fee;
- Receipt of official transcripts from every college or university attended (including Rider University);
- A statement of objectives prepared by the student that presents the student's reasons for wanting to enter the Health Communication program;
- Two letters of recommendation, at least one from a college professor

Students accepted into the Health Communication program at the end of their junior year will complete one graduate level elective course during each semester of their senior year.

Students will be awarded the B.A. or B.S. degree when they complete the requirements for that degree. The M.A. will be awarded upon completion of the Health Communication requirements.

Academic Plan of Study

The 4+1 MAHC is designed to begin in the senior year of undergraduate study and be completed in one additional year by the student who plans to attend the program on a full-time basis. The following educational plan is provided as a sample only. Each student, with the guidance from the MABC/MAHC director, will develop a personalized educational plan.

Courses and Descriptions

COMM 500 Communication Processes in Health 3 Credits

Interpersonal and nonverbal communication are the two areas of general communication studies that health communication draws from most heavily. These concepts affect relationships in healthcare, the ability to understand and process medical information, the efficacy of messages in relation to nonverbal indicators, and how bad news, another major concept in health communication, is received. This class will provide a comprehensive understanding of these concepts, how they are utilized in the field of health communication, and the ways in which the two areas intersect, all in the broader context of understanding health communication as a discipline.

COMM 501 Medical Concepts and Health Writing 3 Credits

Improving the way that health is communicated requires the ability to understand health information at the initial – and often complex – level. In particular, health communication aims to provide information to underserved populations, who may suffer from lack of education and poor health literacy. This class will provide students with a basic understanding of medical terminology and the ability to comprehend and explain scientific literature. Students will develop the skills needed to translate medical information for a wide range of audiences. Students will also be required to apply these concepts through the creation of multiple types of health writing assignments.

COMM 505 Health Communication Theory 3 Credits

Health communication is driven by a set of principles that guide the conceptualization, design, and implementation of new health guidelines and interventions. The ultimate goal of health communication is to increase health and satisfaction by encouraging healthier behaviors, medical compliance, and more efficient communication of medical information. This class is designed to give an overview of the major fields of study in health communication through examination of the major theoretical perspectives therein. Topics include the different areas of study in which health communication theories are based, how theory is used to support the initial design of research studies and interventions, and the situations in which the use of more than one theoretical approach is warranted.

COMM 507 Presentation Strategies 1.5 Credits

This course develops the ability to create presentations for targeted audiences. Students will gain competency in preparing purposeful messaging and incorporating visual presentation tools, with a goal of delivering impactful professional presentations that achieve results. The course will focus on developing the knowledge and skills to influence and inspire internal and external constituencies, which is a key part of communication practitioners' jobs.

COMM 525 Visual Communication 1.5 Credits

This course introduces students to the theory and practice of visual communication design. Students will learn how to critique, evaluate, and edit visual communications with specific audiences in mind. Possible topics include the elements and principles of design, color theory, visual perception theories, typography, symbols, brand identity, logos, propaganda, and information design in both current and historical contexts. Readings and viewings of relevant films may be required component of the course. Assignments will afford students opportunities to analyze and critique visual communications for various professional environments.

COMM 531 Legal/Ethical Issues for Professional Communication 3 Credits

Provides students with the knowledge to understand and apply ethical guidelines and current laws and regulations relative to workplace communication, as well as the legal limits impacting professional communications. This knowledge is particularly important for those in or aspiring to managerial/senior staff roles.

COMM 545 Information Gathering & Analysis 3 Credits

Develops the knowledge and skills to use various research methods and analysis techniques to provide critical information for, and assist with, business decisions. It will cover developing research tools, gathering and verifying information, analyzing, and reporting results. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 551 Cultural Conceptions of Health and Illness 3 Credits

Culture affects every relationship dynamic, the way nonverbal communication is interpreted, how audiences are selected for health campaigns, the ability and willingness to use technology, and the way bad news is broken to individuals and families. In health communication, culture comprises both the general conceptions of what culture is – the characteristics of a particular social, ethnic, or age group – as well as other factors. This class will examine the specific variables of culture in this setting, how the variables are both unique and interconnected, and the wide-reaching impact culture has in health. The first half of the course explores the variables that culture includes. The latter part of the course takes these variables and demonstrates the roles they play in real-world health communication settings.

COMM 558 Health Communication Campaigns 3 Credits

Campaigns are the primary tool used in health communication to disseminate messages and effect change. Campaigns can provide information on a specific issue or to a specific community, encourage preventative health behaviors, demonstrate behaviors (such as performing self-skin exams for skin cancer or the proper way to follow medication instructions), put forward suggestions for a healthy lifestyle, raise awareness, or offer support. At times, multiple messages may be present in one campaign. This class will examine the different types of health campaigns and the impact a health communication campaign can have. Students will learn how to analyze a health campaign through its full cycle. The class will also serve as a foundation for the capstone class of the Master's in Health Communication program.

COMM 559 Communicating Crises in Health 3 Credits

In the health setting, multiple events can be considered a crisis: the outbreak of a disease, contamination of food, a natural disaster, and more. The response to a crisis can have a significant, long-lasting impact on the organization's reputation. The development of a crisis plan, which sets forth guidelines for an organization's response to a crisis and involves multiple steps, can be completed before any events occur and can significantly affect the way an organization handles a crisis. This class explores the types of crises that occur in health communication, the factors involved in a crisis, the development of a crisis plan, and the effects of a crisis on an organization.

COMM 600 Capstone: Implementing a Health Communication Campaign 3 Credits

The ability to implement, evaluate, revise and successfully launch a campaign is a critical skill for all individuals who work in health communication. Campaigns are the primary tool used by health communicators to initiate change in a community, although their implementation will not always be a fluid, one-step process. This class will require students to select a local health campaign and evaluate the campaign from start to finish. Students will complete the Master's program in Health Communication with a complete proposal for a health communication campaign and the skills needed to analyze an existing campaign from beginning to end.

Homeland Security (M.A.)

Program Overview

The M.A. in Homeland Security provides students with a multidisciplinary program that goes beyond conventional studies of the subject. The degree is designed to give students broad training in the theoretical and applied nature of security studies and then to offer students the ability to specialize in Global or Domestic Security. The M.A. explores the causes and consequences of political violence and how the U.S.'s internal and global environment impacts issues of security within the nation and globally. Students will also learn about the institutions, actors and processes that support the security community. It explores the tools and actions the U.S. and other governments can utilize in maintaining security and the consequences of doing so. Finally, the graduate program in Homeland Security Policy provides students with the foundation for pursuing careers in the security sector.

Degree Offered

Course Requirements for the M.A. in Homeland Security

(36 credits)

Code	Title	Credits
Required Foundation Courses		18
HLSP 501	Homeland Security	
HLSP 502	Development and Structure of the US Intelligence Community	
HLSP 505	Civil Liberties and National Security	
HLSP 527	Policy Analysis and Evaluation	
HLSP 530	Data Analysis and Methods for Political Science	
HLSP 545	Loyalty and the State of Exception	
Specialized Courses (Select one of the following specialization areas):		9
Global Security Specialization (Select three courses from the following):		
HLSP 508	Political Communication, Terrorism, and Security	
HLSP 510	Terrorism	
HLSP 511	Borders and National Security	
HLSP 529	Energy Security	
HLSP 533	International Law and Armed Conflict	
HLSP 551	Global Security	
HLSP 552	U.S. Foreign and Security Policy	
HLSP 553	Cyber War	
HLSP 554	Asymmetric Conflict: When The Weak Attack The Strong and Succeed	
HLSP 555	Insurgency and Counterinsurgency: U.S. Wars in Iraq & Afghanistan	
HLSP 567	Global Immigration Trends and Security Issues	
Domestic Security Specialization (Select three courses from the following):		
HLSP 504	Political Behavior of Security and Conflict	
HLSP 506	US Constitutional Law and National Security	
HLSP 514	Congress and National Security	
HLSP 515	Counterterrorism	
HLSP 516	The Presidency and National Security	
HLSP 520	Defense Policy and Analysis	
HLSP 522	Countering Domestic Extremism	
HLSP 531	Critical Infrastructure Security	
HLSP 532	Disaster Management and Preparedness	
HLSP 550	American National Security	
Elective Courses:		6
Select two additional courses in any specialization (domestic, global, or elective)		
HLSP 534	Cyber Strategy and National Security	
HLSP 541	Hactivism and Cyberviolence	
HLSP 562	Responding to Collective Threats: Terrorism & Beyond	
HLSP 690	Research & Creative Expression	
Capstone (Select one of the following):		3
HLSP 590	Master's Thesis	
HLSP 591	M.A. in Homeland Security Internship	
Total Credits		36

Courses and Descriptions

HLSP 501 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

HLSP 502 Development and Structure of the US Intelligence Community 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

HLSP 504 Political Behavior of Security and Conflict 3 Credits

The course focuses on various analytical approaches in behavioral political science in order to better understand how individuals interact with the political system. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior during periods of crisis and uncertainty. The course empowers students to conduct advanced research in order to test some of the leading theories of the subfield.

HLSP 505 Civil Liberties and National Security 3 Credits

During times of crisis, can our government maintain individual liberty? This course provides an in-depth exploration of the tension between the role of the state in balancing civil liberties with national security. In this context, the course provides a specific focus on freedom of speech, press and assembly, freedom of religion, the right to privacy and the courts' role, or lack thereof, in the War on Terror.

HLSP 506 US Constitutional Law and National Security 3 Credits

This graduate seminar examines the origin and development of the American constitutional system and constitutional law. It further examines this system within the context of national security. Primary emphasis is on the US Supreme Court, which includes its developmental as an institution, the origins of judicial review and the court's establishment of this process, as well as the decision-making process by Justices of the court. The course will then examine the interplay between the court and its political environment and the impact the court has had upon the functioning of the political system by considering the Marshall Court (1801-1835), the Hughes Court (1930-1941) and the Warren Court (1953-1969). We will conclude with a consideration of the role of the court in balancing the rights and freedoms of a democratic society within the demands of the national security state.

HLSP 508 Political Communication, Terrorism, and Security 3 Credits

This course explores how political communication affects terrorism and security. It is well known that media plays an important role in creating the narrative for understanding terrorism and national security issues. The question is whether that narrative tends to help protect that nation, or whether it actually interferes with that goal. In addition, social media has become a means by which terrorist groups recruit outside volunteers, while blogs and websites are often used to incite incidents in various countries. This course deals with the various ways in which political communication can support, or interfere with, the protection of national security.

HLSP 510 Terrorism 3 Credits

Politics is the study of power and its application, and hence the study of violence has always played a central role in the discipline. In the era of mass politics, violent political participation has been accentuated as evidenced by the prevalence of both domestic and international terrorism. The practice of terrorism itself has undergone changes in the new era and the appearance of groups and "lone wolves" bent on sowing death and destruction for its own sake is more common place. Moreover, the statelessness of today's terrorists removes crucial restraints that once held even extreme terrorists in check. Perhaps more than any other organization, ISIS embodies these trends. It is therefore incumbent upon us to take a step away from the spectacular nature of the news, and ask fundamental questions concerning the motivations, modes of operation, and circumstances contributing to the appearance of terrorist movements, and the roles of the leaders as against the "foot soldiers" in such organizations. Special attention is laid on the emotional fervor of those engaged in the activity, the ideology that mobilizes them and rationalizes their behavior, within each case's historical settings.

HLSP 511 Borders and National Security 3 Credits

This course focuses on borders, boundary-making, securitization, and other theories surrounding the territorialization of the nation-state, including the rise of the national-security and homeland security industries. The analysis of the changing complexities of borders and borderlands is driven by a meta-narrative about national security and current developments in the immigration/security nexus, including policies of border control and the surveillance of immigrants, denizen, and citizens with new security technologies. A key piece of the course is the comparative analysis of US and EU border agencies and the militarization and weaponization of borders, including the construction of new border walls, with the objective to protect the global North from the onslaught of desperate, impoverished and persecuted hordes from the global South. Transnational questions focusing, for example, on the dynamics of human trafficking and drug cartels is an essential parts of this comparison. Throughout the course, a special analytical emphasis is given to the meta-narrative and political opportunism that have driven these developments and led to the fortification of the global North.

HLSP 514 Congress and National Security 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. In addition to an in-depth analysis of the US Congress, we also look comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror?.

HLSP 515 Counterterrorism 3 Credits

One of the aims of analyzing the nature of terrorism, its goals, and the underlying deeper motives of those who partake in it, is to thwart as many terrorist efforts as possible and to bring terrorist campaigns to an end. Thus, the questions of how terrorism begins and how terrorism ends are intimately related. Because of the prevalence of terrorism in the national and international arenas and the spectacular nature of terrorist undertakings, the analysis of these questions is the subject of much media attention and public discussion that tends to obscure and politicize what should be a focus of attention of citizens, policy makers, and students of the social sciences alike. This course seeks to point out concrete measures for counterterrorism –of the type that sometimes is under public discussion –but in a more systematic manner that brings together methods of heuristic thinking in political science and adjacent disciplines, historical and comparative experience, and the literature on counter terrorism to analyze the range of possible strategies that could be adopted and the possible manner in which terror campaigns may be brought.

HLSP 516 The Presidency and National Security 3 Credits

This course is designed as an upper level graduate combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School, English School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

HLSP 520 Defense Policy and Analysis 3 Credits

The course begins with an overview of the structure of US defense policy and administration and explores issues associated with national defense. Throughout the course students become familiar with basic data, institutions, actors, trends, issues and options in the strategic implementation of defense and force. The primary focus of the course is on the Department of Defense (DoD) as well as on key committees and actors within the White House, State Department, Central Intelligence Administration and Congress.

HLSP 522 Countering Domestic Extremism 3 Credits

Domestic extremism is an issue the United States government has had to contend with since its inception, from Shay's and the Whiskey Rebellion in the 18th century, the Klu Klux Klan throughout the 19th and 20th century, to the threat of terrorism today. Broadly defined, extremism has profound and specific impacts on our government and everyday life. Given the limited, enumerated powers the Constitution grants the federal government, cooperation between local, state, and national government agencies is essential to counter domestic threats arising from extremists across the political spectrum. This course will examine threats to U.S. domestic security both before and after the September 11th attacks with a focus on critiquing the ability of our federal system of government to prevent and respond to the evolving threats posed by individuals and groups within the United States.

HLSP 525 Special Topics in Homeland Security 3 Credits

This course is an advanced level seminar examining research on current areas of importance relevant to the interdisciplinary field of Homeland Security.

HLSP 527 Policy Analysis and Evaluation 3 Credits

This course will provide students with an in-depth study of public policy by linking theory with practice to helping students think about problems systematically. The course addresses the policy process through leading theoretical models within the subfield as well as an evaluation of government's response, or lack thereof, of contemporary policy problems. Our focus will be on three areas of policy analysis: description, evaluation, and prescription. As part of our focus, we will address policy design, implementation, evaluation, and failure. Overall, students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options.

HLSP 529 Energy Security 3 Credits

Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

HLSP 530 Data Analysis and Methods for Political Science 3 Credits

This course introduces students to quantitative and qualitative methods used by political scientists and security specialists in the study of social and political phenomena. Students will learn the logical structure of political analysis, and the quantitative measures used to supplement and support these logical structures. Overall the course draws on the fundamentals of statistics: namely the ability to describe data samples and draw inferences about the populations from which they were drawn. It should also improve one's ability to read data, interpret data, and judge others' claims about data. After students learn these skills, they will apply them to a prepared data set. The emphasis of this course is on "hands-on" experience. Students approaching this subject for the first time will "learn by doing" this type of analysis.

HLSP 531 Critical Infrastructure Security 3 Credits

Overall the course draws on the fundamentals of risk management strategies and policies related to manmade and natural threats to critical infrastructure. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation's infrastructure. The emphasis of this course is on "hands-on" experience whereby students will "learn by doing" analysis.

Prerequisite(s): For MA students and can be offered to undergraduate students who are in the 4+1 program.

HLSP 532 Disaster Management and Preparedness 3 Credits

This course provides an overview of the following: 1) various types of natural and manmade disasters that communities are vulnerable to, and 2) how to develop corresponding preparedness, response, recovery, and mitigation strategies. Upon completing this course, students will be able to assess and develop the following: 1) preparedness plans for disaster response, 2) monitoring and evaluation plans for disaster response, 3) early warning systems plans for risk reductions, and 4) response, recovery, and mitigation strategies. Students will also learn about existing and developing domestic and international Disaster Risk Reduction models. This includes, but is not limited to: 1) strategies that prevent and minimize casualties during disasters, and 2) logistic and operational challenges. Special consideration will also be given to the impact of the social and political processes associated with disaster policy and planning.

Prerequisite(s): For MA students and can be offered to undergraduate students who are in the 4+1 program.

HLSP 533 International Law and Armed Conflict 3 Credits

By literalizing the “war on terror,” governments have broken down the distinction between what is permissible in times of peace and what can be condoned during a war. In peacetime, governments are bound by strict rules of law enforcement. For example, lethal force can be employed in law enforcement only if necessary to meet an imminent threat of death or serious bodily injury. Those detained by police must be charged and tried. However, in wartime, law enforcement rules are supplemented by a more permissive set of rules embodied in international humanitarian law, otherwise known as the law of armed conflict. Under such wartime rules, unlike during peacetime, an enemy combatant can be shot without warning (unless he or she is incapacitated, in custody, or trying to surrender), regardless of any imminent threat. If a combatant is captured, he or she can be held in custody until the end of the conflict, without any trial. This course explores how these two sets of rules have developed, both by customary international law and by international conventions, analyzes under what sorts of circumstances one set of rules should apply instead of the other, and examines the legal consequences of governments fighting the “war on terror” by expanding the boundaries of the law of armed conflict beyond the traditional battlefield to wherever terrorists hide, run, or plan. Students will receive a solid foundation in the law of armed conflict and will analyze complex legal problems occurring at the intersections of international humanitarian law, international human rights law and national security law.

Prerequisite(s): For MA students and can be offered to undergraduate students who are in the 4+1 program.

HLSP 534 Cyber Strategy and National Security 3 Credits

The course examines issues and challenges related to national security concerns and cybersecurity. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation’s cyber infrastructure. The emphasis of this course is on “hands-on” experience whereby students will “learn by doing” analysis.

HLSP 541 Hactivism and Cyberviolence 3 Credits

Hactivism is a process designed to be “the creative use of computer technology for the purposes of facilitating online protests, performing civil disobedience in cyberspace and disrupting the flow of information by deliberately intervening in the networks of global capital” (Gunkel 2005). This course addresses the challenges of hactivism for policymakers involved in domestic and international information conflict and cybersecurity related to this process. It does so by critically examining the processes of digital vandalism, cyberprotest, advocacy and persuasion used to elicit political, social and economic change. The primary focus of the course is on non-state actors and organizations who engage in the process of hactivism and cyberprotest movements.

HLSP 545 Loyalty and the State of Exception 3 Credits

The course enquires into cases ranging across Europe, the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, have suspended, if not dissolved, constitutionally guaranteed civil liberties. Under emergency situations, organs of national security are energized; organs of opinion and electronic media including internet newsgathering, opinion expression and formation, may be censored; citizens may be enlisted to report to and inform on their neighbors. Regimes of exception may severely curtail academic freedom and university life; they may regulate voluntary associations by means of secret or not so secret surveillance of meetings, and a demand for lists of members and financial contributors. States of exception may deploy methods of coercion usually proscribed in “normal” times, e.g., suspension of habeas corpus rules; extended if not indeterminate periods of detention of suspects; and techniques of “enhanced interrogation” that may violate constitutional and international law. Using a number of case studies, the course inquires into the conditions under which liberal democracies transform themselves into states of exceptions; the effects of such transformations on individual and civic life; and the procedures by which states no longer under stress return to liberal democratic procedures and recovery of civil liberties.

HLSP 550 American National Security 3 Credits

The course is part of the foundational sequence of the M.A. in Homeland Security Policy. The course trains students to think strategically and critically about major issues facing American National Security.

HLSP 551 Global Security 3 Credits

This seminar critically addresses the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

HLSP 552 U.S. Foreign and Security Policy 3 Credits

This course emphasizes the main theories of and themes in American foreign policy since the end of the Second World War. We will examine the patterns that have permeated American Foreign Policy since 1945, and discuss the roles that various actors play in the foreign policy process. We will use theoretical concepts to discuss the major events in American foreign policy over the last half of a century. The course will focus on both the conduct and formulation of American foreign policy. Detailed knowledge of the policy-making process, including legal and institutional restraints and standard operating procedures, is clearly essential for all students of foreign policy. Yet, only by exploring America's past actions in the global arena and only by searching for historical precedents and patterns can students fully grasp the dilemmas facing the United States today.

HLSP 553 Cyber War 3 Credits

Cyber attacks are a growing concern for international community. When does a cyber attack constitute an act of war or is merely an inconvenience? Is cyber power military power? How prevalent are such attacks, and to what extent can cyber attacks lead to conventional conflicts? Will cyber attacks by non-state actors render more power to such players in destabilizing states? This course explores the different types of issues in cyber wars, including mechanisms through which targeting of communication technology could escalate tensions and lead to an armed conflict, and ways through which states and international organizations could limit the de-structive potential of cyber technology.

HLSP 554 Asymmetric Conflict: When The Weak Attack The Strong and Succeed 3 Credits

Why is it that the weak challenge the strong and sometimes manage to succeed? In fact, between 1800-2003, nearly 30 percent of all international conflicts waged against more powerful adversaries, the weaker party came out victorious. And the weaker actors have achieved more victories over time. Asymmetric conflict or competition between a weak and a strong adversary is all around us. From North Korea to Iran defying the United States and risking military confrontation through nuclear tests and drone shootings, the weak it seems defy the basic expectation that possession of material power is an all-time guarantee of security. This course examines why the weak rise against the strong, how they manage to succeed, and in what capacity. We focus on unconventional, conventional, and hybrid tactics of the weak and the implications for U.S. strategy development. We rely on cases of international conflicts and insurgencies to derive insights about the theory of asymmetric conflict onset and termination and to predict future trends in the struggle between the weak and the strong.

HLSP 555 Insurgency and Counterinsurgency: U.S. Wars in Iraq & Afghanistan 3 Credits

Intrastate rather than interstate conflicts account for majority of armed conflicts today. The outbreak of the Syrian insurgency, the challenges experienced by U.S. forces in Afghanistan and Iraq, and humanitarian crisis in Yemen illustrate that stickiness of the problem. Today's civil wars are mostly insurgencies, conflicts with the use of guerrilla tactics. Increasingly, they involve multiple non-state actors challenging the government. What explains the onset of such conflicts? What role do ethnic and religious differences play in conflict initiation? How do guerrilla fighters acquire the means to wage their war? Is democracy a solution to conflicts? Are insurgencies a threat to U.S. security and economic interests? Why has the United States struggled with its counterinsurgency operations in Iraq and Afghanistan? And what lessons have been learned for future management of such threats? The course explores the onset, management, and termination of insurgencies, with special focus on current debates on counterinsurgency approaches. We will focus on the role of resources, state capacity, ethnic/religious differences and power in setting the stage for the conflict to start. We will then explain why insurgencies are difficult to end, and why the United States has struggled to stabilize the situation in Iraq and Afghanistan. Lastly, the course will focus on conflict management by emphasizing specific counterinsurgency approaches, including population and state-centric strategies. We will explore in what ways the United States, in particular, has been successful in these areas and why it has failed in others. This course relies on classroom discussions, peer collaboration, creative thinking exercises/projects, simulation, game exercise, and case study analysis to facilitate learning and student engagement.

HLSP 562 Responding to Collective Threats: Terrorism & Beyond 3 Credits

The difference between the professional and the novice in Homeland Security is not measured by the number of "items" one knows but by the ability to sift through the mounds of information, identify what is important, and form causal links between what was selected. The aim of this course is to familiarize students with the main methods by which the important relevant data in Homeland Security are identified and linked to produce a coherent understanding of and reaction to collective threats. Students will focus on how to conceptualize and respond to collective dangers, including contemporary events that may arise throughout the semester.

HLSP 567 Global Immigration Trends and Security Issues 3 Credits

Amidst the broader trends of international politics that address the growing flow of goods, capital, and information across state borders, the movement of people is a permanent and expanding feature. However, central to the notion of the political identity of the nation-state is the ability to control the entry of non-citizens. The regulatory power of the nation-state to control its borders is at least threatened by the migratory movements of people. People are driven from their homes by conditions of war, economic difficulty, or environmental disaster. Millions of people migrate permanently each year, and about 20 million are refugees and seek political asylum worldwide. The vast majority of refugees are women and children—this is the hidden truth of the post-Cold War order, huge numbers of displaced women and children. These numbers are significant, particularly since the general movement heads in one direction, toward advanced industrial states, mainly Western Europe and the United States. About 35 million legal and illegal immigrants live in the United States. Immigrants account for 11.5 percent of the total population, the highest percentage in 70 years. Critics warn that if current trends continue, by the end of this decade the immigrant share of the total population will surpass the all time high of 14.8 percent reached in 1890. Understanding immigration and refugee issues in this interdependent world will help us to gain insights into the workings of political, economic, and social forces both within receiving and sending states as well as the international regime which regulates these movements. The topics addressed in this course go beyond simple models of utility and efficiency since the questions of immigration and political asylum are often deeply emotional issues for societies; the issue also has a significant moral dimension.

HLSP 590 Master's Thesis 3 Credits

Students will complete an original substantive research paper that will build on prior research in Security Studies or related discipline.

HLSP 591 M.A. in Homeland Security Internship 3 Credits

The course is part of the capstone requirements of the M.A. in Homeland Security Policy. The course will have students complete an internship, self-evaluation and write a reflection paper outlining their experience working in a security related position.

HLSP 690 Research & Creative Expression 1-4 Credits

College of Liberal Arts and Sciences Faculty

John A. Adamovics

Priority Adjunct Associate Professor, Department of Chemistry and Biochemistry
B.A. Portland State University; Ph.D. Colorado State University

Wendy Adlai-Gail

Priority Adjunct Assistant Professor, Department of Psychology
B.A. Brown University; M.A. University of Chicago; Ph.D. University of Chicago

Md Liakat Ali

Assistant Professor, Department of Computer Science and Physics
B.S. International Islamic University; M.S. Blekinge Institute of Technology; Ph.D. Pace University

Nadia S. Ansary

Professor, Department of Psychology
B.A. Rutgers, The State University of New Jersey; M.A. Teachers College, Columbia University; M.Phil. Teachers College, Columbia University; Ph.D. Teachers College, Columbia University

Anthony Bahri

Professor, Department of Mathematics
B.Sc. The University of Sydney; M.Sc. University of Oxford; D.Phil. University of Oxford

Kelly A. Bidle

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Rutgers, The State University of New Jersey; Ph.D. University of Maryland

Pauline Blaimont

Lecturer, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. California State University; M.S. University of California; Ph.D. University of California

John J. Bochanski

Associate Professor, Department of Computer Science and Physics
B.S. Villanova University; M.S. University of Washington; Ph.D. University of Washington

Ciprian S. Borcea

Professor, Department of Mathematics
B.S. University of Bucharest, Romania; Diploma in Mathematics University of Bucharest, Romania; Ph.D. University of Bucharest, Romania

Michael J. Brogan

Professor, Department of Political Science
B.A. University of Delaware; M.P.A. Rutgers, The State University of New Jersey - Camden; M.Phil. The Graduate Center, City University of New York; Ph.D. The Graduate Center, City University of New York

Gary M. Brosvic

Professor, Department of Psychology
B.S. John Carroll University; M.A. The American University; Ph.D. The American University

Kathleen M. Browne

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.A. Colgate University; M.A. Binghamton University, State University of New York; Ph.D. Rosenstiel School of Marine and Atmospheric Science, University of Miami

Robert Burger

Priority Adjunct Assistant Professor, Department of Communication and Journalism
B.F.A. Pratt Institute; M.F.A. Miami International University of Art & Design

Michael Carlin

Associate Professor, Department of Psychology
B.A. Wheeling Jesuit University; Ph.D. Vanderbilt University

Feng Chen

Associate Professor, Department of Chemistry and Biochemistry
B.S. Hunan University, P. R. China; Ph.D. Northeastern University

Lisa Chong

Priority Adjunct Instructor, Department of English
B.S. Cairn University; M.A. Arcadia University; M.Ed. University of Pennsylvania

Daria Cohen

Professor, Department of Languages, Literatures and Cultures
 B.A. Douglass College, Rutgers, The State University of New Jersey; M.A. Rutgers, The State University of New Jersey; Ph.D. Rutgers, The State University of New Jersey

Deborah Cordonnier

Priority Adjunct Instructor, Department of English
 B.S. University of Missouri; M.A. Texas A & M University; M.Div. Princeton Theological Seminary; Th.M. Princeton Theological Seminary; M.F.A. Goddard College

Mack Costello

Associate Professor, Department of Psychology
 B.S. University of Florida; M.A. Western Michigan University

Michele D'Angelo

Priority Adjunct Assistant Professor, Department of English
 B.A. The College of New Jersey; MAT The College of New Jersey; Ed.S. Rider University

Melissa M. DeWees

Priority Adjunct Assistant Professor, Department of Psychology
 B.A. Towson State University; M.A. Alliant International University; Psy.D. Alliant International University

David R. Dewberry

Professor, Department of Communication and Journalism
 B.A. University of Arkansas; M.A. University of Arkansas; Ph.D. University of Denver

Cara J. DiYanni

Associate Professor, Department of Psychology
 B.A. Georgetown University; M.A. Boston University; Ph.D. Boston University

Chrystina A. Dolyniuk

Associate Professor, Department of Psychology
 B.A. University of California, Los Angeles; M.A. California State University, Northridge; Ph.D. University of Calgary

Julie Drawbridge

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
 B.S. The University of Maine; Ph.D. The University of Texas at Austin

Daniel L. Druckenbrod

Associate Professor, Department of Geological, Environmental, and Marine Sciences
 B.S. University of Notre Dame; Ph.D. University of Virginia

Bosah L. Ebo

Professor, Department of Communication and Journalism
 B.S. University of Wisconsin-Stevens Point; B.S. University of Wisconsin-Stevens Point; M.A. University of Wisconsin-Stevens Point; Ph.D. The University of Iowa

Jeff Edelstein

Priority Adjunct Instructor, Department of Communication and Journalism
 B.A. Rider University

Alice Faroh

Priority Adjunct Assistant Professor, Department of Languages, Literatures and Cultures
 B.A. Universidad Pedagógica Experimental de Barquisimeto; M.A. Maryville University

Joel Feldman

Associate Professor, Department of History and Philosophy
 B.A. Hampshire College; Ph.D. The University of Texas at Austin

Roberta Fiske-Rusciano

Priority Adjunct Assistant Professor, Department of Political Science
 B.A. Simmons College; M.A. University of Chicago; Ph.D. Rutgers, The State University of New Jersey

William F. Fobare

Priority Adjunct Assistant Professor, Department of Chemistry and Biochemistry
 A.B. Hope College; Ph.D. University of South Carolina

Hernán Fontanet

Professor, Department of Languages, Literatures and Cultures
 B.A. The University of Buenos Aires; A.M. Universidad Complutense de Madrid; Ph.D. Universidad Autónoma de Madrid

Jessica Franko-Oliano

Priority Adjunct Assistant Professor, Department of Communication and Journalism
 B.A. Rider University; MBA Rider University

Barbara Franz

Professor, Department of Political Science
 M.A. University of Vienna; M.A. Syracuse University; M.A. Syracuse University; Ph.D. Syracuse University

Lucien J. Frary

Professor, Department of History and Philosophy
 B.A. University of St. Thomas; M.A. University of Minnesota, Twin Cities; Ph.D. University of Minnesota, Twin Cities

Daniel C. Garro

Priority Adjunct Instructor, Department of History and Philosophy
 B.A. Washington College; M.A. Texas Tech University

Matthew B. Goldie

Professor, Department of English
 B.A. Victoria University; M.F.A. Brooklyn College; Ph.D. The Graduate Center, City University of New York

Selma C. Goldstein

Priority Adjunct Instructor, Department of English
 B.S. Cornell University; MBA Fairleigh Dickinson University

Stephanie Golski

Associate Professor, Department of Psychology
 B.A. McDaniel College; Ph.D. The Johns Hopkins University

Alexander Grushow

Professor, Department of Chemistry and Biochemistry
 B.A. Franklin & Marshall College; Ph.D. University of Minnesota

Sophie Guderian

Lecturer, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. University of North Carolina; M.S. University of North Carolina; Ph.D. University of Delaware

John Guers

Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
M.S. East Stroudsburg University; M.S. East Stroudsburg University; Ph.D. University of Delaware

Jeffrey Halpern

Associate Professor, Department of Sociology and Criminology
B.A. The City College of New York; Ph.D. University of Pittsburgh

Laurel Harris

Associate Professor, Department of English
B.A. Oberlin College; M.A. University of Chicago; Ph.D. The Graduate Center, City University of New York

Catrinel Haught Tromp

Associate Professor, Department of Psychology
B.A. Queens University of Charlotte; Ph.D. Princeton University

Elizabeth Hawthorne

Online Lecturer, Department of Computer Science and Physics
B.S. Rider University; M.S. Kean University; Ph.D. Nova Southeastern University; Postdoctoral Fellowships, University of Maryland

Wendy P. Heath

Professor, Department of Psychology
B.A. Boston University; M.S. The University of Texas at Arlington; Ph.D. The University of Texas at Arlington

Mickey Hess

Professor, Department of English
Ph.D. University of Louisville

Sheena C. Howard

Associate Professor, Department of Communication and Journalism
B.B.A. Iona College; M.A. New York Institute of Technology; Ph.D. Howard University

Brooke B. Hunter

Associate Professor, Department of History and Philosophy
B.A. University of California, Irvine; M.A. University of Delaware; Ph.D. University of Delaware

Jacqueline Soteropoulos Incollingo

Associate Professor, Department of Communication and Journalism
B.A. Connecticut College; M.A. Philip Merrill College of Journalism, University of Maryland; Ph.D. Philip Merrill College of Journalism, University of Maryland

Robert Isenhower

Assistant Professor, Department of Psychology
B.S. Clemson University; Ph.D. University of Connecticut

Danielle L. Jacobs

Associate Professor, Department of Chemistry and Biochemistry
B.S. Haverford College; Ph.D. The University of North Carolina at Chapel Hill

Barry T. Janes

Professor, Department of Film and Television
B.A. Rutgers, The State University of New Jersey; M.A. Rutgers, The State University of New Jersey; Ph.D. New York University

Paul R. Jivoff

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Hartwick College; M.S. The Ohio State University; Ph.D. University of Maryland

Howard H. Joffe

Priority Adjunct Associate Professor, Department of Communication and Journalism
B.A. Rutgers, The State University of New Jersey; J.D. Benjamin N. Cardozo School of Law, Yeshiva University

Terra Walston Joseph

Associate Professor, Department of English
B.A. Indiana University; M.A. University of Illinois; Ph.D. University of Illinois

Jonathan Karp

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Colgate University; Ph.D. Vanderbilt University

Mamadou Keita

Lecturer, Department of Computer Science and Physics
B.A. Ecole Normale Supérieure Bamako; M.S. Ohio University; Ph.D. University of Miami; M.S. University of Miami

Shawn P. Kildea

Associate Professor, Department of Film and Television
B.A. Rider University; M.A. Rider University; Ph.D. Rutgers, The State University of New Jersey

Jennifer King

Lecturer, Department of Psychology
B.A. The College of New Jersey; M.S. Villanova University; M.S. University of Maryland; Ph.D. University of Maryland

Joanna Kubik

Assistant Professor, Department of Sociology and Criminology
B.A. Boston University; M.A. Jagiellonian University; Ph.D. Rutgers School of Criminal Justice

Anne Law

Professor, Department of Psychology
B.A. University of New Hampshire; M.A. University of New Hampshire; Ph.D. University of New Hampshire

Maxim J. Losi

Priority Adjunct Assistant Professor, Department of English
A.B. Princeton University; M.A. New York University; Ph.D. New York University

Phillip L. Lowrey

Associate Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Vanderbilt University; Ph.D. Northwestern University

Duo Lu

Assistant Professor, Department of Computer Science and Physics
B.E. Shanghai Jiao Tong University; M.S. Arizona State University

Cynthia Lucia

Professor, Department of Film and Television
B.S. Indiana University of Pennsylvania; M.A. New York University; M.A. New York University; Ph.D. New York University

Zhengping Luo

Assistant Professor, Department of Computer Science and Physics

Katherine G. Magrino

Priority Adjunct Instructor, Department of Communication and Journalism
B.A. The College of New Jersey; M.A. Thomas Edison State College

Cynthia Martinez

Assistant Professor, Department of Languages, Literatures and Cultures
B.A. Murray State University; M.A. University of Louisville; Ph.D. Indiana University

Nicholas McLeod

Assistant Professor, Department of History and Philosophy
B.A. Bucknell University; M.A. University of Louisville; Ph.D. University of Louisville

Adam McMahon

Assistant Professor, Department of Political Science
B.A. Bowling Green State University; M.S. Portland State University; Ph.D. City University of New York

Susan J McManimon

Priority Adjunct Assistant Professor, Department of Communication and Journalism
B.A. Kean University; M.A. Montclair State University; Ph.D. Indiana University of Pennsylvania

Jonathan Mendilow

Professor, Department of Political Science
B.A. The Hebrew University of Jerusalem; M.A. The Hebrew University of Jerusalem; Ph.D. The Hebrew University of Jerusalem

Ahmad Mojiri

Associate Professor, Department of Mathematics
B.S. Isfahan University of Technology; M.S. Isfahan University of Technology; Ph.D. University of Ottawa

Aaron J. Moore

Associate Professor, Department of Communication and Journalism
B.A. La Salle University; M.A. Temple University; Ph.D. Temple University

Mourya Reddy Narasareddygar

Assistant Professor, Department of Computer Science and Physics
B.A. Sri Krishnadevaraya University; M.S. North Dakota State University; Ph.D. North Dakota State University

Stéphane Natan

Professor, Department of Languages, Literatures and Cultures
B.A. Université Jean Moulin Lyon 3, France; M.A. Université Lumière Lyon 2, France; Ph.D. Université Jean Moulin Lyon 3, France

Vanita Neelakanta

Professor, Department of English
B.A. Jadavpur University, India; M.A. Jadavpur University, India; Ph.D. Brandeis University

Olivia Newman

Associate Professor, Department of Political Science
B.A. The Evergreen State College; M.A. The New School; Ph.D. The New School

Carol J. Nicholson

Professor, Department of History and Philosophy
B.A. Earlham College; Ph.D. Bryn Mawr College

Seiwoong Oh

Professor, Department of English
B.A. Chung-Ang University, Seoul; M.A. West Texas A&M University; Ph.D. University of North Texas

Jessica Oliano

Lecturer, Department of Communication and Journalism
B.A. Rider University; M.B.A. Rider University

Anne R. Osborne

Professor, Department of History and Philosophy
B.A. New York University; M.A. Columbia University; Ph.D. Columbia University

Francis A. Perrin

Priority Adjunct Assistant Professor, Department of Psychology
B.S. Stockton University; M.S. Temple University; Ph.D. Temple University

Pearlie Peters

Professor, Department of English
B.S. Grambling State University; Ph.D. State University of New York at Buffalo

Mary Poteau-Tralie

Professor, Department of Languages, Literatures and Cultures
B.A. Temple University; M.A. Princeton University; Ph.D. Princeton University

Susan Power

Priority Adjunct Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Trinity College; Ph.D. University College Dublin

Magnolia Pérez-Garrido

Priority Adjunct Assistant Professor, Department of Languages, Literatures and Cultures
B.A. The College of New Jersey; M.A. Villanova University

William Quirk

Priority Adjunct Instructor, Department of English
B.A. University of Colorado; M.A. University of Washington

Elizabeth Radziszewski

Assistant Professor, Department of Political Science
B.A. Rutgers, The State University of New Jersey; M.A. University of Illinois at Urbana-Champaign; Ph.D. University of Illinois at Urbana-Champaign

Mohamed Rahouti

Assistant Professor, Department of Computer Science and Physics

Robert Reilly

Professor-Librarian, Department of English
 B.A. St. Mary's Seminary and University; M.A. University of Washington;
 Ph.D. University of Washington

James E. Riggs

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
 B.S. Delaware Valley College; M.S. University of Massachusetts Amherst;
 Ph.D. University of Massachusetts Amherst

Jane E. Rosenbaum

Priority Adjunct Assistant Professor, Department of English
 B.A. The City College of New York; M.A. University of Pittsburgh; Ph.D.
 University of Pittsburgh

Kelly Ross

Assistant Professor, Department of English
 B.A. The College of William & Mary; M.A. The University of North Carolina
 at Chapel Hill; Ph.D. The University of North Carolina at Chapel Hill

Erica Rubine

Priority Adjunct Professor, Department of English
 B.A. Scripps College; M.A. University of Pennsylvania; Ph.D. University of
 Pennsylvania

Frank L. Rusciano

Professor, Department of Political Science
 B.A. Cornell University; M.A. University of Chicago; Ph.D. University of
 Chicago

Erica J. Ryan

Associate Professor, Department of History and Philosophy
 B.A. Sarah Lawrence College; A.M. Brown University; Ph.D. Brown
 University

Elizabeth S. Scheiber

Professor, Department of Languages, Literatures and Cultures
 B.A. Western Kentucky University; M.A. Indiana University; Ph.D. Indiana
 University

George Otto Schneller

Priority Adjunct Associate Professor, Department of Mathematics
 B.S. Mount Union University; M.A. Lehigh University; Ph.D. Lehigh
 University

Reed A. Schwimmer

Associate Professor, Department of Geological, Environmental, and
 Marine Sciences
 B.S. Rider University; M.A. Bryn Mawr College; Ph.D. University of
 Delaware

Elaine A. Scorpio

Associate Professor, Department of Psychology
 B.A. Rhode Island College; M.A. Rhode Island College; Ph.D. Syracuse
 University

Kerrie Sendall

Assistant Professor, Department of Biology, Behavioral Neuroscience, and
 Health Sciences
 B.S. California State University; M.S. California State University; Ph.D.
 University of Minnesota and Macquarie University

Raymond Setters, II

Priority Adjunct Assistant Professor, Department of English
 B.A. Rider University; M.F.A. Rosemont College

Nikki Shepardson

Associate Professor, Department of History and Philosophy
 B.A. University of Rochester; M.A. Rutgers, The State University of New
 Jersey; Ph.D. Rutgers, The State University of New Jersey

Gabriela W. Smalley

Associate Professor, Department of Geological, Environmental, and
 Marine Sciences
 B.S. University of Maryland; Ph.D. University of Maryland

Bryan D. Spiegelberg

Associate Professor, Department of Chemistry and Biochemistry
 B.S. Denison University; Ph.D. Duke University

Drue Stapleton

Assistant Professor, Department of Biology, Behavioral Neuroscience, and
 Health Sciences
 A.A. Hudson Valley Community College; B.S. State University of New York
 at Cortland; M.Ed. Salisbury University; Ph.D. West Virginia University

Jay Stern

Assistant Professor, Department of Film and Television
 B.A. Columbia University; M.A. European Graduate School

Joshua Stratton

Assistant Professor, Department of Chemistry and Biochemistry
 B.A. Wartburg College; Ph.D. Colorado State University

Susan Strom

Priority Adjunct Instructor, Department of English
 B.A. University of Toronto; M.A. University of Cincinnati; M.Ed. Temple
 University

Helen T. Sullivan

Priority Adjunct Assistant Professor, Department of Psychology
 B.F.A. Saint Mary's College; M.S. Saint Louis University; Ph.D. Saint Louis
 University

Jack Sullivan

Professor, Department of English
 B.A. Furman University; M.A. Columbia University; M.Phil. Columbia
 University; Ph.D. Columbia University

Hongbing Sun

Professor, Department of Geological, Environmental, and Marine Sciences
 B.A. Nanjing University, China; M.S. Chinese Academy of Geological
 Sciences, Beijing; Ph.D. Florida State University

Alison D. Thomas-Cottingham

Associate Professor, Department of Psychology
 B.S. University of Maryland; M.A. Binghamton University, State University
 of New York; Ph.D. Binghamton University, State University of New York

Victor R. Thompson

Associate Professor, Department of Sociology and Criminology
 B.A. University of Illinois at Urbana-Champaign; M.A. Stanford University;
 Ph.D. Stanford University

Megan L. Titus

Associate Professor, Department of English
B.A. Muhlenberg College; M.A. Montclair State University; Ph.D. Ohio University

Sarah Trocchio

Assistant Professor, Department of Sociology and Criminology
B.A. Clark University; M.S.W. Boston University School of Social Work; M.A. Rutgers University; Ph.D. Rutgers University of Criminal Justice

Barry E. Truchil

Associate Professor, Department of Sociology and Criminology
B.A. American University; M.A. American University; Ph.D. Binghamton University, State University of New York

Cynthia Vieth

Lecturer, Department of Communication and Journalism
B.A. Rutgers, The State University of New Jersey; M.C.I.S. Rutgers, The State University of New Jersey; Ed.D. Rowan University

Maria F. Villalobos-Buehner

Professor, Department of Languages, Literatures and Cultures
B.A. Universidad del Valle, Cali-Colombia; M.A. University of Portsmouth, Portsmouth-England; Ph.D. Michigan State University

Shunzhu Wang

Professor, Department of Languages, Literatures and Cultures
B.A. Soochow University, Suzhou, China; M.A. Wayne State College; Ph.D. Purdue University

Nancy C. Weber

Priority Adjunct Instructor, Department of Chemistry and Biochemistry
B.S. Alderson Broaddus University; M.S. The Pennsylvania State University

E. Todd Weber

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Slippery Rock University; M.S. The University of Illinois at Urbana-Champaign; Ph.D. The University of Illinois at Urbana-Champaign

Allison D. Weidhaas

Associate Professor, Department of Communication and Journalism
B.A. Rowan University; M.A. Rowan University; M.S. University of South Florida; Ph.D. University of South Florida

Nancy A. Wienczek

Associate Professor, Department of Communication and Journalism
B.A. Douglass College, Rutgers, The State University of New Jersey; M.S. University of Louisiana at Lafayette; Ph.D. Rutgers, The State University of New Jersey

James Wojtowicz

Lecturer, Department of Sociology and Criminology
B.A. Rutgers University; M.S. Rutgers University

Yun Xia

Professor, Department of Communication and Journalism
B.A. Sichuan University, China; M.A. Sichuan University, China; Ph.D. Southern Illinois University

Richard A. Zdan

Lecturer, Department of Sociology and Criminology
B.Sc. Carnegie Mellon University; M.A. The University of Chicago

Ava Baron

Professor Emerita, Department of Sociology and Criminology
B.A. Brooklyn College, C.U.N.Y.; M.A. New York University; Ph.D. New York University

Gary Barricklow

Professor Emeritus, Department of English
B.A. California State University, Sacramento; M.A. California State University, Sacramento; Ph.D. University of New Mexico

Pamela Brown

Professor Emerita, Department of Communication and Journalism
B.A. Rider University; M.A. The Ohio State University; Ph.D. The University of Iowa

Richard Burgh

Professor Emeritus, Department of History and Philosophy
B.A. Rider University; M.A. University of Wisconsin; Ph.D. University of Wisconsin

Richard Butsch

Professor Emeritus, Department of Sociology and Criminology
B.S. University of Cincinnati; M.S. University of Cincinnati; Ph.D. Rutgers University

Thomas Callahan

Professor Emeritus, Department of History and Philosophy
B.A. State University of New York at Albany; M.A. University of Connecticut; Ph.D. University of Connecticut

James Carlson

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Fenn College; M.S. Ohio State University; Ph.D. Ohio State University

James M. Dickinson

Professor Emeritus, Department of Sociology and Criminology
B.A. University of Kent, Canterbury, UK; M.A. American University; Ph.D. University of Toronto

Mervin Dissinger

Professor Emeritus, Department of Psychology
B.S. Millersville State College; M.A. Temple University; Ph.D. Temple University

Benjamin Eichhorn

Professor Emeritus, Department of Psychology
B.S. Hebrew University; Ph.D. University of California at Berkeley

Michael Epstein

Professor Emeritus, Department of Psychology
B.S. University of Washington; B.A. University of Washington; Ph.D. University of Washington

Kenneth Fields

Professor Emeritus, Department of Mathematics
S.B. Massachusetts Institute of Technology; Ph.D. University of California at Berkeley

Phyllis Frakt

Professor Emerita, Department of Political Science
B.A. Douglass College; M.A. Rutgers University; Ph.D. Rutgers University

Marvin Goldstein

Professor Emeritus, Department of Psychology
B.A. Hofstra University; M.A. Hofstra University; Ph.D. New School for
Social Research

Robert Good

Professor Emeritus, Department of History and Philosophy
A.B. Princeton University; M.A. University of Wisconsin–Madison; Ph.D.
University of Wisconsin–Madison

Joseph Gowaskie

Professor Emeritus, Department of History and Philosophy
B.A. St. Norbert College; M.A. Catholic University of America; Ph.D.

University; Ph.D. Bowling Green State University

Graduate Academic Policies

Introduction

Graduate students must comply with the general requirements of Rider University concerning graduate study. Graduate students must demonstrate the ability to express their thoughts in writing and in speaking in clear, correct English for class reports, research papers, theses and examinations.

Graduate students should refer below for important information regarding Rider's graduate academic policies. In addition, academic policies

specific to degree programs or certificates housed within each of the colleges/schools can be found in the Academic Catalog as per the list below.

- Norm Brodsky College of Business (p. 844)
- College of Liberal Arts and Sciences (p. 968)
- College of Education and Human Services (<http://catalog.rider.edu/graduate/colleges-schools/education/education-leadership-counseling/>)
- Westminster Choir College (p. 1193)

Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to, those standards and policies set forth in this catalog and in The Student Code of Social Conduct (https://www.rider.edu/sites/default/files/docs/student_code_of_social_conduct.pdf). **Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student.**
2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirements), creations, and activities engaged in by the student while at the University, including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, internet/web-based productions and sales, and athletic events and all proceeds therefrom. The student has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

Rider University's Right to Change Catalog Content

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student.

While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and

reasonable treatment of interested parties requires in the University's best judgment.

-
- Academic Concern, Conditional Standing/Dismissal and Readmission (p. 1000)
 - Academic Disability Policy (p. 1001)
 - Academic Records (p. 1002)
 - Academic Load/Overload (p. 1002)
 - Accompanying Costs for Voice Students (p. 1003)
 - Applied Music - Westminster College of the Arts (p. 1003)
 - Class Attendance/Absence (p. 1004)
 - Class Cancellation (p. 1004)
 - Class Cancellation Policy and Excused Absences - Westminster Choir College (p. 1004)
 - Commencement Requirements – Westminster Choir College (p. 1004)
 - Course Credits (p. 1004)
 - Course Level Numbering (p. 1004)
 - Course Repeats - Westminster College of the Arts (p. 1005)
 - Courses - Adding, Dropping, Repeating and Withdrawing (p. 1005)
 - Degree Completion (p. 1005)
 - Diploma Conferral (p. 1006)
 - Employment Opportunities – Westminster Choir College (p. 1006)
 - Ensembles/Productions – Attire and Registration (p. 1006)
 - Full-Time Graduate Tuition Inclusion - Westminster Choir College Students (p. 1006)
 - Grades - Grade Reports, Grade Point Average, Incomplete Grades, Grade Appeals (p. 1006)
 - Graduate Assistantships (p. 1010)
 - Graduate Oral Examinations - Westminster Choir College (p. 1010)
 - Graduation with Distinction - Westminster Choir College (p. 1193)
 - Health and Safety - Westminster College of the Arts (p. 1010)

Academic Concern, Conditional Standing/Dismissal and Readmission

Students permitted to enroll at Rider University are either in:

- (a) Graduate Standing, in which case they are qualified to undertake graduate study and are recognized as degree or certification candidates upon admission;
- (b) Conditional Standing, in which case they are permitted to enroll for a probationary period before a final decision of Graduate Standing is made; or
- (c) Special Standing, in which case they are not enrolled in a Riderdegree program but are permitted to enroll in some courses.

Decisions regarding academic progress, conditional standing, and dismissal for poor scholarship or poor professional performance are the responsibility of the faculty of the relevant program or the Committee on Academic Standing within each college or school. These committees may establish and apply criteria in addition to the minimum university cumulative grade point average (GPA). Using approved academic criteria, the Committee on Academic Standing within each college or school may review the academic record of any student. The following applies to all graduate students.

- Master's and graduate students with a cumulative GPA below 3.0, and Ed.S., Ed.D., or EMBA students with a cumulative GPA below 3.3, will be placed on probationary academic standing and may be dismissed.
- The minimum GPA to graduate from a Master's and graduate certificate program is 3.0 and from an Ed.S., Ed.D., or EMBA program is 3.3.
- For all graduate programs, students graduating with a cumulative GPA of 3.85 or above graduate with distinction.

Master's and graduate students who fail to maintain at least a 3.0 cumulative GPA, and Ed.S., Ed.D. or EMBA students who fail to maintain at least a 3.3 cumulative GPA, will be reviewed by the appropriate program faculty or Committee on Academic Standing and may receive a letter of academic concern, be placed on conditional standing, or be dismissed from the University.

Academic Concern

Upon review of a student's academic record and professionalism, a Committee on Academic Standing or Department Chair may issue a letter of concern, which responds to academic progress that does not meet college, school or university expectations, and describes an academic plan of study or professional remediation plan that must be met in the subsequent semester. Students who fail to pursue the plan prescribed by the department faculty or an academic standing committee, who do unsatisfactory work in the prescribed plan, or who fail to meet other academic standards may be placed on Conditional Academic Standing or dismissed.

Conditional Academic Standing

Upon review of a student's academic record and professionalism, the department faculty or a Committee on Academic Standing may place a student on Conditional Academic Standing. In reaching this decision, the faculty or committee may require a student who does unsatisfactory work to pursue a specific course of study or professional remediation plan during a particular academic session. Students who fail to pursue the plan prescribed by the faculty or an academic standing committee,

who do unsatisfactory work in the prescribed plan, or who fail to meet other academic standards may be continued on Conditional Academic Standing or may be dismissed without further right of appeal. There must be substantial evidence of proper motivation and a capacity for doing graduate level work to warrant maintaining a student in school with a record of continued conditional status as opposed to dismissal.

Students on conditional academic standing may not register for an academic overload. Westminster Choir College graduate students on conditional standing are ineligible for assistantships and may become ineligible for other scholarship awards. Additionally, students must be removed from conditional status in order to be approved for graduation.

Academic Dismissal from the University

Students who have not done satisfactory work may be dismissed from the University for poor scholarship or poor professional conduct at the end of any semester after an appropriate review of their scholastic performance by the department faculty or Committee on Academic Standing within their college or school. Academic dismissal at the end of the fall semester is effective prior to the beginning of the spring semester.

Academic dismissal at the end of the spring semester is effective prior to the beginning of summer session.

Students who wish to appeal a dismissal must submit a written statement of appeal to the department chair or academic dean of their college or school within 10 days from the date on their letter of dismissal.

All appeals submitted by the deadline will receive consideration by the appropriate academic standing committee.

Dismissal for academic or professional conduct reasons terminates a student's relationship with Rider. Dismissed students may not enroll for courses nor participate in university-sponsored activities or ensembles at either campus for a period of one year following their dismissal. Students dismissed for academic or professional conduct reasons normally will not be eligible for readmission within one calendar year of the dismissal date. Although some students will apply for readmission, there is no real or implied right to such readmission.

Students dismissed by Westminster Choir College (WCC) but not Rider University may apply for enrollment in graduate programs in other colleges of the University. Students dismissed by WCC but not Rider University may not enroll in WCC courses, ensembles or activities until they have been readmitted to WCC with the exception of courses, ensembles or activities that are delivered by or at WCC and are required in music degrees housed within the School of Fine and Performing Arts.

Dismissal from a Major within Westminster College of the Arts

Academic departments within Westminster College of the Arts reserve the right to dismiss a student from a major following notification that their standing in the major is in jeopardy and the passage of a suitable amount of time permitted to address stated issues, typically one semester. Such dismissal may be based upon any of the following conditions: failure to maintain a satisfactory or minimum GPA; failure to sustain academic progress in the courses of the major; conduct in violation of the standards of the department or profession; failure to meet conditions or requirements as stated in university catalogs, The Student Code of Social Conduct (https://www.rider.edu/sites/default/files/docs/student_code_of_social_conduct.pdf), or the departmental handbook; or the student's general standing at Rider University. Such dismissal will become effective at the end of the semester in which the decision is reached. Students dismissed from Music Education are not

permitted to enroll in Music Education courses until readmitted into the Music Education major.

Readmission after Academic Dismissal

Dismissed students seeking readmission must first contact the Registrar's Office (<https://www.rider.edu/academics/academic-support-services/registrar/>), Bart Luedeke Center, or the Associate Dean of Students Office, Bart Luedeke Center to obtain appropriate forms. Once the Registrar or Associate Dean of Students or his/her designee approves the readmission application, the application is forwarded to the dean of the college or chair of the department to which the student seeks reentry. Students dismissed for academic reasons must submit with their readmission application a personal letter to the Academic Standing Committee which will make decisions concerning their readmission. They should also provide evidence, usually in the form of a transcript from another institution, of formal study and/or accomplishment. If possible, such work should have been done in specific areas of deficiency in the student's academic record.

Academically dismissed students must meet all academic requirements in place at the time of their readmission. Readmission will be dependent upon various criteria including GPA, current academic progress, evidence of professional growth, and the student's general standing. Students may be required to reapply or reaudition.

If readmission is granted, the student is placed on conditional academic standing until the cumulative GPA reaches a satisfactory level of at least 3.0. A readmitted student is responsible for curriculum requirements in effect at the time of readmission.

Students should refer to The Student Code of Social Conduct at https://www.rider.edu/sites/default/files/docs/student_code_of_social_conduct.pdf for information regarding readmission following a voluntary or judicial dismissal.

Academic Disability Policy

Rider University supports the protections available to students with disabilities under Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended, and the New Jersey Law Against Discrimination.

Student Accessibility and Support Services (<https://www.rider.edu/academics/academic-support-services/student-accessibility-support-services/>) (SASS) facilitates equal access to the programs and activities at Rider University for students with disabilities, as defined by the Americans with Disabilities Act (ADA).

Students must initiate contact with SASS in order to receive services and to arrange reasonable accommodations, such as course adjustments, course substitutions and auxiliary aids. Any Rider student who supplies SASS with appropriate documentation of a disability is eligible on a case-by-case basis for reasonable accommodations. Students with disabilities should contact SASS Bart Luedeke Center, Suite 201, accessibility@rider.edu, 609-895-5492) to discuss available services and reasonable accommodations, including academic adjustments.

Only students with documented disabilities that prevent equal access to an academic course or program are entitled to reasonable accommodations, which may include course adjustments, course substitutions and auxiliary aids. A reasonable accommodation is an accommodation that provides the student with equal access to the academic course or program, including all course or program materials,

but does not impose an undue burden on the University or constitute a fundamental alteration to the course or program in question. Knowledge of the essential course and program standards resides primarily with the individual faculty member and/or the academic department.

SASS evaluates the disability documentation provided by the student, collects additional information from the student, and gathers information from relevant educational support personnel (e.g., high school guidance counselors), medical and psychological professionals, and other pertinent sources outside of Rider University. When the student's disability has been sufficiently documented and potential reasonable accommodations have been identified, the student is provided a Notice of Academic Adjustments specific to each course and encouraged to present that Notice of Academic Adjustments to the relevant faculty member and to discuss, in a private setting, how the reasonable accommodations will be implemented.

If any such faculty member has concerns that the accommodations constitute a fundamental alteration to the course or program in question, that faculty member shall promptly contact SASS to initiate discussion and resolution of those concerns.

If the faculty member does not demonstrate to SASS that the accommodation constitutes a fundamental alteration of the course or program in question, the accommodation shall be put in place. If the faculty member demonstrates to SASS that the accommodation constitutes a fundamental alteration of the course or program in question, alternate accommodations, to the extent available, shall be made. If SASS and the faculty member are unable to mutually agree on this issue, they shall appeal it to the Provost or his/her designee, who shall hear both positions, review any necessary documents, and render a final decision.

If such an appeal is taken to the Provost or his/her designee, and the semester has already begun, the Provost or his/her designee shall determine at the outset of the appeal process whether or not the student will suffer an immediate negative impact, if the proposed accommodation is not yet in place. If the determination is that the student will suffer such an immediate negative impact, then the proposed accommodation will be put into place pending resolution of the appeal. If no such immediate negative impact is apparent, the proposed accommodation will be withheld, pending resolution of the appeal. In either case, the Provost or his/her designee will make every reasonable effort to render his/her decision within four working days of the initiation of the appeal.

This policy is designed to ensure the University's compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act as amended and the New Jersey Law Against Discrimination, and to enable every Rider student with a disability to enjoy an equal opportunity to achieve his/her full potential while attending this University.

Academic Load/Overload

Graduate Business

A full-time program consists of nine (9) or more semester hours of graduate course work. Part-time students who are employed full-time will generally be limited to six semester hours of graduate work in a given semester. During the evening summer session or during an accelerated term in a fall or spring semester, the recommended course load is one-half that of a regular semester.

Graduate Education

A full-time program during the fall and spring semesters consists of nine (9) or more semester hours of graduate course work. A full-time program during the Summer Sessions consists of six (6) or more semester hours of graduate course work. Students enrolled in the Post-Baccalaureate Teacher Certification program are restricted to two courses (6 semester hours) per semester until the point of student teaching.

Graduate Liberal Arts and Sciences

A full-time program consists of nine (9) or more semester hours of graduate course work. Part-time students who are employed full-time will generally be limited to six semester hours of graduate work in a given semester. During the evening summer session, the recommended course load is one-half that of a regular semester.

Westminster Choir College

In the Westminster College of the Arts, a full-time graduate program consists of between nine (9) and fifteen (15) semester hours. Enrollment for more than 15 semester hours constitutes an academic overload, and requires the permission of the WCA Associate Dean.

Westminster College of the Arts graduate students may exceed the normal maximum academic load after completing one (1) full-time semester at Rider University (minimum of 9 credit hours) **and** attaining a cumulative grade point average of 3.00 or higher. Students on Conditional Academic Standing are not eligible for an academic overload.

Students who exceed the normal load are required to pay an overload per credit fee for each credit over 15, except in the case of non-billable hours.

Students may enroll for a maximum of 12-14 combined credits during Summer I and II, with no more than 7 credits in any one session. These maximums may be exceeded only with the permission of the student's academic dean.

Students should understand that for every hour spent in class, they are expected to spend two to three hours studying outside of class time, and should therefore plan their academic load accordingly. Study time may vary based on the student's background knowledge and class difficulty.

Academic Records

Academic Records are retained for varying periods of time depending on record type pursuant to University policy. Records may be kept longer at the sole discretion of the University.

Access to student academic and other records may be accorded to Rider personnel with a legitimate educational interest in the records. Information may be released to other agencies and individuals according to these policies in compliance with the Family Educational Rights and Privacy Act (FERPA) of 1974 (as amended):

- Rider may release the following information without written permission from the student: fact of enrollment, dates of enrollment, degree candidacy, degree awarded, and major field.
- Rider may release the following information unless the student has requested in writing by the end of the second week of classes each semester that the information not be released: name, email, home and local address, and home and local telephone number,

participation on athletic teams and organizations, dates of attendance and honors and awards received.

No other information concerning a student will be released without that student's written permission.

Students having a complaint or question regarding FERPA may write to: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-8520.

Students may request to view their academic record by making an appointment with the appropriate dean's office.

Accompanying Costs for Voice Students

Any student studying individual voice at Rider University should expect, in most cases, to hire an accompanist. Students may choose to hire a college-approved accompanist. The per-semester fee is not refundable in any part if a student discontinues voice study or decides to seek out another accompanist. For additional information, see Tuition and Fees on Rider's website: <https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees> (<https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees/>).

Applied Music - Westminster College of the Arts

Individual applied music lessons for academic credit are available to all Rider University students with prior experience, regardless of major.

Lessons are available in brass, composition, conducting, guitar/bass, harpsichord, organ, percussion, piano, strings, woodwinds, and voice. For all students whose major or minor program does not require applied music lessons, and for those students who have completed the applied music requirements for their degree program, fees for this elective (non-required) study will apply. Elective lessons are provided on a space-available basis. All part-time students are charged an applied music fee.

Students may earn 1 or 2 credits per semester, with the exception of graduate applied composition courses, which carry 3 credits per semester. Each fall, spring or summer applied course consists of twelve private lessons, or the equivalent instructional time, and may require participation in studio classes, performance classes, and/or an end-of-semester jury or performance review. Applied lessons completed during the January term follow specific departmental requirements regarding instructional time.

All applied music students must observe departmental applied requirements listed in the catalog and in department handbooks.

Applied lesson fees are described in the Tuition and Fees section of Rider's website (<https://www.rider.edu/tuition-aid/tuition-fees/undergraduate/>).

All applied music students must observe departmental applied requirements listed elsewhere in this catalog and in department handbooks. Students for whom applied music lessons are not required may register for lessons on a space-available basis. Interested students should consult the Associate Dean.

Applied lesson fees are described on the Undergraduate Tuition and Fees (<http://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees/>) section of Rider's website (<https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/>

<https://www.rider.edu/offices-services/financial-aid-scholarships/tuition-fees/undergraduate-tuition-fees/>).

Effective as of the fall 2009 semester for all new or readmitted Rider University students, for all students whose major or minor program does not require applied music study, or for those students who have completed applied music requirements, elective fees will apply. All part-time students are charged an applied music fee.

Registration for applied music study follows this table of suffixes. Students will register for the appropriate course number and suffix, as indicated in the curriculum pages found elsewhere in this catalog.

Full-time Students

A – One-hour, 2-credit required lesson. Included in tuition – no extra charge.

- Fine and Performing Arts example: Musical Theatre major
- Westminster Choir College example: All undergraduate majors

B – Half-hour, 1-credit required lesson. Included in tuition – no extra charge.

- Fine and Performing Arts example: Popular Music Culture, up to 3 semesters
- Westminster Choir College example: Theory/Composition major (half-hour voice or keyboard lesson)

C – One-hour, 2-credit elective lesson. Not included in tuition – fee charged per semester.

- For students who have completed all required lessons in their major, or students whose major does not require lessons.

D – Half-hour, 1-credit elective lesson. Not included in tuition – fee charged per semester.

- For students who have completed all required lessons in their major or students whose major does not require lessons.

G – One-hour, 2-credit required/elective lesson. Half-hour is required and is included in tuition. The second half-hour is elective and is not included in tuition – fee charged per semester.

- Fine and Performing Arts example: Popular Music Culture, up to 3 semesters
- Westminster Choir College example: Theory/Composition major (full-hour voice or keyboard lesson)

Part-time Students

(all part-time students regardless of major or requirements)

- Suffix E – One-hour, 2-credit required or elective lesson – fee charged per semester
- Suffix F – Half-hour, 1-credit required or elective lesson – fee charged per semester

Change of Applied Teacher

Students wishing to change their applied lesson teacher must make a request to the chair of the appropriate department. Any change requested after the beginning of a semester will require the permission of both applied lesson teachers and the department chair. If either applied

lesson teacher is the department chair, permission of the Associate Dean also is required.

Change of Major or Applied Primary Area

Students wishing to change their major or the applied primary instrument they play must complete the appropriate form. Permission of the old and new major department is required.

Class Attendance/Absence

It is the prerogative as well as the responsibility of each faculty member to establish a clear policy for each course of instruction in regard to the nature and extent of student participation that will be expected and required.

The effect of absences upon the student's standing in a particular class will be left to the determination of the instructor of the course. However, it is expected that faculty members will be fair and reasonable concerning validated absences due to field trips, practicum, religious observance, participation in varsity athletics, placement interviews for graduating seniors, Westminster College of the Arts rehearsals or performances, and illnesses sufficiently serious to be certified by either the University Health Center or the student's physician. The faculty member should consult with the Dean of Students in instances where doubts arise regarding the course to follow in evaluating student absences.

It is the student's responsibility to inform instructors of the nature and extent of an actual or anticipated absence. If that is impossible, or if the absence is or will be more than three (3) consecutive class sessions or longer than seven [7] calendar days, the student should contact the Office of the Dean of Students at 609-896-5101. Then, the dean's office will notify the appropriate faculty member.

Class Cancellation

In most cases, Rider will remain open and fully operational during inclement weather and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, close certain buildings or take other emergency actions.

If such circumstances should arise, notification will be made by phone call, text and/or email via RiderAlert, Rider's mass electronic messaging system. Students can update their information via the link: RiderAlert (<http://www.rider.edu/rideralert/>) (<https://www.rider.edu/rideralert/>).

Cancellations will also be announced online at www.rider.edu (<https://www.rider.edu/>) and on the Rider University information hotline at 609-219-2000, option 1.

Class Cancellation Policy and Excused Absences for Westminster Choir College Students Only

During run-outs involving Westminster ensembles, private lessons for those students not involved in the run-out continue to meet. When a college-sponsored performance necessitates that 30% or more of the students in a class be absent, the class may be cancelled at the discretion of the faculty member.

The dean will excuse individuals or groups of students who are participating in college-sponsored events. Only students registered for

the class or ensemble participating in an activity will be excused from class. Students excused from class(es) under these circumstances remain responsible for all class work.

Commencement Requirements – Westminster Choir College only

Academic year requirements of students at Westminster Choir College extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Schola Cantorum, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness.

In particular, credit for spring semester choir participation is lost if a student does not attend and is not excused from Commencement. All other students are encouraged to participate in Commencement.

Students singing in one of the choirs for the Commencement ceremony will be provided with a red choir robe for the ceremony. Students participating in the ceremony as part of the graduating class can order academic regalia free of charge from the Rider University Bookstore (<https://www.rider.edu/about/offices-services/bookstore/>).

Course Credits

Graduate classes at Rider University may follow a 14-week semester.

When required, exams will be held during the final week of classes. Accelerated classes follow a 7-week schedule. When required, exams will be held during the last class meeting. Rider uses the true number of minutes per hour-long session; i.e., a one-hour meeting is actually 60 minutes. Three-credit classes meet for 60, 90, or 180 minutes, corresponding to, respectively and typically, 3, 2, or 1 meetings per week.

In the Westminster College of the Arts all performance courses receive credit:

- All ensembles receive 1 credit
- Other performance-based courses receive 1-3 credits
- A full-semester Student Teaching experience receives 12 credits.
- Westminster Choir College students enrolled in CRC 100, PI 045, or TH 045 receive credit toward their semester course load, but such credits do not count toward graduation.
- Applied music instruction receives 1-3 credits.

Course Level Numbering

Courses numbered below 100 are taught at pre-college level and carry no credit. Courses numbered at the 100- to 400-level carry only undergraduate credit. The course number indicates the anticipated audience for a course; 100 level courses are designed for freshmen, 200 level for sophomores, etc.

For Westminster Choir College:

1. Courses at the 500-level are open to undergraduate and graduate students. Undergraduate students who have earned at least 60 credits and a minimum cumulative GPA of 3.0 may enroll in a 600-level course upon permission of the instructor and the Associate Dean. Undergraduate students who have earned at least 90 credits and a minimum cumulative GPA of 3.8 may enroll in a 700-level course upon permission of the instructor, the Director of Graduate Studies and the Associate Dean.

2. Students with undergraduate status in the five-year B.M./M.A.T. program may take graduate courses required in that curriculum at the 500- or 600-level. Students in the B.M./M.A.T. program may take required 700-level courses in the senior year or upon successfully completing 124 credits and the student teaching semester. Students in the B.M./M.A.T. program who have not attained graduate status may enroll in non-required 700-level courses according to the restrictions stated in the previous paragraph.
3. Certain students who have completed a baccalaureate degree may apply for permission to take 600- or 700-level courses. Undergraduate students in the Baccalaureate Honors Program (BHP) should see the Assistant Registrar regarding enrollment in graduate courses.

Course Repeats - Westminster College of the Arts

All undergraduate and graduate students who are enrolled in a major or minor offered by the Westminster College of the Arts may enroll for a second or subsequent time in any *non-repeatable* WCA course from which they have withdrawn, in which they have earned an "F," or in which they have failed to earn the required minimum grade¹ according to the following rules:

- 1) Students who have withdrawn from, failed, or failed to achieve the required minimum grade in a required course¹ in their first attempt at the course may enroll for a second time without permission. All other students must have the permission of the Associate Dean.
- 2) Permission of the dean or associate dean of the college or school (WCC or FPA) offering the course in question is required in order to enroll in a course for the third time.
- 3) Permission of the Academic Standing Committee of the college or school (WCC or FPA) offering the course in question is required in order to enroll in a course for the fourth time. Permission for a fourth enrollment will be granted only in rare, extenuating, and documented circumstances.

In all instances, the most recent grade is calculated into the grade point average, and all listings and grades will remain on the transcript.

¹ Examples include: a minimum grade of "B-" is required in Piano Secondary, a minimum grade of "C" is required in foreign language study in order to progress to the next level in that language.

Courses - Adding, Dropping, Repeating and Withdrawing

Timetables and deadlines given below pertain to fall and spring semesters. Students should consult the Registrar's web page for summer session deadlines.

Adding Courses

Graduate students may add a course through the first week of the semester provided the course is still open for registration, for full term courses. See the Registrar's website for timelines for accelerated courses.

Dropping Courses

Students may drop courses through the second week of the regular semester at their own discretion. In such cases, the courses are deleted

from the student's record. After the second week of the semester, a withdrawal from the course is necessary and a 'W' is recorded on the transcript. See the Registrar's website for the timeline for accelerated classes.

Repeating Courses

Students may request permission from the academic dean to repeat a course to earn a better grade provided that the course is one that cannot be repeated for additional credit (e.g., applied music lessons, acting courses, coaching, ensembles and productions, stagecraft, studio dance, and other related classes). The grade first earned will remain on the transcript but only the latest grade will be used in computing grade point average and determining whether or not degree requirements have been met.

Students who fail a required course must repeat the course until a passing grade is received. Students do not have to repeat a failed elective, but must pass another acceptable elective of comparable credit in order to meet graduation requirements.

Students receiving financial aid should consult with Student Financial Services before repeating a course already passed to determine the possible impact upon the student's continuing eligibility for financial aid.

Withdrawing from Courses

Students may withdraw from courses and receive a grade of 'W' during the third through seventh weeks of the semester. In the semester's eighth through eleventh weeks, students may withdraw from courses with the written consent of the course instructor and receive a grade of 'W'. Differing subject matters, instructional methodologies and course objectives make it likely that instructors will have differing criteria for giving consent to withdrawal in this period. A Lawrenceville student who wishes to withdraw officially from one or more graduate or undergraduate courses must submit a written request and must obtain the approval of the associate dean or department chair of graduate studies, or dean of the respective school. Accelerated courses have a different timeline; see the Registrar's website for details.

Withdrawals are not permitted during the last two weeks of class except for reasons of validated physical or psychological incapacitation as approved by the dean of the college. Reasons must be validated by the Dean of Students and approved by the academic dean of the college in which the student is enrolled.

Students who do not withdraw officially from courses they fail to complete, will receive a grade of "F" for those courses.

Please refer to Financial Aid website (<http://www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds/>) for information regarding course withdrawals and refunds.

Degree Completion

In all colleges, students who have not satisfied requirements by the end of the specified time may be required to repeat courses and/or meet further requirements. Students for whom more than one year has elapsed since the date of last enrollment may be required to re-apply and/or re-audition for the program, and must meet all requirements in place at the time of their readmission.

For all colleges except Westminster Choir College and the College of Education and Human Services, students must complete all requirements for the master's degree within six (6) years of the date of first registration

for graduate course work. College of Education and Human Services students must complete all requirements for their program within six years of the enrollment date of the first course (with the exception of the M.A. in Counseling Services program, which is eight years from the date of acceptance into the program; the M.A. in Clinical Mental Health Counseling which is ten years from the date of acceptance into the program; and the Ed.S. in School Psychology, which is ten years from the date of acceptance into the program; and four years after completion of APRN 5007 in the Graduate Nursing Program.)

Westminster Choir College students must complete all requirements for the master's degree within seven (7) years of the date of first registration for graduate course work. For Westminster Choir College students, credits earned at another institution or through Westminster Continuing Education outside the seven-year period that commenced with initial enrollment in a degree program must be approved for transfer into that program by the department offering the degree.

Diploma Conferral

Diplomas are conferred four times each year: January, May, August, and December. Students must submit a degree application form, available online via MyRider or in their academic dean's or department's office, in order to be eligible to receive a diploma on any date. Students must apply for graduation by the deadlines established each year by the Registrar's Office. See the Registrar's Office website (<http://www.rider.edu/academics/academic-support-resources/registrar/commencement-candidates/>) for more information.

Diplomas are conferred only upon those who have met 100% of all degree requirements. Students in the combined B.M./M.A.T. program receive both diplomas upon the completion of all requirements.

Employment Opportunities – Westminster Choir College

The University provides work opportunities both on and off campus.

Students who demonstrate financial need as determined by the FAFSA are offered Federal Work Study in their award. Students who have no need are paid through a student employment budget. It is the responsibility of students to find their own jobs. All students are encouraged to apply for available employment opportunities. Bi-weekly paychecks are provided directly to students rather than to student accounts.

Weekend church positions: Many Westminster students are employed in area churches on a part-time basis as organists, directors, and singers.

Lawrenceville and the surrounding area provides many opportunities for part-time employment in local businesses.

Ensembles/Productions – Attire and Registration

Attire

Students must purchase official ensemble attire for choirs in which they are enrolled. Freshman/transfer students attending Westminster Choir College must be fitted during orientation and purchase a red robe which will be charged to their student account by the Bursar's Office.

Registration

Students participating in music ensembles or artistic productions must be registered for the course that accompanies that activity. It is the responsibility of the student to ensure proper registration in the appropriate course. Excused absences are granted only to registered students.

Each semester, the official personnel roster for each ensemble will be finalized for that semester at the end of the schedule adjustment period, typically two weeks after the first day of classes.

Full-Time Graduate Tuition Inclusion – Westminster Choir College

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges are incurred when full-time students exceed maximum load levels, excluding VC 593 or participation in auditioned choirs.

Please see Rider's Financial Aid website (<https://www.rider.edu/tuition-aid/tuition-fees/>) for elective and part-time charges for elective music and dance study.

Full graduate tuition includes:

1. A minimum of 9 and maximum of 15 credits per semester, or the equivalent including undergraduate and non-credit courses.
2. For required graduate primary applied music study, one hour per week of private instruction, except for Choral Conducting majors, who receive one half-hour per week of private instruction.
3. Once all required primary, secondary or private composition applied requirements have been completed, all additional applied lessons will be billed at the elective rate given below.
4. Students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate.
5. Any non-required private lesson will be billed at the elective rate given below. Graduate students in majors without applied requirements will be billed for applied lessons at the elective rate.
6. Please see the table of applied lesson suffixes under "Applied Music (p. 1003)" in the Academic Policies section of this catalog. Registration for the incorrect suffix may result in an incorrect bill.

Grades: Grade Reports, Grade Point Average, Incomplete Grades, Grade Appeals

Grade Reports

Members of the faculty are officers of instruction at Rider University.

Among their responsibilities as such is the evaluation of students' academic accomplishments in courses of instruction. These evaluations ultimately are expressed in grades that are recorded in the students' academic record. Members of the faculty, judging the competencies and performances of students, assign grades based on their professional experience and training. Grades assigned by the faculty follow practices and procedures within the standards established by Rider and within the standards established by individual course requirements.

Letter grades are used at Rider University for recording faculty evaluations of final student achievement in individual courses and are

entered on the permanent academic record of a student's academic performance.

The academic grades used by faculty for recording evaluations of student achievement are as follows. For determining grade point averages (GPAs), grades have weighted values called variously honor points, quality points, or grade points as follows:

Letter Grade	Grade Point Value
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
D*	1.0
F	0.0

*Failing academic work; fail to abide by standards of academic honesty and integrity; unauthorized withdrawal, and fail to complete work in prescribed time.

Each instructor of a course will inform the student of the course objectives, procedures, and applicable grading standards. Upon a student's written request, members of the faculty will provide a review of the student's course standing at least once each term by the mid-point of that term. Each student may also review material submitted to the instructor for evaluation such as papers, examinations, and the like. In these ways, students will be able to assess their own progress in a course before final grades are assigned.

NOTE: Faculty members are not required to maintain student course materials more than four months after the end of an academic term.

A student grade report may also show the following transcript notations, which carry no grade point value:

Transcript Notation	Explanation
I	Incomplete
L	Late grade
N	Registered; did not attend
AU	Audit
P	Pass
S	Satisfactory progress
U	Failure in pass/fail course
W	Withdrawal
Y	Satisfactory completion of supplemental education course
Z	Insufficient progress in supplemental education course

"N" and "W" notations are included in the total semester hours attempted, as far as tuition payment is concerned.

Grade Point Average (GPA)

Grade point averages (GPA) are used to establish academic standing. In order to compute the grade point average, students must first determine

the number of quality points earned for each course. The total number of quality points for a course is derived by multiplying the number of credits for the course by the number of quality points for each letter grade. The grade point average (GPA) is determined by dividing the number of quality points by the number of GPA hours.

Incomplete Grades

Students who, as a result of extenuating circumstances, are unable to complete the required work of a course within the term, may request an extension of time from a faculty member. Such extensions of time can be granted only in cases in which illness or another serious emergency has prevented the student from completing the course requirements or from taking a final examination. The request for extension of time must be made prior to the last scheduled class meeting, except in those unusual situations in which prior notification is impossible.

The faculty member shall determine whether to grant the request for a time extension and the type of verification (if any) required to support the request. The faculty member shall specify the time, up to four weeks from the last day of the term as specified in the academic calendar, by which work must be completed by the student. If the faculty member does agree to the request, the notation "I" (Incomplete) shall be submitted on the grade roll. In those situations where the faculty member has not received a request for an extension of time, the notation "I" (Incomplete) may be submitted on the grade roll by the faculty member when, in his or her judgment, such a determination appears justified. Upon submission of completed required work the faculty member shall submit a Change of Grade form to the Registrar.

Students who, as a result of extenuating circumstances, are unable to submit the completed required work at the end of the four-week period may request an extension of the incomplete grade. The request for an extension of the incomplete grade must be made prior to the expiration of the four-week period. If the faculty member agrees to the request for an extension of the incomplete, the faculty member shall specify the time, up to a maximum of two weeks from the date of expiration of the four-week period (i.e., six weeks from the last day of the term) by which work must be completed by the student and shall submit an Extension of Incomplete form to the Registrar.

Upon submission of completed required work, the faculty member shall submit a Change of Grade form to the Registrar and assign the course grade. Failure of the Registrar to receive from the faculty member a Change of Grade form or an Extension of Incomplete form at the end of the four-week period, or a Change of Grade form at the end of the six-week period, shall result in the automatic assignment of the grade "F," "Z," or "U" by the Registrar.

Students who receive an incomplete in a course that is part of a course sequence must obtain permission from the department chairperson to remain enrolled in the next course in the sequence or they will be removed from that next course.

Grade Appeals

Basis for Grade Appeal

A final course grade may be changed only at the initiative of the faculty member who originally assigned the grade or as the result of a decision made in the hearing of a grade appeal by the Faculty Grade Review Panel. It is assumed that the final course grade is assigned in good faith and based on the professional expertise of the faculty member.

A student may appeal a final course grade only on the grounds that it represents an arbitrary, capricious, and/or unreasonable evaluation of his or her performance.

A grade appeal may not be based on a disagreement with the faculty member's professional academic evaluation of the student's work.

The burden of proof rests with the student. A grade appeal shall be supported only when a student convincingly demonstrates that an arbitrary, capricious, and/or unreasonable evaluation occurred. Changes and appeals for grades on written comprehensive graduate examinations are subject to the same requirements and procedures as course grades.

The Faculty Grade Review Panel may return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process; may decline to hear an appeal when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading; and shall decline an appeal if it is based on failure to accommodate a disability covered by the Academic Disability Policy (p. 786).

Faculty Grade Review Panel

The Faculty Grade Review Panel has final authority concerning all grade appeal questions. **The panel consists of the following nine members:**

1. Six tenured faculty members including one tenured faculty member elected by the bargaining unit members of each of the five college/school academic policy committees and one selected by the bargaining unit members of the University Academic Policy Committee, who shall serve as chairperson of the panel;
2. A seventh faculty member selected jointly by the Provost and Vice President for Academic Affairs and the academic deans;
3. Two full-time students selected by the Student Government Association who, at the time of their service, must be seniors who have attained a grade point average of at least 3.25.

Each of the above appointing groups shall also designate an alternate for each member they appoint to the panel. Faculty members of the panel shall serve two-year terms and may be reappointed.

A quorum of the Faculty Grade Review Panel shall consist of any five members. The failure or inability of any appointing body to fulfill its responsibility to appoint any member or members to the panel shall not prevent the panel from organizing itself and exercising its duties.

The chairperson of the panel will serve as the hearing coordinator and has the following duties and responsibilities:

1. Inform the members of the panel that a grade appeal has been received and set a date for the hearing;
2. Distribute documentary materials pertaining to the appeal to members of the panel;
3. Maintain a permanent record of the panel's proceedings;
4. Prepare and distribute any decision made by the panel to the appropriate parties.

Prior to Initiating a Grade Appeal

A student who believes that his or her final course grade represents an arbitrary, capricious, and/or unreasonable evaluation of his or her work is strongly encouraged to talk with the faculty member in an effort to resolve the issue before filing a formal grade appeal. However, it must be emphasized that this informal discussion does not constitute the

initiation of a grade appeal and does not extend the time limits specified in the next section, Initiating a Grade Appeal.

Initiating a Grade Appeal

To initiate a grade appeal, the student must forward a letter to the faculty member which clearly and precisely describes the student's reasons for believing that the final course grade constitutes an arbitrary, capricious, and/or unreasonable evaluation of his or her performance. A copy of this letter shall also be sent to the faculty member's department chairperson. (If the faculty member taught the relevant course in another department, the letter shall be sent to the chair of that other department. If the relevant course is in a program and is not cross-listed, the letter shall be sent to the chair of the program director's home department.)

For appeal of fall semester grades, the letter must be postmarked or hand-delivered within seven (7) days of the start of the upcoming spring semester. For appeal of spring semester grades, it must be postmarked or hand-delivered within thirty (30) days of the last regularly scheduled spring semester examination. For appeal of summer grades, it must be postmarked or hand-delivered within seven (7) days of the start of the upcoming fall semester. For appeal of grades on written comprehensive graduate examinations, it must be postmarked or hand-delivered within thirty (30) days of the date that grades were issued for the examination.

If a change of grade occurs after the aforementioned deadlines, the grade appeal must be filed within thirty (30) days of the submission of the changed grade to the registrar.

If the faculty member who assigned the grade in question is no longer at Rider or is away from Rider on an extended basis and not available for consultation, the initial review shall be conducted by the appropriate department chairperson, and the schedule may be extended at the appropriate dean's discretion.

If the faculty member who assigned the grade in question is the department chairperson, the chairperson's dean or that dean's designee shall replace the chairperson in all the procedures that follow.

Failure to submit a written statement of the appeal within the time guidelines established above shall constitute grounds for denying a student access to the grade appeal process. Failure to provide a clear and precise statement shall constitute grounds for denying the appeal at any step in the process. Once a grade appeal is initiated, the basis of all subsequent proceedings must be limited to the allegations appearing in the initial written statement. This limitation does not exclude the introduction of new evidence directly related to the initial allegations.

The chairperson of the Faculty Grade Review Panel, upon written request of any party, may extend any deadline contained in this policy if he or she believes that circumstances beyond the control of a party to the appeal have prevented compliance with stated deadlines. The decision of the panel chairperson to extend or not to extend a deadline shall not be subject to appeal.

The Grade Appeal Process

Step One

In the letter of appeal, the student may request a formal meeting with the faculty member. If the faculty member agrees to such a meeting, the meeting shall be held no later than fourteen (14) days after the beginning of the fall or spring semester following the semester or session in which the grade was given. However, the parties are encouraged to schedule such a meeting at an earlier date if mutually convenient.

The faculty member shall render a decision on the appeal within seven (7) days of such a meeting and shall notify the student and the department chairperson in writing of the decision. If the faculty member agrees to change the final course grade of the student, he or she shall submit a Change of Grade form to the Registrar.

If the faculty member believes that a meeting with the student would not be productive, he or she shall make a decision on the appeal based on the student's letter and shall communicate the decision in writing to the student and the department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given.

If the student accepts the decision of the faculty member at Step One, no further action is required. If the student does not accept the faculty member's decision at Step One, he or she may appeal the decision to Step Two in writing to the department chairperson with a copy to the faculty member's dean. This letter must be postmarked or hand-delivered within seven (7) days of the postmark date of the faculty member's Step One decision.

If the student does not receive a written response from the faculty member or department chairperson within fourteen (14) days of the beginning of the fall or spring semester following the semester or session in which the grade was given, the student may, within twenty-one (21) days of the beginning of that semester, proceed to Step Two as indicated below. All such written responses shall be mailed to the student's campus address, if the student resides on campus, or otherwise to the student's home address on record.

Step Two

Within fourteen (14) days of the receipt of a student's letter of appeal to Step Two, the department chairperson shall schedule a meeting with the student and the faculty member. At such meeting, the student and the faculty member will have the opportunity to explain their positions with respect to the grade in question, but they shall be limited to the allegations raised in the student's initial written statement.

The department chairperson shall render an opinion on the matter within seven (7) days of the Step Two meeting and shall provide explanatory language for this opinion in writing to the student, the faculty member and the faculty member's dean.

If the department chairperson's opinion supports the position of the faculty member, the student shall have seven (7) days from the postmark date of the letter from the department chairperson to continue his or her appeal to the Faculty Grade Review Panel as described in Step Three.

If the department chairperson's opinion supports the student's position in the appeal, the faculty member shall have seven (7) days from the postmark date of the department chairperson's letter opinion either to accept that opinion and submit a Change of Grade form to the registrar, or to reject the opinion and notify the student, department chairperson, and faculty member's dean that the faculty member is making an appeal pursuant to the Step Three process.

If the student does not receive notification of a change of grade within twenty-one (21) days of the date of the department chairperson's written decision, the student may carry the appeal to Step Three.

Step Three

To carry the appeal to Step Three, the student must submit a letter expressing that intent to the chairperson of the Faculty Grade Review

Panel with copies to the faculty member, the department chairperson, the dean, and the Provost and Vice President for Academic Affairs.

Within seven (7) days (excluding vacation and examination periods) of the receipt of this letter, or the letter from the faculty member who has appealed, whichever the case may be, the chairperson of the Faculty Grade Review Panel shall schedule a meeting of the panel to consider the appeal.

The student and the faculty member shall have the right to appear before the panel to present information pertaining to the allegations made in the student's initial written statement.

The Faculty Grade Review Panel may, if it deems it desirable, request attendance by the chairperson, the dean, and/or any other representatives of the University. Attorneys or advisors to the participants may attend but not participate in the meeting of the panel.

The unwillingness of the faculty member or student to appear before the panel shall not prevent the panel from proceeding with its deliberations. In those deliberations, the panel shall have access to written documents pertaining to the appeal, pertinent records of student performance, and such verbal presentations as may be made during panel deliberations.

On the basis of careful consideration of the available information, the Faculty Grade Review Panel will determine if an arbitrary, capricious, and/or unreasonable evaluation of the student's performance has occurred. This determination will be made in writing and provided to all affected parties.

If the panel determines that no such action occurred, the case will be closed with no further right of appeal. If the panel determines that an arbitrary, capricious, and/or unreasonable evaluation has occurred, it will direct the faculty member's department (or will establish an evaluation committee of faculty members in the field of the course offered) to re-evaluate the student's performance based upon the panel's decision, the records and documentary materials.

Within fourteen (14) days of the receipt of the panel's directive, the department or evaluation committee shall recommend to the panel a grade that it deems appropriate, whether higher than, lower than, or the same as the original grade. Normally, the panel will accept the revised evaluation by the department or committee and will subsequently notify the Registrar of any change of grade. Should the panel feel that the department or committee has not conducted its review in an appropriate manner and that, as a result, the suggested substitute grade is not appropriate, it shall have the authority to direct the Registrar to enter the grade that the panel judges appropriate.

Decisions of the panel are not subject to further appeal. The panel may also return appeals to department chairs when such individuals have not discharged their responsibilities during the appeals process, or when there is insufficient documentation of arbitrary, capricious and/or unreasonable grading. The panel shall decline an appeal if it is based on failure to accommodate a disability covered by the University Disability Policy.

Expediting a Grade Appeal

When a student's graduation is affected by the outcome of a grade appeal in a semester, term, or session immediately preceding such graduation, faculty members shall make reasonable efforts to expedite the process.

Grade Changes Made at Initiative of Faculty Member

The individual faculty member may determine that it is appropriate to change a recorded academic grade. Such changes must be made within four (4) months of the date that the original grade was assigned. Any change of grade initiated by a faculty member more than four (4) months after the date the original grade was assigned must be approved by the faculty member's dean. Faculty members, using forms supplied by the Office of the Registrar, will prepare a written change of grade stating the reasons for the grade change with a copy to the student, the department chairperson and the faculty member's dean. Upon receipt of this form by the Office of the Registrar, the grade will be changed on the official records of the University.

Graduate Assistantships

A limited number of assistantship positions and graduate scholarships are available to full-time graduate students.

On the Lawrenceville campus, further information can be found under Scholarships for Graduate Students (<http://www.rider.edu/offices-services/finaid/scholarships-grants/graduate-scholarships/>) on Rider's website.

Graduate Oral Examinations - Westminster Choir College

Oral Examinations (Graduate Students)

General information

1. All students pursuing the M.M., M.M.E., or M.V.P. degree at Westminster Choir College of Rider University must pass a final oral examination.
2. The oral examination normally occurs during the last semester in which a student is enrolled prior to graduation.
3. **All courses required to remediate academic deficiencies must be completed successfully by the end of the semester prior to the oral examination.**
4. The oral examination must be completed by the deadline published in the Academic Calendar (p. 1149) in this catalog.
5. Students who elect to pursue multiple graduate programs must pass a separate final oral examination in each major area.
6. Students who have not passed all portions of the oral exam must be re-examined within one year from the date of the original or previous exam. Students failing to meet this deadline or those who have not passed the oral examination after three attempts are no longer considered degree candidates and become ineligible to graduate.
7. Students must apply to schedule the oral examination by November 1 for a fall examination, by April 1 for a spring examination, or by June 1 for a summer examination.

Examining Committee

1. The examining committee consists of no fewer than three Westminster **music** faculty members, full-time or adjunct, including two from the student's major program area, and one member of the student's choice from outside the major area.
2. Departments may establish their own policies for membership on the major area portion of the examining committee.

Structure and Content of Examination

1. The structure and content of the examination should support the general philosophy of graduate education, as previously endorsed by the Westminster Academic Policy Committee, which states:

"Critical thinking is to be encouraged throughout the curriculum. Students should acquire a musicological sensibility and the ability to engage in a logical discourse about varied aspects of the art. In addition to overall musical competency, true expertise is required in a particular area. At the conclusion of their studies, students should have an understanding of what remains to be learned and the tools to continue their education throughout their lives. They should be fully prepared to embark upon—or continue in—their professional lives as performers, composers, teachers, ministers of music, conductors, doctoral students, and as vigorous advocates for music."

While specific content is left to the discretion of the department, the examination should be designed to demonstrate the student's ability to engage in a logical discourse in the major area and its relationship to various aspects of the art, and should transcend the mere recitation of factual information.

2. Departments will create written guidelines to assist students in preparing for the examinations, which will be distributed to students at the onset of their graduate studies.
3. The Director of Graduate Studies will periodically attend examinations as a fourth, non-voting member to ensure a degree of interdepartmental consistency in content and the standard to which students are held. The DGS will report his/her findings to the Graduate Committee and the WAPC for future review.

Health and Safety - Westminster College of the Arts

Westminster Choir College/Westminster College of the Arts of Rider University, as required by the National Association of Schools of Music, is obligated to inform students and faculty of health and safety issues, hazards, and procedures inherent in practice, performance, teaching, and listening, both in general and as applicable to their specific specializations. This includes but is not limited to information regarding hearing, vocal and musculoskeletal health, injury prevention, and the use, proper handling, and operation of potentially dangerous materials, equipment, and technology.

It is important to note that health and safety depends largely on personal decisions made by informed individuals. Rider University has health and safety responsibilities, but fulfillment of these responsibilities cannot and will not ensure any individual's health and safety. Too many factors beyond the University's control are involved.

Each individual is personally responsible for avoiding risk and preventing injuries to themselves before, during, and after study or employment at Rider University. The policies, protocols, and operational procedures developed do not alter or cancel any individual's personal responsibility, or in any way shift personal responsibility for the results of any individual's personal decisions or actions in any instance or over time to the University.

All members of the Westminster College of the Arts community are encouraged to visit Health and Safety Recommendations (<http://www.rider.edu/student-life/health-wellness/student-health-services/health-safety-sfpa-wcc-students/>) on Rider's website for a series of

recommendations and resources designed to help each individual to become aware of and attend to various issues.

International Student Status

Federal regulations require that all F-1 and J-1 undergraduate and graduate international students maintain full-time status. International students may engage in one online course per mandatory term (fall and spring term) as long as they are enrolled in a full course load. Students may request part-time status under specified, limited circumstances, including during their final semester. Prior approval of the Office for International Education (<https://www.rider.edu/academics/centers-institutes/office-of-international-education/>) is required.

All international students do not need to comply with the above restrictions for summer course work.

Interruption of Studies

Lawrenceville

Students who interrupt their studies must notify the appropriate graduate program office. If studies are interrupted for up to one year, students may return with the approval of the advisor. However, if two calendar years elapse between the last date of attendance and the next registration, students must submit an application for readmission together with a nonrefundable readmission fee. Students will be responsible for the application and degree requirements in force at the time of readmission.

For students to remain in good standing with the division, they must file a notification of non-attendance form announcing their intention to not attend any semester prior to the beginning of that semester. The form may be procured from the approved graduate office.

Westminster Choir College

A student who wishes to discontinue study for any reason should withdraw officially from Rider University. Withdrawal from the university is accomplished by submission of the proper form, signed by the student, to the Registrar's Office. If it is not feasible to complete and submit the official form, a letter stating intention to withdraw may suffice.

Failure to observe the proper withdrawal procedure results in the recording of failing grades for all courses if a student leaves during a term. If a student leaves and returns within the same semester, consultation with course instructors may be necessary to ensure that coursework can be completed. Official withdrawal from the college is effective on the date that the Registrar's Office signs a withdrawal form or receives a letter stating intention to discontinue enrollment. A withdrawal date must fall within a term if grades of "W" are to be recorded.

The Graduate Committee may require a student who has withdrawn from the college and who seeks readmission to present evidence demonstrating that the conditions leading to the withdrawal are no longer operative. If it is felt that it is not in the best interests of the student or the college, permission to return may be denied. An audition and/or interview may be required for readmission.

Students withdrawing for medical reasons or to fulfill a military obligation may apply to the Registrar's Office. Written documentation is required, and the maximum length for such a leave is one year. If a leave of absence has been granted for medical reasons, the student may be required to submit evidence documenting full recovery. If a leave is granted, the student may return at any time within one year, so long as a

letter stating intention to return is submitted to the Registrar's Office at least one month in advance of the start of a new term.

Outside Activities – Westminster Choir College only

Westminster Choir College students are expected to give priority to all officially scheduled classes, lessons, rehearsals, on- and off-campus performances (including tours), and other official functions involving music students. Outside activities, such as employment, church or volunteer work, or other professional engagements should not conflict with college requirements or those listed on course syllabi. Students employed outside of the college should inform employers of their commitment to their education and their obligation to college classes and ensembles.

Thesis/Capstone - Westminster Choir College Only

Students in the M.M.E. (p. 1203) and M.V.P. (p. 1218) programs must register for one hour of thesis credit in the semester or summer term in which thesis work begins, in the semester or summer term in which work is completed, and in any other semester or summer term in which assistance is provided by the thesis advisor. A grade of "S" will be recorded on the student's transcript in any/all semesters while thesis work is ongoing but incomplete. Students in the M.A.T. (p. 963) program must complete a capstone as part of the degree requirements.

Upon final approval of the thesis, a letter grade will be assigned by the thesis advisor for the final semester of registration. Final approval and deposit of the thesis must occur a minimum of one month prior to the end of the semester in which graduation is anticipated for Music Education students; a minimum of two weeks prior to the end of the semester in which graduation is anticipated for Voice students.

Transfer Credit While Currently Enrolled at Rider

Currently enrolled students are strongly encouraged to obtain permission to transfer a course before enrolling for a course at another institution, using the form available on the Registrar's Office website or from their academic dean's office. If prior approval is not obtained, there is no guarantee that transfer credit will be granted.

College of Education and Human Services Credit Transfer Policy

It is the policy of the Department to accept up to twelve (12) graduate transfer credits into its programs, or up to 30 graduate credits for the Clinical Mental Health Counseling (CMHC) Program, subject to Program and Department Chair approval who will make each credit-transfer decision in the light of meeting best the program needs of individual students. Credits approved for transfer will be added to students' transcripts after approval from the program director or the person designated by the program director.

For the **Clinical Mental Health Counseling Program**, transfer credits must meet the following guidelines:

1. All transfer credits must carry a graduate letter grade of at least "B," and requests for such credits must be made in writing on the appropriate form.
2. All transfer credits must be for graduate course work taken within six (6) years from the date of acceptance into the program (with the exception of the Counseling Services program, which is eight years from

the date of acceptance into the program; and with the exception of some courses in the Graduate Nursing Program). Courses not meeting this criterion are subject to Program Director review and approval.

3. All transfer credits must be approved by the program director or the person designated by the program director at the time of initial enrollment in the Rider University program.

4. Official transcripts covering courses submitted for transfer must accompany the written request for such transfer, if the transcripts have not already been filed.

5. Course descriptions and/or syllabi of the courses being requested for transfer may be required.

students may request transfer of between six (6) and nine (9) credits depending on the program from other graduate schools.

For the School Psychology Program Ed.S. or the Counseling Services Program Ed.S., the program director or the person designated by the program director and the Department Chair will determine the number of credits to be transferred given the following guidelines:

1. All transfer credits must carry a letter grade of at least "B."

2. Transfer credits must be taken within the six years from the date of acceptance into the program. Exceptions may also be granted by the program director or the person designated by the program director for courses where content remains consistent over time and supports current program objectives.

3. For students in the School Psychology Program, up to 36-credits may be transferred. Students in the Counseling Services Program may transfer up to 48-credits from a CACREP approved program. Students admitted from a non-CACREP approved program may transfer up to 36-credits.

4. Official transcripts must accompany the request for transfer of credit. The advisor must approve the credits to be transferred upon admission.

5. Credits approved for transfer will be added to students' transcripts at the time of admission to the program.

6. Course descriptions and/or syllabi of the courses being requested for transfer may be required.

Westminster Choir College

Approval of transfer credits is given by the appropriate academic department, following receipt of a written petition and an official transcript. Graduate students may request transfer of a maximum of six (6) credits from other graduate schools. A maximum of six (6) additional credits earned through the Westminster Continuing Education program may be applied toward graduation requirements in the M.M. and M.V.P. programs. A maximum of twelve (12) additional credits earned through the Westminster Continuing Education program may be applied toward graduation requirements in the M.M.E. program. Official transcripts must be submitted before any transfer or continuing education credits can be accepted.

Norm Brodsky College of Business

For specific information about transfer credit policies in the Norm Brodsky College of Business (p. 844) graduate program, visit their webpage.

College of Liberal Arts and Sciences

Approval of transfer credits is given by the appropriate graduate program, following receipt of a written petition and an official transcript. Graduate

COURSES AND DESCRIPTIONS

Advanced Practice Registered Nurse (APRN)

APRN 5001 Socialization to the APRN Role 3 Credits

The course will examine the critical issues that define the APRN's scope of practice and nurse practitioner competencies. Issues related to health policy, interprofessional collaborative practice, team building, conflict resolution, and leadership will be discussed. Guidelines for resolving professional legal and ethical issues that are often confronted in APRN practice will be analyzed.

APRN 5002 Applied Theory for the APRN Role 3 Credits

This course will demonstrate the use of science-based theories to analyze healthcare delivery at the patient, family, community and organizational levels in order to improve health outcomes. Theories addressing nursing practice, teaching and learning, health behaviors, and families within the context of cultural influences will be explored. Issues related to ethical decision making and advocacy in APRN practice will be analyzed.

APRN 5003 Advanced Pathophysiology 3 Credits

This course analyzes alterations in various physiological systems. General physiological and pathophysiological principles that regulate inflammation, cellular/tissue repair, genetics, immunity, and cancer will be discussed. Pathophysiology of disease processes in primary care conditions across the lifespan will be examined.

APRN 5004 Clinical Prevention and Population Health 3 Credits

This course will enable students to analyze epidemiological and biostatistical data in the development, implementation, and evaluation of clinical prevention and population health initiatives. Concepts of public health, health promotion, morbidity and mortality, determinants of health, and cultural diversity and sensitivity will be incorporated into the advanced practice nursing role.

APRN 5005 Research and Quality Improvement 3 Credits

This course builds a foundation for advanced clinical scholarship and healthcare improvement while developing skills in analytical methods for evidence-based practice. Concepts of quality process, regulatory practices, root cause analysis, and problem identification will be explored.

APRN 5006 Health Delivery and Information Systems 3 Credits

This course focuses on trends, issues, and policies related to the transformation of the U.S. health care system. Emphasis will be placed on the economics of care and equity, access, and quality of the health care system. The role of the APRN in the utilization of information systems to reduce health disparities and promote quality initiatives will be presented.

APRN 5007 Advanced Physical Assessment 3 Credits

This course builds upon scientific underpinnings to enable the learner to develop a holistic approach to culturally sensitive health assessment including health related behaviors across the life span. The student begins to synthesize data in diagnostic reasoning to determine appropriate and effective healthcare strategies, including disease prevention, health promotion and health restoration. Prerequisite(s): APRN 5003.

Corequisite(s): APRN 5008.

APRN 5008 Advanced Pharmacology 3 Credits

This course is designed to meet the needs of APRNs that are eligible for prescriptive privileges. Content will focus on the pharmacological management of self-limited, episodic complaints and stable chronic disease states across the life span. Emphasis is placed on the decision-making process utilized to safely and effectively prescribe and monitor pharmacotherapeutics appropriate to the client situation. Prerequisite(s): APRN 5003.

Corequisite(s): APRN 5007.

APRN 5009 Primary Care of Young Adult 3 Credits

This course focuses on the care of young adults and women. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions as well as application of U.S. health promotion guidelines and screening for young adults and women. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for young adults and women. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5010.

APRN 5010 Young Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5009 - Primary Care of the Young Adult. The focus is on primary care of the young adult client and women. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5009.

APRN 5011 Primary Care of the Middle-Aged Adult 3 Credits

This course focuses on the health state of middle-aged adults. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions, as well as application of U.S. health promotion guidelines and screening for middle-aged adults. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of adults. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5012.

APRN 5012 Middle-Aged Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5011 - Primary Care of the Middle-Aged Adult. The focus is on primary care of common acute and chronic disease processes of the middle-aged population. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5011.

APRN 5013 Primary Care of the Older Adult 3 Credits

This course focuses on the health state of older adults. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions, as well as application of U.S. health promotion guidelines and screening for older adults. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of older adults. Prerequisite(s): APRN 5011, APRN 5012.

Corequisite(s): APRN 5014.

APRN 5014 Older Adult Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in APRN 5013 - Primary Care of the Older Adult. The focus is on primary care of common acute and chronic disease processes of the older adult population. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 180 clinical hours. Prerequisite(s): APRN 5011, APRN 5012.

Corequisite (s): APRN 5013.

APRN 5015 Primary Care of the Pediatric and Perinatal Patient 3 Credits

This course focuses on the health state of pediatric and perinatal patient populations. Course content includes developmental, physiological, pathological, and psychosocial changes relative to primary, secondary and tertiary prevention, health maintenance, acute and chronic illnesses and life transitions as well as application of U.S. health promotion guidelines and screening for pediatric and perinatal patients. Emphasis is on the nurse practitioner role as a collaborative health care team member and client advocate for acute and chronic illnesses of adults. Prerequisite(s): APRN 5013, APRN 5014.

Corequisite(s): APRN 5016.

APRN 5016 Pediatric Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in Primary Care of the Pediatric and Perinatal Patient. The focus is on primary care of common acute and chronic disease process of the pediatric and perinatal populations. Students will utilize the necessary resources in health care to optimize health in these populations. Students will complete 120 clinical hours. Prerequisite(s): APRN 5013, APRN 5014.

Corequisite(s): APRN 5015.

APRN 5017 Acute Care I 3 Credits

This course examines advanced practice nursing and healthcare management of adolescents and young adults in acute care settings. This course provides a foundation for the advanced practice nurse working in acute care practice settings to have entry level competencies for the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) to build on the core competencies for all nurse practitioners. Emphasis on the nurse practitioner role as a collaborative healthcare team member and advocate for adolescents and young adults in the acute care setting. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5018.

APRN 5018 Acute Care I Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in Acute Care I. This course focuses primarily on transitioning from an expert registered nurse role to the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) student role that is working in a variety of acute care settings. Students will utilize the necessary resources in health care to optimize health in these populations. Prerequisite(s): APRN 5007, APRN 5008.

Corequisite(s): APRN 5017.

APRN 5019 Acute Care II 3 Credits

This course is designed to foster development of clinical competency in acute care settings for middle-aged adult patients. This course provides a foundation for the advanced practice nurse working in acute care practice settings to have entry level competencies for the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) to build on the core competencies for all nurse practitioners. Emphasis on the nurse practitioner role as a collaborative healthcare team member and advocate for adolescents and young adults in the acute care setting. Prerequisite(s): APRN 5017, APRN 5018.

Corequisite(s): APRN 5020.

APRN 5020 Acute Care II Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in Acute Care II. This course focuses primarily on transitioning from an expert registered nurse role to the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) student role that is working in a variety of acute care settings. Students will utilize the necessary resources in health care to optimize health in these populations. Prerequisite(s): APRN 5017, APRN 5018.

Corequisite(s): APRN 5019.

APRN 5021 Acute Care III 3 Credits

This course is designed to foster development of clinical competency in acute care settings for the older adult and frail elderly patient population (ages 65-74 and 75+). This course provides a foundation for the advanced practice nurse working in acute care practice settings to have entry level competencies for the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) to build on the core competencies for all nurse practitioners. Emphasis on the nurse practitioner role as a collaborative healthcare team member and advocate for adolescents and young adults in the acute care setting. Prerequisite(s): APRN 5019, APRN 5020.

Corequisite(s): APRN 5022.

APRN 5022 Acute Care III Practicum 3 Credits

This practicum provides a clinical setting for the integration of classroom material presented in Acute Care III. This course focuses primarily on transitioning from an expert registered nurse role to the Adult Gerontology Acute Care Nurse Practitioner (AGACNP) student role that is working in a variety of acute care settings. Students will utilize the necessary resources in health care to optimize health in these populations. Prerequisite(s): APRN 5019, APRN 5020.

Corequisite(s): APRN 5021.

APRN 5023 Advanced Psychopharmacology 2 Credits

The course builds on the knowledge from advanced pharmacology and provides an in-depth examination of drug classifications related to the treatment of psychiatric disorders across the lifespan. The pharmacokinetics and pharmacodynamics of psychopharmacologic agents and therapeutic treatment plans will be emphasized. Special topics on issues related to polypharmacology, drug abuse, and psychiatric-mental health nurse practitioner prescribing issues are discussed. Prerequisite(s): APRN 5008

Corequisite(s): APRN 5024, APRN 5025.

APRN 5024 Psychiatric Assessment and Diagnosis 3 Credits

This course will examine the advanced concepts of assessment and differential diagnosis in advanced practice, psychiatric-mental health nursing. The Diagnostic and Statistical Manual of Mental Disorders (DSM-5) will be used in clinical decision making to determine screening, assessment, diagnostic studies, and differential diagnoses for psychiatric disorders across the lifespan. A holistic approach to assessment will be incorporated by examining social, genetic, cultural, ethnic, and gender elements in psychiatric illnesses. Prerequisite(s): APRN 5007

Corequisite(s): APRN 5023, APRN 5025.

APRN 5025 Foundations in Therapy 2 Credits

This course provides a foundation in the application of psychotherapeutic interventions to the management of psychiatric disorders for individuals, families, and groups across the lifespan. The practice of psychotherapy and crisis intervention in the psychiatric-mental health nurse practitioner role will be examined in relation to cultural, ethical, moral, and legal issues.

Corequisite(s): APRN 5023, 5024.

APRN 5026 Psychiatric-Mental Health I 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse adult populations. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for adults with psychiatric disorders. Prerequisite(s): APRN 5023, APRN 5024, APRN 5025

Corequisite(s): APRN 5027.

APRN 5027 Psychiatric-Mental Health Practicum I 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health I. The focus is on psychiatric health care of adults. Students will utilize the necessary resources in health care to optimize health in this population. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5026.

APRN 5028 Psychiatric-Mental Health II 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse older adult populations. Complex disorders will be examined. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for older adults with psychiatric disorders. Prerequisite(s): APRN 5026, APRN 5027

Corequisite(s): APRN 5029.

APRN 5029 Psychiatric-Mental Health Practicum II 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health II. The focus is on psychiatric health care of older adults. Students will utilize the necessary resources in health care to optimize health in this population. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5028.

APRN 5030 Psychiatric-Mental Health III 3 Credits

This course will examine the Psychiatric Mental Health Nurse Practitioner (PMHNP) role in health promotion, disease prevention, diagnosis, and management in psychiatric practice with diverse pediatric populations and families. Emphasis is on the nurse practitioner role as a collaborative health care team member and advocate for children with psychiatric disorders. Prerequisite(s): APRN 5028, APRN 5029

Corequisite(s): APRN 5031.

APRN 5031 Psychiatric-Mental Health Practicum III 3 Credits

This practicum course provides a clinical setting for the integration of classroom material presented in Psychiatric-Mental Health III. The focus is on psychiatric health care of pediatric patients and families. Students will utilize the necessary resources in health care to optimize health in these populations. The nurse practitioner's role as a collaborative member of the interprofessional team will be evaluated.

Corequisite(s): APRN 5030.

Arts Management and Executive Leadership (AMEX)

Courses and Descriptions

AMEX 500 Managing Arts & Institutions - Principles & Practice 3 Credits

Provides survey of key challenges and opportunities in institutional planning and development, strategy, organization, marketing, fund development, budgeting, leadership and governance in arts institutions, with a particular focus on nonprofit arts. Vision-centric, mission-driven, integrated management perspectives are applied to case-based research, analysis and reporting, supported by multiple assigned readings and required online discussion posts. This course is a pre-program requirement for the MA in Arts Management and Executive Leadership degree. Students who have successfully completed AAD 121 (or similar, at another undergraduate program) as an undergraduate may be waived from completing this course by the program director and dean.

AMEX 503 Arts Marketing: Principles and Practice 1.5 Credits

This course will build upon integrated management and marketing fundamentals addressed in AMEX 500. The course surveys the challenges, as well as traditional, contemporary and developing opportunities and approaches to institutional branding, audience development, product marketing and community alignment from vision-centric, mission-driven strategic marketing and public relations perspectives. The course is a pre-program requirement for the Master of Arts in Arts Management and Executive Leadership program. Students who have successfully completed AAD 202 as an undergraduate may be waived from completing this course by the program director and dean.

Prerequisite(s): AMEX 500 or permission of director and dean.

AMEX 506 Funding Arts & Institutions - Principles and Practice 1.5 Credits

The seminar builds upon integrated management, fundraising and institutional advancement fundamentals addressed in AMEX 500. This course surveys the challenges as well as traditional, contemporary and developing opportunities and approaches to advancement, donor-centered fundraising, legacy-building from vision-centric, mission-driven strategic fund-development perspectives. The course is a pre-program requirement for the Master of Arts, Arts Management and Executive Leadership program. Students who have successfully completed AAD 203 or similar coursework may be waived from completing this course by the program director and dean.

Prerequisite(s): AMEX 500.

AMEX 509 Intersecting Arts and Law 3 Credits

Intersecting Arts & Law explores multiple, diverse cases and conclusions which have impacted and continue to shape the arts. Masters candidates compare and contrast past and present legal cases, statutes and mandates on a host of issues ranging from artistic expression as hate or sex speech to the rights and responsibilities of artists and institutions pursuant to ownership and rights of dissemination. Current legal standing and its evolution, essential tools, trends and best practices will be assessed via case-based research and reporting grounded in comparative analysis of historical, contemporary and prescient topics relating to the intersections of law and artistic rights and freedoms.

Prerequisite(s): AMEX 500, AMEX 503, AMEX 506.

AMEX 512 Advancing Arts & Institutions 3 Credits

This course will provide integrated strategies for long-term fund development, sustainability, and legacy building in the arts. Funding and other stakeholder-driven advancement follows vision and, in an industry that relies heavily on stakeholder investment to propel artistic and programmatic success, the need for strong vision-driven leadership is critical. Building upon foundational information delivered in AMEX 500 and AMEX 506 (or equivalents), the course explores and assesses multiple, diverse approaches to vision-centered, mission-driven institutional advancement and fund-development from all philanthropic sectors impacting the nonprofit arts. Students will compare and contrast diverse board, executive and managerial strategies and application of current tools, trends and best practices employed in fund development planning and program implementation via case-based research and reporting. Comparative research and analysis of public and private funding institutions, corporations, and individual philanthropists – what inspires and guides their proposal review processes and giving practices - further informs discussion and the development of three sector-specific assessments for multiple arts institutions with which each student will have aligned themselves. Three, 90-minute live streamed, moderated expert advisory panel discussions in addition to regularly-scheduled online sessions will interface leaders in the field and faculty moderator engaging on essential topics relating to course goals/outcomes, providing diverse and highly informative first-hand insights from executive leaders and decision-makers.

Prerequisite(s): AMEX 500, AMEX 503, AMEX 506, or equivalents, or permission of program director and dean.

AMEX 515 Advocating Arts & Institutions 3 Credits

This course will discuss the legal, societal and ethical perspectives on arts policy, practice, and procedures in the workplace. Arts often reflect, challenge and at times define social, political and ethical constructs and push the envelope on what is acceptable – aesthetically, morally and otherwise – in contemporary society. Explore the ever-evolving relationship of arts and society through the lens of institutional responsibility as interpreted by the artist, the law, and by contemporary civic and social considerations. Masters candidates will research and discuss key historical moments and movements which have impacted the arts and institutional governance and administration; current legal, social and ethical issues impacting artistic expression and institutional leadership today; and key policy decisions past, present and under consideration which impact the ways by which institutions make and disseminate art, govern themselves, and carry out key administrative functions. Case-based comparative research and analysis of effective leadership initiatives, policies and best practices around key legal, social and ethical issues impacting institutions further informs discussion and the development of a comprehensive institutional responsibility proposal for an arts institution with which each student will align him or herself.

Prerequisite(s): AMEX 500, AMEX 503, and AMEX 506 or equivalents when approved by the program director and dean.

AMEX 518 Engaging Arts & Institutions 3 Credits

This course provides an integrated approach to vision-centric, mission-driven community building, audience development, and engagement in the arts. In a time when active participation in live arts is challenged with multiple and ever-advancing competing arts and entertainment options, platforms and pricing structures, the ability and wherewithal for arts institutions to effectively get their message through is more essential than ever. Building upon foundational information delivered in AMEX 503, this course explores challenges and opportunities in winning the hearts and minds of a diverse, often fickle and ever-changing demographic, psychographic and socio-economic public, engaging them in new and meaningful ways. Masters candidates research and discuss the importance of vision, mission and integrated management approaches to branding and messaging; trends in audience participation; efficacy of traditional and contemporary approaches to institutional branding, audience development and community-building around the arts; evolving modes and tools for effectively identifying, programming for, marketing to and engaging diverse audiences; efforts to integrate live arts and new technologies to market, and expand access to and engage audiences in the arts in new ways. Case-based comparative research and analysis of effective branding and marketing campaigns further informs discussion and the development of a comprehensive market analysis and brand expansion proposal for an arts institution with which each student will align him or herself.

Prerequisite(s): AMEX 500, AMEX 503, and AMEX 506 or permission of the program director or dean.

AMEX 521 Surveying Arts Institutions 1.5 Credits

Comprehensive, case-based assessment of significant institutions, institutional governance & leadership as a means of guiding final synthesis and capstone development.

Prerequisite(s): AMEX 518, AMEX 521, AMEX 524.

AMEX 524 Leading & Governing Arts Institutions 3 Credits

This course will discuss strategic methods, analytical approaches, and best practices for arts executives, board members, and stakeholders. Strategic, adaptive, entrepreneurial governance and management of arts institutions is essential for long-term survival and success, particularly in ever-shifting social, political, economic and technological landscapes. Building upon foundational information delivered through all prior coursework, this course explores the roles, relationships and responsibilities of institutional leaders and how strategic approaches to defining roles, finding and keeping the right people to fill them, strengthening the relationships and identifying and fulfilling responsibilities at all levels drives success. Graduate candidates research, compare and contrast leadership styles, tools and best practices in ethically and responsibly governing and managing institutions, with particular consideration given to the specific needs of the nonprofit arts. Topics of discussion and debate will include ethics and aesthetics, diversity and equity, arts and civic responsibility, and freedom and constraint in strategically planning, governing and managing the production and dissemination of art. Multiple case-based analytical studies resulting from in-depth, thesis-oriented governance and/or leadership focus surveys developed throughout the program further inform discussion and the development of a comprehensive leadership strategy for an arts institution with which each student will align him or herself. Requires participation in a full-day Board and Executive Management Leadership Seminar/Workshop intensive on the Rider campus at end of the session.

Prerequisite(s): AMEX 512, AMEX 515, AMEX 518.

AMEX 590 Synthesizing Arts Management 1.5 Credits

Capstone (Thesis or Leadership Project) research, analysis, orientation & preparation in context of all prior coursework. This course involves thesis research and analysis, thesis development and writing application OR* project research and analysis, project development, management and reporting. *Capstone option (thesis or leadership project) is chosen in coordination with graduate capstone advisor and upon approval by WCA Dean.

Prerequisite(s): AMEX 521.

AMEX 593 Applying Arts Management 3 Credits

This course represents the graduate capstone requirement and is taken subsequent to the preparatory "Synthesizing Arts Management" (AMEX 590) course wherein the graduate candidate will identify, design, prepare for and subsequently complete either a traditional, written graduate thesis path of completion or an in-depth, comprehensive leadership project - either option upon approval, and under advisement of, program director and designated faculty member.

Prerequisite(s): AMEX 519.

Athletic Leadership (ATHL)**ATHL 501 Sport Psychology 3 Credits**

This course covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics. Emphasis is placed on applications for maximizing effectiveness while serving in the position of coach or administrator.

Prerequisite(s): Permission of Program Director.

ATHL 502 Evidence-Based Research and Athletics 3 Credits

This course in research methods prepares the student to understand materials and issues associated with but not limited to the logic of the scientific method, research design, and qualitative and statistical analysis of data. Students will be afforded the opportunity to conduct research in the course on topics.

Prerequisite(s): Permission of Program Director.

ATHL 503 Strength, Speed, and Conditioning 3 Credits

Emphasis will be placed upon assessment, description, and analysis of sport movement and designing training programs to enhance performance variables. While this course will assist those who desire to sit for the National Strength and Conditioning Association's (NSCA) Certified Exam, it is NOT a preparation course for the NSCA-CSCS exam.

Prerequisite(s): Permission of Program Director.

ATHL 504 Seminar in Athletic Training 3 Credits

Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

Prerequisite(s): Permission of Program Director.

ATHL 505 Athletic Communication and Marketing 3 Credits

Seminar in Sports Media and Communication is a critical examination of the symbiotic relationship between the mass media and professional sports franchises and major college athletic programs. This course deals with the workings and processes behind executing the proper techniques of sports information and media relations, as well as an analysis of the culture of sports in modern society. Students will develop a practical focus on sports information and promotion, including the role of the sports information director and events promoter, with emphasis on advanced concepts of public relations, publicity and marketing.

Prerequisite(s): Permission of Program Director.

ATHL 506 Athletic Facilities Management 3 Credits

Seminar in Facilities Management and Event Planning provides an examination of principles and techniques of planning and operating sport facilities. Emphasizes the principles and concepts of organization and administration including communication, personnel management, management of physical resources, and risk management. Examines a variety of sport operations such as indoor stadiums, athletic field complexes, and managing recreation and intramural activities.

Prerequisite(s): Permission of Program Director.

ATHL 507 Athletic Governance and Policy 3 Credits

Students in this course will explore principles, techniques, and processes related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. Studying collegiate athletic administration involves interpreting NCAA By-laws, including a comparison between Division I, II, and III compliance regulations. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level. At the end of the course, students will understand the primary duties of the athletic director and the intricacies of managing an intercollegiate athletic program.

Prerequisite(s): Permission of Program Director.

ATHL 508 Athletic Risk Management & Wellness 3 Credits

Students in this course will explore proactive approaches to managing risks associated with conducting health, physical education, recreation and outdoor education programs. This course will emphasize safety as a foundation of quality program planning. Students will study governing associations and leadership/management skills required to be successful in the world of college athletics.

Prerequisite(s): Permission of Program Director.

ATHL 509 Seminar in Legal and Ethical Issues in Athletics 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues that will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

Prerequisite(s): Permission of Program Director.

ATHL 514 Women and Sports 3 Credits

Women and Sport focuses on women winning access to the playing field as well as the front office in sport. Using research-based materials, course members will gain an understanding of how women have been involved in sport and physical activity, how women have struggled for widespread recognition and legitimacy, how women continue to carve out their role in shaping sport as it is known today, in the future, and society's ongoing conversation about what it means to be a female athlete or a woman working in sport.

ATHL 515 Athletic Leadership 3 Credits

In any profession or endeavor, the attitude and overall culture of a team is a direct reflection of its leadership. In the sports realm, there are many different leadership approaches that have been considered effective. This course will provide an overview of these approaches based on a comprehensive review of the literature related to sport leadership. The primary goals of this course are to help current and aspiring sport leaders gain a better understanding of effective leadership, to provide the necessary tools in developing effective leaders, and to provide networking opportunities for individuals who share similar goals and aspirations across various domains. The leadership principles may be beneficial to individuals in a variety of settings. This course offers coaches, administrators, players, and scholars the opportunity to learn and apply leadership principles within various contexts.

ATHL 516 Sport Analytics 3 Credits

This course will discuss the theory, development, and application of analytics in sports and the application of analytics in sports for purposes of in-game strategy, player performance, team management, sports operations, and fantasy competitions. Students will be introduced to topics in the applied analysis of sports, with a focus on supporting team decision-makers and applying modern, practical analytic techniques to sports data in search of actionable insight and a competitive edge. The four major team sports of North America (football, baseball, basketball, and hockey) will be the primary subjects of study, but the course's learning objectives are universally applicable to all sports. Emphasis will be placed upon becoming familiar with the full analytic life-cycle: asking productive and relevant research questions, finding the correct data, applying the appropriate tools, discovering insights, and clearly communicating results.

ATHL 517 Athletic Finances 3 Credits

Athletic Finances examines the financial tools that sports managers use to run their sport businesses. Course members will explore traditional and innovative methods of revenue acquisition and financial management in sports organizations, the financial business structure of sports organizations, and the financial planning and forecasting processes that make organizations effective. Various other aspects of finance are discussed as they relate to sports organizations, including the time value of money, capital structuring, stocks and bonds, inventory management, and higher education.

ATHL 518 Athlete Development 3 Credits

Athlete Development focuses on sports-specific learning to prepare athletes with the necessary critical elements leading to an improvement in their chosen sport, emphasizing technical development, physical preparation and sports specific knowledge. The course follows the Long-Term Athlete Development (LTAD) model, an approach to athlete-centered sport that combines skill instruction with long-term planning and an understanding of human development. The LTAD model integrates current research on talent development and assessment into practice to help sport leaders plan athletic development across the life span or design detailed programs for a particular group, including those with physical and cognitive disabilities.

ATHL 519 Ethics in Sport 3 Credits

Ethics in Sport focuses on focus on how people should treat one another in sport settings and, therefore, on a critical examination of ethical issues central to contemporary sport. As a class we will thus consider these questions: 1) What place, if any, does sport have in a good life? 2) What counts as cheating in sport, and why is it morally wrong? 3) Is it morally permissible to use performance-enhancing drugs or genetic forms of enhancement to boost athletic performance? 4) How is it possible to achieve equality for women in sports in a culture where dominant sports tend to privilege such traditionally male features as strength, power, and speed?

ATHL 520 Applied Sport Psychology 3 Credits

Applied sport psychology involves extending theory and research into the field to educate coaches, athletes, parents, exercisers, fitness professionals, and athletic trainers about the psychological aspects of sport or activity. A primary goal of professionals in applied sport psychology is to facilitate optimal involvement, performance, and enjoyment in sport and exercise. Applied sport psychology is an emerging practice area focusing on applying psychological principles, theories, and skills to enhance optimal performance among populations such as performing artists, athletes, and those in the business world.

Prerequisite(s): ATHL 501.

ATHL 521 Clinical Sport Psychology 3 Credits

Clinical Sport Psychology presents a new way of thinking about the psychological processes that are involved in attaining and maintaining sport expertise. The course, based on clinical and sport research, bridges the gap between clinical and sport psychologists by presenting a model that connects athletic performance, basic psychological processes, and relevant empirical findings. Successful completion of course materials provides the practitioner with greater understanding of the varying dimensions of clinical phenomena and how nonclinical, subclinical, and clinical issues affect athletic performance and the overall well-being of athletes.

Prerequisite(s): ATHL 501.

ATHL 522 Assessment in Sport Psychology 3 Credits

Assessment in Sport Psychology integrates and synthesizes the theoretical concepts of sport and performance psychology into meaningful application. Emphasis is placed on creating and then assessing performance-enhancement programs for clients through the exploration and application of theory, research, and intervention strategies to assist clients pursuing excellence. The construct of excellence is thoroughly explored, including common roadblocks and the type of contexts in which the skills and knowledge are used in the field of clinical mental health counseling, sport and performance, intrapersonal relationships, and career.

Prerequisite(s): ATHL 501.

ATHL 550 Current Issues in Athletics 3 Credits

This course will provide students the opportunity to survey the various sub-disciplines related to coaching and athletic administration, and their methods of inquiry. The course will place emphases on critically appraising research literature, and data collection, data organization and analyses for various research questions.

ATHL 601 Concepts and Principles of Coaching 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director.

ATHL 602 Developing a Philosophy of Coaching 3 Credits

Athletic Coaching – Developing a Philosophy provides the opportunity to learn and reflect upon the necessary skills for a successful coach. The course will cover numerous topics to allow course members the opportunity to learn, evaluate and self-reflect on their abilities and skills as a coach, and to develop a personal philosophy of coaching. The course addresses the differences in levels of competitive sports, the personal roles that coaches should exhibit, the professional roles expected and the organizational influences on the world of a coach in order to maximize the development of athletes and team while progressing from one season to the next in the annual coaching cycle.

Prerequisite(s): ATHL 601.

ATHL 621 Concepts and Principles of Athletic Administration 3 Credits

Concepts and Principles of Athletic Administration explores the complexities of intercollegiate athletics while explaining the organizational structures, key players, terms, and important issues most relevant to the growing but often misunderstood fields of recreational studies, sports management, and athletic administration. Intercollegiate athletics create unique challenges to higher education—for while they are closely integrated into their institutions—athletic programs often operate outside of traditional university governance structures while contributing significantly to a school's culture, identity, and financial outlook. Course members in this course will explore principles, techniques, and process related to the management of college athletics, characterize the critical steps to getting hired in collegiate athletics, and prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level.

ATHL 622 Administrative Decision-Making 3 Credits

Students in this course will explore principles, techniques, and process related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students value effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will characterize the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level.

Prerequisite(s): ATHL 621.

ATHL 650 Internship of Athletic Leadership 3 Credits

The learning experiences in this course are afforded through a variety of instructional approaches. This will ensure opportunities to meet the course objectives. Course content includes, but is not limited to, the following: philosophical foundations of coaching, integrity; program mission and priorities; scientific basis of sport; basic conditioning and training principles; basic wellness; psychological foundations of coaching; leadership strategies; communication; team dynamics and cohesion; personality, basic traits and states influencing performance; pedagogical principles of sport; learning motor skills; process of coaching; managerial functions of coaches-planning, controlling, evaluating; event/facility/equipment management; legal duties and risk management; promotions, marketing, fundraising for coaches; multitask management, self-management; intangibles in coaching.

Prerequisite(s): Permission of Program Director.

ATHL 651 Internship of Athletic Administration 3 Credits

The internship affords students professional experience with an organization where the course theory can be applied to best practices. The internship is developed in consultation with the student, the student's academic advisor and the Internship. A learning/work plan is prepared by the student for approval by the site supervisor, both of whom share responsibility for the internship.

Prerequisite(s): Permission of Program Director or approval by CLAS Dean's Office.

Business Education-GR (BSED)

BSED 504 Curriculum Strategies and Evaluative Concepts in Business Education 3 Credits

Designed to provide the student with effective curriculum strategies and evaluative concepts relative to business and office education programs in elementary, secondary, and post-secondary public and private schools. Students are acquainted with appropriate curriculum and evaluation models designed to plan, organize, implement, revise and assess instruction and programs. Improvement of curriculum and evaluation is the primary goal.

BSED 506 Administration and Supervision of Business and Vocational Education 3 Credits

A study of the administrative and supervisory problems associated with business and vocational education at the local, county, state, and federal levels. Administrative and supervisory improvement strategies are explored. Major topics include: educational administrative structures; role of the supervisor of instruction; state and federal legislation; certification; personnel policies; ethical conduct; funding procedures; and public relations. Improvement of administration and supervision of business and vocational education is the primary goal.

BSED 508 Organizing and Administering Cooperative Work Experience Programs 3 Credits

An overview of the current administrative and instructional strategies used in organizing and administering cooperative work experience programs at the secondary and post-secondary levels. Up-to-date concepts are reviewed relative to program approval, teacher coordinator certification, work agreements, labor laws, funding, reporting supervision of student learners, related instruction, student wages, and vocational student organizations. Current instructional materials are reviewed and evaluated. Improvement in the organization and administration of cooperative work experience programs is the primary goal.

BSED 509 Principles and Strategies of Vocational and Cooperative Education 3 Credits

Designed as one of the specialized courses in the preparation of business and marketing education teachers and teacher-coordinators of cooperative work experience programs. The philosophy and history of education for and about work, including technology, are studied along with the principles and strategies for organizing and administering vocational cooperative education programs. Developmental/reflective evaluative techniques will be applied for the assessment of self, students, instruction and selected case studies. Current instructional concepts, organizational and administrative strategies, legislative enactments, and regulations pertaining to the employment of youth are included. Special attention is given to the role of vocational student organizations and advisory committees.

BSED 519 Directed Study and Research in Business Education 1-3 Credits

Provides the student with an opportunity to complete a project, resolve a problem, or pursue a major activity that will make a contribution to the teaching profession in business or marketing education. Each participant, under the supervision of a senior faculty member, follows a planned sequence of professional activity that culminates in a completed written project. Professional teacher development is the primary goal.

BSED 530 Emerging Instructional Strategies in Business Education 3 Credits

Emphasis is placed on the enhancement of teaching effectiveness in business education as emerging instructional strategies are reviewed and studied. Special attention is devoted to the new technology and its use in business education while focusing attention to the present and future needs of the employer. Current instructional materials are presented and utilized. Master practicing business education teachers will augment the instructor's presentations.

Communication-GR (COMM)

COMM 500 Communication Processes in Health 3 Credits

Interpersonal and nonverbal communication are the two areas of general communication studies that health communication draws from most heavily. These concepts affect relationships in healthcare, the ability to understand and process medical information, the efficacy of messages in relation to nonverbal indicators, and how bad news, another major concept in health communication, is received. This class will provide a comprehensive understanding of these concepts, how they are utilized in the field of health communication, and the ways in which the two areas intersect, all in the broader context of understanding health communication as a discipline.

COMM 501 Medical Concepts and Health Writing 3 Credits

Improving the way that health is communicated requires the ability to understand health information at the initial – and often complex – level. In particular, health communication aims to provide information to underserved populations, who may suffer from lack of education and poor health literacy. This class will provide students with a basic understanding of medical terminology and the ability to comprehend and explain scientific literature. Students will develop the skills needed to translate medical information for a wide range of audiences. Students will also be required to apply these concepts through the creation of multiple types of health writing assignments.

COMM 503 Crisis Communication 3 Credits

Crises can bring harm to an organization's brand and threaten its reputation. Knowing how to anticipate and plan for problems and challenges, and knowing how to manage a crisis if it does strike, are key factors in effective crisis communication. Students will develop theoretical knowledge of issues management and crisis communication and, through case studies and hands-on assignments, will learn to think strategically about importance of public opinion, the role of the media and social media in a crisis, how to develop effective crisis-related messages, and learn how to evaluate crisis responses.

COMM 504 Strategic Writing 3 Credits

This course will provide students with the tools to think and write strategically in today's dynamic, hyper-competitive, and ever-changing global marketplace. Students will gain competency in a number of areas including: creating a clear, concise, and compelling strategic outline, understanding the need to customize strategies and tactics for different stakeholders, and focusing on actionable intelligence and outcomes-based writing. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 505 Health Communication Theory 3 Credits

Health communication is driven by a set of principles that guide the conceptualization, design, and implementation of new health guidelines and interventions. The ultimate goal of health communication is to increase health and satisfaction by encouraging healthier behaviors, medical compliance, and more efficient communication of medical information. This class is designed to give an overview of the major fields of study in health communication through examination of the major theoretical perspectives therein. Topics include the different areas of study in which health communication theories are based, how theory is used to support the initial design of research studies and interventions, and the situations in which the use of more than one theoretical approach is warranted.

COMM 507 Presentation Strategies 1.5 Credits

This course develops the ability to create presentations for targeted audiences. Students will gain competency in preparing purposeful messaging and incorporating visual presentation tools, with a goal of delivering impactful professional presentations that achieve results. The course will focus on developing the knowledge and skills to influence and inspire internal and external constituencies, which is a key part of communication practitioners' jobs.

COMM 510 Theory and Practice of Negotiations 3 Credits

This course provides students with the theory and skills required to be effective negotiators. Students will learn how to prepare for and participate in negotiations by applying various strategies and tactics. This course will be evenly split between theoretical lecture/discussion and practical application / skill development, including in-class simulations.

COMM 520 Social Media Planning 3 Credits

Social media has changed the way that organizations communicate with their various audiences blurring the lines of public relations, marketing and customer service. Communication professionals must be able to think strategically across all social media platforms to effectively define their brand, speak in an authentic voice and build relationships. Through case study analyses, best-practices research and hands-on assignments, students will learn how to strategically plan a social media campaign through research, content development and curation, and evaluation using meaningful metric analysis.

COMM 525 Visual Communication 1.5 Credits

This course introduces students to the theory and practice of visual communication design. Students will learn how to critique, evaluate, and edit visual communications with specific audiences in mind. Possible topics include the elements and principles of design, color theory, visual perception theories, typography, symbols, brand identity, logos, propaganda, and information design in both current and historical contexts. Readings and viewings of relevant films may be required component of the course. Assignments will afford students opportunities to analyze and critique visual communications for various professional environments.

COMM 531 Legal/Ethical Issues for Professional Communication 3 Credits

Provides students with the knowledge to understand and apply ethical guidelines and current laws and regulations relative to workplace communication, as well as the legal limits impacting professional communications. This knowledge is particularly important for those in or aspiring to managerial/senior staff roles.

COMM 545 Information Gathering & Analysis 3 Credits

Develops the knowledge and skills to use various research methods and analysis techniques to provide critical information for, and assist with, business decisions. It will cover developing research tools, gathering and verifying information, analyzing, and reporting results. These skills are particularly important for those in or aspiring to managerial/senior staff roles.

COMM 551 Cultural Conceptions of Health and Illness 3 Credits

Culture affects every relationship dynamic, the way nonverbal communication is interpreted, how audiences are selected for health campaigns, the ability and willingness to use technology, and the way bad news is broken to individuals and families. In health communication, culture comprises both the general conceptions of what culture is – the characteristics of a particular social, ethnic, or age group – as well as other factors. This class will examine the specific variables of culture in this setting, how the variables are both unique and interconnected, and the wide-reaching impact culture has in health. The first half of the course explores the variables that culture includes. The latter part of the course takes these variables and demonstrates the roles they play in real-world health communication settings.

COMM 552 Communication in a Multicultural Workplace 1.5 Credits

Instructs in the use of diversity and cultural communication principles and strategies to effectively manage a culturally diverse workforce. This course will help organizational leaders understand how gender, ethnic, religious, and other differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relations, and ultimately, good productivity for the organization.

COMM 553 Communication in a Global Market 1.5 Credits

Examines communication between and among businesses in a global context. The course presents communication as an essential pivot around which revolve the social and institutional relationships within and among nations. Hence, exploring global communication structures and tendencies is an important means to understanding social, cultural, economic and political impositions on global business. The emerging role of technologies of communication, such as social media, will be a particular focus of this course.

COMM 554 Effective Group Communication 1.5 Credits

Encompasses the study of individual and group behavior in the workplace. Emphasis is placed on individual behavior and group dynamics, application of current group theories, effective group communication, and effective leadership/followership skills. A comprehensive review of these processes, as well as others, will allow students to examine their role in groups as well as teams.

COMM 555 Organizational Culture & Storytelling 1.5 Credits

Organizational culture matters and, according to the research, it is the secret to the most successful organizations in the world. This course will define organizational culture, explore how culture is communicated through organizational mission and value statements, and provide insight into leveraging culture for organizational performance. Students will explore a variety of topics related to organizational culture including the role of the leader, its importance to recruiting and hiring, how to share culture through organizational practices and storytelling, and how to leverage culture to inspire change and innovation.

COMM 556 Special Topics in Communicatio 3 Credits**COMM 557 Special Topics in Communicatio 3 Credits****COMM 558 Health Communication Campaigns 3 Credits**

Campaigns are the primary tool used in health communication to disseminate messages and effect change. Campaigns can provide information on a specific issue or to a specific community, encourage preventative health behaviors, demonstrate behaviors (such as performing self-skin exams for skin cancer or the proper way to follow medication instructions), put forward suggestions for a healthy lifestyle, raise awareness, or offer support. At times, multiple messages may be present in one campaign. This class will examine the different types of health campaigns and the impact a health communication campaign can have. Students will learn how to analyze a health campaign through its full cycle. The class will also serve as a foundation for the capstone class of the Master's in Health Communication program.

COMM 559 Communicating Crises in Health 3 Credits

In the health setting, multiple events can be considered a crisis: the outbreak of a disease, contamination of food, a natural disaster, and more. The response to a crisis can have a significant, long-lasting impact on the organization's reputation. The development of a crisis plan, which sets forth guidelines for an organization's response to a crisis and involves multiple steps, can be completed before any events occur and can significantly affect the way an organization handles a crisis. This class explores the types of crises that occur in health communication, the factors involved in a crisis, the development of a crisis plan, and the effects of a crisis on an organization.

COMM 560 Communication Issues for Leaders 3 Credits

Focuses on analysis of contemporary issues that highlight the necessity of effective communication for those in a leadership position. Through analysis and discussion of historical and current challenges faced by organizations, students will learn to recognize how effective leaders apply successful communication strategies. Case studies will also explore the effect that poor communication choices have had on organizations. Emphasis will be placed on discussion, research, and presentation.

COMM 561 Business of Media 3 Credits

This course will take you behind the scenes in the media industry to investigate how its economic structure affects the content we see and the composition of audiences. We will explore tensions between traditional and emerging media as they compete to retain existing customers and acquire new ones. You'll learn to critically analyze how concepts such as profits, politics, ownership, data-gathering and agenda setting relate to media. Students will learn some fundamental business concepts, which will enable them to communicate about business decisions and engage in important debates about the future of media. Students completing this course will understand the economics (and economies) of media and thus be better prepared to become leaders in media organizations whether by way of a career in media sales, marketing, advertising, public relations, journalism, creative design, production, broadcasting, etc.

COMM 563 Digital Media Communication 3 Credits

Looks at the digital technologies that make up the new world of digital convergence. The course will examine the effects of digital media convergence on social life, ethics, industry, and local and global communities through a variety of theories and paradigms. This course will also help students develop necessary digital media production skills and use them critically to solve media development problems.

COMM 564 Communication and Diversity in the Workplace 3 Credits

The culture of work, like society, is multicultural. More than ever, today's organizational leaders, including CEOs, managers and supervisors, must understand how to use diversity and cultural communication principles and strategies to effectively nurture and promote a culturally diverse workforce. This course helps organizational leaders understand how gender, ethnic, religious, and other social and cultural differences affect the workplace, and how to effectively harness those differences towards maintaining a workplace that promotes good employee relationship, and ultimately, good productivity for the organization.

COMM 565 Rel Comm: Interpersl, Group, Intercultur 3 Credits

Introduces students to seminal and contemporary research in the area of relational communication. Broken down into three modules, the curriculum will be divided among the topics of Interpersonal Communication, Group Communication, and Intercultural Communication. In the first, emphasis will be placed upon theories of human communication, verbal and nonverbal communication, gender, and conflict. The second module will explore various elements of group communication, including leadership and followership, roles, status, power and problem solving and decision making. The third module will introduce students to the study of intercultural communication, with its focus on the relationship between culture and communication.

COMM 590 Independent Research and Study 3 Credits

Independent Research and Study allows students in good academic standing to investigate topics of interest under faculty supervision.

COMM 599 Capstone Seminar 3 Credits

As the final course in the curriculum, students will use concepts, theories and practices from previous courses as they contemplate complex issues. As a comprehensive assessment of student learning, a committee will ask students to respond to questions related to course material. This course will culminate with several research-based position papers on topics related to individual student interests. This course should be taken in a student's final semester. Minimum required GPA of 3.0; permission of instructor required.

COMM 600 Capstone: Implementing a Health Communication Campaign 3 Credits

The ability to implement, evaluate, revise and successfully launch a campaign is a critical skill for all individuals who work in health communication. Campaigns are the primary tool used by health communicators to initiate change in a community, although their implementation will not always be a fluid, one-step process. This class will require students to select a local health campaign and evaluate the campaign from start to finish. Students will complete the Master's program in Health Communication with a complete proposal for a health communication campaign and the skills needed to analyze an existing campaign from beginning to end.

COMM 690 Research and Creative Expressi 1-4 Credits

Counseling (COUN)

COUN 500 Introduction to Counseling and Helping Professions 3 Credits

Educational, social, and psychological foundations of counseling services. Basic theories, principles, and techniques of counseling and related helping professions, such as coaching, and their applications to professional services. Emphasizes self-awareness as related to becoming a facilitator of helping skills. The team approach to counseling services and the contribution of the various specialties within the total counseling services program are stressed.

COUN 501 Coaching Principles and Practices 3 Credits

The course covers core coaching competencies, including coaching screening and orientation, fundamental skills, assessment, approaches for organizations, and coaching ethics. The course meets all 30-hour educational requirements for certification as a Board Certified Coach (BCC) through the Center for Credentialing and Education and is required course for the 60-hour BCC educational requirements.

COUN 502 Prevention and Intervention for Body Image and Disordered Eating 3 Credits

In this course, students will gain an understanding of strategies relevant to the prevention and treatment of body image and disordered eating concerns. Prevention strategies applicable to individual client care, small group work, and large group programming will be discussed. Students will also learn how to communicate and teach prevention strategies to parents, teachers, partners, and others who may be key influences in body image and/or disordered eating issues. In addition, various treatment and intervention approaches for individuals already exhibiting problematic body image and/or disordered eating attitudes and behaviors will be reviewed.

COUN 503 Group Counseling 3 Credits

Analyzes the historical development of group treatment methods, theories, practices, methods for appraising outcomes of treatment, and research findings. Includes critique of recordings, demonstrations, and students' own group experiences as counseling group members.

Prerequisite(s): COUN 500, CNPY 502.

COUN 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

COUN 505 Vocational/Career Development 3 Credits

Includes organizational change and vocational development theories, research, and literature in the field to inform practice with clients with vocational/career concern. The problems and techniques of using occupational and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and group processes are stressed. Includes concepts of career/life planning and counseling and coaching techniques, lifespan transitions, and the interrelationships among work, family, and other life roles.

COUN 508 Foundations of Clinical Mental Health Counseling 3 Credits

This course will provide the foundation of community counseling including roles, policies, history, diversity, systems, programs, interventions, fiscal issues, community resources, consultation, advocacy, and assessment that are unique to community counselors. Projects include searching for government and foundation funding, writing a grant proposal, developing a resource directory, visiting and writing reports evaluating community agencies. This course also meets Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for Community Counseling Programs.

COUN 510 Approaches to Family Counseling 3 Credits

Presents a basic understanding of major approaches of family counseling. Family counseling approaches covered include structural, systems, Ackerman, Satir, and analytical. These approaches are presented as related to major problem centered family concerns--child-rearing concerns, alcohol, drugs, child abuse, dysfunctional marriage, divorce, etc. Emphasizes self-awareness as related to family development.

Prerequisite(s): COUN 500, CNPY 502, or permission of instructor or advisor.

COUN 512 Disaster Response, Trauma, Crisis, and Grief Counseling 3 Credits

This course is an introduction to the research and practice of disaster response, trauma, crisis, and grief and loss counseling in clinical and educational settings. Course will include an overview of the impact of disasters, crisis, and trauma-causing events on individuals, communities, and educational settings and of the impact of working with traumatized clients on practitioners. Emphasis will be placed on prevention, intervention, and postvention practices in working effectively with individuals, families, and groups of people in the midst of traumatic situations and who have experienced loss, crisis, disasters and trauma-causing events.

Prerequisite(s): COUN 550.

COUN 515 Substance Abuse Counseling 3 Credits

This course analyzes the development, intervention and treatment of substance abuse. Family dysfunction and its results will be examined with the various addictive behaviors. This course is designed to help students understand addictive behaviors and how they function. Specialized techniques for treatment will be examined along with related elements, i.e., family, parenting, the characteristics of dysfunction, developmental growth problems, physical problems, effects on school and job performance.

COUN 516 Strategies in Addiction Counseling 3 Credits

This is an experiential and laboratory-based experience in which students will learn to implement evidence based counseling techniques that are utilized in the field of substance abuse counseling. Students will be able to expand their basic counseling skills and techniques learned in COUN 550, as well as become exposed to techniques that are unique to addiction counseling. In addition to learning assessment skills, students will learn interventions that include motivational interviewing, relapse prevention, alternative therapies, group counseling, family counseling, and others. This course will also focus on issues of ethics and prevention in counseling.

Prerequisite(s): COUN 550.

COUN 520 Multicultural Counseling and Relationship Development 3 Credits

Introduces, examines, and critically analyzes and reflects upon major origins and dimensions of human similarities and differences. Explores and personalizes the social-psychological and behavioral implications of these similarities and differences. Examines issues of racism, reverse racism, age and handicapped discrimination, sexism, sexual orientation, etc., in the light of theories of individual and group identity development and the impact of these on, between and within group relationships. Each student is expected to utilize this knowledge for the development of healthy multicultural skills. A semester-long engagement in a multicultural interaction and a presentation of a multicultural discovery project are required.

COUN 521 Cultivation and Implementation of Trauma-Informed Counseling in Community & Educational Settings 3 Credits

This course takes the knowledge of trauma-informed practice in the counseling profession to the cultivation and implementation of trauma-informed practices in various counseling settings. The course will provide an introduction and more in depth understanding of various trauma-informed models such as the Sanctuary Model, and how to work with various systems to implement trauma-informed practices. Specifically, leadership will be a major component of the course, as discussion and assignments will focus on how to implement and educate others in agencies or educational settings on how to adapt a trauma-informed culture in the setting. Specific steps to implement trauma-informed practices and trauma-informed advocacy will be covered throughout the course. Furthermore, there will be an emphasis on how to collaborate with the community, teachers, administrators, and staff to promote trauma-informed practice, trauma-informed treatment, enhancing resiliency, and how to lead the implementation of trauma-informed care in schools and community settings with concrete steps.

COUN 525 Gender Issues in Counseling 3 Credits

Examines the psychological, physiological, historical, and socio-cultural factors that affect the development of women and men across the life span and discusses implications for counseling. Focuses on relevant gender issues including gender bias and equity, misdiagnosis, self-esteem, depression, violence and sexual abuse, the feminization of poverty, and the importance of relationship for women. Presents an overview of feminist psychotherapy and explores the context of the behavioral, emotional and biological problems that impact on mental health. Also discusses the emerging men's movement and trends in counseling men; introduces gay and lesbian issues, the issues of minority women, and factors in counseling the HIV/AIDS client.

COUN 528 Introduction to Creative Arts and Specializations in Counseling 3 Credits

This course provides an introduction to the basic concepts and practices of the uses of creative arts in clinical and educational counseling settings, including the history, current and future trends, rational, and benefits of using artistic methods in counseling. The class is designed for mental health and school practitioners interested in gaining a deeper understanding of the neuroscience, theory and practice of the use of mediating properties found in the creative arts such as visual arts, imagery, dance/movement, music, humor, and drama and other modalities such as animal-assistance, horticulture, and wilderness/nature therapy. Emphasis will be placed on experiential learning activities and exercises to introduce these modalities as they are used independently or in conjunction with the therapeutic process. The function and range of professional practices and specialization/credentialing processes will also be introduced in this course.

COUN 530 Legal and Ethical Issues in Counseling and Psychotherapy 3 Credits

Examines and analyzes the legal, ethical, and professional parameters of counseling and psychotherapy. Discusses legal liabilities and malpractice cases arising from constitutional, tort, contract, family, privacy, and criminal laws. Examines client rights and counselor duties and responsibilities. Explores legal, ethical, and professional implications of third party payment, informed consent, medication, case documentation, client termination and abandonment. Advertisement of counseling services, crisis and case management, consultation and supervision, "duty-to-warn" and court appearances of an expert witness will be explored. Special attention will be given to child abuse reporting issues, dual relationships and to regional legal and ethical developments.

COUN 535 Holistic Wellness Counseling 3 Credits

Based on current methods and research, students will explore holistic wellness (e.g., spirituality, self-direction, work and leisure, friendship, and love) positive psychology (e.g., hope, forgiveness, etc.), and human change from personal and interpersonal perspectives.

Prerequisite(s): CNPY 502.

COUN 550 Counseling and Helping Techniques Laboratory 3 Credits

This a laboratory course, which provides opportunities for both the observation and practice of counseling and professional helping skills. The purpose of this course is to provide students with their initial training in counseling and helping skills under closely supervised conditions. The focus of this course is the development of initial client interviewing and basic counseling and helping skills through an emphasis on techniques (basic and advanced listening and helping skills), strategy (the counseling and helping process), and self-development (the student as counselor and helper) grounded in theories of counseling and related helping professions.

COUN 555 Introduction to Play Therapy 3 Credits

Introduction to Play Therapy provides an overview of the fundamental principles of play therapy, including history, theories, skills, and applications. The course emphasizes developing the therapeutic relationship with children and utilizing play to facilitate children's self-expression, self-understanding, and personal growth. Observation of and supervised experiential activities in play therapy with children are an integral part of the course.

Prerequisite(s): CNPY 502, can take concurrently with COUN 550.

COUN 556 Parent-Child Play Therapy 3 Credits

Parent-child play therapy builds upon the introduction to play therapy course and focuses on helping parents/caregivers enhance their relationship with children through play therapy modalities. Students will learn the history, principles, and skills of filial therapy, with an emphasis on Child-Parent Relationship Therapy (CPRT). Students will have opportunities to strengthen their play therapy skills, develop the ability to conduct CPRT, and learn how to facilitate systemic changes in children's lives through working with parents/caregivers. This course contains an experiential component including in-class role-playing and supervised parent-child play therapy experiences with parents/caregivers.

Prerequisite(s): CNPY 502, COUN 550, EDPS 503, COUN 555.

COUN 580 Elementary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 581 Secondary School Counseling Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor-in-training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 582 Coaching Practicum 3 Credits

A 30-hour supervised experience in coaching with individuals, groups, or organizations. Includes seminar discussions, observations of recorded sessions, session analyses, and group supervision with the faculty supervisor. Provides the coach in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of coaching services. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on coaching services as they address the needs of clients. This course is designed to fulfill the practice requirements for certification as a Board Certified Coach through the Center for Credentialing and Education.

Prerequisite(s): COUN 500 or COUN 501, CNPY 502, COUN 505, and permission of instructor.

COUN 585 Clinical Mental Health Counseling Practicum 3 Credits

A supervised experience in counseling and consulting techniques in mental health facility, community counseling agency, or college setting. Includes seminar discussions, interview analyses or audiotape/videotape observations, and individual supervision with the instructor. For the experienced counselor or the advanced counselor in training who desires to review and/or strengthen individual counseling and consulting techniques. A field placement of 100 hours is required with a minimum of 40 direct contact hours with clients. Students registering for this course should contact the instructor the semester prior to the course being offered.

Prerequisite(s): To be taken semester prior to COUN 590.

COUN 586 Practicum II 1 Credits

The continuation of Practicum, this 1-credit course is required for those students who were unable to complete the 100-fieldwork hours of Practicum in the fall or spring semester. Students will continue at their Practicum fieldwork site and will be responsible for completing the remainder of their 100-hours. A grade will not be granted in Practicum until the successful completion of Practicum II. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor, director, and professor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator.

Prerequisite(s): COUN 580 or CNSC 580 or COUN 581 or CNSC 581 or COUN 585 and all other required course work must be completed or in progress. Program director approval with professor of record approval is required.

COUN 590 Internship in Counseling I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled.

Prerequisite(s): COUN 580 or COUN 581 or COUN 585 or CNSC 580 or CNSC 581. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

COUN 591 Internship in Counseling II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 or concurrent enrollment. All other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

COUN 592 Internship III 1-3 Credits

The continuation of Internship I, this 1 to 3-credit course is required for those students who were unable to complete the 300-fieldwork hours of Internship I in the fall or spring semester. Students will continue at their Internship I fieldwork site and will be responsible for completing the remainder of their 300-hours. A grade will not be granted in Internship I until the successful completion of Internship III. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator. Clinical coordinator approval is required. **Prerequisite(s):** COUN 590 and all other required course work must be completed or in progress and permission of the clinical coordinator is required.

Prerequisite(s): COUN 590.

COUN 593 Internship IV 1-3 Credits

The continuation of Internship II, this 1-credit course is required for those students who were unable to complete the 300-fieldwork hours of Internship II in the fall or spring semester. Students will continue at their Internship II fieldwork site and will be responsible for completing the remainder of their 300-hours. A grade will not be granted in Internship II until the successful completion of Internship IV. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator. Clinical coordinator approval is required.

Prerequisite(s): COUN 590, COUN 591 and all other required course work must be completed or in progress and permission of the clinical coordinator is required.

COUN 600 Independent Study and Research in Counseling Services 1-3 Credits

Students may take two independent studies. However, under special circumstances, such as students seeking certifications (e.g., Student Assistance Coordinator), students may be approved by their advisor to take up to six COUN 600 3-credit courses for a total of 18 credits.

COUN 660 Counseling Supervision: Issues, Concepts and Methods 3 Credits

This course introduces and critically examines issues and concepts that arise in the supervision of counseling and psychotherapy practitioners and trainees. Methods and techniques of supervision are presented to enable students to become knowledgeable and skilled providers of proficient clinical supervision. Psychotherapeutic, behavioral, integrative, systems, experiential, and developmental models of supervision are studied. The unique problems encountered in group, family, and couples counseling supervision are raised as well as legal, ethical, and multicultural issues. Administrative and contemporary issues such as inter- and intra-agency supervision, inter-agency communication, record keeping, evaluation, and taping of counseling sessions are examined.

Prerequisites: COUN 590.

COUN 690 Internship in Counseling Speciality I 3-6 Credits

This internship provides on-the-job clinical experience in approved settings. Placement is selected based on students' specialty area goals and must be approved by the faculty advisor the semester prior to actual placement. Students must also submit in writing a description of clinical activities available in the field site before the placement is approved. Students will be required to attend a weekly seminar during which time each student will present and/or discuss legal, ethical, multicultural, contemporary, and clinical issues in her/his specialty area.

Counseling Psychology (CNPY)

CNPY 502 Theories of Counseling and Helping Professions 3 Credits

Introduces the theoretical constructs of the primary contemporary counseling psychology theories being used in the counseling profession today. The theoretical constructs will be explored for use for self-reflection and self-development and to serve as the basis for development of psychological maps for understanding purposes of clients' behaviors.

Prerequisite(s): COUN 500 or as corequisite.

CNPY 503 Psychological Development of the Adult and Aging 3 Credits

Surveys psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human adult development and transitions throughout the adult life span. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the adult and aging will be examined.

CNPY 514 Psychopathology 3 Credits

A survey of the study of abnormal psychology. Includes classification, assessment, and treatment and prevention of psychopathology. Characteristics of healthy psychological functioning are examined. Biological, psychological, and sociocultural bases of well-adjusted and maladjusted behavior patterns are considered. Stress, anxiety, and milder forms of psychopathology are considered, as are more severe psychopathological conditions.

CNPY 515 Consultation in School and Agency Settings 3 Credits

This course provides an introduction to school and agency based consultation theories and practices. Contemporary models of consultation are presented with students' emphasis on mental health, behavioral, and systems approach. In addition to the study of conceptual models, the development of skills in the consultation process in school and/or agency settings is emphasized. Students engage in behavioral consultations with consultees in approved placements.

CNPY 516 Advanced Psychopathology 3 Credits

An in-depth study of psychopathology with emphasis on developmental and personality disorders, and physiological disturbances. Includes assessment, classification, and treatment with emphasis on utilization in a variety of counseling and school settings. Biological, pathological, pharmacological bases of mental disorders are introduced and discussed in relationship to specific disorder classifications.

Prerequisite(s): CNPY 514 or permission of instructor.

CNPY 518 Counseling Children, Adolescents and Families 3 Credits

This course will emphasize counselor and consultant behaviors that facilitate the helping process with children, adolescents, and their families. Information and activities will be provided that address age, ethnic, and developmental considerations in counseling children and adolescents. Issues and practices related to crisis intervention will be explored.

Counseling Substance Aware (CNSC)

CNSC 580 Elementary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in an elementary school setting. Students will obtain a minimum of forty (40) contact hours with clients. The course will also provide an historical overview of the school guidance and counseling function. Current practices for assessing, organizing, implementing and evaluating school counseling services will be reviewed. Students will develop knowledge and skills in the development of primary, secondary, and tertiary interventions designed to promote the academic and social development of children of elementary school age. Students will apply knowledge and skills developed in pre-practicum experiences in addressing the needs of school children. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 581 Secondary School Counseling Practicum and Student Assistance Coordinator Practicum 3 Credits

A 100-hour supervised experience in counseling and consultation in a secondary school setting. Includes seminar discussions, interview analyses, videotape observations, and individual supervision with the faculty supervisor. Provides the counselor in training with the opportunity to develop and practice skills and techniques necessary for the effective delivery of counseling services in the secondary school setting. Reviews current practices for assessing, developing, organizing, implementing, evaluating, and reflecting on counseling services as they address the special needs of secondary school students. Students must be supervised by a Substance Awareness Coordinator (SAC).

Prerequisite(s): COUN 515 or COUN 516.

CNSC 590 Counseling Internship I 3 Credits

An internship that provides 300 hours of on-the-job experience, including all activities that a regularly employed staff member would be expected to perform. The internship placement is selected on the basis of the student's career goals. School counselors, student assistance coordinators (SACs) and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the Rider supervisor. The approval and cooperation of the student's superintendent, principal, or other appropriate administrative personnel must be obtained the semester before the counselor candidate's internship is scheduled. Students must be supervised by an SAC.

Prerequisite(s): COUN 585 OR COUN 580 OR COUN 581 OR CNSC 580 OR CNSC 581. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

CNSC 591 Counseling Internship II 3 Credits

The continuation of an internship that provides a 300-hour field experience including all activities that a regularly employed staff member would be expected to perform (n.b., a regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring). The internship placement is selected on the basis of the intern's career goals. School counselors, Student Assistance Coordinators (SACs), and agency counselors who supervise interns determine the structure and the content of the internship in cooperation with the faculty supervisor. Students must be supervised by a SAC. The approval and cooperation of the intern's field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): COUN 590 or CNSC 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the faculty supervisor.

Curriculum & Instruction (CURR)**CURR 501 Coaching Principles and Practices 3 Credits**

This course is an introduction to the profession of coaching for educators. It is designed to fulfill the educational requirements for certification as a Board Certified Coach through the Center for Credentialing and Education (CCE). The CCE competencies for certification provide the basis for course material.

CURR 504 Vocational/Career Development in Educational Settings 3 Credits

This course provides a comprehensive and practical approach to career counseling, coaching, and curriculum design for educators who work in Kindergarten through postsecondary settings. Theories of vocational development and decision making form the foundation for designing career counseling curriculum. The problems and techniques of using college and career information, assessment tools, educational and vocational goal setting, conflict management strategies, and individual and organizational change processes are stressed. Concepts of career/life planning and the interrelationships among life roles, family, ecosystemic influences, and work in a diverse and changing society are explored.

CURR 510 Reflection and Mentoring in Professional Teaching Practice 3 Credits

This course serves as an introduction to professional teaching work in classrooms. The hands-on work in the course complements required classroom observations and reflections. The course uses participants' classroom observations and reflections as the bases for targeted, practical discussions and study on topics such as classroom management, teacher identity and diversity, teaching and content, asking for feedback, and working with mentors.

Prerequisite(s): Permission of Program Director.

CURR 517 Teaching and Learning Number and Operations 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding early number theory. It addresses students' mathematical understanding of representing numbers, relationships among numbers, and number systems; operations and how they relate to one another; and computation. Strong emphasis is placed on the cognitive development of children's thinking in number and operations, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 518 Teaching and Learning Rational Numbers and Proportional Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding rational numbers and proportional reasoning. Content includes a variety of situations involving proportions, for example, real-world problems involving ratios, rates, and percents; geometry involving similarity; algebra involving linearity; and probability involving assigning a probability to an event. Distinguishing proportional situations from those that are not and reasoning proportionally in appropriate situations are emphasized. Emphasis is placed on children's cognitive development of rational numbers and proportional reasoning, and the instructional, curricular, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Practices.

CURR 519 Teaching and Learning Algebraic Reasoning 3 Credits

This course provides an in-depth study of the content and pedagogy necessary to facilitate the transition from concrete arithmetic reasoning to abstract algebraic reasoning. It addresses students' mathematical understanding of equality, variable, generalization, and functions; cognitive development of algebraic reasoning; and the instructional, curricular, and assessment implications for fostering algebraic reasoning in students. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core State Standards for Mathematics Content and Mathematical Practices.

CURR 520 Teaching and Learning Geometric Understanding 3 Credits

This course provides an in-depth study of the content and pedagogy for geometric understanding. It addresses students' mathematical understanding of shapes and their properties, location, transformation of shapes, and visualization; the cognitive development of geometric thinking; and the instructional, curricular, and assessment implications for teaching. Emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 522 Teaching and Learning Measurement and Data 3 Credits

This course provides an in-depth study of the content and pedagogy for measurement, data analysis, and probability. Mathematical content includes units, systems, and processes of measurement; techniques, tools, and formulas to determine measurements; data collection and display; statistical methods to analyze data; and, evaluating inferences and predictions. Emphasis is placed on children's cognitive development of measurement and data, and the instructional, curricula, and assessment implications for teaching. The course includes the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and the Common Core state Standards for Mathematics Practices.

CURR 523 Teaching and Learning Mathematics in the High School 3 Credits

This course addresses issues central to teaching and learning mathematics in the high school; building learning communities, how students learn mathematics, use of worthwhile mathematical tasks, instructional modes, technology options, and assessment to inform instruction. Mathematical topics examined are number and quantity, algebra, trigonometry, geometry, and statistics and probability, and modeling. Strong emphasis is placed on the NCTM Principles of problem solving, reasoning and proof, connections, communication, and multiple representations and on the Common Core State Standards for Mathematics Practices.

CURR 524 Teaching Mathematics in the Middle School 3 Credits

This course has been designed to guide both in-service and pre-service teachers towards growth in teaching mathematics in middle school classrooms, according to the best of current practices. It is accepted that teaching and learning is an ongoing process throughout our careers. Teaching math well requires: a) Deep understanding of the mathematics content, b) Understanding of how students develop mathematical ideas, and c) The ability to shape appropriate learning environments and tasks. Realistically, the process of teaching mathematics, how student learn it, and how to build appropriate learning environments in courses like this one is only the first step towards developing the content and pedagogical skills needed to teach in the 21st century. The objective is to help students construct ideas that take them in the right direction, providing models for the continued long-term learning they will develop with their own classrooms clearly in mind. According to the best of current practice, this involves learning through exploration, inquiry and discovery. As students communicate and then reflect on teaching situations, they will form what has been described as a community of practice, a prototype for how groups of educators join forces, over months and years, to strengthen both their understanding and school practice.

CURR 526 Place Value Instruction: Navigating the Decimal 3 Credits

K-8 teachers examine the theory and practice of K-8 place value instruction during a weeklong course. Incorporating the ideas of the successful CONNECT-ED project, this seminar will examine place value theory and model instructional design that traces children's developmental levels and aligns with national and state standards. Participants will work with peers and experienced University faculty to design longitudinal instructional modules on other math topics. By engaging in this multi-grade design process, teachers will examine new ideas about mathematics, children's mathematical thinking, and mathematics instruction. Participants can earn professional development hours or college credit.

CURR 527 Curricular and Instructional Design for Fraction Understanding 3 Credits

K-8 teachers examine the theory and practice of K-8 fraction instruction during a weeklong course. Based on the successful CONNECT-ED project, this seminar will model how to design fraction instruction that traces children's developmental levels, and aligns with national and state standards. Participants will work with peers and experienced University faculty to design similar instructional activities. By engaging in this multi-grade design process, teachers will examine new ideas about mathematics, children's mathematical thinking, and mathematics instruction. Participants can earn professional development hours or college credit.

CURR 531 Strategies for Curriculum Development, Innovation and Change 3 Credits

This course will address the importance of philosophy, historical precedents, learning theory, developmental theory, emerging social trends and issues, and recent trends in content knowledge as bases for designing and developing the K-12 curriculum. The articulation of curriculum aims and goals, the development and selection of learning experiences, the organization of learning experiences, and plans for evaluating curriculum outcomes are used as steps for developing the curriculum. Students investigate the roles teachers, teacher leaders, supervisors and administrators play in implementing curriculum designs in school settings. Students are expected to demonstrate course understandings through actual school applications and field experiences that are referenced to state and national standards.

CURR 532 Strategies for Curriculum Change 3 Credits

This course will examine organizational skills and knowledge necessary to effect curriculum development and change, K-12. The course will address the socio-political context of curriculum change along with alternative strategies for initiating, implementing and sustaining standards-based curriculum improvements. Topics of study include strategic planning, problem-solving strategies, needs assessments, curriculum alignment, program evaluation, staff development and the organization of staff members for collaborative deliberation and decision making as essential means for promoting successful curriculum change at all levels of schooling. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): CURR 531.

CURR 533 Elementary School Curriculum 3 Credits

A review of principles, curriculum, and methodology in elementary education, examined in the framework of social, cultural, and psychological developments. Recent developments in theory and empirical knowledge are analyzed. Emphasizes developing the content and organization of an integrated curriculum with a concern for individual differences with provision for social environments best adapted to fulfill basic needs and interests.

Prerequisite(s): CURR 531.

CURR 534 Secondary School Curriculum 3 Credits

A survey of the changing aims and programs of the secondary school. General, specialized, vocational, and activity programs are discussed with an analysis and evaluation of recent curriculum developments and projects. Current issues and controversies, in addition to research findings affecting secondary curriculum, are studied.

Prerequisite(s): CURR 531.

CURR 535 Theory and Practices of Bilingual Education 3 Credits

Introduces the rationale and research as a basis for bilingual education as well as the varied and current approaches to implementing programs. Implications drawn from the social, psychological, and linguistic problems of bilingual learners are considered as they apply to the needs, goals, and issues of bilingual/bicultural programs.

CURR 536 Special Studies in Curriculum, Instruction, and Supervision 3 Credits

The content of this course varies for each offering. In-depth treatment of issues, problems, concerns, or developments in curriculum, instruction and/or supervision will be provided. Topics such as global education, teaching and learning styles, classroom management, etc., are announced in advance and serve as the focus of course content.

CURR 538 Assessment of Curriculum and Instruction to Improve the Performance of Teachers and Diverse Learners 3 Credits

This course establishes the implemented curriculum by establishing the relationship between curriculum goals and the instructional strategies needed to realize those purposes. Emphasis will be placed on analyzing and using various instructional models to meet the learning expectations embodied in curriculum goals and core curriculum content standards from pre-school to high school. Students will examine instructional strategies from the perspectives of assessing research findings on effective practices, realizing curriculum standards, adapting the classroom to diverse learner needs, establishing appropriate staff development agendas, and providing forms of supervisory support to optimize learning and achievement. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, and national school leadership standards.

Prerequisite(s): CURR 531.

CURR 541 Assessment and Student Learning 3 Credits

This course provides hands-on opportunities to create and design varied classroom assessments that help teachers align their teaching goals with student learning goals. With a focus on NJ Student Learning Standards across the curriculum content areas and grade levels, assessments will be designed for use in individual teaching practice and with a variety of diverse learners. Topics include designing assignment rubrics and effective essay prompts as well as developing evaluation criteria.

Prerequisite(s): CURR 510, CURR 700.

CURR 548 Curriculum and Instruction for Diverse Learners 3 Credits

This course will examine the curricular and instructional issues that educational leaders must address in accommodating the school program to the needs and abilities of diverse learners. A historical perspective will be developed with an emphasis on how schools have responded to meet the needs of the exceptional child. Legal issues and programmatic trends will be examined and assessed since the inception of the Individuals with Disabilities Education Act. Multicultural issues will be introduced within the context of school and society. The responsibility of the educational leader in fostering a multicultural perspective pertaining to curriculum and instruction, governance, bias and prejudice and school climate and culture will be emphasized. Students will identify and develop curricular possibilities and solutions in school settings to accommodate learners' diverse needs. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards, state adopted core curriculum content standards, professional development standards, standards and national school leadership standards.

Prerequisite(s): CURR 531, CURR 538.

CURR 552 Creative, Ethical Teacher Leadership 3 Credits

In order to be effective, teacher leaders require in-depth understanding of the complex, threat-filled, 21st-century globalized environment that provides the context for their work. They must understand the problems, opportunities, and pressures generated by the current socioeconomic, political, and cultural system of the United States, which is characterized by dogmatism-saturated disputes over the purposes of education and the allocation of resources. In addition, they must appreciate the ways in which the larger forces of globalization influence these national trends and issues. Finally, they must understand the ways in which the principles of wise, ethical, intelligent, and creative leadership can help them and their colleagues in their efforts to maintain and strengthen student learning in these daunting conditions.

CURR 580 Action Research Tchg & Learn 3 Credits**CURR 585 Practicum Conducting Action Rsch 3 Credits****CURR 590 Seminar and Practicum in Curriculum, Instruction and Supervision 3 Credits**

Taken at the completion of all course work in the program. Students study in seminar fashion the current literature and research in the general areas of curriculum, instruction and supervision. Each student is involved in an individualized field experience. Typically the experience involves work with supervisory assistance in a selected segment of the student's school district, or in an approved location. The cooperation of the administrative staff of the student's school district is essential for the effective completion of this project. The instructor is free to observe the project in progress, and to evaluate the completed research project and the finished project paper.

Prerequisite(s): all course work including EDUC 500, permission of instructor.

CURR 592 Internship III 1-3 Credits

The continuation of Internship I, this 1 to 3-credit course is required for those students who were unable to complete the 300-fieldwork hours of Internship I in the fall or spring semester. Students will continue at their Internship I fieldwork site and will be responsible for completing the remainder of their 300-hours. A grade will not be granted in Internship I until the successful completion of Internship III. The approval and cooperation of the intern's agency or school field supervisor for continuing placement must be obtained at the conclusion of the prior semester. Prior to enrollment, students must submit documentation of supervisor permission and a comprehensive plan for fieldwork- hour completion to the clinical coordinator. Clinical coordinator approval is required.

Prerequisite(s): COUN 590 and all other required course work must be completed or in progress and permission of the clinical coordinator is required.

CURR 600 Independent Study and Research 1-3 Credits

Course content varies with academic research interests of students who wish to engage in independent study related to the overall content of curriculum, instruction and/or supervision.

CURR 640 Teaching and Learning Physical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected physical science (physics and chemistry) topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 641 Teaching and Learning Life Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected life science topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 642 Teaching and Learning Earth and Space Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected earth and space science topics aligned with state and national standards. The course will be structured around big ideas identified in standards. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 643 Engineering Solutions to the Challenges of Contemporary Science Issues 3 Credits

This course provides an in-depth study of the content and pedagogy for understanding selected technology, engineering and design topics aligned with state and national standards. The course will be structured around big ideas identified in standards, common misconceptions, and appropriate learning progressions. While addressing the content, emphasis will also be placed on: effective instructional strategies and science practices through the use and study of such practices and strategies.

CURR 644 Teaching and Learning Chemical Science 3 Credits

This course provides an in-depth study of content and pedagogy for understanding selected chemistry topics aligned with Next Generation Science Standards (NGSS). The course will be structured around big ideas identified in NGSS, common misconceptions, and appropriate learning progressions. While addressing the chemistry content, emphasis will also be place on: effective instructional strategies and science practices for the K-8 classroom through the use and study of such practices and strategies. Participants will engage in experiences with the states and properties of matter, develop models of the atom, and gain an understanding of the major principles of chemistry. The course will focus on states of matter, characteristic physical and chemical properties of matter, and chemical and physical transformations of matter.

CURR 650 Understanding Gifted Learners 3 Credits

The course explores the ways in which the gifted and talented can differ from more typical learners in terms of their cognition, social-emotional dimensions, behavior, and long-term development. It focuses on theories of intelligence, differing conceptions of giftedness and talent development, and learning processes. Some specific topics include underachievement, perfectionism, dual exceptionality, gender issues, and underserved populations. The course also addresses the ways in which gifted education can evolve to fit the demands and opportunities embedded in complex, 21st-century socioeconomic, cultural, and technological contexts.

CURR 652 Differentiating Instruction for the Gifted and Talented 3 Credits

This course provides the rationale and practical strategies for effective instructional differentiation for the gifted and talented within and beyond the regular classroom. Participants will learn how to differentiate within subject areas by adjusting content, process, product, and learning environment to meet the needs of learners. They also will explore the nature and nuances of differentiation by ability, readiness, and interest, as well as the implications of instructional differentiation for formative and summative assessment. Throughout the course they will design and share examples of differentiation including tiered assignments, complex instruction, independent studies, graphic organizers, and learning contracts.

CURR 654 Innovative Instructional Strategies for Gifted Education 3 Credits

This hands-on, experiential course immerses participants in simulations and analyses of new and revised student-centered teaching models and strategies that are conducive to creative and critical thinking, advanced content mastery, and the invigoration of students' interests. Participants analyze the potential of each model/strategy while considering the ways in which it can apply to content learning in various subject areas/domains. The course also engages participants in studying the fundamental principles of program design in gifted education so they can make the best possible use of the instructional models and strategies.

CURR 656 Creative, Interdisciplinary Thinking 3 Credits

This course facilitates creative thinking through the exploration of important insights from a wide variety of disciplines in the social sciences, humanities, natural sciences, and education. The process of creative association enables participants to combine diverse, remotely associated constructs to create new products and processes. Applications of interdisciplinary thinking to curriculum and instruction are explored. These applications include novel methods for curriculum integration, discovery and development of children's interests, and instructional modifications for the gifted and talented. Exploration of concepts and processes in multiple academic domains and professional fields also provide appreciation for the domain-specific natures of giftedness and creativity.

CURR 660 Authentic Data in the Elementary STEM Classroom. 3 Credits

Young learners can think deeply about content and make meaningful connections between their experiences, natural phenomena, and authentic data when teachers integrate data in purposeful ways. In this course, teachers construct student-centered STEM investigations integrating real-world scientific and mathematical data and build their understanding of the theoretical basis for this work. Participants gain knowledge of STEM resources, learn to access entry points for STEM in elementary classrooms and foster engaging contexts, like engineering, coding, and NASA mission exploration. Teachers explore the synergies between Common Core State Standards and Next Generation Science Standards for a productive and exciting learning environment that prepares students for ongoing interest in STEM. This course is recommended as a foundation for the STEM certificate program.

CURR 661 Authentic Data in the Secondary STEM Classroom 3 Credits

Middle and High School students are capable of deep sense making when teachers utilize engaging STEM classroom practices to teach content with authentic data connections. In this course, teachers learn to apply research-based best practices central to today's classrooms. In a collaborative professional learning environment, they build knowledge of resources for accessing, analyzing, and making use of authentic data in meaningful activities. Coursework includes planning student-centered lessons that integrate data, building cultural relevance with engaging phenomena, and developing meaningful assessments for STEM activities. Participants identify how to integrate engineering design into the STEM classroom and learn how to represent the Nature of Science as students develop conceptual understanding and apply critical thinking to real-world decisions. A library of content rich lessons becomes available to all participants through a shared online community. This course is recommended as a foundation for the STEM certificate program.

CURR 662 Eyes on Earth: Teaching Earth Science from Space (PK-8) 3 Credits

This course will take participants through a journey about space exploration and specific NASA missions that examine components of earth. Participants will learn science content grounded in Earth's Lithosphere, Hydrosphere, Atmosphere, and Biosphere. By learning to use authentic data from NASA and other sources participants will experience an exploratory approach to learning about the Earth, and then bring these experiences to their own classrooms. Teachers will utilize several web-based tools and real-time data along with the three-dimensional learning in the Next Generation Science Standards to create lessons that can be used directly in the classroom.

CURR 663 Lessons from the Ocean: Science on the Water Planet (Grades 2-12) 3 Credits

Bring the ocean into your classroom by using Earth's waters as a context for standards-based STEM content. The ocean is critical to the functioning of the Earth system, and is an authentically integrated context for learning about topics such as density, weather and climate, heat transport, environmental issues, biogeochemical cycles, mathematics, and much more. Access a myriad of data sets to apply science concepts and make connections between the ocean and atmosphere, living and nonliving parameters, and life on land, as well as in the deep sea. Use the context of the ocean to teach Next Generation Science Standards topics with deep understanding and meaning for learners.

CURR 664 The Arts in STEM: Advancing Meaningful Integration (K-12) 3 Credits

Apply art in the context of exciting STEM concepts and learn to integrate art, science, math, technology, and engineering in more meaningful ways in your classroom. At the core of the STEM Education movement are critical thinking, creativity, problem solving, and authentic learning environments that engage diverse students in meaningful ways with content. The many mediums for art and artistic expression are a valuable component of communication and expression. Scientists and researchers at NASA and across the globe use myriad forms of art in their work. This course invites students to take a close look at the incorporation of art in the STEM classroom and provides resources, exemplars, and access to collaborative support for arts integration.

CURR 665 Climate Change with NSF SPRINTT 3 Credits

Award-winning curriculum and eloquent, online student investigations help students study science concepts emphasized in the Next Generation Science Standards, in the context of Earth's Polar Regions to better understand the complexity of Earth's climate and how it is changing. View the Earth using real scientific data from satellites and western researchers. Then, consider the lens of indigenous peoples of the Arctic. Examine tons of data and changes in ice, permafrost, weather patterns, biological change, and more as you conduct research with simple-to-use, web-based instructional tools, using authentic data sets and models to study our planet's past, present, and future climate. Interdisciplinary investigations address many Common Core State Standards in reading, writing, science, and technical subjects as well as mathematics in the context of climate science.

CURR 666 Exploring Mars: A New Twist on Science (or Math) 3 Credits

Use a wealth of data sets and technological tools to explore and understand features of Earth's neighbor, the Red Planet. Look for and study the physical and chemical evidence of water and ice; compare erosion patterns on Mars and Earth; and make inferences about the planet's history as you study both its geologic features, including volcanoes and craters, and the physics of the atmosphere. Teach Next Generation Science Standards topics in Earth, physical, and chemical science integrating mathematics, in the context of Mars using recent data from Curiosity Rover and other missions.

CURR 667 Physical Science in Motion: Classroom Applications 3 Credits

Physical science, when applied, makes tough-to-understand concepts easy and fun. Participants learn to solve problems relating to one-dimensional motion; become acquainted with and apply Newton's Laws of Motion and equilibrium of forces; learn about constant acceleration and gravitational acceleration; investigate concepts in aerodynamics; and learn about two-dimensional motion. Participants will use free, simple-to-use, software simulations from NASA Glenn Research Center, which help to present these concepts for you, and, then, your students, in the context of aeronautics, including airplane design, rocketry, sports, and more. A carefully developed resource page provides access to excellent resources and engaging activities for implementing course content in your classroom with important connections to Next Generation Science Standards and Common Core mathematics.

CURR 668 Coding, Robotics, and 1:1 Devices 3 Credits

Learn applications of Coding as a mathematics pedagogy, explore opportunities for Robotics, and learn cutting-edge implementation of One-to-One Devices (1:1) in K-12 classrooms. Participants learn about and explore best practices in the newest learning pedagogies and technologies. Whether you are already involved, or looking to integrate these cutting-edge tools and strategies for the classroom, you will begin to expand your reach for enhancing student learning. Scaffolded to allow success at all grade levels, Coding, Robotics, and 1:1 Devices offers resources for application into elementary, middle, and high school. Participants will interact with no-fee computer programming, robotics opportunities, and the latest uses of devices. All participants have the opportunity to work with innovative technologies and interact with talented educators, practitioners and special guests who are already making a difference in K-12 classrooms.

CURR 669 Culturally Relevant Pedagogy in the STEM Classroom 3 Credits

Classrooms comprise individual learners, each bringing their own culture and experiences to the learning environment. The value and strength of diversity has become increasingly described in educational literature. This course introduces teachers to the curriculum and pedagogical issues relevant to race, language, gender, and socio-economic differences. Participants apply content and pedagogy involving science and mathematics contexts for effective learning. STEM activities will integrate meaningful, engaging practices for teaching diverse learners. The course is differentiated for elementary and secondary school educators to provide relevant connections, to be directly applied, in each participant's classroom.

CURR 670 Life and Marine Science: Tracking Live Marine Animals 3 Credits

Follow marine animals (e.g., polar bears, sea turtles, sharks, and whales) in real-time, and apply life and Earth science topics to the ocean. Study topics such as ecosystems, biodiversity, cell structures, food webs, and conservation, as you make connections to ocean currents, seafloor features, density and more. Discover the importance of the ocean to humans, as well as our impacts, both positive and negative, on marine environments. The in-depth use of data lends itself to Next Generation Science Standards by integrating instructional technology with life, Earth and physical science.

CURR 671 Life in Space: NASA ISS and Astrobiology 3 Credits

The International Space Station (ISS) is an amazing undertaking comprising technology, engineering, science and math—the perfect context for exciting students for learning. NASA research leads to technological advances on Earth and in human space exploration. As NASA plans for manned missions to Mars, scientists explore our solar system and beyond for determining if and where life could exist. Extremophiles are fascinating for teaching Earth science in a context for astrobiology research. The course explores how space travel impacts the human body; growing food in space; engineering protection from radiation, and searching for habitable environments. With its application of subject matter, it offers excellent resources and interactions with NASA scientists, and data for educators to bring the exciting context of space travel to the classroom.

CURR 672 Math Connections to STEM Education 3 Credits

The course introduces a wealth of applied mathematics exercises and activities relevant to integrated STEM assets and science activities. Some are in the realm of topics seen in Earth and Space science and physics. Live presenters break down authentic examples and projects, and demonstrate to educators how problems incorporate Common Core State Standards-based mathematics with applications that meet Next Generation Science Standards performance expectations. Educators survey math and science examples and tools as the course promotes the use of applied mathematics in science, or science in mathematics, to meet content goals in the classroom.

CURR 673 NASA Astronomy and Space Science 3 Credits

Harness your students' enthusiasm for space and astronomy by using astronomical images to enrich your physical, Earth, and life science courses. Measure the speed of an asteroid, learn about erosion on Mars, and see the tracers of life that are visible from space. In this course, we explore the many ways in which real data from NASA's space science and astronomy missions can be used to teach math and science content in your classroom, meeting science and math standards in Next Generation Science Standards and Common Core State Standards. Through the use of cutting-edge technology tools, and with a NASA scientist visiting our class, you will not only learn more about the universe, you will learn how to bring the universe into your education context.

CURR 674 NASA Physics for Real Beginners: Earth, Moon, and Space 3 Credits

Gain an introduction to physics in this conceptual course that uses NASA's space initiatives as the context for content. Learn about gravitation between celestial bodies, how to get a satellite into orbit, what it takes to blast off into space, and more. This course will discuss these and related topics while exploring NASA content related to space and the Hubble Space Telescope and Kepler Missions. Bring cutting-edge examples to your classroom while addressing Next Generation Science Standards performance expectations.

CURR 675 Reading and Writing in the Science Classroom 3 Credits

Discuss and analyze the ways that literacy and science connect in the science classroom, and highlight how reading and writing can be used to increase students' understanding of science content. Focus on how to integrate important literacy skills from Common Core State Standards in your science and STEM classroom to address content standards from Next Generation Science Standards. Cutting-edge strategies and well-founded principles pave the way to success with non-fiction reading material. The manner in which information and scientific content is presented shapes student success, not just for reading, but student writing, organization, and presentation.

CURR 676 The E in STEM: Meaningful Content for Engineering 3 Credits

Learn how to use engineering to make your classroom come alive. Bridge and teach math and science concepts through exciting applications in the Engineering Design Process where you and your students design, test, and evaluate models and real-life applications. Activities are hands-on and emphasize the reciprocities between science, technology, engineering, and mathematics in formal design challenges. Educators enrich classroom curriculum with elements of design in science, mathematics, or technology activities, addressing important Next Generation Science Standards' engineering design practices.

CURR 677 WDLC - Weather Data Learning Center 3 Credits

Use weather data to teach and learn math. This course teaches content in a math curriculum that uses weather data. Weather Data Learning Center demonstrates increases in student performance in grade 4 mathematics. Collect, access, and interpret current real-time imagery, maps and data. Make connections from weather to learn Common Core-based mathematics using various STEM pedagogical strategies. Learn the basics of clouds, air masses, humidity, fronts, pressure, jet stream, and climatic patterns as you apply these ideas to math concepts such as measurement, fractions, number sense, data collection, and analysis.

CURR 678 Action Research in the STEM Classroom 3 Credits

A Capstone Course requirement "option", this course may be part of joint Master's Degree programs, or Endeavor's "5-course" certificate program earning Research Distinction and an award.

CURR 679 Practicum in STEM Leadership 3 Credits

Share your knowledge of STEM teaching and learning with colleagues in your building, district, or region.

CURR 680 STEM Leadership Seminar 3 Credits

The course contains STEM pedagogical content knowledge, incorporating authentic data and using technology as a tool for learning. The course provides a springboard for cultivating problem solving skills, inspiring student research projects, and integrating STEM methods and essential principles addressed in new standards.

CURR 681 Chemistry in the STEM Classroom 3 Credits

In this course, the many facets by which even the layman can come to appreciate chemistry in the world will be explored; be it in the materials that make up your clothes, the technology that created the age of plastics, or the chemicals in your brain that tell you how to feel as you read these words. A wide array of topics based on 'grocery-store' science will be introduced, allowing you to get your hands in the chemistry without the need of expensive materials or lab equipment.

CURR 682 Climate Science: Socioscientific Issues in the STEM Classroom 3 Credits

Socioscientific issues are important avenues through which to teach scientific literacy and to create the next generation of critical thinkers and sustainable solution engineers. Anthropogenic climate change is one of the most complex and critical issues the global community faces today. Understanding climate change and the scientific, social, and economic ramifications is crucial for science pedagogues. This course examines the ideas of socioscientific issues and critical thinking in science education and how they can be taught through NGSS-aligned global change pedagogies that highlight climate and energy literacy. Pedagogues will learn to utilize authentic data resources that elucidate the story of our changing climate and think critically about how to implement data into their teaching. The philosophical, ethical, and scientific basis of these problems and their solutions will be discussed.

CURR 700 Educational Foundations for Inclusive Practices 3 Credits

This course provides psychological and interdisciplinary perspectives on teaching and learning. Within the theme of optimal development of creative intelligence, and in concordance with important NJ and national professional standards, candidates will use these perspectives to begin their career-long processes of reflective professional development. More specifically, the course develops knowledge, skills, and dispositions pertinent to (a) child and adolescent development, (b) learning theories, (c) learner diversity, (d) classroom management, (e) career readiness skills, (f) philosophical and historical perspectives on education, (g) sociocontextual and interdisciplinary influences on education, and (h) higher-order, creative and critical thinking. The emphases on student development and learner diversity entail in-depth investigation of the following subtopics: the philosophical, legal, and historical foundations of special education; the characteristics of students with disabilities and learning strengths; inclusive practices; professional partnerships for support of diverse learners; and strategies for modification of curriculum content and materials aligned to NJ Student Learning Standards, learning environments and processes.

CURR 702 Early Literacy Development for Diverse Learners 3 Credits

This course addresses current strategies for teaching beginning learners' vocabulary, comprehension, composition, and language study. It addresses strategies for the development of literacy for all learners ranging from the gifted and talented to those with learning disabilities or other special needs. The course develops proficiency with the management of literacy instruction for content areas in general education in preschool and primary grades and planning aligns with NJ Student Learning Standards. It provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on literacy instruction in inclusive classrooms.

Prerequisite(s): CURR 700.

CURR 703 Inclusive Literacy Practices Across Content Areas 3 Credits

This course addresses varied literacy strategies for teaching diverse adolescents across content areas in secondary schools. Professional educators use a variety of instructional methods, curriculum unit/lesson planning, and assessment strategies to help diverse students actively construct their own learning as well as critically access and assess new information. Through in-class workshops and discussions, reading, group and individual work, the course uses various methods, models, and strategies for integrating literacy for diverse adolescent learners across settings and subject matters aligned with NJ Student Learning Standards. The course also provides candidates with the pedagogical literacy proficiency necessary for the development of their students' career readiness skills (employability skills, employment readiness through enhanced literacy capacities). Field experiences include observation and interaction in classes focusing on various literacy strategies in inclusive classrooms.

Prerequisite: CURR 700.

CURR 704 Inclusive Methods for Teaching English Language and Theater Arts 3 Credits

This course provides experience with various methods of teaching and learning integrated English language and theater arts and with diverse adolescent students. Teacher candidates explore methods, classroom management, and strategies for teaching and learning through reading/literature, language development, writing/composing processes, representing and performing, speaking, listening, and viewing/creating media. Candidates design curriculum and assessments using NJ Student Learning Standards for Language Arts Literacy and Theatre and Visual Arts curriculum standards. Aligned with NCTE's Guidelines for the Preparation of Teachers of English Language Arts, the course uses collegial collaboration during the review of student work, co-planning curriculum and assessment in the development of employability skills such as collaborative planning, teaching, and assessment review. A field-based middle school partnership embedded in the course allows candidates to work with a range of diverse students and explore implications for teaching, learning, and providing access to the general curriculum for all students.

CURR 705 Inclusive Methods for Teaching Social Studies 3 Credits

This course addresses the practical and theoretical aspects of teaching social studies to diverse adolescents in secondary schools. Using the NJ Student Learning Standards in Social Studies, candidates will prepare and design curriculum and assessment for students in various learning environments and with diverse learning needs. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying social studies curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 706 Inclusive Methods for Teaching Science 3 Credits

Classroom interaction analysis systems are used in the study of the instructional processes that support inquiry-based science learning. Candidates develop their own repertoires of teaching strategies, classroom management strategies, and awareness of career requirements in STEM fields. Emphases are on the investigation and interpretation of recent curriculum developments in NGSS and NJ Student Learning Standards in Science as well as the use of lab-based processes in science learning. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying science curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 707 Inclusive Methods for Teaching Mathematics 3 Credits

This course critically analyzes the aims of teaching mathematics in secondary schools. Research pertaining to mathematics teaching and learning is analyzed. Demonstration lessons including reflective teaching and individual and group processing are created and carried out to clarify teaching, mathematics curriculum planning using NJ Student Learning Standards in Mathematics, the organization of materials and subject matter, assessment processes classroom management strategies, and awareness of career requirements in STEM fields. The course also examines the characteristics of secondary students with disabilities as well as strategies for modifying mathematics curriculum planning, learning environments, and instructional materials to address diverse learning needs. The clinical, field-based component of the course requires candidates provide instructional support for diverse learners.

CURR 710 Math Methods for the Inclusive Elementary Classroom 3 Credits

This course introduces candidates to effective mathematics instruction based on learning trajectories of diverse learners in preschool and elementary classrooms. In alignment with NAEYC and NCTM and NJ Student Learning standards, emphasis is placed on planning and implementing an inquiry-based approach with hands-on experiences, use of technology, and traditional and non-traditional assessment strategies. Students also explore positive models of classroom management and environment design to support diverse learning needs. The course provides candidates with the pedagogical proficiency necessary for the development of the mathematical dimensions of their students' career readiness skills. Field experiences consist of classroom observations with instructional analysis and assessment of children's mathematical thinking.

CURR 711 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. The existing methods course in Dance for beginning teachers is cross-listed with DAN 450.

CURR 712 Inclusive Methods for Teaching Music 3 Credits

This course provides experience with various methods of teaching and learning music K-12. Course readings and field observations focus on inclusive teaching practices in music and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Music/Visual and Performing Arts.

Prerequisite(s): CURR 700, CURR 703, CURR 720.

CURR 713 Inclusive Methods for Teaching Art 3 Credits

This course provides experience with various methods of teaching and learning Art K-12. Course work and fieldwork focus on inclusive teaching practices in art and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Visual and Performing Arts.

Prerequisite(s): CURR 510, CURR 700, CURR 703.

CURR 714 Inclusive Methods for Teaching Health and Physical Education 3 Credits

This course provides experience with various methods of teaching and learning Health and Physical Education K-12. Course work and fieldwork focus on inclusive teaching practices in health and physical education and explore implications for teaching, learning, and providing access to the general curriculum for all students across diverse settings. Candidates also design curriculum and assessments using NJ Student Learning Standards for Comprehensive Health and Physical Education.

Prerequisite(s): CURR 510, CURR 700, CURR 703.

CURR 715 Inclusive Elementary Science, Arts, & Social Studies Teaching 3 Credits

This course provides aspiring elementary school teachers with a variety of developmentally appropriate options for designing, implementing, and evaluating curriculum and instruction in science, social studies, and the arts. Using NJ Student Learning Standards, emphasis is placed on inclusive practices and differentiation of instruction (e.g., modifying curriculum planning, learning environments, and instructional materials, content, processes, and products), curriculum integration, thematic unit and lesson planning, various teaching strategies, hands-on learning experiences, inquiry learning, career readiness skills, higher-order thinking, reflective practice, and various assessment strategies. Other facets of teaching also are addressed or reviewed in the course. These include the characteristics and needs of students with disabilities motivation, classroom management, and becoming a team member of a school faculty. Candidates also refine their pedagogical knowledge and skills by participating in the modification of instruction to meet the needs of diverse learners in nearby school settings.

CURR 720 Inclusive Curriculum Design & Instruction 3 Credits

This course offers an overview of curriculum designs and their relation to teaching, learning, assessment, and providing curriculum access for all students. The course assumes that professional educators use a variety of instructional methods, curriculum unit/lesson planning and assessment strategies to help a variety of diverse students, especially adolescents, actively construct their own learning and enjoy access to the general curriculum. Using NJ Student Learning Standards, candidates acquire skills in instructional planning, classroom management, and the development of career readiness skills along with required field-based observations and experiences.

Prerequisite(s): CURR 700, CURR 703.

CURR 770 Clinical Experience and Seminar in Teaching 9 Credits

This course, designed for those seeking teacher initial certification, requires full-time supervised daily participation in a school setting with diverse students including students with disabilities. These experiences test and strengthen the translation of educational theory and research into meaningful teaching practice. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 771 Supervised Clinical Experience in Teaching 9 Credits

The Supervised Clinical Experience in Teaching is available only to candidates seeking initial teacher certification and who currently work full-time teaching. Candidates may apply to the program for Supervised Clinical Experience in Teaching by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area and under university supervision for a semester. On-campus or site-based seminar accompany the clinical experience and emphasize the reflective development toward professionalism through sharing and analyses of how to support the learning needs of diverse students and connecting clinical experiences with content knowledge and pedagogical knowledge from prior course work. The clinical experience is augmented with a series of additional seminars that include the following: introductory/ orientation seminars prior to the beginning of the semester; strategies for designing inclusive education practices and positive behavioral supports, assistive technology for diverse learners, transition planning; classroom management strategies; awareness of methods for strengthening student achievement and career readiness.

CURR 772 Clinical Experience in Teaching Seminar 3 Credits

The Clinical Experience in Teaching Seminar is available only to candidates completing teacher certification through the Alternate Route program and who currently work full-time teaching. Candidates may apply to the program for the Clinical Experience in Teaching Seminar by providing evidence of successful, full-time teaching experience, planning, and evaluation. Once approved, candidates continue teaching within the appropriate certification area, attend and participate in on-campus seminar, and complete and submit the edTPA required for NJ certification.

Prerequisite(s): CURR 510, CURR 700, CURR 541 and Permission of Program Director.

Cybersecurity (CYBR)

CYBR 500 Beyond Code: Cybersecurity in Context 3 Credits

At its core, cybersecurity is a technical, computing-based discipline. This course explores the most important non-technical elements that shape the landscape upon which cybersecurity problems emerge and are managed. Students will assume different lenses – legal, economic, political, societal, and ethical – to better understand how different forces enable and constrain security technologies and policies. Specific topics include ethical and societal issues, policy-making, business models, legal frameworks, national security considerations, and the roles of users, industry, and government which includes the military.

CYBR 510 Cryptography for Cybersecurity 3 Credits

This course focuses on both mathematical foundations and practical applications of cryptography. The course discusses asymmetric and symmetric cryptography, Kerckhoff's Principle, chosen and known plaintext attacks, public key infrastructure, authentication protocols. The course includes a close examination of various cryptosystems including the RSA, DES, AES, Elliptic Curve, and SHA family cryptosystems. Topics include a brief history of cryptography, ciphers, digital signatures, hash functions, message authentication codes, secure e-commerce, and digital cash.

CYBR 520 Managing Cyber Risks 3 Credits

In the context of risk management, this course examines the motivating reasons behind cyber attacks and data breaches. Various risk management frameworks to measure organizational cybersecurity threats and vulnerabilities are presented. Further, students will model cybersecurity risks, using both qualitative and quantitative risk assessment methods. Students also will articulate the organizational consequences of the assessed risks along with mitigating strategies to reduce or eliminate the cyber risks.

CYBR 530 Mobile Computing and Wireless Security 3 Credits

This course examines the cybersecurity of mobile computing and wireless networking, especially the vulnerabilities, threats, and mitigation techniques. Topics include: mobile malware, wireless communications infrastructure vulnerabilities and associated mitigation techniques, mobile platform vulnerabilities and associated mitigation techniques, mobile app vulnerabilities and associated mitigation techniques, mobile device vulnerabilities and associated mitigation techniques, and organizational policies for mobile computing and wireless networking.

Prerequisite(s): CYBR 510.

CYBR 540 Secure Coding for Cyber Defense 3 Credits

This combined course of lecture and hands-on labs follows the philosophy and principles of secure and robust programming, using the Java language. The eight design principles that govern secure and robust coding will be emphasized with follow-on coding labs to apply these design methods to real-world problems. Design choices, good or bad, drive implementation in coding, so designing software security from the beginning will be practiced. Common software vulnerabilities and static analysis of code will be examined, as well as informal, formal, and ad hoc coding methods will be differentiated. Prior experience with the Java programming language is highly recommended.

CYBR 550 Cybercrime and Digital Forensics Analysis 3 Credits

Digital forensics is a hybrid science that offers a systematic approach for conducting comprehensive investigations to solve cybercrimes. In this course, students will learn the principles and techniques of digital forensics investigations to ensure court admissibility of electronic evidence, including the legal and ethical implications. Students also will also gain hands-on experience with performing proper forensic investigations with different file systems (e.g., Unix/Linux, Mac, Windows, Android) and writing appropriate forensics analysis reports.

CYBR 560 Usable Privacy and Security 3 Credits

There is growing recognition that technology alone cannot provide all of the solutions to security and privacy problems. Human factors play an important role, and it is important for security and privacy experts to have an understanding of how people might interact with the systems they develop. This course explores a variety of usability and user interface pitfalls related to privacy and security and provides experiences in designing studies aimed at helping to evaluate usability issues in security and privacy systems.

Prerequisite(s): CYBR 500.

CYBR 570 Special Topics in Cybersecurity 3 Credits

This course is used as a general placeholder for one time offerings and new courses that have not been assigned a permanent designation. The course will cover advanced and emerging topics of current interest in cybersecurity. This course code may be taken more than once as long as the topic offered is different each time.

Prerequisite(s): Permission of instructor.

CYBR 590 Independent Research and Study 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of instructor.

CYBR 591 M.S. in Cybersecurity Internship 3 Credits

The course is part of the capstone requirement for the M.S. in Cybersecurity. The course will have students complete an internship, self-evaluation, and a project related to their experience working in a cybersecurity related position. Permission of instructor.

CYBR 600 Software Vulnerability and Malware Analysis 3 Credits

This combined course of lecture and hands-on labs covers both the art and science of discovering software vulnerabilities and malware. Beginning with the foundational techniques used to analyze both source and binary code, this course will examine current threats and evaluate the actions needed to prevent attackers from taking advantage of both known and unknown vulnerabilities. The course will cover passive and active reverse engineering techniques in order to discover and categorize software vulnerabilities and malware, create workarounds to better secure the system, and demonstrate security solutions that provide protection from an adversary attempting to exploit the vulnerabilities. Techniques covered include the use of static analysis, dynamic reverse engineering tools, and fault injection to better understand and improve the security of software. Prior exposure to Intel assembly is helpful, though not required.

Prerequisite(s): CYBR 540.

CYBR 610 Cloud Computing Security and Privacy 3 Credits

This course focuses on the security and privacy issues in Cloud Computing. While the Cloud Computing paradigm gains in popularity, there are many unresolved cybersecurity issues related to confidentiality, integrity, and availability of data and computations involving the Cloud. This course examines Cloud Computing models and the associated risks, threats and vulnerabilities; focuses on sound architectural design for secure and private computing; and explores practical applications of cloud computing and the Internet of Things (IoT).

Prerequisite(s): CYBR 530.

CYBR 620 Blockchains and Cryptocurrencies 3 Credits

This combined Lecture-Lab course covers the mathematical, computational, and economic foundations of Blockchain technology, and exposes students to the societal and legal implications of a decentralized monetary system based on consensus. Students learn what cryptocurrencies are, why it is possible to make money using cryptocurrencies such as bitcoins, and why it is so volatile. Through hands-on practice with the bitcoin and Ethereum-based software platforms, students will program secure decentralized applications (Dapps), develop an understanding of cryptographic principles, and reexamine critical economic questions.

Prerequisite(s): CYBR 510.

Dance and Movement Therapy (CNDT)

CNDT 584 Counseling and Dance/Movement Therapy Practicum I 3 Credits

Students develop clinical observation skills by being active participant observers in clinical field settings. Supervision class will focus on understanding the professional, legal, and ethical responsibilities of being a dance/movement therapist in clinical settings from a multicultural perspective. Issues pertaining to professional identity development will be addressed.

CNDT 585 Counseling and Dance/Movement Therapy Practicum II 3 Credits

A supervised field experience in counseling and dance/movement therapy techniques. In this second semester of practicum, students will continue to advance their clinical skills by co-leading dance/movement therapy sessions with field supervision. The goal is for students to facilitate entire sessions by the end of the semester. The course will include seminar discussions, observations and analysis of the therapeutic process of dance/movement therapy sessions and individual supervision with the instructor. A total of 100 field hours is required with a minimum of 40 direct contact hours with clients. The approval and cooperation of the fieldwork agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): CNDT 584.

CNDT 590 Counseling and Dance/Movement Therapy Internship I 3 Credits

This course is one of two internship courses required in the student's final year. It fulfills 350 of the internship hours required by the American Dance Therapy Association and by CACREP. Students will be at a clinical site approved by faculty, with a supervisor who meets all CACREP standards and is a board certified Dance/Movement Therapist. Supervision class will support students in the clinical setting and in effectively utilizing counseling and dance/movement therapy knowledge and skills, including clinical appraisal, treatment planning, and documentation for dance/movement therapy. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement.

Prerequisite(s): CNDT 585. All other required course work must be completed or in progress and permission of the Rider supervisor must be obtained; any exceptions must be approved by the instructor.

CNDT 591 Counseling and Dance/Movement Therapy Internship II 3 Credits

The second semester of the internship that fulfills the remaining internship hours required by the American Dance Therapy Association and CACREP. Students will be at a clinical site approved by faculty, and will engage in all activities that a regularly employed staff member would be expected to perform. A regularly employed staff member is defined as a person occupying the professional role to which the student is aspiring. Students will be under the field supervision of a supervisor who meets all CACREP requirements and is a Board Certified Dance/Movement Therapist. Supervision class will provide opportunities for students to analyze their practice, reflect on their progress as clinicians, and develop skills to internally self-evaluate their effectiveness as counselors and dance/movement therapists. The approval and cooperation of the intern's agency or school field supervisor must be obtained the semester prior to the actual placement. **Prerequisite(s):** CNDT 590 and all other required course work must be completed or in progress and permission of the faculty supervisor must be obtained; any exceptions must be approved by the instructor.

CNDT 600 Body Mind Integration through Movement I 0 Credits

This is a movement laboratory class to explore how dance and movement reflect and affect physical, cognitive, mental, emotional, and spiritual states. Students learn to attune to their bodies in movement and develop awareness of the bidirectional interactions between body and mind.

CNDT 610 Dance/Movement Therapy Theory and Practice I 3 Credits

This course covers the foundational principles, theories, and techniques of dance/movement therapy and will examine the social and cultural foundations of dance as art and medium for growth, change, and healing. Works of dance/movement therapy pioneers and the evolution of dance/movement therapy practices will be explored didactically and experientially.

CNDT 612 Movement Observation, Analysis, and Assessment 3 Credits

This course is designed to provide students with the language and skills to observe, describe, analyze, and document human movement patterns and behaviors using Laban Movement Analysis. The didactic and experiential format of this class will allow students to embody movements and make connections to clinical practice with various client populations. Students will learn to translate movement based terminology and dance/movement therapy goals into clinical language used in treatment plans and progress notes.

CNDT 620 Clinical Applications of Dance/Movement Therapy 3 Credits

Group and individual dance/movement therapy practices in various clinical settings are addressed: psychiatric hospitals, addiction recovery programs, therapeutic schools for children with emotional and behavioral problems, developmental disabilities, and special needs; hospices; and hospitals. Students develop their own working theoretical model of dance/movement therapy to guide their work as emerging dance/movement therapists.

CNDT 700 Body Mind Integration through Movement II 0 Credits

The second semester of the movement laboratory class focuses on the use of mindfulness practices and Authentic Movement methods for further develop body-mind awareness, to experience and observe movements simultaneously as internal and external experience, and to decipher the nature of knowledge and meaning inherent in dance and movement.

Prerequisite(s): CNDT 600.

CNDT 710 Dance/Movement Therapy Theory and Practice II 3 Credits

In this didactic and experiential course, select theories from psychology, counseling, psychotherapy, and neuroscience are studied in order to identify the healing and transformative factors of the creative arts therapies. Some of the topics covered in this course are: psychodynamics and object relations theories; intersubjectivity; symbolism and metaphor; psychology of creativity; and neuroscience in dance/movement therapy.

Prerequisite(s): CNDT 610.

Early Childhood Ed-GR (ECED)

ECED 532 Families, Community, and Diversity in Early Childhood Education 3 Credits

This course addresses the role of parents of young children within the context of school, home and society, as well as the influence of culture, traditions and current issues in early childhood education. Students will explore the efficacy of parenting techniques and behaviors on child development in the early years, including cognitive growth, emotional and social well-being and physical health. Students will investigate strategies for fostering home-school partnerships that enhance child development and educational success, as well as the influence of community, culture and socio-economic status on families and schools throughout our world. In addition, this course addresses current issues and challenges in the early childhood profession including inclusion of children with special needs, advocacy for quality care and education for all young children, and any other subject that might arise - either from the lives of children and families, teachers' professional development, or community agencies. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

ECED 550 Development Methods and Assessment in Early Childhood Education 3 Credits

The focus of this course is developmentally appropriate and culturally responsive curriculum and teaching P-3 settings as delineated in the guidelines of the National Association for the Education of Young Children. Students will learn how to make curriculum and teaching decisions based on knowledge of child development, content area, curriculum content standards, and home and community cultures. In order to meet the ever-changing needs, interests, and growing strengths of individual children, careful observation and assessment provides teachers with information on which to base adjustments of teaching plans. This course will provide opportunities to deepen understanding of child development; gain an appreciation for the professional responsibility of ongoing assessment of children; and, develop the necessary skills to gather, record, and interpret information in a deliberate and reflective manner. Required: 6 hours per week field placement in a Preschool classroom. A cumulative GPA of 2.75 is required.

Prerequisite(s): EDU 106 and EDU 206.

Education-GR (EDUC)

EDUC 500 Introduction To Research 3 Credits

This course will provide students with the tools to evaluate the claims and uses of research related to teaching, counseling, and psychology. Students will learn how to find and critique the literature, and will be able to conduct some of their own basic evaluative research to assess the efficacy of their practice and programs. At the conclusion of the course, students will have developed an understanding of rigorous research and evaluation design, and will have skills in data analysis and interpretation.

EDUC 501 Methods and Instruments of Research 3 Credits

Acquaints students with insights, information, methods, procedures, and techniques for planning, conducting, and evaluating research. Includes the nature and types of research, methods, and procedures used in educational and psychological research, and the use of research data and other appropriate tools. The completion of a research proposal is required. Students who wish to complete the research project may do so on an individual basis in consultation with their respective advisors.

Prerequisite(s): EDPS 506 and READ 501.

EDUC 502 History of Education 3 Credits

The necessary knowledge of modern education's heritage so that students understand and appreciate current educational practices in proper perspective. Concentration on education's evolution in the U.S. from colonial times to the present, with a major emphasis on a study of topical issues in education treated within the framework of their historical background. A term paper and intermittent reports are required.

EDUC 503 Philosophy of Education 3 Credits

Considers the nature, aims, and objectives of education in a democratic society. Critical evaluations of various educational theorists and the philosophies of pragmatism, idealism, realism, existentialism, etc., are made. Students are encouraged to develop their own philosophy of education by preparing intermittent reports and term papers.

EDUC 511 Educational Foundations: Philosophical/Historical Perspectives 3 Credits

Major thoughts and significant actions in American educational history from colonial times to the present. Synthesis and integration of philosophical and historical contributions to the evolution of America's educational heritage for the purpose of understanding and appreciating current educational practices in proper perspective. Major emphasis on topical issues within the framework of their philosophical/historical backgrounds. Critical evaluations made of educational practices based on pragmatism, idealism, realism, existentialism. Students are encouraged to develop their own philosophy of education by preparing intermittent reports and term papers.

EDUC 515 Issues in American Schools and Society 3 Credits

This course is designed to examine contemporary educational issues impacting on schools and to re-examine the purposes of schooling in a democratic society. Students will explore current and emerging policy issues and the demands for reform in schools and districts. Emphasis will be placed on identifying and developing politically feasible responses to policy issues and procedural problems facing educational leaders today. The role of the leader in promoting the development of a collaborative institutional culture and climate and the identification of best-practice strategies to involve community stakeholders in the development of policies and programs will be emphasized. Effective communication models for use within the school, district and greater community and the use of different media and technology formats will be examined and evaluated. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

EDUC 520 Introduction to Linguistics and Psycholinguistics 3 Credits

This course provides an introduction to the properties of human languages and to their systematic study in the field of linguistics and psycholinguistics. Topics include the nature of human language as distinct from other communication systems; sound patterns (phonology), word-formation (morphology), sentence structure (syntax), and meaning (semantics) in the world's languages; relations to cognition, communication, and social organization; dialect variation and language standardization; language learning by children and adults; and the nature and history of writing systems. Intended for any undergraduate and graduate interested in language or its use. It is assumed that students have had no prior course work or exposure to linguistics and will begin with the basic assumptions that are shared by those who study language from a variety of perspectives. Students analyze their own speech patterns, investigate different speech acts in different languages and develop a research project using a linguistic construct in order to apply it to the second language classroom. Students present this project in a poster format to the university community at the end of the semester.

EDUC 521 Teaching a Second Language 3 Credits

This course focuses on interactive methods of teaching a new language as well as cross-cultural understanding. Students learn to plan using national and state standards for language instruction, organize activities, design and direct language learning tasks, and assess learning. Includes theoretical positions on communicative language learning and teaching, the use and evaluation of currently used materials, the design of new materials, and field experiences in the language to be taught. Students develop their professional portfolio, participate in an E-seminar, prepare a unit of study, and present lesson segments. Open to prospective world language teachers, ESL and bilingual teachers, as well as practicing teachers seeking certification. *NOTE: This course is cross-listed as READ 517. Students cannot get credit for both READ 517 and EDUC 521.

EDUC 525 The Higher Education Organization 3 Credits

This course allows students to gain perspective on the historical and societal context of higher education in America and the organizational structures, functions, behaviors, and cultures that exist within institutions.

EDUC 530 Student Affairs & Experiences in Higher Education 3 Credits

This course will highlight how individuals access higher education and how that education affects students' development via programs, services and interventions designed to promote student growth. The course will explore multiple dimensions of the student experience and how student development theory is used to understand and enhance those experiences. Students will also explore student affairs organizational structures and functions common in colleges and universities.

EDUC 531 Introduction to Collective Bargaining and Labor Relations 3 Credits

This course assumes that students do not have prior knowledge of legal terminology or concepts. It will provide students with a foundation in the fundamentals of collective bargaining and union-management relationships within the unique environment of the college campus. American labor law is the prevailing system of laws that govern universities and colleges, however, students will explore how these general "rules of the game" apply to higher education institutions. The course will challenge participants to consider how general rules and principles of collective bargaining and labor relations shape, and are shaped by fundamental aspects of the higher-education "workplace" including academic freedom, faculty workloads, tenure and shared governance. These unique factors have the potential to influence expectations concerning productivity, termination and the traditionally sharp distinction between labor and management found in other industries.

EDUC 535 Legal and Ethical Issues in Higher Education 3 Credits

This course discusses the fundamentals of American law that directly and indirectly affect the environment of higher-education. Students will use diverse sources of law to understand the many different ways laws, code and common law affect the life of an higher education administrator. Ethical issues will be explored in relationship to critical issues in higher education such as admissions, affirmative action, dismissal procedures, academic honesty, and student loans.

EDUC 540 Leading Operations, Change and Assessment in Higher Education 3 Credits

In this course, students will gain an understanding of the daily and long-term operational challenges colleges and universities face. The course intends to cultivate a strategic mindset about higher education organizations and a recognition that institutions exist in a competitive environment that require them to change in order to survive.

EDUC 541 Assessing Organizational Performance in Higher Education 3 Credits

Through this course, students will be introduced to the concept of institutional effectiveness which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvements. Students will understand the importance of a performance assessment culture including the presence of clear performance goals and measures, collaborative decision-making, and engaged leadership. A focus on determining what should be assessed in academic and administrative units and strategies for initiating performance assessment programs is reviewed.

EDUC 542 Assessment of Student Learning in Higher Education 3 Credits

This course examines institutional effectiveness matters focusing on assessment processes in higher education. It explores topics such as the evaluation of academic programs, assessment of student learning outcomes, and involvement in accreditation and accountability demands in higher education. Here, the focus is on how colleges and universities are doing assessment, at the classroom, program, and institutional levels. The course covers the pragmatic planning skills and decision-support tools relevant to assessing student learning. Just as businesses are expected to adhere to compliance and ethics standards, this course provides an in-depth look at how universities' adherence to standards pertaining to academic success can and will lead to an assurance that accredited universities are achieving their institutional goals, meeting the public's' expectations, and realizing their greater societal mission.

EDUC 543 Communicating Educational Data 3 Credits

Through this course, students will develop skills in statistical communication, incorporating data into delivery methods such as writing, public speaking, teaching, informal conversation and collaboration, programming, and graphic visualizations. Students will understand the importance of creating a data-informed culture and how it contributes to an organization's success. They will also learn methods and strategies of how to communicate to a non-technical audience.

EDUC 550 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 551 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 552 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 553 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 554 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 555 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 556 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 557 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.).

EDUC 558 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.)

EDUC 559 Selected Topics in Higher Education 3 Credits

As a special topics course, the content will vary according to the topic or issue under consideration for a given offering of the course. The following are some of the topics anticipated: Adolescent into Adult Development, Problems and Issues in Residence Life, Public Relations and Marketing in Higher Education, Technology and Data Management in Higher Education, Planning for a Safe and Secure Campus Environment. Students will be expected to investigate the research literature related to the topic, examine institutional practices and implications, and propose improvements to campus policies and procedures. The EDUC 500 to 559 course numbering is designed to permit students to enroll in more than one version of the course to fulfill concentration requirements. (Course is offered on a special scheduling basis.)

EDUC 560 Educating and Evaluating the Bilingual Child 3 Credits

An examination of the historical, legal and pedagogical aspects of the education of language minority students. Considers the design of school programs for minority students including legal mandates, testing, staffing and funding. Emphasis is placed on the evaluation of bilingual students as they enter, develop and exit from special programs of study.

Education Administration (EDAD)**EDAD 501 Educational Leadership and Organizational Theory 3 Credits**

This introductory course will provide leadership candidates with a framework for understanding the complexity of organizational behavior in an educational setting. Theories and issues in the technical core of teaching and learning, educational governance, leadership, communication patterns, decision-making, school culture, organizational problem solving and school change will be presented, examined and applied through a series of case studies and student initiated inquiry/research projects and presentations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

EDAD 505 Supervisor/Teacher Leadership for Improved Instruction and Student Learning 3 Credits

This course will explore the supervisory and evaluation practices in K-12 settings by examining and identifying the relationships among collegiality and collaboration, educational leadership, and the improvement of instruction. This course will emphasize the development of practical observation skills and approaches and the development of appropriate professional growth plans to enhance staff performance and bring about increased student learning. Multi-track evaluation programs will be examined as well as an analysis of current observation and supervisory approaches used in school districts. Participants in the course will develop a personal supervisory platform. This course will emphasize the development of collaborative and clinical supervision approaches as well as communication skills and interpersonal qualities of the effective supervisor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): Permission of Program Director.

EDAD 507 Education and the Law 3 Credits

This course will address legal issues and requirements confronting educational leaders in school settings. Students will be introduced to varied legal requirements that pertain to educational settings. Legal concepts and issues, and policies and procedures relating to students, parents, teachers and administrators, the board of education, and the community will be introduced and examined. Some of the topics referenced will include: regulations and the key concepts in the Individuals with Disabilities Education Act and the Americans with Disabilities Act; No Child Left Behind legislation; church-state issues; free-speech rights of students, teachers and extracurricular groups; curriculum development and implementation; rules governing student and staff conduct; creating and maintaining a safe school environment; child abuse; search and seizure procedures; affirmative action requirements; and, due process procedures. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

EDAD 508 Leadership in School Business Administration 3 Credits

The educational leadership required to establish an effective relationship between school business services and the success of the total educational program is the primary focus. The professional and legal responsibilities of the school business administrator to manage the organization and resources, identifying and solving problems and issues related to the effective and efficient operation of school district, will be reviewed. Specific legal and code requirements and best-practice organizational and management procedures critical to the administration of a public school district will be examined. Topics studied include: organization and management of the district business office; development of strategic planning models; traditional and program oriented budgets; and, application of technology to instruction and management of school and district fiscal operations. Importance of "generally accepted accounting procedures" in district operations is emphasized. Other topics include: personnel, enrollment, and resource forecasting; debt service and insurance expenses; food services, transportation, and facility operations; supply management and facility maintenance; and temporary financial investments. Students demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 509 School Financial Management and Accounting 3 Credits

This course examines the historical precedents and current procedures that regulate and control the funding and financial operations of school districts. The leadership role of the school business administrator, ensuring the operation of the district in compliance with policy, procedure, and code, is a central theme. Judicial decisions, federal and state legislation, the planned curriculum, and generally accepted business practices that impact on the operation of the total educational program in school districts will be reviewed. Some specific topics of study will include: the leadership role of the school business administrator in monitoring, assessing and reporting on fiscal operations; determining taxation rates; and, developing non-public sources of revenue. The impact of state imposed "cap" regulations and negotiated bargaining unit benefit packages and agreements will be assessed with regard to possible budget growth and development. Enrollment, revenue, and cash flow projections; the fiscal controls used to approve, manage and track expenditures; regulations and restrictions on the use of school funds; school district surplus and debt regulations; current and emerging fiscal concerns in school budget planning and development; and, the role of the school fiscal structure in relation to the local, state, and federal governments are other important topics to be developed. Advanced study in double entry accounting procedures will be a major component in the course. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 510 Seminar/Practicum in Teacher Leadership and Supervision 3 Credits

This course requires the student to self-assess supervisory leadership strengths for the purpose of establishing an agenda for an extensive site-based internship. The internship agenda is guided by national leadership standards that ensure a comprehensive exposure to supervisory responsibilities. Students deepen their understanding of supervisory theory and best practice and apply this knowledge to the development and refinement of a personal leadership platform. Considerable attention is placed on understanding the ethical basis of supervisory practice. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state and national standards.

Prerequisite(s): CURR 531, CURR 532 or CURR 538, EDAD 505, and Permission of Program Director.

EDAD 511 Group Process in Supervision for Creative Change and Collaboration in Schools 3 Credits

This course will apply theory and research to the supervisory function of developing group capacity in educational settings. Students will identify group process "best practices" to be modeled by educational leaders. Candidates will develop and refine techniques, strategies, and personal skills facilitating the development of helping and caring relationships with faculty and staff, while promoting interactive communication with stakeholders concerned with improving teaching and learning. Students will demonstrate effective supervisory behaviors in class sessions and simulations that represent daily challenges and opportunities present in school settings. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 505.

EDAD 512 School Facility Planning and Development 3 Credits

This course will examine the leadership role of the school business administrator in facility planning, renovation, and expansion. The essential linkage between guiding principles, existing and proposed facilities, and the implementation of the total educational program is considered from both theoretical constructs and practical applications. Major topics of study will include: the development and revision of long-range facility plans; the role of the state Economic Development Authority; the critical review of state proposed "model" school buildings; and, the process of drafting educational specifications. In addition, required site plan reviews by state and local officials; the referendum approval process; and, the integral role of professional services (public opinion consultants, attorneys, demographers, architects, financial consultants, public information agencies, etc.) will be discussed. Students will evaluate geographic, socio-political, financial, and ecological considerations in proposed school construction. Planning for new and emerging technology, addressing health, safety, and security considerations, ensuring barrier-free access, incorporating energy conservation measures, and the utilization of school buildings by the greater community will be overarching themes developed. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

EDAD 513 Human Resources in Education 3 Credits

This course will develop the practical and theoretical knowledge of the human resources function in the educational setting. Emphasis will be placed on understanding and utilizing human resources functions and processes to identify needs and address issues in both instructional and non-instructional positions. The student will gain an understanding of the inter-relationship that exists between organizational climate, strategic planning, and the established policies and regulations of the human resources function. Students will develop a comprehensive understanding of the importance of recruitment, selection, mentoring and evaluation of faculty and support staff. Emphasis will be to continuously identify issues that are legal requirements in human resources administration or required by federal or state regulations. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards and professional development standards, the Standards for School Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite(s): EDAD 505 and EDAD 511.

EDAD 514 School Finance and Fiscal Management 3 Credits

This course will examine the principles and court decisions involved in shaping the legal framework of school finance. Students will examine the historical spending patterns of a school district budget and develop new budget proposals using "generally accepted accounting procedures" and the appropriate state budgeting codes. Students will study school budgeting procedures as a tool for program and school improvement. The class will examine the financial implications associated with site-based management models and whole school reform. Legislation pertaining to the financing of short and long term debt will be examined. Students will use technology to gather data; identify non-tax based resources; create presentations for specific audiences; and, work with models of data driven indicators to examine issues of equity, efficiencies and resource deployment. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501.

EDAD 515 Mentoring Beginning Teachers 3 Credits

This field-based practicum requires that each student work with a novice teacher (student teacher or beginning teacher) while enrolled in the course. Through reading, observation, biography and interview, students will explore how novice teachers acquire teaching knowledge and skill. By researching their own practice as mentors, reading relevant literature and participating in critical dialogue in seminars, students will explore and evaluate methods of facilitating and supporting novice teachers' professional growth.

EDAD 521 Using Research Strategies and Analysis of Data to Make Decisions in Schools 3 Credits

This course will develop the skills needed by educational leaders at all levels to interpret, use, and apply statistical concepts and research methodologies in critical administrative and supervisory functions. Statistical methodology will be used to further understanding of different research strategies. Students will interpret data and make informed decisions regarding the frameworks, implementation, and evaluation of instructional programs and practices designed to improve teaching and learning in school, district, and national settings. Course activities and field work will include: scenario and case study analyses; the use of critical friends' discussion groups; the application and use of different technologies and software programs; and, the identification of appropriate problem solving and resolution strategies. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards.

Prerequisite(s): EDAD 501 and EDAD 514.

EDAD 591 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the first of two "capstone" internship courses for candidates in the leadership program in educational administration. The course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. This course is taken in the fall semester and is followed in the spring semester with EDAD 592. After analysis of leadership strengths, based on a self-assessment completed by the candidate, specific internship experiences will be cooperatively planned by the candidate, site-based mentor, and instructor. The capstone internship will build on strengths, develop growth experiences, be substantial and sustained, and be ethically informed. Students will cooperatively evaluate and problem-solve internship experiences, assess leadership performance from best-practice perspectives, finalize the development of a leadership platform statement, review and discuss topics and scenarios derived from readings and other resources, engage in simulations and case analyses, and interact with students in other graduate programs. Presentations by practicing administrators and other school personnel will provide understanding of the patterns of interaction that occur among different leadership positions in educational institutions. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of Instructor.

EDAD 592 Seminar/Practicum in Educational Leadership/Supervision 3 Credits

This is the second of the "capstone" internship course sequence that coincides with the school-year calendar and is taken during the spring semester. In combination with EDAD 591, the course meets New Jersey Department of Education requirements for an extended administrative internship in the schools. Students will continue pursuing field-based internship projects initiated in EDAD 591 in collaboration with a site mentor and the course instructor. Students will demonstrate course understandings through actual classroom and school applications that are referenced to state adopted core curriculum content standards, professional development standards and national school leadership standards. Enrollment by permission of instructor.

Prerequisite(s): EDAD 591.

EDAD 600 Independent Study and Research in Educational Administration 1-3 Credits

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of educational administration.

Education Psychology (EDPS)**EDPS 500 Cognitive Assessment 3 Credits**

This course addresses contemporary intellectual theories and the process and procedure of cognitive assessment. It presents the relevant issues related to intelligence testing and interpretation. Through a variety of pedagogical approaches, students acquire needed skills in administering, scoring, and interpreting results from contemporary tests of cognitive ability.

Prerequisite(s): EDPS 513.

EDPS 502 Psychological Development of the Child and Adolescent 3 Credits

Surveys of psychological principles applied to counseling services with emphasis on developmental processes, individual differences, and mental health. Concepts and theoretical orientations to human development from conception through adolescence. The analysis, interpretation, and practical implications of significant research that has contributed most to the knowledge of human development of the child and adolescent.

EDPS 503 Human Growth and Development 3 Credits

Provides an overview and broad understanding of life span developmental theories and research applied to counseling services with special emphasis on developmental processes, individual differences and mental health. Includes strategies for working with developmental issues across the life span.

EDPS 506 Testing and Measurement Techniques in Reading/Literacy Education 3 Credits

Studies basic characteristics of test scores, including: reliability and validity, selection, administration, and scoring of tests; measurement of achievement, intelligence, aptitude, and interests; and the writing and editing of items of teacher-made tests, school marking procedures, interpreting of test scores. Covers basic statistical tools needed by reading specialists.

EDPS 507 Advanced Educational Psychology 3 Credits

A critical examination of contemporary learning theory as applied to educational thought and practice. The psychological, physiological, and sociological foundations of education and training; personality problems encountered by classroom teachers.

EDPS 508 Cognitive Processes and Learning 3 Credits

This course deals with what is known relative to the principles of cognitive psychology and their application to learning. The flow of information is followed from where it begins through the processes of integration and storage. Cognitive principles will be studied relative to concept formation, reasoning, and problem solving. Their relationship to specific educational tasks such as the teaching of reading, writing, mathematics, and other content will be explored and confirmed through empirical evidence.

EDPS 509 Psychoeducational Assessment and Report Writing 3 Credits

This course furnishes students with the clinical, practical, and theoretical sophistication to understand the assessment and report writing process for academic, behavioral, adaptive, and social-emotional concerns. Students are expected to master a wide range of concepts and skills to successfully complete this course including integrating multiple pieces of assessment data for case conceptualization, classification, and treatment recommendation. Students are required to synthesize data from multiple methods of assessment and sources to produce written psychoeducational reports that inform intervention practice.

Prerequisite(s): EDPS 513.

EDPS 510 Assessment of Behavioral and Social-Emotional Functioning 3 Credits

The assessment of behavioral and social-emotional functioning is studied from an empirically based, problem-solving model that links directly to intervention. Students learn to select appropriate assessment tools to match individual referral questions so as to evaluate the behavioral and social/emotional problems of children and adolescents.

Prerequisite(s): EDPS 513.

EDPS 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with specific educational exceptionalities, including learning disabilities, mental retardation, behavior disorders, physical handicaps, and giftedness. The characteristics, identification procedures, and current intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

EDPS 513 Professional Practice of School Psychology: Issues and Historical, Ethical, and Legal Considerations 3 Credits

This course is designed to provide an introduction to school psychology through an analysis of the contemporary roles and functions of school psychologists. Professional issues are explored in the context of the history and evolution of school psychology as a specialty area of professional psychology. In addition, the study of professional ethics, best practices, and standards for delivery of school psychological services that have been adopted by national organizations representing the profession of school psychology will be reviewed.

EDPS 514 Standardized Measures of Academics and Behavior 3 Credits

This course will increase students' understanding of the standardized assessment process, measurement issues, psychometric properties of assessment instruments, and the role of these instruments in informing academic, behavioral, and social-emotional interventions.

EDPS 515 Curriculum-Based Assessment and Measurement 3 Credits

This course will build upon students' knowledge and skills in individual-referenced assessment based upon the standards and general curriculum. Students will be able to design, administer, score, and interpret curriculum-based assessment and link these data to intervention.

EDPS 520 Measurement, Tests and Assessments in Counseling 3 Credits

This course covers the use of assessment instruments in counseling practice. Topics include descriptive statistics, reliability and validity, social and ethical considerations in testing, the appropriate selection and usage of standardized tests, and the communication of their results. At the conclusion of the course, students will be able to administer, evaluate and interpret assessment instruments commonly used in the counseling profession.

EDPS 521 Statistics and Quantitative Analysis 3 Credits

This introductory statistics course will cover basic descriptive and inferential statistics for use in counseling, school psychology, and education. Students will learn how to interpret and evaluate statistics in empirical articles and to understand some of the considerations in selecting and using different statistical techniques. In addition, they will learn to analyze data and interpret output using statistical software.

Prerequisite(s): EDPS 520, EDUC 500.

EDPS 535 Biological Basis of Behavior 3 Credits

This course will emphasize a biological approach to the study of psychology and behavior. Topics studied will include the following: 1) the genetics of human psychological differences; 2) the anatomy of the nervous system; 3) psychopharmacology; 4) neuropsychological diseases (e.g., epilepsy, autism, multiple sclerosis); 5) memory and amnesia; 6) sleeping, dreaming, and circadian rhythms; and 7) the biopsychology of mental health difficulties.

EDPS 538 Developmental Child Psychopathology 3 Credits

The course will furnish students with a comprehensive account of the characteristics, correlates, causes, contexts, and outcomes of psychopathology in children. It serves to augment students' understanding of specific conditions in childhood and adolescence including autism spectrum disorders, attention-deficit/hyperactivity disorder, mental retardation, childhood anxiety/depression, enuresis/encopresis, learning disabilities, communication disorders including selective mutism, and emotional/behavioral disorders. The diagnostic nosologies of the DSM and IDEA will be referenced and thoroughly discussed. A special emphasis upon a developmental-systems framework for understanding child psychopathology will be presented wherein the importance of context and the influence of multiple, interacting events and processes in shaping adaptive and maladaptive development will be investigated.

EDPS 570 Advanced Interventions for Children, Adolescents and Families 3 Credits

This course provides opportunity to expand each student's knowledge and skills in the development of effective interventions to meet academic, behavioral, and social-emotional needs. Currently accepted practices based upon the individual's referral problem will be explored. Intervention will be approached from a problem-solving model and based on current assessment data. Case studies will be used to link theory and application.

Prerequisite(s): EDPS 513.

EDPS 581 Practicum in Psychoeducational Assessment and Report Writing 1 Credits

This practicum experience provides supervised practice in administering, scoring, and interpreting an array of individually administered assessment instruments for the purpose of producing a written psychological report that is linked to intervention.

Prerequisite(s): EDPS 513.

EDPS 582 Practicum in the Assessment of Behavioral and Social-Emotional Needs 1 Credits

This practicum experience provides supervised practice using the techniques and methods taught in EDPS 510 Assessment of Behavioral and Social-Emotional Needs. Students will be expected to complete a Functional Behavioral Assessment including recommendations for a behavior intervention plan and a means to monitor and evaluate the target student's progress.

Prerequisite(s): EDPS 513.

EDPS 583 Practicum in Consultation in School and Agency Settings 1 Credits

This practicum experience provides supervised practice in the study, implementation, and evaluation of a problem-solving model to provide consultation across school and agency settings. Students will be expected to successfully initiate and lead the 4-step consultation process resulting in a databased intervention. The consultation will be documented in a formal report.

Prerequisite(s): EDPS 513.

EDPS 584 Practicum in Curriculum-Based Measures 1 Credits

This practicum provides supervised experience in identifying academic needs of students utilizing curriculum-based assessment (CBA) methods within a problem-solving framework. Students will practice the selection and administration of appropriate CBA tools to match referral question(s) at the individual, class-wide and school-wide levels. Students will also practice assessment of the academic environment by conducting structured direct observation of the classroom. Students will summarize and analyze assessment data, develop goals and objectives and make recommendations for intervention.

Prerequisite(s): EDPS 513.

EDPS 590 Internship in School Psychology I 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 581, EDPS 582, and EDPS 583.

EDPS 591 Internship in School Psych II 3 Credits

The student functions as a school psychologist in a 600-hour approved field placement under the supervision of a certified school psychologist. At least 50 percent of the internship must occur in a school setting. Additionally, students attend weekly seminars that deal with issues related to professional ethics, problem-solving and intervention design, and group supervision. The internship occurs at the end of the student's program.

Prerequisite(s): EDPS 590.

EDPS 600 Independent Research and Study in School Psychology 1-3 Credits

Course content varies with the academic research interests of students who wish to engage in independent study related to the overall content of school psychology.

Education Sociology (EDSO)

EDSO 501 Foundations of Counseling in Edu Settings: Referral Sources for Stdnts and Stdnts With Special Needs 3 Credits

The course provides an overview of the foundations of counseling in educational settings, including the historical roots, current and future trends, roles, and functions in multicultural schools and higher education settings. Students examine the roles and responsibilities of professional school counselors to facilitate student success through the development of a comprehensive school counseling program as an integral component of the total education system.

EDSO 510 Sociological and Cultural Foundations of Education 3 Credits

The American public school as a social organization which influences and is influenced by local, national and international cultural evolution. An exposition and analysis of the vibrant multicultural issues that sometimes determine the outcome of public education. An exploration of contemporary educational problems and challenges resulting from changing social and cultural conditions. A perceptive and reflective placement of these changes in a historical context to enable students put the future in perspective.

Educational Leadership (EDLD)**EDLD 800 Strategic Management, Organizational and Moral Leadership Behavior in a Culture of Learning 3 Credits**

This course will challenge students to embrace a system view of leadership and organizational change at the organizational level. Students will compare, contrast and critique theories and models of organizational learning, knowledge creation, and organizational capacity building and apply them to their own organizational settings. The course will focus on three leadership standards: instructional leadership, operational and managerial leadership, and professional culture. While the course will focus on conceptual frameworks and theory, it is a practice-based course. The course will enhance student ability to think systematically and develop comprehensive understanding of core competencies required to lead, initiate and sustain change in organizations. It investigates process and content issues of team building, interpersonal and group relations, and effective problem solving and decision making skills in collaborative environments. The course emphasizes the moral, ethical and social responsibilities of organizational leaders, as well as the application of principles to organizational leadership behavior and decision-making. Students will also investigate current research trends regarding ethical issues in education and other organizational contexts.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 801 Action Research: Principles and Methods 3 Credits

This course provides an introduction to action research, with emphasis on its application in educational settings. The course covers definitions and purposes of action research. Students will explore theoretical, methodological, and ethical issues pertinent to action research. During the course, students will engage in an action research project in an educational setting.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 802 Educational Change, Systemic Reform, Exercising the Politics of Change 3 Credits

This course will provide students with the skills necessary to achieve educational reform and improvement while navigating the political environment within educational institutions. Through this course, students will analyze various theories and how these ideas apply to education, organizations, change, and leadership.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 803 Instructional Leadership and Educational Reform 3 Credits

Through this course, students will examine contemporary educational practices and their relationship to leadership theories, models, and strategies. Participants will investigate research based instructional practices and develop the skills necessary to identify issues within organizations in suburban and urban settings. The course will provide students with a deep knowledge of the educational challenges faced by educational leaders in today's society. The focus will be on learning a successful organization through the implementation of research based strategies.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 804 Community Building and Sustaining Community Partnerships 3 Credits

Drawing on philosophies/theories, processes, and practices that build and sustain effective school-community partnerships, this course addresses the identification and utilization of community resources and the development of effective intra- and inter-organizational strategies, community linkages, and collaborative efforts necessary to provide for the holistic needs of students and families. Special attention is focused on the role of school leaders in planning and implementing community-wide and building level communications and involvement networks, through the development of practical action learning sets and tools. Building Commitment: How do leaders build and use public awareness and commitment to support their schools?

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 805 Valuing Diversity/Equity: Developing and Fostering a Community of Learners 3 Credits

The focus of the course is academic excellence with equity. The value orientation of the course is toward high-quality developmental outcomes for youth of all racial, ethnic, and social class backgrounds. With an emphasis on students of color and youth from less-advantaged families, the course explores several policy and strategic responses to achievement disparity: identify and work to remove key structural barriers to educational equity; excellence with equity goals; design more effective policies and practices to improve the quality of teaching; support families with ideas and practices for parenting children more effectively; engage youth to reshape their culture of achievement to align with their most positive values. The course explores theories, evidence, designs, methods, and mechanisms associated raising achievement and closing gaps.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 806 Research Proposal Development 3 Credits

This course builds on the action research course to more clearly define the rationale and procedures of educational and social science research. The course is designed for our first-year doctoral students. Topics will include the nature and purpose of research, planning and conducting research, critiquing and evaluation research, sampling, survey and experimental design, evaluation research, naturalistic observation and inquiry, measurement and methods of data collection, ethics, and the use of computers in data analysis. Methods are considered for collecting both quantitative and qualitative data. Students will build on prior project ideas, concepts, and research practice to more fully develop into their Dissertation of Practice topic. This course has two objectives: to increase participants' knowledge of methods for making causal inferences in quantitative research, and to provide participants with a forum for presenting and receiving feedback on their research topic for the Dissertation of Practice.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 807 Law and Policy 3 Credits

This course explores legal, ethical and politics issues governing PreK-12 education in America and the legal responsibilities and powers of state and local governing bodies and individuals that arise in elementary and secondary schools. Emphasis is given to federal and state statutes and case law affecting due process, liability, equal protection, and the rights of teachers and students in order to better understand the risks in education management and possible strategies to reduce those risks. The course will explore evolving legal standards on a variety of issues. The course will draw on real cases and legal/policy dilemmas that practitioners face, and focus on preventive law - providing current and future school learners with knowledge and skills they will need to make sound decisions, advance important educational objectives, and minimize legal problems.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 808 Generating, Using, and Assessing Data Accountability and Student Assessment 3 Credits

This course will develop the skills necessary for educational leaders to identify and define problems, implement data collection methods, and analyze, interpret, and report data across multiple levels from the individual student to the larger system. Students will gain the knowledge and skills to use data in decision making within a problem solving framework that enables evaluation of instructional programs and practices. Within this course, students will engage in activities designed to enhance skills in data-based decision making, including: large and small group discussion; review of the extant literature base; review and use of different technologies and statistical methods for data collection and analyses; case studies and simulated data analyses; and application of skills in real world settings. Attainment of these skills will prepare the student for the dissertation process to serve as an instructional leader in the field. The course references and aligns with state adopted core curriculum content standards and professional development standards, the Standards for Schools Leaders of the Interstate School Leaders Licensure Consortium, and the candidate proficiencies developed by the Educational Leadership Constituent Council.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 809 Finance, Fundraising and Fiscal Management 3 Credits

Financial and managerial leadership of a school building or district is a primary factor in the success or failure of school instructional programs. This course provides an opportunity for public and private school practicing and prospective administrators to gain an understanding of their role in these critical areas. Providing the resources to fund academics/instruction/athletics, facilities and capital projects is a focus of this course. A comprehensive understanding of the financial implications of systemic reform, centralized goal setting, accountability standards, and decentralized forms of site-based management, school choice, and charter schools will be a focus of study. This course will also provide a comprehensive overview of fund raising. Students are provided with an ethical foundation and are introduced to basic terminology and concepts in the field. Various fund raising vehicles are surveyed and participants learn to apply fund raising strategies that are appropriate to their organizational setting.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 810 Curriculum Leadership: Transforming Teachers/Developing Teacher Talent 3 Credits

This course will focus on the complex nature of teaching and learning and provide participants with the skills necessary to guide instructional practice. Adult learning theory will be examined as will curriculum theories, instructional practices, professional development, and human capital.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 811 Innovation and the Use of Educational Technology 3 Credits

This course addresses the intersection of organizational change and educational technology. Students will develop a philosophy of educational technology and explore related issues in policy, diversity, ethics, and evaluation. The course also covers research and theory on organizational change and processes for developing a culture of innovation. Students will apply theories of organizational change to the implementation and use of technology in educational contexts.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 812 Leading Programs for Diverse Learners and At Risk Students 3 Credits

This course examines some of the best practices for supporting diverse learners and at-risk students and some of the reasons behind the intrinsic and bureaucratic/policy barriers that may hinder their success. Schools are faced with an increasing number of diverse learners and at-risk students who require additional academic, social and/or medical supports for them to achieve success. This course will examine the root causes that may hinder student success and some of the programs and approaches that have proved successful in meeting their needs.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 813 Dissertation of Practice I 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research.

Prerequisite: Master's Degree and Permission of the Program Director.

EDLD 814 Dissertation of Practice II 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice I.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 815 Dissertation of Practice III 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice II.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 816 Dissertation of Practice IV 3 Credits

The Dissertation in Practice is a scholarly endeavor that impacts a complex problem of practice. This research is a reflective process of progressive problem solving led by individuals working with others in teams or as part of a community of practice to improve the way they address issues and solve problems. The research involves the process of actively participating in an organization change situation while conducting research. This course is a continuation of Dissertation of Practice III.

Prerequisite(s): Master's Degree and Permission of the Program Director.

EDLD 817 Qualitative Research Methods 3 Credits

This course gives particular focus to the use of qualitative research methods in action research studies. Students in this course will gain knowledge about the theoretical foundations, conceptualization, and design of qualitative research. Building on prerequisite coursework, students will learn and practice advanced skills for collecting qualitative data. Students will also engage in hands-on application of specific analytic methods and generate a formal written report of results, paralleling required components of the dissertation of practice. Students will review several dissertation of practice studies that exemplify qualitative research methods in the context of action research. Attention will be given to issues of bias and positionality in qualitative research.

Prerequisite(s): EDLD 801.

EDLD 900 Dissertation In Progress 1 Credits

This course is a continuation of the sequence of dissertation seminar courses to complete the Action Research Dissertation in the Doctorate Program for Educational Leadership. Candidates will register for this course each semester until the defense of the dissertation is completed.

Prerequisite(s): EDLD 813, EDLD 814, EDLD 815, EDLD 816.

Executive MBA (EMBA)**EMBA 9001 Top Management Perspective 3 Credits**

This team-taught course will serve as the initial course of the EMBA program. The course will take place over three weekends. Top managers will also attend and provide their perspectives to students and faculty in attendance. This course will explore the "art" of case study analysis. Students will focus on identifying, analyzing, and resolving issues from a top management perspective. This course will consider various issues confronted by top managers and heavily emphasizes contemporary cases that illustrate a wide range of management issues. By having the course team-taught by a faculty member and an Executive-in-Residence, both the academic and applied aspects of business will be represented in the classroom. This sets the tone for the approach and philosophy of the entire program - a blending of business theory with real world application. Another of the course's purposes is to allow the students to get to know one another, become acquainted with the faculty who will be teaching in the program, and receive an overview of the material that will be covered.

EMBA 9220 Financial Accounting 3 Credits

This course provides a managerially-oriented focus on the aspects of financial accounting most relevant to business decision makers. Students will develop the ability to read, analyze, and interpret financial information for decisions regarding operating, investing, and financing activities as well as serving as a foundation for more advanced analysis in areas such as credit and equity decisions.

EMBA 9231 Economic Analysis and Decision Making 3 Credits

This course focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

EMBA 9240 Corporate Finance 3 Credits

This course introduces modern corporate finance principles that today's managers should know. Its purpose is to give students a thorough introduction to the theory and practice of financial management. The course reviews the principles executives need to acquire to manage for value creation. Topics covered include valuation of securities, capital budgeting, cost of capital, capital structure, and value-creating decisions in a global environment.

EMBA 9250 Statistical Analysis for Bus 3 Credits

This course introduces students to basic concepts and methodologies in probability theory and statistics. Emphasis is on real-world application of reasoning techniques used for interpreting data for decision criteria of managerial decision making. Topics include probability, variables, estimation, hypothesis, regression, and sampling. Concepts of learning are facilitated through real-world practices.

EMBA 9251 Supply Chain and Operations Management 3 Credits

This course focuses on the issues, concepts, skills, and techniques related to the management of operations of organizations. Students are introduced to various techniques of operations research and management science as they are applied to decision making in the management of operations. Topics include productivity, supply chain management, manufacturing strategies, and competitiveness.

EMBA 9260 Strategic Marketing 3 Credits

The focus of this course is to provide students with the analytical skills required to understand and assess complex marketing situations in order to develop and implement appropriate marketing strategies. Identifying individual case factors and understanding the relationship between developments of strategies is emphasized. Students will apply the material using real-world cases faced by organizations.

EMBA 9270 Management/Team Skills 3 Credits

This course is based on the assumption that management and team skills can be learned. To learn skills requires active involvement in the classroom exercises and many learning opportunities come from group activities. To develop these skills, students will need to set personal goals and experiment with new behavior. This course will involve a variety of in-class exercises including self-assessments, interpersonal activities, and a team project.

EMBA 9271 Leadership 3 Credits

This course has been designed to provide students with an understanding of leadership from both a scholarly and a practitioner perspective. The purpose is to help students understand what it means to be a leader in general and in the current business environment specifically. Students will be encouraged to consider their own leadership aspirations, to observe others in leadership roles, and to test their own leadership acumen.

EMBA 9301 Corp Governance Legal Ethical Issues 3 Credits

This course provides an overview of corporate governance. The governance structure specifies the distribution of rights and responsibilities among different participants in the corporation, such as the board of directors, managers, shareholders, and other stakeholders. In this course, students will discuss the importance of corporate governance and the roles of various stakeholders in the governance structure. Conflicts of interest that arise between the stakeholders and approaches to mitigate those conflicts will be a central focus of the course. Because corporate governance plays an integral role in creating a culture in which ethical behavior is the norm, this course will also focus on identifying, analyzing, and resolving ethical dilemmas in business. The course will consider ethical issues confronted by managers and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues.

EMBA 9302 Corporate Performance Evaluation 3 Credits

This course emphasizes to executives that shareholder value creation should be an enduring focus of concern because value is the foundation of survival and prosperity for the enterprise. The course introduces multiple perspectives in evaluating the performance of the firm. Among them are management control systems, financial statement analysis, cash flow analysis, and the balanced score card (BSC) including Economic Value Added. The nature of these approaches to evaluation draws from the disciplines of accounting and finance. Structuring the course as a team-taught course in which instructors from both of these disciplines will be present helps to ensure that students will receive a comprehensive and integrated understanding of the course topics. Students will experience using real-world cases in evaluation.

EMBA 9303 Intl Bus Seminar W/ Travel Exp 3 Credits

The purpose of this course is to examine the intricacies of conducting business internationally. With each offering, the course will focus on parts of the world where emerging economies are becoming influential players in international business. Examples of these emerging economies include China, South America, Argentina and Chile in particular, and Eastern Europe or Southeast Asia. The influence of external forces resulting from the socio-cultural, economic, technological and political aspects of the macro-environment will be examined. The competitive environment will be examined from the perspective of both multinational and domestic corporations. Finally, consideration will be given to the corporate level strategies and the functional operation of these corporations as they compete for market share, financial investment and human resources.

EMBA 9309 Special Topics 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9310 Information Technology and Management 3 Credits

This course enables current and future senior executives to gain a strategic perspective of information technology resources within the organization. The focus is on opportunities and challenges associated with managing technological resources as well as how the effective management of information technology can improve competitive positioning and operational performance. Course format will be a combination of lectures, guest speakers, case studies, and hands-on exercises. Experiential learning opportunities will allow students to work with real-world case studies using relevant technologies.

EMBA 9362 Product Development and Commercialization 3 Credits

The purpose of this course is to provide an in-depth overview of the Product Development and Commercialization (PD&C) process. This will be done through the analysis of cases that describe actual PD&C as well as innovation problems faced by a variety of organizations (e.g. consumer, health care service). Topics covered include innovation funding, opportunity analysis, common PD&C challenges and issues, and the interface among various disciplines to achieve best-in-class PD&C strategies.

EMBA 9880 Strategic Management: a Capstone Course 3 Credits

The capstone course focuses on the elements required to make effective strategic decisions in organizations with reference to the impact these decisions have on all stakeholders. The purpose of this course is to provide students with an understanding of the strategy process through an analysis of how a firm develops a mission, vision, and establishes a sense of purpose while simultaneously monitoring the external environment for emerging opportunities and threats. Topics focus on real-world cases, the evolution of strategic management processes, and strategies for a global world.

EMBA 9900 Leadership Edge 0 Credits

This course is structured as pass/fail. It provides students at, or aspiring to, executive positions within their organization's career, leadership and management development with a real-time, practical approach to leadership. This differentiator and developmental component is referred to as "The Leadership Edge." Students will reflect on self-assessments completed as part of the program. They are then able to leverage the Leadership Edge experience by pursuing different methods of developing career, leadership, and management competencies to fill identified gaps. Opportunities for development are met through group sessions and student participation in individual (private) coaching or group seminars to discuss personal career and organizational situations. The choice of which avenue is taken (individual or group) is made on an integrated group basis.

EMBA 9906 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9907 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9908 Special Topics in Bus Adm 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

EMBA 9909 Special Topics in Bus Admi 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Homeland Security (HLSP)

HLSP 501 Homeland Security 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

HLSP 502 Development and Structure of the US Intelligence Community 3 Credits

The course is designed to help students increase their knowledge and understanding of homeland security policy. The course will consider why and how homeland security problems impact the public agenda, why some solutions are adopted and others rejected, and why some policies appear to succeed while others appear to fail. The course will primarily examine policy making at the national level in the United States, but will also analyze examples at the state and local level, as well as placing U.S. policy in a comparative perspective.

HLSP 504 Political Behavior of Security and Conflict 3 Credits

The course focuses on various analytical approaches in behavioral political science in order to better understand how individuals interact with the political system. It does so by advancing students' knowledge of the cognitive aspects of whether citizens engage in various types of political behavior during periods of crisis and uncertainty. The course empowers students to conduct advanced research in order to test some of the leading theories of the subfield.

HLSP 505 Civil Liberties and National Security 3 Credits

During times of crisis, can our government maintain individual liberty? This course provides an in-depth exploration of the tension between the role of the state in balancing civil liberties with national security. In this context, the course provides a specific focus on freedom of speech, press and assembly, freedom of religion, the right to privacy and the courts' role, or lack thereof, in the War on Terror.

HLSP 506 US Constitutional Law and National Security 3 Credits

This graduate seminar examines the origin and development of the American constitutional system and constitutional law. It further examines this system within the context of national security. Primary emphasis is on the US Supreme Court, which includes its developmental as an institution, the origins of judicial review and the court's establishment of this process, as well as the decision-making process by Justices of the court. The course will then examine the interplay between the court and its political environment and the impact the court has had upon the functioning of the political system by considering the Marshall Court (1801-1835), the Hughes Court (1930-1941) and the Warren Court (1953-1969). We will conclude with a consideration of the role of the court in balancing the rights and freedoms of a democratic society within the demands of the national security state.

HLSP 508 Political Communication, Terrorism, and Security 3 Credits

This course explores how political communication affects terrorism and security. It is well known that media plays an important role in creating the narrative for understanding terrorism and national security issues. The question is whether that narrative tends to help protect that nation, or whether it actually interferes with that goal. In addition, social media has become a means by which terrorist groups recruit outside volunteers, while blogs and websites are often used to incite incidents in various countries. This course deals with the various ways in which political communication can support, or interfere with, the protection of national security.

HLSP 510 Terrorism 3 Credits

Politics is the study of power and its application, and hence the study of violence has always played a central role in the discipline. In the era of mass politics, violent political participation has been accentuated as evidenced by the prevalence of both domestic and international terrorism. The practice of terrorism itself has undergone changes in the new era and the appearance of groups and "lone wolves" bent on sowing death and destruction for its own sake is more common place. Moreover, the statelessness of today's terrorists removes crucial restraints that once held even extreme terrorists in check. Perhaps more than any other organization, ISIS embodies these trends. It is therefore incumbent upon us to take a step away from the spectacular nature of the news, and ask fundamental questions concerning the motivations, modes of operation, and circumstances contributing to the appearance of terrorist movements, and the roles of the leaders as against the "foot soldiers" in such organizations. Special attention is laid on the emotional fervor of those engaged in the activity, the ideology that mobilizes them and rationalizes their behavior, within each case's historical settings.

HLSP 511 Borders and National Security 3 Credits

This course focuses on borders, boundary-making, securitization, and other theories surrounding the territorialization of the nation-state, including the rise of the national-security and homeland security industries. The analysis of the changing complexities of borders and borderlands is driven by a meta-narrative about national security and current developments in the immigration/security nexus, including policies of border control and the surveillance of immigrants, denizen, and citizens with new security technologies. A key piece of the course is the comparative analysis of US and EU border agencies and the militarization and weaponization of borders, including the construction of new border walls, with the objective to protect the global North from the onslaught of desperate, impoverished and persecuted hordes from the global South. Transnational questions focusing, for example, on the dynamics of human trafficking and drug cartels is an essential parts of this comparison. Throughout the course, a special analytical emphasis is given to the meta-narrative and political opportunism that have driven these developments and led to the fortification of the global North.

HLSP 514 Congress and National Security 3 Credits

The purpose of this course is for students to identify, examine, analyze, and interpret the role of Congress in shaping national security policy with a particular emphasis on the institution's role in the Global War on Terror. In addition to an in-depth analysis of the US Congress, we also look comparatively at how legislatures in other nations have dealt with crafting their own security policies. The course will address the following questions: First, what is the role of Congress in national security policy, what does it do, and why? Second, what are the various ways of studying the relationship between the legislative and executive branches of government in the US system as it relates to the Global War on Terror?.

HLSP 515 Counterterrorism 3 Credits

One of the aims of analyzing the nature of terrorism, its goals, and the underlying deeper motives of those who partake in it, is to thwart as many terrorist efforts as possible and to bring terrorist campaigns to an end. Thus, the questions of how terrorism begins and how terrorism ends are intimately related. Because of the prevalence of terrorism in the national and international arenas and the spectacular nature of terrorist undertakings, the analysis of these questions is the subject of much media attention and public discussion that tends to obscure and politicize what should be a focus of attention of citizens, policy makers, and students of the social sciences alike. This course seeks to point out concrete measures for counterterrorism –of the type that sometimes is under public discussion –but in a more systematic manner that brings together methods of heuristic thinking in political science and adjacent disciplines, historical and comparative experience, and the literature on counter terrorism to analyze the range of possible strategies that could be adopted and the possible manner in which terror campaigns may be brought.

HLSP 516 The Presidency and National Security 3 Credits

This course is designed as an upper level graduate combination lecture and discussion section on the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School, English School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

HLSP 520 Defense Policy and Analysis 3 Credits

The course begins with an overview of the structure of US defense policy and administration and explores issues associated with national defense. Throughout the course students become familiar with basic data, institutions, actors, trends, issues and options in the strategic implementation of defense and force. The primary focus of the course is on the Department of Defense (DoD) as well as on key committees and actors within the White House, State Department, Central Intelligence Administration and Congress.

HLSP 522 Countering Domestic Extremism 3 Credits

Domestic extremism is an issue the United States government has had to contend with since its inception, from Shay's and the Whiskey Rebellion in the 18th century, the Klu Klux Klan throughout the 19th and 20th century, to the threat of terrorism today. Broadly defined, extremism has profound and specific impacts on our government and everyday life. Given the limited, enumerated powers the Constitution grants the federal government, cooperation between local, state, and national government agencies is essential to counter domestic threats arising from extremists across the political spectrum. This course will examine threats to U.S. domestic security both before and after the September 11th attacks with a focus on critiquing the ability of our federal system of government to prevent and respond to the evolving threats posed by individuals and groups within the United States.

HLSP 525 Special Topics in Homeland Security 3 Credits

This course is an advanced level seminar examining research on current areas of importance relevant to the interdisciplinary field of Homeland Security.

HLSP 527 Policy Analysis and Evaluation 3 Credits

This course will provide students with an in-depth study of public policy by linking theory with practice to helping students think about problems systematically. The course addresses the policy process through leading theoretical models within the subfield as well as an evaluation of government's response, or lack thereof, of contemporary policy problems. Our focus will be on three areas of policy analysis: description, evaluation, and prescription. As part of our focus, we will address policy design, implementation, evaluation, and failure. Overall, students will develop skills required to define and critically examine policy problems, articulate relevant decision-making criteria and assess alternative policy options.

HLSP 529 Energy Security 3 Credits

Energy Security explores the role of energy in shaping global politics, natural resource management practices and volatility in economic markets. The course begins with an overview of energy security and explores issues associated with energy production, national security, energy consumption, and environmental conservation. Throughout the course students will become familiar with basic data, trends, issues and options in the exploration and production of renewable and non-renewable energy sources.

HLSP 530 Data Analysis and Methods for Political Science 3 Credits

This course introduces students to quantitative and qualitative methods used by political scientists and security specialists in the study of social and political phenomena. Students will learn the logical structure of political analysis, and the quantitative measures used to supplement and support these logical structures. Overall the course draws on the fundamentals of statistics: Namely the ability to describe data samples and draw inferences about the populations from which they were drawn. It should also improve one's ability to read data, interpret data, and judge others' claims about data. After students learn these skills, they will apply them to a prepared data set. The emphasis of this course is on "hands-on" experience. Students approaching this subject for the first time will "learn by doing" this type of analysis.

HLSP 531 Critical Infrastructure Security 3 Credits

Overall the course draws on the fundamentals of risk management strategies and policies related to manmade and natural threats to critical infrastructure. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation's infrastructure. The emphasis of this course is on "hands-on" experience whereby students will "learn by doing" analysis.

Prerequisite(s): For MA students and can be offered to undergraduate students who are in the 4+1 program.

HLSP 532 Disaster Management and Preparedness 3 Credits

This course provides an overview of the following: 1) various types of natural and manmade disasters that communities are vulnerable to, and 2) how to develop corresponding preparedness, response, recovery, and mitigation strategies. Upon completing this course, students will be able to assess and develop the following: 1) preparedness plans for disaster response, 2) monitoring and evaluation plans for disaster response, 3) early warning systems plans for risk reductions, and 4) response, recovery, and mitigation strategies. Students will also learn about existing and developing domestic and international Disaster Risk Reduction models. This includes, but is not limited to: 1) strategies that prevent and minimize casualties during disasters, and 2) logistic and operational challenges. Special consideration will also be given to the impact of the social and political processes associated with disaster policy and planning.

Prerequisite(s): For MA students and can be offered to undergraduate students who are in the 4+1 program.

HLSP 533 International Law and Armed Conflict 3 Credits

By literalizing the "war on terror," governments have broken down the distinction between what is permissible in times of peace and what can be condoned during a war. In peacetime, governments are bound by strict rules of law enforcement. For example, lethal force can be employed in law enforcement only if necessary to meet an imminent threat of death or serious bodily injury. Those detained by police must be charged and tried. However, in wartime, law enforcement rules are supplemented by a more permissive set of rules embodied in international humanitarian law, otherwise known as the law of armed conflict. Under such wartime rules, unlike during peacetime, an enemy combatant can be shot without warning (unless he or she is incapacitated, in custody, or trying to surrender), regardless of any imminent threat. If a combatant is captured, he or she can be held in custody until the end of the conflict, without any trial. This course explores how these two sets of rules have developed, both by customary international law and by international conventions, analyzes under what sorts of circumstances one set of rules should apply instead of the other, and examines the legal consequences of governments fighting the "war on terror" by expanding the boundaries of the law of armed conflict beyond the traditional battlefield to wherever terrorists hide, run, or plan. Students will receive a solid foundation in the law of armed conflict and will analyze complex legal problems occurring at the intersections of international humanitarian law, international human rights law and national security law.

Prerequisite(s): For MA students and can be offered to undergraduate students who are in the 4+1 program.

HLSP 534 Cyber Strategy and National Security 3 Credits

The course examines issues and challenges related to national security concerns and cybersecurity. The course provides students with tools and critical thinking skills in order to identify and analyze challenges and opportunities to the nation's cyber infrastructure. The emphasis of this course is on "hands-on" experience whereby students will "learn by doing" analysis.

HLSP 541 Hactivism and Cyberviolence 3 Credits

Hactivism is a process designed to be "the creative use of computer technology for the purposes of facilitating online protests, performing civil disobedience in cyberspace and disrupting the flow of information by deliberately intervening in the networks of global capital" (Gunkel 2005). This course addresses the challenges of hactivism for policymakers involved in domestic and international information conflict and cybersecurity related to this process. It does so by critically examining the processes of digital vandalism, cyberprotest, advocacy and persuasion used to elicit political, social and economic change. The primary focus of the course is on non-state actors and organizations who engage in the process of hactivism and cyberprotest movements.

HLSP 545 Loyalty and the State of Exception 3 Credits

The course enquires into cases ranging across Europe, the US, in which liberal democratic governments, under stress because of subversion, sabotage, invasion, rebellion, or the effects of economically caused chaos, have suspended, if not dissolved, constitutionally guaranteed civil liberties. Under emergency situations, organs of national security are energized; organs of opinion and electronic media including internet newsgathering, opinion expression and formation, may be censored; citizens may be enlisted to report to and inform on their neighbors. Regimes of exception may severely curtail academic freedom and university life; they may regulate voluntary associations by means of secret or not so secret surveillance of meetings, and a demand for lists of members and financial contributors. States of exception may deploy methods of coercion usually proscribed in "normal" times, e.g., suspension of habeas corpus rules; extended if not indeterminate periods of detention of suspects; and techniques of "enhanced interrogation" that may violate constitutional and international law. Using a number of case studies, the course inquires into the conditions under which liberal democracies transform themselves into states of exceptions; the effects of such transformations on individual and civic life; and the procedures by which states no longer under stress return to liberal democratic procedures and recovery of civil liberties.

HLSP 550 American National Security 3 Credits

The course is part of the foundational sequence of the M.A. in Homeland Security Policy. The course trains students to think strategically and critically about major issues facing American National Security.

HLSP 551 Global Security 3 Credits

This seminar critically addresses the foundations of international security. It will examine the concept of security from both the macro and micro level. We will discuss a mix of security strategies (balance of power, alliances, rearmament, collective security, deterrence), theoretical perspectives on security (Neorealism, Neoliberalism, Critical Theory, Copenhagen School), great power and third world security, democratic and non-democratic security, classic threats (changes in relative power, proliferation) and new threats (environment, population movements, terrorism), and concepts of security ranging from state survival, to societal security, to unit level-variables such as Human Security.

HLSP 552 U.S. Foreign and Security Policy 3 Credits

This course emphasizes the main theories of and themes in American foreign policy since the end of the Second World War. We will examine the patterns that have permeated American Foreign Policy since 1945, and discuss the roles that various actors play in the foreign policy process. We will use theoretical concepts to discuss the major events in American foreign policy over the last half of a century. The course will focus on both the conduct and formulation of American foreign policy. Detailed knowledge of the policy-making process, including legal and institutional restraints and standard operating procedures, is clearly essential for all students of foreign policy. Yet, only by exploring America's past actions in the global arena and only by searching for historical precedents and patterns can students fully grasp the dilemmas facing the United States today.

HLSP 553 Cyber War 3 Credits

Cyber attacks are a growing concern for international community. When does a cyber attack constitute an act of war or is merely an inconvenience? Is cyber power military power? How prevalent are such attacks, and to what extent can cyber attacks lead to conventional conflicts? Will cyber attacks by non-state actors render more power to such players in destabilizing states? This course explores the different types of issues in cyber wars, including mechanisms through which targeting of communication technology could escalate tensions and lead to an armed conflict, and ways through which states and international organizations could limit the de-structive potential of cyber technology.

HLSP 554 Asymmetric Conflict: When The Weak Attack The Strong and Succeed 3 Credits

Why is it that the weak challenge the strong and sometimes manage to succeed? In fact, between 1800-2003, nearly 30 percent of all international conflicts waged against more powerful adversaries, the weaker party came out victorious. And the weaker actors have achieved more victories over time. Asymmetric conflict or competition between a weak and a strong adversary is all around us. From North Korea to Iran defying the United States and risking military confrontation through nuclear tests and drone shootings, the weak it seems defy the basic expectation that possession of material power is an all-time guarantee of security. This course examines why the weak rise against the strong, how they manage to succeed, and in what capacity. We focus on unconventional, conventional, and hybrid tactics of the weak and the implications for U.S. strategy development. We rely on cases of international conflicts and insurgencies to derive insights about the theory of asymmetric conflict onset and termination and to predict future trends in the struggle between the weak and the strong.

HLSP 555 Insurgency and Counterinsurgency: U.S. Wars in Iraq & Afghanistan 3 Credits

Intrastate rather than interstate conflicts account for majority of armed conflicts today. The outbreak of the Syrian insurgency, the challenges experienced by U.S. forces in Afghanistan and Iraq, and humanitarian crisis in Yemen illustrate that stickiness of the problem. Today's civil wars are mostly insurgencies, conflicts with the use of guerrilla tactics. Increasingly, they involve multiple non-state actors challenging the government. What explains the onset of such conflicts? What role do ethnic and religious differences play in conflict initiation? How do guerrilla fighters acquire the means to wage their war? Is democracy a solution to conflicts? Are insurgencies a threat to U.S. security and economic interests? Why has the United States struggled with its counterinsurgency operations in Iraq and Afghanistan? And what lessons have been learned for future management of such threats? The course explores the onset, management, and termination of insurgencies, with special focus on current debates on counterinsurgency approaches. We will focus on the role of resources, state capacity, ethnic/religious differences and power in setting the stage for the conflict to start. We will then explain why insurgencies are difficult to end, and why the United States has struggled to stabilize the situation in Iraq and Afghanistan. Lastly, the course will focus on conflict management by emphasizing specific counterinsurgency approaches, including population and state-centric strategies. We will explore in what ways the United States, in particular, has been successful in these areas and why it has failed in others. This course relies on classroom discussions, peer collaboration, creative thinking exercises/projects, simulation, game exercise, and case study analysis to facilitate learning and student engagement.

HLSP 562 Responding to Collective Threats: Terrorism & Beyond 3 Credits

The difference between the professional and the novice in Homeland Security is not measured by the number of "items" one knows but by the ability to sift through the mounds of information, identify what is important, and form causal links between what was selected. The aim of this course is to familiarize students with the main methods by which the important relevant data in Homeland Security are identified and linked to produce a coherent understanding of and reaction to collective threats. Students will focus on how to conceptualize and respond to collective dangers, including contemporary events that may arise throughout the semester.

HLSP 567 Global Immigration Trends and Security Issues 3 Credits

Amidst the broader trends of international politics that address the growing flow of goods, capital, and information across state borders, the movement of people is a permanent and expanding feature. However, central to the notion of the political identity of the nation-state is the ability to control the entry of non-citizens. The regulatory power of the nation-state to control its borders is at least threatened by the migratory movements of people. People are driven from their homes by conditions of war, economic difficulty, or environmental disaster. Millions of people migrate permanently each year, and about 20 million are refugees and seek political asylum worldwide. The vast majority of refugees are women and children—this is the hidden truth of the post-Cold War order, huge numbers of displaced women and children. These numbers are significant, particularly since the general movement heads in one direction, toward advanced industrial states, mainly Western Europe and the United States. About 35 million legal and illegal immigrants live in the United States. Immigrants account for 11.5 percent of the total population, the highest percentage in 70 years. Critics warn that if current trends continue, by the end of this decade the immigrant share of the total population will surpass the all time high of 14.8 percent reached in 1890. Understanding immigration and refugee issues in this interdependent world will help us to gain insights into the workings of political, economic, and social forces both within receiving and sending states as well as the international regime which regulates these movements. The topics addressed in this course go beyond simple models of utility and efficiency since the questions of immigration and political asylum are often deeply emotional issues for societies; the issue also has a significant moral dimension.

HLSP 590 Master's Thesis 3 Credits

Students will complete an original substantive research paper that will build on prior research in Security Studies or related discipline.

HLSP 591 M.A. in Homeland Security Internship 3 Credits

The course is part of the capstone requirements of the M.A. in Homeland Security Policy. The course will have students complete an internship, self-evaluation and write a reflection paper outlining their experience working in a security related position.

HLSP 690 Research & Creative Expression 1-4 Credits**Interdisciplinary Studies (IND)****IND 600 Supervised Study 1-4 Credits****Literacy (LITR)****LITR 500 Multimodal Teaching and Learning 3 Credits**

As we consider the 21st century's rapid expansion of information and text it is timely to take a critical view of what literacy means in the 21st century and how it is influencing children's literacy development and the work of educators. Many argue that the rapidly evolving use of technology is potentially shifting the ways in which we construct and comprehend information, or is it? In this hybrid/online course, we aim to explore these sometimes competing conceptions of text as we consider what these new literacies mean for children's literacy development as well our own work as educators.

LITR 501 Psychology and Pedagogy of Literacy Processes 3 Credits

Studies the communication process from a componential point of view, including language acquisition and development, perception, comprehension and cognition, composition, and language systems. A review of the literature in each area as well as a survey of models of reading and language is included.

LITR 502 Curriculum, Instruction and Supervision in Literacy 3 Credits

Reading and literacy pedagogy for ALL learners, gifted, average, and diverse learners is the course content. Current strategies for teaching comprehension, composition, vocabulary, language study, and independence skills are learned in a workshop setting. How to manage literacy instruction through content areas for all aged children in mainstream classrooms is studied. Parent education and inservice training are also included in course content.

LITR 504 Diagnosis and Correction of Literacy Abilities and Challenges: Seminar and Practicum 3 Credits

Studies reading/language arts abilities and challenges and assessment measures. Observational techniques and diagnostic teaching for assessment are stressed. Students will apply concepts learned in seminar to their associated practicum/field experience.

LITR 508 Literacy and the Bilingual/Bicultural Child 3 Credits

Presents multidisciplinary and interdisciplinary perspectives on bilingual/bicultural children and their reading process. Strategies and materials for second language reading instruction are suggested and discussed.

LITR 510 Research and Survey of Texts for Children and Adolescents 3 Credits

This course surveys developmental trends in texts for children and adolescents. Students will become knowledgeable about the theoretical and practical aspects of the study of the texts (both digital and print) available for youth and adolescents. Candidates will explore their own assumptions about text and the relationship to literacy development. Course participants will explore strategies for integrating print and non-print texts into the school curricula in ways that support youth and adolescent literacy development.

LITR 560 Writing Project at Rider 3 Credits

Examines theory, research, and practices in the teaching of writing K-12, with emphasis on improved practices in teaching writing as well as the personal writing of participants. Students investigate relevant local and national standards and curriculum, design, present, and respond to peer demonstration lessons in writing, and publish to the National Writing Project e-anthology. Further participation in NWP activities is encouraged and supported. This Invitational Summer Institute is part of the National Writing Project network. Project participants, called Summer Fellows, become Teacher Consultants upon completion of the Institute and are expected to maintain affiliation with the Project and to participate in the dissemination of professional development in writing instruction K-12 for all subject areas.

LITR 600 Independent Research and Study in Literacy Education 1-3 Credits

Course content is designed specifically to meet specific academic needs or interests of students who wish to engage in independent study related to literacy education.

Marine Sciences (MAR)

MAR 580 Independent Marine Science Field Study 4 Credits

This field-based course provides a practical experience in integrating marine science with pedagogical concepts. Students will use scientific methodology to explain marine ecosystems through specially designed, inquiry-based exercises. During these activities, students will address the process of applying college-level content to their own classroom settings, considering national and state standards. Hands-on, field-based exercises will provide experience with a diversity of marine habitats and the biological, geological, hydrological, and physical processes that influence them. Visited habitats can include rocky intertidal, salt marsh, tidal flat, beach and channel sand bars. As a result, students will develop field and laboratory skills in marine science and use them in designing materials for their own classroom use.

Master of Accountancy (MACC)

MACC 611 Professional Research and Communication 3 Credits

Effective communication and interpersonal skills are key for success in the accounting profession. This course is an interactive seminar designed to provide a strong foundation in professional research and to develop communication and interpersonal skills with an emphasis on the communication and interpersonal challenges that accountants commonly face. Course work is primarily base based and includes a wide variety of video and written assignments that require research to develop accounting services and present to guest professionals and the "client".

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 650 Seminar in Federal Taxes 3 Credits

The course examines tax compliance and basic planning concepts available to C corporations, S corporations, partnerships, gifts, estates, and trusts. Topics include tax issues involved in the decision to select a particular form of business organization, fundamental concepts of interstate, international, and New Jersey taxation, and to expose the student to a variety of common tax returns, applicable to the above topics.

Prerequisite(s): completion of ACC 410 or ACC 410P.

MACC 652 Analysis of Accounting Data 3 Credits

This course uses information technology and data analytical techniques to conduct analysis needs commonly faced by accounting professionals. The course uses cases and projects to pursue such areas of decision concern as financial statement analysis, the evaluation of audit risk and selected additional topics.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 654 Issues in Financial Reporting 3 Credits

This course uses the conceptual framework to examine standards for financial reporting. Theoretical and conceptual assessments of current reporting issues pertaining to asset valuation and income measurement are addressed through cases, readings, and projects. Topics to be investigated from term to term vary depending on their importance and timeliness to the profession. This course should be taken first or early in the program.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 656 International Dimensions of Accounting 3 Credits

This course examines the global applications of accounting principles and practices, including the relationship between international accounting issues and company strategy. Topics include theoretical and societal considerations of international accounting issues, the identification of transnational accounting practices, and attempts at harmonization.

Prerequisite(s): completion of the Preliminary Accounting Requirements.

MACC 658 Governmental and Not-for-Profit Accounting 3 Credits

This course provides an in-depth study of the concepts, objectives and techniques of the evolving field of accounting for nonprofit institutions and organizations. Areas emphasized include municipal and state governmental units, hospitals, colleges and universities and service organizations. Problems, cases and selected readings are employed.

Prerequisite(s): completion of Preliminary Accounting requirements.

MACC 662 Auditing Practice & Problems 3 Credits

This course is an advanced course in auditing. The course examines current auditing issues, including professional ethics, internal control, risk assessment, data analytics, cybersecurity, other topics. Topics include basic principles of Generally Accepted Auditing Standards and PCAOB standards, the audit process from the stage of accepting an audit engagement to the stage of completion of the audit, various types of reports that are issued by independent auditors, legal liabilities of independent auditors, ethical responsibilities of auditors and current issues facing the auditing profession (e.g., litigation, auditor independence), role of various entities that influence the public accounting profession (e.g., PCAOB, AICPA, State Societies of CPAs, SEC, IRS) and other types of services (e.g., assurance services) that are provided by CPAs. A wide variety of teaching tools are employed including extensive use of case analysis, online lectures, videos, readings and data analytics software.

Prerequisite(s): ACC 400 or ACC 400P.

MACC 663 Fraud and Forensic Accounting 3 Credits

This course provides a background in all areas of forensic accounting including: fraudulent financial reporting and the detection of fraud, money laundering and transnational flows, courtroom procedures and litigation support, as well as cybercrime. A wide variety of teaching tools are employed including extensive use of the professional literature, case analysis, videos, role playing and text materials.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 664 Issues in Managerial Accounting 3 Credits

This course examines current management accounting practices with an emphasis on world class developments and strategic implications to the firm. Integrates current management accounting literature with considerations of planning, control, decision-making and information needs of the firm.

Prerequisite(s): completion of ACC 302, ACC 302P or PMBA 8220.

MACC 665 Fraud Detection and Deterrence 3 Credits

This course explores contemporary forensic accounting topics pertaining to fraud examination, detection and deterrence. Topics include audit responsibility and reporting, professional judgment, quality control and developing effective policies in preventing and detecting economic crimes. Students will apply relevant fraud examination techniques to a variety of settings.

Prerequisite(s): ACC 310 or ACC 310P, ACC 311 or ACC 311P, and ACC 400 or ACC 400P.

MACC 667 Business Valuations: Fundamentals, Techniques and Theory 3 Credits

This course examines fundamentals of business valuations including basic, intermediate, and some advanced concepts and methodologies required by accounting and finance professionals in valuing a closely held (privately-owned) business where there is no market price.

Prerequisite(s): completion of PMBA 8040 and PMBA 8020 or the Preliminary Accounting Requirements.

Prerequisites: PMBA 8040 or VL12 with a score of WV AND PMBA 8020 or VL10 with a score of WV OR VL25 with a score of WV OR VL26 with a score of WV.

MACC 668 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisites: ACC 302, ACC 302P or PMBA 8220.

MACC 670 Accounting Internship 3 Credits

This course provides on-site experiential learning through supervised employment with a participating company. Students will be reviewed periodically by senior staff. Academic assignments, including a formal report, will be developed in conjunction with a faculty member. Permission of the instructor is required.

MACC 690 Special Topics 3 Credits

This course provides study of a timely topic that represents a dimension of business administration or accounting that not covered in a regular course. Such a topic may be offered by the Accounting Department. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Musical Theatre (MTR)**MTR 511 Music Theater Ensemble 1 Credits**

The performance-based, auditioned music theater ensemble engages multiple singers/actors/dancers in performance, utilizing scenes from music theater literature as the primary material. Emphasis is placed upon group interaction and building an ensemble. This ensemble often is asked to perform for University sponsored events.

Organizational Leadership (LEAD)**LEAD 500 The Practice of Leadership 3 Credits**

This course allows students to gain an understanding of the practice of leadership and how they can develop as leaders. Students will explore leadership models, creativity in organizations, and approaches to decision making as they begin to form their own leadership philosophy.

LEAD 510 Organizations: Design and Dynamics 3 Credits

This course will provide students with foundational knowledge in the area of organization studies. Students will gain insight into organizational structure and how it affects interdepartmental behaviors, communication and work flow. The course emphasizes how organizational environment and culture generate and reinforce the way organizational systems work and how leaders operate within these organizational contexts.

LEAD 511 Facilitating Culture and Process Change in Organizations 3 Credits

Organizational culture and existing processes can enable productive and effective environments, or they can be barriers to carrying out the central missions of corporations, not-for-profits, governmental or educational institutions. For organizations to thrive and survive in the future they must be able to change and develop rapidly. This course provides a working knowledge of the key theories and practices necessary to be an effective change agent. Students develop skills in diagnosis, design of interventions and strategies for communicating change.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 512 Forms of Diversity in Organizations 3 Credits

Increasingly, leaders and employees are part of a more diverse, multiethnic and globally influenced workforce. Students will become more conversant with forms of diversity, such as different cultural traditions, as well as differences in generational sensibilities, ableness, gender, and level of adult development. Students will learn about the different "worldviews" which organizational members bring into the organization, and how that affects their ability to work together. The course develops students' knowledge of and skills in practicing: principles for optimizing human performance in organizations, cultural intelligence, human diversity, and leading multicultural organizations.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 531 Developing The Human Side of Organizations 3 Credits

This course examines Strategic Human Resources Management (SHRM) within today's organizations, and is designed to provide students with a comprehensive understanding of SHRM practices from a systemic and strategic perspective. Students learn approaches leaders use to recruit, select, evaluate, and develop employees and strategies to create a positive work environment.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 532 Program Design for Training and Development in Organizations 3 Credits

This course provides a full circle approach to workforce training and development that is applicable to professionals in human resources, organizational development, or other leaders who see themselves as trainers, mentors and coaches. The course is designed for students to explore "real world" applications for programs, services and operations in a training environment, and covers key principles such as adult learning theory, facilitation skills, curriculum development, needs assessment, training methodology and techniques, resources and constraints, as well as learning how to evaluate and improve the efficacy of training programs.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 533 Conflict and Crisis Resolution in Organizations 3 Credits

Leaders face conflict and crisis in their organizations. Being effective in their resolution is an important leadership attribute. Skills that support positive and integrative outcomes include mediation, negotiation and crisis resolution skills. This course will use multiple case studies and role-playing assignments to engage students in understanding how individuals and teams handle mediation and negotiation scenarios. The course will also use multiple case studies to enhance students' understanding of the components of effective and ineffective leadership for crisis.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 534 Facilitation and Team Leadership 3 Credits

This course examines the characteristics and behaviors of teams that produce good results and/or generate new ideas. The focus of the course is on how to lead high functioning teams and the development of facilitation capabilities, so that students can effectively lead teams and organizations.

Prerequisite(s): LEAD 510 or concurrent with LEAD 510.

LEAD 540 Strategic and Financial Decision-Making in Organizations 3 Credits

This course explores the importance of information and financial resources within the culture of organizations, and the necessary relationship that exists between the two. The course draws on current literature and student experience to explore resource management and focuses on the effective use of information resources within the boundaries defined by financial realities. The relationship between data analyses and effective decision-making will be explored.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

LEAD 550 Organizational Research 3 Credits

The purpose of this course is to prepare future organizational leaders to read professional journal articles, plan research, and critique research. The course covers basic research methods, such as experimental, ex post facto, correlational, case study, time series, interviews, surveys, and basic statistics in terms of understanding and selecting statistics. These concepts are taught within the framework of organizational leadership. This course should be taken at the end of your program.

Prerequisite(s): LEAD 500, LEAD 51. Permission of Program Director required.

LEAD 551 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 552 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 553 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 554 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 555 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 556 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 557 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 558 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 559 Selected Topics in Organizational Leadership 3 Credits

As a Selected Topics course, the content will vary according to the topic or issue under consideration. Students will study important topics related to leadership within organizations. They will examine and analyze theoretical work, conduct background research, interpret findings and develop positions in regard to the topic under study. Depending on the topic, they may propose and plan policy or develop programs to influence change in organizations.

LEAD 598 Capstone in Organizational Leadership 3 Credits

All MA candidates complete a capstone research project to demonstrate the application of core program competencies to a specific organizational or leadership problem. Reflecting upon their own leadership philosophy developed throughout the program, students will formulate, research, and write a leadership capstone paper that integrates the skills and concepts from the core courses as students use quantitative and qualitative methods to analyze a problem. Core and concentration courses should be completed before taking this course.

Prerequisite(s): Must be taken in last semester of study. Permission of Instructor required.

LEAD 600 Independent Study and Research in Organizational Leadership 3 Credits

The content of the course varies with the academic research interests of students who wish to engage in independent study related to the core content of organizational leadership and/or one of the concentrations in higher education administration, communication, information technology, and counseling-related services.

Professional MBA (PMBA)**PMBA 8000 Executive Communications 3 Credits**

Professionals spend about seventy percent (70%) of their work-time communicating with other people. It is therefore no surprise that, without good communication skills, it is impossible to succeed in one's workplace. Yet, effective communication skills do not come naturally for most people. This course aims to prepare you to speak compellingly, write clearly and concisely, listen actively and critically, and persuade others by constructing sound arguments. To that end, we will learn the key aspects of communication: audience analysis, communicator credibility, message construction, and delivery. Deliverables will include written documents and oral presentations, as well as both individual and team presentations. Importantly, in doing so, you will enhance your leadership potential in your workplace by motivating your colleagues, team, and organization to work toward important goals.

PMBA 8010 Information Technology Proficiency 1.5 Credits

Computing proficiency requires understanding implications of advanced information technologies and the ability to successfully apply these technologies in an increasingly global society. This course will enable students to effectively use specific information systems tools (spreadsheet and database management) to begin to design applications for effective decision making.

PMBA 8020 Fundamentals of Accounting 3 Credits

For those students having no previous knowledge of accounting. Subject is approached from the point of view of the user of accounting information rather than that of the accountant who supplies the information. Surveys mechanics of accounting as a means to an end, emphasizing accounting as a tool of management and the language of business. Problems and cases bring out the managerial implications of accounting.

PMBA 8030 Economic Analysis 3 Credits

An intensive exposition of the essentials of price theory and income and employment theory. For students with less than a year of introductory economics at the undergraduate level. Topics include an analysis of markets, the nature and characteristics of producer behavior, the theory of pricing in competitive and non competitive markets, and their welfare effects. At the macro level, coverage of the economy in the short run deals with economic fluxuations, fiscal policy, and monetary policy. An examination of the economy in the long run covers factors effecting economic growth.

PMBA 8040 Basic Financial Principles 1.5 Credits

The central unifying theme of this course is valuation. Valuation is the basis for decisions in all major areas of finance. This course begins with a discussion of basic concepts including time value of money and its application for valuation of stocks and bonds and analysis of risk and return. Further application of valuation for capital investment projects made by a firm is explored by introducing the techniques of capital budgeting.

PMBA 8051 Fundamentals of Statistical Analysis 3 Credits

Covers basic statistical techniques useful in business decision making. Includes descriptive statistics, event probability, random variables, sampling distributions, regression analysis and topics in statistical inference.

PMBA 8052 Models and Methods of Operations Management 1.5 Credits

This course provides students with some of the most frequently used quantitative tools necessary in analyzing and resolving issues and problems in managing service and/or manufacturing operations. These tools are required in PMBA 8250 Operations and Supply Chain Management

Prerequisite(s): PMBA 8051.

PMBA 8060 Basic Marketing Principles 1.5 Credits

The purpose of this course is to provide students with an operational understanding of basic marketing principles and concepts. This will be done through interactive exercises and discussions based both on primary source and textbook readings as well as discussions and critical examinations of current marketing practices in companies and industries of interest to the students. Topics covered include environmental analysis, target marketing, product and service strategy, integrated marketing communications, channels of distribution, pricing practices, and the interface between marketing and corporate strategic planning.

PMBA 8070 Management: Theory & Application 1.5 Credits

A foundation course that provides an introduction to the theory and practice of management. The management functions of planning, organizing, leading, and controlling provide an organizing framework for examining current management challenges (e.g. globalization, ethics, diversity, and multidimensional organizational structures).

PMBA 8210 Information Technology Management 3 Credits

This course introduces the theory and practice of Information and Communication technologies deployment in organizations. This includes planning, analysis, design, and implementation of computer-based management information systems (MIS). The course emphasizes an understanding of emergent cutting-edge technological phenomena and the effect of information systems on the practice of management.

PMBA 8220 Strategic Accounting for Manager 3 Credits

This course emphasizes the issues encountered by managers regarding performance measurement, incentives, ethics and strategic management accounting tools. Students will learn to recognize ethical issues and apply a code of conduct to those issues, understand the criteria for recognizing revenue, analyze cash flows for investment decisions, compute measures of returns on investments, and understand the uses of a Balance Scorecard in performance evaluation. This course will also cover transfer pricing issues and methods in domestic and international settings, the application of differential analysis to a variety of short-run decisions, and the application of traditional costing methods, activity-based costing, activity-based management, and target costing to products and services. Preparation of a master budget and its role in planning, control, and decision making is also discussed. This course is not open to MAcc students.

Prerequisite(s): PMBA 8020.

PMBA 8230 Managerial Economics 3 Credits

Focuses on using economic methods for making managerial decisions affecting the value of the firm. Topics include demand analysis, production and costs, employment decisions, project evaluation, profit-volume analysis and pricing strategies under a variety of settings. The course emphasizes integration between economics, accounting, and finance.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8240 Applied Corporate Finance 3 Credits

This course is designed to further develop the students' skills through practical application of concepts and tools taught in prior finance courses. Students will learn by solving real-world case studies and learning to communicate clearly their decisions to both sophisticated and lay audiences. The primary method of instruction is the preparation, presentation, and discussion of finance cases. Each case study session will be preceded by lectures and discussion of the main theoretical concepts. The case studies considered will cover a wide range of corporate financial problems including value creation, capital budgeting, capital structure, cost of capital, and mergers and acquisitions. Throughout the course, attention will be given to the international dimensions of the issues and problems presented and discussed.

Prerequisite(s): Completion of PMBA 8040 and PMBA 8020.

PMBA 8250 Operations & Supply Chain Management 3 Credits

This course provides MBA students with the current knowledge and practice of operations and global supply chain management. Supply chain management has become one of the most important and talked about topics in business in recent years. Many companies have realized that they can reduce their costs, increase profits, and increase customer satisfaction by improving their supply chain practices. It is also evident that most supply chains extend beyond the borders on the U.S., and consequently, have global components and challenges. This course is designed to prepare students to meet operations and supply chain related challenges in their careers.

Prerequisite(s): Completion of PMBA 8051 and 8052.

PMBA 8260 Mkt Analysis & Decision Making 3 Credits

The purpose of the course is to provide the analytical skills required to understand complex marketing situations in order to develop and implement appropriate marketing strategies. The decision-making processes in the management of product planning, pricing practices, selection of channels of distribution and development of effective promotion programs are investigated. This involves identification and selection of appropriate target markets, the effective use of marketing research and recognition of organizational dynamics. The case approach is used to develop communication skills and further build team skills as students interact with peers in solving problems.

Prerequisite(s): PMBA 8060.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): PMBA 8070.

PMBA 8290 Legal and Ethical Aspects of Management 3 Credits

The purpose of this course is to prepare students to meet the legal, ethical, and regulatory challenges and opportunities they will encounter as they conduct business as managers and entrepreneurs. To excel, managers and entrepreneurs must recognize that the law is important to firm success and that they must always consider the legal ramifications of their business decisions. Students will learn how to identify legal and ethical issues before they become legal problems and how to communicate and work collaboratively with legal counsel. The course begins with an overview of business ethics and social responsibility and goes on to cover the U.S. court system and the laws of contracts, torts, and intellectual property. The course covers corporate governance issues including the fiduciary duties of officers, directors, and controlling shareholders, public and private offerings of securities, and securities fraud. Environmental regulation, product quality, legal aspects of the employment relationship (as they relate to the liability of the corporation and managers for the acts of their employees), wrongful termination, discrimination, and sexual harassment will also be covered.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8303 International Business Study Tour 3 Credits

This course provides a cross-cultural perspective for conducting business outside of the United States. Students will gain a better appreciation of how culture, history, and politics influence organizational dynamics, transactions and business customs.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8311 Information Security for the Enterprise 3 Credits

This course will teach students how businesses can implement security policies which will protect their significant investment in computer systems. The course topics include but are not limited to security attacks, attack prevention and mediation and security audits. Security devices, firewalls, PC and server security, authentication methods and procedures, and network security will all be discussed. The course will be delivered through a combination of hands-on labs where students will evaluate and implement computer security on computers, and class lectures.

Prerequisite(s): PMBA 8210.

PMBA 8312 Business Intelligence Tech-Data Mining 3 Credits

In this course, students will learn to solve problems/exploit opportunities by processing datasets, interpreting results, and deploying solutions. This course provides hands-on experience with these tasks. Upon this base of experience, students will build a robust data mining methodology that can be applied to real-world investigations. The course of study will include Online Analytical Processing (OLAP), statistical and machine learning techniques, and unstructured text analysis. Students will learn to apply these techniques through the study of payroll, procurement, and expense report fraud. Cell phone and credit card fraud, credit and bankruptcy analysis, and customer relationship management will also be covered.

PMBA 8313 Electronic Commerce 3 Credits

Electronic commerce involves the use of information technology to improve, enhance, simplify or enable business transactions. This course examines such business, social, and technical issues of electronic commerce as the technology of the Internet, effective system strategies to attract and maintain customers, security, and electronic payment systems.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8314 Project Management 3 Credits

In our complex world of global economies and pervasive technology, change is constant. It is a persistent challenge to manage this change. It is the body of knowledge that is project management that helps managers address this change. This course will introduce students to project management for a variety of disciplines. The methods and techniques taught will be applicable not only to software development, but to any series of tasks that could constitute a project. The course content will cover the identification, approval, and management of complex projects. Various project management tools, techniques, and approaches will be covered.

PMBA 8315 Globalization and Technology 3 Credits

The emergence and growth of the global economy constitutes an epochal shift in the organization of the world. Technology has been a key component in the production and acceleration of these phenomena. This course introduces students to the latest theoretical and empirical literature on globalization as shaped by technology.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8316 Application Development for the Web 3 Credits

This class will examine application development for the Web platform in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications and the skills needed to develop applications using that architecture. Specific skills learned include programming with the JavaScript programming language, creating Web pages using the HyperText Markup Language (HTML) and Cascading Style Sheets (CSS). Other skills learned in this course include how to create user-friendly user interfaces, and how to retrieve and update information stored on computer servers.

Prerequisite(s): PMBA 8210.

PMBA 8317 Applied Data Management for Business Users 3 Credits

Learn the benefits of data sharing in a business organization, the benefits of the relational database model, how data is structured in a relational database model, and how data can be accessed in a relational database using the structured query language (SQL). The process of formatting, loading, and accessing data for data analytics will be shown as well as the interaction with data warehouse schemas such as the star schema and snowflake scheme.

PMBA 8318 Business Analysis and Design 3 Credits

This course will integrate the skills of business analysis with those of system design. Students will learn a dynamic visioning/planning process which will guide the development of a technology architecture model for the business enterprise. Students will learn requirements elicitation techniques and use cases. Design methods such as object modeling and prototyping and data modeling with enterprise relationship diagrams will also be covered.

Prerequisite(s): PMBA 8210.

PMBA 8319 Selected Topics in CIS 3 Credits

The study of a topic (or combination of topics) that represents some dimensions of computer information systems or has important and direct implications for CIS management. Topics recently covered include project management, data mining and data privacy. Theoretical foundations as well as applications may be explored. Readings, research, lectures, projects, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8321 Managerial Taxation and Strategy 3 Credits

This course is designed for students who are embarking on (or already in) careers in investment banking, corporate finance, strategy consulting, money management, or venture capital. The focus of the course comes from integrating the tax law with the fundamentals of corporate finance and microeconomics.

Prerequisite(s): PMBA 8020.

PMBA 8324 Financial Accounting & Report 3 Credits

Focus is on analysis and evaluation of alternative accounting methods and the relationship to company policy. Insight is gained through the reading of articles in leading accounting and financial periodicals and Internet research. Cases demonstrating financial reporting methods are assigned and discussed in class. Term project required. Topics include financial instruments, earnings per share, deferred taxes, post-retirement benefits and the accounting rule-making process.

Prerequisite(s): PMBA 8020 and PMBA 8040.

PMBA 8325 Enterprise Risk Management 3 Credits

This course explores current issues and world-class practices of risk management at an organizational level. Emphasis will be placed on the overall risk management cycle of identifying, assessing, responding and managing strategic, reputational, financial and operational risks using contemporary risk management tools.

Prerequisites: ACC 302 or ACC 302P or PMBA 8220.

PMBA 8335 International Trade & Investment 3 Credits

A study of the international economy in which business firms operate, and public policies that influence their activities. Includes international trade theory, balance of payments analysis, the international monetary system, barriers to trade, and the role of multinational corporations. This course applies to the Global Business concentration. This course will satisfy the International elective requirement.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8341 Corporate Treasury Management 3 Credits

This course is designed to provide an understanding of modern principles and techniques for corporate treasury management. The course materials are useful for finance, banking, accounting and information system professionals or small business owners. Topics include analysis of liquidity and solvency, credit and accounts receivable management, cash collection and disbursement systems, short-term investment and borrowing, management of treasury information and technology, multinational cash management, and other related topics. Success in this course will help students preparing for the Certified Cash Manager (CCM) exam.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8343 Investment Instruments and Strategies 3 Credits

Principles of investment analysis and portfolio management. Includes analysis of stocks and fixed income securities, mutual funds, international investing, margin trading and short sales, convertibles, stock options and financial futures. Hedging strategies, market forecasting and tax advantaged investments are also discussed. Makes considerable use of problems to illustrate concepts.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8344 Financial Market Operations 3 Credits

Flow of funds analysis is used to study financial intermediation and interest rate determination in money and capital markets. Includes the flow of funds accounts, funds flow through financial institutions, the demands for and supply of credit by economic sectors, and the impact of public policies on financial market behavior.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8345 International Financial Management 3 Credits

The techniques of multinational financial management are developed for enterprises that do business in more than one country and/or have assets and liabilities denominated in more than one currency. The management of foreign exchange and country risks is applied to working capital, capital budgeting, and capital structure decisions.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8346 Financial Modeling 3 Credits

Spreadsheets are utilized to analyze problems and cases. Students receive instruction in computer use beyond that available in other finance courses. Spreadsheet applications include valuation models, cost of capital, capital budgeting, risk and return, portfolio analysis, stock market analysis, and options and futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8347 Portfolio Management 3 Credits

Real-world application of the concepts and techniques of investment analysis and portfolio theory. Students interact with and make recommendations to professional portfolio managers. Topics include stock valuation methods, major forces driving movements in current equity markets, international investment opportunities, industry analysis, technical analysis and investment timing, evaluation of portfolio performance, analysis of business conditions and interest rates, and hedging portfolio risk with stock index options and financial futures.

Prerequisite(s): Completion of PMBA 8040.

PMBA 8348 Fixed Income Securities and Alternative Investments 3 Credits

This is an introductory course in fixed income securities and alternative investments. The first part of the course covers the markets for fixed income securities and their derivatives. Valuation of these securities and determination of the risk inherent in these securities are discussed. Methods for managing that risk, such as hedging and credit derivatives, are also discussed. The second part of the course covers a variety of alternative investments, including real estate funds, venture capital, hedge funds, and commodities. Valuation of these investments and determination of their risk are discussed.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8349 Personal Financial Planning 3 Credits

This course provides a background and an appreciation of the fundamental concepts and processes associated with Personal Financial Management. Various technical elements that are part of the study for a Certified Financial Planner certification will be covered including risk management, investments, tax planning, retirement planning, employee benefits, and estate planning.

Prerequisite(s): Completion of PMBA 8040 or any MAcc student with PMBA 8020 completed.

PMBA 8351 Introduction to Business Analytics 3 Credits

This course introduces (i) data analysis tools that are appropriate for generating useful information for decision-making and (ii) a framework for analyzing decisions based on partial information. Examples from financial analysis, marketing, and operations management are used to illustrate applications of the topics covered. Microsoft Excel and associated add-ins are used for the purpose of analysis.

Prerequisite(s): PMBA 8051.

PMBA 8352 Design Thinking and Innovation 3 Credits

This graduate course on Design Thinking and Innovation provides students with a framework for dealing with unstructured problems, and for managing the innovation process. This course introduces students to design thinking as a systematic approach to innovation, but also guide students through the process to identify and translate broadly defined opportunities into actionable innovation possibilities. Students who have earned credits for CIS 388 or equivalent cannot take PMBA 8352 for credit.

Prerequisite(s): PMBA 8210.

PMBA 8353 Digital Futures 3 Credits

This course is a holistic course drawing on all areas of Information Technology. It leverages the in-depth understanding of Technology that MSIS students possess and transforms such knowledge into a new skill set of strategic leadership development at the level of the firm, economy and society. It will enable the student to assess and respond to challenges in their current work environment as well as develop strategic leadership capacity going into the future. Case studies and readings will familiarize students with literature on rapid technology-led transformations such as Schumpeterian theories of 'creative destruction' and derivative theories of technological restructuring at the scale of an industry such as disruptive technology/innovation. Students will be engaged in a discussion of multi-firm cases of strategic innovation and will examine policy decisions by the firm and various ethical dilemmas engendered by technological changes of the last four decades.

Prerequisites: PMBA 8210.

PMBA 8354 Quality Assurance and Total Quality Mgt 3 Credits

This course integrates the concepts of statistical quality control and the practices of today's leading companies in creating systems of total quality management (TQM). Considers how various business functions (e.g., production, engineering and design of products and services, purchasing raw materials, providing technical assistance to customers, and statistical quality control) and their interrelationships can be used to create high-quality products, and, thus, high levels of customer satisfaction. Includes traditional statistical methods for process control, acceptance sampling, reliability and quality improvement, as well as numerous examples of U.S. and foreign firms at the cutting edge of TQM. Introduces current thinking of leading figures in TQM.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8355 Visual Analytics 3 Credits

This graduate course will equip the students with the fundamental skills to perform visual analytics with Tableau. Specifically, students will learn how to prepare a dataset for visual analysis, and how to "tell a good story" using basic and advanced visualizations. At the completion of this course, students will be able to apply best visualization practices and create effective visualizations to convey analytical insights to a business audience. Students who have earned credits for BDA 205 or equivalent cannot take PMBA 8355 for credit.

Prerequisite(s): PMBA 8351.

PMBA 8358 Data-Driven Strategies for Business 3 Credits

In this course, several real-world business problems will be presented as case studies for the application of descriptive, predictive, and prescriptive analytics. Relevant business areas for these problems include online recommendations, healthcare, sports management, marketing, and revenue management. Through these business case studies, students will (1) define a real-world problem in the context of business analytics (2) develop hands-on experience on implementing analytics methodologies (3) learn to derive and communicate insights from analytics results and (4) practice the formulation of data-driven strategies.

Prerequisite(s): PMBA 8051, PMBA 8351.

PMBA 8361 Business to Business Marketing 3 Credits

The practices and policies used in the marketing of goods and services to business and industrial buyers are analyzed, focusing on the market and demand for products, marketing research, product planning, channels of distribution, pricing policies and practices and the development of sales program and service policies.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8362 Marketing Communications 3 Credits

This course dynamically blends the concepts and issues of integrated marketing communications with real world experiences. It is highly interactive, with students spending time in teams creating solutions, presenting, and feeling the experience of being in real life marketing communications situations. Students also will be exposed to current and classic literature pertaining to the course content.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8363 Consumer Behavior 3 Credits

The purpose of this course is to provide the analytical skills required to understand the nature of consumer decision making and internal and external factors that influence buying decisions in order to develop and implement appropriate marketing strategies. A case study approach is utilized in this course. This will be done through the analysis of actual marketing problems faced by a variety of organizations. The readings and class discussions will also include internal and external influences on consumer behavior, marketing research tools, marketing strategies to reach consumers and shape consumers' opinions, the role of marketing communications and marketing mix elements in creating a unique value proposition, and managing consumer relationships.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8364 Marketing Research 3 Credits

An overview of the subject matter which will assist students in developing an appreciation for the use by marketing management of marketing research and marketing information systems in making marketing decisions. Topics include specific research procedures for gathering, processing, analyzing and presenting information relevant to marketing problems in such areas as: advertising effectiveness, product development, distribution channels, sales techniques, consumer behavior, and forecasting study of research planning, implementation, and interpretation of findings is facilitated by the use of cases or projects.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8365 International Marketing Management 3 Credits

Examination of the nature and scope of global marketing activities, including the theoretical framework of international marketing, foreign marketing environments, multinational markets, MNC information systems, strategic marketing decisions, and organization for transnational marketing. This course applies to the Global Business concentration.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8369 Selected Topics in Marketing 3 Credits

The study of a topic (or combination of topics) that represents some dimension of marketing or has important and direct implications for marketing management. Theoretical foundations as well as special applications of marketing decision-making may be explored. Readings, research, lectures, discussions or other appropriate methods are employed to stimulate student learning.

Prerequisite(s): Completion of PMBA 8060.

PMBA 8371 Human Resource Management 3 Credits

This course is an introduction to the field of human resource management (HRM). The goal is to provide students with an understanding of current corporate HR practices. Common HR problems and the tools and procedures for dealing with them will be discussed. Contemporary topics such as strategic HR planning, international staffing, career planning, workforce diversity, work/family balance, and work motivation will be examined. EEO guidelines and their implications for human resource functions will be discussed as well. A combination of conceptual and experiential approaches include discussions, case studies, exercises, small group activities, and lectures.

Prerequisite(s): PMBA 8070.

PMBA 8372 Management Skills 3 Credits

This is a practicum in interpersonal skills that are useful for practicing managers. Topics include motivating oneself and others, persuasive communication, creative problem-solving, managing conflict, using power constructively, managing change, and team management. Students are given opportunities to practice these skills in class and are asked to apply them to their current lives and report on the results of their applications. The course will provide students with a better understanding of the art of managing and of themselves as current or future managers.

Prerequisite(s): PMBA 8070.

PMBA 8375 International Management 3 Credits

This course focuses on the complexities of working and managing in a global business environment. Emphasis is placed on cross-cultural awareness, international communication, and negotiations. Students will explore the effect of culture on organizational behavior, managerial decision making, and global leadership.

Prerequisite: PMBA 8070.

PMBA 8376 Org Development & Effectiveness 3 Credits

This course focuses on Organization Development (OD), a discipline concerned with improving organizational effectiveness by means of planned, systematic interventions. The course will acquaint students with OD concepts, techniques, and skills. The course provides opportunities for students to explore and enhance their personal skills as change agents and consultants. The teaching/learning process emphasizes experiential activities and case analysis.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8377 Managing Workforce Diversity 3 Credits

This course explores the opportunities and challenges of the increasingly diverse workforce emerging in the U.S. today. It will address the knowledge and skills managers must develop in working with others who are different from themselves. Some of these differences are obvious - gender, race, age, and physical characteristics. Other differences are not as easily observed such as family structure, educational level, social class, and sexual orientation. Understanding and valuing diversity requires attitudinal self-assessment and change. Values, stereotypes, and prejudices will be explored through readings, reflective writing, and active involvement in discussions, projects, and activities.

Prerequisite(s): PMBA 8070.

PMBA 8380 Business Analytics Optimization 3 Credits

This course has been designed to provide professional MBA students with the current knowledge and practice of optimization business analysts use. Optimization aims at selecting the best alternative from among available alternatives according to a predetermined objective. In general it involves building a mathematical model and finding the best alternative through a mathematical procedure. Optimization techniques help decision-makers make fact (i.e. data) based decisions and offer the potential of making significant profits or cost savings. The main focus of this course will be on developing modeling skills to gain insight into a wide variety of business decision problems. In other words, the emphasis in this course will be on modeling practical business decision problems, use of relevant software for optimal solution, interpretation of results, and sensitivity analysis rather than the theory of mathematical solution techniques. Coverage of course material will follow the typical sequence of (1) identification and discussion of a business decision problem; (2) developing a graphical model (e.g. influence diagram); (3) developing a mathematical model; (4) computer solution; (5) interpretation of results and sensitivity analysis; (6) discussion of insights gained from the experience; (7) discussion of implementation issues. In addition, heuristics will be discussed when optimization techniques are not available or too costly.

Prerequisites: PMBA 8010 and PMBA 8051.

PMBA 8383 Entrepreneurship 3 Credits

The course deals with new business venture start-up. Topics include entrepreneurship concepts and characteristics, new venture types and pros/cons, choice of products/services, market study, marketing planning, financing, and business plan preparation. Practical exercises in developing business plans for new business ventures are part of the course.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8384 Consulting for New and Small Ventures 3 Credits

This course provides experience-based learning to students through the use of student teams to assist area small businesses/organizations. These small firms could have a variety of needs ranging from market research, improving financial reporting and bookkeeping, business planning, streamlining operational procedures, etc. This course will provide students the opportunity to experience in-depth analysis of an individual organization. The emphasis is on student consultants generating immediate, actionable recommendations for the client. Thus, this course is useful not only for those considering small business ownership, but provides an opportunity to students to learn entrepreneurial thinking.

Prerequisite(s): Completion of MBA pre-program courses and permission of instructor.

PMBA 8385 New Venture Launch 3 Credits

Students will start and run a new venture while under the supervision and guidance of faculty. Students will take a business plan they have developed and execute it. This is an opportunity to experience the launch process and learn hands-on how to adapt to the marketplace. Some businesses started in this class may also be eligible to receive venture funding from Rider.

PMBA 8386 Green Entrepreneurship 3 Credits

This course is both a traditionally academic graduate course and a practical, case study based, business development course. Lectures will present the scientific, technical, financial, and business underpinnings required to understand the rationale for and the range of solutions possible that businesses can utilize when initiating or developing sustainable practices or new entrepreneurs can consider as they develop new businesses. Students will be learning about real business examples and discussing how the technical aspects of sustainability interact with the more practical and immediate demands of running a business – making a profit and maintaining positive cash flow while acting ethically.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8389 Tax Planning for Entrepreneurs 3 Credits

The business and personal finances of an entrepreneur are integrally related. Often personal resources fund business operations and business resources fund individual necessities and obligations. This course is designed to familiarize the entrepreneur with wealth maximization and tax minimization strategies for business and personal activities. This course covers basic tax compliance concepts and includes personal financial planning and estate planning issues. Not open to MAcc students.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8397 Evidence Management and Presentation 3 Credits

This course addresses legal issues and practical considerations involved in the collection, acquisition, analysis and storage of digital evidence and presentation of digital and technical evidence to judges, juries and other decision makers. The law of evidence and its implications for the manner and method technical evidence is acquired and presented for consideration in court or in other proceedings (i.e. criminal, civil, or administrative). Requirements and preparation for the presentation of technical evidence as an expert or fact witness.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8402 The Business of Sports 3 Credits

This course examines diverse managerial issues involving the sports industry. The course covers topics at the league level, the team level, the athlete-agent level, and the college level. The constituencies with interests in sports issues such as athletes, fans, media, companies, advertisers, and legislators are discussed along with global aspects of sports enterprises. Valuation issues related to sports teams are also covered. The course is designed to integrate all aspects of businesses as they apply to sports with an emphasis on strategy, management, marketing, and finance.

PMBA 8403 Sport Analytics 3 Credits

This course will address the theory, development, and application of analytics in sports. Analytics refers to the use of data and quantitative methods to measure performance and make decisions. Students will learn about the application of analytics in sports for purposes of strategy, player performance, team management, sports operations, and fantasy competitions. The class will consist of hands-on labs, a data project, a research project, quizzes, and online discussions. Students will work on projects related to the use of analytics in the various professional sports leagues and college sports. This course assumes a basic level of skill working with Microsoft Excel.

Prerequisite(s): PMBA 8051 or waiver.

PMBA 8404 Sports Marketing 3 Credits

This course explores the complex and diverse nature of sports marketing. It applies fundamental marketing concepts to the sports industry, including the marketing mix, consumer behavior, marketing research, segmentation analysis, and assessment of marketing programs specific to sports. Guidelines for the formulation of marketing plans and strategies will be included. Trends, issues, and problems influencing the industry will also be examined. Discussions cover professional, collegiate, non-profit, and other areas of the sport industry.

PMBA 8405 Legal and Ethical Issues in Sports 3 Credits

The purpose of the course is to familiarize the students with the business of sports and various issues related to sports management. Legal, ethical, economic, social and managerial issues related to sports will be addressed. Sports law issues which will be covered include tort law, contract law, employment discrimination, antitrust law and constitutional law. Also covered will be the structures and authority of the organizations involved in amateur and professional athletics.

PMBA 8491 Business Law 3 Credits

Considers in depth the law relating to the sale of goods, commercial paper, and secured transactions as promulgated by the Uniform Commercial Code. Explores warranties, guarantees, remedies, and product liability. Also considers the law of agency, partnerships and corporations. International dimensions of sales law and related topics are addressed. Students who have taken BUS 211 Commercial Law or BUS 214 Advanced Business Law cannot take this course. This elective is particularly appropriate for students in the MAcc program and in anticipation of CPA law requirement.

Prerequisite(s): BUS 210 Introduction to Law: Contracts or its equivalent at another college or university; requires completion of MBA pre-program courses.

PMBA 8492 Ethical Issues in International Business 3 Credits

This course is an introduction to identifying, analyzing and resolving ethical dilemmas in both U.S. and international business, including reference to legal and regulatory issues. The course begins with a general introduction to ethics, considers ethical issues connected with the economic, legal and regulatory systems within which modern business takes place and heavily emphasizes contemporary cases that illustrate a wide range of ethical issues, including cases resulting in civil and criminal litigation. The primary focus of this course will be ethics in the international business environment. Most of the readings and discussion board topics, the group case studies and the individual research paper will have an international focus.

Prerequisite(s): Completion of MBA pre-program courses.

PMBA 8880 Strategic Management 3 Credits

This course provides an understanding of the strategic management process. Students will analyze and discuss concepts and cases relating to strategic management, make strategic decisions for a hypothetical company in the online computer simulation project, and develop a detailed action plan to resolve a hypothetical business situation. This course will cover the analysis of the strategic process of studying and forecasting the external environment of the firm, assessing the present and future enterprise strengths and weaknesses, setting enterprise goals with recognition of personal and societal goals, and evaluating performance and progress toward those goals. Provides the student with an integrated view of the functional decisions and corporate strategy.

Prerequisite(s): All other MBA breadth courses.

PMBA 8902 Independent Studies in Business Administration 3 Credits

Involves a program determined by the individual faculty member and approved by the program director. Written assignments are required as part of this rigorous academic experience. Students are eligible for a maximum of one independent elective and should have completed at least three breadth courses prior to the start of the independent study. **Prerequisite(s):** Completion of MBA pre-program courses and permission of the associate Dean of Graduate Programs.

PMBA 8904 Micro-Internship 1 Credits

In order to supplement in-class learning with practical training, this micro-internship may be taken for 1 elective credit. The internship may not be done with a student's current employer. The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined following the internship guidelines available from the Dean's office.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

PMBA 8905 Internship 3 Credits

In order to supplement in-class learning with practical training, an internship may be taken for three elective credits. The internship may not be done at a student's current employer. An internship may only be taken if the student has been enrolled for at least one full academic year and during the semester he/she receives credit for the internship is taking at least three graduate-level classes (including the internship course). The course will be supervised by a full-time faculty member and will follow a structure similar to that of independent study. Course grades will be determined by evaluations from the student's on-site supervisor, as well as the sponsoring faculty member.

Prerequisite(s): Completion of MBA pre-program courses and permission of the Associate Dean of Graduate Programs.

PMBA 8906 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8907 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8908 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8909 Selected Topics in Business Administration 3 Credits

The study of a timely topic that represents a dimension of business administration not covered in a regular course. Such a topic may be offered by any department of business administration. The nature of the course will be described in the appendix of the registration materials for the semester when the course will be offered.

Prerequisite(s): To be announced and completion of MBA pre-program courses.

PMBA 8989 Spec Topics Entrepreneurship 3 Credits

Special Topics in Entrepreneurship.

Psychology (PSY)

PSY 501 Introduction to Applied Psychology Skills 3 Credits

This course will provide students with an examination of several facets of applied psychology with a focus on consuming research, understanding differences in methods and perspectives, writing according to APA style, and demonstrating understanding of several methods and perspectives in applied psychology. These are necessary skills to function meaningfully in the field. We will review and evaluate scholarly literature from across several psychology application areas. This course is available to MA Applied Psychology students only and should be taken near the beginning of entering the MA program.

PSY 510 Introduction to Applied Behavior Analysis 3 Credits

This course will provide an introduction to applied behavior analysis. Students will learn the history and defining features of the field. Due to the scientific nature of applied behavior analysis, students will also learn characteristics and processes associated with the scientific method. Furthermore, foundational concepts will be defined, along with relevant behavior change procedures.

PSY 511 Principles of Learning 3 Credits

This course will provide students with more in depth understanding of the philosophical assumptions, characteristics and basic principles of behavior analysis. Students will have the opportunity to review concepts learned during Introduction to Applied Behavior Analysis. This course will also provide an introduction to the basic research in behavior analysis. Students will become more fluent in definitions, characteristics, principles, processes, and concepts of behavior analysis.

Prerequisite(s): PSY 510.

PSY 513 Functional Assessment 3 Credits

This course is designed to provide knowledge and skills of methodologies to conduct a thorough behavioral assessment, interpret the assessment data, and identify goals for treatment. Topics will include direct observation/data collection methods, data analysis, functional assessment, stimulus preference and reinforcer assessments, and ethical and professional issues. The second half of the course will deal specifically with functional analysis including the history of and variations to the methodology. The relationship between assessment techniques and the development of the least-restrictive but most effective behavioral intervention will also be discussed.

Prerequisite(s): PSY 510, PSY 511.

PSY 514 Single Subject Research Design and Analysis 3 Credits

Students will be introduced to the basic evaluative methods used in behavior analysis including various models of single subject design such as multiple baselines, reversal designs, and alternating treatment models. Students will design analyses, collect data, graphically display their data, and provide an analysis of findings. Students will read original behavior analytic research articles and practice analysis of findings.

PSY 515 Psychological Tests 3 Credits

Examines the history of psychological testing. Issues concerning the construction of psychological tests are discussed, including concepts concerning reliability, validity, and item analysis. The rationale and structure of the major tests of intelligence, aptitude, and personality are reviewed, including the Rorschach, WAIS, TAT, MMPI, and Bender-Gestalt. In the last section of the course, students are given hands-on experience in the administration, scoring, and interpretation of a standard test battery.

Prerequisite(s): any statistics course.

PSY 516 Ethics for Behavior Analysts 3 Credits

This course will familiarize the student with ethical issues and responsibilities of behavior analysts working in applied settings. Informed consent, due process, protection of confidentiality, and selection of least intrusive, least restrictive behavior change procedures will be presented and discussed within the context of case method. Ethical decision making processes will be emphasized, and the relationship between ethics and law will be explored.

PSY 518 Organizational Behavior Management 3 Credits

This course will provide an overview of research and practice in the field of Organizational Behavior Management (OBM), also referred to as Performance Management in organizational settings. Performance Management is a behaviorally-based area of specialization within the broad field of Industrial-Organizational Psychology. The concepts and techniques used in Performance Management originated from the field of behavior analysis.

PSY 519 Models of ABA Instruction 3 Credits

This course provides students with a general knowledge of the different procedures used to teach new skills and new behaviors in the field of applied behavior analysis. Areas covered will include the assessment of relative strengths and deficits, use of discrete-trial and naturalistic teaching procedures, use of reinforcement procedures to strengthen behaviors, use of motivating operations and discriminative stimuli, use of prompting and prompt-fading procedures to transfer stimulus control, use of shaping procedures to teach new behavior, use of task analysis and chaining procedures to teach new behaviors, use of precision teaching and fluency-based instruction, and use of personalized systems of instruction. Additionally, various components of the aforementioned areas will be integrated and culminate in two modules: one designed to teach communicative behavior and the other to perform discrimination training.

Prerequisite(s): PSY 510.

PSY 520 Interventions for Challenging Behavior 3 Credits

Students will review principles of behavior in the context of application to functional assessment and treatment of socially significant problem behavior. Topics including extinction, functional communication training, differential reinforcement, choice, environmental manipulations, and punishment will be covered. Students will move through the process of developing function-based interventions and writing behavior plans.

Prerequisite(s): PSY 510 and PSY 513 (or co-req).

PSY 521 Supervision and Management in ABA 3 Credits

This course provides students with skills needed to provide supervision and management in the field of applied behavior analysis. Students will apply the basic principles of behavior analysis to supervision and management of their staff and trainees. Areas covered include establishing performance expectations, selecting supervision goals based on assessment of current skills, how to train personnel to competence, performance monitoring and feedback, functional assessment and function-based strategies of personnel behavior, and how to evaluate the effects of supervision. Additional areas of discussion will include professional behavior, leadership, ethics, and professional development.

Prerequisite(s): PSY 510, PSY 511, PSY 513 and PSY 514.

PSY 522 Recent Research in ABA 3 Credits

This course provides an overview of recent behavior analytic research. Topics will vary semester to semester to capture changes in the field as they occur. Students will have the opportunity to practice reviewing, discussing, and interpreting research methodology, results, and potential areas for future research.

Prerequisite(s): PSY 510, PSY 511, PSY 513, PSY 514.

PSY 525 Cognitive Development 3 Credits

Compares and analyzes the major theories of cognitive development: Piaget, Information Processing, Vygotsky, Gardner, and Sternberg. The course describes cognitive growth from infancy to adulthood. Particular topics will include: concept formation, language acquisition, memory reading and writing, mathematical skills and sociocultural skills. Also of interest will be the use of cognitive theory in education, and understanding variations from the typical pattern of cognitive development as in mental retardation and prodigies.

PSY 530 Interventions for Individuals with Developmental Disabilities 3 Credits

The purpose of this course is to prepare students to work with individuals with a broad spectrum of developmental disabilities. The course will begin with a discussion of typical child development and milestones, address how development might differ from the norm, introduce subsequent assessment and diagnosis and ultimately, introduce appropriate interventions. The main focus of this course is applied behavior analysis [ABA] and common ABA strategies for intervention.

PSY 533 Interventions for Autism 3 Credits

The purpose of this course is to provide students with a general understanding of the clinical characteristics of autism spectrum disorders. The course will briefly address etiology and neurocognitive underpinnings of these disorders but will focus on psycho-educational interventions. The course will be taught from an applied behavior analytic perspective.

PSY 535 Language Assessment and Intervention 3 Credits

Students will be introduced to the classification of verbal responses, both vocal and non-vocal. Using videotaped examples, students will categorize observed verbal behavior. Students will be provided with practical tools for the assessment of verbal behavior, as well as an array of intervention strategies. A focus will include the design of teaching strategies to enhance language acquisition, as well as ongoing evaluation of intervention efficacy will be employed.

Prerequisite(s): PSY 510, PSY 511.

PSY 536 Social Skills Assessment & Intervention 3 Credits

Students will be introduced to the development of social skills and the identification social skills deficits. Using videotaped examples, students will categorize observed social behavior. Next, students will be provided with practical tools for the assessment of social and emotional behavior, as well as an array of intervention strategies. Tools for the collection of data and the evaluation of the success of target interventions will be stressed.

Prerequisite(s): PSY 510, PSY 511.

PSY 545 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

PSY 550 Behavior Analytic Approaches to Health and Physical Activity 3 Credits

The application of behavior analytic methods, practices, and principles has been demonstrated through research and clinical applications to be effective at changing health and fitness behavior. This course will provide an overview of research and practice in applying behavior analytic principles to changing health behavior and physical activity. Behavior change across various populations will be covered including both adults and children with and without disabilities. Discussion will focus on both functional assessment as well as interventions effective at changing health and physical activity including self-management, self-monitoring, goal setting, contingency management, etc. Students will spend the semester implementing self-management projects for their own health and/or fitness behavior.

PSY 551 Behavioral Appro to Addiction 3 Credits

Evidence from laboratory and clinical settings suggests that addiction can be conceptualized and effectively treated through the application of principles of conditioning. This course provides an overview of behavior analytic research in understanding and intervening on addictive behavior. Behavioral technologies for change regarding substance-related and behavioral addiction will be covered.

Prerequisite(s): Graduate students in Applied Psychology.

PSY 565 Drugs and Human Behavior 3 Credits

Presents the student with an in-depth analysis of the effects of alcohol and selected chemical substances on the behavior and body of the user. Commonly abused substances will be discussed in terms of their history, sources of production, routes of administration, distribution, metabolism and excretion, neurophysiology, tolerance, properties of addiction, withdrawal course and symptoms, and potential beneficial and harmful effects.

PSY 567 Multicultural Perspectives in Applied Psychology 3 Credits

In this graduate level course, students will examine in-depth, culture and identity formation, social relationships, the perception and manifestation of mental illness, and treatment seeking among other areas. Additionally, given the increasing diversity of communities in the US, the course will also focus on immigration, acculturation, discrimination, and the psychological correlates of each. Implications of these factors for emerging practitioners will also be covered.

PSY 572 States of Consciousness 3 Credits

This course explores the variety of states that comprise normal and altered consciousness. It highlights how these states are determined by complex interactions between conscious and unconscious mental functions. Key psychological concepts are applied in an investigation of various states of consciousness, especially meditative states and dreams. The course examines both the psychopathological aspects of altered states, as well as their potential beneficial effects on creativity and the development of the self.

PSY 574 Psychology of the Family 3 Credits

This course examines the significance of family in human development. Using prominent themes of developmental psychology, such as: the role of attachment in forming human relationships, the significance of context in understanding human development, and the resilience of development; this course will explore the existing research on the family. Students are asked to consider their own experiences as members of a family, as well as to understand the varieties of ways family impacts development across the lifespan.

PSY 577 Developmental Psychopathology 3 Credits

This course provides an in-depth view of developmental psychopathology as an applied and prevention science. Developmental psychopathology is concerned with the emergence and continuity or discontinuity of psychopathology, or maladaptive behaviors, across the lifespan. An emphasis is placed on exploring individual, environmental, social, and especially cultural influences in explaining normal and abnormal behavior.

PSY 582 Aging, Brain, and Cognition 3 Credits

This course covers the biological structures and processes underlying cognition in humans and explores modulating factors such as age, sex, disease, stress, and environment. The theoretical and methodological issues of developmental cognitive neuroscience research are addressed. Focus of the course is on brain structure and function in the largest growing segment of our population, persons over the age of 65, and the link between structure and cognitive abilities, both intact and declining. Special attention is paid to those factors related to successful aging and treatments with putative cognitive enhancers.

PSY 584 Positive Psychology 3 Credits

Historically, the field of psychology has placed great attention on the question of, "What is wrong with people and how do we fix it?" This course will focus on the question of, "What is right with people and how can we build on that?" We will explore this by examining empirical research centered on the nature of happiness and psychological well-being. Positive psychology is the rigorous study of what is right and positive about people and institutions. Positive psychologists call for as much focus on strength as on weakness, as much attention on positive emotions as negative emotions, as much interest in building the best things in life as in repairing the worst, and as much attention to promoting the fulfillment of lives of healthy people as to healing the wounds of the distressed. This course will first present an introduction to the core assumptions and research findings associated with human strengths and positive emotions, then move on to explore interventions and applications informed by this perspective in counseling and psychotherapy, as well as in domains personally relevant to the lives of students such as school, work, family and other close relationships. PSY 584 is crosslisted with PSY 384.

PSY 590 Field Placement in Applied Behavior Analysis 3 Credits

The applied behavior analysis practicum includes a required field placement of 15 hours per week and periodic on campus meetings. The practicum experience will allow students to experience the professional life of a behavior analyst in one of several preapproved sites. Sites approved include those for children, adolescents or adults with disabilities. Placements will be selected in consultation with the Practicum Coordinator and will require a written practicum plan from the cooperating field supervisor.

Prerequisite(s): PSY 510, PSY 511, PSY 513, PSY 514.

PSY 595 Selected Topics in Applied Psychology 3 Credits

Students will actively engage in an in-depth inquiry into a special topic area concerning applied psychology. Though the topics will change, students will be required to read and discuss current literature as well as considering the application of tools of the discipline to research questions of their own.

PSY 600 ABA Thesis I 1 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 601 ABA Thesis II 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 602 ABA Thesis III 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 690 Independent Research and Study 1-4 Credits

Provides students with an opportunity to design and carry out original research in an area of their choice. Students designate a faculty supervisor and work closely with him/her during the semester. Permission of Instructor.

PSY 700 ABA Thesis I 1 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 701 ABA Thesis II 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 702 ABA Thesis III 3 Credits

The expectation of the thesis experience is for students to generate a scholarly work of professional presentation and/or publication quality. Students will first complete a comprehensive survey of the research literature in a particular area within applied behavior analysis. They will then design and conduct an original empirical research thesis using the principles of ABA and an appropriate single-case research design. Students will write up their study in American Psychological Association (APA) style. The student will present an oral defense to a committee of faculty members.

PSY 720 Practicum in ABA 3 Credits

The Master in Applied Psychology - Applied Behavior Analysis (MAP-ABA) program's practicum offers students supervision from Rider's MAP-ABA faculty and a variety of high quality in-vivo experiences, under the direct supervision of a Rider-Approved Board Certified Behavior Analyst (BCBA), during which students apply the skills acquired in coursework.

Prerequisite(s): PSY 510, PSY 511.

Spanish (SPA)

SPA 500 The Poetry of Resistance in the Time of the Generals in Latin America 3 Credits

This course offers a broad overview of important historical literature about dictatorships in Latin America. The weekly readings and writing assignments have been selected in order to: 1) introduce major concepts, arguments, and figures in the field of Latin American literature and culture; 2) appreciate the evolution of the role of artists and intellectuals during the years of the "dirty war" in Latin America; 3) sharpen analytical writing; and, 4) demonstrate the connection (and the limits of the connection) between literature, culture, and society. This course is predominantly a study of Latin American governments in the twentieth century and of the role of artists, primarily writers of fiction and poetry, as a corps of truth-tellers and resisters in the face of government propaganda, censorship, and cultural/political repression.

SPA 510 Marks of Identity: The Journey of the Self in Spanish Theater 3 Credits

What markers of class, race, ethnicity, gender and even species shape individual and group identity? How does identity change over time? How do I know who I am, and how does my identity further my interests and those of society? Offered in translation, this course explores the staging of identity in Spanish theater from the seventeenth to the twenty-first century. Topics may include the 17th-century honor code and gender, the myth of Don Juan, imperialist imaginings of New World subjects, the romantic hero and the angel of love, identity and the grotesque, identity and erotic desire, identity and media technologies, and non-human animal subjects. Film, art, music and live-theater attendance.

Special Education-GR (SPED)

SPED 500 The Inclusive Classroom: Effective Practices for General Education Teachers 3 Credits

This course is designed to introduce general education teachers to special education and the inclusive classroom. Students will explore current research, issues and practices in special education. Assignments and activities will enable students to develop the knowledge and skills to design and manage the instructional environment for diverse learners in inclusive and classroom setting. Attitudes and behaviors that influence children with special needs will be addressed.

SPED 504 Assistive and Augmentative Technology for Autism Spectrum Disorders and Other Disabilities 3 Credits

This course will emphasize the use of assistive technology, augmentative communication modalities, visual supports, and related instructional methods and strategies that maximize the learning of individuals with autism spectrum disorders and other exceptional learning needs. Students will learn how to effectively customize materials and adapt learning environments using technology, with a specific focus on individuals with ASD. Students will become familiar with the use of high-tech, low-tech, and no-tech solutions that support the individualized needs of learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

SPED 512 Psychology of Exceptionality 3 Credits

This course provides opportunities for the study of school psychological issues associated with supporting students with exceptionalities. Philosophical, historical, and legal foundations of special education, and the characteristics of students with disabilities will be examined. Special education policy, legal foundations, and evaluation procedures are discussed. Current issues related to inclusive practice and intervention strategies are examined from a psychological and sociocultural perspective. An experience in the field will enable students to apply knowledge in a realistic classroom setting. This course, or its equivalent, will be the prerequisite for all other SPED courses.

SPED 514 Applied Behavior Analysis for Students with Autism Spectrum Disorder and other Behavior Needs 3 Credits

This course is designed to provide extensive knowledge and practice in meeting the behavioral challenges of individuals through Applied Behavior Analysis for students with Autism Spectrum Disorder and other behavioral issues. Candidates will receive instruction in a problem-solving approach to identify the possible function(s) of problem behavior and the design of proactive, positive behavior intervention plans that emphasize the teaching of appropriate alternative skills. An emphasis is placed upon behavior change strategies, which intervene on antecedent events, teach appropriate alternative skills, and provide supports in the natural environment. Multi-component interventions also are designed to include the interest and preferences of the target student. Legal and ethical considerations are considered. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 524 Collaboration and Inclusive Practice for Students with Mild and Severe Disabilities 3 Credits

This course will emphasize curriculum planning, learning environments, materials, and modifications for students with mild and severe disabilities. Instructional and behavioral strategies to maximize learning of all students, including those with exceptional learning needs in the general education classroom will be examined. Inclusive educational practices including collaboration, communication and positive behavior supports and co-teaching will be discussed and applied for diverse learners. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 531 Assessment for Instruction in Special Education 3 Credits

In this course, standardized and functional assessments are emphasized. Students are introduced to basic educational assessment procedures, norm-referenced, criterion-referenced, and individually-referenced assessment in this course. An emphasis is placed on gathering information to answer specific referral questions, and the use of assessment tools, which meet legal and ethical guidelines. A model of academic assessment most consistent with classroom practices is emphasized. Students are expected to measure an individual's performance (e.g., current level of functioning) and provide recommendations for instruction and learning goals and objectives. A field experience will enable students to apply knowledge to practice.

Prerequisite(s): SPED 512.

SPED 536 Instruction and Transition for Autism and Severe Disabilities 3 Credits

The course will provide students with the knowledge and skills to support individuals with Autism Spectrum Disorders and those with moderate to severe disabilities. Strategies to address instruction, transition, behavior, and communication and will be emphasized across domains of life skills, inclusion, and transition. Transition planning, including understanding, formulating, and implementing the Individual Transition Plan will be taught. Collaborative interactions with school and community personnel and agencies will be addressed. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 539 Instructional Practices for Students with Disabilities 3 Credits

This course will give students the opportunity to evaluate, select, develop, and adapt instructional and assessment materials for individuals with mild to severe disabilities. Using various case studies, students will have the opportunity to develop an Individualized Education Program (IEP) and synthesize assessment information to make appropriate instructional decisions addressing learner characteristic and classifications. Curriculum planning, learning environments, modifications, and materials for diverse learner needs will be examined. Students will experience the collaborative process and develop their ability to function as part of an educational team. A field experience with children with disabilities will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 542 Literacy and Students With Special Needs 3 Credits

The course will provide an overview of theories, assessment, and intervention techniques for the literacy development of students with special instructional needs. Students will explore research validated methods for literacy development and instruction, including current strategies for teaching comprehension, composition, vocabulary, and language study. Management of literacy instruction is studied in a workshop setting. An experience in the field will enable students to apply knowledge in a realistic classroom setting.

Prerequisite(s): SPED 512.

SPED 580 Supervised Internship in Special Education 3 Credits

This supervised internship experience will provide students with an opportunity to connect theory and practice in special education during the summer. Students will work full-time in a setting with individuals with disabilities. After a brief period of orientation to the setting, the intern will assume a full load of teaching and/or supervisory responsibilities appropriate to the context of the experience. Seminar meetings will be required. Permission of the program advisor is required.

Prerequisite(s): SPED 512, SPED 514, SPED 523, SPED 525, SPED 531, SPED 535, SPED 539.

SPED 590 Professional Seminar in Special Education 3 Credits

This course addresses the current issues in the field of special education. Students will synthesize research and literature from the field of special education to address current issues and practice. Collaboratively, students will examine one area of special education through research and presentation. A reflective comprehensive view of special education including assessment, instruction, inclusive practice, assistive technology, Autism Spectrum Disorder, behavior, literacy etc. will be shared. Students are expected to complete a comprehensive exam in these related special education topics and submit 100 hours of supervised field hours. This course should be taken in the final semester of the MA program as it is the culminating reflective course of study.

Prerequisite(s): Permission of instructor.

SPED 600 Independent Study and Research in Special Education 1-3

Credits

The content of the course varies with the academic research interests of students who wish to engage in independent study related to topics in special education.

WESTMINSTER COLLEGE OF THE ARTS

www.rider.edu/wca (<https://www.rider.edu/academics/colleges-schools/westminster-college-arts/>)

Westminster College of the Arts (WCA) offers Rider students the opportunity to study intensively in the arts - whether that plan includes a lifetime career in the arts or personal expression and enrichment found through its exploration. Students can choose from a wide variety of undergraduate and graduate majors including arts administration, dance, film and television, film and media, filmmaking for actors, fine arts, music education, music theatre, organ performance, piano, music, popular music culture, sacred music, theatre, theory and composition, voice performance and other areas of concentration. See the links below for specific information pertaining to each of the schools in WCA.

- Westminster Choir College (p. 1148)
- School of Fine and Performing Arts (p. 1071)

School of Fine and Performing Arts

<http://www.rider.edu/sfpa/> (<https://www.rider.edu/academics/colleges-schools/westminster-college-arts/sfpa/>)

The School of Fine and Performing Arts is a division of the Westminster College of the Arts. The school offers Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, and minor degrees, as well as widespread opportunities for students – regardless of major – to participate in the arts. Exhibitions, plays, concerts, and productions are presented in the 442-seat Yvonne Theater, the 90-seat Spitz Studio Theater, and the recently-expanded 374-seat Bart Luedeke Theater.

Several experiences, including ensembles and classes, are open to all university students. Dramatic plays and musical theatre productions are open to all students by audition. The Rider University Art Gallery showcases leading regional and national artists, as well as selected student work. Artist lectures and gallery performances bring additional opportunities for artistic enrichment. The Arts Administration Center provides a forum for students to work with campus and community organizations on a variety of issues and activities. Rider Dances involves student dancers, choreographers and musicians. Each year, many education majors elect a second major from the School of Fine & Performing Arts, choosing from tracks in Dance Studies, Popular Music Studies or Theatre Studies.

Mission

Westminster College of the Arts

Westminster College of the Arts inspires and empowers innovative artists and leaders to transform communities through the arts.

The School of Fine and Performing Arts

The School of Fine and Performing Arts focuses on dance, film, music, musical theatre, theatre, and arts administration. Through programs that provide a historical, aesthetic, practical, and professional perspective, students develop the skills to excel in a professional career while growing intellectually from a broadly based liberal arts curriculum. The school fosters meaningful engagement in the arts to students who wish to become professional artists as well as students who view the arts as an integral part of overall intellectual growth. The school nurtures and

challenges the artist within all students and prepares them to contribute to an ever-changing global society.

Department website: www.rider.edu/academics/colleges-schools/westminster-college-arts/sfpa (<https://www.rider.edu/academics/colleges-schools/westminster-college-arts/sfpa/>)

Health and Safety

Westminster College of the Arts of Rider University, as required by the National Association of Schools of Music, is obligated to inform students and faculty of health and safety issues, hazards, and procedures inherent in practice, performance, teaching, and listening both in general and as applicable to their specific specializations. This includes but is not limited to information regarding hearing, vocal and musculoskeletal health, injury prevention, and the use, proper handling, and operation of potentially dangerous materials, equipment, and technology.

It is important to note that health and safety depend largely on personal decisions made by informed individuals. Rider University has health and safety responsibilities, but the fulfillment of these responsibilities cannot and will not ensure any individual's health and safety. Too many factors beyond the university's control are involved.

Each individual is personally responsible for avoiding risk and preventing injuries to themselves before, during, and after study or employment at Rider University. The policies, protocols, and operational procedures developed do not alter or cancel any individual's personal responsibility, or in any way shift personal responsibility for the results of any individual's personal decisions or actions in any instance or over time to the University.

All members of the WCA community are encouraged to visit the university web site for a series of recommendations and resources designed to help each individual to become aware of attend to various issues. The URL for the page is www.rider.edu/wca_healthandsafety (http://www.rider.edu/wca_healthandsafety/) www.rider.edu/student-life/health-wellness/student-health-services/health-safety-sfpa-wcc-students (<http://www.rider.edu/student-life/health-wellness/student-health-services/health-safety-sfpa-wcc-students/>)

Full-Time Tuition Inclusion

Full-time tuition charges are incurred by students who enroll for credit loads, including credit equivalents for non-credit and audited courses, which fall within the ranges indicated below. Further charges (p. 793) are incurred when full-time students exceed maximum load levels, excluding, for School of Fine and Performing Arts majors, recital credits or participation in auditioned choirs or productions.

Full Undergraduate Tuition Includes

- A minimum of 12 and maximum of 18 credits per semester or the equivalent including non-credit courses.
- Primary applied study to the maximum required credits/semesters. (see below)
- Applied dance study to the maximum required credits/semesters. (see below)
- Once all applied music or dance requirements have been completed, all additional lessons or courses will be billed at the elective rate.
- Music students in double major programs with two different primary instruments will be billed for the second applied lesson at the elective rate.

Applied Music Study

Effective as of the fall 2009 semester for all new or readmitted Rider University students: For all students whose major or minor program does not require applied music study, or for those students who have completed applied music requirements, elective fees will apply. All part-time students are charged an applied music fee. Please see below.

Registration for applied music study follows this table of suffixes. Students will register for the appropriate course number and suffix, as indicated in the curriculum pages later in this section.

Maximum enrollment under full-time tuition: In B.A.- Popular Music Studies, one half-hour per week of applied music instruction for three semesters; in B.F.A.- Musical Theatre, one hour per week of applied music instruction for six semesters, and one half-hour lesson per week for two semesters; in B.M.- Music Theatre/Piano Track, one hour per week of applied music instruction for eight semesters.

Full-Time Students

Suffix A – One-hour, 2-credit required lesson. Included in tuition – no extra charge. Example: Musical Theatre major in first six semesters.

Suffix B – Half-hour, 1-credit required lesson. Included in tuition – no extra charge. Example: B.F.A./Musical Theatre/Voice majors in semesters seven and eight.

Suffix C – One-hour, 2-credit elective lesson. Not included in tuition – \$1500 extra per semester. Examples: Student who has completed all required lessons in their major or a student whose major does not require lessons.

Suffix D – Half-hour, 1-credit elective lesson. Not included in tuition – \$740 extra per semester. Examples: Student who has completed all required lessons in their major, or student whose major does not require lessons.

Suffix G – One-hour, 2-credit required/elective lesson. The first half-hour is required and is included in tuition. The second half-hour is elective and is not included in tuition. A fee of \$740 per semester applies. Example: Popular Music Studies majors up to 3 semesters.

Part-Time Students

(all students, both campuses, regardless of major or requirements)

Suffix E – One-hour, 2-credit required or elective lesson – \$2,090 per semester.

Suffix F – Half-hour, 1-credit required or elective lesson – \$1,050 per semester.

Dance Study

Effective as of the fall 2014 semester for all new or readmitted Rider University students: For all students whose major or minor program does not require applied dance study under the DAN prefix, or for those students who have completed dance requirements, elective fees will apply. All part-time students are charged a dance fee. Please see below.

Registration for applied dance study follows this table of courses. Students will register for the appropriate course number, as indicated in the curriculum pages later in this section.

Maximum enrollment under full-time tuition: In B.A.-Dance/Performance Track, a total of 15 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School (PBS); in B.A.- Dance/Dance Studies Track, a total of 14 credits of applied dance instruction, including all dance courses taken at Rider University

and at Princeton Ballet School; in Dance Minor, a total of 8 credits of applied dance instruction, including all dance courses taken at Rider University and at Princeton Ballet School.

Registration for DAN 100 and DAN 300 require a placement completed with dance faculty.

Full-Time Students

DAN 100

- DAN-100-01 – 1-credit required course taken at PBS. Included in tuition – no extra charge. Example: B.A./Dance majors and minors up to the maximum stated above.
- DAN-100-01F – 1-credit elective course taken at PBS. Not included in tuition – \$740 extra per semester. Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

DAN 151 – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

DAN 152 – 1-credit course taken at Lawrenceville campus. Included in tuition – no extra charge. Course counts toward the maximum stated above.

DAN 300

- DAN-300-01 – 2-credit required course taken at PBS. Included in tuition – no extra charge. Example: B.A./Dance majors and minors up to the maximum stated above.
- DAN-300-01F – 2-credit elective course taken at PBS. Not included in tuition – \$1,500 extra per semester. Examples: Student who has completed all required applied dance study in their major, student who has completed all required applied dance study in their minor, or student whose major or minor does not require lessons.

Note: Students choosing to register for both DAN 100-01F and DAN 300-01F as elective study in the same semester will be charged a total fee of \$2,000.00.

Part-Time Students

(all students, both campuses, regardless of major or requirements)

DAN 100

- DAN 100 -01P – 1-credit course taken at PBS. Not included in tuition – \$1,050 extra per semester. For majors and minors, course counts toward the maximum stated above.
- DAN 300 -01P – 2-credit course taken at PBS. Not included in tuition – \$2,090 extra per semester. For majors and minors, course counts toward the maximum stated above.

Note: Part-time students choosing to register for both DAN-100-01P and DAN-300-01P in the same semester will be charged a total fee of \$3,050.00.

Admission as a Freshman

Students may apply for admission to undergraduate study for the fall or spring term. Applicants are encouraged to begin the application process late in the junior or early in the senior year of high school. Westminster College of the Arts uses a rolling admissions policy. Completed applications are reviewed on a regular basis and students

are notified of decisions. Students initiate the application process by first completing the Rider University application. All items must be in the Admissions Office before a decision can be reached. The following are necessary for admission:

Applications

Students may request application forms by contacting the Admissions Office, or through the Rider University Web site.

Audition/Interview

Certain majors and minors require either an audition or an interview. Please see the individual program requirements below. Audition requirements may be found on our Web site.

Credentials

Applicants for admission to the School of Fine and Performing Arts should be graduates or prospective graduates of accredited secondary schools where they have pursued college preparatory courses. Four secondary school credits must be presented in English as well as other credits in disciplines such as natural sciences, history, social studies, mathematics, and foreign languages. It is each student's responsibility to have an official and final high school transcript sent to the Admissions Office in order to document high school diploma conferral. Applicants who hold high school equivalency diplomas and high school graduates who have pursued business courses will be considered. Two letters of recommendation and an essay are required. Transfer applicants must submit both an official high school transcript and an official transcript from any and all colleges or universities attended.

Standardized Test Scores

Beginning with the freshman class entering in the fall of 2019, Rider University has established a test-optional admission policy. Some restrictions apply. For more information, please see this link: <https://www.rider.edu/admissions/undergraduate/how-to-apply/test-optional-admission>

Placement Testing

Entering freshmen may be required to complete various placement examinations, in accordance with university policies listed elsewhere in this catalog. Students exempted from any graduation requirement as a result of those examinations must replace those credits with free electives, as appropriate, in order to meet the minimum number of credits required for graduation.

Music Theory Placement

All students in the B.A.- Popular Music Studies, B.M.- Music Theater/ Music Theatre Direction, and B.F.A.- Musical Theatre degree programs must take the music theory placement examination. Students placed into MUS 109S will be graded on a pass ("Y") or fail ("Z") basis. A passing grade must be earned before the student will be permitted to enroll in MUS 110. MUS 109S does not count toward graduation credits for students in these majors.

Credit-by-Exam

Musical Theatre majors will be required to take an exam in music theory. Successful completion of the exam with a passing grade will result in credit-by-exam, granting the student credit for the course in lieu of taking the course. Placement exams for sight singing and piano will be given at the student's request after they have started their studies at Rider, but prior to the semester in which they would normally take these classes.

Minimum Grades Needed

For all majors offered in the Theatre & Dance Department students must earn a minimum grade of "C" in those courses required in the major area in order to make satisfactory progress. If a grade of "C-" or lower is earned, the student must repeat the course.

B.F.A. – Musical Theatre majors must earn a minimum grade of "B-" each semester in the primary applied music field in order to make satisfactory progress. If a grade of "C+" or lower is earned, the student must repeat the course.

At the graduate level, the grade of "D" is not awarded. The lowest passing grade in a graduate course is a "C-."

Course Repeat Policy

All undergraduate and graduate students who are enrolled in a major or minor offered by the Westminster College of the Arts may enroll for a second or subsequent time in any *non-repeatable* WCA course from which they have withdrawn, in which they have earned an "F," or in which they have failed to earn the required minimum grade* according to the following rules:

- 1) Students who have withdrawn from, failed, or failed to achieve the required minimum grade in a required course* in their first attempt at the course may enroll for a 2nd time without permission. All other students must have the permission of the Associate Dean.
- 2) Permission of the Dean or Associate Dean of the college (FPA or WCC) offering the course in question is required in order to enroll in a course for the 3rd time.
- 3) Permission of the Academic Standing Committee of the college (FPA or WCC) offering the course in question is required in order to enroll in a course for the 4th time. Permission for a 4th enrollment will be granted only in rare, extenuating, and documented circumstances.

In all instances, the most recent grade is calculated into the grade point average, and all listings and grades will remain on the transcript.

* Examples include: a minimum grade of "B-" is required in Piano Secondary, a minimum grade of "C" is required in foreign language study in order to progress to the next level in that language.

Academic Dismissal/Conditional Academic Standing

In the Westminster College of the Arts, decisions regarding academic conditional standing and dismissal for poor scholarship are the responsibility of the School of Fine and Performing Arts Academic Standing Committee, the Westminster Choir College Academic Standing Committee, and the Westminster Choir College Graduate Committee. These committees review the academic progress of students, and may recommend a letter of concern, placement on Conditional Academic Standing, or dismissal.

Because a 2.0 cumulative average is required for graduation a student is expected to maintain a 2.0 cumulative grade point average while enrolled at Rider. Students who fail to maintain at least a 2.0 cumulative average will be reviewed by an academic standing committee and may be dismissed or placed on conditional standing.

Students who have not done satisfactory work may be dismissed from the University for poor scholarship at the end of any semester, after an

appropriate review of their scholastic records by the academic standing committee of their college. An academic standing committee may require any student who does unsatisfactory work to pursue a specific course of study during a particular academic session. There must be substantial evidence of proper motivation and a capacity for doing college level work to warrant maintaining a student in school with a record of continued conditional status.

Any student who fails to pursue a course of study prescribed by an academic standing committee, or who does unsatisfactory work in the prescribed course of study, may be dismissed without right of further appeal.

Students may also be subject to academic dismissals if their cumulative grade point averages fall below the required minimum for two or more consecutive semesters, or the grade points fall below the required averages established at the freshman, sophomore, junior and senior levels. Academic dismissal at the end of the fall semester is effective prior to the beginning of the spring semester.

The School of Fine and Performing Arts Academic Standing Committee has the sole authority to dismiss students for academic reasons. Students may be placed on conditional academic standing or dismissed from the Westminster College of the Arts upon failure to meet academic standards. In the School of Fine and Performing Arts, the Academic Standing Committee will review the academic record of undergraduate students who fail to maintain a 2.0 cumulative grade point average or a 2.5 cumulative grade point average in courses required for the major.

Students must earn a minimum cumulative grade point average of 2.0 and a minimum of 2.5 in the major. Students dropped from a major because of failure to maintain the minimum grade point average may apply for readmission. Readmission will depend on various criteria, including the GPA, current academic progress, and the student's general standing.

A dismissed student may appeal in writing to the appropriate committee for immediate rescission of a dismissal decision. Evidence should be submitted to suggest that it is in the interests of both the student and the college for the dismissal to be rescinded. However, any student who fails to pursue a course of study prescribed by an academic standing committee, or who does unsatisfactory work in the prescribed course of study, may be dismissed without right of further appeal.

Students dismissed by the university may not enroll for courses nor participate in university-sponsored activities or ensembles at either campus of Rider University for a period of one year following their dismissal. Students dismissed by the School of Fine and Performing Arts but not Rider University may apply for enrollment in other colleges of the university. Students dismissed by the School of Fine and Performing Arts but not Rider University may not enroll in SFWA courses, ensembles, or activities until they have been readmitted to SFWA. Before permission to enroll in the School of Fine and Performing Arts or Rider University, as appropriate, will be granted, students must follow the process for readmission.

Dismissal from a Major

Following notification that their standing in the major is in jeopardy and the passage of a suitable amount of time permitted to address stated issues, typically one semester, academic departments reserve the right to dismiss a student from a major. Such dismissal may be based upon any of the following conditions: failure to maintain a satisfactory or minimum GPA; failure to sustain academic progress in the courses

of the major; conduct in violation of the standards of the department or profession; failure to meet conditions or requirements as stated in University catalogs; or the student's general standing at Rider University. Such dismissal will become effective at the end of the semester in which the decision is reached.

Readmission

If more than one year has elapsed since the date of last enrollment, students may be required to reapply and/or re-audition or re-interview for the program. Students must meet all requirements of the application process in order to be readmitted.

General Requirements

In addition to the information given here and on the following pages, students are referred to individual department handbooks for additional information and requirements.

Students in any School of Fine and Performing Arts degree must earn a minimum of 120 credits.

General Education Requirements

In addition to the information given here and on the following pages, students are referred to individual department handbooks for additional information and requirements.

Students in any School of Fine and Performing Arts degree must earn a minimum of 120 credits. The BFA in Musical Theatre requires a minimum of 121 credits.

General Education Requirements

Students in the Fine Arts major (Art track) must complete the General Education Curriculum (p. 577) as listed under the College of Liberal Arts and Sciences. All other majors in the School of Fine and Performing Arts must complete these requirements:

PHY 103	Science of Light and Color
PHY 104	Energy, the Environment & Man
PSY 100	Introduction to Psychology
SP 408	Voice Science
SUS 100	Introduction to Sustainability Studies

Total Credits 30-33

- College Reading required only of those students scoring 470 or lower on the reading comprehension portion of the SAT.
- Students who place at the 101-level or above are still expected to take a minimum of three (3) credits at the level of placement. Students who are native speakers of languages not offered at Rider University may have the Foreign Language requirement waived upon documentation of proficiency. This documentation could be in the form of a transcript on letterhead sent by the accredited institution abroad, or fee-based proficiency tests. To initiate a request for a waiver, students should see the chairperson of the Department of Foreign Languages, Literatures and Cultures.
- MTH 100S may be required based upon ACT/SAT scores.

Acting for Film, Television and Theatre (BFA)**Program Overview**

The BFA in Acting at Rider is a professional training program preparing students for entry in stage, film and television. The program consists of

comprehensive training in Acting, Voice and Movement as well as training in the Business of Acting, Directing, Script Analysis and Theatre History. They will learn from a faculty of working professionals from every aspect of the discipline. The close proximity to New York City and Philadelphia allow the students to interface with many industry experts and to help nurture their professional aspirations in the vibrant cultural atmosphere of these major entertainment markets.

Acting for Film, Television and Theatre (BFA) Major Requirements

(81 credits)

General Requirements

For all majors offered in the Theatre & Dance Department students must earn a minimum grade of "C" in those courses required in the major area in order to make satisfactory progress. If a grade of "C-" or lower is earned, the student must repeat the course.

Students in the BFA in Acting for Film, Television and Theatre program must pass the sophomore review to remain in good standing in the major.

Courses and Descriptions

THE 103 The Authentic Instrument I: Introduction to Performance Skills 3 Credits

Through Alexander Technique and other methodologies, actors gain awareness of personal habits and begin to find their authentic, truth-telling voice and body—a dynamic and expressive instrument to serve them in any medium.

THE 104 The Authentic Instrument II: Developing the Imaginative Performer 3 Credits

Continuing from THE 103, actors explore psycho-physical techniques (e.g. Michael Chekhov, Viewpoints, Laban) to develop the actor's imagination. The class culminates in a public presentation using the tools that have been cultivated in Authentic Instrument I & II.

Prerequisite(s): THE 103.

THE 105 Theatre History to 1700 3 Credits

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 107 Acting I: Intro to Acting 3 Credits

Exercises and improvisations developing the fundamental prerequisites for the actor are provided. The emphasis is on vocal and physical mobility and the ability to communicate emotional states from the stage.

THE 110 Acting II: Scene Study 3 Credits

Basic acting techniques. Emphasis on the ingredients of any action: what am I doing, where, why, who am I, what is my attitude toward partner?

Prerequisite(s): THE 107.

THE 111 Theatre Lab 0 Credits

This class serves as a forum for students to cultivate practical professional skills. Through seminars, guest speakers and master classes, this lab will give the students necessary tools to enter the professional theater. Theater majors must meet the weekly attendance and participation requirements during every semester up to a total of six.

THE 115 Stagecraft 3 Credits

The theory and practice of construction and rigging of stage scenery is offered. Emphasis is on actual productions and road show set-ups. One lecture and two labs per week.

THE 127 Theatre Production 1 Credits

Students rehearse and perform roles in a play produced by the department and directed by a member of its faculty. Students may also prepare a major element of design or technology for the production. Maximum of eight credits are accepted in theatre production, band and/or choir.

THE 220 Movement for the Actor I 3 Credits

This course is an introduction to movement training methodologies, and emphasizes physical awareness and expressivity as it relates to development of character.

Prerequisite(s): THE 110, For Acting majors or by permission of the instructor.

THE 221 Voice for the Actor 3 Credits

Focuses on exploration of the basic principles of vocal production and cultivating natural expressivity of the voice. Class work is based upon the classic progression of voice exercises of Kristin Linklater.

Prerequisite(s): THE 107; Open to Theatre majors or minor, or by permission of the instructor.

THE 222 Speech and Dialects for the Actor 3 Credits

Focuses on exploration of the International Phonetic Alphabet (IPA) and the use of the IPA in learning dialects (including Standard Neutral American) for the stage.

Prerequisite(s): THE 107; Open to Theater majors or minor, or by permission of the instructor.

THE 229 Movement for the Actor II 3 Credits

This course is a continuation of study in movement training methodologies (Alexander Technique, Viewpoints, Laban). It will emphasize developing physical awareness and expressiveness as it relates to the development of character work. It will also continue the further cultivation of awareness of habitual psycho-physical patterns that inhibit students in their professional development.

Prerequisite(s): THE 220, THE 221.

THE 240 Script Analysis 3 Credits

This course provides students with a technique for analyzing a theatrical script in terms of its theatrical requirements and aesthetic qualities. Students will use critical research and develop the abilities to write and speak clearly about dramatic literature, the requirements of production, and the experience of performance.

Prerequisite(s): THE 107 with a minimum grade of C.

THE 300 Acting for the Camera 3 Credits

Focuses on the craft and artistry of acting in television and film. Examination of TV production and the styles needed for work in various media will be discussed. Physicalization, simplicity, listening, marking and other technical requirements will be explored. Staging involving different camera angles will be rehearsed. The emphasis of this class is on adapting the performance to the special needs of the camera.

Prerequisite(s): THE 107.

THE 310 Acting III 3 Credits

Students will study in-depth techniques for exploring characterization. They will be introduced to the "magic if" and study techniques for placing themselves in the circumstances of the characters they are portraying. They will learn the interior and exterior analysis of characters using "Adler" and "Practical Aesthetics" techniques.

Prerequisite(s): THE 107, THE 110.

THE 311 Acting IV 3 Credits

Students will learn the appropriate techniques to explore characters in the three styles of Elizabethan, Restoration, and Commedia dell'arte theatre. Sessions will include movement, effective speech, and finding appropriate actions for each style. Students will also learn proper research techniques to understand cultural influences on plays and characters.

Prerequisite(s): THE 107, THE 110, THE 310.

THE 313 Advanced Voice and Speech for the Actor I 3 Credits

Actors continue their study of vocal progression of Kristen Linklater and the speech work of Patsy Rodenberg, Edith Skinner and Louis Colaianni to develop physical freedom, energy and expressivity. Advanced diagnostic work of students' voice and speech habits is explored in relationship to work with contemporary, heightened, and stylized texts.

Prerequisite(s): THE 221, THE 222.

THE 314 Advanced Voice and Speech for the Actor II 3 Credits

Continuing from THE 313, actors apply advanced principles of vocal production and speech work to contemporary, heightened and stylized texts.

Prerequisite(s): THE 313.

THE 315 Acting V: Advanced Acting for the Camera 3 Credits

This course is a continuation of the study of acting for Television, Film, Internet Content, Voiceover and other mediums.

Prerequisite(s): THE 229, THE 311.

THE 329 Movement for the Actor III 3 Credits

This course is a continuation of study in movement training methodologies focusing on continued development of expressivity, ease, dynamics and authenticity in character development.

Prerequisite(s): THE 229.

THE 400 Directing for the Stage I 3 Credits

The technique of play directing and production management. Lectures present aesthetic and theoretical concepts that are explored in workshops.

Prerequisite(s): THE 107, THE 115.

THE 410 Advanced Performance Workshop 3 Credits

An opportunity to work an entire semester on a specific style or period of theatre, e.g., Shakespeare, farce, Readers' Theater.

Prerequisite(s): THE 107, THE 110.

THE 450 NY Experience: Professional Audition Technique and the Business of Acting 3 Credits

Students engage weekly with New York professionals to learn the business of acting and strategies for successful auditions in the NY Film, Television and Theatre industry. Students will participate in mock auditions with casting directors and theatre and on camera directors to refine audition skills. Travel costs to New York are the responsibility of the student.

FTV 135 Filmmaking I 3 Credits

Filmmaking I introduces students to basic film and television production theories, techniques, and applications. Students will gain competency in a number of production areas including composition, lighting, filmic storytelling, sound, production planning and editing. As well as gaining practical production experience, students will also be introduced to basic art theory in relation to composition and visual storytelling.

FTV 238 Screenplay Fundamentals 3 Credits

Screenplay Fundamentals will instruct students in how to write for the screen. Students will learn how to convey story and character through the medium of film and television, how to write effective dialogue, and understand the basics of dramatic writing and scene structure.

Prerequisite: COM 131.

FTV 243 The Actor and Filmmaker 3 Credits

A practicum course that instructs the student on how actors and directors work together to build a performance. The course will provide on-hands experience in technical aspects of behind and in front of camera processes in capturing an actor's performance, exploring the demands and particularities of acting for the camera. This course will also serve as an introduction to basic acting theories and practices as they relate to how actors work to express a character onscreen. Elements of this course include monologue and scene rehearsal and performance (both multi-camera and single camera), audition techniques (for both actors and directors), and how film directors block and cover a scene.

Students will gain experience both behind and in front of the camera, **Prerequisite(s):** COM 131 or FTV 135 for Film/TV majors or THE 110 for Theater majors.

FTV 399 The Co-operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. Prerequisite(s): junior standing and 2.75 GPA at the time of registration; .

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

Art Minor

Overview

Students with a minor in visual art focus on creating art and pursuing an understanding of the history and theory of art and its importance in society.

Minor Offered

- Minor in Fine Arts - Art

Total Credits 21

Courses and Descriptions

ART 103 Fundamentals of Drawing 3 Credits

An intensive study of drawing techniques in charcoal, pencil, and pen and ink.

ART 104 Survey of Art History I 3 Credits

The history of Western art, architecture, sculpture, painting from prehistoric times through the Middle Ages, emphasizing the relation between the arts and ideas of each period.

ART 105 Design 3 Credits

Basic concepts of composition, form, texture, value, and color in two-dimensional design are explored.

ART 106 Survey of Art History II 3 Credits

The history of Western art, architecture, sculpture, painting from the Renaissance to the present, emphasizing the relation between the arts and ideas of each period.

ART 150 Digital Foundations 3 Credits

Industry standard digital tools are used to explore the basic concepts of composition, form, texture, value, and color in two-dimensional design. Further consideration of digital formats and technologies in the visual arts will be highlighted.

ART 201 Art of the Ancient World 3 Credits

The arts of ancient man from prehistoric times to the fall of the Roman Empire.

ART 207 Medieval and Renaissance Art 3 Credits

A study of the major monuments of architecture, painting, and sculpture created in Western Europe between 300 and 1600. Particular emphasis on the history of Christian art, from its beginnings in the Roman catacombs, to the great monasteries and cathedrals of the High Middle Ages, to the revival of ancient Roman grandeur and forms in the Renaissance.

ART 209 Art of the Baroque 3 Credits

The art of the 17th century in southern and northern Europe.

ART 214 American Art 3 Credits

The development of the arts from colonial America to World War I. Discusses major economic, social, and political factors that influenced the course of American art history.

ART 230 Three-Dimensional Design 3 Credits

Beginning problems in traditional sculptural materials (clay, wood, stone) and design-construction in mixed media.

ART 303 19th Century Art 3 Credits

An in-depth study of the major art movements in 19th-century Europe, from Neoclassicism to Postimpressionism.

ART 304 Drawing II 3 Credits

Studies the art of drawing beyond the introductory level with an emphasis on greater self-expression, advanced technical skills, and a variety of drawing media.

Prerequisite(s): ART 103.

ART 305 Intermediate Painting A-B-C 3 Credits

Studio courses designed to expand the student's creative experience in painting with emphasis of greater self-expression. Students will be presented with specific painting projects that originate from conceptual or perceptual responses to reality (still life, landscape, figure) and to imagination (dreams, fantasy, invention). Class trips to galleries and museums are included. May be taken three times.

Prerequisite(s): ART 204.

ART 306 Art of the 20th Century 3 Credits

The major artists and movements in the history of 20th-century painting and sculpture from Postimpressionism. Slide lectures, class discussion, field trips.

ART 310 Figure Drawing and Painting 3 Credits

Students will draw and paint from various sources, including the live model, clothed and nude, to understand the structures, gestures, and psychological aspects of the human body in art.

Prerequisite(s): ART 103 and ART 204.

ART 335 Printmaking 3 Credits

A studio introduction to various traditional and contemporary relief printmaking techniques.

ART 493 Special Topics in Studio Art 3 Credits

Study in drawing and painting of a particular style, such as abstraction or subject, such as still life; or particular aspects on a museum collection, such as the Metropolitan.

Prerequisite(s): ART 103 and ART 105 or Permission of Instructor.

ART 495 Selected Topics in Art History 3 Credits

An intensive study of a particular art history topic, e.g., a single artist, artistic center, or artistic medium. Slide lectures, class discussion, field trips, class reports. Topics to be announced.

MUS 105 Survey of Music History I 3 Credits

A chronological survey of Western music from the Medieval through the Baroque periods stressing the origin and evolution of musical forms, musical styles, and the important composers before 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 106 Survey of Music History II 3 Credits

A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 204 Jazz History 3 Credits

Survey from 19th C. roots to 21st C. styles. Development of listening skills and overview of musical skills used by jazz performers. Exploration of the relationship between jazz and poetry, race relations, and the reputation of jazz in popular culture.

Prerequisite(s): CMP 120 or CMP 125.

MUS 205 History of Pop and Rock Part I 3 Credits

This course charts the history of popular music from its origins until the 1960s. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music from its roots in the blues, early jazz, ragtime and military band marches to the music of Elvis, Chuck Berry, Little Richard, Buddy Holly, the Rolling Stones and the Beatles. We look at the recording industry and the advent of the gramophone record and the important role of radio and television in expanding the reach of popular music directly into the home, creating a vibrant soundtrack for peoples lives.

MUS 206 History of Pop and Rock Part 2 3 Credits

Description: This course charts the history of popular music from the 1960s to today's. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music through Acid Rock, Progressive (Prog) Rock, Hard Rock, Singer-Songwriters, Disco, Reggae, Funk, Punk, Heavy Metal, New Wave, Grunge, Electronica and Rap & Hip-Hop. We look at the development of analog and digital media and how new forms of delivery of product shapes the business model of the industry and beyond.

MUS 208 Music of the Theater 3 Credits

A study of music drama both historical and contemporary covering European opera of the Baroque, classical and romantic periods, and the American musical theatre, especially the contemporary Broadway musical.

MUS 209 Great Composers 3 Credits

A study of selected major composers life, works, and historical significance with an emphasis on the listening experience. Bach, Mozart, Beethoven, Tchaikovsky, Stravinsky, or others.

MUS 218 Postmodernism & Popular Culture 3 Credits

This course considers music in light of the ideological trends of postmodernism in order to better understand contemporary music in its cultural context.

MUS 300 Beethoven and the Romantic Age 3 Credits

A study of the Romantic period with particular emphasis on Beethoven. The classical heritage, the transformation of that heritage into romantic terms, the prominent influence of Beethoven on 19th century musical style.

MUS 304 Music of the Beatles 3 Credits

This course is a very in-depth analysis of the music and personalities of the Beatles. The student will gain in depth insight to the Beatles songs and albums as the course proceeds through the music chronologically. This will be contextualized historically and sociologically where required.

MUS 306 Contemp Music Experience 3 Credits

A survey of European and American musical styles of the late 19th and 20th centuries. Topics include postromantic music, neoclassicism, serialism, electronic music, and the current avant garde.

MUS 309 Film Music 3 Credits

A study of music in feature film, documentary film, and television. A chronological survey of film music from silent to contemporary film, animated shorts, and television, with emphasis on listening to recorded performance of representative works.

MUS 315 Black Music in America 3 Credits

This course covers the history of music made by and/or about African Americans, from minstrel shows to hip hop and everything in between.

THE 105 Theatre History to 1700 3 Credits

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 206 American Theatre History 3 Credits

The history of the American theater from the colonial period to the present, emphasizing dramatic scripts and theatrical conventions. Examines important playwrights, theorists, and practitioners representative of each period of American history, emphasizing the 19th and 20th centuries.

THE 307 Contemporary Theater 3 Credits

The richness and diversity of contemporary theatre artists across the world are discussed. Focusing on playwrights and innovative performing arts practitioners, the form and content of dramatic literature and production styles considered most significant today are examined from a global context.

THE 308 Modern Drama 3 Credits

Surveys American and European drama from 1920 to 1970. All plays are read in English translation. In these plays, theatrical artists address the great themes of this century. While doing so, they also expand the limits of theatrical expression.

THE 495 Selected Topics in Theatre History 3 Credits

Intensive study of a particular topic, such as the work of one dramatic movement, one period in dramatic history, or one nation's history. Students become deeply involved in an area through research, class discussions, and individual consultation with the instructor.

Arts and Entertainment Industries Management

Program Overview

Arts and Entertainment Industries Management (AEIM) combines passion for arts and entertainment with the business know-how that keeps these industries strong. Opportunities abound for satisfying and rewarding management careers in: music business, film & television, Broadway & regional theatre, professional dance, symphonies, galleries, and many more. With more than four million jobs in the AEIM field - ranging from music, Broadway, or film producer to entertainment lawyer, fund developer, touring manager or marketing executive - the industry needs you. For aspiring performing artists, AEIM is a smart compliment to your performance degree, as U.S. Labor statistics demonstrate that only 1/17th of 1% will make above poverty wage as a performer, while there are over 4.8M jobs on the management side of the industry. What better way to bolster your arts aspirations than with AEIM? With its comprehensive, dynamic curriculum options, Rider affords you the know-how to succeed in these and many other career paths!

Curriculum Overview

The degree requirements within Arts and Entertainment Industries Management (BA) incorporate a core curriculum of 36 credits, a selected path with either a Commercial/For-Profit or Non-commercial/Institutional focus of 12 credits, and a Commercial or Traditional/Institutional Emphasis of 12 credits based upon the path and arts discipline that interests you. Each emphasis incorporates studio or applied skills courses with historical and practical coursework. In addition, majors select elective courses which expand professional skills development beyond those specific to the Arts. Elective course selections range from public relations and communications to professional writing and other options housed beyond the School of Fine and Performing Arts.

Rounding out the degree are the general university requirements and a number of "free electives" which commonly are applied to minors or second majors in one of the arts disciplines or related administrative fields of interest (ie: marketing (<https://rider-curr.courseleaf.com/undergraduate/colleges-schools/business-administration/majors-minors-certificates/marketing/>), event planning and production (<https://rider-curr.courseleaf.com/undergraduate/colleges-schools/liberal-arts-sciences/majors-minors-certificates/event-planning-production/>), business administration (<https://rider-curr.courseleaf.com/undergraduate/colleges-schools/business-administration/majors-minors-certificates/business-administration/>), etc.).

Degrees Offered

- B.A. in Arts and Entertainment Industries Management: Commercial/ For Profit Path
- B.A. in Arts and Entertainment Industries Management: Non-commercial/Institutional Path
- A "plus-one" online MA, Arts Management & Executive Leadership (<https://www.rider.edu/academics/colleges-schools/westminster-college-arts/sfpa/programs/ma-arts-management-executive-leadership/>) adds significant value!

Arts and Entertainment Industries Management Major Requirements

(60 credits)

To satisfy the major, students must complete the following:

- 36 credits from Required Core Courses
- 12 credits from courses in Path 1 or Path 2
- 12 credits from courses in the Optional Emphasis which aligns with your selected Path

The remaining 60 credits will be earned through completing General Education Requirements (p. 1074) or elective courses. Elective course credits may be used to complete a minor or second major in one of the arts disciplines or related field of interest (i.e., marketing, event planning and production, business administration, etc.

Required Core Courses (36 credits)

Code	Title	Credits
Complete the following courses:		
ACC 210	Introduction to Accounting	3
AAD 121	Intro to Arts Administration	3
AAD 202	Commun/Marketing in Arts	3
AAD 203	Arts Fundraising	3
AAD 204	Arts Outreach & Education	3
AAD 225	Arts Administration Practicum ¹	3
AAD 308	Legal Aspects of Arts & Entertainment	3
AAD 309	Arts Events & Festivals Mgt	3
AAD 315	Arts & Entertainment Industries Professional Development	3
AAD 322	Policy Perspectives on Arts & Entertainment	3
AAD 350	Arts Venue and Patron Services Management	3

AAD 401	New York Arts Network	3
Total Credits		36

¹ AAD 225 is a 1-credit course and must be taken three times (Sophomore year Fall, Spring, and Junior year Fall sequence recommended) to satisfy the program requirement.

Select one of the following Paths:

(12 credits)

Code	Title	Credits
Path 1: Commercial / For Profit		
AAD 310	Acquiring & Managing Talent in Arts & Entertainment Industries	
AAD 312	Deal-Making in Arts & Entertainment

Visual Arts (galleries, museums, etc.)		
ART 227	Gallery Management	3
One Art History course ¹		3
One Creating Art or Graphic Design course ¹		3
AAD 491	Arts Management Internship (2nd of 2)	3

¹ Students will choose the course for this requirement during course selection.

Arts and Entertainment Industries Management Minor Requirements

(18 credits)

Any Rider University student may choose to pursue the Arts Administration minor. Interested students should declare the minor by completing a form available in the Department Office.

Code	Title	Credits
Required Courses		
AAD 121	Intro to Arts Administration	3
AAD 202	Commun/Marketing in Arts	3
AAD 204	Arts Outreach & Education	3
or AAD 350	Arts Venue and Patron Services Management	
AAD Electives		6
Select two of the following:		
AAD 203	Arts Fundraising	
AAD 204	Arts Outreach & Education	
AAD 225	Arts Administration Practicum (Note: Three 1-credit semesters will be needed to reach 3 credits)	
AAD 306	Music Business	
AAD 307	Touring and Production Management	
AAD 308	Legal Aspects of Arts & Entertainment	
AAD 309	Arts Events & Festivals Mgt	
AAD 350	Arts Venue and Patron Services Management	
AAD 351	Crossing Cultural Borders	

AAD 375	Special Topics: Arts Admin	
ART 227	Gallery Management	
Other Elective		3
Select one of the following:		
ACC 210	Introduction to Accounting	
CBA 110	Business in Action	
COM 212	Digital Publication Design	
ENG 322	Grant Proposals, Fundraising and Development	
MKT 340	Personal Selling	
Total Credits		18

Academic Plans of Study

The following educational plans are provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Commercial Emphasis Options - Path 1

- Commercial Theatre Emphasis (p. 1084)
- Film and Television Industries Emphasis (p. 1085)
- Music Business Emphasis (p. 1083)
- Sport Entertainment Emphasis (p. 1085)

Traditional/Institutional Emphasis Options - Path 2

- Dance Emphasis (p. 1086)
- Music Institutions/Non-Commercial Emphasis (p. 1086)
- Theatre Emphasis (p. 1087)
- Visual Art Emphasis (p. 1087)

-----------------------------------	-----

Courses and Descriptions**AAD 121 Intro to Arts Administration 3 Credits**

A survey course that covers topics relevant to administering the arts, and includes reviewing state and federal legislation to non-profit organizations, non-profit agency structure, long range planning, board development, marketing, fundraising, public relations, advocacy, budget, human resources and ongoing compliance issues. Students will have opportunities to interact with professionals in the field and explore career options.

AAD 202 Commun/Marketing in Arts 3 Credits

Intended for arts or business majors interested in arts management, this course immerses students in the fundamentals of promoting the arts, from grassroots public relations to basic marketing concepts and applications. Students will have opportunities to interact with professionals in the field and explore career options.

Prerequisite(s): AAD 121 and CMP 125, or permission of instructor.

AAD 203 Arts Fundraising 3 Credits

Provides students with an understanding of the ethics, strategies and practices of fundraising for non-profit arts agencies. Students gain an understanding of the role of the development office in a non-profit arts agency, prepare for careers in arts management by increasing the skills necessary to function, and learn to plan a multi-faceted fundraising campaign effectively.

Prerequisite(s): CMP 120 or CMP 125.

AAD 204 Arts Outreach & Education 3 Credits

This course examines essential educational components of arts institutions, how they evolve and are produced, and will assess the importance of educational programming to arts organizations and the communities they serve.

Prerequisite(s): AAD 121.

AAD 225 Arts Administration Practicum 1 Credits

Under faculty advisement and project site supervision, students complete a total of three, 1-credit (33-hour) "mini-internships" or practicum projects in service to the field, sequentially in the Sophomore Fall, Sophomore Spring, and Junior Fall semesters, simultaneous to Arts Administration Lab. The first practicum project is in connection with Box Office and Patron Service to Rider Performing Arts. The second is in connection with a project of the student's choosing in service to the arts on campus or beyond. The third is in connection with a project of the student's choosing in service to the field in an outside, professional setting.

Prerequisite(s): AAD 121.

AAD 295 Art & Business of Entertainment 3 Credits

Students explore traditional and emerging models in entertainment and the impacts which social media, online service and other emerging platforms continue to have on the evolution of the industry. Students will identify and define pivotal functions and functionaries across all sectors who apply innovation, effective leadership and essential skills to produce and distribute various forms of entertainment to the masses. Through the application of a "wheel of fortune" research & analysis approach to each commercial entertainment sector, students will come to understand the multiple aspects of each (film, television, media, commercial theatre and entertainment in sports), the people who drive them and the critical functions which they serve.

Prerequisite(s): AAD 121, AAD 202 and AAD 203.

AAD 306 Music Business 3 Credits

Survey of the recording industry. Responsibilities of the label and producer, copyrights, royalties, residuals, publishing, contracts and artist development, promotion, distribution, product management, domestic and international licensing, and related technology.

Prerequisite(s): AAD 121, CBA 110.

AAD 307 Touring and Production Management 3 Credits

Organizing, marketing and managing tours. Responsibilities of the booking agent, tour manager, and performers. Case studies, relationships, contracts with venues, transportation companies, housing, and unions, budgeting, press kits, and insurance.

Prerequisite(s): AAD 121, CBA 110.

AAD 308 Legal Aspects of Arts & Entertainment 3 Credits

A survey of legal issues in the arts and entertainment industries, examining the relationship between arts and the law – from cultural property rights to intellectual property, copyright and beyond.

Prerequisite(s): AAD 121.

AAD 309 Arts Events & Festivals Mgt 3 Credits

Students learn to develop, produce, and staff successful arts events while refining planning skills through practice with theoretical and real arts event venues and participating in the production and management of actual events.

Prerequisite(s): AAD 121.

AAD 310 Acquiring & Managing Talent in Arts & Entertainment Industries 3 Credits

This course teaches foundations of professional talent management and explores the many ways by which the role of today's artist manager has evolved and expanded, particularly in an era of "independent" artists seeking managers who can act as CEO's. The course explores the many facets which an artist manager oversees, from launching an artist's career to building a successful and enduring business and fan base. Topics of exploration include talent acquisition, the artist/manager partnership, contracts, strategic planning, branding and more relating to managing all key aspects of an artist's career. Students will gain deep understanding of the dynamic roles which managers and agents play in the entertainment business as the "backbone of our industry" and of the pathways to career success as artist managers & representatives. Aspiring artists will find guidance in self-management and choosing the right partners. Other aspiring entertainment professionals will learn how to effectively engage with artist managers & agents as essential components in the broader ecology of professional arts & entertainment.

Prerequisite: Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 312 Deal-Making in Arts & Entertainment 3 Credits

This course explores all practical aspects of deal-making in commercial entertainment and the art of negotiation as the catalyst for success. Through forensic analysis & discussion of multiple types and structures of short and long-form agreements and the wide variety of provisions to be found therein, students will gain knowledge of key legal, historical, discipline-specific and industry-wide contexts of deal-making. Readings and lectures will focus on the nuts and bolts of negotiation – from essential research processes to finding and exercising bargaining power to knowing when to compromise and when to withdraw. Skills gained will be exercised through role-play, writing and ongoing analysis of peer and professional contracts. Students will gain and exercise deep understanding of agreements across multiple disciplines and the common elements therein including agency, personal management, personal appearance, merchandising, endorsements, creative ownership and union influence will be explored, as well as the unique characteristics which apply to distinct disciplines. For Arts & Entertainment Industries Management majors or minors only except by permission of Dean.

Prerequisite(s): AAD 121, AAD 202.

AAD 314 Commerce and Merchandising in Arts & Entertainment 3 Credits

This course builds upon foundational knowledge gained in "Arts Marketing & Communications," exploring the far-reaching and highly lucrative aspects of commercializing and merchandizing creative output across the many disciplines which comprise the arts & entertainment industries. Creative output in the form of a commercial film, Broadway hit, top-selling album or live performance establishes a point of departure into a massive world of merchandising where brand is king, franchises flourish and sequels make (and break) futures. Students will gain deep understanding of how strategic marketing campaigns develop, run and catalyze broader merchandising, commerce and franchise potential. Readings, lectures and case-based analyses will investigate successful corporate models, strategies and tools for maximizing commercial potential and earnings in the global commercial arts & entertainment marketplace. From relationship and influencer-based approaches across traditional and digital platforms to the tools which maximize celebrity branding, tap global merchandising capacity and harness new technologies that drive innovation, this course introduces aspiring arts & entertainment leaders to the foundations of commercial success.

Prerequisite: Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 315 Arts & Entertainment Industries Professional Development 3 Credits

Arts & Entertainment Industries (AEIM) Professional Development is designed to prepare AEIM majors for successful internship and career placement, growth and development. Through this course, AEIM majors will engage in best possible selves vision mission goals and objectives-setting, transferrable skills identification and articulation, resume development, informational and formal interview skills practice and application as well as refine and package their individual portfolios comprised of final projects/portfolios from several prior courses. These and other assets, including personal web-page and social media profile work and editorial bio, will be developed in the creation of a comprehensive professional "toolkit" of assets to aid in their pre-professional and professional career pursuits. Over the course of a semester, students will work on professional communication skills including public speaking, writing, and corresponding etiquette, and interviewing techniques for both in-person and virtual meetings. Students will explore their own strengths and weaknesses through industry-leading personality and professional skills and traits analyses and how to apply them to maximal effect. Industry guests from all arts disciplines will afford "real-world" perspectives and build networking capacity. Restricted to AEIM Majors, Junior standing or above.

AAD 318 Music Publishing 3 Credits

This course teaches foundational concepts, context, tools, and function of music publishing as an essential force in today's ever-evolving music industry. Students examine the many roles which the music publisher plays in the acquisition, market development and administration of copyrighted musical works. Through case-based analysis of the inner workings of major, independent and self-owned music publishing companies, students will gain understanding of the depth, breadth and scope of this fascinating aspect of the business. Discussion will encompass the fundamentals of copyright, types of publishing deals, income streams, registrations and collection, foreign sub-publishing deals, and the rights and royalties applicable to copyrighted musical work. Students will also learn how music is licensed for use in film, television, advertising, theatrical performance, game and other forms of interactive media, as well as an overview of the administrative aspects of these uses and the ways by which legislative action impacts opportunities and earnings of copyright holders. Lastly, students will explore the creative and administrative responsibilities involved in establishing their own music publishing company.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 320 Licensing & Distributing Arts & Entertainment 3 Credits

Course Description: Licensing and/or distribution of creative output powers nearly every aspect of the arts and entertainment industries as significant brand builders and revenue-generators for intellectual property owners. This course delivers foundational knowledge of the many ways by which music, theater, dance film and other media are licensed for commercial use or otherwise distributed directly to vendors and consumers. Discussion encompasses the various types and purposes of license, key points of negotiation, parties, agreements and business constructs involved in licensing and distribution deals across multiple entertainment sectors. Through readings, lectures and case-based analysis students will study the means of directly and indirectly getting works out into the marketplace, as well as the risks and rewards that may result. Through comparative analysis of traditional and contemporary professional agreements, students will come to understand how licensing and distribution contracts, modalities, administration and payments have evolved, and what the future holds for this vital engine of the arts & entertainment industries.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 202.

AAD 322 Policy Perspectives on Arts & Entertainment 3 Credits

This course delivers foundational knowledge of the historical evolution, current state, and anticipated future of legislative actions, general policies and protocols impacting the many diverse components of arts and entertainment. Students will gain understanding of the several stakeholders, advocates and allies involved in the process of shaping policy and effectuating legislation, from lobbyists and industry leaders to politicians and the constituents whom they represent. Discussion will also encompass the expanding role and reach of the internet and streaming services which have often driven, and too often outpaced legislative agendas, putting the rights and benefits of intellectual property owners at risk through inequitable compensation practices, usurping of rights and expanding of global piracy. Case-based analysis will afford insight into current and anticipated lobbying agendas, legislative action (or inaction) on Capitol Hill, resolutions in process and recent legislation in action. Students will create an advocacy campaign around a pertinent issue facing arts & entertainment today, and strategize an effective lobbying process in order to gain direct insight and inspiration to become lifelong agents for change.

Prerequisite(s): Arts & Entertainment Industries Management majors or minors only except by permission of Dean. AAD 121, AAD 308.

AAD 350 Arts Venue and Patron Services Management 3 Credits

Integrating workplace with organizational mission: administration, staff, general public, artists. Internal control, artist/employee contracts, collective bargaining, health and safety issues, facilities operation, inventory, cultivation and maintenance of clientele and audience.

Prerequisite(s): AAD 121.

AAD 401 New York Arts Network 3 Credits

Students learn how arts institutions of varying scope, size and function and how administrators keep them running by spending focused, intensive time with them on their own turf.

Prerequisite(s): AAD 121, AAD 202 and AAD 203.

AAD 491 Arts Management Internship 3-12 Credits

Arts Administration majors are required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 6 credits of internships.

Prerequisite(s): Junior standing.

Dance

Program Overview

There are many ways to dance at Rider University. The Bachelor of Arts in Dance Performance provides courses in dance technique, history, movement theory, choreography and pedagogy, as well as numerous repertory and performance opportunities. Students have the option of earning a degree in Dance Studies (p. 188) if majoring in Elementary Education. There is also a B.A. in Dance Science, an emphasis in dance with the Arts Entertainment and Industries Management degree, a Dance Minor, and a Movement Science Minor. Graduates of the program may also go on to earn a graduate degree in Clinical Mental Health Counseling with a Dance/Movement Therapy Concentration (<https://www.rider.edu/academics/colleges-schools/college-education-human-services/graduate-programs/counseling-services/ma-clinical-mental-health-counseling/dance-movement-therapy/>).

Degrees Offered

- B.A. in Dance Performance
- B.A. in Dance Studies
- B.A. in Dance Science
- Minor in Dance
- Minor in Movement Science
- M.A. in Clinical/Mental Health Counseling with Dance/Movement Therapy concentration

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

An introductory course to familiarize students with the breadth and depth of dance in human society. It will chronologically examine dance through four lenses: Dance and Community, Dance and Religion, Dance and Politics, and Dance as Art. Students will be exposed to various dance forms from around the world with varying purposes, functions, and motivations from the beginning of recorded history to present.

DAN 111 Dance Lab 0 Credits**DAN 112 Ballet I: The Point of Departure 1 Credits**

This is an entry-level, mandatory ballet class that covers all of the safest fundamental practices, including proper use of alignment, feet, rotation, and use of the core in the classical vocabulary.

DAN 113 Ballet II: Next Steps 1 Credits

This is a continuation of the safest fundamental practices covered in Ballet I, including proper use of alignment, feet, rotation, and use of the core in the classical vocabulary. In addition this course extends the coverage of discourse, terminology and vocabulary of the classical technique. DAN 113 may be repeated two times for a total of three credits.

Prerequisite(s): Ballet I or equivalent.

DAN 121 Introduction to Dance Science 3 Credits

This orientation to dance science will consider important aspects of the study of human performance including anatomy, biology, kinesiology, and psychology of movement and performance. Covered are the foundations and research findings in Movement Theory, Motor Development, and Well-Being. Topics include the Care and Prevention of Injuries, Movement Analysis, Dance Movement Therapy, Mind-body Connection, Dance Fitness and Optimal Performance.

DAN 151 Pilates and Modern 1 Credits**DAN 152 World Dance & Improvisation 1 Credits****DAN 180 History of Movement Theory 3 Credits**

Investigation of the mind-body connection, somatic experience, body therapies, movement and theories. The essential questions are: How is it that we move with awareness, fluidity, efficiency and precision?.

DAN 190 Dalcroze Eurythmics 3 Credits

This movement course familiarizes students with the basic elements of music theory (staff, clefs, time signatures, notations, chords, etc.) and the Dalcroze principles regarding music, movement and improvisation.

DAN 201 Vaganova I 1 Credits

This studio course focuses on fundamental knowledge about the vocabulary, discourse, performance and style of the classical ballet, especially as it pertains to the Vaganova Technique.

DAN 202 Vaganova II 1 Credits

This studio course continues the development of knowledge concerning the vocabulary, discourse, performance and style of the classical ballet, especially as it pertains to the Vaganova Technique. Repeatable twice for total of three times taken. May only be repeated if there are open spots after those taking it for the first time have registered.

Prerequisite(s): DAN 201.

DAN 210 Rider Dances: Repertory & Productions 1 Credits

This course provides an in-depth experience with the art of dance production from creation to performance. Students will be chosen to learn and perform repertory; fulfill technical roles such as sound, lighting and costume design; and assume production and managerial responsibilities such as promotion, publicity, front of house management and stage management.

Prerequisite(s): permission of instructor.

DAN 210T Rider Dances Rep&Produc:Tech 1 Credits**DAN 220 History of Choreography 3 Credits**

This course prepares the dance student for the creating of dance through critical analysis, reading, writing and practical assignments. Students will examine creative process as applied to dance artists and various forms of dance.

DAN 300 Lecture & Studio in Dance 2 Credits

Dance 300 series is also designed to offer students concurrent participation and theoretical inquiry in specific dance forms. Students must register for four classes per week at the Princeton Ballet School. One additional hour is comprised of video observation, lecture, or readings and is held at Rider's Lawrenceville campus. Prerequisite(s): permission of instructor; Dance Studio Courses Ballet I.

DAN 300A Ballet I 0 Credits**DAN 300B Ballet II 0 Credits****DAN 300C Ballet III 0 Credits****DAN 300D Ballet IV 0 Credits****DAN 300E Ballet V 0 Credits****DAN 300F Ballet VI 0 Credits****DAN 300G Jazz I 0 Credits****DAN 300H Jazz II 0 Credits****DAN 300I Jazz III 0 Credits****DAN 300J Modern Dance I 0 Credits****DAN 300K Modern Dance II 0 Credits****DAN 300L Modern Dance III 0 Credits****DAN 300M Spanish Dance I 0 Credits****DAN 300N Spanish Dance II 0 Credits****DAN 300O Spanish Dance III 0 Credits****DAN 300P Pilates Mat Class 0 Credits****DAN 300Q Accelerated Adult Ballet I 0 Credits****DAN 300R Accelerated Adult Ballet II 0 Credits****DAN 300S Accelerated Adult Ballet III 0 Credits****DAN 300T Accelerated Adult Ballet IV 0 Credits****DAN 300U World Dance Forms 0 Credits****DAN 300V Yoga 0 Credits****DAN 300W Tap 0 Credits****DAN 300X Ballet VII 0 Credits****DAN 300Y Choreography 0 Credits****DAN 300Z Movement Fundamentals 0 Credits****DAN 350 History of Ballet, Modern & Jazz Dance 3 Credits**

Studies the major periods in the development of Western Theatrical Dance from the Renaissance to the present focusing on ballet, modern, jazz, tap and musical theater dance. The course will examine the ideas and individuals that caused the development of choreographers, producers, designers and productions.

DAN 450 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. Cross-listing existing entry-level teaching course with analogous graduate-level course (CURR 711).

DAN 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credit hours. Approval of the faculty sponsor, department chair, and dean required prior to enrollment. Prerequisite(s): junior or senior standing, good academic standing.

DAN 491 Internship in Dance 1-4 Credits

Provides junior or senior dance majors with the practical experience of working within an educational or professional dance environment. Students must be sponsored by a dance professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

DAN 493 Special Topics in Dance Studio 1 Credits

This class covers a discrete movement style, technique, or form such as the choreography of Balanchine, the technique of Cecchetti or dance theater fusion.

Prerequisite(s): DAN 100.

DAN 495 Selected Topics in Dance History 3 Credits

Intensive study of a particular topic in dance history or theory. This may include one era, movement or nation's dance history and practice. Students will become deeply involved in an area through research, class discussions and group projects.

DAN 498 Senior Capstone 3 Credits**DAN 499 Seniors Honor Program 3 Credits**

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, to be planned under the direction of a faculty advisor, will represent a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Dance Science

Program Overview

A degree in Dance Science capitalizes on Rider's science offerings to produce a first-of-its-kind curriculum incorporating a wide variety of courses focused on human performance. Students will study the art and movement of dance - fundamentals of classical dance forms; history and theory of dance, composition and performance - along with biology, nutrition, anatomy, exercise physiology, kinesiology and injury prevention.

They will understand socio-political-historical aspects of dance, and be able to discuss meaning in movement. Students will learn to integrate mind-body, and develop strength, coordination, flexibility, musicality, and expression, while studying the science of how to move safely and achieve personal, optimal performance.

Curriculum Overview

Students will learn how to conceptualize, create, and analyze dance as they study the art of movement. They will receive a comprehensive education in both the art of dance and the instrument of dance - the body. Students will have opportunities to both perform on stage and work, shadow, and research with our physical therapist who specializes in movement logic and injury prevention. Each student will select a capstone, multi-disciplinary, or research project. Understanding biomechanics will increase understanding and equip students with the skills, theoretical framework, and experience necessary to enter the

workforce as dance teachers, choreographers, directors, producers, and candidates for graduate school in education, dance, or sciences.

Degree Offered

Note:

- All majors and minors must have a Dance Screening (\$75.00) with a certified Dance Physical Therapist.

Academic Plan

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

BIO 115 Principles of Biology I 4 Credits

An introductory biology course focusing on major themes of biology: what is life?; Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 221 Human Anatomy & Physiology I 4 Credits

A comprehensive survey of the structure and function of musculo-skeletal systems, neuroendocrine systems and related tissues and cellular interactions. Physiological applications include homeostasis, muscle dynamics, and cell activities. Laboratory exercises complement lecture material through the use of animal dissections, wet labs, computer-assisted investigations, microscopy, and models. Exams, case histories, personal investigations, and lab practicums assess learning. Course emphasis supports allied health and pre-professional training. Three hours of lecture and one three-hour lab per week. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): HSC major ONLY or Permission of instructor.

Corequisite(s): BIO 221L.

BIO 221L Human Anatomy & Physiology I Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 221.

BIO 222 Human Anatomy & Physiology II 4 Credits

A comprehensive survey of the organ systems of the body including special senses, cardiovascular, respiratory, digestive, excretory, reproduction and development. Physiological components include electrolytes, metabolism, nutrition, and the mechanisms of homeostasis and cell reception. Lab studies support lecture material through dissections, wet labs, computer-assisted learning, microscopy, and models. Assessment includes lab practicums, exams, and reports. Course emphasis supports allied health and pre-professional training. Designed for allied health students; does not satisfy requirements for the biology major. Prerequisite(s): BIO 221.

Corequisite(s): BIO 222L.

BIO 222L Human Anatomy & Phys II Lab 0 Credits

This lab is a co-requisite and must be taken with the corresponding course. Prerequisite(s): BIO 221L.

Corequisite(s): BIO 222.

DAN 100 Fundamentals of Dance 1 Credits

Designed to offer students concurrent participation and theoretical inquiry in specific dance forms. Students must register for two classes per week at the Princeton Ballet School. One additional hour per week is comprised of video observation, lecture, or readings, and is taught at Rider's Lawrenceville campus. Prerequisite(s): permission of dance advisor; Dance Studio Courses Ballet I.

DAN 105 Survey of Dance History 3 Credits

An introductory course to familiarize students with the breadth and depth of dance in human society. It will chronologically examine dance through four lenses: Dance and Community, Dance and Religion, Dance and Politics, and Dance as Art. Students will be exposed to various dance forms from around the world with varying purposes, functions, and motivations from the beginning of recorded history to present.

DAN 111 Dance Lab 0 Credits**DAN 112 Ballet I: The Point of Departure 1 Credits**

This is an entry-level, mandatory ballet class that covers all of the safest fundamental practices, including proper use of alignment, feet, rotation, and use of the core in the classical vocabulary.

DAN 113 Ballet II: Next Steps 1 Credits

This is a continuation of the safest fundamental practices covered in Ballet I, including proper use of alignment, feet, rotation, and use of the core in the classical vocabulary. In addition this course extends the coverage of discourse, terminology and vocabulary of the classical technique. DAN 113 may be repeated two times for a total of three credits.

Prerequisite(s): Ballet I or equivalent.

DAN 151 Pilates and Modern 1 Credits**DAN 152 World Dance & Improvisation 1 Credits****DAN 180 History of Movement Theory 3 Credits**

Investigation of the mind-body connection, somatic experience, body therapies, movement and theories. The essential questions are: How is it that we move with awareness, fluidity, efficiency and precision?

DAN 190 Dalcroze Eurhythmics 3 Credits

This movement course familiarizes students with the basic elements of music theory (staff, clefs, time signatures, notations, chords, etc.) and the Dalcrozian principles regarding music, movement and improvisation.

DAN 201 Vaganova I 1 Credits

This studio course focuses on fundamental knowledge about the vocabulary, discourse, performance and style of the classical ballet, especially as it pertains to the Vaganova Technique.

DAN 202 Vaganova II 1 Credits

This studio course continues the development of knowledge concerning the vocabulary, discourse, performance and style of the classical ballet, especially as it pertains to the Vaganova Technique. Repeatable twice for total of three times taken. May only be repeated if there are open spots after those taking it for the first time have registered.

Prerequisite(s): DAN 201.

DAN 121 Introduction to Dance Science 3 Credits

This orientation to dance science will consider important aspects of the study of human performance including anatomy, biology, kinesiology, and psychology of movement and performance. Covered are the foundations and research findings in Movement Theory, Motor Development, and Well-Being. Topics include the Care and Prevention of Injuries, Movement Analysis, Dance Movement Therapy, Mind-body Connection, Dance Fitness and Optimal Performance.

DAN 210 Rider Dances: Repertory & Productions 1 Credits

This course provides an in-depth experience with the art of dance production from creation to performance. Students will be chosen to learn and perform repertory; fulfill technical roles such as sound, lighting and costume design; and assume production and managerial responsibilities such as promotion, publicity, front of house management and stage management.

Prerequisite(s): permission of instructor.

DAN 210T Rider Dances Rep&Produc:Tech 1 Credits**DAN 220 History of Choreography 3 Credits**

This course prepares the dance student for the creating of dance through critical analysis, reading, writing and practical assignments. Students will examine creative process as applied to dance artists and various forms of dance.

DAN 300 Lecture & Studio in Dance 2 Credits

Dance 300 series is also designed to offer students concurrent participation and theoretical inquiry in specific dance forms. Students must register for four classes per week at the Princeton Ballet School. One additional hour is comprised of video observation, lecture, or readings and is held at Rider's Lawrenceville campus. Prerequisite(s): permission of instructor; Dance Studio Courses Ballet I.

DAN 350 History of Ballet, Modern & Jazz Dance 3 Credits

Studies the major periods in the development of Western Theatrical Dance from the Renaissance to the present focusing on ballet, modern, jazz, tap and musical theater dance. The course will examine the ideas and individuals that caused the development of choreographers, producers, designers and productions.

DAN 450 Pedagogy and Methodology in Dance 3 Credits

This course provides the student with first-hand experience inside a classroom setting to broaden the students' understanding of dance techniques, teaching styles and strategies, analysis of skills and critical feedback, class preparation and design, and assessment. Course requirements include off-campus field work. Cross-listing existing entry-level teaching course with analogous graduate-level course (CURR 711).

DAN 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credit hours. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing, good academic standing.

DAN 491 Internship in Dance 1-4 Credits

Provides junior or senior dance majors with the practical experience of working within an educational or professional dance environment. Students must be sponsored by a dance professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

EXS 320 Exercise Physiology 3 Credits

An entry level exploration of the physiological processes, metabolic requirements, and consequences of exercise in humans. Emphasis is placed on bioenergetics, as well as circulatory, respiratory, and neuromuscular responses to the physical stress of exercise performed for health and disease prevention.

Prerequisite(s): BIO 221, BIO 222.

EXS 321 Exercise Physiology Laboratory 1 Credits

EXS 321 is the laboratory course that accompanies EXS 320. Topics will include entry-level practical skills and competencies related to exercise capacity evaluation, interpretation of exercise data, and application of exercise interventions in a clinical setting. **Prerequisite(s):** BIO 221, 222 **Co-requisite(s):** EXS 320.

EXS 360 Foundations of Strength and Conditioning 4 Credits

This course examines the advanced methods and techniques associated with the design of strength and conditioning programs to enhance human performance in sport and fitness. This course is designed to develop, enhance, and apply knowledge and skills to prepare the student for the profession of strength and conditioning. **Prerequisite(s):** EXS 320, EXS 321, HSC 302.

Corequisite(s): EXS 360L.

HSC 100 Intro to Human Nutrition 3 Credits

This course is designed to offer the student understanding of fundamental human nutrition concepts including, but not limited to, digestion, absorption, metabolism, functions and sources of macronutrients and micronutrients. The theme of the course will align with human health and disease states and the important conceptions about the food industry and its relation to healthy dietetic choices.

HSC 201 Nutrition for Exercise and Physical Activity 3 Credits

An introductory exploration of evidence based nutritional theory and applications in sport and exercise.

HSC 302 Kinesiology 3 Credits

The purpose of this course is to explore human movement during performance of activities. This course will explore the relationship between anatomical structures and function in the production of movement. The application and relationships between the fundamental principles of mechanics and musculoskeletal system function will be addressed within the framework of clinical and research perspectives. Both qualitative and quantitative approaches will be applied towards a better understanding of human movement, the analysis of physical activity. **Prerequisite(s):** BIO 221 & MTH 105 (or equivalent) or POI.

Corequisite: HSC 302L.

HSC 302L Kinesiology Lab 1 Credits

This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): HSC 302.

MTH 105 Algebra and Trigonometry 4 Credits

The course is an in depth and rigorous study of functions and graphs, equations and inequalities, polynomial and rational functions, exponential, and logarithmic functions, basic trigonometric functions and their inverses, trigonometric identities.

Prerequisite(s): A mathematics SAT score of 570, departmental placement or MTH 100 with a grade of C or higher.

PHL 303 Philosophy of Law 3 Credits

An examination and analysis of selected topics including classical and contemporary theories in the philosophy of law and moral philosophy. Such topics as the nature of the law and legal reasoning, the legal enforcement of morality, protection of personal liberty, and the moral justification of punishment are considered. Such philosophers as Aquinas, Austin, Holmes, Bentham, Hart, and Dworkin are read and discussed.

PSY 100 Introduction to Psychology 3 Credits

This course covers major facts, principles and concepts about human and animal behavior and experience, research findings, major problems, basic vocabulary, methodologies, and contributions in the field. Topics include psychology as a science; human development; individual differences; intelligence and its measurement; special aptitudes and interests; personality and social behavior; motivation and emotion; frustration and personality deviations; and learning, thinking, remembering and forgetting.

PSY 283 Sport Psychology 3 Credits

This survey course will focus on the social and psychological factors related to performance and participation in sport and exercise, health, and injury rehabilitation settings. Two general questions will be explored: (a) how do social and psychological variables influence performance and participation in physical activity pursuits? And (b) how does physical activity participation affect the psychological well-being of the individual? To better understand these questions, this course will overview theoretical and methodological approaches to a variety of sport and exercise psychology topics, including: socialization, motivation, group processes, competition, and performance enhancement. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

PSY 345 Health Psychology 3 Credits

This course focuses on the biopsychosocial model of health in which biological, psychological and social factors contribute to health and wellbeing, as well as illness and disease. After a brief introduction to systems of the body, i.e. nervous, endocrine, respiratory, cardiovascular, digestive, immune, this course will examine health enhancing behaviors such as exercise and nutrition, as well as health compromising behaviors such as drug abuse and other reckless behaviors, along with models that explain behavior maintenance and change. Additionally, attention is devoted to a discussion of how health psychology can function in shaping health care policy.

Prerequisite(s): PSY 100 or PSY 102 or PSY 110 or PSY 131.

SOC 101 Sociological Imagination 3 Credits

Introduction to principles and concepts for the sociological analysis of human societies. Social relations, social structure, and institutions characteristic of societies past and present are examined, and causes and directions of social change are considered. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

Film and Media Studies

Program Overview

The film and media studies minor approaches film and media from interdisciplinary humanities and cultural studies perspectives, providing students with a comprehensive and nuanced understanding of media

within their experience and the world. Students majoring in Film and Television are encouraged to minor in Film and Media Studies.

Degree Offered

- Minor in Film and Media Studies

Film and Media Studies Minor Requirements

The required Foundation Course, FMS 284/ENG 284, should be taken early in the minor.

Students must complete a minimum of five (5) of the seven (7) Film and Media Studies Program courses uniquely counted toward the 21-credit minor. In other words, no more than two (2) courses counting toward the 21-credit FMS minor can be used toward major or minor requirements in other areas, whether in English, Communication, American Studies, Law and Justice, Languages, Literatures and Cultures, etc.

Code	Title	Credits
------	-------	---------

Select at least one course from each group, but no more than two from Technical Aspects. You must select a minimum of four FMS-designated courses from among those listed in groups II, III, and IV, making a total of five FMS courses.

I. Foundation Course (required)

FMS 284	Language of Film Analysis	
or ENG 284	Language of Film Analysis	

II. Film Theory and Aesthetics Courses (select at least one)

FMS 260	Great Performances in Film	
FMS 300	Special Topics in Film and Media Studies ¹	
FMS 342	Artists of the Cinema	
FMS 381/ENG 381	Studies in Film Genre	
FMS 382/ENG 382	Comparative Film Directors	
FMS 384/ENG 384	Film Adaptation	

FMS 484/ENG 484	Seminar in Cinema Studies	
-----------------	---------------------------	--

AMS 214	Special Topics in American Studies	
AMS 215	Alfred Hitchcock in America	
MUS 309	Film Music	
MUS 310	The Film Music of Stanley Kubrick	

III. Film History, Media, and Culture Courses (select at least one)

FMS 250/ENG 281	Global Film History: Origins to 1960	
FMS 251/ENG 282	Global Film History: 1961 to Present	
FMS 252/ENG 285	American Film History: Origins to 1960	
FMS 253/ENG 286	American Film History: 1961 to Present	
FMS 383/ENG 383	Global Cinemas	

FTV 291	Documentary Film and Video	
FTV 328	Sitcoms and American Culture	
FRE 422	Cultural Expression in French Film and Television ²	
GLS 310	Ethnographic Film	
LAW 395	Selected Topics in Law/Justice	
LIT 322	German Literature & Film in English Translation	
POL 306	American Political Film	
PSY 375	Psychology and Film	
SOC 204	Law, Literature, and Film in America	
SOC 252	Media, Culture and Society	
SOC 302	Crime & Justice in the Media	
SPA 412	Theater and Film of the Hispanic World ³	
SPA 426	Latin American/Latino Film and Fiction ³	

IV. Technical Aspects Courses (select at least one)

COM 234	Audio Production	
FMS 286	Writing Short Screenplays for Digital Cinema	
FTV 135	Filmmaking I	
FTV 231	Film and Television Special Studies ⁴	
FTV 235	Filmmaking II	
FTV 295	Cinematography I	
ENG 312	Creative Writing: Screenwriting	
THE 300	Acting for the Camera	

Total Credits	0
---------------	---

¹ Depending on the topic, this course may count as a Group II, III, or IV course; to be determined as courses are offered.

² Prerequisite: FRE 201, placement test at 300 level or above, or FRE 300 or above.

³ Prerequisite: SPA 201, placement test at 300 level or above, SPA 300 or above.

⁴ FTV 231 Film and Television Special Studies courses are one credit each. Students must take three to fulfill the FMS Technical Aspects requirement.

Notes

- **Junior and Senior Film and Media Studies minors may also take:**

FMS 490 Independent Research and Study

FMS 491 Internship in Film and Media Study

- FMS 490 and FMS 491 will fulfill requirements in the category designated as appropriate by the program director; both courses require permission of the director.
- Students minoring in Film and Media Studies are encouraged to consider majoring in Filmmaking, TV and Radio (http://catalog.rider.edu/undergraduate/colleges-schools/liberal-arts-sciences/majors-minors-certificates/digital_media-film-television-radio/) or in English with a concentration in Cinema Studies (p. 357).

Courses and Descriptions

FMS 250 Global Film History: Origins to 1960 3 Credits

Examines major technological and aesthetic developments in both American and international cinema of the period, with an emphasis on global cinema. From silent comedy and melodrama to German Expressionism and Soviet activist cinema; from French poetic realism and Italian Neo-realism to Hollywood sound cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. FMS 250 is cross-listed with ENG 281 and fulfills the general education global perspectives requirement.

FMS 251 Global Film History: 1961 to Present 3 Credits

Examines major technological, industrial, and aesthetic developments in both American and international cinema of the period, with an emphasis on global cinema. From the decline of the studio system and the emergence of the “New Hollywood” to the digital revolution; from the renaissance in Western and Eastern European cinemas to Latin American, Asian, and Middle Eastern cinema, this course will survey and assess the impact of influential movements, major film artists, and groundbreaking films of the period. FMS 251 is cross-listed with ENG 282 and fulfills the general education global perspectives requirement.

FMS 252 American Film History: Origins to 1960 3 Credits

Examines major technological and aesthetic developments in American cinema as it grew from the days of one-reel silent shorts exhibited in storefront theaters through the days of studio productions exhibited in lavish picture palaces and featuring iconic stars the system manufactured and promoted. From the inception of sound and color, to the later development of lightweight equipment that freed filmmakers from the confines of the studio, from the “golden age” to the gradual decline of the Hollywood studio system in the 1950s, we will study the lasting genres that grew out of the system, the filmmakers who flourished and those who rebelled against the system, and the ground-breaking films that established the American film industry as a dominant force within the world. FMS 252 is cross-listed with ENG 285.

FMS 253 American Film History: 1961 to Present 3 Credits

Examines the transitions of Hollywood in the post-studio era— the rise of the 1960s-1970s New Hollywood and its ground-breaking films, the rise of the blockbuster as an industry standard; the responses of independent filmmakers and the avant-garde to blockbuster dominance; the transition from the Production Code to the ratings system, the move back to studio-owned theaters, and the emergence of digital cinema and CGI. We will look at how genres are being redefined, how major filmmakers are re-shaping their work to fit 21st century demands, how “gaming,” YouTube, and other media sources are altering the very definition of cinema. FMS 253 is cross-listed with ENG 286.

FMS 260 Great Performances in Film 3 Credits

Examines major accomplishments in film acting from the silent era to the present day. Students will acquire knowledge of the historical and critical contexts and the artistic vocabulary necessary to understanding, appreciating and assessing screen performances in a range of genres— from comedy and the musical, to the melodrama, psychological thriller, and “hard-boiled” film noir. Students will be asked to read, evaluate, and analyze film performance texts, as well as to research and write about performances in numerous films.

FMS 284 Language of Film Analysis 3 Credits

Provides students with the fundamentals necessary for achieving beginning proficiency in methods of cinema studies scholarship. The course provides an in-depth introduction to concepts of film analysis, theory, and history, as well as to the field of cinema studies as an academic discipline. Through close analysis of selected films and readings, students will examine the various and complex ways in which formal elements shape meaning. Students also will study key concepts in film theory, applying these concepts as a further means of understanding the ways in which film positions viewers and mediates ideology. Required of all Film and Media Studies minors. FMS 284 is cross-listed with ENG 284.

FMS 286 Writing Short Screenplays for Digital Cinema 3 Credits

Writing Short Screenplays for Digital Cinema will focus solely on the creation of a short screenplay for digital film. The course will ask that students conceive of and execute a viably producible screenplay, shooting script, and industry pitch for the modern market.

FMS 300 Special Topics in Film and Media Studies 3 Credits

Courses in specialized and interdisciplinary areas of Film and Media Studies explore all three phases of the media experience: the industry that produces, distributes and exhibits; the textual products themselves; and audience reception of these products. FMS 300 Special Topics in Film and Media Studies courses will focus on each of the phases individually and/or on intersections of all three phases. Special topics courses will devote attention to the relationship of film to both traditional as well as new media; the relationship of film to the other arts; the relationship of film to the ancillary products and industries it both creates and depends upon for financial profit; and the relationship of film as an industry and institution to the various cultural institutions film and media texts routinely represent.

FMS 340 Film and Media Audiences 3 Credits

Provides students with the fundamentals necessary for understanding media audiences and reception within the interdisciplinary framework of film and media studies. The course introduces students to the field of audience and reception studies, including theory, empirical scholarship and history. Students will learn about who composed audiences, how they behaved, how they responded to the medium and the texts it delivered, how they interpreted what it meant to be an audience, how audiences were defined and treated by others, both today and historically. This will include audiences of movies, radio, television and news media.

FMS 342 Artists of the Cinema 3 Credits

Provides the opportunity to delve into the work of an individual film artist (whether a director, producer, screenwriter, cinematographer, costume designer, art director, musical composer, actor) or to examine a creative team (various combinations of a director, actor, cinematographer, screenwriter) that has collaborated in producing a series of films together. The course will pose the daunting question: Who is the author of the film? Even when studying individual artists, we will explore the influences and the working relationships that have shaped their work, and we will look outward to the way in which they have influenced other artists of their own generation and beyond.

FMS 381 Studies in Film Genre 3 Credits

Provides an in-depth examination of a variety of film genres (such as the gangster film, the western, the musical, the screwball comedy, the science fiction film, and the horror film, among others), to be examined through the perspective of film genre theory. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing specific genres, and will trace the development of those genres within the dual contexts of the film industry and cultural ideology. Note: This course is cross-listed as ENG 381. Students may not get credit for both ENG 381 and FMS 381.

FMS 382 Comparative Film Directors 3 Credits

Provides an in-depth comparative study of major American, international, independent and avant-garde filmmakers. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing the work of individual directors and will draw meaningful comparisons among directors sharing similar aesthetic and thematic approaches. Students will trace the artistic development of directors through their careers, assessing individual works in the context of film criticism and theory, and in the context of multi-layered intertextual influences. Note: This course is cross-listed as ENG 382. Students may not get credit for both ENG 382 and FMS 382.

FMS 383 Global Cinemas 3 Credits

Provides an in-depth study of the history and defining characteristics of national cinemas. Through close analysis of selected films and readings, students will examine the general movements within the history and development of various national cinemas, with attention to film historiography when considering how patterns are to be viewed in light of the culture, politics, and history of a particular producing nation. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as ENG 383. Students may not get credit for both ENG 383 and FMS 383.

FMS 384 Film Adaptation 3 Credits

Provides an in-depth study of intertextual influence, as film enters into "dialogue" with various literary forms. Through close analysis of selected films and various forms of literature-including novels, graphic novels, short stories, plays, poetry, and journalism-students will study the aesthetic specificity of both film and literary genres and will analyze the transformative qualities at play when a work is adapted from page or stage to screen. Note: This course is cross-listed as ENG 384. Students may not get credit for both ENG 384 and FMS 384.

FMS 484 Seminar in Cinema Studies 3 Credits

Provides an in-depth study of areas central to discussion and debate in the field of cinema studies (such as film violence, cinema censorship, feminism and film, post-colonial cinema, African- American cinema, blaxploitation, The French New Wave, and Italian Neorealism, among others). Through close analysis of selected films and readings, students will examine the impact of specialized influential movements in film history and in film theory and criticism. Further, students will trace and evaluate the influence of selected film movements and issues upon both cinematic and critical practice. Note: This course is cross-listed as ENG 484. Students may not get credit for both ENG 484 and FMS 484.

FMS 490 Independent Study: Research and Creative Expression 1-4 Credits

FMS 490 Independent Study will allow Film and Media Studies minors to pursue specialized areas of study, research and/or creative work relevant to the field of Film and Media Studies in consultation and close collaboration with a Film and Media Studies faculty member.

FMS 491 Internship in Film and Media Studies 1-4 Credits

FMS 491 Internship in Film and Media Studies will provide approved juniors and seniors minoring in Film and Media Studies with the opportunity to gain practical experience through work in various outside film and media-related publications, businesses, organizations, and production companies.

Film and Television

Program Overview

Students majoring in Film and Television have access to a wide variety of courses that carefully integrate hands-on production practice with studies in film history, theory, and the work of major film artists. FTV students are taught best professional practices through small, interactive classes in the Department's state-of-the-art digital film and television labs and editing suites. Through class projects and internships, students gain experience in screenwriting, editing, cinematography, and direction/performance methodologies for camera and screen, honing their aesthetic and technical skills in film and television production. To fully complement these skills, FTV students are encouraged to minor in Film and Media Studies (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-sciences/liberal-arts-programs/film-media-studies/>), which is part of the FTV Department. In addition to traditional three-credit courses, students participate in the Department's innovative one-credit workshops taught by practicing industry professionals. These courses not only expose students to specialized niches within the profession, but also provide students with networking opportunities.

Beyond the classroom, students can also participate in a variety of film appreciation and production clubs, such as the Alternative Film Club (<https://www.rider.edu/academics/colleges-schools/college-liberal-arts-education-sciences/liberal-arts-programs/film-media-studies/alternative-film-club/>) and R.U.N., The Rider University Network (<http://runetwork.weebly.com/>). The Department of Film and Television's central location offers students internship opportunities throughout New York, New Jersey and Philadelphia. Rider's semester long program in Los Angeles also allows students a valuable opportunity to live, learn, and intern in one of the major film and media development and production centers of the world.

Curriculum Overview

The Department of Film and Television curriculum is designed to provide students with a comprehensive education in the production, aesthetics, history, and theory of film and television. Our core integrates filmmaking and film studies courses including two fundamental production courses; Foundations of Film, Television & Radio; Screenplay Fundamentals; and Language of Film Analysis. The curriculum also includes advanced courses in subjects such as film direction, cinematography, global and American film history, film and television writing, film adaptation, studies of a variety of film and television genres, major film directors, animation, documentary, and narrative television production.

Total Credits	45-54

¹ FTV 231 must be taken three times for a total of 3 credits, each with a different special topic, to satisfy the requirement.

² Indicates a writing course that will satisfy the requirement.

Film & Television Minor Requirements

The minor in Film and Television provides students with a solid foundation in film and television history, theory, screenwriting, and production. Rider’s alumni network and industry connections, and the Department’s Semester in Los Angeles Program, allow students to complement traditional classwork with real-world internships in the film and television industry. While broadening a student’s appreciation for film history and aesthetics and developing their video storytelling and production skills, the minor helps prepare students for careers in the film and television industry or for advanced studies in film and television.

Courses and Descriptions

FTV 135 Filmmaking I 3 Credits

Filmmaking I introduces students to basic film and television production theories, techniques, and applications. Students will gain competency in a number of production areas including composition, lighting, filmic storytelling, sound, production planning and editing. As well as gaining practical production experience, students will also be introduced to basic art theory in relation to composition and visual storytelling.

FTV 202 Global Film & Media Industries 3 Credits

An introductory survey of the international film and television industry that will provide students with a global perspective of this ever-evolving industry. First, providing a basic foundation of key historical, economic and cultural factors and initiatives impacting and shaping films and television programs, this course will provide students with the tools to better understand the influence that globalization has on the film and television industry and the impact the products of this industry may have throughout the world.

FTV 221 Animation: History, Art, Industry & Culture 3 Credits

An introduction to the history of animation in film and television, this course will explore animation as art, industry, and purveyor of culture. Through this course, students will gain a greater appreciation for aesthetics, technology, and the cultural and communication theories impacting and influencing the genre, and gain a greater understanding of the role played by key individuals and companies in the development of both iconic characters and in the shaping of an industry. Students will view a variety of important animated films and television programs and discuss the artistic, technical and narrative developments in animation from the early 20th century to the present. This course will provide students with a more nuanced understanding of the magic of animation and its impact and influence on culture and society throughout the globe.

FTV 230 Foundations of Film, Television and Radio 3 Credits

Examines film, television and radio industries, the programs they create and the powerful role they play in society. This course will examine the history, technology, structure, programming and regulation of these industries including issues, trends, and the impact of new and evolving technologies.

FTV 231 Film and Television Special Studies 1 Credits

Course descriptions will vary from topic to topic. This course will be offered Pass/Fail.

FTV 235 Filmmaking II 3 Credits

This course will build on the basic technical proficiency gained in COM 135 as applied to narrative filmmaking. Working as individuals and in groups, students will develop skills in narrative cinematic storytelling, and gain a basic proficiency in filmmaking theory, techniques and applications. Students will gain competency in a number of production areas including idea generation and scripting, production planning, cinematography, lighting, sound and editing.

Prerequisite(s): COM 131.

FTV 236 The Aesthetics of Filmmaking 3 Credits

Introduces students to basic terminology, techniques, theories and criticism commonly used in digital filmmaking. Through lecture, class discussion and screenings, students will learn how film theory, criticism and aesthetics impact the filmmaking process. Students will review and analyze films of different genres; the different approaches adopted by filmmakers; and the various elements and techniques that contribute to the creation of powerful and effective films. Aesthetic elements such as production design, mise en scene, cinematography, lighting, editing, sound design and script development will be introduced and practiced.

FTV 238 Screenplay Fundamentals 3 Credits

Screenplay Fundamentals will instruct students in how to write for the screen. Students will learn how to convey story and character through the medium of film and television, how to write effective dialogue, and understand the basics of dramatic writing and scene structure.

Prerequisite: COM 131.

FTV 239 YouTube: Content and Culture 3 Credits

YouTube, one of the most well-known and widely discussed examples of participatory media in the social media environment, is the first generally popular platform for user-created video. Blending theory and practice, this course examines the social, cultural, economic, and political implications of YouTube; the empowerment and pitfalls of the user-generated content it relies on; and the implication of the participatory media which has transformed passive viewers into active producers. Students will learn the historical roots of YouTube, become familiar with modes of media production, and study legal, ethical, and social justice issues related to the creation of channels and videos for YouTube. While the course has a significant theoretical component, students will engage directly in participatory practices by designing and creating course related content for YouTube. Through this course, students will gain a critical understanding of and a greater appreciation for the impacts of user generated video content on social and political participation locally and globally.

FTV 243 The Actor and Filmmaker 3 Credits

A practicum course that instructs the student on how actors and directors work together to build a performance. The course will provide on-hands experience in technical aspects of behind and in front of camera processes in capturing an actor's performance, exploring the demands and particularities of acting for the camera. This course will also serve as an introduction to basic acting theories and practices as they relate to how actors work to express a character onscreen. Elements of this course include monologue and scene rehearsal and performance (both multi-camera and single camera), audition techniques (for both actors and directors), and how film directors block and cover a scene. Students will gain experience both behind and in front of the camera, **Prerequisite(s):** COM 131 or FTV 135 for Film/TV majors or THE 110 for Theater majors.

FTV 250 Television Studio Production I 3 Credits

This introductory course is designed to expose students to the processes, equipment, production roles, techniques and goals of in-studio television production. Serving as directors, writers, on-camera hosts, etc., students will gain valuable, direct hands-on experience with the technical and creative challenges faced during the various phases of studio production from pre-production planning through actual remote and live studio work. Emphasis will be placed on studio operation and technology; the roles and responsibilities of the production crew; and the pressures faced during the direction of live, multi-camera productions. **Prerequisite(s):** COM 131 or FTV 135.

FTV 291 Documentary Film and Video 3 Credits

Surveys the history of documentary film, including reportorial, exploratory, persuasive, symphonic, compilational, reflexive, and fictional traditions through screenings, lectures, and readings. Provides practice in film criticism. Explores philosophical questions about the relationship between non-fiction films and videos and the reality they purport to record. Analyzes ethical problems of filmmaking.

FTV 295 Cinematography I 3 Credits

This course introduces the art of cinematography from historical, aesthetic and practical perspectives. Students will learn the principles of cinematic composition, lenses, lighting, and camera operation while studying the work of great cinematographers in film history. **Prerequisite(s):** COM 131.

FTV 328 Sitcoms and American Culture 3 Credits

Provides an overview to the unique and highly structured form of the American television situation comedy. The primary focus will be on history and development with in-depth study of situation comedy themes, characters, and settings. Through lectures, case discussions, in-class assignments, and class projects, students will examine the social and cultural meanings and implications of this incredibly popular and durable genre of programming.

FTV 330 Documenting Cultures Through Travel 3 Credits

Offers students, through travel and study, a unique opportunity to gain firsthand experience of a different culture and to learn how to record and document their experiences using multiple media, including print, audio, video, photography and/or the Web. While traveling, students will be required to attend lecture/discussion sessions, site tours, and other planned activities. This experience will be preceded and/or followed by additional academic work to be conducted on campus. Study topics may include aspects of the historical, social, economic, political and aesthetic cultural components appropriate to the location(s) to be visited. The travel component of the course will be scheduled to avoid conflict with normal semester offerings. No foreign language skills are required.

FTV 333 Media Program Development and Distribution 3 Credits

Critically analyzes the theory, practice, structure, and function of media program development and distribution. Examines the structure of the field as it relates to programming, the industry and audiences. Studies program categories, formats, genres, trends, and audience measurement and analysis as well as the new and evolving technologies responsible for program development and distribution.

Prerequisite(s): FTV 230.

FTV 335 Documentary Production 3 Credits

This course serves as an introduction to documentary filmmaking. Students will be introduced to a wide variety of documentary styles and approaches and learn the basics of documentary production. Working in teams, students will gain firsthand experience with on-camera interviews, conducting documentary research, using practical and source lighting, scripting, and working with a variety of source material in constructing their own short documentary projects.

Prerequisite(s): COM 331.

FTV 339 Developing The Feature-Length Script 3 Credits

Developing the Feature Length Script will instruct students how to write a full-length film or television program. Students will learn the mechanics of 3-act and 7-act structure, and during the course they will develop a logline, synopsis, treatment, and sample scenes of a full-length project. **Prerequisite(s):** FTV 238.

FTV 343 Actor and Filmmaker Practicum 1 Credits

A workshop class designed to give acting and filmmaking students an opportunity to collaborate on narrative film and television projects. During this class students will work closely with the directors on building compelling performances for the screen. Students will gain practical experience with auditioning, blocking of scenes, developing their characters and techniques for working effectively and efficiently with a director and crew.

Prerequisite(s): FTV 135 or THE 110.

FTV 390 Communication and Society 3 Credits

Examines in a topical manner the influence of communication upon significant issues and movements affecting people and society. Investigates interpersonal and mass media factors as they relate to a major issue such as changing sex roles, radicalism, racism, evangelism, election campaigns, and technology. May be taken more than once with different emphasis.

FTV 392 Media History: Personalities and Trend 3 Credits

Presents in a topical manner the history of the media from various perspectives, seeking to place the material into a meaningful economic, cultural, political, and/or social context. Different issues and related individuals are examined, such as the golden age of radio, motion picture economics, and media empire builders, with a view toward understanding their significant impact on the development and functioning of the media today. This course may be taken more than once with a different emphasis.

FTV 395 Los Angeles Media Experience 3 Credits

This course is a practical exploration of the workings of the contemporary film and media industries in Los Angeles, California, and is designed as a required compliment for students enrolled in Rider's Semester in Los Angeles program. Focused on both major studios and independent production companies, this course explores how media are created, distributed and consumed in the U.S. and around the world. Students will examine the role of creativity, economics, an ever-evolving technology and the impact they have on how this industry operates today and where it may be heading into the future. The class will stay current by regularly reading trade publications and, through guest lectures, have many opportunities to hear directly from industry professionals about issues and challenges facing the field.

Prerequisite(s): POI (restricted to students enrolled in the Department of Film and Television Semester in Los Angeles program.

FTV 399 The Co-Operative Experience 3-12 Credits

This course provides a significant work experience to support the professional development of the student and complement theoretical and classroom learning. Students will be assessed based on measures as defined in a placement contract mutually agreed upon by the sponsoring faculty member, the organization representative of the placement site, and the student. Approximately 360 hours of work will be required as students work typically four days per week over at least eight weeks. The proposed placement contract requires departmental approval and the approval of the appropriate office of the dean. It is expected that the Co-op program consume the student's academic load for the semester. Final placement will be determined by the organization where the student will work. Rider University does not guarantee that every student applying for a co-op will earn a co-op placement. Contact the appropriate department for additional information. **Prerequisite(s):** junior standing and 2.75 GPA at the time of registration; .

Corequisite(s): IND 398 The Co-operative Experience Seminar, IND 398 and (dept) 399 combined cannot exceed 15 credits.

FTV 402 Directing for Film 3 Credits

This course approaches directing both creatively and critically, and examines the role and importance of the director to the filmmaking process. The transformation of the written script into a film is explored through readings, viewing and analyzing the films of accomplished directors. Lectures and exercises illustrated with film clips and readings emphasize plot development, script analysis, developing storyboards and shot lists, rehearsal, blocking, collaborating with talent and production crew, and using the camera to effectively capture action and performance. Students will gain an effective understanding of the role of the director through the various stages of film production, and be provided the opportunity to demonstrate and cultivate his/her effectiveness as a director through individual and group assignments.

Prerequisite(s): FTV 235 and COM 338.

FTV 435 Filmmaking III 3 Credits

This is an intensive hands-on course in advanced digital filmmaking. Students will gain proficiencies in a number of filmmaking areas including production planning, aesthetics, scripting, script breakdown, camera movement, selecting and directing talent, creating scenes and sequences, visualizing action, establishing mood and conflict, as well as advanced lighting, sound and digital editing techniques. The students' use of high definition digital imaging systems as a medium for narrative cinematography will be developed and refined. In addition, students will explore how filmmaking techniques and technology can impact the visual storytelling process. Students will work cooperatively in groups, modeling the interdependent structure of professional film crews. Throughout the class, there will be an important integration of theory and practice which will enable students to produce meaningful film projects that will not only be technically effective, but strong in content and context as well.

Prerequisite(s): FTV 235.

FTV 490 Independent Study: Research and Creative Expression 1-4 Credits

Independent Research and Study allows juniors and seniors in good academic standing to investigate topics of interest under faculty supervision. Projects must be approved by the faculty member, department chairperson, and academic dean no later than the third week of the semester in which the project is to be conducted. Only one project can be scheduled in a semester, and for no more than four semester hours; up to 12 semester hours of independent research and study may be counted toward graduation. Note that individual departments may have additional restrictions.

FTV 491 Internship in Film and TV 1-4 Credits

Places qualified students in a professional area related directly to their communication training. Students may intern in a communication position with a corporation, small business, media outlet, public relations agency, non-profit organization, political party, sports organization, or other similar organizations. A minimum of 50 hours of internship per credit is required. Written reports, a final project, and supervisor evaluations are used to analyze and evaluate the experience. For students majoring in the Department of Communication and Journalism only, primarily juniors and seniors. No more than two internships are permitted for each student; exceptions may be made. The deadline for registration is the first Friday of the semester.

Prerequisite(s): 3.2 GPA and permission of instructor.

Filmmaking for Actors

Overview

The minor in Filmmaking for Actors provides acting students an opportunity to collaborate with Film and Television Production students in order to gain a greater understanding of the production field, as well as the specific requirements of acting for the camera. Students will gain competency in development and production, along with the practical experience of working with screenwriters and filmmakers. Students also will be given the ability to tailor their coursework in ways that best prepares them for careers in acting for film and television.

FTV 135 Filmmaking I 3 Credits

Filmmaking I introduces students to basic film and television production theories, techniques, and applications. Students will gain competency in a number of production areas including composition, lighting, filmic storytelling, sound, production planning and editing. As well as gaining practical production experience, students will also be introduced to basic art theory in relation to composition and visual storytelling.

FTV 230 Foundations of Film, Television and Radio 3 Credits

Examines film, television and radio industries, the programs they create and the powerful role they play in society. This course will examine the history, technology, structure, programming and regulation of these industries including issues, trends, and the impact of new and evolving technologies.

FTV 235 Filmmaking II 3 Credits

This course will build on the basic technical proficiency gained in COM 135 as applied to narrative filmmaking. Working as individuals and in groups, students will develop skills in narrative cinematic storytelling, and gain a basic proficiency in filmmaking theory, techniques and applications. Students will gain competency in a number of production areas including idea generation and scripting, production planning, cinematography, lighting, sound and editing.

Prerequisite(s): COM 131.

FTV 238 Screenplay Fundamentals 3 Credits

Screenplay Fundamentals will instruct students in how to write for the screen. Students will learn how to convey story and character through the medium of film and television, how to write effective dialogue, and understand the basics of dramatic writing and scene structure.

Prerequisite: COM 131.

FTV 239 YouTube: Content and Culture 3 Credits

YouTube, one of the most well-known and widely discussed examples of participatory media in the social media environment, is the first generally popular platform for user-created video. Blending theory and practice, this course examines the social, cultural, economic, and political implications of YouTube; the empowerment and pitfalls of the user-generated content it relies on; and the implication of the participatory media which has transformed passive viewers into active producers. Students will learn the historical roots of YouTube, become familiar with modes of media production, and study legal, ethical, and social justice issues related to the creation of channels and videos for YouTube. While the course has a significant theoretical component, students will engage directly in participatory practices by designing and creating course related content for YouTube. Through this course, students will gain a critical understanding of and a greater appreciation for the impacts of user generated video content on social and political participation locally and globally.

FTV 243 The Actor and Filmmaker 3 Credits

A practicum course that instructs the student on how actors and directors work together to build a performance. The course will provide on-hands experience in technical aspects of behind and in front of camera processes in capturing an actor's performance, exploring the demands and particularities of acting for the camera. This course will also serve as an introduction to basic acting theories and practices as they relate to how actors work to express a character onscreen. Elements of this course include monologue and scene rehearsal and performance (both multi-camera and single camera), audition techniques (for both actors and directors), and how film directors block and cover a scene. Students will gain experience both behind and in front of the camera, **Prerequisite(s):** COM 131 or FTV 135 for Film/TV majors or THE 110 for Theater majors.

FTV 295 Cinematography I 3 Credits

This course introduces the art of cinematography from historical, aesthetic and practical perspectives. Students will learn the principles of cinematic composition, lenses, lighting, and camera operation while studying the work of great cinematographers in film history.

Prerequisite(s): COM 131.

FTV 343 Actor and Filmmaker Practicum 1 Credits

A workshop class designed to give acting and filmmaking students an opportunity to collaborate on narrative film and television projects. During this class students will work closely with the directors on building compelling performances for the screen. Students will gain practical experience with auditioning, blocking of scenes, developing their characters and techniques for working effectively and efficiently with a director and crew.

Prerequisite(s): FTV 135 or THE 110.

FMS 260 Great Performances in Film 3 Credits

Examines major accomplishments in film acting from the silent era to the present day. Students will acquire knowledge of the historical and critical contexts and the artistic vocabulary necessary to understanding, appreciating and assessing screen performances in a range of genres—from comedy and the musical, to the melodrama, psychological thriller, and “hard-boiled” film noir. Students will be asked to read, evaluate, and analyze film performance texts, as well as to research and write about performances in numerous films.

FMS 284 Language of Film Analysis 3 Credits

Provides students with the fundamentals necessary for achieving beginning proficiency in methods of cinema studies scholarship. The course provides an in-depth introduction to concepts of film analysis, theory, and history, as well as to the field of cinema studies as an academic discipline. Through close analysis of selected films and readings, students will examine the various and complex ways in which formal elements shape meaning. Students also will study key concepts in film theory, applying these concepts as a further means of understanding the ways in which film positions viewers and mediates ideology. Required of all Film and Media Studies minors. FMS 284 is cross-listed with ENG 284.

FMS 286 Writing Short Screenplays for Digital Cinema 3 Credits

Writing Short Screenplays for Digital Cinema will focus solely on the creation of a short screenplay for digital film. The course will ask that students conceive of and execute a viably producible screenplay, shooting script, and industry pitch for the modern market.

THE 300 Acting for the Camera 3 Credits

Focuses on the craft and artistry of acting in television and film. Examination of TV production and the styles needed for work in various media will be discussed. Physicalization, simplicity, listening, marking and other technical requirements will be explored. Staging involving different camera angles will be rehearsed. The emphasis of this class is on adapting the performance to the special needs of the camera.

Prerequisite(s): THE 107.

Game and Interactive Media Design

Overview

Students will learn to conceptualize, create, and analyze video games and related media (animation, sound, narrative, interface, and user experience.) All students complete courses in media theory, basic computer coding languages, and general education courses, and will choose an emphasis in visual, sound, or narrative design (or some combination of the three.) Culminating in a multi-disciplinary, project-based course and required internship, the degree will equip students with the skills, theoretical framework, and experience necessary to enter the gaming industry.

GAM 491	Internship in Game Design	
MUS 113	Popular Music Theory I	
MUS 213	Digital Comp of Popular Music	
MUS 216	Digital Comp of Pop Music II	
MUS 220	Songwriting	
MUS 316	Digital Mixing and Mastering	
Total Credits		54

¹ GAM 310 Special Topics in Game Design must be taken twice with different topics to meet the requirement.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

ART 103 Fundamentals of Drawing 3 Credits

An intensive study of drawing techniques in charcoal, pencil, and pen and ink.

ART 106 Survey of Art History II 3 Credits

The history of Western art, architecture, sculpture, painting from the Renaissance to the present, emphasizing the relation between the arts and ideas of each period.

ART 150 Digital Foundations 3 Credits

Industry standard digital tools are used to explore the basic concepts of composition, form, texture, value, and color in two-dimensional design. Further consideration of digital formats and technologies in the visual arts will be highlighted.

CIS 200 Application Development with JavaScript 3 Credits

In the early 1990s, Tim Berners-Lee created a set of technologies to allow information sharing at the CERN particle accelerator in Europe. These technologies dramatically changed the face of computing and became what we know today as the Web. Understanding how to develop and manage applications for the Web is a requirement for the information system professional. Because of the ease of development, deployment, maintenance and general scalability of Web applications, this approach to building and managing applications has become the de facto standard for business application development. This class will examine Web application development in detail. Through a combination of lecture and labs, students will learn the architecture of Web applications, how to develop Web pages using HTML and CCS, how to control user interaction with those pages using the JavaScript programming language. The programming basics of variable declaration and usage, program flow of control, function declaration and calling, and object usage and declaration will also be shown. The use of the JQuery Javascript library to ease the development of Web pages will also be shown.

COM 103 Introduction to Communication Studies: Theory & Practice 3 Credits

Provides a foundation for the study of communication across the discipline. Open to freshmen only, it is designed to assist the first year student majoring in communication or journalism to gain a broad understanding of the scope and breadth of the field. Fundamental communication theories, principles, concepts, terms, and issues are introduced.

COM 105 Communication, Culture and Media 3 Credits

Provides a detailed investigation and analysis into the nature, history, scope, adequacy, and limitations of mass communication and examines the reciprocal influence of the media on culture and society. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

COM 131 Fundamentals of Video Production 3 Credits

Introduces students to basic video production theories, techniques, and applications. Students will gain competency in a number of video production areas including: production planning, camera operations, lighting, sound, and digital non-linear editing. Individual and group production exercises will involve planning and executing video productions in both studio and non-studio settings. This class is designed to prepare students from any major to effectively create, produce, shoot, and edit basic video production assignments including public service announcements, video news releases, educational/instructional videos, and marketing/promotional spots.

COM 265 3D Graphic Animation 3 Credits

Provides students with an introduction to the basics of 3D graphic animation techniques including modeling, texturing, rendering, visual effects and animation. Through various projects the students will learn: to model characters, sets and props, how to apply textures and color to their models, and how to bring their creations to life using various animation techniques. In addition to the technical aspects of creating successful animation, the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation, dramatization and narrative.

COM 302 Communication Ethics 3 Credits

Analyzes internal and external pressures on the communication professional including economic, cultural, social, and political pressures, assesses the philosophical and practical basis for responding to such pressures, evaluates contemporary media responses to these pressures, identifies those that are of laudable quality and why, and provides guidance as to how individuals and organizations can think and react ethically. Issues addressed include censorship, confidentiality, conflicts of interests, minority and ethnic groups, privacy, sensationalism, and self-criticism.

COM 365 Graphic Animation 3 Credits

Offers students education in graphic animation theories, animation development techniques, and animation preparation for various multimedia applications. Emphasis is placed on the design principles in animated communication and animation techniques. The course covers the integration of static images in animation, graphic animation techniques, animation compression, animation rendering, input/output file formats, and animation delivery. The primary software for this course is Adobe Photoshop and MacMedia Flash. Students will be expected to participate in critiques of professional animation designs in order to learn to evaluate critically their own work and their fellow students' work.

Prerequisite(s): COM 262 or permission of instructor.

COM 367 3D Graphic Animation II 3 Credits

Continue to learn the techniques of 3D computer animation including modeling, texturing, rendering, visual effects and animation. In addition to the technical aspects of creating successful 3D animation the students will also learn the aesthetics of animation in regard to cinematography, art direction, lighting, character creation, prop creation, and set creation.

Prerequisite(s): COM 265.

ENG 312 Creative Writing: Screenwriting 3 Credits

A workshop teaching and analyzing how students write for the screen, both television and film, that pays particular attention to the demands of the genre. Through reading and writing assignments, students will discuss and analyze the development of their own dramatic scripts for production. A portfolio of revisions will serve as a final for the course.

ENG 381 Studies in Film Genre 3 Credits

Provides an in-depth examination of a variety of film genres (such as the gangster film, the western, the musical, the screwball comedy, the science fiction film, and the horror film, among others), to be examined through the perspective of film genre theory. Through close analysis of selected films and readings, students will define the aesthetic and thematic patterns characterizing specific genres, and will trace the development of those genres within the dual contexts of the film industry and cultural ideology. Note: This course is cross-listed as FMS 381.

FMS 286 Writing Short Screenplays for Digital Cinema 3 Credits

Writing Short Screenplays for Digital Cinema will focus solely on the creation of a short screenplay for digital film. The course will ask that students conceive of and execute a viably producible screenplay, shooting script, and industry pitch for the modern market.

FTV 135 Filmmaking I 3 Credits

Filmmaking I introduces students to basic film and television production theories, techniques, and applications. Students will gain competency in a number of production areas including composition, lighting, filmic storytelling, sound, production planning and editing. As well as gaining practical production experience, students will also be introduced to basic art theory in relation to composition and visual storytelling.

FTV 235 Filmmaking II 3 Credits

This course will build on the basic technical proficiency gained in COM 135 as applied to narrative filmmaking. Working as individuals and in groups, students will develop skills in narrative cinematic storytelling, and gain a basic proficiency in filmmaking theory, techniques and applications. Students will gain competency in a number of production areas including idea generation and scripting, production planning, cinematography, lighting, sound and editing.

Prerequisite(s): COM 131.

FTV 236 The Aesthetics of Filmmaking 3 Credits

Introduces students to basic terminology, techniques, theories and criticism commonly used in digital filmmaking. Through lecture, class discussion and screenings, students will learn how film theory, criticism and aesthetics impact the filmmaking process. Students will review and analyze films of different genres; the different approaches adopted by filmmakers; and the various elements and techniques that contribute to the creation of powerful and effective films. Aesthetic elements such as production design, mise en scene, cinematography, lighting, editing, sound design and script development will be introduced and practiced.

FTV 435 Filmmaking III 3 Credits

This is an intensive hands-on course in advanced digital filmmaking. Students will gain proficiencies in a number of filmmaking areas including production planning, aesthetics, scripting, script breakdown, camera movement, selecting and directing talent, creating scenes and sequences, visualizing action, establishing mood and conflict, as well as advanced lighting, sound and digital editing techniques. The students' use of high definition digital imaging systems as a medium for narrative cinematography will be developed and refined. In addition, students will explore how filmmaking techniques and technology can impact the visual storytelling process. Students will work cooperatively in groups, modeling the interdependent structure of professional film crews. Throughout the class, there will be an important integration of theory and practice which will enable students to produce meaningful film projects that will not only be technically effective, but strong in content and context as well.

Prerequisite(s): FTV 235.

GAM 100 Game & Interactive Media Forum 0 Credits

Game & Interactive Media Forum is a once-per-month gathering of all Game majors from across the university's different Colleges. The forum will be an opportunity for students focusing on different backgrounds to engage together in industry-related topics and skills.

GAM 150 Intro to Game Studies 3 Credits

Intro to Game Studies surveys the history of video games and gaming culture against the social and political contexts that shape and are shaped by games.

GAM 200 Game Design 3 Credits

Game Design introduces students to the basic concepts of game design, covering game rules, iterations, and playtesting. Students will work with hands-on material to develop design techniques and instincts outside of digital work spaces.

GAM 201 Game Development I 3 Credits

Game Development I introduces students to industry-standard software and the basics of user experience and collaborative game design.

Prerequisite(s): ART 150, CIS 200 and GAM 200.

GAM 301 Game Development II 3 Credits

Game Development II extends students' knowledge of industry-standard software, building on GAM 201 and progressing toward advanced concepts of user experience and collaborative game design.

Prerequisite(s): GAM 201.

GAM 310 Special Topics in Game Design 3 Credits

Special Topics in Game Design applies students' knowledge of game design and the development software that helps them realize their design toward specific prototyping goals. The subject of GAM 310 will rotate each semester; GAM majors must complete two semesters of 310 without duplicating topics.

Prerequisite(s): GAM 200.

GAM 330 Soundtracks and Foley 3 Credits

Soundtracks and Foley covers dialog, music, and foley in filmic settings, with a specific focus on game environments.

Prerequisite(s): MUS 216.

GAM 401 Game Workshop I 3 Credits

Game Workshop I places students in multidisciplinary project teams. Each team will create a game prototype over the course of the semester that demonstrates each student's mastery of their area of specialization and the each group's ability to work together.

Prerequisite(s): GAM 310.

GAM 402 Game Workshop II 3 Credits

Game Workshop II places students in multidisciplinary project teams and builds on skills developed in Game Workshop I.

Prerequisite(s): GAM 310.

GAM 491 Internship in Game Design 3-6 Credits

Internship in Game Design places students in industry work environments, overseen by a site supervisor.

Prerequisite(s): GAM 310.

MUS 113 Popular Music Theory I 3 Credits

Popular Music Theory I covers basic elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations.

Practice in scales and chords; ear-training in rhythm, pitch, and timbre. Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice)

Corequisite(s): MUS 113L.

MUS 213 Digital Comp of Pop Music I 3 Credits

This course is about "the doing of music". It ties music theory to pragmatic concerns with keyboards and software in the making and distribution of music.

MUS 216 Digital Comp of Pop Music II 3 Credits

This course is about "the doing of music." It ties music theory to pragmatic concerns with keyboards and software in the making and distribution of music, continuing the content begun in The Digital Composition of Popular Music I.

MUS 220 Pop Songwriting I 3 Credits

The Songwriting I course is an introduction to songwriting in popular music styles. Students will learn to compose music by themselves and collaboratively. This course will develop comprehensive musicianship and compositional techniques, as well as learn to use the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 113 with a minimum grade of D and MUS 113L with a minimum grade of D.

MUS 316 Digital Mixing and Mastering 3 Credits

Digital Mixing and Mastering is a practical skills class focusing on post-production skills in software interfaces. Students will learn how to work with multiple editing softwares and plug-in tools to achieve balanced, lively, professional mixes.

Music Studies

Program Overview

The music studies minor provides students with insights that can help connect them to professional careers in music. Students will work closely with renowned faculty and recognized professionals in a variety of areas of study.

Course Block

MUS 105 Survey of Music History I 3 Credits

A chronological survey of Western music from the Medieval through the Baroque periods stressing the origin and evolution of musical forms, musical styles, and the important composers before 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 106 Survey of Music History II 3 Credits

A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 204 Jazz History 3 Credits

Survey from 19th C. roots to 21st C. styles. Development of listening skills and overview of musical skills used by jazz performers. Exploration of the relationship between jazz and poetry, race relations, and the reputation of jazz in popular culture.

Prerequisite(s): CMP 120 or CMP 125.

MUS 205 History of Pop and Rock Part I 3 Credits

This course charts the history of popular music from its origins until the 1960s. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music from its roots in the blues, early jazz, ragtime and military band marches to the music of Elvis, Chuck Berry, Little Richard, Buddy Holly, the Rolling Stones and the Beatles. We look at the recording industry and the advent of the gramophone record and the important role of radio and television in expanding the reach of popular music directly into the home, creating a vibrant soundtrack for peoples lives.

MUS 206 History of Pop and Rock Part 2 3 Credits

Description: This course charts the history of popular music from the 1960s to today. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music through Acid Rock, Progressive (Prog) Rock, Hard Rock, Singer-Songwriters, Disco, Reggae, Funk, Punk, Heavy Metal, New Wave, Grunge, Electronica and Rap & Hip-Hop. We look at the development of analog and digital media and how new forms of delivery of product shapes the business model of the industry and beyond.

MUS 208 Music of the Theater 3 Credits

A study of music drama both historical and contemporary covering European opera of the Baroque, classical and romantic periods, and the American musical theatre, especially the contemporary Broadway musical.

MUS 209 Great Composers 3 Credits

A study of selected major composers life, works, and historical significance with an emphasis on the listening experience. Bach, Mozart, Beethoven, Tchaikovsky, Stravinsky, or others.

MUS 217 Black Music in America 3 Credits

This course covers the history of music made by and/or about African Americans, from minstrel shows to hip-hop and everything in between.

MUS 218 Postmodernism & Popular Culture 3 Credits

This course considers music in light of the ideological trends of postmodernism in order to better understand contemporary music in its cultural context.

MUS 300 Beethoven and the Romantic Age 3 Credits

A study of the Romantic period with particular emphasis on Beethoven. The classical heritage, the transformation of that heritage into romantic terms, the prominent influence of Beethoven on 19th century musical style.

MUS 304 Music of the Beatles 3 Credits

This course is an in-depth analysis of the music and personalities of the Beatles. The student will gain deep insight to the Beatles songs and albums as the course proceeds through the music chronologically. This will be contextualized historically and sociologically where required.

MUS 306 Contemp Music Experience 3 Credits

A survey of European and American musical styles of the late 19th and 20th centuries. Topics include postromantic music, neoclassicism, serialism, electronic music, and the current avant garde.

MUS 307 The Music of Radiohead 3 Credits

This course investigates the music, lyrics, art and marketing strategies of the British so called "alternative" band, Radiohead, moving song by song through their demos, videos and albums.

MUS 309 Film Music 3 Credits

A study of music in feature film, documentary film, and television. A chronological survey of film music from silent to contemporary film, animated shorts, and television, with emphasis on listening to recorded performance of representative works.

MUS 495 Selected Topics in Music 3 Credits

Studies specialized aspects of the literature, history, or theory of music, to supplement the established curriculum. Emphasis on creative investigative work and individual experiences in music.

Musical Theatre: Musical Direction

Overview

The Musical Theatre: Musical Direction major at Rider prepares students for a professional career in musical theatre, working as a music director or in other aspects that focus on the music side of the industry. This program is provided in a nurturing liberal arts environment on Rider's campus, just one hour from New York City.

Degree Offered

- B.M. in Musical Theatre: Musical Direction

Contact

Related Programs

- Arts Entertainment Industries Management (p. 1081)
- Dance (p. 1091)
- Music (p. 1114)
- Piano (p. 1174)

General Requirements

B.M. - Musical Theatre majors must earn a minimum grade of "B-" each semester in the primary applied music field in order to make satisfactory progress. If a grade of "C+" or lower is earned, the student must repeat the semester.

Students must meet attendance and performance requirements in studio performance classes and Musical Theatre Lab.

All students must present a senior piano primary applied recital after qualifying according to applied area standards. Students must enroll for

primary applied study during the term when any recital is to be presented unless specifically excused from this requirement by the Associate Dean.

Applied Music – Piano Primary Study

Piano primary students in the B.M.-Music Theatre degree must register for two credits of applied music in each semester of study, to a maximum of eight semesters. Four terms are taken under MUS 165A; four terms under MUS 365A. The section number corresponds to the instructor with whom the student will study.

Musical Theatre Lab

All majors are required to attend a weekly musical theatre lab during every semester of enrollment. The lab supplements curricular instruction with presentations by guest artists, managers, agents, and casting directors. This interface provides each student with an opportunity for interaction with some of the most important professionals in the musical theatre business.

Performing Opportunities at Rider University

The musical theatre program offers three fully staged productions led by faculty and experienced and notable directors, conductors and choreographers from the professional community. The Theatre and Dance Department also offers a well-established theatre program that provides additional performing opportunities in three major productions. Majors also are encouraged to participate in student-directed and produced events, presented each year on both campuses. The Voice Department at the Princeton campus offers two Opera Theater productions each year. All productions are open by audition to all Rider University students except first-semester freshmen.

Courses and Descriptions**CR 215 Fundamentals of Conducting 3 Credits**

This course provides the foundation of conducting technique and philosophy as it relates to choral ensemble. Primarily, it deals with the development of basic pedagogical proficiencies, specifically alignment, Laban gestural vocabulary, breathing, beat patterns, consistent tempo, and the development of expressive gesture for relaying various styles of music, i.e., legato, staccato and marcato. Basic philosophical understandings concerning the human aspects of the music making process and the role the conductor plays in that process also are emphasized. Specific techniques for dealing with technical elements, e.g., fermata, dynamics, changes of tempo, contrasts in style, also are covered. The overall focus of the course is to establish the important relationship between ear, body, and the choral sound.

Prerequisite(s): TH 141.

CR 315 Techniques of Conducting 3 Credits

Continued development of conducting technique with emphasis on more complex styles and patterns, and on communication through appropriate gestures. Further improvement in conducting various dynamics and articulations, as well as more effective use of the left hand. Rehearsal procedures, repertoire programming, score preparation, and baton techniques are incorporated into the course.

Prerequisite(s): CR 215.

MTR 105 Musical Theatre Practicum 1 Credits

This course explores the literature of musical theatre vocal ensembles. It emphasizes examining a wide range of styles. This is a studio/academic class, not a performance ensemble.

MTR 109 Beginning Ballet I 1 Credits

This course introduces the basic elements of ballet technique. Technique is based on the five positions of the legs and feet, coupled with appropriate arm positions. The class consists of a basic ballet barre warm-up that includes stretching and developing strength and turn-out used in dance positions and combinations. Instruction includes jumping, turning, and connecting steps with movement. Ballet terminology is addressed.

MTR 111 Musical Theatre Lab 0 Credits**MTR 120 Hist of American Music Theater 3 Credits**

The history of the American Musical from the first American production in 1750 of Gay's *The Beggar's Opera* up to the present will be traced. Emphasis will be placed upon those common elements which are solely intrinsic to the American stage. Developments and imported ideas (e.g., *The British Invasion*) will be highlighted.

MTR 215 MT Performance: Song as Text 3 Credits

In this course the student will learn how to develop a performance of musical text by making doable, actable choices and applying those choices to musical monologues – solo songs.

Prerequisite(s): THE 110.

MTR 218 Musical Theatre Scene Study I 3 Credits

Scene study class exploring the literature of the musical theatre – emphasis placed on two- and three-character scenes. Required of all second-year students.

Prerequisite(s): MTR 215.

MTR 255 Musical Theatre Repertoire I 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers through the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106 with a minimum grade of D and THE 311 with a minimum grade of D.

MTR 256 Musical Theater Repertoire II 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers since the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106, THE 107.

MTR 317 MT Auditions:Preparation/Tech 3 Credits

This course, building upon skill-sets established in the Music Theatre singer-actor curriculum, will introduce and hone the required skill-sets for preparing to audition in Music Theatre. Genres and styles of music most often required for auditioning in the industry will be prepared and explored. An audition "book," based upon the demands of the industry, as well as the most suitable material for each student will be built. When appropriate, guests from the industry will be invited to present master classes and evaluations in a "mock audition" process.

Prerequisite(s): MTR 207, MTR 216, MTR 217, MTR 492.

MTR 493 Music Theater Production 1 Credits

Preparation and performance of a solo or ensemble role in a fully staged music theatre production. Concurrent participation in stage crew activities is required.

MUS 106 Survey of Music History II 3 Credits

A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 110 Music Theory I 3 Credits

A practical introduction to the basic elements of music, beginning with the reading of music notation. Practice in scales and chords; ear-training in rhythm and pitch. Techniques may be applied to the student's own instrument (e.g., guitar, piano, winds) if he or she plays one.

Prerequisite(s): MUS 109S or placement.

Corequisite(s): MUS 110L.

MUS 110L Music Theory I Lab 1 Credits

Dictation, aural skills training, sight singing, and keyboard skills to accompany MUS 110 (Music Theory I). **Prerequisite(s):** MUS 109S or placement.

Corequisite(s): MUS 110.

MUS 111 Music Theory II 3 Credits

Continuation of MUS 110, leading to some original composition.

Prerequisite(s): MUS 110 and MUS 110L.

Corequisite(s): MUS 111L.

MUS 111L Music Theory II Lab 1 Credits

Dictation, aural skills training, sight singing, and keyboard skills to accompany MUS 111 (Music Theory II). Prerequisite(s): MUS 110 and MUS 110L or placement.

Corequisite(s): MUS 111.

MUS 165A Applied Piano 2 Credits**PI 513 Jazz Keyboard/Improv 3 Credits**

This course will enable pianists and organists to become familiar with the theory, harmony, and improvisational techniques of jazz piano. Emphasis will be placed upon getting each student to create spontaneous improvisations. The fundamental goal will be that of enabling students accustomed to following a score to move beyond it. Extensive exposure to material from the "Great American Songbook" as well as to jazz standards will provide a structural basis for the course.

Prerequisite(s): TH 142 and PI 201, or equivalent knowledge and technical proficiency.

TH 251 Analytical Studies I 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain only the harmonic vocabulary and formal structures studied in TH 141 and TH 142, may vary each time the course is offered. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 253 Orchestration 3 Credits

A study of the orchestra and its individual instruments from the standpoints of the composer, arranger and conductor. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 255 Song Writing 3 Credits

Solo vocal composition in various styles. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 259 Electroacoustic Music 3 Credits

An introduction to the history and literature of electroacoustic music emphasizing hands-on creative opportunities in sequencing and digital sound processing. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

THE 105 Theatre History to 1700 3 Credits

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 107 Acting I: Intro to Acting 3 Credits

Exercises and improvisations developing the fundamental prerequisites for the actor are provided. The emphasis is on vocal and physical mobility and the ability to communicate emotional states from the stage.

VC 103 Voice Secondary 1 Credits

Musical Theatre (B.F.A)

Program Overview

The musical theatre major at Rider prepares students for a professional career in musical theatre with veteran faculty and regular interface with top industry professionals. This program is provided in a nurturing liberal arts environment just one hour from New York City at Rider's Lawrenceville campus.

The musical theatre program offers development of well-rounded, competitive musical theatre professionals. Rider's professional musical theatre faculty members are committed to developing students' talents and technique in all areas – vocal, dance and acting – preparing them to succeed in the highly competitive world of professional musical theatre.

Rider musical theatre majors enjoy affordable, student-sponsored Broadway performance trips, special student discounts, class-related Broadway field-trips and backstage tours or just a quick visit via the nearby train.

Musical Theatre (B.F.A.) Program Requirements

(120 credits)

General Requirements

For all majors offered in the Theatre & Dance Department, students must earn a minimum grade of "C" in those courses required in the major area in order to make satisfactory progress. If a grade of "C-" or lower is earned, the student must repeat the course.

B.F.A.–Musical Theatre majors must earn a minimum grade of “B-” each semester in the primary applied music field in order to make satisfactory progress. If a grade of “C+” or lower is earned, the student must repeat the semester.

Students must meet attendance and performance requirements in studio performance classes and Musical Theatre Lab.

Applied Music – Voice Primary Study

Students in the B.F.A.-Musical Theatre degree must register for applied music in each semester of study, to a maximum of eight semesters. Six terms are taken under MUS 168A (2-credit, 1-hour lesson) and two semesters are taken under MUS 168B (1-credit, half-hour lesson). The section number corresponds to the instructor with whom the student will study.

Musical Theatre Lab

All majors are required to attend a weekly musical theatre lab during every semester of enrollment. The lab supplements curricular instruction with presentations by guest artists, managers, agents, and casting directors. This interface provides each student with an opportunity for interaction with some of the most important professionals in the musical theatre business.

Performing Opportunities at Rider University

The musical theatre program offers three fully staged productions led by faculty and experienced and notable directors, conductors and choreographers from the professional community. The Theatre and Dance Department also offers a well-established theatre program that provides additional performing opportunities in three major productions. Majors also are encouraged to participate in student-directed and produced events, presented each year on both campuses. The Voice Department at the Westminster campus offers two Opera Theater productions each year. All productions are open by audition to all Rider University students except first-semester freshmen. Consult the Musical Theatre Handbook for the Audition Policy.

MTR 105 Musical Theatre Practicum 1 Credits

This course explores the literature of musical theatre vocal ensembles. It emphasizes examining a wide range of styles. This is a studio/academic class, not a performance ensemble.

MTR 109 Beginning Ballet I 1 Credits

This course introduces the basic elements of ballet technique. Technique is based on the five positions of the legs and feet, coupled with appropriate arm positions. The class consists of a basic ballet barre warm-up that includes stretching and developing strength and turn-out used in dance positions and combinations. Instruction includes jumping, turning, and connecting steps with movement. Ballet terminology is addressed.

MTR 111 Musical Theatre Lab 0 Credits**MTR 112 Advanced Ballet I 1 Credits**

Continuation of MTR 109, building upon techniques learned in that course.

MTR 113 Beginning Ballet II 1 Credits

Intermediate ballet, expanding upon Ballet I and concentrating upon the American lineage of ballet training.

MTR 114 Advanced Ballet II 1 Credits

Continuation of MTR 113. Intermediate ballet, expanding upon Ballet I and concentrating upon the American lineage of ballet training.

MTR 120 Hist of American Music Theater 3 Credits

The history of the American Musical from the first American production in 1750 of Gay's The Beggar's Opera up to the present will be traced. Emphasis will be placed upon those common elements which are solely intrinsic to the American stage. Developments and imported ideas (e.g., The British Invasion) will be highlighted.

MTR 131 Music Theory for MT 3 Credits

Teaches students to understand musical form, structure, melody, rhythm and harmony by applying these concepts to musical theatre literature. Includes full analysis of musical theatre songs. Required in the first year.

MTR 132 Group Piano 1 Credits

Offers the musical theatre student appropriate keyboard technique to play any vocal part and to play a rudimentary accompaniment. Required of all second-year students.

Prerequisite(s): MTR 131.

MTR 133 Sight Singing for MT 3 Credits

Intensive class in reading music, designed for musical theatre students. Traditional solfeggio techniques used with musical theatre texts whenever possible. Required of first-year students.

Prerequisite(s): MTR 131.

MTR 209 Tap Dance I 1 Credits

Introduction to the basic elements of tap dancing. Tap technique is geared to enhance rhythm and motor skills, basic elements that will be used to connect several steps and movements into combinations. Other variations such as "soft shoe" or "clogging" are included.

MTR 211 Ballet III 1 Credits

Intermediate ballet, expanding upon Ballet II and concentrating upon the American lineage of ballet training.

Prerequisite(s): MTR 110.

MTR 212 Ballet IV 1 Credits

Continuation of MTR 211. Intermediate ballet, expanding upon Ballet III and concentrating upon the American lineage of ballet training.

Prerequisite(s): MTR 211.

MTR 215 MT Performance: Song as Text 3 Credits

In this course the student will learn how to develop a performance of musical text by making doable, actable choices and applying those choices to musical monologues – solo songs.

Prerequisite(s): THE 110.

MTR 218 Musical Theatre Scene Study I 3 Credits

Scene study class exploring the literature of the musical theatre – emphasis placed on two- and three-character scenes. Required of all second-year students.

Prerequisite(s): MTR 215.

MTR 219 Musical Theatre Scene Study II 3 Credits

Further exploration of scenes in the musical theatre literature – emphasis on more complex scenes. Required of all third-year students.

Prerequisite(s): MTR 218.

MTR 255 Musical Theatre Repertoire I 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers through the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106 with a minimum grade of D and THE 311 with a minimum grade of D.

MTR 256 Musical Theater Repertoire II 3 Credits

This course provides the opportunity to encounter/examine the repertoire of the major musical theatre writers since the 1950s. The thrust of this class is split between studio work and academic work.

Prerequisite(s): THE 106, THE 107.

MTR 307 Tap III 1 Credits

This course is designed for the moderately advanced tap dancer. Course to be taken in the fall.

Prerequisite(s): MTR 210.

MTR 308 Tap IV 1 Credits

The course will allow the more advanced student to complete the work begun in Tap III.

Prerequisite(s): MTR 307.

MTR 309 Beginning Jazz Dance I 1 Credits

Based upon the ballet foundation, this course explores the expressive style of jazz dance, and basic Western theatrical dance forms and social dances used most often on the stage.

Prerequisite(s): MTR 109.

MTR 313 Ballet V 1 Credits

Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills.

Prerequisite(s): MTR 212.

MTR 314 Ballet VI 1 Credits

Continuation of MTR 313. Advanced ballet, expanding upon Ballet IV and concentrating upon the American lineage of ballet training. Inclusion of advanced combinations, physical development and coordination skills.

Prerequisite(s): MTR 313.

MTR 315 Advanced Jazz Dance I 1 Credits

Continuation of work begun in MTR 309.

MTR 317 MT Auditions:Preparation/Tech 3 Credits

This course, building upon skill-sets established in the Music Theatre singer-actor curriculum, will introduce and hone the required skill-sets for preparing to audition in Music Theatre. Genres and styles of music most often required for auditioning in the industry will be prepared and explored. An audition "book," based upon the demands of the industry, as well as the most suitable material for each student will be built. When appropriate, guests from the industry will be invited to present master classes and evaluations in a "mock audition" process.

Prerequisite(s): MTR 207, MTR 216, MTR 217, MTR 492.

MTR 319 Jazz Dance III 1 Credits

This course continues the work begun in MTR 318.

Prerequisite(s): MTR 318 and MTR 212.

MTR 320 Jazz Dance IV 1 Credits

This course continues the work begun in MTR 319.

Prerequisite(s): MTR 319 and MTR 212.

MTR 335 Speech for the Actor 3 Credits

This course introduces and develops speech techniques, specifically in the areas of relaxation, posture and alignment, respiration, phonation, support, registration, resonance, and articulation. Students learn to consistently produce a free, resonant, fully supported speaking voice. Exercises will increase flexibility and range of speaking and will foster heightened responsiveness to feeling. Regular practice in the delivery of both impromptu and prepared monologues is required. This course includes studies in Neutral American Speech.

MTR 415 Musical Theatre Dance I 1 Credits

This is the first capstone course in the Musical Theatre dance sequence. Practical and historical study of Broadway dance styles; main focus on jazz idiom. Emphasis placed on performance quality, auditioning skills, self-taping, and "how to swing/dance captain".

Prerequisite(s): Completion of Ballet, Tap, and Jazz requirements; senior standing.

MTR 416 Musical Theatre Dance II 1 Credits

This is the second capstone course in the Musical Theatre dance sequence. Emphasis is placed on other dance styles used on stage, film, music videos, and television. Primary focus is on Hip Hop and Street Jazz.

Prerequisite(s): MTR 415 with a minimum grade of C.

MTR 480 Dance for Performing Artist 3 Credits

This course is a culmination of the dance elements and forms studied in ballet, tap, and jazz dance. Context areas include movement used most often in performance of music theater and movement fundamentals applicable to all aspects of presentation and principle to refine and articulate the performer's awareness and use of the body through singing and dance. Performance issues and movement as a basis for music and sound production are addressed.

Prerequisite(s): MTR 209, MTR 309.

MTR 493 Music Theater Production 1 Credits

Preparation and performance of a solo or ensemble role in a fully staged music theatre production. Concurrent participation in stage crew activities is required.

MUS 168A Applied Voice 2 Credits**MUS 168B Applied Voice 1 Credits****THE 105 Theatre History to 1700 3 Credits**

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 107 Acting I: Intro to Acting 3 Credits

Exercises and improvisations developing the fundamental prerequisites for the actor are provided. The emphasis is on vocal and physical mobility and the ability to communicate emotional states from the stage.

THE 110 Acting II: Scene Study 3 Credits

Basic acting techniques. Emphasis on the ingredients of any action: what am I doing, where, why, who am I, what is my attitude toward partner?

Prerequisite(s): THE 107.

THE 115 Stagecraft 3 Credits

The theory and practice of construction and rigging of stage scenery is offered. Emphasis is on actual productions and road show set-ups. One lecture and two labs per week.

THE 127 Theatre Production 1 Credits

Students rehearse and perform roles in a play produced by the department and directed by a member of its faculty. Students may also prepare a major element of design or technology for the production. Maximum of eight credits are accepted in theatre production, band and/or choir.

THE 190 Production I 1-3 Credits

Students carry out a technical theatre crew position for one or more theatre, musical theatre or dance productions during the semester of course registration. May be repeated seven times, for a total of eight credits.

THE 310 Acting III 3 Credits

Students will study in-depth techniques for exploring characterization. They will be introduced to the "magic if" and study techniques for placing themselves in the circumstances of the characters they are portraying. They will learn the interior and exterior analysis of characters using "Adler" and "Practical Aesthetics" techniques.

Prerequisite(s): THE 107, THE 110.

THE 311 Acting IV 3 Credits

Students will learn the appropriate techniques to explore characters in the three styles of Elizabethan, Restoration, and Commedia dell'arte theatre. Sessions will include movement, effective speech, and finding appropriate actions for each style. Students will also learn proper research techniques to understand cultural influences on plays and characters.

Prerequisite(s): THE 107, THE 110, THE 310.

Music Production

Program Overview

The music production major presents students with a focused study in 20th- and 21st-century popular music in a unique context that will give them an unrivaled advantage in any professional aspect of popular music.

Students in the program have the opportunity to develop their own groups and to perform and record projects in an interactive and supportive environment. Rider also helps students gain internships that are tailored to their passions and interests.

Students also can get involved with performance groups such as the Brass Band, Rider Choir, Pep Band and student-run ensembles.

Music Production Academic Plan

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Note: The following courses do not fulfill any requirements for the major: ART 120, MUS 120 and THE 120.

Courses and Descriptions

MUS 001S Applied Voice Studio 0 Credits**MUS 105 Survey of Music History I 3 Credits**

A chronological survey of Western music from the Medieval through the Baroque periods stressing the origin and evolution of musical forms, musical styles, and the important composers before 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 106 Survey of Music History II 3 Credits

A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 109S Basic Music Theory 3 Credits

This is a beginner's course in music theory. It familiarizes the student with the basic elements (e.g., staff, clefs, time signatures, musical notation, intervals, triads and chords). This course is ideal for both the student wanting to know only the essential, or the student wanting to go on to develop their theoretical skills. For non-music majors, MUS 109S counts toward graduation and grades are awarded on an A-F basis. For music majors, MUS 109S does not count toward graduation, and grading is on a pass ("Y") or fail ("Z") basis.

MUS 110 Music Theory I 3 Credits

A practical introduction to the basic elements of music, beginning with the reading of music notation. Practice in scales and chords; ear-training in rhythm and pitch. Techniques may be applied to the student's own instrument (e.g., guitar, piano, winds) if he or she plays one. Prerequisite(s): MUS 109S or placement.

Corequisite(s): MUS 110L.

MUS 110L Music Theory I Lab 1 Credits

Dictation, aural skills training, sight singing, and keyboard skills to accompany MUS 110 (Music Theory I). Prerequisite(s): MUS 109S or placement.

Corequisite(s): MUS 110.

MUS 111 Music Theory II 3 Credits

Continuation of MUS 110, leading to some original composition.

Prerequisite(s): MUS 110 and MUS 110L.

Corequisite(s): MUS 111L.

MUS 111L Music Theory II Lab 1 Credits

Dictation, aural skills training, sight singing, and keyboard skills to accompany MUS 111 (Music Theory II). Prerequisite(s): MUS 110 and MUS 110L or placement.

Corequisite(s): MUS 111.

MUS 113 Popular Music Theory I 3 Credits

Popular Music Theory I covers basic elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations.

Practice in scales and chords; ear-training in rhythm, pitch, and timbre. Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice)

Corequisite(s): MUS 113L.

MUS 113L Popular Music Theory Lab I 1 Credits

Taken in conjunction with Popular Music Theory I, the lab applies theoretical concepts in a performance context. Applied aural training and improvisation skills on primary and secondary instruments.

Corequisite(s): MUS 113.

MUS 114 Popular Music Theory II 3 Credits

A continuation of Popular Music Theory I, progressing to intermediate elements of music, including the reading of music notation in traditional formats as well as in audio wave form and in the visualization of standard Digital Audio Workstations. Practice in scales and chords, ear-training in rhythm, pitch, and timbre. Techniques may be applied to the student's own instrument (e.g., guitar, piano, voice).

MUS 114L Popular Music Theory Lab II 1 Credits

Taken in conjunction with Popular Music Theory II, the lab applies theoretical concepts in a performance context. Applied aural training and improvisation skills on primary and secondary instruments.

MUS 116 Digital DJing 3 Credits

Digital DJing is a three-week, software-based course that develops musical mixing skills for the purpose of creating the kinds of DJ sets one may play on the radio or at live events. Includes repertory building across several popular and dance genres.

MUS 120 Music and Society 3 Credits

Introduction to the basic elements of music (rhythm, melody, harmony, etc.) and the appreciation of representative types of music from all historical periods.

MUS 127 Pop, Rock & Hip-Hop Ensemble 1 Credits

Ensemble rehearsal and performance of contemporary music. Maximum of eight credits are accepted in band, choir, and/or theater production.

MUS 128 Choir 1 Credits

Rehearsal and performance of multi-era Western and non-Western repertoire. Instruction in music fundamentals and vocal production. Pitch matching and part-singing abilities must be demonstrated in the first-week sectional hearing.

MUS 129 Contemporary Vocal Ensemble 1 Credits

The objective of the contemporary vocal ensemble course is to allow students to experience the aesthetics of popular music through the study, interpretation and performance of the music. Students will develop their ensemble skills, independent part singing, as they experience a wide range of popular music genres (jazz, pop, R&B, world, etc.) Students must pass an audition to participate in this course.

MUS 130 Music in Children's Lives 3 Credits

Students in this course will study how music interacts in the lives of children as they sing, listen, play instruments and move. Song repertoire and selections for listening and moving from the American, European and non-Western cultures will be introduced. Playing recorder as well as pitched and non-pitched percussion instruments will be demonstrated.

MUS 131 Beginning Piano I 2 Credits

Class approach to learning to play the piano. How to read music, basic piano technique, and appropriate piano pieces and songs are studied.

MUS 132 Beginning Piano II 2 Credits

Continuation of MUS 131. Emphasis on further development of technique and the ability to interpret piano music from a variety of styles.

Prerequisite(s): MUS 131 or equivalent.

MUS 133 Class Voice I 2 Credits

Class approach to learning pop vocals. How to read music, basic vocal production technique and appropriate vocal pieces and songs are studied, especially in popular genres.

MUS 134 Class Voice II 2 Credits

Continuation of class approach to learning pop vocals started in Class Voice I. Intermediate vocal technique for popular music

Prerequisite(s): MUS 133 or placement exam.

MUS 135 Class Guitar I 2 Credits

Class approach to learning to play the guitar. How to read tablature, basic guitar technique, and appropriate guitar pieces and songs are studied, especially in popular genres. Students must provide their own guitars; if electric, they should provide their own amps, too.

MUS 136 Class Guitar II 2 Credits

Continuation of class approach to learning to play the guitar started in Class Guitar I. Intermediate guitar technique for popular music. Students must provide their own guitars; if electric, they should provide their own amps, too.

Prerequisite(s): MUS 135 or placement exam.

MUS 201 Skills Ensemble I 1 Credits

A Contemporary Performance skills ensemble focusing on interactive musicianship, composition, ear training, transcription, and notation, for popular music studies majors. Students will develop proficiency in the following areas: • Developing ensemble skills • Preparing and rehearsing original compositions • Recognizing scales, intervals and chords • Harmonic, Melodic, and Rhythmic Transcription • Recognizing basic structural elements in different musical genres: Pop(Hip-Hop, R&B, Rock)/Jazz/Classical as well as understand their basic vernacular • Writing legible and clear musical scores (charts).

MUS 204 Jazz History 3 Credits

Survey from 19th C. roots to 21st C. styles. Development of listening skills and overview of musical skills used by jazz performers. Exploration of the relationship between jazz and poetry, race relations, and the reputation of jazz in popular culture.

Prerequisite(s): CMP 120 or CMP 125.

MUS 205 History of Pop and Rock Part I 3 Credits

This course charts the history of popular music from its origins until the 1960s. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music from its roots in the blues, early jazz, ragtime and military band marches to the music of Elvis, Chuck Berry, Little Richard, Buddy Holly, the Rolling Stones and the Beatles. We look at the recording industry and the advent of the gramophone record and the important role of radio and television in expanding the reach of popular music directly into the home, creating a vibrant soundtrack for peoples lives.

MUS 206 History of Pop and Rock Part 2 3 Credits

Description: This course charts the history of popular music from the 1960s to today's. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music through Acid Rock, Progressive (Prog) Rock, Hard Rock, Singer-Songwriters, Disco, Reggae, Funk, Punk, Heavy Metal, New Wave, Grunge, Electronica and Rap & Hip-Hop. We look at the development of analog and digital media and how new forms of delivery of product shapes the business model of the industry and beyond.

MUS 207 Masterworks in Music 3 Credits

Major works by great composers from different historical periods Mozart, Beethoven, Brahms, and Wagner, among others are studied. Up to 10 compositions by six composers are covered, with an emphasis on listening to recorded and live performances of representative works.

MUS 208 Music of the Theater 3 Credits

A study of music drama both historical and contemporary covering European opera of the Baroque, classical and romantic periods, and the American musical theatre, especially the contemporary Broadway musical.

MUS 209 Great Composers 3 Credits

A study of selected major composers life, works, and historical significance with an emphasis on the listening experience. Bach, Mozart, Beethoven, Tchaikovsky, Stravinsky, or others.

MUS 210 Music Theory III 3 Credits

Analysis of musical forms, including binary, rounded binary, ternary, and popular song. Identification of techniques that support musical form, including harmonic language, contrast/repetition, compositional process. Advanced sight singing and aural drills.

Prerequisite(s): MUS 111 and MUS 111L.

MUS 211 Music Theory for Music Theater 3 Credits

Analysis of music theater songs, scenes and scores. Various techniques, placement of examples into historical, musical, artistic, and literary perspective. Reading of full and piano/vocal scores, conducting, orchestration and harmonic language will be emphasized.

Prerequisite(s): MUS 111 and MUS 111L.

MUS 212 Cartoon and Anime Culture 3 Credits

This course investigates the music and culture of animated films and television shows, anime, animated shorts including cartoons, and related incidental music for documentary films.

MUS 213 Digital Comp of Pop Music I 3 Credits

This course is about "the doing of music". It ties music theory to pragmatic concerns with keyboards and software in the making and distribution of music.

MUS 214 Writing about Music 3 Credits

This course instructs students in the art of writing about music, from small-form criticism to large scale scholarship, focusing especially on the ability to translate what one hears into engaging prose.

Prerequisite(s): CMP 120 and 125, MUS 110, 110L, and MUS 213.

MUS 215 Music & Techn/Mobile Society 3 Credits

This course compares the recent history of music technology to past innovations, focusing on the aesthetic implications and ideological influences of an increasingly mobilized musical milieu.

MUS 216 Digital Comp of Pop Music II 3 Credits

This course is about "the doing of music." It ties music theory to pragmatic concerns with keyboards and software in the making and distribution of music, continuing the content begun in The Digital Composition of Popular Music I.

MUS 217 Black Music in America 3 Credits

This course covers the history of music made by and/or about African Americans, from minstrel shows to hip-hop and everything in between.

MUS 218 Postmodernism & Popular Culture 3 Credits

This course considers music in light of the ideological trends of postmodernism in order to better understand contemporary music in its cultural context.

MUS 219 Pop Music Arranging I 3 Credits

The Pop Music Arranging I course is the first of a two-semester course sequence whose goal is to explore the fundamental arranging techniques for popular music styles. Students will learn to arrange popular music for the standard instrumentation found in a pop/rock ensemble (bass guitar, drumset, rhythm guitar, and keyboard). This course will develop comprehensive musicianship and fundamental arranging techniques, as well as develop skills as they relate to the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 113.

MUS 220 Pop Songwriting I 3 Credits

The Songwriting I course is an introduction to songwriting in popular music styles. Students will learn to compose music by themselves and collaboratively. This course will develop comprehensive musicianship and compositional techniques, as well as learn to use the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 113 with a minimum grade of D and MUS 113L with a minimum grade of D.

MUS 233 Intermediate Piano 3-12 Credits

Continuation of MUS 132 with further development of reading skills, piano techniques and interpretation. Each student studies a set of pieces selected together with the instructor tailored specifically to the students' needs and interests.

MUS 300 Beethoven and the Romantic Age 3 Credits

A study of the Romantic period with particular emphasis on Beethoven. The classical heritage, the transformation of that heritage into romantic terms, the prominent influence of Beethoven on 19th century musical style.

MUS 301 Skills Ensemble II 1 Credits

The Contemporary Performance Skills Ensemble II is a course whose focus is interactive musicianship, composition, ear training, transcription, and notation, for popular music studies majors. This course will require a higher level of musical ability, aptitude, and technical development than the Skills I Ensemble course. Students will develop proficiency in the following areas: • Developing ensemble skills • Preparing and rehearsing original compositions • Recognizing scales, intervals and chords • Harmonic, Melodic, and Rhythmic Transcription • Recognizing basic structural elements in different musical genres: Pop(Hip-Hop, R&B, Rock)/Jazz/Classical as well as understand their basic vernacular • Writing legible and clear musical scores (charts) • Improvisation.

MUS 303 Music Literature: Baroque Era 3 Credits

A survey of European musical styles from c. 1600 to 1750, approached by listening to the music of the period, including Bach, Handel, and many lesser known masters. Topics include the development of modern musical sound, instrumental forms, Lutheran and Catholic church music, and the beginnings of dramatic music.

MUS 304 Music of the Beatles 3 Credits

This course is a very in-depth analysis of the music and personalities of the Beatles. The student will gain in depth insight to the Beatles songs and albums as the course proceeds through the music chronologically. This will be contextualized historically and sociologically where required.

MUS 305 Words and Music 3 Credits**MUS 306 Contemp Music Experience 3 Credits**

A survey of European and American musical styles of the late 19th and 20th centuries. Topics include postromantic music, neoclassicism, serialism, electronic music, and the current avant garde.

MUS 307 The Music of Radiohead 3 Credits

This course investigates the music, lyrics, art and marketing strategies of the British so called "alternative" band, Radiohead, moving song by song through their demos, videos and albums.

MUS 308 World Music 3 Credits

To understand world music as a means of appreciating and respecting our common inheritance as humans. To better understand in what ways music is a 'language' and how this functions within 'community' including aspect of ritual, celebration, religion and spirituality. The student will be expected to be able to discern between various genres of world music understanding the wider cultural context including, but not limited to, popular music within that same culture.

MUS 309 Film Music 3 Credits

A study of music in feature film, documentary film, and television. A chronological survey of film music from silent to contemporary film, animated shorts, and television, with emphasis on listening to recorded performance of representative works.

MUS 310 The Film Music of Stanley Kubrick 3 Credits

This course is an in-depth study of the way in which music impacts society through the art of film. Focusing on the films of Stanley Kubrick (e.g. *The Shining*; *2001: A Space Odyssey*; *A Clockwork Orange*; *Full Metal Jacket*; *Eyes Wide Shut*; *Dr. Strangelove*; *Lolita*) we will study a variety of strategies within which music integrates, counterpoints or ironically resists themes such as war, sex, politics, religion, gender etc. Also we will observe how music interacts with other aesthetics in film such as light, camera methods, 1. diegetic/source, 2. non-diegetic/underscore and 3. metadiegetic (i.e. 1. music in the film; 2. music only the audience can hear; 3. music that seems to be coming from the mind of a character in the film) method as part of the narrative itself. In this way we will investigate the way film both integrates aspects of society and also radiates messages, indeed challenges, to society, both as a mirror but also didactically—with the direct intent of creating change.

MUS 311 Unpacking Bruce Springsteen 3 Credits

This course will survey the music of Bruce Springsteen. It will 'unpack' Springsteen's musical development not only across his official career (i.e. from signing with Columbia for his first album 'Greetings from Asbury Park, New Jersey' in 1973 to the present) but also from his childhood through his youth in Freehold, NJ. By closely studying Springsteen's life, music and lyrics as well as the themes of each album the student will become an expert in understanding how The Boss was able to universalize the Jersey Shore as well as his personal concerns into vital musical messages of great value and import today. This will also involve looking at music as varied as The British Invasion (i.e. The Beatles, The Animals & the Rolling Stones et al); Motown; Country; Soul; Folk; Rock and the American Songbook.

MUS 312 The Arts Abroad 3 Credits

A two week trip abroad that includes a critical study of music and theater. Students are required to attend all performances, guided tours, and classes before and after the trip.

MUS 315 Black Music in America 3 Credits

This course covers the history of music made by and/or about African Americans, from minstrel shows to hip hop and everything in between.

MUS 316 Digital Mixing and Mastering 3 Credits

Digital Mixing and Mastering is a practical skills class focusing on post-production skills in software interfaces. Students will learn how to work with multiple editing softwares and plug-in tools to achieve balanced, lively, professional mixes.

MUS 319 Pop Music Arranging II 3 Credits

The Pop Music Arranging II course is the terminal course of a two-semester sequence whose goal is to explore the advanced arranging techniques for popular music styles. Students will learn to arrange popular music for the standard instrumentation found in a pop/rock ensemble (bass guitar, drumset, rhythm guitar, and keyboard). This course will develop comprehensive musicianship and advanced arranging techniques, as well as develop advanced skills as they relate to the utilization of the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 219.

MUS 320 Pop Songwriting II 3 Credits

The Pop Songwriting II course is a continuation of the songwriting course sequence whose goal is to explore advanced compositional techniques for popular music styles. Students will learn to compose music by themselves and collaboratively. This course will develop comprehensive musicianship and advanced compositional techniques, as well as develop advanced skills as they relate to the software platforms Logic Pro X and Finale notation.

Prerequisite(s): MUS 220.

MUS 350A Applied Flute 2 Credits**MUS 350B Applied Flute 1 Credits****MUS 351A Applied Oboe 2 Credits****MUS 351B Applied Oboe 1 Credits****MUS 352A Applied Clarinet 2 Credits****MUS 353A Applied Bassoon 2 Credits****MUS 354A Applied Saxophone 2 Credits****MUS 355A Applied French Horn 2 Credits****MUS 356A Applied Trumpet 2 Credits****MUS 356B Applied Trumpet 1 Credits****MUS 357A Applied Trombone 2 Credits****MUS 358A Applied Euphonium 2 Credits****MUS 359A Applied Tuba 2 Credits****MUS 360A Applied Guitar 2 Credits****MUS 360B Applied Guitar 1 Credits****MUS 361A Applied Violin 2 Credits****MUS 362A Applied Viola 2 Credits****MUS 363A Applied Cello 2 Credits****MUS 364A Applied String Bass 2 Credits****MUS 364B Applied String Bass 1 Credits****MUS 365A Applied Piano 2 Credits****MUS 365B Applied Piano 1 Credits****MUS 366A Applied Organ 2 Credits****MUS 367A Applied Percussion 2 Credits****MUS 368A Applied Voice 2 Credits****MUS 368B Applied Voice 1 Credits****MUS 368C Applied Voice 2 Credits****MUS 368E Applied Voice 2 Credits****MUS 369A Applied Composition 2 Credits****MUS 490 Independent Research and Study 1-4 Credits**

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1 to 4 Credits. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing; good academic standing.

MUS 491 Internship in Music 1-4 Credits

Provides junior or senior music majors with the opportunity to gain practical experience working within a professional music environment. Students must be sponsored by a music professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

MUS 493 Selected Topics in Music Perf 3 Credits

Intensive study of a particular topic in applied music for the intermediate to advanced student. Students are led to understand the historic and aesthetic elements in music through critical listening, performance, research, and class projects.

MUS 495 Selected Topics in Music 3 Credits

Studies specialized aspects of the literature, history, or theory of music, to supplement the established curriculum. Emphasis on creative investigative work and individual experiences in music.

MUS 498 Popular Music Culture Capstone 3 Credits

The capstone is an independent, student-led project resulting in a material product (recording/performance/event/presentation) that demonstrates a student's interests and skills in the area of popular music.

MUS 499 Senior Honors Program 3 Credits

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, planned under the direction of a faculty advisor, represents a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

Courses and Descriptions

MUS 106 Survey of Music History II 3 Credits

A chronological survey of Western music from the classical through the contemporary periods stressing the origin and evolution of musical forms, musical styles, and the important composers since 1750. The relation between the music and the aesthetic movements of each period is studied.

MUS 204 Jazz History 3 Credits

Survey from 19th C. roots to 21st C. styles. Development of listening skills and overview of musical skills used by jazz performers. Exploration of the relationship between jazz and poetry, race relations, and the reputation of jazz in popular culture.

Prerequisite(s): CMP 120 or CMP 125.

MUS 205 History of Pop and Rock Part I 3 Credits

This course charts the history of popular music from its origins until the 1960s. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music from its roots in the blues, early jazz, ragtime and military band marches to the music of Elvis, Chuck Berry, Little Richard, Buddy Holly, the Rolling Stones and the Beatles. We look at the recording industry and the advent of the gramophone record and the important role of radio and television in expanding the reach of popular music directly into the home, creating a vibrant soundtrack for peoples lives.

MUS 206 History of Pop and Rock Part 2 3 Credits

Description: This course charts the history of popular music from the 1960s to today. Looking at performers, song-writers, bands and pop genres we will chart the dynamic evolution of popular music through Acid Rock, Progressive (Prog) Rock, Hard Rock, Singer-Songwriters, Disco, Reggae, Funk, Punk, Heavy Metal, New Wave, Grunge, Electronica and Rap & Hip-Hop. We look at the development of analog and digital media and how new forms of delivery of product shapes the business model of the industry and beyond.

MUS 208 Music of the Theater 3 Credits

A study of music drama both historical and contemporary covering European opera of the Baroque, classical and romantic periods, and the American musical theatre, especially the contemporary Broadway musical.

MUS 209 Great Composers 3 Credits

A study of selected major composers life, works, and historical significance with an emphasis on the listening experience. Bach, Mozart, Beethoven, Tchaikovsky, Stravinsky, or others.

MUS 212 Cartoon and Anime Culture 3 Credits

This course investigates the music and culture of animated films and television shows, anime, animated shorts including cartoons, and related incidental music for documentary films.

MUS 214 Writing about Music 3 Credits

This course instructs students in the art of writing about music, from small-form criticism to large scale scholarship, focusing especially on the ability to translate what one hears into engaging prose.

Prerequisite(s): CMP 120 and 125, MUS 110, 110L, and MUS 213.

MUS 215 Music & Techn/Mobile Society 3 Credits

This course compares the recent history of music technology to past innovations, focusing on the aesthetic implications and ideological influences of an increasingly mobilized musical milieu.

MUS 218 Postmodernism & Popular Culture 3 Credits

This course considers music in light of the ideological trends of postmodernism in order to better understand contemporary music in its cultural context.

MUS 300 Beethoven and the Romantic Age 3 Credits

A study of the Romantic period with particular emphasis on Beethoven. The classical heritage, the transformation of that heritage into romantic terms, the prominent influence of Beethoven on 19th century musical style.

MUS 495 Selected Topics in Music 3 Credits

Studies specialized aspects of the literature, history, or theory of music, to supplement the established curriculum. Emphasis on creative investigative work and individual experiences in music.

Theatre

Program Overview

In addition to a full array of theatre coursework, six main-stage productions each year give students a wide variety of experiences and opportunities. As a theatre major at Rider, students have the choice of pursuing a musical theatre, design & technology or contemporary theatre practice track. Musical theatre majors receive an education in the various areas necessary to develop as a professional musical theatre performer. Design & Technology majors are offered a wide range of

courses in the various aspects of theatre production. Contemporary Theatre Practice majors use their degree to pursue careers as educators, directors, playwrights, producers, and dramaturgs. All three tracks allow you the ability to add a second major or minor.

Audition or Interview

A satisfactory audition or interview must be completed before a student is accepted into this major. Audition and interview requirements may be found on the Admissions audition website (<http://www.rider.edu/ugauditions/>).

Courses and Descriptions

THE 103 The Authentic Instrument I: Introduction to Performance Skills 3 Credits

Through Alexander Technique and other methodologies, actors gain awareness of personal habits and begin to find their authentic, truth-telling voice and body—a dynamic and expressive instrument to serve them in any medium.

THE 104 The Authentic Instrument II: Developing the Imaginative Performer 3 Credits

Continuing from THE 103, actors explore psycho-physical techniques (e.g. Michael Chekhov, Viewpoints, Laban) to develop the actor's imagination. The class culminates in a public presentation using the tools that have been cultivated in Authentic Instrument I & II.

Prerequisite(s): THE 103.

THE 105 Theatre History to 1700 3 Credits

The history of theater from the primitive time through the Baroque era. Examines major plays and playwrights, emphasizing the Greek, Roman, Medieval, and Elizabethan eras. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 106 Theater History Since 1700 3 Credits

The history of theater from the Restoration to the present. Examines major plays and playwrights, emphasizing the Restoration, Romantic, and Realistic movements. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 107 Acting I: Intro to Acting 3 Credits

Exercises and improvisations developing the fundamental prerequisites for the actor are provided. The emphasis is on vocal and physical mobility and the ability to communicate emotional states from the stage.

THE 110 Acting II: Scene Study 3 Credits

Basic acting techniques. Emphasis on the ingredients of any action: what am I doing, where, why, who am I, what is my attitude toward partner?

Prerequisite(s): THE 107.

THE 111 Theatre Lab 0 Credits

This class serves as a forum for students to cultivate practical professional skills. Through seminars, guest speakers and master classes, this lab will give the students necessary tools to enter the professional theater. Theater majors must meet the weekly attendance and participation requirements during every semester up to a total of six.

THE 115 Stagecraft 3 Credits

The theory and practice of construction and rigging of stage scenery is offered. Emphasis is on actual productions and road show set-ups. One lecture and two labs per week.

THE 116 Stagecraft Practicum 1 Credits

Work in the various shops and stages specializing in different areas such as carpentry, scenic painting, lighting and electrics, costumes and props, assisting main stage productions under the supervision of the design or technical staff.

Prerequisite(s): THE 115.

THE 118 Visual Imagination 3 Credits

Introduction to the visual world of theater design. Visual examples, physical exercises and handcraft of composition and style, with dramatic input and meaning. The course explores how to translate ideas in a dramatic text into a visual context.

THE 120 Theater Appreciation 3 Credits

By exploration of dramatic literature, conclusions are drawn as to man's relationship to his particular period, style, political, social, and psychological environment. Appreciation of the theatrical event is included. This course counts towards the fulfillment of the Disciplinary Perspectives element of the CLAS general education curriculum.

THE 127 Theatre Production 1 Credits

Students rehearse and perform roles in a play produced by the department and directed by a member of its faculty. Students may also prepare a major element of design or technology for the production. Maximum of eight credits are accepted in theatre production, band and/or choir.

THE 190 Production I 1-3 Credits

Students carry out a technical theatre crew position for one or more theatre, musical theatre or dance productions during the semester of course registration. May be repeated seven times, for a total of eight credits.

THE 199 The Arts in Contemporary Civil 3 Credits

An integrated study of the arts and their place in contemporary American life. Includes attendance at several events in art, music, and drama.

THE 201 Devised Theatre 3 Credits

Devised theatre is a process in which a whole creative team – from actors to technicians - develop a new work collaboratively. Students will create an original production inspired by a theme, topic, poem, or circumstance using multimedia, interviews, and other methods and build them through collaborative workshops and rehearsals.

THE 206 American Theatre History 3 Credits

The history of the American theater from the colonial period to the present, emphasizing dramatic scripts and theatrical conventions. Examines important playwrights, theorists, and practitioners representative of each period of American history, emphasizing the 19th and 20th centuries.

THE 215 Introduction to Theatrical Lighting and Sound 3 Credits

This course will introduce students to basic lighting and sound principles and how those integrate into a theatrical performance. The main focus of the class will be analysis and application of lighting and sound equipment commonly used in live performance and how that equipment functions and is installed. The class will also touch on the design process, script analysis, and lighting color theory. These objectives will be achieved through in-depth lectures, class discussions, and hands-on demonstration sessions.

THE 216 Introduction to Scenic Construction 3 Credits

This course will expose students to reading construction drawings, construction techniques, generating material lists, problem-solving, and material and time management as related to scenic construction. A shop participation requirement will allow students to apply course objectives within a real-time production schedule and construction environment.

THE 218 Stage Lighting 3 Credits

The theory and practice of stage lighting as utilized in concept, dance, and theatre. Considers the nature of light, controlling light, color theory, electricity, electrical safety, and lighting design.

Prerequisite(s): THE 115.

THE 219 Stage Management 3 Credits

Provide necessary tools to get started as a production stage manager (PSM), including management, leadership, communication and organizational skills. Providing guidelines to prepare production paperwork. Overview of the relationship between the PSM and other production personnel.

Prerequisite(s): THE 115.

THE 220 Movement for the Actor I 3 Credits

This course is an introduction to movement training methodologies, and emphasizes physical awareness and expressivity as it relates to development of character.

Prerequisite(s): THE 110, For Acting majors or by permission of the instructor.

THE 221 Voice for the Actor 3 Credits

Focuses on exploration of the basic principles of vocal production and cultivating natural expressivity of the voice. Class work is based upon the classic progression of voice exercises of Kristin Linklater.

Prerequisite(s): THE 107; Open to Theatre majors or minor, or by permission of the instructor.

THE 222 Speech and Dialects for the Actor 3 Credits

Focuses on exploration of the International Phonetic Alphabet (IPA) and the use of the IPA in learning dialects (including Standard Neutral American) for the stage.

Prerequisite(s): THE 107; Open to Theater majors or minor, or by permission of the instructor.

THE 223 Costume Design 3 Credits

Introduction to tasks, skills and expertise of costume design and costuming techniques, relationship with other creative production and cast members. Students will create sketches and develop basic construction plans. Develop familiarity with fabrics, patterns, common challenges in costume design.

Prerequisite(s): THE 115, THE 118.

THE 224 Stage Make Up 3 Credits

Basic application of make up artistry and techniques for the stage. How it can help build a character, and how to apply to self and others.

THE 225 Sound Design 3 Credits

Introduction to sound design and its diverse use and practice for the staged productions, e.g. plays, musicals, operas and dance.

Prerequisite(s): THE 115.

THE 226 Drafting for the Stage 3 Credits

Covers essential drafting language for staged productions. Drafting of ground plans, sections, elevations, and renderings by hand and with computers.

Prerequisite(s): THE 115.

THE 227 Properties and Scenic Painting 3 Credits

Covers general aspects of scenic painting and props for the stage. Hands on exercises, needs and challenges of each area, how work is usually accomplished in the professional world. Explore different textures, materials and how to combine them.

Prerequisite(s): THE 115, THE 118.

THE 228 Projection Design 3 Credits

In this course students will learn the basics of video editing software and its application to the performing arts. It will provide them with a general understanding of the needs for projection design, visual possibilities, explore the reasons to use video or projection in a production and its most effective applications within theatrical production limitations.

Prerequisite(s): THE 115, THE 118.

THE 229 Movement for the Actor II 3 Credits

This course is a continuation of study in movement training methodologies (Alexander Technique, Viewpoints, Laban). It will emphasize developing physical awareness and expressiveness as it relates to the development of character work. It will also continue the further cultivation of awareness of habitual psycho-physical patterns that inhibit students in their professional development.

Prerequisite(s): THE 220, THE 221.

THE 240 Script Analysis 3 Credits

This course provides students with a technique for analyzing a theatrical script in terms of its theatrical requirements and aesthetic qualities. Students will use critical research and develop the abilities to write and speak clearly about dramatic literature, the requirements of production, and the experience of performance.

Prerequisite(s): THE 107 with a minimum grade of C.

THE 250 Introduction to Costume Construction 3 Credits

This course will introduce students to basic costume construction methods and alteration skills used by professional costume shops and costume houses to create theatrical costumes. Students will complete several projects, covering hand and machine sewing, cutting, fabric identification, and will also learn how to use home and commercial patterns to cut out garments and simple patterning and draping techniques. Students will also get practical experience by assisting the costume designer and/or shop manager in supporting the needs of the current productions and will have experience taking measurements, fitting and the alteration of actual costumes.

THE 260 History of Style and Decor 3 Credits

This class is a survey of elements, furnishings, decorative motifs and trends in architecture, decor and fashion, starting with prehistory and moving through the early part of the 21st century. It is intended to be a visual survey of the major "periods" of both decor and fashion and is intended to help theatre artists to develop an understanding of visual history.

Prerequisite(s): THE 115.

THE 290 Production II 1-3 Credits

Students carry out an intermediate level technical theatre crew position for one or more theatre, musical theatre, or dance productions during the semester of course registration. Intermediate level technical theatre positions are supervisory positions or assistants to department heads which include, but not limited to, assistant to a designer, Stage Manager, Wardrobe Supervisor, and Master Carpenter.

Prerequisite(s): SO standing; 3 credits of THE 190.

THE 300 Acting for the Camera 3 Credits

Focuses on the craft and artistry of acting in television and film. Examination of TV production and the styles needed for work in various media will be discussed. Physicalization, simplicity, listening, marking and other technical requirements will be explored. Staging involving different camera angles will be rehearsed. The emphasis of this class is on adapting the performance to the special needs of the camera.

Prerequisite(s): THE 107.

THE 307 Contemporary Theater 3 Credits

The richness and diversity of contemporary theatre artists across the world are discussed. Focusing on playwrights and innovative performing arts practitioners, the form and content of dramatic literature and production styles considered most significant today are examined from a global context.

THE 308 Modern Drama 3 Credits

Surveys American and European drama from 1920 to 1970. All plays are read in English translation. In these plays, theatrical artists address the great themes of this century. While doing so, they also expand the limits of theatrical expression.

THE 310 Acting III 3 Credits

Students will study in-depth techniques for exploring characterization. They will be introduced to the "magic if" and study techniques for placing themselves in the circumstances of the characters they are portraying. They will learn the interior and exterior analysis of characters using "Adler" and "Practical Aesthetics" techniques.

Prerequisite(s): THE 107, THE 110.

THE 311 Acting IV 3 Credits

Students will learn the appropriate techniques to explore characters in the three styles of Elizabethan, Restoration, and Commedia dell'arte theatre. Sessions will include movement, effective speech, and finding appropriate actions for each style. Students will also learn proper research techniques to understand cultural influences on plays and characters.

Prerequisite(s): THE 107, THE 110, THE 310.

THE 312 The Arts Abroad 3 Credits

A two-week trip abroad that includes a critical study of the music and theatre. Students are required to attend all performances, guided tours, and classes before and after the trip. A travel journal and final paper is required. A travel fee is required. Travel sites and artistic disciplines may vary year to year. May be taken more than once for credit.

Prerequisite(s): Permission of instructor.

THE 313 Advanced Voice and Speech for the Actor I 3 Credits

Actors continue their study of vocal progression of Kristen Linklater and the speech work of Patsy Rodenberg, Edith Skinner and Louis Colaianni to develop physical freedom, energy and expressivity. Advanced diagnostic work of students' voice and speech habits is explored in relationship to work with contemporary, heightened, and stylized texts.

Prerequisite(s): THE 221, THE 222.

THE 314 Advanced Voice and Speech for the Actor II 3 Credits

Continuing from THE 313, actors apply advanced principles of vocal production and speech work to contemporary, heightened and stylized texts.

Prerequisite(s): THE 313.

THE 315 Acting V: Advanced Acting for the Camera 3 Credits

This course is a continuation of the study of acting for Television, Film, Internet Content, Voiceover and other mediums.

Prerequisite(s): THE 229, THE 311.

THE 317 Scenic Design 3 Credits

The study and application of design principles as related to the stage. Incorporates the design process, decor research, styles, materials, and construction technology.

THE 329 Movement for the Actor III 3 Credits

This course is a continuation of study in movement training methodologies focusing on continued development of expressivity, ease, dynamics and authenticity in character development.

Prerequisite(s): THE 229.

THE 390 Production III 1 Credits

Students carry out an advanced level technical theatre crew position for one or more theatre, musical theatre, or dance productions during the semester of course registration. These positions include, but are not limited to, Designer, Production Stage Manager, Props Master, and Technical Director. This course may be taken up to three times for credit.

Prerequisite(s): JR or SR standing; 2 credits of THE 290 and related management/design course or permission of Instructor.

THE 400 Directing for the Stage I 3 Credits

The technique of play directing and production management. Lectures present aesthetic and theoretical concepts that are explored in workshops.

Prerequisite(s): THE 107, THE 115.

THE 410 Advanced Performance Workshop 3 Credits

An opportunity to work an entire semester on a specific style or period of theatre, e.g., Shakespeare, farce, Readers' Theater.

Prerequisite(s): THE 107, THE 110.

THE 411 Advanced Performance Online Workshop 3 Credits

An opportunity to work an entire term on a specific style or period of theatre that is most conducive to online instruction.

Prerequisite(s): THE 107, THE 110.

THE 450 NY Experience: Professional Audition Technique and the Business of Acting 3 Credits

Students engage weekly with New York professionals to learn the business of acting and strategies for successful auditions in the NY Film, Television and Theatre industry. Students will participate in mock auditions with casting directors and theatre and on camera directors to refine audition skills. Travel costs to New York are the responsibility of the student.

THE 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 Credits. Approval of the faculty sponsor, department chair, and dean required prior to enrollment.

Prerequisite(s): junior or senior standing, good academic standing.

THE 491 Internship in Theater 1-12 Credits

Provides junior or senior theatre majors the practical experience of working within a professional theater environment. Students must be sponsored by a theatre professor. For each academic credit, interns must work 48 hours for the semester, or approximately 3.7 hours each week.

Prerequisite(s): permission of instructor.

THE 493 Contemporary Theatre Ensemble 1 Credits

This course gives Contemporary Theatre Practice students the opportunity to create a full season of student-directed, acted and designed productions.

Prerequisite(s): THE 190 (3 times) and 60 semester hours.

THE 495 Selected Topics in Theatre History 3 Credits

Intensive study of a particular topic, such as the work of one dramatic movement, one period in dramatic history, or one nation's history. Students become deeply involved in an area through research, class discussions, and individual consultation with the instructor.

THE 496 Senior Internship 6-12 Credits**THE 497 Theatre Senior Showcase 1 Credits**

This course is a senior level experience for BFA acting students, and acts as a bridge between life in the university and life as a professional actor. Through this course the students will, in collaboration with the teacher, compile and put together a showcase to introduce the students to casting and agent professionals in the industry by way of getting the showcase performance in front of a diverse range of industry professionals who will be useful in both casting and representing recently graduated talent.

THE 498 Senior Capstone 3 Credits

The senior capstone is intended for technical theatre students in their final year. Depending on the required abilities, students will be able to design sets, lights, costumes, props or sound for a mainstage show at Rider University, do research on topics related to technical Theatre, internships outside Rider University or work on projects that will improve the use of facilities, storage or equipment for Theater and Dance Department.

THE 499 Senior Honors Program 3 Credits

A senior honors program may be submitted in partial fulfillment of requirements for graduation with honors in fine arts. Honors work is limited to those departmental majors with a GPA of 3.5 in fine arts courses and cognates. The program, to be planned under the direction of a faculty advisor, will represent a culmination of demonstrated excellence in a specific area of fine arts. Candidates for honors in fine arts must be approved by the department chairperson and the faculty.

School of Fine and Performing Arts

<http://www.rider.edu/sfpa/> (<https://www.rider.edu/academics/colleges-schools/westminster-college-arts/sfpa/>)

A division of the Westminster College of the Arts, the School of Fine and Performing Arts is located on the Lawrenceville campus. The school offers Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music and Master of Arts degrees, as well as widespread opportunities for students – regardless of major – to participate in the arts. Exhibitions, plays, concerts, and productions are presented in the 442-seat Yvonne Theater, the 90-seat Spitz Studio Theater, and the recently-expanded 374-seat Bart Luedeke Theater.

Several experiences, including ensembles and classes, are open to all university students. Dramatic plays and musical theatre productions are open to all students by audition. The Rider University Art Gallery showcases leading regional and national artists, as well as selected student work. Artist lectures and gallery performances bring additional opportunities for artistic enrichment. The Arts Administration Center provides a forum for students to work with campus and community organizations on a variety of issues and activities. Rider Dances involves student dancers, choreographers and musicians. Each year, many education majors elect a second second major from the School of Fine & Performing Arts, choosing from tracks in Dance Studies, Popular Music Studies or Theatre Studies.

Mission

Westminster College of the Arts

Westminster College of the Arts inspires and empowers innovative artists and leaders to transform communities through the arts.

The School of Fine and Performing Arts

The School of Fine and Performing Arts focuses on dance, music, musical theatre, theatre and arts administration. Through programs that provide a historical, aesthetic, practical and professional perspective, students develop the skills to excel in a professional career while growing intellectually from a broadly based liberal arts curriculum. The school fosters meaningful engagement in the arts to students who wish to become professional artists as well as students who view the arts as an integral part of overall intellectual growth. The school nurtures and challenges the artist within all students and prepares them to contribute to an ever-changing global society.

Arts Management and Executive Leadership

Overview

Arts Management and Executive Leadership (AMEX) marries your passion for arts, culture and entertainment with vision-centric, mission-driven executive skills and leadership capacity development to help you become a dynamic leader, advancing & ensuring the future of arts as vital and integral to the future of communities, our nation and the world. Opportunities abound for satisfying and rewarding careers in managing & leading arts, culture and entertainment - whether in the growing nonprofit or for-profit/commercial sectors. There are over 4.8M jobs in the management sector of arts & entertainment (U.S. Labor Statistics), and the industry has consistently demonstrated slow but steady upward momentum, even as economic and other challenges hit. Rider's Master of Arts in Arts Management and Executive Leadership affords graduates critical executive-level knowledge and skillsets to succeed in leading departments, divisions and institutions from deeply-rooted vision, high-impact mission, and sound strategic planning & application perspectives vital to the success of the field and of yourself as a dynamic arts leader. Established, experienced executives working at significant institutions around the nation are unique to our balanced delivery of practical and theoretical coursework which prepares you for a creative sector in need of pragmatic visionaries.

Arts Management and Executive Leadership M.A. Program Requirements

(33 credits)

Code	Title	Credits
------	-------	---------

The following courses are prerequisites and must be completed (or waived¹ or tested out of²) before taking any other courses in the program:

AMEX 500	Managing Arts & Institutions - Principles & Practice	3
----------	--	---

The following courses are intended to be completed in the sequence below:

AMEX 509	Intersecting Arts and Law	3
AMEX 512	Advancing Arts & Institutions	3
AMEX 515	Advocating Arts & Institutions	3
AMEX 518	Engaging Arts & Institutions	3

AMEX 521	Surveying Arts Institutions	1.5
AMEX 524	Leading & Governing Arts Institutions	3
AMEX 590	Synthesizing Arts Management	1.5
AMEX 593	Capstone: Arts Management Thesis or Leadership Project	3

The following non-AMEX courses may be taken at any time throughout the program:

LEAD 500	The Practice of Leadership	3
PMBA 8020 or LEAD 540	Fundamentals of Accounting Strategic and Financial Decision-Making in Organizations	3
PMBA 8270	Adv. Organizational Behavior	3
Total Credits		33

- ¹ Candidates who have successfully completed AAD 121, AAD 202 and AAD 203 may be waived from completing one or more of these prerequisite courses by the program director and dean. Inquire about this option with Graduate Admissions.
- ² Candidates who demonstrate considerable professional work or training in one or more of the prerequisite areas may be able to test out of one or more prerequisite courses by approval of the program director and dean. Inquire about this option with Graduate Admissions.

Courses and Descriptions

AMEX 500 Managing Arts & Institutions - Principles & Practice 3 Credits

Provides survey of key challenges and opportunities in institutional planning and development, strategy, organization, marketing, fund development, budgeting, leadership and governance in arts institutions, with a particular focus on nonprofit arts. Vision-centric, mission-driven, integrated management perspectives are applied to case-based research, analysis and reporting, supported by multiple assigned readings and required online discussion posts. This course is a pre-program requirement for the MA in Arts Management and Executive Leadership degree. Students who have successfully completed AAD 121 (or similar, at another undergraduate program) as an undergraduate may be waived from completing this course by the program director and dean.

AMEX 503 Arts Marketing: Principles and Practice 1.5 Credits

This course will build upon integrated management and marketing fundamentals addressed in AMEX 500. The course surveys the challenges, as well as traditional, contemporary and developing opportunities and approaches to institutional branding, audience development, product marketing and community alignment from vision-centric, mission-driven strategic marketing and public relations perspectives. The course is a pre-program requirement for the Master of Arts in Arts Management and Executive Leadership program. Students who have successfully completed AAD 202 as an undergraduate may be waived from completing this course by the program director and dean.
Prerequisite(s): AMEX 500 or permission of director and dean.

AMEX 506 Funding Arts & Institutions - Principles and Practice 1.5 Credits

The seminar builds upon integrated management, fundraising and institutional advancement fundamentals addressed in AMEX 500. This course surveys the challenges as well as traditional, contemporary and developing opportunities and approaches to advancement, donor-centered fundraising, legacy-building from vision-centric, mission-driven strategic fund-development perspectives. The course is a pre-program requirement for the Master of Arts, Arts Management and Executive Leadership program. Students who have successfully completed AAD 203 or similar coursework may be waived from completing this course by the program director and dean.

Prerequisite(s): AMEX 500.

AMEX 509 Intersecting Arts and Law 3 Credits

Intersecting Arts & Law explores multiple, diverse cases and conclusions which have impacted and continue to shape the arts. Masters candidates compare and contrast past and present legal cases, statutes and mandates on a host of issues ranging from artistic expression as hate or sex speech to the rights and responsibilities of artists and institutions pursuant to ownership and rights of dissemination. Current legal standing and its evolution, essential tools, trends and best practices will be assessed via case-based research and reporting grounded in comparative analysis of historical, contemporary and prescient topics relating to the intersections of law and artistic rights and freedoms.

Prerequisite(s): AMEX 500, AMEX 503, AMEX 506.

AMEX 512 Advancing Arts & Institutions 3 Credits

This course will provide integrated strategies for long-term fund development, sustainability, and legacy building in the arts. Funding and other stakeholder-driven advancement follows vision and, in an industry that relies heavily on stakeholder investment to propel artistic and programmatic success, the need for strong vision-driven leadership is critical. Building upon foundational information delivered in AMEX 500 and AMEX 506 (or equivalents), the course explores and assesses multiple, diverse approaches to vision-centered, mission-driven institutional advancement and fund-development from all philanthropic sectors impacting the nonprofit arts. Students will compare and contrast diverse board, executive and managerial strategies and application of current tools, trends and best practices employed in fund development planning and program implementation via case-based research and reporting. Comparative research and analysis of public and private funding institutions, corporations, and individual philanthropists – what inspires and guides their proposal review processes and giving practices - further informs discussion and the development of three sector-specific assessments for multiple arts institutions with which each student will have aligned themselves. Three, 90-minute live streamed, moderated expert advisory panel discussions in addition to regularly-scheduled online sessions will interface leaders in the field and faculty moderator engaging on essential topics relating to course goals/outcomes, providing diverse and highly informative first-hand insights from executive leaders and decision-makers.

Prerequisite(s): AMEX 500, AMEX 503, AMEX 506, or equivalents, or permission of program director and dean.

AMEX 515 Advocating Arts & Institutions 3 Credits

This course will discuss the legal, societal and ethical perspectives on arts policy, practice, and procedures in the workplace. Arts often reflect, challenge and at times define social, political and ethical constructs and push the envelope on what is acceptable – aesthetically, morally and otherwise – in contemporary society. Explore the ever-evolving relationship of arts and society through the lens of institutional responsibility as interpreted by the artist, the law, and by contemporary civic and social considerations. Masters candidates will research and discuss key historical moments and movements which have impacted the arts and institutional governance and administration; current legal, social and ethical issues impacting artistic expression and institutional leadership today; and key policy decisions past, present and under consideration which impact the ways by which institutions make and disseminate art, govern themselves, and carry out key administrative functions. Case-based comparative research and analysis of effective leadership initiatives, policies and best practices around key legal, social and ethical issues impacting institutions further informs discussion and the development of a comprehensive institutional responsibility proposal for an arts institution with which each student will align him or herself.

Prerequisite(s): AMEX 500, AMEX 503, and AMEX 506 or equivalents when approved by the program director and dean.

AMEX 518 Engaging Arts & Institutions 3 Credits

This course provides an integrated approach to vision-centric, mission-driven community building, audience development, and engagement in the arts. In a time when active participation in live arts is challenged with multiple and ever-advancing competing arts and entertainment options, platforms and pricing structures, the ability and wherewithal for arts institutions to effectively get their message through is more essential than ever. Building upon foundational information delivered in AMEX 503, this course explores challenges and opportunities in winning the hearts and minds of a diverse, often fickle and ever-changing demographic, psychographic and socio-economic public, engaging them in new and meaningful ways. Masters candidates research and discuss the importance of vision, mission and integrated management approaches to branding and messaging; trends in audience participation; efficacy of traditional and contemporary approaches to institutional branding, audience development and community-building around the arts; evolving modes and tools for effectively identifying, programming for, marketing to and engaging diverse audiences; efforts to integrate live arts and new technologies to market, and expand access to and engage audiences in the arts in new ways. Case-based comparative research and analysis of effective branding and marketing campaigns further informs discussion and the development of a comprehensive market analysis and brand expansion proposal for an arts institution with which each student will align him or herself.

Prerequisite(s): AMEX 500, AMEX 503, and AMEX 506 or permission of the program director or dean.

AMEX 521 Surveying Arts Institutions 1.5 Credits

Comprehensive, case-based assessment of significant institutions, institutional governance & leadership as a means of guiding final synthesis and capstone development.

Prerequisite(s): AMEX 518, AMEX 521, AMEX 524.

AMEX 524 Leading & Governing Arts Institutions 3 Credits

This course will discuss strategic methods, analytical approaches, and best practices for arts executives, board members, and stakeholders. Strategic, adaptive, entrepreneurial governance and management of arts institutions is essential for long-term survival and success, particularly in ever-shifting social, political, economic and technological landscapes. Building upon foundational information delivered through all prior coursework, this course explores the roles, relationships and responsibilities of institutional leaders and how strategic approaches to defining roles, finding and keeping the right people to fill them, strengthening the relationships and identifying and fulfilling responsibilities at all levels drives success. Graduate candidates research, compare and contrast leadership styles, tools and best practices in ethically and responsibly governing and managing institutions, with particular consideration given to the specific needs of the nonprofit arts. Topics of discussion and debate will include ethics and aesthetics, diversity and equity, arts and civic responsibility, and freedom and constraint in strategically planning, governing and managing the production and dissemination of art. Multiple case-based analytical studies resulting from in-depth, thesis-oriented governance and/or leadership focus surveys developed throughout the program further inform discussion and the development of a comprehensive leadership strategy for an arts institution with which each student will align him or herself. Requires participation in a full-day Board and Executive Management Leadership Seminar/Workshop intensive on the Rider campus at end of the session.

Prerequisite(s): AMEX 512, AMEX 515, AMEX 518.

AMEX 590 Synthesizing Arts Management 1.5 Credits

Capstone (Thesis or Leadership Project) research, analysis, orientation & preparation in context of all prior coursework. This course involves thesis research and analysis, thesis development and writing application OR* project research and analysis, project development, management and reporting. *Capstone option (thesis or leadership project) is chosen in coordination with graduate capstone advisor and upon approval by WCA Dean.

Prerequisite(s): AMEX 521.

AMEX 593 Applying Arts Management 3 Credits

This course represents the graduate capstone requirement and is taken subsequent to the preparatory "Synthesizing Arts Management" (AMEX 590) course wherein the graduate candidate will identify, design, prepare for and subsequently complete either a traditional, written graduate thesis path of completion or an in-depth, comprehensive leadership project - either option upon approval, and under advisement of, program director and designated faculty member.

Prerequisite(s): AMEX 519.

LEAD 500 The Practice of Leadership 3 Credits

This course allows students to gain an understanding of the practice of leadership and how they can develop as leaders. Students will explore leadership models, creativity in organizations, and approaches to decision making as they begin to form their own leadership philosophy.

LEAD 540 Strategic and Financial Decision-Making in Organizations 3 Credits

This course explores the importance of information and financial resources within the culture of organizations, and the necessary relationship that exists between the two. The course draws on current literature and student experience to explore resource management and focuses on the effective use of information resources within the boundaries defined by financial realities. The relationship between data analyses and effective decision-making will be explored.

Prerequisite(s): LEAD 500 or concurrent with LEAD 500.

PMBA 8020 Fundamentals of Accounting 3 Credits

For those students having no previous knowledge of accounting. Subject is approached from the point of view of the user of accounting information rather than that of the accountant who supplies the information. Surveys mechanics of accounting as a means to an end, emphasizing accounting as a tool of management and the language of business. Problems and cases bring out the managerial implications of accounting.

PMBA 8270 Adv. Organizational Behavior 3 Credits

A study of key individual, group, and organizational processes. At the individual level, the focus is on different personalities, job attitudes, and work motivation. The implication of individual factors is then considered in a team context focusing on the processes of communication, influence, conflict, and leadership. Finally, we examine the impact of organizational culture and change on workplace behavior. In order to integrate the individual, group, and organizational levels of study, the course emphasizes a team-based approach to learning.

Prerequisite(s): PMBA 8070.

School of Fine and Performing Arts Faculty

Stephen A. Allen

Professor, Department of Fine Arts
D.Phil. University of Oxford; B.A. Birmingham Conservatoire; LTCL Trinity College London; ABSM Birmingham Conservatoire

Westminster Choir College

A division of Westminster College of the Arts, **Westminster Choir College of Rider University** is a professional college of music. Here, the Bachelor of Music (B.M.) degree is offered with majors in music education, organ performance, piano, sacred music, theory/composition, and voice performance. The Master of Music (M.M.) degree is offered in American and Public Musicology choral conducting, composition, music education, organ performance, piano accompanying and coaching, piano pedagogy and performance, piano performance, sacred music, and voice pedagogy

and performance. In addition, the college offers the Master of Music Education (M.M.E.), Master of Voice Pedagogy (M.V.P.), and Bachelor of Arts in Music degrees.

A Tradition of Excellence

Choral music performance lies at the heart of the Westminster program, which involves daily choir rehearsals and required voice study for all its students. Preparation and performance of the choral/orchestral works at times takes precedence over all other facets of campus life. All undergraduates sing in one of the large ensembles: Chapel Choir, Schola Cantorum or Symphonic Choir. Auditioned ensembles include the Westminster Choir, Williamson Voices, Westminster Kantorei, Jubilee Singers, and Concert Bell Choir.

The Symphonic Choir has performed hundreds of times and made many recordings with the principal orchestras of New York, Philadelphia, and Washington. It also has performed in New York with many touring orchestras such as the Atlanta Symphony, Los Angeles Philharmonic, Berlin Philharmonic, and Vienna Philharmonic. Virtually every major conductor of the 20th century, from Toscanini and Walter through Bernstein, Muti, and Masur, has conducted the Symphonic Choir during the 80 years of the college's history.

Private Study

Private study in voice, piano, or organ is available during the fall and/or spring terms. Full-time students in Rider's other colleges or schools whose major program does not require private applied music study, or Westminster College of the Arts majors who have completed all applied music requirements, may apply to enroll in elective private study on a space-available basis. Effective as of the fall 2009 semester for all new or readmitted Rider University students, there is a fee for these half-hour private lessons. Qualified students may audition for organ study, for elective choirs, or for advanced courses in music for which they meet the prerequisites at Westminster Choir College.

Visit the Westminster Choir College site for undergraduate and graduate catalog information.

	Dance and MT Dance Placements;
	Choral hearings and callbacks; auditions
6 Monday	Labor Day - College Closed
	Choral hearings or callbacks for elective choirs and productions
7 Tuesday	Lawrenceville Convocation • 11 a.m., SRC, tbc
	WCA First Year Meeting • 10 a.m.
8 Wednesday	Classes Begin
8-10 Wednesday-Friday	Open Choral hearings (non-WCC students)
9 Thursday	WCA Fall Convocation • 11:30 a.m.
14 Tuesday	Last day to add courses
20 Monday	Unresolved Summer II Incomplete grades default to "F"
21 Tuesday	Last day to drop courses
Sept 22-Oct 26	Withdrawal Period I, instructor signature not required

October

1 Tuesday	Deadline to apply for December 2021 or January 2022 graduation
18 Monday	Spring 2022 Course Selection begins
26 Tuesday	Midterm grades due
	Last day for course withdrawal without instructor's signature
Oct. 27-Nov. 23	Withdrawal Period II, instructor's signature required

November

1 Monday	Deadline to schedule fall oral examination
5 Friday	Spring 2022 Course selection ends
5-7 Friday-Sunday	Family Weekend
23 Tuesday	Last day for course withdrawal with instructor's signature
Nov 24-Dec 10	Withdrawal III, psychological or physiological incapacity (medical documentation required)
24 Wednesday	Residence halls close • 12 p.m.
24-28 Wednesday-Sunday	Thanksgiving Recess
28 Monday	Residence halls reopen • 11 a.m.
29 Monday	Classes resume

December

10 Friday	Last day of classes
10 Friday	Last day to hold Graduate Oral Examination
10-11 Friday-Saturday	Readings and Carols
11 Saturday	WCC Class of 2020 Commencement
13-21 Monday-Friday	Final Exams and Juries
15 Wednesday	Reading Day
18-19 Saturday-Sunday	Reading Days
22 Wednesday	Residence halls close

Spring Semester 2022**January**

3 Monday	Final grades due • 12 p.m.
4 Monday	January Term begins
17 Monday	Martin Luther King, Jr. Day (Entire University Closed)
20 Thursday	January Term ends
20-21 Thursday-Friday	Orientation for new students
21 Friday	Registration for Spring 2022 New student choral hearings
22 Saturday	Residence halls open
24 Monday	Classes begin
28 Friday	Unresolved Fall 2020 Incomplete grades default to "F"
28 Friday	Last day to add courses

February

4 Friday	Last day to drop courses
7 Monday	Withdrawal Period I begins, instructor's signature not required
11 Friday	Deadline to apply for May 2022 graduation

March

7 Monday	Fall 2022 course selection begins
11 Friday	Last day for course withdrawal without instructor's signature Midterm grades due
12 Saturday	Residence halls close • 12 p.m.
14-20 Sunday-Sunday	Spring Break; no classes or lessons
March 14-April 15	Withdrawal Period II, instructor's signature required
20 Sunday	Residence halls reopen • 2 p.m.
21 Monday	Classes Resume
29 Friday	Fall 2022 Course Selection ends

April

1 Friday	Deadline to schedule spring oral examination
15 Friday	Last day for course withdrawal with instructor's signature

April 18-30	Withdrawal III, psychological or physiological incapacity (medical documentation required)
21 Thursday	Westminster Spring Convocation
30 Saturday	Last day of classes

May

2-10 Monday-Tuesday	Final Exams and Juries
11-14 Wednesday-Saturday	Alumni Week (tbc)
13 Friday	Commencement at Princeton University Chapel • 4 pm Final grades due • 12 p.m.
14 Saturday	Lawrenceville Commencement Residence halls close • 8 p.m.
16 Monday	Summer Session I begins

June

1 Wednesday	Deadline to apply for August 2022 graduation
1 Wednesday	Deadline to schedule summer oral examination
10 Friday	Unresolved Spring 2022 Incomplete grades default to "F". Last day of classes of Summer Session II is the last day to hold summer Graduate Oral Examination

Withdrawal Information

Please refer to www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds (<http://www.rider.edu/offices-services/finaid/payments-billing-deposits/refunds/>) for information regarding course withdrawals and refunds. For additional information and updates, refer to www.rider.edu (<http://www.rider.edu>)

Cancellation of Classes

In most cases, Westminster Choir College of Rider University will remain open and fully operational during snowstorms and other emergency situations. Under extreme circumstances, however, it may become necessary to cancel classes and other functions, and close certain buildings or take emergency actions.

If such circumstances should arise, a notice will be sent via the Rider Alert System. Students may sign up for Rider Alert at www.rider.edu/rideralert (<http://www.rider.edu/rideralert/>)

Cancellations will also be announced online at www.rider.edu (<http://www.rider.edu>) and on the Rider University information hotline at 609-219-2000, option 1.

Commencement Information

For Commencement ceremonies information, refer to www.rider.edu/commencement (<http://www.rider.edu/commencement/>)

Academic Support Services

Rider University offers a wide array of academic support services. Additional information regarding each of these can be found on Rider's

website (<http://www.rider.edu/academics/academic-support-services/>).
(<http://www.rider.edu/academics/academic-support-services/>)

Registrar (<http://www.rider.edu/academics/academic-support-resources/registrar/>)

Responsible for academic records, registration processing, degree and attendance verification, transcripts, grade reporting, veterans services, and maintenance of the student and course information system.

Career Development and Success (<http://www.rider.edu/careerservices/>)

Provides resume assistance, interview preparation, job search/postings, networking, career fairs, graduate school preparation, alumni services, employer partnerships and more.

TRIO Student Support Services (<https://www.rider.edu/academics/academic-support/trio-programs/>)

A comprehensive academic support program designed to increase performance, retention and graduation rates, primarily of first-generation college students.

Academic Success Center (<http://www.rider.edu/academics/academic-support-resources/student-success-center/>)

Offers free tutoring and other programs to enhance learning and development.

Student Accessibility and Support Services (<http://www.rider.edu/academics/academic-support-resources/services-students-disabilities/>)

Ensures equal access by providing services for all students with qualifying documented disabilities.

Reading Courses (<http://www.rider.edu/academics/academic-support-resources/reading-courses/>)

Rider University offers an introductory course in College Reading, CRC 100.

Westminster Choir College Departments and Programs

- Arts and Sciences (p. 1151)
- Baccalaureate Honors Program (p. 16)
- Conducting (p. 1152)
- Music Composition, History and Theory (p. 1153)
- Music Education (p. 1154)
- Organ or Harpischord (p. 1156)
- Piano (p. 1157)
- Sacred Music (p. 1158)
- Voice (p. 1159)

Arts and Sciences

General Remarks

Westminster Choir College Arts and Sciences courses seek to provide those elements of a liberal arts education that will furnish undergraduates with an intelligent grasp of their cultural heritage and of the world in which they live. A thorough and ongoing contact with the humanities and an appreciation for the behavioral, social and physical sciences are indispensable to the development of musical leadership. Arts and Sciences courses are taught by faculty from all departments of the University. Arts and Sciences students may enroll in any Rider University class. Please see the section, "Princeton University Program" for additional information.

Music History and Art History courses cannot be used to fulfill the Arts and Sciences history elective requirement.

Bachelor of Arts in Music

The Bachelor of Arts in Music (p. 1163) is a liberal arts degree with a major in music. A broad foundation in liberal studies complements extensive studies in music. The curriculum is designed for students whose academic/and or career interests extend beyond music.

Reading, Writing and Mathematics Skills

All entering undergraduates take placement tests in order to determine the level of their English reading and writing abilities and the level of their mathematics skills. Students exempted from any required Arts and Sciences course(s) must replace the credits with additional Arts and Sciences electives.

As a result of SAT scores and/or the English placement test, students may be required to take CMP 120 during their first fall semester. CMP 120, if required, must be completed satisfactorily as a prerequisite to all other Arts and Sciences courses. All students should complete CMP 125 or BHP 150 during their first year of study.

English Placement

Students who have earned an AP score of 4 on either the Composition and Literature or the Language and Literature examination will receive credit for CMP 125. Students who have earned an AP score of 5 on either the Composition and Literature or the Language and Literature examination will receive three additional credits.

Students with a combined score on the SATW and SATR of 1300 or higher are eligible to enroll in CMP 203 or CMP 125. Students may enroll in BHP 100 by invitation of the Westminster Choir College Honors Program.

Students with an SATW score of 550 or higher OR an essay score of 8 or higher will be placed into CMP 125.

Students with an SATW below 550 AND an essay score below 8 will be placed into LL 037.

Students with an SATW score lower than 500 OR an essay score lower than 7 may not challenge their placement into LL 037.

Students with an SATW score between 500-550 and an essay score of 7 may challenge their placement into LL 037 by taking the English Placement Test.

Mathematics Placement

As a result of the SAT scores and/or the mathematics placement test, students may be required to take MTH 100S.

Failing grade on the Mathematics Placement Test, OR SAT Math < 550: MTH 100S.

Passing grade on the Mathematics Placement Test, OR SAT Math \geq 550 OR completion of MTH 100S or MTH 102.

Foreign Languages

Foreign language study is sequential, each course being prerequisite to the next. A minimum grade of C is required for advancement to the next level. Grades of C- or below will not be accepted. Placement tests are offered for students who have backgrounds in French, German or Italian. Advanced standing may be approved, but credit is not awarded except by transfer of credits earned in foreign language study at the college level for undergraduate students only.

- Foreign language placement tests are intended to determine appropriate placement only for students that have had prior instruction in the language and intend to take further courses in the language at Rider University. Undergraduate students whose test results place them into 200 or 300-level must take at least one semester of the language in order to fulfill an undergraduate language requirement.
- Foreign language placement tests do not result in credit awarded.
- Undergraduate students who have earned a minimum grade of C in a language course at another college or university will receive credit after supplying transcript evidence. Grades of C- or below are not sufficient.
- Students who have earned a minimum score of 3 on the AP (Advanced Placement) test, may receive three to six credits for each language exam.
- Undergraduate students who would like to receive credit for one or more language courses may take the College Level Examination Program (<https://clep.collegeboard.org/exam/>) (CLEP) in that language at their own expense. (There is currently no CLEP exam for Italian.) Students who earn a score of at least 65 on CLEP exams may earn credits towards graduation.
- Native speakers may be exempted from taking a course in their native language by the Dean or by recommendation from the appropriate language instructor. This exemption does not receive credit, but fulfills undergraduate language requirements in that language.

For undergraduates exempted from language courses, the language credits are replaced by electives in Arts and Sciences.

AP, IB, and CLEP Credit

Students who have earned a minimum score of 3 may receive three to six credits for each Advanced Placement (AP) test. A minimum score of 4 is required on the Music Theory AP test. Specific course and credit information is available at <https://www.rider.edu/admissions/first-year/requirements-deadlines/college-credit/ap> (<https://www.rider.edu/admissions/first-year/requirements-deadlines/college-credit/ap/>)

Students who have completed International Baccalaureate (IB) courses must submit appropriate transcripts and scores. Incoming students may be granted up to 20 credits on the basis of their International Baccalaureate (IB) coursework. Credits are awarded for Higher Level IB courses based on the student receiving a score at or above the

level approved by the department that evaluated the course (in no case less than a score of five). In order to grant credit, Rider's Office of Undergraduate Admission must be sent an official IB transcript. Specific course and credit information may be found at <https://www.rider.edu/admissions/first-year/requirements-deadlines/college-credit/ib-course-equivalency> (<https://www.rider.edu/admissions/first-year/requirements-deadlines/college-credit/ib-course-equivalency/>)

In the case of the College Level Examination Program (CLEP) (<https://clep.collegeboard.org/exam/>), students who have earned scores of at least 65 on tests prior to entering Westminster Choir College may apply these courses toward graduation. Students are limited to three credits per course unless additional credit is specifically authorized by the department. After enrolling at Westminster, students must obtain advance written approval from the department in order to earn credit through CLEP.

The following policies govern the awarding of academic credit for CLEP Examinations:

1. Credit will be provided for the successful completion of CLEP Subject Examinations, provided the student has not already received credit for corresponding courses.
2. A college course may not be taken for credit if the student has already received credit for the course through CLEP.
3. Continuing students must obtain approval from their academic dean prior to taking CLEP examinations.
4. Awarding of CLEP credits, like credit transferred from other colleges and universities, is subject to the approval of the student's academic dean.
5. Juniors or seniors generally may not obtain CLEP credits. Students having CLEP credits or contemplating CLEP exams should consult with their academic dean.

Faculty

Elly Sparks Brown • Adjunct Assistant Professor, Arts and Sciences, 2013. B.A., Seton Hill University; M.A., The Catholic University of America; M.Div., Virginia Theological Seminary; D.Min., Wesley Theological Seminary.

Elena Livingstone-Ross • Adjunct Assistant Professor, Arts and Sciences, 1995. Graduate, Polytechnic Institute of Leningrad; B.A., Grinnell College; M.A., Princeton University.

Ute Mehnert • Adjunct Assistant Professor, Arts and Sciences, 2011. M.A., Ph.D., University of Cologne.

Conducting

General Remarks

The reputation of Westminster Choir College rests in large part upon the excellence of the choirs and the success of its graduates. The nation's leading critics and orchestra conductors continue to find the choirs worthy of the highest praise. Choral music is therefore the focus of all curricula. Westminster alumni are employed by schools, universities, churches, professional choruses and orchestras and opera houses throughout the world. Opportunities for choral performance on a professional level are unparalleled, and students acquire a strong foundation in conducting technique and knowledge of choral literature.

Ensemble Grading Policy

A. Attendance

- Two absences are allowed per semester. No absences are allowed for dress rehearsals or performances.
- All events on the syllabus are required.
- Any absences over two will result in a lowered letter grade.
- Extenuating circumstances should be discussed with the director before they occur.
- Be on time. Two tardies will count as one absence.
- Missing a dress rehearsal or concert will result in a failing grade for the semester.

B. Participation/General Information

- Positive participation factors into your grade.
- Music and pencil are required at each rehearsal.
- Memorization, written translations and other analytical study may be required.

Required Ensembles

Required ensembles are the essence of Westminster Choir College. These experiences enrich the entire student body and create the opportunity to form a creative musical core.

Chapel Choir and Schola Cantorum are designed to meet the needs of freshmen and sophomores. Each ensemble provides a dynamic and focused experience to build a strong foundation of rehearsal skills, choral tone, language and musicianship. Both ensembles use a variety of repertoire to build a strong foundation for each student.

The Symphonic Choir is at the heart of the college choral community. The ensemble appears with symphony orchestras of the United States and Europe. Students above the lower division sing in the Symphonic Choir, preparing choral/orchestral repertoire for performance at major venues along with local and regional concerts.

Elective Ensembles

Elective ensembles are open to students by audition only. Auditions are held in the fall semester, and students perform in that ensemble for the academic year. The elective ensembles are Westminster Choir, Williamson Voices, Kantorei, Jubilee Singers and Concert Handbell Choir I.

Conducting Major: Graduate

The graduate choral conducting program, generally a two-year program, trains conductors to be marketable and effective musicians. Westminster offers a balance of academic and performance opportunities. Graduate conducting majors take a core of research, literature, conducting, pedagogy and ensemble. Applied study and ensemble conducting offer each candidate the opportunity to work with the conducting faculty. Candidates must successfully complete a comprehensive oral exam before a degree is conferred. Graduate Conducting majors are admitted by audition in order to assure quality conducting experiences and contact with the graduate faculty.

Conducting Concentration: Graduate

Graduate students majoring in Sacred Music and those Master of Music Education majors admitted with conducting as the performance field participate in Symphonic Choir for two semesters and in Master Singers for two to three semesters. A half recital in conducting is presented at the

culmination of study. For Sacred Music majors, the conducting recital is a requirement in addition to the solo recital.

Contact

Chair of Conducting, Organ, and Sacred Music

James Jordan • Professor, Conducting, 1991. B.M., Susquehanna University; M.M., Ph.D., Temple University; D.Mus., University of Aberdeen, Scotland.

Music Composition, History and Theory

General Remarks

The program in composition, music history and theory aims to develop the aural skills needed by all musicians, to provide the necessary theoretical knowledge for the continuing study and performance of music, to build an understanding of music's function in society, to develop analytical and aesthetic understanding of music forms and styles and to foster the creative impulse in music.

Undergraduate Music History Curriculum

Music history is concerned with why music matters to us both aesthetically and socially, what the past can teach us about ourselves, and how we arrive at our understandings of the past. It asks such questions as: why did this style or trend occur at this time? Why do we consider this composer to be more important than another composer? What social or political ideas are incorporated into this music? How can music communicate social or political ideas and change society for the better or the worse?

All undergraduates are required to take the two-semester Historiography sequence, Music Since 1900 and a music history elective at or above the 400 level. After completing the required courses, students will have:

- gained a working knowledge of the history of Western Art Music,
- some exposure to music of several other music cultures,
- acquired information literacy skills that will allow them to conduct further research in music history,
- improved their ability to read and critique academic writings and
- completed at least one major research project.

Undergraduate Music Theory Curriculum

Required musicianship courses, Contemporary Trends, and elective theory courses form the core of the undergraduate music theory curriculum. All baccalaureate candidates must elect a level I theory course; Bachelor of Music candidates also must elect a level II theory course. All theory electives are defined as level I or level II under course descriptions. Also see "Music Theory Electives" below.

Incoming undergraduates take placement tests and may be required to take Introduction to Musicianship before beginning the core sequence of studies in musicianship. Exemption from and credit for required college-level courses may be earned by passing examinations administered by the department. These examinations are intended for entering freshmen and transfer students only.

Incoming undergraduates who hold scores of 4 or 5 on the Advanced Placement Examination in Music Theory will receive credit by

examination for TH 141 Musicianship I. Students receiving credit for TH 141 are eligible to take a placement test to determine if credit by examination may be granted for additional theory courses.

Theory/Composition Major: Undergraduate

The curriculum for the undergraduate Theory/Composition major is designed to foster individual creative ability and to develop a broad and informed musicianship along with a knowledge of the literature of all periods. The department welcomes diversity of compositional styles and esthetic viewpoints and encourages exploration on the part of its students. The program culminates with a recital of original music written while a student is enrolled at Westminster.

Composition Major: Graduate

Composition majors are expected to write works for soloists, for chamber ensembles, and for large wind or orchestral ensembles. The department welcomes diversity of compositional styles and esthetic viewpoints and encourages exploration on the part of its students. The program culminates with a recital of original music written while a student is enrolled at Westminster.

Composition Primary: Graduate

Graduate students majoring in Sacred Music or Music Education may be admitted with a composition primary. Such a student must complete three semesters of Composition Primary and must present a composition recital as a conductor, accompanist, soloist, or ensemble performer. For Sacred Music majors, the composition recital is distinct from the required conducting recital.

Music History Elective

The Music History elective (MH 433, MH 733, MH 635, or MH 734) is an in-depth exploration of a single topic (e.g., a composer, a genre, a country). Topics will vary from year to year. Generally, offerings include at least one course in Western Art Music before 1800, one course in Western Art Music since 1800, one course in Asian, Latin American or African music, and one course in Popular Music (broadly defined) on a regular basis. The goal of the elective is not only to teach students about the specific topic of the course, but also to develop students' research skills so that they can teach themselves about any topic in music history in the future. The Music History elective includes a significant research paper (2000+ words at the 400 level; 3000+ words at the 600 or 700 level).

Music Theory Electives

Elective courses provide students with opportunities to apply their skills to specific areas of inquiry after satisfying specific prerequisites. The core requirements for Bachelor of Music students include two music theory electives. Bachelor of Music students may meet the theory requirement by taking one level I elective (preferably after completing TH 142 and before taking TH 241) and one level II elective, or else by taking two level II electives.

Level I theory electives include:

Code	Title	Credits
TH 237	Composition Class	3
TH 251	Analytical Studies I	3
TH 253	Orchestration	3
TH 255	Song Writing	3
TH 259	Electroacoustic Music	3

Level II theory electives include:

Code	Title	Credits
TH 424	Choral and Instrumental Arranging	3
TH 431	Form and Analysis	3
TH 432	Contrapuntal Techniques	3
TH 433	Special Topics in Theory	3
TH 452	Analytical Studies II	3
TH 550	Keyboard Harmony	3

Music Computing Center

Westminster maintains a music computing facility in which students can compose, orchestrate, and print their compositions in publishable quality using computers interfaced with sampler/synthesizers as well as sequencing and music printing software.

Stefan Young • Professor, Theory/Composition, 1979. B.M., Rollins College; M.M., The Juilliard School; Ph.D., Rutgers University.

Music Education

General Remarks

The undergraduate Music Education curriculum is planned to develop teachers who are reflective, who acknowledge the connections music has to the child's world and who seek to promote an understanding of those connections in a social context. Students come to know and understand:

- the central concepts, tools of inquiry and structures of music education as they relate to the New Jersey Core Curriculum Content Standards for the Visual and Performing Arts and how to design appropriate learning experiences that connect to the students' world and help students to broaden their perceptions of the world around them;
- how children learn and adapt to instruction that meets a diversity of learning styles and special learning needs in a variety of school contexts;
- the importance of teaching that is culturally responsive;
- instructional planning and curriculum design that promote critical thinking, action and feeling through teaching constructivist and other appropriate strategies;

- how to engage students in problem solving, problem posing and meaningful dialogue;
- the appropriate use of multiple assessments;
- sound principles of effective classroom management;
- effective verbal, nonverbal and written communication techniques and the tools of information literacy;
- the importance of being articulate advocates for music education in the schools;
- the importance of schooling within the context of the community and of learning to build partnerships with parents, families and agencies within the community to support students' learning and well-being;
- the importance of ongoing professional development.

The curriculum includes a state-approved music education program that leads to a letter of certification eligibility for teaching vocal and instrumental music at all levels in New Jersey. Transfer of certificates to other states is greatly facilitated by accreditation of the program by the National Council for the Accreditation of teacher Education (NCATE) and by membership of the State of New Jersey in the National Association of State Directors of Teacher Education and Certification program (NASDTEC) and the Interstate New Teacher Assessment and Support Consortium (INTASC).

Music Education Majors must maintain a minimum cumulative grade point average of 3.0. Students whose general progress is unsatisfactory or whose cumulative grade point average falls below a minimum 3.0 level may be dropped from the Music Education major. If a student is dropped from the major because of failure to maintain the minimum grade point average, s/he may apply for readmission to the Music Education department. Readmission will be dependent upon various criteria, including the G.P.A., current academic progress and the student's general standing. Decisions regarding retention or appeals will be made in a manner consistent with state and institutional non-discrimination policies.

Applications for certification are processed each year on November 15 and April 15, and at no other time.

Music Education Lab

Undergraduates must meet the weekly attendance and participation requirements for Music Education Lab during every semester of enrollment up to seven semesters as an undergraduate Music Education major except for the senior student teaching semester. Grading is "P" (satisfactory) or "U" (unsatisfactory). As part of the Music Education Lab experience, students are required to complete 15 hours of professional development. Students propose their own Professional Development Activity (PDA) to be approved by the lab instructor each semester.

Graduate students have no departmental requirements in Music Education Lab.

National Association for Music Education

Music Education majors are encouraged to join the Westminster student chapter of the National Association for Music Education (NAfME.org (<http://www.NAfME.org>)). Membership enables them to attend state, regional and national meetings, providing them with a connection to active members of the profession. Members also receive the Music Educators Journal, Tempo and Teaching Music, which are used as supplementary texts in several courses.

Music Education Portfolios

All Music Education majors must maintain portfolios of work providing evidence of their suitability for teaching. Portfolios of undergraduates are reviewed by the department with students when they have earned at least 60 credits as well as upon completion of ME 492. Students must pass the portfolio review to continue in the department. Portfolios of graduate students are reviewed each year.

Practicums and Field-based Observations

In addition to the standard student teaching semester in the senior year, a special feature of the Westminster program is the experience of observation and teaching in the context of the Art of Teaching Music courses ME 161, ME 262, ME 563 and ME 564. These combine instruction in music methods with practical experience in public school contexts. Several music education courses require students to make observations of music classes in urban, suburban, public and/or private schools.

Students must be prepared to arrange for transportation to and from practicums at a reasonable distance from the college and to sustain related expenses.

Students will be required to obtain a background clearance in an assigned school district in order to participate in a field experience. Students who have been convicted of a felony may not be approved for field experiences, and are not able to receive New Jersey State Teacher Licensure.

Priority Registration

Because of the demand for these courses, ME majors will receive priority registration for:

Code	Title	Credits
ME 111	Music Education Lab	0
ME 161	Art of Teaching Music I	3
ME 262	Art of Teaching Music II	4
ME 563	Art of Teaching Music III	4
ME 564	Art of Teaching Music IV	4

Students who register after pre-registration are not assured places in these classes. Students need the permission of the chair to register for student teaching. All pre-requisites for student teaching must be completed before permission is granted. Therefore, students are urged to complete pre-requisites (including PI 204) by the end of the spring semester of their junior year. It is recommended that students meet piano proficiency requirements by the end of their sophomore year.

Student Teaching

Student teaching is a full semester in duration and is usually completed during the seventh or eighth semester of study. Students may not enroll for any applied or classroom courses during the semester of student teaching, except for ME 587. In addition, students may not present or participate in recitals or choral performances or ensembles during the semester of student teaching. Further departmental policies regarding the student teaching semester are contained in the Music Education Department Handbook. Students are referred to the paragraph above which relates to registering for the student teaching semester.

Master of Music Education (M.M.E)

The Master of Music Education program is for music teachers who wish to complete graduate study in three to four summers or in two

academic years. Students may also combine summer and academic terms to accelerate completion. The degree is for those who hold an undergraduate degree in music education and a teaching certificate. Students do not earn teacher certification through this degree program.

Our 32-33 credit graduate curriculum is designed for music educators who wish to improve their practice, challenge their thinking and develop the skills to bring about positive change in their school. Students design their own 12-credit "focus area" of courses tailored to their particular interests and goals. Some areas of focus selected by recent MME students include choral pedagogy, choral conducting, voice pedagogy, Kodály (with certification) and music technology. The MME degree culminates in either a thesis or capstone project.

For more information on this program please visit Graduate Programs: Music Education (<http://www.rider.edu/wcc/academics/graduate-programs/music-education/>)

Music Education Courses Online

The following music education courses are offered in traditional (fall, spring and summer terms) and online formats throughout the year. The online versions may be offered in 13-week, 6-week or 3-week formats. Students in the MM, MME or BM-MME programs may take either the traditional or online format to complete their degree. Students in other degree programs may take these courses as free electives:

Code	Title	Credits
ME 685	Improving Musical Practice: Research in Music Education	3
ME 692	Social Justice in Music Education: History, Philosophy, and Practice	3
ME 693	Seminar in Music Educ	3
ME 721	Curriculum Development & Evaluation	3
ME 723	Social, Emotional, and Musical Learning	3

The following courses may be used as electives in graduate music education programs. They are taught quarterly online, in 8-week modules throughout the year:

- CP-600 Creative Practices in Music Teaching and Learning
- CP-620 Creative Practices in Vocal Science
- CP-640 Creative Practices in Choral Pedagogy
- CP-660 Creative Practices in Classroom

Faculty

- Frank Abrahams** • Professor, Music Education, 1992. B.M.E., Temple University; M.M., New England Conservatory; Ed.D., Temple University.
- Sangmi Kang** • Assistant Professor, Music Education, 2018. B.M., M.M., Seoul National University; Ph.D. University of Florida.
- Maureen Murphy-Fernandez** • Adjunct Instructor, Music Education, 2016. B.S., West Chester University.
- Marshall Onofrio** • Professor, Music Education, 2007. B.M., B.S., University of Connecticut; M.M., University of Illinois; M.M., University of Nebraska-Lincoln; D.M.A., The Ohio State University.
- Sarah Perry** • Assistant Professor, Music Education, 2021.
- Jason Vodicka** • Associate Professor, Music Education, 2018. B.M., M.M., Westminster Choir College; D.M.A., University of Georgia.
- G. Preston Wilson, Jr.** • Assistant Professor, Music Education, 2021. B.M., Fisk University; M.M., Bowling Green State University.

Organ or Harpischord

General Remarks

The purpose of organ study at Westminster is that of equipping students for church work, teaching and recitals. Thorough training and study of technique, service playing, organ literature and the instrument itself are integral to the total organ program. Details of jury, repertoire and recital requirements may be obtained from the Organ faculty.

There are currently 19 organs for student and faculty use on campus. These include an Aeolian-Skinner, 1935, completely refinished tonally in 1983 by Mark Brombaugh and Kenneth Wolfe; a Casavant, 1968; a Fisk, 1977; and others by von Beckerath, Casavant, Flentrop, Hildebrandt, Holtkamp, Möller, Noack, Ott, Phelps, and Schantz.

Organ Major: Undergraduate

Undergraduate Organ Performance majors are required to play six times each semester in performance class as outlined in the Organ Department Handbook. A half recital in the junior year and a full recital in the senior year, each partially memorized, are required. Juries are required at the end of each semester unless a recital is successfully completed during the semester.

Organ Primary: Undergraduate

Organ primary students majoring in Sacred Music, Music Education, or Theory/Composition are expected to play five times each semester in performance class as outlined in the Organ Department Handbook. Seniors must present a half or full recital, as determined by the instructor and with the approval of the department chair. Juries are required at the end of each semester unless a recital is successfully completed during the semester.

Organ Major: Graduate

Graduate Organ Performance majors are required to play six times each semester in performance class as outlined in the Organ Department Handbook. Semester juries are required unless a recital is successfully performed during the semester. The degree program is culminated by one fully memorized or two non-memorized recitals. The entrance audition may be waived for current Westminster seniors and, in some cases as determined by the department chair, for recent Westminster graduates. Students must take OR 433 and OR 434 (carrying no graduate credit) or pass an exemption examination.

Organ Primary: Graduate

Graduate students majoring in Sacred Music or Music Education may study organ as a primary instrument to satisfy degree requirements. Graduate organ primary students are required to play five times each semester in performance class as outlined in the Organ Department Handbook. Semester juries and a half recital are required.

The entrance audition may be waived as described for Organ Performance major applicants. Students must take OR 433 and OR 434 (carrying no graduate credit) or pass an exemption examination.

Organ as an Elective

Undergraduate and graduate students who qualify by audition may study organ as an elective if it is not otherwise a specific requirement. An extra tuition fee is assessed for such study. Elective lessons are provided on a space-available basis to qualified students.

Organ Performance Class

Attendance and participation at weekly studio and performance classes is required for all organ primary students. All Westminster Choir College students are invited to attend.

Harpsichord Study

Under the auspices of the Organ Department, private harpsichord instruction is available for elective credit at an extra tuition fee. The college owns two harpsichords: a one-manual Dupree and a two-manual Dowd.

Faculty

Kathleen Scheide • Adjunct Assistant Professor, Harpsichord, 2006. B.M., M.M., New England Conservatory, D.M.A., University of Southern California.

Piano

General Remarks

Piano at Westminster Choir College has multiple dimensions at both the undergraduate and graduate levels. It fosters the development of students who perform on a high level as soloists, as artist-teachers and as collaborators with other performing artists. A strong foundation of technique and knowledge of piano literature and style are essential to all of these aspects of pianism. The department also provides instruction for undergraduate students who need keyboard skills in order to function effectively throughout their professional careers.

Programs of Study

Piano Major: Undergraduate (p. 1157)
 Piano Primary: Undergraduate (p. 1157)
 Piano Major: Graduate (p. 1157)
 Piano Pedagogy and Performance Major: Graduate (p. 1157)
 Piano Accompanying and Coaching Major: Graduate (p. 1157)
 Piano Primary: Graduate (p. 1157)
 Piano Secondary: Undergraduate (p. 1157)
 Piano as an Elective (p. 1157)
 Piano Pedagogy Lab (p. 1157)
 Piano Performance Class (p. 1158)

Piano Major: Undergraduate

Undergraduate Piano majors are encouraged to play at least twice in performance classes each semester. Semester juries, a recital in either the sophomore or junior year and a senior recital are required.

Piano Primary: Undergraduate

Piano primary students majoring in Sacred Music, Bachelor of Arts in Music, Music Education or Theory/Composition are expected to play once each semester in performance class. Seniors give a full or half recital, as determined by the instructor and the department following the jury examination at the end of the junior year. Freshmen have required juries at the end of each semester; sophomores and juniors, at the end of each year.

Piano Major: Graduate

Students majoring in Piano receive private lessons and play in weekly studio and are expected to play at least twice in performance classes. The program culminates with a full recital. Semester juries are required.

Piano Pedagogy and Performance Major: Graduate

Students majoring in Piano Pedagogy and Performance receive private lessons, study major teaching methodologies, and undertake observation and practice teaching. The program includes a two-semester teaching internship and culminates in a full recital or in a combination lecture/performance recital. Students are encouraged to play at least twice in performance class each semester. Semester juries are required. A weekly Pedagogy Lab is required for two semesters, but recommended for all four semesters.

Piano Accompanying and Coaching Major: Graduate

Majors in Piano Accompanying and Coaching receive private lessons in vocal accompanying repertoire and are assigned to collaborative roles in working with undergraduate and graduate voice primary students. Two degree-specific recitals as an accompanist are required.

Piano Primary: Graduate

Graduate piano primary students majoring in Sacred Music or Music Education receive private lessons and are required to present a half recital. Students are expected to play at least twice in performance class each semester. Annual juries are required.

Piano Secondary: Undergraduate

All undergraduate voice primary students must enroll for piano secondary study until the capstone course (PI 204, PI 205, PI 207, or PI 208) is passed. Instruction is in the form of piano classes. Incoming undergraduates take a placement test and may be required to successfully complete PI 045 before beginning the sequence of Piano Secondary courses. The sequence consists of four courses: PI 103, PI 104, PI 203 and the capstone course, each of which must be passed with a grade of B- or higher.

For any student with a double major that includes the Bachelor of Music in Music Education or the Bachelor of Music in Music Education/Master of Arts in Teaching degree program, that student must successfully complete PI 204, the Piano Secondary capstone course. For any other student with a double major, not including the B.M. in Music Education or the B.M. in Music Education/M.A.T. degree program, the capstone course required for that student will be determined by the piano secondary faculty and coordinator of Piano Secondary in consultation with the Associate Dean.

Instruction entails study and performance of piano literature from the Baroque through the 21st Century as well as development of proficiency in areas of functional keyboard skills. If the capstone is passed in fewer than four semesters, further study is not required.

Piano as an Elective

Students may elect private instruction in piano for credit. There are no audition requirements, but an extra fee is charged. Elective lessons are provided on a space-available basis to qualified students.

Piano Pedagogy Lab

PI 611 is a required graduate Piano Pedagogy course for the purpose of solving problems related to piano teaching. The class format includes discussion of observations, supervised and independent teaching, questions relating to repertoire, materials, and technique, comparative

philosophies and psychologies and their applications, group and private teaching, business issues (e.g. studio policies), professional organizations and publications, use of technology, career planning, recital and audition planning. Preparation for graduate oral examination is included. The weekly lab is required for two semesters, but recommended for all four semesters.

Piano Performance Class

This is a weekly recital and lecture hour during which programs are given by students and guest performers. Attendance and participation at weekly studio and performance classes is required for all undergraduate and graduate piano major and primary students. All Westminster Choir College students are invited to attend.

Faculty

Ena Bronstern Barton • Adjunct Associate Professor, Piano, 1983. Artist Diploma, Escuela Moderna de Musica and Conservatorio Nacional de Musica, Santiago, Chile.

Ingrid Clarfield • Professor, Piano, 1982. B.M., Oberlin College; M.M., Eastman School of Music, University of Rochester

James Goldsworthy • Professor, Piano, 1996. B.M., M.M., Southern Methodist University; D.M.A., Stanford University.

Phyllis Lehrer • Professor Emerita, Piano, 1975. A.B., University of Rochester; M.S., Juilliard School.

Agnes Poltorak • Adjunct Assistant Professor, Piano, 2000. B.M., University of British Columbia, Canada; M.M., Westminster Choir College of Rider University.

Sacred Music

General Remarks

The Sacred Music Department offers education of the highest quality and broadest scope to Sacred Music majors who aspire to be leaders of the future.

The department is inter-denominational and seeks to explore the excellence of various traditions of sacred music. The faculty have wide experience and expertise in such traditions as Anglican, Lutheran, Methodist, Presbyterian, Reformed, Roman Catholic, the Synagogue and Temple tradition, and others.

The curricula at both undergraduate and graduate levels aim, on the one hand, to explore how familiar tradition can be blended with unfamiliar contemporary creativity in choral, congregational, and instrumental music for worship and, on the other hand, to provide a balanced study of theoretical matters and practical concerns. Technique, repertoire, and performance practice are therefore considered with theology, Biblical and post-Biblical religious history, and the development and practice of liturgy and worship.

Underlying all the offerings of the department is the understanding that sacred music is neither an optional extra nor merely a spiritual entertainment within the service of the church. It is rather an essential part of the liturgy and worship and therefore must have integrity and quality appropriate for its twin functions of carrying the Word of God to us, and our words of praise to God.

Undergirding the sacred music program are the offerings of the other Westminster academic and performance departments, the specialized collections containing sacred music materials in Talbot Library, and the vast network of affiliate churches in the greater New York-Philadelphia

metropolitan area in which Westminster students are enabled to gain personal experience of a wide range of sacred music practice.

Sacred Music Lab

All full-time undergraduate Sacred Music majors are expected to enroll in and meet the requirements for SM 511 for a total of eight semesters. All full-time graduate Sacred Music majors are expected to enroll in and meet the requirements for SM 511 for a total of two semesters. Grading is "P" (satisfactory) or "U" (unsatisfactory).

Handbell Program

The Westminster handbell program was instituted in 1979 to fill the need to train church musicians in the art of handbell ringing. It became the first curriculum of handbell ringing in an institution of higher learning. Concert Handbell Choir I, open to students by audition, goes on tour annually, has appeared on national television, and has five recordings to its credit.

Jubilee Singers

The Westminster Jubilee Singers is an auditioned ensemble dedicated to the performance of repertoire from the rich body of sacred music from the African-American tradition. Jubilee Singers performs regularly on- and off-campus.

Sacred Music Internship

All undergraduate Sacred Music majors are placed in local churches during the junior year as part of the requirement for church field education. The placement decision is made at the end of the sophomore year to permit planning over the summer before employment begins in the fall. Church field education gives the opportunity for students to exercise their skills in a church setting under faculty supervision and guidance.

Sacred Music Major: Undergraduate

The undergraduate sacred music program is designed for students who are preparing for professional careers in church music. The curriculum provides courses in theological, liturgical, sociological, and practical dimensions of music ministry and requires at least one year of supervised field education in an affiliate church.

Sacred Music Major: Graduate

The graduate sacred music program provides advanced training for church musicians from a wide variety of educational, professional, and denominational backgrounds. It is expected that applicants for this program will bring a thorough grounding of musical knowledge and significant experience in full- or part-time music ministry. The curriculum includes general as well as specialized courses in sacred music studies, theology, history, musicology, and applied skills.

Special Performance Option for Graduate Students

Graduate applicants who have outstanding promise in sacred music as conductors but who have limited backgrounds in voice, organ or piano may apply for special consideration as performers in an instrumental field not normally part of the graduate sacred music program. A candidate should have an undergraduate major or emphasis or the equivalent on the instrument. A recommendation from the undergraduate applied music instructor is required. The candidate will audition for a committee

composed of an associate dean, the faculty chair, and an appropriate member of the Westminster Conservatory faculty.

An admitted student will choose an instrumental teacher with whom to study, subject to the approval of the auditioning committee. The student is required to complete satisfactorily the equivalent of two semesters of study (at least 12 hours of lessons per semester) and to present a 30-minute recital under the instrumental teacher's supervision. All fees and expenses for this study are separate from those charged by the college and are the responsibility of the student. The requirement of three semesters of voice, organ or piano study, with satisfactory completion of an appropriate jury, remains for a student admitted under this option, but audition and recital requirements in these areas are waived.

Princeton Theological Seminary

A reciprocal arrangement with Princeton Theological Seminary allows Westminster graduate students to take certain courses offered by the Seminary. Enrollment in such courses is arranged after consultation with Sacred Music faculty. Speer Library at the Seminary, housing one of the nation's most important theological collections, is another invaluable resource for Westminster students.

Faculty

Vinroy Brown • Adjunct Instructor, Sacred Music, 2017. B.M., Westminster Choir College; M.A., Regent University.

Steve Pilkington • Associate Professor, Sacred Music, and Director of Chapel, 1992. B.A., St. Olaf College; M.M., University of Illinois; Ph.D., Drew University.

Kathleen Ebling Shaw • Adjunct Instructor, Sacred Music, 1991. B.M., Westminster Choir College.

Tom T. Shelton, Jr. • Associate Professor, Sacred Music, 2012. B.M., M.M., University of North Carolina at Greensboro.

Voice

General Remarks

Since its founding, Westminster Choir College has made a unique contribution to the world of music because of its emphasis upon vocal training. All undergraduates are required to study voice in order to become well grounded in the fundamentals of singing. Many graduate students also study voice as a major, primary, or elective.

The Voice Department seeks to develop the musician by establishing a sound vocal technique and a thorough understanding of the singing voice, its literature, and pedagogy. These tools are essential for the study and performance of vocal and choral literature and for training students as solo performers, professional teachers, or choral conductors. Every undergraduate must satisfy departmental requirements for graduation. Juries and other tests are conducted periodically for the purpose of evaluating progress; details may be obtained from the Voice Department.

Voice Primary: Undergraduate

Voice primary students majoring in Sacred Music, Music Education, Theory/Composition, Music Theater, or the Bachelor of Arts in Music receive instruction which includes private lessons, diction, vocal pedagogy, voice literature and recitals. Weekly studio and performance classes offer regular performing opportunities.

Voice Major: Undergraduate

Instruction for Voice Performance majors entails private lessons, coaching, recitals, diction, voice literature, opera, and vocal pedagogy. Weekly studio and performance classes offer regular performing opportunities.

Voice Performance Repertoire List

(This requirement is effective as of the Fall 2010 semester for all students who entered or were readmitted into the Bachelor of Music, Voice Performance major for Fall 2008 or later.)

Students will document and present a Voice Performance Repertoire List demonstrating that they have satisfied the repertoire requirements stated in the Voice Handbook. The completed Voice Performance Repertoire List, signed by the voice teacher, must be submitted to the Academic Coordinator, along with documentation of the senior recital. Failure to complete the requirements of the Voice Performance Repertoire List will result in failure to graduate.

Secondary Voice: Undergraduate

Organ and piano primary students are required to study voice as a secondary applied field until they pass the Voice Proficiency Test. The test may be passed at the end of any semester, but those who do not pass it after four semesters of instruction are required to continue study until the test is passed. If the test is passed in fewer than four semesters, further voice secondary study is not required. Instruction includes class and private lessons as well as optional diction and vocal pedagogy courses. Qualified students may sing in performance classes at the discretion of their teachers or may request departmental approval to present voice recitals.

Voice Pedagogy and Performance Major: Graduate

This program has two emphases or tracks. The pedagogy emphasis entails private lessons, voice literature, opera, vocal pedagogy, supervised student teaching and a full recital. The performance emphasis entails private lessons, voice literature, opera, vocal coaching, vocal pedagogy, and a full recital supported by carefully researched program notes. For students whose undergraduate work has not included a public recital, presentation of a 30-minute recital is required before work on the graduate recital may begin. Weekly coaching classes as well as studio and performance classes offer frequent performance opportunities.

Voice Primary: Graduate

Graduate students majoring in Sacred Music or Music Education may study voice as a primary instrument. The program culminates in a graduate recital of 30 to 50 minutes of singing. Weekly studio and performance classes offer frequent performance opportunities.

Voice as an Elective

Undergraduate and graduate students may elect to study voice for credit toward their degrees if it is not otherwise a specific requirement. Instruction is in the form of private lessons and an extra tuition fee is assessed. There are no specific entrance or jury requirements. Elective lessons are provided on a space-available basis to qualified Princeton and Lawrenceville students.

Voice Performance Class

Attendance and participation at weekly studio and performance classes is required for all voice primary students. All Westminster students are invited to attend. The class functions primarily to provide performance opportunities, to acquaint students with a wide variety of vocal literature, and to equip them to teach voice to others.

Master of Voice Pedagogy (M.V.P.)

The Master of Voice Pedagogy program is designed for summer study. It includes courses in vocal pedagogy and literature, music core courses, and choral ensemble participation. The program culminates in a vocal pedagogy project completed under the guidance of a Westminster voice faculty member.

Presser Voice Laboratory

The Presser Voice Laboratory at Westminster is a state-of-the-art lab for voice analysis and research. It is used as a tool for students and their teachers to work interactively with visual and acoustical feedback, and for them to engage in individual research interests. Open Lab Days encourage everyone at Westminster to explore the lab's technology, and classes routinely work on lab assignments there to gain knowledge and experience in voice science.

Laboratory equipment includes KayPENTAX's Computerized Speech Laboratory (CSL), the Phonatory Aerodynamic System (PAS) for airflow analysis, VoceVista software and electroglottograph, and professional-quality microphones, recorders, and sound level meters. Various models and teaching aids are also housed in the lab, and the Talbot Library collaborates with the Presser Lab to provide access to books, journals, recordings, and Visible body software.

Faculty

Margaret Cusack (chair) • Professor, Voice, and Chair of Voice and Piano Faculties, 1994. B.M., M.M.T., Oberlin College.

Christopher Arneson • Professor, Voice, 2003. B.A., M.M., Binghamton University; D.M.A., Rutgers University.

Susan S. Ashbaker • Associate Professor, Voice, 2006. B.M., M.M., Southern Illinois University; M.M., University of Illinois.

Lauren Athey-Janka • Adjunct Assistant Professor, Voice, 2016. B.M., Boston University, M.M., Westminster Choir College of Rider University.

Victoria Browsers • Adjunct Assistant Professor, Voice, 2017. B.M., Ohio Wesleyan University, M.M. Westminster Choir College of Rider University; D.M.A. State University of New York at Stony Brook.

Elem Eley • Professor, Voice, 1987. B.M., Baylor University; M.M., Southwestern Baptist Theological Seminary.

Rochelle Ellis • Adjunct Assistant Professor, Voice, 1995. B.M.E., University of Missouri, Kansas City; M.M.E., Westminster Choir College of Rider University.

Faith Esham • Adjunct Assistant Professor, Voice, 2000. B.A., Columbia Union College; B.M., M.M., The Juilliard School.

Thomas Faracco • Associate Professor Emeritus, Voice. 1983. B.M., M.M., Westminster Choir College of Rider University.

Nancy Froysland Hoerl • Adjunct Assistant Professor, Voice, 1995. B.A., Moorhead State University; M.M., Westminster Choir College of Rider University.

Katherine Johnson • Adjunct Assistant Professor, Voice, 2006. B.M., University of Calgary; M.M., Manhattan School of Music.

Rachelle Jonck • Adjunct Associate Professor, Voice, 2007. B.M., University of Stellenbosch (South Africa)

Robin Massie • Adjunct Assistant Professor, Voice, 2008. B.M., Westminster Choir College; M.M., Yale University.

Sean McCarther • Associate Professor, Voice, 2012. B.M., Baylor University; M.M., D.M., Indiana University.

Mark Moliterno • Adjunct Associate Professor, Voice, 2005. B.M., M.M., Oberlin College Conservatory of Music.

Carolann Page • Adjunct Assistant Professor, Voice, 2008. B.M., Curtis Institute of Music.

Kathy Kessler Price • Associate Professor, Voice, 2012. B.A., University of Richmond; M.M., University of Maryland; Ph.D., University of Kansas, Lawrence.

Debra Scurto-Davis • Adjunct Assistant Professor, Voice, 2004. B.M.E., Evangel College; M.M., Baylor University; S.M., University of Michigan.

Elizabeth Sutton • Adjunct Assistant Professor, Voice, 2005. B.A., Bowling Green State University; M.M., College-Conservatory of Music, University of Cincinnati.

Charles J. Walker • Adjunct Instructor, Voice, 1995. B.M., University of Delaware.

Sally Wolf • Adjunct Assistant Professor, Voice, 2001. B.M., Kent State University; Artist Diploma, Curtis Institute of Music.

Amy Zorn • Adjunct Assistant Professor, Voice, 1996. B.M., University of Wisconsin, Madison; M.M., Boston University.

Westminster Choir College

A division of Rider University's Westminster College of the Arts, Westminster Choir College is a four-year music college and graduate school that prepares aspiring musicians for successful careers in schools, universities, and churches; on concert stages and in professional and community organizations. It offers degree programs leading to a Bachelor of Arts in Music, Bachelor of Music, Master of Music, Master of Music Education and Master of Voice Pedagogy. Several graduate programs are offered online, making a Westminster education accessible world-wide.

The choral experience represents Westminster's most distinctive feature. Daily rehearsals, supported by intensive musical skills development and by the study of voice and conducting, constitute the foundation of the choral program. The large ensembles are at the center of all curricula: Westminster Chapel Choir, composed of all first-year students, and Westminster Symphonic Choir, composed of sophomores, juniors, and seniors as well as graduate students. Smaller ensemble experience is afforded by Westminster Choir, Westminster Jubilee Singers, Westminster Kantorei, Westminster Williamson Voices, Master Singers, Westminster Concert Bell Choir, and Westminster Opera Theater.

Celebrating 95 years of music excellence, Westminster Choir College of Rider University has significantly influenced the cultural life of our nation.

HISTORY

In the belief that a choir of volunteer singers could be trained to perform on a professional level, John Finley Williamson established the Westminster Choir in 1920 at the Westminster Presbyterian Church in Dayton, Ohio. The national prominence achieved by this choir and Dr. Williamson's conviction that churches could best be served by dedicated, professionally trained musicians led him to found Westminster Choir School at the Dayton church in 1926.

In 1929 the college moved to Ithaca, N.Y., and became associated with what is now Ithaca College, where a four-year program leading to the Bachelor of Music degree was instituted. Relocated to Princeton, N.J. in

1932, a master's program was added in 1934 and it became known as Westminster Choir College in 1939.

The move to Princeton was motivated by a desire to provide ready access to the great metropolitan centers and orchestras of the eastern seaboard. Since then the Westminster Symphonic Choir has performed hundreds of times and made many recordings with the principal orchestras of New York, Philadelphia, Washington, Pittsburgh, Boston and Atlanta. Conductors of the choir have included Bernstein, Ormandy, Steinberg, Stokowski, Toscanini and Walter, and such contemporary figures as Abbado, Boulez, Chailly, Leinsdorf, Levine, Masur, Mehta, Muti, Nézet-Séguin, Ozawa, Robertson, Sawallisch and Shaw. The choir has also received numerous invitations over the years to sing with such touring orchestras as the Berlin Philharmonic, the Los Angeles Philharmonic, the Royal Concertgebouw and the Vienna Philharmonic.

In 1992, Westminster Choir College merged with Rider University, and in 2007 it became a division of Rider University's Westminster College of the Arts. In 2020, Westminster Choir College moved to Rider University's main campus in Lawrenceville, N.J.

Mission Statements

Westminster College of the Arts

Westminster College of the Arts educates and trains aspiring performers, artists, teachers and students with artistic interests, to pursue professional, scholarly and lifelong personal opportunities in art, dance, music and theater. The College consists of three divisions: Westminster Choir College, the School of Fine and Performing Arts and Westminster Conservatory, a community music school. Through innovative and integrated programs and a commitment to discipline and excellence, the College serves as a cultural force within the university and community.

Westminster Choir College

Westminster Choir College is a professional college of music with a unique choral emphasis that prepares undergraduate and graduate students for careers in performance, teaching, sacred music and composition. In an atmosphere that encourages personal and musical growth and nurtures leadership qualities, Westminster Choir College complements professional training in music with studies in the liberal arts. Founded for Christian service, Westminster Choir College was a pioneer in establishing the highest standards in choral performance and church music. Today, the curriculum teaches pluralism and holds service through music to be ennobling, liberating and integral to a rewarding and productive life.

The School of Fine and Performing Arts

The School of Fine and Performing Arts focuses on art, dance, music, music theater, theater and arts administration. Through programs that provide a historical, aesthetic, practical and professional perspective, students develop the skills to excel in a professional career while growing intellectually from a broadly based liberal arts curriculum. The School fosters meaningful engagement in the arts to students who wish to become professional artists as well as students who view the arts as an integral part of overall intellectual growth. The School nurtures and challenges the artist within all students and prepares them to contribute to an ever-changing global society.

Westminster Conservatory of Music

For more than 40 years Westminster Conservatory of Music has served the Central New Jersey/Eastern Pennsylvania area with on-campus and community-based music instruction. The community music school of

Westminster College of the Arts, it offers a superior faculty and tailors lessons, workshops and classes to the needs of the individual student.

Music study at the Conservatory provides a unique opportunity for musical growth and is available to students of all ages and stages of advancement. It also offers many opportunities to perform through its community choral, orchestral and theater ensembles. In addition to its program on the Westminster Choir College campus in Princeton, the Conservatory offers classes at extensions in Lawrenceville and South Brunswick, N.J. and in Newtown and Yardley, PA.

Accreditation

Westminster has been fully accredited by the National Association of Schools of Music (NASM) since 1941. It has held accreditation by the Middle States Association of Colleges and Schools since 1966 and remains accredited as a college within Rider University. The undergraduate program in music education was approved by the State of New Jersey in 1961 and leads to certification to teach public school music, K-12. This program was also approved in 1974 by the National Association of State Directors of Teacher Education and Certification (NASDTEC), facilitating transfer of teaching certificates to any of the participating states, and in 1995 by the National Council for the Accreditation of Teacher Education (NCATE), which now is known as the Council for Accreditation of Educator Preparation (CAEP).

Continuing Education

Westminster offers summer workshops and festivals covering a wide range of subjects and techniques within the field of music. Workshops are open to all Westminster students, to professional musicians and teachers and to the general public. Graduate credits may be earned through participation in workshops. The Office of Continuing Education also presents residential high school and middle school summer programs in the form of a two-week Vocal Institute and a series of one-week programs in voice, organ, piano, composition and music theater.

Westminster Conservatory

The Westminster Conservatory is the community music school division of the College of the Arts. It serves Central New Jersey and Eastern Pennsylvania with high-quality music instruction in piano, voice, brass, woodwinds, strings, theory, composition, and percussion. Westminster Choir College students receive a discount on lessons through the Conservatory. Non-credit instruction is open to all ages and levels of ability from 12 months of age through senior citizens, for the serious musician and for the amateur. Students at the college have the opportunity to observe lessons, to study privately those instruments not taught within the college curriculum, and in some cases, to teach on the junior faculty of the Conservatory.

Westminster Choir College Library

Westminster's Talbott Library is located in Rider University's Moore Library. Its collections comprise more than 67,000 music-related books, music scores and periodicals, approximately 5,400 choral music titles in performance quantities, a choral music reference collection of more than 80,000 titles, 200 current periodical titles in print, as well as access to more than 12,000 titles electronically. The library's 25,000 sound and video recordings are supplemented by more than 338,000 audio tracks available electronically from the Classical Music Library and the Naxos Music Library.

Special collections include the Erik Routley Collection of hymns and hymnological literature; the D. deWitt Wasson Research Collection

of Organ Music; and the Archives of the Organ Historical Society, a comprehensive collection of organ research materials.

Talbot Library's score and sound recording collections cover all musical styles, genres and periods at a basic level, but are concentrated more heavily in the areas of choral, vocal, keyboard and sacred music. Of note are collected works of many individual composers, masterworks of music, an extensive piano pedagogy collection, instructional material for music education in primary and intermediate schools, and holdings both broad and deep in choral music, keyboard music and hymnals. The library collects multiple print editions of many music titles for comparison of editing practices and multiple recordings of many titles for comparison of performance practices.

Westminster Choir College Administration and Staff

Marshall Onofrio • Dean, Westminster College of the Arts
 Kimberly Apadula • Assistant Director of Admission
 Christopher Botti • Associate Dean of Students
 Carol Conklin • Manager, ITT and Finance, Westminster Conservatory
 Stephanie Gerstenhaber • Assistant Director of Admissions
 Scott Hoerl • Director of Westminster Conservatory and Continuing Education
 Marianne Lauffer • Assistant Director, Westminster Conservatory Faculty and Extensions
 Natalie Pollard • Director of Alumni Relations
 Jose Rincon • Director of Performance Management
 Kristen Rodgers • Assistant Director of Performance Management
 Carolyn Sauer - Production Coordinator
 Anne M. Sears • Director of External Affairs
 Judy Simmons • Assistant to the Dean

National Association of Schools of Music Code of Ethics

As a fully-accredited member of the National Association of Schools of Music, Westminster Choir College abides by the NASM Code of Ethics, which establishes deadlines for the consideration and acceptance of talent-based scholarship awards from member institutions. Having accepted a financial aid offer from Westminster Choir College, undergraduate students must receive written permission from Westminster to consider an offer of financial aid from another institution after May 1. Having accepted a financial aid offer from Westminster Choir College, graduate students must receive written permission from Westminster to consider an offer of financial aid from another institution after April 15. Students accepted into Westminster Choir College after those dates must inform Westminster of any offer(s) they have accepted.

Study Abroad

Study in a foreign country provides a unique opportunity for students to grow intellectually through exposure to the customs, habits, and languages of different cultures. Study abroad helps prepare students for the global community in which they will live and work, increasing their employment and earnings potential. Study abroad experiences are available in many locations through Rider exchange and affiliate programs. Westminster semester-long programs offer courses in a variety of subjects, including voice and theory. An exchange program with the University for Music and Dramatic Arts in Graz, Austria, allows Westminster Choir College students to do voice, composition, and keyboard courses abroad. Besides our semester programs, students can select summer programs through study abroad providers and faculty-led

short-term international travel projects that are offered for credit during January intercession, spring break, and in the summer.

Additional information is available on the Rider University Study Abroad Web site (<http://www.rider.edu/academics/academic-programs/study-abroad/>). Information is also available in the Center for International Education, located in the office of the Associate Dean of Students in the Scheide Student Center.

General Requirements

General Requirements for the Bachelor of Music (B.M.) and the Bachelor of Arts in Music (B.A.M.)

- All entering undergraduate students take placement tests in order to determine the level of their skills in a variety of areas. Specifically, students must meet all musicianship, ELI/TOEFL, reading, writing, and mathematics proficiency requirements as determined by the college. Those whose scores on placement tests indicate that they are not prepared to undertake college-level work are required to complete remedial courses in order to bring their skills up to the minimum standards expected. Please see "Placement" in the Admissions and Arts and Sciences sections of this catalog. International students also should review the English language requirements listed under "Admission as an International Student" in the Admissions section of this catalog.
- Students must earn a minimum of 124 undergraduate credits. Of these, a minimum of 62 must be earned within Rider University, exclusive of credits transferred or earned by examination.
- Students must complete all degree requirements within ten years of initial enrollment. Students who have not satisfied requirements by this time may be required to repeat courses and/or to meet further requirements. If more than one year has elapsed since the date of last enrollment, students may be required to re-apply and re-audition for the program and must meet all requirements in place at the time of their readmission.
- Students must earn a minimum cumulative grade point average of 2.00, except for Music Education majors who must, by state requirement, earn a minimum cumulative average of 3.00. Students dropped from a major because of failure to maintain the minimum grade point average may apply for readmission to the respective department. Readmission will be dependent upon various criteria, including the G.P.A., current academic progress, and the student's general standing.
- Performance majors must earn a minimum grade of "B-" each semester in the primary applied music field in order to make satisfactory progress. If a grade of "C+" or lower is earned, the student must repeat the semester. All other students must earn a minimum grade of "C-" each semester in the primary applied music field. If a grade of "D" or lower is earned, a student must repeat the semester.
- Students must meet attendance and performance requirements in studio performance classes and labs, as set by each applied department and/or major field department.
- Keyboard students must pass a general progress jury at the end of one year of secondary voice study and a proficiency test to complete secondary voice study.
- All students must present a senior primary applied recital after qualifying according to departmental standards. Some major fields

also require a junior recital. Students must enroll for primary applied study during the term when any recital is to be presented unless specifically excused from this requirement by the primary applied department.

- Students must participate in and earn credit for one of the required choirs (Chapel Choir, Symphonic Choir) during every semester of enrollment, up to a maximum of eight semesters, except for Music Education majors, who must enroll up to a maximum of seven semesters.
- Commencement: Academic year requirements extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness. All other students are encouraged to participate in Commencement. In particular, credit for spring semester choir participation is lost if a student does not attend and is not excused from Commencement. Students participating with the members of the graduating classes are required to purchase or rent appropriate academic regalia, available through the college store.
- In addition to the information given here and on the following pages, students are referred to individual department handbooks for additional information and requirements.

The Academic Programs A to Z Chart (p. 20) lists Rider University's majors, minors and certificates alphabetically, along with the college or school (p. 22) that grants each degree, major, minor and certificate. The following definitions explain the difference between majors, minors, tracks, concentrations, and emphases:

Major An organized group of courses ranging from introductory through advanced levels. Typically most if not all courses are in a single primary area of study, although some majors include study in multiple disciplines. Undergraduate majors require between 18 and 90 credits, depending upon the liberal arts or professional focus. Graduate majors require between 30 and 45 credits. Entrance into some majors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the major is listed on the official transcript.

Minor An organized group of courses, typically involving introductory through intermediate levels. While most minors are in a single discipline, Rider University offers several interdisciplinary minors, such as Law and Justice, and Sustainability Studies. Minors are offered at only the undergraduate level, and require between 15-24 credits. Some departments have restrictions on the connection between major and minor options. Entrance into some minors may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the minor is listed on the official transcript.

Track A choice of specialty within a degree, tracks comprise an organized group of courses serving a particular focus within a major. In undergraduate and graduate majors that represent multiple disciplines, tracks indicate a particular disciplinary focus. In a single discipline major with tracks, each track represents a singular focus, often representing a liberal arts or professional path. In some cases, a track represents a sub-specialization within the major field. Entrance into some tracks, particularly those that represent a particular disciplinary focus, may require prerequisites, portfolios, auditions, or other forms of assessment. Tracks require between 21 and 52 credits. Upon completion of all requirements, the track is listed on the official transcript along with the major field of study.

Concentration Concentrations, such as English Literature or English Writing, represent a specialty or focus within an undergraduate or graduate major field of study. Typically, a concentration unites courses around content or a particular theme. Concentration requirements are a portion of a major, not the entire major itself. In some cases, concentrations refer to an interdisciplinary combination. Entrance into some concentrations may require prerequisites, portfolios, auditions, or other forms of assessment. Undergraduate concentrations require between 12 and 36 credits; graduate concentrations range from 9 to 18 credits. Upon completion of all requirements, the concentration is listed on the official transcript along with the major field of study.

Emphasis Typically an organized group of courses in a single discipline, the emphasis represents a subset of credits within an undergraduate or graduate major. The emphasis provides a coherent focus of study within a discipline, which may or not be in the major field. Typically an emphasis represents less than a third of the total major credits, mostly ranging from 15 to 19 credits. Entrance into some areas of emphasis may require prerequisites, portfolios, auditions, or other forms of assessment. Upon completion of all requirements, the emphasis is listed on the official transcript along with the major field of study.

Bachelor of Arts in Music (B.A.M.)

Program Overview

Bachelor of Arts in Music

The Bachelor of Arts in Music is a liberal arts degree with a major in music. A broad foundation in liberal studies complements extensive studies in music. The curriculum is designed for students whose academic/and or career interests extend beyond music.

All students in the B.A.M. degree must select a minor or concentration. Typically this selection is made no later than the end of the sophomore year. Students are encouraged to make this decision earlier, if possible, as the date of the decision may affect progress towards a timely graduation. The declaration is made through the Registrar's office.

Students may choose from any minor approved by Rider University. Minors are offered in most disciplines of the university and require 18-21 credits. Courses taken to fulfill Arts and Sciences core requirements may be used to complete minor requirements. Information about minors may be found on the university website (www.rider.edu/academics/majors-minors-programs/) (<http://www.rider.edu/academics/majors-minors-programs/>).

Notes

- ¹ With the permission of the Conducting Department, the 8th semester may be waived in the event of an approved internship or off-site semester of study. Internship credits replace Arts and Sciences elective credits.
- ² The 8th semester may be waived in the event of an approved internship or off-site semester of study. Internship credits replace Arts and Sciences elective credits. A recital or lecture-recital is required.
- ³ VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives.
- ⁴ Honors Students will substitute BHP 150 for CMP 125.
- ⁵ Completion of French, German, Spanish, Italian, or Latin II is required. If students are exempted from one or more semesters of foreign language study, they must replace the missing credits with other Arts & Sciences electives.
- ⁶ Music History or Art History courses do not fulfill history elective requirements.
- ⁷ Social/behavioral/natural science electives exclude history courses.
- ⁸ Chosen from COM 107, ENG 321, ENG 322, ENG 323, or LL 285.
- ⁹ If you choose to complete a minor, the hours required to complete the minor are taken from these 24 credits.
- ¹⁰ If students select MH 345 as part of their core requirement, they must take TH 342 in place of MH 345 as part of their concentration.

- ¹¹ If students select TH 342 as part of their core requirement, they must take MH 345 in place of TH 342 as part of their concentration.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions**AR 111 Survey of Art History I 3 Credits**

A survey of Western art - architecture, sculpture, painting - from prehistoric times, is presented against the background of chronological and intellectual history.

AR 112 Survey of Art History II 3 Credits

Crucial artistic tendencies in Western art of the 19th and 20th centuries are introduced and discussed against their historical and intellectual setting. A brief background of art history from previous centuries is presented in order to appreciate these developments.

AR 216 Acting I 3 Credits

This course provides an introduction to basic techniques of realistic acting using exercises, improvisation and scene study. The emphasis is on honesty and commitment to action in order to be able to create real life in an imaginary world.

AR 217 Improvisation & Movement 3 Credits

Using theater games, students explore themselves as individuals and members of a group. The course uses scenes, skits, dances and games to help students overcome their fears and insecurities, enabling them to develop their creativity, spontaneity, honesty, concentration, and commitment to action. The class also explores body movement as a means of heightening dramatic expression.

AS 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

AS 491 Arts & Science Internship 1-12 Credits

This course requires 95 hours for each three credits for which the student enrolls. The student is required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 12 credits of internships.

Prerequisite(s): at least junior level standing.

LL 037 College Reading and Writing 3 Credits

Required for students placed into this course as a result of the basic skills English testing program. This intensive course reviews effective reading, writing, and study processes and leads students to the level of mastery required to begin CMP 125 Seminar in Writing and Research.

LL 141 French I 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 142 French II 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 141.

LL 145 Italian I 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 146 Italian II 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 145.

LL 151 German I 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

LL 152 German II 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 151.

LL 243 French III 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 142.

LL 244 French IV 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 243.

LL 247 Italian III 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 146.

LL 248 Italian IV 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 247.

LL 253 German III 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 152.

LL 254 German IV 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 253.

LL 280 Sacred Texts and Literature 3 Credits

Explore the cultural, theological, and artistic contexts of key themes (e.g. creation, journey, forgiveness, love) in the sacred texts of the major historical world religions as they are portrayed in contemporary poetry and drama, and in novels that have been adapted to film

Prerequisite(s): CMP 125 or CMP 120 or BHP 150.

LL 282 Major Poets 3 Credits

This course introduces students to poetry via the reading and analysis of different poetic forms. While reading, listening to, performing and discussing poems from a wide cultural spectrum, students learn to evaluate and appreciate poetry by understanding such elements as metaphor and persona.

Prerequisite(s): CMP 125 or BHP 150.

LL 285 Writing About Music: A Seminar for Performers, Teachers, and Academics 3 Credits

A writing intensive course focusing on the essential writing tasks encountered by musicians in their roles as performers, teachers, and scholars.

Prerequisite(s): BHP 150 or CMP 125.

LL 327 Dante's Commedia 3 Credits

An introduction to Dante Alighieri's *Commedia* ("Inferno", "Purgatorio" and "Paradiso") exploring key ethical and aesthetic elements of the poem through close reading and critical analysis of the primary text.

Prerequisite(s): BHP 150 or CMP 125.

LL 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

RP 265 Lit of New Testament 3 Credits

An introduction to the thought of the early Christian church as expressed in the New Testament, this course will emphasize a literary and historical reading of the Gospels and Epistles. It will introduce students to the Jewish and Greco-Roman religious, political and cultural worlds in which Jesus and his disciples lived and within which earliest Christianity arose.

RP 268 Hebrew Bible & Old Testament 3 Credits

This course introduces students to the writings of the Hebrew Bible/Old Testament within their historical and literary contexts. By critically reading these books, students will become aware of the history, culture and religion of ancient Israel - all of which contributed to the traditions of Judaism and Christianity.

SP 171 Western Civ I 3 Credits

This survey history course presents a cohesive picture of the development of Western societies from prehistoric times to the early Renaissance. Social, political and economic aspects are covered; intellectual and cultural developments are emphasized. Familiarity with primary sources and critical reading are integral to the course.

SP 172 Western Civ II 3 Credits

Continuation of SP171. This survey history course covers developments in Western societies from the Renaissance to the present. Major intellectual and cultural trends and movements are presented, along with historical progress and socio-economic expansion.

SP 273 Developmental Psychology 3 Credits

The physical and psychological growth of the individual from infancy through adolescence is studied, with emphasis on cognitive, emotional, and social processes.

Prerequisite(s): SP 175.

SP 274 Educational Psychology 3 Credits

The psychological foundations of education, based on the findings of experimental research in learning, transfer, motivation, reinforcement, and behavioral modification.

Prerequisite(s): PSY 100.

SP 286 Life in Middle Ages 3 Credits

A seminar in which the life styles of medieval Europeans are studied. Students will develop an understanding of particular social organizations and problems of the period by examining the conditions and events of everyday medieval life. Offered in rotation with other History courses.

SP 408 Voice Science 3 Credits

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

Corequisite(s): CR 509.

Bachelor of Music: Music Education

Program Overview

The undergraduate Music Education degree normally takes four years to complete and includes courses in music education, musicianship studies, general education, and field experiences. Each year students engage in increasingly intensive field experiences, culminating with a semester of full-time student teaching in the last year.

All music education majors must maintain a portfolio of work providing evidence of their suitability for teaching. Portfolios are reviewed as part of the Sophomore Review taken near the completion of 60 credits. Music Education majors must maintain a minimum cumulative grade point average of 3.0. Students whose general progress is unsatisfactory or whose cumulative grade point average falls below a minimum 3.0 level may be dropped from the Music Education major. If a student is dropped from the major because of failure to maintain the minimum grade point average, s/he may apply for readmission to the Music Education department. Readmission will be dependent upon various criteria, including the G.P.A., current academic progress and the student's

general standing. Decisions regarding retention or appeals will be made in a manner consistent with state and institutional non-discrimination policies.

To graduate, students must complete all requirements for New Jersey teacher certification for Certified Educator with Advanced Standing (CEAS). **Students who want to be able to apply for teaching positions in other states should become familiar with teacher certification requirements for states of interest ASAP to determine if additional coursework is needed.** In addition to successfully completing required coursework, the State of New Jersey requires students to:

1. Satisfy basic skills (reading, writing, math) proficiency as a prerequisite for taking the Sophomore Review. Proficiency is satisfied for students who score at or above the identified cut scores on the SAT or ACT. Students who do not have sufficient SAT or ACT test scores must pass the Praxis Core Academic Skills (<https://www.ets.org/praxis/nj/requirements/>) tests to satisfy basic skills proficiency.
2. Complete a minimum of 50 hours of clinical experience during the first four semesters and 175 hours of clinical practice before full-time clinical practice (student teaching).
3. Pass the Praxis Music Content Exam.
4. Pass the performance-based edTPA Exam.

For more information about non-course program requirements, see links on Undergraduate Music Education Homepage. (<http://www.rider.edu/wcc/academics/undergraduate-programs/music-education/>)

Curriculum Overview

The Music Education curriculum includes courses in elementary and secondary general music education, choral music education, instrumental studies, music technology and creativity, and students with special needs. An innovative four-course sequence integrates theoretical foundations of planning, teaching, assessing, and musicianship development with practical application through peer teaching and field-based music teaching. The undergraduate Music Education curriculum is intended to develop teachers who are reflective, who acknowledge the connections music has to the child's world and who seek to promote an understanding of those connections in a social context.

¹ VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives.

Courses and Descriptions

ME 111 Music Education Lab 0 Credits

Undergraduates must meet the weekly attendance and participation requirement for Music Education Lab during every semester of enrollment up to seven semesters as an undergraduate Music Education major except for the student teaching semester. Grading is "P" (satisfactory) or "U" (unsatisfactory). As part of the Music Education Lab experience, students are required to complete 15 hours of professional development.

ME 161 Art of Teaching Music I 3 Credits

Art of Teaching Music I (ATM I) is a first in the sequence of Music Education courses designed to prepare the undergraduate Music Education major students for their student teaching experience and completion of their teaching licensure. There will be field observations of master teachers under the aegis of a music education faculty that will allow students not only to observe, but to have guided experience in assessing how teaching and learning are experienced in real classrooms. Partnerships between local expert teachers and music education faculty will allow students to complete field observations as well as guided experience in teaching and assessing students in real classrooms.

ME 187 Instrumental Music: Strings 1 Credits

This course is designed as an introduction to the pedagogy of string instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring, and idiomatic writing are investigated. When available, instruments may be rented from the college. Rental fee, per instrument: \$25.

ME 188 Instrumental Music: Winds/Percussion 2 Credits

This course is designed as an introduction to the pedagogy of brass, woodwind, and percussion instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring and idiomatic writing are investigated. When available, instruments may be rented from the college. Students must provide their own drum pads and sticks. Rental fee, per instrument: \$60.

ME 471 Music and Hip Hop Culture 3 Credits

Hip Hop in the United States is arguably the most lucrative, popular, and culturally challenging contemporary musical force. The narratives of Hip Hop go beyond the boundaries of race and class as well as those of music, poetry and dance. As such, Hip Hop is a phenomenon that presents problems as well as great possibilities. This course explores them from the standpoint of educational sociology, looking at their implications for music in schools as well as in daily life.

Prerequisite(s): ME 271.

ME 472 Teaching/Learning:Urban Schools 3 Credits

This course offers students theoretical and practical insight into teaching in urban schools. The class will present an analysis and practical implications for what is needed in order to successfully engage in teaching in urban centers in the United States. Students will balance field experiences with critical analyses of issues such as multicultural teaching, race, class, and economics in urban schools as well as their curricular and pedagogical implications.

Prerequisite(s): ME 581, ME 582.

ME 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

ME 491 Kodaly Music Reading 2 Credits

ME 492 Student Teaching 12 Credits

ME 492 - Student Teaching A full semester internship in directed full-time teaching supervised by department members and carried out in schools with approved cooperating teachers. In addition to the field experience, students attend a weekly seminar on campus to discuss current issues in music education as they relate to individual teaching situations. Students discuss classroom management strategies, action research, authentic instruction, critical thinking, feeling and action as well as teaching to focusing questions, concepts and objectives. Throughout student teaching, students maintain a digital portfolio that demonstrates how they meet the New Jersey State and INTASC teaching standards. At the conclusion of the semester, students attend a portfolio review with members of the Music Education faculty to assess the success of the teaching experience. Students must provide their own transportation to student teaching site. Student Teaching fee: \$245. Fees for the Praxis Examination and Teacher Certification are additional. Additional information regarding student teaching may be found in the department's Student Teaching Handbook at www.rider.edu/musiced

Prerequisite(s): Classification as a full senior; Satisfactory completion of music education courses numbered ME 161, ME 262, ME 563, ME 564, ME 187, ME 188, and either Developmental or Educational Psychology; Satisfactory completion of TH 241; For voice primary students, satisfaction of all requirements of PI 204; A minimum 3.0 cumulative grade point average; Demonstrated aptitude, motivation and potential for success in teaching, as evidenced by the successful completion of portfolio reviews; Departmental approval; Students in the Master of Music Education (MME) degree program must take the following courses as prerequisites to student teaching; ME 563, ME 564, ME 725.

ME 499 Special Topics Music Education 2 Credits

The content of this course and the number of credits will vary with the special interests and qualifications of the professor teaching it.

Bachelor of Music: Organ Performance

Program Overview

The Organ Department at Westminster Choir College educates students in many facets of organ playing and related topics. Courses in performance, collaborative skills, choral conducting, improvisation, and literature are offered each semester. Westminster is home to a collection of 18 pipe organs built by Aeolian-Skinner, Beckerath, Casavant, Flentrop, Noack, and others. Students are encouraged to seek church employment during their time at Westminster; the organ faculty and sacred music office maintain a list of available positions in the area. For more information, including audition requirements and instrument specifications, visit the Organ Department website (<http://www.rider.edu/organ/>).

Curriculum Overview

The undergraduate curriculum includes eight semesters of applied lessons, two semesters of organ literature, two semesters of organ improvisation, and courses in choral conducting, worship planning, and accompanying.

Degree Recital Requirements

- Two recitals - memorization is encouraged, but not required:
 - A recital of at least 45 minutes at the conclusion of the Junior year.
 - A recital of at least 60 minutes at the conclusion of the Senior year.
- Students are required to be enrolled in organ lessons at Westminster during the semester of a degree recital, without exception.

Performance Class Requirements

For each semester a student is enrolled in organ lessons as a performance major, these requirements must be met:

- Three solo works, one of which must be memorized.
- Two hymns, one of which must be memorized.
- One collaborative work (i.e. anthem, vocal/instrumental solo, concerto, etc.)

Jury Requirements

- All freshman performance majors must pass a qualifying jury that includes:
 - Five Orgelbüchlein Chorales, by J. S. Bach; a Leipzig, Schübler, or Clavierübung III chorale can be substituted for one of these. (This requirement may be met in any jury or performance class during the first year.)
 - A Prelude and Fugue of J.S. Bach or Präludium of Dietrich Buxtehude, or Nicolas Bruhns
 - Three contrasting pieces from the 19th, 20th, or 21st centuries.
 - A complete hymn performed creatively (introduction, alternative harmonizations, etc.)
 - All major and minor scales (harmonic and melodic); four octaves
 - A jury must be performed at the conclusion of any semester that does not include a degree recital.

Note: One of the works in a. through e. above must be memorized.

Degree Offered

- B.M. in Organ Performance

Notes

- ¹ Four terms of one-credit, half-hour lessons (suffix B) are covered under full-time tuition. Students wishing to take a full-hour lesson register for Suffix G, and are billed for one half-hour. After four terms are complete, all harpsichord or piano lessons are considered elective.
- ² Completion of French, German, Italian, Latin, or Spanish IV is required. If students are exempted from one or more semesters of foreign language study, they must replace the missing credits with other Arts & Sciences electives.
- ³ Attendance at weekly studio classes is required during all semesters of applied study.
- ⁴ A half recital must be presented in the junior year. A full recital must be presented in the senior year. All recitals must receive prior departmental approval.

OR 433 Organ Literature I 3 Credits

Historical study of organ literature coordinated with a study of the development of the organ as a musical instrument.

OR 434 Organ Literature II 3 Credits

Continuation of OR 433.

OR 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

OR 587 Organ Improvisation 2 Credits

A laboratory in the keyboard disciplines of modulation, transposition, improvisation and vocal score reading. Required for undergraduate Organ Performance majors; others may elect the course by permission of the instructor.

OR 588 Organ Pedagogy 2 Credits

Pedagogical approaches to organ playing. Required for undergraduate Organ Performance majors; others may elect the course by permission of the instructor.

OR 589 Organ Improvisation II 2 Credits

Continuation of OR 587.

OR 590 Accompanying at the Organ 2 Credits

Development of accompanying techniques essential to the professional organist. Arranging and transcription from piano reductions and orchestral scores; standard choral/organ literature. Leading congregational song; appropriate methods of instrumental registration.

OR 623 Organ Music of J.S. Bach 3 Credits

A study by genre of Bach's organ compositions will include background, overview of the influences of Buxtehude, Pachelbel and Böhm, and performance practice issues. The question of the "Bach organ" will be explored. Prerequisite(s): MH 731, OR 433.

Corequisite(s): MH 731, OR 433.

OR 629 Seminar in Organ Literature 2 Credits

An intensive study of an area of organ literature or its performance practice. Specific content will change with each semester. Emphasis upon in-depth study of the works of a selected composer or genre.

OR 641A Organ Primary 2 Credits

OR 641B Organ Primary 1 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

OR 723 Organ Literature Before 1800 3 Credits

Historical study of the organ literature coordinated with a study of the development of the organ as a musical instrument.

OR 724 Organ Literature since 1800 3 Credits

Study and research into the style, form, and interpretation of representative organ works composed after 1800. Study and research into national styles of organ composition and construction in France, Germany, England and North America.

Bachelor of Music: Piano

Program Overview

Piano at Westminster Choir College has multiple dimensions at both the undergraduate and graduate levels. It fosters the development of students who perform on a high level as soloists, as artist-teachers and as collaborators with other performing artists.

Our program helps to develop a strong foundation of technique and knowledge of piano literature and style. The department also provides

instruction for undergraduate students who need keyboard skills in order to function effectively throughout their professional careers.

Curriculum Overview

Undergraduate Piano Primary: Piano primary students majoring in sacred music, B.A. in music, music education, or theory/composition are expected to play once each semester in a performance class. Seniors give a full or half recital. Freshmen have required juries at the end of each semester; sophomores and juniors, at the end of each year.

Undergraduate Piano Secondary: All undergraduate voice primary students must enroll for piano secondary study until completing the undergraduate piano secondary curriculum course sequence. Instruction is in the form of piano classes. Placement in the class by level is determined at the beginning of each semester. Instruction entails study and performance of piano literature from the Baroque through the 21st Century as well as development of proficiency in areas of functional keyboard skills. For more details about the Piano Secondary curriculum, please refer to the Piano Department page (p. 1157) in this catalog.

Piano as an Elective: Students may elect private instruction in piano for credit. There are no audition requirements, but an extra fee is charged.

Piano Pedagogy Lab: This is a required graduate Piano Pedagogy course for the purpose of problem solving related to piano teaching. The class format includes open discussion of observations, supervised and independent teaching, questions relating to repertoire, materials, and technique, comparative philosophies and psychologies and their applications, group and private teaching, business issues (e.g. studio policies), use of technology, professional organizations and publications, recital and audition preparation, and parent education.

Piano Studio and Performance Class: This is a weekly recital and lecture hour during which performances are given by students, faculty members, and guest performers. Attendance and participation at weekly studio and performance classes is required for all undergraduate and graduate piano primary students. All Westminster students are invited to attend.

Notes

- ¹ Attendance at weekly studio/performance classes is required during all semesters of applied study.
- ² A half recital must be presented in the junior year. A full recital must be presented in the senior year. All recitals must receive prior departmental approval.
- ³ If students are exempted from one or more semesters of foreign language study, they must replace the missing credits with other Arts & Sciences electives.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions**PI 101A Piano Primary 2 Credits****PI 201A Piano Primary 2 Credits****PI 297 Fund of Piano Pedagogy I 3 Credits**

Fundamentals I is devoted to study of techniques, methods, and materials suitable for beginning through early intermediate level students. Other areas of study include motivational strategies, establishment of effective practice habits, recital preparation, technique, and elementary duet materials. Students analyze and demonstrate teaching from three different beginning piano methods. Observation of professional teaching is done in the context of class and private lessons at the Westminster Conservatory.

PI 298 Fund of Piano Pedagogy II 3 Credits

In Fundamentals II, students continue to apply their experience with piano methods to the teaching of students. In addition, the semester is devoted to the study of materials from all style periods for upper elementary and intermediate level students. Students observe private and group lessons appropriate to these levels. The course culminates in an individual lecture recital demonstrating music from a variety of style periods.

Prerequisite(s): PI 297.

PI 301A Piano Primary 2 Credits**PI 397 Fund of Piano Pedagogy III 3 Credits**

Fundamentals III involves supervised private and group teaching of beginning students. Emphasis is placed on lesson planning, presentation of concepts, use of technology, and the relationship between technique and musicianship skills. The course further addresses the different psychological and methodological approaches to teaching adults and children in class and private settings, and includes an overview of materials for the adult student and group classes. The course culminates in a lecture recital on a pedagogical subject of the students choice.

PI 401A Piano Primary 2 Credits**PI 413 Accompanying Class 2 Credits**

This course is designed with the twofold purpose of allowing undergraduate pianists to fulfill their piano ensemble elective requirement within the professional studies area as well as providing an opportunity for voice primary students to further their piano study in a challenging forum in situations directly related to their repertoire. The students in the class will receive instruction in the stylistic, technical, analytical and linguistic aspects of vocal literature. The many issues involved in vocal collaboration will be discussed along with in-depth study of the pianist's role in musical partnerships. Issues of musical freedom, language, and the varieties of sonic treatment unique to vocal literature will be discussed. Italian, French, German and English song repertoire from various style periods will provide the assignments for performance and discussion.

PI 435 Survey of Piano Literature I 3 Credits

A study of representative works from 1650-1800 by composers including J. S. Bach, C.P.E. Bach, J.C. Bach, Haydn, Mozart, and Beethoven.

Prerequisite(s): MH 248.

PI 436 Survey of Piano Literature II 3 Credits

A study of representative works from 1800 to the present by composers including Beethoven, Schubert, Mendelssohn, Schumann, Chopin, Liszt, Brahms, Debussy, Ravel, Prokofiev, and Bartók.

Prerequisite(s): MH 248.

PI 512 Chamber Music 2 Credits

Emphasis is placed upon rehearsal and performances of representative collaborative literature for strings and piano, and woodwinds and piano. Students will be assigned movements from major chamber works selected from different style periods. Professional instrumentalists will join them for rehearsals and performances in class. An overview of the development of this repertoire will be presented and listening assignments will augment the study of specific works. A project involving the study and presentation of a piano quartet or piano quintet will be included. Attendance at three concerts of instrumental chamber music is required. Permission of applied teacher and instructor is required.

PI 513 Jazz Keyboard/Improv 3 Credits

This course will enable pianists and organists to become familiar with the theory, harmony, and improvisational techniques of jazz piano. Emphasis will be placed upon getting each student to create spontaneous improvisations. The fundamental goal will be that of enabling students accustomed to following a score to move beyond it. Extensive exposure to material from the "Great American Songbook" as well as to jazz standards will provide a structural basis for the course.

Prerequisite(s): TH 142 and PI 201, or equivalent knowledge and technical proficiency.

PI 516 Physical/Psych Aspects Piano 2 Credits

The two major emphases of this course are: (1) the pianist as athlete and 2) the pianist as performer. The first includes a study of appropriate exercise, nutrition, anatomy and physiology as they relate to piano technique, implications for injury prevention, and how to deal with injuries should they occur. The second includes the reading process, strategies for practicing, memorizing techniques, and ways of coping with the behavioral, physical and cognitive manifestations of performance anxiety.

PI 540 Keyboard Skills 3 Credits

The course includes in-depth study of numerous aspects of musicianship skills essential for all pianists within the broader categories of technique and practice strategies; memorization and sight reading; improvisation and lead sheet realization. All aspects of piano musicianship skills will be addressed from practical, pedagogical, and collaborative points of view. Assignments will include examples of studies from a wide range of levels all within the current and developing skill level of each student enrolled in the class.

Prerequisite(s): UG - Eight credits of applied keyboard study or permission of keyboard instructor or course instructor. GR - Permission of course instructor.

PI 585 Piano Ensemble 1 Credits

Study and performance of piano duets, two-piano works, and works for combinations of three or more pianists. The emphasis is on ensemble techniques for rehearsal and performance.

Piano Pedagogy Minor

Please Note: The Piano Pedagogy Minor program is not being offered during the current academic year.

Overview

The Piano Pedagogy minor is open to Westminster Choir College undergraduates other than Piano majors. Interested students must be accepted by the piano faculty and should then declare the minor by completing a form available in the Assistant Registrar's Office.

Acceptance to Minor

- For piano primary – by recommendation of the applied piano teacher
- For non-piano primary – by recommendation of the applied teacher, advisor, audition, and interview with the Piano Faculty

Degree Offered

- Minor in Piano Pedagogy

Prerequisite(s): UG - Eight credits of applied keyboard study or permission of keyboard instructor or course instructor. GR - Permission of course instructor.

PI 585 Piano Ensemble 1 Credits

Study and performance of piano duets, two-piano works, and works for combinations of three or more pianists. The emphasis is on ensemble techniques for rehearsal and performance.

Bachelor of Music: Sacred Music

Program Overview

Students who choose to major in sacred music at Westminster have access to education of the highest quality and broadest scope. The major brings together students from all faiths and interests and seeks to explore the excellence of various traditions of sacred music. Faculty members have wide experience and expertise in such traditions as Anglican, Lutheran, Methodist, Presbyterian, Reformed, Roman Catholic, the Synagogue and Temple tradition, and others.

Underlying all the offerings of the department is the understanding that sacred music is neither an optional extra nor merely a spiritual entertainment within the service of the church. It is rather an essential part of the liturgy and worship and therefore must have integrity and quality appropriate for its twin functions of carrying the word of God to us, and our words of praise to God.

Undergirding the sacred music program are the offerings of the other Westminster academic and performance departments, the specialized collections containing sacred music materials in Talbot Library, and the vast network of affiliate churches in the greater New York-Philadelphia metropolitan area in which Westminster students gain personal experience in a wide range of sacred music practice.

Curriculum Overview

The curriculum aims, on the one hand, to explore how familiar tradition can be blended with unfamiliar contemporary creativity in choral, congregational, and instrumental music for worship; and, on the other hand, to provide a balanced study of theoretical matters and practical concerns. Technique, repertoire, and performance practice are therefore considered with theology, biblical and post-biblical religious history, and the development and practice of liturgy and worship.

Sacred Music Lab provides an opportunity for students to experience a wide variety of denominational traditions and worship styles. In this context students are immersed in extensive congregational, choral, vocal, organ and instrumental works, which comprise the basic corpus of sacred repertoire. New trends in theology, hymnody and composition are also explored through practical and creative liturgies.

Additional Opportunities

A reciprocal arrangement with Princeton Theological Seminary allows Westminster graduate students to take certain courses offered by the Seminary. Enrollment in such courses is arranged after consultation with Sacred Music faculty. Speer Library at the Seminary, housing one of the nation's most important theological collections, is another invaluable resource for Westminster students.

Faculty

Vinroy Brown • Adjunct Instructor, Sacred Music, 2017. B.M., Westminster Choir College of Rider University; M.A., Regent University.
Steve Pilkington • Associate Professor, Sacred Music, and Director of Chapel, 1992. B.A., St. Olaf College; M.M., University of Illinois; Ph.D., Drew University.
Kathleen Ebling Shaw • Adjunct Instructor, Sacred Music, 1991. B.M., Westminster Choir College of Rider University.
Tom T. Shelton, Jr. • Associate Professor, Sacred Music, 2012. B.M., M.M., University of North Carolina at Greensboro.

Courses and Descriptions

SM 121 Survey of Sacred Music Lit 3 Credits

Broad survey of Christian music. Through standard repertoire, major historical genres of sacred music are explored from biblical roots in the Old and New Testament to the postmodern expressions of our time.

SM 122 Worship and Theology 3 Credits

A study of the content, theology, and history of the Old and New Testament narratives that the church recounts and celebrates in its liturgical year.

SM 142 Intro to Music Ministry 2 Credits

An introduction to the vocational needs, professional relationships, administration styles and teaching roles of the church musician. In addition to an overview of professional standards, emphasis will also be placed on music engraving skills, budgeting, recruitment, endowments and fundraising.

SM 158 Intro Handbell Leadership 1 Credits

A hands-on course providing a strong foundation for the beginning director/ringer. It will include information about ringing instruments, maintenance, ringing and damping techniques, articulations, part assignments, a survey of handbell literature, and rehearsal planning and directing.

SM 250 Contemporary Worship 2 Credits

This course is an exploration of the various forms of worship being practiced in urban churches across America. Practical and skill-based, it is designed to allow the student to explore praise and worship music, different styles of gospel, and other forms of music used in non-traditional worship.

SM 340 Church Field Education 1 Credits

A practical program in which students take responsibility for the music program of an assigned affiliate church. Under supervision, students exercise the skills and concepts learned in the classroom. Enrolled students also meet in a weekly preceptorial. Sacred Music majors must take two consecutive semesters, normally in the junior year.

Prerequisite(s): SM 121, SM 122.

SM 354 Hymnody & Psalmody 3 Credits

A study of the origins and development of Christian song. The first part of the course deals with the nature of the Psalms in their Biblical setting and their use in the worship of different traditions. The second part of the course deals with the history of congregational hymnody - texts, tunes, styles and functions - from the 16th century to the present. The course aims to develop an awareness of the textual and musical treasures available for both congregational and choral use.

SM 360 History of American CM 3 Credits

A broad survey of American church music beginning with colonial psalm-singing and continuing through four centuries of musical development leading up to and including the vast panorama musical practices found in post-modern Christianity. A special emphasis will be placed on the development and influence of African-American church music on contemporary musical practices. **Prerequisite(s):** SM 121.

SM 365 Sacred Sounds 2 Credits

A study of the origins and development of Christian song. The first section of the course deals with the nature of the psalms and their use in the worship of different traditions. The second section of the course will be a survey of congregational hymnody – texts, tunes, styles and functions – from the 16th century to the present. The course aims to develop a context for the discussion congregational song as it might be practiced in the 21st century, the final part of the class.

SM 410 African Amer Choral Lit 3 Credits

This course is designed to give students a better understanding of the choral literature, historical context and text analysis of African American composers.

SM 454 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 455. Offered in rotation with other Sacred Music electives.

SM 455 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas. Complements SM 454. Offered in rotation with other Sacred Music electives.

SM 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 is required. **Prerequisite(s):** junior or senior standing.

SM 491 SM Internship 1 Credits

A practical program in which students take responsibility for the music program of a local church or work as an intern in an assigned affiliate church. Under faculty supervision, students exercise the skills and concepts learned in the classroom. Enrolled students also meet in a weekly preceptorial. Sacred music majors must take two consecutive semesters, normally in the junior year.

Prerequisite(s): CR 215.

SM 509 Jubilee Singers 1 Credits

This auditioned ensemble is devoted to the performance of sacred music from the African-American tradition.

SM 510 Conducting Adult Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving adults.

SM 511 Sacred Music Lab 0 Credits

Series of classes that addresses a variety of experiences in Sacred Music while rotating principal themes and ideas. Student preparation of monthly worship settings will put studied concepts into practice.

SM 512 Conducting Children and Youth Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving children and youth.

SM 517 Concert Handbell Choir II 1 Credits

Open to students who have had previous handbell experience.

Intermediate to advanced repertoire, with opportunities for concert performance.

SM 519 Concert Handbell Choir I 1 Credits

A choir selected by audition from the most experienced and capable bell ringers among the student body at large. This ensemble utilizes advanced repertoire and techniques, aiming primarily at presenting concerts both on and off campus, including a two-week annual tour.

SM 525 Conductors' Repertoire Ensemble 1 Credits

An auditioned chamber ensemble, offered every semester, which provides conducting podium time and coaching to all interested members. It additionally serves the conducting needs of graduate Sacred Music majors.

Prerequisite(s): CR 215 or permission of instructor.

SM 531 Colloquium in Sacred Music 2 Credits

A lecture series/colloquium intended to address a wide variety of concerns in the field of Sacred Music while rotating principal themes and ideas.

SM 540 Choir Training/Young Singers 3 Credits

A practicum combined with study designed to teach students how to organize and direct a children's choir program that emphasizes musical training as a basic requirement. The course focuses on teaching children good vocal techniques and sight-reading skills and includes practice teaching in a local school under instructor supervision. Other areas covered include musical readiness skills, voice-change problems, and repertoire.

SM 541 Conducting Church Choirs: Ped & Mgt 3 Credits

A practical course devoted to the building and maintenance of church music programs serving persons of all ages.

SM 610 Foundations of Music Ministry 2 Credits

This graduate level course surveys the vocational needs, professional relationships, administrative styles, and teaching roles of the practicing church musician. In addition to an overview of professional standards, emphasis will also be placed on music engraving skills (music notation software), budgeting, recruitment, endowments and fundraising.

SM 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity. Offered in rotation with other Sacred Music electives. 3 Credit hours.

SM 624 Choral Music for Children 1 Credits

This course is designed to acquaint the church choral director with repertoire suitable for use with children's and youth choirs. Representative repertoire from all periods of music will be discussed and analyzed. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 625 Choral Music for Adults 1 Credits

This course is designed to acquaint the church choral director with repertoire suitable for use with adult choirs and adult ensembles. Representative repertoire from all periods of music will be discussed and analyzed. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 630 Conducting Coaching 1-2 Credits

Structured preparation and faculty coaching of the culminating choral recital in the graduate Sacred Music curriculum.

SM 631 Worship Planning/21st Cent. 3 Credits

Designed to facilitate the planning of worship, this practical course will be an immersion in the musical and theological materials available to those who create worship.

SM 632 Collaborative Prep for Worship 1 Credits

Through seminars, readings and common participation in chapel services, Westminster Choir College and Princeton Theological Seminary students will explore models for pastors and church musicians to prepare collaboratively for worship.

SM 635 Choir Training For Children/Youth 3 Credits

A practical course designed to teach students how to organize and direct a comprehensive music program from preschool through high school in the church setting. The course focuses on teaching excellent vocal techniques for each level as well as appropriate music skill development. Other areas of focus include: musical readiness skills; working with preschool singers; understanding the child's voice; the changing voice; and appropriate repertoire for all ages.

SM 640 Liturgies 3 Credits

A study of the origins of liturgy, its development in the main Christian traditions, and its relation to ecclesiastical history, with particular attention given to the differing styles and traditions of liturgical music. Contemporary liturgies are viewed against this historical background.

SM 641 Hymnology 3 Credits

A study of the origins and development of Christian hymnody, with reference to the theological emphases of various periods from the beginnings to the present, aiming to arouse interest in the textual and musical content of hymns and in their effective use in worship.

SM 654 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 655. Offered in rotation with other Sacred Music electives.

SM 655 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas.

SM 690 Independent Study and Research 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

SM 710 Panorama of Sacred Music 3 Credits

This graduate-level course is a one-semester survey of those masterworks and significant musical movements that have shaped the evolution of Western Sacred Music. Beginning with the Old Testament, this course will move through all eras, highlighting important composers and liturgical trends, placing them in their appropriate cultural and theological contexts.

SM 712 Hist of Sacred Music I 3 Credits

Study and research into the history of Western Christian music and its most important genres beginning with the Old Testament and continuing until the death of J.S. Bach in 1750.

SM 713 Hist of Sacred Music II 3 Credits

Continuation of SM 712, beginning with the Classical Viennese Mass and continuing until today. Emphasis on the development of the American church and its worship music.

SM 722 Theology, Liturgy & Worship 3 Credits

A detailed study of the Bible. Principal thematic and narrative elements are correlated to the development of the church's historic liturgies and the theological principles behind them.

Bachelor of Music: Theory and Composition

Program Overview

The program in composition, music history and theory aims to develop the aural skills needed by all musicians to provide the necessary theoretical knowledge for the continuing study and performance of music, to develop analytical and esthetic understanding of music forms and styles, and to foster the creative impulse in music.

Students also have access to Westminster's music computing center, where they can compose, orchestrate, and print their compositions in publishable quality using computers interfaced with sampler/synthesizers as well as sequencing and music printing software.

Curriculum Overview

The curriculum for the undergraduate Theory/Composition major is designed to foster individual creative ability and to develop a broad and informed musicianship along with a knowledge of the literature of all periods. The department welcomes diversity of compositional styles and esthetic viewpoints and encourages exploration on the part of its students. Theory/Composition majors take Composition Class, six semesters of Applied Composition, and complete a senior project which may be a large-scale composition or a theory research paper. The program culminates with a recital of original music written while a student is enrolled at Westminster.

Required musicianship and historiography courses, contemporary trends, music since 1900, and elective theory and music history courses form the core of undergraduate study. The elective courses provide students with opportunities to apply their skills to specific areas of inquiry after satisfying specific prerequisites. All Bachelor of Music candidates must elect one music history elective, a level I theory elective and a level II theory elective. Theory/Composition majors take four additional music theory and history electives.

Degree Offered

- B.M. in Theory and Composition

Notes

- ¹ Eight terms of one-credit, half-hour lessons (suffix B) are covered under full-time tuition. Students wishing to take a full-hour lesson register for suffix G, and are billed for one half-hour.
- ² VC 115 and VC 116 are required for voice primary students only. Organ and piano primary students may substitute four additional credits of free electives for these two courses.
- ³ If students are exempted from one or more semesters of foreign language study, they must replace the missing credits with other Arts & Sciences electives.
- ⁴ Students must present a public recital in the senior year that includes both compositions written by the student and performance on the applied primary instrument. Recitals must be approved in advance by both the Music Composition, History & Theory Department and the applied primary department.

⁵ Attendance requirements at monthly departmental forums must be met.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

MH 247 Music Historiography I 3 Credits

Historiography I begins by exploring similarities and differences between various music cultures around the world, and continues with an examination of selected genres of Western Art Music of the Medieval, Renaissance and Baroque periods. Basic information literacy skills, such as searching library catalogs, databases and reading academic articles also will be covered.

Prerequisite(s): CMP 125.

MH 248 Music Historiography II 3 Credits

Examines Western Art Music since 1750 and includes a research assignment that builds upon the information literacy skills gained in MH 247.

Prerequisite(s): MH 247.

MH 345 Music Since 1900 3 Credits

Examines controversies and aesthetic movements in 20th and 21st century music. Emphasis is placed upon critical reading and writing skills.

Prerequisite(s): MH 248.

MH 433 Seminar in Music History 3 Credits

The contents of courses carrying this number will vary with the special interests and qualifications of the instructors teaching them. Possible topics include period courses, courses from a distinct perspective, composer courses and genre courses.

Prerequisite(s): MH 248.

MH 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

MH 608 Graduate Music History Review 3 Credits

Required for graduate students who are admitted with deficiencies in music history, as determined by the graduate placement test in music history. It is strongly recommended that this course be taken at the outset of graduate study.

MH 635 Public Musicology 3 Credits

A graduate-level introduction to the many ways musicology can engage with communities and events outside the academy. Topics include music criticism, oral history, museum education, archives, and cultural tourism.

Prerequisite(s): Graduate Standing; removal of all Music History deficiencies.

MH 690 Independent Research & Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

MH 733 Seminar in Music History 3 Credits

The content of the course will vary with the special interests and qualifications of the professor teaching it.

Prerequisite(s): Removal of all music history deficiencies, it is strongly recommended that MH 731 be taken prior to this course.

MH 734 Proseminar in Music USA 3 Credits

A graduate-level introduction to the scholarly study of music in the U.S. Readings will cover music in Colonial/Early America, Western art music, popular music, and music of various ethnic communities.

Prerequisite(s): Graduate standing; removal of all Music History deficiencies.

MH 750 Thesis I 3 Credits

Independent research under faculty supervision leading to a master's thesis. Students register for this course in their first term of thesis research.

Prerequisite(s): Graduate standing, removal of all Music History deficiencies.

MH 751 Thesis II 3 Credits

Independent research under faculty supervision leading to a master's thesis. Students register for this course beginning in their second term of thesis research.

Prerequisite(s): Graduate Standing, removal of all Music History deficiencies, MH 750.

TH 045 Introduction to Musicianship 4 Credits

Integration of the basic elements of music, scales, intervals, key signatures, triads and rhythmic notation with the practical skills of sight singing, rhythmic reading, keyboard harmony and dictation. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade; 0 credits toward graduation, counts as 4 credits in the semester load.

TH 101A Composition Primary 2 Credits**TH 101C Composition Elective 2 Credits****TH 101D Composition Elective 1 Credits****TH 101E Composition Primary 2 Credits****TH 101F Composition Primary 1 Credits****TH 141 Musicianship I 4 Credits**

This course assists students in learning and integrating aural, performance, analytical and composition skills involving diatonic melody and harmony. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade.

Prerequisite(s): TH 045 or passing a placement test.

TH 142 Musicianship II 4 Credits

A continuation of TH 141 involving chromatic melody and harmony with an introduction to binary and ternary form.

Prerequisite(s): minimum "C-" grade in TH 141.

TH 201A Composition Primary 2 Credits**TH 201E Composition Primary 2 Credits****TH 201F Composition Primary 1 Credits****TH 237 Composition Class 3 Credits**

Class instruction in original composition. May be taken as a level I elective.

Prerequisite(s): For non Theory/Composition majors only, minimum "C-" grade in TH 142.

TH 241 Musicianship III 4 Credits

A continuation of TH 142 with an introduction to larger musical forms and counterpoint.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 251 Analytical Studies I 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain only the harmonic vocabulary and formal structures studied in TH 141 and TH 142, may vary each time the course is offered. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 253 Orchestration 3 Credits

A study of the orchestra and its individual instruments from the standpoints of the composer, arranger and conductor. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 255 Song Writing 3 Credits

Solo vocal composition in various styles. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 259 Electroacoustic Music 3 Credits

An introduction to the history and literature of electroacoustic music emphasizing hands-on creative opportunities in sequencing and digital sound processing. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 301A Composition Primary 2 Credits**TH 301E Composition Primary 2 Credits****TH 301F Composition Primary 1 Credits****TH 342 Contemporary Trends 3 Credits**

An analytical study of the compositional techniques of the 20th and 21st centuries.

Prerequisite(s): TH 241.

TH 401A Composition Primary 2 Credits**TH 401E Composition Primary 2 Credits****TH 401F Composition Primary 1 Credits****TH 424 Choral and Instrumental Arranging 3 Credits**

Arranging for various ensembles of voices and instruments. May be taken as a level II theory elective.

Prerequisite(s): TH 241.

TH 431 Form and Analysis 3 Credits

Study of the compositional process as observed in selected examples of music literature, predominantly from the tonal repertoire. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 432 Contrapuntal Techniques 3 Credits

18th century counterpoint with an emphasis on analysis and writing of original compositions. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 433 Special Topics in Theory 3 Credits

The content of the course carrying this number will vary with the special interests and qualifications of the professor teaching it. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 452 Analytical Studies II 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain a more advanced harmonic vocabulary and larger formal structures than the music studied in TH 251, may vary each time the course is offered. May be taken as a level II theory elective.

Prerequisite(s): TH 241 with a minimum grade of C-.

TH 480 Senior Project 3 Credits

Independent study in theory or composition resulting in either a paper comparable to a substantial journal article or a composition in one of the larger forms.

Prerequisite(s): Five semesters of private composition study.

TH 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

TH 511 New Music Ensemble 1 Credits

This course provides an opportunity to perform new music, primarily works of fellow students. It will also provide instrumentalists an opportunity to develop their performance skills more fully.

TH 512 Chinese Music Ensemble 1 Credits

This course provides an opportunity to learn a Chinese instrument and to perform on it in an ensemble setting. Students will learn musical styles from different parts of China and the Chinese Diaspora.

TH 550 Keyboard Harmony 3 Credits

An intense exploration of and drill in musicianship-keyboard skills, including score reading, transposition, modulation, clef reading, figured bass realization, harmonizing melodies, improvising and lead sheet accompanying. Projects may include transposition of a number of songs (perhaps a complete set) into all keys, figured bass realization for a Bach cantata, improvisation of service music (prelude, offertory, interludes, chorale preludes, postlude), multiple re-harmonizations of hymns/chorales for a service and score reduction and performance of a movement of an orchestral work. May be taken as an undergraduate level II theory elective.

Prerequisite(s): Undergraduate, minimum "C-" grade in TH 241; Graduate, Removal of all theory deficiencies.

TH 608 Graduate Musicianship Review 4 Credits

Required for graduate students admitted with deficiencies in musicianship as determined by the graduate placement test in musicianship. This course assists students in learning and integrating aural, performance, analytical and composition skills. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade. It is strongly recommended that this course be taken at the outset of graduate study.

TH 622 Electroacoustic Music 3 Credits

Advanced opportunities for creative activities utilizing the resources of Westminster's Music Computing Center. Previous experience with sequencers and/or digital audio is expected.

Prerequisite(s): Removal of all music theory deficiencies.

TH 623 Seminar in Music Theory 3 Credits

The content of the course bearing this number will vary with the special interests and qualifications of the professor teaching it.

Prerequisite(s): Undergraduate, minimum "C-" grade in TH 241 and permission of instructor, or graduate student standing and removal of all music theory deficiencies.

TH 625 Composition 3 Credits

Class instruction in original composition. Projects and presentations.

Prerequisite(s): Graduate student standing and removal of all music theory deficiencies.

TH 645A Composition Primary 3 Credits**TH 645C Composition Elective 2 Credits****TH 645D Composition Elective 1 Credits****TH 645E Composition Primary 3 Credits****TH 645F Composition Primary 1 Credits****TH 655 Composition Project 3 Credits**

Graduate-level private study in composition culminating in a major composition in one of the larger forms.

Prerequisite(s): three semesters of TH 645.

TH 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

TH 726 Analysis 3 Credits

A study of the compositional process as observed in selected tonal works, using the analytical approach of Heinrich Schenker.

Prerequisite(s): Removal of all music theory deficiencies.

Bachelor of Music: Voice Performance

Program Overview

The voice performance program seeks to develop the musician by establishing a sound vocal technique and a thorough understanding of the singing voice, its literature and pedagogy. These tools are essential for the study and performance of vocal and choral literature and for training students as solo performers, professional teachers or choral conductors.

Students will build and demonstrate a healthy vocal technique, become acquainted with voice literature, and develop an understanding of the complex relationships between music and poetry. They will also learn how to sing with correct diction in English, Italian, French and German, as well as to understand both the general meaning and specific nuances of their sung texts.

As they progress in the program, students will integrate musicianship skills and use their increasing understanding of musical structure and form to communicate musically, with stylistic and textual understanding. Students will also build vocal and performance skills that equip them for the demands of solo and ensemble singing.

Curriculum Overview

Every undergraduate must satisfy departmental requirements for graduation. Juries and other tests are conducted periodically for the purpose of evaluating progress; details may be obtained from the Voice Department.

Instruction for voice performance majors entails private lessons, recitals, diction, voice literature, performance/opera classes and voice pedagogy. Weekly studio and performance classes offer regular performing opportunities. Two fully-staged operas, one with orchestra, are presented each year, along with an additional undergraduate-only opera offering. Private vocal coaching is available for upperclassmen and graduate students.

The curriculum has been revised for the class entering in the fall of 2015. Current students may continue to follow their original curriculum, or adopt the new curriculum.

Faculty

Margaret Cusack (chair) • Professor, Voice, and Chair of Voice and Piano Faculties, 1994. B.M., M.M.T., Oberlin College.

Christopher Arneson • Professor, Voice, 2003. B.A., M.M., Binghamton University; D.M.A., Rutgers University.

Susan S. Ashbaker • Associate Professor, Voice, 2006. B.M., M.M., Southern Illinois University; M.M., University of Illinois.

Lauren Athey-Janka • Adjunct Assistant Professor, Voice. B.M. Boston University, M.M., Westminster Choir College of Rider University.

Victoria Browsers • Adjunct Assistant Professor, Voice, 2017. B.M., Ohio Wesleyan University, M.M. Westminster Choir College of Rider University; D.M.A. State University of New York at Stony Brook.

Jay Carter • Assistant Professor, Voice, 2019. B.M., William Jewell College; M.M., Yale University; D.M.A., University of Missouri-Kansas City

Rochelle Ellis • Adjunct Assistant Professor, Voice, 1995. B.M.E., University of Missouri, Kansas City; M.M.E., Westminster Choir College of Rider University.

Faith Esham • Adjunct Assistant Professor, Voice, 2000. B.A., Columbia Union College; B.M., M.M., The Juilliard School.

Nancy Froyland Hoerl • Adjunct Assistant Professor, Voice, 1995. B.A., Moorhead State University; M.M., Westminster Choir College of Rider University.

Katherine Johnson • Adjunct Assistant Professor, Voice, 2006. B.M., University of Calgary; M.M., Manhattan School of Music.

Rachelle Jonck • Adjunct Associate Professor, Voice, 2007. B.M., University of Stellenbosch (South Africa)

Robin Massie • Adjunct Assistant Professor, Voice, 2008. B.M., Westminster Choir College of Rider University; M.M., Yale University.

Sean McCarther • Associate Professor, Voice, 2012. B.M., Baylor University; M.M., D.M., Indiana University.

Kathy Kessler Price • Associate Professor, Voice, 2012. B.A., University of Richmond; M.M., University of Maryland; Ph.D., University of Kansas, Lawrence.

Debra Scurto-Davis • Adjunct Assistant Professor, Voice, 2004. B.M.E., Evangel College; M.M., Baylor University; S.M., University of Michigan.
Elizabeth Sutton • Adjunct Assistant Professor, Voice, 2005. B.A., Bowling Green State University; M.M., College-Conservatory of Music, University of Cincinnati.

Charles J. Walker • Adjunct Instructor, Voice, 1995. B.M., University of Delaware.

Sally Wolf • Adjunct Assistant Professor, Voice, 2001. B.M., Kent State University; Artist Diploma, Curtis Institute of Music.

Amy Zorn • Adjunct Assistant Professor, Voice, 1996. B.M., University of Wisconsin, Madison; M.M., Boston University.

Notes

- ¹ Students must complete six semesters of foreign language study. Students must complete Italian I and II. They must complete additional semesters of either French or German. Semesters five and six may be of a third language (French or German) or additional semesters of Italian, French or German. If students are exempted from one or more semesters of foreign language study, they must replace the missing course credits with other Arts and Sciences electives.

² Attendance at weekly studio classes is required during all semesters of applied study.

³ A half recital must be presented in the junior year. A full recital must be presented in the senior year.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

VC 001S Applied Voice Studio 0 Credits

VC 101A Voice Primary 2 Credits

VC 101B Voice Primary 1 Credits

VC 101C Voice Elective 2 Credits

VC 101D Voice Elective 1 Credits

VC 101E Voice Primary 2 Credits

VC 101F Voice Primary 1 Credits

VC 101G Voice Primary 2 Credits

VC 103 Voice Secondary 1 Credits

VC 114 Introduction to Lyric Diction 2 Credits

Introduction to the International Phonetic Alphabet (IPA) and the sounds of all major sung languages through oral and written drill. Open to Voice Performance majors only.

VC 115 English & Italian Diction 2 Credits

Introduction to the rules of singing English and Italian through the use of the International Phonetic Alphabet (IPA) with oral and written drill.

VC 116 French & German Diction 2 Credits

Introduction to the rules of singing French and German through the use of the International Phonetic Alphabet (IPA) with oral and written drill.

Prerequisite(s): VC 115.

VC 118 Italian Diction 2 Credits

Introduction to the rules for singing Italian through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 119 French Diction 2 Credits

Introduction to the rules for singing French through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 120 German Diction 2 Credits

Introduction to the rules for singing German through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 191 Movement for the Performer 2 Credits

Movement exercises and etudes help students develop proper alignment, physical freedom, unification of voice, breath, and body, and help them explore the body as an expressive instrument.

VC 201A Voice Primary 2 Credits

VC 201B Voice Primary 1 Credits

VC 201C Voice Primary 2 Credits

VC 201E Voice Primary 2 Credits

VC 201F Voice Primary 1 Credits

VC 201G Voice Primary 2 Credits

VC 203 Voice Secondary 1 Credits

VC 291 The Singing Actor 2 Credits

The introduction to vocal performance entails coaching of selected songs, arias or repertoire from music theater and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

Prerequisite(s): successful completion of Level I voice jury.

VC 301A Voice Primary 2 Credits

VC 301B Voice Primary 1 Credits

VC 301C Voice Primary 2 Credits

VC 301E Voice Primary 2 Credits

VC 301F Voice Primary 1 Credits

VC 301G Voice Primary 2 Credits

VC 305 Singing in Italian and French 2 Credits

Master class and private coaching in vocal performance of Italian and French language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung Italian and French.

Prerequisite(s): Successful completion of Level I jury; VC 118, VC 119.

VC 306 Singing in German and English 2 Credits

Master class and private coaching in vocal performance of German and English language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung German and English.

Prerequisite(s): Successful completion of Level I Jury; VC 120.

VC 401A Voice Primary 2 Credits

VC 401B Voice Primary 1 Credits

VC 401E Voice Primary 2 Credits

VC 401F Voice Primary 1 Credits

VC 401G Voice Primary 2 Credits

VC 408 Voice Science 3 Credits

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

VC 433 Song Literature I 2 Credits

A survey of solo literature for voice and accompanying instrument including solo vocal music of the Baroque period and German lieder.

Prerequisite(s): MH 248.

VC 434 Song Literature II 2 Credits

A survey of solo literature for voice and accompanying instrument including French mélodie, songs by nationalist composers, English and American song.

Prerequisite(s): MH 248.

VC 457 Private Coaching 2 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 457 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 458 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 458 Private Coaching 1 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 457 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 458 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 467 Private Dramatic/Role Coaching 2 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 467 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 468 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 468 Private Dramatic/Role Coaching 1 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 467 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 468 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed.

Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

General Policies

General Policies and Program Requirements for the Master of Music (M.M.), Master of Music Education (M.M.E.) and Master of Voice Pedagogy (M.V.P.)

General Policies (p. 1193) and Requirements (p. 1193)

Graduation with Distinction (p. 1194)

Graduate Assistantships (p. 1194)

Graduate Oral Exams (p. 1194)

General Policies and Requirements

- An applicant for admission as a graduate student must, by the time of initial enrollment, provide documentation of having earned a baccalaureate degree, normally, but not necessarily, with a major in music.
- International students also should review "Admission as an International Student" in the Admissions section of this catalog for additional information and requirements.
- All entering students in the M.M. degree take placement tests in order to determine the level of their skills in a variety of areas. Please refer to "Placement Exams" in the Admissions section of this catalog. Also, please consult the Graduate Hearings and Placement Testing page on the University website.
- Graduate students must earn minimum grades of "Y" or "B-" in all courses mandated to remove deficiencies in musical preparation, as determined by placement examinations at the time of initial enrollment. If a grade of "Z" or "C+" or lower is earned, the course must be repeated.
- All degree requirements must be completed within seven years of initial enrollment. Students who have not completed a degree within this time may be required to repeat courses and/or to meet further requirements. If more than one year has elapsed since the date of last enrollment, students may be required to re-apply and re-audition for the program, and must meet all requirements in place at the time of their readmission.
- A minimum cumulative or semester grade point average of 3.00 must be maintained at all times. Students who fall below this level may become ineligible to receive graduate awards and are placed on conditional academic standing. Students in this situation place themselves at risk of academic dismissal. Grades earned in courses offered through Continuing Education are recorded but are not factored into the grade point average. A 3.0 cumulative grade point average is required for graduation, and students must be removed from Conditional Academic Standing to be eligible for graduation.
- Only courses carrying graduate credit may be counted toward master's degree requirements.
- Choral Conducting, and Organ Performance majors must demonstrate, by means of examination or of transcript grades, a reading knowledge of either French or German equivalent to two years of study at the college level. Piano Accompanying and Coaching majors must present one year each of college-level study in French and German. Voice Pedagogy and Performance majors must present one year each of college-level study in two of the following languages: French, German, and Italian. Grades of C- or below are not accepted as a demonstration of these skills. Graduate credit is not awarded for foreign language study. A score of 3 on the AP (Advanced Placement) test or a score of at least 65 on CLEP tests is sufficient for language deficiency removal for graduate students providing that these tests were taken within the previous 5 years.
- Undergraduate foreign language study is sequential, each course being prerequisite to the next. A minimum grade of C is required for advancement to the next level. Grades of C- or below will not be accepted. Placement tests are offered for students who have a background in French, German or Italian. Advanced standing may be approved, but credit is not awarded except by transfer of credits earned in foreign language study at the college level. Most graduate students must demonstrate proficiency in foreign languages or show transcript evidence of completion of college level study as indicated below. Native speakers may be exempted from taking a course in their native language by the Dean or by recommendation from the appropriate language instructor. This exemption does not receive credit, but fulfills graduate language requirements in that language.
- All graduate Voice, Choral Conducting, and Piano Accompanying and Coaching majors must take a proficiency examination in English, Italian, French and German Diction, and the International Phonetic

Alphabet. For students who do not pass all or part of the proficiency exam, the Voice Department will recommend courses or other options to prepare to re-take the exam. Students who do not pass the proficiency exam must re-take and pass the examination as a graduation requirement.

- Graduate students majoring in Organ Performance, or Choral Conducting must demonstrate a reading proficiency in either French or German in order to pass out of LL 640 and LL 641 by taking a translation proficiency test for graduate students offered during the week of orientation; or must provide transcript evidence of successful completion (minimum C grades) of two years of college study in one of those languages; or may take either LL 640 or LL 641 to satisfy this requirement.
- Graduate students in Voice Pedagogy and Performance must pass a university administered proficiency examination, both written and oral in two foreign languages, chosen from French, German or Italian; or must provide transcript evidence of successful completion of one year of college study in two of those languages; or may take FRE 100 and FRE 101, ITA 100 and ITA 101, and/or GER 100 and GER 101, to satisfy these requirements. C grades are the minimum acceptable for all foreign language proficiency purposes. Grades of C- or below will not be accepted.
- Graduate students majoring in Piano Accompanying and Coaching must pass a university administered proficiency examination, both written and oral in French and German languages or must provide transcript evidence of successful completion of one year of college study in those languages; or may take FRE 100 and FRE 101, and GER 100 and GER 101, to satisfy these requirements. C grades are the minimum acceptable for all foreign language proficiency purposes. Grades of C- or below will not be accepted.
- Graduate students pursuing the M.M. or M.M.E. degrees must earn credit for at least two terms of choral ensemble experience.
- All graduate students must pass a final oral examination in each major field. The oral examination may be scheduled only after completion of any and all non-credit-bearing courses being taken to remove deficiencies in musical preparation, and upon approval by the student's academic advisor. This stipulation does not apply to foreign language courses being taken to establish proficiency levels. The oral examination must be completed by the deadline published in the calendar section of this catalog. Please see "Oral Examinations" in the Academic Policies section of this catalog. Further information is available on the website at Graduate Programs - Music Education . (<http://www.rider.edu/wcc/academics/graduate-programs/music-education/>)
- A maximum of six graduate credits may be earned by transfer from other institutions with departmental approval. Credit by examination is not awarded at the graduate level except in the case of applied music. In the case of course waivers, the credits involved must be replaced with other elective course credits, unless stated otherwise by the department offering the course.
- Apart from workshops taken to satisfy choral ensemble requirements, students pursuing the M.M. or M.V.P. degree may present toward "Electives" a maximum of six Continuing Education credits. Students pursuing the M.M. or M.V.P. degree may present toward "Electives" a maximum of two credits of choral ensemble participation beyond "Core" requirements. Students pursuing the M.M.E. degree may present toward "Electives" a maximum of twelve summer workshop credits. After the completion of primary applied lesson requirements, students may enroll in elective applied lessons and count those credits towards "Free Electives." Elective applied lessons carry a

fee. In some degree programs, "Electives" must be chosen from discrete lists of courses unless otherwise approved by the major field department.

- Students must register for applied study during the term when they plan to give a voice, organ, piano, or composition recital, unless this requirement is specifically waived by the applied department.
- Students in the M.M.E and M.V.P. programs must register for 1 hour of thesis credit or one hour of capstone credit in the semester or summer term in which work begins, in the semester or summer term in which work is completed, and in any other semester or summer term in which assistance is provided by the thesis or capstone advisor.
- Commencement: Academic year requirements extend through the annual spring Commencement. All students enrolled in required ensembles (Chapel Choir, Schola Cantorum, Symphonic Choir) are required to participate in Commencement unless excused under extraordinary and unavoidable circumstances, such as serious illness. All other students are encouraged to participate in Commencement. In particular, credit for spring semester choir participation is lost if a student does not attend and is not excused from Commencement. Students participating with the members of the graduating classes are required to purchase or rent appropriate academic regalia, available through the college store.
- In addition to the information given here and on the following pages, students are referred to individual department handbooks for additional information and requirements.

Graduation with Distinction

Graduate students are graduated *with distinction* upon earning a cumulative grade point average of 3.85 in all 500-, 600-, and 700-level courses.

Graduate Assistantships

A limited number of assistantship positions and graduate scholarships are available to full-time graduate students. Interested students should visit the graduate assistantship website (<https://www.rider.edu/careers/events-resources/graduate-assistantships/>).

Graduate Oral Exams

General information

1. All students pursuing the M.M., M.M.E., or M.V.P. degree at Westminster Choir College of Rider University must pass a final oral examination.
2. The oral examination normally occurs during the last semester in which a student is enrolled prior to graduation.
3. **All courses required to remediate academic deficiencies in Musicianship and Music History must be completed successfully by the end of the semester prior to the oral examination.**
4. The oral examination must be completed by the deadline published in the Academic Calendar (p. 1149) in this catalog.
5. Students who elect to pursue multiple graduate programs must pass a separate final oral examination in each major area.
6. Students who have not passed all portions of the oral exam must be re-examined within one year from the date of the original or previous exam. Students failing to meet this deadline or who have not passed the oral examination after three attempts are no longer considered degree candidates and become ineligible to graduate.

7. Students must apply to schedule the oral examination by November 1 for a fall examination, by April 1 for a spring examination, or by June 1 for a summer examination.

Examining Committee

1. The examining committee consists of no fewer than three Westminster **music** faculty members, full-time or adjunct, including two from the student's major area, and one member of the student's choice from outside the major area.
2. Departments may establish their own policies for membership on the major area portion of the examining committee.

Structure and Content of Examination

1. The structure and content of the examination should support the general philosophy of graduate education, as previously endorsed by the Westminster Academic Policy Committee, which states:

Critical thinking is to be encouraged throughout the curriculum. Students should acquire a musicological sensibility and the ability to engage in a logical discourse about varied aspects of the art. In addition to overall musical competency, true expertise is required in a particular area. At the conclusion of their studies, students should have an understanding of what remains to be learned and the tools to continue their education throughout their lives. They should be fully prepared to embark upon—or continue in—their professional lives as performers, composers, teachers, ministers of music, conductors, doctoral students, and as vigorous advocates for music.

While specific content is left to the discretion of the department, the examination should be designed to demonstrate the student's ability to engage in a logical discourse in the major area and its relationship to various aspects of the art, and should transcend the mere recitation of factual information.

Departments will create written guidelines to assist students in preparing for the examination, which will be distributed to students at the onset of their graduate studies.

2. The Director of Graduate Studies will periodically attend examinations as a fourth, non-voting, member to ensure a degree of interdepartmental consistency in content and the standards to which students are held. The DGS will report his/her findings to the Graduate Committee and the WAPC for future review.

American and Public Musicology

Program Overview

Westminster Choir College's master of music program in American and public musicology focuses on preparing students for careers inside and outside of academia. As the first graduate program in North America to require coursework in public musicology, Westminster's program looks beyond traditional music history and research to consider musicology as a practice in civic engagement.

This degree prepares students for doctoral studies in musicology, ethnomusicology and music theory. It also prepares students for careers as entrepreneurial performers, arts administrators or writers, or for positions with arts foundations, historical societies, performing arts centers, education departments or museums.

Curriculum Overview

Students in the American and public musicology program study with many of the best-known names in music, as well as with education directors at performing arts centers and museums, digital archivists, music journalists, oral historians and musicologists involved in K-12 education. They will develop research skills associated with a typical musicology degree while also exploring American music and the cultural relevance and influence of music.

Students work closely with world-renowned faculty who are accessible and involved in the learning process. They learn and collaborate with the nation's best public musicologists and experts in American music, and build their resume while performing in Westminster Choir College's acclaimed Symphonic Choir.

CR 509 Symphonic Choir 1 Credits

A large mixed chorus comprised of students above the lower division, including graduate students from all disciplines. The ensemble regularly performs in the region and focuses on the major choral/orchestral repertoire along with a wide variety of repertoire for large mixed chorus. Placement hearing required.

MH 635 Public Musicology 3 Credits

A graduate-level introduction to the many ways musicology can engage with communities and events outside the academy. Topics include music criticism, oral history, museum education, archives, and cultural tourism. **Prerequisite(s):** Graduate Standing; removal of all Music History deficiencies.

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

MH 733 Seminar in Music History 3 Credits

The content of the course will vary with the special interests and qualifications of the professor teaching it.

Prerequisite(s): Removal of all music history deficiencies, it is strongly recommended that MH 731 be taken prior to this course.

MH 734 Proseminar in Music USA 3 Credits

A graduate-level introduction to the scholarly study of music in the U.S. Readings will cover music in Colonial/Early America, Western art music, popular music, and music of various ethnic communities.

Prerequisite(s): Graduate standing; removal of all Music History deficiencies.

MH 750 Thesis I 3 Credits

Independent research under faculty supervision leading to a master's thesis. Students register for this course in their first term of thesis research.

Prerequisite(s): Graduate standing, removal of all Music History deficiencies.

MH 751 Thesis II 3 Credits

Independent research under faculty supervision leading to a master's thesis. Students register for this course beginning in their second term of thesis research.

Prerequisite(s): Graduate Standing, removal of all Music History deficiencies, MH 750.

Master of Music: Choral Conducting

Program Overview

The graduate conducting program trains conductors to be creative, thoughtful, and technically proficient musicians. Students are admitted by audition. Opportunities for choral performance on a professional level are unparalleled.

Curriculum Overview

Graduate conductors take a core curriculum of research, literature, conducting, pedagogy, and ensemble. One year of choral literature is followed by elective courses in performance practice, seminars in choral literature, analysis, vocal pedagogy and related topics. The conducting sequence includes two semesters of choral conducting courses followed by two semester of applied study. Students conduct a series of four to five recitals culminating in a major recital project with one of Westminster Choir College's core ensembles.

Ensemble singing is a key element of the curriculum. Students sing in a range of large and small ensembles. Learning repertoire through performance is a key tenet of Westminster Choir College. Please see our department webpage (link) for additional information.

Courses and Descriptions

CR 505 Advanced Conducting 3 Credits

A continuation of the conducting studies begun in CR 215 and CR 315, this course aims to be more student-centered, following the process from repertoire planning to the final performance. Intensive score preparation, advanced rehearsal techniques, performance practice and baton technique.

Prerequisite(s): CR 315.

CR 509 Symphonic Choir 1 Credits

A large mixed chorus comprised of students above the lower division, including graduate students from all disciplines. The ensemble regularly performs in the region and focuses on the major choral/orchestral repertoire along with a wide variety of repertoire for large mixed chorus. Placement hearing required.

SM 509 Jubilee Singers 1 Credits

This auditioned ensemble is devoted to the performance of sacred music from the African-American tradition.

CR 511 Westminster Choir 1 Credits

A highly select ensemble that performs and records a wide variety of choral repertoire, the Westminster Choir regularly tours nationally and internationally, and aspires to the highest professional standards. Members are selected by audition from all Westminster students above the freshman level. The requirements for selection include good academic standing, strong musicianship, and superior vocal talent. Auditions are held in the fall semester and students participate for the academic year.

CR 513 Williamson Voices 1 Credits

A chamber choir with a unique mission that combines performance and outreach education. Repertoire is chosen from a broad spectrum of literature, including world music and contemporary choral works. Auditions are held in the fall semester and students participate for the academic year.

CR 515 Westminster Kantorei 1 Credits

An early music vocal chamber ensemble specializing in music before 1750, with occasional forays into more contemporary repertoire. [Although the ensemble will generally consist of around 16 singers, the exact make-up of the ensemble will vary from semester to semester, depending on the works to be studied and performed.] Repertoire will include works for vocal ensemble and works featuring significant solo work. The entire ensemble will rehearse three hours per week. Keyboardists may audition for the ensemble. Auditions are held in the fall semester and students participate for the academic year.

CR 517 Master Singers 1 Credits

A mixed ensemble serving as the choir for Graduate Conducting, Sacred Music and Music Education majors. Repertoire consists of a wide variety of choral works drawn from all style periods, works appropriate for use in churches and in schools at the secondary and post-secondary levels. Four semesters are required for all graduate Choral Conducting majors. Two semesters are required for Sacred Music majors, and those Music Education majors who have selected conducting as their performance field. This ensemble is non-auditioned and open to all students.

SM 519 Concert Handbell Choir I 1 Credits

A choir selected by audition from the most experienced and capable bell ringers among the student body at large. This ensemble utilizes advanced repertoire and techniques, aiming primarily at presenting concerts both on and off campus, including a two-week annual tour.

CR 524 Vocal Techniques for Choirs 3 Credits

Study of vocal techniques appropriate for use in choral rehearsals and for teaching class voice. Techniques for effecting change in group vocal productions are discussed, including such topics as the identification of group vocal problems and mental and physical preparation of a group for good vocal production. Techniques to be developed include (1) how to communicate information about vocal technique to amateur singers, (2) exercises used to develop choral sound by improving diction, dynamics, legato, staccato, martellato, high and low registers, resonance, vowel modification, etc., (3) how to train singers to use a vocal production specifically appropriate to the repertoire of various style periods and the demands of individual composers, and (4) conducting methods for good choral and vocal training. Recommended both for conducting majors and for students in other major programs, including those for whom the voice is not the primary performance medium.

CR 607 Conducting Performance 1 Credits

Graduate Conducting, Sacred Music and Music Education students (with a conducting concentration) enroll for Conducting Performance in the semester of their recital or major conducting project.

CR 621 Choral Conducting I 3 Credits

A study of conducting to develop technique through facial expression, breathing, alignment and gesture. Emphasis is placed on developing and refining a process of score study. This course will assist conductors in evaluating their conducting and preparing them to make conducting decisions based upon score study.

CR 622 Choral Conducting II 3 Credits

In addition to building on the conducting skills taught in Conducting I, this course will focus upon acquisition of a broad range of rehearsal methods and techniques and gaining a comprehensive knowledge of choral ensemble warm-up philosophies, methods and techniques. Conductors will continue to study various approaches to score analysis that aid in preparation for rehearsal. Participants in the course will be required to submit a comprehensive case study which focuses on rehearsal technique and rehearsal procedures.

Prerequisite(s): CR 621.

CR 624 Conducting Skills 3 Credits**CR 628 Choral Literature II 3 Credits**

A study of selected major choral works, involving analytical and stylistic study. Oral reports by class members on assigned topics.

CR 641B Conducting Primary 1 Credits**CR 641D Conducting Primary (Elective) 1 Credits****CR 641F Conducting Primary 1 Credits****CR 681 Baroque Performance Practice 3 Credits**

A practical and theoretical study of issues of Baroque performance practice, including tempo, phrasing and articulation, ornamentation, rhythmic alternation, qualities of sound, continuo practice, influence of dance, affect and national idioms. Primary source materials will serve as the basic core of readings for the course, supplemented and supported by recordings and contemporary resources. In the later half of the semester, students will perform in a series of master classes.

Prerequisite(s): for undergraduates MH 248, TH 241.

CR 690 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

CR 710 Seminar in Choral Literature 3 Credits

An intensive study of a specific area of choral history and literature. The content of this course will vary from semester to semester with the special interests and qualifications of the professor teaching it. Emphasis is placed upon in-depth study of the selected repertoire. May be repeated for credit.

Prerequisite(s): undergraduate must have Permission of Instructor.

CR 720 Graduate Conducting Forum 1 Credits

A conducting seminar that focuses on the synthesis of gesture, score study and pedagogy. Select repertoire and research materials will be conducted, analyzed and discussed. Focus will be given to orals preparation and current choral conducting issues. This course may be repeated for credit.

Master of Choral Pedagogy

Program Overview

The Master of Choral Pedagogy Curriculum includes courses in voice science, choral rehearsal pedagogy, choral literature, and music education. It emphasizes the process of rehearsing, the psychology of learning, and educational philosophy. At least one course required to fulfill this degree is offered online each semester. Coursework is also offered during Westminster's six-week Summer Session, allowing degree candidates to maintain performance schedules and teaching jobs during the year. Students may also take part in the numerous summer workshops offered through the Westminster Office of Continuing Education, including the Choral Institute at Oxford.

Curriculum Overview

At least one course required to fulfill this degree is offered online each semester. Coursework is also offered during Westminster's six-week Summer Session, allowing degree candidates to maintain performance schedules and teaching jobs during the year. Students may also take part

in the numerous summer workshops offered through the Westminster Office of Continuing Education, including the Choral Institute at Oxford.

The Master of Choral Pedagogy Curriculum includes courses in voice science, choral rehearsal pedagogy, choral literature, and music education. Unlike traditional conducting degrees, the curriculum emphasizes the process of rehearsing, the psychology of learning, and educational philosophy.

Courses and Descriptions

CR 524 Vocal Techniques for Choirs 3 Credits

Study of vocal techniques appropriate for use in choral rehearsals and for teaching class voice. Techniques for effecting change in group vocal productions are discussed, including such topics as the identification of group vocal problems and mental and physical preparation of a group for good vocal production. Techniques to be developed include (1) how to communicate information about vocal technique to amateur singers, (2) exercises used to develop choral sound by improving diction, dynamics, legato, staccato, martellato, high and low registers, resonance, vowel modification, etc., (3) how to train singers to use a vocal production specifically appropriate to the repertoire of various style periods and the demands of individual composers, and (4) conducting methods for good choral and vocal training. Recommended both for conducting majors and for students in other major programs, including those for whom the voice is not the primary performance medium.

CR 621 Choral Conducting I 3 Credits

A study of conducting to develop technique through facial expression, breathing, alignment and gesture. Emphasis is placed on developing and refining a process of score study. This course will assist conductors in evaluating their conducting and preparing them to make conducting decisions based upon score study.

CR 625 Choral Pedagogy 3 Credits

This online course reorganizes the components of choral rehearsal technique to reflect a harmonic approach to rehearsing, teaching, and learning. It is designed to emphasize the importance of teaching audiation and rehearsing choirs within a harmonic context.

CR 627 Choral Literature I 3 Credits

A broad survey of choral repertoire from Gregorian chant to present-day compositions. Emphasis is placed upon knowing the availability and sources of music of major composers and of music appropriate for performance in today's churches and schools.

CR 628 Choral Literature II 3 Credits

A study of selected major choral works, involving analytical and stylistic study. Oral reports by class members on assigned topics.

CR 750 Choral Pedagogy Capstone 3 Credits

Independent research leading to a completed capstone project such as pedagogical publication or presentation, development of an original or unique method of instruction, instructional materials, or case study, or musical performance. The project must be approved by the department.

ME 682 Choral Music Education 3 Credits

This course is designed to assist choral music educators to improve their pedagogical effectiveness. This course will provide students with the knowledge, skills and dispositions necessary for developing comprehensive musicianship in the choral ensemble setting through the study of creating original music, responding to music, connecting to students and performing vocal/choral music with a primary focus on choral pedagogy, curriculum development, unit and rehearsal planning, programming, vocal development, program management, music literacy pedagogy, music technology and assessment.

Prerequisite(s): CR 621, ME 692, ME 721, ME 723.

ME 692 Social Justice in Music Education: History, Philosophy, and Practice 3 Credits

The purpose of this course is two-fold. First, the course will explore the historical perspectives that have significantly shaped and informed music teaching and learning within American public education during the last century. Second, students will encounter, engage with, and interrogate philosophies and theories of practice from social justice perspectives in order to critically consider the place and purpose of music and music education within educational and societal contexts.

ME 721 Curriculum Development & Evaluation 3 Credits

This course examines the relationship between curriculum theory and philosophy of music education. Through the study of traditional and contemporary models of curriculum development and evaluation, students broaden their understanding of curriculum as it impacts the learning process. Post modern theory consistent with the Department's commitment to Critical Pedagogy for Music Education provide the focal point for the development of curricula that enhance and support quality music education. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

ME 723 Social, Emotional, and Musical Learning 3 Credits

This course examines topics in psychology of music from the lens of social emotional learning. This theoretical lens will allow students to find the relationships between music-making as social and cultural practices and the development of individual and collective psychological process in music teaching and learning. Major topics include affective and physiological responses to music, musical enculturation, learning theory, well-being and wellness, musical aptitude, developmental processes, and motivation. Students will discuss literature in the psychology of music with applications to K-12 music classes and rehearsals and conduct a pilot study in an area of interest based upon knowledge from the literature.

ME 771 Critical Pedagogy for Music Ed 3 Credits

This course presents the fundamental concepts, contexts and constructs that define Critical Pedagogy for Music Education. It focuses on the application of critical theory as a philosophical perspective to inform decisions teachers make when planning instruction for their students.

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

SM 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity. Offered in rotation with other Sacred Music electives. 3 Credit hours.

SM 710 Panorama of Sacred Music 3 Credits

This graduate-level course is a one-semester survey of those masterworks and significant musical movements that have shaped the evolution of Western Sacred Music. Beginning with the Old Testament, this course will move through all eras, highlighting important composers and liturgical trends, placing them in their appropriate cultural and theological contexts.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 724 Voice Pedagogy II: Methods 3 Credits

A comparative study of various pedagogical methods and ideals. A wide range of important historical and contemporary pedagogy treatises is reviewed. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student.

Master of Music: Composition

Program Overview

Rider's program in composition, music history and theory aims to develop the aural skills needed by all musicians, to provide the necessary theoretical knowledge for the continuing study and performance of music, to develop analytical and esthetic understanding of music forms and styles, and to foster the creative impulse in music.

Curriculum Overview

Composition majors are expected to write works for soloists, for chamber ensembles, and for large wind or orchestral ensembles. The department welcomes diversity of compositional styles and esthetic viewpoints and encourages exploration on the part of its students. The program culminates with a recital of original music written while a student is enrolled at Westminster.

Elective courses provide students with opportunities to apply their skills to specific areas of inquiry after satisfying specific prerequisites.

Westminster maintains a music computing facility in which students can compose, orchestrate, and print their compositions in publishable quality using computers interfaced with sampler/synthesizers as well as sequencing and music printing software.

Courses and Descriptions**CR 509 Symphonic Choir 1 Credits**

A large mixed chorus comprised of students above the lower division, including graduate students from all disciplines. The ensemble regularly performs in the region and focuses on the major choral/orchestral repertoire along with a wide variety of repertoire for large mixed chorus. Placement hearing required.

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

TH 645A Composition Primary 3 Credits**TH 550 Keyboard Harmony 3 Credits**

An intense exploration of and drill in musicianship-keyboard skills, including score reading, transposition, modulation, clef reading, figured bass realization, harmonizing melodies, improvising and lead sheet accompanying. Projects may include transposition of a number of songs (perhaps a complete set) into all keys, figured bass realization for a Bach cantata, improvisation of service music (prelude, offertory, interludes, chorale preludes, postlude), multiple re-harmonizations of hymns/chorales for a service and score reduction and performance of a movement of an orchestral work. May be taken as an undergraduate level II theory elective.

Prerequisite(s): Undergraduate, minimum "C-" grade in TH 241; Graduate, Removal of all theory deficiencies.

TH 622 Electroacoustic Music 3 Credits

Advanced opportunities for creative activities utilizing the resources of Westminster's Music Computing Center. Previous experience with sequencers and/or digital audio is expected.

Prerequisite(s): Removal of all music theory deficiencies.

TH 623 Seminar in Music Theory 3 Credits

The content of the course bearing this number will vary with the special interests and qualifications of the professor teaching it.

Prerequisite(s): Undergraduate, minimum "C-" grade in TH 241 and permission of instructor, or graduate student standing and removal of all music theory deficiencies.

TH 655 Composition Project 3 Credits

Graduate-level private study in composition culminating in a major composition in one of the larger forms.

Prerequisite(s): three semesters of TH 645.

TH 726 Analysis 3 Credits

A study of the compositional process as observed in selected tonal works, using the analytical approach of Heinrich Schenker.

Prerequisite(s): Removal of all music theory deficiencies.

Master of Music Education (M.M.E.)**Program Overview**

Designated for music educators who want to enhance their impact, the MME program helps students to improve as educators and make positive change in their classrooms and school communities. Students design their own 12-credit "focus-area" of courses tailored to their particular interests and goals and learn skills and techniques that can be immediately applied to their current teaching or used as preparation for doctoral work. Example areas of focus include choral pedagogy, choral conducting, voice pedagogy, Kodály (with certification) and music technology.

The degree is for individuals with significant music teaching experience. Students do not earn teacher certification through this degree program.

The MME program may be completed part-time through online classes and summer study or over two academic years.

Music Education Courses Online

The following music education courses are offered in rotation during the summer in an online format. Students in the MME or BM-MME programs may take either the traditional or online format to complete their degree. Students in other degree programs may take these courses as free electives:

Code	Title	Credits
ME 685	Improving Musical Practice: Research in Music Education	3
ME 692	Social Justice in Music Education: History, Philosophy, and Practice	3
ME 721	Curriculum Development & Evaluation	3
ME 723	Social, Emotional, and Musical Learning	3
ME 693	Seminar in Music Educ	3

CP 640 Creative Practices in Choral Pedagogy is offered online during summer and may be used as an elective in graduate music education.

Degree Offered:

- Master of Music Education

Faculty

Jason Vodicka (chair) • Associate Professor, Music Education, 2018. B.M., M.M., Westminster Choir College; D.M.A., University of Georgia.

Frank Abrahams • Professor Emeritus, Music Education, 1992. B.M.E., Temple University; M.M., New England Conservatory; Ed.D., Temple University.

Sangmi Kang • Assistant Professor, Music Education, 2018. B.M., M.M., Seoul National University; Ph.D. University of Florida.

Maureen Murphy-Fernandez • Adjunct Instructor, Music Education, 2016. B.S., West Chester University.

Marshall Onofrio • Professor, Music Education, 2007. B.M., B.S., University of Connecticut; M.M., University of Illinois; M.M., University of Nebraska-Lincoln; D.M.A., The Ohio State University.

Sarah Perry • Assistant Professor, Music Education, 2021.

G. Preston Wilson, Jr. • Assistant Professor, Music Education, 2021. B.M., Fisk University; M.M., Bowling Green State University.

Master of Music Education (M.M.E.) Program Requirements

(32-33 credits)

Designed for music educators who want to enhance their impact, the MME program helps students to improve as educators and make positive change in their classrooms and school communities. Students design their own 12-credit "focus area" of courses tailored to their particular interests and goals and learn skills and techniques that can be immediately applied to their current teaching or used as preparation for doctoral work. Example areas of focus include choral pedagogy, choral conducting, voice pedagogy, Kodaly (with certification), and music technology. The MME degree culminates in either a theses or capstone project.

The degree is for individuals with significant music teaching experience; students do not earn teacher certification through this degree program.

The MME program may be completed part-time through online classes and summer study or over two academic years.

Learn more about General Graduate Requirements. (p. 1193)

Free Elective		3
Area of Emphasis ⁴		9
Total Credits		32-33

¹ ME 685 prepares students to write the thesis for the course ME 650. With permission of the Music Education Department, however, students may substitute MH 731, Introduction to Musicology. Students should plan on at least one full year to complete the thesis after taking a research course.

² Students may take any approved WCC Ensemble, including CR 509 Symphonic Choir; CR 513 Williamson Voices; CR 515 Westminster Kantorei; CR 517 Master Singers; SM 509 Jubilee Singers; SM 519 Concert Handbell Choir I; Choral Institute at Oxford; Conducting Institute; Summer Choral Festival, or another WCC ensemble by approval of the department chair.

³ The core elective must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis, and/or area of applied study.

⁴ Emphasis must be formally presented to the department chair or advisor for approval. Suggested courses include Seminar in Music Education, Curriculum Development, Pedagogy and Practicum, Conducting, Conducting Institute, Oxford, Choral Pedagogy Institute, Kodaly I, II, III, ATM4, VC/OR/PI study, Theory/Comp., Music Theatre, Popular Music, CP, MVP courses, School of Ed. courses, etc.

Notes:

- Students may elect to complete New Jersey approved teacher certification courses at the undergraduate level in conjunction with this degree program. Courses taken at the undergraduate degree level do not count towards the completion of the MME degree. Candidates who wish to complete teacher certification must plan on three semesters of study during the academic year.
- Students complete a thesis as the capstone experience in the degree. Information about the thesis is contained in the Music Education Thesis and Capstone Handbook (http://www.rider.edu/sites/default/files/docs/wcc_musiced_grad_thesis-2016.pdf) found on the Music Education website. Students should plan at least one year to complete the thesis.

Courses and Descriptions

ME 650 Thesis 1 Credits

Independent research under faculty supervision leading to the writing of a master's thesis. Students register for this course in every semester or summer term in which assistance is provided by the thesis advisor.

Prerequisite(s): ME 685 (preferred) or MH 731; Permission of the Chair for Music Education is required to register for this course.

ME 682 Choral Music Education 3 Credits

This course is designed to assist choral music educators to improve their pedagogical effectiveness. This course will provide students with the knowledge, skills and dispositions necessary for developing comprehensive musicianship in the choral ensemble setting through the study of creating original music, responding to music, connecting to students and performing vocal/choral music with a primary focus on choral pedagogy, curriculum development, unit and rehearsal planning, programming, vocal development, program management, music literacy pedagogy, music technology and assessment.

Prerequisite(s): CR 621, ME 692, ME 721, ME 723.

ME 685 Improving Musical Practice: Research in Music Education 3 Credits

Intended for students in the MME and BM-MME degree programs, this course focuses on research as a tool for improving practice. Course members will read qualitative and quantitative research studies and consider the impact of research on their teaching. Course members will also plan and conduct original research that will help them to analyze their specific teaching contexts, identify and conduct inquiry into problems, and refine their practice as educators.

ME 692 Social Justice in Music Education: History, Philosophy, and Practice 3 Credits

The purpose of this course is two-fold. First, the course will explore the historical perspectives that have significantly shaped and informed music teaching and learning within American public education during the last century. Second, students will encounter, engage with, and interrogate philosophies and theories of practice from social justice perspectives in order to critically consider the place and purpose of music and music education within educational and societal contexts.

ME 693 Seminar in Music Educ 3 Credits

While the topics vary from year to year, international perspectives in music education form the foundation for this seminar.

ME 721 Curriculum Development & Evaluation 3 Credits

This course examines the relationship between curriculum theory and philosophy of music education. Through the study of traditional and contemporary models of curriculum development and evaluation, students broaden their understanding of curriculum as it impacts the learning process. Post modern theory consistent with the Department's commitment to Critical Pedagogy for Music Education provide the focal point for the development of curricula that enhance and support quality music education. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

ME 723 Social, Emotional, and Musical Learning 3 Credits

This course examines topics in psychology of music from the lens of social emotional learning. This theoretical lens will allow students to find the relationships between music-making as social and cultural practices and the development of individual and collective psychological process in music teaching and learning. Major topics include affective and physiological responses to music, musical enculturation, learning theory, well-being and wellness, musical aptitude, developmental processes, and motivation. Students will discuss literature in the psychology of music with applications to K-12 music classes and rehearsals and conduct a pilot study in an area of interest based upon knowledge from the literature.

ME 771 Critical Pedagogy for Music Ed 3 Credits

This course presents the fundamental concepts, contexts and constructs that define Critical Pedagogy for Music Education. It focuses on the application of critical theory as a philosophical perspective to inform decisions teachers make when planning instruction for their students.

ME 775 MME Capstone 1 Credits

Independent research leading to a completed capstone project, such as curriculum and assessment development, pedagogical publication or presentation, instructional materials, etc. The project must be approved by the department.

Master of Music: Organ Performance

Program Overview

The Organ Department of Westminster Choir College educates students in many facets of organ playing and related topics. Courses in performance, collaborative skills, choral conducting, improvisation, and literature are offered each semester. Westminster Choir College is home to a collection of 18 pipe organs built by Aeolian-Skinner, Beckerath, Casavant, Flentrop, Noack, and others. Students are encouraged to seek church employment during their time at Westminster; the organ faculty and sacred music office maintain a list of available positions in the area. For more information, including audition requirements and instrument specifications, visit the Organ Department website (<http://www.rider.edu/organ/>).

Curriculum Overview

The graduate curriculum includes four semesters of applied lessons, three semesters of organ literature, two semesters of organ improvisation, and courses in choral conducting, worship planning, and accompanying.

Degree Recital Requirements

One fully-memorized recital or two non-memorized recitals:

- Recitals must be at least 60 minutes.
- Students are required to be enrolled in organ lessons at Westminster Choir College during the semester of a degree recital, without exception.

Performance Class Requirements

For each semester a student is enrolled in organ lessons as a performance major, the following requirements must be met:

- **Three solo works**, one of which must be memorized.
- **Two hymns**, one of which must be memorized.
- **One collaborative work** (i.e. anthem, vocal/instrumental solo, concerto, etc.)

Jury Requirements

- A jury must be performed at the conclusion of any semester that does not include a degree recital.

Degree Offered

- M.M. in Organ Performance

Courses and Descriptions

OR 587 Organ Improvisation 2 Credits

A laboratory in the keyboard disciplines of modulation, transposition, improvisation and vocal score reading. Required for undergraduate Organ Performance majors; others may elect the course by permission of the instructor.

OR 588 Organ Pedagogy 2 Credits

Pedagogical approaches to organ playing. Required for undergraduate Organ Performance majors; others may elect the course by permission of the instructor.

OR 589 Organ Improvisation II 2 Credits

Continuation of OR 587.

OR 590 Accompanying at the Organ 2 Credits

Development of accompanying techniques essential to the professional organist. Arranging and transcription from piano reductions and orchestral scores; standard choral/organ literature. Leading congregational song; appropriate methods of instrumental registration.

OR 623 Organ Music of J.S. Bach 3 Credits

A study by genre of Bach's organ compositions will include background, overview of the influences of Buxtehude, Pachelbel and Böhm, and performance practice issues. The question of the "Bach organ" will be explored. Prerequisite(s): MH 731, OR 433.

Corequisite(s): MH 731, OR 433.

OR 629 Seminar in Organ Literature 2 Credits

An intensive study of an area of organ literature or its performance practice. Specific content will change with each semester. Emphasis upon in-depth study of the works of a selected composer or genre.

OR 641A Organ Primary 2 Credits

OR 641B Organ Primary 1 Credits

OR 641C Organ Elective 2 Credits

OR 641D Organ Elective 1 Credits

OR 641E Organ Primary 2 Credits

OR 641F Organ Primary 1 Credits

OR 690 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

OR 723 Organ Literature Before 1800 3 Credits

Historical study of the organ literature coordinated with a study of the development of the organ as a musical instrument.

OR 724 Organ Literature since 1800 3 Credits

Study and research into the style, form, and interpretation of representative organ works composed after 1800. Study and research into national styles of organ composition and construction in France, Germany, England and North America.

Master of Music: Piano Accompanying and Coaching

Program Overview

Westminster's master of music in accompanying and coaching program offers an intensive experience in lieder, choral music and opera coaching.

Westminster's historic commitment to vocal music shapes a curriculum in which literature and languages are taught in every course, celebrating a spirit of investigation, both interpretive and scholarly.

Alumni of the program have served as faculty members and coaches at the Tanglewood Music Center, Academy of Vocal Arts, American Boychoir School, the Curtis Institute, Opera North, Indianapolis Opera, Brevard Music Festival, the Canadian Opera Company, and the San Francisco Opera and Glimmerglass Opera Young Artists' Programs.

Curriculum Overview

Students work closely with their private teacher, while collaborating with graduate and undergraduate singers in a wide variety of literature and engaging in coursework designed to hone their musical, stylistic and linguistic understanding. Two degree-specific recitals as an accompanist are required.

Courses and Descriptions

PI 512 Chamber Music 2 Credits

Emphasis is placed upon rehearsal and performances of representative collaborative literature for strings and piano, and woodwinds and piano. Students will be assigned movements from major chamber works selected from different style periods. Professional instrumentalists will join them for rehearsals and performances in class. An overview of the development of this repertoire will be presented and listening assignments will augment the study of specific works. A project involving the study and presentation of a piano quartet or piano quintet will be included. Attendance at three concerts of instrumental chamber music is required. Permission of applied teacher and instructor is required.

PI 513 Jazz Keyboard/Improv 3 Credits

This course will enable pianists and organists to become familiar with the theory, harmony, and improvisational techniques of jazz piano. Emphasis will be placed upon getting each student to create spontaneous improvisations. The fundamental goal will be that of enabling students accustomed to following a score to move beyond it. Extensive exposure to material from the "Great American Songbook" as well as to jazz standards will provide a structural basis for the course.

Prerequisite(s): TH 142 and PI 201, or equivalent knowledge and technical proficiency.

PI 516 Physical/Psych Aspects Piano 2 Credits

The two major emphases of this course are: (1) the pianist as athlete and 2) the pianist as performer. The first includes a study of appropriate exercise, nutrition, anatomy and physiology as they relate to piano technique, implications for injury prevention, and how to deal with injuries should they occur. The second includes the reading process, strategies for practicing, memorizing techniques, and ways of coping with the behavioral, physical and cognitive manifestations of performance anxiety.

PI 540 Keyboard Skills 3 Credits

The course includes in-depth study of numerous aspects of musicianship skills essential for all pianists within the broader categories of technique and practice strategies; memorization and sight reading; improvisation and lead sheet realization. All aspects of piano musicianship skills will be addressed from practical, pedagogical, and collaborative points of view. Assignments will include examples of studies from a wide range of levels all within the current and developing skill level of each student enrolled in the class.

Prerequisite(s): UG - Eight credits of applied keyboard study or permission of keyboard instructor or course instructor. GR - Permission of course instructor.

PI 585 Piano Ensemble 1 Credits

Study and performance of piano duets, two-piano works, and works for combinations of three or more pianists. The emphasis is on ensemble techniques for rehearsal and performance.

PI 609 Graduate Piano Review 1 Credits

A functional course concentrating upon sight reading of simple piano accompaniments and open score reading. Required for graduate students with deficiencies in these skills.

PI 611 Piano Pedagogy Lab 0 Credits

Discussions will include problem-solving related to piano teaching, discussion of observations, supervised and independent teaching, questions relating to repertoire, materials and technique. Comparative philosophies and psychologies and their applications, group and private teaching, business issues, professional organizations and publications, technology, career planning, recital and audition planning will be included. There will also be guidance in the preparation for the graduate oral examination.

PI 622 Eval Piano Teaching Lit 3 Credits

This course provides a critical survey of piano teaching materials, including standard teaching literature, approaches to piano technique in writings and music exercises, and repertoire for the elementary, intermediate, and early advanced student. All music is analyzed from the perspectives of performance, technical demands, strategies for teacher presentation, and student practice. Applications and demonstrations of technology are included. Graduate students demonstrate teaching and performance strategies in class and carry an assigned teaching load at the Westminster Conservatory.

PI 633 Piano Literature Seminar 3 Credits

A major area of piano repertoire is selected for intensive study. The emphasis of the seminar changes from semester to semester. Possible topics include the development of the Mozart concerto, keyboard works of J.S. Bach, piano writing of Debussy, and 20th Century piano music.

PI 641A Piano Primary 2 Credits**PI 641B Piano Primary 1 Credits****PI 641C Piano Elective 2 Credits****PI 641D Piano Elective 1 Credits****PI 641E Piano Primary 2 Credits****PI 641F Piano Primary 1 Credits****PI 661 Graduate Piano Pedagogy 3 Credits**

This course serves as an intensive study of theoretical and practical aspects of piano study, through examination of instruction materials and developing a well-defined philosophy and approach to piano teaching. Students are challenged to increase their ability in connecting advanced and intermediate music study to the foundation of what should take place in the first weeks of piano lessons. The focus of the course lies in developing one's own curriculum, on its own terms, or associated with instruction materials already in publication. Various methodologies and significant areas of thought in the field of piano pedagogy are explored and compared. The course involves private and group lesson observations at all levels of teaching. Practical application of education theory to music lessons at the piano is done through demonstration and practice teaching at the Westminster Conservatory or the College. Practical application of educational theory to music lessons at the piano is done through demonstration and practice teaching through the Westminster Conservatory or the College.

PI 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

PI 691A Piano Pedagogy Internship I 3 Credits

The two-semester internship includes weekly teaching each semester, faculty observation of this teaching, and private discussion with the faculty observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. Internships may include intensive study of private and/or group instruction, reading for children, working with college, adults, piano minor, gifted students or traditional studio of all ages and levels.

PI 691B Piano Pedagogy Internship II 3 Credits

The two-semester internship includes weekly teaching each semester, faculty observation of this teaching, and private discussion with the faculty observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. Internships may include intensive study of private and/or group instruction, reading for children, working with college, adults, piano minor, gifted students or traditional studio of all ages and levels.

PI 713 Accompanying Class 3 Credits

Students will investigate aspects of ensemble in vocal accompanying. Discussion topics will include rubato and its connection to language, stylistic concerns, musical preparation as well as practical issues such as recital programming and balance. Students will be expected to absorb extensive repertoire through attendance and performance. Class format will include both student presentations and lecture sessions.

PI 714 Techniques of Coaching I 2 Credits

A practical course designed to furnish information and experience in all aspects of vocal coaching, including diction coaching, ornamentation and realization, issues of drama and presentation, stylistic considerations, stage deportment and specialized accompanying skills. Students are observed in the process of coaching singers. Semantics and pedagogical techniques are stressed and polished. Factors involved in translations of Italian, French, German and other non-English texts are studied.

PI 715 Techniques of Coaching II 2 Credits

A practical course designed to furnish information and experience in all aspects of vocal coaching, including diction coaching, ornamentation and realization, issues of drama and presentation, stylistic considerations, stage deportment and specialized accompanying skills. Students are observed in the process of coaching singers. Semantics and pedagogical techniques are stressed and polished. Factors involved in translations of Italian, French, German and other non-English texts are studied.

Prerequisite(s): PI 714.

Master of Music: Piano Pedagogy and Performance

Program Overview

Piano at Westminster Choir College has multiple dimensions at both the undergraduate and graduate levels. It fosters the development of students who perform on a high level as soloists, as artist-teachers and as collaborators with other performing artists. A strong foundation of technique and knowledge of piano literature and style are essential to all the foregoing.

Students majoring in piano pedagogy and performance receive private lessons, study major teaching methodologies, and undertake observation and practice teaching.

Curriculum Overview

The program includes a two-semester teaching internship and culminates in a full recital or else in a combination lecture/performance recital. Semester juries are required. A weekly pedagogy lab is required for two semesters, but recommended for all four semesters.

PI 512 Chamber Music 2 Credits

Emphasis is placed upon rehearsal and performances of representative collaborative literature for strings and piano, and woodwinds and piano. Students will be assigned movements from major chamber works selected from different style periods. Professional instrumentalists will join them for rehearsals and performances in class. An overview of the development of this repertoire will be presented and listening assignments will augment the study of specific works. A project involving the study and presentation of a piano quartet or piano quintet will be included. Attendance at three concerts of instrumental chamber music is required. Permission of applied teacher and instructor is required.

PI 513 Jazz Keyboard/Improv 3 Credits

This course will enable pianists and organists to become familiar with the theory, harmony, and improvisational techniques of jazz piano. Emphasis will be placed upon getting each student to create spontaneous improvisations. The fundamental goal will be that of enabling students accustomed to following a score to move beyond it. Extensive exposure to material from the "Great American Songbook" as well as to jazz standards will provide a structural basis for the course.

Prerequisite(s): TH 142 and PI 201, or equivalent knowledge and technical proficiency.

PI 516 Physical/Psych Aspects Piano 2 Credits

The two major emphases of this course are: (1) the pianist as athlete and 2) the pianist as performer. The first includes a study of appropriate exercise, nutrition, anatomy and physiology as they relate to piano technique, implications for injury prevention, and how to deal with injuries should they occur. The second includes the reading process, strategies for practicing, memorizing techniques, and ways of coping with the behavioral, physical and cognitive manifestations of performance anxiety.

PI 540 Keyboard Skills 3 Credits

The course includes in-depth study of numerous aspects of musicianship skills essential for all pianists within the broader categories of technique and practice strategies; memorization and sight reading; improvisation and lead sheet realization. All aspects of piano musicianship skills will be addressed from practical, pedagogical, and collaborative points of view. Assignments will include examples of studies from a wide range of levels all within the current and developing skill level of each student enrolled in the class.

Prerequisite(s): UG - Eight credits of applied keyboard study or permission of keyboard instructor or course instructor. GR - Permission of course instructor.

PI 585 Piano Ensemble 1 Credits

Study and performance of piano duets, two-piano works, and works for combinations of three or more pianists. The emphasis is on ensemble techniques for rehearsal and performance.

PI 609 Graduate Piano Review 1 Credits

A functional course concentrating upon sight reading of simple piano accompaniments and open score reading. Required for graduate students with deficiencies in these skills.

PI 611 Piano Pedagogy Lab 0 Credits

Discussions will include problem-solving related to piano teaching, discussion of observations, supervised and independent teaching, questions relating to repertoire, materials and technique. Comparative philosophies and psychologies and their applications, group and private teaching, business issues, professional organizations and publications, technology, career planning, recital and audition planning will be included. There will also be guidance in the preparation for the graduate oral examination.

PI 622 Eval Piano Teaching Lit 3 Credits

This course provides a critical survey of piano teaching materials, including standard teaching literature, approaches to piano technique in writings and music exercises, and repertoire for the elementary, intermediate, and early advanced student. All music is analyzed from the perspectives of performance, technical demands, strategies for teacher presentation, and student practice. Applications and demonstrations of technology are included. Graduate students demonstrate teaching and performance strategies in class and carry an assigned teaching load at the Westminster Conservatory.

PI 633 Piano Literature Seminar 3 Credits

A major area of piano repertoire is selected for intensive study. The emphasis of the seminar changes from semester to semester. Possible topics include the development of the Mozart concerto, keyboard works of J.S. Bach, piano writing of Debussy, and 20th Century piano music.

Master of Music: Sacred Music

Program Overview

The sacred music program offers education of the highest quality and broadest scope to sacred music majors who aspire to be leaders of the future.

The program is interdenominational and seeks to explore the excellence of various traditions of sacred music. Faculty members have wide experience and expertise in such traditions as Anglican, Lutheran, Methodist, Presbyterian, Reformed, Roman Catholic, the Synagogue and Temple tradition, and others.

Curriculum Overview

The graduate curriculum aims, on the one hand, to explore how familiar tradition can be blended with unfamiliar contemporary creativity in choral, congregational, and instrumental music for worship and, on the other hand, to provide a balanced study of theoretical matters and practical concerns. Technique, repertoire, and performance practice are therefore considered with theology, Biblical and post-Biblical religious history, and the development and practice of liturgy and worship.

Graduate courses include oratorio solo literature, conducting coaching, worship planning for the 21st century, liturgies, Bach cantatas, history of sacred music and more.

A reciprocal partnership with Princeton Theological Seminary allows Westminster Choir College graduate students to take certain courses offered by the seminary. The seminary's Speer Library is another invaluable resource for Westminster students.

¹ Students selecting Option A must present a half-recital in the applied area. Departmental approval is required for all recitals. For composition primary students, the recital consists of original works composed while the student was enrolled as a graduate student at Westminster Choir College. For composition primary students, TH 625 Composition class, may be required if it is felt that class work in composition is needed prior to private study. Composition primary students must complete TH 726 as the core theory/music history elective.

² The core elective must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis, and/or area of applied study.

Academic Plan of Study

The following educational plan is provided as a sample only. Rider students who do not declare a major during their freshman year; who change their major; or those who transfer to Rider may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Courses and Descriptions

SM 509 Jubilee Singers 1 Credits

This auditioned ensemble is devoted to the performance of sacred music from the African-American tradition.

SM 511 Sacred Music Lab 0 Credits

Series of classes that addresses a variety of experiences in Sacred Music while rotating principal themes and ideas. Student preparation of monthly worship settings will put studied concepts into practice.

SM 517 Concert Handbell Choir II 1 Credits

Open to students who have had previous handbell experience. Intermediate to advanced repertoire, with opportunities for concert performance.

SM 519 Concert Handbell Choir I 1 Credits

A choir selected by audition from the most experienced and capable bell ringers among the student body at large. This ensemble utilizes advanced repertoire and techniques, aiming primarily at presenting concerts both on and off campus, including a two-week annual tour.

SM 525 Conductors' Repertoire Ensemble 1 Credits

An auditioned chamber ensemble, offered every semester, which provides conducting podium time and coaching to all interested members. It additionally serves the conducting needs of graduate Sacred Music majors.

Prerequisite(s): CR 215 or permission of instructor.

SM 531 Colloquium in Sacred Music 2 Credits

A lecture series/colloquium intended to address a wide variety of concerns in the field of Sacred Music while rotating principal themes and ideas.

SM 540 Choir Training/Young Singers 3 Credits

A practicum combined with study designed to teach students how to organize and direct a children's choir program that emphasizes musical training as a basic requirement. The course focuses on teaching children good vocal techniques and sight-reading skills and includes practice teaching in a local school under instructor supervision. Other areas covered include musical readiness skills, voice-change problems, and repertoire.

SM 541 Conducting Church Choirs: Ped & Mgt 3 Credits

A practical course devoted to the building and maintenance of church music programs serving persons of all ages.

SM 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity. Offered in rotation with other Sacred Music electives. 3 Credit hours.

SM 630 Conducting Coaching 1-2 Credits

Structured preparation and faculty coaching of the culminating choral recital in the graduate Sacred Music curriculum.

SM 631 Worship Planning/21st Cent. 3 Credits

Designed to facilitate the planning of worship, this practical course will be an immersion in the musical and theological materials available to those who create worship.

SM 640 Liturgies 3 Credits

A study of the origins of liturgy, its development in the main Christian traditions, and its relation to ecclesiastical history, with particular attention given to the differing styles and traditions of liturgical music. Contemporary liturgies are viewed against this historical background.

SM 641 Hymnology 3 Credits

A study of the origins and development of Christian hymnody, with reference to the theological emphases of various periods from the beginnings to the present, aiming to arouse interest in the textual and musical content of hymns and in their effective use in worship.

SM 654 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 655. Offered in rotation with other Sacred Music electives.

SM 655 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas.

SM 712 Hist of Sacred Music I 3 Credits

Study and research into the history of Western Christian music and its most important genres beginning with the Old Testament and continuing until the death of J.S. Bach in 1750.

SM 713 Hist of Sacred Music II 3 Credits

Continuation of SM 712, beginning with the Classical Viennese Mass and continuing until today. Emphasis on the development of the American church and its worship music.

SM 722 Theology, Liturgy & Worship 3 Credits

A detailed study of the Bible. Principal thematic and narrative elements are correlated to the development of the church's historic liturgies and the theological principles behind them.

Master of Music in Sacred Music: Practical Pedagogy Track (Online)

Program Overview

This online Sacred Music program offers an education of the highest quality and broadest scope to those musicians who aspire to be leaders of their time and place. An interdenominational program, it seeks to train church musicians to a high level of competency in the traditional ways of making sacred music while also striving to engage students in new ways of achieving liturgical excellence and spiritual depth in practices that respond to the various cultural forces that continue to transform the ways in which worship is accomplished in the 21st-century.

In order to meet the needs of those musicians who may not find it feasible or expeditious to matriculate in the on-campus program offered during the academic year, this pedagogy-based track is delivered entirely online with the exception of one 3-week period during the summer of the student's own choosing. While still broad and comprehensive in its curricular design, it offers students a chance to focus on the practical side of making music for those who wish to concentrate on either working with children and youth or adults.

¹ The core elective must be a single, 3-credit graduate-level course outside the student's major area of emphasis, and or area of applied study.

² Recital or approved project will be with their Church or Community Choir. Conducting/Coaching will be via Skype.

SM 509 Jubilee Singers 1 Credits

This auditioned ensemble is devoted to the performance of sacred music from the African-American tradition.

SM 510 Conducting Adult Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving adults.

SM 511 Sacred Music Lab 0 Credits

Series of classes that addresses a variety of experiences in Sacred Music while rotating principal themes and ideas. Student preparation of monthly worship settings will put studied concepts into practice.

SM 512 Conducting Children and Youth Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving children and youth.

SM 517 Concert Handbell Choir II 1 Credits

Open to students who have had previous handbell experience.

Intermediate to advanced repertoire, with opportunities for concert performance.

SM 519 Concert Handbell Choir I 1 Credits

A choir selected by audition from the most experienced and capable bell ringers among the student body at large. This ensemble utilizes advanced repertoire and techniques, aiming primarily at presenting concerts both on and off campus, including a two-week annual tour.

SM 525 Conductors' Repertoire Ensemble 1 Credits

An auditioned chamber ensemble, offered every semester, which provides conducting podium time and coaching to all interested members. It additionally serves the conducting needs of graduate Sacred Music majors.

Prerequisite(s): CR 215 or permission of instructor.

SM 531 Colloquium in Sacred Music 2 Credits

A lecture series/colloquium intended to address a wide variety of concerns in the field of Sacred Music while rotating principal themes and ideas.

SM 541 Conducting Church Choirs: Ped & Mgt 3 Credits

A practical course devoted to the building and maintenance of church music programs serving persons of all ages.

SM 610 Foundations of Music Ministry 2 Credits

This graduate level course surveys the vocational needs, professional relationships, administrative styles, and teaching roles of the practicing church musician. In addition to an overview of professional standards, emphasis will also be placed on music engraving skills (music notation software), budgeting, recruitment, endowments and fundraising.

SM 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity. Offered in rotation with other Sacred Music electives. 3 Credit hours.

SM 624 Choral Music for Children 1 Credits

This course is designed to acquaint the church choral director with repertoire suitable for use with children's and youth choirs.

Representative repertoire from all periods of music will be discussed and analyzed. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 625 Choral Music for Adults 1 Credits

This course is designed to acquaint the church choral director with repertoire suitable for use with adult choirs and adult ensembles. Representative repertoire from all periods of music will be discussed and analyzed. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 630 Conducting Coaching 1-2 Credits

Structured preparation and faculty coaching of the culminating choral recital in the graduate Sacred Music curriculum.

SM 631 Worship Planning/21st Cent. 3 Credits

Designed to facilitate the planning of worship, this practical course will be an immersion in the musical and theological materials available to those who create worship.

SM 632 Collaborative Prep for Worship 1 Credits

Through seminars, readings and common participation in chapel services, Westminster Choir College and Princeton Theological Seminary students will explore models for pastors and church musicians to prepare collaboratively for worship.

SM 635 Choir Training For Children/Youth 3 Credits

A practical course designed to teach students how to organize and direct a comprehensive music program from preschool through high school in the church setting. The course focuses on teaching excellent vocal techniques for each level as well as appropriate music skill development. Other areas of focus include: musical readiness skills; working with preschool singers; understanding the child's voice; the changing voice; and appropriate repertoire for all ages.

SM 640 Liturgies 3 Credits

A study of the origins of liturgy, its development in the main Christian traditions, and its relation to ecclesiastical history, with particular attention given to the differing styles and traditions of liturgical music. Contemporary liturgies are viewed against this historical background.

SM 641 Hymnology 3 Credits

A study of the origins and development of Christian hymnody, with reference to the theological emphases of various periods from the beginnings to the present, aiming to arouse interest in the textual and musical content of hymns and in their effective use in worship.

SM 654 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 655. Offered in rotation with other Sacred Music electives.

SM 655 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas.

SM 690 Independent Study and Research 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

SM 710 Panorama of Sacred Music 3 Credits

This graduate-level course is a one-semester survey of those masterworks and significant musical movements that have shaped the evolution of Western Sacred Music. Beginning with the Old Testament, this course will move through all eras, highlighting important composers and liturgical trends, placing them in their appropriate cultural and theological contexts.

SM 712 Hist of Sacred Music I 3 Credits

Study and research into the history of Western Christian music and its most important genres beginning with the Old Testament and continuing until the death of J.S. Bach in 1750.

SM 713 Hist of Sacred Music II 3 Credits

Continuation of SM 712, beginning with the Classical Viennese Mass and continuing until today. Emphasis on the development of the American church and its worship music.

SM 722 Theology, Liturgy & Worship 3 Credits

A detailed study of the Bible. Principal thematic and narrative elements are correlated to the development of the church's historic liturgies and the theological principles behind them.

Master of Voice Pedagogy: Classical Track

Program Overview

Westminster's Master of Voice Pedagogy program is offered entirely online and is specifically designed to serve the needs of professional singers, voice teachers, school music teachers, and voice coaches who want advanced training in the art and science of voice teaching. For those interested, there is also the option of extensive voice research. Supported by the latest developments in voice science, and thoroughly grounded in practical application, the program offers the most comprehensive training for singing teachers available anywhere. Because of the high standard required for admission to this program, applications will be considered only from candidates who can document their professional experience, and who have worked in their chosen field for at least five years since their undergraduate degree was completed.

Curriculum Overview

At least one course required to fulfill this degree is offered online each semester. Coursework is also offered during Westminster's six-week Summer Session, allowing degree candidates to maintain performance schedules and teaching jobs during the year.

The M.V.P. program includes courses in vocal pedagogy and literature, culminating in a substantial vocal pedagogy project completed under the guidance of a Westminster voice faculty member.

For students who elect applied voice study (fee is charged), weekly studio and performance classes offer frequent performance opportunities. Two fully-staged operas, one with orchestra, are presented each year. Private vocal coaching is available (a fee is charged).

Please see the Voice Handbook for language requirements.

Electives		
Free electives ³		5
Total Credits		32

¹ Students who have had significant teaching experience in American schools may petition to substitute another graduate course for VC 791. The department, if granting, will specify acceptable course alternatives.

² The core elective must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis and/or area of applied study.

³ Students may fulfill free elective requirements through completion of summer workshops and/or Saturday Seminars with prior approval of the Voice Department.

Notes

- Students with limited prior singing experience, as determined through departmental evaluation of past vocal study, performance career and/or performing skill as demonstrated through live or recorded performance, may be required to complete up to four credits of applied voice instruction in addition to the major area course requirements. Such required developmental lessons will result in additional charges.
- In addition to the above requirements, all students must demonstrate competency in at least two of the three major European singing languages (Italian, German, French). This may occur through completion of at least one year of college-level study in each language, intensive work through language institutes or practical experience living and/or working in a foreign country, as verified by diagnostic testing at Westminster.

Academic Plan of Study

The following educational plan is provided as a sample only. Students may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Code	Title	Credits
Pedagogy Courses		
It is preferable that the pedagogy courses be taken in the following order:

Free Electives ³		5
Total Credits		32

Footnotes

- ¹ Students who have had significant teaching experience in American schools may petition to substitute another graduate level course for VC 791. The department, if granting a substitution, will specify acceptable course alternatives.
- ² The core elective must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis and/or area of applied study.
- ³ Students may fulfill free elective requirements through completion of summer workshops and/or Saturday Seminars with prior approval of the Voice Department.

Notes

1. Students with limited prior singing experience, as determined through departmental evaluation of past vocal study, performance career and/or performing skill as demonstrated through live or recorded performance, may be required to complete up to four (4) credits of applied voice instruction in addition to the major area course requirements. Such required developmental lessons will result in additional charges.
2. In addition to the above requirements, all students must demonstrate competency in at least two of the three major European singing languages (Italian, German, French). This may occur through completion of at least one year of college-level study in each language, intensive work through language institutes, or practical experience living and/or working in a foreign country, as verified by diagnostic testing at Westminster.

Courses and Descriptions

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

VC 650 Pedagogy Capstone 1 Credits

Independent research leading to a completed capstone project, such as a pedagogical publication or presentation, development of an original or unique method of instruction, instructional materials, etc. The project must be approved by the department.

VC 661 German Lieder 3 Credits

This survey of the German Lieder begins with its roots in the 17th and 18th centuries and continues into the 20th century. Classes will involve study of Romanticism, including philosophers and poets of the 18th and 19th centuries who were important for German Lieder. The bulk of the class involves in-depth study of the Lieder of the important composers of the genre: Haydn, Mozart, Schubert, Robert and Clara Schumann, Mendelssohn, Liszt, Brahms, Wolf, Strauss, Mahler, Schoenberg, Berg, and Webern. Class sessions will involve a balance of lecture, discussion, and student performance.

VC 662 French Melodie 3 Credits

This course is designed as a survey of the song literature of France. Students examine works for voice and piano/instruments by Berlioz, Gounod, Saint-Saëns, Bizet, Faure, Duparc, Chausson, Debussy, Ravel, Messaien, Milhaud, Poulenc, and others, analyzing their relationship to larger stylistic, social, and musicological trends. Investigation will include matters of prosody, scansion, and compositional organization, with particular attention given to matters of text setting and poetic treatment. Special emphasis will be placed on important French language poets whose literary works serve as the basis for this material. Poets will include Baudelaire, Verlaine, Hugo, Rimbaud, Mallarmé, LaForgue, Maeterlinck, and others. Poetic history and form will be covered as well as important composer/poet partnerships. Class sessions will involve a balance of lecture and discussion. Works by both well-known and lesser-known composers will be included.

VC 722 Literature for Teaching 3 Credits

A survey of graduated teaching literature for beginning, intermediate and advanced voice students. Literature will be explored that is particularly well-suited to specific vocal issues (e.g. legato, coloratura, staccato, etc.)

Prerequisite(s): VC 723, VC 724.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 724 Voice Pedagogy II: Methods 3 Credits

A comparative study of various pedagogical methods and ideals. A wide range of important historical and contemporary pedagogy treatises is reviewed. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student.

VC 791 Teaching Internship 2 Credits

Teaching internship with a master teacher(s). The student will teach under faculty observation and supervision, including follow-up private discussion with the observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. May be offered on an intensive basis in conjunction with Westminster Summer Session events, such as The High School Solo Vocal Artist and/or Vocal Institute.

Master of Voice Pedagogy: Music Theatre Track

Program Overview

Westminster's Master of Voice Pedagogy program is offered entirely online and is specifically designed to serve the needs of professional singers, voice teachers, school music teachers, and voice coaches who want advanced training in the art and science of voice teaching. This particular track focuses on the pedagogy and science associated with music theater genres. Supported by the latest developments in voice science, and thoroughly grounded in practical application, the program offers the most comprehensive training for singing teachers available anywhere in an entirely online format. Preference is given to candidates who can document their professional experience and who have worked in their chosen field for at least three years since their undergraduate degree was completed.

Curriculum Overview

At least one course required to fulfill this degree is offered online each semester. Coursework is also offered during Westminster's six-week Summer Session, allowing degree candidates to maintain performance schedules and teaching jobs during the year.

The M.V.P.: MT Track includes courses in music theater pedagogy and literature, culminating in a substantial vocal pedagogy project completed under the guidance of a Westminster voice faculty member.

Core Elective ²		
Theory or History Elective		
Free Electives for five credits total ³		

- ¹ Students who have had significant teaching experience in American schools may petition to substitute another graduate level course for VC 791. The department, if granting a substitution, will specify acceptable course alternatives.
- ² The core elective must be a single, 3 credit graduate-level course outside of the student's major area, area of emphasis, and/or area of applied study.
- ³ Students may fulfill free elective requirements through completion of summer workshops and/or Saturday Seminars with prior approval of the Voice Department.

Courses and Descriptions

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

VC 650 Pedagogy Capstone 1 Credits

Independent research leading to a completed capstone project, such as a pedagogical publication or presentation, development of an original or unique method of instruction, instructional materials, etc. The project must be approved by the department.

VC 722 Literature for Teaching 3 Credits

A survey of graduated teaching literature for beginning, intermediate and advanced voice students. Literature will be explored that is particularly well-suited to specific vocal issues (e.g. legato, coloratura, staccato, etc.)
Prerequisite(s): VC 723, VC 724.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 740 Seminar in Music Theater Pedagogy 3 Credits

Comprehensive study of various pedagogical approaches to teaching Music Theater singing techniques. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments, and other written assignments.

VC 741 Music Theater Literature I 3 Credits

Survey and analysis of Music Theater literature from its roots in Tin Pan Alley through Kander and Ebb. Students will explore the synergistic relationships among text, music, and style and discuss the influence of society and politics on the genre. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments and other written assignments.

VC 742 Music Theater Literature II 3 Credits

Survey and analysis of Music Theater Literature from Sondheim to the present. Students will explore the synergistic relationships among text, music, and style and discuss the influence of society and politics on the genre. The class will also discuss the integration of pop/rock and other contemporary substyles within the genre. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments and other written assignments.

VC 791 Teaching Internship 2 Credits

Teaching internship with a master teacher(s). The student will teach under faculty observation and supervision, including follow-up private discussion with the observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. May be offered on an intensive basis in conjunction with Westminster Summer Session events, such as The High School Solo Vocal Artist and/or Vocal Institute.

Master of Music: Voice Pedagogy and Performance (Pedagogy Emphasis)

Program Overview

The voice program seeks to develop the musician by establishing a sound vocal technique and a thorough understanding of the singing voice, its literature and pedagogy. These tools are essential for the study and performance of vocal and choral literature and for training students as solo performers, professional teachers or choral conductors.

Capitalizing upon undergraduate work, students continue to build and demonstrate healthy vocal technique while deepening their knowledge of voice literature and pedagogy. Students develop a strong understanding of the complex relationships between music and poetry.

Curriculum Overview

This voice pedagogy and performance program has two emphases. The pedagogy emphasis entails private lessons, voice literature, opera, vocal pedagogy, supervised student teaching and a full recital. For students whose undergraduate work has not included a public recital, presentation of a 30-minute recital is required before work on the graduate recital may begin. Weekly coaching classes as well as studio and performance classes offer frequent performance opportunities. Two fully-staged operas, one with orchestra, are presented each year. Private vocal coaching is available (fee is charged).

Each Pedagogy Emphasis student completes a multi-course sequence in Voice Pedagogy, including voice science, methods and teaching, research, and literature. Four semesters of applied voice study culminate in a graduate recital.

Please see the Voice Handbook for language requirements.

Courses and Descriptions

VC 591 Performing in Lyric Theater 2 Credits

Performing in Lyric Theater offers techniques for the preparation of lyric roles in a theatrical setting. It will develop elements of stagecraft, systematize a process for preparations and exploration, and introduce the working relationship with director and conductor.

Prerequisite(s): Undergraduates, VC 291 and the successful completion of Level II jury, or permission of the Chair.

VC 592 Opera Workshop 2 Credits

Introduction to opera performance. Acting exercises, character development, dramatic exploration and musical coaching culminating in a workshop-format presentation. It is recommended that VC 491 or 691 be taken before this course. This course may be repeated for credit.

Prerequisite(s): Undergraduates, successful completion of the level II voice test or permission of the chair.

VC 593 Opera Theater 2 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions, and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity.

VC 627 Opera Literature I 3 Credits

Study of the development of opera from 1600 through the Napoleonic era (ca. 1815), with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 628 Opera Literature II 3 Credits

Study of the development of opera from the early 19th century to the present, with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 633 Seminar in Opera Literature 3 Credits

An intensive study of an area of opera literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the works of a selected composer or of a specific genre of opera.

VC 635 Seminar in Song Literature 3 Credits

An intensive study of some area of art song history and literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the selected repertoire.

VC 641A Voice Primary 2 Credits

VC 661 German Lieder 3 Credits

This survey of the German Lieder begins with its roots in the 17th and 18th centuries and continues into the 20th century. Classes will involve study of Romanticism, including philosophers and poets of the 18th and 19th centuries who were important for German Lieder. The bulk of the class involves in-depth study of the Lieder of the important composers of the genre: Haydn, Mozart, Schubert, Robert and Clara Schumann, Mendelssohn, Liszt, Brahms, Wolf, Strauss, Mahler, Schoenberg, Berg, and Webern. Class sessions will involve a balance of lecture, discussion, and student performance.

VC 662 French Melodie 3 Credits

This course is designed as a survey of the song literature of France. Students examine works for voice and piano/instruments by Berlioz, Gounod, Saint-Saëns, Bizet, Faure, Duparc, Chausson, Debussy, Ravel, Messaien, Milhaud, Poulenc, and others, analyzing their relationship to larger stylistic, social, and musicological trends. Investigation will include matters of prosody, scansion, and compositional organization, with particular attention given to matters of text setting and poetic treatment. Special emphasis will be placed on important French language poets whose literary works serve as the basis for this material. Poets will include Baudelaire, Verlaine, Hugo, Rimbaud, Mallarmé, LaForgue, Maeterlinck, and others. Poetic history and form will be covered as well as important composer/poet partnerships. Class sessions will involve a balance of lecture and discussion. Works by both well-known and lesser-known composers will be included.

VC 705 Grad Voice Rep:Italian/French 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 706 Grad Voice Rep:German/English 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 724 Voice Pedagogy II: Methods 3 Credits

A comparative study of various pedagogical methods and ideals. A wide range of important historical and contemporary pedagogy treatises is reviewed. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student.

VC 725 Voice Ped III:Tchnng Practicum 3 Credits

Communication skills are explored and students develop a systematic approach to studio voice instruction. Each student is assigned at least two voice students (one adult and one teenager) to be taught both inside and outside of class. Emphasis is placed on becoming familiar with all voice classifications and basic vocal literature.

Prerequisite(s): VC 723.

VC 726 Voice Research 3 Credits

Peer reviewed research in voice is evaluated and research methodologies are explored. Class projects include research in historical, qualitative, quantitative, and mixed methods approaches.

VC 730 The Singing Actor: Opera 3 Credits

This course entails coaching of selected songs, arias or repertoire from music theater, and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

VC 731 Opera Auditions: Prep & Tech 2 Credits

This class will explore the many facets of preparing an audition for an opera role, apprentice program, or competition. At least three to four arias in contrasting styles and languages should be prepared for work in class. Areas to be addressed include vocal and dramatic presentation, networking, resume building, make-up, and photo advice. In coordination with the Office of Career Services, panel discussions with invited guests that will explore specific career-related topics will be scheduled.

Prerequisite(s): permission of the applied instructor.

VC 753 Spec Topics in Voice Perf Prac 3 Credits

Intensive performance coaching and lectures in the form of master classes where performance practice in selected topics will be taught by current faculty or distinguished alumni and specialists in their fields.

Prerequisite(s): permission of the applied instructor.

VC 722 Literature for Teaching 3 Credits

A survey of graduated teaching literature for beginning, intermediate and advanced voice students. Literature will be explored that is particularly well-suited to specific vocal issues (e.g. legato, coloratura, staccato, etc.)

Prerequisite(s): VC 723, VC 724.

Master of Music: Voice Pedagogy and Performance (Performance Emphasis)

Program Overview

More students pursue voice study at the graduate level at Westminster Choir College than any other major on campus. A strong and unique double emphasis in voice pedagogy and performance prepares our graduates to find success on the operatic and concert stages of the world, in studio and classroom teaching positions at prominent schools, universities, and churches, and in thriving private voice studios. The process-oriented approach focuses on *how*, rather than *what* to sing, enabling students to become the best possible vocal artists and independent musicians.

Curriculum Overview

This voice pedagogy and performance program has two emphases. The performance emphasis entails private lessons, voice literature, opera, vocal coaching, vocal pedagogy, and a full recital. Studio and performance classes, as well as a number of performance-oriented class options, Opera Workshop, and Opera Theatre, offer frequent performance opportunities. Two fully-staged operas, one with orchestra, are presented each year. Private vocal coaching is available (fee is charged).

Each Performance Emphasis student completes courses in applied study, voice science and pedagogy, and literature. Four semesters of applied voice study culminate in a graduate recital. For students whose undergraduate work has not included a public recital, presentation of a 30-minute recital is required before work on the graduate recital may begin.

CR 509	Symphonic Choir	2
Theory or Music History elective (1 course)		3
Core elective (1 course) ¹		3
Total Credits		34-39

- ¹ The core elective must be a single, 3-credit graduate-level course outside the student's major area, area of emphasis and/or area of applied study.
- ² Prior to graduation, students must complete at least one year of undergraduate-level study in two of the three major European singing languages (Italian, German, and French). Students must earn a minimum grade of "C" in these courses. Grades of "C-" or below are not accepted.
- ³ Students are required to present a public recital following approval by the department. Registration for VC655A is a pre-requisite for the approval.
- ⁴ Students may repeat any individual Performance course for credit (either for elective credit or to satisfy the Performance course requirements).

Academic Plan of Study

The following educational plan is provided as a sample only. Students may follow a different plan to ensure a timely graduation. Each student, with guidance from his or her academic advisor, will develop a personalized educational plan.

Course	Title	Credits
Year 1

¹ VC 591 is suggested as a performance elective.

Courses and Descriptions

VC 591 Performing in Lyric Theater 2 Credits

Performing in Lyric Theater offers techniques for the preparation of lyric roles in a theatrical setting. It will develop elements of stagecraft, systematize a process for preparations and exploration, and introduce the working relationship with director and conductor.

Prerequisite(s): Undergraduates, VC 291 and the successful completion of Level II jury, or permission of the Chair.

VC 592 Opera Workshop 2 Credits

Introduction to opera performance. Acting exercises, character development, dramatic exploration and musical coaching culminating in a workshop-format presentation. It is recommended that VC 491 or 691 be taken before this course. This course may be repeated for credit.

Prerequisite(s): Undergraduates, successful completion of the level II voice test or permission of the chair.

VC 593 Opera Theater 2 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593E Opera Theater (Ensemble) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593N Opera Theater (Opera NJ) 1 Credits

VC 593R Opera Theater (Role) 2 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593T Opera Theater (Tech) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions, and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity.

VC 627 Opera Literature I 3 Credits

Study of the development of opera from 1600 through the Napoleonic era (ca. 1815), with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 628 Opera Literature II 3 Credits

Study of the development of opera from the early 19th century to the present, with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 633 Seminar in Opera Literature 3 Credits

An intensive study of an area of opera literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the works of a selected composer or of a specific genre of opera.

VC 635 Seminar in Song Literature 3 Credits

An intensive study of some area of art song history and literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the selected repertoire.

VC 641A Voice Primary 2 Credits

VC 641B Voice Primary 1 Credits

VC 641C Voice Elective 2 Credits

VC 641D Voice Elective 1 Credits

VC 641E Voice Primary 2 Credits

VC 641F Voice Primary 1 Credits

VC 641G Voice Primary 2 Credits

VC 650 Pedagogy Capstone 1 Credits

Independent research leading to a completed capstone project, such as a pedagogical publication or presentation, development of an original or unique method of instruction, instructional materials, etc. The project must be approved by the department.

VC 655A Voice Primary 2 Credits

VC 655B Voice Primary 1 Credits

VC 655E Voice Primary 2 Credits

VC 655F Voice Primary 1 Credits

VC 657 Private Coaching 2 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 657 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 658 involves weekly half-hour lessons and a fee of \$600. Open to graduate Voice Pedagogy and Performance majors.

VC 658 Private Coaching 1 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 657 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 658 involves weekly half-hour lessons and a fee of \$600. Open to graduate Voice Pedagogy and Performance majors.

VC 661 German Lieder 3 Credits

This survey of the German Lieder begins with its roots in the 17th and 18th centuries and continues into the 20th century. Classes will involve study of Romanticism, including philosophers and poets of the 18th and 19th centuries who were important for German Lieder. The bulk of the class involves in-depth study of the Lieder of the important composers of the genre: Haydn, Mozart, Schubert, Robert and Clara Schumann, Mendelssohn, Liszt, Brahms, Wolf, Strauss, Mahler, Schoenberg, Berg, and Webern. Class sessions will involve a balance of lecture, discussion, and student performance.

VC 662 French Melodie 3 Credits

This course is designed as a survey of the song literature of France. Students examine works for voice and piano/instruments by Berlioz, Gounod, Saint-Saëns, Bizet, Faure, Duparc, Chausson, Debussy, Ravel, Messaien, Milhaud, Poulenc, and others, analyzing their relationship to larger stylistic, social, and musicological trends. Investigation will include matters of prosody, scansion, and compositional organization, with particular attention given to matters of text setting and poetic treatment. Special emphasis will be placed on important French language poets whose literary works serve as the basis for this material. Poets will include Baudelaire, Verlaine, Hugo, Rimbaud, Mallarmé, LaForgue, Maeterlinck, and others. Poetic history and form will be covered as well as important composer/poet partnerships. Class sessions will involve a balance of lecture and discussion. Works by both well-known and lesser-known composers will be included.

VC 667 Private Dramatic/Role Coaching 2 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 667 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 668 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

VC 668 Private Dramatic/Role Coaching 1 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 667 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 668 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

VC 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

VC 705 Grad Voice Rep:Italian/French 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 706 Grad Voice Rep:German/English 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 722 Literature for Teaching 3 Credits

A survey of graduated teaching literature for beginning, intermediate and advanced voice students. Literature will be explored that is particularly well-suited to specific vocal issues (e.g. legato, coloratura, staccato, etc.)
Prerequisite(s): VC 723, VC 724.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 724 Voice Pedagogy II: Methods 3 Credits

A comparative study of various pedagogical methods and ideals. A wide range of important historical and contemporary pedagogy treatises is reviewed. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student.

VC 725 Voice Ped III: Tchng Practicum 3 Credits

Communication skills are explored and students develop a systematic approach to studio voice instruction. Each student is assigned at least two voice students (one adult and one teenager) to be taught both inside and outside of class. Emphasis is placed on becoming familiar with all voice classifications and basic vocal literature.

Prerequisite(s): VC 723.

VC 726 Voice Research 3 Credits

Peer reviewed research in voice is evaluated and research methodologies are explored. Class projects include research in historical, qualitative, quantitative, and mixed methods approaches.

VC 730 The Singing Actor: Opera 3 Credits

This course entails coaching of selected songs, arias or repertoire from music theater, and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

VC 731 Opera Auditions: Prep & Tech 2 Credits

This class will explore the many facets of preparing an audition for an opera role, apprentice program, or competition. At least three to four arias in contrasting styles and languages should be prepared for work in class. Areas to be addressed include vocal and dramatic presentation, networking, resume building, make-up, and photo advice. In coordination with the Office of Career Services, panel discussions with invited guests that will explore specific career-related topics will be scheduled.

Prerequisite(s): permission of the applied instructor.

VC 740 Seminar in Music Theater Pedagogy 3 Credits

Comprehensive study of various pedagogical approaches to teaching Music Theater singing techniques. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments, and other written assignments.

VC 741 Music Theater Literature I 3 Credits

Survey and analysis of Music Theater literature from its roots in Tin Pan Alley through Kander and Ebb. Students will explore the synergistic relationships among text, music, and style and discuss the influence of society and politics on the genre. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments and other written assignments.

VC 742 Music Theater Literature II 3 Credits

Survey and analysis of Music Theater Literature from Sondheim to the present. Students will explore the synergistic relationships among text, music, and style and discuss the influence of society and politics on the genre. The class will also discuss the integration of pop/rock and other contemporary substyles within the genre. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments and other written assignments.

VC 753 Spec Topics in Voice Perf Prac 3 Credits

Intensive performance coaching and lectures in the form of master classes where performance practice in selected topics will be taught by current faculty or distinguished alumni and specialists in their fields.

Prerequisite(s): permission of the applied instructor.

VC 791 Teaching Internship 2 Credits

Teaching internship with a master teacher(s). The student will teach under faculty observation and supervision, including follow-up private discussion with the observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. May be offered on an intensive basis in conjunction with Westminster Summer Session events, such as The High School Solo Vocal Artist and/or Vocal Institute.

Westminster Choir College Faculty

Christopher Arneson

Professor, Voice, 2003. B.A., M.M., Binghamton University; D.M.A., Rutgers University.

Susan S. Ashbaker

Associate Professor, Voice, 2006. B.M., M.M., Southern Illinois University; M.M., University of Illinois.

Lauren Athey-Janka

Adjunct Assistant Professor, Voice. B.M. Boston University, M.M., Westminster Choir College of Rider University.

Ena Bronstein Barton

Adjunct Associate Professor, Piano, 1983. Artist Diploma, Escuela Moderna de Musica and Conservatorio Nacional de Musica, Santiago, Chile.

Victoria Browers

Adjunct Assistant Professor, Voice, 2017. B.M., Ohio Wesleyan University, M.M. Westminster Choir College of Rider University; D.M.A. State University of New York at Stony Brook.

Vinroy Brown

Adjunct Instructor, Sacred Music, 2017. B.M., Westminster Choir College of Rider University; M.A., Regent University.

Janet Cape

Associate Professor and Chair, Music Education, 2010. B.M., University of Victoria; M.M., Arizona State University; D.M.A., Arizona State University.

Christian Carey

Associate Professor, Theory, 2004. B.M., Juilliard; M.M., Boston University; Ph.D., Rutgers University.

Jay Carter

Assistant Professor, Voice, 2019. B.M., William Jewel College; M.M., Yale University; D.M.A., University of Missouri-Kansas City.

Victoria Chow

Adjunct Assistant Professor, Piano, 2018. B.M., M.M., Westminster Choir College of Rider University.

Ingrid Clarfield

Professor, Piano, 1982. B.M., Oberlin College; M.M., Eastman School of Music, University of Rochester.

Margaret Cusack

Professor, Voice, and Chair of Voice and Piano Faculties, 1994. B.M., M.M.T., Oberlin College.

Rochelle Ellis

Adjunct Assistant Professor, Voice, 1995. B.M.E., University of Missouri, Kansas City; M.M.E., Westminster Choir College.

Faith Esham

Adjunct Assistant Professor, Voice, 2000. B.A., Columbia Union College; B.M., M.M., The Juilliard School.

Charles Frantz

Adjunct Associate Professor, Theory/Music History, 2000. B.M., M.M., Temple University; Ph.D., Rutgers University.

James Goldsworthy

Professor, Piano, 1996. B.M., M.M., Southern Methodist University; D.M.A., Stanford University.

Ronald A. Hemmel

Professor, Theory, and Director, Music Computing Center, 1994. B.M., Westminster Choir College; M.M., James Madison University; M.Phil., Ph.D., Rutgers University.

Nancy Froyland Hoerl

Adjunct Assistant Professor, Voice, 1995. B.A., Moorhead State University; M.M., Westminster Choir College.

Eric Hung

Adjunct Associate Professor, Music History, 2004. A.R.C.T., Royal Conservatory of Music; B.A., Wesleyan University; Ph.D., Stanford University.

Katherine Johnson

Adjunct Assistant Professor, Voice, 2006. B.M., University of Calgary; M.M., Manhattan School of Music.

Rachelle Jonck

Adjunct Associate Professor, Voice, 2007. B.M., University of Stellenbosch (South Africa)

James Jordan

Professor, Conducting, 1991. B.M., Susquehanna University; M.M., Ph.D., Temple University; D.Mus., University of Aberdeen, Scotland.

Sangmi Kang

Assistant Professor, Music Education, 2018. B.M., M.M., Seoul National University; Ph.D., University of Florida.

Jay Kawarsky

Professor, Theory, 1989. B.M.E., Iowa State University; M.M., D.M., Northwestern University.

Anthony Kosar

Professor, Music Composition, History, & Theory, 1984. B.M., West Liberty State College; M.M., Southern Illinois University; Ph.D., The Ohio State University.

David Leifer

Adjunct Assistant Professor, Piano, 2011. B.M., M.M., Westminster Choir College of Rider University; D.M.A., University of Michigan.

Robin Massie

Adjunct Assistant Professor, Voice, 2008. B.M., Westminster Choir College of Rider University; M.M., Yale University.

Sean McCarther

Associate Professor, Voice, 2012. B.M., Baylor University; M.M., D.M., Indiana University.

Ute Mehnert

Adjunct Assistant Professor, Arts and Sciences, 2011. M.A., Ph.D., University of Cologne.

Sharon Mirchandani

Professor, Theory, 1997. B.M., Bowling Green State University; M.M., Temple University; Ph.D., Rutgers University.

Mark Moliterno

Adjunct Associate Professor, Voice, 2005. B.M., M.M., Oberlin College Conservatory of Music.

Maureen Murphy-Fernandez

Adjunct Instructor, Music Education, 2016. B.S., West Chester University.

Marshall Onofrio

Professor, Music Education, 2007. B.M., B.S., University of Connecticut; M.M., University of Illinois; M.M., University of Nebraska-Lincoln; D.M.A., The Ohio State University.

Carolann Page

Adjunct Assistant Professor, Voice, 2008. B.M., Curtis Institute of Music.

Joel Phillips

Professor, Theory, 1985. M.M., Eastman School of Music, University of Rochester; B.M., D.M.A., University of Alabama.

Steve Pilkington

Associate Professor, Sacred Music, and Director of Chapel, 1992. B.A., St. Olaf College; M.M., University of Illinois; Ph.D., Drew University.

Agnes Poltorak

Adjunct Assistant Professor, Piano, 2000. B.M., University of British Columbia, Canada; M.M., Westminster Choir College.

Kathy Kessler Price

Professor, Voice, 2012. B.A., University of Richmond; M.M., University of Maryland; Ph.D., University of Kansas, Lawrence.

Justin Proffitt

Adjunct Instructor, Piano, 2012. B.M., Bob Jones University; M.M., Westminster Choir College of Rider University.

Kathleen Scheide

Adjunct Assistant Professor, Harpsichord, 2006. B.M., M.M., New England Conservatory, D.M.A., University of Southern California.

Debra Scurto-Davis

Adjunct Assistant Professor, Voice, 2004. B.M.E., Evangel College; M.M., Baylor University; S.M., University of Michigan.

Kathleen Ebling Shaw

Adjunct Instructor, Sacred Music, 1991. B.M., Westminster Choir College.

Tom T. Shelton, Jr.

Associate Professor, Sacred Music, 2012. B.M., M.M., University of North Carolina at Greensboro.

Elizabeth Sutton

Adjunct Assistant Professor, Voice, 2005. B.A., Bowling Green State University; M.M., College-Conservatory of Music, University of Cincinnati.

Robert Terrio

Associate Professor-Librarian, 2002. B.M., Berklee College of Music; M.M., University of Massachusetts; M.L.S., Rutgers University.

Jason Vodicka

Assistant Professor, Music Education, 2018. B.M., M.M., Westminster Choir College of Rider University; D.M.A., University of Georgia.

Charles J. Walker

Adjunct Instructor, Voice, 1995. B.M., University of Delaware.

Sally Wolf

Adjunct Assistant Professor, Voice, 2001. B.M., Kent State University; Artist Diploma, Curtis Institute of Music.

Stefan Young

Professor, Theory, 1979. B.M., Rollins College; M.M., The Juilliard School; Ph.D., Rutgers University.

Amy Zorn

Adjunct Assistant Professor, Voice, 1996. B.M., University of Wisconsin, Madison; M.M., Boston University.

Frank Abrahams

Professor Emeritus, Music Education, 1992. B.M.E., Temple University; M.M., New England Conservatory; Ed.D., Temple University.

Barton Bartle

Professor Emeritus, Theory, 1973. B.M., M.M., University of Michigan; Ph.D., University of Illinois.

Robert Carwithen

Adjunct Professor Emeritus, Organ. B.M., Curtis Institute of Music; M.M., Westminster Choir College of Rider University.

Harriet Chase

Professor Emerita, Theory. B.M., University of Wisconsin; M.M., Eastman School of Music, University of Rochester; Ph.D., Indiana University.

Mi-Hye Chyun

Associate Professor-Librarian Emerita, University Libraries. B.A., Sungkyunkwan University, Seoul; M.L.S., University of Maryland.

Diana Crane

Professor Emerita, Voice, 1986. B.A., Leicester University, England; M.Ed., London University.

William Dalglish

Associate Professor Emeritus, Music History. B.M., Southeastern Louisiana College; M.M., Indiana University.

Elem Eley

Professor Emeritus, Voice, 1987. B.M., Baylor University; M.M., Southwestern Baptist Theological Seminary.

Robert Evans

Professor Emeritus, Arts and Sciences. B.A., Stanford University; B.D., Princeton Theological Seminary; D.Theol., University of Basel, Switzerland.

Thomas Faracco

Associate Professor Emeritus, Voice. 1983. B.M., M.M., Westminster Choir College of Rider University.

Ronald Filler

Professor Emeritus, Music Education, 1985. B.A., Union College; M.A., Rider College; M.S., D.Ed., University of Tennessee.

Anne Ackley Gray

Professor Emerita, Voice, 1982. B.A., Sarah Lawrence College; M.M., New England Conservatory.

Jeannette Jacobson

Associate Professor-Librarian Emerita. B.S., University of Wisconsin, Stevens Point; M.S. in L.S., University of Wisconsin.

Marvin Keenze

Professor Emeritus, Voice, and Co-Director, Voice Resource Center, 1976. B.M., M.M., Westminster Choir College.

Lois Laverty

Professor Emerita, Voice. B.M., M.M., Westminster Choir College; Artist's Diploma, Vienna Academy of Music, Austria.

Robin A. Leaver

Professor Emeritus, Sacred Music, 1984. Dipl. in Theol., Trinity College, Bristol, England; D.Theol., State University of Groningen, Netherlands.

Phyllis Lehrer

Professor Emerita, Piano, 1975. A.B., University of Rochester; M.S., Juilliard School.

Joan Hult Lippincott

Professor Emerita, Organ. B.M., M.M., Westminster Choir College.

Donald McDonald

Professor Emeritus, Organ. B.M. Curtis Institute of Music; M.S.M., S.M.D., Union Theological Seminary.

Jane Nowakowski

Associate Professor-Librarian Emerita. B.M. Westminster Choir College of Rider University; M.L.S. Rutgers University.

Thomas Parente

Professor Emeritus, Piano, 1993. B.A., Jersey City State College; B.M., Manhattan School of Music; M.A., Rutgers University; Dalcroze Eurhythmics License, Longy School of Music; Ed.D., Teachers College, Columbia University.

Frances Poe

Professor Emerita, Music Education. B.M., University of Georgia; M.M., Ph.D., Indiana University.

Laura Brooks Rice

Professor Emerita, Voice, 1985. B.M., Georgia Southern College; M.M., Indiana University.

Sharon Sweet

Professor Emerita, Voice, 1999. B.S., Roberts Wesleyan College; M.M., Ithaca College.

Peter D. Wright

Professor Emeritus, Theory/Music History, 1965. B.S., Juniata College; M.A., Ph.D., Eastman School of Music, University of Rochester.

Undergraduate Courses and Descriptions

Arts (AR)

AR 111 Survey of Art History I 3 Credits

A survey of Western art - architecture, sculpture, painting - from prehistoric times, is presented against the background of chronological and intellectual history.

AR 112 Survey of Art History II 3 Credits

Crucial artistic tendencies in Western art of the 19th and 20th centuries are introduced and discussed against their historical and intellectual setting. A brief background of art history from previous centuries is presented in order to appreciate these developments.

AR 216 Acting I 3 Credits

This course provides an introduction to basic techniques of realistic acting using exercises, improvisation and scene study. The emphasis is on honesty and commitment to action in order to be able to create real life in an imaginary world.

AR 217 Improvisation & Movement 3 Credits

Using theater games, students explore themselves as individuals and members of a group. The course uses scenes, skits, dances and games to help students overcome their fears and insecurities, enabling them to develop their creativity, spontaneity, honesty, concentration, and commitment to action. The class also explores body movement as a means of heightening dramatic expression.

Arts and Sciences (AS)

AS 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

AS 491 Arts & Science Internship 1-12 Credits

This course requires 95 hours for each three credits for which the student enrolls. The student is required to spend 13 weeks of on-site participation in a broad range of daily operations at an internship site. In addition, there are group meetings with all students participating in internships and site-analysis assignments given under the direction of Arts and Sciences faculty. Students may enroll for a maximum of 12 credits of internships.

Prerequisite(s): at least junior level standing.

Conducting (CR)

CR 109 Chapel Choir 1 Credits

Comprised of undergraduate students in their first year of study, Chapel Choir focuses on music for men's, women's, and mixed chorus. The ensemble provides the fundamentals of artistic choral ensemble singing and a foundation for all Westminster choral ensembles. Placement hearing required.

CR 209 Schola Cantorum 1 Credits

Comprised of undergraduate students in their second year of study, Schola Cantorum focuses on music for mixed chorus and continues to build and refine the skills developed in Chapel Choir. This ensemble presents campus, community, and regional performances. Placement hearing required.

CR 215 Fundamentals of Conducting 3 Credits

This course provides the foundation of conducting technique and philosophy as it relates to choral ensemble. Primarily, it deals with the development of basic pedagogical proficiencies, specifically alignment, Laban gestural vocabulary, breathing, beat patterns, consistent tempo, and the development of expressive gesture for relaying various styles of music, i.e., legato, staccato and marcato. Basic philosophical understandings concerning the human aspects of the music making process and the role the conductor plays in that process also are emphasized. Specific techniques for dealing with technical elements, e.g., fermata, dynamics, changes of tempo, contrasts in style, also are covered. The overall focus of the course is to establish the important relationship between ear, body, and the choral sound.

Prerequisite(s): TH 141.

CR 315 Techniques of Conducting 3 Credits

Continued development of conducting technique with emphasis on more complex styles and patterns, and on communication through appropriate gestures. Further improvement in conducting various dynamics and articulations, as well as more effective use of the left hand. Rehearsal procedures, repertoire programming, score preparation, and baton techniques are incorporated into the course.

Prerequisite(s): CR 215.

CR 490 Independent Study and Research 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed.

Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Harpichord (HP)

HP 101B Harpichord Primary 1 Credits

HP 101C Harpichord Elective 2 Credits

HP 101D Harpichord Elective 1 Credits

HP 101E Harpichord Elective 2 Credits

HP 101F Harpichord Elective 1 Credits

HP 101G Harpichord Elective 2 Credits

HP 201B Harpichord Primary 1 Credits

Language/Literature (LL)

LL 037 College Reading and Writing 3 Credits

Required for students placed into this course as a result of the basic skills English testing program. This intensive course reviews effective reading, writing, and study processes and leads students to the level of mastery required to begin CMP 125 Seminar in Writing and Research.

LL 141 French I 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 142 French II 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 141.

LL 145 Italian I 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

LL 146 Italian II 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening, and speaking).

Prerequisite(s): minimum "C" grade in LL 145.

LL 151 German I 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

LL 152 German II 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to develop basic grammar, vocabulary and conversation with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 151.

LL 243 French III 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 142.

LL 244 French IV 3 Credits

This course is an integrated approach to the study of French language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in French with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 243.

LL 247 Italian III 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 146.

LL 248 Italian IV 3 Credits

This course is an integrated approach to the study of Italian language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in Italian with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 247.

LL 253 German III 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 152.

LL 254 German IV 3 Credits

This course is an integrated approach to the study of German language and culture. It is designed to strengthen grammatical mastery, to build vocabulary and to encourage lively and meaningful communication in German with the purpose of developing proficiency in all four language skills (reading, writing, listening and speaking).

Prerequisite(s): minimum "C" grade in LL 253.

LL 280 Sacred Texts and Literature 3 Credits

Explore the cultural, theological, and artistic contexts of key themes (e.g. creation, journey, forgiveness, love) in the sacred texts of the major historical world religions as they are portrayed in contemporary poetry and drama, and in novels that have been adapted to film

Prerequisite(s): CMP 125 or CMP 120 or BHP 150.

LL 282 Major Poets 3 Credits

This course introduces students to poetry via the reading and analysis of different poetic forms. While reading, listening to, performing and discussing poems from a wide cultural spectrum, students learn to evaluate and appreciate poetry by understanding such elements as metaphor and persona.

Prerequisite(s): CMP 125 or BHP 150.

LL 285 Writing About Music: A Seminar for Performers, Teachers, and Academics 3 Credits

A writing intensive course focusing on the essential writing tasks encountered by musicians in their roles as performers, teachers, and scholars.

Prerequisite(s): BHP 150 or CMP 125.

LL 327 Dante's Commedia 3 Credits

An introduction to Dante Alighieri's *Commedia* ("Inferno", "Purgatorio" and "Paradiso") exploring key ethical and aesthetic elements of the poem through close reading and critical analysis of the primary text.

Prerequisite(s): BHP 150 or CMP 125.

LL 490 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed.

Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Music Education (ME)

ME 111 Music Education Lab 0 Credits

Undergraduates must meet the weekly attendance and participation requirement for Music Education Lab during every semester of enrollment up to seven semester as an undergraduate Music Education major except for the student teaching semester. Grading is "P" (satisfactory) or "U" (unsatisfactory). As part of the Music Education Lab experience, students are required to complete 15 hours of professional development.

ME 161 Art of Teaching Music I 3 Credits

Art of Teaching Music I (ATM I) is a first in the sequence of Music Education courses designed to prepare the undergraduate Music Education major students for their student teaching experience and completion of their teaching licensure. There will be field observations of master teachers under the aegis of a music education faculty that will allow students not only to observe, but to have guided experience in assessing how teaching and learning are experienced in real classrooms. Partnerships between local expert teachers and music education faculty will allow students to complete field observations as well as guided experience in teaching and assessing students in real classrooms.

ME 187 Instrumental Music: Strings 1 Credits

This course is designed as an introduction to the pedagogy of string instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring, and idiomatic writing are investigated. When available, instruments may be rented from the college. Rental fee, per instrument: \$25.

ME 188 Instrumental Music: Winds/Percussion 2 Credits

This course is designed as an introduction to the pedagogy of brass, woodwind, and percussion instruments. Emphasis is on learning through performance. Instruments are required. Various methods and materials available for use in public schools, developmental ranges, transposition, scoring and idiomatic writing are investigated. When available, instruments may be rented from the college. Students must provide their own drum pads and sticks. Rental fee, per instrument: \$60.

ME 262 Art of Teaching Music II 4 Credits

Art of Teaching Music II (ATM II) is designed to build on the knowledge, skills, and dispositions, introduced in ATM I. Students will expand their abilities in the domains of planning, teaching, assessing, reflecting, developing musicianship, and philosophy in context of teaching general music. Moreover, they will have the opportunity to put these abilities into practice when teaching peers and teaching elementary and middle general school students.

Prerequisite(s): ME 161.

ME 471 Music and Hip Hop Culture 3 Credits

Hip Hop in the United States is arguably the most lucrative, popular, and culturally challenging contemporary musical force. The narratives of Hip Hop go beyond the boundaries of race and class as well as those of music, poetry and dance. As such, Hip Hop is a phenomenon that presents problems as well as great possibilities. This course explores them from the standpoint of educational sociology, looking at their implications for music in schools as well as in daily life.

Prerequisite(s): ME 271.

ME 472 Teaching/Learning:Urban Schools 3 Credits

This course offers students theoretical and practical insight into teaching in urban schools. The class will present an analysis and practical implications for what is needed in order to successfully engage in teaching in urban centers in the United States. Students will balance field experiences with critical analyses of issues such as multicultural teaching, race, class, and economics in urban schools as well as their curricular and pedagogical implications.

Prerequisite(s): ME 581, ME 582.

ME 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

ME 491 Kodaly Music Reading 2 Credits**ME 492 Student Teaching 12 Credits**

ME 492 - Student Teaching A full semester internship in directed full-time teaching supervised by department members and carried out in schools with approved cooperating teachers. In addition to the field experience, students attend a weekly seminar on campus to discuss current issues in music education as they relate to individual teaching situations. Students discuss classroom management strategies, action research, authentic instruction, critical thinking, feeling and action as well as teaching to focusing questions, concepts and objectives. Throughout student teaching, students maintain a digital portfolio that demonstrates how they meet the New Jersey State and INTASC teaching standards. At the conclusion of the semester, students attend a portfolio review with members of the Music Education faculty to assess the success of the teaching experience. Students must provide their own transportation to student teaching site. Student Teaching fee: \$245. Fees for the Praxis Examination and Teacher Certification are additional. Additional information regarding student teaching may be found in the department's Student Teaching Handbook at www.rider.edu/musiced

Prerequisite(s): Classification as a full senior; Satisfactory completion of music education courses numbered ME 161, ME 262, ME 563, ME 564, ME 187, ME 188, and either Developmental or Educational Psychology; Satisfactory completion of TH 241; For voice primary students, satisfaction of all requirements of PI 204; A minimum 3.0 cumulative grade point average; Demonstrated aptitude, motivation and potential for success in teaching, as evidenced by the successful completion of portfolio reviews; Departmental approval; Students in the Master of Music Education (MME) degree program must take the following courses as prerequisites to student teaching; ME 563, ME 564, ME 725.

ME 499 Special Topics Music Education 2 Credits

The content of this course and the number of credits will vary with the special interests and qualifications of the professor teaching it.

Music History (MH)

MH 247 Music Historiography I 3 Credits

Historiography I begins by exploring similarities and differences between various music cultures around the world, and continues with an examination of selected genres of Western Art Music of the Medieval, Renaissance and Baroque periods. Basic information literacy skills, such as searching library catalogs, databases and reading academic articles also will be covered.

Prerequisite(s): CMP 125.

MH 248 Music Historiography II 3 Credits

Examines Western Art Music since 1750 and includes a research assignment that builds upon the information literacy skills gained in MH 247.

Prerequisite(s): MH 247.

MH 345 Music Since 1900 3 Credits

Examines controversies and aesthetic movements in 20th and 21st century music. Emphasis is placed upon critical reading and writing skills.

Prerequisite(s): MH 248.

MH 433 Seminar in Music History 3 Credits

The contents of courses carrying this number will vary with the special interests and qualifications of the instructors teaching them. Possible topics include period courses, courses from a distinct perspective, composer courses and genre courses.

Prerequisite(s): MH 248.

MH 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Music Theory (TH)

TH 045 Introduction to Musicianship 4 Credits

Integration of the basic elements of music, scales, intervals, key signatures, triads and rhythmic notation with the practical skills of sight singing, rhythmic reading, keyboard harmony and dictation. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade; 0 credits toward graduation, counts as 4 credits in the semester load.

TH 101A Composition Primary 2 Credits**TH 101C Composition Elective 2 Credits****TH 101D Composition Elective 1 Credits****TH 101E Composition Primary 2 Credits****TH 101F Composition Primary 1 Credits****TH 141 Musicianship I 4 Credits**

This course assists students in learning and integrating aural, performance, analytical and composition skills involving diatonic melody and harmony. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade.

Prerequisite(s): TH 045 or passing a placement test.

TH 142 Musicianship II 4 Credits

A continuation of TH 141 involving chromatic melody and harmony with an introduction to binary and ternary form.

Prerequisite(s): minimum "C-" grade in TH 141.

TH 201A Composition Primary 2 Credits**TH 201E Composition Primary 2 Credits****TH 201F Composition Primary 1 Credits****TH 237 Composition Class 3 Credits**

Class instruction in original composition. May be taken as a level I elective.

Prerequisite(s): For non Theory/Composition majors only, minimum "C-" grade in TH 142.

TH 241 Musicianship III 4 Credits

A continuation of TH 142 with an introduction to larger musical forms and counterpoint.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 251 Analytical Studies I 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain only the harmonic vocabulary and formal structures studied in TH 141 and TH 142, may vary each time the course is offered. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 253 Orchestration 3 Credits

A study of the orchestra and its individual instruments from the standpoints of the composer, arranger and conductor. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 255 Song Writing 3 Credits

Solo vocal composition in various styles. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 259 Electroacoustic Music 3 Credits

An introduction to the history and literature of electroacoustic music emphasizing hands-on creative opportunities in sequencing and digital sound processing. May be taken as a level I theory elective.

Prerequisite(s): minimum "C-" grade in TH 142.

TH 301A Composition Primary 2 Credits**TH 301E Composition Primary 2 Credits****TH 301F Composition Primary 1 Credits****TH 342 Contemporary Trends 3 Credits**

An analytical study of the compositional techniques of the 20th and 21st centuries.

Prerequisite(s): TH 241.

TH 401A Composition Primary 2 Credits**TH 401E Composition Primary 2 Credits****TH 401F Composition Primary 1 Credits****TH 424 Choral and Instrumental Arranging 3 Credits**

Arranging for various ensembles of voices and instruments. May be taken as a level II theory elective.

Prerequisite(s): TH 241.

TH 431 Form and Analysis 3 Credits

Study of the compositional process as observed in selected examples of music literature, predominantly from the tonal repertoire. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 432 Contrapuntal Techniques 3 Credits

18th century counterpoint with an emphasis on analysis and writing of original compositions. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 433 Special Topics in Theory 3 Credits

The content of the course carrying this number will vary with the special interests and qualifications of the professor teaching it. May be taken as a level II theory elective.

Prerequisite(s): minimum "C-" grade in TH 241.

TH 452 Analytical Studies II 3 Credits

An in-depth analytical study of a select body of tonal music to be determined by the instructor. The music, which will contain a more advanced harmonic vocabulary and larger formal structures than the music studied in TH 251, may vary each time the course is offered. May be taken as a level II theory elective.

Prerequisite(s): TH 241 with a minimum grade of C-.

TH 480 Senior Project 3 Credits

Independent study in theory or composition resulting in either a paper comparable to a substantial journal article or a composition in one of the larger forms.

Prerequisite(s): Five semesters of private composition study.

TH 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed.

Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Organ (OR)

OR 001S Applied Organ Studio 0 Credits

OR 101A Organ Primary 2 Credits

OR 101B Organ Primary 1 Credits

OR 101C Organ Elective 2 Credits

OR 101D Organ Elective 1 Credits

OR 101E Organ Primary 2 Credits

OR 101F Organ Primary 1 Credits

OR 101G Organ Primary 2 Credits

OR 201A Organ Primary 2 Credits

OR 201B Organ Primary 1 Credits

OR 201E Organ Primary 2 Credits

OR 201F Organ Primary 1 Credits

OR 201G Organ Primary 2 Credits

OR 301A Organ Primary 2 Credits

OR 301B Organ Primary 1 Credits

OR 301E Organ Primary 2 Credits

OR 301F Organ Primary 1 Credits

OR 301G Organ Primary 2 Credits

OR 401A Organ Primary 2 Credits

OR 401B Organ Primary 1 Credits

OR 401E Organ Primary 2 Credits

OR 401F Organ Primary 1 Credits

OR 401G Organ Primary 2 Credits

OR 433 Organ Literature I 3 Credits

Historical study of organ literature coordinated with a study of the development of the organ as a musical instrument.

OR 434 Organ Literature II 3 Credits

Continuation of OR 433.

OR 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Piano (PI)

PI 001S Applied Piano Studio 0 Credits

PI 045 Introduction to Piano Secondary 1 Credits

Designed for student with little to no background in piano study or music reading. Students will develop a foundation (basic elements) of pianism/musicianship skills and will focus on the most fundamental aspects of music study at the piano. 0 credits toward graduation, counts as 4 credits in the semester load.

Prerequisite(s): placement; Students must pass this course with a grade of "Y" to progress to PI 103: Piano Secondary I.

PI 101A Piano Primary 2 Credits

PI 101B Piano Primary 1 Credits

PI 101C Piano Elective 2 Credits

PI 101D Piano Elective 1 Credits

PI 101E Piano Primary 2 Credits

PI 101F Piano Primary 1 Credits

PI 101G Piano Primary 2 Credits

PI 103 Piano Secondary I 1 Credits

Establishes a solid foundation of piano playing through integration of musicianship skills in addition to building facile digital independence and bilateral hand coordination. Minimum grade of "B-" required to pass the course.

Prerequisite(s): Grade of "Y" in PI 045 or placement.

PI 104 Piano Secondary II 1 Credits

Continuation of PI 103; appropriate for the advanced beginner. Minimum grade of "B-" required to pass the course.

Prerequisite(s): PI 103 or placement.

PI 201A Piano Primary 2 Credits

PI 201B Piano Primary 1 Credits

PI 201C Piano Elective 2 Credits

PI 201D Piano Elective 1 Credits

PI 201E Piano Primary 2 Credits

PI 201F Piano Primary 1 Credits

PI 201G Piano Primary 2 Credits

PI 203 Piano Secondary III 1 Credits

Establishes fluidity in piano playing through integration of musicianship skills, digital independence and bilateral hand coordination. Minimum grade of "B-" needed to pass the course.

Prerequisite(s): minimum grade of "B-" in PI 104 or placement.

PI 204 Piano Secondary for Mus Ed & Sacred Music 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of choral works; playing individual lines/parts of small-scale instrumental works; harmonizing and transposing melodies with accompaniments.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 205 Piano Secondary VCPER 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of songs and arias; warm-up exercises; transposing vocal lines and portions of accompaniments; harmonizing melodies.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 206 Piano Secondary for Music Theater Majors 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of songs and arias; warm-up exercises; transposing vocal lines and portions of accompaniments; harmonizing melodies.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 207 Piano Secondary for Theory Comp Majors 1 Credits

Development of practical keyboard skills in the areas of score reading (including one's own works), use of piano as a tool for composition, and realizing chord progressions.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 208 Piano Secondary BAM 1 Credits

Development of practical keyboard skills: sight-reading; playing vocal lines and piano parts of songs and arias; warm-up exercises; transposing vocal lines and portions of accompaniments; harmonizing melodies.

Prerequisite(s): minimum grade of "B-" in PI 203 or placement.

PI 297 Fund of Piano Pedagogy I 3 Credits

Fundamentals I is devoted to study of techniques, methods, and materials suitable for beginning through early intermediate level students. Other areas of study include motivational strategies, establishment of effective practice habits, recital preparation, technique, and elementary duet materials. Students analyze and demonstrate teaching from three different beginning piano methods. Observation of professional teaching is done in the context of class and private lessons at the Westminster Conservatory.

PI 298 Fund of Piano Pedagogy II 3 Credits

In Fundamentals II, students continue to apply their experience with piano methods to the teaching of students. In addition, the semester is devoted to the study of materials from all style periods for upper elementary and intermediate level students. Students observe private and group lessons appropriate to these levels. The course culminates in an individual lecture recital demonstrating music from a variety of style periods.

Prerequisite(s): PI 297.

PI 301A Piano Primary 2 Credits**PI 301B Piano Primary 1 Credits****PI 301C Piano Elective 2 Credits****PI 301D Piano Elective 1 Credits****PI 301E Piano Primary 2 Credits****PI 301F Piano Primary 1 Credits****PI 301G Piano Primary 2 Credits****PI 397 Fund of Piano Pedagogy III 3 Credits**

Fundamentals III involves supervised private and group teaching of beginning students. Emphasis is placed on lesson planning, presentation of concepts, use of technology, and the relationship between technique and musicianship skills. The course further addresses the different psychological and methodological approaches to teaching adults and children in class and private settings, and includes an overview of materials for the adult student and group classes. The course culminates in a lecture recital on a pedagogical subject of the students choice.

PI 401A Piano Primary 2 Credits**PI 401B Piano Primary 1 Credits****PI 401C Piano Elective 2 Credits****PI 401D Piano Elective 1 Credits****PI 401E Piano Primary 2 Credits****PI 401F Piano Primary 1 Credits****PI 401G Piano Primary 2 Credits****PI 413 Accompanying Class 2 Credits**

This course is designed with the twofold purpose of allowing undergraduate pianists to fulfill their piano ensemble elective requirement within the professional studies area as well as providing an opportunity for voice primary students to further their piano study in a challenging forum in situations directly related to their repertoire. The students in the class will receive instruction in the stylistic, technical, analytical and linguistic aspects of vocal literature. The many issues involved in vocal collaboration will be discussed along with in-depth study of the pianist's role in musical partnerships. Issues of musical freedom, language, and the varieties of sonic treatment unique to vocal literature will be discussed. Italian, French, German and English song repertoire from various style periods will provide the assignments for performance and discussion.

PI 435 Survey of Piano Literature I 3 Credits

A study of representative works from 1650-1800 by composers including J. S. Bach, C.P.E. Bach, J.C. Bach, Haydn, Mozart, and Beethoven.

Prerequisite(s): MH 248.

PI 436 Survey of Piano Literature II 3 Credits

A study of representative works from 1800 to the present by composers including Beethoven, Schubert, Mendelssohn, Schumann, Chopin, Liszt, Brahms, Debussy, Ravel, Prokofiev, and Bartók.

Prerequisite(s): MH 248.

PI 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Religion/Philosophy (RP)

RP 265 Lit of New Testament 3 Credits

An introduction to the thought of the early Christian church as expressed in the New Testament, this course will emphasize a literary and historical reading of the Gospels and Epistles. It will introduce students to the Jewish and Greco-Roman religious, political and cultural worlds in which Jesus and his disciples lived and within which earliest Christianity arose.

RP 268 Hebrew Bible & Old Testament 3 Credits

This course introduces students to the writings of the Hebrew Bible/Old Testament within their historical and literary contexts. By critically reading these books, students will become aware of the history, culture and religion of ancient Israel - all of which contributed to the traditions of Judaism and Christianity.

Sacred Music (SM)

SM 121 Survey of Sacred Music Lit 3 Credits

Broad survey of Christian music. Through standard repertoire, major historical genres of sacred music are explored from biblical roots in the Old and New Testament to the postmodern expressions of our time.

SM 122 Worship and Theology 3 Credits

A study of the content, theology, and history of the Old and New Testament narratives that the church recounts and celebrates in its liturgical year.

SM 142 Intro to Music Ministry 2 Credits

An introduction to the vocational needs, professional relationships, administration styles and teaching roles of the church musician. In addition to an overview of professional standards, emphasis will also be placed on music engraving skills, budgeting, recruitment, endowments and fundraising.

SM 158 Intro Handbell Leadership 1 Credits

A hands-on course providing a strong foundation for the beginning director/ringer. It will include information about ringing instruments, maintenance, ringing and damping techniques, articulations, part assignments, a survey of handbell literature, and rehearsal planning and directing.

SM 250 Contemporary Worship 2 Credits

This course is an exploration of the various forms of worship being practiced in urban churches across America. Practical and skill-based, it is designed to allow the student to explore praise and worship music, different styles of gospel, and other forms of music used in non-traditional worship.

SM 340 Church Field Education 1 Credits

A practical program in which students take responsibility for the music program of an assigned affiliate church. Under supervision, students exercise the skills and concepts learned in the classroom. Enrolled students also meet in a weekly preceptorial. Sacred Music majors must take two consecutive semesters, normally in the junior year.

Prerequisite(s): SM 121, SM 122.

SM 354 Hymnody & Psalmody 3 Credits

A study of the origins and development of Christian song. The first part of the course deals with the nature of the Psalms in their Biblical setting and their use in the worship of different traditions. The second part of the course deals with the history of congregational hymnody - texts, tunes, styles and functions - from the 16th century to the present. The course aims to develop an awareness of the textual and musical treasures available for both congregational and choral use.

SM 360 History of American CM 3 Credits

A broad survey of American church music beginning with colonial psalm-singing and continuing through four centuries of musical development leading up to and including the vast panorama musical practices found in post-modern Christianity. A special emphasis will be placed on the development and influence of African-American church music on contemporary musical practices. **Prerequisite(s):** SM 121.

SM 365 Sacred Sounds 2 Credits

A study of the origins and development of Christian song. The first section of the course deals with the nature of the psalms and their use in the worship of different traditions. The second section of the course will be a survey of congregational hymnody – texts, tunes, styles and functions – from the 16th century to the present. The course aims to develop a context for the discussion congregational song as it might be practiced in the 21st century, the final part of the class.

SM 410 African Amer Choral Lit 3 Credits

This course is designed to give students a better understanding of the choral literature, historical context and text analysis of African American composers.

SM 454 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 455. Offered in rotation with other Sacred Music electives.

SM 455 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas. Complements SM 454. Offered in rotation with other Sacred Music electives.

SM 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 is required.

Prerequisite(s): junior or senior standing.

SM 491 SM Internship 1 Credits

A practical program in which students take responsibility for the music program of a local church or work as an intern in an assigned affiliate church. Under faculty supervision, students exercise the skills and concepts learned in the classroom. Enrolled students also meet in a weekly preceptorial. Sacred music majors must take two consecutive semesters, normally in the junior year.

Prerequisite(s): CR 215.

Social/Physical Science (SP)

SP 171 Western Civ I 3 Credits

This survey history course presents a cohesive picture of the development of Western societies from prehistoric times to the early Renaissance. Social, political and economic aspects are covered; intellectual and cultural developments are emphasized. Familiarity with primary sources and critical reading are integral to the course.

SP 172 Western Civ II 3 Credits

Continuation of SP171. This survey history course covers developments in Western societies from the Renaissance to the present. Major intellectual and cultural trends and movements are presented, along with historical progress and socio-economic expansion.

SP 273 Developmental Psychology 3 Credits

The physical and psychological growth of the individual from infancy through adolescence is studied, with emphasis on cognitive, emotional, and social processes.

Prerequisite(s): SP 175.

SP 274 Educational Psychology 3 Credits

The psychological foundations of education, based on the findings of experimental research in learning, transfer, motivation, reinforcement, and behavioral modification.

Prerequisite(s): PSY 100.

SP 286 Life in Middle Ages 3 Credits

A seminar in which the life styles of medieval Europeans are studied. Students will develop an understanding of particular social organizations and problems of the period by examining the conditions and events of everyday medieval life. Offered in rotation with other History courses.

SP 408 Voice Science 3 Credits

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.
Corequisite(s): CR 509.

Voice (VC)**VC 001S Applied Voice Studio 0 Credits****VC 101A Voice Primary 2 Credits****VC 101B Voice Primary 1 Credits****VC 101C Voice Elective 2 Credits****VC 101D Voice Elective 1 Credits****VC 101E Voice Primary 2 Credits****VC 101F Voice Primary 1 Credits****VC 101G Voice Primary 2 Credits****VC 103 Voice Secondary 1 Credits****VC 114 Introduction to Lyric Diction 2 Credits**

Introduction to the International Phonetic Alphabet (IPA) and the sounds of all major sung languages through oral and written drill. Open to Voice Performance majors only.

VC 115 English & Italian Diction 2 Credits

Introduction to the rules of singing English and Italian through the use of the International Phonetic Alphabet (IPA) with oral and written drill.

VC 116 French & German Diction 2 Credits

Introduction to the rules of singing French and German through the use of the International Phonetic Alphabet (IPA) with oral and written drill.

Prerequisite(s): VC 115.

VC 118 Italian Diction 2 Credits

Introduction to the rules for singing Italian through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 119 French Diction 2 Credits

Introduction to the rules for singing French through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 120 German Diction 2 Credits

Introduction to the rules for singing German through the use of the International Phonetic Alphabet (IPA), with oral and written drill. Open to Voice Performance majors only.

Prerequisite(s): VC 114.

VC 191 Movement for the Performer 2 Credits

Movement exercises and etudes help students develop proper alignment, physical freedom, unification of voice, breath, and body, and help them explore the body as an expressive instrument.

VC 201A Voice Primary 2 Credits**VC 201B Voice Primary 1 Credits****VC 201C Voice Primary 2 Credits****VC 201E Voice Primary 2 Credits****VC 201F Voice Primary 1 Credits****VC 201G Voice Primary 2 Credits****VC 203 Voice Secondary 1 Credits****VC 291 The Singing Actor 2 Credits**

The introduction to vocal performance entails coaching of selected songs, arias or repertoire from music theater and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

Prerequisite(s): successful completion of Level I voice jury.

VC 301A Voice Primary 2 Credits**VC 301B Voice Primary 1 Credits****VC 301C Voice Primary 2 Credits****VC 301E Voice Primary 2 Credits****VC 301F Voice Primary 1 Credits****VC 301G Voice Primary 2 Credits****VC 305 Singing in Italian and French 2 Credits**

Master class and private coaching in vocal performance of Italian and French language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung Italian and French.

Prerequisite(s): Successful completion of Level I jury; VC 118, VC 119.

VC 306 Singing in German and English 2 Credits

Master class and private coaching in vocal performance of German and English language song, recitative and opera arias. The class will focus on pronunciation, inflection and nuances of sung German and English.

Prerequisite(s): Successful completion of Level I Jury; VC 120.

VC 401A Voice Primary 2 Credits**VC 401B Voice Primary 1 Credits****VC 401E Voice Primary 2 Credits****VC 401F Voice Primary 1 Credits****VC 401G Voice Primary 2 Credits****VC 408 Voice Science 3 Credits**

Study of the physics and physiology of voice production. Musical and vocal acoustics are explored using the facilities of the Westminster Voice Laboratory. Anatomic and physiologic underpinnings of respiration, phonation, articulation, registration and hearing are explored in depth.

VC 433 Song Literature I 2 Credits

A survey of solo literature for voice and accompanying instrument including solo vocal music of the Baroque period and German lieder.

Prerequisite(s): MH 248.

VC 434 Song Literature II 2 Credits

A survey of solo literature for voice and accompanying instrument including French mélodie, songs by nationalist composers, English and American song.

Prerequisite(s): MH 248.

VC 457 Private Coaching 2 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 457 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 458 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 458 Private Coaching 1 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 457 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 458 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 467 Private Dramatic/Role Coaching 2 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 467 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 468 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 468 Private Dramatic/Role Coaching 1 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 467 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 468 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

Prerequisite(s): successful completion of Level II.

VC 490 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-4 credit hours. Students may count up to a maximum of 18 independent study hours toward graduation. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): junior or senior standing.

Graduate Courses and Descriptions

Arts and Sciences (AS)

AS 691 Arts & Science Internship 1-3 Credits

This course requires 15 hours for each credit for which the student enrolls. The internship requires on-site participation at a pre-approved site. Students may enroll for a maximum of 3 credits.

Prerequisite(s): graduate standing.

Conducting (CR)

CR 505 Advanced Conducting 3 Credits

A continuation of the conducting studies begun in CR 215 and CR 315, this course aims to be more student-centered, following the process from repertoire planning to the final performance. Intensive score preparation, advanced rehearsal techniques, performance practice and baton technique.

Prerequisite(s): CR 315.

CR 509 Symphonic Choir 1 Credits

A large mixed chorus comprised of students above the lower division, including graduate students from all disciplines. The ensemble regularly performs in the region and focuses on the major choral/orchestral repertoire along with a wide variety of repertoire for large mixed chorus. Placement hearing required.

CR 511 Westminster Choir 1 Credits

A highly select ensemble that performs and records a wide variety of choral repertoire, the Westminster Choir regularly tours nationally and internationally, and aspires to the highest professional standards. Members are selected by audition from all Westminster students above the freshman level. The requirements for selection include good academic standing, strong musicianship, and superior vocal talent. Auditions are held in the fall semester and students participate for the academic year.

CR 513 Williamson Voices 1 Credits

A chamber choir with a unique mission that combines performance and outreach education. Repertoire is chosen from a broad spectrum of literature, including world music and contemporary choral works. Auditions are held in the fall semester and students participate for the academic year.

CR 515 Westminster Kantorei 1 Credits

An early music vocal chamber ensemble specializing in music before 1750, with occasional forays into more contemporary repertoire. [Although the ensemble will generally consist of around 16 singers, the exact make-up of the ensemble will vary from semester to semester, depending on the works to be studied and performed.] Repertoire will include works for vocal ensemble and works featuring significant solo work. The entire ensemble will rehearse three hours per week. Keyboardists may audition for the ensemble. Auditions are held in the fall semester and students participate for the academic year.

CR 517 Master Singers 1 Credits

A mixed ensemble serving as the choir for Graduate Conducting, Sacred Music and Music Education majors. Repertoire consists of a wide variety of choral works drawn from all style periods, works appropriate for use in churches and in schools at the secondary and post-secondary levels. Four semesters are required for all graduate Choral Conducting majors. Two semesters are required for Sacred Music majors, and those Music Education majors who have selected conducting as their performance field. This ensemble is non-auditioned and open to all students.

CR 524 Vocal Techniques for Choirs 3 Credits

Study of vocal techniques appropriate for use in choral rehearsals and for teaching class voice. Techniques for effecting change in group vocal productions are discussed, including such topics as the identification of group vocal problems and mental and physical preparation of a group for good vocal production. Techniques to be developed include (1) how to communicate information about vocal technique to amateur singers, (2) exercises used to develop choral sound by improving diction, dynamics, legato, staccato, martellato, high and low registers, resonance, vowel modification, etc., (3) how to train singers to use a vocal production specifically appropriate to the repertoire of various style periods and the demands of individual composers, and (4) conducting methods for good choral and vocal training. Recommended both for conducting majors and for students in other major programs, including those for whom the voice is not the primary performance medium.

CR 607 Conducting Performance 1 Credits

Graduate Conducting, Sacred Music and Music Education students (with a conducting concentration) enroll for Conducting Performance in the semester of their recital or major conducting project.

CR 621 Choral Conducting I 3 Credits

A study of conducting to develop technique through facial expression, breathing, alignment and gesture. Emphasis is placed on developing and refining a process of score study. This course will assist conductors in evaluating their conducting and preparing them to make conducting decisions based upon score study.

CR 622 Choral Conducting II 3 Credits

In addition to building on the conducting skills taught in Conducting I, this course will focus upon acquisition of a broad range of rehearsal methods and techniques and gaining a comprehensive knowledge of choral ensemble warm-up philosophies, methods and techniques. Conductors will continue to study various approaches to score analysis that aid in preparation for rehearsal. Participants in the course will be required to submit a comprehensive case study which focuses on rehearsal technique and rehearsal procedures.

Prerequisite(s): CR 621.

CR 624 Conducting Skills 3 Credits**CR 625 Choral Pedagogy 3 Credits**

This online course reorganizes the components of choral rehearsal technique to reflect a harmonic approach to rehearsing, teaching, and learning. It is designed to emphasize the importance of teaching audiation and rehearsing choirs within a harmonic context.

CR 627 Choral Literature I 3 Credits

A broad survey of choral repertoire from Gregorian chant to present-day compositions. Emphasis is placed upon knowing the availability and sources of music of major composers and of music appropriate for performance in today's churches and schools.

CR 628 Choral Literature II 3 Credits

A study of selected major choral works, involving analytical and stylistic study. Oral reports by class members on assigned topics.

CR 641B Conducting Primary 1 Credits**CR 641D Conducting Primary (Elective) 1 Credits****CR 641F Conducting Primary 1 Credits****CR 681 Baroque Performance Practice 3 Credits**

A practical and theoretical study of issues of Baroque performance practice, including tempo, phrasing and articulation, ornamentation, rhythmic alternation, qualities of sound, continuo practice, influence of dance, affect and national idioms. Primary source materials will serve as the basic core of readings for the course, supplemented and supported by recordings and contemporary resources. In the later half of the semester, students will perform in a series of master classes.

Prerequisite(s): for undergraduates MH 248, TH 241.

CR 690 Independent Research and Study 1-4 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

CR 710 Seminar in Choral Literature 3 Credits

An intensive study of a specific area of choral history and literature. The content of this course will vary from semester to semester with the special interests and qualifications of the professor teaching it. Emphasis is placed upon in-depth study of the selected repertoire. May be repeated for credit.

Prerequisite(s): undergraduate must have Permission of Instructor.

CR 720 Graduate Conducting Forum 1 Credits

A conducting seminar that focuses on the synthesis of gesture, score study and pedagogy. Select repertoire and research materials will be conducted, analyzed and discussed. Focus will be given to orals preparation and current choral conducting issues. This course may be repeated for credit.

CR 750 Choral Pedagogy Capstone 3 Credits

Independent research leading to a completed capstone project such as pedagogical publication or presentation, development of an original or unique method of instruction, instructional materials, or case study, or musical performance. The project must be approved by the department.

Harpsichord (HP)

HP 641C Harpsichord Elective 2 Credits**HP 641D Harpsichord Elective 1 Credits****HP 641E Harpsichord Elective 2 Credits****HP 641F Harpsichord Elective 1 Credits**

Language/Literature (LL)

LL 640 German Reading 3 Credits

Designed for graduate students who have little or no previous experience with the German language. A functional course concentrating solely upon preparing students to translate German language sources pertinent to their fields of study. Completion of the course with a grade of "Y" satisfies the graduate language translation requirement. Recommended for Sacred Music, Organ Performance and Choral Conducting majors; not recommended for Voice Pedagogy and Performance or Piano Accompanying and Coaching majors.

LL 641 French Reading 3 Credits

Designed for graduate students who have little or no previous experience with the French language. A functional course concentrating solely upon preparing students to translate French language sources pertinent to their fields of study. Completion of the course with a grade of "Y" satisfies the graduate language translation requirement. Recommended for Sacred Music, Organ Performance and Choral Conducting majors; not recommended for Voice Pedagogy and Performance or Piano Accompanying and Coaching majors. This course is offered in the fall semester only. Offered in the Fall. 3 Credit hours.

Music Education (ME)

ME 540 Choir Train for Young Singers 3 Credits

This course focuses on children's choirs in school, church and community. Students learn strategies to teach children good vocal technique and to build musical literacy through the study of appropriate repertoire. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

Prerequisite(s): Junior status.

ME 563 Art of Teaching Music III 4 Credits

Through course assignments, discussion, and clinical practice in varied school and community choral settings, course participants learn how to create meaningful elementary music experiences that foster individual success, accountability, a sense of accountability, critical thinking, independence, and life-long engagement with choral music.

Prerequisite(s): ME 262, satisfactory completion of Sophomore Review, satisfactory completion of teacher candidate basic skills requirement.

ME 564 Art of Teaching Music IV 4 Credits**ME 587 Music in Special Educ 1 Credits**

This course is designed to acquaint the pre-service teacher with the special needs of exceptional children in music classes. Students learn to adapt instruction to accommodate a variety of exceptionalities that are both physical and emotional. Content includes categories of special students, characteristic behaviors, mainstreaming, and classroom methodology. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. It is recommended that student take this course before the student teaching semester.

Prerequisite(s): Senior status.

ME 588 Dalcroze Studies 2 Credits

The purpose of this elective course is to provide students with an intensive experience in eurhythmics and eurhythmics pedagogy leading to an understanding of Dalcroze's principles regarding movement, solfège, improvisation and their uses in the classroom. An important focus of the class will be to provide an insight into kinesthetic-based learning as a conduit to inform and deepen the musical experience. Opportunities for lesson planning and curriculum development in the Dalcroze model will be offered. Students will write and present practice lessons. In addition, students will develop improvisation skills necessary to integrate eurhythmics into private applied instruction.

ME 591 Choral Music Grades 5-12 3 Credits

This course is designed to acquaint the music educator with repertoire suitable for use with middle and senior high school choral ensembles. Representative repertoire from all periods of music will be discussed, analyzed and performed in class. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

Prerequisite(s): Junior status.

ME 592 Creativity & Music Technology 2 Credits

Creativity and Technology in the Music Classroom is designed to prepare students to foster musical creativity using a variety of approaches and tools. In particular, students will use equipment such as digital audio workstations, MIDI controllers, microphones, and SmartBoards to facilitate rich and engaging creative experiences. Students will explore ways to structure learning experiences in response to the needs and interests of students, and will examine current thinking and trends related to the uses of creativity and technology in the music classroom.

Prerequisite(s): Junior status or permission of instructor.

ME 595 Assessing Music Learning 1 Credits

This course provides pre-service music teachers with the strategies to assess music learning. Students study various testing models and learn to write and grade traditional tests such as true/false, multiple choice and essay. In addition, students examine authentic assessment, performance assessment and portfolio assessment models. Topics such as validity, reliability, standardized tests and testing bias will be included. In addition, students will learn how to read and interpret quantitative test data and examine the literature on grading. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. The content of this course conforms to the recommendations of the Professional Teaching Standards adopted by the State of New Jersey in 2002. In some semesters, this course may be offered in an on-line format.

Prerequisite(s): Senior status.

ME 650 Thesis 1 Credits

Independent research under faculty supervision leading to the writing of a master's thesis. Students register for this course in every semester or summer term in which assistance is provided by the thesis advisor.

Prerequisite(s): ME 685 (preferred) or MH 731; Permission of the Chair for Music Education is required to register for this course.

ME 671 Music and Hip Hop Culture 3 Credits

Hip Hop in the United States is arguably the most lucrative, popular, and culturally challenging contemporary musical force. The narratives of Hip Hop go beyond the boundaries of race and class as well as those of music, poetry and dance. As such, Hip Hop is a phenomenon that presents problems as well as great possibilities. This course explores them from the standpoint of educational sociology, looking at their implications for music in schools as well as in daily life.

ME 672 Teaching/Learning in Urban Schools 3 Credits

This course offers students theoretical and practical insight into teaching in urban schools. The class will present an analysis and practical implications for what is needed in order to successfully engage in teaching in urban centers in the United States. Students will balance field experiences with critical analyses of issues such as multicultural teaching, race, class, and economics in urban schools as well as their curricular and pedagogical implications.

ME 682 Choral Music Education 3 Credits

This course is designed to assist choral music educators to improve their pedagogical effectiveness. This course will provide students with the knowledge, skills and dispositions necessary for developing comprehensive musicianship in the choral ensemble setting through the study of creating original music, responding to music, connecting to students and performing vocal/choral music with a primary focus on choral pedagogy, curriculum development, unit and rehearsal planning, programming, vocal development, program management, music literacy pedagogy, music technology and assessment.

Prerequisite(s): CR 621, ME 692, ME 721, ME 723.

ME 685 Improving Musical Practice: Research in Music Education 3 Credits

Intended for students in the MME and BM-MME degree programs, this course focuses on research as a tool for improving practice. Course members will read qualitative and quantitative research studies and consider the impact of research on their teaching. Course members will also plan and conduct original research that will help them to analyze their specific teaching contexts, identify and conduct inquiry into problems, and refine their practice as educators.

ME 686 Teaching Music in the 21st Century 3 Credits

Critical theory and critical pedagogy provide the framework for advanced study in post-modern teaching philosophies and teaching strategies as applied to music education. Techniques to engage students in diverse ways of thinking about music teaching and learning that transform both student and teacher will be presented. Always in the context of the social and political structures of schooling and the place schooling has in society, students will be empowered to create a dialoguing and problem-solving pedagogy for teaching music to children at all grade levels.

ME 690 Independent Research and Study 3 Credits

An elective course providing an opportunity to pursue a topic of special interest under the guidance of a music education faculty member. The proposal must be approved prior to registration for the course.

ME 692 Social Justice in Music Education: History, Philosophy, and Practice 3 Credits

The purpose of this course is two-fold. First, the course will explore the historical perspectives that have significantly shaped and informed music teaching and learning within American public education during the last century. Second, students will encounter, engage with, and interrogate philosophies and theories of practice from social justice perspectives in order to critically consider the place and purpose of music and music education within educational and societal contexts.

ME 693 Seminar in Music Educ 3 Credits

While the topics vary from year to year, international perspectives in music education form the foundation for this seminar.

ME 721 Curriculum Development & Evaluation 3 Credits

This course examines the relationship between curriculum theory and philosophy of music education. Through the study of traditional and contemporary models of curriculum development and evaluation, students broaden their understanding of curriculum as it impacts the learning process. Post modern theory consistent with the Department's commitment to Critical Pedagogy for Music Education provide the focal point for the development of curricula that enhance and support quality music education. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching.

ME 723 Social, Emotional, and Musical Learning 3 Credits

This course examines topics in psychology of music from the lens of social emotional learning. This theoretical lens will allow students to find the relationships between music-making as social and cultural practices and the development of individual and collective psychological process in music teaching and learning. Major topics include affective and physiological responses to music, musical enculturation, learning theory, well-being and wellness, musical aptitude, developmental processes, and motivation. Students will discuss literature in the psychology of music with applications to K-12 music classes and rehearsals and conduct a pilot study in an area of interest based upon knowledge from the literature.

ME 725 Teaching Instrumental Music 3 Credits

A graduate level survey of the pedagogy necessary to teach instrumental music (woodwinds, brass, string and percussion instruments) and to develop and maintain beginning string and wind ensembles. While the class will include some playing and performance, it is not designed to develop proficiency on the individual instruments. Students must demonstrate sufficient competencies to provide beginning instruction. Instruments will be available for rental. Course content, activities and experiences in this course covers New Jersey Core Curriculum Content Standards for Music and prepares students to meet the New Jersey Professional Standards for Teaching. Rental fee, per instrument: \$20.

ME 727 Teaching College 3 Credits

This course is designed for the graduate student who will be teaching at the college level. The content combines the theory of college teaching with praxis. Topics covered include: the psychology of the undergraduate, teaching graduate students, designing a syllabus, presenting course content, strategies for student-centered learning and assessment. Whenever possible, students will have the opportunity to intern with college faculty and will observe, present demonstration lessons, be coached and mentored. Open to all graduate students.

ME 730 Pedagogy and Practice 3 Credits

This course explores the intersection of philosophy, psychology, pedagogy and practice by providing students with guided teaching experiences connected to their current teaching situation. Throughout the course, students will be challenged to evaluate their own teaching against philosophical, psychological, pedagogical, and research-based models of music instruction. In addition to guided teaching experiences, students will participate in a weekly seminar class during which they will share and reflect on their experiences in the field and discuss topics pertinent to teaching and learning music.

ME 771 Critical Pedagogy for Music Ed 3 Credits

This course presents the fundamental concepts, contexts and constructs that define Critical Pedagogy for Music Education. It focuses on the application of critical theory as a philosophical perspective to inform decisions teachers make when planning instruction for their students.

ME 775 MME Capstone 1 Credits

Independent research leading to a completed capstone project, such as curriculum and assessment development, pedagogical publication or presentation, instructional materials, etc. The project must be approved by the department.

ME 791 Internship in Music Teaching 3 Credits

A field-based experience consisting of three hours per week of internship teaching at a public or private school. Students will work with a cooperating teacher and be supervised by the instructor of the internship. Students will meet with the instructor periodically through the semester. In addition, they will prepare and teach lessons and submit documentation to chronicle the internship experience. International students in music education are strongly encouraged to take this course. ME 685, 692 and 791 are offered in rotation.

Music History (MH)

MH 608 Graduate Music History Review 3 Credits

Required for graduate students who are admitted with deficiencies in music history, as determined by the graduate placement test in music history. It is strongly recommended that this course be taken at the outset of graduate study.

MH 635 Public Musicology 3 Credits

A graduate-level introduction to the many ways musicology can engage with communities and events outside the academy. Topics include music criticism, oral history, museum education, archives, and cultural tourism.

Prerequisite(s): Graduate Standing; removal of all Music History deficiencies.

MH 690 Independent Research & Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

MH 731 Intro to Musicology 3 Credits

Introduction to the basic tools of research in historical musicology in order to foster: (1) an awareness of the nature and scope of historical musicology as a scholarly discipline; (2) familiarity with the techniques of musicological research; (3) an understanding of the relationship between musicological research and performance practice; and (4) experience in the application of musicological techniques to specific musical works and issues. It is strongly recommended that this course be taken at the outset of graduate study. Required for all Master of Music candidates.

MH 733 Seminar in Music History 3 Credits

The content of the course will vary with the special interests and qualifications of the professor teaching it.

Prerequisite(s): Removal of all music history deficiencies, it is strongly recommended that MH 731 be taken prior to this course.

MH 734 Proseminar in Music USA 3 Credits

A graduate-level introduction to the scholarly study of music in the U.S. Readings will cover music in Colonial/Early America, Western art music, popular music, and music of various ethnic communities.

Prerequisite(s): Graduate standing; removal of all Music History deficiencies.

MH 750 Thesis I 3 Credits

Independent research under faculty supervision leading to a master's thesis. Students register for this course in their first term of thesis research.

Prerequisite(s): Graduate standing, removal of all Music History deficiencies.

MH 751 Thesis II 3 Credits

Independent research under faculty supervision leading to a master's thesis. Students register for this course beginning in their second term of thesis research.

Prerequisite(s): Graduate Standing, removal of all Music History deficiencies, MH 750.

Music Theory (TH)**TH 511 New Music Ensemble 1 Credits**

This course provides an opportunity to perform new music, primarily works of fellow students. It will also provide instrumentalists an opportunity to develop their performance skills more fully.

TH 512 Chinese Music Ensemble 1 Credits

This course provides an opportunity to learn a Chinese instrument and to perform on it in an ensemble setting. Students will learn musical styles from different parts of China and the Chinese Diaspora.

TH 550 Keyboard Harmony 3 Credits

An intense exploration of and drill in musicianship-keyboard skills, including score reading, transposition, modulation, clef reading, figured bass realization, harmonizing melodies, improvising and lead sheet accompanying. Projects may include transposition of a number of songs (perhaps a complete set) into all keys, figured bass realization for a Bach cantata, improvisation of service music (prelude, offertory, interludes, chorale preludes, postlude), multiple re-harmonizations of hymns/chorales for a service and score reduction and performance of a movement of an orchestral work. May be taken as an undergraduate level II theory elective.

Prerequisite(s): Undergraduate, minimum "C-" grade in TH 241; Graduate, Removal of all theory deficiencies.

TH 608 Graduate Musicianship Review 4 Credits

Required for graduate students admitted with deficiencies in musicianship as determined by the graduate placement test in musicianship. This course assists students in learning and integrating aural, performance, analytical and composition skills. Both the theoretical and the practical portion must be passed individually in order to receive a passing grade. It is strongly recommended that this course be taken at the outset of graduate study.

TH 622 Electroacoustic Music 3 Credits

Advanced opportunities for creative activities utilizing the resources of Westminster's Music Computing Center. Previous experience with sequencers and/or digital audio is expected.

Prerequisite(s): Removal of all music theory deficiencies.

TH 623 Seminar in Music Theory 3 Credits

The content of the course bearing this number will vary with the special interests and qualifications of the professor teaching it.

Prerequisite(s): Undergraduate, minimum "C-" grade in TH 241 and permission of instructor, or graduate student standing and removal of all music theory deficiencies.

TH 625 Composition 3 Credits

Class instruction in original composition. Projects and presentations.

Prerequisite(s): Graduate student standing and removal of all music theory deficiencies.

TH 645A Composition Primary 3 Credits**TH 645C Composition Elective 2 Credits****TH 645D Composition Elective 1 Credits****TH 645E Composition Primary 3 Credits****TH 645F Composition Primary 1 Credits****TH 655 Composition Project 3 Credits**

Graduate-level private study in composition culminating in a major composition in one of the larger forms.

Prerequisite(s): three semesters of TH 645.

TH 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

TH 726 Analysis 3 Credits

A study of the compositional process as observed in selected tonal works, using the analytical approach of Heinrich Schenker.

Prerequisite(s): Removal of all music theory deficiencies.

Organ (OR)**OR 587 Organ Improvisation 2 Credits**

A laboratory in the keyboard disciplines of modulation, transposition, improvisation and vocal score reading. Required for undergraduate Organ Performance majors; others may elect the course by permission of the instructor.

OR 588 Organ Pedagogy 2 Credits

Pedagogical approaches to organ playing. Required for undergraduate Organ Performance majors; others may elect the course by permission of the instructor.

OR 589 Organ Improvisation II 2 Credits

Continuation of OR 587.

OR 590 Accompanying at the Organ 2 Credits

Development of accompanying techniques essential to the professional organist. Arranging and transcription from piano reductions and orchestral scores; standard choral/organ literature. Leading congregational song; appropriate methods of instrumental registration.

OR 623 Organ Music of J.S. Bach 3 Credits

A study by genre of Bach's organ compositions will include background, overview of the influences of Buxtehude, Pachelbel and Böhm, and performance practice issues. The question of the "Bach organ" will be explored. **Prerequisite(s):** MH 731, OR 433.

Corequisite(s): MH 731, OR 433.

OR 629 Seminar in Organ Literature 2 Credits

An intensive study of an area of organ literature or its performance practice. Specific content will change with each semester. Emphasis upon in-depth study of the works of a selected composer or genre.

OR 641A Organ Primary 2 Credits**OR 641B Organ Primary 1 Credits****OR 641C Organ Elective 2 Credits****OR 641D Organ Elective 1 Credits****OR 641E Organ Primary 2 Credits****OR 641F Organ Primary 1 Credits****OR 690 Independent Research and Study 1-4 Credits**

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

OR 723 Organ Literature Before 1800 3 Credits

Historical study of the organ literature coordinated with a study of the development of the organ as a musical instrument.

OR 724 Organ Literature since 1800 3 Credits

Study and research into the style, form, and interpretation of representative organ works composed after 1800. Study and research into national styles of organ composition and construction in France, Germany, England and North America.

Piano (PI)**PI 512 Chamber Music 2 Credits**

Emphasis is placed upon rehearsal and performances of representative collaborative literature for strings and piano, and woodwinds and piano. Students will be assigned movements from major chamber works selected from different style periods. Professional instrumentalists will join them for rehearsals and performances in class. An overview of the development of this repertoire will be presented and listening assignments will augment the study of specific works. A project involving the study and presentation of a piano quartet or piano quintet will be included. Attendance at three concerts of instrumental chamber music is required. Permission of applied teacher and instructor is required.

PI 513 Jazz Keyboard/Improv 3 Credits

This course will enable pianists and organists to become familiar with the theory, harmony, and improvisational techniques of jazz piano. Emphasis will be placed upon getting each student to create spontaneous improvisations. The fundamental goal will be that of enabling students accustomed to following a score to move beyond it. Extensive exposure to material from the "Great American Songbook" as well as to jazz standards will provide a structural basis for the course.

Prerequisite(s): TH 142 and PI 201, or equivalent knowledge and technical proficiency.

PI 516 Physical/Psych Aspects Piano 2 Credits

The two major emphases of this course are: (1) the pianist as athlete and 2) the pianist as performer. The first includes a study of appropriate exercise, nutrition, anatomy and physiology as they relate to piano technique, implications for injury prevention, and how to deal with injuries should they occur. The second includes the reading process, strategies for practicing, memorizing techniques, and ways of coping with the behavioral, physical and cognitive manifestations of performance anxiety.

PI 540 Keyboard Skills 3 Credits

The course includes in-depth study of numerous aspects of musicianship skills essential for all pianists within the broader categories of technique and practice strategies; memorization and sight reading; improvisation and lead sheet realization. All aspects of piano musicianship skills will be addressed from practical, pedagogical, and collaborative points of view. Assignments will include examples of studies from a wide range of levels all within the current and developing skill level of each student enrolled in the class.

Prerequisite(s): UG - Eight credits of applied keyboard study or permission of keyboard instructor or course instructor. GR - Permission of course instructor.

PI 585 Piano Ensemble 1 Credits

Study and performance of piano duets, two-piano works, and works for combinations of three or more pianists. The emphasis is on ensemble techniques for rehearsal and performance.

PI 609 Graduate Piano Review 1 Credits

A functional course concentrating upon sight reading of simple piano accompaniments and open score reading. Required for graduate students with deficiencies in these skills.

PI 611 Piano Pedagogy Lab 0 Credits

Discussions will include problem-solving related to piano teaching, discussion of observations, supervised and independent teaching, questions relating to repertoire, materials and technique. Comparative philosophies and psychologies and their applications, group and private teaching, business issues, professional organizations and publications, technology, career planning, recital and audition planning will be included. There will also be guidance in the preparation for the graduate oral examination.

PI 622 Eval Piano Teaching Lit 3 Credits

This course provides a critical survey of piano teaching materials, including standard teaching literature, approaches to piano technique in writings and music exercises, and repertoire for the elementary, intermediate, and early advanced student. All music is analyzed from the perspectives of performance, technical demands, strategies for teacher presentation, and student practice. Applications and demonstrations of technology are included. Graduate students demonstrate teaching and performance strategies in class and carry an assigned teaching load at the Westminster Conservatory.

PI 633 Piano Literature Seminar 3 Credits

A major area of piano repertoire is selected for intensive study. The emphasis of the seminar changes from semester to semester. Possible topics include the development of the Mozart concerto, keyboard works of J.S. Bach, piano writing of Debussy, and 20th Century piano music.

PI 641A Piano Primary 2 Credits**PI 641B Piano Primary 1 Credits****PI 641C Piano Elective 2 Credits****PI 641D Piano Elective 1 Credits****PI 641E Piano Primary 2 Credits****PI 641F Piano Primary 1 Credits****PI 661 Graduate Piano Pedagogy 3 Credits**

This course serves as an intensive study of theoretical and practical aspects of piano study, through examination of instruction materials and developing a well-defined philosophy and approach to piano teaching. Students are challenged to increase their ability in connecting advanced and intermediate music study to the foundation of what should take place in the first weeks of piano lessons. The focus of the course lies in developing one's own curriculum, on its own terms, or associated with instruction materials already in publication. Various methodologies and significant areas of thought in the field of piano pedagogy are explored and compared. The course involves private and group lesson observations at all levels of teaching. Practical application of education theory to music lessons at the piano is done through demonstration and practice teaching at the Westminster Conservatory or the College. Practical application of educational theory to music lessons at the piano is done through demonstration and practice teaching through the Westminster Conservatory or the College.

PI 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

PI 691A Piano Pedagogy Internship I 3 Credits

The two-semester internship includes weekly teaching each semester, faculty observation of this teaching, and private discussion with the faculty observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. Internships may include intensive study of private and/or group instruction, reading for children, working with college, adults, piano minor, gifted students or traditional studio of all ages and levels.

PI 691B Piano Pedagogy Internship II 3 Credits

The two-semester internship includes weekly teaching each semester, faculty observation of this teaching, and private discussion with the faculty observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. Internships may include intensive study of private and/or group instruction, reading for children, working with college, adults, piano minor, gifted students or traditional studio of all ages and levels.

PI 713 Accompanying Class 3 Credits

Students will investigate aspects of ensemble in vocal accompanying. Discussion topics will include rubato and its connection to language, stylistic concerns, musical preparation as well as practical issues such as recital programming and balance. Students will be expected to absorb extensive repertoire through attendance and performance. Class format will include both student presentations and lecture sessions.

PI 714 Techniques of Coaching I 2 Credits

A practical course designed to furnish information and experience in all aspects of vocal coaching, including diction coaching, ornamentation and realization, issues of drama and presentation, stylistic considerations, stage deportment and specialized accompanying skills. Students are observed in the process of coaching singers. Semantics and pedagogical techniques are stressed and polished. Factors involved in translations of Italian, French, German and other non-English texts are studied.

PI 715 Techniques of Coaching II 2 Credits

A practical course designed to furnish information and experience in all aspects of vocal coaching, including diction coaching, ornamentation and realization, issues of drama and presentation, stylistic considerations, stage deportment and specialized accompanying skills. Students are observed in the process of coaching singers. Semantics and pedagogical techniques are stressed and polished. Factors involved in translations of Italian, French, German and other non-English texts are studied.

Prerequisite(s): PI 714.

Sacred Music (SM)**SM 509 Jubilee Singers 1 Credits**

This auditioned ensemble is devoted to the performance of sacred music from the African-American tradition.

SM 510 Conducting Adult Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving adults.

SM 511 Sacred Music Lab 0 Credits

Series of classes that addresses a variety of experiences in Sacred Music while rotating principal themes and ideas. Student preparation of monthly worship settings will put studied concepts into practice.

SM 512 Conducting Children and Youth Church Choirs: Pedagogy and Management 2 Credits

A practical, skill-based course devoted to the building and maintenance of church music programs serving children and youth.

SM 517 Concert Handbell Choir II 1 Credits

Open to students who have had previous handbell experience.

Intermediate to advanced repertoire, with opportunities for concert performance.

SM 519 Concert Handbell Choir I 1 Credits

A choir selected by audition from the most experienced and capable bell ringers among the student body at large. This ensemble utilizes advanced repertoire and techniques, aiming primarily at presenting concerts both on and off campus, including a two-week annual tour.

SM 525 Conductors' Repertoire Ensemble 1 Credits

An auditioned chamber ensemble, offered every semester, which provides conducting podium time and coaching to all interested members. It additionally serves the conducting needs of graduate Sacred Music majors.

Prerequisite(s): CR 215 or permission of instructor.

SM 531 Colloquium in Sacred Music 2 Credits

A lecture series/colloquium intended to address a wide variety of concerns in the field of Sacred Music while rotating principal themes and ideas.

SM 540 Choir Training/Young Singers 3 Credits

A practicum combined with study designed to teach students how to organize and direct a children's choir program that emphasizes musical training as a basic requirement. The course focuses on teaching children good vocal techniques and sight-reading skills and includes practice teaching in a local school under instructor supervision. Other areas covered include musical readiness skills, voice-change problems, and repertoire.

SM 541 Conducting Church Choirs: Ped & Mgt 3 Credits

A practical course devoted to the building and maintenance of church music programs serving persons of all ages.

SM 610 Foundations of Music Ministry 2 Credits

This graduate level course surveys the vocational needs, professional relationships, administrative styles, and teaching roles of the practicing church musician. In addition to an overview of professional standards, emphasis will also be placed on music engraving skills (music notation software), budgeting, recruitment, endowments and fundraising.

SM 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity. Offered in rotation with other Sacred Music electives. 3 Credit hours.

SM 624 Choral Music for Children 1 Credits

This course is designed to acquaint the church choral director with repertoire suitable for use with children's and youth choirs. Representative repertoire from all periods of music will be discussed and analyzed. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 625 Choral Music for Adults 1 Credits

This course is designed to acquaint the church choral director with repertoire suitable for use with adult choirs and adult ensembles. Representative repertoire from all periods of music will be discussed and analyzed. Focus will be on repertoire that can be used during special services throughout the liturgical church year.

SM 630 Conducting Coaching 1-2 Credits

Structured preparation and faculty coaching of the culminating choral recital in the graduate Sacred Music curriculum.

SM 631 Worship Planning/21st Cent. 3 Credits

Designed to facilitate the planning of worship, this practical course will be an immersion in the musical and theological materials available to those who create worship.

SM 632 Collaborative Prep for Worship 1 Credits

Through seminars, readings and common participation in chapel services, Westminster Choir College and Princeton Theological Seminary students will explore models for pastors and church musicians to prepare collaboratively for worship.

SM 635 Choir Training For Children/Youth 3 Credits

A practical course designed to teach students how to organize and direct a comprehensive music program from preschool through high school in the church setting. The course focuses on teaching excellent vocal techniques for each level as well as appropriate music skill development. Other areas of focus include: musical readiness skills; working with preschool singers; understanding the child's voice; the changing voice; and appropriate repertoire for all ages.

SM 640 Liturgies 3 Credits

A study of the origins of liturgy, its development in the main Christian traditions, and its relation to ecclesiastical history, with particular attention given to the differing styles and traditions of liturgical music. Contemporary liturgies are viewed against this historical background.

SM 641 Hymnology 3 Credits

A study of the origins and development of Christian hymnody, with reference to the theological emphases of various periods from the beginnings to the present, aiming to arouse interest in the textual and musical content of hymns and in their effective use in worship.

SM 654 German Church Music 3 Credits

A study of church choral literature by German composers from the 16th century to the present focusing on the pre-Bach and post-Bach cantata. Class performances of selected works. Complements SM 655. Offered in rotation with other Sacred Music electives.

SM 655 Bach Cantatas 3 Credits

A study of the history, performance practices, and liturgical setting of the cantatas of J.S. Bach. Class performances of selected cantatas.

SM 690 Independent Study and Research 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

SM 710 Panorama of Sacred Music 3 Credits

This graduate-level course is a one-semester survey of those masterworks and significant musical movements that have shaped the evolution of Western Sacred Music. Beginning with the Old Testament, this course will move through all eras, highlighting important composers and liturgical trends, placing them in their appropriate cultural and theological contexts.

SM 712 Hist of Sacred Music I 3 Credits

Study and research into the history of Western Christian music and its most important genres beginning with the Old Testament and continuing until the death of J.S. Bach in 1750.

SM 713 Hist of Sacred Music II 3 Credits

Continuation of SM 712, beginning with the Classical Viennese Mass and continuing until today. Emphasis on the development of the American church and its worship music.

SM 722 Theology, Liturgy & Worship 3 Credits

A detailed study of the Bible. Principal thematic and narrative elements are correlated to the development of the church's historic liturgies and the theological principles behind them.

Voice (VC)**VC 591 Performing in Lyric Theater 2 Credits**

Performing in Lyric Theater offers techniques for the preparation of lyric roles in a theatrical setting. It will develop elements of stagecraft, systematize a process for preparations and exploration, and introduce the working relationship with director and conductor.

Prerequisite(s): Undergraduates, VC 291 and the successful completion of Level II jury, or permission of the Chair.

VC 592 Opera Workshop 2 Credits

Introduction to opera performance. Acting exercises, character development, dramatic exploration and musical coaching culminating in a workshop-format presentation. It is recommended that VC 491 or 691 be taken before this course. This course may be repeated for credit.

Prerequisite(s): Undergraduates, successful completion of the level II voice test or permission of the chair.

VC 593 Opera Theater 2 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593E Opera Theater (Ensemble) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593N Opera Theater (Opera NJ) 1 Credits**VC 593R Opera Theater (Role) 2 Credits**

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 593T Opera Theater (Tech) 1 Credits

This course involves preparation and performance of a role or in the chorus of a fully staged opera production. Open only by audition. May be repeated for credit.

VC 621 Oratorio Solo Literature 3 Credits

A performance course surveying solo and ensemble portions of oratorios, masses, passions, and cantatas from the early Baroque period to the present, with emphasis on appropriate performance techniques for stylistic integrity.

VC 627 Opera Literature I 3 Credits

Study of the development of opera from 1600 through the Napoleonic era (ca. 1815), with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 628 Opera Literature II 3 Credits

Study of the development of opera from the early 19th century to the present, with emphasis on performance practices, singing styles, libretti, the role of the orchestra, and the historical, political and sociological milieu in which the operas were written.

VC 633 Seminar in Opera Literature 3 Credits

An intensive study of an area of opera literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the works of a selected composer or of a specific genre of opera.

VC 635 Seminar in Song Literature 3 Credits

An intensive study of some area of art song history and literature. The specific content of this course will change from semester to semester. Emphasis is placed upon in-depth study of the selected repertoire.

VC 641A Voice Primary 2 Credits**VC 641B Voice Primary 1 Credits****VC 641C Voice Elective 2 Credits****VC 641D Voice Elective 1 Credits****VC 641E Voice Primary 2 Credits****VC 641F Voice Primary 1 Credits****VC 641G Voice Primary 2 Credits****VC 650 Pedagogy Capstone 1 Credits**

Independent research leading to a completed capstone project, such as a pedagogical publication or presentation, development of an original or unique method of instruction, instructional materials, etc. The project must be approved by the department.

VC 655A Voice Primary 2 Credits**VC 655B Voice Primary 1 Credits****VC 655E Voice Primary 2 Credits****VC 655F Voice Primary 1 Credits****VC 657 Private Coaching 2 Credits**

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 657 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 658 involves weekly half-hour lessons and a fee of \$600. Open to graduate Voice Pedagogy and Performance majors.

VC 658 Private Coaching 1 Credits

Individual coaching sessions for singers on musical style, interpretation, ensemble, languages, and presentation. Registration for VC 657 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 658 involves weekly half-hour lessons and a fee of \$600. Open to graduate Voice Pedagogy and Performance majors.

VC 661 German Lieder 3 Credits

This survey of the German Lieder begins with its roots in the 17th and 18th centuries and continues into the 20th century. Classes will involve study of Romanticism, including philosophers and poets of the 18th and 19th centuries who were important for German Lieder. The bulk of the class involves in-depth study of the Lieder of the important composers of the genre: Haydn, Mozart, Schubert, Robert and Clara Schumann, Mendelssohn, Liszt, Brahms, Wolf, Strauss, Mahler, Schoenberg, Berg, and Webern. Class sessions will involve a balance of lecture, discussion, and student performance.

VC 662 French Melodie 3 Credits

This course is designed as a survey of the song literature of France. Students examine works for voice and piano/instruments by Berlioz, Gounod, Saint-Saëns, Bizet, Faure, Duparc, Chausson, Debussy, Ravel, Messaien, Milhaud, Poulenc, and others, analyzing their relationship to larger stylistic, social, and musicological trends. Investigation will include matters of prosody, scansion, and compositional organization, with particular attention given to matters of text setting and poetic treatment. Special emphasis will be placed on important French language poets whose literary works serve as the basis for this material. Poets will include Baudelaire, Verlaine, Hugo, Rimbaud, Mallarmé, LaForgue, Maeterlinck, and others. Poetic history and form will be covered as well as important composer/poet partnerships. Class sessions will involve a balance of lecture and discussion. Works by both well-known and lesser-known composers will be included.

VC 667 Private Dramatic/Role Coaching 2 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 667 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 668 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

VC 668 Private Dramatic/Role Coaching 1 Credits

Individual dramatic coaching sessions for singers on operatic role study and/or audition preparation. Students will provide their own accompanists as needed. Registration for VC 667 involves weekly hour-length lessons and a fee of \$1,200. Registration for VC 668 involves weekly half-hour lessons and a fee of \$600. May be repeated for credit.

VC 690 Independent Research and Study 1-3 Credits

Students may pursue a special topic for which they have prepared through prior course work. Only one project may be scheduled in a semester. The project may involve 1-3 credit hours. Approval of the faculty sponsor, department chair, and dean required prior to the first day of the semester in which the project is to be completed. Minimum cumulative GPA of 3.0 required.

Prerequisite(s): graduate standing.

VC 705 Grad Voice Rep:Italian/French 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 706 Grad Voice Rep:German/English 1 Credits

This class is a performance seminar focusing on the synthesis of musical line and linguistic inflection. Elements of tonal color, frequency, vowel purity and rhythm will be practiced in each class session as individual students perform selections from the literature. Repeatable for credit only if space is available AND by permission of the Chair.

VC 722 Literature for Teaching 3 Credits

A survey of graduated teaching literature for beginning, intermediate and advanced voice students. Literature will be explored that is particularly well-suited to specific vocal issues (e.g. legato, coloratura, staccato, etc.)
Prerequisite(s): VC 723, VC 724.

VC 723 Voice Ped I: Voice Science 3 Credits

Study of voice anatomy and physiology with concentration on respiration, phonation, articulation, hearing and vocal health. Through hands-on experience in the Westminster Voice Laboratory, students explore the physics of sound, the fundamentals of musical acoustics, and acoustical elements that are unique to the human voice. Priority registration is given to M.V.P. majors and M.M. students majoring in Voice Performance and Pedagogy. Other students may enroll on a space-available basis.

VC 724 Voice Pedagogy II: Methods 3 Credits

A comparative study of various pedagogical methods and ideals. A wide range of important historical and contemporary pedagogy treatises is reviewed. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student.

VC 725 Voice Ped III: Tchng Practicum 3 Credits

Communication skills are explored and students develop a systematic approach to studio voice instruction. Each student is assigned at least two voice students (one adult and one teenager) to be taught both inside and outside of class. Emphasis is placed on becoming familiar with all voice classifications and basic vocal literature.

Prerequisite(s): VC 723.

VC 726 Voice Research 3 Credits

Peer reviewed research in voice is evaluated and research methodologies are explored. Class projects include research in historical, qualitative, quantitative, and mixed methods approaches.

VC 730 The Singing Actor: Opera 3 Credits

This course entails coaching of selected songs, arias or repertoire from music theater, and techniques for performance preparation through intensive research. A final written project involves a musical and dramatic analysis of all chosen repertoire.

VC 731 Opera Auditions: Prep & Tech 2 Credits

This class will explore the many facets of preparing an audition for an opera role, apprentice program, or competition. At least three to four arias in contrasting styles and languages should be prepared for work in class. Areas to be addressed include vocal and dramatic presentation, networking, resume building, make-up, and photo advice. In coordination with the Office of Career Services, panel discussions with invited guests that will explore specific career-related topics will be scheduled.

Prerequisite(s): permission of the applied instructor.

VC 740 Seminar in Music Theater Pedagogy 3 Credits

Comprehensive study of various pedagogical approaches to teaching Music Theater singing techniques. Students explore exercises and vocalises for general voice development as well as techniques to address and correct specific vocal problems. Role-playing exercises are used to develop appropriate listening and teaching skills. Class participants begin supervised instruction of a volunteer singing student. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments, and other written assignments.

VC 741 Music Theater Literature I 3 Credits

Survey and analysis of Music Theater literature from its roots in Tin Pan Alley through Kander and Ebb. Students will explore the synergistic relationships among text, music, and style and discuss the influence of society and politics on the genre. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments and other written assignments.

VC 742 Music Theater Literature II 3 Credits

Survey and analysis of Music Theater Literature from Sondheim to the present. Students will explore the synergistic relationships among text, music, and style and discuss the influence of society and politics on the genre. The class will also discuss the integration of pop/rock and other contemporary substyles within the genre. The course is offered entirely online and will consist of recorded lectures, reading assignments, group discussions via discussion boards, listening assignments and other written assignments.

VC 753 Spec Topics in Voice Perf Prac 3 Credits

Intensive performance coaching and lectures in the form of master classes where performance practice in selected topics will be taught by current faculty or distinguished alumni and specialists in their fields.

Prerequisite(s): permission of the applied instructor.

VC 791 Teaching Internship 2 Credits

Teaching internship with a master teacher(s). The student will teach under faculty observation and supervision, including follow-up private discussion with the observer. In addition, students themselves observe group and private lessons and are given readings, written assignments, and/or projects associated with their own teaching. May be offered on an intensive basis in conjunction with Westminster Summer Session events, such as The High School Solo Vocal Artist and/or Vocal Institute.

Introduction

All information given here applies to all undergraduate and graduate students of Rider University.

Significance of Accepting Admission to Rider University

By the act of accepting admission to Rider University, students acknowledge and agree to the following:

1. that they will be bound by and comply with all University standards and policies, including but not limited to those standards and policies set forth in this catalog. **Primary and ultimate responsibility for knowing and conforming to these standards and policies and degree requirements resides with the individual student;**

2. that the ultimate authority to regulate and maintain order on the University campuses resides with the President and the Board of Trustees; and,
3. that the University retains ownership and the exclusive right to use any and all promotional, publicity, and entertainment products (including those produced as course requirement), creations, and activities engaged in by the student while at the University, including but not limited to photographs, television, audio and video recordings, motion pictures, artistic performances and presentations, Internet/web-based productions and sales, and athletic events and all proceeds therefrom. He/she has no right to any payment for participation therein.

Students further agree to execute any documents required to confirm or convey to the University all rights outlined in subpart (3) above.

Rider University's Right to Change Catalog Contents

This Academic Catalog is not a contract nor is it an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this catalog, it must be understood that all policies and procedures (as well as courses, course descriptions, curricular and degree requirements and other academic information) described in this catalog are subject to change or elimination at any time without prior notice.

Primary and ultimate responsibility for knowing and conforming to the standards, policies and degree requirements outlined in the Academic Catalog resides with the individual student. While every effort will be made to inform students of any changes as soon as is practical, students should consult the appropriate academic or administrative department, school, college, or other service provider for currently accurate information on any matters described in this catalog. Changes affecting degree requirements will take into account the applicability of the change to currently matriculated students.

Rider University also reserves the right to vary the policies and procedures in the Academic Catalog on a case-by-case basis, as fair and reasonable treatment of interested parties requires in the University's best judgment.

Academic Rights and Freedoms

It is the responsibility of Rider University to protect the academic freedoms of the students in accordance with the Joint Statement on Rights and Freedoms of Students. Of critical importance is section two, which deals with the relationship between the professor and the student. "The professor in the classroom and in conference should encourage free discussion, inquiry and expression. Student performance should be evaluated solely on an academic basis, not on opinions or conduct in matters unrelated to academic standards."

Protection of Freedom of Expression

Students should be free to take reasoned exception to the data or views offered in any course of study and to reserve judgment about matters of opinion, but they are responsible for learning the content of any course of study for which they are enrolled.

Protection Against Improper Academic Evaluation

Students should have protection through orderly procedure against prejudiced or capricious academic evaluation. At the same time, they are responsible for maintaining standards of academic performance established for each course in which they are enrolled.

Protection Against Improper Disclosure

Information about student views, beliefs and political associations which professors acquire in the course of their work as instructors, advisors and counselors should be considered confidential. Protection against improper disclosure is a serious professional obligation. Judgments of ability and character may be provided under appropriate circumstances, normally with the knowledge or consent of the student.

When students feel that their academic rights and freedoms have been violated, they must have a defined avenue of appeal that is consistent with the principles outlined in the Joint Statement on Rights and Freedoms of Students, the AAUP 1940 Statement on Academic Freedom, and the AAUP 1956 Statement on Professional Ethics.

Code of Academic Integrity**Preamble**

Academic honesty constitutes the cornerstone of the academic community. Learning, teaching and scholarship cannot be conducted in an atmosphere of dishonesty. Therefore, Rider University insists on strict adherence to the concept of academic honesty as indispensable to the continued existence and future development of the campus community. Every student has a direct personal interest in maintaining academic honesty since each evaluation of academic progress involves a judgment by the faculty member concerning each individual's intellectual performance. The evaluation process is predicated on the assumption that an individual's achievement reflects his/her own ability, effort and perceptions.

Academic dishonesty includes any unauthorized collaboration, misrepresentation or fabrication in the submission of academic work. In all written work, whether in class or out of class, the student's name on the work is considered to be a statement that the work is his or hers alone, except as otherwise indicated. Students are expected to provide proper citations for the statements and ideas of others whether submitted word for word or paraphrased. Failure to provide proper citations will be considered plagiarism and offenders will be subject to the charge of plagiarism specified in the statement of regulations.

Similarly, students are expected to adhere to all regulations pertaining to examination conduct including placement tests. These regulations are designed to insure that the work submitted by the student on examinations is an honest representation of that student's effort and that it does not involve unauthorized collaboration, unauthorized use of notes during the exam, or unauthorized access to prior information about the examination.

In oral or written submissions presented as scientific or non-fiction, fabrication or alteration of facts, data, images, or audio or video recordings, or misrepresentation of procedures or of participation in an academic activity, for the purpose of misleading, also constitutes academic dishonesty.

Jurisdiction of the Code of Academic Integrity

Each student is responsible for his or her academic conduct from the time of acceptance for admission through the actual awarding of a degree.

Statement of Regulations**Section 1. Out-of-Class Assignments.**

Students are expected to provide proper citations for the ideas and statements of others. When the ideas are paraphrased, the sources of

those ideas need only to be properly cited. When the ideas are quoted (copied word for word), the copied words must be set in quotation marks and cited. When students collaborate on papers or out-of-class examinations, the names of all collaborators must be acknowledged on all papers submitted. It is expected that research and writing assigned to an individual student will be done by that student.

1.1 Ghostwriting. Written work submitted by an individual student (or group of students working together as approved in advance by the instructor) is expected to be the work of that student (or approved group). A false claim of authorship is an act of academic dishonesty.

1.2 Word for Word Plagiarism. Copying, word for word, from any source (book, magazine, newspaper, Internet source, unpublished paper or thesis) without proper acknowledgment by quotation and citation within the text of the paper, or the submission of any part of another's work, word for word, without proper quotation and citation is an act of academic dishonesty.

1.3 Patchwork Plagiarism. The submission of work which has been constructed by piecing together phrases and/or sentences quoted verbatim (word for word) or paraphrased from a variety of unacknowledged sources is an act of academic dishonesty.

1.4 Unacknowledged Paraphrases. Submission of another author's facts or ideas in one's own words without acknowledgment by proper citation is an act of academic dishonesty. (If the ideas or information are neither originally the student's nor cannot be found in a variety of sources, the source must be acknowledged by footnotes or by proper citation within the text of the paper. Failure to acknowledge this indebtedness is referred to as "unacknowledged paraphrase.")

Section 2. Examination Conduct

Students are expected to adhere to the following regulations pertaining to their personal and academic conduct before, during, and after examinations. These regulations are designed to insure that the work submitted by a student on examinations is an honest representation of that student's effort and that it does not involve unauthorized collaboration, unauthorized use of notes during an examination, or unauthorized access to prior information about the examination.

2.1 Prior Access to Examinations. No student may have direct or indirect access to an examination or an examination question without the express approval of the faculty member who has prepared the examination. Unauthorized entry into offices, duplicating centers, computers, voice mail, fax, other electronic media, or personal possessions of faculty is prohibited. Prior access to examination information, attempts to gain access to examination material, unauthorized possession of examination material, and the derivation of benefit from or aiding access to examination materials are all acts of academic dishonesty.

2.2 Unauthorized Assistance During Examinations. The receiving or giving of any written, oral or visible help on an examination is an act of academic dishonesty.

2.3 Proxy Representation. Students are expected to sit for examinations required for the courses in which they are enrolled. Proxies/ghosts are strictly prohibited. Serving as a proxy, or being served by proxy, during

an examination is an act of academic dishonesty. (Students must carry ID cards at all times, including the times they present themselves for examinations. Students must present their ID cards during an examination if requested to do so by the proctor or instructor.)

2.4 Unauthorized Use of Written or Electronic Material During Examinations.

No student may use any book, notebook or other written or electronic materials during an examination unless such examination has been designated as an "open book" type, in which case the examining faculty member must have so informed the class prior to the examination. Materials which are not permitted to be used on the examination, if brought to the examination room, must be deposited at a location specified by the faculty member. Unauthorized possession of any written materials during an examination is an act of academic dishonesty.

Section 3. Fabrication

Students are expected to accurately report facts and data obtained in their research activities; present documentary photographs and audio and video recordings honestly; and, report on their attendance at events and engagement in activities honestly and accurately. Fabrication includes the making up or falsification of facts, data, sources or procedures; misleading doctoring or manipulation of photographs or video; or falsely claiming to have attended an event or visited a site, or engaged in an activity, or misrepresenting the time devoted to such attendance, visitation, or engagement, for the purpose of misleading.

3.1 Fictional devices in nonfiction material. Names, dates, places and other verifiable facts should not be altered in any paper or story that purports to be factual and non-fiction. Facts that must be disguised or withheld to protect the privacy or safety of a source should be acknowledged with an appropriate explanation to the reader/viewer. Composites, which present the characteristics or experiences of more than one person or event blended into one, should not be used without a clear explanation to the reader/viewer.

3.2 Documentary photos and audio or video recordings. While manipulating images and recordings for purposes of satiric or similar effect is permissible for artistic purposes, such manipulations should not be presented in a way that can be confused with reality. It is not permissible to doctor or manipulate photographs or recordings if the result is counterfactual. Cropping and enhancement of clarity are permissible, provided it does not distort reality so as to deceive the audience.

3.3 Scientific misconduct. Fabrication, manipulation, or "fudging" of the processes or results of experiments or observations, and similar practices which seriously deviate from those commonly accepted by the scientific community, as represented by your faculty, for proposing, conducting or reporting research, are also violations of this policy. Honest errors and honest differences of opinion in interpretations and judgments of data are not included in this definition.

3.4 Procedural dishonesty. This category includes falsely claiming to have attended an event or to have remained at the event longer than one did; claiming to have visited a site; or to have engaged in an activity, whether for purposes of extra-credit in a course, or for inclusion in a graded assignment.

Procedures to be Followed in Cases of Academic Dishonesty

Step One

When a faculty member has reason to believe that an act of academic dishonesty has been committed by a student enrolled either in a current course or in one completed within the previous four months, the faculty

member shall notify the student in writing of the alleged violation and require that the student meet with the faculty member at a mutually satisfactory time within five (5) working days after the faculty member's notification. The faculty member shall have the authority to extend the time within which the meeting takes place to ten (10) working days at his or her discretion. If the meeting does not occur within this time, the faculty member may proceed with the imposition of any of the sanctions described below.

At this meeting with the student, the faculty member and the student shall discuss the alleged act of dishonesty. The faculty member and the student shall seek to resolve the matter during this meeting. If the faculty member concludes that an act of academic dishonesty has not occurred, no further action shall be taken and the student shall be permitted to complete the course, if it is still in session, as if the faculty member's allegation had not been made.

If, as a result of information obtained in this meeting and/or shortly thereafter, the faculty member concludes that an act of academic dishonesty has occurred, he/she must notify the student of this determination in writing within seven (7) working days of the meeting and must indicate which one of the following sanctions will be invoked. The existence of a prior finding of academic dishonesty may impact the choice of sanction. The options are listed below in ascending order of seriousness. The faculty member may:

1. Direct the student to resubmit any work necessary to complete the course requirements;
2. Direct the Registrar to change the grade given to the student to the notation "Incomplete" and direct the student to resubmit any work necessary to complete the course requirements;
3. Lower the grade appropriately on the assignment in which the academic dishonesty took place in light of the gravity and implications of the act of dishonesty, recalculate the final course grade, and direct the registrar to change the final course grade accordingly;
4. Direct the Registrar to enter the grade of "F" for the course on the student's permanent academic record (this "F" supersedes all other grades, including the "W" notation);
5. Initiate charges against the student with the Academic Integrity Committee for the purpose of causing the student to be suspended or dismissed from the University

The sanction will be effective immediately upon notification, except for sanction #5.

When the faculty member invokes sanction #5, he/she must submit a letter detailing the act of alleged academic dishonesty to the Academic Integrity Committee and, simultaneously, to the student involved, to the faculty member's department chairperson, to the student's academic dean and, in the case of an undergraduate student, to the Dean of Students.

When the faculty member invokes any of the sanctions #1 through #4 and the student does not challenge the decision within seven (7) working days of receiving notice from the faculty member, the faculty member shall place copies of the decision in the student's academic file in the student's academic dean's office. If the student challenges the sanction (#1-#4) recommended by the faculty member (based solely on disputing the charge of academic dishonesty), he/she shall have the right to pursue a written appeal beyond the faculty member, first to the chairperson of the department where the faculty member (or if an adjunct based solely in a program, where his/her program director) is based and then, if

necessary, to the appropriate academic dean. If the faculty member of the course is the department chairperson, the appeal shall go directly to the appropriate academic dean.

Step Two

The written appeal to the department chairperson or academic dean must be made within seven (7) working days of the receipt of the faculty member's decision, with a copy of the appeal to the faculty member. The department chairperson or academic dean will have seven (7) working days to reach his/her decision. The department chairperson or academic dean shall send the decision to the student by registered mail or hand delivery, with a copy to the faculty member. If the department chairperson upholds the faculty member's decision regarding academic dishonesty and the student does not appeal this decision in writing to the appropriate academic dean within seven (7) working days from the receipt of the decision, the department chairperson shall place copies of the decision in the student's academic file in the student's academic dean's office.

Step Three

If either the student or faculty member is dissatisfied with the chairperson's or dean's decision, the student or faculty member will have seven (7) working days from receipt of that decision to submit a written appeal to the dean of the college in which the course is taught, with copies to the faculty member, student, and department chairperson. (If the dean has already ruled on the case, he/she shall appoint another department chair, or an associate or assistant dean to handle this appeal.) The appropriate dean shall schedule a meeting with the student and faculty member to hear the appeal as soon as it can reasonably be set, and, following his/her assessment of the situation, will have seven (7) working days to render a decision. The dean shall convey his/her decision in writing by registered mail or hand delivery to the student, with a copy to the faculty member and the department chairperson. If the dean upholds the faculty member's decision regarding academic dishonesty and the student does not appeal this decision to the Academic Integrity Committee within seven (7) working days from receipt of the decision, the dean shall place copies of the decision in the student's academic file in the student's academic dean's office. If after appealing to the dean, the student or faculty member is still dissatisfied, a final appeal may be made in writing to the Academic Integrity Committee within seven (7) working days of receipt of the dean's decision.

Step Four

The Academic Integrity Committee shall consist of six (6) members:

Three (3) faculty members appointed by the bargaining unit members of the University Academic Policy Committee; two (2) administrators with faculty rank appointed by the Provost and Vice President for Academic Affairs; and one (1) full-time undergraduate student selected by the Student Government Association who, at the time of his/her service, must be a senior with a grade point average no lower than 3.25.

The bargaining unit members of the University Academic Policy Committee, the Provost and Vice President for Academic Affairs, and the Student Government Association shall each designate one alternate who shall serve in the event an applicable appointee is unable to serve. The bargaining unit faculty members and the administrators shall serve two-year terms, beginning with the date of appointment, and may be reappointed. The student member shall serve a one-year term.

The committee shall select from among its members with faculty rank a chairperson and a vice chairperson, and immediately notify the President, the Provost and Vice President for Academic Affairs and the chairperson of the University Academic Policy Committee, the president of the

Student Government Association, and the Dean of Students of the names of the designees. The chairperson or vice-chairperson shall serve as the hearing coordinator. Any three (3) members of the committee with faculty rank (including the hearing coordinator) shall constitute a quorum.

The failure or inability of any appointing body to fulfill its responsibility to appoint any member(s) to the Academic Integrity Committee shall not prevent the committee from organizing and exercising its prescribed duties. Whenever there is no chairperson or vice-chairperson of the committee, the Provost and Vice President for Academic Affairs shall appoint a convener. Ordinarily, the chairperson (or vice-chairperson, in his/her absence) shall preside over the meetings of the committee.

The hearing coordinator shall have the following duties and responsibilities:

1. To assure that all procedures have been followed;
2. To inform the members of the committee that a charge of alleged academic misconduct against a student has been brought by a faculty member or that a student or faculty member has appealed a decision;
3. To see that all members of the committee receive the appropriate materials necessary for the hearing of the charge and appeal;
4. To keep a permanent record of the committee's proceedings; and
5. To see that all decisions made by the committee are prepared and distributed to the relevant parties.

Within ten (10) working days after receipt of a charge brought by a faculty member, or an appeal brought by either party, a date for a hearing shall be set and the faculty member and the student shall be notified of that date. If the hearing has not occurred within those ten (10) days, it shall be scheduled to take place as soon as possible thereafter. The committee chairperson shall have authority to extend any deadlines when it is evident that both parties have made good faith, though unsuccessful, efforts to meet the stated deadlines. Parties at the hearing shall be limited to members of the Rider University community with information pertinent to the given case. The student may choose to have a University advisor present with him/her. This advisor may be a university administrator, faculty member, or current student.

If the requested sanction is dismissal from the University, the student shall have the right to be accompanied by an attorney. If the committee indicates in advance that dismissal will not be considered by the committee no attorney shall attend. In cases where dismissal will be considered, if the student wishes to be accompanied by an attorney, the hearing coordinator must be so notified at least seven (7) days before the scheduled hearing so that the University may also have counsel present.

The committee shall establish the operating procedures by which it reviews cases. Standard operating steps include:

1. An uninterrupted presentation of his/her position by whichever person brought the matter to the committee (faculty member or student);
2. An uninterrupted presentation of his/her position by the other party (faculty member or student);
3. Committee questioning of either and/or both parties;
4. Committee review of any documents or affidavits proffered by the parties;
5. Committee deliberations in executive session.

The role of any University advisor or attorney present shall be that of observer of the proceedings and advisor to his/her client and shall not include the right to question either party for the record. An audio recording shall be made of all proceedings conducted by the Academic Integrity Committee.

After both the faculty member's and the student's assertions and responses have been heard (including questioning of either party by the committee), the committee will decide whether the faculty member's charge and sanction shall be upheld.

If the faculty member's charge is upheld, the committee will normally uphold the sanction originally imposed, if it is consistent with the faculty member's pre-stated written guidelines (if any) given to the student at the outset of the course about the consequences of an act of academic dishonesty. However, the committee will have recourse to any one of the four (4) other sanctions which the faculty member could have chosen, or may decide to suspend or dismiss the student, depending upon the specific circumstances connected with each case.

When a student's graduation is affected by the outcome of an academic conduct case in a semester, term or session immediately before such graduation, all parties in the case shall make reasonable efforts to expedite the entire process.

As a result of its deliberation, the committee may find the student innocent of academic dishonesty, thereby levying no sanctions against the student. Under this condition, no punitive action shall be taken against the student, either by the committee or by the faculty member.

If the committee finds the student guilty of academic dishonesty, it may direct that one of the following sanctions be taken against the student in ascending order of seriousness:

1. That the student resubmit any work necessary to complete the course requirements;
2. That the registrar change the grade given to the student to the notation "Incomplete" and direct the student to resubmit any work necessary to complete the course requirements;
3. That the grade be lowered appropriately on the assignment in which the academic dishonesty took place in light of the gravity and implications of the act of dishonesty, and recalculate the final course grade and direct the registrar to change the final course grade accordingly;
4. That the registrar enter the grade of "F" for the course on the student's permanent academic record (this "F" supersedes all other grades, including the "W" notation);
5. That in addition to, or in place of, any of the sanctions imposed above, the student be suspended for a definite period of time or be dismissed from the University, whenever the committee deems it in the best interests of the University to do so, with the notation, "Dismissed for Academic Dishonesty" entered on the student's permanent academic record.

The sanction invoked will become effective immediately upon notification.

The committee shall notify, by registered mail or hand delivery, the faculty member and the student of its decision within five (5) working days after the hearing, and copies of the decision shall be forwarded to the student's chairperson and dean for inclusion in the student's academic file. The committee's decision shall be final, with no other right of appeal.

Any letters placed in a student's academic file according to any of the provisions in this policy will be available to individual members of the faculty and the committee when determining sanctions in subsequent incidents of academic dishonesty for that student. These letters will also be made available to the members of Academic Standing Committees for making subsequent decisions regarding conditional academic standing and academic dismissal for that student.

Veterans and Military Service Information

Rider's degree programs are approved under the Veterans Readjustment Benefits Act of 1966, as amended. An application for VA Education and Training benefits is available online at www.vets.gov (<https://www.vets.gov/>) or www.benefits.va.gov/gibill/ (<https://www.benefits.va.gov/gibill/>).

® 1

Veterans who receive Chapter 33 Post 9/11 G.I. Bill benefits may be eligible for Rider's Yellow Ribbon program.

Students filing for benefits at Rider will be responsible for filing a copy of their separation papers (DD214) and/or their Certificate of Eligibility (COE) with the appropriate school certifying official. Contact the Registrar's Office certifying official at 609-896-5066 or the Veterans and Military Affairs Office at 609-896-5000 ext. 7382 if you have any questions.

Rider University strives to settle all grievances internally in order for the issue to be resolved as quickly as possible but any student who submits a complaint to the DoD and/or VA concerning any type of Federal or veteran educational benefit must also inform Rider University in writing within 7 (seven) days of when the complaint is made.

Enrolled students may contact the Veterans and Military Affairs Office at 609-896-5000 ext.7382 with any questions or concerns.

Reserve Officer's Training Corps (ROTC)

Army Reserve Officer's Training Corps (ROTC)

Mission

Rider University students are eligible to participate in the Princeton Army ROTC program through a formal cross-town enrollment agreement with the U.S. Army Cadet Command. Princeton Army ROTC will recruit, educate, develop, and inspire ROTC Cadets at off-campus locations in order to commission officers of character for the Total Army; and develop citizens of character for a lifetime of commitment and service to the nation.

The Army ROTC course is designed as a four-year leadership program divided into two phases: the basic course and the advanced course. The basic course is open to all students (100 series only. 200 series and above upon approval by the Princeton Army ROTC Professor of Military Science). The advanced course is available to cadets who complete the basic course and wish to be commissioned as either active or reserve component officers.

The Basic Course

This course is primarily designed for full-time freshmen and sophomores who desire to pursue a commission in the United States Army. However, students in good academic standing are encouraged to take MSCI 100-series and 200-series courses to broaden their knowledge and develop leadership skills. Students enrolled in the Basic Course attend a weekly classroom session, as well as three morning sessions of physical training and a Leadership Lab. The Basic Course curriculum consists of introductory lessons in beginning soldier and leadership skills such as

¹ GI Bill is a registered trademark of the U.S. Department of Veteran Affairs (VA). More information about education benefits offered by the VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill>.

Army customs and courtesies, Army values, time management, effective communications, decision making, and physical fitness.

There is no military obligation associated with enrollment in the Basic Course. Students are free to withdraw from the program as they would from any other academic course. Students who desire to earn possible elective credit on their Rider transcript, upon successful completion of the course(s), should request a letter from the Director, Army Officer Education Program Princeton, to their college Deans Office, declaring the student (full-time) has satisfactorily completed the listed course(s) with nomenclature, grade(s), grade point(s) and credit hours for evaluation by the Dean.

Completion of the Basic Course is a prerequisite for enrollment in any of the advanced course classes; however, interested students with prior military service are encouraged to speak with a member of the ROTC cadre to discuss additional options that may be available.

The Advanced Course

This Course provides full-time juniors and seniors (and select graduate students) the opportunity to complete their professional development in preparation for commissioning into the United States Army upon graduation. Approval by the Princeton Army ROTC Professor of Military Science is required for any student to enroll in the Advanced Course.

Once enrolled in the Advanced Course, students are obligated to complete the program and accept a commission, if offered, as a Second Lieutenant in the United States Army.

Students enrolled in the Advanced Course attend a weekly three-hour classroom session, in addition to three morning sessions of physical training and a Leadership Lab. Advanced Course cadets will lead the morning physical training sessions. The Advanced Course curriculum focuses on organizational leadership, small-unit tactics, military history, war and morality, the profession of arms, and continuing self-development. Advanced Course students plan, coordinate, and supervise the execution of ROTC activities outside the military science academic curriculum.

Cadets who desire possible elective credit on their Rider transcript must request a letter from the Director, Army Officer Education Program Princeton, to their college Deans Office, declaring the student (full-time) has satisfactorily completed the listed course(s) with nomenclature, grade(s), grade point(s) and credit hours for evaluation by the Dean.

Advanced Placement

Sophomores have opportunities to enter the ROTC program at the beginning and end of the academic year. Advanced placement does not result in the award of academic credits.

1. Through the first semester ROTC Add/Drop deadline, sophomores who have not previously enrolled in ROTC may enroll in MSCI 201. A student who successfully completes MSCI 201 and MSCI 202, as well as additional requirements assigned by the instructor, will meet the basic course prerequisites for entry into the advanced course.

2. Sophomores who missed attending ROTC courses during their first three semesters at Rider may have the option to attend the Army ROTC Cadet Basic Camp, a summer training opportunity at Fort Knox, KY, conducted during the summer before junior year. This opportunity is subject to available slating. This camp provides compressed instruction for all MSCI 100- and 200-series academic year courses. Student expenses are paid for by the Army and students are also paid a nominal

salary for their attendance. Students must indicate an interest to attend Basic Camp no later than February 15th of their sophomore year.

3. Students with prior military service may receive ROTC placement credit for the basic course upon approval by the Princeton Army ROTC Professor of Military Science. This credit is given on a case-by-case basis, taking into account the branch of service, length of service, type of discharge, and rank attained.

For further details on any of these programs, call the Army ROTC office at (609) 258-4225 or email to armyrotc@princeton.edu.

Activities

Army ROTC students participate in extracurricular activities as a student organization sponsored by the Princeton Army ROTC Department of Military Science. These activities are designed to build camaraderie, develop leadership skills, and produce competent military leaders.

Activities include a weekly four-hour Leadership Lab where Cadets in all Military Science Courses perform practical exercises on subjects learned in class. Once per semester, ROTC cadets attend a field-training exercise at Fort Dix in order to practice Soldier skills in a military field environment.

Other activities include color guard ceremonies, the Ranger Challenge military skills competition, tours of local battlefields (such as Princeton, Monmouth, or Gettysburg), trips to military conferences, annual holiday ball and awards ceremonies, and leadership seminars. Each spring, cadets compete for the opportunity to attend military schools, such as Airborne (military parachutist) and Air Assault during the summer (slots for these schools are very limited and highly competitive).

Military Science Course Description

MSCI 100-series courses are open to all students. For all other courses, enrollment requires the approval of the Princeton Army ROTC Professor of Military Science. Students complete courses as an extracurricular activity through the Princeton Army ROTC Department of Military Science. All grades are counted in the student's ROTC cumulative grade point average. Advanced placement does not result in the award of academic credits. These courses and activities take place at off-campus locations such as Princeton University, The College of New Jersey, and Rowan University.

MSCI 101/Introduction to Military Leadership I (3 course unit)

(annually—fall)

Prerequisite: Freshman standing or permission of instructor

An introduction to the ROTC program and the Army. Classes focus on Army leadership and management principles as well as basic soldier skills such as first aid and map reading, and familiarization with the U.S. Army's customs, courtesies, standards, and rank structure. Students also receive an introduction to basic leadership principles expected of military officers.

MSCI 102/Introduction to Military Leadership II (3 course unit)

(annually—spring)

Prerequisites: Freshman standing and completion of MSCI 101 or permission of the instructor

This course builds on the lessons learned in MSCI 101 in basic soldier skills and leadership. Students learn how to use basic leadership and management techniques, improve their competence in basic soldier skills and tactics, and receive further professional development in leadership

skills. Students are introduced to the career field opportunities available to Army officers.

MSCI 201/Small-Unit Leadership I (3 course unit)

(annually—fall)

Prerequisites: Sophomore standing and completion of MSCI 100-series courses, or permission of the Professor of Military Science

This course provides students with the opportunity to attain the next level of proficiency in physical fitness, basic soldier skills, problem solving, and leadership. This course introduces the operations order, a format for developing and communicating military operations, as well as further leadership development in effective communications, performance assessment, and counseling. Officer career field opportunities and responsibilities are also addressed in the course.

MSCI 202/Small-Unit Leadership II (3 course unit)

(annually—spring)

Prerequisites: Sophomore standing and completion of MSCI 201 or permission of the Professor of Military Science

Students participate in learning activities designed to provide practical experience in the use of the military decision-making processes. Oral presentation techniques and historical analysis of military decision making are also critical components of the course. Students prepare to assume cadet, non-commissioned officer leadership roles within the cadet command structure.

MSCI 301/Applied Military Leadership I (0 course unit)

(annually—fall)

Prerequisites: Junior standing and completion of the basic course (MSCI 100 and 200 series, or advanced placement)

Enrollment in this course marks a commitment to completing the ROTC program and receiving a commission as a second lieutenant in the United States Army. To this end, cadets study and practice the leadership aspects of planning and executing small-unit tactical operations. Further emphasis is given to development of leadership skills as measured by the Cadet Leadership Development Program, an evaluation system designed to improve an individual's competence as a military leader. Cadets get hands-on practice on these skills through assigned leadership positions within the cadet command structure. Cadets continue to refine their individual physical fitness and assist seniors in leading unit fitness sessions.

MSCI 302/Applied Military Leadership II (0 course unit)

(annually—spring)

Prerequisites: Junior standing and completion of MSCI 301

This course provides the cadets their final preparation for the Cadet Leadership Course (CLC) normally attended in the summer between junior and senior years. Cadets refine their individual and military leadership, with practical exercise opportunities and feedback from senior cadets and instructors. The course emphasizes leadership in small units, use of the military operations order, land navigation, and physical fitness.

MSCI 401/Leadership Development and the Profession of Arms (0 course unit)

(annually—fall)

Prerequisites: Senior standing and completion of MSCI 300-series courses

Cadets assume leadership roles within the cadet command structure. Cadets study the nature of military professionalism with respect to their future duties as officers. Students learn how to assess performance and to plan and supervise training using the Army's training management system. The course strives to develop habits of independent study with historical readings and oral presentations. Cadets gain practical leadership experience as they lead the Army ROTC program.

MSCI 402/Leadership Development and the Profession of Arms (0 course unit)

(annually—spring)

Prerequisites: Senior standing and completion of MSCI 401

This course provides the final preparation for an officer's commissioning. Learning activities include the Army Command Policy, Administrative Law, the Uniform Code of Military Justice, officer and enlisted evaluation and promotion systems, senior-subordinate relationships, performance counseling, and a tour of a historical battlefield. Cadets gain practical leadership experience as they lead the Army ROTC program.

Summer Offerings

MSCI 222/ Cadet Basic Camp (Introduction to Military Skills and Leadership) (0 course unit)

Sophomores (and select students headed to graduate school) who missed attending courses during freshman and/or sophomore year have the option to attend Army ROTC Cadet Basic Camp, a summer training opportunity at Fort Knox, KY, conducted during the summer before junior year. This camp provides compressed instruction for all MSCI 100- and 200-series academic year courses. All student expenses are paid for by the Army, plus students are paid a nominal salary of about \$800 for their attendance, meals and housing are provided at no expense. This opportunity requires the student's advanced commitment to pursue a commission as an Army officer.

MSCI 333/Cadet Advanced Camp (Advanced Military Leadership Practicum) (0 course unit)

All cadets who successfully complete their junior academic year and the MSCI 300-series courses must attend this five-week leadership development camp at Fort Knox, KY, where they are evaluated by commissioned Army officers on individual military skills and demonstrated leadership potential.

MSCI 334/Cadet Troop Leader Training (Junior Officer Leadership Internship) (0 course unit)

Cadets who successfully complete MSCI 300-series courses in their junior year and Cadet Advance Camp may request this opportunity. Cadets serve in tactical, active-duty Army units for three or four weeks, at military posts either overseas (Germany, Korea, Hawaii, or Alaska) or in any one of numerous locations throughout the continental United States. During this time, cadets get hands-on, practical experience in the platoon leader responsibilities they will assume as a second lieutenant. Cadets often use this opportunity to "try out" the branch of the Army they are most interested in pursuing during their career.

MSCI 335/Army Nurse Summer Training Program (Clinical) (0 course unit)

Nursing students who successfully complete MSCI 300-series courses in their junior year and the Cadet Leadership Course may request this opportunity to serve for three or four weeks in an Army hospital either overseas (Germany, Korea, and Hawaii) or in any one of the major military hospitals in the continental United States. Cadets get clinical experience working with

Professor, Department of Fine Arts
D.Phil. University of Oxford; B.A. Birmingham Conservatoire; LTCL Trinity College London; ABSM Birmingham Conservatoire

Meade Andrews

Priority Adjunct Associate Professor, Department of Theatre and Dance
B.A. Mary Washington College; M.A. University of Maryland; Ph.D. University of California, Santa Barbara; Graduate degree American Center for the Alexander Technique

Nadia S. Ansary

Professor, Department of Psychology
B.A. Rutgers, The State University of New Jersey; M.A. Teachers College, Columbia University; M.Phil. Teachers College, Columbia University; Ph.D. Teachers College, Columbia University

Barry D. Ashmen

Assistant Professor, Department of Marketing
B.S. Rider University; M.A. Rider University; Ed.D. Temple University

John Baer

Professor, Department of Teacher Education
B.A. Yale University; M.A. Hood College; M.S. Rutgers, The State University of New Jersey; Ph.D. Rutgers, The State University of New Jersey

Anthony Bahri

Professor, Department of Mathematics
B.Sc. The University of Sydney; M.Sc. University of Oxford; D.Phil. University of Oxford

Devon Baranek

Assistant Professor, Department of Accounting
B.S. Villanova University; MBA Baruch College; Ph.D. Baruch College

Kelly A. Bidle

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Rutgers, The State University of New Jersey; Ph.D. University of Maryland

Pauline Blaimont

Lecturer, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. California State University; M.S. University of California; Ph.D. University of California

Trent Blanton

Associate Professor, Department of Theatre and Dance
B.A. Georgia College; M.F.A. Florida Atlantic University

John J. Bochanski

Associate Professor, Department of Computer Science and Physics
B.S. Villanova University; M.S. University of Washington; Ph.D. University of Washington

Ciprian S. Borcea

Professor, Department of Mathematics
B.S. University of Bucharest, Romania; Diploma in Mathematics University of Bucharest, Romania; Ph.D. University of Bucharest, Romania

Beverly Braddock

Lecturer, Department of Marketing

Michael J. Brogan

Professor, Department of Political Science
B.A. University of Delaware; M.P.A. Rutgers, The State University of New Jersey - Camden; M.Phil. The Graduate Center, City University of New York; Ph.D. The Graduate Center, City University of New York

Gary M. Brosvic

Professor, Department of Psychology
B.S. John Carroll University; M.A. The American University; Ph.D. The American University

Kathleen M. Browne

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.A. Colgate University; M.A. Binghamton University, State University of New York; Ph.D. Rosenstiel School of Marine and Atmospheric Science, University of Miami

Robert Burger

Priority Adjunct Assistant Professor, Department of Communication and Journalism
B.F.A. Pratt Institute; M.F.A. Miami International University of Art & Design

Mark N. Burgess

Priority Adjunct Instructor, Department of Marketing
B.A. University of Pittsburgh; MBA Fairleigh Dickinson University

Justin D. Burton

Associate Professor, Department of Fine Arts
M.A. Rutgers, The State University of New Jersey; Ph.D. Rutgers, The State University of New Jersey

Diane K. Campbell

Associate Professor-Librarian, University Libraries
B.A. The University of North Carolina at Chapel Hill; M.L.I.S. Rutgers, The State University of New Jersey; MBA Rider University

Michael Carlin

Associate Professor, Department of Psychology
B.A. Wheeling Jesuit University; Ph.D. Vanderbilt University

Diane Casale-Giannola

Professor, Department of Teacher Education
B.A. University at Albany, State University of New York; M.S. University at Albany, State University of New York; Ed.D. New York University

Heather Casey

Professor, Department of Teacher Education
B.A. Rutgers, The State University of New Jersey; M.Ed. Graduate School of Education, Rutgers, The State University of New Jersey; Ph.D. Rutgers, The State University of New Jersey

Nandini Chandar

Associate Professor, Department of Accounting
B.Com. Osmania University, India; PGDM Indian Institute of Management Calcutta; Ph.D. Case Western Reserve University

Feng Chen

Associate Professor, Department of Chemistry and Biochemistry
B.S. Hunan University, P. R. China; Ph.D. Northeastern University

Chih-Chieh (Jason) Chiu

Associate Professor, Department of Finance and Economics
B.Sc. University of Witwatersrand; MBA Columbia University; Ph.D. Baruch College

Lisa Chong

Priority Adjunct Instructor, Department of English
B.S. Cairn University; M.A. Arcadia University; M.Ed. University of Pennsylvania

Daria Cohen

Professor, Department of Languages, Literatures and Cultures
B.A. Douglass College, Rutgers, The State University of New Jersey; M.A. Rutgers, The State University of New Jersey; Ph.D. Rutgers, The State University of New Jersey

Robert J. Congleton

Associate Professor-Librarian, University Libraries
B.A. Rider University; M.A. University of Connecticut; M.L.S. Rutgers, The State University of New Jersey

Ronald G. Cook

Professor, Department of Management
B.S.B.A. State University of New York at Oswego; MBA Syracuse University; Ph.D. Syracuse University

Deborah Cordonnier

Priority Adjunct Instructor, Department of English
B.S. University of Missouri; M.A. Texas A & M University; M.Div. Princeton Theological Seminary; Th.M. Princeton Theological Seminary; M.F.A. Goddard College

Mack Costello

Associate Professor, Department of Psychology
B.S. University of Florida; M.A. Western Michigan University

Quinn W. Cunningham

Associate Professor, Department of Management
B.A. Randolph-Macon College; M.S. Virginia Commonwealth University; Ph.D. Drexel University

Michele D'Angelo

Priority Adjunct Assistant Professor, Department of English
B.A. The College of New Jersey; MAT The College of New Jersey; Ed.S. Rider University

Robert D'Avanzo

Lecturer, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Syracuse University

Heather A. Dalal

Associate Professor-Librarian, University Libraries
B.A. Northwestern University; M.L.I.S. Rutgers, The State University of New Jersey; M.Ed. University of Massachusetts

Melissa M. DeWees

Priority Adjunct Assistant Professor, Department of Psychology
B.A. Towson State University; M.A. Alliant International University; Psy.D. Alliant International University

Lauren B. Delisio

Assistant Professor, Department of Teacher Education
B.A. Rider University; M.S. Pace University; Ph.D. University of Central Florida

Todd M. Dellinger

Associate Professor, Department of Fine Arts
B.A. The American University; M.A. The American University

David R. Dewberry

Professor, Department of Communication and Journalism
B.A. University of Arkansas; M.A. University of Arkansas; Ph.D. University of Denver

Cara J. DiYanni

Associate Professor, Department of Psychology
B.A. Georgetown University; M.A. Boston University; Ph.D. Boston University

Jie Joyce Ding

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Xi'an Jiaotong University, P.R. China; M.S. Xi'an Jiaotong University, P.R. China; Ph.D. The University of Texas at Austin

Chrystina A. Dolyniuk

Associate Professor, Department of Psychology
B.A. University of California, Los Angeles; M.A. California State University, Northridge; Ph.D. University of Calgary

Susan Dougherty

Associate Professor, Department of Teacher Education
B.S. The Pennsylvania State University; M.Ed. Rutgers, The State University of New Jersey; M.Ed. Boston University; Ed.D. Boston University

Julie Drawbridge

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. The University of Maine; Ph.D. The University of Texas at Austin

Daniel L. Druckenbrod

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.S. University of Notre Dame; Ph.D. University of Virginia

Kathleen Dunne

Associate Professor, Department of Accounting
B.A. University at Buffalo, The State University of New York; M.S. State University College of Buffalo; Ph.D. Temple University

Bosah L. Ebo

Professor, Department of Communication and Journalism
B.S. University of Wisconsin-Stevens Point; B.S. University of Wisconsin-Stevens Point; M.A. University of Wisconsin-Stevens Point; Ph.D. The University of Iowa

Jeff Edelstein

Priority Adjunct Instructor, Department of Communication and Journalism
B.A. Rider University

Alice Faroh

Priority Adjunct Assistant Professor, Department of Languages, Literatures and Cultures
B.A. Universidad Pedagógica Experimental de Barquisimeto; M.A. Maryville University

Joel Feldman

Associate Professor, Department of History and Philosophy
B.A. Hampshire College; Ph.D. The University of Texas at Austin

Roberta Fiske-Rusciano

Priority Adjunct Assistant Professor, Department of Political Science
B.A. Simmons College; M.A. University of Chicago; Ph.D. Rutgers, The State University of New Jersey

William F. Fobare

Priority Adjunct Assistant Professor, Department of Chemistry and Biochemistry
A.B. Hope College; Ph.D. University of South Carolina

Hernán Fontanet

Professor, Department of Languages, Literatures and Cultures
B.A. The University of Buenos Aires; A.M. Universidad Complutense de Madrid; Ph.D. Universidad Autónoma de Madrid

Jessica Franko-Oliano

Priority Adjunct Assistant Professor, Department of Communication and Journalism
B.A. Rider University; MBA Rider University

Barbara Franz

Professor, Department of Political Science
M.A. University of Vienna; M.A. Syracuse University; M.A. Syracuse University; Ph.D. Syracuse University

Lucien J. Frary

Professor, Department of History and Philosophy
B.A. University of St. Thomas; M.A. University of Minnesota, Twin Cities; Ph.D. University of Minnesota, Twin Cities

Ivan Fuller

Professor, Department of Theatre and Dance
B.A. Butler University; M.A. Bowling Green State University; Ph.D. Bowling Green State University

Zhihong Gao

Professor, Department of Marketing
B.A. Peking University; M.A. Wake Forest University; Ph.D. University of Illinois at Urbana-Champaign

Tracey Garrett

Professor, Department of Teacher Education
B.S. East Stroudsburg University; B.S. East Stroudsburg University; M.A. Kean University; Ed.D. Rutgers Graduate School of Education

Daniel C. Garro

Priority Adjunct Instructor, Department of History and Philosophy
B.A. Washington College; M.A. Texas Tech University

Herbert E. Gishlick

Professor, Department of Finance and Economics
A.B. Muhlenberg College; M.A. University of Pennsylvania; Ph.D. University of Pennsylvania

Louis F. Goldberg

Priority Adjunct Assistant Professor, Department of Theatre and Dance
B.A. Colgate University; M.M. Syracuse University; M.F.A. Syracuse University

Matthew B. Goldie

Professor, Department of English
B.A. Victoria University; M.F.A. Brooklyn College; Ph.D. The Graduate Center, City University of New York

Selma C. Goldstein

Priority Adjunct Instructor, Department of English
B.S. Cornell University; MBA Fairleigh Dickinson University

Stephanie Golski

Associate Professor, Department of Psychology
B.A. McDaniel College; Ph.D. The Johns Hopkins University

Linguo Gong

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Tsinghua University, Beijing, China; M.S. Tsinghua University, Beijing, China; Ph.D. The University of Texas at Austin

Stephen Gonzalez

Assistant Professor, Department of Fine Arts
B.A. Bloomfield College; M.F.A. New York University

Alexander Grushow

Professor, Department of Chemistry and Biochemistry
B.A. Franklin & Marshall College; Ph.D. University of Minnesota

Sophie Guderian

Lecturer, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. University of North Carolina; M.S. University of North Carolina; Ph.D. University of Delaware

John Guers

Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
M.S. East Stroudsburg University; M.S. East Stroudsburg University; Ph.D. University of Delaware

Cengiz Haksever

Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Middle East Technical University, Ankara, Turkey; M.S. Middle East Technical University, Ankara, Turkey; MBA Texas A & M University; Ph.D. The University of Texas at Austin

Jeffrey Halpern

Associate Professor, Department of Sociology and Criminology
B.A. The City College of New York; Ph.D. University of Pittsburgh

Laurel Harris

Associate Professor, Department of English
B.A. Oberlin College; M.A. University of Chicago; Ph.D. The Graduate Center, City University of New York

Catrinel Haught Tromp

Associate Professor, Department of Psychology
B.A. Queens University of Charlotte; Ph.D. Princeton University

Elizabeth Hawthorne

Online Lecturer, Department of Computer Science and Physics
B.S. Rider University; M.S. Kean University; Ph.D. Nova Southeastern University; Postdoctoral Fellowships, University of Maryland

M. Elizabeth Haywood-Sullivan

Associate Professor, Department of Accounting
B.S. The College of Charleston; M.P.A. The University of Texas at Austin; Ph.D. The University of Georgia

Wendy P. Heath

Professor, Department of Psychology
B.A. Boston University; M.S. The University of Texas at Arlington; Ph.D. The University of Texas at Arlington

Joshua Henry

Assistant Professor, University Libraries
B.M. Oklahoma City University; M.M. Oklahoma City University; M.L.I.S. University of Wisconsin-Milwaukee

Mickey Hess

Professor, Department of English
Ph.D. University of Louisville

Melissa A. Hofmann

Associate Professor-Librarian, University Libraries
B.A. The College of New Jersey; M.L.I.S. Rutgers, The State University of New Jersey; M.A. The College of New Jersey

Sheena C. Howard

Associate Professor, Department of Communication and Journalism
B.B.A. Iona College; M.A. New York Institute of Technology; Ph.D. Howard University

Meng-Chen (Melinda) Hsieh

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S.B.A. National Taiwan University; M.S. National Chengchi University; M.S. New York University Stern School of Business; Ph.D. New York University Stern School of Business

Brooke B. Hunter

Associate Professor, Department of History and Philosophy
B.A. University of California, Irvine; M.A. University of Delaware; Ph.D. University of Delaware

Nathan Hurwitz

Associate Professor, Department of Theatre and Dance
B.F.A. New York University; M.A. Northwestern University; Ph.D. University of Pittsburgh

Jacqueline Soteropoulos Incollingo

Associate Professor, Department of Communication and Journalism
B.A. Connecticut College; M.A. Philip Merrill College of Journalism, University of Maryland; Ph.D. Philip Merrill College of Journalism, University of Maryland

Robert Isenhower

Assistant Professor, Department of Psychology
B.S. Clemson University; Ph.D. University of Connecticut

Danielle L. Jacobs

Associate Professor, Department of Chemistry and Biochemistry
B.S. Haverford College; Ph.D. The University of North Carolina at Chapel Hill

Mayank Jaiswal

Assistant Professor, Department of Management
B.E. University of Delhi; M.B.A. University of Chicago; Ph.D. Georgia Institute of Technology

Barry T. Janes

Professor, Department of Film and Television
B.A. Rutgers, The State University of New Jersey; M.A. Rutgers, The State University of New Jersey; Ph.D. New York University

Paul R. Jivoff

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Hartwick College; M.S. The Ohio State University; Ph.D. University of Maryland

Howard H. Joffe

Priority Adjunct Associate Professor, Department of Communication and Journalism
B.A. Rutgers, The State University of New Jersey; J.D. Benjamin N. Cardozo School of Law, Yeshiva University

Julia Johnson Thick

Priority Adjunct Assistant Professor, Department of Theatre and Dance
B.A. Rutgers, The State University of New Jersey

Terra Walston Joseph

Associate Professor, Department of English
B.A. Indiana University; M.A. University of Illinois; Ph.D. University of Illinois

Jonathan Karp

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Colgate University; Ph.D. Vanderbilt University

Mamadou Keita

Lecturer, Department of Computer Science and Physics
B.A. Ecole Normale Supérieure Bamako; M.S. Ohio University; Ph.D. University of Miami; M.S. University of Miami

Shawn P. Kildea

Associate Professor, Department of Film and Television
B.A. Rider University; M.A. Rider University; Ph.D. Rutgers, The State University of New Jersey

Hee Young Kim

Assistant Professor, Department of Management
B.A. University of Pennsylvania; Ph.D. Stern School of Business, New York University

Jennifer King

Lecturer, Department of Psychology
B.A. The College of New Jersey; M.S. Villanova University; M.S. University of Maryland; Ph.D. University of Maryland

Joanna Kubik

Assistant Professor, Department of Sociology and Criminology
B.A. Boston University; M.A. Jagiellonian University; Ph.D. Rutgers School of Criminal Justice

Eugene J. Kutcher

Associate Professor, Department of Management
B.S. Rutgers, The State University of New Jersey; M.A. Montclair State University; Ph.D. Virginia Polytechnic Institute and State University

Robert J. Lackie

Professor-Librarian, University Libraries
B.S. The University of the State of New York; M.L.I.S. University of South Carolina; M.A. Rider University

Anne Law

Professor, Department of Psychology
B.A. University of New Hampshire; M.A. University of New Hampshire; Ph.D. University of New Hampshire

Robin W. Lewis

Associate Professor, Department of Theatre and Dance
B.S. The University of Alabama at Birmingham

Sherry Fang Li

Associate Professor, Department of Accounting
B.Ec. Tsinghua University; Ph.D. University of Massachusetts Amherst

Wil Lindsay

Associate Professor, Department of Fine Arts
B.F.A. The University of Arizona; M.F.A. Rensselaer

Charmen Loh

Associate Professor, Department of Finance and Economics
B.S.I.E. University of Arkansas; MBA University of Arkansas; Ph.D. University of Arkansas

Linda Lorence-Critelli

Assistant Professor, Department of Fine Arts
A.A. Ferrum College; B.A. Berklee College of Music

Maxim J. Losi

Priority Adjunct Assistant Professor, Department of English
A.B. Princeton University; M.A. New York University; Ph.D. New York University

Phillip L. Lowrey

Associate Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Vanderbilt University; Ph.D. Northwestern University

Duo Lu

Assistant Professor, Department of Computer Science and Physics
B.E. Shanghai Jiao Tong University; M.S. Arizona State University

Cynthia Lucia

Professor, Department of Film and Television
B.S. Indiana University of Pennsylvania; M.A. New York University; M.A. New York University; Ph.D. New York University

Zhengping Luo

Assistant Professor, Department of Computer Science and Physics

Katherine G. Magrino

Priority Adjunct Instructor, Department of Communication and Journalism
B.A. The College of New Jersey; M.A. Thomas Edison State College

Bhesh Manali

Assistant Professor, Department of Teacher Education
I.Sc. Tribhuvan University; B.Sc. Tribhuvan University; M.Sc. Tribhuvan University; M.S. University of Amsterdam; Ph.D. University of Central Florida

Cynthia Martinez

Assistant Professor, Department of Languages, Literatures and Cultures
B.A. Murray State University; M.A. University of Louisville; Ph.D. Indiana University

Morteza Mashayekhy

Assistant Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A. University of Tehran; M.B.A. Sharif University of Technology; M.M.Sc. Ryerson University; Ph.D. McMaster University

Sarah Mason

Instructor - Librarian, University Libraries

Biju Mathew

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A. Nizam College, Hyderabad, India; M.A. XLRI – Xavier School of Management, Jamshedpur, India; Ph.D. University of Pittsburgh

Kristin McCarthy

Assistant Professor, Department of Finance and Economics
B.A. Dickinson College; M.P.H. Hunter College; Dr.P.H. Columbia University

Evelyn A. McDowell

Associate Professor, Department of Accounting
B.B.A. Baldwin Wallace University; MAcc Case Western Reserve University; Ph.D. Case Western Reserve University; CPA, CGMA

Sharon McKool

Associate Professor, Department of Teacher Education
B.S.Ed. Texas State University; M.Ed. Texas State University; Ph.D. The University of Texas at Austin

Nicholas McLeod

Assistant Professor, Department of History and Philosophy
B.A. Bucknell University; M.A. University of Louisville; Ph.D. University of Louisville

Adam McMahan

Assistant Professor, Department of Political Science
B.A. Bowling Green State University; M.S. Portland State University; Ph.D. City University of New York

Susan J McManimon

Priority Adjunct Assistant Professor, Department of Communication and Journalism
B.A. Kean University; M.A. Montclair State University; Ph.D. Indiana University of Pennsylvania

Dorothy A. McMullen

Associate Professor, Department of Accounting
B.S. LaSalle University; MBA Drexel University; Ph.D. Drexel University

Jonathan Mendilow

Professor, Department of Political Science
B.A. The Hebrew University of Jerusalem; M.A. The Hebrew University of Jerusalem; Ph.D. The Hebrew University of Jerusalem

Tan Miller

Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A. Haverford College; MBA The Wharton School, University of Pennsylvania; M.A. University of Pennsylvania; Ph.D. University of Pennsylvania

Eri Millrod

Assistant Professor, Department of Theatre and Dance
A.B. Columbia University; M.A. New York University; Ph.D. Drexel University

Miriam N. Mills

Associate Professor, Department of Theatre and Dance
B.A. Rutgers, The State University of New Jersey; M.F.A. Mason Gross School of the Arts, Rutgers, The State University of New Jersey

Anubha Mishra

Associate Professor, Department of Marketing
B.Com. Symbiosis College of Arts and Commerce; MBA Pune University; Ph.D. University of Arizona

Ahmad Mojiri

Associate Professor, Department of Mathematics
B.S. Isfahan University of Technology; M.S. Isfahan University of Technology; Ph.D. University of Ottawa

Aaron J. Moore

Associate Professor, Department of Communication and Journalism
B.A. La Salle University; M.A. Temple University; Ph.D. Temple University

Mourya Reddy Narasareddygari

Assistant Professor, Department of Computer Science and Physics
B.A. Sri Krishnadevaraya University; M.S. North Dakota State University; Ph.D. North Dakota State University

Stéphane Natan

Professor, Department of Languages, Literatures and Cultures
B.A. Université Jean Moulin Lyon 3, France; M.A. Université Lumière Lyon 2, France; Ph.D. Université Jean Moulin Lyon 3, France

Vanita Neelakanta

Professor, Department of English
B.A. Jadavpur University, India; M.A. Jadavpur University, India; Ph.D. Brandeis University

Larry M. Newman

Associate Professor, Department of Marketing
B.S. The Pennsylvania State University; MBA Drexel University; Ph.D. The Pennsylvania State University

Cynthia M. Newman

Professor, Department of Marketing
B.S.B.A. Rider University; MBA Rider University; Ph.D. University of Pennsylvania

Olivia Newman

Associate Professor, Department of Political Science
B.A. The Evergreen State College; M.A. The New School; Ph.D. The New School

Carol J. Nicholson

Professor, Department of History and Philosophy
B.A. Earlham College; Ph.D. Bryn Mawr College

Lan Ma Nygren

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Jiangsu Institute of Technology; M.S. Renmin University of China; M.A. The Ohio State University; Ph.D. Stern School of Business, New York University

Thomas O'Connor

Assistant Professor, Department of Management
B.A. Seton Hall University; M.A. Seton Hall University; Ph.D. Seton Hall University

Marge O'Reilly-Allen

Associate Professor, Department of Accounting
B.S.B.A. Temple University; MBA Drexel University; Ph.D. Drexel University

Susan O'Sullivan-Gavin

Associate Professor, Department of Marketing
B.A. Seton Hall University; J.D. Seton Hall University School of Law

Seiwoong Oh

Professor, Department of English
B.A. Chung-Ang University, Seoul; M.A. West Texas A&M University; Ph.D. University of North Texas

Jessica Oliano

Lecturer, Department of Communication and Journalism
B.A. Rider University; M.B.A. Rider University

Susan Onofrio

Priority Adjunct Assistant Professor, Department of Fine Arts
B.A. Muskingum University; M.A. Marshall University

Philip Orr

Priority Adjunct Professor, Department of Fine Arts
B.M. Rider University; M.M. Rider University

Anne R. Osborne

Professor, Department of History and Philosophy
B.A. New York University; M.A. Columbia University; Ph.D. Columbia University

Mark Percy

Associate Professor, Department of Teacher Education
B.A. University of Florida; M.Ed. University of Florida; Ph.D. University of South Florida

Francis A. Perrin

Priority Adjunct Assistant Professor, Department of Psychology
B.S. Stockton University; M.S. Temple University; Ph.D. Temple University

Obeua S. Persons

Associate Professor, Department of Accounting
B.A. Chulalongkorn University, Thailand; M.P.A. The University of Texas at Austin; Ph.D. The University of Texas at Austin

Pearlie Peters

Professor, Department of English
B.S. Grambling State University; Ph.D. State University of New York at Buffalo

Mary Poteau-Tralie

Professor, Department of Languages, Literatures and Cultures
B.A. Temple University; M.A. Princeton University; Ph.D. Princeton University

Susan Power

Priority Adjunct Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. Trinity College; Ph.D. University College Dublin

Jonathan Price

Priority Adjunct Assistant Professor, Department of Fine Arts
B.M. The University of Cincinnati, College-Conservatory of Music; M.M., Professional Studies Certificate Boston Conservatory

J. Drew Procaccino

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A.B.A. Ursinus College; B.S.B.A. Rider University; MBA Rider University; Ph.D. Drexel University

Mark D. Promislo

Associate Professor, Department of Management
B.S. Tulane University; MBA Northwestern University; Ph.D. Temple University

Magnolia Pérez-Garrido

Priority Adjunct Assistant Professor, Department of Languages, Literatures and Cultures
B.A. The College of New Jersey; M.A. Villanova University

William Quirk

Priority Adjunct Instructor, Department of English
B.A. University of Colorado; M.A. University of Washington

Elizabeth Radziszewski

Assistant Professor, Department of Political Science
B.A. Rutgers, The State University of New Jersey; M.A. University of Illinois at Urbana-Champaign; Ph.D. University of Illinois at Urbana-Champaign

Mohamed Rahouti

Assistant Professor, Department of Computer Science and Physics

Mitchell Ratner

Professor, Department of Finance and Economics
A.B. Lafayette College; MBA Drexel University; Ph.D. Drexel University

Charles Ray

Lecturer, Department of Marketing
B.A. Louisiana State University; J.D. Rutgers University School of Law

T. Oliver Reid

Assistant Professor, Department of Theatre and Dance
B.M. University of North Carolina School of the Arts

Robert Reilly

Professor-Librarian, Department of English
B.A. St. Mary's Seminary and University; M.A. University of Washington; Ph.D. University of Washington

James E. Riggs

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Delaware Valley College; M.S. University of Massachusetts Amherst; Ph.D. University of Massachusetts Amherst

Jane E. Rosenbaum

Priority Adjunct Assistant Professor, Department of English
B.A. The City College of New York; M.A. University of Pittsburgh; Ph.D. University of Pittsburgh

Kelly Ross

Assistant Professor, Department of English
B.A. The College of William & Mary; M.A. The University of North Carolina at Chapel Hill; Ph.D. The University of North Carolina at Chapel Hill

Erica Rubine

Priority Adjunct Professor, Department of English
B.A. Scripps College; M.A. University of Pennsylvania; Ph.D. University of Pennsylvania

Lisa Rufer

Assistant Professor, Department of Marketing, Sport Management and Legal Studies
B.S. State University of New York College; M.B.A. SUNY; Ph.D. Virginia Commonwealth University

Frank L. Rusciano

Professor, Department of Political Science
B.A. Cornell University; M.A. University of Chicago; Ph.D. University of Chicago

Erica J. Ryan

Associate Professor, Department of History and Philosophy
B.A. Sarah Lawrence College; A.M. Brown University; Ph.D. Brown University

Maria H. Sanchez

Professor, Department of Accounting
B.S. Villanova University; MBA Drexel University; Ph.D. Drexel University

Elizabeth S. Scheiber

Professor, Department of Languages, Literatures and Cultures
B.A. Western Kentucky University; M.A. Indiana University; Ph.D. Indiana University

Joy A. Schmeer

Professor, Department of Management
B.A. Barnard College, Columbia University; MBA Baruch College; Ph.D. The City University of New York

Charles Schneider

Priority Adjunct Assistant Professor, Department of Fine Arts
B.M. Rutgers, The State University of New Jersey; M.M. The University of North Carolina-Greensboro; D.M.A. Rutgers, The State University of New Jersey

George Otto Schneller

Priority Adjunct Associate Professor, Department of Mathematics
B.S. Mount Union University; M.A. Lehigh University; Ph.D. Lehigh University

Reed A. Schwimmer

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.S. Rider University; M.A. Bryn Mawr College; Ph.D. University of Delaware

Elaine A. Scorpio

Associate Professor, Department of Psychology
B.A. Rhode Island College; M.A. Rhode Island College; Ph.D. Syracuse University

Kerrie Sendall

Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. California State University; M.S. California State University; Ph.D. University of Minnesota and Macquarie University

Raymond Setters, II

Priority Adjunct Assistant Professor, Department of English
B.A. Rider University; M.F.A. Rosemont College

Robin Shane

Assistant Professor, Department of Theatre and Dance
B.A. Wesleyan University; M.F.A. NYU, Tisch School of the Arts

Jia Shen

Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. Beijing University of Technology; M.S. New Jersey Institute of Technology; Ph.D. New Jersey Institute of Technology

Nikki Shepardson

Associate Professor, Department of History and Philosophy
B.A. University of Rochester; M.A. Rutgers, The State University of New Jersey; Ph.D. Rutgers, The State University of New Jersey

Rebecca Simon

Priority Adjunct Assistant Professor, Department of Theatre and Dance
B.A. University at Buffalo, The State University of New York; M.F.A. Florida Atlantic University

Gabriela W. Smalley

Associate Professor, Department of Geological, Environmental, and Marine Sciences
B.S. University of Maryland; Ph.D. University of Maryland

Bryan D. Spiegelberg

Associate Professor, Department of Chemistry and Biochemistry
B.S. Denison University; Ph.D. Duke University

Ira Sprotzer

Associate Professor, Department of Marketing, Sport Management and Legal Studies
B.A. Binghamton University, State University of New York; J.D. Boston College Law School; MBA Miami University

Drue Stapleton

Assistant Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
A.A. Hudson Valley Community College; B.S. State University of New York at Cortland; M.Ed. Salisbury University; Ph.D. West Virginia University

Jay Stern

Assistant Professor, Department of Film and Television
B.A. Columbia University; M.A. European Graduate School

Joshua Stratton

Assistant Professor, Department of Chemistry and Biochemistry
B.A. Wartburg College; Ph.D. Colorado State University

Susan Strom

Priority Adjunct Instructor, Department of English
B.A. University of Toronto; M.A. University of Cincinnati; M.Ed. Temple University

David Y. Suk

Associate Professor, Department of Finance and Economics
B.A. Sogang University; M.A. The Ohio State University; Ph.D. The Ohio State University

Helen T. Sullivan

Priority Adjunct Assistant Professor, Department of Psychology
B.F.A. Saint Mary's College; M.S. Saint Louis University; Ph.D. Saint Louis University

Jack Sullivan

Professor, Department of English
B.A. Furman University; M.A. Columbia University; M.Phil. Columbia University; Ph.D. Columbia University

Hongbing Sun

Professor, Department of Geological, Environmental, and Marine Sciences
B.A. Nanjing University, China; M.S. Chinese Academy of Geological Sciences, Beijing; Ph.D. Florida State University

Chirag Surti

Assistant Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.Eng. Mumbai University; M.Sc. SUNY; Ph.D. McMaster University

Stephanie Sussmeier

Assistant Professor-Librarian, University Libraries

Leonore Shever Taga

Associate Professor, Department of Finance and Economics
A.B. University of Michigan; M.A. University of California, Berkeley; Ph.D. University of California, Berkeley

Yoshi Tanokura

Assistant Professor, Department of Theatre and Dance
B.F.A. The Indiana University of Pennsylvania; M.F.A. The University of Connecticut; M.A. Central Saint Martins College of Art and Design

Arthur R. Taylor

Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.A. University of South Florida; M.S.I.S. George Mason University; Ph.D. Rutgers, The State University of New Jersey

Robert D. Terrio

Associate Professor-Librarian, University Libraries
B.M. Berklee College of Music; M.M. University of Massachusetts Amherst; M.L.I.S. Rutgers, The State University of New Jersey

Alison D. Thomas-Cottingham

Associate Professor, Department of Psychology
B.S. University of Maryland; M.A. Binghamton University, State University of New York; Ph.D. Binghamton University, State University of New York

Victor R. Thompson

Associate Professor, Department of Sociology and Criminology
B.A. University of Illinois at Urbana-Champaign; M.A. Stanford University; Ph.D. Stanford University

Megan L. Titus

Associate Professor, Department of English
B.A. Muhlenberg College; M.A. Montclair State University; Ph.D. Ohio University

Mindy Treceno

Priority Adjunct Assistant Professor, Department of Marketing, Sport Management and Legal Studies
B.A. New York University; J.D. Rutgers School of Law

Sarah Trocchio

Assistant Professor, Department of Sociology and Criminology
B.A. Clark University; M.S.W. Boston University School of Social Work; M.A. Rutgers University; Ph.D. Rutgers University of Criminal Justice

Barry E. Truchil

Associate Professor, Department of Sociology and Criminology
B.A. American University; M.A. American University; Ph.D. Binghamton University, State University of New York

Katerina Tsakiri

Associate Professor, Department of Information Systems, Analytics, and Supply Chain Management
B.S. National Technical University of Athens; M.A. University at Albany, State University of New York; Ph.D. University at Albany, State University of New York

Kim Chandler Vaccaro

Associate Professor, Department of Theatre and Dance
B.A. University of California, Santa Barbara; M.A. University of California, Los Angeles; Ed.D. Temple University

Cynthia Vieth

Lecturer, Department of Communication and Journalism
B.A. Rutgers, The State University of New Jersey; M.C.I.S. Rutgers, The State University of New Jersey; Ed.D. Rowan University

Maria F. Villalobos-Buehner

Professor, Department of Languages, Literatures and Cultures
B.A. Universidad del Valle, Cali-Colombia; M.A. University of Portsmouth, Portsmouth-England; Ph.D. Michigan State University

Katherine Vroman

Lecturer, Department of Teacher Education
B.A. Boston University; E.D. Boston University; Ph.D. Syracuse University

Shunzhu Wang

Professor, Department of Languages, Literatures and Cultures
B.A. Soochow University, Suzhou, China; M.A. Wayne State College; Ph.D. Purdue University

Nancy C. Weber

Priority Adjunct Instructor, Department of Chemistry and Biochemistry
B.S. Alderson Broaddus University; M.S. The Pennsylvania State University

E. Todd Weber

Professor, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.S. Slippery Rock University; M.S. The University of Illinois at Urbana-Champaign; Ph.D. The University of Illinois at Urbana-Champaign

Allison D. Weidhaas

Associate Professor, Department of Communication and Journalism
B.A. Rowan University; M.A. Rowan University; M.S. University of South Florida; Ph.D. University of South Florida

Sharon Whitfield

Assistant Professor-Librarian, University Libraries
B.A. University of Pittsburgh; M.L.I.S. University of Pittsburgh

Nancy A. Wiencek

Associate Professor, Department of Communication and Journalism
B.A. Douglass College, Rutgers, The State University of New Jersey; M.S. University of Louisiana at Lafayette; Ph.D. Rutgers, The State University of New Jersey

James Wojtowicz

Lecturer, Department of Sociology and Criminology
B.A. Rutgers University; M.S. Rutgers University

Yun Xia

Professor, Department of Communication and Journalism
B.A. Sichuan University, China; M.A. Sichuan University, China; Ph.D.
Southern Illinois University

Sharon Q. Yang

Professor-Librarian, University Libraries
B.A. Beijing Foreign Studies University; M.S. Columbia University; D.L.S.
Columbia University

Emre Yetgin

Assistant Professor, Department of Information Systems, Analytics, and
Supply Chain Management
B.S. Middle East Technical University; MBA Binghamton University, State
University of New York; Ph.D. University of Oklahoma

Richard A. Zdan

Lecturer, Department of Sociology and Criminology
B.Sc. Carnegie Mellon University; M.A. The University of Chicago

Cathleen Zucco-Teveloff

Priority Adjunct Lecturer, Department of Information Systems, Analytics,
and Supply Chain Management
B.A. LeMoyne College; M.S. Syracuse University

Emeriti Faculty**Mohammad Ahsanullah**

Professor Emeritus, Department of Information Systems, Analytics, and
Supply Chain Management
B.S.C. Presidency College; M.S.C. Calcutta University; Ph.D. North
Carolina State University

Ava Baron

Professor Emerita, Department of Sociology and Criminology
B.A. Brooklyn College, C.U.N.Y.; M.A. New York University; Ph.D. New York
University

Gary Barricklow

Professor Emeritus, Department of English
B.A. California State University, Sacramento; M.A. California State
University, Sacramento; Ph.D. University of New Mexico

Carol Brown

Professor Emerita, Department of Teacher Education
B.A. Muhlenberg College; M.A. University of Pennsylvania; Ph.D.
University of Pennsylvania

Pamela Brown

Professor Emerita, Department of Communication and Journalism
B.A. Rider University; M.A. The Ohio State University; Ph.D. The University
of Iowa

Richard Burgh

Professor Emeritus, Department of History and Philosophy
B.A. Rider University; M.A. University of Wisconsin; Ph.D. University of
Wisconsin

Dennis Buss

Professor Emeritus, Department of Teacher Education
A.B. University of Pennsylvania; M.A.T. Brown University; Ed.D. Rutgers
University

Richard Butsch

Professor Emeritus, Department of Sociology and Criminology
B.S. University of Cincinnati; M.S. University of Cincinnati; Ph.D. Rutgers
University

Thomas Callahan

Professor Emeritus, Department of History and Philosophy
B.A. State University of New York at Albany; M.A. University of
Connecticut; Ph.D. University of Connecticut

James Carlson

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and
Health Sciences
B.S. Fenn College; M.S. Ohio State University; Ph.D. Ohio State University

Radharao Chaganti

Professor Emerita, Department of Management
B.A. Osmania University, India; M.A. Osmania University, India; PGDM
Indian Institute of Management Calcutta; Ph.D. University at Buffalo, The
State University of New York

Patrick Chmel

Professor Emeritus, Department of Theatre and Dance
B.S. Bemidji State University; M.A. University of Missouri at Columbia;
Ph.D. University of Missouri at Columbia

Mi-Hye K. Chyun

Professor-Librarian Emerita, University Libraries
B.A. Sungkyunkwan University, Seoul, Korea; M.L.S. University of
Maryland

Lewis Coopersmith

Professor Emeritus, Department of Management
B.A. University of Pennsylvania; M.S. New York University; Ph.D. New York
University

Hope Corman

Professor Emerita, Department of Finance and Economics
B.A. University of Illinois at Urbana-Champaign; Ph.D. The City University
of New York

Jean Darian

Professor Emerita, Department of Marketing, Sport Management and
Legal Studies
B.A. University of Liverpool; M.C.D. University of Liverpool; Ph.D.
University of Pennsylvania

Marvin Darter

Professor Emeritus, Department of Information Systems, Analytics, and
Supply Chain Management
B.A. University of California at Los Angeles; M.B.A. University of Maine;
Ph.D. Georgia State University

Jesse DeEsch

Professor Emeritus, Department of Teacher Education
B.S. East Stroudsburg State College; M.A. Ohio State University; Ph.D.
Indiana State University

Susan Denbo

Professor Emerita, Department of Marketing, Sport Management and
Legal Studies
B.S. Cornell University; J.D. Villanova Law School

James M. Dickinson

Professor Emeritus, Department of Sociology and Criminology
B.A. University of Kent, Canterbury, UK; M.A. American University; Ph.D.
University of Toronto

Mervin Dissinger

Professor Emeritus, Department of Psychology
B.S. Millersville State College; M.A. Temple University; Ph.D. Temple
University

Lauren B. Eder

Professor Emerita, Department of Information Systems, Analytics, and
Supply Chain Management
B.S. Boston University; MBA Drexel University; Ph.D. Drexel University

Robert Edney

Professor Emeritus, Department of Accounting
B.S. Temple University; M.B.A. Temple University; C.P.A. University of
Pennsylvania

Benjamin Eichhorn

Professor Emeritus, Department of Psychology
B.S. Hebrew University; Ph.D. University of California at Berkeley

Walter Eliason

Professor Emeritus, Department of Teacher Education
B.A. LaSalle College; M.A. Villanova University; Ed.D. Temple University

Michael Epstein

Professor Emeritus, Department of Psychology
B.S. University of Washington; B.A. University of Washington; Ph.D.
University of Washington

Kenneth Fields

Professor Emeritus, Department of Mathematics
S.B. Massachusetts Institute of Technology; Ph.D. University of California
at Berkeley

Phyllis Frakt

Professor Emerita, Department of Political Science
B.A. Douglass College; M.A. Rutgers University; Ph.D. Rutgers University

Marguerite Frank

Professor Emerita, Department of Information Systems, Analytics, and
Supply Chain Management
B.A. University of Toronto; M.A. Radcliffe College; Ph.D. Radcliffe College

Ralph Gallay

Professor Emeritus, Department of Marketing, Sport Management and
Legal Studies
B.E. McGill University; M.B.A. New York University; M.S. New York
University; Ph.D. New York University

Walter Gebhart

Professor Emeritus, Department of Marketing, Sport Management and
Legal Studies
B.S. University of Pennsylvania; J.D. Temple University School of Law;
C.P.A. University of Pennsylvania

Suzanne Gespass

Professor Emerita, Department of Teacher Education
B.A. Sarah Lawrence College; M.Ed. University of Arizona; Ph.D. University
of Arizona

Ilene Goldberg

Professor Emerita, Department of Marketing, Sport Management and
Legal Studies
B.A. The Pennsylvania State University; J.D. Temple University James E.
Beasley School of Law

Marvin Goldstein

Professor Emeritus, Department of Psychology
B.A. Hofstra University; M.A. Hofstra University; Ph.D. New School for
Social Research

Robert Good

Professor Emeritus, Department of History and Philosophy
A.B. Princeton University; M.A. University of Wisconsin–Madison; Ph.D.
University of Wisconsin–Madison

Joseph Gowaskie

Professor Emeritus, Department of History and Philosophy
B.A. St. Norbert College; M.A. Catholic University of America; Ph.D.
Catholic University of America

Jean Gray

Professor Emerita, Department of Finance and Economics
B.A. Michigan State University; M.A. University of California at Berkeley;
Ph.D. University of California at Berkeley

James Guimond

Professor Emeritus, Department of English
B.A. Kalamazoo College; M.A. Ohio Wesleyan University; Ph.D. University
of Illinois

William Guthrie

Professor Emeritus, Department of Teacher Education
B.S. Trenton State College; M.A. Trenton State College; Ph.D. New York
University

Myra G. Gutin

Professor Emerita, Department of Communication and Journalism
B.A. Emerson College; M.A. Emerson College; Ph.D. University of
Michigan

Mary Jo Hall

Professor Emeritus, Department of Geological, Environmental, and Marine
Sciences
B.S. Pennsylvania State University; M.Ed. West Chester State College;
Ph.D. Lehigh University

Henry Halpern

Professor-Librarian Emeritus, University Libraries
B.A. City College of New York; M.A. New York University; M.L.S. Pratt
Institute

Belmont Haydel

Professor Emeritus, Department of Marketing
B.S. Loyola University of Chicago; B.A. American Institute for Foreign
Trade; M.S. Louisiana State University; Ph.D. North Texas State University

Sigfredo Hernandez

Professor Emeritus, Department of Marketing
B.A. University of Puerto Rico; M.A. Boston University; Ph.D. Temple
University

Jane Hettrick

Professor Emeritus, Department of Fine Arts
B.A. Queens College; M.M. University of Michigan; D.M.A. University of Michigan

John Hillje

Professor Emeritus, Department of History and Philosophy
B.J. University of Texas; M.A. University of Texas; Ph.D. University of Texas

Katharine Hoff

Professor Emerita, Department of English
A.B. Oberlin College; M.A. Yale University; Ph.D. Yale University

Kathryn Holden

Professor-Librarian Emeritus, University Libraries
B.A. William Smith College; M.A. Pennsylvania State University; M.S.L.S. University of Kentucky

Richard Homan

Professor Emeritus, Department of Fine Arts
B.A. University of Notre Dame; M.A. University of Minnesota; Ph.D. University of Minnesota

John Hulsman

Professor Emeritus, Department of English
B.A. St. Vincent College; Ph.D. Ohio University

Jonathan M. Husch

Professor Emeritus, Department of Geological, Environmental, and Marine Sciences
B.A. Colgate University; M.A. Princeton University; Ph.D. Princeton University

Judith Johnston

Professor Emerita, Department of English
B.A. Rice University; Ph.D. Stanford University

Mildred Rice Jordan

Professor Emerita, Department of Teacher Education
B.S. Temple University; M.A. Beaver College; Ed.D. Temple University

Joe H. Kim

Professor Emeritus, Department of Marketing
B.A. Soongsil University; MBA Yonsei University; Ph.D. Saint Louis University

Gerald Klein

Professor Emeritus, Department of Management
B.S. Drexel University; M.B.A. Harvard Graduate School of Business; Ph.D. Case Western Reserve University

Michael Kole

Professor Emeritus, Department of Accounting
B.M.E. Rensselaer Polytechnic Institute; Ph.D. University of Massachusetts

Harvey R. Kornberg

Professor Emeritus, Department of Political Science
B.B.A. The City College of New York; M.A. Brown University; Ph.D. Brown University

Mary Leck

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences

Christine Lentz

Professor Emerita, Department of Management
B.A. Drexel University; M.S. Northwestern University; Ph.D. Northwestern University

Patricia Leonard

Professor Emerita, Department of Teacher Education
B.S. Eastern Michigan University; M.A. Central Michigan University; Ed.S. Michigan State University; Ph.D. University of Tennessee

Marilyn Levitt

Professor Emerita, Department of Fine Arts
A.B. Syracuse University; M.A. Syracuse University

Karl Mann

Professor Emeritus, Department of Information Systems, Analytics, and Supply Chain Management
B.S. American University; M.A. University of Wisconsin; Ph.D.

Linda Materna

Professor Emerita, Department of Languages, Literatures and Cultures
B.A. Beloit College; M.A. University of Wisconsin-Madison; Ph.D. University of Wisconsin-Madison

Thomas Mayer

Professor Emeritus, Department of Biology, Behavioral Neuroscience, and Health Sciences
B.A. University of Tennessee; M.A. Johns Hopkins University; Ph.D. Louisiana State University

Katherine K. Maynard

Professor Emerita, Department of English
B.S. The College at Brockport: State University of New York; Ph.D. University of Rochester

Charles W. McCall

Professor Emeritus, Department of Finance and Economics
B.A. Lycoming College; M.A. Temple University; Ph.D. Temple University

William McCarroll

Professor Emeritus, Department of Chemistry and Biochemistry
B.A. University of Connecticut; M.S. University of Connecticut; Ph.D. University of Connecticut

Roderick A. McDonald

Professor Emeritus, Department of History and Philosophy
M.A. University of Aberdeen; M.A. The University of Kansas; Ph.D. The University of Kansas

E. Graham McKinley

Professor Emeritus, Department of Communication and Journalism
B.A. Yale University; M.M. Westminster Choir College, Rider University; Ph.D. Rutgers, The State University of New Jersey

Alan McLeod

Professor Emeritus, Department of English
B.A. University of Sydney; M.A. University of Sydney; Dip.Ed. University of Sydney; B.Ed. University of Melbourne; Ph.D. Pennsylvania State University

Ilhan Meric

Professor Emeritus, Department of Finance and Economics
B.A. Ankara University; M.S. Lehigh University; Ph.D. Lehigh University

Bernard Miller

Professor Emeritus, Department of Teacher Education
B.S. Newark State College; M.A. New York University; Ed.D. Yeshiva University

Regina Mladineo Williams

Professor Emerita, Department of Management
B.S. Denison University; Ph.D. Rutgers University

Mary Morse

Professor Emerita, Department of English
B.A. St. Olaf College; M.A. University of Minnesota; Ph.D. Marquette University

John Moussourakis

Professor Emeritus, Department of Management
B.A. New York University; M.B.A. Iona College; Ph.D. New York University

Harry I. Naar

Professor Emeritus, Department of Fine Arts
B.F.A. The University of the Arts; M.F.A. Indiana University Bloomington

Jane Nowakowski

Professor-Librarian Emerita, University Libraries
B.M. Westminster Choir College; M.L.S. Rutgers, The State University of New Jersey

Chau Phan

Professor Emeritus, Department of Political Science
B.A. Marian College; M.A. University of Detroit; Ph.D. University of Denver

David Pierfy

Professor Emeritus, Department of Teacher Education
B.A. Rider University; M.A. George Peabody College at Vanderbilt University; Ed.S. George Peabody College at Vanderbilt University; Ed.D. University of Georgia

Marilyn Quinn

Professor-Librarian Emerita, University Libraries
B.A. Clark University; M.A. Brown University; M.L.S. Drexel University

Maury R. Randall

Professor Emeritus, Department of Finance and Economics
A.B. New York University; M.A. University of Chicago; Ph.D. New York University

Jerry Rife

Professor Emeritus, Department of Fine Arts
B.S. Kansas State University; M.M. Kansas State University; Ph.D. Michigan State University

George Ritchie

Professor Emeritus, Department of Computer Science and Physics
B.S. Hampden-Sydney College; Ph.D. University of Pennsylvania

Deborah Rosenthal

Professor Emerita, Department of Fine Arts
A.B. Barnard College; M.F.A. Pratt Institute

Thomas Ruble

Professor Emeritus, Department of Management
B.S. University of California at Los Angeles; M.B.A. University of California at Los Angeles; Ph.D. University of California at Los Angeles

Arthur Russomano

Professor Emeritus, Department of Teacher Education
B.A. Kean University; M.A. Seton Hall University; Ed.D. Rutgers University

Anne T. Salvatore

Professor Emerita, Department of English
A.B. Chestnut Hill College; M.A. The College of New Jersey; Ph.D. Temple University

Mark Sandberg

Professor Emeritus, Department of Management
B.S. Drexel University; M.B.A. Drexel University; Ph.D. Cornell University

Margaret R. Schleissner

Professor Emerita, Department of Languages, Literatures and Cultures
B.A. Kirkland College; M.A. Princeton University; Ph.D. Princeton University

Charles F. Schwartz

Professor Emeritus, Department of Mathematics
A.B. University of Pennsylvania; Ph.D. Rutgers, the State University of New Jersey

Harriett Schwartz

Professor Emerita, Department of Communication and Journalism
B.A. University of Maryland; M.S. Purdue University; ; ; ;

Barry Seldes

Professor Emeritus, Department of Political Science
B.A. City College of New York; M.A. City College of New York; Ph.D. Rutgers University

Prakash Sharma

Professor Emeritus, Department of Sociology and Criminology
B.S. Agra University; M.S. Agra University; M.S. University of Guelph; Ph.D. University of Georgia

John Sheats

Professor Emeritus, Department of Chemistry and Biochemistry
B.S. Duke University; Ph.D. Massachusetts Institute of Technology

Thomas Simonet

Professor Emeritus, Department of Communication and Journalism
B.A. Georgetown University; M.S. Columbia University; Ph.D. Temple University

Ruth Simpkins

Professor Emerita, Department of Psychology
A.B. Roberts Wesleyan College; A.M. Temple University; Ph.D. Temple University

Wayne Smeltz

Professor Emeritus, Department of Management
B.B.A. College of Insurance; M.B.A. University of Houston; Ph.D. University of Houston

Sandra Stein

Professor Emerita, Department of Teacher Education
B.S. University of Wisconsin; M.S. Northern Illinois University; Ed.D. Northern Illinois University

Marcia Steinberg

Professor Emerita, Department of Sociology and Criminology
B.A. Hunter College; M.A. Columbia University; Ph.D. City University of New York

John R. Suler

Professor Emeritus, Department of Psychology
B.A. State University of New York at Stony Brook; Ph.D. State University of New York at Buffalo

Alan R. Sumutka

Professor Emeritus, Department of Accounting
B.S. Rider University; MBA Seton Hall University

Richard Swain

Professor Emeritus, Department of Fine Arts
B.A. Oberlin College; Ph.D. University of Michigan

Frederick Turner

Professor Emeritus, Department of Communication and Journalism
B.S. Millersville State College; M.A. Temple University; Ph.D. Temple University

Lise Vogel

Professor Emerita, Department of Sociology and Criminology
A.B. Radcliffe College; A.M. Harvard University; M.A. Brandeis University; Ph.D. Brandeis University

James Volpi

Professor Emeritus, Department of Accounting
B.S. Drexel University; M.B.A. Drexel University; C.P.A. New Jersey, Pennsylvania

Minmin Wang

Professor Emerita, Department of Communication and Journalism
B.A. Xian Foreign Languages University; M.A. Bowling Green State University; Ph.D. Bowling Green State University

Jean Warner

Professor Emerita, Department of Teacher Education
B.S. Rider University; M.A. Rider University; Ph.D. New York University

Carol Watson

Professor Emerita, Department of Management
B.A. University of Akron; M.A. Stanford University; Ph.D. Columbia University

Samuel Weigh

Professor-Librarian Emeritus, University Libraries
B.A. Hong Kong Baptist College; M.S. Columbia University; M.A. Rider University

Nancy Westberg

Professor Emerita, Department of Teacher Education
B.A. Holy Family College; M.S. Chestnut Hill College; Ph.D. Indiana State University

Alan Wiman

Professor Emeritus, Department of Marketing
B.S. Virginia Polytechnic Institute and State University; M.B.A. University of Tennessee; D.B.A. University of Tennessee

Donald Wygal

Professor Emeritus, Department of Accounting
B.A. Slippery Rock State College; M.B.A. University of Pittsburgh; Ph.D. University of Pittsburgh

Graduate Faculty

C. Emmanuel Ahia

Professor, Department of Graduate Education, Leadership, and Counseling
B.A. Wheaton College; M.A. Wheaton College Graduate School; Ph.D. Southern Illinois University; J.D. University of Arkansas

Juleen K. Buser

Professor, Department of Graduate Education, Leadership, and Counseling
B.A. Franklin & Marshall College; M.Div. Princeton Theological Seminary; M.A. Wake Forest University; Ph.D. Syracuse University

Yi-Ju Cheng

Assistant Professor, Department of Graduate Education, Leadership, and Counseling
B.S. Tunghai University; M.Ed. University of North Texas; Ph.D. University of North Texas

Aubrey Daniels

Assistant Professor, Department of Graduate Education, Leadership, and Counseling
B.A. Seton Hall University; M.S.Ed. University of Pennsylvania; M.Phil.Ed. University of Pennsylvania; Ph.D. The Pennsylvania State University

Stefan C. Dombrowski

Professor, Department of Graduate Education, Leadership, and Counseling
B.B.A. The College of William & Mary; MBA University of Connecticut; M.Ed. The University of Georgia; Ph.D. The University of Georgia

Andrea Drewes

Assistant Professor, Department of Graduate Education, Leadership, and Counseling
B.A. University of Delaware; M.Ed. Salisbury University; M.A. University of Delaware; Ph.D. University of Delaware

Karen L. Gisclar

Professor, Department of Graduate Education, Leadership, and Counseling
B.S. The College of New Jersey; M.A. The College of New Jersey; Ed.S. Rider University; Ph.D. Lehigh University

Leonard R. Goduto, Jr.

Associate Professor, Department of Graduate Education, Leadership, and Counseling
B.A. Ramapo College of New Jersey; M.Ed. Rutgers, The State University of New Jersey; Ed.D. Columbia University

Bonnie Lehet

Assistant Professor, Department of Graduate Education, Leadership, and Counseling
B.A. Rutgers University; M.A. Columbia University; Ed.D. Columbia University

Terry L. Pertuit

Associate Professor, Department of Graduate Education, Leadership, and Counseling
B.M.Ed. Southeastern Louisiana University; M.Ed. Southeastern Louisiana University; Ph.D. The Pennsylvania State University

Christina Hamme Peterson

Professor, Department of Graduate Education, Leadership, and Counseling

B.A. Vassar College; Psy.D. Rutgers, The State University of New Jersey

Kathleen M. Pierce

Professor, Department of Graduate Education, Leadership, and Counseling

B.A. Rowan University; M.Ed. Rutgers, The State University of New Jersey; Ph.D. University of Pennsylvania

Lori Prol

Assistant Professor, Department of Graduate Education, Leadership, and Counseling

B.S. Pace University; M.S. Rutgers University; Ph.D. Capella University

Judith Stegmaier-Nappi

Associate Professor, Department of Graduate Education, Leadership, and Counseling

B.A. Montclair State University; M.A. Montclair State University; Ed.D. Fordham University

Jaisy Varges

Lecturer, Department of Graduate Education, Leadership, and Counseling

Donald Ambrose

Professor Emeritus, Department of Graduate Education, Leadership, and Counseling

B.A. University of Saskatchewan; B.Ed. University of Saskatchewan; M.Ed. University of Oregon; Ph.D. University of Oregon

Marcia Steinhauer

Professor Emerita, Department of Graduate Education, Leadership, and Counseling

B.A. University of Florida; M.A. University of Florida; Ph.D. University of Florida
